Preface

This is the preliminary publication of the papers to be pre-
sented at the International Seminar on Machine Translation
being held at the Cranfield Institute of Technology under
the organization of that college and the Natural Language
Translation Specialist Group of The British Computer
Society, February 13th-15th 1984.

Whilst every care has been taken in the preparation of
these papers for printing, the very tight timescales have
meant that errors and omissions are inevitable. In partic-
ular, a number of papers were not received in time for them
to be included here. For all of these I offer my apologies,
and the assurances that our best endeavours will be used to
ensure that the definitive version of the proceeding to be
published after the conference will rectify as many mistakes
as we can find, or are informed of.

Thanks are due to all the members of the organizing
committee for their efforts, to Douglas Clarke for the tre-
mendous amount of work he has put into organizing this semi-
nar, to The British Computer Society, for their financial
support and backing, and to GSi (UK) for their generous gift
of resources for the production of these preliminary pro-
ceedings.
