The CERN Accelerator School and the Wigner Research Centre for Physics are organising a course on

Introduction to Accelerator Physics

2 - 14 October, 2016

Danubius Hotel Helia, Budapest, Hungary

This Introductory Course will be of interest to staff and students from laboratories and universities, as well as companies manufacturing accelerator equipment, who wish to learn about accelerator science and technology. The course will focus on various aspects of beam dynamics and will provide an introduction to

the underlying accelerator systems. Key topics will be consolidated through a series of discussion sessions and tutorials, while topical seminars will complete the programme
