2. Perform essential clinical skills within the medical assistant scope of practice in ambulatory clinic settings.
3. Recognize factors that affect procedures and results, and take appropriate actions with predetermined limits when indicated, including patient compromise or complications.
4. Demonstrate professional conduct and interpersonal communication skills with patients, other health care professionals, and with the public.
5. Recognize the responsibilities of other health care personnel and interact with them with respect for their jobs and patient care.
6. Apply basic scientific principles in learning new techniques and procedures.
7. Relate vital sign and laboratory findings to common disease processes.

AHS 202. Legal and Ethical Issues in Health Care**3 Credits (3)**

Consideration of legal and ethical issues in modern health care delivery.

AHS 250. Spanish for Health Professionals**3 Credits (3)**

Spanish for Health Professionals is a 3 credit course geared toward individuals working or majoring in health related areas. The course focus is on conversation and vocabulary needed for the workplace and task based practical skills. Restricted to: Community Colleges only.

AHS 280. Medical Office Administration & Management**4 Credits (2+4P)**

A core course designed to provide the theory, concepts, and skills needed in preparation for entry-level medical assisting positions. Content includes theory and concepts related to medical office administration. The course includes skills, hands-on practice, and 40 hours of supervised clinical in the work environment in ambulatory care settings. Restricted to Community Colleges campuses only.

AHS 290. Clinical Skills & Concepts for Medical Assisting II**6 Credits (3+6P)**

A core course designed to provide the theory, concepts, and skills needed in preparation for entry-level medical assisting positions. Content includes theory and concepts related to specialty areas of healthcare practice, as well as consideration for conditions affecting persons throughout the life span. The course includes a skills laboratory for hands-on practice and 96 hours of supervised clinical in the work environment with specialized populations and procedures in both ambulatory and acute care settings. Restricted to Community Colleges campuses

Learning Outcomes

1. Apply theoretical knowledge associated with medical assisting in providing basic healthcare services.
2. Perform essential clinical skills within the medical assistant scope of practice in ambulatory clinic settings where specialized care is given, as well as, acute care settings.
3. Recognize factors that affect procedures and results, and take appropriate actions within predetermined limits when indicated, including patient compromise or complications.
4. Demonstrate professional conduct and interpersonal communication skills with patients, other health care professionals, and with the public.
5. Recognize the responsibilities of other health care personnel and interact with them with respect for their jobs and patient care.
6. Apply basic scientific principles in learning new techniques and procedures.
7. Relate vital sign and laboratory findings to common disease processes.

ANSC-ANIMAL SCIENCE

ANSC 1110. Animal Science Careers

1 Credit (1)

Introduction to scientific disciplines and career options in animal-agriculture career skill development, including resume preparation, networking, importance of internships, and leadership experiences in animal agriculture.

Learning Outcomes

1. Increasing the understanding of career opportunities in animal agriculture.
2. Gain a broad experience in the development of creative thinking about the career choices available in animal agriculture.
3. Apply the increased knowledge of career development in the career path and internship directions for each student.
4. Gain leadership experience that will be impactful for the student in their pursuit of a career in animal agriculture.

ANSC 1120. Introduction to Animal Science

3 Credits (3)

This course is designed to provide an introduction to nutrients and their function in livestock animals. Basic feed identification, evaluation, and diet formulation will be discussed. The anatomy of the digestive tract of animals and their ability to utilize feedstuffs is presented. Classification, digestion, absorption, transport and metabolism of major nutrients required by animals are studied

Learning Outcomes

1. Identify conventional and non-conventional feedstuffs that are fed to livestock animals.
2. Describe various methods for feed processing and storage.
3. Assess the nutritional value of a ration or feed ingredients.
4. Interpret the NRC (Nutrient Requirement Council) guidelines for feeding livestock.
5. List the basic digestive anatomy for all classes of livestock.
6. Describe nutritional deficiencies and digestive disorders common to livestock animals

ANSC 1120H. Introduction to Animal Science Honors

3 Credits (3)

This course is designed to provide an introduction to nutrients and their function in livestock animals. Basic feed identification, evaluation, and diet formulation will be discussed. The anatomy of the digestive tract of animals and their ability to utilize feedstuffs is presented. Classification, digestion, absorption, transport and metabolism of major nutrients required by animals are studied. Additional course work will be required. Restricted to Las Cruces campus only.

Prerequisite(s): Eligibility for membership in honors college.

Learning Outcomes

1. Identify conventional and non-conventional feedstuffs that are fed to livestock animals.
2. Describe various methods for feed processing and storage.
3. Assess the nutritional value of a ration or feed ingredients.
4. Interpret the NRC (Nutrient Requirement Council) guidelines for feeding livestock.
5. List the basic digestive anatomy for all classes of livestock.
6. Describe nutritional deficiencies and digestive disorders common to livestock animals

ANSC 1120L. Introduction to Animal Science Lab

1 Credit (2P)

Students will observe and participate in activities related to farm animal management and will include areas of livestock selection, nutrition, reproductive physiology, animal ID and animal health. This lab is required for animal science majors.

Prerequisite(s)/Corequisite(s): ANSC 1120.

Learning Outcomes

1. To provide the students with an understanding of the principles, concepts and terminology of today's livestock industry

ANSC 1130. Western Equitation I

2 Credits (4P)

Basic principles of Western riding, including care and management of the riding horse, equitation equipment, and development of riding skills.

ANSC 1140. Introduction to Dairy Science**3 Credits (3)**

Introduction to the basic aspects of dairy science and how to apply key concepts to the practical feeding and management of dairy cattle and production of dairy products. Students should also obtain an appreciation for the size and diversity of the dairy industry.

Prerequisite(s)/Corequisite(s): ANSC 1120. Restricted to Las Cruces campus only.

Learning Outcomes

1. Learn key concepts in dairy production and management
2. Be familiar with terms used in production of milk and milk products

ANSC 1160. Introductory Horse Science**3 Credits (2+2P)**

The light horse industry; breeds; introduction to feeding, breeding, marketing and management; handling and selecting horses for breeding and performance.

Learning Outcomes

1. Describe and identify breeds of horses, their characteristics and their uses.
2. Demonstrate knowledge of basic physiology of horses by recalling parts of the horse, including bones, muscle, tendons and ligaments. Also, by ageing horses via teeth, body condition scoring and taking vital signs.
3. Demonstrate safe and proper handling of horses.
4. Demonstrate comprehension of basic nutrition and feedstuffs by formulating/correcting diets in clinical and non-clinical situations.
5. Recall aspects of basic reproduction by calculating a stallion book and recalling appropriate procedures for breeding.
6. Create informative articles that seek to educate the lay horse person about a topic covered in class.

ANSC 1170. Introduction to Animal Metabolism**3 Credits (3)**

Principles underlying the mechanisms of animal metabolism as they relate to production, maintenance, and health of animals.

Prerequisite: CHEM 1215G.

Learning Outcomes

1. This course provides an introduction to the study of the physiology of life.
2. The first part of the course covers acids and bases and the chemical nature of organic compounds.
3. The second part of the course relates to the chemistry of biomolecules (nutrients) and summarizes the chemical reactions of life (metabolism).

ANSC 1180. Companion Animal in Society**3 Credits (3)**

Examination of the historical, current, and potential future roles of companion animals in human society. Topics include animal domestication, breeds, exotic companion animals, the companion animal industry, and competitions and sports involving companion animals. Emphasis is on canine and feline species. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. Discuss the theories regarding why, how, and when companion animals became domesticated.
2. Describe how selective breeding has optimized certain physiological and behavioral traits of companion animals in order to fulfill the needs of individual people and society.
3. Explain the concept of human-companion animal interaction (HAI) and the influence this bond has on human behavior, health, society, and government policy/laws.
4. Understand the breadth and economic impact of the rapidly expanding companion animal industry and the recent expenditure trends of pet owners.
5. Discuss the past and present uses of companion animals and theorize regarding the future uses of companion animals in society
6. Be effective in searching for, and critically evaluating, scientific based resources.

ANSC 2120. Equine Management**3 Credits (3)**

Introduction and application of the business skills necessary to effectively manage the equine operation. Students will learn how to use strategic thinking and sound business management practices to succeed in the demanding equine industry.

Prerequisite: ANSC 1160.

Learning Outcomes

1. Develop a working knowledge of the business principles needed to operate a successful entrepreneurial enterprise.
2. Increase the awareness of the need for business principles in the aggregate function of an equine operation.
3. Gain a greater perspective of accounting, economic and financial principles in an equine business operation.

ANSC 2130. Western Equitation II**2 Credits (4P)**

Intermediate principles of Western riding, including reading horse behavior, limbering-up exercises, and developing riding skills. Introduction to rollbacks, turnarounds and stops.

Prerequisite: consent of instructor.

Learning Outcomes

1. Increasing the understanding of the student relative to equitation practices
2. Increase the students' ability to apply principles of Western Equitation to applied settings across a broad spectrum of outlets
3. Prepare the student to engage equine in a professional manner

ANSC 2140. Introduction to Companion Animal Science**3 Credits (3)**

Introduction to the care of common companion animal species. Species specific housing and nutrition are covered in the context of maximizing animal health and well-being and reducing disease. May be repeated up to 3 credits.

Learning Outcomes

1. Accurately use scientific terminology common to the companion animal discipline.
2. Compare and contrast the physiological similarities and differences between the various companion animal species studied in class.
3. Create dietary plans based on the nutritional needs of different companion animal species to optimize animal health and lifespan.
4. Identify symptoms of disease/injury at the early stages of illness in order to obtain Veterinary care and treatment as quickly as possible.
5. Design and construct species specific cages/vivariums to maximize animal well-being and health.
6. Educate others regarding providing the best possible care for a variety of companion animal species.

ANSC 2150. Management of Equine Operations**3 Credits (3)**

Introduction and application of business skills necessary to effectively manage the equine operation. Students will learn how to use strategic thinking and sound business management practices to succeed in the demanding equine industry.

Prerequisite(s): ANSC 1160.

Learning Outcomes

1. Acquire a working knowledge of different sectors of the equine industry, including business practices, management and marketing skills.

ANSC 2310. Introduction to Meat Science**3 Credits (2+3P)**

Fundamental aspects of the red meat industry. Lecture topics and laboratory exercises include the nutrient value of meat, meat preservation, meat safety, muscle structure and contraction, slaughter and processing of beef, lamb and pork, sausage manufacture, meat curing, meat cookery, and muscle and bone anatomy.

Learning Outcomes

1. Increasing the understanding of meat science applications across animal agriculture.
2. Increase the students' ability to apply principles of production to the industry perspective.
3. Apply the increased knowledge of meat science in a global situation.
4. Gain an understanding of the components involved in the development and processing of the red meat industry.

ANSC 2330. Animal Production**3 Credits (2+2P)**

Production and utilization of beef cattle, sheep, and swine; emphasis on feeding, breeding, management problems and marketing; selection of animals for breeding and market

Learning Outcomes

1. Increasing the understanding of meat animal production.
2. Increase the students' ability to apply principles of production to the industry perspective.
3. Apply the increased knowledge of meat animal production to global situations.
4. Gain a broader understanding of the importance of meat animals in the global food system.

ANSC 2340. Genetics in Animal Science**3 Credits (3)**

Introduction to genetics and inheritance relative to livestock production. Introduction to procedures for collection and use of performance information in livestock improvement programs.

Prerequisites: BIOL 2610G.

Learning Outcomes

1. Gain a broader understanding of the role genetic impacts in the livestock industry.
2. Employ an increased knowledge of impact of genetics in the food animal industry and the production
3. and economic principles that apply.
4. Recognition of the global impacts of genetics in the food animal industry in a global setting.

ANSC 2996. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

Learning Outcomes

1. Varies

ANSC 301. Animal and Carcass Evaluation**3 Credits (2+2P)**

Determination of the market value of meat animals by relating live animal and carcass traits. Topics include the identification of economically important traits, grading, growth and development, wholesale and retail pricing, and futures and options markets.

ANSC 303. Livestock, Meat and Wool Evaluation**4 Credits (3+2P)**

Selection, classification, grading, and judging of livestock, meat, and wool.

ANSC 304. Feeds and Feeding**3 Credits (2+2P)**

Digestibility of feeds, their nutritive values, grades, and classes, principles of ration formulation and computer ration formulations, and practical feeding of farm animals. Prerequisite(s): CHEM 1215G

ANSC 305. Principles of Genetics**3 Credits (3)**

Covers fundamental principles of reproduction, variation, and heredity in plants and animals. Crosslisted with: AGRO 305, BIOL 305, HORT 305 and GENE 305

Prerequisite(s): BIOL 2610G, BIOL 2110G and either CHEM 1215G or CHEM 1216.

ANSC 308. Horse Evaluation**4 Credits (2+4P)**

Students will acquire a working knowledge of selection and classification of horses, learn criteria for evaluation and selection of breeding and show animals, gain a broad understanding of judging conformation and performance in the horse, and learn effective oral and written communication skills through defense of class placings. This course is considered an introduction to the NMSU Horse Judging Team.

ANSC 310. Exhibiting Livestock**3 Credits (1+4P)**

Fitting and showing beef cattle, dairy cattle, sheep and swine.

ANSC 312V. Companion Animals and the Human- Animal Interaction**3 Credits (3)**

The science behind human-animal interactions (HAI). An examination of the interactions between humans and companion animals and the effects on human and animal health and wellness. Cultural differences in HAI will be explored. Topics will include Animal Assisted Activity (AAA), Animal Assisted Therapy (AAT), and service animals. Emerging and future uses of companion animals in HAI will be discussed.

ANSC 320. Equine Behavior and Training**3 Credits (6P)**

Basic principles, methods and philosophies of handling, breaking and training the two-year-old Western horse. May be repeated up to 6 credits.

Prerequisite(s): ANSC 2130 or consent of instructor.

ANSC 321. Advanced Equine Behavior and Training**3 Credits (6P)**

Continuation of ANSC 320. Further development of skills required to advance the training of the two-year-old Western horse. Emphasis will be placed on lateral work, lead changes, turn-arounds, obstacles, and making the horse accustomed to ranch and trail riding situations.

Prerequisite(s): ANSC 320 or consent of instructor.

ANSC 325. Food and Agribusiness Finance and Planning**3 Credits (3)**

Same as AEEC 325. May be repeated up to 3 credits. Crosslisted with: AEEC 325.

ANSC 350. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

ANSC 351V. Agricultural Animals of the World**3 Credits (3)**

Global study of the development and use of animals for production of food and nonfood products. Climatic, cultural, and economic influences on systems of livestock production and species and breeds of livestock utilized will be evaluated.

ANSC 353. Advanced Livestock Evaluation**2 Credits (4P)**

Advanced selection, classification and grading of livestock. May be repeated up to 2 credits. Consent of Instructor required.

ANSC 370. Anatomy and Physiology of Farm Animals**4 Credits (3+2P)**

Structure and function of the animal body. Includes studies of the horse, cow, sheep, pig, and comparisons with the human body.

Prerequisite(s): CHEM 1215G and BIOL 2610G or BIOL 2110G.

ANSC 383. Equine Reproductive Management**3 Credits (1+4P)**

Anatomy, physiology, and endocrinology of reproduction of the mare and stallion; training in modern reproductive techniques employed in the horse industry.

Prerequisites: ANSC 1160, ANSC 2150, and ANSC 370.

ANSC 390. Internship**1-3 Credits**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. Graded S/U.

Prerequisite: consent of instructor.

ANSC 391. Undergraduate Research Experience**1-3 Credits (1-3)**

Formal laboratory, library, or field study of problems related to animal sciences, emphasizing hypothesis development, testing, and reporting results. Projects are preplanned, reviewed, and approved. Students submit periodic written reports and final written and oral reports. May be repeated for a maximum of three credits. Consent of Instructor required.

ANSC 392. Animal Sciences Teaching/Extension Experience**1-3 Credits (1-3)**

: Formal teaching experience related to animal sciences supervised by a faculty member. May involve classroom instruction, educational material development, and/or student evaluation and assessment. Students may also be involved in development, implementation, or assessment of adult or youth educational programs related to animal sciences, supervised by a faculty member. Students submit periodic written reports and a final written and oral report. May be repeated for a maximum of three credits. Consent of Instructor required.

ANSC 402. Animal Science Seminar**1 Credit (1)**

A seminar course designed to inform students of the career opportunities, develop their interviewing and other interpersonal skills may also include reading, discussions, written reports, and seminar presentations of current relevant literature.

ANSC 402 H. Animal Science Seminar**1 Credit (1)**

Taught with ANSC 402 with additional work.

Prerequisite(s): Meets Honors eligibility and/or Crimson Scholar status.

ANSC 411. Canine and Feline Behavior and Training**3 Credits (3)**

The influence of domestication, breeds, genetics, and physiology on the behavior of canine and feline species. Training methods and modification of problem behaviors are examined. The impact of the pet parent on their animal's behavior is addressed. May be repeated up to 3 credits.

Prerequisite(s): Junior or Senior status or consent of the instructor.

ANSC 412. Canine and Feline Health and Diseases**3 Credits (3)**

A review of common infectious and non-infectious diseases and the basics of the immune response. Pathophysiology and treatment of these diseases and the role the pet parent plays in pre-disposing their animals to disease. May be repeated up to 3 credits.

Prerequisite(s): ANSC 2140 or consent of instructor.

ANSC 421. Physiology of Reproduction**4 Credits (3+2P)**

Fertility and the role of hormones, nutrition, selection, management and environment in the maintenance of high reproductive rate.

Prerequisite(s): ANSC 370.

ANSC 422. Animal Nutrition**3 Credits (3)**

Nutrient utilization and measurement and nutrient requirements for the various body functions.

Prerequisite(s): CHEM 2115 or CHEM 313 or ANSC 1170.

ANSC 423. Animal Breeding**3 Credits (2+2P)**

Mating systems, and selection procedures; calculation of inbreeding coefficients, genetic relationships, and gene frequency.

Prerequisite(s): ANSC 2340 or 305.

ANSC 424. Swine Production**3 Credits (2+2P)**

Breeding, feeding, and care of swine.

Prerequisite(s): ANSC 304.

ANSC 425. Horse Science and Management**3 Credits (2+2P)**

Senior level course requiring students to apply basic knowledge acquired in the previous courses to solve typical problems encountered in the horse industry. Specific topics include genetics and animal breeding, business and legal issues, reproduction, health, nutrition and exercise physiology.

Prerequisite(s): ANSC 304 and ANSC 370 or concurrent registration.

ANSC 426. Beef Production: Cow-Calf Management**3 Credits (2+2P)**

Senior level course examining management practices for the cow-calf producers. Specifically focusing on nutrition, reproduction, genetics, marketing, and health. May be repeated up to 3 credits.

Prerequisite(s): ANSC 304 and (ANSC 2340 or ANSC 305) or concurrent registration.

ANSC 427. Dairy Production**3 Credits (2+2P)**

Breeding, nutrition, physiology and management of dairy cattle.

Prerequisite(s): ANSC 304 and (ANSC 2340 or ANSC 305) or concurrent registration.

ANSC 428. Sheep and Wool Production**3 Credits (2+2P)**

Genetics, nutrition, physiology and management of sheep. Wool grading, shearing, and disease control.

Prerequisite(s): ANSC 304 and junior status.

ANSC 429. Beef Production: Feedlot Management**3 Credits (2P)**

Senior level course in feedlot management of beef cattle. Topics of interest include cattle handling and processing, health and nutrition, intake management, and growth. Feed mill operation, marketing strategies, and regulatory concerns associated with finishing cattle production may also be discussed.

Prerequisite(s): ANSC 304 or Consent of Instructor.

ANSC 448. Problems**1-4 Credits**

Individual investigation in a specific area of animal science. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

ANSC 458. Livestock Behavior, Welfare and Handling**3 Credits (2+3P)**

Principles of animal behavior and evaluation of management practices on animal welfare in confined and rangeland livestock operations. Low stress livestock handling techniques. Design of livestock handling facilities. Crosslisted with: RGSC 458

Prerequisite(s): RGSC 2110 or ANSC 1120.

ANSC 462. Parasitology**3 Credits (3)**

Same as EPWS 462.

ANSC 468. Advanced Dairy Herd Management**3 Credits (3)**

The course is offered through the Southern Great Plains Dairy Consortium in Clovis, NM, and will include breeding, nutrition, physiology, health and management of large herd dairies of the Southwest. Students must apply for the course through the Consortium, and can take it more than once, as topics vary. Consent of instructor required.

Prerequisite(s): ANSC 304.

ANSC 480. Environmental Physiology of Domestic Animals**3 Credits (3)**

Influence of environmental factors on physiological processes of domestic animals.

Prerequisite: ANSC 370.

ANSC 484. Ruminant Nutrition**3 Credits (3)**

Energy, nitrogen, and mineral nutrition of ruminants with special emphasis on digestive physiology and metabolism of nonprotein nitrogen compounds.

Prerequisite: ANSC 422.

ANSC 488. Equine Nutrition and Exercise Physiology**3 Credits (2+2P)**

Students will gain an in-depth understanding of nutrition and exercise physiology in the horse. Students will investigate the response of major physiological systems to exercise, conditioning and training, gastrointestinal physiology, nutrition requirements and clinical nutrition of the horse. Students must have Junior standing or higher to enroll in this course.

ANSC 501. Advanced Animal Nutrition (so)**3 Credits (3)**

Emphasis on digestive physiology and metabolism. Basic mechanisms involved in the intake, digestion, and absorption of nutrients studied.

Prerequisite(s): CHEM 2115 or consent of instructor.

ANSC 504. Animal Physiology Techniques (se)**4 Credits (4)**

Radioimmunoassay procedures. Methods and procedures for conducting reproductive physiology research in livestock. Includes animal preparation, sample collection, laboratory and cell culture procedures.

Prerequisite: consent of instructor.

ANSC 507. Laboratory Techniques in Nutrition (f)**4 Credits (2+6P)**

Methodology and experimental procedures in measuring nutrient requirements and value of diets.

Prerequisites: ANSC 422 or consent of instructor.

ANSC 509. Endocrinology of Domestic Animals (f)**3 Credits (3)**

The role of hormones in growth, development, metabolism, temperature regulation, lactation, and reproduction of domestic animals, including commercial applications.

ANSC 510. Range Nutrition Techniques (se)**3 Credits (3)**

Animal and plant methods of determining quantity and quality of range forage. Same as RGSC 510.

Prerequisite: ANSC 484 or consent of instructor.

ANSC 512. Research Methods in Animal Science (s)**4 Credits (3+2P)**

Procedures used in animal science research, including planning and conduct of investigations and interpretation of results.

ANSC 515. Graduate Seminar**1 Credit (1)**

Current topics.

ANSC 520. Advanced Nutritional Management I: Feedlot (se)**3 Credits (3)**

Emphasis on feeding systems for beef cattle from weaning to slaughter. Primary focus on feedlot nutrition and management.

Prerequisite: ANSC 484 or consent of instructor.

ANSC 521. Advanced Nutritional Management II: Cow Calf/Stocker (so)**3 Credits (3)**

Emphasis on nutritional management for cow-calf and stocker operations. Primary focus on applications to range animal nutrition and management.

Prerequisite: ANSC 484 or consent of instructor.

ANSC 522. Animal Nutrition (f)**3 Credits (3)**

Nutrient utilization and measurement; nutrient requirements for the various body functions. Taught with ANSC 422 with additional requirements for graduate students. Recommended for nonmajors.

Prerequisite(s): CHEM 2115.

ANSC 560. Rumen Microbiology (so)**3 Credits (3)**

Issues in ruminal and gastrointestinal microbiology. Includes physiological and genetic mechanisms in carbohydrate and nitrogen utilization. Same as FSTE 560.

Prerequisites: ANSC 501.

ANSC 580. Environmental Physiology of Domestic Animals**3 Credits (3)**

Influence of environmental factors on physiological processes of domestic animals. Specific focus on fetal and developmental programming, heat and cold stress.

ANSC 588. Equine Nutrition and Exercise Physiology**3 Credits (3)**

Students will gain an in-depth understanding of nutrition and exercise, conditioning and training, gastrointestinal physiology, nutrition requirements and clinical nutrition of the horse.

Prerequisite(s)/Corequisite(s): ANSC 304 and ANSC 422.

ANSC 598. Special Research Programs**1-4 Credits (1-4)**

Individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

ANSC 599. Master's Thesis**15 Credits**

Thesis. Consent of Instructor required. Thesis/Dissertation Grading.

ANSC 600. Research**1-15 Credits**

This course is for Ph.D. students before they have completed qualifiers. Consent of Instructor required. Thesis/Dissertation Grading.

Prerequisite(s): ANSC 421 or consent of instructor.

ANSC 602. Advanced Reproductive Physiology (fo)**3 Credits (3)**

Mechanisms of reproductive function; research methodology.

Prerequisite(s): ANSC 421 or consent of instructor.

ANSC 602 L. Molecular Techniques in Reproductive Physiology (fo)**2 Credits (4P)**

Molecular biology techniques used in the study of reproductive physiology in domestic animals. Extraction of RNA, DNA from endocrine tissues, northern analysis, culture of pituitary/ovarian tissue. Mechanisms of hormone action.

Prerequisite: consent of instructor.

ANSC 604. Hypothalamo-Hypophyseal-Pineal Endocrinology (fe)**1 Credit (1)**

Hormones and other neurochemicals synthesized and secreted by the hypothalamus, pituitary, and pineal glands. Neuroendocrinology of the hypothalamo-hypophyseal axis.

Prerequisite: ANSC 509.

ANSC 605. Gonadal and Uterine Endocrinology (fe)**1 Credit (1)**

Endocrinology of mammalian ovaries, testes, and uteri including developing trophoblasts.

Prerequisite: ANSC 509.

ANSC 606. Endocrinology of Pregnancy, Parturition, and Lactation (fe)**1 Credit (1)**

Hormones and other chemical messengers involved in maintenance of pregnancy, control of parturition, and initiation and maintenance of lactation in farm animals.

Prerequisite: ANSC 509.

ANSC 621. Metabolic Functions and Dysfunctions (fe)**3 Credits (3)**

Physiological chemistry of ruminants and other domestic animals, with attention to metabolic dysfunctions and nutritional toxicology.

Prerequisites: CHEM 345 and ANSC 501.

ANSC 625. Nutrient Metabolism I: Mineral, Vitamin, and Nitrogen Metabolism (fo)**4 Credits (4)**

Cellular metabolism, physiological function(s), toxicities, and deficiencies of minerals, vitamins and nitrogen in ruminants and nonruminants.

Prerequisite: ANSC 501.

ANSC 626. Nutrient Metabolism II: Carbohydrates, Lipids, and Energetics (se)**4 Credits (4)**

Basic principles of carbohydrate, lipid, and energy metabolism; integration of metabolism with emphasis on nutritional and biochemical processes related to efficiency of nutrient use.

Prerequisite: ANSC 501.

ANSC 698. Special Research Programs**1-4 Credits**

Advanced individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree.

Consent of Instructor required.

ANSC 700. Doctoral Dissertation**15 Credits**

Dissertation. Consent of Instructor required. Thesis/Dissertation Grading.

ANTH-ANTHROPOLOGY

ANTH 1115G. Introduction to Anthropology**3 Credits (3)**

Anthropology is the systematic study of the humanity both past and present. The course introduces students to the four subfields of anthropology, which include archaeology, biological, linguistic and cultural anthropology. Students will learn about the concepts and methods that anthropologists use to study our species and gain a broader perspective on the human experience.

Learning Outcomes

1. Describe and summarize terms, approaches, and cultural and biological adaptations in the four subfields of anthropology. Explain and analyze conceptual and ethical arguments in the four subfields of anthropology. Effectively communicate content, perspectives, and ideas in four subfields of anthropology. Critically evaluate sources, approaches, and arguments in the four subfields of anthropology.

ANTH 1135G. Introduction to Biological Anthropology**3 Credits (3)**

This course provides a basic introduction to the broad field of biological anthropology. The research interests of biological anthropologists include the history and development of modern evolutionary biology, molecular and population genetics, modern primates, the primate and human fossil record, and modern human biological diversity.

Corequisite(s): ANTH 1135L.

Learning Outcomes

1. Summarize the basic principles of evolution and recognize how they apply to the human species. Recognize the biological and behavioral continuity of humans with all life, and especially other modern primate species. Identify ways in which the human species is biologically and behaviorally unique. Summarize fossil evidence for human evolution. Distinguish the major Paleolithic industries and outline the behavioral and cognitive changes indicated by the fossil and archeological evidence. Critically evaluate popular accounts of human variation and human evolution. Interpret modern human dilemmas (e.g., overpopulation, co-evolution of disease, and genetic engineering) from an evolutionary perspective. Discuss in class and analyze in writing scholarly arguments concerning course concepts.

ANTH 1135L. Introduction to Biological Anthropology Lab**1 Credit (2P)**

This laboratory course expand on the topics covered in lecture course and uses scientific methods and principles to examine evidence for the process of evolution, the nature of heredity, human evolutionary history and family tree relationships, primate ecology and behavior, and modern human diversity.

Hands-on experience with fossil and skeletal material will be an important part of the learning process. **Corequisite(s):** ANTH 1135G

Learning Outcomes

1. Demonstrate an understanding of the scientific method. Employ principles of Mendelian genetics to determine genotype and phenotype probabilities, and calculate gene, genotype, and phenotype frequencies using the Hardy-Weinberg Equilibrium formula. Demonstrate an understanding of cell structure and functions. Use common lab and anthropometric equipment such as a compound microscope and calipers. Discuss primate evolution, and compare and contrast members of the Primate order in terms of structure, behavior, and phylogeny. Classify hominid species based upon selected traits such as anatomical changes associated with bipedalism, changes in the size and structure of the brain, and the development of culture. Locate and describe the major bones of the human skeleton, and identify characteristics of human skeletons or skulls such as gender, age, and ancestry. Discuss current research in genome analysis of various hominid populations.

ANTH 1136. Introduction to Historic Preservation**3 Credits (3)**

Introduction to historic preservation, its history, goals, methods, legal basis, and economic importance. Explores public role in decision-making. Community Colleges only.

Learning Outcomes

1. Understand why historic preservation is important;
2. be familiar with what is important to preserve;
3. know who among the general public, state, and federal governments is responsible for preserving the past;
4. Have gained experience in how we all preserve.

ANTH 1137G. Human Ancestors**3 Credits (3)**

Evolutionary history of the human species from its origin in the primate order, with primary emphasis on the evolution of humankind during the past three million years. Examination of the social lives of apes and consideration of similarities to and differences from them. Biological foundations of human behavior, emphasizing thought, movement, and interaction.

Learning Outcomes

1. Describe the evolution of the human species, from its origin in the primate order to the emergence of Homo sapiens, and to the present-day.
2. Describe the social lives of apes and identify similarities to and differences between apes and humans.
3. Explain the biological foundations of human behavior.

ANTH 1140G. Introduction to Cultural Anthropology**3 Credits (3)**

This is an introductory course that provides an overview of cultural anthropology as a subfield within the broader discipline of anthropology and as a research approach within the social sciences more generally. The course presents core concepts and methods of cultural anthropology that are used to understand the ways in which human beings organize and experience their lives through distinctive cultural practices. More specifically, this course explores social and cultural differences and similarities around the world through a variety of topics such as: language and communication, economics, ways of making a living, marriage and family, kinship and descent, race, ethnicity, political organization, supernatural beliefs, sex and gender, and globalization. This course ultimately aims to present a broad range of perspectives and practices of various cultural groups from across the globe.

Learning Outcomes

1. Introduce students to the basic concepts and research methods of cultural anthropology as one of the disciplines of social science, including fundamental concepts, such as culture and society, which form the pillars of the discipline (e.g., cultural relativism, cultural persistence and change, world-view and enculturation). Comprehend the importance of studying cultural anthropology. Demonstrate knowledge of the practice of anthropological research in the modern world that is increasingly multicultural, transnational and globally interconnected (e.g., globalization and modern world system). Demonstrate an awareness of how students' own cultures shape their experiences and the way they see the world, as well as help them understand and interact with other cultures. Understand how beliefs, values and assumptions are influenced by culture, biology, history, economic, and social structures. Gain a sense of relationship with people possessing different experiences from their own. Gain a deeper understanding and appreciation for cultural anthropology as a broad discipline through learning about its practices, and differentiating cultural anthropology from other disciplines that study

ANTH 1160G. World Archaeology**3 Credits (3)**

This course is an exploration of human evolution and cultural development throughout the world. Students will be introduced to basic anthropological methods and theories and will learn how anthropological research has contributed to our understanding of major themes in human prehistory, including human evolution, the origins of culture, migration and colonization, animal and plant domestication, and the rise and fall of civilizations.

Learning Outcomes

1. Describe and explain the major developments in human prehistory.
2. Identify and describe major archaeological cultures throughout the world.
3. Employ critical thinking skills in the evaluation of competing theories about the past.
4. Select and use relevant archaeological evidence to explain how prehistoric populations adapted to their natural and cultural environments.
5. Demonstrate competency in written communication.

ANTH 2140G. Indigenous Peoples of North America**3 Credits (3)**

This course is a general survey of the history and ethnology of indigenous groups in North America. The course is designed to give students a comprehensive view of major issues pertaining to the indigenous cultures of North America, such as family structure, social organization, subsistence and contemporary economies, environmental adaptation, Indian-White relations, religious practices, and contemporary issues.

Learning Outcomes

1. Demonstrate familiarity with common elements pertaining to the languages and social organization of indigenous peoples in North America.
2. Recognize fundamental differences and similarities among traditional indigenous cultures.
3. Describe social relations of indigenous peoples in relationship to other ethnic groups.
4. Identify and analyze important ways that European societies and cultures and indigenous societies and cultures interacted from the time of Columbus to the present.
5. Evaluate the impacts of Euroamerican policies and programs on indigenous cultures.
6. Distinguish major social issues facing contemporary indigenous communities in North America.
7. Understand objectives and limitations of cross-cultural analysis in anthropology as they relate to the study of indigenous peoples in North America.
8. Demonstrate research and communication skills as they relate to the study of indigenous peoples in North America.

ANTH 2150. Indigenous Peoples of the American Southwest**3 Credits (3)**

This course is a study of indigenous cultural groups of the American Southwest. Students will explore historical and contemporary cultural and social patterns of American Indian, Hispanic and Anglo-American groups.

Learning Outcomes

1. Describe socio-cultural developments, geographic environments, and characteristics of major cultural groups that currently inhabit the American Southwest.
2. Recognize underlying similarities as well as the wide range of variability of the cultural groups in the American Southwest.
3. Recognize the impacts and effects of Euroamerican colonization on indigenous cultural groups in the American Southwest.
4. Describe the historical interactions and accommodations among indigenous cultural groups in the American Southwest.
5. Examine the processes of cultural change within major cultural groups in the American Southwest.
6. Identify and analyze some of the contemporary issues faced by major cultural groups in the American Southwest.

ANTH 2996. Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Learning Outcomes

1. Varies

ANTH 301. Cultural Anthropology**3 Credits (3)**

Human concepts of culture and life processes.

ANTH 305V. Contemporary Native Americans**3 Credits (3)**

Introduction to contemporary native peoples and cultures of North America. Emphasis on sociocultural and socioeconomic history, sociocultural change and persistence, present day reservation life, and current social and economic goals.

ANTH 306V. Peoples of Latin America**3 Credits (3)**

Introduction to cultural patterns and diversity of Latin America with emphasis on indigenous groups, peasants, plantation workers, and urban residents throughout South America, the Caribbean, Mexico, and Central America.

ANTH 307V. Japanese Culture and Society: Anthropological Perspectives**3 Credits (3)**

This course introduces students to Japanese culture from anthropological and philosophical perspective. Learning about Japanese culture (non-Western) enhances students' awareness of the diversity of human values, beliefs, and morals and provides an understanding of cultural differences outside of mainstream American culture.

Learning Outcomes

1. Take a position on an anthropological theory that accounts for how and why Japanese culture has changed through time.
2. Select and integrate relevant anthropological perspectives to argue for or against ethical and moral differences between American and Japanese cultures.
3. Analyze social, political, and religious aspects in Japanese society and compare them with those in America.
4. Investigate sociopolitical and economic status of minority groups in Japan using anthropological approaches and compare them with those of America.
5. Engage in face-to-face interactions with Japanese people in southern New Mexico and discuss similarities and differences between cultures, values, and worldview.

ANTH 312. The Ancient Maya**3 Credits (3)**

Archaeological evidence of culture change in the Maya civilizations of Mexico and Central America from 2000 BC to the Spanish Conquest.

ANTH 313V. Ancient Mexico**3 Credits (3)**

Archaeological exploration of the development and culture change of the Aztec, Zapotec, and Maya civilizations of Mexico and Central America from 12,000 years ago to the Spanish invasion of 1521.

Learning Outcomes

1. Take a position on theories that explain how, when, and why human lifeways changed in ancient Mesoamerica. Select and integrate relevant archaeological evidence to argue for and against a theoretical position. Analyze the significance of sites, structures, artifacts, and ecofacts within their archaeological contexts and explain their relevance for people today. Evaluate how practices in research, conservation, and tourism to archaeological sites promote stewardship of non-renewable archaeological resources and intangible heritage. Design and present a public tour of an archaeological site in Mexico or Central America to promote and integrate best practices for the preservation of archaeological resources.

ANTH 315. Introduction to Archaeology**3 Credits (3)**

Concepts and methods for study of prehistoric cultures; history of archaeological research.

ANTH 318. Historical Archaeology**3 Credits (3)**

This survey course explores the development of historical archaeology, its methods and theory, and popular research themes within the discipline. Students will be introduced to the ways that archaeologists identify and analyze historical-period documents, oral histories, features, and artifacts, and how they use these data to deepen our understanding of the recent past. Crosslisted with: ANTH 518.

Learning Outcomes

1. Critically evaluate historical sources.
2. Identify and analyze common historical-period artifacts and features.
3. Utilize historical and archaeological evidence in research.
4. Demonstrate how historical archaeology can be used to draw attention to and highlight the contributions of diverse populations in history.
5. Demonstrate improved oral and written communication skills.

ANTH 320. Anthropological Linguistics**3 Credits (3)**

The study of language and culture with particular emphasis on the cultural factors in the communication process.

ANTH 330V. Magic, Witchcraft and Religion**3 Credits (3)**

Provides an overview of old and new methods and theories for the study of religion. Exposure to the ways groups of people in diverse cultural systems construct and change their religious traditions to serve practical and meaningful ends. Crosslisted with: HIST 330V and SOCI 330V.

ANTH 345. Introduction to Museology**3 Credits (3)**

This course provides a broad introduction to the museum world. Through discussion of readings, examination of case-studies, and practical assignments, students will gain an understanding of the museum as an institution, as well as learn the challenges and responsibilities that museums and their staff encounter. Topics include the history of museums, contemporary debates surrounding the definition of museums, ethical and legal issues, and community connections. The course will cover various types of museums—including art, history, ethnographic, indigenous, and scientific—and discuss how these thematic orientations impact museum practice. Students will also explore common museum processes such as collecting, cataloguing, conservation, exhibition, research, and education through practical exercises using the collections of the University Museum in Kent Hall, as well as through case studies of museums around the world.

Learning Outcomes

1. Describe the major conceptual and practical influences on museums today—including issues of historical development, ethics, missions, and thematic orientations. Critically engage with diverse types of museums as cultural institutions, their practices, and the communities with whom they engage. Implement skills relevant to the museum profession, such as collections management, condition reporting, exhibition and programming planning, and research.

ANTH 347. Museum Confidential**3 Credits (3)**

This course will introduce students to many of the fundamental concepts behind the creation of a museum exhibition. Drawing from the extensive permanent collection of the University Museum, housed in the basement of Kent Hall, students will gain hands-on experience with exhibition development, resulting in the creation of a temporary public exhibition in the west gallery of the Museum. By turning the museum inside-out, this course will be a unique behind-the-scenes experience. Through readings and discussion, we will also examine historic and contemporary interpretations of exhibitions and collections from the cabinet of curiosity and wunderkammer, to readymades and Mark Dion's re-imagined museums. Crosslisted with: ANTH 547.

Learning Outcomes

1. Explain the basic concepts and terminology of the museum
2. Differentiate the functions, roles, duties and responsibilities of museums
3. Describe the types of museums and their historical development
4. Discuss the challenges and responsibilities that museums and their staff members encounter, most especially in collections
5. Employ the fundamental principles and practices of museum documentation (knowledge of deaccessioning and the challenges faced by museum and inherited collections)
6. Apply the fundamental principles and practices of collection management
7. Synthesize the fundamental principles and practices of museum exhibition planning and design including the role of the curator

ANTH 349. Museum Anthropology**3 Credits (3)**

This course provides an introduction to the methodological and theoretical approaches of museum anthropology. Students will gain experience with all these aspects of museum anthropology in the course by engaging with critical scholarship, analyzing case studies, and practicing collections-based research methods utilizing the collections of the University Museum. Through assignments students will analyze objects in the museum's collections using techniques of close looking, drawing, photography, sequences of making, and external research using scholarly sources. Students will gain skills in primary and secondary research, the analysis of material culture, and the practicalities of navigating research in museums.

Learning Outcomes

1. Describe major theoretical approaches to museum anthropology, and how these have
2. changed over time. Critically engage with the intersections between museums as institutions and the practice of anthropology, including the politics of representation. Implement methodological research skills as a student-scholar by conducting independent research based on museum collections. Convert collections-based research into written and media works characteristic of
3. scholar-facing and public-facing practice in museum anthropology, curatorship, and
4. museum studies.

ANTH 350. Anthropological Theory**3 Credits (3)**

This course introduces students to historical and contemporary theory in anthropology with a focus on understanding why theory matters in our discipline. Key questions the course explores include: How have anthropologists thought about the concept of culture in different ways throughout the history of anthropology? What is the relevance of anthropological theory, both inside and outside the discipline? What new and promising trajectories do we see in anthropological theory today?

ANTH 355. Biological Anthropology**3 Credits (3)**

An introduction to the fundamentals of the scientific method and organic evolution specific to the study of human origins and contemporary biological variation. Non-human primate diversity and behavior are also considered.

Learning Outcomes

1. Increase scientific literacy.
2. Improve specific skill areas including: Critical thinking; Expository writing; Analytical reading; Oral presentation skills.
3. Establish foundational knowledge as a basis for further study in: Evolutionary theory; Human variation and adaptation; Primatology; Human origins and evolution.

ANTH 356. Forensic Anthropology**3 Credits (3)**

Overview of the field of forensic anthropology. Topics covered include basic human osteology; skeletal examination and documentation; skeletal trauma; personal identification; forensic taphonomy and the process of decomposition; archaeology and scene processing; sex, age, stature, and ancestry estimation; and contemporary issues and limitations in the field of forensic anthropology.

Learning Outcomes

1. Learn about the scientific method and how to apply scientific findings to field work.
2. Learn about the history and applications of forensic anthropology.
3. Gain a practical understanding of the methods, applications, and limitations of forensic anthropology as relates to police and other investigations.
4. Learn to identify human bones and the process of building a biological profile of human remains.
5. Learn about decomposition and how forensic anthropologists process and interpret crime scenes.

ANTH 357V. Medical Anthropology**3 Credits (3)**

This course introduces students to evolutionary, ecological, interpretive, political-economic, and applied anthropological perspectives on health, illness, and healing to address some of the major questions in the field. How do humans adapt to changing environments that bring with them new illnesses and diseases? How do anthropologists understand the multiple meanings of health and illness cross-culturally? How can anthropologists effectively study health inequalities? What can medical anthropological perspectives contribute to addressing the health issues that we face in our current global context?

Learning Outcomes

1. Explain medical anthropology to someone unfamiliar with the field. Meeting this goal requires that you are able to: Define medical anthropology; Define health, illness, sickness, disease, and healing; Explain basic research methods in medical anthropology; Identify the different perspectives within medical anthropology.
2. Evaluate health problems from medical anthropological perspectives. Meeting this goal requires that you are able to: Accomplish goal Identify different medical anthropological perspectives in research and reporting on health problems; Identify what is missing (based on your knowledge of medical anthropological perspectives) in addition to what is present in research and reporting on health problems.
3. Apply medical anthropological perspectives to current health problems. Meeting this goal requires that you are able to: Accomplish goals 1 and 2; Develop deeper understanding of medical anthropological perspectives by formulating "in your own words" definitions of medical anthropological perspectives; Identify multiple facets of major health issues.

ANTH 360V. Food and Culture Around the World**3 Credits (3)**

Study of the interaction between food and human culture from an anthropological perspective. Examines the traditional role of food in local economies, social relations, and identity around the world. Also examines the impact of globalization on traditional food systems and cultures.

ANTH 362V. Environmental Anthropology**3 Credits (3)**

This course examines environmental studies from an anthropological perspective. The class focuses on how cultural values mediate environmental management. The class covers topics such as environmental anthropology, large scale development, biodiversity conservation, sustainable development, indigenous groups, consumption, and globalization.

Learning Outcomes

1. Students will understand the impact of cultural values on how humans interact with the environment. Students will understand how different cultural perspectives can be used to address environmental problems. Students will critically reflect on their own environmental values and recognize how these values are shaped by our own culture.

ANTH 375. Pottery Analysis in Archaeology**3 Credits (3)**

This course introduces the basic concepts, methods, and approaches used in the analysis of archaeological pottery. The purpose of the course is first to provide hands-on experience with the full range of analytical techniques routinely applied to ceramic materials recovered from archaeological sites, but to also provide a contextual framework for the interpretation and evaluation of these data. Classes consist of brief introductory lectures, and seminar presentation and discussion of course readings. Lab meetings consist of exercises designed to provide you with practical experience working with the materials and measures covered in lectures and readings. Crosslisted with: ANTH 575.

Learning Outcomes

1. Students will learn the theory underlying pottery analysis as well as some of the methods used to identify and interpret pottery;
2. Students will learn to think about the organization of pottery technology from a behavioral rather than a purely typological framework;
3. Students will have the opportunity to develop and then evaluate a research question or problem statement within a chosen theoretical framework, as well as have the opportunity to evaluate that question or questions using both qualitative and quantitative analyses;
4. Students will gain the skills needed to assess pottery analysis reports and undertake pottery analyses for senior thesis, M.A. theses, and CRM contexts.

ANTH 376. Lithic Technology Organization**3 Credits (3)**

Advanced seminars and laboratory exercises to learn and develop techniques and methods that will help us determine how to interpret behavioral and cultural information from lithic (stone tool) data.

Prerequisite(s): ANTH 315.

ANTH 378. Introduction to Lab Methods in Archaeology**3 Credits (3)**

Laboratory techniques used in the analysis of archaeological materials.

ANTH 385. Internship in Anthropology**3-12 Credits (3-12)**

Applied or field experience to gain professional expertise. Placements with public agencies, NGOs, or research organizations. Topical focus tailored to student's individual needs through consultation with instructor.

Prerequisite(s): Junior status, consent of instructor and GPA 2.8 or better.

ANTH 388. Intermediate Archaeological Field School**2-6 Credits (2-6)**

Training in archaeological field methods, including excavations of prehistoric sites, record keeping, mapping and analysis of data. Consent of Instructor required.

ANTH 389. Archaeological Mapping**3-6 Credits (3-6)**

Techniques for mapping archaeological sites and recording spatial distributions of archaeological data using a variety of surveying equipment and computer mapping software.

ANTH 399. Professionalism & Practice in Anthropology**3 Credits (3)**

Capstone course for seniors designed to allow students to synthesize the anthropological knowledge they have acquired and connect theory to application in preparation for entry into a career. Restricted to: ANTH majors.

ANTH 402. Contemporary Medical Anthropology**3 Credits (3)**

Contemporary Medical Anthropology This advanced seminar in medical anthropology addresses contemporary issues in the field of medical anthropology through theoretical and ethnographic texts. Topics span a wide range of studies in medical anthropology and may include such issues as the social production of health and illness, medical pluralism, discourses of mental health, the practice of complementary and alternative medicine, health disparities, the political economy of infectious disease, race and biological variation in biomedicine, and implementing biocultural perspectives. Crosslisted with: ANTH 546.

Prerequisite(s): ANTH 301 or ANTH 355 or ANTH 357V or consent of instructor.

Learning Outcomes

1. Discuss current issues relevant to the study of medical anthropology.
2. Apply medical anthropological concepts and ideas to theoretical and practical health issues.
3. Acquire skills in the critical appraisal of ethnographic literature.

ANTH 407. Native American Education**3 Credits (3)**

This is a survey course that explores the education of Natives from multiple perspectives; the perspectives of Native theories and practices, the colonizers'-imposed education theories and practices, U.S. federal educational policies and practices, tribal systems of education, and responses from those experiencing the education. Starting with traditional education, the course will examine colonial education, federal and tribal efforts, contemporary models of Indian education including issues and challenges, and the educational sovereignty of tribes.

Learning Outcomes

1. Describe (verbally and written) traditional methods of education used by Native Americans. Discuss and interpret (verbally and written) the theories and practices of educating Natives in different eras. Compare (verbally and written) the different systems of education for Native Americans. Articulate (verbally and written) contemporary Native American educational issues and challenges. Be able to articulate (verbally and written) support for educational sovereignty of tribes. Research, analyze and orally present a written paper about an American Indian boarding school and its legacy.

ANTH 414. The Archaeology of Religion**3 Credits (3)**

The class offers an in-depth introduction to the Archaeology of Religion focusing on the theoretical framework of artifact agency. The course begins with a discussion of the role of material culture in society and religion (artifact agency theory) and then moves through a series of case studies that highlight important themes in the archaeology of religion. These themes include the Religion among the Earliest Paleolithic Cultures, Relationships between Houses and Temples, Sacrifice (Artifact, Animal and Human), New Religious Movements, and Witchcraft Persecution.

Learning Outcomes

1. Students will develop a stronger understanding of the role of religious material culture in anthropology and archaeology. Students will develop strong research skills by applying that knowledge of material culture theory in a term paper that explores artifact agency in an ancient religion. Students will develop strong communication skills through the preparation of a written term paper and class power point presentation of that research.

ANTH 415. Applied Anthropology**3 Credits (3)**

Examines the intellectual roots of applied anthropology and early case studies of anthropologists working as administrators. Examines the ethical and methodological approaches that applied anthropologists employ. Examination of case studies that show role of applied anthropologists in improving human service delivery, cultural preservation, planning and implementing programs of participatory change, advocacy, and economic development. Taught with ANTH 515.

ANTH 419. Topics in Prehistoric Archaeology**3 Credits (3)**

Specific subjects in prehistoric archaeology as announced in the Schedule of Classes. May be repeated up to 6 credits.

ANTH 431V. Nutritional Anthropology**3 Credits (3)**

This course provides biological, ecological, and cross-cultural perspectives on human nutrition. Topics covered include human nutritional evolution, dietary adaptation, variation in human foodways and habits, relationships between diet and health, nutrition transitions, and methods for studying human diet and nutrition in field settings.

Learning Outcomes

1. Understand the ways in which biology, culture, and ecology shape human nutritional outcomes and dietary patterns. Be able to identify methods best suited to answering questions about human diet and nutrition in field settings. Be able to develop a research question and basic research strategy.

ANTH 434. Human Evolution**3 Credits (3)**

Overview of human biological evolution from the emergence of Miocene apes to modern human diaspora. May be repeated up to 3 credits. Crosslisted with: BIOL 434.

Prerequisite(s): ANTH 355 or consent of instructor.

ANTH 435. Human Health and Biological Variation**3 Credits (3)**

Overview of contemporary human biological variation and adaptability within a scientific evolutionary and biocultural framework. Special emphasis is placed on human adaptation to the environment and the sociocultural, epidemiological, and evolutionary factors that underlay contemporary issues in human health and disease. Crosslisted with: ANTH 535.

Learning Outcomes

1. Develop critical thinking skills and scientific literacy through discussion, reading, and writing exercises and evaluating scientific theories, data, and research methods.
2. Develop an understanding of evolutionary theory, and how human organic evolution shapes variation, adaptation, and health in contemporary human populations.
3. Learn how human evolutionary history has shaped the global distribution of contemporary human biological diversity.
4. Understand the scientific critique of the biological race concept, and how social inequality, particularly racism, can become embodied.
5. Understand the various ways that humans adapt to the environment on different timescales.
6. Study life course theory and how experiences during development impact health across the life course.
7. Develop specific transferable skills, including written communication, public speaking, and information gathering (research), and for graduate students, research questions development, hypothesis testing, basic data analysis/visualization in Excel.

ANTH 436. Evolutionary Medicine**3 Credits (3)**

This course provides an overview of evolutionary medicine, a field that applies evolutionary theory to understanding variation in human biology and health and treating and preventing disease. Topics covered in the course include evolutionary perspectives on diet and nutrition, chronic disease, infectious disease, cancer, stress, mental health, reproductive health, women's health, and child growth and development.

Learning Outcomes

1. Understand the basic principles of evolutionary theory. Understand how anthropologists and medical and public health professionals can apply evolutionary theory to understand human health and disease. Understand both the promise and limits of evolution as an explanatory paradigm for variation in human health and disease. Be able to apply principles of evolutionary medicine to development of a research proposal. Develop collaborative and oral presentation skills through a group presentation.

