<i>Preface</i>	xi
<i>List of abbreviations</i>	xiii
<i>About the editors</i>	xvii
<b>I Environmental problems – An overview</b>	<b>I</b>
K. GRUIZ	
1 Introduction	1
2 Ecosystem	4
3 Ecosystem and man: Ecosystem services	16
4 Extension and time frame of environmental risks and their management	22
5 Environmental compartments: Air, water, and soil	26
6 Deteriorated ecosystems in general	28
6.1 Damage in the ecosystem's provisioning services	28
6.2 Damage in the ecosystem's regulating services	28
6.3 Damage in the ecosystem's habitat services	29
6.4 Nature and biodiversity protection	30
6.5 Invasive species	33
6.6 Urban ecosystems	34
<b>2 Threat by chemical substances: Legislation, production, use and waste</b>	<b>41</b>
K. GRUIZ	
1 Introduction	41
2 Production and use of chemical substances world-wide	42
3 Risk of hazardous chemicals during their whole life cycle	44
4 Regulation of chemical substances in Europe	46
4.1 GHS pictograms and hazard categories	47
4.2 European Regulatory Framework	47
5 Which are the most dangerous chemical substances?	49
5.1 Practical grouping of environment-contaminating chemicals	50
5.2 Pesticides	51
5.3 Biocides	53
5.4 Cosmetics	54

---

6	Carcinogens	54
7	Mutagens	57
8	Reprotoxic substances	58
9	Pollutants of emerging concern	61
<b>3</b>	<b>Abandoned and contaminated land</b>	<b>77</b>
	K. GRUIZ	
1	Deteriorated land and contaminated soil: An introduction	77
2	Contaminated land	78
3	Typical soil contaminants	84
4	Soil deterioration other than contamination	86
5	Some European facts	89
<b>4</b>	<b>Environmental risk of chemical agriculture</b>	<b>93</b>
	A. ANTON, G. FEKETE, B. DARVAS & A. SZÉKÁCS	
1	Introduction to the risk of chemicals in agriculture	93
2	Regulation of pesticides in the European union	94
3	Environmental impacts of fertilizers and pesticides	96
	3.1 Environmental impacts of fertilizers	97
	3.2 Environmental impacts of pesticides	98
4	Output intensity of agrochemicals	100
5	Sustainable agriculture	108
<b>5</b>	<b>Environmental risk of mining</b>	<b>113</b>
	E. VASZITA	
1	Environmental problems caused by mining: An introduction	113
2	Nonrenewable resources	114
	2.1 Oil and gas production	114
	2.2 Coal, ore and nonmetallic mineral mining and quarrying	115
	2.2.1 Extraction	115
	2.2.2 Mineral processing	116
3	Environmental impacts	116
4	Mining production data	118
5	Managing environmental risk of mining	120
6	Environmental problems caused by mine accidents	122
	6.1 The Stava tailings dam failure	123
	6.2 The Los Frailes tailings dam failure	123
	6.3 The Baia Mare cyanide spill	124
	6.4 The red mud catastrophe at the Ajka bauxite processing plant	125
7	Towards more sustainable mining	126
<b>6</b>	<b>Environmental risk of waste and its management</b>	<b>135</b>
	K. GRUIZ & O. KLEBERCZ	
1	The waste problem and its management: An introduction	135
2	European waste legislation	139

3	Waste classification and consequent duties	141
4	Waste management hierarchy	143
5	Waste statistics for Europe	146
6	Waste evaluation: Environmental risks and benefits	149
7	Life cycle thinking should be integrated with environmental risk assessment of chemicals	151
<b>7</b>	<b>Management of abandoned and contaminated land</b>	<b>167</b>
	Y. SPIRA, K. GRUIZ, N. UZINGER & A. ANTON	
1	European action programs in aid of the management of contaminated land	167
2	Thematic strategy and the upcoming soil framework directive in Europe	171
3	Research and development on soil at EU level	173
4	Basic theory of contaminated land management	176
5	Risk-based management of degraded and contaminated land in Europe	180
	5.1 Problem definition and conceptual risk model of contaminated sites	181
	5.2 Risk assessment of contaminated land	184
	5.3 Risk reduction and remediation of contaminated land	185
	5.4 Management is more than assessing and reducing risk	189
<b>8</b>	<b>Environmental risks and impacts</b>	<b>195</b>
	K. GRUIZ	
1	Introduction	195
2	Environmental management at company level	198
3	Managing the environment in general	199
4	Managing the risk of projects, plans and programs	204
5	Life cycle approach for environmental management	207
6	Integrated and risk based management of the environment	209
7	Environmental efficiency, eco-efficiency and sustainability	210
8	How to manage the environment efficiently?	213
9	Environmental management of chemical substances and polluted land	215
	9.1 Environmental legislation in the context of chemical pollution	216
	9.2 Environmental monitoring	216
	9.3 Risk assessment	218
	9.4 Risk reduction measures	219
10	Increasing efficiency of environmental management	220
11	Decision making and decision-support tools	221
<b>9</b>	<b>Risk management of chemicals and contaminated land – from planning to verification</b>	<b>227</b>
	K. GRUIZ, B. SÁRA & E. VASZITA	
1	Introduction, definitions	227
	1.1 Risk management and RMOs	229

