## Part I Normal Cardiac Rhythm and Pacemaker Activity

<b>1 Cardiac Ion Channels and Heart Rate and Rhythm</b> .....	3
Onkar Nath Tripathi	
<b>2 Ionic Basis of the Pacemaker Activity of SA Node Revealed by the Lead Potential Analysis</b> .....	33
Yukiko Himeno, Chae Young Cha, and Akinori Noma	
<b>3 The “Funny” Pacemaker Current</b> .....	59
Andrea Barbuti, Annalisa Bucchi, Raffaella Milanesi, Georgia Bottelli, Alessia Crespi, and Dario DiFrancesco	
<b>4 Novel Perspectives on Cardiac Pacemaker Regulation: Role of the Coupled Function of Sarcolemmal and Intracellular Proteins</b> .....	83
Victor A. Maltsev, Tatiana M. Vinogradova, and Edward G. Lakatta	
<b>5 Pacemaker Activity of the SA Node: Insights from Dynamic-Clamp Experiments</b> .....	101
Ronald Wilders, Antoni C.G. van Ginneken, and Arie O. Verkerk	
<b>6 Heart Rate Variability: Molecular Mechanisms and Clinical Implications</b> .....	119
Kishore K. Deepak	
<b>7 Mechano-Electric Feedback in the Heart: Effects on Heart Rate and Rhythm</b> .....	133
T. Alexander Quinn, Rebecca A. Bayliss, and Peter Kohl	

**Part II Modeling**

- 8 A Historical Perspective on the Development of Models of Rhythm in the Heart** ..... 155  
Penelope J. Noble and Denis Noble
- 9 Simulation of Cardiac Action Potentials** ..... 175  
Jonathan D. Moreno and Colleen E. Clancy

**Part III Cardiac Development and Anatomy**

- 10 Development of Pacemaker Activity in Embryonic and Embryonic Stem Cell-Derived Cardiomyocytes** ..... 197  
Huamin Liang, Michael Reppel, Ming Tang, and Jürgen Hescheler
- 11 Molecular Basis of the Electrical Activity of the Atrioventricular Junction and Purkinje Fibres** ..... 211  
Halina Dobrzynski, Oliver Monfredi, Ian D. Greener, Andrew Atkinson, Shin Inada, Mary-Anne Taube, Joseph Gianni, Olga Fedorenko, Peter Molenaar, Robert H. Anderson, Igor R. Efimov, and Mark R. Boyett
- 12 Molecular Basis and Genetic Aspects of the Development of the Cardiac Chambers and Conduction System: Relevance to Heart Rhythm** ..... 231  
Martijn L. Bakker, Vincent M. Christoffels, and Antoon F.M. Moorman
- 13 Role of the T-Tubules in the Response of Cardiac Ventricular Myocytes to Inotropic Interventions** ..... 255  
C.H. Orchard, F. Brette, A. Chase, and M.R. Fowler

**Part IV Mechanisms of Acquired Arrhythmia**

- 14 An Overview of Spiral- and Scroll-Wave Dynamics in Mathematical Models for Cardiac Tissue** ..... 269  
Rupamanjari Majumder, Alok Ranjan Nayak, and Rahul Pandit
- 15 Post-infarction Remodeling and Arrhythmogenesis: Molecular, Ionic, and Electrophysiological Substrates** ..... 283  
Nabil El-Sherif