ANTH 441. Indigenizing Methodologies in Native American Studies**3 Credits (3)**

This course utilizes decolonizing (indigenizing) methodologies and praxis to gain insight into the complex effects of oppression and colonization. The course uses critical and indigenous concepts to identify and analyze hegemonic, ethnocentric, historic and contemporary human rights and social justice issues of indigenous people. Emphasis includes research theory and methodology, such as community participatory action research, that is collaborative, inclusive, and pragmatic to ethics, intellectual property, and cultural boundaries of indigenous people. Crosslisted with: ANTH 541.

Learning Outcomes

1. The student is able to describe and explain some of the complex effects of oppression and colonization on indigenous peoples.
2. The student is able to identify historic and contemporary issues that have influenced and affected the study and research of indigenous peoples.
3. The student is able to convey particular research theory and methodology that is collaborative, inclusive, and pragmatic to ethics and cultural boundaries of indigenous people.

ANTH 444. Native American Visual Culture**3 Credits (3)**

This course examines the various theoretical and methodological challenges inherent to the study of indigenous art, including the issues of identity, sovereignty, gender, cultural critique, and the role of the artist. In addressing the interdisciplinary nature of the field, students will seek to find strategies in approaching their own research. Crosslisted with: ANTH 544.

Learning Outcomes

1. Identify NA / Indigenous, film/video writers and directors.
2. Locate NA / Indigenous nations with their geo-physical location.
3. Consider issues of identity concerning Indigenous population.
4. Apply "colonizing" / "decolonizing" methodologies.
5. To practice writing short analytical journal entries.
6. To learn effective group discussion techniques

ANTH 449. Directed Reading**1-6 Credits**

Comprehensive reading on selected topics. May be repeated for a maximum of 6 credits.

Prerequisite(s): Upper division anthropology majors with consent of instructor.

ANTH 449 H. Directed Reading Honors**1-3 Credits**

Same as ANTH 449. Additional work to be arranged. May be repeated for a maximum of 6 credits.

ANTH 453. Native American Women**3 Credits (3)**

Students investigate the status, experience, and contributions of Native American women from pre-contact to contemporary times. Identifying the contribution of Native American women to societies, communities, and Nations as keepers of knowledge, teachings, and traditions. Crosslisted with: ANTH 553.

Learning Outcomes

1. Explore and examine the roles of American Indian women within a tribal society and analyze the impact of colonization and decolonization upon their place / roles over time.
2. Evaluate historical and contemporary issues of importance to American Indian women and their communities.
3. Assess a topic, book or issue of importance to Native women through a research paper, case study, or exam demonstrating in-depth knowledge and understanding.
4. Demonstrate in-depth knowledge and understanding of Native American women histories and contemporary issues.
5. Formulate a paper on Native woman/tribal women from historical or contemporary sources and share with class (undergraduates).
6. Demonstrate in-depth knowledge and understanding of Native American women through an exam/final (undergraduates).

ANTH 454. An Indigenous Peoples History of the United States**3 Credits (3)**

This course is a history of United States as experienced by the Indigenous people. It delineates the Indigenous experience as reflected in Native American scholarship and research. The Indigenized and decolonized Native perspective provides an educative authenticity of Indigenous knowledge comprehensible to all, particularly the non-Indian.

Learning Outcomes

1. The student can identify and describe significant historic periods as experienced by the Indigenous inhabitants in United States The student is able to identify and differentiate aspects of the Native American historic experience in relationship to the standard linear chronicle timeline as reflected in U.S. history. The student is able to compose a brief summary review of the Native American historic periods as evidenced in scholarship and research.

ANTH 455. Federal Indian Policy**3 Credits (3)**

Federal Indian policy and its impact on Native Americans. This course will provide basic understanding of how federal Indian policy impacts almost all activities and situations with Native Americans. Course will also look at issues such as sovereignty and how it impacts most interactions with tribal groups.

ANTH 456. Native American Intersections in Museums**3 Credits (3)**

This course explores the changing relationships and complex intersections between Native people and museums. We will examine how museum practices of collection and exhibition influence ways in which knowledge is formed and presented, and interrogate the role of museums as crucial sites for discourse around issues of ownership, indigenous knowledge and representation. Case studies revealing shifting meanings of objects, curatorial challenges, the development of tribal museums and repatriation complexities will be used to critically engage with Native responses via art, criticism and legal action. Crosslisted with: ANTH 556.

ANTH 458. Fertility, Reproduction and Birth**3 Credits (3)**

This course examines biocultural variation in reproductive health and birth practices, with topics such as gendered roles and responsibilities, pregnancy and birth as rites of passage, cultural concepts of personhood, global family planning initiatives, the medicalization of pregnancy and birth, developing reproductive technologies, and reproductive health disparities.

Prerequisite(s): ANTH 301 or ANTH 355 or ANTH 357V or consent of instructor.

Learning Outcomes

1. Identify multiple anthropological perspectives on sex, reproduction, and birth. Anthropologists approach questions about human sex, reproduction, and birth in a variety of ways. You will be able to identify and discuss some major perspectives in this area.
2. Critically analyze anthropological concepts of sex, reproduction, and birth. This course focuses on discussion of anthropological ideas about sex, reproduction, and birth. Not all fully agree with one another nor do they all fully answer the questions you may have. You should approach the materials we read and discuss from a critical angle.
3. Apply anthropological concepts about sex, reproduction, and birth to contemporary anthropological "problems" Throughout the course, you will reflect on the usefulness of different perspectives on sex, reproduction and birth to address current issues that we face in our globalized world.

ANTH 459. Peru: From Incas to Inca Kola**3 Credits (3)**

Explores issues of cultural and national identity in Peru from the Incas to the present, focusing on the modern period. Themes include indigenous resistance and adaptation to colonial rule, nationalism, militarism, terrorism, globalization, and the drug trade. Crosslisted with: HIST 459

ANTH 463. Cultural Resource Management I**3 Credits (3)**

This course introduces you to the field of cultural resource management (CRM) and to the federal and state laws and regulations that govern most archaeology and historic preservation projects conducted today. Class lectures, readings, and written assignments will cover the major relevant US federal laws (NHPA, NEPA, ARPA, NAGPRA); New Mexico state cultural resource laws, regulations, and permitting practices; and major international heritage laws. Particular emphasis will be placed on understanding how to evaluate and nominate cultural resources for listing on the National Register of Historic Places (NRHP). Good oral and written communication skills are essential for success in CRM, so students will be provided with numerous opportunities to develop these skills in class.

Learning Outcomes

1. Explain the goals of cultural resource management (CRM) Describe the major laws and regulations that govern CRM in the United States, in the state of New Mexico, and abroad
2. Mexico, and abroad
3. Identify some common challenges with implementing these laws and regulations Determine the eligibility of cultural resources for listing on the NRHP, and justify this determination

ANTH 464. Curation Crisis in Archaeology**3 Credits (3)**

This collection management course will introduce students to collections curation, collections care, and collections-based research. Archaeological collections stewardship begins before an archaeologist steps foot into the field and continues well after the recovered collections reach the repository. This course provides students with an understanding of the curation crisis using archaeological collections curated at the University Museum as a case study and the responsibilities that archaeologists have to the collections they generate.

Learning Outcomes

1. Learn about the maintenance of archaeological collections Learn about the management of, access to, and use of archaeological collections Learn about the curation crisis at a small museum (e.g., Kent Hall University Museum) Learn about collections-based research Learn about various ways of disseminating archaeological collections to the public Change the perception of the "just digging and we will deal with the collections later" approach.

ANTH 467. Archaeology of the American Southwest**3 Credits (3)**

Description and analysis of prehistoric archaeology of the American Southwest including paleo-environmental reconstruction, culture change, and relations with contemporary cultures.

Prerequisite: ANTH 315.

ANTH 472. Primate Behavior and Ecology**3 Credits (3)**

Survey of the social behavior and ecology of nonhuman primates. Crosslisted with: BIOL 472.

ANTH 474. Human Osteology**3 Credits (3)**

A survey of the functional, developmental, and evolutionary biology of the human skeleton. Identifying bones and teeth from hands-on experience with skeletal and dental material. Provides a foundation for human evolutionary studies, bioarchaeology and forensic anthropology. May be repeated up to 3 credits. Crosslisted with: BIOL 424.

ANTH 474 L. Human Osteology Lab**1 Credit (1P)**

Laboratory for ANTH 474. Experiences and activities related to identifying teeth and bones of the human skeleton. Students are recommend to take ANTH 355 or an equivalent before enrolling in this course. Crosslisted with: BIOL 424 L.

Corequisite(s): ANTH 474.

ANTH 477. Zooarchaeology**3 Credits (3)**

Detailed study and analysis of taphonomic processes affecting animal bone recovered from archaeological and paleontological contexts. May be repeated up to 3 credits.

ANTH 485. Special Research Project**1-3 Credits**

Anthropological, archaeological, or museum field work or laboratory experience in academic, private, state, or federal agencies. Must spend 30 hours in a field, museum, or laboratory setting per credit hour earned. May be repeated up to 6 credits.

Prerequisite(s): Complete 12 ANTH credits and consent of instructor.

ANTH 486. Community Engagement and Service Learning**3 Credits (3)**

Course combines classroom instruction with a local community service project. Formal instruction component will examine social science research findings and perspectives on a locally relevant social issue or problem. In the service learning component, students will be trained and work on a local community service project. Students will develop field experience and methodological skills in community engagement. Projects and social issues may vary for different semesters.

ANTH 488. Archaeological Field School Advanced**1-6 Credits**

Archaeological field methods, including excavations of prehistoric sites, record keeping, mapping and analysis of data. Consent of Instructor required.

ANTH 497. Special Topics**1-6 Credits (1-6)**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite(s): Junior or above standing.

ANTH 500. Seminar in Anthropological Theory**3 Credits (3)**

Detailed focus on specific areas of anthropological theory. Course subtitled in the Schedule of Classes. Course may be repeated.

Prerequisite(s): graduate standing in Anthropology or consent of instructor.

ANTH 502. Fundamentals of Anthropology**1-4 Credits (1-4)**

Review of fundamental knowledge and theories in biological, cultural, or linguistic anthropology or archaeology. Graded S/U.

ANTH 503. Anthropological Theory**3 Credits (3)**

This seminar is designed to introduce graduate students to the major concepts and developments in anthropological theory. Students will develop an understanding of the major principles, contributions, and limitations of anthropological theory from the 1890s to the present. The course will address theoretical developments in biological anthropology, sociocultural anthropology, archaeology, and public and applied anthropology.

Learning Outcomes

1. Articulate the history of theoretical developments in multiple anthropological subfields and explain the holistic connections among them.
2. Explain and critique the major theoretical formulations of the field, including: human biological evolution and variation; cultural relativism; practice theory; life history and formation processes of archaeological, paleontological, and contemporary sites and specimens; historical contingency in culture change and globalization; human ecology and environmental anthropology, past and present; indigenous perspectives, participatory action research, and collaborative research designs; identity and the intersections of gender, sex, race, class, and other categories, past and present; origins and contemporary variation of inequality and socioeconomic disparities; political economy, domination and resistance, past and present; the development and critique of diverse narratives of the past drawn from archaeological/material, visual and performative, documentary, and oral historical media; stewardship of tangible and intangible cultural heritage,
3. Read and practice in the norms of written and verbal expression across multiple theoretical domains in anthropology.

ANTH 505. Issues in Anthropological Practice**3 Credits (3)**

Anthropological approaches to research design, implementation, and dissemination. Restricted to: Main campus only.

ANTH 506. Advanced Studies in Physical Anthropology**1-3 Credits**

Lectures, seminars, or laboratory research in selected topics. May be repeated for a maximum of 12 credits.

Prerequisite(s): graduate standing in Anthropology or consent of instructor.

ANTH 507. Advanced Studies in Archaeology**1-3 Credits**

Lectures, seminars, field or laboratory research in selected topics. May be repeated for a maximum of 12 credits.

Prerequisite(s): graduate standing in Anthropology or consent of instructor.

ANTH 508. Advanced Studies in Cultural Anthropology**1-3 Credits**

Lectures, seminars, or field research in selected topics. May be repeated for a maximum of 12 credits.

Prerequisite(s): graduate standing in Anthropology or consent of instructor.

ANTH 509. Advanced Studies in Anthropological Linguistics**1-3 Credits**

Lectures, seminars, or field research in selected topics. May be repeated for a maximum of 12 credits.

ANTH 512. Quantitative Analytical Methods in Anthropology**3 Credits (3)**

This class is an introduction to statistical analysis of anthropological and social science data. Students will learn how quantitative and statistical techniques are used in the analysis of anthropological problems and how to evaluate statistical arguments in the literature. No previous background in statistics is required. We will consider data collection, sampling and statistical populations, exploratory summaries of data, and the importance of choosing appropriate statistical techniques. All course work will emphasize anthropological interpretation through applied statistical methods. The course has a four-field focus (archaeology, biological anthropology, cultural anthropology, and linguistics), and students will work with readings, examples, and problem assignments from each subfield.

Learning Outcomes

1. Articulate the difference between descriptive and inferential statistics.
2. Explain the difference between a population and a sample and learn how to draw random samples (various methods – simple random, stratified, systematic, etc.) in the field and using numerical data and statistical procedures within SAS or other STATPACKS (SPSS, R).
3. Use appropriate graphs, tables, and measures of central tendency and dispersion to display and summarize distributions of nominal, ordinal, interval and ratio level data.
4. Understand the Normal Distribution and the assumptions required for hypothesis testing.
5. Perform hypothesis testing and interpret the results for univariate, bivariate, and multivariate statistical procedures, including Chi Square, T-tests, Non-parametric Comparison tests, ANOVA, Correlation, Simple Linear Regression, Multiple Regression, Cluster and Discriminant Analysis (as time permits).
6. Develop an exploratory statistical analysis for original anthropological data and write a final paper interpreting the results.

ANTH 514. Advanced Issues in the Archaeology of Religion**3 Credits (3)**

The class offers an in-depth introduction to the Archaeology of Religion focusing on the theoretical framework of artifact agency. The course begins with a discussion of the role of material culture in society and religion (artifact agency theory) and then moves through a series of case studies that highlight important themes in the archaeology of religion. These themes include the Religion among the Earliest Paleolithic Cultures, Relationships between Houses and Temples, Sacrifice (Artifact, Animal and Human), New Religious Movements, and Witchcraft Persecution.

Learning Outcomes

1. Students will develop a stronger understanding of the role of religious material culture in anthropology and archaeology and be required to lead class discussions. Students will develop strong research skills by applying that knowledge of material culture theory in a term paper that explores artifact agency in an ancient religion. Students will develop strong communication skills through the preparation of a written term paper and class power point presentation of that research.

ANTH 515. Applied Anthropology**3 Credits (3)**

Examines the intellectual roots of applied anthropology and early case studies of anthropologists working as administrators. Examines the ethical and methodological approaches that applied anthropologists employ. Examination of case studies that show the role of applied anthropologists in improving human service delivery, cultural preservation, planning and implementing programs of participatory change, advocacy, and economic development. Taught with ANTH 415.

ANTH 516. Advanced Archaeology of the American Southwest**3 Credits (3)**

Advanced topics in Southwestern archaeology including ritual architecture, environmental reconstruction, violence, site formation processes, and experiment and research.

ANTH 517. Advanced Topics in Mesoamerican Archaeology**3 Credits (3)**

Specific subjects in Mesoamerican archaeology to be announced in the Schedule of Classes. May be repeated for a maximum of 6 credits.

Prerequisite: graduate standing.

ANTH 518. Advanced Historical Archaeology**3 Credits (3)**

This survey course explores the development of historical archaeology, its methods and theory, and popular research themes within the discipline. Students will be introduced to the ways that archaeologists identify and analyze historical-period documents, oral histories, features, and artifacts, and how they use these data to deepen our understanding of the recent past. Crosslisted with: ANTH 318.

Learning Outcomes

1. Critically evaluate historical sources.
2. Identify and analyze common historical-period artifacts and features.
3. Utilize historical and archaeological evidence in research.
4. Demonstrate how historical archaeology can be used to draw attention to and highlight the contributions of diverse populations in history.
5. Demonstrate improved oral and written communication skills.

ANTH 519. Advanced Topics in Prehistoric Archaeology**3 Credits (3)**

Seminar on specialized research archaeology.

Prerequisite: graduate standing.

ANTH 520. Ethnographic Field Methods**3 Credits (3)**

Basic methodologies used in conducting qualitative ethnographic research. Projects in participant observation, ethnographic interviews, life history interviews, folk taxonomy construction, and coding of field notes.

ANTH 522. Archaeological Field School-Graduates**2-6 Credits**

Techniques of archaeological data collection, analysis, and interpretation. Emphasis on archaeological field work in the Southwest.

ANTH 523. Archaeological Mapping**3-6 Credits (3-6)**

Techniques for mapping archaeological sites and recording spatial distributions of archaeological data using a variety of surveying equipment and computer mapping software.

ANTH 528. Advanced Native American Education**3 Credits (3)**

This is a survey course that explores the education of Natives from multiple perspectives; the perspectives of Native theories and practices, the colonizers'-imposed education theories and practices, U.S. federal educational policies and practices, tribal systems of education, and responses from those experiencing the education. Starting with traditional education, the course will examine colonial education, federal and tribal efforts, contemporary models of Indian education including issues and challenges, and the educational sovereignty of tribes.

Learning Outcomes

1. Describe (verbally and written) traditional methods of education used by Native Americans. Discuss and interpret (verbally and written) the theories and practices of educating Natives in different eras. Compare (verbally and written) the different systems of education for Native Americans. Articulate (verbally and written) contemporary Native American educational issues and challenges. Be able to articulate (verbally and written) support for educational sovereignty of tribes. Research, analyze and orally present a written a paper about an American Indian boarding school and its legacy.

ANTH 529. Advanced Evolutionary Medicine**3 Credits (3)**

This course provides an overview of evolutionary medicine, a field that applies evolutionary theory to understanding variation in human biology and health and treating and preventing disease. Topics covered in the course include evolutionary perspectives on diet and nutrition, chronic disease, infectious disease, cancer, stress, mental health, reproductive health, women's health, and child growth and development.

Learning Outcomes

1. Understand the basic principles of evolutionary theory. Understand how anthropologists and medical and public health professionals can apply evolutionary theory to understand human health and disease. Understand both the promise and limits of evolution as an explanatory paradigm for variation in human health and disease. Be able to apply principles of evolutionary medicine to development of a research proposal. Develop collaborative and oral presentation skills through a group presentation.

ANTH 531. Issues in Nutritional Anthropology**3 Credits (3)**

This course provides biological, ecological, and cross-cultural perspectives on human nutrition. Topics covered include human nutritional evolution, dietary adaptation, variation in human foodways and habits, relationships between diet and health, nutrition transitions, and methods for studying human diet and nutrition in field settings.

Learning Outcomes

1. Understand the ways in which biology, culture, and ecology shape human nutritional outcomes and dietary patterns. Be able to identify methods best suited to answering questions about human diet and nutrition in field settings. Be able to develop a research question and basic research strategy.

ANTH 533. Advanced Issues in Women, Gender, and Culture**3 Credits (3)**

Survey of the history of anthropological ideas about gender and women, and a comparison of gender roles, relations, and ideologies across a range of cultures. Same as W S 533.

ANTH 534. Advanced Human Evolution**3 Credits (3)**

Advanced overview of human biological evolution from the emergence of Miocene apes to the modern human diaspora. May be repeated up to 3 credits. Crosslisted with: BIOL 534.

ANTH 535. Adv. Human Health and Biological Variation**3 Credits (3)**

Overview of contemporary human biological variation and adaptability within a scientific evolutionary and biocultural framework. Special emphasis is placed on human adaptation to the environment and the sociocultural, epidemiological, and evolutionary factors that underlay contemporary issues in human health and disease. Crosslisted with: ANTH 435.

Learning Outcomes

1. Develop critical thinking skills and scientific literacy through discussion, reading, and writing exercises and evaluating scientific theories, data, and research methods.
2. Develop an understanding of evolutionary theory, and how human organic evolution shapes variation, adaptation, and health in contemporary human populations.
3. Learn how human evolutionary history has shaped the global distribution of contemporary human biological diversity.
4. Understand the scientific critique of the biological race concept, and how social inequality, particularly racism, can become embodied.
5. Understand the various ways that humans adapt to the environment on different timescales.
6. Study life course theory and how experiences during development impact health across the life course.
7. Develop specific transferable skills, including written communication, public speaking, and information gathering (research), and for graduate students, research questions development, hypothesis testing, basic data analysis/visualization in Excel.

ANTH 538. Plants, Culture, and Sustainable Development**3 Credits (3)**

Study of role of indigenous cultures and indigenous knowledge systems in plant domestication, ethnoecology, and preservation of traditional crop diversity. Examination of issues related to conserving cultural diversity, food systems, food security and biodiversity.

ANTH 539. Culture and Foodways**3 Credits (3)**

Study of interaction between food and culture from anthropological perspective. Study of role of food in cultural history, social relations, ritual, and identity. Examination of impact of globalization of food systems on traditional cultures, local food systems, and food security.

ANTH 540. Cultural Resource Management**3 Credits (3)**

Study of federal and state of New Mexico historic preservation laws and regulations and their application in current Cultural Resource Management and a review of relevant case studies.

ANTH 541. Advanced Indigenizing Methodologies in Native American Studies**3 Credits (3)**

This course utilizes indigenizing methodologies and praxis to gain insight into the complex effects of oppression and colonization. Critical and indigenous concepts are used to identify and analyze hegemonic, ethnocentric, historic and contemporary human rights and social justice issues of indigenous people. Research theory and methodology such as community participatory action research that is collaborative, inclusive, and pragmatic to ethics, intellectual property, and cultural boundaries of indigenous people is emphasized. Crosslisted with: ANTH 441.

Learning Outcomes

1. The student is able to describe and explain some of the complex effects of oppression and colonization on indigenous peoples.
2. The student is able to identify historic and contemporary issues that have influenced and affected the study and research of indigenous peoples.
3. The student is able to convey particular research theory and methodology that is collaborative, inclusive, and pragmatic to ethics and cultural boundaries of indigenous people.

ANTH 542. Cultural Resource Management II**3 Credits (3)**

Continuation of ANTH 540. This course introduces students to the business and practice of doing contractual cultural resource management in the United States.

Learning Outcomes

1. Map an archaeological site (meeting New Mexico state standards for archaeological survey)
2. Document an archaeological site (using a Laboratory of Anthropology site form)
3. Prepare a written site description suitable for inclusion in a survey report
4. Analyze and present data using relevant software (e.g., Excel, Access)
5. Prepare a research proposal or report (meeting New Mexico state standards)

ANTH 543. Indigenous Ways of Knowing**3 Credits (3)**

This course examines Indigenous knowledge and ways of knowing as a means to gain an appreciation of an epistemology and ontology that may be outside the boundaries of Eurocentric theory, concepts, and principles. Knowledge development through mythology and story telling is viewed from the nature of difference rather than comparative analysis.

ANTH 544. Advanced Native American Visual Culture**3 Credits (3)**

This course examines the various theoretical and methodological challenges inherent to the study of indigenous art, including the issues of identity, sovereignty, gender, cultural critique, and the role of the artist. In addressing the interdisciplinary nature of the field, students will seek to find strategies in approaching their own research. Crosslisted with: ANTH 444.

Learning Outcomes

1. Identify NA / Indigenous, film/video writers and directors.
2. Locate NA / Indigenous nations with their geo-physical location.
3. Consider issues of identity concerning Indigenous population.
4. Apply "colonizing" / "decolonizing" methodologies.
5. To practice writing short analytical journal entries.
6. To learn effective group discussion techniques

ANTH 545. Advanced Museology**3 Credits (3)**

This course provides a broad introduction to the museum world. Through discussion of readings, examination of case-studies, and practical assignments, students will gain an understanding of the museum as an institution, as well as learn the challenges and responsibilities that museums and their staff encounter. Topics include the history of museums, contemporary debates surrounding the definition of museums, ethical and legal issues, and community connections. The course will cover various types of museums—including art, history, ethnographic, indigenous, and scientific—and discuss how these thematic orientations impact museum practice. Students will also explore common museum processes such as collecting, cataloguing, conservation, exhibition, research, and education through practical exercises using the collections of the University Museum in Kent Hall, as well as through case studies of museums around the world.

Learning Outcomes

1. Describe the major conceptual and practical influences on museums today—including issues of historical development, ethics, missions, and thematic orientations. Critically engage with diverse types of museums as cultural institutions, their practices, and the communities with whom they engage. Implement skills relevant to the museum profession, such as collections management, condition reporting, exhibition and programming planning, and research.

ANTH 546. Advanced Contemporary Medical Anthropology**3 Credits (3)**

This advanced seminar in medical anthropology addresses contemporary issues in the field of medical anthropology through theoretical and ethnographic texts. Topics span a wide range of studies in medical anthropology and may include such issues as the social production of health and illness, medical pluralism, discourses of mental health, the practice of complementary and alternative medicine, health disparities, the political economy of infectious disease, race and biological variation in biomedicine, and implementing biocultural perspectives. Crosslisted with: ANTH 402.

Learning Outcomes

1. Discuss current issues relevant to the study of medical anthropology.
2. Apply medical anthropological concepts and ideas to theoretical and practical health issues.
3. Acquire skills in the critical appraisal of ethnographic literature.

ANTH 547. Museum Field Methods**3 Credits (3)**

This course will introduce students to many of the fundamental concepts behind the creation of a museum exhibition. Drawing from the extensive permanent collection of the University Museum, housed in the basement of Kent Hall, students will gain hands-on experience with exhibition development, resulting in the creation of a temporary public exhibition in the west gallery of the Museum. By turning the museum inside-out, this course will be a unique behind-the-scenes experience. Through readings and discussion, we will also examine historic and contemporary interpretations of exhibitions and collections from the cabinet of curiosity and wunderkammer, to readymades and Mark Dion's re-imagined museums. Crosslisted with: ANTH 347.

Learning Outcomes

1. Explain the basic concepts and terminology of the museum
2. Differentiate the functions, roles, duties and responsibilities of museums
3. Describe the types of museums and their historical development
4. Discuss the challenges and responsibilities that museums and their staff members encounter, most especially in collections
5. Employ the fundamental principles and practices of museum documentation (knowledge of deaccessioning and the challenges faced by museum and inherited collections)
6. Apply the fundamental principles and practices of collection management
7. Synthesize the fundamental principles and practices of museum exhibition planning and design including the role of the curator
8. Object handling and basics of preventive conservation

ANTH 549. Advanced Museum Anthropology**3 Credits (3)**

This course provides an introduction to the methodological and theoretical approaches of museum anthropology. Students will gain experience with all these aspects of museum anthropology in the course by engaging with critical scholarship, analyzing case studies, and practicing collections-based research methods utilizing the collections of the University Museum. Through assignments students will analyze objects in the museum's collections using techniques of close looking, drawing, photography, sequences of making, and external research using scholarly sources. Students will gain skills in primary and secondary research, the analysis of material culture, and the practicalities of navigating research in museums.

Learning Outcomes

1. Describe major theoretical approaches to museum anthropology, and how these have changed over time. Critically engage with the intersections between museums as institutions and the practice of anthropology, including the politics of representation. Implement methodological research skills as a student-scholar by conducting independent research based on museum collections. Convert collections-based research into written and media works characteristic of scholar-facing and public-facing practice in museum anthropology, curatorship, and museum studies.

ANTH 551. Advanced Indigenous Peoples History of the United States**3 Credits (3)**

This course is a history of United States as experienced by the Indigenous people. It delineates the Indigenous experience as reflected in Native American scholarship and research. The Indigenized and decolonized Native perspective provides an educative authenticity of Indigenous knowledge comprehensible to all, particularly the non-Indian.

Learning Outcomes

1. The student can identify and describe significant historic periods as experienced by the Indigenous inhabitants in United States. The student is able to identify and differentiate aspects of the Native American historic experience in relationship to the standard linear chronicle timeline as reflected in U.S. history. The student is able to compose a brief summary review of the Native American historic periods as evidenced in scholarship and research.

ANTH 553. Advanced Native American Women**3 Credits (3)**

Students investigate the status, experience, and contributions of Native American women from pre-contact to contemporary times. Identifying the contribution of Native American women to societies, communities, and Nations as keepers of knowledge, teachings, and traditions. Crosslisted with: ANTH 453.

Learning Outcomes

1. Explore and examine the roles of American Indian women within a tribal society and analyze the impact of colonization and decolonization upon their place / roles over time.
2. Evaluate historical and contemporary issues of importance to American Indian women and their communities.
3. Assess a topic, book or issue of importance to Native women through a research paper, case study, or exam demonstrating in-depth knowledge and understanding.
4. Demonstrate in-depth knowledge and understanding of Native American women histories and contemporary issues.
5. Formulate a paper on Native woman/tribal women from historical or contemporary sources and share with class (undergraduates).
6. 6 Demonstrate in-depth knowledge and understanding of Native American women through an exam/final (undergraduates).
7. Demonstrate in-depth knowledge and understanding of Native American women through a research presentation/final paper (graduates).

ANTH 556. Advanced Native American Intersections in Museums**3 Credits (3)**

This course explores the changing relationships and complex intersections between Native people and museums. We will examine how museum practices of collection and exhibition influence ways in which knowledge is formed and presented, and interrogate the role of museums as crucial sites for discourse around issues of ownership, indigenous knowledge and representation. Case studies revealing shifting meanings of objects, curatorial challenges, the development of tribal museums and repatriation complexities will be used to critically engage with Native responses via art, criticism and legal action. Crosslisted with: ANTH 456.

ANTH 560. Advanced Forensic Anthropology**3 Credits (3)**

Overview of the field of forensic anthropology. Topics covered include basic human osteology; skeletal examination and documentation; skeletal trauma; personal identification; forensic taphonomy and the process of decomposition; archaeology and scene processing; sex, age, stature, and ancestry estimation; and contemporary issues and limitations in the field of forensic anthropology.

Learning Outcomes

1. Understand how scientific findings from fields like biological anthropology are applied in forensic anthropology. Understand the history and range of applications of forensic anthropology. Gain a practical understanding of the methods, applications, and limitations of forensic anthropology as relates to police and other investigations. Gain a practical understanding of how forensic anthropologists identify human bones and the process of building a biological profile of human remains. Understand processes like decomposition and recovery of remains at crime scenes.

ANTH 564. Advanced Curation Crisis in Archaeology**3 Credits (3)**

This collection management course will introduce students to collections curation, collections care, and collections-based research. Archaeological collections stewardship begins before an archaeologist steps foot into the field and continues well after the recovered collections reach the repository. This course provides students with an understanding of the curation "crisis" using archaeological collections curated at the University Museum as a case study and the responsibilities that archaeologists have to the collections they generate.

Learning Outcomes

1. Learn about the maintenance of archaeological and repository collections over time
- Learn about the management of, access to, and use of archaeological collections
- Learn about the curation crisis at a small museum (e.g., Kent Hall University Museum)
- Learn about collections-based research
- Learn about the development of a small as well as large archaeological database
- Learn about various ways of disseminating archaeological collections to the public
- Change the perception of the "just digging and we will deal with the collections later" approach.

ANTH 574. Advanced Human Osteology**3 Credits (3)**

Advanced Human Osteology surveying the functional, developmental and evolutionary biology of the human skeleton. Identifying bones and teeth from hands-on experience with skeletal and dental material. Provides a foundation for human evolutionary studies, bioarchaeology and forensic anthropology. May be repeated up to 3 credits. Crosslisted with: BIOL 574.

ANTH 575. Advanced Pottery Analysis in Archaeology**3 Credits (3)**

This course introduces the basic concepts, methods, and approaches used in the analysis of archaeological pottery. The purpose of the course is first to provide hands-on experience with the full range of analytical techniques routinely applied to ceramic materials recovered from archaeological sites, but to also provide a contextual framework for the interpretation and evaluation of these data. Classes consist of brief introductory lectures, and seminar presentation and discussion of course readings. Lab meetings consist of exercises designed to provide you with practical experience working with the materials and measures covered in lectures and readings. Crosslisted with: ANTH 375.

Learning Outcomes

1. Students will learn the theory underlying pottery analysis as well as some of the methods used to identify and interpret pottery;
2. Students will learn to think about the organization of pottery technology from a behavioral rather than a purely typological framework;
3. Students will have the opportunity to develop and then evaluate a research question or problem statement within a chosen theoretical framework, as well as have the opportunity to evaluate that question or questions using both qualitative and quantitative analyses;
4. Students will gain the skills needed to assess pottery analysis reports and undertake pottery analyses for senior thesis, M.A. theses, and CRM contexts.

ANTH 576. Lithic Technology Organization**3 Credits (3)**

Advanced seminars and laboratory exercises to learn and develop techniques and methods that will help us determine how to interpret behavioral and cultural information from lithic (stone tool) data. Consent of Instructor required.

ANTH 577. Advanced Zooarchaeology**3 Credits (3)**

Detailed study and analysis of taphonomic processes affecting animal bone recovered from archaeological and paleontological contexts.

ANTH 578. Advanced Lab Methods in Archaeology**3 Credits (3)**

Examination of advanced laboratory techniques used in the analysis of archaeological materials.

ANTH 579. Qualitative Data Analysis and Interpretation**3 Credits (3)**

This course focuses on methods for qualitative data analysis, both computer-assisted and non-computer-assisted, and interpretation. It includes writing up data for academic articles or theses.

ANTH 585. Method and Theory in Archaeology**3 Credits (3)**

Focus on major methodological and theoretical aspects of contemporary archeology.

ANTH 587. Field Work in Latin America**3-12 Credits**

Covers anthropological field methods in Latin America that also incorporate in-field lab analysis. No S/U grading.

Prerequisite: consent of instructor.

ANTH 596. Readings**1-6 Credits**

Individual study of selected readings and topics. May be repeated for a maximum of 6 credits. Consent of instructor required.

ANTH 597. Internship**1-9 Credits**

Anthropological or archaeological internship in private, state, or federal agency. May be repeated for a maximum of 18 credits. Consent of instructor required. Restricted to ANTH majors.

Prerequisite(s): graduate standing.

ANTH 598. Special Research Problems**1-6 Credits (6)**

Individual analytic or experimental investigations. May be repeated under different subtitles for a maximum of 6 credits. Consent of instructor required. Restricted to ANTH majors.

Prerequisite(s): graduate standing.

ANTH 599. Master's Thesis**1-15 Credits**

Thesis. Consent of instructor required. Restricted to ANTH majors.

Prerequisite(s): graduate standing.

ARCH-ARCHITECTURE

ARCH 1105. Orientation and Mentoring in Architecture-Construction-Engineering (ACE)**1-6 Credits (1-6)**

This course is intended for high school dual credit students and college/university students wishing to explore careers in Architecture, Construction, and Engineering (ACE), which includes the specific fields of Architectural, Civil, Mechanical, Structural, Interior, Landscape, Sustainability, and Environmental. Students receive one-on-one mentoring, attend field trips, and engage in hands-on activities. May be repeated up to 6 credits. Restricted to Community Colleges campuses

Learning Outcomes

1. Career opportunities related to 'ACE'
2. Career requirements: Education
3. Career requirements: Experience and/or examination(s)
4. Overview of construction/management
5. Overview of Architecture
6. Overview of Civil engineering
7. Overview of Surveying
8. Overview of Mechanical Engineering
9. Overview of Electrical Engineering
10. 1 Overview of Landscape Architecture
11. 1 Overview of Interior Design
12. 1 Overview of Sustainable design
13. 1 Overview of the Design Process
14. 1 Basic Structural Specifications.
15. 1 Structural drafting/detailing principles
16. 1 AutoCAD applications: Sheet Layout, Drawing Standards, Efficiency, Speed, Accuracy
17. 1 Structural CAD software applications
18. 1 Sustainability in Structural Systems

ARCH 1110. Architectural Drawing**4 Credits (2+4P)**

This course is designed as an introduction to architectural drawing and design for students without prior experience in the fine arts. Students are guided through a series of spatial and analytical exercises that focus attention on not only how architects draw, but also the reasoning and processes embedded within the technique. Students are provided exposure to a wide range of interconnected architectural concepts and to manual and digital drawing, as well as modeling techniques for architectural and interior design. Students will learn how to represent composition, form, and space by orthographic drawing, paraline and perspective views, and freehand sketching. Three-dimensional model building techniques will also be introduced.

Learning Outcomes

1. Gain understanding of basic methods of architectural drawing
2. Explore and gain understanding of concepts of spatial design and its representation through exercises
3. That stress analytical ability and an awareness of rational design process
4. Gain an understanding of the design process with practice and various exercises
5. Gain exposure to architectural delineation
6. Demonstrate an understanding of specific skills and concepts related to architectural drawing
7. Create and modify architectural models through various phases of a project
8. Demonstrate a knowledge of graphic standards according to industry conventions
9. Identify the various phases of work with regard to the architectural and interior design professions
10. 1Develop analytical and critical thinking skills

ARCH 1112. Global Issues and Sustainability**3 Credits (3)**

Introduction to global environmental issues (historic, present, and future), and the impact on tomorrow's design and construction professions. Issues will include, but shall not be limited to global warming, energy consumption, population, natural resource consumption, air and water quality, waste management, facilities operation management, politics, and facilities design & construction. The impact on the design and construction industry, including 'Green Building' and 'LEED Accreditation and Certification/Criteria' will also be addressed. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Learning Outcomes

1. Discover global environmental history to better understand sustainable topics and change your behavior in the future.
2. Expand your knowledge on environment, natural resource consumption, human intervention, politics, and design and construction industry to support your education and future careers.
3. Learn how the US Green Building Council LEED (Leadership in Energy and Environmental Design) certification and Accredited Professional training expands your knowledge on green building design criteria; will help you determine whether you want to take the LEED exam.
4. Examine the many sides of climate change and its effects on the globe as well as our individual microclimate and personal lives to learn how to adapt to the current changes
5. Learn how to effectively research, report, present, and debate environmental topics to help you in your education and future careers.

ARCH 1114. Introduction to Architectural Design**3 Credits (2+2P)**

This course provides students who possess a basic background in architecture and architectural drawing with an introduction to architectural design. Students are guided through a series of spatial and analytical exercises that focus attention on two dimensional, three dimensional, and four dimensional design. This course will build on direct linkages to ARCH 1120 and ARCH 1110 to further students' exposure to interconnected architectural concepts of process, organizational strategies, and analysis of material methodology while utilizing abstract and practiced graphical architectural conventions. Consent of Instructor required. Restricted to Community Colleges campuses only.

Prerequisite(s): ARCH 1120 and ARCH 1110.

Learning Outcomes

1. Develop critical thinking strategies through a series of connected exercises in order to explain, demonstrate, categorize, compare, contrast and assess information/evidence.
2. Explore concepts of design through spatial design and apply these concepts through a series of progressive representational exercises that stress analytical ability and an awareness of rational design process.
3. Gain skills in the application of graphical communication in a range of media.
4. Enhance abilities in selecting specific information and applying that information to problem solve issues/concerns required to complete a task, while considering other implications.
5. Develop skill sin writing and speaking effectively and use representational media appropriate for both within the profession and with the public.
6. Gather, assess, record, and comparatively evaluate relevant information and performance in order to support conclusions related to a specific project or assignment.
7. Utilize basic formal, organizational and environmental principles and the capacity of each to inform two- and three-dimensional design.
8. Apply fundamentals of both natural and formal ordering systems and the capacity of each to inform two- and three-dimensional design.
9. Demonstrate basic principles of structural systems and their ability to withstand gravitational, seismic, and lateral forces, as well as the selection and application of the appropriate structural system

ARCH 1120. Introduction to Architecture**3 Credits (2+2P)**

This course provides students the tools and vocabulary to analyze, interpret and discuss the built environment from the social, historical, perceptual and technical determinants. Students are introduced to elements, principles, and theories of architecture through their social, historical, and technical determinants. The course seeks to lay a foundation in architectural studies, including introducing students to fundamental vocabulary and concepts.

Learning Outcomes

1. Identify and describe significant architects and iconic buildings
2. Discuss social, cultural, and aesthetic contributions of specific architects and projects
3. Explain architectural concepts via written and graphic communication
4. Recall basic processes and vocabulary of architectural professional practice
5. Understand our built environment and the language of design and architecture
6. Understand how buildings are constructed and explain the process of development
7. Describe and discuss design elements, principles, and theories
8. Understand the relationships among owner, surveyors, designers, architects, engineers, and contractors
9. Research design texts and analyze buildings, landscapes, interiors, sustainability, and products to
10. increase knowledge of important elements of architecture and design
11. 1Identify the various styles, periods, and movements and their social, historical, and technical impacts on architecture

ARCH 1121. Computers in Architecture**3 Credits (2+2P)**

Explore various software and photography techniques widely used in the architectural field. In addition to using industry standard CAD program as primary 2-d drafting tool, focus is to produce digital architectural models and renderings, presentation boards, and animations. Digital images will be produced and enhanced through basic techniques in photography and integration of various software. Both individual and group work will be required.

Learning Outcomes

1. Demonstrate the use of the computer and plotters/printers
2. Define and understand different terminologies
3. Demonstrate the understanding of different files using windows operating system
4. Understanding the appropriate use of the software in order to produce necessary drafting outcomes
5. Use proper plotting and printing procedures in order to increase efficiency and minimize paper waste
6. Demonstrating the use of different line types as the relate to drafting

ARCH 1122. Architectural Design Studio I**5 Credits (1+8P)**

Enhancement of general graphic communication skills and introduction to fundamental design including exploration, development and defense of design concepts; structural order; 2D and 3D processes in manual and digital architectural graphic expression; model building; general communication and presentation techniques; and development of course portfolio. Course is Studio/critique-based with considerable amount of work/hours required. This course is designed to be taken during student's last year in the Pre-Architecture program at DACC. Consent of Instructor required. Restricted to Community Colleges only.

Prerequisite(s): Grade of B- or better in both ARCH 1120 and ARCH 1110.

Learning Outcomes

1. Write and speak effectively and use representational media appropriate for both within the profession and with the general public.
2. Raise clear and precise questions, use abstract ideas to interpret information, consider diverse points of view, reach well-reasoned conclusions, and test alternative outcomes against relevant criteria and standards
3. Gather, assess, record, and comparatively evaluate relevant information and performance in order to
4. support conclusions related to a specific project or assignment.
5. Effectively use basic formal, organizational and environmental principles and the capacity of each to inform two-and three-dimensional design.
6. Apply the fundamentals of both natural and formal ordering systems and the capacity of each to inform two-and three-dimensional design.
7. Examine and comprehend the fundamental principles present in relevant precedents and to make
8. informed choices about the incorporation of such principles into architecture and urban design projects.
9. Prepare a comprehensive program for an architectural project that includes an assessment of client and user needs; an inventory of spaces and their requirements; an analysis of site conditions (including existing buildings); a review of the relevant building codes and standards, including relevant sustainability
10. requirements, and an assessment of their implications for the project; and a definition of site selection and
11. design assessment criteria.
12. Respond to site characteristics, including its context and developmental patterning, the fabric, soil, topography, ecology, climate, and building orientation, in the development of a project design. Design sites, facilities, and systems that are responsive to relevant codes and regulations, and include the principles of life-safety and accessibility standards.
13. 1Demonstrate the basic principles of structural systems and their ability to withstand gravitational, seismic, and lateral forces, as well as the selection and application of the appropriate structural system.
14. 1Understand the basic principles involved in the appropriate selection and application of building envelope systems relative to fundamental performance, aesthetics, moisture transfer, durability, and energy and material resources.

ARCH 1220. Architecture World History I**3 Credits (2+2P)**

A survey of the development of world architecture from the ancient era to the advent of the enlightenment in Europe. Major emphasis is on the visual, intellectual, cultural and technological aspects of the ancient and indigenous cultures of the classical and pre-modern world. Community Colleges only. Restricted to Alamogordo, Dona Ana and Grants campuses.

Learning Outcomes

1. Identify major architectural monuments from prehistory to the Renaissance (1400's) in the Western world
2. Demonstrate an understanding of major monuments, styles of architecture and building traditions of non-Western cultures
3. Recognize the relationship of movements and styles in Western architecture to their counterparts in painting and sculpture from the various historical periods
4. Describe the basic principles of urban design
5. Express an appreciation of architectural achievements and the ways in which the elements of art {line, form, color, texture, light, etc.) combine to produce objects of beauty in the built environment
6. Describe basic engineering concerns and achievements in architecture

ARCH 1310. Introduction to Architecture, Engineering, & Construction**3 Credits (3)**

Introduction to and exploration of careers in the fields of architecture, engineering, and construction. Specific fields to include: architecture, civil engineering, mechanical engineering, structural engineering, engineering technology, residential construction, commercial construction, geographical information systems (GIS), surveying, sustainable design, and green building Crosslisted with: DRFT 100.

Learning Outcomes

1. Prepare accurate written technical documents, Produce drawing documents that are technically sound, Develop and practice productive work skills, and Upgrade technical knowledge and skills to keep pace with real-world changes ARCT 100 Course Competencies Describe different career options in architecture, engineering, and construction, Define the roles of different design professionals and support staff, Explain related educational and professional licensing requirements, Articulate employer expectations, Explore related courses and programs of study at DACC and NMSU, and Develop good workplace skills and professional, productive work habits.

ARCH 2111. Architectural Delineation I**3 Credits (2+2P)**

Introduction to visual literacy, architectural graphic communication, & basic analytical skills. Architectural concepts primarily explored through the application of technical drawing, descriptive geometry, & material manipulation; primarily black & white media. Use of digital tools and media as applicable. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Learning Outcomes

1. Develop and utilize visual observation skills
2. Translate visual observations into graphical information
3. Develop and utilize critical thinking in the development of projects
4. Develop effective line drawing techniques
5. Produce graphical representations using various shading techniques
6. Communicate design concepts and ideas clearly

ARCH 2113. Sustainable Design in Architecture**3 Credits (3)**

This course provides students with hands-on opportunity to increase their awareness in, and respond to the issues of responsible environmentally friendly building design by engaging in an integrated design process combining 'Traditional Design Process' with 'Sustainable Environmental Design' strategies. Students will expand their awareness of global environmental impacts due to design and construction, and gain knowledge in the industry's leading design 'tool' LEED (Leadership in Energy and Environmental Design) green building design rating system. LEED strategies will be utilized in the design of individual projects apply LEED in practical, individual design development, and develop an integrated building model utilizing the concept of BIM (Building Information Modeling). Such project development will require learning a basic design process and specific sequence including conceptual design, schematic design, design development and BIM (utilizing a BIM software such as REVIT, or AutoCad Architecture). May be repeated up to 3 credits.

Prerequisite(s): DRFT 109 or DRFT 165 or ARCH 2114.

Learning Outcomes

1. Understand Global Issues that impact sustainability of resources and quality of/equity in life.
2. Understand the impact of buildings on the environment
3. Identify the basic principles of 'green' design and construction
4. Identify and Interpret basic principles of the LEED green building rating system
5. Engage in research of green technologies and design practices
6. Understand the essential steps of the design process
7. Develop a basic building design which qualifies for at least LEED Certified rating
8. Utilize a BIM integrated software package to develop a virtual Building Information Models
9. Develop presentation posters and slideshow of design work
10. Conduct project presentations, and critique work of peers in a clear, concise manner

ARCH 2114. Construction Documents**3 Credits (2+2P)**

Basic use of CAD to produce residential, commercial, and industrial architectural working drawings, including floor plans, sections, foundation plans and details, exterior and interior elevations, framing plans, and site plans. Use and application of building and zoning codes, typical construction methods and materials, and accessibility requirements. Basic 3-D modeling, AIA layering standards, sheet layout, and construction document coordination.

Restricted to: Community Colleges only.

Prerequisite(s)/Corequisite(s): DRFT 109.

Learning Outcomes

1. Create full 3D architectural project models, both via tutorials, and independently
2. Set models up as working drawings.
3. Have a working knowledge of the tools that the majority of users will use to work with Revit Architecture.
4. Project File management skills

ARCH 2115. Architecture Design Studio II**5 Credits (1+8P)**

Advanced graphic communication, design, and 3D physical model representation. Focus on site analysis, programming and fundamental design issues of context, environment, program development and space planning, 2D and 3D design and presentation techniques. Course is 'Studio/critique-based' with considerable amount of outside work/hours required. This course is designed to be taken during student's last year in the Pre-Architecture program at DACC. Restricted to Alamogordo, Dona Ana and Grants campuses.

Prerequisite(s): Grade of C- or better in ARCH 1122.

Learning Outcomes

1. Write and speak effectively and use representational media appropriate for both within the profession and with the general public.
2. Raise clear and precise questions, use abstract ideas to interpret information, consider diverse points of view, reach well-reasoned conclusions, and test alternative outcomes against relevant criteria and standards
3. standards
4. Gather, assess, record, and comparatively evaluate relevant information and performance in order to support conclusions related to a specific project or assignment.
5. Effectively use basic formal, organizational and environmental principles and the capacity of each to inform two-and three-dimensional design.
6. Apply the fundamentals of both natural and formal ordering systems and the capacity of each to inform two-and three-dimensional design.
7. Examine and comprehend the fundamental principles present in relevant precedents and to make informed choices about the incorporation of such principles into architecture and urban design projects.
8. Prepare a comprehensive program for an architectural project that includes an assessment of client and user needs; an inventory of spaces and their requirements; an analysis of site conditions (including
9. existing buildings); a review of the relevant building codes and standards, including relevant sustainability requirements, and an assessment of their implications for the project; and a definition of site selection and design assessment criteria.
10. Respond to site characteristics, including its context and developmental patterning, the fabric, soil, topography, ecology, climate, and building orientation, in the development of a project design.
11. Design sites, facilities, and systems that are responsive to relevant codes and regulations, and include the principles of life-safety and accessibility standards.
12. 1Demonstrate the basic principles of structural systems and their ability to withstand gravitational, seismic, and lateral forces, as well as the selection and application of the appropriate structural system.
13. 1 Understand the basic principles involved in the appropriate selection and application of building envelope systems relative to fundamental performance, aesthetics, moisture transfer, durability, and energy and material resources.

ARCH 2116. Architectural Delineation**3 Credits (2+2P)**

Continuation of ARCH 2111 with an emphasis in color media.

Prerequisites: ARCH 2111.

Learning Outcomes

1. Develop and utilize visual observation skills
2. Translate visual observations into graphical information
3. Develop and utilize critical thinking in the development of projects
4. Develop effective line drawing techniques
5. Produce graphical representations using various shading techniques
6. Communicate design concepts and ideas clearly

ARCH 2122. LEED Accreditation Exam Prep**3 Credits (3)**

This course is intended for anyone in the construction or architectural design fields who is interested in learning more about green building and the LEED (Leadership in Energy and Environmental Design) strategies, and are also interested in learning about how to become LEED accredited. Overview of the LEED rating systems utilized in the design and operation of buildings, the various LEED building certifications, and accreditation requirements for professionals. Highlights include interpretation of the LEED Reference Guides, accepted strategies for meeting LEED certification, sample practice exams, integrated project delivery methods, and a practical approach to problem solving through the use of design problems. Restricted to Community Colleges only.

Learning Outcomes

1. The student completing this course should gain knowledge and skills for each of the topics covered in the Course Outline.
2. Successful completion of this course should give each student a working knowledge of various LEED Rating Systems, and LEED GA Study Guides.
3. Students will develop critical thinking strategies to enable them to develop preliminary design and plan checking for code compliance.
4. Students should develop acceptable and productive work habits

ARCH 2124. Professional Development and Leadership-AIAS**1-3 Credits**

As members and/or officers of student professional organizations, architecture students gain experience through undertaking leadership roles, participating in team building, and becoming involved in service to the community. Students can also gain actual work experience involving skills related to their field of study. Graded S/U.

Learning Outcomes

1. Leadership skills
2. Presentation techniques and public speaking
3. Organizational and teambuilding skills
4. Architecture-related skills
5. Community organizations and service

ARCH 2220. Architectural World History II**3 Credits (2+2P)**

A survey of the development of world architecture from the enlightenment in Europe to the present. Community Colleges only. Restricted to Alamogordo, Dona Ana and Grants campuses.

Prerequisite(s): ARCH 1220 or consent of instructor.

Learning Outcomes

1. Identify major architectural monuments from 1400 to the present in the Western world
2. Identify major architectural monuments from 1400 to the present in the Western world
3. Recognize the relationship of movements and styles in Western architecture to their counterparts in design, painting, and sculpture from the various historical periods
4. Describe the basic principles of urban design
5. Express an appreciation of architectural achievements and the ways in which the elements of art (line, form, color, texture, light, etc.) combine to produce objects of beauty in the built environment
6. Analyze basic engineering concerns and achievements in architecture

ARCH 2994. Portfolio Design in Architecture**3 Credits (3)**

This course is intended for Pre-Architecture students in their last semester of the program. Students develop a comprehensive portfolio that compiles, organizes, and showcases their most accomplished coursework produced in Architecture courses at DACC, in preparation for application to a 4 yr. Architecture program. Skills and techniques in architectural photography, scanning, and design layout using graphic software. Restricted to Community Colleges only.

Corequisite(s): ARCT 2115.

Learning Outcomes

1. Edit and enhance previous drawings, digital files, and models.
2. Research and learn about portfolio and layout styles.
3. Development/Presentation of Final Portfolio for application/transfer purposes, as well as presenting it to the class and other reviewers.
4. Document drawings, models, digital work and other productions accurately and effectively.
5. Organize their coursework and select the images that best showcase learned skills
6. Develop organizational habits to record and document their work and back up digital copies
7. Develop analytical skills to produce an effective layout to then produce a portfolio
8. Organize, layout and design their own portfolio.

