Section 1 **Foundational issues**

1 Neuroculture: A new cultural revolution? 3

Francisco Mora

- 1.1 Introduction 3
- 1.2 Neuroscience and the human brain 4
- 1.3 Biological evolution and the brain and the mind 5
- 1.4 Neuroculture 6
- 1.5 Neurophilosophy, consciousness, and the mind–brain problem 8
- 1.6 Knowledge, pleasure, beauty, and neuroculture 11
- 1.7 Neuroculture and the unity of knowledge 13
- 1.8 Conclusion 14

2 Art, meaning, and aesthetics: The case for a cognitive neuroscience of art 19

William P. Seeley

- 2.1 Introduction 19
- 2.2 Art, aesthetics, and psychology 20
- 2.3 Hierarchical models and attentional engines 29
- 2.4 Artistic salience, artistic appreciation, affective and embodied responses to artworks 32

3 States, people, and contexts: Three psychological challenges for the neuroscience of aesthetics 40

Kirill Fayn and Paul J. Silvia

- 3.1 States: the diversity of emotional response to the arts 41
- 3.2 People: the challenge of individual differences in aesthetic experiences 45
- 3.3 Contexts: the diversity of aesthetic objects and environments 48
- 3.4 Conclusion 51

4 Aesthetic appreciation: Convergence from experimental aesthetics and physiology 57

Helmut Leder, Gernot Gerger, and David Brieber

- 4.1 Introduction—strange behaviors? 57
- 4.2 How do psychologists understand aesthetic experiences of art? 58
- 4.3 Components of aesthetic experience of art—behavioral and physiological approaches 64
- 4.4 Conclusion 73

5 The moving eye of the beholder: Eye tracking and the perception of paintings 79

Raphael Rosenberg and Christoph Klein

- 5.1 Gaze movements as a literary model in art history 79
- 5.2 Analysis of gaze movements as a psychological method 82
- 5.3 Visual attention and gaze movements 86
- 5.4 Gaze movements during the beholding of paintings 88
- 5.5 Conclusion and directions for future research 101

Section 2 **Cognitive neuroscience of visual aesthetics and art**

6 Neural mechanisms for evaluating the attractiveness of faces 111

Spas Getov and Joel S. Winston

- 6.1 Introduction 111
- 6.2 What makes a face attractive 111
- 6.3 Conceptual frameworks for studying brain processing of facial attractiveness 114
- 6.4 Studies of the neural mechanisms for evaluating facial attractiveness 118
- 6.5 Discussion 131
- 6.6 Conclusion 137

7 Indeterminate artworks and the human brain 143

Robert C. Pepperell and Alomit Ishai

- 7.1 Visual indeterminacy in art history 143
- 7.2 Scientific background to visual indeterminacy 146
- 7.3 Scientific experiments on visual indeterminacy 148
- 7.4 Object recognition in Cubist paintings 153

8 Contextual bias and insulation against bias during aesthetic rating: The roles of VMPFC and DLPFC in neural valuation 158

Ulrich Kirk and David Freedberg

- 8.1 Neural aesthetic valuation 158
- 8.2 Ventromedial prefrontal cortex involvement in evaluation 160
- 8.3 Neural correlates of aesthetic expertise 164
- 8.4 The influence of favors on valuation and decision making 166
- 8.5 Mitigation of the effects of favors by domain expertise 168

9 Neuroimaging studies of making aesthetic products 174

Oshin A. Vartanian

- 9.1 Creative drawing 175
- 9.2 Creative writing 177
- 9.3 Jazz improvisation 179
- 9.4 Artistic creativity 181
- 9.5 Mirror model of art 182
- 9.6 Aesthetic processing in the brain 183

