Introduction	1
Application Example 1: Lateral Resolution of in-Lens SE and High-Angle BSE Imaging at Low Accelerating Voltages, Below 2.0 kV	3
Application Example 2: Z-Contrast Sensitivity in Low-Voltage, High-Angle BSE Imaging	7
Application Example 3: Information Depth in Low-Voltage, High-Angle BSE Imaging	11
Application Example 4: Nano Inclusions in Co-Hardened Gold Plating for Electronic Applications – Further Evidence for High Lateral Resolution in Low-Voltage, High-Angle BSE Imaging	13
Application Example 5: A Thin Layer of Organic Contaminant on the Surface of Mirror-Polished Al-Based Hard Disks	17
Application Example 6: A Further Potential of Ultralow-Voltage In-lens SE Imaging	21
Application Example 7: Sample Surface Preparation by Ultramicrotomy Using a Diamond Knife for Cross-Sectional Examination of Various Coatings on Metals	23
Application Example 8: Cross-Sectional Examination of a Galvanized Steel	25
Application Example 9: Cross-Sectional Examination of a Painted Steel	29

Application Example 10: Cross-Sectional Examination of Solder Joint of the Printed Circuit Board..... 31

Application Example 11: Cross-Sectional Examination of a Tin-Plated Copper Sheet for Electronic Application 33

Application Example 12: Cross-Sectional Examination of an Anodized Aluminum Alloy for Aerospace Application 37

Application Example 13: Cross-Sectional Examination of a Porous Anodic Oxide Film Grown on a Heterogeneous Al-Fe Alloy 39

Application Example 14: Corrosion of an Al 2024-T3 Alloy for Aerospace Application 41

Application Example 15: Cross-Sectional Examination of an Etched Al Foil for Capacitor Application 45

Application Example 16: On the Nature of rf-GD Sputtering .. 49

Application Example 17: On the Surface Damages Associated with rf-GD Sputtering..... 53

Application Example 18: Precipitates in a Stainless Steel 57

Application Example 19: Ferrite Precipitates in a Low-Carbon Stainless Steel 61

Application Example 20: A Novel Use of rf-GD Sputtered Surfaces for Oxidation Study of Iron, Nickel, and Copper..... 65

 1 Oxidation of Iron..... 65

 2 Oxidation of Nickel and Copper 70

Application Example 21: Preparation of “Highly Flat and Damage-Free” Surfaces for High-Resolution Channeling BSE Imaging 79

Application Example 22: Oxidation of Sputtered Metal Surface in Air – The Main Cause of Surface Alternation 91

Application Example 23: Microstructure of a Ti Alloy 97

Application Example 24: Microstructure of a Ni-Based Super Alloy for Aerospace Applications 99

Application Example 25: Cracks in a Nitrogen-Doped Stainless Steel 101

Application Example 26: Sample Surface Preparation Using rf-GD Sputtering for Cross-Sectional Examination 105

Application Example 27: Cross-Sectional Examination of a Galvanized Steel for Car Bodies 109

Application Example 28: Cross-Sectional Examination of a Flash Memory Device 115

Application Example 29: Cross-Sectional Examination of a Multilayered Glass 123

Application Example 30: Cross-Sectional Examination of a Copper Sheet for Electronic Application 125

Application Example 31: Cross-Sectional Examination of a Nitrided Carbon Steel 127

Application Example 32: Cross-Sectional Examination of Deformed Surface Regions of Carbon Steel after Shot Peening 131

Application Example 33: Cross-Sectional Examination of a Thermal-Sprayed WC-18% Co Coating on a Titanium Alloy 135

Application Example 34: Cross-Sectional Examination of a Thermal Barrier Coating on the Ni-based Super Alloy for Aerospace Applications 141

Application Example 35: Is EDX Elemental Mapping Really Necessary? 145

Application Example 36: Titanium Carbide Precipitates in a Duplex Stainless Steel 153

Application Example 37: Adhesion Between the Hard Chromium Coating and Copper Substrate 157

Application Example 38: On the Possibility of the Use of rf-GD Sputtering for Follow-Up Treatment of Thin Slices for TEM Examination 161