ARCH 2995. Cooperative Experience**1-6 Credits**

Supervised cooperative work program. Student employed in approved occupation; supervised and evaluated by employer and instructor. Student meets weekly with instructor. Graded S/U.

Prerequisite: consent of instructor.

Learning Outcomes

1. Varies

ARCH 2996. Special Topics**1-6 Credits**

Topics subtitled in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

Learning Outcomes

1. Varies

ARTH-ART HISTORY

ARTH 1115G. Orientation in Art**3 Credits (2+3P)**

A multicultural examination of the principles and philosophies of the visual arts and the ideas expressed through them.

Learning Outcomes

1. Identify elements of art principles of design.
2. Articulate the relationship of art to the human experience.
3. Write and discuss critically using the vocabulary of art.
4. Interpret art within cultural, social, personal, and historical contexts.
5. Critically analyze an original work of art.

ARTH 2110G. History of Art I**3 Credits (3)**

This survey course explores the art and architecture of ancient pre-historic cultures through the end of the fourteenth century. While focused primarily on the art of the Western civilizations, this course will also provide insights into the works of other major cultures in order to provide alternate views of art and history. Emphasis will be placed on the relationship of artworks to political, social, spiritual, intellectual, and cultural movements that affect and are affected by their creation and development.

Learning Outcomes

1. Identify major artworks from a variety of regions and time periods.
2. Investigate the methods of producing various works of art.
3. Articulate an understanding and appreciation for the political, social, spiritual, intellectual, and cultural contexts of art forms.
4. Comprehend and apply terms, methodologies and concepts common to studies of art history, developing a language to further understanding of art.
5. Compare works across a range of historical styles and periods.

ARTH 2120G. History of Art II**3 Credits (3)**

This survey course will explore the architecture, sculpture, ceramics, paintings, drawings, and glass objects from the 14th century to the modern era. While focused primarily on the art of the Western civilizations, this course will also provide insights into the works of other major cultures in order to provide alternate views of art and history. Emphasis will be placed on the relationship of artworks to political, social, spiritual, intellectual, and cultural movements that affect and are affected by their creation and development. May be repeated up to 3 credits.

Learning Outcomes

1. Identify major artworks from a variety of regions and time periods.
2. Investigate the methods of producing various works of art.
3. Articulate an understanding and appreciation for the political, social, spiritual, intellectual, and cultural contexts of art forms.
4. Comprehend and apply terms, methodologies and concepts common to studies of art history, developing a language to further understanding of art.
5. Compare works across a range of historical styles and periods.

ARTH 2136. Writing in Art**3 Credits (3)**

This class looks at the variety of writings associated with art history and studio art practice. It explores the discipline of art history itself, and introduces students to the specific ways in which art historians study art. Within a workshop setting, students will practice approaches to research, understanding art and writing about art. Students will also be introduced to professional writing practices, including digital formats, relating to studio art.

Learning Outcomes

1. Develop visual literacy in looking at art
2. Analyze a complex art historical argument
3. Apply art specific vocabulary to critically-based writings and discussions of art
4. Develop writing skills to articulate the relationship of art to the human experience

ARTH 300. Special Topics in Art History

3 Credits (3)

Specific subjects to be announced in the Schedule of Classes, individual topics may not be repeated . Restricted to Las Cruces campus only.

Prerequisite: ARTH 2110G, ARTH 2120G, and ARTS 2671 or consent of instructor.

Learning Outcomes

1. Analysis of specific problems in art history Evaluate approaches to specific problems in art history

ARTH 305. Medieval Art

3 Credits (3)

History of painting, stained glass, sculpture, architecture and manuscript illumination in Europe from the Early Christian period to the end of the Gothic period; taught with ARTH 505.

Prerequisite(s): ARTH 2110G, ARTH 2120G, and ARTS 2671 or consent of instructor.

ARTH 310. Native American Art

3 Credits (3)

Cross-cultural introduction to art of the prehistoric and historic native people of the North, Central, and South Americas. Considers the artistic expression and the function of art in diverse cultural and environmental contexts.

Prerequisite(s): ARTH 2110G, ARTH 2120G, and ARTS 2671 or consent of instructor.

ARTH 311. Art of China I: Neolithic to Song Dynasty

3 Credits (3)

Survey of the art of China from the neolithic period to the end of the Song dynasty. Non-majors welcome.

Prerequisite: ARTH 2110G, ARTH 2120G, and ARTH 2670 or HIST 2250G and HIST 2251G or consent of instructor.

Learning Outcomes

1. identify the principal periods and dynasties up to the Song dynasty and the major political, philosophical and religious ideas that emerged during those periods. describe the principal stylistic characteristics of two-dimensional and three-dimensional artworks and architecture for each period Analyze how the form, function and style of art corresponds to religious beliefs and funerary practices identify some of the major monuments of Chinese painting and be able to discuss their specific historical contexts and meaning Identify basic elements of Buddhist and Taoist iconography

ARTH 312. Art of China II: Song Dynasty to Today

3 Credits (3)

Survey of art, architecture and landscape design of China from the Song Dynasty to the present day Crosslisted with: ARTH 512.

Prerequisite(s): ARTS 2671 or ARTH 2110G or HIST 2250G and HIST 2251G or consent of instructor.

ARTH 321. Art of the Americas

3 Credits (3)

Examines the arts and history of the Americas. Each topic may be taken only once.

Prerequisite: ARTH 2110G, ARTH 2120G, and ARTH 2136 or consent of instructor.

Learning Outcomes

1. Locate works of art in relation to the cultures from which they originate, historicizing and contextualizing them in socio-political histories Identify and employ methodology(ies) and theoretical approaches salient to the specific forms of art practice which they are studying Evaluate, comment upon, and formulate approaches to the artistic practices of people of the Americas

ARTH 325. Northern Renaissance Art

3 Credits (3)

History of painting, manuscript illumination and graphics in Northern Europe from the late 14th century to the mid-16th century; taught with ARTH 525.

Prerequisite(s): ARTH 2110G, 2120G, and ARTS 2671 or consent of instructor.

ARTH 330. Modern Architecture

3 Credits (3)

A survey of the history of Modern Architecture with focus given to major architects, monumental buildings, and building groups stressing construction techniques and style from the 18th century to the present.

Prerequisite(s): ARTH 2110G, ARTH 2120G, ARTS 2671, or consent of instructor.

ARTH 336. Race and Art

3 Credits (3)

Traces race, representation and appropriation through a historical and cultural lens. Issues of identity up to and including contemporary visual expression are examined. Non-majors welcomed. Each topic may be taken one time.

Prerequisite: ARTH 2110G, ARTH 2120G, and ARTH 2136 or consent of instructor.

Learning Outcomes

1. Recognize how identity is perceived and constructed and the contemporary challenges to the creation of the "Other" identify and place art objects within political, social, artistic and philosophical contexts. Acquire the tools to determine how issues of race and identity are being explored and understood today. Interpret and evaluate the relationship of art to the human experience

ARTH 338. Art in the Nineteenth Century**3 Credits (3)**

History of painting, sculpture, architecture, and other arts created during the long nineteenth century

Prerequisite: ARTH 2110G, ARTH 2120G, ARTH 2136, or consent of instructor.

Learning Outcomes

1. Identify and place art objects within political, social, artistic and philosophical contexts. Summarize the major styles that emerged in the 19th century
Analyze the importance of context for these major styles Explain different methodologies of Art History and their relevance for understanding the art movements that emerged during this time period Develop analytical processes, writing skills and research methodology to interpret and articulate the relationship of art to the human experience

ARTH 339. History of Photography**3 Credits (3)**

Course studies history, theory and use of photographic practices in art, especially from formal introduction of the process in 1839 to the present. May be repeated up to 3 credits.

Prerequisite(s): ARTH 2110G, ARTH 2120G, ARTS 2671, or consent of instructor.

ARTH 342. Global Modernisms**3 Credits (3)**

Examines themes and monuments from the late 19th century to 1968, emphasizing modern and avant-garde cultural practices.

Prerequisite: ARTH 2110G, ARTH 2120G, ARTH 2136, or consent of instructor.

Learning Outcomes

1. Identify and place art objects within political, social, artistic and philosophical contexts. Summarize the major styles and practices that emerged in the Twentieth Century Analyze the importance of context for these major styles Explain different methodologies of Art History and their relevance for understanding Twentieth Century Art Apply art specific vocabulary to critically based writings and discussions of the art objects studied Develop analytical processes, writing skills and research methodology to interpret and articulate the relationship of art to the human experience.

ARTH 343. Twentieth-Century Art II, 1945-Present**3 Credits (3)**

History of painting, sculpture, and other arts in Europe, the United States, and elsewhere from 1945 to the present.

Prerequisite(s): ARTH 2110G, ARTH 2120G, ARTS 2671, or consent of instructor.

ARTH 344. Gender, Sexuality, and Art in the Americas**3 Credits (3)**

This course examines woman power/trans/ queer discourses of both the global south and those of people of color in the United States in relation to art from Latin, Central, and North America.

Prerequisite: ARTH 2110G, ARTH 2120G, and ARTS 2136, or consent of instructor.

Learning Outcomes

1. Identify and analyze arguments and problems within gender and sexualities of the global south Locate works of art in relation to the cultures from which they originate, historicizing and contextualizing them in socio-political histories Identify and employ methodology(ies) and theoretical approaches salient to the specific forms of art practice which they are studying Evaluate, comment upon, and formulate approaches to the artistic practices of people of the Americas based in feminist, decolonial methodologies

ARTH 345. Latin American Film**3 Credits (3)**

Surveys films and their histories from Latin American and the LatinX diaspora.

Prerequisite: ARTH 2110G, ARTH 2120G, and ARTS 2136, or consent of instructor.

Learning Outcomes

1. Discuss, distinguish among, and analyze film techniques, genres, distribution systems, and movements, particularly as they relate to Latin America Demonstrate an historical understanding of the political histories, movements, and changes in Latin America Locate films in relation to the cultures from which they originate, historicizing and contextualizing them in socio-political histories Identify and employ methodology(ies) and theoretical approaches salient to filmic

ARTH 346. Museum and Curatorial Studies**3 Credits (3)**

This museum and curatorial studies course surveys practices, objects, and histories.

Prerequisite: ARTH 2110G, ARTH 2120G, and ARTS 2136, or consent of instructor.

Learning Outcomes

1. Historicize the development of museums, patronage, collecting, looting, and restitution; noting distinctions between cultures, geographic regions, and nation-state systems Identify and analyze arguments and problems within museum studies Distinguish between the professional positions, institutional functions, and governing missions within and among of distinct types of art institutions Evaluate, comment upon, and formulate approaches to exhibition design in both their practical and ideological functions

ARTH 390. Visual Culture of the 1960s

3 Credits (3)

Focus on major cultural trends and historical events in 1960's America. Offers analysis of art, films, and pop culture phenomena of the period.

Prerequisite(s): ARTH 2110G, ARTH 2120G, ARTS 2671, or consent of instructor.

ARTH 444. Art and Life in Renaissance Italy

3 Credits (3)

Examines how Italian Renaissance textual and visual culture offered Europe new ways of seeing and portraying itself. 1350-1550. Topics include: Florence, Venice, Rome, Leonardo, Michelangelo, titian, humanism, the Medici, and republican and courtly culture.

Prerequisite(s): ARTH 2110G, ARTH 2120G, ARTS 2671, or consent of instructor.

ARTH 477. Independent Research in Art History

1-9 Credits (1-9)

Advanced research on special problems to be conducted under supervision of art history faculty. May be taken up to 12 credits. Consent of instructor required.

Learning Outcomes

1. Student will analyze approaches to a problem in art history Student will evaluate approaches to a problem in art history Student will formulate approaches to address a problem in art history

ARTH 478. Seminar in Art History

3 Credits (3)

Reading, research, and discussion of advanced problems. Topics will be announced in the course schedule. Each topic may be only taken once. Non-art/art history majors, contact instructor for consent.

Prerequisite: ARTH 2110G, ARTH 2120G and ARTH 2136, and one 300 level ARTH course or consent of instructor.

Learning Outcomes

1. Analyze problems in art history Propose a hypothesis relating to a problem in art history and support conclusions through research Evaluate various approaches to problems in art history

ARTH 479. Methodologies and Theories of Art

3 Credits (3)

Theories and methodologies in art history and art criticism; taught with ARTH 579 May be repeated up to 3 credits.

Prerequisite(s): ARTH 2110G, ARTH 2120G, ARTS 2671 and one 300 level art history course and consent of instructor.

ARTH 500. Special Topics in Art History

3 Credits (3)

Specific subjects to be announced in the Schedule of Classes. Individual topics may only be taken one time. Students must be Graduate students to enroll.

Learning Outcomes

1. Analyze specific problems in Art History Evaluate approaches to specific problems in Art History

ARTH 510. Advanced Native American Art

3 Credits (3)

Cross-cultural introduction to art of the prehistoric and historic native people of the North, Central, and South Americas. The artistic expression and the function of art considered in diverse cultural and environmental contexts. Crosslisted with: ARTH 310.

Prerequisite(s): Graduate standing.

ARTH 511. Art of China I: Neolithic to Song Dynasty

3 Credits (3)

Survey of the art of China from the neolithic period to the Song dynasty. Student must be a Graduate student to enroll.

Learning Outcomes

1. Identify the principal periods and dynasties up to the Song dynasty and the major political, philosophical and religious ideas that emerged during those periods. Describe the principal stylistic characteristics of two-dimensional and three-dimensional artworks and architecture for each period Analyze how the form, function and style of art corresponds to religious beliefs and funerary practices. Identify some of the major monuments of Chinese painting and be able to discuss their specific historical contexts and meaning Identify basic elements of Buddhist and Daoist iconography

ARTH 521. Art of the Americas**3 Credits (3)**

Examines the arts and history of the Americas. Rotating topics; each topic may be taken only once. Crosslisted with: ARTH 321. Students must be in Graduate standing to enroll.

Learning Outcomes

1. Locate works of art in relation to the cultures from which they originate, historicizing and contextualizing them in socio-political histories Identify and employ methodology(ies) and theoretical approaches salient to the specific forms of art practice which they are studying Evaluate, comment upon, and formulate approaches to the artistic practices of people of the Americas

ARTH 525. Northern Renaissance Art**3 Credits (3)**

History of painting, manuscript illumination and graphics in Northern Europe from the late 14th century to the mid-16th century; taught with ARTH 325.

Prerequisite(s): Graduate standing.

ARTH 536. Race and Art**3 Credits (3)**

This course explores the visual expression of race and identity in art and visual culture from a diverse geographical and historical range. Each topic may only be taken one time. Crosslisted with: ARTH 336. Students must be Graduate students to enroll.

Learning Outcomes

1. Recognize how identity is perceived and constructed and the contemporary challenges to the creation of the "Other" Identify and place art objects within political, social, artistic and philosophical contexts. Acquire the tools to determine how issues of race and identity are being explored and understood today. Interpret and evaluate the relationship of art to the human experience. Formulate a question concerning race and art and using analysis, evaluate the research on that question and create an original argument.

ARTH 538. Art in the Nineteenth Century**3 Credits (3)**

History of painting, sculpture, architecture, and other arts created in in the 19th century; taught with ARTH 338. Students must be in Graduate standing to enroll.

Learning Outcomes

1. Identify and place art objects within political, social, artistic and philosophical contexts. Summarize the major styles that emerged in the 19th century Analyze the importance of context for these major styles Explain different methodologies of Art History and their relevance for understanding the art movements that emerged during this time period Formulate a question in art history relating to the topic of the course, evaluate and assess research, and create an original argument concerning that problem

ARTH 539. History of Photography**3 Credits (3)**

Course studies history, theory and use of photographic practices in art, especially from formal introduction of the process in 1839 to the present.

Crosslisted with: ARTH 339.

Prerequisite(s): Graduate standing.

ARTH 542. Global Modernisms**3 Credits (3)**

Examines themes and monuments of created from the end of the 19th century to 1968 emphasizing modern and avant-garde cultural practices.

Crosslisted with: ARTH 342. Students must be Graduate students to enroll.

Learning Outcomes

1. Identify and place art objects within political, social, artistic and philosophical contexts. Summarize the major styles that emerged in the early Twentieth Century to 1968 Analyze the importance of context for these major styles Explain different methodologies of Art History and their relevance for understanding the art of this period Apply art specific vocabulary to critically based writings and discussions of the art objects studied Formulate a question in art history relating to the topic of the course, evaluate and assess research, and create an original argument concerning that problem

ARTH 543. Contemporary Global Art Practices**3 Credits (3)**

Examines the myriad of contemporary art practices, media, and forms from 1968 to the present. Crosslisted with: ARTH 343. Students must be in Graduate standing to enroll.

Learning Outcomes

1. Identify and place art objects within political, social, artistic and philosophical contexts. Summarize the major styles and practices that emerge in the Contemporary period Analyze the importance of context for these major styles and practices Explain different methodologies of Art History and their relevance for understanding Contemporary Art Apply art specific vocabulary to critically based writings and discussions of the art objects studied Formulate a question in contemporary art, evaluate and assess research, and create an original argument concerning that problem

ARTH 544. Gender, Sexuality, and Art in the Americas**3 Credits (3)**

This course examines woman power/trans/ queer discourses of both the global south and people of color in the United States in relation to art from Latin, Central, and North America. Cross-listed with ARTH 344. Students must be in graduate standing to enroll.

Learning Outcomes

1. Identify and analyze arguments and problems within gender and sexualities of the global south Locate works of art in relation to the cultures from which they originate, historicizing and contextualizing them in socio-political histories Identify and employ methodology(ies) and theoretical approaches salient to the specific forms of art practice which they are studying Evaluate, comment upon, and formulate approaches to the artistic practices of people of the Americas based in feminist, decolonial methodologies

ARTH 545. Latin American Film**3 Credits (3)**

Surveys films and their histories from Latin American and the LatinX diaspora. Taught with ARTH 345. Students must be in graduate standing to enroll.

Learning Outcomes

1. Discuss, distinguish among, and analyze film techniques, genres, distribution systems, and movements, particularly as they relate to Latin America Demonstrate an historical understanding of the political histories, movements, and changes in Latin America Locate films in relation to the cultures from which they originate, historicizing and contextualizing them in socio-political histories Identify and employ methodology(ies) and theoretical approaches salient to filmic works

ARTH 546. Museum and Curatorial Studies**3 Credits (3)**

This museum and curatorial studies course surveys practices, objects, and histories. Taught with ARTH 346. Students must be in graduate standing to enroll.

Learning Outcomes

1. Historicize the development of museums, patronage, collecting, looting, and restitution; noting distinctions between cultures, geographic regions, and nation-state systems Identify and analyze arguments and problems within museum studies Distinguish between the professional positions, institutional functions, and governing missions within and among of distinct types of art institutions Evaluate, comment upon, and formulate approaches to exhibition design in both their practical and ideological functions

ARTH 578. Seminar in Art History**3 Credits (3)**

Reading, research, and discussion of advanced problems in art history; rotating topics will be announced in the course schedule. Individual topics may only be taken once. Student must be Graduate students to enroll.

Learning Outcomes

1. Analyze advanced problems in art history Evaluate approaches to advanced problems in art history

ARTH 579. Graduate Seminar: Art Theory, Criticism, Historiography**3 Credits (3)**

Theories and methodologies in art history and art criticism.

Prerequisite: graduate standing.

ARTH 597. Independent Study in Art History**3 Credits (3)**

Supervised independent study in topics in art history. Students must be in graduate standing to enroll.

Learning Outcomes

1. Student will formulate a question in art history, evaluate and assess research, and create an original argument concerning that problem

ARTH 599. Art History Thesis**1-15 Credits (1-15)**

Art history master's thesis research. Students must be in Graduate standing to enroll.

Learning Outcomes

1. Student will formulate a question in art history, evaluate and assess research, and create an original argument concerning that problem

ARTS-ART STUDIO

ARTS 1121. Foundations in Art

3 Credits (2+4P)

The Foundations course will focus on a deceptively simple question. "What is Contemporary Art, and how can we make it?" Through the exploration of basic visual design concepts, collaborative learning, and interdisciplinary studio production, this course will help us to discover what it means to be an artist in the 21st century.

Learning Outcomes

1. Create original works of art through the investigation of ideas and concepts resulting in the communication of meaning. Develop forms that convey meaning. Evaluate works of art through critiques that appraise how the form communicates meaning. Justify the decisions that were made in the use and application of the chosen medium and form to communicate meaning in a work of art. Analyze the differences in clarity of communication between works of art based subject matter, medium and form. Apply knowledge provided in lectures to produce works of art that communicate meaning. Demonstrate an ability to express concepts in visual form. Understand how the choice of subject matter, medium and form translate in the expression of concepts through discussion and description. Remember the fundamental tenets of art, elements and principles of design, through the duplication of them in works of art as well their use in discussions.

ARTS 1145G. Visual Concepts

3 Credits (2+4P)

Visual Concepts is an introduction to the philosophies of art, visual thinking, and principles of visual organization. Designed to give students a broad view of aesthetic traditions, ideologies, and techniques basic to the creation and evaluation of art. Principles and concepts are taught in a common lecture and applied in parallel small studio sections. For non-art majors only.

Learning Outcomes

1. Develop understanding of history, major styles and contemporary issues in art.
2. Introduce students to the language of visual perception and aesthetic evaluation.
3. Introduce students to the fundamental processes of visual perception and artistic expression.
4. Develop students' confidence in using various art materials for artistic expression.
5. Develop students' ability to verbalize ideas and processes in art making.
6. Develop student's ability to communicate through writing about art and art experiences.

ARTS 1240. Design I

3 Credits (3)

This course introduces the fundamentals of two-dimensional design as it applies to fine art and commercial contexts. Emphasis will be on basic color theory, elements of dynamic composition, vocabulary of visual arts and design, and development of visual conceptual skills. Students will use a variety of materials and techniques. Restricted to Community Colleges campuses only.

Learning Outcomes

1. Produce art works that apply and organize the elements of two-dimensional form (line, shape, value, texture, color and space).
2. Produce artworks that apply the principles of two-dimensional design (harmony, variety, repetition, balance, rhythm, proportion, dominance, movement, and economy).
3. Demonstrate effective use of materials and techniques with consideration for craftsmanship and presentation.
4. Use visual art vocabulary in the development and critique of work
5. Explore concepts and ideas: from conceptual, realistic/referential to non-representational

ARTS 1250. Design II

3 Credits (3)

This course introduces the basic formal (aesthetic), spatial, and physical aspects of 3-D form as they can be applied to sculptural and functional design. Techniques that explore structure, mass, volume, scale, surface, form, and function are covered, along with various media, which may include paper, wood, clay, and/or metal. Restricted to Community Colleges campuses only.

Learning Outcomes

1. Apply the artistic qualities of the elements of art and principles of design to three-dimensional form.
2. Create 3 dimensional form using varied sculptural methods, construction techniques and media.
3. Produce 3 D design projects safely with proper use of equipment and materials.
4. Apply realistic, referential, and abstract concepts and ideas to projects.
5. Demonstrate knowledge of 3-D related art vocabulary, origin and trends in sculpture, and 3-D design fundamentals.

ARTS 1310. Introduction to Ceramics**3 Credits (2+4P)**

This course introduces the technical processes and conceptual concerns of working with ceramic material. Various methods of forming functional and expressive works out of clay are explored. Methods used include handbuilding and throwing, basic clay bodies, slip and glaze, and atmospheric firing.

Learning Outcomes

1. Explain the transformation of the ceramic material from raw clay form to glazed ceramic object
2. Demonstrate proficiency of technical ceramic skills
3. Explain larger concepts and design principles
4. Apply basic 3-D design principles in the formation of a work of art, as they apply to the ceramic media
5. Create ceramic works of art based on conceptual prompts
6. Critically evaluate a variety of artwork
7. Gain an understanding of the history of ceramic art from a multicultural perspective

ARTS 1320. Ceramics I**3 Credits (2+4P)**

An introduction to the medium of clay incorporating hand building and wheel throwing to introduce the student to both the sculptural and utilitarian uses of clay. The student will also be introduced to a variety of glazing and firing techniques

Learning Outcomes

1. Demonstrate through critical discourse or writing an introductory knowledge of the history of ceramics, and ceramic language and terminology.
2. Demonstrate through mechanical application an introductory knowledge of the properties of clays, glazes, and a variety firing techniques.
3. Produce a body of work that exemplifies good ceramic design through the effective use of form, surface, and color.
4. Through the production a body of work demonstrate competency in hand building and throwing on the wheel.

ARTS 1410. Introduction to Photography**3 Credits (2+4P)**

This course introduces the making of photographic images from a broad viewpoint to consider both as an art practice and as a cultural practice. The course covers technical information on camera use and functionality, composition and visual design, digital workflow and editing, professional functions of manipulating and enhancing images, and printing correctly and effectively. The historical aspects of photography are also covered. May be repeated up to 3 credits.

Learning Outcomes

1. Gain fluency with basic camera function as well as a working knowledge of other photographic equipment and software to produce technically competent photographs
2. Have a familiarity with current image-editing software to enhance images as well as developing a digital workflow for the management of digital images
3. Be able to develop creative solutions to visual photographic problems
4. Gain awareness of contemporary issues in contemporary art photographic practice that can be applied to the one's own individual practice
5. Develop the ability to critically analyze and discuss photographic images
6. Print and produce a final project that demonstrates synthesis of ideas presented in the course readings, critiques, and individual research
7. Demonstrate photographic terminology, and the many ways photographs function in society, both currently and historically

ARTS 1520. Digital Media I**3 Credits (2+4P)**

This course provides an introduction to two of Adobe's major software applications, Illustrator and Photoshop, which are essential in creating artwork, designing promotional materials, websites and more. Part of the course deals with creating a variety of documents using the major tools of each program, and gaining an understanding of the contemporary graphic design industry and basic elements and principles of design. Community Colleges only.

Learning Outcomes

1. Demonstrate appropriate skills in configuring and navigating computer systems software applications as appropriate to digital image making needs including organization of files using keywords and running batch processes.
2. Exhibit an understanding of a layer based bitmap editing program, through photo retouching, precise use of selection tools, and color adjustment techniques.
3. Create imagery using a vector based illustration program which demonstrates an understanding of vector based drawing tools.
4. Integrate the use of bitmap and vector images using bitmap and vector based image making applications to demonstrate a basic understanding of composition, color, and appropriate image size and resolution.

ARTS 1610. Drawing I**3 Credits (2+4P)**

This course introduces the basic principles, materials, and skills of observational drawing. Emphasis is placed on rendering a 3-D subject on a 2-D surface with visual accuracy. Other topics include historical and contemporary references as well as an investigation of linear perspective, line, value, shape, space & composition. May be repeated up to 3 credits.

Learning Outcomes

1. Produce drawings that demonstrate techniques and mechanics of observational drawing.
2. Demonstrate competency in the following practices: measuring and sighting, gesture, contour line, negative space, shape, value, space, volume, plane and texture.
3. Create drawings primarily from observation with black and white traditional drawing media.
4. Demonstrate effective verbal or written response to one's own art and the art of others.

ARTS 1630. Painting I**3 Credits (2+4P)**

This course introduces the tradition of painting as a medium for artistic expression. Students will investigate materials, tools, techniques, history and concepts of painting. Emphasis is placed on developing descriptive and perceptual skills, color theory, and composition. May be repeated up to 3 credits.

Prerequisite(s): ARTS 1610.

Learning Outcomes

1. Produce paintings that demonstrate the tradition of methods, techniques, materials, and tools of oil painting.
2. Construct a variety of support structures and grounds on which paintings are created
3. Examine the historical origins and practices of painting from the personal, social and cultural perspective.
4. Identify and apply environmentally safe painting practices, care of tools, equipment, and facilities, as well as disposal of mediums, solvents and paints.
5. Apply basic color theory to representational and non-representational painting.

ARTS 1710. Introduction to Printmaking**3 Credits (2+4P)**

This course provides direct experience of exploring basic printmaking processes, including relief, intaglio, and monoprint processes, as well as the investigation of materials/media, tools, techniques, history, and concepts of printmaking. Emphasis is given to solving problems through thematic development while producing a portfolio of prints.

Learning Outcomes

1. Properly operate a printing press and safely handle materials and equipment.
2. Demonstrate an adequate ability to utilize basic historical printmaking techniques that are widely relevant to contemporary, artistic expressions.
3. Utilize formal elements of art and design (line, shape, value, texture, space, and color), to create prints that are formally sophisticated.
4. Create imagery that contains conceptual depth, which can be interpreted by viewers with regard to social, cultural, political, geographical, and/or psychological experiences and relevance.

ARTS 1711. Computer-Based Illustration**3 Credits (2+4P)**

Introduction to the principles of computerized drawing and design. Using the basic concepts, drawing tools, and vocabulary of Adobe Illustrator.

Prerequisite: ARTS 1610, ARTS 1240, or consent of instructor.

Learning Outcomes

1. Demonstrate drawing with the pen tool.
2. Demonstrate the use of blending color and creating shapes.
3. Create spot colors and effectively use them in a page layout.
4. Demonstrate formatting and creating typography.
5. Demonstrate the use of layers, effects, graphic styles, symbols, and brushes
6. Demonstrate competency in creating digital graphics using of Adobe Illustrator software

ARTS 1712. Digital Graphics**3 Credits (2+4P)**

Importing and exporting images and text into various desktop publishing formats. Exploring imaging, drawing, and page layout applications. Introduction to typography.

Prerequisite: ARTS 1520.

Learning Outcomes

1. Demonstrate competency in the use of InDesign software.
2. Create appropriate visual solutions based on target marketing information.
3. Demonstrate competency in the design and production of advertising and promotional materials.
4. Present ideas and concepts effectively and competently.
5. Visually demonstrate design solutions to be used in a portfolio

ARTS 1713. Web Page Design**3 Credits (2+4P)**

Introduction to the creation of well-designed and organized Web sites. Emphasis on building creative but functional user-friendly sites. Introduction to HTML, Flash, Java Script, and Web-authoring software. Community Colleges only.

Prerequisite: ARTS 1520.

Learning Outcomes

1. Outline the structure and functionality of a typical website.
2. Demonstrate design and layout skills.
3. Demonstrate competency in the use of Dreamweaver software.
4. Demonstrate competency in the use of photo editing software.
5. Demonstrate skills learned for website functionality.
6. Create an Internet compatible website.

ARTS 1810. Jewelry and Small Metal Construction I**3 Credits (2+4P)**

This course introduces the basic techniques, materials, and tools traditionally used in the creation of jewelry and/or small-scale sculptural objects.

Learning Outcomes

1. Apply basic jewelry fabrication techniques (such as: piercing, cold connections, soldering, metal forming, casting and stone setting) to complete projects. Create design sketches of the objects prior to fabrication. Demonstrate knowledge of materials and safe practices for making jewelry, as well as small functional and non-traditional objects. Analyze projects through critiques, oral presentations, and discussions.

ARTS 2010. Portfolio Development**3 Credits (2+4P)**

This course presents the practicalities of building an art career with emphasis on developing a professional portfolio through visual aids, resumes, statements, and presentations. It covers professional practices of the studio artist including self-promotion, contracts, research tools for exhibition venues and other art related opportunities.

Prerequisites: ARTS 1712, ARTS 2611, and ARTS 1520, or consent of instructor.

Learning Outcomes

1. Develop a portfolio package with visual aids, photographic documentation, resumes, bios and artist statements.
2. Analyze the qualifications, procedures and portfolio requirements necessary for professional art related opportunities.
3. Complete an oral presentation on a series of personal works.
4. Distinguish pathways for navigating the business side of being a professional artist.

ARTS 2355. Stained Glass**3 Credits (2+4P)**

Instruction in the fundamental fabrication and design techniques for stained glass. Introduction to visual decision making skills, historical, and critical issues of the medium. Community Colleges only.

Learning Outcomes

1. Demonstrate an understanding of the theory, principles and procedures that comprise the art and science of designing at least four (40 stained glass techniques through both written and verbal assessments, as well as, actual completed examples of each technique.
2. Properly select and safely employ various glass studio tools, instruments, procedures, methods and techniques in the fabrication processes of stained glass.
3. Select and apply suitable problem-solving strategies in a practical studio environment.
4. Work cooperatively in a studio classroom.
5. Relate historical background and significant developments of glass in general and stained glass in particular.
6. Understand the chemical processes associated with various processes used in working with and manipulating glass.
7. Develop critical thinking and problem solving strategies in various stained glass fabrication technics.
8. Be able to critically analyze, assess and appreciate the value of glass works of every kind.

ARTS 2410. Black & White Photography**3 Credits (2+2P)**

This course introduces the fundamental techniques of black and white photography, which includes camera functions and use, exposure techniques and film processing, traditional darkroom printing, and presentation of work. Same as ARTS 1410.

Learning Outcomes

1. Demonstrate competent film development and photographic printing skills
2. Demonstrate an emerging understanding of aesthetic, compositional, conceptual, and communicative tools in photography including lighting and dynamic composition techniques.
3. Be able to critically analyze and discuss photographic images using photographic terminology
4. Demonstrate proper image adjustment and correction techniques, and apply proper exposure techniques

ARTS 2430. Photographic Portraiture**3 Credits (2+2P)**

This course covers the study of professional photography that involves people, including studio and environmental portraits. Topics include studio and exterior lighting techniques, and selecting lighting equipment and supplies. Restricted to: Community Colleges only.

Prerequisite(s): ARTS 1410 or FDMA 1545.

Learning Outcomes

1. Demonstrate successful operation of studio lighting equipment and accurately define lighting equipment terminology
2. Illustrate the principles of photographic lighting
3. Demonstrate and apply how to use and modify natural light effectively
4. Demonstrate understanding of different approaches such as formal, informal, candid, vernacular and their cultural implications
5. Distinguish historic and contemporary cultural notions informing different types of portraits

ARTS 2431. Introduction to Graphic Design**3 Credits (2+4P)**

Introduction to the principles of visual communication and digital media, letterforms, typography and identity marks. Projects produced using conventional and digital tools.

Learning Outcomes

1. Demonstrate working knowledge of the graphic design software.
2. Identify and apply basic design concepts for the purpose of visual communication.
3. Conduct visual research and create presentations on design topics.
4. Solve graphic design problems through solving fundamental communication challenges by sketching, drawing, typographic composition, use of image and color.

ARTS 2440. Photo Finishing & Presentation**2 Credits (1+2P)**

Use of visual language for personal expression. Freelance photography; care of original photos; preparation of portfolios, photographic markets, exhibitions and judging, galleries and copyrights. Students will prepare a photographic portfolio. Restricted to: Community Colleges only.

Prerequisite(s): FDMA 1545.

Learning Outcomes

1. Define your target market and create a complete "Personal Promotional Package"
2. Produce a professional Resume Cover Letter.
3. Produce a professional looking Business Card, Letterhead Mailing Labels
4. Produce a single page Promotional Piece, (and possible follow-up material)
5. Produce a PDF Formatted Portfolio (Create in Photoshop Export as PDF)
6. Produce a clean, professional looking traditional hard portfolio with 20-30 pieces
7. Present the Entire Promotional Portfolio and promo materials in a "Job Interview"

ARTS 2610. Drawing II**3 Credits (2+4P)**

This course introduces color and colored media as an element of composition while emphasizing descriptive and perceptual drawing skills and conceptual approaches to contemporary drawing. Restricted to ART and ANVE/DFM majors.

Prerequisite(s): ARTS 1610.

Learning Outcomes

1. Create drawings in wet and dry color media.
2. Practice analyzing and visually translating observed subjects from realistic, referential, and/or objective form, to non-representational or abstract imagery
3. in drawings.
4. Compose fully developed drawings that include a conceptual or historical basis.
5. Engage in effective written and oral critique in response to one's own art and the art of others.

ARTS 2611. Advanced Computer-Base Illustration**3 Credits (2+4P)**

Design custom graphics and create special effects with filtering, special effects on type, graphing, technical illustrations, and three-dimensional drawing using Adobe Illustrator.

Prerequisites: ARTS 1212, ARTS 1711, and ARTS 1520, or consent of instructor.

Learning Outcomes

1. Demonstrate competency in the use of Adobe Illustrator software.
2. Create appropriate visual solutions based on target marketing information.
3. Demonstrate competency in the design and production of advertising and promotional materials.
4. Present ideas and concepts effectively and competently.
5. Visually demonstrate design solutions to be used in a portfolio

ARTS 2616. Aspects of Drawing**2-3 Credits**

Continued work in drawing with emphasis on personal creative endeavor. Community Colleges only.

Prerequisites: ARTS 1610 and ARTS 2610.

Learning Outcomes

1. Advanced skill level in the visual dynamics of line involved in the creation of drawing.
2. Advanced skill level in the visual dynamics of shape involved in the creation of drawing.
3. Advanced skill level in the visual dynamics of value involved in the creation of drawing.
4. Advanced skill level in the visual dynamics of color involved in the creation of drawing.
5. Advanced skill level in the visual dynamics in the combination of line, shape, value and color involved in the creation of drawing.

ARTS 2630. Painting II**3 Credits (2+4P)**

This course focuses on the expressive and conceptual aspects of painting, building on the observational, compositional, technical, and critical skills gained previously. Students will investigate a variety of approaches to subject matter, materials, and creative processes through in-class projects, related out-of-class assignments, library research or museum/gallery attendance, written responses, and critiques. Prerequisite(s): ARTS 1610 and ARTS 1630

Learning Outcomes

1. Produce paintings building on the skills and techniques learned in Painting I
2. Solve unique format, support, ground, over and under texturing surface challenges
3. Practice analyzing and translating observed subjects from realistic, referential, and/or objective form, to non-representational imagery
4. Create paintings that explore personal content, stylization, symbolism, narrative, and/or iconography

ARTS 2635. Painting III**2-3 Credits**

Continuation of ARTS 2630.

Prerequisites: ARTS 1610, ART 1240 (for art majors), ART 1630, or consent of instructor.

Learning Outcomes

1. Color mixing and color relationships
2. Create illusions of space and volume
3. The student will strengthen his or her own personal artistic style. Knowledge of the proper use and maintenance of painting tools
4. Explore and learn the technique of a master painter of the past.
5. Awareness of nature, "eye hand response," and an imaginative or personal use of the medium.
6. Awareness of the creative process, exploring unforeseen possibilities
7. An ability to work independently.
8. Understanding of painting styles and arts vocabulary

ARTS 2839. Introduction to Sculpture**3 Credits (2+4P)**

Beginning sculpture students "explore space" while learning new processes and skills, including mold making, welding and woodworking.

Learning Outcomes

1. Be able to utilize a variety of traditional materials and sculpture processes, including: mold making, metal fabrication/wood fabrication, and the creative integration of mixed media.
2. You will learn to differentiate between objects and installations, and be prepared to explore sculpture in upper division, topics based courses.

ARTS 2993. Art Workshop**0.5 Credits (.5)**

Required for all freshman and sophomore Art majors for four semesters, this workshop is designed to build professional student cohorts within the Department of Art; incorporate visiting artist and scholar lectures into the curriculum; and actively involve students in exhibitions and gallery and departmental events. May be repeated up to 4 credits. Crosslisted with: ARTS 308. Restricted to: BA Studio Art, BA Art History BFA Studio Art, BFA Museum Conservation majors. Restricted to Las Cruces campus only.

Learning Outcomes

1. Varies

ARTS 2996. Special Topics in Studio**1-3 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. No more than 9 credits toward a degree.

Prerequisite: consent of instructor.

Learning Outcomes

1. Varies

ARTS 308. Art Workshop**0.5 Credits (.5)**

Required for all junior and senior Art majors for four semesters, this workshop is designed to build professional student cohorts within the Department of Art; incorporate visiting artist and scholar lectures into the curriculum; and actively involve students in exhibitions and gallery and departmental events. May be repeated up to 4 credits. Crosslisted with: ARTS 208. Restricted to: BA studio art, BA Art History BFA studio art, BFA Museum Conservation majors.

ARTS 340. Internship in Art**1-9 Credits (3P)**

This course provides students with the opportunity for workplace learning as an important component in their program of study. Students can identify an internship in graphic design, photography, conservation or other studio areas; or within broader arts institutions such as museums, galleries and visual arts centers which will provide them with professional experience that will support the successful achievement of their career goals in art. May be repeated up to 9 credits. Crosslisted with: ARTS 440 and ARTS 540. Restricted to: BA Studio Art, BA Art History BFA Museum Conservation, BFA Studio Art MA Art History MFA Studio Art majors.

Prerequisite(s): ARTH 2110G, ARTH 2120G, ARTS 2671 and eighteen credits of ARTS/ARTH 200 or ARTS/ARTH 300 level studio courses.

ARTS 350. Special Topics in Intermediate Drawing and Painting**3 Credits (2+4P)**

Intermediate drawing and painting course focusing on the following topics: Realism, Color, Narrative, and Abstraction. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 12 credits.

Prerequisite(s): ARTS 1610 and ARTS 1630, or consent of instructor.

Learning Outcomes

1. Apply fundamental elements and principles of design to art production specific to an intermediate level drawing and painting course. Demonstrate the ability to express concepts in visual form through art making and process specific to a course covering intermediate level tools and processes in drawing and painting. Evaluate/appraise original works of art through the application of medium, tools, techniques and concepts specific to contemporary drawing and painting. Create original works of art through the application of medium, tools, techniques and concepts specific to drawing and painting.

ARTS 355. Special Topics in Intermediate Graphic Design**3 Credits (2+4P)**

Intermediate graphic design course focusing on the following topics: web design, typography, motion graphics, publication design. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 12 credits.

Prerequisite(s): ARTS 2431 or consent of instructor.

Learning Outcomes

1. Apply fundamental elements and principles of design to art production specific to an intermediate level graphic design course. Demonstrate the ability to express concepts in visual form through art making and process specific to a course covering intermediate level tools and processes in graphic design. Evaluate/appraise original works of art through the application of medium, tools, techniques and concepts specific to contemporary graphic design. Create original works of art through the application of medium, tools, techniques and concepts specific to contemporary graphic design.

ARTS 360. The Figure**3 Credits (2+4P)**

Introduction to working from live models, anatomical skeletons, source images and the imagination in a variety of two-dimensional media, including painting and drawing. An emphasis is placed on anatomical accuracy and with a focus on the figure as an expressive subject. May be repeated up to 6 credits.

Prerequisite(s): ARTS 1610 or consent of instructor.

ARTS 365. Intermediate Sculpture Special Topics**3 Credits (2+4P)**

Intermediate sculpture students will expand their fabrication skills in metal, wood and mixed media. Assignments incorporate topics such as Pop art, Process Art, and The Body in Contemporary Art. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 6 credits.

Prerequisite(s): ARTS 2839 or consent of instructor.

ARTS 370. Special Topics in Intermediate Digital Photography**3 Credits (2+4P)**

Intermediate digital photography course addressing techniques and production of photo media within the context of contemporary art. Course focuses on the following rotating special topics: Networks, Photo-book and Video art. May be repeated up to 12 credits.

Prerequisite(s): ARTS 1410, or consent of instructor.

Learning Outcomes

1. Apply fundamental elements and principles of design to art production specific to an intermediate level photography course. Demonstrate the ability to express concepts in visual form through art making and process specific to a course covering intermediate level tools and processes in photography. Evaluate/appraise original works of art through the application of medium, tools, techniques and concepts specific to contemporary photography. Create original works of art through the application of medium, tools, techniques and concepts specific to contemporary photography.

ARTS 373. Intermediate Analog Photography**3 Credits (2+4P)**

Introduction to skills and techniques of black and white film photography within the context of contemporary art. Emphasis on analog camera work and darkroom procedures. 35 mm SLR or rangefinder film camera required for course. May be repeated up to 6 credits.

Prerequisite(s): ARTS 1410, or consent of instructor.

ARTS 374. Intermediate Ceramics Multiples (Design and Production)**3 Credits (2+4P)**

Intermediate ceramics course focusing on an introduction to the technical processes of throwing, prototyping, mold making, glaze calculation, and alternative firing. May be repeated up to 3 credits.

Prerequisite(s): ARTS 1310 or consent of instructor.

Learning Outcomes

1. Develop the basic visual and tactile problem solving skills necessary to making one part and two part molds. Demonstrate competency is using these techniques to translate basic cylindrical, spherical, and rectangular forms. Develop ability to make successful clay casts from properly made molds. Apply the principles of design to creating multiples: Balance, Emphasis, Rhythm, Contrast, Proportions, and Scale, Movement. Develop basic skills in glazing and a variety of other surface design techniques. Apply the visual element to glazing and surface design of ceramic forms: Line, Shape, Mass, Value, Color, Texture, Pattern, Space Through research, writing, and class critiques develop the ability to think, speak and write about the conceptual relevance to creating multiples in contemporary art.

ARTS 375. Intermediate Ceramics Sculptural Concerns**3 Credits (2+4P)**

Intermediate ceramics course focusing on the refinement of technical skills with an emphasis on conceptual development related to materiality.

Prerequisite(s): ARTS 1310 or consent of instructor.

Learning Outcomes

1. Refine and master the basic skills in all the standard ceramic building techniques. This includes wheel throwing, coil building, and slab building. Demonstrate competency is using these techniques to replicate complex geometric, organic, and figurative forms Through the guidance of course assignments begin to develop original conceptual themes and natives to translate into sculptural forms. Through the guidance of course assignments begin to develop original conceptual themes and natives to translate into sculptural form. Refine and master glazing and surface design techniques. Begin to develop ability to mix glazes and slips. Demonstrate clear understanding of the visual element to glazing and surface design: Line, Shape, Mass, Value, Color, Texture, Pattern, Space Through research, writing, and class critique refine the ability to think, speak and write about contemporary ceramic sculpture in a competent and nuanced way.

ARTS 376. Museum/Gallery Research Internship**1-9 Credits**

Research internship in museum or gallery. Requirements determined by instructor in cooperation with supervising museum/gallery professional. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): ARTH 2110G, ARTH 2120G, ARTS 2671, or consent of instructor.

ARTS 385. Special Topics in Intermediate Metals/Jewelry**3 Credits (2+4P)**

Intermediate Metals/Jewelry course focusing on the following topics: design and production, materiality and sculptural concern. Techniques may include casting, complex construction, forming, and mix media. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 12 credits.

Prerequisite(s): ARTS 1810 or consent of instructor.

Learning Outcomes

1. Apply fundamental elements and principles of design to art production specific to an intermediate level metals/jewelry course. Demonstrate the ability to express concepts in visual form through art making and process specific to a course covering intermediate level tools and processes in metals/jewelry. Evaluate/appraise original works of art through the application of medium, tools, techniques and concepts specific to contemporary metals/jewelry. Create original works of art through the application of medium, tools, techniques and concepts specific to contemporary metals/jewelry.

ARTS 394. Special Topics in Studio**3 Credits (3)**

Specific subjects and credits to be announced in the Schedule of Classes online. Topics cannot be repeated. May be repeated up to 9 credits.

ARTS 401. Museum Conservation Techniques I**3 Credits (2+3P)**

Introduces the student to conservation theory and the basic principles of conservation for cultural objects. The course integrates the history, philosophy and technologies of art conservation with knowledge of the properties of materials used in conservation. The student will learn and develop conservation skills including learning about the most frequent kinds of deterioration that can occur in various types of art objects, symptoms and causes as well as preventative and restoration techniques. Although this course provides practical experience, it also seeks to provide a broad understanding of the field of conservation. This course also includes how to document the condition of an object during the conservation process.

Learning Outcomes

1. Identify and explain strengths and weaknesses of the theory of conservation Analyze a ceramic object through testing and observation; evaluate the results of an object to be conserved. Create and defend a conservation treatment plan based on the conservation theory and the principles of conservation for cultural objects, tests results, observations, and personal experience in the lab. Apply conservation and restoration techniques to the ceramic object in the lab, after analyzing, evaluating and creating a treatment plan for the object. Create a Condition Report of the ceramic object by describing the condition and its treatment during the conservation process.

ARTS 402. Museum Conservation Techniques II**3 Credits (2+3P)**

Continues conservation theory and the basic principles of conservation for cultural objects. The course integrates the history, philosophy and technologies of art conservation with knowledge of the properties of materials used in conservation. The student will learn and develop conservation skills including learning about the most frequent kinds of deterioration that can occur in various types of art objects, symptoms and causes as well as preventative and restoration techniques. Although this course provides practical experience, it also seeks to provide a broad understanding of the field of conservation.

Prerequisite(s): ARTS 401.

Learning Outcomes

1. Analyze different types of materials by examining two objects, a painted canvas and a painted wood panel, through testing and observation and evaluate the results of the objects to be conserved Create and defend a conservation treatment plan based on the conservation theory and the principles of conservation for cultural objects, tests results, observations, and personal experience in the lab. Apply conservation and restoration techniques to both objects in the lab, a painted canvas and a painted wood panel, after analyzing, evaluating and creating a treatment plan for the object. Create a Condition Report for each object, describing the condition of the object, history, the problems the object presents, its treatment during the conservation process, and any remaining issues after treatment.

ARTS 403. Preventative Conservation/Collections Care**3 Credits (3)**

Introduces the student on how to mitigate the deterioration and damage of cultural property in a museum setting through the formulation and implementation of policies and procedures. The course addresses most aspects of collections management and care for objects in storage, exhibitions and during transportation.

Learning Outcomes

1. Understand the principles of Preventive Conservation and Collections Care and develop conservation skills through recognizing, describing, explaining, locating, and reporting symptoms and causes of the agents of deterioration that affect all types of art objects Apply methods of Preventive Conservation and collections care for causes of deterioration in museum collections Analyze and Evaluate several museums and create a Museum Assessment that could serve a plan of action to remediate any problems encountered. Create a plan for re-organizing a museum based on the Museum Assessment Create a binder based on the readings from class that includes all the causes of deterioration of materials, how to prevent deterioration, and environmental control of collections.

ARTS 404. Applied Projects in Museum Conservation**3 Credits (3)**

This course provides student with the practical application of techniques and policies learned in previous museum conservation coursework with the underpinnings of basic museum and conservation practices, particularly in collection care, preventive conservation, conservation, ethics, teamwork and security. Rotating special projects. May be repeated up to 6 credits.

Prerequisite(s): ARTS 401, ARTS 402, ARTS 403 or ARTS 501, ARTS 502, ARTS 503.

Learning Outcomes

1. Analyze and examine the different types of materials that compose one or various objects through testing and observation and evaluate the results of the object/s to be conserved Create and defend the conservation treatment plan based on conservation theory and the principles of conservation for cultural objects, the tests results, and the observations. Apply conservation and restoration techniques to the object/s in the lab after analyzing, evaluating and creating a treatment plan for the object/s. Create Condition Reports, one for each object, by describing the condition of the object and its treatment during the conservation process.

ARTS 440. Internship in Art**1-9 Credits (3P)**

This course provides students with the opportunity for workplace learning as an important component in their program of study. Students can identify an internship in graphic design, photography, conservation or other studio areas; or within broader arts institutions such as museums, galleries and visual arts centers which will provide them with professional experience that will support the successful achievement of their career goals in art. May be repeated up to 9 credits. Crosslisted with: ARTS 340 and ARTS 540.

Prerequisite(s): ARTH 2110G, ARTH 2120G, ARTS 2671 and eighteen credits of ARTS/ARTH 200 or ARTS/ARTH 300 studio courses.

ARTS 450. Special Topics In Advanced Drawing and Painting**3-6 Credits (2-4+4P)**

Advanced drawing and painting course focusing on the following topics: Identity, Place, Spirituality, and Body. Topics will be announced in the course schedule. May be repeated up to 12 credits.

Prerequisite(s): 6 credits of ARTS 350, or consent of instructor.

Learning Outcomes

1. Apply fundamental elements and principles of design to art production specific to an advanced level drawing and painting course. Demonstrate the ability to express concepts in visual form through art making and process specific to a course covering advanced level tools and processes in drawing and painting. Evaluate/appraise original works of art through the application of medium, tools, techniques and concepts specific to contemporary drawing and painting. Create original works of art through the application of medium, tools, techniques and concepts specific to contemporary drawing and painting.

ARTS 455. Special Topics in Advanced Graphic Design**3 Credits (2+4P)**

Advanced graphic design course focusing on the following special topics: special projects, identity design, storytelling, portfolio. Topics will be announced in the course schedule. Each topic may only be taken once. May be repeated up to 15 credits.

Prerequisite(s): 6 credits of ARTS 355, or consent of instructor.

Learning Outcomes

1. Apply fundamental elements and principles of design to art production specific to an advanced level graphic design course. Demonstrate the ability to express concepts in visual form through art making and process specific to a course covering advanced level tools and processes in graphic design. Evaluate/appraise original works of art through the application of medium, tools, techniques and concepts specific to contemporary graphic design. Create original works of art through the application of medium, tools, techniques and concepts specific to contemporary graphic design.

ARTS 465. Advanced Sculpture Special Topics**3-6 Credits (2-4+4P)**

Thematic classes deepen students' knowledge of contemporary sculpture and extended media through a series of interpretive assignments that culminates in a unified body of work. Course topics include: "Artists' Maps", Installation Art/Land Art", "Sculpture and the 1960s", "Sculpture and the 1970's". Topics will be announced in the course schedule. May be repeated up to 18 credits.

Prerequisite(s): ARTS 365 or permission of the instructor.