Section 3 **Cognitive neuroscience of dance**

- 10 Beautiful embodiment: The shaping of aesthetic preference by personal experience** 189
Emily S. Cross
- 10.1 Introduction 189
 - 10.2 The shaping of perception by action 190
 - 10.3 The shaping of action by perception 193
 - 10.4 Aesthetics of action 196
 - 10.5 How action experience shapes preferences in dance spectators 198
 - 10.6 Next steps in using dance to explore embodiment and aesthetics 202
- 11 Sensorimotor aesthetics: Neural correlates of aesthetic perception of dance** 209
Beatriz Calvo-Merino
- 11.1 Do we need a neuroaesthetics of dance? 209
 - 11.2 The body as a dynamic human canvas 210
 - 11.3 Neural correlates of aesthetics experience of dance 215
 - 11.4 Neural correlates of dance's physical properties 217
 - 11.5 Future directions 219
- 12 Moving towards ecological validity in empirical aesthetics of dance** 223
Julia F. Christensen and Corinne Jola
- 12.1 Far from ecological validity 223
 - 12.2 Defining dance 235
 - 12.3 Dance employed as ecologically valid stimuli 245
 - 12.4 Challenges—past and present 248
 - 12.5 Requirements for the future 252
 - 12.6 Conclusion 253

Section 4 **Cognitive neuroscience of music**

- 13 Liking music: Genres, contextual factors, and individual differences** 263
Kathleen A. Corrigan and E. Glenn Schellenberg
- 13.1 Introduction 263
 - 13.2 Liking different genres of music 264
 - 13.3 Liking for individual musical pieces 270
 - 13.4 Future directions 278
- 14 Tension–resolution patterns as a key element of aesthetic experience: Psychological principles and underlying brain mechanisms** 285
Moritz Lehne and Stefan Koelsch
- 14.1 Introduction 285
 - 14.2 Tension–resolution patterns: psychological principles 287
 - 14.3 Musical tension 292
 - 14.4 Summary 298

- 15 From pleasure to liking and back: Bottom-up and top-down neural routes to the aesthetic enjoyment of music 303
Elvira Brattico
- 15.1 Music and aesthetic emotions 303
 - 15.2 The bottom-up neural route to sensory pleasure 304
 - 15.3 The top-down neural route to conscious liking 307
 - 15.4 The role of context: social and person-related factors 310
 - 15.5 The role of genes in idiosyncratic aesthetic emotions 312
 - 15.6 Conclusion 314
- 16 Effects of expertise on the cognitive and neural processes involved in musical appreciation 319
Marcus T. Pearce
- 16.1 Introduction 319
 - 16.2 What is music? 320
 - 16.3 Frameworks for understanding expertise 321
 - 16.4 Musical expertise 322
 - 16.5 Expertise effects on perception and cognition of musical structure 323
 - 16.6 Expertise effects on frequency of exposure to music 326
 - 16.7 Expertise effects on emotional experience 327
 - 16.8 Expertise effects on emotional and aesthetic experience of music 327
 - 16.9 Conclusion 331

Section 5 **Neuropsychology of art and aesthetics**

- 17 The neuropsychology of visual art 341
Anjan Chatterjee
- 17.1 Introduction 341
 - 17.2 The paradoxical facilitation of visual art 343
 - 17.3 Quantification in the neuropsychology of art 349
 - 17.4 Art production 349
 - 17.5 Art perception 352
 - 17.6 Conclusion 353
- 18 The creation of art in the setting of dementia 357
Indre V. Viskontas and Suzee E. Lee
- 18.1 Introduction 357
 - 18.2 The path of degeneration in dementia 357
 - 18.3 The emergence of art in the setting of dementia 359
 - 18.4 Left versus right brain thinking 360
 - 18.5 A study of drawing in patients with dementia 362
 - 18.6 Perseverative, obsessive, and visually dominated behaviors in svPPA patients 365
 - 18.7 A comprehensive case study 368

