Contents

1 Introduction 1
1.1 A Historical Perspective 1
1.2 Problem Setting 2
1.3 Some Examples 4
1.3.1 Simple Three-Dimensional Examples 4
1.3.2 Five-Dimensional Examples 5
1.3.3 Eight-Dimensional Examples 6

2 Special Cases 7
2.1 Bivariate and Trivariate Probabilities 7
2.1.1 Bivariate Probabilities 7
2.1.2 Trivariate Probabilities 10
2.2 Special Integration Regions 11
2.2.1 Orthants 11
2.2.2 Ellipsoids 13
2.2.3 Hyperboloids 15
2.3 Special Correlation Structures 16
2.3.1 Diagonal and Reduced Rank Correlation Matrices 16
2.3.2 Banded Correlation Matrices 18

3 Methods That Approximate the Problem 21
3.1 Boole's Formula Approximations and Bounds 21
3.2 Correlation Matrix Approximations 24
3.3 Other Approximations 25
3.4 Asymptotic Expansions 26

4 Methods That Approximate the Integral 29
4.1 Reparameterizations 29
4.1.1 Spherical-Radial Transformation Methods 29
4.1.2 Separation-of-Variables Methods 31
4.1.3 Variable Reordering 36

4.1.4 Tridiagonal Decomposition Methods . . . 39
4.2 Integration Methods . . . 41
4.2.1 Monte Carlo Methods . . . 41
4.2.2 Quasi-Monte Carlo Methods . . . 45
4.2.3 Polynomial Integration Methods . . . 50
4.2.4 Subregion Adaptive Methods . . . 51
4.2.5 Sparse-Grid Methods . . . 52
4.2.6 Other Numerical Integration Methods . . . 53

5 Further Topics . . . 55
5.1 Linear Inequality Constraints . . . 55
5.2 Singular Distributions . . . 56
5.3 Related Integrals . . . 59
5.3.1 $\mathbf{A} = \mathbb{R}^k$ . . . 59
5.3.2 $\mathbf{A} = [\mathbf{a}, \mathbf{b}]$ . . . 60
5.4 Numerical Tests . . . 60
5.5 Software Implementations . . . 61
5.5.1 R . . . 62
5.5.2 MATLAB . . . 64
5.6 Miscellaneous and Further References . . . 68

6 Applications . . . 71
6.1 Multiple Comparison Procedures . . . 71
6.1.1 Multiple Testing in Linear Models . . . 71
6.1.2 Numerical Computation of Critical Values . . . 75
6.2 Bayesian Statistics and Finance Applications . . . 79
6.2.1 The Standardizing Transformation . . . 81
6.2.2 The Multivariate Normal Transformation . . . 82
6.2.3 The Multivariate t Transformation . . . 82
6.2.4 The Split-t Transformations . . . 84
6.2.5 Some Examples . . . 85

A Description of the R Functions . . . 91

B Description of the MATLAB Functions . . . 101

References . . . 105

Index . . . 123