ARTS 470. Advanced Digital Photography**3 Credits (2+4P)**

Advanced digital photography course addressing technique and production of photo media within the context of contemporary art. Course focuses on the following rotating topics: Temporality, Photo-installation and Video Art. Each topic may only be taken once.

Prerequisite: ARTS 370 or consent of instructor.

Learning Outcomes

1. Apply fundamental elements and principles of design to art production specific to an advanced digital photography course. Demonstrate the ability to express concepts in visual form through art making and process specific to a course covering advanced level tools and processes in digital photography. Evaluate/appraise original works of art through the application of medium, tools, techniques and concepts specific to contemporary photography. Create original works of art through the application of medium, tools, techniques and concepts specific to contemporary photography.

ARTS 474. Advanced Ceramics Design and Production**3-6 Credits (3-6)**

Advanced ceramics course focusing on the technical processes of throwing, prototyping, mold making, glaze calculation, and alternative firing. Discussions may also include issues of professional practice, marketing, and branding. May be repeated up to 6 credits.

Prerequisite(s): ARTS 374 and ARTS 375, or consent of instructor.

Learning Outcomes

1. Refine the basic visual and tactile problem solving skills necessary to making two part molds, and develop the ability to make complex multipart molds. Demonstrate competency is using these techniques to translate complex geometric and organic forms. Develop pertinent conceptual reasoning for creating multiples of a form in ceramic material. Demonstrate clear understanding of the principles of design in designing ceramic multiples: Balance, Emphasis, Rhythm, Contrast, Proportions, and Scale, Movement. Develop basic skills in glazing and a variety of other surface design techniques. Demonstrate clear understanding of the visual element of art to the glaze and surface design of ceramic multiples: Line, Shape, Mass, Value, Color, Texture, Pattern, Space, Through research, writing, and class critiques refine the ability to think, speak and write about the conceptual relevance to creating multiples in contemporary art and articulate.

ARTS 475. Advanced Ceramics Sculptural Concerns**3-6 Credits (2-4+4P)**

Advanced ceramics course focusing on conceptual development as it relates the creation of a unified body of work. Topics may include discussions of advanced techniques, professional practices, and contemporary issues in ceramics. May be repeated up to 15 credits.

Prerequisite(s): ARTS 374 and ARTS 375, or consent of instructor.

Learning Outcomes

1. Strive to innovate the standard ceramic building techniques in a way that contributes to, and is informed by, the field of ceramic sculpture. Develop a cohesive body of work, which explores completely original concepts and themes. Demonstrate clear understand of the principles of design by challenging them in an informed way. Refine and master glazing and surface design techniques. Begin to develop ability to mix glazes and slips. Demonstrate clear understanding of the visual element of art by challenging them in an informed way. Through research, writing, and class critique refine the ability to think, speak and write about contemporary ceramic sculpture in a competent, nuanced, and critical way. Begin to measure one's work against the larger context of contemporary art.

ARTS 485. Special Topics in Advanced Metals/Jewelry**3-6 Credits (2-4+4P)**

Advanced Metals/Jewelry course focusing on the following topics: conceptual development and personal aesthetic and style, professional practices, contemporary issues in Metals/Jewelry, and senior exhibition. Techniques may include enameling, coloring, historical processes, and digital technology. Topics will be announced in the course schedule. Each topic may only be taken once.

Prerequisite: 6 credits of ARTS 385, or consent of instructor.

Learning Outcomes

1. Apply fundamental elements and principles of design to art production specific to an intermediate level metal/jewelry course. Demonstrate the ability to express concepts in visual form through art making and process specific to a course covering intermediate level tools and processes in metal/jewelry. Evaluate/appraise original works of art through the application of medium, tools, techniques and concepts specific to contemporary metal/jewelry. Create original works of art through the application of medium, tools, techniques and concepts specific to contemporary metal/jewelry.

ARTS 490. Museum Conservation Internship**1-6 Credits (1-6)**

The goal of this internship is to provide a student with a practical learning experience in preventative conservation techniques and policies so that they can relate what they have learned in the classroom from ART 403 Preventative Conservation/Collections Care to applied situations. It will provide the student an opportunity to learn skills and knowledge needing in working with museum collections. Tasks and projects will be assigned by the instructor. 3 credits required for BFA in Museum Conservation. May be repeated up to 6 credits.

Prerequisite(s): ARTS 403.

ARTS 494. Special Topics in Studio**3 Credits (3)**

Specific subjects and credits to be announced in the Schedule of Classes online. May be repeated up to 9 credits.

ARTS 495. Undergraduate Studio Thesis**3-6 Credits (3-6)**

Special research and independent study leading to undergraduate thesis exhibition. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

ARTS 496. Fundamentals of Studio Management**1 Credit (1)**

Advanced studio course designed to introduce students to the fundamentals of studio management. Includes training in proper tools use and maintenance; safety procedures; and practical experience with studio oversight. Concurrent registration in advanced level studio course of the same media area required. May be repeated for a maximum of 3 credits. Restricted to majors. Graded S/U.

Prerequisite: consent of instructor.

ARTS 499. Problems in Studio Art**1-6 Credits (1-6)**

Individualized study in specialized studio areas not covered by other advanced courses. May be repeated up to 9 credits. Consent of Instructor required.

ARTS 501. Museum Conservation Techniques I**3 Credits (2+3P)**

Introduces the student to conservation theory and the basic principles of conservation for cultural objects. The course integrates the history, philosophy and technologies of art conservation with knowledge of the properties of materials used in conservation. The student will learn and develop conservation skills including learning about the most frequent kinds of deterioration that can occur in various types of art objects, symptoms and causes as well as preventative and restoration techniques. Although this course provides practical experience, it also seeks to provide a broad understanding of the field of conservation. This course also includes how to document the condition of an object during the conservation process. May be repeated up to 3 credits. Crosslisted with: ARTS 401.

ARTS 502. Museum Conservation Techniques II**3 Credits (2+3P)**

Continues conservation theory and the basic principles of conservation for cultural objects. The course integrates the history, philosophy and technologies of art conservation with knowledge of the properties of materials used in conservation. The student will learn and develop conservation skills including learning about the most frequent kinds of deterioration that can occur in various types of art objects, symptoms and causes as well as preventative and restoration techniques. Although this course provides practical experience, it also seeks to provide a broad understanding of the field of conservation. Crosslisted with: ARTS 402.

Prerequisite(s): ARTS 501.

ARTS 503. Preventive Conservation/Collections Care**3 Credits (3)**

Introduces the student on how to mitigate the deterioration and damage of cultural property in a museum setting through the formulation and implementation of policies and procedures. The course addresses most aspects of collections management and care for objects in storage, exhibitions and during transportation. Crosslisted with: ARTS 403.

ARTS 504. Applied Projects in Museum Conservation**3 Credits (3)**

This course provides students with the practical application of techniques and policies learned in previous conservation coursework with the underpinnings of basic museum and conservations practices, particularly in collection care, preventative conservation, conservation, ethics, teamwork and security. May be repeated up to 6 credits. Crosslisted with: ARTS 404.

Prerequisite(s): ARTS 401, ARTS 402, ARTS 403 OR ARTS 501, ARTS 502, ARTS 503.

ARTS 540. Internship in Art**1-9 Credits (3P)**

This course provides students with the opportunity for workplace learning as an important component in their program of study. Students can identify an internship in graphic design, photography, conservation or other studio areas; or within broader arts institutions such as museums, galleries and visual arts centers which will provide them with professional experience that will support the successful achievement of their career goals in art. May be repeated up to 9 credits. Crosslisted with: ARTS 440 and ARTS 340.

ARTS 550. Drawing and Painting Workshop**3-6 Credits (2-4+4P)**

Graduate level drawing and painting course focusing on the development of concepts, expression and visual form. May be repeated up to 27 credits.

Prerequisite(s): Graduate standing.

ARTS 555. Graphic Design**3 Credits (3)**

May be repeated up to 27 credits.

ARTS 560. Painting Workshop**3-9 Credits**

Advanced work with painting skills. Emphasis on critical analysis and development of body of work. May be repeated up to 27 credits.

Prerequisite(s): Graduate standing.

ARTS 565. Sculpture Media**3-9 Credits**

May be repeated up to 27 credits.

ARTS 570. Photography Seminar

3-9 Credits (3-9)

Graduate students develop and implement a research program using photographic media and processes. Outcomes and program developed in consultation with photography faculty.

Prerequisite: .

Learning Outcomes

1. Create original works of art through the application of medium, tools, techniques and concepts specific to contemporary photography at the graduate level.

ARTS 575. Ceramic Arts

3-9 Credits

May be repeated up to 27 credits.

ARTS 576. Museum/Gallery Research Internship

1-9 Credits

Research internship in museum or gallery. Requirements determined by instructor in cooperation with supervising museum/gallery professional. For art history credit. May be repeated for a maximum of 9 credits.

Prerequisite: graduate standing.

ARTS 580. Printmaking Workshop

3-6 Credits

May be repeated for a maximum of 33 credits.

Prerequisite(s): Graduate standing.

ARTS 585. Metals and Jewelry Design

3-9 Credits

May be repeated up to 27 credits.

ARTS 595. Problems in Studio

1-6 Credits

Individualized study in specialized studio areas not covered by other advanced courses. May be repeated up to 12 credits. Consent of Instructor required.

ARTS 596. Graduate Studio Seminar

3 Credits (3)

Explores issues in contemporary art making and their relationship to personal work. Presentation of research in oral, visual, and written form. May be repeated for a maximum of 18 credits. Restricted to majors.

Prerequisite(s): Graduate standing.

ARTS 598. Studio Thesis

1-15 Credits

Special research in studio, leading to an exhibition and written thesis statement.

ASTR-ASTRONOMY

ASTR 1115G. Introduction Astro (lec+lab)

4 Credits (3+2P)

This course surveys observations, theories, and methods of modern astronomy. The course is predominantly for non-science majors, aiming to provide a conceptual understanding of the universe and the basic physics that governs it. Due to the broad coverage of this course, the specific topics and concepts treated may vary. Commonly presented subjects include the general movements of the sky and history of astronomy, followed by an introduction to basic physics concepts like Newton's and Kepler's laws of motion. The course may also provide modern details and facts about celestial bodies in our solar system, as well as differentiation between them – Terrestrial and Jovian planets, exoplanets, the practical meaning of "dwarf planets", asteroids, comets, and Kuiper Belt and Trans-Neptunian Objects. Beyond this we may study stars and galaxies, star clusters, nebulae, black holes, and clusters of galaxies. Finally, we may study cosmology--the structure and history of the universe. The lab component of this course includes hands-on exercises that work to reinforce concepts covered in the lecture, and may include additional components that introduce students to the night sky.

Learning Outcomes

1. Students will discuss the night sky as seen from Earth, including coordinate systems, the apparent daily and yearly motions of the sun, Moon, and stars, and their resulting astronomical phenomena.
2. Students will list and apply the steps of the scientific method.
3. Students will describe the scale of the Solar System, Galaxy, and the Universe.
4. Students will explain telescope design and how telescopes and spectra are used to extract information about Astronomical objects.
5. Students will describe the formation scenarios and properties of solar system objects.
6. Students will describe gravity, electromagnetism, and other physical processes that determine the appearance of the universe and its constituents.
7. Students will describe methods by which planets are discovered around other stars and current results.
8. Students will describe the structure, energy generation, and activity of the sun.
9. Students will compare our sun to other stars and outline the evolution of stars of different masses and its end products, including black holes.
10. 1Students will describe the structure of the Milky Way and other galaxies and galaxy clusters.
11. 1Students will describe the origin, evolution, and expansion of the universe based on the Big Bang Theory and recent Astronomical observations.
12. 1Students will describe conditions for life, its origins, and possible locations in the universe.

ASTR 1116. Introduction to Astronomy Lab, Special

1 Credit (1)

This lab-only listing exists only for students who may have transferred to NMSU having taken a lecture-only introductory astronomy class, to allow them to complete the lab requirement to fulfill the general education requirement. Consent of Instructor required. , at some other institution). Restricted to Las Cruces campus only.

Prerequisite(s): Must have passed Introduction to Astronomy lecture-only.

Learning Outcomes

1. Course is used to complete lab portion only of ASTR 1115G or ASTR 112
2. Learning outcomes are the same as those for the lab portion of the respective course.

ASTR 1120G. The Planets

4 Credits (3+2P)

Comparative study of the planets, moons, comets, and asteroids which comprise the solar system. Emphasis on geological and physical processes which shape the surfaces and atmospheres of the planets. Laboratory exercises include analysis of images returned by spacecraft. Intended for non-science majors, but some basic math required.

Learning Outcomes

1. Students will describe the sky as seen from Earth, the apparent daily and yearly motions of the Sun, Moon, planets and stars, and resulting astronomical phenomena.
2. Students will apply the process of the scientific method in an astrophysical setting.
3. Students will describe the structure of the solar system and explain the development of the currently accepted model of solar system formation.
4. Students will explain how telescopes and spectra are used to extract information about astronomical objects.
5. Students will describe properties of minor solar system objects, such as dwarf planets, moons, asteroids, meteoroids, and comets.
6. Students will compare and contrast bulk and unique properties of the Terrestrial and Jovian worlds.
7. Students will describe how gravity and other physical processes determine the appearance of the solar system and its constituents.

ASTR 301V. Revolutionary Ideas in Astronomy**3 Credits (3)**

Examines recent fundamental scientific revolutions that have shaped our view of Earth and the universe. Topics in astronomy range from exoplanets to black holes to dark energy and raise questions about the very nature of how we use the scientific method to see the unseen, and how this shapes science research today.

Prerequisite(s): Any general education science course.

ASTR 305V. The Search for Life in the Universe**3 Credits (3)**

Use of information from several of the sciences to explore the likelihood that life exists elsewhere in the universe. Subjects include an overview of historical ideas about the possibility of life elsewhere in the universe, the chemistry and biology of life on Earth, recent explorations for life within our solar system, and current search strategies for life in the universe and their scientific basis.

ASTR 308V. Into the Final Frontier**3 Credits (3)**

Exploration of space: a brief review of the history of space flight, the Apollo program, joint U.S.-Soviet space missions, and unstaffed exploration of the planets. Emphasis on knowledge gained through these efforts. Includes new space initiatives. Same as HNRS 308V.

ASTR 400. Undergraduate Research**1-3 Credits**

Supervised individual study or research. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

ASTR 401. Topics in Modern Astrophysics**3 Credits (3)**

This course is designed for students interested in astrophysics who have some background in math and physics and want to learn about basic astrophysics and interesting current topics. The course will cover basic astrophysical concepts such as orbital mechanics, light, and radiative processes and transfer. These concepts will be applied to the discussion of exciting modern topics involving planets, exoplanets, stars, galaxies, and/or cosmology, with topical emphasis determined by the instructor.

Prerequisite(s): MATH 1521G and (PHYS 2110 or PHYS 1310G).

ASTR 402. Introduction to Astronomical Observations and Techniques**3 Credits (3)**

Designed for students interested in astrophysics who have some background in math and astronomy and want to learn about techniques for obtaining and analyzing astronomical data. This course will review the properties of light and discuss the process of experimental design. The course will describe basic observational tools such as telescopes and detectors. It will discuss how data is obtained, and how features of the detector and the Earth's atmosphere can be corrected for. Some topics in basic astronomical data analysis will be discussed, with topical emphasis determined by the instructor. Some simple data analysis projects will be assigned.

Prerequisite(s): MATH 1511G and (PHYS 2140 or PHYS 1320G) and (ASTR 1120G, ASTR 1115G, or ASTR 401).

ASTR 403. Fundamentals of Astronomy**3 Credits (3)**

This course is designed to ensure a basic, quantitative knowledge of fundamental topics in astronomy and astrophysics. These topics include orbital mechanics, properties of radiation, principles of stellar radiation and spectra, structure and dynamics of the Milky Way, properties of galaxies, and basic cosmology. While this course is designed for first year graduate students, it is also cross-listed as a undergraduate course for students who have already had some exposure to astronomy and are prepared for a fast-paced review of fundamental topics and concepts in astronomy. Undergraduates will have a reduced homework load. Consent of Instructor required. Crosslisted with: ASTR 505.

Prerequisite(s): ASTR 401 or demonstrated background in astronomy and problem solving.

ASTR 500. Seminar**1 Credit (1)**

Organized group study treating selected topics.

ASTR 503. Astrophysics**3 Credits (3)**

This course is designed to ensure a basic, quantitative knowledge of fundamental topics in astronomy and astrophysics. These topics include orbital mechanics, properties of radiation, principles of stellar radiation and spectra, structure and dynamics of the Milky Way, properties of galaxies, and basic cosmology.

ASTR 506. Stellar Dynamics and Hydrodynamics**3 Credits (3)**

Graduate level course on basic stellar dynamics and fundamentals of hydrodynamics.

ASTR 530. Gas and Radiative Processes in Stars, Galaxies and the IGM**3 Credits (3)**

This course will introduce the basic physics of the the primary gaseous environments in the universe and their observational signatures. Astrophysical environment to be addressed will include the atmospheres of stars, the interstellar medium, the circumgalactic medium, and the intergalactic medium. Physical processes covered will include gas hydrodynamics, radiative and collisional excitation and ionization balance in astrophysics, atomic processes and detailed balancing, heating and cooling balance, and evolution. From the observational point of view, the course will discuss the spectral signatures of these processes, including stellar spectra, 21-cm spectra, emission line spectra from HII regions and planetary nebulae, and absorption lines from the interstellar medium, circumgalactic medium, and intergalactic medium.

ASTR 535. Observational Techniques I (f)**3 Credits (3)**

Up-to-date introduction to modern observational astronomy in a two-semester sequence. Topics include: introduction to computers, error analysis in data, the different types of optical telescopes, and optical and infrared photometry, image processing, and detectors.

ASTR 545. Stellar Spectroscopy**3 Credits (3)**

This course covers the physics of stellar atmospheres with emphasis on using spectra as a diagnostic tool for understanding the properties of stars. Topics include spectral classification, radiative transfer, gas equilibrium physics, line and continuum opacities, adiabatic and superadiabatic convection, and extraction of observed quantities from spectra for deducing physical conditions of the source.

ASTR 555. Galaxies I**3 Credits (3)**

Fundamentals of the properties of galaxies and galaxy components, including stars and stellar populations, gas and dust, central black holes, and dark matter. Includes a detailed description of the properties of the Milky Way Galaxy.

ASTR 565. Stellar Interiors**3 Credits (3)**

Internal constitutions of stars, computation of stellar models, and stellar evolution.

ASTR 598. Special Research Programs**1-6 Credits**

Individual investigations, either analytical or experimental.

ASTR 599. Master's Thesis**15 Credits**

Master's level research in astrophysics or observational astronomy.

ASTR 600. Pre-dissertation Research**1-15 Credits**

Research.

ASTR 605. Interstellar Medium**3 Credits (3)**

Basics of radiative transfer and processes in the interstellar medium. Properties of dust and infrared emission from grains. Applications to neutral atomic and molecular gas and ionized plasmas in galaxies. May be repeated up to 3 credits.

ASTR 610. Radio Astronomy**3 Credits (3)**

Techniques in observational radio astronomy, including single dish and interferometer arrays. Physical processes that produce radio emission, with a focus on continuum emission. May be repeated up to 3 credits.

Prerequisite(s): Consent of instructor.

ASTR 616. Galaxies II**3 Credits (3)**

Galaxy formation within a cosmological context. Topics include an introduction to cosmology, the growth of linear and nonlinear structures, the formation of dark matter halos, galaxy growth and feedback processes, and their observational signatures in the intergalactic and circumgalactic media.

ASTR 620. Planetary Surface and Atmospheric Processes**3 Credits (3)**

Evaluation and analysis of observational data on solar system objects to determine their nature and physical conditions, with emphasis upon atmospheres (composition, structure, thermodynamics, evolution, etc.) May be repeated up to 3 credits. Restricted to: ASTR majors.

ASTR 621. Planetary System Formation**3 Credits (3)**

The physical processes involved in planetary system formation are addressed. Specific foci include molecular cloud collapse, disk processes, and competing theories of planet formation within disks. Additional topics to be discussed may include: the solar wind, planetary magnetic fields, planetary ring processes, and mineralogy. May be repeated up to 3 credits. Restricted to: ASTR majors.

ASTR 625. Cosmology**3 Credits (3)**

Discussion of our current knowledge of the structure of the universe and current research methods. Topics include the distance scale, clustering of galaxies, large-scale structure, metrics, dark matter, and cosmological probes such as distant quasars, radio galaxies, and gravitational lenses.

ASTR 630. Numerical and Statistical Methods in Astrophysics**3 Credits (3)**

Provides basic background in numerical and statistical methods relevant to astrophysical research. Topics include a review of probability and probability distribution functions, Bayesian and frequentist approaches, data simulation, parameter estimation, Markov Chain Monte Carlo, and other topics. May be repeated up to 3 credits.

ASTR 670. Heliophysics**3 Credits (3)**

Explore the Sun and its processes, the heliosphere, and its interactions with the planets. Topics include: A introductory description of space weather and its physics; energy interaction with the space environment; the quiet Sun and its interactions with planetary atmospheres (with an emphasis on Earth); Magnetohydrodynamics; frozen-in flux; the solar wind; magnetized fluid dynamics; the active Sun (flares and coronal mass ejections); the effects of Space Weather.

ASTR 698. Special Topics.**1-9 Credits**

Special topics.

ASTR 700. Doctoral Dissertation**15 Credits**

Dissertation.

AUTO-AUTOMOTIVE TECHNOLOGY

AUTO 102. Electrical Measuring Instruments**2 Credits (1+2P)**

Selection, operation, and care of electrical measuring instruments.

AUTO 111. Automotive Mechanics Basics**4 Credits (4)**

Basic maintenance procedures of the major components of the automobile using service repair manuals, hand and power tools, precision measurement equipment, fasteners and chemicals. Restricted to: Community Colleges only.

AUTO 112. Basic Gasoline Engines**5 Credits (2+6P)**

Principles of gasoline engine operation. Identification, design, function of engine components; engine disassembly and reassembly; trouble shooting, and rebuilding heads.

AUTO 113. Automotive Electricity and Electronics PT I**4 Credits (2+4P)**

Topics include mastery of DC electricity, use of digital multimeters, troubleshooting electrical problems in starting, charging and accessory systems. Restricted to Community Colleges only.

AUTO 114. Automotive Electricity and Electronics PT II**4 Credits (2+4P)**

Advanced AC and DC automotive electronic circuits. Troubleshooting electronically controlled components including supplemental restraint systems and convenience accessories. Restricted to Community Colleges campuses only.

Prerequisite: AUTO 113.

Learning Outcomes

1. Understand and demonstrate safety rules related to electronically controlled automotive systems. Diagnosis and demonstrate knowledge of series, parallel, and combination circuits, and their applications as applied to automotive repair. Demonstrate use of wiring diagrams as a diagnostic aide. Demonstrate use of meters, handheld labsopes, scan tools, and other diagnostic equipment. Demonstrate use of repair manuals, both hard copy and electronic. Demonstrate knowledge, diagnose and repair Air Bag Supplemental Inflatable Restraint systems Demonstrate knowledge, diagnose and repair various convenience electronic systems. Interpret customer concerns, create and complete a diagnostic routine and successfully repair an electrical problem. Diagnose and repair starting and charging systems.

AUTO 115. Automotive Engine Repair**5 Credits (2+6P)**

Principles of gasoline engine operation. Identification of engine parts, operation, and function. Disassembly and reassembly. Engine problem diagnoses (cooling system, lubrication system, engine noises). Restricted to Community Colleges only.

AUTO 117. Electronic Analysis and Tune-Up of Gasoline Engines**5 Credits (2+6P)**

Theory and operation of ignition and emission control systems and fuel system. Use of troubleshooting equipment and diagnostic equipment.

Prerequisite: AUTO 120 or consent of instructor.

AUTO 119. Manual Transmission/Clutch**5 Credits (2+6P)**

Manual transmission, transfer cases, and clutch operating principles. Students will diagnose problems, remove and replace, disassemble, repair, and assemble units.

AUTO 120. Electrical Systems**4 Credits (2+4P)**

Troubleshooting and repair of starters, alternators, and associated circuits. Reading electrical diagrams, diagnosis and repair of electrical accessories.

Prerequisite: consent of instructor.

AUTO 122. Automotive Brakes**4 Credits (2+4P)**

Focus is on theory, diagnosis, and service of drum, disc, and anti-lock braking systems, brake component machining, hydraulic component reconditioning, friction and hardware replacement. Restricted to Community Colleges only.

AUTO 124. Automotive Heating and Air Conditioning**4 Credits (2+4P)**

R12 and R134A air conditioning systems maintenance diagnosis and repair. R12 to R134A conversion procedures. Troubleshooting automatic temperature controls and leak detection. Restricted to Community Colleges only.

AUTO 125. Brakes**5 Credits (2+6P)**

Theory of operation, diagnosis, repair, and maintenance of disc and drum brakes; safety and use of special tools.

AUTO 126. Suspension, Steering, and Alignment**5 Credits (2+6P)**

Types of steering systems, suspension maintenance and repair, four-wheel alignment procedures.

AUTO 127. Basic Automatic Transmission**4 Credits (2+4P)**

Theory and operation of the automatic transmission; maintenance, troubleshooting, diagnosis, and repair of components.

AUTO 129. Automotive Steering and Suspension**4 Credits (2+4P)**

Diagnosis/service of suspension components including shocks, springs, ball joints, manual and power steering systems and four wheel alignment are some areas covered. Restricted to Community Colleges only.

AUTO 130. Introduction to Transportation Industry**3 Credits (3)**

State and national traffic statutes that relate to the trucking industry. A Commercial Driver's License Learner's Permit will be obtained through successful completion of the course.

Prerequisites: Must be 18 years of age, have a current driver's license and consent of instructor.

AUTO 131. Class A CDL**3 Credits (1+4P)**

Instruction in how to perform proper pre-trip inspection; hands-on training with a tractor-trailer unit on the backing range and street driving to develop skills necessary to pass Class A DCL exam. Restricted to Community Colleges campuses only.

Prerequisite(s): Class A CDL restricted license (permit) and either restriction of D.O.T.

AUTO 132. Automotive Air-Conditioning and Heating Systems**4 Credits (2+4P)**

Theory and operation, reading schematic diagrams, troubleshooting, repair, and replacement operations performed.

AUTO 137. Fuel Systems and Emission Controls**4 Credits (2+4P)**

Covers theory and operation of fuel system and emission control. Troubleshooting, vacuum diagrams, overhaul, repair and adjustment of carburetion and fuel injection.

Prerequisites: AUTO 117 or consent of instructor.

AUTO 139. Automotive Computer Controls**4 Credits (2+4P)**

Same as OEPM 139.

AUTO 162. Advanced Non-Structural Repair I**4 Credits (2+4P)**

This course will involve the students in all phases of minor non-structural collision damage repairs. It will encompass sheet metal repair, advanced panel replacement and alignment.

Prerequisite(s): AUTO 161.

AUTO 163. Advanced Non-Structural Repair II**4 Credits (2+4P)**

This course is a continuation of AUTO 162 with emphasis in all phases of minor non-structural damage repair. The student will be instructed in sheet metal repair and panel alignment as well as the R&I of automotive glass and related components.

Prerequisite(s): AUTO 162.

AUTO 164. Automotive Industry Collision Repair I**4 Credits (2+4P)**

This advanced course is a continuation of AUTO 161, 162, and 163. This course will incorporate all areas of major non-structural collision damage repair. Through practical application the student will learn how to effectively repair all heavy collision damage using current I-CAR repair standards and procedures.

Prerequisite(s): AUTO 163.

AUTO 165. Automotive Industry Collision Repair II**4 Credits (2+4P)**

This advanced course is a continuation of AUTO 164 with emphasis on time efficiency. This course will involve the student in all areas of major collision damage repair. The student will be exposed to all applicable I-CAR industry procedures and standards involved in sheet metal and composite panel repair.

Prerequisite(s): AUTO 164.

AUTO 172. Introduction to Automotive Refinishing**4 Credits (2+4P)**

This course is designed to incorporate all aspects of surface preparation, paint safety, refinishing materials, and refinishing fundamentals. Students will receive instructions for the application of acrylic enamel and base coat/clear coat refinishing systems.

AUTO 174. Intermediate Automotive Refinishing**4 Credits (2+4P)**

This course encompasses all areas of surface preparation, damage repair and refinishing procedures that are necessary for achieving a proper spot repair. Students will also be exposed to safe work habits in the refinishing area and correct automotive detailing procedures.

Prerequisite(s): AUTO 172.

AUTO 176. Automotive Color Adjustment & Blending**4 Credits (2+4P)**

This course will help develop the skills needed to match any type of paint. It will expose the student to color theory, color evaluation, color matching, and other color adjustment factors. The student will be instructed in multiple panel paint blending techniques as well.

Prerequisite(s): AUTO 174.

AUTO 178. Automotive Overall Refinishing**4 Credits (2+4P)**

This course encompasses all areas of automotive refinishing. This advanced course is a continuation of AUTO 176 with emphasis in achieving industry refinishing times and standards consistent with that of I-CAR. The student will be exposed to surface preparation and refinishing techniques involved with overall coat/clear coat refinishing system.

Prerequisite(s): AUTO 176.

AUTO 181. Frame and Structural Repair**4 Credits (2+4P)**

This course will involve the student in all areas of frame and structural damage repairs. Through theory and practical application, the student will learn how to diagnose and repair various types of damage include: mash, twist, sag, and side sway. This course will expose the students to safe work habits while using measuring and straightening equipment.

Prerequisite(s): AUTO 165.

AUTO 182. Structural Panel Replacement**4 Credits (2+4P)**

This course is a continuation of AUTO 181 with infancies in structural panel replacement. The student will be exposed to frame and unibody measuring equipment and their proper use in sectioning procedures. Through theory and practical application the student will learn how to ID structural components, properly separate spot welds, position and weld new body panels in place.

Prerequisite(s): AUTO 181.

AUTO 201. Engine Performance I**4 Credits (2+4P)**

Theory, function, service and analysis of engine related subsystems including ignition, fuel, starting, and charging systems. Emphasis is placed on diagnosis and operation of electronic engine control management systems. Restricted to Community Colleges only.

AUTO 203. Engine Performance II**4 Credits (2+4P)**

Study of engine management systems and emission control systems, their function and relationship to vehicle performance and air pollution. Emphasis is placed on the analysis and repair of non-compliant vehicles. Restricted to Community Colleges only.

Prerequisite: AUTO 201.

Learning Outcomes

1. Be able to explain basic electrical theories. Be able to explain basic and advanced engine designs and engine operating theory. Be able to explain engine cooling and lubricating systems. Be able to explain intake and exhaust systems Test battery, starting and charging systems Test ignition systems including point type, electronic trigger type, and distributor-less systems. Test automotive fuel system including fuel tanks, lines, filters and pumps. Test basic electronic fuel injection systems. Test automotive computer input devices and controlled devices 1Demonstrate ability to work with PC based automotive software including Alldata,

AUTO 204. Engine Performance III**4 Credits (2+4P)**

Study of advanced level diagnostic test procedures and the equipment used to analyze OBD-II emission and drivability concerns. Use of Digital Storage Oscilloscopes, current ramping, Scan Tool analysis of 4 and 5 gas analyzers is mastered. Hybrid vehicles and the latest engine control systems are introduced. Restricted to Community Colleges only.

AUTO 205. Manual Drive Train and Axles**4 Credits (2+4P)**

Operation, diagnosis, maintenance, repair or replacement of manual transmissions, clutch assemblies, differentials, drivelines, axles, and manual transaxles. Restricted to Community Colleges only.

AUTO 206. Automatic Transmissions**5 Credits (2+6P)**

Operation, diagnosis, maintenance, and repair of automatic transmissions including rear wheel drive, front wheel drive, and electronically controlled transmissions and transaxles. Restricted to Community Colleges only.

AUTO 208. Introduction to Alternative Fueled Vehicles**3 Credits (3)**

Course will familiarize student with conditions that are resulting in the alternative fueled vehicle movement as well as the design and safety precautions unique to each alternative fuel. Propulsion systems covered include electric vehicles, bio-fueled vehicles, hybrid-electric vehicles and hydrogen powered vehicles, along with other emerging technologies as appropriate. Restricted to: Community Colleges only.

Prerequisite(s): AUTO 113 and AUTO 114.

AUTO 209. Hybrid Vehicle Service Techniques**3 Credits (3)**

Designed for experienced automotive technicians, this course will cover safety procedures, design, operational overview and service techniques as well as minor diagnosis and repair of all classifications of hybrid-electric vehicles. Each student must possess legal Class 'O' high voltage gloves and liners to attend this class. Restricted to: Community Colleges only.

Prerequisite(s): AUTO 113 and AUTO 114.

AUTO 221. Cooperative Experience I**1-6 Credits**

Supervised cooperative work program. Student is employed in an approved occupation and supervised and rated by the employer and instructor. Student will meet in a weekly class. Graded S/U.

Prerequisite: consent of instructor.

AUTO 255. Special Problems in Automotive Technology**1-5 Credits**

Individual studies in areas directly related to automotive technologies. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

AUTO 290. ASE Certification Preparation**1 Credit (1)**

This is the capstone course for the Automotive Technology Program and is a requirement for graduation. Consent of Instructor required. Restricted to: AUTO majors. Restricted to Community Colleges campuses

Learning Outcomes

1. write technical reports explaining customers complaint(s), specific component malfunction(s) and related problems to include repair procedures, specifications, parts and costs associated with each specific repair
2. determine, categorize and document component or systems malfunctions which will be discussed in class
3. adequately identify safety hazards associated with electrical, electronic, hydraulic, pneumatic and mechanical systems before participating in any lab project
4. use a systematic approach to identify, diagnose and repair new hydro, electrical and mechanical systems
5. identify all related parts and components before attempting to repair each system
6. clearly identify and understand the specific function of each component before these systems and subsystems are dismantled for repairs
7. demonstrate proficiency in locating, identifying and following procedures for repairs as outlined on the Mitchell and All-DATA computer information systems
8. retrieve all phases of automotive information needed to repair the following: Electrical and Electronics, Engine Repair, Engine Performance, Automatic transmissions, Heating And Air Conditioning Systems
9. demonstrate proficiency in the proper usage of on-board computer scanners used to identify and properly diagnose possible malfunction within a specific on-board computer system
10. 1 demonstrate proficiency in the proper use of scanners, information and vehicle specifications to determine needed repairs
11. 1 identify, evaluate, diagnosis and repair electrical, electronic and mechanical systems and subsystems

AUTO 295. Special Topics**1-6 Credits**

Topics to be announced in the Schedule of Classes.

AVIM-AVIATION MAINTENANCE

AVIM 101. Aviation Science**3 Credits (3)**

Provides students with basic technical mathematics skills, an overview of general physics as applied to the work of an Airframe and Powerplant (A&P) technician, and instruction in the reading and interpreting of aircraft drawings. Restricted to Alamogordo campus only.

Prerequisite(s): Appropriate Math placement score.

AVIM 102. Shop Practices**3 Credits (3)**

Introduces students to specialty tools, shop safety, workplace practices, basic aviation materials and processes. Students also learn to fabricate fluid lines and fittings, identify type fasteners, and processes for nondestructive testing. Restricted to Alamogordo campus only.

AVIM 103. Ground Operations**3 Credits (3)**

Identifies aircraft fuels, cleaning procedures and corrosion removal, as well as ground operation procedures including safety, fueling, and start-up of aircraft. Restricted to Alamogordo campus only.

AVIM 104. Federal Regulations**2 Credits (2)**

Instruction on how to read, comprehend, and apply all FAA maintenance forms and publications as related to aircraft maintenance. Also describes all rights and privileges of A & P technicians. Restricted to Alamogordo campus only.

AVIM 105. Weight and Balance**2 Credits (2)**

Describes proper procedures for weighing and loading aircraft and center of gravity (C.G.) safety and procedures for jacking aircraft. Restricted to Alamogordo campus only.

AVIM 106. Basic Electricity**3 Credits (3)**

Explains theories and principles of electricity related to aircraft circuitry. Restricted to Alamogordo campus only.

AXED-AGRICULTURAL EXTN EDUC

AXED 1110. Introduction to Agricultural, Extension, and Technology Education

3 Credits (3)

Orientation to programs, philosophies, competencies and leadership skills needed by professionals in agricultural and technology education, extension education, agricultural communications, and related career opportunities in industry, governmental agencies, and international organizations.

Learning Outcomes

1. Orient student to the AXED Department and their role as students.
2. Explore career opportunities (and the related skill sets needed for success) in public schools, career and technical institutions, the cooperative extension service, community, and international development, agricultural communications, agricultural industry associations and public service (e.g., NMDA and USDA).
3. Develop an understanding of the self-leadership skills needed to be effective in a variety of professional and personal environments.
4. Familiarize students with the aspects included within a total program in agricultural or technology education.
5. Strengthen skills in oral and written communications.

AXED 1120. Introduction to Agricultural Communication

3 Credits (3)

Students will learn about the history and theories of agricultural communications, be introduced to the degree program, explore careers in the field, and examine the role of media in agricultural communications.

Learning Outcomes

1. Identify classes needed in the degree program and relevant clubs.
2. Recall important times in history of agricultural communication and journalism.
3. Comprehend the communication process and identify its components.
4. Identify effective and efficient media for agricultural communication.
5. Analyze the various roles and uses of media in agriculture communication.
6. Apply theories of communication and journalism to class assignments.

AXED 1130. Techniques in Agricultural Mechanization

3 Credits (2+2P)

Development of competencies in agricultural mechanics including safety, tool identification, operation and maintenance of hand and power tools, cold metal, drafting, and plumbing procedures. Designed for any major wishing to improve mechanical skills needed in agriculturally related occupations in education and industry.

Learning Outcomes

1. To understand basic drafting language used in orthographic and isometric drawings.
2. To develop an understanding of the proper use and safety of basic hand and power tools.
3. To develop skills needed to operate basic hand and power tools correctly.
4. To develop an understanding of surveying methods and building layout for construction.
5. To develop an adequate level of competence in workshop techniques.
6. To prepare students to properly teach and demonstrate these techniques to others who may use them as a means of earning a living.

AXED 2110. Metal Fabrication

3 Credits (2+4P)

Instruction and skill development in process and procedures of metal fusion, including gas and electric welding techniques, safety, and oxy-acetylene cutting and welding. Designed to improve mechanical skills needed in agriculturally related occupations in education and industry.

Learning Outcomes

1. To develop students understanding and appreciation for metal fabrication, design and teaching.
2. To develop in the student an adequate level of competence in shop work techniques, so that the student may be able to properly teach and demonstrate multiple metal fabrication techniques to others who may use them as a mean of earning a living.
3. To develop the student's fundamental techniques in shielded metal arc welding, oxy-acetylene welding and cutting operations, metal inert gas welding (MIG), and gas tungsten-arc welding as needed in repair and construction of agricultural equipment.
4. Student will understand appropriate shop management techniques and have an appreciation for mechanized agriculture.
5. To assist the student in developing an understanding and comprehension of the fundamental principles that apply to the area of basic shop work included in this course; such as proper selection of electrodes, oxy-acetylene filler rods, welding processes best suited for given welding conditions, the proper tool for the job, etc.
6. To develop in the student comprehension of safety practices that apply to the areas of basic shop work, tools, and equipment required in the course.

AXED 2120G. Effective Leadership and Communication in Agriculture**3 Credits (2+2P)**

Theory and practice in leadership and communication for professionals who must work effectively in leadership and supervisory roles with people in agricultural business, industry, government agencies, and education. Course focuses on contemporary leadership theories. Oral communication skills in informative and persuasive speaking, parliamentary procedure, and for small groups are developed.

Learning Outcomes

1. Understanding Leadership: Definitions of Leadership; Agricultural Education, FFA , Leadership; Leadership Categories; Democratic, Authorization, and Situational Leadership; Personality and Leadership Relations; Developing Leaders; Personal Leadership Development; Ability, Experience, and the Opportunity to Lead; Leadership in the Workplace; Human Relations, Technical, and Conceptual Skills
2. Communication Skills: Communication and Leadership; The Purpose of Communication; Forms of Communication; Communication Barriers and Styles; Verbal and Nonverbal Communication; Feedback; Self Communication and Interpersonal Communication
3. Leading Individuals and Groups: Group Dynamics and Team Building; Democratic Group Leadership; Importance of Groups; Types of Groups; Organizing Groups; Group Dynamics, Development, and Discussion
4. Conducting Successful Meetings: Skills Developed by Bring an Officer; Basic Meeting Functions; Characteristics of a Good Meetings; Planning and Preparing for Meetings; The Meeting Room; Committees; Informative and Motivational Meetings; Group Member Involvement; Officer and Member Responsibilities; Developing a Program of Activities

AXED 2130. Early Field-Based Experience**2 Credits (2)**

First Hand view of the roles of professional educators through field experiences with Cooperative Extension or other government agencies. Includes 4 weeks of classroom instruction and 30 hours of observation in a work setting. Consent of Instructor required. Restricted to Las Cruces campus only.

Learning Outcomes

1. Identify successful characteristics, tips and strategies that an agricultural education professional may use as part of their program.
2. Identify key components of an agricultural education program
3. Actively observe a local agricultural education program.
4. Identify ways that your agency program networks and interacts with clientele and community

AXED 2140. Early Field-Based Experience in Agricultural and Technology Education**2 Credits (2)**

First-hand view of the roles of professional educators through field experiences in a secondary agricultural or technology education setting. Includes 4 weeks of classroom instruction and 30 hours of observations in a classroom setting. Consent of Instructor required.

Learning Outcomes

1. Explain student outcomes related to agricultural education
2. Examine the role of agriculture teachers to accomplish the purpose of agricultural education.
3. Explain the relationship between motivation and learning
4. Describe how teachers facilitate learning in an agriculture classroom.
5. Reproduce the three-circle model of agriculture education.
6. Provide an example of instruction in each of the three circles and
7. instruction that happens in more than one circle.
8. Deliver instruction in a classroom or laboratory setting.
9. Deliver instruction related to FFA
10. Deliver instruction related to SAEP

AXED 2996. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 6 credits toward degree.

Learning Outcomes

1. Varies

AXED 300. Special Topics**1-4 Credits**

Course addresses specific subjects and issues as identified by department. Topics and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 6 credits may be applied to a degree.

AXED 303. Small Engine Technology**3 Credits (2+2P)**

Development of competencies in small gasoline engines; theory, operation, design, maintenance and safety. Designed for any major wishing to improve mechanical skills needed in agriculturally related occupations in education and industry.

AXED 331. Agricultural Structures**3 Credits (2+3P)**

Selection and use of agricultural building materials. Design, construction, and maintenance of agricultural structures. Development of competencies in carpentry, concrete, electricity, masonry, and safety. Designed for any major wishing to improve mechanical skills needed in agriculturally related occupations in education and industry.

AXED 348. Advanced Technology in the Agricultural Mechanization**3 Credits (2+3P)**

Students will construct a project in the area of agricultural mechanization under the direction of instructor. Project must be completed within a semester and of sufficient complexity for 3 credits.

Prerequisite(s): AXED 1130 and AXED 2110 or consent of instructor.

AXED 360. Agricultural Communications**3 Credits (3)**

Principles and practical experience in news writing, radio production, newsletter design, public meeting presentations, video productions, graphics, and public relations activities, especially as related to the fields of agriculture and family and consumer sciences.

AXED 380. Philosophy and Methods of Contests**3 Credits (3)**

Covers the roles that career development events (contests) play in agricultural and technology education and in extension programs. Topics include competition and cooperation, winning and losing, ethics, use of community resources, and academic and employability skills taught through contests. Coaching as a teaching method is introduced and expanded. Students will assist with the coordination of various career development events. May be repeated up to 3 credits.

AXED 400. The Diffusion and Adoption of Agricultural Innovations**3 Credits (3)**

Factors that influence the rates of diffusion and adoption of innovations. Consequences of adopting or rejecting innovations. Processes by which change agents influence introduction and adoption of innovations. Same as AXED 500.

AXED 415. Youth Program Development and Management**3 Credits (3)**

Designed for professionals involved in youth group activities. Basic concepts in planning, conducting, and managing educational youth programs in a variety of organizations.

AXED 430. Teaching Adults in Nonformal Settings**3 Credits (3)**

The adult and postsecondary learner; adult learning styles and principles; use of community resources and problem-solving techniques; and learning strategies for adults in formal and nonformal education.

AXED 436. Keys for Agricultural and Rural Development**3 Credits (3)**

Introduction to concepts of development, the process of change, key factors that contribute to agricultural and rural development in a community, and strategies employed to effect change with implications for international students or domestic students planning to work internationally.

AXED 443. Curriculum Development and Assessment in Agricultural Education**3 Credits (3)**

This course prepares students to develop curriculum, design lessons, and prepare appropriate assessments in an agricultural education setting. An emphasis will be placed on the developing curriculum using the currently established resources that are available to agriculture teachers. Restricted to: AXED majors.

Prerequisite(s): 2.5 GPA.

AXED 445. Developing Excellent Programs in Career and Technical Education**3 Credits (3)**

Students learn to develop excellence in the three components of a successful secondary school program in career and technical education: classroom and laboratory instruction, career and technical student organizations, and career development activities. Community-based program planning, utilizing partners, program marketing, and professional development are addressed as strategies for achieving excellence. Methods of obtaining financing and maintaining accountability for the program are discussed.

AXED 446. Methods for Teaching Agricultural and Technology Education**3 Credits (3)**

Methods of instruction and presentation, selection of teaching aids and support materials, classroom management, development of a complete educational program, and microteaching experiences. Restricted to AXED Majors

Prerequisite: GPA of 2.5 or above.

AXED 447. Directed Teaching in Agricultural or Technology Education**15 Credits (15)**

Semester-long off-campus professional experience in directed teaching and observation provided in selected centers under secondary agricultural or technology education supervising teachers. Consent of Instructor required. Restricted to: AXED majors.

Prerequisite(s): AXED 445, 446 and consent of instructor.

AXED 448. Directed Teaching in Extension Education**3-12 Credits (3-12)**

Four-to-fourteen-week, professional experiences in directed teaching and observation provided in cooperative extension at the county, regional, or state level. Consent of instructor required.

AXED 449. Directed Field Experience in Agricultural or Technology Education**3-12 Credits (3-12)**

Four-to-fourteen-week, supervised learning experience in an approved teaching setting with application to educational, agricultural, technological, communications, public relations, or environmental practices. Consent of instructor required.

AXED 456. Introduction to Research Methods**3 Credits (3)**

Introduction to research design and methodology in education and behavioral sciences. Overview of common research designs and data collection strategies. Prepares students to critique published research and understand basic skills including hypothesis development and conducting a literature search.

Prerequisite: junior standing.

AXED 460. Methods in Career and Technical Laboratory Instruction**2 Credits (2)**

For students planning to teach agricultural or technology education at a secondary or postsecondary level. Focus on planning, delivering, and evaluating instruction in laboratories; and on CPR, first aid, and NCCER certifications. Laboratory safety and tool, equipment, and laboratory management systems are also emphasized. Restricted to AXED Majors.

AXED 466V. John Muir: Lessons in Sustainability**3 Credits (3)**

This course examines the life of John Muir in the context of sustainability. Muir was a farmer, inventor, explorer, botanist, glaciologist, conservationist, and noted nature author. He was influential in the National Parks movement and in starting the Sierra Club. Living in the natural world influenced his faith and philosophy. By examining his life and the themes that shaped it, students will develop an understanding of what it means to live sustainably and to contribute beyond their personal lives to a sustainable future. May be repeated up to 3 credits.

AXED 475. Leadership On Agricultural and Natural Resource Issues**3 Credits (3)**

Investigates leadership concepts and group dynamics as they relate to a changing world and complex agricultural and natural resource issues. Topics include emotional intelligence, leading change, political leadership, facilitating agreement, team building, and managing conflict in agricultural and natural resource settings.

AXED 480. International Agricultural Development**3 Credits (3)**

Introduction to Agricultural topics (products, people, environment, culture, etc) that affect international development. Topics provide students with awareness, knowledge and understanding of teaching, research and service opportunities for those seeking experience or careers in international agricultural development. Taught with AXED 580.

AXED 484. Methods of Teaching Biological, Earth and Physical Sciences in Agriculture**3 Credits (3)**

Students learn to set up and teach in a modular agriscience laboratory, utilizing a variety of technologies. Modules covered focus on incorporating biological, earth and physical sciences into agricultural instruction and may include: Tissue culture, animal anatomy, hydroponics microscopy, electrophoresis, microbiology, soils and plant nutrients, water quality, water systems, entomology, integrated pest management, and renewable energy applications. Students develop their own modules and/or experiments.

AXED 486. Effective Management of Volunteer Programs**3 Credits (3)**

For individuals currently involved in, or interested in being involved in, the management and supervision of volunteer programs. Emphasis on practical application, utilizing a research and academic base. Explores the roles, functions, and tasks of volunteers and managers of volunteers including recruitment, orientation and training, supervision, evaluation, recognition and retention.

AXED 488. 4-H Youth Development**1 Credit (1)**

On-line course explores 4-H Youth Development as an integral part of the Cooperative Extension Service. Topics to be addressed include mission, philosophy, delivery modes, audiences and partnerships. Course is relevant for anyone interested in pursuing a career in Cooperative Extension.

AXED 489. The FFA Organization: An Overview**1 Credit (1)**

Online course addressing the history, mission, philosophy and structure of the New Mexico and National FFA Organizations and their relationship to supervised agriculture experiences and the agricultural education curriculum. Course is relevant for anyone interested in pursuing a career in agricultural education.

AXED 490. Independent Study in Agricultural, Extension, or Technology Education**1-3 Credits**

Specific subjects are agreed upon by the student and instructor. May be repeated for a maximum of 6 credits.

Prerequisites: junior or senior standing and consent of instructor.

AXED 499. Undergraduate Research**1-4 Credits**

Research experience in agricultural, extension, and technology education with applications to selected issues and problems.

Prerequisites: consent of instructor.

AXED 500. The Diffusion and Adoption of Agricultural Innovations**3 Credits (3)**

Factors that influence rates of diffusion and adoption of innovations. Consequences of adopting or rejecting innovations. Processes by which change agents influence introduction and adoption of innovations. Taught with AXED 400 with differential assignments for graduate students.

AXED 515. Youth Program Development and Management**3 Credits (3)**

Designed for professionals involved in youth group activities. Basic concepts in planning, conducting, and managing educational youth programs in a variety of organizations. Same as AXED 415 with differentiated assignments for graduate students.

AXED 525. Graduate Teaching Methods**3 Credits (3)**

Examines the teaching and learning process, emphasizing the use of appropriate methods for teaching career and technical education subjects to youth or adults in formal and nonformal educational settings. Includes principles of teaching and learning styles, levels of cognition, syllabus development, lesson planning, teaching using a variety of methods, and evaluating students. For students who have no prior education in teaching methods.

AXED 530. Teaching Adults in Nonformal Settings**3 Credits (3)**

The adult and postsecondary learner; adult learning styles and principles; use of community resources and problem-solving techniques; and learning strategies for adults in formal and nonformal education. Same as AXED 430 with differentiated assignments for graduate students.

AXED 536. Keys for Agricultural and Rural Development**3 Credits (3)**

Introduction to concepts of development, the process of change, key factors that contribute to agricultural and rural development in a community, and strategies employed to effect change with implications for international students or domestic students planning to work internationally.

AXED 543. Curriculum Development and Assessment in Agricultural Education**3 Credits (3)**

This course prepares students to develop curriculum, design lessons, and prepare appropriate assessments in an agricultural education setting. An emphasis will be placed on the developing curriculum using the currently established resources that are available to agriculture teachers. Restricted to: AXED majors.

Prerequisite(s): 2.5 GPA.

AXED 545. Developing Excellent Programs in Career and Technical Education**3 Credits (3)**

Students learn to develop excellence in the three components of a successful secondary school program in career and technical education: classroom and laboratory instruction, career and technical student organizations, and career development activities. Community-based program planning, utilizing partners, program marketing, and professional development are addressed as strategies for achieving excellence. Methods of obtaining financing and maintaining accountability of the program are discussed. Same as AXED 445 with differentiated assignments for graduate students.

AXED 546. Methods for Teaching Agricultural and Technology Education**3 Credits (3)**

Methods of instruction and presentation, selection of teaching aids and support materials, classroom management, development of a complete educational program, and microteaching experiences. Same as AXED 446. Restricted to AXED Majors

Prerequisites: GPA of 3.0 or above.

AXED 547. Directed Teaching in Agricultural or Technology Education**4-9 Credits (4-9)**

Semester-long off-campus professional experience in directed teaching and observation provided in selected centers under secondary agricultural and technology supervising teachers. Consent of Instructor required. Restricted to: AXED majors.

Prerequisite(s): A teaching methods class and consent of instructor.

AXED 548. Directed Teaching in Extension Education**4-9 Credits (4-9)**

Four- to fourteen-week professional experiences in directed teaching and observation provided in cooperative extension at the county, regional, or state level. Same as AXED 448 with reduced credit hours for graduate students. Restricted to majors. Main campus only.

Prerequisite: consent of instructor.

AXED 549. Directed Field Experience in Agricultural or Technology Education**4-9 Credits (4+9P)**

A four-to-fourteen-week supervised learning experience in an approved teaching setting with application to educational, agricultural, technological, communications, public relations, or environmental practices. Same as AXED 449 with reduced credit hours for graduate students. Restricted to majors. Main campus only.