---

2	Phases of environmental risk management and decision making	235
2.1	Assessment phase of ERM	237
2.1.1	Types of problems and their assessment	237
2.2	Assessment of the problem before implementing a risk management measure	237
2.2.1	Chemical substances, products, wastes	238
2.2.2	Contaminated land and waste disposal sites	240
2.3	Selection and planning of the RMO	242
2.4	Implementation and maintenance phase	243
2.5	Retrospective evaluation of the applied RMO	246
2.5.1	Verification of the environmental technology and the risk management measure	247
2.5.2	Technology verification as a regulatory tool	249
3	Necessary information for ERA, SEA and LCA	249
4	Environmental risk assessment of chemicals and contaminated land	259
4.1	Environmental risk assessment	260
4.1.1	Qualitative RA	260
4.1.2	Quantitative RA	261
4.2	Generic and site-specific quantitative ERA	265
4.3	ERA of contaminated land	269
4.4	Special risk management measures for ecological areas	271
4.5	Environmental risk assessment tools	272
4.6	Uncertainties in environmental risk assessment	273
4.7	Risk communication	276
5	Life cycle assessment	278
5.1	Concept of LCA	278
5.2	Methods and tools	278
5.3	Application trends	279
5.4	Application of LCA for contaminated land management	280
5.5	Integration of LCA and ERA	280
6	Socio-economic assessment for environmental management and decision making	281
6.1	Traditional forms of socio-economic assessment	283
6.1.1	Cost effectiveness analysis (CEA)	283
6.1.2	Cost-benefit analysis (CBA)	284
6.2	Multi-criteria analysis (MCA)	287
6.3	Social impact assessment	289
7	Environmental technology verification (ETV)	293
7.1	ETV in the world	293
7.1.1	ETV in the US	293
7.1.2	ETV in Canada	294
7.2	EU policy: ETAP	294
7.2.1	About ETAP	294
7.2.2	Necessity, principle and role of an EU ETV	295
7.2.3	The ETV pilot program	295

<b>10 Site-specific risk assessment and management of point and diffuse sources</b>	<b>313</b>
K. GRUIZ, E. VASZITA & A. CLEMENT	
1 Introduction	313
2 Characteristics and differences between point and diffuse sources	314
2.1 Pollution sources	315
2.1.1 Definitions	315
2.1.2 Typical pollution sources	316
2.2 Origin of point and diffuse pollution	317
2.2.1 Point sources and point-source pollution	317
2.2.2 Diffuse pollution from point and diffuse sources	319
2.3 Characterization of point and diffuse pollution	324
2.3.1 Characteristics of point sources	324
2.3.2 Characteristics of diffuse pollution sources	325
3 Different risk management approaches for point and diffuse pollution	326
3.1 Management of point source pollution	326
3.2 Management of diffuse pollution	328
4 Transport modeling for point and diffuse sources	331
4.1 Transport and fate modeling of point source pollution	334
4.2 GIS-based watershed-scale transport and risk modeling of diffuse pollution	342
4.2.1 Emitted amount from diffuse sources and the risk management concept	342
4.2.2 Model calibration using the RRR rate of the watershed	343
4.2.3 GIS transport model types	344
4.2.4 Combined approach for watershed-scale transport and fate modeling of diffuse pollution	346
4.3 Site-specific target value for point and diffuse sources	352
4.3.1 Setting the target value and its application to point sources	352
4.3.2 Setting the target emission from diffuse sources and planning risk reduction at watershed scale	357
5 Assessment and management of diffuse sources from agriculture	362
5.1 General characterization of agricultural diffuse pollution	362
5.2 Measures to reduce diffuse pollution from agriculture	363
6 Assessment and management of diffuse sources from mining	364
6.1 General characterization of diffuse pollution from mining	364
6.2 Risk management approach of diffuse pollution from mining	367
6.3 Conceptual risk model of diffuse pollution from base metal ore mining	368
6.4 Modeling of the fate and transport of diffuse pollution from mining	369
6.5 Measures to reduce diffuse pollution from mining	369

7	Conclusions about the site-specific risk assessment and management for point and diffuse sources	372
<b>I I</b>	<b>Scientific and engineering improvement of environmental risk management</b>	<b>381</b>
	K. GRUIZ	
1	Introduction	381
2	Technological efficiency of environmental risk management	382
3	Innovation is the driving force for the improvement of environmental risk management	384
4	Technology demonstration is the key element of the market entry of innovations	388
5	Innovative concepts in environmental risk management	390
	5.1 More than risk-based environmental management	390
	5.2 Eco-efficiency and sustainability in environmental risk management and decision making	391
	5.3 Innovative environmental data acquisition, evaluation and interpretation	394
6	Efficient characterization of contaminated land	395
7	Trends in environmental risk and impact assessment – life cycle thinking	397
8	Innovative risk reduction technologies	403
9	Data, information and knowledge in environmental decision making	404
10	Uncertainty and variability in ERM	411
11	What is necessary to further develop risk management and increase its efficiency?	421
<b>I 2</b>	<b>Managing environmental knowledge and the necessary IT tools</b>	<b>431</b>
	Z. SIKI & K. GRUIZ	
1	Introduction	431
2	The example of the environmental information (ENFO) knowledge base	432
	2.1 The objective of the ENFO knowledge base	433
	2.2 The structure and content of the ENFO knowledge base	434
3	The informatics background of the ENFO knowledge base	438
	3.1 IT tools used for creating the ENFO knowledge base	438
	3.2 The developed applications	439
	<i>Subject index</i>	447
