<b>Abstract</b>	vii
<b>Zusammenfassung</b>	ix
<b>1 Introduction</b>	<b>1</b>
<b>2 Mercury in the Environment</b>	<b>5</b>
2.1 Physical and Chemical Properties .....	7
2.1.1 Elemental Mercury .....	8
2.1.2 $\text{Hg}_2^{2+}$ (Hg(I)) Compounds .....	9
2.1.3 $\text{Hg}^{2+}$ Hg(II) Compounds .....	9
2.2 Toxicology of Mercury .....	10
2.2.1 Elemental Mercury .....	10
2.2.2 Inorganic Mercury Compounds .....	11
2.2.3 Organic Mercury Compounds .....	11
2.3 History, Occurrence, and Extraction of Mercury .....	12
2.4 Anthropogenic and Natural Mercury Sources .....	14
2.4.1 Anthropogenic Mercury Sources .....	15
2.4.2 Natural Mercury Sources .....	16
2.5 Global Mercury Cycle .....	19
2.6 Atmospheric Mercury and Transformation Processes .....	21
2.6.1 Reactions in the Gas Phase .....	24
2.6.2 Reactions in the Aqueous Phase .....	25
2.7 Definition of the most important Hg Fractions .....	26
2.8 Sampling and Analytical Methods .....	27
2.8.1 TGM Measurements .....	28
2.8.2 RGM Measurements .....	29
2.8.3 TPM Measurements .....	30
2.8.4 Mercury in Precipitation .....	31
2.9 Worldwide Atmospheric Mercury Measurements .....	33
2.9.1 Monitoring Networks in Europe .....	35
2.9.2 Monitoring Networks in Northern America .....	37
2.9.3 Measurements in the Southern Hemisphere .....	39
<b>3 Development of the Experimental Set-Up</b>	<b>43</b>
3.1 Materials and Chemicals .....	44
3.1.1 Sampling Equipment .....	44
3.1.2 Chemicals, Reagents, and Standards .....	44
3.2 Energy Supply at the Sampling Sites .....	46
3.3 Analyzers for the Atmospheric Mercury Measurements .....	46

3.3.1	GARDIS-3 .....	46
3.3.2	AMA-254 for Solid Samples .....	49
3.3.3	AMA-254 Module for Analyzing Gaseous Mercury .....	50
3.4	TGM Measurements .....	55
3.4.1	Sampling Set-Up in the Field .....	55
3.5	RGM Measurements .....	55
3.5.1	General Information about the Mist Chamber .....	56
3.5.2	Scrubber Solution .....	58
3.5.3	Sample Containers .....	58
3.5.4	Sampling Protocol .....	58
3.5.5	Field Sampling Blank .....	59
3.5.6	Analysis of RGM .....	59
3.6	TPM Measurements .....	60
3.6.1	Particulate Trap .....	60
3.6.2	Pre-Treatment of the Traps .....	61
3.6.3	Sampling Procedure .....	61
3.6.4	Dynamic and passive Blanks .....	62
3.6.5	Analysis of TPM .....	62
3.7	Mercury Sampling in Precipitation .....	64
3.7.1	Sampler Design and Materials .....	64
3.7.2	Pre-Treatment of the Samplers .....	65
3.7.3	Sampling Procedure .....	65
3.7.4	Quality Control – Quality Assurance .....	65
3.7.5	Sample Storage and Handling .....	66
3.7.6	Analysis of Mercury in Precipitation .....	66
3.8	Mercury Analyses in Seasonal Snow .....	68
3.8.1	Sampling Procedure, Transportation and Storage .....	68
3.8.2	Analysis of Snow Samples .....	69
<b>4</b>	<b>Concentration and Speciation of Atmospheric Mercury</b>	<b>71</b>
4.1	Sampling Sites .....	71
4.1.1	Patagonia, Chile .....	71
4.1.2	Galicia, Spain .....	75
4.1.3	Lake Gossenkölle, Kühtai, Austria .....	76
4.2	Results .....	78
4.2.1	Total Gaseous Mercury in Patagonia, Chile .....	78
4.2.2	Reactive Gaseous Mercury in Patagonia, Chile .....	81
4.2.3	Total Particulate Mercury in Patagonia, Chile .....	82
4.2.4	Mercury in Precipitation in Patagonia, Chile .....	83
4.2.5	Total Gaseous Mercury in Galicia, Spain .....	85

4.2.6	Reactive Gaseous Mercury in Galicia, Spain .....	85
4.2.7	Total Particulate Mercury in Galicia, Spain.....	86
4.2.8	Mercury in Precipitation in Galicia, Spain.....	87
4.2.9	Total Gaseous Mercury at Lake Gossenkölle, Austria.....	88
4.2.10	Reactive Gaseous Mercury at Lake Gossenkölle, Austria .....	89
4.2.11	Total Particulate Mercury at Lake Gossenkölle, Austria.....	90
4.2.12	Mercury in Precipitation at Lake Gossenkölle, Austria.....	91
4.3	Discussion.....	92
4.3.1	Mercury Data from Patagonia in Comparison with other Locations.....	92
4.3.2	Mercury Data from Galicia in Comparison with other Locations.....	93
4.3.3	Mercury data of Lake Gossenkölle in Comparison with other Locations .....	94
4.3.4	Diurnal Variation of Total Gaseous Mercury.....	94
4.3.5	Factors suppressing the Diurnal Variation of TGM in Patagonia.....	95
4.3.6	Diurnal Variation of TGM as a Result of Insolation .....	98
4.3.7	Diurnal Variation of TGM above Soil and Snow.....	100
4.3.8	Contribution of RGM to the Total Gaseous Mercury.....	102
4.3.9	Spatial variation of atmospheric mercury in Patagonia.....	103
4.4	Conclusion.....	105
<b>5</b>	<b>Do Hg Accumulation Rates in Archives reflect Atmospheric Deposition Rates?</b>	<b>107</b>
5.1	Sampling Sites of Mercury Records in Peat Bogs and Lake Sediments.....	107
5.2	Mercury Accumulation in the Raised Bog GC1 and the Sediment LMP1 .....	108
5.3	Mercury Accumulation Rates in the Raised Bogs GC1, Sky1, and PBr2.....	110
5.4	Atmospheric Mercury Deposition .....	111
5.4.1	Mercury Wet Deposition at GC .....	111
5.4.2	Mercury Wet Deposition at GC, Sky, and PBr.....	113
5.5	Conclusion.....	113
<b>6</b>	<b>Mercury Transfer from Snow to Atmosphere</b>	<b>115</b>
6.1	Sampling Sites .....	115
6.2	Results .....	116
6.2.1	Mercury in Surface Snow.....	116
6.2.2	Depth Profiles of Mercury in Seasonal Snow Pits.....	116
6.3	Discussion.....	118
6.3.1	Mercury Loss from Surface Snow .....	118
6.4	Conclusion.....	119
<b>7</b>	<b>Summarizing Conclusions</b>	<b>121</b>
<b>8</b>	<b>Literature</b>	<b>123</b>