Prerequisite: consent of instructor.

AXED 556. Research Methods**3 Credits (3)**

Students learn the research process as it is applied to solving problems in the behavioral sciences. Prepares students to conduct and critique research and to diffuse research findings. Implications, applications, and ethics of research also stressed. Students develop a research proposal for a problem of their choice. Same as FCSC 556.

AXED 565. New Mexico Water Issues**3 Credits (3)**

Designed for agricultural and natural resource professionals who must educate others or provide leadership on complex water issues in New Mexico. Students will travel to four distinct geographic and cultural regions of the state and study water policies, issues, and delivery technologies in each region. Specific areas covered will be determined by resource professionals who will present past, current and future issues involved in the distribution of water. Urban impacts on water use will also be investigated.

AXED 571. Data Collection and Analysis**3 Credits (3)**

Introduction to basic concepts of data collection and analysis. Interpretations from observational studies and controlled experiments. Roles of descriptive and inferential statistics in a complete data analysis. Mean, median, standard deviation, and graphical summaries of data. Correlation and simple regression. One- and two-sample tests and confidence intervals. Chi-square tests and basic analysis of variance. Competency in arithmetic and algebra required. An undergraduate statistics course recommended.

AXED 575. Leadership on Agricultural and Natural Resource Issues**3 Credits (3)**

Investigates leadership concepts and group dynamics as they relate to a changing world and complex agricultural and natural resource issues. Topics include emotional intelligence, leading change, political leadership, facilitating agreement, team building, and managing conflict in agricultural and natural resource settings. Taught with AXED 475 with differential assignments for graduate students.

AXED 580. International Agricultural Development**3 Credits (3)**

Introduction to agricultural topics (products, people, environment, culture, etc.) that affect international development. Topics provide students with awareness, knowledge and understanding of teaching, research, and service opportunities for those seeking experience or careers in international agricultural development and education. Taught with AXED 480.

AXED 586. Effective Management of Volunteer Programs**3 Credits (3)**

For individuals currently involved in, or interested in being involved in, the management and supervision of volunteer programs. Emphasis on practical application, utilizing a research and academic base. Explores the roles, functions, and tasks of volunteers and managers of volunteers including recruitment, orientation and training, supervision, evaluation, recognition and retention. Taught with AXED 486 with differentiated assignments for graduate students.

AXED 590. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 6 credits toward degree.

AXED 594. Workshops in Agricultural, Extension, and Technology Education**1-3 Credits**

Workshop procedures applied to current trends in agricultural, extension, and technology education. Maximum of 7 credits toward a degree.

AXED 595. Internship/Cooperative Experience**1-6 Credits**

Supervised professional on-the-job learning experience. Maximum of 6 credits toward a degree.

Prerequisite: Consent of instructor.

AXED 598. Creative Component**1-4 Credits**

For nonthesis program. Individual investigations or projects, either qualitative or quantitative studies. Maximum of 6 credits toward a degree.

Prerequisite: consent of instructor.

AXED 599. Master's Thesis**1-6 Credits**

Thesis.

B A-BUSINESS ADMINISTRATION

B A 104. Introduction to Business**3 Credits (3)**

Survey and integration of functions in business organizations within their social and economic environment. Community Colleges only.

B A 105. Special Topics**1-3 Credits**

Current topics in business and economics.

B A 202. Small Business Enterprise**3 Credits (3)**

Appraisal of business functions within the framework of a small business organization.

B A 291. Business Administration and Economics Internship and Cooperative Education I**1-3 Credits**

Introduction and applications of the principles of business administration and economics. Registration in one course allowed per co-op work phase; a minimum of 12 work weeks is required. Open only to students in the College of Business. Option of S/U or a grade. The amount of academic credit (1-3 cr.) will be determined by the academic experience, and not by the work experience.

B A 305. Leadership Training for COB Ambassadors**1 Credit (1)**

Leadership development for volunteers serving as COB student ambassadors, focusing on COB undergraduate business degree programs, NMSU student services, public speaking and public relations.

B A 391. Business Administration and Economics Internship and Cooperative Education II**1-3 Credits**

Applications of the principles of business administration and economics. Registration in one course allowed per co-op work phase; a minimum of 12 work weeks is required. Open only to students in the College of Business. Option of S/U or a grade. The amount of academic credit (1-3 cr.) will be determined by the academic experience and not by the work experience.

B A 490. Selected Topics**3 Credits (3)**

Prerequisites vary according to the seminar being offered.

B A 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.

Prerequisite: junior or above standing and consent of instructor.

B A 500. Macroeconomic Essentials**1 Credit (1)**

Macroeconomic theory and public policy, national income concepts, unemployment, inflation, economic growth and international payment problems. Restricted to: MBA Major majors majors.

B A 501. Quantitative Tools for the MBA**1 Credit (1)**

An overview of critical topics in math and statistics that will provide a quantitative foundation for students entering the Master of Business Administration program. Admission to the MBA program.

B A 545. Business Ethics**3 Credits (3)**

Understanding of business ethics, social responsibilities of business organizations, and personal codes of conduct. Complexities of moral reasoning and principles of ethical behavior.

B A 550. Special Topics**3 Credits (3)**

Interdisciplinary seminar in selected current business topics.

Prerequisite(s): Prerequisites vary according to the seminar being offered.

B A 590. Professional Paper/Presentation**3 Credits (3)**

Paper written in close coordination with sponsoring professor and presented near the end of the student's final semester in the M.B.A. program. The paper will consist of a professional business report, a case study of a business or organization or a research report. Restricted to: MBA majors.

Prerequisite(s): Minimum of 3.0 average in: ACCT 503, BLAW 502, BFIN 503, and MKTG 503 or AEEC 551.

B A 598. Special Research Programs**1-3 Credits**

Individual investigations either analytical or experimental. A maximum of 3 credits may be earned.

Prerequisite: consent of instructor.

B A 599. Master's Thesis**15 Credits**

Thesis.

BCHE-BIOCHEMISTRY

BCHE 140. Introduction to Biochemistry**1 Credit (1)**

A description of the nature of inquiry in biochemistry, especially with respect to the interaction of chemistry and biology. Both historical development and topics of current interest will be discussed. Graded S/U.

BCHE 241. Introduction to Research in Biochemistry**1-3 Credits**

Techniques and procedures of biochemical research. May be repeated for a maximum of 3 credits.

Prerequisites: 8 credits of chemistry and 3.0 GPA in chemistry.

BCHE 341. Survey of Biochemistry**4 Credits (3+3P)**

Basic principles of biochemical processes and the structure/function of the major classes of biomolecules, with introductions to metabolism and the central dogma of biochemistry. The chemical and biological properties of major biomolecules (DNA, proteins, May be repeated up to 4 credits.

Prerequisite(s): C- or better in CHEM 2115 or CHEM 314.

BCHE 395. Biochemistry I**3 Credits (3)**

Principles governing chemistry and physics of life processes with emphasis on the relationships between molecular structure and cell function. Basic principles of biochemical processes, enzymology, and the structure/function of the major classes of biomolecules with introductions to metabolism. Introduction to catabolic metabolism.

Prerequisite(s): C or better in CHEM 314.

BCHE 396. Biochemistry II**3 Credits (3)**

Introduction to anabolic metabolism and hormonal regulation. Biochemical principles of the mechanism and regulation of replication, transcription, recombination and translation in prokaryotes and eukaryotes. Introduction to DNA-based information technology. Taught with BCHE 396 H.

Prerequisite(s): C or better in BCHE 395.

BCHE 396 H. Biochemistry II Honors**3 Credits (3)**

Taught with BCHE 396 with additional work required.

BCHE 424. Experimental Biochemistry I**3 Credits (1.25+6P)**

Laboratory techniques required for experimentation with recombinant DNA such as nucleic acid isolation and purification, polymerase chain reaction (PCR), sequence analysis, and directed mutagenesis using genetic material from both prokaryotic and eukaryotic organisms.

Prerequisite(s): C- or better in BCHE 395, and BCHE 396 or GENE 315.

Learning Outcomes

1. Conduct experiments safely
2. Select and manipulate plasmids to achieve desired recombinant DNA for experimentation
3. Obtain relevant DNA sequence information for gene of interest from public databases
4. Make buffers and reagents necessary for transforming and isolating plasmid DNA from *E. coli*
5. Transform and isolate plasmid DNA to be used for cloning of gene of interest
6. Design primers for PCR to enrich gene of interest from genomic DNA
7. Analyze DNA sequence and choose appropriate restriction enzymes for cloning gene of interest
8. Design primers for PCR to incorporate restriction sites at the ends of gene of interest
9. Perform restriction digest on plasmid DNA and PCR products
10. 1 Perform ligation reaction to combine gene of interest with plasmid DNA
11. 1 Analyze sequence of plasmid containing gene of interest to validate the outcome of experimentation

BCHE 425. Experimental Biochemistry II**3 Credits (3)**

Introduction to fundamental techniques used to explore structure and function of biological macromolecules such as proteins, carbohydrates, lipids, and nucleic acid. Course covers analyzing and reporting experimental data; enzymology; quantitative methods to determine biological molecules; basic principles of electrophoresis, chromatography, and spectroscopic immunochemistry. May be repeated up to 3 credits.

Prerequisite(s): C- or better in BCHE 424.

Learning Outcomes

1. Understand and implement various methods of protein purification as well as qualitative and quantitative analysis of protein preparations
2. Become proficient in absorbance and fluorescence spectroscopy
3. Determine ligand binding parameters
4. Understand and measure enzyme kinetics and inhibition
5. Perform basic protein crystallization and structure determination
6. Develop skills in scientific writing and presentation

BCHE 432. Physical Biochemistry**3 Credits (3)**

This course focuses on modern Biophysical techniques used in protein and nucleic acid research. Topics are covered in some detail at the theoretical level. The course content is delivered entirely by podcast. Podcast contributions are from several different faculty from within their particular area(s) of expertise. Topics covered include (but are not limited to): biomolecular NMR, atomic force microscopy, light scattering, circular dichroism, ultracentrifugation, isothermal titration calorimetry, positron emission tomography, computerized tomography, ultrasound, functional MRI, protein fluorescence, mass spec/ proteomics, protein molecular dynamics simulations, and X-ray diffraction. Course credit qualifies for minor degree in chemistry as a physical-analytical chemistry emphasis. CHEM 431, or CHEM 433.

Prerequisite(s): One semester of undergraduate physical chemistry, e.g.

BCHE 440. Biochemistry Seminar**1 Credit (1)**

Introduction to current literature in biochemistry and molecular biology. Selected topics in the field will be presented by the faculty. Students will present written and oral reports from literature searches. Restricted to: BCHE majors.

Prerequisite(s): BCHE 395.

BCHE 441. Advanced Research in Biochemistry**1-3 Credits**

Investigation of biochemical problems and the development of special techniques. May be repeated for a maximum of 3 credits.

Prerequisites: consent of instructor, 16 credits of chemistry and 3.0 GPA in chemistry for nonmajors.

BCHE 451. Special Topics**1-3 Credits**

Same as CHEM 451. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

BCHE 455. Independent Studies**1-3 Credits**

Independent studies directed by consulting faculty.

Prerequisite: consent of instructor.

BCHE 540. Seminar in Biochemistry**1 Credit (1)**

Formal seminar presentation in current topics in biochemical research. May be repeated for a maximum of 3 credits.

BCHE 542. Biochemistry I**3 Credits (3)**

Relationship between macromolecular structure and function. Basic enzymology. Energy metabolism.

Prerequisite(s): CHEM 314 and CHEM 431 or CHEM 433; or BCHE 395 or equivalent.

BCHE 545. Molecular and Biochemical Genetics**3 Credits (3)**

An accelerated treatment of the molecular basis of gene expression. Discussion of chemical, enzymological, and genetic techniques of molecular biology. Same as BIOL 545.

Prerequisite: BCHE 542 or equivalent.

BCHE 546. Biochemistry II**3 Credits (3)**

Intermediary metabolism: catabolic and anabolic pathways of carbohydrates, lipids, amino acids, and nucleic acids, including their regulation.

Prerequisite: BCHE 542 or BCHE 395 with consent of instructor.

BCHE 590. Discussions in Biochemistry**1 Credit (1)**

Current research problems in biochemistry. May be repeated for a maximum of 6 credits. Graded: S/U Grading (S/U, Audit).

BCHE 598. Special Research Programs**1-3 Credits**

May be repeated for a maximum of 6 credits. Same as CHEM 598. Graded S/U.

BCHE 599. Master's Thesis**15 Credits**

May be repeated for a maximum of 6 credits. Same as CHEM 599.

BCHE 600. Research**1-15 Credits**

May be repeated for a maximum of 20 credits. PR/U grading. Same as CHEM 600.

BCHE 647. Physical Biochemistry**3 Credits (3)**

Fundamental applications of physical chemistry to the investigation of biological metabolites and biological macromolecules, including proteins, oligo-nucleotides, and molecular arrays with an emphasis on understanding biological functions based on chemical structures. Taught with BCHE 451.

Prerequisite(s): 'C' or better in CHEM 431 or CHEM 433 or BCHE 542.

BCHE 649. Topics in Biochemistry**1-3 Credits**

Selected topics of current interest designated by title and credit. May be repeated for a maximum of 3 credits.

BCHE 650. Advanced Seminar**1 Credit (1)**

Discussion of biochemical research in progress that relates to a doctoral candidate's thesis research. Intended for students who have earned a master's degree or the equivalent and has made significant research progress for preparation of the doctoral dissertation. May be repeated for a maximum of 3 credits.

BCHE 700. Doctoral Dissertation**20 Credits**

May be repeated for a maximum of 20 credits. Graded PR/U. Same as CHEM 700.

BCIS-BUSINESS COMPUTER SYSTEMS

BCIS 1110. Introduction to Information Systems

3 Credits (3)

Examination of information systems and their impact on commerce, education, and personal activities. Utilization of productivity tools for communications, data analysis, information management and decision-making.

Learning Outcomes

1. Describe the social impact of information literacy and systems in relation to commerce, education, and personal activities.
2. Explain how to use the information resources legally, safely, and responsibly in relation to ethical, security, and privacy issues.
3. Evaluate bias, accuracy and relevance of information and its sources.
4. Use productivity tools for communications, data analysis, information management and decision-making.
5. Describe and use current information systems and technologies

BCIS 321. Introduction to Software Development and Programming

3 Credits (3)

Computer algorithm development and programming logic in the context of business information systems using current programming environments. Includes program design, data types, data structures, control structures, arrays, and principles of object oriented programming.

Prerequisite(s): C- or better in BCIS 1110; and MATH 1215.

BCIS 338. Business Information Systems I

3 Credits (3)

Application, design and use of computerized information systems in business environment.

Prerequisite(s): BCIS 1110 or consent of instructor.

BCIS 350. Information Systems Analysis and Design

3 Credits (3)

An introduction to the analysis and design of secure information systems.

Prerequisite(s): Concurrently with BCIS 338 or consent of instructor.

BCIS 461. Business Analytics I

3 Credits (3)

This course provides an understanding of how organizations can utilize technology to successfully collect, organize, manipulate, use, and present data. The course blends the use of current technology with the managerial practices involving business analytics. The emphasis of the course will be on data management practices and the production of descriptive analytics. Crosslisted with: BCIS 561.

Prerequisite(s): BCIS 338 or consent of instructor.

BCIS 466. Business Analytics II

3 Credits (3)

This course provides an understanding of how organizations can build and test predictive models, utilizing business-related data to estimate model parameters. The emphasis of the course will be on utilizing data management systems to produce useful predictive analytics. Crosslisted with: BCIS 566.

Prerequisite(s): BCIS 461 or consent of the instructor.

BCIS 475. Database Management Systems

3 Credits (3)

Design, development, and use of database management systems in the business environment.

Prerequisite(s): BCIS 338 or consent of instructor.

BCIS 480. E-Commerce Security

3 Credits (3)

Introduction to securing network-based applications from internal and external threats. Fundamentals of network security, including TCP/IP, firewalls, intrusion detection, and vulnerability.

Prerequisite(s): BCIS 338 or consent of instructor.

BCIS 482. Management of Information Security

3 Credits (3)

Provides management overview of information security and thorough examination of administration of information security. Surveys field of information security including planning, policy and programs, protection and people relative to information security.

Prerequisite(s): BCIS 338 or consent of instructor.

BCIS 485. Enterprise Resource Planning**3 Credits (3)**

This course covers concepts in enterprise resource planning (ERP). Topics include how ERP integrates business processes across functional areas--such as the procurement process and the sales order process--and how businesses use ERP information systems in day-to-day operations as well as for performance monitoring. SAP R/3 software will be used in several hands-on examples of ERP software as a real-world example of an ERP system.

Prerequisite(s): C- or better in BCIS 338 or BCIS 350 or ACCT 351.

BCIS 490. Selected Topics**1-3 Credits**

Current topics in business systems analysis. Consent of Instructor required.

BCIS 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with prior approval of the department head. May be repeated for a maximum of 3 credits.

Prerequisites: junior or above standing and consent of instructor.

BCIS 502. Business Information Systems**3 Credits (3)**

Analysis of information systems as integral parts of business organizations, including the responsibility of management to understand their capabilities and uses in handling the organization's information flow and providing appropriate information for decision making.

Prerequisite: graduate students only.

BCIS 550. Information Systems Analysis and Design**3 Credits (3)**

Information systems development methodologies and the system life cycle. Justifying and managing systems development projects. Taught with BCIS 350 with differentiated assignments for graduate students.

Prerequisite(s): Graduate Students Only.

BCIS 561. Business Analytics I**3 Credits (3)**

This course provides an understanding of how organizations can utilize technology to successfully collect, organize, manipulate, use, and present data. The course blends the use of current technology with the managerial practices involving business analytics. The emphasis of the course will be on data management practices and the production of descriptive analytics. Not open to students who have taken BCIS 461. Taught with BCIS 461 with differentiated assignments for graduate students. No S/U or audit option. Crosslisted with: BCIS 461.

Prerequisite(s): BCIS 338 or consent of instructor.

BCIS 566. Business Analytics II**3 Credits (3)**

This course provides an understanding of how organizations can build and test predictive models, utilizing business-related data to estimate model parameters. The emphasis of the course will be on utilizing data management systems to produce useful predictive analytics. Not open to students who have taken BCIS 466. Taught with BCIS 466 with differentiated assignments for graduate students. No S/U or audit option. Crosslisted with: BCIS 466.

Prerequisite(s): BCIS 461 or consent of the instructor.

BCIS 575. Database Management Systems**3 Credits (3)**

Design, development, and use of database management systems in the business environment. Taught with BCIS 475 with differentiated assignments for graduate students. Consent of Instructor required.

Prerequisite(s): BCIS 350.

BCIS 580. E-Commerce Security**3 Credits (3)**

Introduction to securing network-based applications from both internal and external threats. Fundamentals of network security including TCP/IP, firewalls, intrusion detection and vulnerability discussed. Not open to students who have taken BCIS 480. Taught with BCIS 480 with differentiated assignments for graduate students. No S/U or audit option.

Prerequisite(s): C- or better in BCIS 460 or consent of instructor.

BCIS 582. Management of Information Security**3 Credits (3)**

Provides management overview of information security and thorough examination of administration of information security. Surveys field of information security including planning, policy and programs, protection and people relative to information security. Taught with BCIS 482 with differentiated assignments for graduate students.

Prerequisite(s): BCIS 1110 or equivalent.

BCIS 585. Enterprise Resource Planning & Business Processes**3 Credits (3)**

Enterprise-wide information systems and their use in enterprise resource planning (ERP). This course will examine the many cross-functional business processes. Other topics include ERP implementation issues, change management, and business process re-engineering. Hands-on exercises use SAP/3 Enterprise software. Taught with BCIS 485 with differentiated assignments for graduate students.

Prerequisite(s): C- or better in ACCT 351 or BCIS 502 or consent of instructor.

BCIS 590. Special Topics**1-3 Credits (1-3)**

Seminars in selected current topics in business computer systems. May be repeated up to 3 credits.

Prerequisite(s): Vary according to topic being offered.

BCIS 598. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with prior approval of department head. A maximum of 3 credits may be earned.

Prerequisite: consent of instructor.

BCT-BUILDING CONSTRUCTION TECH

BCT 100. Building Trades I**8 Credits (2+12P)**

Equipment and general safety. Human relations, building construction surveying, footings, foundation form work, framing, sheathing, insulation. Basic electrical wiring and plumbing. Classroom instruction, on- the-job training, and problem solving.

BCT 101. Introduction to Construction I**2 Credits (2+1P)**

Basic safety, including personal protective equipment, how to perform basic construction tasks safely, and what to do if an accident occurs. Includes basic construction methods. May be repeated up to 2 credits. Restricted to Community Colleges campuses only.

Corequisite(s): BCT 102;BCT 103.

BCT 102. Introduction to Construction II**2 Credits (2+1P)**

Introduction to power and hand tools, blueprints, and basic rigging hardware and techniques. May be repeated up to 2 credits. Restricted to Community Colleges campuses only.

Corequisite(s): BCT 101;BCT 103.

BCT 103. Introduction to Construction Laboratory**3 Credits (3)**

Provides students the opportunity to practice skills they have acquired in BCT 101 and BCT 102. It includes task-oriented projects in which students can apply many of the skills and knowledge that have been presented throughout the National Center for Construction and Education Research (NCCER) Carpentry Program. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Corequisite(s): BCT 101; BCT 102.

BCT 104. Woodworking Skills I**3 Credits (1+4P)**

Use and care of hand tools and elementary power tools, safety procedures, and supervised project construction.

BCT 105. Woodworking Skills II**3 Credits (1+4P)**

Advanced woodworking skills to include use of advanced power tools, power tool safety, and supervised construction.

Prerequisite: BCT 104 or consent of instructor.

BCT 106. Woodworking Theory and Practice**3 Credits (2+2P)**

History of wood manufacturing, industrial techniques, wood characteristics, stains and finishes. Design and construction of minor wood projects.

BCT 107. Painting I**4 Credits (2+4P)**

Types and applications of paints and clear coatings. Use of fasteners, caulks, and sealants. Restricted to: Community Colleges only.

BCT 109. Plumbing I**3 Credits (2+3P)**

Covers orientation to the trade. Students will learn about materials used in the plumbing industry and the different types of plumbing fixtures. It includes task-oriented projects in which the students apply many of the skills and knowledge that are presented through the National Center for Construction and Education Research (NCCER) Plumbing Program. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): BCT 101, BCT 102. Restricted to Community Colleges campuses only.

BCT 110. Blueprint Reading for Building Trades**4 Credits (2+4P)**

Same as DRFT 151, OEET 101, OEPB 110.

BCT 111. Small Equipment Maintenance and Repair**4 Credits (2+4P)**

Covers small engine theory, troubleshooting and repair, auto maintenance, hydraulic theory and repair lubricants, batteries and scheduled tool maintenance. Restricted to: Community Colleges only.

BCT 114. Basic Carpentry**3 Credits (1+4P)**

Covers orientation to the trade; wood building materials, fasteners, and adhesives; detailed description and explanations of hand-operated and power tools, including safety; framing basics including laying out and constructing of wood floors, walls and ceilings and includes roughing in of door and window openings. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Corequisite(s): BCT 115; BCT 116.

BCT 115. Carpentry Level I**3 Credits (1+4P)**

Describes the various kinds of roofs and provides instructions for lay out of the different roofing systems. Describes the various types of windows, skylights, and exterior doors and provides instruction for installation. May be repeated up to 3 credits. Consent of Instructor required. Restricted to Community Colleges campuses only.

Corequisite(s): BCT 114; BCT 116.

BCT 116. Basic Carpentry Lab**2 Credits (2)**

Provides students the opportunity to practice skills they have acquired in BCT 114 and BCT 115. It includes task-oriented projects in which students can apply many of the skills and knowledge that have been presented throughout the National Center for Construction and Education Research (NCCER) Carpentry Program. May be repeated up to 2 credits. Restricted to Community Colleges campuses only.

Corequisite(s): BCT 114; BCT 115.

BCT 117. Plumbing 1A**3 Credits (2+2P)**

This course will introduce students to the plumbing profession. Students will become familiar with the tasks and responsibilities of plumbing professionals in the construction industry and gain a basic knowledge of the plumbing field. Restricted to Community Colleges campuses only.

BCT 118. Math for Building Trades**3 Credits (3)**

Geometry, algebra, arithmetic, and basic trigonometry pertaining to mathematical applications in the building trades field. Same as OEET 118, DRFT 118, OEPB 118.

Prerequisite: CCDM 103 N.

BCT 123. Residential Wiring I**3 Credits (2+3P)**

Introduction to residential electrical wiring trade, electrical safety practices, basic electrical circuits and theory, reading and interpreting applicable construction prints/drawings, introduction to basic National Electric Code (NEC), and preparation for entry-level employment in residential electrical wiring. Restricted to Community Colleges campuses only.

BCT 130. Professional Development and Leadership**1 Credit (1)**

As members and/or officers of various student professional organizations, students gain experience in leadership, team building, and community service. Students competing or participating in Skills USA are required to register for the course. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: BCT majors. Graded: S/U Grading (S/U, Audit). Restricted to: Community Colleges only.

BCT 150. Forklift Operation**1 Credit (1)**

Classroom instruction and hands-on practice to prepare students to operate a forklift safely in the workplace. Students will have the opportunity to earn a forklift operator's permit. Consent of Instructor required. Restricted to Community Colleges campuses only.

BCT 200. Building Trades II**8 Credits (2+12P)**

Continuation of BCT 100: roofing; exterior and interior finish; masonry; door, window, and cabinet installation.

BCT 206. Advanced Cabinetmaking**3 Credits (1+3P)**

Advanced cabinetmaking skills, to include expert use of hand and power tools, professional construction and finishing techniques.

Prerequisites: BCT 105, BCT 106, or consent of instructor.

BCT 209. Plumbing II**3 Credits (2+3P)**

Continuation of BCT 109. Provides students the opportunity to gain more practice in the skills and knowledge learned in Plumbing I. Students will install fixtures and run the various plumbing supply lines from Plumbing Level I. The course included hands on projects in which the students apply many of the competencies that have been presented through the National Center for Construction and Education Research (NCCER) Plumbing Program. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): BCT 109.

BCT 217. Building and the Environment**3 Credits (3)**

Introduction to LEED's, and Green Building Fundamentals, sustainability, sustainable design and green building evaluating cost implication of green building. Describes site development; managing site water runoff, improving a project's water use efficiency. Discusses renewable energy sources, and introduces student to generating power on-site using renewable energy sources, improving a building's indoor environment quality, improving the building industries' environmental performance and environmental aspects of building maintenance, re-use and conservation. Restricted to: Community Colleges only.

BCT 218. Plumbing 2**4 Credits (2+4P)**

This course builds on the skills and knowledge students have gained in previous BCT introduction to plumbing courses, focusing on installation of plumbing systems. Students will become familiar with the tasks and responsibilities of plumbing professionals in the construction industry and gain a basic knowledge of the plumbing field.

Prerequisite(s): BCT 117 and BCT 119.

BCT 219. Weatherization in Construction**3 Credits (2+2P)**

Introduction to industry weatherization standards and practices utilized in the construction of buildings for the purpose of energy conservation. Economic and environmental impacts of the use of energy in heating and cooling building will be examined.

Prerequisite(s): BCT 101, BCT 102 and BCT 103.

BCT 221. Cooperative Experience I**1-4 Credits**

Supervised cooperative work program. Student is employed in an approved occupation and is supervised and rated by the employer and instructor. Student will meet in a weekly class. Graded S/U.

Prerequisite: consent of instructor.

BCT 223. Residential Wiring II**3 Credits (2+3P)**

Introduction to electrical raceways and fittings; electrical conductors and cables; basic electrical construction drawings, residential electrical services, and electrical test equipment. Restricted to Community Colleges campuses only.

Prerequisite(s): BCT 123.

BCT 255. Special Topics**1-6 Credits (1-6)**

Topics to be announced in the Schedule of Classes . May be repeated up to 12 credits. Consent of Instructor required. Restricted to Community Colleges campuses only.

BCT 290. Special Problems in Building Technology**1-4 Credits**

Individual studies in areas directly related to building technologies.

Prerequisite: consent of instructor.

BEST-BORDERLAND & ETHNIC STUDIES

BEST 510. Foundations in Borderlands & Ethnic Studies

3 Credits (3)

This seminar explores the roots, logics, and administrations of racism within the U.S. context, locally along the border, and framed within a larger global and historical context. In addition to race, other social locations such as gender, class, and sexual orientation are explored as intersectional. The course uses traditional lecture format, multi-media, guest lecturers, and engaging activities inside and outside the classroom to apply materials in tangible and impactful ways.

Learning Outcomes

1. Identify, compare and contrast broad histories of social struggles, social movements, and ensuing human relationships.
2. Meaningfully engage classical and new materials from the Borderlands and Ethnic Studies "canon."
3. Articulate observations using key terms, theories, and concepts in Borderlands and Ethnic Studies.
4. Apply key concepts in "everyday life" via course activities.
5. Demonstrate mindful and constructive ways to engage peers about sometimes "difficult" topics like race, power, and privilege.

BEST 511. Methodologies in Borderlands and Ethnic Studies

3 Credits (3)

This seminar introduces the practice of indigenizing research methods by looking beyond the canon of Eurocentric methodologies that have often trapped marginalized communities outside of normative time frames. Through the deconstruction of colonial apparatuses and their influence on research methods, the class explores key concepts in decolonizing research to move us to new understandings of communities according to indigenous traditions that privilege ancestral ways of knowing. Crosslisted with: GNDR 455 and ANTH 541.

Learning Outcomes

1. Explain how producing research is connected to producing knowledge.
2. Identify and describe the impact of colonialism and imperialism on disrupting ways of knowing.
3. Recognize political and cultural implications of the world seen as a colonial, constructed narrative
4. Describe how a social reality can have set political and ideological conditions.
5. Distinguish how indigenous methodologies relate to decolonizing methods.
6. Describe how decolonizing methods are a different approach to research.
7. Identify decolonizing methods that have been used in research.
8. Critically engage with research lenses stemming from a decolonizing standpoint.

BEST 512. Theories in Borderlands and Ethnic Studies

3 Credits (3)

This seminar provides a basic understanding of theoretical foundations of Borderlands and Ethnic Studies. It also examines borderlands theorizing to critically engage the border not simply as a physical barrier meant to regulate migration, but the economic, cultural, spatial, and metaphorical borderlands that informs us on larger processes of membership, belonging, identity, politics, and dehumanization linked to social structures and institutions. Social movements in the U.S. that sought to illuminate social inequalities and social justice issues are explored. The course investigates the underlying causes and sources of these social movements as they relate to reconceptualizing race and the borderlands and their overall impact on society at large. Crosslisted with: ANTH 543.

Learning Outcomes

1. Explain how race and ethnicity has been socially constructed in the U.S.
2. Recognize how the social construction of race and ethnicity is related to issues of social control
3. Describe how the idea of race helps to reinforce existing power arrangements
4. Connect historical struggles for justice and equality in the U.S. to current social and political issues dealing with the borderlands
5. Explain hegemony and its link to shifting borders and nationalism
6. Identify how racial beliefs are tied to laws, policies, and practices of social institutions and organizations
7. Distinguish how biopolitics relates to the development of the border.
8. Analyze the ways race, class, and gender serve as interlocking systems of oppression.
9. Gain an understanding of and be able to evaluate your own worldviews and opinions towards issues of race, class, gender, nationalism, migration, borders, social movements, and resistance.
10. 1 Critically engage and "think outside the box" when discussing the conceptualization and development of the idea of race.

BEST 513. Capstone in Borderlands and Ethnic Studies**3 Credits (3)**

This seminar is designed to culminate the graduate certificate by summarizing knowledge and experience garnered in pre-courses: BEST 510, 511, 512. Students will be asked to write a reflective essay at the start of the course that highlights 1) materials and ideas that have most impacted the student throughout the core courses, 2) discuss how the elective course complemented and expanded materials and ideas from BEST core classes, 3) what materials and ideas remain challenging to grasp, and 4) what kind of culminating project the student would like to complete. This essay will be the foundational document to carry the student through the semester, along with close guidance provided by the instructor as well as peer feedback.

Prerequisite(s): BEST 510; BEST 511; BEST 512.

Learning Outcomes

1. Summarize, concisely, key concepts and frameworks learned in seminars BEST 510, 511, 512.
2. Express, reflectively, what these concepts and frameworks mean in the context of historical and contemporary social issues related to power dynamics created and exacerbated by hierarchies associated with racial, gender, class, sexual orientation and other positionalities.
3. Design a culminating project that encapsulates a nuanced understanding of Borderlands and Ethnic Studies, ensuring its impact on a broader audience.
4. Generously evaluate cohort mates' projects as they progress during semester.
5. Receive feedback about one's own project and apply those comments and critiques in useful ways and in collaboration with instructor.
6. Create/generate a culminating project that aligns with rubrics in the most effective manner possible.
7. Present work to cohort and instructor in an effective way.

BFIN-BUSINESS FINANCE

BFIN 2110. Introduction to Finance**3 Credits (3)**

Introduces tools and techniques of financial management. Includes time value of money; financial planning, diversification and risk; debt and equity investment decisions; and financial statement analysis.

Prerequisite(s): OATS 106 or higher; OATS 120 or ACCT 2110; ECON 1110G or ECON 2110G.

Learning Outcomes

1. Explain the time value of money and its application in decision-making, including calculating present and future values of single payment and series of payments.
2. Identify the major sources of external long-term financing for corporations.
3. Explain risk-return tradeoff as it relates to diversification.
4. Differentiate the role of finance from other related disciplines such as accounting and economics.
5. Demonstrate knowledge of capital markets and securities (debt and equity).
6. Describe basic types of financial ratios and their uses.
7. Demonstrate the ability to prepare cash flows and make qualitative judgments on the relevance of the changes from one time frame to another.

BFIN 303V. Personal Financial Planning and Investing in a Global Economy**3 Credits (3)**

Provides a framework for successful personal financial planning within an individual's career and income. Covers personal money management, federal and state taxation, the mathematics of finance and credit, housing, inflation, insurance, savings, and investments. Majors and minors may not use this course to satisfy their finance requirements.

BFIN 311. Financial Futures Markets**3 Credits (3)**

Same as AEEC 311.

BFIN 322. Principles of Insurance**3 Credits (3)**

Theory and practice of insurance and its economics and social significance; review of the major lines of insurance including life, health, and property liability insurance.

BFIN 323. Life/Health/Employee Benefits**3 Credits (3)**

Approaches to problems of employee security from the perspective of businesses. Topics including pensions, profit-sharing plans, 401(k) plans, group life and health plans, and flexible benefit programs. The course also addresses individual life, health, and annuity contracts within a financial planning context.

Prerequisite: BFIN 322.

BFIN 324. Property and Liability Insurance**3 Credits (3)**

Analysis of property and liability insurance with emphasis on handling of commercial exposures. Review of property and liability company operations including rate making and insurance accounting. Prerequisite: BFIN 322

BFIN 325. Real Estate Principles and Law I**3 Credits (3)**

Real estate law and the fundamental aspects of the real estate purchase transaction and the real estate lease agreement. Topics include real estate brokerage, marketing of real estate, fundamental legal aspects of real estate, present and future interests, air and water rights, methods of transfer, basics of financing and liens, and real estate leases. Same as BLAW 325.

BFIN 326. Business Risk Management**3 Credits (3)**

The operational risks faced by firms and the study of various methods of handling these risks, including loss prevention, risk retention, self-insurance, corporate insurance programs, and capital markets. Prerequisites: BFIN 322

BFIN 341. Financial Analysis and Markets**3 Credits (3)**

Financial analysis for business financing and investing decisions. Prerequisites ACCT 2110, ECON 2110G, ECON 2120G, MATH 1220G, A ST 311 or MATH 1350G.

BFIN 355. Investments**3 Credits (3)**

Analysis of investment risks and rewards and of the problems of portfolio selection and management. Operation of the securities market.

Prerequisite(s): BFIN 341 with a grade of C- or better.

BFIN 360. Financial Information Technology**3 Credits (3)**

Integrated use of electronic financial information resources with spreadsheet and word processing applications in investigating financial issues and solving financial problems.

Prerequisite(s): a grade of C- or better in BFIN 341 or consent of instructor.

BFIN 385. Analysis of Financial Markets and Institutions**3 Credits (3)**

Analysis of the financial system, emphasizing its institutions and instruments.

Prerequisite(s): BFIN 341 with a grade of C- or better.

BFIN 391. Finance Internship and Cooperative Education I**1-3 Credits**

Introduction and application of finance principles in a work environment. Open only to students in the finance major or minor who will be working with an approved employer in a finance related position, over a period of 12 weeks or at least 300 work hours. Consent of instructor required.

BFIN 392. Insurance Internship and Cooperative Education I**1-3 Credits (1-3)**

Introduction and application of insurance principles in a work environment. Open only to students in the finance major or insurance minor who will be working with an approved employer in an insurance related position, over a period of 12 weeks or at least 300 work hours. Consent of instructor required. Restricted to Finance majors.

BFIN 393. Banking Internship and Cooperative Education**1-3 Credits (1-3)**

Professional banking experience with opportunities to engage in business analysis and to observe application of business principles in the management of a banking entity or a regulatory agency with banking oversight. Open only to students in the finance major or banking minor who will be working with an approved employer in a banking related position, over a period of 12 weeks or at least 300 work hours. May be repeated up to 3 credits. Consent of Instructor required.

BFIN 406. Theory of Financial Decisions**3 Credits (3)**

Contemporary financial theory. Firm valuation, investments and financing decisions, risk analysis.

Prerequisite(s): BFIN 341 with a grade of C- or better.

BFIN 421. Personal Financial Planning for Professionals**3 Credits (3)**

Introduction to personal financial planning, including goal setting and fact finding, cash management, credit, housing, retirement planning, taxation and estate planning. This course is intended for those planning careers in personal financial advising in one of the various financial services environments.

Prerequisite(s): BFIN 341, or consent of Instructor.

BFIN 435. Investment Analysis**3 Credits (3)**

Efficiency of capital markets, modern portfolio management, special topics of current interest to investment analysts.

Prerequisite: BFIN 355.

BFIN 445. Fixed Income Markets, Instruments and Derivatives**3 Credits (3)**

Course provides a broad introduction to treasury, corporate, municipal, mortgage backed and asset backed bond markets. The analytical techniques for valuing bonds, quantifying their exposure to changes in interest rate and credit risk exposures and investment decision-making are explored.

Prerequisite(s): BFIN 341.

BFIN 455. Derivative Markets and Securities**3 Credits (3)**

Institutional aspects of derivative markets and the arbitrage based pricing of derivative instruments such as stock options, interest rate options, future contracts and swaps. The applied component of the course demonstrates use of these instruments as hedge and/or investment vehicles.

Prerequisite(s): BFIN 355.

BFIN 470. Real Estate Appraisal**3 Credits (2+2P)**

This course addresses issues influencing the value of real estate with some emphasis upon rural properties. Topics include courthouse records, property taxes, appraisal methodology, expert courtroom testimony, condemnation, and legal issues. Students will take field trips and write appraisals. Course material is relevant to student in Finance, Accounting, and Pre-Law, as well as Agriculture. Accredited for hours to apply to both pre-licensing and continuing education requirements of the New Mexico Real Estate Commission for both Appraisers and Real Estate Brokers. Crosslisted with: AEEC 470.

Prerequisite(s): Junior or above standing.

BFIN 475. International Managerial Finance**3 Credits (3)**

International aspects of financial transactions, decision-making, banking and financial markets. Crosslisted with: I B 475 and BFIN 575.

BFIN 480. Management of Financial Institutions**3 Credits (3)**

Asset and liability management of financial institutions; emphasis on commercial bank management.

Prerequisite: BFIN 385 or consent of instructor.

BFIN 490. Selected Topics**1-3 Credits**

Current topics in finance.

Prerequisites: vary according to the seminar being offered.

BFIN 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.

Prerequisites: junior or above standing and consent of instructor.

BFIN 500. Concepts in Finance**1 Credit (1)**

An overview of fundamental principles of finance necessary for prospective MBA students who do not have an undergraduate background in finance. Includes: Time value of money concepts and calculations; risk and calculation of return given appropriate risk measures; bond risk characteristics and calculation of the value of a bond; calculation of the value of common stock (determination as to whether a stock is over-valued or under-valued); and calculation of the costs of capital and capital budgeting problems using the cost of capital.

Prerequisite(s): admitted to MBA Program or consent of course department.

BFIN 503. Financial Management**3 Credits (3)**

Theory and application of financial analysis to asset management, project evaluation, capital structure, and dividend policy. Interrelationships among financial and other organizational decisions.

Prerequisite(s): BFIN 341 with a grade of B or better.

BFIN 511. Financial Futures Markets**3 Credits (3)**

Same as AEEC 511.

BFIN 521. Personal Financial Planning for Professionals**3 Credits (3)**

Introduction to personal financial planning, including goal setting and fact finding, cash management, credit, housing, retirement planning, taxation and estate planning. This course is intended for those planning careers in personal financial advising in one of the various financial services environments.

For Graduate students only

Learning Outcomes

1. Describe the financial planning process, assess the external environment, use goals to establish financial direction, and analyze a client's present financial position. Estimate the impacts of income tax planning strategies, apply the basic process for retirement planning, and define the considerations for estate planning. Evaluate the roles of various insurances products in managing risks, and recognize the professional and ethical aspects of financial planning

BFIN 535. Investment Concepts**3 Credits (3)**

Investments in common stocks and other securities. Risk and return, securities markets, portfolio theory and management. For Graduate students only

Learning Outcomes

1. Model forecasted financial statements using Microsoft Excel. Build financial models in Excel to estimate risk and return for individual stock. Build financial models in Excel to construct an efficiently diversified portfolio. Make decisions regarding investments for the Wetherbe Student-Managed Investment Fund.

BFIN 545. Fixed Income Markets, Instruments and Derivatives**3 Credits (3)**

Course provides a broad introduction to treasury, corporate, municipal, mortgage backed and asset backed bond markets. The analytical techniques for valuing bonds, quantifying their exposure to changes in interest rate and credit risk exposures and investment decision-making are explored.

Assignments and exams will be differentiated from the undergraduate cross-listed course. In addition, graduate students are expected to complete a project. For Graduate students only.

Learning Outcomes

1. Describe basic features of a fixed-income security. Describe mechanisms available for issuing bonds in primary markets. Analyze repurchase agreements (repos) and the risks associated with them. Compute invoice prices, yields, spot rates, and forward rates. Compute PVBP, duration and convexity of a bond, duration of a portfolio of bonds. Construct the term-structure of interest rates, Yield curve strategies. Describe the process of calibrating a binomial interest rate tree to match a specific term structure. Explain the principles underlying, and factors that influence, the market's pricing of CDS. Explain and execute interest rate swaps.

BFIN 555. Derivative Markets and Securities**3 Credits (3)**

Institutional aspects of derivative markets and the arbitrage based pricing of derivative instruments such as stock options, interest rate options, future contracts and swaps. The applied component of the course demonstrates use of these instruments as hedge and/or investment vehicles. Same as BFIN 455 with differentiated assignments for graduated students. For Graduate students only.

Learning Outcomes

1. Define forward contracts, futures contracts, options (call and puts), swaps, and credit derivatives and compare their basic characteristics. Determine the value at expiration and profit from a long or a short position in a call or put option, or combinations such as straddles, covered calls, spreads, put-call parity etc. Explain how the concepts of arbitrage, replication, and risk neutrality are used in pricing derivatives. Explain how the value of an option is determined using a multiperiod-period binomial model. Describe how the Black-Scholes-Merton model is used to value European options on equities. Interpret each of the option Greeks. Describe how a delta hedge is executed. Define implied volatility and explain how it is used in options trading. Describe a futures contract: long and short positions, hedging, basis risk, and hedge ratios

BFIN 575. International Managerial Finance**3 Credits (3)**

International aspects of financial transactions, decision-making, banking and financial markets. For Graduate students only.

Learning Outcomes

1. Explain and evaluate how the globalization process moves a business from a purely domestic focus in its financial relationships and composition to one truly global in scope. Describe what three major corporate currency exposure arises from multinational business. Define and explain the terms that are used in reference to exchange rates and currency regimes in addition to analyzing the characteristics of an ideal currency. Explain how nations measure their own level of international economic activity and how that is measured by the balance of payments. Show how interest rates and inflation affect each country and currency. Identify the forms of currency quotations used by currency dealers, financial institutions, and agents of all kinds when conducting foreign exchange transactions. Distinguish between spot, forward, swaps, and other types of foreign exchange financial instruments as well as foreign currency futures and options contracts. Demonstrate how both the diversifiable and non-diversifiable risks of an investor's portfolio may be reduced through international diversification. Evaluate the various internal and external sources of funds available for the financing of foreign subsidiaries.

BFIN 581. Management of Financial Institutions**3 Credits (3)**

Asset and liability management of financial institutions; emphasis on commercial bank management. For Graduate students only.

Learning Outcomes

1. Describe the Financial System and Competing Financial Service Institutions. Describe the impact of government policy and regulation on the banking industry. Explain the array of organizational structures in Banking: Unit, Branch, Holding. Company and Electronic Services. Analyze the Balance Sheets and Income Statements of Banks. Measure and evaluate the performance of Banks and their principal competitors. Apply different liquidity management strategies.

BFIN 590. Selected Topics**1-3 Credits (1-3)**

Current topics in finance. Taught with BFIN 490 with differentiated assignments for graduate students. Consent of instructor required.

BFIN 598. Special Research Programs**1-3 Credits**

Directed individual reading or research.

Prerequisite: consent of instructor.

BIOL-BIOLOGY

BIOL 1120G. Human Biology**3 Credits (3)**

This course is an introduction to modern biological concepts with an emphasis on the relevance to humans and their relationships with the environment.

Learning Outcomes

1. Explain that biology is a scientific discipline based on observations and experiments.
2. Explain the process of scientific inquiry and explain how scientific knowledge is discovered and validated.
3. Describe the chemical basis of living organisms and how biomolecules contribute to the structure and function of cells.
4. Develop a basic familiarity with cells and cell organelles.
5. Describe the structure and function of DNA as well as how DNA is used in the production of proteins
6. Describe the basic principles of genetics and heredity leading to human diversity.
7. Identify the major features of the systems in the human body, and understand the anatomy and physiology of them
8. Describe the roles of the organ systems in maintaining homeostasis
9. Explain the principles of evolution by means of natural selection explaining the diversity of life.
10. 1Describe how science and technology have impacted life in particular to society and the environment (e.g. medicine, forensic science, agriculture, ecology, sustainability).

BIOL 1120L. Human Biology Laboratory**1 Credit (3P)**

This course introduces exercises, experiences, and activities exploring biological concepts and theories relevant to humans and their relationship to the environment in a laboratory setting.

Prerequisite(s)/Corequisite(s): BIOL 1120G.

Learning Outcomes

1. Understand general principles of cell structure and function.
2. Understand general principles of genetics.
3. Understand basic human anatomy and physiology.
4. Communicate scientific information effectively.
5. Demonstrate an understanding of the scientific method.
6. Knowledge of appropriate laboratory skills
7. Apply quantitative reasoning and scientific thinking to real world problems.

BIOL 1130G. Introductory Anatomy & Physiology (non-majors)**4 Credits (3+3P)**

This course introduces the anatomy (structure) and physiology (function) of the human body, which includes the study of basic chemistry, molecules, cells, tissues, organs, organ systems, and terminology related to these concepts. May be repeated up to 4 credits. Restricted to Community Colleges campuses

Learning Outcomes

1. (Lecture) Define and explain anatomy and physiology.
2. (Lecture) Use anatomic directional, regional, and sectional terminology related to the human body.
3. (Lecture) Explain and describe the basic chemical principles of the human body including the structure and function of carbohydrates, lipids, proteins and nucleic acids.
4. (Lecture) Develop a basic familiarity with cells and cell organelles that include cell division, DNA replication, and protein synthesis.
5. (Lecture) Describe the structure and function of the major tissues in the human body.
6. (Lecture) Identify and describe the basic anatomical features of the integumentary, skeletal, muscle, nervous, endocrine, cardiovascular, lymphatic, digestive, respiratory, urinary and reproductive systems.
7. (Lecture) Describe the basic physiological roles of the integumentary, skeletal, muscle, nervous, endocrine, cardiovascular, lymphatic, digestive, respiratory, urinary and reproductive systems.
8. (Lecture) Apply and describe the principles of homeostasis in the human body.
9. (Laboratory) Use and apply proper anatomic terms
10. 1 (Laboratory) Develop skills using the microscope correctly.
11. 1 (Laboratory) Identify basic tissue types.
12. 1 (Laboratory) Discuss and describe the basic anatomical features of the integumentary, skeletal, muscle, nervous, endocrine, cardiovascular, lymphatic, digestive, respiratory, urinary and reproductive systems.
13. 1 (Laboratory) Demonstrate and describe physiological roles of the integumentary, skeletal, muscle, nervous, endocrine, cardiovascular, lymphatic, digestive, respiratory, urinary and reproductive systems.

BIOL 1190G. Contemporary Problems in Biology**4 Credits (3+3P)**

Fundamental concepts of biology will be presented using examples from relevant problems in ecology, medicine and genetics. For nonscience majors only. Community Colleges only.

Learning Outcomes

1. Identify the unity and diversity of living things
2. Identify the structure and function of cells and biological molecules
3. Recognize and demonstrate patterns of inheritance
4. Describe mechanisms of evolution
5. Describe the human body systems including immune response
6. Discuss population dynamics and ecological systems
7. Describe the process of scientific inquiry, solve problems scientifically, and communicate on a scientific level
8. Apply quantitative analysis and scientific thinking to scientific and real world problems

BIOL 1996. Topics in Biology**1-3 Credits (1-3)**

Introductory level coverage of biological topics. May be repeated up to 9 credits.

Learning Outcomes

1. Varies

BIOL 2110G. Principles of Biology: Cellular and Molecular Biology**3 Credits (3)**

This course introduces students to major topics in general biology. This course focuses on the principles of structure and function of living things at the molecular, cellular and organismic levels of organization. Major topics included are introduction to the scientific process, chemistry of cells, organization of cells, cellular respiration, photosynthesis, cell division, DNA replication, transcription, and translation. Must be taken with BIOL 2110L to meet general education requirements. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): a C- or better in MATH 1215 or higher and a C- or better in CHEM 1120G or CHEM 1215G or CHEM 1216.

Learning Outcomes

1. Apply the scientific method to develop and evaluate hypotheses and propose an experiment to test a scientific hypothesis related to cell biology and molecular biology.
2. Describe the distinguishing characteristics of various biological molecules (water, carbohydrates, lipids, proteins, and nucleic acids). (HED Area 3, Competency 3)
3. Compare and contrast the basic features of cells and how prokaryotic cells differ from eukaryotic cells. (HED Area 3, Competency 3)
4. Understand how organisms maintain homeostasis in a dynamic environment.
5. Describe how biological molecules are acquired and how they are subsequently used to meet the metabolic needs of organisms. (HED Area 3, Competency 3)
6. Describe membrane structure and function.
7. Describe and analyze the nature of bioenergetic transformations and metabolism within the cell.
8. Describe the processes of cellular respiration and photosynthesis.
9. Analyze with specific detail the processes of DNA replication, transcription, and translation.
10. Analyze with specific detail the types, mechanisms, and regulation of cellular division.
11. Assess important applications of cell and molecular biology to energy use, medicine, and other day-to-day processes. (HED Area 3, Competency 1,3,4,5)

BIOL 2110L. Principles of Biology: Cellular and Molecular Biology Laboratory**1 Credit (3P)**

This course introduces students to major topics in general biology. This course focuses on the principles of structure and function of living things at the molecular, cellular and organismic levels of organization. Major topics included are introduction to the scientific process, chemistry of cells, organization of cells, cellular respiration, photosynthesis, cell division, genetics, DNA replication, transcription, and translation. May be repeated up to 1 credits.

Prerequisite/Corequisite(s): BIOL 2110G; Prerequisite(s): MATH 1215 or higher, and a C- or better in CHEM 1120G or CHEM 1215G or CHEM 1216.

Learning Outcomes

1. Describe and apply the scientific method to generate testable hypotheses in evolution and ecology.
2. Design and conduct laboratory experiments using relevant laboratory equipment and methods.
3. Analyze and report data generated during laboratory activities and experiments.
4. Communicate scientific results from experiments in Mendelian genetics, evolution, ecology, and biodiversity.

BIOL 2210. Human Anatomy and Physiology I for the Health Sciences**4 Credits (3+3P)**

This course is the first of two that serve as an introduction to human anatomy and physiology for biology majors and allied health students. The course entails describing, explaining, and analyzing structure and function from the submicroscopic to the organismal level with emphasis on anatomic, directional, and sectional terminology, basic cellular structure and metabolism, tissue differentiation and characteristics, and organ system structure and function; Specifically the integumentary, skeletal, muscular, and nervous systems.

Prerequisite(s)/Corequisite(s): CHEM 1120G or CHEM 1215G. Restricted to: Community Colleges only.

