— 1<sup>st</sup> July 2023

BERLIN

# Course of RF for Accelerators

LIKE!

This course will mainly be of interest to students and staff in accelerator laboratories, university departments or companies involved in producing RF equipment for accelerators. The course will include a review of the RF technology presently used in the field of particle accelerators as well as a recapitulation of the theoretical fundamentals.

Different RF equipment and RF technologies will be discussed along with their practical applications for various types of accelerators. Dedicated “hands-on” afternoon courses and seminars will complete the programme.

Since the number of participants will be limited, “first come, first served” basis is strictly applied.

**Location: Seminaris CampusHotel, Berlin.**