<b>16</b>	<b>The Role of Intracellular <math>\text{Ca}^{2+}</math> in Arrhythmias in the Postmyocardial Infarction Heart</b> .....	305
	Wen Dun, Henk ter Keurs, and Penelope A. Boyden	
<b>17</b>	<b>Molecular and Biochemical Characteristics of the Intracellular <math>\text{Ca}^{2+}</math> Handling Proteins in the Heart</b> .....	323
	Yasser Abdellatif, Vijayan Elimban, Delfin Rodriguez-Leyva, and Naranjan S. Dhalla	
<b>18</b>	<b>Pharmacological Modulation and Clinical Implications of Sarcolemmal <math>\text{Ca}^{2+}</math>-Handling Proteins in Heart Function</b> .....	337
	Yasser Abdellatif, Adriana Adameova, and Naranjan S. Dhalla	
<b>19</b>	<b>Calmodulin Kinase II Regulation of Heart Rhythm and Disease</b> ...	351
	Thomas J. Hund	
<b>20</b>	<b>MicroRNA and Pluripotent Stem Cell-Based Heart Therapies: The Electrophysiological Perspective</b> .....	365
	Ellen Poon, Deborah K. Lieu, and Ronald A. Li	
<b>Part V Mechanisms of Inherited Arrhythmia</b>		
<b>21</b>	<b>Intracellular Calcium Handling and Inherited Arrhythmogenic Diseases</b> .....	387
	Nicola Monteforte, Carlo Napolitano, Raffaella Bloise, and Silvia G. Priori	
<b>22</b>	<b>Molecular Mechanisms of Voltage-Gated <math>\text{Na}^+</math> Channel Dysfunction in LQT3 Syndrome</b> .....	409
	Thomas Zimmer and Klaus Benndorf	
<b>23</b>	<b>The Short QT Syndrome</b> .....	431
	Jules C. Hancox, Mark J. McPate, Aziza El Harchi, Rona S. Duncan, Chris E. Dempsey, Harry J. Witchel, Ismail Adeniran, and Henggui Zhang	
<b>24</b>	<b>Adrenergic Regulation and Heritable Arrhythmias: Key Roles of the Slowly Activating Heart <math>I_{\text{Ks}}</math> Potassium Channel</b> .....	451
	David Y. Chung, Kevin J. Sampson, and Robert S. Kass	

<b>25</b>	<b>Defects in Ankyrin-Based Protein Targeting Pathways in Human Arrhythmia</b> .....	461
	Hjalti Gudmundsson, Francis Jareczek, and Peter J. Mohler	
<b>26</b>	<b>Genetically Modified Mice: Useful Models to Study Cause and Effect of Cardiac Arrhythmias?</b> .....	473
	Gregor Sachse, Martin Kruse, and Olaf Pongs	
<b>27</b>	<b>Genetics of Atrial Fibrillation</b> .....	485
	Saagar Mahida, Michiel Rienstra, Moritz F. Sinner, Steven A. Lubitz, Patrick T. Ellinor, and Stefan Kääh	
<b>Part VI Role of Specific Channels and Transporters in Arrhythmia</b>		
<b>28</b>	<b>The Role of Gap Junctions in Impulse Propagation in the Heart: New Aspects of Arrhythmogenesis and New Antiarrhythmic Agents Targeting Gap Junctions</b> .....	503
	Stefan Dhein, Joanna Jozwiak, Anja Hagen, Thomas Seidel, Anna Dietze, Aida Salameh, Martin Kostelka, and Friedrich Wilhelm Mohr	
<b>29</b>	<b>Possible Mechanisms of the Acute Ischemia-Induced Ventricular Arrhythmias: The Involvement of Gap Junctions</b> .....	525
	Ágnes Végh and Rita Papp	
<b>30</b>	<b>Role of NCX1 and NHE1 in Ventricular Arrhythmia</b> .....	543
	András Tóth and András Varró	
<b>31</b>	<b>TRP Channels in Cardiac Arrhythmia: Their Role During Purinergic Activation Induced by Ischemia</b> .....	563
	Guy Vassort and Julio Alvarez	
<b>32</b>	<b>Cardiac Aquaporins: Significance in Health and Disease</b> .....	581
	Tanya L. Butler and David S. Winlaw	
<b>Part VII Drugs and Cardiac Arrhythmia</b>		
<b>33</b>	<b>Ion Channels as New Drug Targets in Atrial Fibrillation</b> .....	599
	Ursula Ravens	
<b>34</b>	<b>hERG1 Channel Blockers and Cardiac Arrhythmia</b> .....	611
	Michael C. Sanguinetti and Matthew Perry	

<b>35</b>	<b>Preclinical Drug Safety and Cardiac Ion Channel Screening</b> .....	<b>627</b>
	Zhi Su and Gary Gintant	
<b>36</b>	<b>QT Prolongation Is a Poor Predictor of Proarrhythmia Liability: Beyond QT Prolongation!</b> .....	<b>639</b>
	Luc M. Hondeghem	
<b>37</b>	<b>K Channel Openers as New Anti-arrhythmic Agents</b> .....	<b>655</b>
	Nathalie Strutz-Seebohm and Guiscard Seebohm	
<b>Index</b>	.....	<b>669</b>