Learning Outcomes

1. Describe and apply anatomical terminology.
2. Describe multi cellular organization.
3. Distinguish and describe major tissue types.
4. Describe the structure and function of the integumentary system.
5. Describe the structure and function of the skeletal system.
6. Describe the structure and function of the muscular system.
7. Describe the structure and function of the nervous system.
8. Describe the structure and function of the special senses.
9. Define homeostasis and describe specific examples for the integumentary, skeletal, muscular, and nervous systems.

BIOL 2221. Human Physiology**3 Credits (3)**

Physical and chemical operation of the organs and systems of the human body. Not open to students who have passed BIOL 354 or BIOL 381.

Prerequisite(s): Grade of at least C- in BIOL 2110G; BIOL 2110L; CHEM 1215G or CHEM 1120G.

Learning Outcomes

1. Understand the central physiological principle of homeostasis
2. Be able to explain why concentration gradients are essential to maintain homeostasis
3. Understand the regulation of homeostasis by neuronal / endocrine chemical messengers
4. Understand that changes in bodily function occur throughout the entire life span of the human animal
5. Incorporate the importance of evolutionary biology to your understanding of human disease
6. Teach a physiological concept to your classmates
7. Design experiments to test physiological concepts
8. Put in plain words how the laws of thermodynamics can explain human disease

BIOL 2225. Human Anatomy and Physiology II**4 Credits (3+3P)**

This course is the second of two that serve as an introduction to human anatomy and physiology for biology majors and allied health students. The course entails describing, explaining, and analyzing structure and function from the submicroscopic to the organismal level with emphasis on specific cellular, tissue, and organ structure and physiology, and organ system structure and function; specifically the endocrine, cardiovascular, respiratory, urinary, and reproductive systems. Additionally, an analysis of these concepts is included: fluid and electrolyte balance, pregnancy, growth and development from zygote to newborn, and heredity. Restricted to: Community Colleges only.

Prerequisite(s): BIOL 2210, CHEM 1120G or CHEM 1215G.

Learning Outcomes

1. Identify and describe the major anatomical features of the endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems.
2. Analyze the physiological roles of the endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems in maintaining homeostasis in the human body.
3. Explain how fluid and electrolyte balance is maintained in the human body.
4. Compare and contrast the anatomy and physiology of male and female reproductive systems.
5. Describe pregnancy from conception to parturition including human growth and development from zygote to newborn.
6. Explain heredity and genetic control.

BIOL 2310. Microbiology**3 Credits (3P)**

Introduction to the basic principles of microbiology, microbial pathogenesis, host defenses and infectious diseases. The course will emphasize concepts related to the structure and function of microorganisms, including their mechanisms of metabolism and growth. Host parasite interactions will also be emphasized, including mechanisms of microbial pathogenesis and mechanisms of host defenses against infectious diseases. Restricted to Community Colleges campuses only.

Prerequisite(s): CHEM 1120G or CHEM 1215G or CHEM 1225G.

Corequisite(s): BIOL 2310L.

Learning Outcomes

1. Describe and compare the structure and function of prokaryotic and eukaryotic cells.
2. Describe and compare the techniques used for staining of and microscopic observation of bacteria including morphology.
3. Describe the nutritional requirements for bacterial growth and the impact of environmental factors on bacterial growth (temperature, pH, oxygen, etc.).
4. Describe and compare the mechanisms of aerobic respiration, anaerobic respiration, and fermentative metabolism.
5. Describe the mechanism of bacterial growth by binary fission, and laboratory methods used for observing and measuring bacterial growth.
6. Describe the mechanisms of bacterial DNA replication, RNA transcription, and translation, and compare and contrast with eukaryotic cells.
7. Describe the structure and replication strategies of viruses.
8. Describe and contrast mechanisms of innate nonspecific immunity and adaptive specific immunity.
9. Describe immune hypersensitivity reactions, autoimmune diseases, and immunodeficiency diseases.
10. Differentiate between host microbe relationships, mechanisms of microbial pathogenesis, differentiate between communicable and noncommunicable diseases and describe mechanisms of direct and indirect transmission of communicable diseases.

BIOL 2310L. Microbiology Lab**1 Credit (3P)**

This course will emphasize both the theory and hands-on application of techniques used in a microbiology laboratory for the growth and identification of bacterial species. Students will learn microscopy skills and staining techniques for the observation of bacteria. Students will also learn aseptic techniques used for isolation of bacteria, inoculation of cultures, and interpretation of selective and differential growth media for the identification of bacterial species.

Prerequisite: BIOL 2310 or BIOL 2320 or concurrent enrollment.

Learning Outcomes

1. Demonstrate skills of microscopy.
2. Demonstrate skills of bacterial staining.
3. Demonstrate aseptic technique for inoculation of bacterial growth media.
4. Interpret results from selective and differential media.
5. Demonstrate appropriate use of diagnostic reagents.
6. Interpret results of diagnostic assays.
7. Identify unknown bacterial species through the use of a dichotomous key, inoculation and interpretation of laboratory assays, and application of the scientific method.

BIOL 2320. Public Health Microbiology**3 Credits (3)**

This course introduces microbiology on the health profession level. It incorporates cell structure, metabolism, growth, controls of growth, infectious epidemiology, etiology, pathogenicity, and relative virulence of pathogens. It will lead to students assessing a clinical infection scenario from the microbiological perspective that includes making diagnoses based on data from appropriate diagnostic tests, investigating appropriate treatment options, and making recommendations for prevention.

Prerequisite: BIOL 2110G and BIOL 2110L.

Learning Outcomes

1. Identify key physical features of various infectious agents and describe their structure and function in the pathogen
2. Describe the microbiological, serological, biochemical and genetic tests that are used to identify infectious agents in a laboratory setting and be able to interpret test results in order to identify the pathogen
3. Explain how structural and metabolic differences between infectious agents and human host can be exploited for chemotherapy
4. Explain the observed effect of a particular environmental change on the growth of a given microorganism, and the relationship between bacterial growth patterns and selected foodborne illnesses
5. Describe several mechanisms by which pathogens generate genetic diversity and the role genetic diversity plays in resistance to therapy and treatment failure
6. Explain the role of innate, and adaptive immunity in host defense
7. Describe general virulence strategies used by variety of pathogens, and different types of vaccines along with recommendations for vaccinations of specific populations
8. Demonstrate understanding of signs and symptoms of selected diseases, and be able to relate disease agents with environmental reservoirs and transmission

BIOL 2505. Pathophysiology**3 Credits (3)**

This course is designed to provide the conscientious student with a solid foundation for understanding the pathophysiological processes of the human organism. Successful completion of this course will promote the general student learning outcomes listed below. Corequisite/Prerequisites(s): AHS 154 or BIOL 2225. Restricted to: Community Colleges only.

Prerequisite(s): AHS 153 or BIOL 2210.

Learning Outcomes

1. To describe the general concepts of disease processes and factors associated with disease causation.
2. To identify the function of basic cellular structures, determining the process of cellular malfunctions.
3. To describe the response of the body to injury and immunologic challenge.
4. To discuss the etiology, pathogenesis, and treatment modalities of frequently occurring diseases.

BIOL 2511. Human Pathophysiology**3 Credits (3)**

The first in a two-course sequence that covers changes in body physiology that result from disease or injury. Includes a general introduction to pathophysiology as well as an overview of altered cellular and tissue biology, injury, inflammation, and neoplasia. Students will also explore deviation from fluid, hemodynamic, and endocrinologic balance. Topics related to the science of pathophysiology, including pathology, pathogenesis, etiology, epidemiology, and clinical manifestations, are also discussed throughout the course where relevant. Grade of C- or higher in microbiology is recommended. Restricted to Community Colleges campuses only.

Prerequisite(s): Grade of C- or higher in BIOL 2210 and BIOL 2225.

Learning Outcomes

1. The cellular adaptations occurring in atrophy, hypertrophy, hyperplasia, dysplasia, and metaplasia; the types and causes of cellular injury; and the types of necrosis.
2. The different compartments for body fluids; the factors that affect water movement; the processes that drive and affect capillary exchange; the mechanisms causing edema; the electrolytes in body compartments; the various electrolyte imbalances; the body mechanisms that maintain acid-base balance; and the various acid-base imbalances and how they are compensated for .
3. The interrelationships of DNA, RNA, and proteins; the various types of mutations; the various types of mutagens, the various types of numerical and structural chromosomal aberrations; the various genetic terms; the single-gene disorders discussed in class; the multifactorial disorders discussed in class.
4. The relationships between genes, environment, and multifactorial diseases; the criteria used to define multifactorial disease; the characteristics of multifactorial traits; and the various features of the threshold model.
5. The terms related to tumor/cancer biology, classification, and nomenclature; the various features of cancer biology, including the characteristics of cancer and the genetic basis of cancer; features related to cancer invasion and metastasis; and the clinical manifestations and treatments of cancer.
6. Features related to Innate and adaptive immunity; features related to the first, second, and third lines of defense; the mechanisms and manifestations of inflammation; components/mechanisms related to the complement, clotting, and kinin systems; mechanisms of wound healing; and features of dysfunctional wound healing.
7. Aspects/mechanisms of specific (adaptive) immunity, features related to the structure, function, and classification of immunoglobulins; features related to haptens, antigens, immunogens, and epitopes; the different types of antigens; features related to immunological memory; and features related to the different types of active and passive immunity.
8. Aspects related to allergy, autoimmunity, and alloimmunity; aspects/mechanisms/examples related to the four basic types of hypersensitivity reactions; mechanisms and examples related to autoimmunity; and aspects/mechanisms related to immunodeficiency.
9. The risk factors for infection; the six components of the chain of infection; general concepts, terms, and processes/mechanisms related to basic microbiology; and the mechanisms of microbial pathogenicity.
10. 1 General concepts, terms, and processes/mechanisms related to normal hormonal action; mechanisms of hormonal alterations; processes/mechanisms related to the pathophysiology of the various disorders discussed in class; and the clinical manifestations and treatment of the hormonal alterations discussed in class.

BIOL 2512. Human Pathophysiology I**3 Credits (3)**

The second in a two-course sequence that covers changes in body physiology that result from disease or injury. This course focuses on the pathophysiology of the nervous, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems. Topics related to the science of pathophysiology, including pathology, pathogenesis, etiology, epidemiology, and clinical manifestations, are also discussed throughout the course where relevant. Grade of C- or higher in microbiology is recommended. Restricted to Community Colleges campuses only.

Prerequisite(s): Grade of C- or higher in BIOL 2210, BIOL 2225, and BIOL 2511.

Learning Outcomes

1. " The different types of sensory modalities; the different dysfunctions of the general and special senses; the different pain theories discussed in class; the various aspects of the neuroanatomy and neuromodulation of pain; the various clinical descriptions of pain; the various aspects of temperature regulation; components of the pathogenesis of fever; the various disorders of temperature regulation; the various aspects of sleep disorders; the various components of visual dysfunction; and the various aspects of auditory, gustatory, and olfactory dysfunction.
2. The various alterations in cognitive systems; the various alterations in arousal; the outcomes of alterations in arousal; the various alterations in awareness; the various seizure disorders; the various data processing deficits; various alterations in cerebral hemodynamics; and alterations in neuromotor function.
3. The various disorders of the central and peripheral nervous systems; and the various disorders of the neuromuscular junction.
4. The components of normal blood; the process/stages of hematopoiesis; the various normal RBC laboratory values; the components and functions of the lymphatic system; the various types of imbalances of erythropoiesis; the various types of anemias and their causes; the various types of polycythemia and their causes; the processes related to hemostasis; the various alterations of white blood cells and their causes; and the various alterations of lymphoid and hemostatic function.
5. The various diseases of the veins; the various diseases of the arteries; the various aspects of atherosclerosis; features related to the pathogenesis and consequences of coronary artery disease; the disorders of the heart wall and their consequences; the various aspects of valvular dysfunction; aspects of the pathogenesis and manifestations of rheumatic disease; the causes, pathogenesis, and manifestations of infective endocarditis; the causes, manifestations, and pathophysiology of heart failure; and the various types of shock.
6. The various signs and symptoms of pulmonary disease; the various conditions caused by pulmonary disease/injury; the various disorders of the chest wall and pleura; and the causes, manifestations, and pathophysiology of selected pulmonary disorders.
7. The features and consequences of upper and lower urinary tract obstruction; the various types of urinary tract infection; the causes, pathogenesis, and clinical manifestations of glomerulonephritis; the various features of nephrotic and nephritic syndrome; and the various features (etiology, pathophysiology, and clinical manifestations) of both acute kidney injury and chronic kidney disease.
8. The various clinical manifestations of gastrointestinal dysfunction; the various aspects (etiology, pathophysiology, and clinical manifestations) of disorders of motility; the causes, manifestations, and pathophysiology of gastritis; features related to the causes, manifestations, and pathophysiology of peptic ulcer disease; features related to the etiology, pathogenesis and pathophysiology of selected malabsorption syndromes, inflammatory bowel diseases, diverticular disease of the colon, appendicitis, and irritable bowel syndrome; the various types of vascular insufficiency; the various disorders of nutrition and their causes and clinical manifestations; and the various disorders of the accessory organs of digestion.
9. The various features associated with alterations of sexual maturity (delayed puberty and precocious puberty); features related to the etiology, pathogenesis, and pathophysiology of the various disorders of the male reproductive system, including disorders of the urethra, disorders of the penis, disorders of the scrotum, disorders of the testes, disorders of the epididymis, disorders of the prostate gland, and disorders of the male breast; features related to the etiology, pathogenesis, and pathophysiology of male sexual dysfunction; features associated with abnormalities of reproductive tract development; the various hormonal and menstrual alterations and their causes and clinical manifestations; the various conditions related to infection, inflammation, and pelvic organ prolapse (uterine prolapse, cystocele, rectocele, and enterocele); conditions involving benign growths and cancer (endometriosis, cervical cancer, vaginal cancer, vulvar cancer, endometrial cancer, uterine sarcoma, and ovarian cancer); features related to the etiology, pathogenesis, and pathophysiology of female sexual dysfunction (disorders of desire, vaginismus, anorgasmia, and dyspareunia); features related to infertility; and features related to the etiology, pathogenesis, and pathophysiology of breast cancer."

BIOL 2610G. Principles of Biology: Biodiversity, Ecology, and Evolution**3 Credits (3)**

This course is an introduction to the dynamic processes of living things. Major topics include the mechanisms of evolution, biological diversity, Mendelian genetics, and ecology.

Prerequisite/Corequisite: grade of C- or better in MATH 1215 or higher, or a Math Placement Exam score adequate to enroll in mathematics courses beyond MATH 1215.

Learning Outcomes

1. Understand the scientific method and apply it to biological topics of genetics, evolution, ecology, and biodiversity. Apply quantitative reasoning and scientific thinking to real world problems. Identify and describe the basic principles of evolution. Analyze the relationships between the genetics of populations and evolution. Analyze the processes of speciation. Describe how the hierarchical classification scheme is used to categorize organisms. Describe how DNA research has modernized bio systematics. Compare and contrast the general characteristics of each of the living domains and kingdoms. Relate the structure of organisms to the way they function. 1Explain how the life histories of organisms are adapted for different environments. 1Relate the complexity of behavior to the overall complexity of an organism. 1Describe the ecological roles played by organisms in each kingdom. 1Compare basic ecological principles at the population and community levels of organization. 1Describe and compare energy relationships and the cycling of materials in ecosystems. 1Identify and describe the basic principles of Mendelian genetics.

BIOL 2610L. Principles of Biology: Biodiversity, Ecology, and Evolution Laboratory**1 Credit (3P)**

This laboratory course is an introduction to the dynamic processes of living things. This course introduces students to the methods used in the study of Mendelian genetics, evolution, ecology, and biological diversity. Designed for students continuing in life sciences.

Prerequisite/Corequisite: BIOL 2610G; grade of C- or better in MATH 1215 or higher, or a Math Placement Exam score adequate to enroll in mathematics courses beyond MATH 1215.

Learning Outcomes

1. Describe and apply the scientific method to generate testable hypotheses in evolution and ecology. Design and conduct laboratory experiments using relevant laboratory equipment and methods. Analyze and report data generated during laboratory activities and experiments. Communicate scientific results from experiments in Mendelian genetics, evolution, ecology, and biodiversity.

BIOL 2996. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 6 credits. Community Colleges only.

Learning Outcomes

1. Varies

BIOL 301. Principles of Ecology**3 Credits (3)**

A survey of ecology including general theory, the adaptations of organisms, population dynamics, species interactions, and the structure and function of natural communities and ecosystems. MATH 1511G and A ST 311 recommended. Same as ENVS 301. Crosslisted with: ENVS 301.

Prerequisite(s): BIOL 2610G, MATH 1220G.

BIOL 302. Molecular Biology Techniques Laboratory**3 Credits (6P)**

This combined lecture and laboratory course emphasizes molecular biology laboratory practices through the hands-on application of commonly applied techniques, protocols, and equipment. The topics covered include both the fundamental development of empirical data as well as data analysis using stand-alone and web-based resources. Consent of instructor required.

Prerequisite(s): BIOL 2110G or equivalent, and MATH 1220G.

BIOL 305. Principles of Genetics**3 Credits (3)**

Covers fundamental principles of reproduction, variation, and heredity in plants and animals. Crosslisted with: HORT 305 and AGRO 305.

Prerequisite(s): BIOL 2610G and BIOL 2110G, or BIOL 2110G and BCHE 140, either CHEM 1215G or CHEM 1216, and MATH 1220G.

BIOL 309. Guided Biological Research Lab**3 Credits (3)**

This laboratory course provides a guided experience to hands-on research in biology. It is intended for early-career undergraduates who have finished the introductory sequence of Biology courses. Topics will vary with instructor.

Prerequisite(s): BIOL 2610G, BIOL 2110G, and MATH 1220G.

BIOL 311. General Microbiology**3 Credits (3)**

Principles of physiology, molecular biology, ecology, and taxonomy of microorganisms.

Prerequisite(s): BIOL 2110G and MATH 1220G.

BIOL 311 L. General Microbiology Laboratory**2 Credits (4P)**

Microbiology techniques and procedures, including isolation and identification of microorganisms and biotechnology procedures that employ microorganisms.

Prerequisite(s)/Corequisite(s): BIOL 2320 or BIOL 311. Prerequisite(s): BIOL 2110G and MATH 1220G.

BIOL 312. Plant Taxonomy**3 Credits (2+3P)**

Classification and identification of representative plant families and local plants. Emphasis on ability to use technical sources. Saturday field trips may be recommended.

Prerequisite(s): BIOL 2610G and MATH 1220G.

BIOL 313. Structure and Function of Plants**3 Credits (2+3P)**

Structure, function, and survey of plants. BIOL 2110G recommended.

Prerequisite(s): BIOL 2610G, MATH 1220G, and sophomore-level standing.

BIOL 314. Plant Physiology**3 Credits (3)**

Photosynthesis, respiration, water relation of plants, minerals and organic nutrition, growth and development.

Prerequisite(s): BIOL 2110G and CHEM 1225G.

BIOL 322. Zoology**3 Credits (2+3P)**

Structure, function, and survey of animals. BIOL 2110G recommended.

Prerequisite(s): BIOL 2610G, MATH 1220G, and at least sophomore-level standing.

BIOL 350. Special Topics**1-4 Credits**

Specific subjects announced in Schedule of Classes and offered as scheduled courses. May be repeated for unlimited credit.

BIOL 351. Biology Internship**1-6 Credits**

Substantial off-campus experience in biology selected by student in consultation with regular biology faculty member. Internship must be approved by faculty member. Student will supply mutually agreed upon documentation of internship activities after the internship is completed. May be repeated up to 6 credits. Restricted to: BIOL, MBIO, CEC, GEOT majors. Graded: S/U Grading (S/U, Audit).

Prerequisite(s): 45 college credits, 2.5 or better GPA, consent of instructor.

BIOL 353. Pre-Professional Human Anatomy**4 Credits (4)**

Pre-professional clinically-oriented survey of human anatomy. Designed primarily for pre-nursing majors. Provides comprehensive anatomical training for students planning careers in health and allied health sciences, such as medicine, dentistry, nursing, physical therapy, physicians aid, human nutrition, and food science. Suitable as a biology elective. Concurrent enrollment in BIOL 353 L is recommended but not required. May be repeated up to 4 credits.

Prerequisite(s): BIOL 2110G and either CHEM 1120G, CHEM 1215G, or CHEM 1216.

BIOL 353 L. Pre-Professional Human Anatomy Laboratory**1 Credit (3P)**

Laboratory experience in human anatomy using anatomical models and cat dissections. Designed as a learning aid to support and augment BIOL 353 pre-professional Human Anatomy. For students planning careers in health and allied health sciences such as medicine, dentistry, nursing, physical therapy, physicians aid, human nutrition, and food science. May be repeated up to 1 credits.

Prerequisite(s)/Corequisite(s): BIOL 353. Prerequisite(s): BIOL 2110G and either CHEM 1120G, CHEM 1215G, or CHEM 1216.

BIOL 354. Physiology of Humans**3 Credits (3)**

Principles of integrative functions in humans. A systems approach emphasizing tissues, organs, and their regulation.

Prerequisite(s): BIOL 2110G and MATH 1220G.

BIOL 354 L. Laboratory of Human Physiology**1 Credit (3P)**

Laboratory to accompany BIOL 354.

Prerequisite(s): MATH 1220G and either BIOL 2221, BIOL 381, BIOL 354, or concurrent enrollment in BIOL 354.

BIOL 373. Fungal Biology**3 Credits (3+2P)**

Same as EPWS 372.

Prerequisite: EPWS 310 or BIOL 311 or consent of instructor.

BIOL 377. Cell Biology**3 Credits (3)**

Fundamentals of eukaryotic cell structure, organization, and function. Emphasis on membranes, subcellular organelle systems, cytoskeleton, and cell cycle. Includes basic aspects of molecular biology. May be repeated up to 3 credits. BIOL 2610G recommended.

Prerequisite(s): (BIOL 2110G, BIOL 305 or GENE 315) and MATH 1220G.

BIOL 381. Animal Physiology**3 Credits (3)**

Principles of integrative function in animals, emphasizing tissues, organs, organ systems, and regulation. Includes adaptations of animals to their environments. BIOL 2610G and BIOL 377 recommended.

Prerequisite(s): BIOL 2110G and junior-level standing, MATH 1220G.

BIOL 382. Plant Signalling and Development**3 Credits (3)**

This is a course that introduces plant signalling pathways and their role in development to students. The lectures are structured to facilitate in-class discussions on the current state and future directions in this field. Topics will cover a wide range of biological questions and the methods used to study them. May be repeated up to 3 credits.

Prerequisite(s): BIOL 305 or GENE 315, and MATH 1220G.

BIOL 385. An Introduction to Cancer**3 Credits (3)**

This course will cover 3 areas of cancer research and their interdisciplinary connections: clinical cancer research, epidemiology and public health, and basic cancer research. May be repeated up to 3 credits.

Prerequisite(s): BIOL 305 or GENE 315 or equivalent and MATH 1220G.

BIOL 398. Biology Research Programs**1-3 Credits**

Directed studies and research experiences, by arrangement with instructor. May be repeated for a maximum of 6 credits.

BIOL 402. Biology Honors Thesis**1-3 Credits (1-3)**

Provides guidance in how to write a scientific paper in the sciences. Students will produce an honors thesis based on previous independent research. Consent of instructor required.

Prerequisite(s): MATH 1220G and consent of instructor.

BIOL 412. Seminar in Microbiology**1 Credit (1)**

Seminar to aid students in assessment and presentation of current topics in microbiology.

Prerequisite(s): BIOL 311, BIOL 311 L, and MATH 1220G.

BIOL 417. Topics in Environmental Microbiology**3 Credits (3)**

This is an advanced undergraduate course based on current literature in Environmental Microbiology, and is a seminar-style, discussion-based class. Topics typically include marine microbiology, ancient DNA, and the human microbiome. Crosslisted with: BIOL 577.

Prerequisite(s): MATH 1220G, BIOL 477 or consent of instructor.

BIOL 424. Human Osteology**3 Credits (3)**

A survey of the functional, developmental, and evolutionary biology of the human skeleton. Identifying bones and teeth from hands-on experience with skeletal and dental material. Provides a foundation for human evolutionary studies, bioarchaeology and forensic anthropology. Students are recommended to take ANTH 355 or an equivalent before enrolling in this course. BIOL 424L should be taken concurrently when it is offered. Crosslisted with: ANTH 474.

BIOL 427. Symbiosis**3 Credits (3)**

In-depth treatment of the ecology, evolution, and mechanisms that are found in symbiotic systems. May be repeated up to 3 credits. Crosslisted with: BIOL 527.

Prerequisite(s): BIOL 2610G, BIOL 2110G, and MATH 1220G.

BIOL 434. Human Evolution**3 Credits (3)**

Overview of human biological evolution from the emergence of Miocene apes to the modern human diaspora. BIOL 424L should be taken concurrently when it is offered. Crosslisted with: ANTH 434.

Prerequisite(s): ANTH 355.

BIOL 436. Disease Vector Biology**3 Credits (3)**

Fundamentals of disease vector biology with emphasis on molecular biology. Explores an overview of vector borne diseases, insect endocrinology, insect immunity, olfaction, vector genome projects and transgenic insect techniques. Includes student presentations and literature discussions.

Crosslisted with: BIOL 536

Prerequisite(s): BIOL 2110G, BIOL 305, and MATH 1220G.

BIOL 442. Genomics Technology**3 Credits (3)**

The course introduces current genomic techniques in genome sequencing, transcriptome analysis, detection of genetic variation, and metagenomics. May be repeated up to 3 credits. Crosslisted with: BIOL 562.

Prerequisite(s): BIOL 2110G, BIOL 305 or BIOL 478 or GENE 315, and MATH 1220G.

BIOL 446. Bioinformatics and NCBI Database**3 Credits (3)**

The course discusses how to use NCBI database and bioinformatic tools for research with genomics approaches. The topics include nucleotide and protein sequence analysis, similarity search with blast algorithms, gene/genome annotation, protein structure analysis, gene expression analysis, and metagenomic study.

Prerequisite(s): BIOL 2110G, BIOL 305 or BIOL 478 or GENE 315, and MATH 1220G.

BIOL 450. Special Topics**1-3 Credits**

Specific subjects announced in the Schedule of Classes and offered as scheduled courses. May be repeated for unlimited credit.

BIOL 451. Physiology of Microorganisms**3 Credits (3)**

Aspects of cellular physiology unique to prokaryotes. BCHE 395 recommended.

Prerequisite(s): C- or better in BIOL 311, MATH 1220G.

BIOL 455. Biometry**3 Credits (3)**

Biometry is the analysis of biological data using mathematical and statistical models. The course will cover basic theories of probability and statistics and will introduce principles of sampling, estimation, experimental design, and hypothesis testing. Students will analyze biological data using computer programs and will perform tests for goodness-of-fit, independence, analysis of variance, correlation, and regression.

Prerequisite(s): BIOL 2310G or BIOL 2110G, and MATH 1220G.

BIOL 459. Darwinism Versus Creationism**3 Credits (3)**

This course examines the debate regarding Creationism versus Darwinism as explanations for the origin and diversification of life on Earth. Topics covered include the nature and philosophy of science, new-world creationism, old-world creationism, intelligent design, history of evolutionary thought, modern evolutionary theory, and the Creationism-Darwinism debate at the societal, political, and educational interfaces. The course structure will include formal lectures and in-class discussion of assigned readings.

Prerequisite(s): BIOL 2610G or BIOL 2110G, and MATH 1220G.

BIOL 459 H. Darwinism versus Creationism Honors**3 Credits (3)**

This course will examine the history and philosophy surrounding the debate between Darwinism and Creationism. The course will also examine the consequences of the debate at the interface of sociology, economics, politics, and education. The Honors version of the course (BIOL 459H) will require a term paper in addition to the requirements of BIOL 459. Crosslisted with: BIOL 459.

Prerequisite(s): BIOL 2610G or BIOL 2110G, and MATH 1220G.

BIOL 462. Conservation Biology**3 Credits (3)**

Examination of the value of biological diversity, the natural processes that control biological diversity, and the ways in which human activities have resulted in the loss of biological diversity, both regionally and globally.

Prerequisite(s): BIOL 301 and either MATH 1430G or MATH 1511G.

BIOL 465. Invertebrate Zoology**4 Credits (3+3P)**

Survey, ecology, behavior and physiology. BIOL 322 recommended.

Prerequisite(s): MATH 1220G, BIOL 2610G, and junior-level standing.

BIOL 466. Invertebrate Zoology Field Trip**1 Credit (1)**

A one-week field trip for the study of marine invertebrates. Registrants must provide own camping gear. Graded: S/U.

Prerequisite(s): MATH 1220G, BIOL 465 or equivalent (or concurrent enrollment) or consent of instructor.

BIOL 467. Evolution**3 Credits (3)**

Covers theory, historical background, population variation, natural selection, adaptation, speciation.

Prerequisite(s): BIOL 2610G, BIOL 305 or GENE 320, and MATH 1220G.

BIOL 469. Biology of Emerging Infectious Diseases**3 Credits (3)**

This class will investigate the evolutionary and ecological drivers of disease emergence. The effect of emerging diseases on human health will be addressed throughout the class, but the class will also consider the consequences of disease emergence for the health of wildlife and plant populations. Additionally, the class will consider the mechanisms used to control disease emergence and why they succeed or fail.

Prerequisite(s): MATH 1220G, Introductory Genetics (BIOL 305 or equivalent) or consent of the instructor.

BIOL 470. Developmental Biology**3 Credits (3)**

The purpose of this course is to introduce students to the principles that govern the development of a single fertilized egg cell into a complex multicellular organism. These principles, and often the molecular mechanisms by which they are accomplished, appear to be universal for all multicellular organisms including both plants and animals. We will explore issues such as: how cells become committed to particular cell fates and how this commitment is maintained; how organs acquire particular shapes, sizes and positions; the developmental causes of some human diseases; how the environment affects development; and, how changes in development provide the material basis for evolutionary change.

Prerequisite(s): BIOL 2110G, BIOL 305, and MATH 1220G.

BIOL 472. Primate Behavior and Ecology**3 Credits (3)**

Survey of the social behavior and ecology of nonhuman primates. Crosslisted with: ANTH 472.

BIOL 473. Ecology of Microorganisms**3 Credits (2+3P)**

The metabolic interactions of microorganisms in the environment, with emphasis on their roles in ecological processes.

Prerequisite(s): MATH 1220G, BIOL 311 or consent of instructor.

BIOL 474. Immunology**3 Credits (3)**

Basic concepts of the immune response.

Prerequisite(s): MATH 1220G, BIOL 305, and CHEM 2115 or CHEM 313.

BIOL 475. Virology**3 Credits (3)**

Mechanisms of viral infections of animals and man. BCHE 395 or BIOL 305 are recommended.

Prerequisite(s): BIOL 311 and MATH 1220G.

BIOL 476. Soil Microbiology**3 Credits (3)**

Nature and physiology of soil microorganisms, how they affect plant growth and recycle nutrients. Land farming, bioremediation, and other environmental problems as influenced by soil microorganisms. SOIL 2110 and BIOL 311 recommended. Same as SOIL 476.

BIOL 476 L. Soil Microbiology Laboratory**1 Credit (3P)**

Enumeration of soil microorganisms, their activities, and transformations they mediate. Same as SOIL 476L.

Prerequisite(s)/Corequisite(s): BIOL 476.

BIOL 477. Applied and Environmental Microbiology**4 Credits (4)**

A lecture-laboratory course on the microorganisms and the reactions they mediate which either impact the environment or have industrial applications. Reading of current literature will be emphasized. Topics include bioremediation, water quality, and aspects of industrial and food microbiology.

Prerequisite(s): MATH 1220G, BIOL 311, and 311 L, or consent of instructor.

BIOL 478. Molecular Biology of Microorganisms**3 Credits (3)**

The biochemical basis for gene mutation, recombination, and expression with emphasis on prokaryotes. Includes fundamentals of recombinant DNA technology. BIOL 305 and BCHE 395 recommended.

Prerequisite(s): BIOL 311 and MATH 1220G.

BIOL 479. Medical Microbiology**3 Credits (3)**

An in-depth overview of microbial pathogens associated with human infectious disease. Etiological agents, pathogenesis, and processes leading to the disease state and the therapies of infectious disease.

Prerequisite(s): MATH 1220G and BIOL 311 required, BIOL 474 recommended.

BIOL 479 L. Medical Microbiology Laboratory**1 Credit (1)**

Overview of common procedures used by medical microbiologists to identify agents of disease or microbial pathogen traits. May be repeated up to 1 credits.

Prerequisite(s)/Corequisite(s): BIOL 479. Prerequisite(s): MATH 1220G, BIOL 311, BIOL 311 L.

BIOL 480. Animal Behavior**3 Credits (3)**

A survey of the field of animal behavior. BIOL 322 recommended.

Prerequisite(s): MATH 1220G, BIOL 2610G, and junior-level standing.

BIOL 484. Animal Communication**3 Credits (3)**

An examination of how animals produce and perceive signals, what factors influence the form of signals in different sensory modalities, and how conflicts between senders and receivers affect signaling strategies. Weekly discussion from the primary literature and group research products.

Prerequisite(s): BIOL 2610G or consent of instructor, and MATH 1220G.

BIOL 488. Principles of Conservation Genetics**3 Credits (3)**

Fundamentals of the genetics of small populations. Genetic technologies used in studying small populations. Application of genetics and evolution to the conservation of biological populations.

Prerequisite(s): MATH 1220G and BIOL 305.

BIOL 489. Genetic Aspects of Population Biology**3 Credits (3)**

Basic theory of population genetics and how that theory has guided, and been influenced by, studies of natural populations.

Prerequisite(s): MATH 1220G and BIOL 305 or equivalent.

BIOL 490. Neurobiology**3 Credits (3)**

Fundamentals of neurobiology with an emphasis on properties of neurons and glia, principles of synaptic transmission, development of nervous system and organization of motor and sensory systems.

Prerequisite(s): BIOL 2110G, MATH 1430G or equivalent.

BIOL 498. Biology Research Programs**1-3 Credits**

Directed studies and research experiences, by arrangement with instructor. May be repeated for a maximum of 6 credits.

BIOL 509. Guided Biological Research Lab**3 Credits (3P)**

This laboratory course provides a guided experience to hands-on research in biology. It is intended for early-career graduate students wishing an introduction to research practices. Topics will vary with instructor. Crosslisted with: BIOL 309.

BIOL 510. Current Topics in Biology**3 Credits (3)**

Introduction to diverse topics in modern biology, including dynamic areas of current research.

BIOL 514. Plant Physiology**2 Credits (2)**

Same as EPWS 514.

Prerequisites: BIOL 2110G and CHEM 1225G.

BIOL 520. Molecular Cell Biology**3 Credits (3)**

An in-depth look at cellular processes and structures at the molecular level. Emphasis is placed on formal student presentations and discussions of current literature.

Prerequisite: BIOL 377 or equivalent.

BIOL 527. Symbiosis**3 Credits (3)**

In-depth treatment of the ecology, evolution, and mechanisms that are found in symbiotic systems. May be repeated up to 3 credits. Crosslisted with: BIOL 427.

Prerequisite(s): Graduate status.

BIOL 536. Advanced Disease Vector Biology**3 Credits (3)**

Fundamentals of disease vector biology with emphasis on molecular biology. Explores an overview of vector borne diseases, insect endocrinology, insect immunity, olfaction, vector genome projects and transgenic insect techniques. Includes student presentations and literature discussions. Taught with: BIOL 436.

Prerequisite(s): BIOL 2110G and BIOL 305.

BIOL 540. Science and Ethics**1-3 Credits (1-3)**

Ethical concerns facing researchers in the basic and applied biological sciences. Coverage of responsible conduct in research including scientific integrity and research misconduct, mentor/trainee responsibilities, data management, authorship, publication practices, human subjects, animal welfare, intellectual property, conflicts of interest and effort and collaborative science. Emphasis on ethical reasoning skills. Discussion of ethical and societal implications of issues selected from a broad range of contemporary research areas (genetics, reproductive biology, environmental sciences, nanoscience, drug discovery, bioengineering, neuroscience). Subtitled. May be repeated up to 4 credits. Crosslisted with: PHIL 540.

BIOL 541. Professional Development Seminar**1-3 Credits**

Practical aspects of career enhancement including job seeking, professional presentations, grant proposals, etc.

Prerequisite: consent of instructor.

BIOL 550. Special Topics**1-3 Credits**

Readings, discussions, and/or field and laboratory investigation of selected problems. Possible topics: human genetics, systematic entomology, or parasitism in animals. May be repeated for unlimited credit.

Prerequisite: consent of instructor, and designation of a specific topic before registration.

BIOL 562. Advanced Genomics Technology**3 Credits (3)**

This course covers current genomics techniques in genome sequencing, transcriptome analysis, detection of genetic variation, and metagenomics. May be repeated up to 3 credits. Consent of Instructor required. Crosslisted with: BIOL 442.

BIOL 565. Biology In The K-6 Curriculum**3 Credits (3)**

Linking important biological concepts to the K-6 curriculum and standards. Addressing known content area challenges with effective pedagogical approaches. Aligning content, standards, classroom activities and assessment. Does not fulfill requirements for degrees in biology. Consent of Instructor required. Restricted to: Master of Arts in Education: Elementary Mathematics and Science majors.

Learning Outcomes

1. Explain that biology is a scientific discipline based on observations and experimentations.
2. Explain the process of scientific inquiry and explain how scientific knowledge is discovered and validated.
3. Describe the chemical basis of living organisms and how biomolecules contribute to the structure and function of cells.
4. Develop a basic familiarity with cells and cell organelles.
5. Describe the structure and function of DNA as well as how DNA is used in the production of proteins
6. Describe the basic principles of genetics and heredity leading to human diversity.
7. Identify the major features of the systems in the human body, and understand the anatomy and physiology of them
8. Describe the roles of the organ systems in maintaining homeostasis
9. Explain the principles of evolution by means of natural selection explaining the diversity of life.
10. 1 Describe how science and technology have impacted life in particular to society and the environment (e.g. medicine, forensic science, agriculture, ecology, sustainability)
11. 1 Describe the benefits of a case study approach to teaching
12. 1 Align biology content with specific K-6 (e.g. NGSS) science standards 1 Design an instructional case study (complete with teaching notes and assessment) to address specific K-6 science standards

BIOL 566. Advanced Bioinformatics and NCBI Database**3 Credits (3)**

The course discusses how to use NCBI database and bioinformatic tools for research with genomics approaches. The topics include nucleotide and protein sequence analysis, similarity search with blast algorithms, gene/genome annotation, protein structure analysis, gene expression analysis, and metagenomic study. Consent of Instructor required.

BIOL 568. Communities and Ecosystems**3 Credits (3)**

Community ecology is an interdisciplinary field that integrates numerous theories, concepts, and methods to study the patterns and dynamics of biotic assemblages. Because biotic groups affect the biogeophysical and biogeochemical processes that govern Earth system functioning, community ecology also plays an increasingly large role in the study of ecosystem ecology, a discipline which seeks to understand the processes governing nutrient and energy flow across the Earth system. This course will explore the theories and methods for study of biodiversity, biogeography, and community assembly, as well as the pathways through which communities exert influence on ecosystem functioning. Topics will also include evolutionary influences on communities, the integration of community ecology into conservation and land management, and community ecology in an era of rapid environmental change.

BIOL 572. Advanced Primate Behavior and Ecology**3 Credits (3)**

Advanced review of non-human primate social behavior and ecology. Crosslisted with: ANTH 572.

BIOL 577. Advanced Topics in Environmental Microbiology**3 Credits (3)**

This course is based on current literature in Environmental Microbiology, and is a seminar-style, discussion-based class. Topics typically include marine microbiology, ancient DNA and the human microbiome.

Prerequisite(s): Consent of instructor.

BIOL 581. Physiology of Animals**3 Credits (3)**

Comprehensive treatment of integrative physiology of animals, emphasizing tissues, organ systems, and regulatory control, including neuroendocrine function, circulation, respiration, and excretion. Term paper required. BIOL 2610G, BIOL 377 recommended.

Prerequisite: BIOL 2110G.

BIOL 582. Advanced Plant Signalling and Development**3 Credits (3)**

This is a course that introduces plant signalling pathways and their role in development to students. The lectures are structured to facilitate in-class discussions on the current state and future directions in this field. Topics will cover a wide range of biological questions and the methods used to study them. May be repeated up to 3 credits.

Prerequisite(s): BIOL 305 or GENE 315, and MATH 1220G.

BIOL 587. Behavioral and Evolutionary Ecology**3 Credits (3)**

This course will investigate the causes and consequences of phenotypic variation and the adaptive value of phenotypic traits.

BIOL 590. Neuroscience**1-3 Credits**

Detailed examination of the principles underlying nervous system organization and function. Emphasis on recent advances in multidisciplinary, integrated approaches to study the nervous system. May be repeated up to 9 credits.

BIOL 598. Special Research Programs**1-9 Credits**

Individual investigations either analytical or experimental.

BIOL 599. Master's Thesis**15 Credits**

Thesis.

BIOL 600. Doctoral Research**1-15 Credits**

Research.

BIOL 610. Seminar**1-3 Credits (1-3)**

Oral presentation and discussion of journal articles and ongoing research projects. May be repeated up to 6 credits. Graded: S/U Grading (S/U, Audit).

BIOL 612. Microbiology Seminar**1 Credit (1)**

Seminar to aid graduate students in assessment and presentation of classical and current topics in microbiology.

BIOL 697. University Teaching Experience**1-3 Credits**

Certain graduate students will be permitted to teach up to one-third of one of the biology courses. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures.

BIOL 698. Selected Topics**1-3 Credits**

Selected topics for doctoral students.

BIOL 700. Doctoral Dissertation**15 Credits**

Dissertation.

BLAW-BUSINESS LAW

BLAW 2110. Business Law I**3 Credits (3)**

Survey of the legal environment of business and common legal principles including: the sources of law, dispute resolution and the U.S. court systems, administrative law, tort law, contract law, agency and employment law, business structure and governance, ethics and corporate social responsibility. Explores sources of liability and presents strategies to minimize legal risk. Offered at all NMSU Community Colleges except Dona Ana Community College. Credit may not be earned in both BLAW 2110 and BLAW 317.

Learning Outcomes

1. Describe the sources of law.
2. Describe and explain dispute resolution and the court systems in the United States.
3. Describe the concepts of negligence, intentional torts and strict liability.
4. Describe and apply the essential aspects of contracts from creation, performance, breach and remedies, including basic contract law from Article 2 of the Uniform Commercial Code.
5. Explain the concept of ethics.

BLAW 313. Sports and the Law**3 Credits (3)**

Introduction to legal concepts related to sports and business including an introduction to U. S. law and the civil practice, agency, sports contracts, sport torts, sport crimes, pertinent federal legislation such as Title IX, drugs and sports, international sports issues, pertinent antitrust issues, intellectual property, ethics and alternative dispute resolution.

Prerequisite(s)/Corequisite(s): BLAW 316.

BLAW 316. Legal Environment of Business**3 Credits (3)**

Survey of business law including: the legal system (court systems, sources and types of law, litigation and dispute resolution), ethics and corporate social responsibility, administrative law, tort law, contract law, agency and employment law, business structure and governance, securities regulations, and international law. Students may not receive credit for both BLAW 316 and BLAW 317.

BLAW 325. Real Estate Principles and Law I**3 Credits (3)**

Real estate law and the fundamental aspects of the real estate purchase transaction and the real estate lease agreement. Topics include real estate brokerage, marketing of real estate, fundamental legal aspects of real estate, present and future interests, air and water rights, methods of transfer, basics of financing and liens, and real estate leases. Same as BFIN 325.

BLAW 330. Entrepreneurial Law**3 Credits (3)**

This course will explore the legal issues faced in the process of launching, financing, and growing a new venture. We will pay special attention to ventures making use of innovative technologies and business models. Intellectual property (trade secrets and confidential information, patents, copyrights, and trademarks) are of special importance to innovation-driven ventures, so we will consider in- depth how intellectual property is developed, protected, and put to use.

BLAW 385V. Employment and Consumer Law**3 Credits (3)**

Study of the interrelationships between business, legal, and ethical aspects of employment and consumer issues and their attendant civil liability and remedies in domestic and international markets.

Learning Outcomes

1. Almost every aspect of today's businesses is subject to a myriad of legal requirements imposed by law (whether that law be civil or criminal, common or statutory, or regulatory). Legal issues lurk everywhere! To succeed in business, one must be aware of the major aspects of the substantive law and the nature of the legal system, and be able to communicate with the lawyers that he or she will likely come in contact with. Successful completion of this course will not qualify you to be a lawyer or to solve your own legal problems (or those of your business). Rather, this course will provide you with a broad overview of certain aspects of the law that you may encounter in your day-to-day business (or personal) affairs (some of the subjects covered in a chapter in this course are semester-long courses in law school, so this course necessarily is somewhat of a "survey" of the topics covered). Successful completion of the course should provide you with sufficient knowledge to recognize when "legal" issues in consumer protection are looming, and provide you some tools to assist you in seeking the right help to address the issues. Students taking this course will better understand the American legal system, with an emphasis on administrative law, since most consumer protection regulations are a creature of administrative law. Secondly, students will master the scope of several consumer protection agencies, their respective roles and responsibilities, and the associated obligations of businesses and consumers to comply with the various agency rules and regulations. Third and finally, interspersed throughout the semester student will learn about select topics they choose that have some relationship to consumer protection. This is student guided, and can be anything of interest to you. In the past, I have covered landlord-tenant law, intellectual property, state lemon laws, election law, and employment law.

BLAW 418. Uniform Commercial Code and Advanced Business Law Topics**3 Credits (3)**

Property, advanced contract law, debtor-creditor relations, bankruptcy and Uniform Commercial Code topics, including sales, negotiable instruments, secured transactions. Students who have taken BLAW 318 may not receive credit for BLAW 418.

Prerequisite(s): BLAW 316.

BLAW 430V. American Indian Law and Policy**3 Credits (3)**

Explores the principles, doctrines, and texts governing the legal relations between the United States and Indian tribes, the history of federal Indian law and policy, tribal property, treaty rights and sovereignty, congressional plenary power, the trust doctrine, jurisdiction in Indian country, and tribal government. Topic specifically examined in the course include tribal lawmaking powers, gaming and economic development in Indian country, protection of Indian religious rights and cultural property, water rights, fishing, hunting and other treaty-based rights.

BLAW 490. Selected Topics**1-3 Credits**

Prerequisites vary according to the seminar being offered.

BLAW 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head.

Prerequisites: junior or above standing and consent of instructor and department head.

BLAW 502. Legal Environment of Business**3 Credits (3)**

Legal procedures and the judicial system as applied to business situations and a general coverage of the bodies of substantive law most commonly associated with business.

Prerequisite: graduate students only.

BLAW 518. Uniform Commercial Code and Advanced Business Law Topics**3 Credits (3)**

Property, advanced contract law, debtor-creditor relations, bankruptcy and Uniform Commercial Code topics, including sales, negotiable instruments, secured transactions. Students who have taken either BLAW 318 or BLAW 418 may not receive credit for BLAW 518. Same as BLAW 418 with differentiated assignments for graduate students.

Prerequisite(s): BLAW 316 or BLAW 502.

BLAW 527. Negotiation and Business Dispute Resolution**3 Credits (3)**

Focus on learning tactics related to conflict resolution skills and negotiation theory. Also the use of quantitative methods and their realistic application in resolving disputes. Students will participate in numerous role playing activities and simulated mediation games. Same as MGMT 527.

BLAW 530. American Indian Law and Policy**3 Credits (3)**

This course is divided into two major parts: an historical survey of federal Indian law and policy, and selected topics focusing on contemporary federal Indian law and policy issues and problems. This course assumes that the students have not had any law courses and approaches the topic of the history of federal Indian law and policy from various multidisciplinary and interdisciplinary perspectives.

BLAW 550. Selected Topics**3 Credits (3)**

Seminars in selected topics related to business law or the legal environment of business.

Prerequisite(s): Varies according to seminar being offered.

BLAW 598. Special Research Programs**1-3 Credits**

Individual investigations either analytical or experimental with the prior consent of the instructor and department head.

Prerequisite: consent of instructor and department head.

BLED-BILINGUAL EDUCATION

BLED 1110. Introduction n Bilingual Education/ESL**3 Credits**

An overview of the American Education system with emphasis on organization, governance, law, demographics, and professional practice. Will include supervised experience in bilingual education/ESL elementary settings for prospective bilingual education/ESL teachers.

Learning Outcomes

1. Complete 24 hours field observations in a classroom.
2. Articulate the attributes of an education professional entering the field.
3. Construct an individualized map to teacher licensure in the State of New Mexico.
4. Differentiate and summarize the major educational philosophies and historical events that have influenced the progression of educational practice.

BLED 2110. Bilingual Methods**3 Credits (3)**

This course provides a historical overview of bilingual and ESL education including an emphasis on present trends and practices. Discussions of the aspects of bilingualism at both an individual and a societal level are included.

Learning Outcomes

1. (Culture) Develops awareness in the learner of the value of cultural diversity.
2. (Culture) Prepares and assists students to interact successfully in cross cultural settings.
3. (Culture) Recognizes and accepts different patterns of child development within and between cultures in order to formulate realistic instructional strategies.
4. (Culture) Recognizes the similarities and differences between mainstream American and other cultures and the potential conflicts and opportunities they may create for students.
5. (Culture) Demonstrates knowledge of the effects of culture and socio-economic variables in learning styles.
6. (English Language Development) Demonstrates knowledge of the basic nature of language, language acquisition, language variation, language change, and the relation of language to society and culture.
7. (English Language Development) Demonstrates knowledge of the nature of bilingualism and the process of becoming bilingual.
8. (Instructional Methodology) Demonstrates knowledge of the historical, legal, theoretical, and sociological foundations of programs of instruction for second language learners.
9. (Instructional Methodology) Demonstrates knowledge of theories of first and second language acquisition.
10. 1.(Instructional Methodology) Utilizes teaching methods appropriate to various age and language groups.

bled 303. Secondary Bilingual/ESL Field Experience**3 Credits (2+2P)**

Develop professional skills, dispositions, and understanding of secondary bilingual youth, content, and pedagogy through discussion seminar and interactions with public education mentor teachers. Focused observations, study of classroom language and culture, introduction to lesson planning and student assessment. Requires 32 hours of practicum field experience. Same as EDUC 381. May be repeated up to 3 credits. Crosslisted with: EDUC 381.

Learning Outcomes

1. Complete 32 hours of secondary classroom and professional development practicum with a satisfactory rating (0 average) from middle/high school cooperating teacher.
2. Apply Costa's Level of Thinking, WICOR strategies, Cornell Notes, and other high-yield strategies of the AVID College Readiness System.
3. Interact with youth through a tutoring model.
4. Demonstrate ability to effectively utilize specific observation techniques in secondary classrooms following specific guidelines.
5. Describe classroom language and culture of middle/high school.
6. Develop an understanding of resources available at the secondary level.
7. Identify authentic assessment and instructional methods that can be used to deliver engaging lessons in specific content areas.
8. Participate in a weekly discussion seminar.
9. Assemble a culminating reflective portfolio that demonstrates the ability to self-assess strength and need areas based on NM Teach InTASC standards and experiences in the classroom/professional development.

bled 342. Sheltered English Instruction for the ESL Classroom**3 Credits (3)**

Addresses the acquisition of English proficiency by speakers of other languages. May be repeated up to 3 credits. Crosslisted with: BLED 542.

Learning Outcomes

1. Discuss sheltered instruction for teaching English learners (ELs).
2. Compare and contrast SIOP model lesson components and features.
3. Co-Design a grade-level and subject-specific SIOP lesson with a peer.
4. Correlate components of your prepared lesson plan to ensure alignment.
5. Co-Implement your SIOP lesson in class.
6. Evaluate two lessons (yours and another lesson developed by two other peers).

bled 343. Language, Literacy, and Culture in the ESL Classrooms**3 Credits (3)**

Framework and strategies for developing the written abilities of second language learners. May be repeated up to 3 credits. Crosslisted with: BLED 543.

Learning Outcomes

1. Build an online learning community.
2. Demonstrate an understanding of various perspective and theories on language, culture, and literacy.
3. Demonstrate an understanding of the impact that federal and state language/literacy policies have had on schools.
4. Evaluate the major arguments articulated and varying positions taken about language, literacy, and culture by scholars from different disciplines, such as Sociolinguistic, Linguistics, Sociology, Cultural studies.
5. Analyze social, political, and ideological aspects/components of these concepts, perspectives, and theories.
6. Explain the interaction between literacy, language, culture, and its implication for student learning.
7. Apply the theories of language, culture, and literacy they are learning in classroom practices.
8. Demonstrate critical thinking skill

bled 344. Issues in Schooling for Bilingual Learners**3 Credits (3)**

Current thought and direction regarding bilingual education in the United States and New Mexico. May be repeated up to 3 credits.

BLED 355. Bilingual/Multicultural Special Education**3 Credits (3)**

The Special Education component in TPAL develop educational professionals who facilitate learning and are responsive to diverse and changing environments. The aim of the Sped component is to ensure that its students have opportunities to become creative and critical thinkers who can make appropriate decisions relative to their professional roles and responsibilities. Graduates will possess broad general education and content area knowledge, be effective and reflective practitioners, problem – solvers, apply innovative learning technologies and participate in opportunities for professional growth. Through its efforts, the component seeks to empower its graduates by enabling them to acquire the knowledge, skills, and dispositions that will allow them to excel in their instructional, clinical, or administrative responsibilities. Crosslisted with: SPED 355.

