

# Contents

<b>Foreword</b>	<b>ix</b>
<b>Preface</b>	<b>xi</b>
<b>Preface to first edition</b>	<b>xiii</b>
<b>1 Introduction to forensic genetics</b>	<b>1</b>
Forensic genetics	1
A brief history of forensic genetics	2
References	6
<b>2 DNA structure and the genome</b>	<b>11</b>
DNA structure	11
Organization of DNA into chromosomes	11
The structure of the human genome	13
Genetic diversity of modern humans	15
The genome and forensic genetics	16
Tandem repeats	16
Single nucleotide polymorphisms	18
References	19
<b>3 Biological material – collection, characterization and storage</b>	<b>21</b>
Sources of biological evidence	21
Collection and handling of material at the crime scene	23
Identification and characterization of biological evidence	23
Evidence collection	29
Sexual and physical assault	31
Storage of biological material	32
References	32
<b>4 DNA extraction and quantification</b>	<b>37</b>
DNA extraction	37
General principles of DNA extraction	37
DNA extraction from challenging samples	41
Quantification of DNA	45
DNA IQ system	48
References	49

<b>5</b>	<b>Polymerase chain reaction</b>	<b>53</b>
	The evolution of PCR-based profiling in forensic genetics	53
	DNA replication: the basis of the PCR	54
	The components of PCR	54
	<i>Taq</i> DNA polymerase	54
	The PCR process	56
	PCR inhibition	58
	Sensitivity and contamination	60
	The PCR laboratory	60
	Further reading	62
	References	62
<b>6</b>	<b>The analysis of short tandem repeats</b>	<b>67</b>
	Structure of STR loci	67
	The development of STR multiplexes	67
	Detection of STR polymorphisms	70
	Interpretation of STR profiles	72
	Further reading	77
	References	77
<b>7</b>	<b>Assessment of STR profiles</b>	<b>81</b>
	Stutter peaks	81
	Split peaks ( $\pm N$ )	81
	Pull-up	83
	Template DNA	84
	Overloaded profiles	84
	Low template DNA typing	84
	Peak balance	86
	Mixtures	86
	Degraded DNA	88
	PCR inhibition	90
	References	91
<b>8</b>	<b>Statistical interpretation of STR profiles</b>	<b>95</b>
	Population genetics	95
	Deviation from the Hardy–Weinberg equilibrium	96
	Statistical tests to determine deviation from the Hardy–Weinberg equilibrium	97
	Estimating the frequencies of STR profiles	98
	Corrections to allele frequency databases	98
	Which population frequency database should be used?	103
	Conclusions	104
	Further reading	104
	References	104

<b>9</b>	<b>Evaluation and presentation of DNA evidence</b>	<b>107</b>
	Hierarchies of propositions	107
	Likelihood ratios	109
	Two fallacies	113
	Comparison of three approaches	114
	Further reading	115
	References	115
<b>10</b>	<b>Databases of DNA profiles</b>	<b>117</b>
	The UK National DNA Database	117
	International situation	124
	Further reading	128
	References	128
<b>11</b>	<b>Kinship testing</b>	<b>131</b>
	Parentage testing	131
	Punnett square	132
	Identification of human remains	139
	Further reading	140
	References	140
<b>12</b>	<b>Single nucleotide polymorphisms</b>	<b>145</b>
	SNPs – occurrence and structure	145
	Detection of SNPs	146
	SNP detection for forensic applications	148
	Forensic applications of SNPs	149
	SNPs compared with STR loci	150
	References	152
<b>13</b>	<b>Lineage markers</b>	<b>155</b>
	Mitochondria	155
	Applications of mtDNA profiling	157
	Haplotypes and haplogroups	159
	The Y chromosome	161
	Forensic applications of Y chromosome polymorphisms	162
	Further reading	165
	References	165
<b>14</b>	<b>Non-human DNA typing</b>	<b>171</b>
	Non-human sample types	171
	Species identification	173
	Linkage to an individual using STR loci	174
	Linkage to an individual using mitochondrial loci	175
	Microbial DNA testing	176

Concluding comments	176
Further reading	176
References	176
<b>Appendix A Forensic parameters</b>	<b>181</b>
<b>Appendix B Useful web links</b>	<b>183</b>
<b>Glossary</b>	<b>185</b>
<b>Abbreviations</b>	<b>189</b>
<b>Index</b>	<b>193</b>