- 18.8 Theory of creativity in patients with dementia: release of inhibition 369
- 18.9 Conclusion and future directions 370
- 19 Hemispheric specialization, art, and aesthetics 373
 - Dahlia W. Zaidel*
 - 19.1 Introduction 373
 - 19.2 Historical background for hemispheric lateralization in art 374
 - 19.3 The right hemisphere and art? 375
 - 19.4 Perceptual effects of right hemisphere damage in artists 376
 - 19.5 Perception of paintings in the left and right hemispheres 377
 - 19.6 Drawings and the right hemisphere 378
 - 19.7 Lateralized and bilateral brain activation with EEG and fMRI 379
 - 19.8 Painted portraits: lateralization of the face in art and viewers' aesthetic reactions 380
 - 19.9 Conclusion 381

Section 6 **The evolution of art, aesthetics, and the brain**

- 20 Towards a comparative approach to empirical aesthetics 385
 - Gesche Westphal-Fitch and W. Tecumseh Fitch*
 - 20.1 Introduction 385
 - 20.2 Pervasive issues in aesthetic inquiry 386
 - 20.3 Some implications of non-representational human artifacts 389
 - 20.4 Animal aesthetics? 393
 - 20.5 Discussion 400
- 21 Art and brain co-evolution 408
 - Camilo J. Cela-Conde and Francisco J. Ayala*
 - 21.1 Neuroaesthetics 408
 - 21.2 Neural networks 410
 - 21.3 Functional connectivity 413
 - 21.4 Perceiving beauty as a human trait 418
 - 21.5 Patterns of the evolution of the brain 420
 - 21.6 Comparative studies 421
 - 21.7 Aesthetic appreciation as an exaptation 421
 - 21.8 The question of quale 423
- 22 Art as a human "instinct-like" behavior emerging from the exaptation of the communication processes 426
 - Luigi F. Agnati, Diego Guidolin, and Kjell Fuxe*
 - 22.1 Introduction 426
 - 22.2 General premise 427
 - 22.3 Why human beings are artwork makers? 429
 - 22.4 Artwork production/appreciation: a hub role for insula and anterior cingulate cortex? 434
 - 22.5 Conclusion 441

Section 7 **Integrative approaches**

- 23 Neurobiological foundations of art and aesthetics 453**
Edmund T. Rolls
- 23.1 Introduction 453
 - 23.2 Emotions as states elicited by rewards and punishers 453
 - 23.3 The functions of emotion 455
 - 23.4 Dual routes to action: gene-defined goals, and syntactic reasoning 457
 - 23.5 A theory of the neurobiological foundations of aesthetics and art 457
 - 23.6 Is what is attractive also beautiful and aesthetic? 472
 - 23.7 Comparison with other theories of aesthetics 473
- 24 Aesthetic evaluation of art: A formal approach 479**
Alexander J. Huston and Joseph P. Huston
- 24.1 Introduction 479
 - 24.2 Qualia (Qs) and aesthetic evaluation 481
 - 24.3 Violation and extraction of qualia 483
 - 24.4 Taxonomy of qualia 484
 - 24.5 Viewing art on the basis of qualia 485
 - 24.6 Eliminating a Q 486
 - 24.7 Rapport between producer and viewer 486
 - 24.8 Invariance of qualia 488
 - 24.9 The problem of concurrent qualia: poignancy, fading, and interplay of Q 489
 - 24.10 Poignancy 489
 - 24.11 Fading or decay of Q 489
 - 24.12 Interplay of Qs 490
 - 24.13 Qualia in architecture 491
 - 24.14 Antique 491
 - 24.15 Classical modern 494
 - 24.16 Minimalism 494
 - 24.17 How does the brain process qualia? 496
- 25 Tempos of eternity: Music, volition, and playing with time 500**
Barbara G. Goodrich
- 25.1 Introduction 500
 - 25.2 Preliminary considerations 500
 - 25.3 Rhythm, anticipation, and motility/volition 502
 - 25.4 Music and the temporality of consciousness 506
 - 25.5 Clive Wearing's enduring musical gifts 512
 - 25.6 Conclusion 514

Index 519