Learning Outcomes

1. This course is an introduction to issues related to the provision of services when dealing with culturally and linguistically diverse (CLD) students with exceptionalities in a multicultural context.
2. The term "bilingual special education" continues to evolve.
3. The literature defines it as the use of students' home language and culture, along with English, in an individually designed program of instruction for students who have been recommended for special education classrooms (Baca Cervantes, 1989; Carrasquillo, 1990).
4. To provide an appropriate educational context for culturally and linguistically diverse (CLD) students with disabilities, teachers need a theoretical and methodological foundation in bilingual education as well as special education.

BLED 483. Second Language Acquisition**3 Credits (3)**

Exploring affective, cultural, linguistic, cognitive factors that influence the second language acquisition process with application to classroom practice. May be repeated up to 3 credits. Restricted to: TEP: EED, ECED, SED and SPED majors.

BLED 489. Topics**3 Credits (3)**

Course subtitled in the Schedule of Classes. May be repeated three times for a maximum of 9 credits.

BLED 504. Adult and Family Literacy in TESOL**3 Credits (3)**

An exploration of the theoretical, programmatic, and curricular frameworks for English language learners and their families. Focus on the development of culturally responsive and pedagogically sound literacy programs. Same as RDG 504. May be repeated up to 3 credits.

Learning Outcomes

1. Examine the assumptions underlying the common practices of family and adult education that predominate in schools and in public discourse. Plan and conduct an adult and family literacy project by expanding the range of family literacies to include those practiced in non-mainstream cultural groups, as well as to include those literacies that are necessary in order to be able to participate fully in building a democratic society. Develop research questions, collect data from the adult and family literacy sessions, and write a Family Literacy Research Project. Develop an advocacy plan for policy makers and administrators based on your work with adults and families.

BLED 505. The Bilingual Preschool Child**3 Credits (3)**

Principles of multicultural education applied to preschool and primary levels. Focus on issues, methods, and materials.

BLED 520. Issues in Schooling for Bilingual Learners**3 Credits (3)**

Identification and consideration of current thought and directions in bilingual education, nationally and internationally. May be repeated up to 3 credits.

Learning Outcomes

1. To create a framework for understanding issues facing bilingual learners with scrutiny toward social justice.
2. To review and study the various theories that informs bilingual education
3. To explore the classroom practice of these theories with bilingual learners
4. To co-construct practical teaching strategies to use with bilingual learners
5. To reflect on the socio/politico-cultural constructs and contexts of bilingual learners

BLLED 522. Literacy-Language Instruction for Bilingual Students**3 Credits (3)**

Framework and strategies for developing the written language abilities of bilingual learners, with attention to the interrelationships among reading, writing, and oral language. May be repeated up to 3 credits. Crosslisted with: RDG 522.

Learning Outcomes

1. The number of linguistically and culturally diverse students is increasing every year in the U.S. school system.
2. Such an increase has multiplied the responsibilities of teachers, particularly those working with diverse groups of students.
3. This increase has also created an urgent need to properly train and support in-service and pre-service teachers, so that they can meet the literacy, linguistic, and educational needs of these students—many of whom often do not develop academic language and literacy skills in their first language that can be transferred to content area studies in English.
4. Indeed, many are often illiterate in their first language prior to starting school in the U.S.
5. For this category of students, exponentially more time and effort is required to help them develop the language and literacy skills needed to grow academically.

BLLED 542. Sheltered English Instruction for the ESL Classroom**3 Credits (3)**

Addresses the acquisition of English proficiency via the SIOP (Sheltered Instruction Observational Protocol) a research validated model for lesson planning and implementation that provides English learners with access to grade-level standards.

Learning Outcomes

1. Discuss sheltered instruction for teaching English learners (ELs).
2. Compare and contrast SIOP model lesson components and features.
3. Co-Design a grade-level and subject-specific SIOP lesson with a peer.
4. Correlate components of your prepared lesson plan to ensure alignment.
5. Co-Implement your SIOP lesson in class.
6. Evaluate two lessons (yours and another lesson developed by two other peers).

BLLED 543. Language, Literacy and Culture in the ESL Classrooms**3 Credits (3)**

Framework and strategies for developing the written abilities of second language learners. Explore different theories of language, culture and literacy by analyzing the interconnections between language, culture and literacy.

Learning Outcomes

1. Build an online learning community.
2. Demonstrate an understanding of various perspective and theories on language, culture, and literacy.
3. Demonstrate an understanding of the impact that federal and state language/literacy policies have had on schools.
4. Evaluate the major arguments articulated and varying positions taken about language, literacy, and culture by scholars from different disciplines, such as Sociolinguistic, Linguistics, Sociology, Cultural studies.
5. Analyze social, political, and ideological aspects/components of these concepts, perspectives, and theories.
6. Explain the interaction between literacy, language, culture, and its implication for student learning.
7. Apply the theories of language, culture, and literacy they are learning in classroom practices. 8- Demonstrate critical thinking skill

BLLED 545. Bilingual/Multicultural Schooling and Community Relations**3 Credits (3)**

Rationale, information pertinent to the school and the community in a setting involving economic, cultural, and linguistics diversity. May be repeated up to 3 credits.

Learning Outcomes

1. This course is designed as a space to enhance educators' understanding of bilingual/multicultural schooling and community relations in the borderland region as it relates to the rest of the US, with a view to rethinking their own role in order to become agents of change.
2. The main objective of this course is the development of a framework to understand, critique and contribute to the strengthening and critical transformation of school and community relations in the borderlands

BLLED 550. Internship in Bilingual Education IV**1-6 Credits**

Advanced experience in educational bilingual settings for prospective bilingual education teachers. May be repeated up to 6 credits.

Learning Outcomes

1. The Internship has traditionally meant that you will be involved in practicing what you have learned in a series of studies you have taken or are taking. In this course, we will cover topics and themes related to bilingual education

BLED 560. Selected Topics in Bilingual Education III**1-6 Credits**

Various topics on current requests and needs in bilingual education. Maximum of 6 credits. The Bilingual Exceptional Student 3 cr. Introduction to bilingual/multicultural special education. Same as SPED 561, SPED 661.

BLED 570. Directed Study in Bilingual Education III**1-6 Credits**

Independent research topics in bilingual education based on particular individual interest or needs.

BLED 583. Second Language Acquisition**3 Credits (3)**

Exploring affective, cultural, linguistic, cognitive factors that influence the second-language-acquisition process with application to classroom practice. May be repeated up to 3 credits. Crosslisted with: BLED 483.

Learning Outcomes

1. Explore different language perspectives as they relate to first second language acquisition
2. Explore the role of language across different social contexts and academic contexts
3. Explore the cognitive factors influencing language development in second language learning and acquisition
4. Examine culturally linguistically diverse styles of second language learners and how these factors influence the second language acquisition process
5. Explore, select and implement second language teaching methods.

BLED 584. Assessment in Culturally & Linguistically Responsive Teaching**1-3 Credits (1-3)**

An overview of approaches to assessment with a special focus on cultural and linguistic responsiveness needed for teaching learners of English as an additional language.

Learning Outcomes

1. Explore different approaches to assessment in cultural and linguistically diverse (CLD) settings
2. Explore authentic assessment by content areas for assessing CLD students
3. Explore assessment of English language development in CLD students
4. Examine culturally linguistically diverse styles of CLD students
5. Select Culturally and Linguistically responsive assessments for assessing content and language in CLD students

BLED 585. Sociolinguistics in Education**3 Credits (3)**

Course provides an overview of sociolinguistics, with emphasis on the study of the relationship between language and society. Explores both foundational and current issues as they relate to educational practice. Crosslisted with: RDG 530.

Learning Outcomes

1. The nature of reading and writing as socio-psycholinguistic processes including: Language, culture and politics and their relationships; The structure, forms and purposes of written language; What makes a text a text; Readers and writers as users of language. What that means; Written language in education and curriculum; Oral and written language development and their relationships; Alphabetic and non-alphabetic writing systems; Defining oneself as a literate person

BLED 587. Pedagogy of TESOL**3 Credits (3)**

Overview of approaches that provide for interactive, culturally responsive pedagogy for students acquiring English. Emphasis on content and language integration through sheltered instruction. May be repeated up to 3 credits.

Learning Outcomes

1. Understand and explore the foundations of TESOL instruction.
2. Analyze the sociocultural theory of teaching English as a second/foreign language.
3. Demonstrate an understanding of culturally responsive pedagogy in language teaching and academic achievement.
4. Evaluate principles of best practices instruction and applications of TESOL methods.
5. Explore assessment issues and concepts related to English Language Learners.
6. Examine the impact of policies, national laws, school and community partnerships, and personal professional development on TESOL instruction.
7. Develop, select, and implement second language teaching methods.

BLLED 616. Acquiring Emancipatory Discourses: TESOL/BIL**3 Credits (3)**

An elaboration of understandings of bi- and multilingualism and related models of education based on current research and practice. May be repeated up to 3 credits.

Learning Outcomes

1. This course is designed for participants to -deepen their critical understanding of the relationship between language and power and its relevance to educational studies -analyze critical discourses from different contexts, institutional settings, and social agents: major discourse theorists, educational researchers, teachers, and students -become familiar with Critical Discourse Analysis as a framework and a methodology to study the role of discourse in the construction of the social world and its relevance to teachers, students, and researchers in education

BLLED 617. Multiple Critical Literacies**3 Credits (3)**

An exploration of the multiple literacies that operate on the individual, classroom, community, cultural and societal levels. May be repeated up to 3 credits. Crosslisted with: RDG 617.

Learning Outcomes

1. This doctoral level course explores in depth various theories about literacy.
2. Placed in the bilingual and multicultural context, this course critically reviews and brings to the forefront key linguistic, educational, socio-economic, political, cultural, and racial issues related to literacy.
3. It goes on to unveil and carefully analyze various ideological forces informing multiple forms of literacy and the effects of these forces on student learning, teachers' teaching practices, and people's lives in general.

BLLED 621. Literacy / Biliteracy Assessment and Evaluation**3 Credits (3)****Learning Outcomes**

1. Literacy assessment and evaluation
2. Documenting student language and literacy development
3. Interpreting and analyzing your documentation/data
4. Generating and implementing appropriate, engaging and effective literacy instructions in order to meet children's interests and needs
5. Linguistics, psycholinguistics, sociolinguistics and their relationships
6. Readers and writers as users of language.
7. Relationships between reading, writing and text
8. Reading strategies and instructional implications
9. Kidwatching: documenting and analyzing literacy processes and events
10. 1 Miscue Analysis: Understanding and analyzing children's oral reading
11. 1 Defining oneself as a literate person

BLLED 623. Curriculum and Instructional Leadership**3 Credits (3)**

The purpose of this course is to examine the concepts of leadership and curriculum. This examination will focus on the dynamic relationships of these concepts in our society and their differentiated effects on diverse community groups. Our examination will lead us on a development and contributions. Crosslisted with: EDUC 623.

Learning Outcomes

1. To become well versed in those issues surrounding leadership and curriculum and their impact on various groups in society. To develop an understanding of how the interactions of leadership, curriculum, and multiculturalism impacts distribution of knowledge in our society. To develop an appreciation for the diverse representations of the concepts curriculum and leadership. To evolve an understanding of the interconnectedness of leadership, curriculum, multiculturalism, and people. For you to determine: A good leader-

BLLED 633. Praxis and Reflexivity**3 Credits (3)**

The cyclical research processes of continuous self and systemic (re)evaluation vis-a-vis classroom, community, and society with an eye toward reflection, growth, change, and larger forms of social agency. May be repeated up to 3 credits. Consent of Instructor required. Crosslisted with: ECED 633, EDLT 633, EDUC 633 and RDG 633.

Prerequisite(s): Consent of instructor.

Learning Outcomes

1. Thematic and theoretical explorations aimed at setting the path for your dissertation research
2. Theorization and the actualization of your own educational praxis and reflexivity as educators within this 'new world order', Therefore we will read, discuss and enact some theoretical and practical ideas by well-known and not so well-known thinkers and researchers who have been working on these issues for several years.

BLLED 635. Critical Theory and Pedagogy**3 Credits (3)**

The course will explore critical theory and pedagogy and its applications to everyday life, teaching and learning. Crosslisted with: EDUC 635.

Learning Outcomes

1. review, study and write about the history of critical theory and pedagogy.
2. become familiar with current research regarding critical theory and pedagogy and to gain knowledge and understanding of its application to teaching and learning.
3. create the opportunity to interact with peers and instructor regarding course topics.
4. begin to understand the why and not only the how and what of critical theory and its pedagogies.

BLLED 637. Social Justice Issues in Education**3 Credits (3)**

Students are introduced to social justice issues as they relate to education. In particular, we will seek to understand the interconnectedness and relationship between the social construction of inequity within education and the ways in which teachers, students, researchers and administrators grapple with such inequities. There will be an examination of historical and social injustices, social movements that seek to overcome these injustices, and contemporary work done by activists around the globe to cause transformation with such issues. Crosslisted with: EDUC 637.

Learning Outcomes

1. Define and describe key social justice concepts and principles in education,
2. Compose documents and reports while correctly utilizing American Psychological Association (APA) format,
3. Develop online resources for use in their work,
4. Critique and reflect upon diverse theoretical frameworks,
5. Utilize conceptual frameworks to analyze divergent theories in education, and
6. Apply information provided in this course to real-life situations.

BLLED 640. Internship in Bilingual Education**3 Credits (3)**

In this course you will apply your knowledge developed in prior coursework about the research, history, theories, policies, pedagogies, and practices in bilingual education. You will apply this knowledge in a bilingual internship setting where you will conduct your own research.

Learning Outcomes

1. The Internship has traditionally meant that you will be involved in practicing what you have learned in a series of studies you have taken or are taking.
2. In this course, we will cover research topics and themes related to bilingual education.

BLLED 670. Directed Study in Bilingual Education IV**1-6 Credits**

Independent research topics in bilingual education based on particular individual interest or needs. May be repeated up to 6 credits.

Learning Outcomes

1. In this course, we will cover research topics and themes related to bilingual education.

BMGT-BUSINESS MANAGEMENT

BMGT 112. Banks and Your Money**3 Credits (3)**

Banking in today's economy: language and documents of banking, check processing, teller functions, deposit function, trust services, bank bookkeeping, loans, and investments. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

BMGT 126. Retail Management**3 Credits (3)**

Phases of retailing, including types of retail outlets and basic problems of organizing and operating a retail store. Restricted to: Community Colleges only.

BMGT 132. Principles of Selling**3 Credits (3)**

Analysis of customer behavior, persuasive communication, process of the sales interview. Restricted to: Community Colleges only.

BMGT 136. Forecasting Business Activity**3 Credits (3)**

Course covers the important elements of forecasting all types of business activities including inventory control, revenue forecasts, staffing, and other industry specific activities using metrics and data analysis processes. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): BUSA 1110.

BMGT 138. Advertising**3 Credits (3)**

Psychological approach to non-personal consumer persuasion; applied techniques in media selection, layout mechanics, production methods, and campaign structures. Restricted to: Community Colleges only.

BMGT 140. Principles of Supervision I**3 Credits (3)**

Principles of supervision emphasizing planning, organization, rating of employees and procedures to develop good morale. Introduction to interpretation of case studies. Restricted to: Community Colleges only.

BMGT 150. Income Taxation**3 Credits (3)**

Federal income taxation of individuals, sole proprietorships, partnerships, corporations, trusts, and estates with particular reference to CLU, life insurance and annuities. Restricted to: Community Colleges only.

BMGT 155. Special Topics I**1-3 Credits (1-3)**

Introductory special topics of lower division level work that provides a variety of timely subjects and content material. May be repeated up to 9 credits. Restricted to Community Colleges campuses only.

BMGT 160. Self-Presentation and Etiquette**3 Credits (3)**

Introduction to business etiquette based on tradition, social expectations, and professional behavior standards. Restricted to: Community Colleges only.

BMGT 201. Work Readiness and Preparation**3 Credits (3)**

Instruction in methods of selection, seeking, acquiring and retaining employment. Addresses work success skills, business etiquette, employer expectation and workplace norms. Restricted to Community Colleges campuses only.

BMGT 205. Customer Service in Business**3 Credits (3)**

Establishes concepts of service quality in relationship to business success and maximization of returns to the organization. Explores techniques for delivering quality and service in a variety of business settings. Restricted to: Community Colleges only.

BMGT 208. Business Ethics**3 Credits (3)**

The course examines the underlying dimensions of ethics in business, investigating ethics in relationship to the organization, the stakeholders, and society. Exploration of ethical issues from a historical context, analyzing actual events through the lens of business decision making, including legal/political, sociocultural, economic, and environmental considerations will be undertaken. Restricted to Community Colleges campuses only.

BMGT 216. Business Math**3 Credits (3)**

Application of basic mathematical procedures to business situations, including percentage formula applications, markup, statement analysis, simple and compound interest, and annuities. Restricted to: Community Colleges only.

Prerequisite(s): CCDM 103 N or satisfactory math score on ACT.

BMGT 221. Internship I**1-3 Credits (1-3)**

Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and instructor. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: BMGT majors. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

BMGT 225. Introduction to Commercial Lending**3 Credits (3)**

Commercial lending overview, the lending process, portfolio management, and regulation and business development. Restricted to: Community Colleges only.

Prerequisite(s): BMGT 112.

BMGT 232. Personal Finance**3 Credits (3)**

Budgeting, saving, credit, installment buying, insurance, buying vs. renting a home, income tax statement preparation, investment, and estate disposal through will and trust. Restricted to: Community Colleges only.

BMGT 236. Small Business Start-Up**3 Credits (3)**

Starting a small business is a complex endeavor that requires specialized knowledge. This course prepares students to take the first step in business ownership and operations. Restricted to Community Colleges campuses

Learning Outcomes

1. Identify the unique challenges of starting a small business.
2. Identify opportunities to start up a business and conduct a needs analysis.
3. Develop value proposition/market fit for proposed products and services.
4. Develop an appropriate business model.
5. Identify the availability of necessary resources.

BMGT 237. Managing Small Businesses**3 Credits (3)**

Managing a small business requires the owner/operator to be proficient in a number of skills and technical areas. This course provides small business owners/operators with the training and essential knowledge to manage a small business. Restricted to Community Colleges campuses

Learning Outcomes

1. Identify the strengths and weaknesses of small businesses
2. Define entrepreneurship and identifying its traits
3. Demonstrate a capability to explore and research business opportunities
4. Explain how to plan to start a new business, identifying legal structures, financing options, and organizing a management team
5. Identify and analyze financial statements
6. Review the importance of management information systems
7. Identify their own managerial leadership style
8. Review purchasing and inventories, taxation and insurance
9. Describe the process of writing a business plan

BMGT 240. Human Relations**3 Credits (3)**

Human interactions in business and industrial settings. Motivation and learning experiences as related to problems of the worker and supervisor. Practical applications of human behavior. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

BMGT 247. Customer Relationship Management**3 Credits (3)**

The course addresses the application of positive customer relationship practices and demonstrates the connection between managing excellent customer experiences and business success. Customer related decision making processes through the use of data based decision matrices are introduced. Restricted to Community Colleges campuses

Learning Outcomes

1. Recognize and explain the concept of customer service.
2. Describe the basic factors in Customer Relationship Management (CRM).
3. Explain how technological tools can support CRM processes.
4. Discuss the impact of CRM on the marketing processes.
5. Describe how effectively using CRM techniques impacts customer satisfaction.
6. Demonstrate the use of data to make effective CRM decisions.

BMGT 250. Diversity in the Workplace**3 Credits (3)**

Concepts of culture, diversity, prejudice, and discrimination within the domestic workforce/society. Restricted to Community Colleges campuses only.

Prerequisite(s): BUSA 1110.

BMGT 272. E-Commerce Operations**3 Credits (3)**

Includes the many forms of e-commerce and emerging technologies that will impact the business of tomorrow. Restricted to Community Colleges campuses only.

Prerequisite(s): OECS 105 or BCIS 1110.

BMGT 277. Entrepreneurship II - Small Business Management**3 Credits (3)**

This course is designed to acquaint the student with the opportunities encountered in the management and operations of a small business enterprise. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): ENTR 1110.

BMGT 280. Introduction to Human Resources**3 Credits (3)**

Personnel functions encompassing job analysis, recruitment, selection, training, appraisals, discipline, and terminations. Prerequisite(S): BUSA 1110 or B A 104. Restricted to Community Colleges campuses only.

BMGT 282. Introduction to International Business Management**3 Credits (3)**

Overview of the social, economic and cultural environment of international business transactions. Restricted to Community Colleges only.

Prerequisite(s): BUSA 1110.

BMGT 285. Introduction to Manufacturing Operations**3 Credits (3)**

Introduction to issues related to manufacturing, including an overview of the production function, product design and development, location, layout, forecasting, planning, purchasing, materials/inventory, and quality management. Restricted to Community Colleges campuses only.

Prerequisite(s): BUSA 1110 and (BMGT 140 or MGMT 2110).

BMGT 286. Introduction to Logistics**3 Credits (3)**

Overview on the planning, organizing, and controlling of transportation, inventory maintenance, order processing, purchasing, warehousing, materials, handling, packaging, customer service standards, and product scheduling. Restricted to: Community Colleges only.

BMGT 287. Introduction to Export/Import**3 Credits (3)**

Procedures and documentation for exporting and importing products. Emphasis on NAFTA regulations and other U.S. border operations crossings. Restricted to Community Colleges only.

Prerequisite(s): BUSA 1110.

BMGT 290. Applied Business Capstone**3 Credits (3)**

Refines skills and validates courses taken in BMGT program. Business simulations, case studies and projects used to test and improve business practices. Student must be within 25 credits of graduation. Restricted to: BMGT majors. Restricted to Community Colleges campuses only.

Prerequisite: BUSA 1110, and (BMGT 140 or MGMT 2110), and (BMGT 240 or SOCI 1110G or PSYC 1110G), and MKTG 2110.

Learning Outcomes

1. Plan, design, and create a real world project related to their field of study. Participate in job shadowing in positions related to their field of study. Create a portfolio in preparation for career applications. Collaborate as a member of a team in their field of study. Identify and use ethical decision-making in working on individual projects, job shadowing, and a team.

BMGT 298. Independent Study**3 Credits (3)**

Individual studies directed by consenting faculty with prior approval of department chair. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): Sophomore standing with 3.0 GPA.

BOT-BUSINESS OFFICE TECHNOLOGY

BOT 298. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with prior approval of department head. May be repeated for a maximum of 3 credits.

Prerequisite: sophomore standing with 3.0 GPA.

BUSA-BUSINESS ADMINISTRATION

BUSA 1110. Intro to Business

3 Credits (3)

Fundamental concepts and terminology of business including areas such as management, marketing, accounting, economics, personnel, and finance; and the global environment in which they operate.

Learning Outcomes

1. Explain how business and entrepreneurship affect the quality of life and the world around us.
2. Explain the characteristics of the different forms of business ownership.
3. Perform basic stakeholder analysis concerning accountability, ethics and social responsibility of business.
4. Demonstrate knowledge of the various dimensions of the business environment including political and legal, socio-cultural, environmental, diversity, economic, technological, and global.
5. Describe the purpose and functions of finance, operations, marketing, management, accounting, and information systems.
6. Demonstrate basic skills such as use of common business terminology, information search skills, presentation and writing skills, and team skills.

C E-CIVIL ENGINEERING

C E 109. Computer Drafting Fundamentals

3 Credits (2+2P)

Same as DRFT 109, E T 109, SUR 109.

C E 151. Introduction to Civil Engineering

3 Credits (3)

Problem solving and use of computer software for civil engineering applications. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 1220G.

C E 198. Special Topics

1-3 Credits

May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

C E 233. Mechanics-Statics

3 Credits (3)

Engineering mechanics using vector methods. May be repeated up to 3 credits.

Prerequisite(s): MATH 1521G or MATH 1521H, PHYS 1310G and cumulative GPA of 2.0.

C E 234. Mechanics-Dynamics

3 Credits (3)

Kinematics and dynamic behavior of solid bodies utilizing vector methods. May be repeated up to 3 credits. Crosslisted with: M E 234.

Prerequisite(s): C E 233, MATH 1521G or MATH 1521H, PHYS 1310G.

C E 256. Environmental Engineering and Science

3 Credits (3)

Principles in environmental engineering and science: physical chemical systems and biological processes as applied to pollution control. Crosslisted with: ENVS 2111

Prerequisite: CHEM 1215G and MATH 1511G or ENGR 190.

Learning Outcomes

1. To understand the nature of water quality parameters in the context of Civil Engineering and Environmental Science (Water Treatment/Wastewater Treatment/Environmental Science) To learn to apply engineering and scientific solutions to water quality problems To understand environmental regulations and their consequences on the design of pollution control systems

C E 256 L. Environmental Science Laboratory

1 Credit (1P)

Laboratory experiments associated with the material presented in C E 256. Same as ENVS 2111L.

Corequisite(s): C E 256.

C E 298. Special Topics

1-3 Credits

May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

C E 301. Mechanics of Materials**3 Credits (3)**

Stress, strain, and elasticity of materials. May be repeated up to 3 credits.

Prerequisite(s): C E 233 or M E 236.

C E 311. Civil Engineering Materials**3 Credits (2+3P)**

Introduction to the structure, physical properties, testing and mechanical behavior of civil engineering materials and components made from these materials.

Prerequisite: C E 301.

C E 315. Structural Analysis**4 Credits (3+3P)**

Classical analysis of determinate and indeterminate structures; introduction to modern methods of structural analysis using computer programs.

Prerequisite(s): C E 301.

C E 331. Fluid Mechanics and Hydraulics**3 Credits (3)**

Fluid Mechanics and Hydraulics. Fundamentals and theory of fluid mechanics, compressible fluids, flow of incompressible fluids in open and closed conduits. Restricted to: CE majors.

Prerequisite(s): PHYS 1310G, C E 233.

C E 331 L. Fluid Mechanics and Hydraulics Laboratory**1 Credit (1P)**

Fundamentals and Theory of Fluid Mechanic, compressible and incompressible flow of fluids in open and closed conduits.

Prerequisite(s)/Corequisite(s): C E 331. Restricted to: C E majors.

C E 355V. Technology and the Global Environment**3 Credits (3)**

A scientific basis for understanding changes in the global environment that result through the complex interactions of natural phenomena and the impacts of the activities of man.

Prerequisites: junior or senior standing, and the general education requirements for math and natural sciences.

C E 356. Fundamentals of Environmental Engineering**3 Credits (3)**

Introduction to water treatment and water pollution and the analysis and design of selected treatment processes.

Prerequisite(s): C E 256.

C E 357. Soil Mechanics**3 Credits (2+3P)**

Engineering properties of soils, consolidation settlement, compaction, water flow through soils, geostatic stresses, soil shear strength, lateral earth pressure, and soil laboratory testing.

Prerequisite(s): C E 160 or GEOL 1110G, and C E 301.

C E 382. Hydraulic and Hydrologic Engineering**3 Credits (3)**

Analysis and design of hydraulic systems, including pipe networks, open channels, regulating structures, and pumping systems. Surface water and groundwater hydrology, analysis and design. May be repeated up to 3 credits.

Prerequisite(s): C E 331 and C E 331 L.

C E 398. Special Topics**1-3 Credits**

May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

C E 435. Technical Communication for Engineers**3 Credits (3)**

The course addresses the fundamentals of communicating technical information that is clear, concise, and concrete to a wide variety of stakeholder types.

Learning Outcomes

1. Ability to write in a way that is clear. Ability to write in a way that is concise. Ability to write in a way that is concrete.

C E 444. Elements of Steel Design**3 Credits (3)**

Analysis and design of tension members, beams, columns, and bolted and welded connections.

Prerequisite(s)/Corequisite(s): C E 311. Prerequisite(s): C E 315.

C E 445. Reinforced Concrete Design

3 Credits (3)

Design and mechanics of structural reinforced concrete members.

Prerequisite(s)/Corequisite(s): C E 311. Prerequisite(s): C E 315.

C E 452. Geohydrology

3-4 Credits (3+1P)

Origin, occurrence, and movement of fluids in porous media and assessment of aquifer characteristics. Development and conservation of ground water resources, design of well fields. Crosslisted with: ENVS 452 and GEOL 452.

Prerequisite(s): Junior or Senior.

C E 454. Wood Design

3 Credits (3)

Theory and design of wood structural members and systems subjected to gravity and lateral loads. Taught every other year, alternates with C E 455, Masonry Design.

Prerequisite(s)/Corequisite(s): C E 311. Prerequisite(s): C E 315.

C E 457. Foundation Design

3 Credits (2+3P)

Application of principles of classical soil mechanics to the design of shallow and deep foundations, and the fundamentals of geotechnical site investigation.

Prerequisite(s): C E 357.

C E 460. Site Investigation

3 Credits (2+2P)

Investigation and characterization of surficial and subsurface geologic materials and ground water for civil engineering projects. Includes exploration program, drilling and sampling, rock and soil classification and logging, groundwater monitoring, profiles, and preparation of geotechnical reports.

Prerequisite(s): C E 357.

Prerequisite(s)/Corequisite(s): C E 457.

C E 469. Structural Systems

3 Credits (3)

Design of structural systems for buildings and bridges. May be repeated up to 3 credits.

Prerequisite(s): C E 444 or C E 445.

C E 470. Design of Municipal and Hazardous Waste Landfills

3 Credits (3)

Solid waste and application of geotechnical engineering principles and methods to the site selection and design of municipal and hazardous waste landfills.

Prerequisite(s): C E 357 and C E 452, or consent of instructor.

C E 471. Transportation Engineering

3 Credits (3)

Highway and traffic design and systems. Students must be in junior or senior standing to enroll.

Prerequisite: MATH 1521G.

Learning Outcomes

1. Provide understanding of the principles of transportation engineering with a focus on highway engineering and traffic analysis Provide basic skill set that will allow a student to address most of the transportation problems that are likely to appear in professional practice and on the Fundamentals of Engineering exam (FE) and the Principles and Practice of Engineering exam (PE) Provide foundation for future coursework in transportation should a student wish to pursue further coursework in the field

C E 477. Engineering Economics and Construction Management

3 Credits (3)

Engineering economics, construction and project management.

Prerequisite/Corequisite: C E 357.

Learning Outcomes

1. Understand time value of money and be able to perform economic analyses on engineering problems to determine whether a given project is worthwhile or to prioritize multiple alternatives based on present worth. Understand the mathematical and ethical implications of benefit/cost and internal rate of return analyses Estimate durations and requirements of individual construction tasks Develop construction schedules using Critical Path Method (CPM) Analysis Understand the legal and ethical concerns involved in economic analysis and construction engineering.

C E 479. Pavement Analysis and Design**3 Credits (3)**

Covers stresses and deflections in pavement layers, material characterization, flexible and rigid pavement design by AASHTO, and rehabilitation concepts.

Prerequisite(s): C E 357.

C E 481. Civil Engineering Capstone Design**3 Credits (3)**

Culminating multidisciplinary project-oriented capstone design. Ethics, professional development, global issues.

Prerequisite(s)/Corequisite(s): C E 457, C E 471, C E 477. **Prerequisite(s):** C E 356, C E 382, and either C E 444 or C E 445.

C E 482. Hydraulic Structures**3 Credits (3)**

Engineering design of water-regulating structures. Capstone design course. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): C E 477. **Prerequisite(s):** C E 382.

C E 483. Surface Water Hydrology**3 Credits (3)**

Hydrologic cycle and relationships between rainfall and surface water runoff.

Prerequisite: C E 331 or consent of instructor.

C E 485. Design of Earth Dams**3 Credits (3)**

Engineering design applied to site selection, foundation inspection and treatment, hydrology and hydraulics, stability, and seepage analysis. Economic and environmental factors. May be repeated up to 3 credits.

Prerequisite(s): C E 357, C E 382.

C E 497. Senior Seminar**1 Credit (1)**

Selected topics on the civil engineering profession and orientation for professional practice. Preparation for the FE exam. Students must be able to submit their application for degree while enrolled in this course.

Learning Outcomes

1. Prepare students for professional and ethical aspects of employment or graduate studies.

C E 498. Special Topics**1-3 Credits**

May be repeated for a maximum of 9 credits.

Prerequisite: consent of department head.

C E 501. Advanced Mechanics of Materials**3 Credits (3)**

Study of stress and strain in two and three dimensions, theories of failure, stress concentrations, unsymmetrical bending, curved beams, beams on elastic foundations, column theories, torsion, thick-wall cylinders. Same as M E 501.

Prerequisites: C E 301, MATH 392.

C E 502. Advanced Mechanics of Steel Structures**3 Credits (3)**

Advanced structural mechanics applicable to steel structures. Includes inelastic behavior, plastic analysis, column and frame stability and torsion.

Prerequisite: C E 444.

Learning Outcomes

1. Introduce students to advanced topics in structural mechanics of steel structures that are commonly encountered in structural engineering Provide the background needed to understand the code requirements applicable to problems in plastic design of steel structures

C E 503. Special Design and Analysis Program**3-6 Credits**

Design and analysis covering subject matter of an approved 450 undergraduate departmental course plus an additional report or project. Course may be subtitled in the Schedule of Classes. May be repeated once for a total of 6 credits.

Prerequisite: consent of instructor/committee.

C E 504. Advanced Engineering Design**3 Credits (3)**

Advanced engineering design covering subject matter of a selected capstone undergraduate design course plus an additional report or project. May be subtitled.

Prerequisite: consent of instructor/committee.

C E 506. Advanced Soil Mechanics**3 Credits (3)**

Stress and strain analyses in soil, stress paths; drained and undrained shear strengths of granular soils and clays, consolidation, liquefaction, soil improvement.

Prerequisite: C E 457 or consent of instructor.

C E 507. Design of Earth Retaining Structures**3 Credits (3)**

Lateral earth pressure theory, soil-reinforcement interaction, and analysis and design of rigid and flexible earth retaining structures for support of fills and excavations, including retaining walls, mechanically stabilized earth (MSE) walls, sheet pile walls, anchored walls, tiebacks and soil nailing.

Prerequisite(s): C E 357.

Prerequisite(s)/Corequisite(s): C E 457.

C E 508. Advanced Soil Behavior**3 Credits (3)**

The course covers particle-scale phenomena that govern the macro-scale behavior of soils. Topics covered in the class include classical concepts as well as contemporary advances in soil mechanics. The students will develop a fundamental understanding of soil-water interaction, theories of contact level deformation, and mass and energy transport through granular media. Consent of Instructor required.

Prerequisite(s): C E 357 or Instructor Consent.

C E 509. Deep Foundations**3 Credits (3)**

Behavior, analysis and design of pile and pier foundations subjected to axial and lateral loads.

Prerequisite: C E 457 or consent of instructor.

C E 510. Introduction to Nondestructive Testing**3 Credits (3)**

This course explores the application of different Nondestructive Testing (NDT) methods in material characterization and product qualification.

Prerequisite(s): C E 311 or CHME 361 or Consent of Instructor.

C E 514. Numerical Methods in Civil Engineering**3 Credits (3)**

Mathematical, numerical, and programming foundations of applied numerical methods with a focus on Civil and Environmental Engineering applications using MATLAB.

Learning Outcomes

1. To provide necessary background and skills to use MATLAB as a programming language for engineering problem solving. To introduce classical and some modern methods for civil engineering numerical problem solving. Develop numerical algorithms and programs for solving civil engineering problems involving: (1) multi-dimensional integration, (2) multivariate differentiation, (3) ordinary differential equations, (4) partial differential equations, (5) optimization (6) parameter estimation methods such as linear and nonlinear least square methods.

C E 515. Finite Element Methods**3 Credits (3)**

Introduces the finite element method. Topics may include beam, frame, plane stress, plane strain, axisymmetric, and 3-D stress elements. Includes static and dynamic analysis. Uses readily available finite-element software.

Prerequisite: graduate standing or consent of instructor.

C E 531. Open Channel Hydraulics**3 Credits (3)**

Theoretical and applied hydraulics of open channels, with emphasis on nonuniform flow, rapidly varied flow, and wave formation.

Prerequisite: C E 382 or consent of instructor.

C E 535. Technical Communication for Engineers**3 Credits (3)**

The course addresses the fundamentals of communicating technical information that is clear, concise, and concrete to a wide variety of stakeholder types. Same as C E 435 with differentiated assignments for graduate students.

Learning Outcomes

1. Ability to write in a way that is clear Ability to write in a way that is concise Ability to write in a way that is concrete

C E 544. Advanced Design of Steel Structures**3 Credits (3)**

Connection design; beam-column analysis and design; composite construction; and plate girder design.

Prerequisite: C E 444.

Learning Outcomes

1. Introduce students to advanced topics in steel design that are commonly encountered in structural engineering Provide the background needed to practice structural steel design Provide the background needed to understand the code requirements applicable to difficult problems in structural steel design

C E 545. Advanced Concrete Design**3 Credits (3)**

Advanced topics in ultimate strength design of reinforced concrete that include: concrete footings, retaining structures, short and long columns, torsion members, deep beams and shear walls, two-way slabs, and shear and moment transfer at slab-column connections.

Prerequisites: C E 445.

Learning Outcomes

1. Introduce students to advanced topics in reinforced concrete design that are commonly encountered in structural engineering Provide the background needed to practice structural concrete design Provide the background needed to understand the code requirements applicable to difficult problems in structural concrete design

C E 547. Bridge Engineering**3 Credits (3)**

Topics related to prestressed concrete, reinforced concrete and steel bridge design according to the AASHTO specifications; bridge analysis and evaluation.

Prerequisite: C E 444 or C E 445.

Learning Outcomes

1. Introduce students to topics in bridge design that are commonly encountered in structural engineering Provide the background needed to understand the code requirements applicable to problems in bridge design

C E 554. Wood Design**3 Credits (3)**

Theory and design of wood structural members and systems subjected to gravity and lateral loads. Design project required. Taught every other year, alternates with C E 555 - Masonry Design.

C E 557. Water Resources Development**3 Credits (3)**

Students function as members of a consulting panel and prepare reports on major water resources development problems. Political, financial, and social aspects of water resources development are considered as well as scientific and technical details.

C E 571. Structural Dynamics**3 Credits (3)**

Response of elastic structure to dynamic loading. Moving load, earthquake and blast loading.

Prerequisite: ENGR 234 and C E 315.

Learning Outcomes

1. Introduce students to topics in structural dynamics that are commonly encountered in structural engineering Provide the background needed to understand the code requirements applicable to problems in seismic and blast-resistant design

C E 572. Earthquake Engineering**3 Credits (3)**

Earthquake characteristics; seismic loads; elastic and inelastic response; analysis and design of buildings for earthquakes.

Prerequisites: graduate standing and consent of instructor.

C E 579. Ground Improvement**3 Credits (3)**

The objective of this course is to introduce common ground improvement techniques, including mechanical (compaction, soil reinforcement, preloading and accelerated consolidation) and chemical (cementing, ion-replacement, polymer bonding) stabilization methods, as well as seepage and dewatering. Emphasis will be placed on developing an understanding of the underlying physical and chemical processes involved in each case.

Prerequisite(s): C E 357.

C E 581. Ground Water Hydrology**3 Credits (3)**

Mathematical treatment of water flow in porous media. Emphasis on hydraulics of water movement, including pumping and recharge wells, drainage, and water quality.

Prerequisites: MATH 392, G EN 452, and C E 382, or consent of instructor.

C E 582. Statistical Hydrology**3 Credits (3)**

Application of statistical techniques to hydrologic data, including distributions, hypothesis testing, linear models, non-parametrics, and time-series and stochastic models. May be repeated up to 3 credits.

C E 585. Slope Stability Analysis and Design**3 Credits (3)**

Design of earth slopes, causes of instability, limit equilibrium methods, slope reinforcement (geosynthetics soil nailing, tiebacks), seismic analysis, rock slope stability. Consent of instructor required.

Learning Outcomes

1. Be familiar with the implications of drainage conditions and pore water pressure in the soil as they relate to soil shear strength and slope stability. Be able to recognize the differences between short-term and long-term analyses (total versus effective stress analyses) applied to slope stability. Be able to perform hand calculations of slope stability for very simple cases. Be familiar with the set of input data usually required to perform stability analyses using software. Be able to design soil slopes with various soil profiles and geometry and reinforcement using slope stability software. Recognize and understand the effects of geologic and groundwater conditions on the stability of soil slopes. Understand the mechanisms by which the most common methods of slope stabilization work (tie-backs, soil nailing, geosynthetics).

C E 596. Special Topics**1-3 Credits**

May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

C E 598. Special Research Programs**1-3 Credits**

Individual investigations either analytical or experimental. May be subtitled. Maximum of 3 credits per semester.

C E 599. Master's Thesis**1-15 Credits**

Thesis.

C E 600. Doctoral Research**1-15 Credits**

Research.

C E 604. Advanced Engineering Topics**3 Credits (3)**

In depth study of a topic at the forefront of environmental engineering & science. Journal papers will be critically reviewed and students will be asked to write an analysis of the topic and present their thoughts orally.

C E 614. Advanced Numerical Methods in Civil Engineering**3 Credits (3)**

Advanced mathematical, numerical, and programming for applied numerical methods with a focus on Civil and Environmental Engineering applications using MATLAB. Same as C E 514 with differentiated material and assignments for C E 614 students.

Learning Outcomes

1. To provide necessary background and skills to use MATLAB as a programming language for engineering problem solving. To introduce classical and some modern methods for civil engineering numerical problem solving. Develop numerical algorithms and programs for solving civil engineering problems involving: (1) multi-dimensional integration, (2) multivariate differentiation, (3) ordinary differential equations, (4) partial differential equations, (5) optimization (6) parameter estimation methods such as linear and nonlinear least square methods, and (7) time series analysis such as Fourier transform, wavelet, and basic filtering.

C E 615. Advanced Finite Element Methods**3 Credits (3)**

Finite element method with emphasis on stress analysis. May include development and use of plane stress, plane strain, and 3-D and shell elements. Includes static, dynamic, and nonlinear analysis.

Prerequisite: graduate standing.

C E 682. Topics in Hydrodynamics II**3 Credits (3)**

Selected topics in hydrometeorology, including the transfer of water and energy between the land surface and the lower atmosphere.

Learning Outcomes

1. This course helps lay the foundation for theoretical concepts useful in measurement, analysis and estimation of evaporation/evapotranspiration. Students learn some of the theoretical concepts and relationships useful in the phenomenon of evaporation as well as gain some field experience on measurement of evapotranspiration and open water evaporation.

C E 698. Special Research Programs**1-3 Credits**

May be subtitled. May be repeated for a maximum of 9 credits.

C E 700. Doctoral Dissertation**1-15 Credits**

Dissertation.

C S-COMPUTER SCIENCE

C S 111. Computer Science Principles**4 Credits (3+2P)**

This course provides a broad and exciting introduction to the field of computer science and the impact that computation has today on every aspect of life. It focuses on exploring computing as a creative activity and investigates the key foundations of computing: abstraction, data, algorithms, and programming. It looks into how connectivity and the Internet have revolutionized computing and demonstrates the global impact that computing has achieved, and it reveals how a new student in computer science might become part of the computing future.

Prerequisite(s): MATH 1215 or higher.

C S 117. Introduction to Computer Animation**3 Credits (3)**

Introductory course for learning to program with computer animation as well as learning basic concepts in computer science. Students create interactive animation projects such as computer games and learn to use software packages for creating animations in small virtual worlds using 3D models. Recommended for students considering a minor/major in computer science or simply interested in beginning computer animation or programming.

C S 151. C++ Programming**3 Credits (2+2P)**

Introduction to object-oriented programming in the C++ language. The focus will be on preparing students to use C++ in their own areas. No prior programming experience is required. Taught with C S 451.

Prerequisite: MATH 1215 or higher.

Learning Outcomes

1. Use various data types and the corresponding operations. Write C++ programs that contain expressions, program control, functions, arrays, and input/output Explain basic object-oriented programming concepts. Demonstrate proficiency in using classes, inheritance, pointers, streams, and recursion

C S 152. Java Programming**3 Credits (2+2P)**

Programming in the Java language. May be repeated up to 3 credits.

Prerequisite(s): MATH 1215 or higher.

C S 153. Python Programming I**3 Credits (3)**

This course is an introduction to programming in the Python language, covering fundamental scripts, data types and variables, functions, and simple object creation and usage. The focus will be on preparing students to use Python in their own areas. No prior programming experience is required. Taught with C S 453.

Prerequisite: MATH 1215 or higher.

Learning Outcomes

1. Develop an algorithm to solve a problem Demonstrate the ability to use Python data types: int, float, strings, and lists; and the built-in functions associated with those data types Edit and debug programs using the Spyder IDE for Python Implement algorithms using the Python features of assignment, input, output, branches, loops, and functions Explain the fundamental concepts of object-oriented programming with Python Design and implement Python classes based on given attributes and behaviors Work with existing Python modules such as math, random, and os Write Python programs that input data from files and store results in files

C S 154. Python Programming II**3 Credits (3)**

This course covers advanced Python programming, including classes, objects, and inheritance, embedded programming in domain applications, database interaction, and advanced data and text processing. The focus will be on preparing students to use Python in their own areas.

Prerequisite(s): C S 153 or C S 453.

C S 157. Topics in Software Programming and Applications**3 Credits (2+2P)**

Current topics in computer programming and software applications. Topic announced in the Schedule of Classes. May be repeated if subtitle is different.

C S 158. R Programming I**3 Credits (3)**

This course is an introduction to data processing in the R language, covering fundamental script configuration, data types and data collections, R control structures, and basic creation of graphs and data visualizations. This course will not focus on the statistical capabilities of R, though some basic statistical computations will be used.

Prerequisite(s): MATH 1220G.

C S 171G. Introduction to Computer Science**4 Credits (3+2P)**

Computers are now used widely in all area of modern life. This course provides understanding of the theoretical and practical foundations for how computers work, and provides practical application and programming experience in using computers to solve problems efficiently and effectively. The course covers broad aspects of the hardware, software, and mathematical basis of computers. Weekly labs stress using computers to investigate and report on data-intensive scientific problems. Practical experience in major software applications includes an introduction to programming, word processing, spreadsheets, databases, presentations, and Internet applications.

Prerequisite(s): MATH 1130G or MATH 1215 or higher.

C S 172. Computer Science I**4 Credits (3+2P)**

Computational problem solving; problem analysis; implementation of algorithms using Java. Object-oriented concepts, arrays, searching, sorting, and recursion. Taught with C S 460

Prerequisite: (A C or better in either MATH 1250G or MATH 1430G) OR (A C or better in MATH 1220G and a 1 or better in the CS Placement Test).

Learning Outcomes

1. Develop algorithms to solve problems Implement algorithms using the fundamental programming features of sequence, selection, iteration, and recursion
2. Apply an understanding of primitive and object data types
3. Design and implement classes based on given attributes and behaviors
4. Explain the fundamental concepts of object-oriented programming,

C S 209. Special Topics.**1-3 Credits**

May be repeated for a maximum of 12 credits.

C S 271. Object Oriented Programming**4 Credits (3+2P)**

Introduction to problem analysis and problem solving in the object-oriented paradigm. Practical introduction to implementing solutions in the C++ language. Pointers and dynamic memory allocation. Hands-on experience with useful development tools. Taught with C S 462.

Prerequisite: At least a C- in C S 172 or E E 112.

Learning Outcomes

1. Develop an algorithm to solve a problem. Implement algorithms using the C and C++ languages including imperative and object-oriented language features. Beyond what was learned in C S 172, E E 112, or E E 161 demonstrate a noticeable increase in understanding of problem analysis and program design. Demonstrate proficiency in using control structures including if statements (single selection), switch (multiple selection), and loops (repetition). Demonstrate proficiency in using arrays and functions Create UML class and relationship diagrams. Design a class to model a real-world person, place, thing, or event. Use editing and debugging software to create, debug, and test C and C++ programs. Understand the basic terminology used in object-oriented programming. 1 Create a make file to build an executable from a set of C or C++ source files.

C S 272. Introduction to Data Structures**4 Credits (3+2P)**

Design, implementation, use of fundamental abstract data types and their algorithms: lists, stacks, queues, dequeues, trees; imperative and declarative programming. Internal sorting; time and space efficiency of algorithms. Taught with C S 463.

Prerequisite: At least a C- in C S 172, or placement.

Learning Outcomes

1. Be able to implement and use lists Be able to implement and use stacks Be able to implement and use queues Be able to implement and use trees Be able to perform the run time analysis of basic algorithms using Big O notation Be able to implement, use, and analyze searching algorithms Be able to solve a problem recursively Take a problem statement from a user and convert it into a Java program that fulfills the user's needs Create object oriented Java classes that effectively separate and hide implementation details from client applications

C S 273. Machine Programming and Organization**4 Credits (3+2P)**

Computer structure, instruction execution, addressing techniques; programming in machine and assembly languages. Taught with C S 464.

Prerequisite: At least a C- in C S 172 or E E 112.

Learning Outcomes

1. Describe the architecture of a microcontroller, the interconnections between the components, and the basic units inside the CPU Use signed and unsigned numbers, the associated branching instructions, and the corresponding flags in the status register Explain immediate, direct, indirect addressing modes, their opcode and operands, and their utilities Map high-level programming language features to assembly instructions, including loops, conditionals, procedure calls, value and reference parameter passing, return values, and recursion Interface with I/O devices including LED and sensors via digital input and output, and analog-to-digital conversion Program timers/counters and interrupts to control real-time applications Design an assembly program

C S 278. Discrete Mathematics for Computer Science**4 Credits (3+2P)**

Discrete mathematics required for Computer Science, including the basics of logic, number theory, methods of proof, sequences, mathematical induction, set theory, counting, and functions. Taught with C S 465.

Prerequisite: At least C- in C S 172.

Learning Outcomes

1. Use logic to specify precise meaning of statements, demonstrate the equivalence of statements, and test the validity of arguments Construct and recognize valid proofs using different techniques including the principle of mathematical induction Use summations, formulas for the sum of arithmetic and geometric sequences Explain and apply the concepts of sets and functions Apply counting principles to determine the number of various combinatorial configurations

C S 343. Algorithm Design & Implementation**3 Credits (3)**

Introduction to efficient data structure and algorithm design. Basic graph algorithms. Balanced search trees. Classic algorithm design paradigms: divide-and-conquer, greedy scheme, and dynamic programming. Taught with C S 493.

Prerequisite: At least a C- in C S 272, or consent of instructor.

Learning Outcomes

1. Be able to use and implement sorting algorithms Be able to design and implement graph algorithms Be able to design and implement algorithms using the divide-and-conquer technique Be able to design and implement algorithms using the greedy technique Be able to design and implement algorithms using the dynamic programming technique Be able to use and implement balanced search trees Be able to use and implement hashing techniques Be able to perform the run time analysis of basic algorithms using Big O notation

C S 370. Compilers and Automata Theory**4 Credits (3+2P)**

Methods, principles, and tools for programming language processor design; basics of formal language theory (finite automata, regular expressions, context-free grammars); development of compiler components. Taught with C S 466.

Prerequisite: At least a C- in C S 271, C S 272, and C S 273.

Learning Outcomes

1. Understand the language theory concepts of regular languages, context free languages, regular expressions, context free grammars, and formal language hierarchy Use Thompson's construction to convert from regular expression to NFA, and subset construction to convert from NFA to DFA Apply recursive descent parsing in programming a parser of a small grammar Understand the ideas in LL and LR parsing of context-free language classes Understand and use table-driven top-down (LL(1)) and bottom up (SLR) parsing to parse a sentence

C S 371. Software Development**4 Credits (3+2P)**

Software specification, design, testing, maintenance, documentation; informal proof methods; team implementation of a large project. Taught with C S 468.

Prerequisite: At least a C- in C S 271 and C S 272.

Learning Outcomes

1. Understand and explain the activities and structure of different styles of software development processes, including waterfall, (spiral,) iterative, and agile methodologies Apply requirements knowledge and techniques to create functional and non-functional requirements for a software system Apply high and low level design ideas to create an object-oriented design of a software system Use good design and programming ideas to implement individual and team software systems in compiled OOP languages Apply white and black box testing techniques and tools to individual and team software development Use UML class diagrams (and sequence diagrams) to capture aspects of system design and/or requirements (domain) Use practical software development tools, including version control systems, automated build tools, and testing tools

C S 372. Data Structures and Algorithms**4 Credits (3+2P)**

Introduction to efficient data structure and algorithm design. Order notation and asymptotic run-time of algorithms. Recurrence relations and solutions. Abstract data type dynamic set and red-black trees. Classic algorithm design paradigms: divide-and-conquer, dynamic programming, greedy algorithms. Taught with C S 469.

Prerequisite: At least a C- in CS 272 and C S 278.

Learning Outcomes

1. Analyze the growth of functions via asymptotic notation Evaluate the asymptotic running time of a given algorithm Solve recurrence relations of the kinds encountered in algorithm analysis Design algorithms using the divide-and-conquer technique Design algorithms using the greedy technique Design algorithms using the dynamic-programming technique Use and analyze balanced binary search trees Analyze the design, correctness, and time complexity of basic graph algorithms

C S 380. Introduction to Cryptography**3 Credits (3)**

The course covers basic cryptographic primitives, such as symmetric, public-key ciphers, digital signature schemes, and hash functions, and their mathematical underpinnings. Course helps students understand basic notions of security in a cryptographic sense: chosen plaintext and chosen ciphertext attacks, games, and reductions. Course also covers computational number theory relevant to cryptography. Consent of Instructor required. Taught with: C S 525.

Prerequisite: C S 278 (or equivalent) with a C or better.

Learning Outcomes

1. Describe basic cryptographic primitives, including symmetric ciphers, asymmetric ciphers, digital signatures, message authentication codes, and hash functions. Understand the mathematical, fundamental underpinnings of cryptography, and how to reason about the security of crypto primitives: indistinguishability (IND) properties of ciphertexts, CPA/CCA games, and reductions to fundamental math assumptions; Be able to discuss number theory/algebra underpinning the design of cryptographic primitives, in some depth.

C S 382. Modern Web Technologies**3 Credits (3)**

In this course, we will take a full-stack approach to modern web application design. We will start with the fundamentals including HTML5, CSS3, Javascript, JSON, and the underlying networking concepts and protocols driving the modern web. We will then move on to more advanced topics including javascript backend development with Node.js, NoSQL database design with MongoDB, cloud computing, and re-sponsive web design. Finally, we cover advanced topics including the design and im- plementation of browser extensions and real-time web technologies like WebRTC and WebSockets. Consent of Instructor required. Taught with: C S 532.

Learning Outcomes

1. Understand the fundamental technologies and operation of the web. Design and develop responsive interactive web sites. Deploy web applications on Cloud Computing Platforms. Leverage modern tools and packages to develop full stack web applications. Be fluent in the application of emerging web technologies like browser extensions, WebSockets, and WebRTC. Use existing materials and references on the web to learn new skills.

C S 409. Independent Study**1-6 Credits (1-6)**

Faculty supervised investigation, to culminate in a written report. May be repeated up to 6 credits.

Prerequisite(s): Written agreement with faculty supervisor.

C S 419. Computing Ethics and Social Implications of Computing**1 Credit (1)**

An overview of ethics for computing majors includes: history of computing, intellectual property, privacy, ethical frameworks, professional ethical responsibilities, and risks of computer-based systems.

Prerequisite: At least a C- in C S 371.

Learning Outcomes

1. Understand the fundamental technologies and operation of the web. Design and develop responsive interactive web sites. Deploy web applications on Cloud Computing Platforms. Leverage modern tools and packages to develop full stack web applications. Be fluent in the application of emerging web technologies like browser extensions, WebSockets, and WebRTC. Use existing materials and references on the web to learn new skills.

C S 448. Senior Project**4 Credits (4)**

Capstone course in which C S majors work in teams and apply computer science skills to complete a large project. Restricted to: C S majors.

Prerequisite: At least a C- in C S 370 and C S 371.

Learning Outcomes

1. Apply design and development principles in the construction of software systems of varying complexity Apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the tradeoffs involved in design choices Design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs Use current techniques, skills, and tools necessary for computing practice Analyze a problem, and identify and define the computing requirements appropriate to its solution Function effectively as teams to accomplish a common goal Communicate effectively with a range of audiences

C S 449. Senior Thesis**4 Credits (4)**

Capstone course in which C S majors apply computer science skills to complete a research project, culminating in a written thesis report. Restricted to: C S majors.

Prerequisite: At least a C- in C S 370 and C S 371.

Learning Outcomes

1. Apply design and development principles in the construction of software systems of varying complexity Apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the tradeoffs involved in design choices Design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs Use current techniques, skills, and tools necessary for computing practice Analyze a problem, identify, and define the computing requirements appropriate to its solution Communicate effectively with a range of audiences via presentations and technical reports

C S 451. C++ Programming**3 Credits (3)**

Programming in the C language. Taught with C S 151. Required more advanced graduate work than C S 151. Recommended for nonmajors only. Not for CS undergraduate students.

Learning Outcomes

1. Use various data types and the corresponding operations. Write C++ programs that contain expressions, program control, functions, arrays, and input/output. Explain basic object-oriented programming concepts. Demonstrate proficiency in using classes, inheritance, pointers, streams, and recursion.

C S 452. Java Programming**3 Credits (2+2P)**

Programming in the Java language. More advanced than C S 152. Recommended for nonmajors only. Not for CS undergraduate standing. May be repeated up to 3 credits.

C S 453. Python Programming I**3 Credits (3)**

This course is an introduction to programming in the Python language, covering fundamental scripts, data types and variables, functions, and simple object creation and usage. The focus will be on preparing students to use Python in their own areas. No prior programming experience is required. Taught with C S 153. More advanced than C S 153.

Learning Outcomes

1. Develop an algorithm to solve a problem Demonstrate the ability to use Python data types: int, float, strings, and lists; and the built-in functions associated with those data types Edit and debug programs using the Spyder IDE for Python Implement algorithms using the Python features of assignment, input, output, branches, loops, and functions Explain the fundamental concepts of object-oriented programming with Python Design and implement Python classes based on given attributes and behaviors Work with existing Python modules such as math, random, and os Write Python programs that input data from files and store results in files

C S 454. Python Programming II**3 Credits (3)**

This course covers advanced Python programming, including classes, objects, and inheritance, embedded programming in domain applications, database interaction, and advanced data and text processing. The focus will be on preparing students to use Python in their own areas. For graduate students only. Has more advanced work than C S 154, and does not count towards CS major requirements. Not for CS undergraduate students. May be repeated up to 3 credits. Restricted to: exclude C S majors.

Prerequisite(s): C S 153 or C S 453.

C S 457. Topics in Software Programming and Applications**3 Credits (2+2P)**

Current topics in computer programming and software applications. Topic announced in the Schedule of Classes. More advanced than C S 157. recommended for non-majors only. May be repeated if subtitle is different.

Prerequisite(s): Graduate standing.

C S 458. R Programming I**3 Credits (3)**

This course is an introduction to data processing in the R language, covering fundamental script configuration, data types and data collections, R control structures, and basic creation of graphs and data visualizations. This course will not focus on the statistical capabilities of R, though some basic statistical computations will be used. For graduate students only. Has more advanced work than C S 158. Does not count towards CS major requirements. May be repeated up to 3 credits.

Prerequisite(s): Good understanding of college algebra or higher.

C S 460. Computer Science I Transition**3 Credits (3)**

Computational problem solving; problem analysis; implementation of algorithms. Recursive structures and algorithms. For C S graduate students only; cannot be used to meet a C S student's program of study. Taught with C S 172.

Learning Outcomes

1. Develop algorithms to solve problems Implement algorithms using the fundamental programming features of sequence, selection, iteration, and recursion Apply an understanding of primitive and object data types Design and implement classes based on given attributes and behaviors Explain the fundamental concepts of object-oriented programming

C S 462. Object Oriented Programming Transition**3 Credits (3)**

Introduction to problem analysis and problem solving in the object-oriented paradigm. Practical introduction to implementing solutions in the C++ language. Hands-on experience with useful development tools. Cannot be used in a C S student's program of study. Consent of Instructor required. Taught with C S 271.

Prerequisite: At least a C- in C S 172 or C S 460 or consent of instructor.

Learning Outcomes

1. Develop an algorithm to solve a problem. Implement algorithms using the C and C++ languages including imperative and object-oriented language features. Demonstrate a noticeable increase in understanding of problem analysis and program design beyond what was learned in C S 172, E E 112, or E E 161 Demonstrate proficiency in using control structures including if statements (single selection), switch (multiple selection), and loops (repetition). Demonstrate proficiency in using arrays and functions. Create UML class and relationship diagrams. Design a class to model a real-world person, place, thing, or event. Use editing and debugging software to create, debug, and test C and C++ programs. Understand the basic terminology used in object-oriented programming. 1Create a make file to build an executable from a set of C or C++ source files.

C S 463. Introduction to Data Structures Transition**3 Credits (3)**

Design, implementation, use of fundamental abstract data types and their algorithms: lists, stacks, queues, dequeues, trees; imperative and declarative programming. Internal sorting; time and space efficiency of algorithms. Cannot be used in a C S student's program of study. Consent of Instructor required. Taught with C S 272.

Prerequisite: At least a C- in C S 172 or C S 460 or consent of instructor.

Learning Outcomes

1. Be able to implement and use lists Be able to implement and use stacks Be able to implement and use queues Be able to implement and use trees Be able to perform the run time analysis of basic algorithms using Big O notation Be able to implement, use, and analyze searching algorithms Be able to solve a problem recursively Take a problem statement from a user and convert it into a Java program that fulfills the user's needs Create object oriented Java classes that effectively separate and hide implementation details from client applications

C S 464. Machine Programming and Organization Transition**3 Credits (3)**

Computer structure, instruction execution, addressing techniques; programming in machine and assembly languages. Cannot be used in a C S student's program of study. Consent of Instructor required. Taught with C S 273.

Prerequisite: At least a C- in C S 172 or C S 460 or consent of instructor.

Learning Outcomes

1. Describe the architecture of a microcontroller, the interconnections between the components, and the basic units inside the CPU Use signed and unsigned numbers, the associated branching instructions, and the corresponding flags in the status register Explain immediate, direct, indirect addressing modes, their opcode and operands, and their utilities Map high-level programming language features to assembly instructions, including loops, conditionals, procedure calls, value and reference parameter passing, return values, and recursion Interface with I/O devices including LED and sensors via digital input and output, and analog-to-digital conversion Program timers/counters and interrupts to control real-time applications Design an assembly program

C S 465. Discrete Math for Computer Science Transition**3 Credits (3)**

Logical connectives, sets, functions, relations, graphics, trees, proofs, induction, and application to computer science. For C S graduate students only. Cannot be used in a C S student's program of study. Consent of Instructor required. Taught with C S 278.

Prerequisite: At least a C- in C S 172 or C S 460 or consent of instructor.

Learning Outcomes

1. Use logic to specify precise meaning of statements, demonstrate the equivalence of statements, and test the validity of arguments Construct and recognize valid proofs using different techniques including the principle of mathematical induction Use summations, formulas for the sum of arithmetic and geometric sequences Explain and apply the concepts of sets and functions Apply counting principles to determine the number of various combinatorial configurations

C S 466. Compilers and Automata Transition**3 Credits (3)**

Methods, principles, and tools for programming language processor design; basics of formal language theory (finite automata, regular expressions, context-free grammars); development of compiler components. For C S graduate students only; cannot be used in a students program of study. Taught with C S 370.

Prerequisite: At least a C in (C S 271 or C S 462), in (C S 272 or C S 463), in (C S 273 or C S 464), or consent of instructor.

Learning Outcomes

1. Understand the language theory concepts of regular languages, context free languages, regular expressions, context free grammars, and formal language hierarchy Use Thompson's construction to convert from regular expression to NFA, and subset construction to convert from NFA to DFA Apply recursive descent parsing in programming a parser of a small grammar Understand the ideas in LL and LR parsing of context-free language classes Understand and use table-driven top-down (LL(1)) and bottom up (SLR) parsing to parse a sentence

C S 468. Software Development Transition**3 Credits (3)**

Software specification, design, testing, maintenance, documentation; informal proof methods; team implementation of a large project. For C S graduate students only. Cannot be used in a C S student's program of study. Consent of Instructor required. Taught with C S 371.

Prerequisite: At least a C- in C S 271 or C S 462, in C S 272 or C S 463, or consent of instructor.

Learning Outcomes

1. Understand and explain the activities and structure of different styles of software development processes, including waterfall, (spiral,) iterative, and agile methodologies Apply requirements knowledge and techniques to create functional and non-functional requirements for a software system Apply high and low level design ideas to create an object-oriented design of a software system Use good design and programming ideas to implement individual and team software systems in compiled OOP languages Apply white and black box testing techniques and tools to individual and team software development Use UML class diagrams (and sequence diagrams) to capture aspects of system design and/or requirements (domain) Use practical software development tools, including version control systems, automated build tools, and testing tools

C S 469. Data Structure and Algorithms Transition**3 Credits (3)**

Introduction to efficient data structure and algorithm design. Order notation and asymptotic run-time of algorithms. Recurrence relations and solutions. Abstract data type dynamic set and red-black trees. Classic algorithm design paradigms: divide-and-conquer, dynamic programming, greedy algorithms. For C S graduate students only. Consent of Instructor required. Taught with C S 372.

Prerequisite: At least a C- in C S 272 or C S 463, in C S 278 or C S 465, or consent of instructor.

Learning Outcomes

1. Analyze the growth of functions via asymptotic notation Evaluate the asymptotic running time of a given algorithm Solve recurrence relations of the kinds encountered in algorithm analysis Design algorithms using the divide-and-conquer technique Design algorithms using the greedy technique Design algorithms using the dynamic-programming technique Use and analyze balanced binary search trees Analyze the design, correctness, and time complexity of basic graph algorithms

C S 471. Programming Language Structure I**3 Credits (3)**

Syntax, semantics, implementation, and application of programming languages; abstract data types; concurrency. Not for C S graduate students.

Prerequisite: At least a C- in C S 370 and C S 371.

Learning Outcomes

1. Improve the background for choosing appropriate programming languages for certain classes of programming problems Increase the ability to learn new programming languages Critically evaluate what paradigm and language are best suited for a new problem Demonstrate the use of the primary segments for a running program Apply the principles of functional programming Apply the principles of logic programming Program a simple parallel program with threads Program in at least five different programming languages Program in C to demonstrate architecture details

C S 473. Architectural Concepts I**3 Credits (3)**

Comparison of architectures to illustrate concepts of computer organization; relationships between architectural and software features. Not for C S graduate students.

Prerequisite: At least a C- in C S 273 and C S 370.

Learning Outcomes

1. Explain the concepts in instruction set architecture Analyze the behavior of pipelined CPU data path and control Analyze behavior and performance of memory hierarchies with different cache designs Describe the implementation of binary integer and floating point representation and arithmetic Identify and analyze performance of instruction level parallelism and multi-core parallelism Describe virtual memory and architectural support for operating systems Understand the organization of various kinds of secondary storage devices, and their performance and tradeoffs Create software that demonstrates performance of architectural features and evaluate the effects of software change

C S 474. Operating Systems I**3 Credits (3)**

Operating system principles and structures, and interactions with architectures. Not for C S graduate students.

Prerequisite: At least a C- in C S 273, C S 371, and C S 372.

Learning Outcomes

1. Explain OS control and management of hardware resources Explain OS management and execution of processes Explain OS control and management of real and virtual memory Explain classical concurrency issues and their solutions Analyze and implement threads Analyze OS interaction with networks and architecture

C S 475. Artificial Intelligence I**3 Credits (3)**

Fundamental principles and techniques in artificial intelligence systems. Intelligent Agents; solving problems by searching; local search techniques; game-playing agents; constraint satisfaction problems; knowledge representation and reasoning. Further selected topics may also be covered. Not for C S graduate students. Taught with C S 505.

Prerequisite: At least a C- in C S 272 and C S 278.

Learning Outcomes

1. Use various search algorithms commonly used in problem-solving Use methods for solving constraint satisfaction problems Use propositional and first-order logic to represent knowledge Use logical inference methods to derive conclusions from a knowledge base Use adversarial search for game-playing agents Analyze the different search strategies Design and Implement heuristic search for problem-solving

C S 476. Computer Graphics I**3 Credits (3)**

Languages, programming, devices, and data structures for representation and interactive display of complex objects. Not for C S graduate students. Taught with C S 506.

Prerequisite: At least C- in C S 370 or C S 371.

Learning Outcomes

1. Techniques used in three-dimensional graphics Computer Graphics lightning and shading Client-server graphics using WebGL Geometric and Solid modeling Computer Graphics implementation algorithms

C S 477. Digital Game Design**3 Credits (3)**

An introduction to digital game design. Topics include design, development, and playtesting of games. The course is structured to use team-based learning. Not for C S graduate students. Taught with C S 517.

Prerequisite/Corequisite: C S 371.

Learning Outcomes

1. Describe, analyze, and/or critique games with a consistent vocabulary Design, develop, and playtest games Understand the formal systems of games Communicate game designs through demonstrations and presentations

C S 478. Computer Security**3 Credits (3)**

Introduction to the art and science of computer security. Fundamentals of computer security including elementary cryptography, authentication and access control, security threats, attacks, detection and prevention in application software, operating systems, networks and databases. Not for C S graduate students. Taught with C S 513.

Prerequisite: At least a C- in C S 272, C S 273 or consent of instructor.

Learning Outcomes

1. Describe fundamental concepts in security and privacy Understand requirements of security in different contexts Describe practical implementation challenges in security/privacy system design Explain at a high-level symmetric and public key cryptography Explain various access control mechanisms such as authentication, authorization Understand aspects of secure system design that a computer programmer/engineer needs to account for

C S 479. Special Topics**1-12 Credits**

Topics announced in the Schedule of Classes. May be repeated under different subtitles. Not for C S graduate students. May be repeated up to 12 credits.

C S 480. Linux System Administration**3 Credits (3)**

Basic system administration for Linux environments. Topics include user managements, file systems, security, backups, system monitoring, kernel configuration and other relevant aspects of system administration. Not for Computer Science graduate students.

Learning Outcomes

1. Be able to properly set up, configure, and maintain a Linux-based set of networked computers with shared resources Understand the significance of proper administration of systems and its impact on users, their data and computational resources, and the security of the overall installation

C S 481. Visual Programming**3 Credits (3)**

Design and implementation of programs using visual (i.e. dataflow or diagrammatic) programming techniques, with an emphasis on real-time data processing. Students will learn how to design visual programs, including how to handle cycles and state maintenance, and will learn to process audio, video, and other data using visual programs. Not for C S graduate students. Taught with C S 518.

Prerequisite: At least a C- in C S 272 and C S 278.

Learning Outcomes

1. Develop software in graph-based visual environments Understand flows of control in visual programming environments Use signals, digital and analog, to drive software Communicate software design and evaluation with presentations, demos, and reports

C S 482. Database Management Systems I**3 Credits (3)**

Database design and implementation; models of database management systems; privacy, security, protection, recovery. Not for C S graduate students. Taught with C S 502.

Prerequisite: At least a C- in C S 272 and C S 278.

Learning Outcomes

1. Utilize the basic concepts of relational database model Utilize database query languages (e.g. SQL) Identify data integrity and security requirements Analyze, capture, and model user requirements for building database systems using conceptual models Design and normalize relational schemas Apply application development methods to implement a database system

C S 483. Introduction to Robotics**3 Credits (3)**

Basic AI-based robotic architecture and concepts, with an emphasis on building and programming mobile robots. Not for C S graduate students. Taught with C S 503.

Prerequisite: At least a C- in C S 272 and C S 273.

Learning Outcomes

1. Analyze the strengths and weaknesses of basic robotic architectures (deliberative, reactive, hybrid) Use the basics of Monte Carlo localization in map construction and robot navigation Design and implement robots for special deliberative and reactive purposes Program robots to navigate in both known and unknown areas Program robots to map an unknown area

C S 484. Computer Networks I**3 Credits (3)**

Fundamental concepts of computer communication networks: layered network architecture, network components, protocol stack and service. Example of application, transport, network and data link layers, protocols primarily drawn from the Internet (TCP, UDP, and IP) protocol multimedia networks; network management and security. Not for C S graduate students. Taught with C S 504.

Prerequisite: At least a C- in C S 272 and CS 273.

Learning Outcomes

1. Explain the layered model of networking using the OSI and TCP/IP models Describe the purpose and concepts of each layer in the OSI and TCP/IP models Describe IP as a particular network layer protocol Describe TCP and UDP as particular transport layer protocols Describe Ethernet (11) and WiFi (15) as particular data link layer protocols Describe and analyze routing and routing issues Describe and analyze data link layer switching Describe the need for application protocols such as HTTP Explain other network issues such as multicasting and audio/video data streaming 1 Implement socket-based network programs

C S 485. Human-Centered Computing**3 Credits (3)**

Covers iterative, human-centered interface design, including prototyping and evaluation. Basics of graphic design and visualization. Not for C S graduate students. Taught with C S 515.

Prerequisite: At least C- in C S 371.

Learning Outcomes

1. Describe, analyze, and/or critique a device interface using a design vocabulary Enact a human-centered process of interaction design: gather data; develop a data-driven design; iterate design through testing; and evaluate results Conduct human-computer interaction research by proposing, developing, and conducting experiments; analyzing data; and developing synthesized results Communicate design and evaluation with presentations, demos, and reports Implement a variety of interaction techniques

C S 486. Bioinformatics**3 Credits (3)**

Introduction to bioinformatics and computational biology. Computational approaches to sequences analysis, protein structure prediction and analysis, and selected topics from current advances in bioinformatics. Not for C S graduate students. Taught with C S 516.

Prerequisite: At least a C- in C S 272 and C S 278.

Learning Outcomes

1. Explain the biology motivation of a bioinformatics question Formulate a computational problem and its solution to address a molecular biology question Implement basic bioinformatics algorithms such as sequence alignment, pattern matching, and genome assembly Evaluate the performance of a bioinformatics algorithm on real data sets Argue the correctness of a bioinformatics algorithm Analyze the complexity of a bioinformatics algorithm

C S 487. Applied Machine Learning I**3 Credits (3)**

An introductory course on practical machine learning. An overview of concepts for both unsupervised and supervised learning. Topics include classification, regression, clustering, and dimension reduction. Classical methods and algorithms such as linear regression, neural networks, support vector machines, and ensemble approaches. Recent techniques such as deep learning. Focused on applying of machine learning techniques in application domains. Not for Graduate Majors. Taught with: C S 519.

Prerequisite: At least a C- in C S 272, MATH 1511G; or consent of instructor.

Learning Outcomes

1. Implement and utilize different data processing techniques Differentiate and assess several dimension reduction techniques Utilize several classifiers (SVM, Decision tree, k-Nearest Neighbor, and logistic regression) and differentiate their advantages and disadvantages Explain and demonstrate regression analysis Describe and illustrate clustering approaches Apply ensemble learning approaches
2. Implement several neural network classifiers, including deep learning models

C S 488. Introduction to Data Mining**3 Credits (3)**

Techniques for exploring large data sets and discovering patterns in them. Data mining concepts, metrics to measure its effectiveness. Methods in classification, clustering, frequent pattern analysis. Selected topics from current advances in data mining. Taught with C S 508.

Prerequisite: At least a C- in C S 272 and C S 278.

Learning Outcomes

1. Explain and recognize different data mining tasks such as data pre-processing, visualization, classification, regression, clustering, association rules, and anomaly detection Apply classical data mining / machine learning algorithms for classification, clustering, association rules, and anomaly detection Evaluate and compare the performance of different data mining / machine learning algorithms Utilize data mining algorithms to analyze data in real applications using a data mining tool

C S 489. Bioinformatics Programming**3 Credits (3)**

Computer programming to analyze high-throughput molecular biology data including genomic sequences, bulk and single-cell transcriptome, epigenome, and other omics data. Quality control, library size normalization, confounding effect removal, clustering, statistical modeling, trajectory inference, and visualization. Taught with C S 509. May be repeated up to 3 credits.

Learning Outcomes

1. Write R scripts and functions to manipulate biological sequences, genome annotation, and gene expression data Perform high-throughput data analysis with established R packages Detect differential gene expression on RNA sequencing data Perform single-cell RNA sequencing data analysis (quality control, library size normalization, confounding effect removal, modeling) Assess statistical significance of analytical results Create automatic data analysis pipeline to link multiple software packages

C S 491. Parallel Programming**3 Credits (3)**

Programming of shared memory and distributed memory machines; tools and languages for parallel programming; techniques for parallel programming; parallel programming environments. Not for C S graduate students. Taught with C S 521.

Prerequisite: At least a C- in C S 370 or consent of instructor.

Learning Outcomes

1. Describe existing parallel architectures including shared memory versus distributed memory platforms Apply basic techniques for organizing parallel computations Apply basic techniques for performance measurement and theoretical limitations of parallelism Explain alternative parallel techniques and hardware Perform performance Analysis of different parallel programming techniques Program shared memory machines using threads, processes, and the OpenMP library Program using a message passing paradigm and obtain working knowledge of the Message Passing Interface (MPI)

C S 493. Algorithm Design and Implementation**3 Credits (3)**

This course introduces the basic knowledge of designing classical algorithms and implementing these algorithms using a programming language. In particular, the course teaches various data structures, including graphs and balanced binary search trees, and efficient schemes to implement these data structures. This course also teaches basic algorithm design techniques including divide-and-conquer, greedy scheme, and dynamic programming. This course covers graph algorithms, including graph traversals (depth-first search and breadth-first search), connectivity, shortest paths, and minimum spanning trees. Graduate standing. Not for CS students. Taught with C S 343.

Prerequisite: At least a C- in C S 272, or Consent of Instructor.

Learning Outcomes

1. Be able to use and implement sorting algorithms Be able to design and implement graph algorithms Be able to design and implement algorithms using the divide-and-conquer technique Be able to design and implement algorithms using the greedy technique Be able to design and implement algorithms using the dynamic programming technique Be able to use and implement balanced search trees Be able to use and implement hashing techniques Be able to perform the run time analysis of basic algorithms using Big O notation

C S 494. Introduction to Smart Grids**3 Credits (3)**

This course is an introduction to the technologies and design strategies associated with the Smart Grid. The emphasis will be on the development of communications, energy delivery, coordination mechanisms, and management tools to monitor transmission and distribution networks. Topics include: Smart grid introduction and evolution; Power systems; Networking and transport control; Artificial intelligence & agent coordination; Data mining for smart grids. Taught with C S 514.

Prerequisite: At least a C- in C S 272 and a C- in E E 230; or Consent of instructor.

Learning Outcomes

1. Get basic understanding of how conventional power system is operated and protected Understand and use basic knowledge of communication techniques in smart grids
2. Understand and use basic knowledge for the coordination of the different units in smart grids Understand and apply data mining techniques for protecting smart grids

C S 496. Cloud and Edge Computing**3 Credits (3)**

The course presents a top-down view of cloud computing, from applications and administration to programming and infrastructure. Its main focus is on the concepts of networking and parallel programming for cloud computing and large scale distributed systems which form the cloud infrastructure. The topics include: overview of cloud computing, cloud systems, parallel processing in the cloud, distributed storage systems, virtualization, security in the cloud, and multicore operating systems. Students will study state-of-the-art approaches to cloud computing followed by large cloud corporations, namely Google, Amazon, Microsoft, and Yahoo. Students will also apply what they learn through project developments using Amazon Web Services. Not for graduate CS majors. Taught with: C S 522.

Prerequisite: At least a C- in C S 372; background in C S 484/C S 504 is preferred or consent of instructor.

Learning Outcomes

1. The emphasis of the course will be on the understanding the concepts and the engineering trade-offs involved in the design of cloud computing systems Cloud deployment models, cloud service models (software-as-a-service, infrastructure- as-a-service, protocol-as-a-service), cloud architecture, cloud-edge security, service level agreements, and load balancing in cloud and datacenters Learn about cloud computing, especially what are their fundamental components, how these components interact, and how the technology is evolving for the future (edge computing, cloudlets, mobile edge computing, etc.).

C S 502. Database Management Systems I**3 Credits (3)**

Database design and implementation; models of database management systems; privacy, security, protection, recovery; taught with C S 482; requires more advanced graduate work than C S 482. Students are expected to have solid knowledge of data structures and discrete mathematics.

Learning Outcomes

1. Utilize the basic concepts of relational database model Utilize database query languages (e.g. SQL) Identify data integrity and security requirements Analyze, capture, and model user requirements for building database systems using conceptual models Design and normalize relational schemas Apply application development methods to implement a database system

C S 503. Introduction to Robotics**3 Credits (3)**

Basic AI-based robotic architectures and concepts, with an emphasis on building and programming mobile robots; taught with C S 483; requires more advanced graduate work than C S 483. Students are expected to have solid knowledge of data structures and machine-level programming.

Learning Outcomes

1. Analyze the strengths and weaknesses of basic robotic architectures (deliberative, reactive, hybrid) Use the basics of Monte Carlo localization in map construction and robot navigation Design and implement robots for special deliberative and reactive purposes Program robots to navigate in both known and unknown areas Program robots to map an unknown area

C S 504. Computer Networks I**3 Credits (3)**

Fundamental concepts of computer communication networks: layered network architecture, network components, protocol stack and service. Example of application, transport, network and data link layers, protocols primarily drawn from the Internet (TCP, UDP, and IP) protocol suite; local and wide area networks, wireless and mobile networks, multimedia networks; network management and security; taught with C S 484; requires more advanced graduate work than C S 484. Students are expected to have solid knowledge of data structures, machine-level programming. Knowledge of statistics (at the level of MATH 371 or MATH 470) is recommended.

Learning Outcomes

1. Explain the layered model of networking using the OSI and TCP/IP models Describe the purpose and concepts of each layer in the OSI and TCP/IP models Describe IP as a particular network layer protocol Describe TCP and UDP as particular transport layer protocols Describe Ethernet (802-11) and WiFi (802-15) as particular data link layer protocols Describe and analyze routing and routing issues Describe and analyze data link layer switching Describe the need for application protocols such as HTTP Explain other network issues such as multicasting and audio/video data streaming 1Implement socket-based network programs

C S 505. Artificial Intelligence I**3 Credits (3)**

Fundamental principles and techniques in artificial intelligence systems. Knowledge representation formalisms; heuristic problem solving techniques; automated logical deduction; robot planning methods; algorithmic techniques for natural language understanding, vision and learning; taught with C S 475; requires more advanced graduate work than C S 475. Students are expected to have strong knowledge of algorithms and data structures (at the level of C S 372).

Learning Outcomes

1. Use various search algorithms commonly used in problem-solving
2. Use methods for solving constraint satisfaction problems
3. Use propositional and first-order logic to represent knowledge
4. Use logical inference methods to derive conclusions from a knowledge base
5. Use adversarial search for game-playing agents
6. Analyze the different search strategies
7. Design and Implement heuristic search for problem-solving

C S 506. Computer Graphics I**3 Credits (3)**

Languages, programming, devices, and data structures for representation and interactive display of complex objects. Taught with C S 476. Requires more advanced graduate work than C S 476. Students are expected to have knowledge of compilers design and software engineering equivalent to C S 370 and C S 371.

Learning Outcomes

1. Techniques used in three-dimensional graphics Computer Graphics lightning and shading Client-server graphics using WebGL
2. Geometric and Solid modeling
3. Computer Graphics implementation algorithms

C S 508. Introduction to Data Mining**3 Credits (3)**

Techniques for exploring large data sets and discovering patterns in them. Data mining concepts, metrics to measure its effectiveness. Methods in classification, clustering, frequent pattern analysis. Selected topics from current advances in data mining. Students are expected to have a preparation in Discrete Mathematics and Data Structures equivalent to C S 272 and C S 278. Requires more advanced graduate work than C S 488. Taught with: C S 488.

Learning Outcomes

1. Explain and recognize different data mining tasks such as data pre-processing, visualization, classification, regression, clustering, association rules, and anomaly detection
2. Apply classical data mining / machine learning algorithms for classification, clustering, association rules, and anomaly detection
3. Evaluate and compare the performance of different data mining / machine learning algorithms
4. Utilize data mining algorithms to analyze data in real applications using a data mining tool

C S 509. Bioinformatics Programming**3 Credits (3)**

Computer programming to analyze high-throughput molecular biology data including genomic sequences, bulk and single-cell transcriptome, epigenome, and other omics data. Quality control, library size normalization, confounding effect removal, clustering, statistical modeling, trajectory inference, and visualization. Taught with C S 489. Requires more advanced graduate work than C S 489.

Learning Outcomes

1. Write R scripts and functions to manipulate biological sequences, genome annotation, and gene expression data Perform high-throughput data analysis with established R packages Detect differential gene expression on RNA sequencing data Perform single-cell RNA sequencing data analysis (quality control, library size normalization, confounding effect removal, modeling) Assess statistical significance of analytical results Create automatic data analysis pipeline to link multiple software packages

C S 510. Automata, Languages, Computability**3 Credits (3)**

Regular and context-free languages, pushdown and finite-state automata, Turing machines, models of computation, halting problems. Students are expected to have knowledge of compilers design and algorithms equivalent to C S 370 and C S 372.

Learning Outcomes

1. Describe the language accepted by an automaton or generated by a regular expression or a context-free grammar Design automata, regular expressions and context-free grammars accepting or generating a certain language Prove properties of languages, grammars, and automata with formal mathematical methods Convert between equivalent deterministic and non-deterministic finite automata, and regular expressions Convert between equivalent context-free grammars and pushdown automata Define Turing machines performing simple tasks

C S 513. Computer Security**3 Credits (3)**

Introduction to the art and science of computer security. Fundamentals of computer security including elementary cryptography, authentication and access control, security threats, attacks, detection and prevention in application software, operating systems, networks and databases. Taught with C S 578. Requires more advanced graduate work than C S 578. Recommended knowledge of materials in C S 272 and C S 273.

Prerequisite: At least a C in C S 273 or consent of instructor.

Learning Outcomes

1. Describe fundamental concepts in security and privacy
2. Understand requirements of security in different contexts
3. Describe practical implementation challenges in security/privacy system design
4. Explain at a high-level symmetric and public key cryptography
5. Explain various access control mechanisms such as authentication, authorization
6. Understand aspects of secure system design that a computer programmer/engineer needs to account for

C S 514. Introduction to Smart Grids**3 Credits (3)**

This course is an introduction to the technologies and design strategies associated with the Smart Grid. The emphasis will be on the development of communications, energy delivery, coordination mechanisms, and management tools to monitor transmission and distribution networks. Topics include: Smart grid introduction and evolution; Power systems; Networking and transport control; Artificial intelligence & agent coordination; Data mining for smart grids. Taught with C S 494. Requires more advanced work than C S 494.

Prerequisite: At least a C- in C S 272 and a C- in E E 230; or Consent of instructor.

Learning Outcomes

1. Get basic understanding of how conventional power system is operated and protected
2. Understand and use basic knowledge of communication techniques in smart grids
3. Understand and use basic knowledge for the coordination of the different units in smart grids
4. Understand and apply data mining techniques for protecting smart grids

C S 515. Human-Centered Computing**3 Credits (3)**

Covers iterative, human-centered interface design, including prototyping and evaluation. Basics of graphic design and visualization. Taught with C S 485. Requires more advanced graduate work than C S 485 with an emphasis on studying recent research in human-computer interaction. Students are expected to have knowledge of software engineering equivalent to C S 371.

Learning Outcomes

1. Describe, analyze, and/or critique a device interface using a design vocabulary
2. Enact a human-centered process of interaction design: gather data; develop a data-driven design; iterate design through testing; and evaluate results
3. Conduct human-computer interaction research by proposing, developing, and conducting experiments; analyzing data; and developing synthesized results
4. Communicate design and evaluation with presentations, demos, and reports
5. Implement a variety of interaction techniques

C S 516. Bioinformatics**3 Credits (3)**

Introduction to bioinformatics and computational biology. Computational approaches to sequences analysis, protein structure prediction and analysis, and selected topics from current advances in bioinformatics; taught with C S 486; requires more advanced graduate work than C S 486. Students are expected to have a knowledge of algorithms and data structures equivalent to C S 372 or exposure to Biology (equivalent to BIOL 2310 or BIOL 311).

Learning Outcomes

1. Explain the biology motivation of a bioinformatics question
2. Formulate a computational problem and its solution to address a molecular biology question
3. Implement basic bioinformatics algorithms such as sequence alignment, pattern matching, and genome assembly
4. Evaluate the performance of a bioinformatics algorithm on real data sets
5. Argue the correctness of a bioinformatics algorithm
6. Analyze the complexity of a bioinformatics algorithm

C S 517. Digital Game Design**3 Credits (3)**

An introduction to digital game design. Topics include design, development, and playtesting of games. The course is structured to use team-based learning. Taught with C S 477. Requires more advanced graduate work than C S 477 with deeper attention to a team game project.

Learning Outcomes

1. Describe, analyze, and/or critique games with a consistent vocabulary
2. Design, develop, and playtest games
3. Understand the formal systems of games
4. Communicate game designs through demonstrations and presentations

C S 518. Visual Programming**3 Credits (3)**

Design and implementation of programs using visual (i.e. dataflow or diagrammatic) programming techniques, with an emphasis on real-time data processing. Students will learn how to design visual programs, including how to handle cycles and state maintenance, and will learn to process audio, video, and other data using visual programs. Students must be in graduate standing to enroll. Taught with C S 481. Requires more advanced graduate work than C S 481.

Learning Outcomes

1. Develop software in graph-based visual environments
2. Understand flows of control in visual programming environments
3. Use signals, digital and analog, to drive software
4. Communicate software design and evaluation with presentations, demos, and reports

C S 519. Applied Machine Learning I**3 Credits (3)**

An introductory course on practical machine learning. An overview of concepts for both unsupervised and supervised learning. Topics include classification, regression, clustering, and dimension reduction. Classical methods and algorithms such as linear regression, neural networks, support vector machines, and ensemble approaches. Recent techniques such as deep learning. Focused on applying of machine learning techniques in application domains. Taught with: C S 487. Requires more advanced graduate work than C S 487.

Learning Outcomes

1. Implement and utilize different data processing techniques
2. Differentiate and assess several dimension reduction techniques
3. Utilize several classifiers (SVM, Decision tree, k-Nearest Neighbor, and logistic regression) and differentiate their advantages and disadvantages
4. Explain and demonstrate regression analysis
5. Describe and illustrate clustering approaches
6. Apply ensemble learning approaches
7. Implement several neural network classifiers, including deep learning models

C S 521. Parallel Programming**3 Credits (3)**

Programming of shared memory and distributed memory machines; tools and languages for parallel programming; parallelizing compilers; parallel programming environments; taught with C S 491; requires more advanced graduate work than C S 491. Students are expected to have knowledge of programming and machine organization equivalent to C S 271 and C S 273.

Learning Outcomes

1. Describe existing parallel architectures including shared memory versus distributed memory platforms
2. Apply basic techniques for organizing parallel computations
3. Apply basic techniques for performance measurement and theoretical limitations of parallelism
4. Explain alternative parallel techniques and hardware
5. Perform performance Analysis of different parallel programming techniques
6. Program shared memory machines using threads, processes, and the OpenMP library
7. Program using a message passing paradigm and obtain working knowledge of the Message Passing Interface (MPI)

C S 522. Cloud and Edge Computing**3 Credits (3)**

The course presents a top-down view of cloud computing, from applications and administration to programming and infrastructure. Its main focus is on the concepts of networking and parallel programming for cloud computing and large scale distributed systems which form the cloud infrastructure. The topics include: overview of cloud computing, cloud systems, parallel processing in the cloud, distributed storage systems, virtualization, security in the cloud, and multicore operating systems. Students will study state-of-the-art approaches to cloud computing followed by large cloud corporations, namely Google, Amazon, Microsoft, and Yahoo. Students will also apply what they learn through project developments using Amazon Web Services. Might have additional requirements for graduate students. To enroll in this course a background in C S 484/C S 504 is preferred or have consent from the instructor. Taught with: C S 496. Requires more advanced graduate work than C S 496.

Learning Outcomes

1. The emphasis of the course will be on the understanding the concepts and the engineering trade-offs involved in the design of cloud computing systems
2. Cloud deployment models, cloud service models (software-as-a-service, infrastructure- as-a-service, protocol-as-a-service), cloud architecture, cloud-edge security, service level agreements, and load balancing in cloud and datacenters
3. Learn about cloud computing, especially what are their fundamental components, how these components interact, and how the technology is evolving for the future (edge computing, cloudlets, mobile edge computing, etc.).

C S 525. Introduction to Cryptography**3 Credits (3)**

The course covers basic cryptographic primitives, such as symmetric, public-key ciphers, digital signature schemes, and hash functions, and their mathematical underpinnings. Course helps students understand basic notions of security in a cryptographic sense: chosen plaintext and chosen ciphertext attacks, games, and reductions. Course also covers computational number theory relevant to cryptography. Consent of Instructor required. Taught with: C S 380. Requires more advanced graduate work than C S 380.

Prerequisite: C S 278 (or equivalent) with a C or better.

Learning Outcomes

1. Describe basic cryptographic primitives, including symmetric ciphers, asymmetric ciphers, digital signatures, message authentication codes, and hash functions. Understand the mathematical, fundamental underpinnings of cryptography, and how to reason about the security of crypto primitives: indistinguishability (IND) properties of ciphertexts, CPA/CCA games, and reductions to fundamental math assumptions; Be able to discuss number theory/algebra underpinning the design of cryptographic primitives, in some depth.

C S 531. Principles of Virtual Reality**3 Credits (3)**

This course is an introduction to building systems and doing research in / on virtual reality. We cover system design, development, and evaluation, with an emphasis on recent research in the space. We cover a range of methods, qualitative and quantitative, in order to develop insights into effective VR designs. Students in this class will develop a foundation in VR development; learn about current topics in VR; and design, develop, evaluate, and report on a VR system. Consent of Instructor required. Crosslisted with: C S 381.

Prerequisite(s): CS 485 (or equivalent).

Learning Outcomes

1. Design and develop systems in virtual reality.
2. Understand the variety of development techniques in VR.
3. Understand the state-of-the-art in VR systems.
4. Communicate understanding of people, designs, and evaluations through presentations, demos, and/or reports.

C S 532. Modern Web Technologies**3 Credits (3)**

In this course, we will take a full-stack approach to modern web application design. We will start with the fundamentals including HTML5, CSS3, Javascript, JSON, and the underlying networking concepts and protocols driving the modern web. We will then move on to more advanced topics including javascript backend development with Node.js, NoSQL database design with MongoDB, cloud computing, and responsive web design. Finally, we cover advanced topics including the design and implementation of browser extensions and real-time web technologies like WebRTC and WebSockets. Consent of Instructor required. Taught with: C S 382. Requires more advanced graduate work than C S 382.

Learning Outcomes

1. Understand the fundamental technologies and operation of the web. Design and develop responsive interactive web sites. Deploy web applications on Cloud Computing Platforms. Leverage modern tools and packages to develop full stack web applications. Be fluent in the application of emerging web technologies like browser extensions, WebSockets, and WebRTC. Use existing materials and references on the web to learn new skills.

C S 570. Analysis of Algorithms**3 Credits (3)**

Techniques for design and analysis of algorithms; time and space complexity; proving correctness of programs. Particular algorithms such as sorting, searching, dynamic programming. NP complete problems. Students are expected to have knowledge of algorithms and data structures equivalent to C S 372.

Learning Outcomes

1. Prove algorithm correctness by loop-invariant Prove an algorithm to be incorrect by counterexamples Develop efficient divide-and-conquer algorithms Design and analyze binary search tree algorithms Construct dynamic programming solutions Prove the correctness of dynamic programming solutions by contraposition Traverse graphs efficiently Find paths in graphs efficiently Determine if a problem is NP-Complete or NP-Hard 1Basic concepts of quantum computing

C S 571. Programming Language Structure II**3 Credits (3)**

Formal semantics of programming languages. Students are expected to have knowledge of algorithms and data structures equivalent to C S 372, and knowledge of principles of programming languages equivalent to C S 471.

Learning Outcomes

1. Apply formal methods to semantics of a variety of programming language constructs Use structural operational semantics as a way to formalize the intended execution and implementation of languages Survey axiomatic semantics, which is useful in developing as well as verifying programs Learn simply-typed lambda calculus Explore more advanced programming language notions, such as types for imperative features and exceptions, parametric polymorphism, existential types for use in abstraction and module systems, and dependent types Become acquainted with recent research in topics such as concurrency, fault localization, or program repair

C S 573. Architectural Concepts II**3 Credits (3)**

Advanced topics related to computer architecture, guided by the current literature. Students are expected to have knowledge of computer architectures equivalent to C S 473 and of operating systems equivalent to C S 474. Crosslisted with: E E 564.

Learning Outcomes

1. Be able to explain the features in a modern multicore CPU architecture Be able to utilize hardware counter features of a CPU in performance evaluation Be able to explain the architecture of GPUs and their capabilities and drawbacks Be able to evaluate novel cutting-edge architectural features and designs Be able to present a research paper to an advanced audience

C S 574. Operating Systems II**3 Credits (3)**

Advanced topics related to operating system principles, guided by the current literature. Students are expected to have knowledge of computer architectures and operating systems equivalent to C S 473 and C S 474.

Learning Outcomes

1. Further an understanding of the principles of operating systems. Develop insight into process management and scheduling issues. Understand memory management operation. Develop an understanding of file system implementation and of multiple levels of hardware support and management. Develop a deep understanding of the concepts of cooperating processes, including communication, synchronization, and deadlock (detection and avoidance). Be able to evaluate operating system features. Develop an understanding of the distributed operating system environment.

C S 575. Artificial Intelligence II**3 Credits (3)**

Covers advanced theory and application of artificial intelligence. Concentration on several specific research areas, such as knowledge representation, problem solving, common-sense reasoning, natural language understanding, automated tutoring systems, learning systems. Students are expected to have knowledge of artificial intelligence equivalent to C S 475.

Learning Outcomes

1. Apply selected planning algorithms in solving problems Identify problems where knowledge representation and reasoning techniques are applicable Be able to apply answer set programming in problem solving Be aware of various advanced research topics in Artificial Intelligence

C S 579. Special Topics**1-6 Credits**

Topic announced in the Schedule of Classes.

C S 581. Advanced Software Engineering**3 Credits (3)**

Advanced tools and methods for developing large software systems. Topics include object-oriented modeling and design, component architectures, templates and generic programming, software configuration and revision control, static and dynamic analysis tools, model, checking, advanced testing, and verification. Students are expected to have knowledge of software engineering equivalent to C S 371.

Learning Outcomes

1. Be able to explain modern software development process ideas Be able to apply agile software development techniques in a project Be able to specify, design, and develop a complex software system in a team Be able to properly utilize both black box and white box testing techniques Be able to explain how unsound and incomplete formal methods can aid in system verification and validation Be able to utilize sound and complete formal methods to prove properties of a system

C S 582. Database Management Systems II**3 Credits (3)**

Advanced data models and abstractions, dependencies, implementations, languages, database machines, and other advanced topics. Students are expected to have knowledge of data base management systems equivalent to C S 482.

Learning Outcomes

1. Analyze storage and file structures of an RDBMS Analyze and apply indexing techniques of an RDBMS Analyze query evaluation approaches of an RDBMS Analyze the mechanisms of transaction management in an RDBMS

C S 583. Advanced Cryptography**3 Credits (3)**

This is an advanced cryptography course, which will cover cryptographic protocols such as zero-knowledge proofs, secret sharing schemes, secure two-party/multi-party computation, and more. We will also briefly cover real-world applications of these protocols. Students will also be exposed to recent research topics in cryptography (exact topics might vary every offering).

Prerequisite: At least a C- in C S 465.

Learning Outcomes

1. Understand advanced crypto primitives such as zero-knowledge proofs, fair exchange, verifiable encryption, k-of-n secret sharing, etc., and their security properties Understand the theoretical underpinnings of protocols such as attribute-based encryption/signatures, two-party/multi-party secure computation Given a real-world situation, be able to think of what protocols are best applicable in the scenario, and be able to reason about their security

C S 584. Computer Networks II**3 Credits (3)**

Advanced topics in computer networks. Covers advanced topics in networking, with emphasis on wireless, and IP networks. Students are expected to have knowledge of computer networks equivalent to C S 484, and of statistics equivalent to MATH 371 or MATH 470.

Learning Outcomes

1. Understand design of link layer protocols. Understand challenges and implementations for multimedia streaming. Be able to use basic security constructs in the networking context. Understand the concepts of edge and cloud computing Understand the concepts and challenges of Internet of Things Learn concepts of distributed networking Learn and evaluate future internet architectures

C S 586. Algorithms in Systems Biology**3 Credits (3)**

The course will introduce important algorithms and computational models used in systems biology to study molecular mechanisms for cellular dynamics, processes, and systems. Cellular processes, such as metabolism and signal transduction, are studied as systems and networks quantitatively from high throughput molecular measurements. The topics include molecular biological systems, network alignment, model simulation, network inference, model optimization, and hybrid models. Students will be able to construct models and analyze their properties in the context of molecular biological systems. Students are expected to have knowledge of algorithms and data structures equivalent to C S 372.

Learning Outcomes

1. Create mathematical representation of biological systems Infer biological network topology from observed omics data set Simulate the behavior of a biological system using a mathematical model Characterize behaviors of biological systems Estimate parameters in a biological system model Validate a model's statistical relevance given observed data

C S 587. Advanced Human-Centered Computing**3 Credits (3)**

Covers a range of methods available for performing research in the field of human-computer interaction in order to develop insights into effective human-centered designs of computing systems. Students will develop insights into how humans live, play, and work and best practices in system design.

Prerequisite: Consent of instructor or at least a C- in one of the following: C S 485/C S 515, SOCI 352, PSYC 430/PSYC 530, or ANTH 520.

Learning Outcomes

1. Describe, compare, and identify the relative and relevant merits of research methods for understanding people and/or evaluating research products. Use a variety of methods to enact human-centered computing research by proposing, developing, and conducting studies; analyzing data; and synthesizing results. Communicate understanding of people, designs, and evaluations through presentations, demos, and/or reports.

C S 589. Special Research Problems**1-6 Credits**

Faculty-supervised investigation, to culminate in a written report. May be repeated; maximum of 6 credits may be applied toward M.S. degree. Restricted to majors.

Prerequisite: written agreement with faculty supervisor.

C S 598. Master's Project**1-6 Credits**

Project-oriented capstone course to be completed by M.S. students under supervision of their advisor. Maximum of 6 credits may be applied toward M.S. degree. Restricted to C S majors.

Prerequisite: written agreement with instructor.

C S 599. Master's Thesis**1-6 Credits (1-6)**

Thesis to be developed by M.S. Students under supervision of their advisor. May be repeated for a maximum of 6 credits. Restricted to majors.

Prerequisite: consent of instructor.

C S 600. Pre-dissertation Research**1-15 Credits**

Pre-dissertation research.

C S 700. Doctoral Dissertation**1-15 Credits**

Dissertation.

CAST-CHILD ADVOCACY STUDIES

CAST 1110. Introduction to Child Advocacy**3 Credits (3)**

This is the introductory course for child advocacy studies (CAST). It covers different models for understanding child maltreatment, types and indicators of child maltreatment, controversial topics in the field, and issues and laws related to child maltreatment in various countries around the world. Students will develop critical thinking and analytical skills in assessing child maltreatment. Restricted to Dona Ana campus only.

Learning Outcomes

1. Demonstrate how to apply a model of critical thinking and analysis to child maltreatment issues.
2. Describe historical trends in child maltreatment and child advocacy.
3. Compare and contrast theories and models of child maltreatment.
4. Compare and contrast the indicators and consequences of different types of maltreatment.
5. Discuss cultural issues related to assessing and working with families.

CAST 2110. Professional and Systems Responses to Child Maltreatment**3 Credits (3)**

Course examines the professionals and systems that respond to allegations of child abuse and neglect. Includes the differences between civil and criminal proceedings; components of a court-worthy child abuse and neglect investigation; basic child forensic interviewing; an overview of child sex offenders; and current research and controversial issues affecting the field. Restricted to Dona Ana campus only.

Prerequisite(s): CAST 1110.

Learning Outcomes

1. Define neglect, abuse, and violence including psychological, emotional, and spiritual maltreatment.
2. Describe the interpersonal dynamic of violence and abuse, and the varied and changing types of violence and abuse.
3. Identify risk factors for various categories of child abuse in the general population and identify high-risk population.
4. Describe the physical and behavioral health effects of violence, neglect, and abuse, including mental health impacts.
5. Identify the barriers to help-seeking for victimized children.
6. Describe models for intervention and prevention of child maltreatment.
7. Discuss various factors that affect children's motivation for disclosure.
8. Discuss how values, attitudes, beliefs, and experiences related to child maltreatment may effect interaction with children and families
9. Describe best practice in the investigation of maltreatment reports.
10. 1 Identify methods utilized to evaluate the credibility of witnesses.
11. 1 Describe the processes of collecting corroborative evidence beyond "hard science" items such as DNA.
12. 1 Identify strategies for engaging non offending caregivers in providing appropriate support for children who have disclosed maltreatment.
13. 1 Identify commonly available community resources that may ensure a safe environment for children disclosing maltreatment.
14. 1 Describe strategies for engaging appropriate professionals to ensure children's' well-being following a disclosure of maltreatment.
15. 1 Discuss cultural or developmental factors that may impact the well-being of children reporting maltreatment.
16. 1 Discuss the scope of confidentiality in child maltreatment cases.
17. 1 Describe why all children's safety should be the priority during an investigation.
18. 1 Describe the typology of sex offenders in child maltreatment cases.
19. 1 Define the grooming process used by sex offenders.
20. 2 Discuss circumstances that may cause children to recant the disclosure of child maltreatment.
21. 2 Discuss how values, attitudes, beliefs, and experiences related to child maltreatment may effect interaction with children and families.
22. 2 Describe legislative and agency mandates of common MDT team members.
23. 2 Discuss the scope of authority and resources among MDT members.
24. 2 Discuss the importance of maintaining appropriate professional boundaries between team members.
25. 2 Identify the kinds of information that must be shared within the MDT team during an investigation or litigation.
26. 2 Identify common educational resources needed by MDTs.
27. 2 Describe ways to engage community stakeholders in preventing, investigating, and intervening in cases of child maltreatment.
28. 2 Accurately describe the steps in the process following a report of child maltreatment.
29. 2 Describe common questions asked by children and families during a child abuse investigation and provide possible answers.
30. 3 Discuss the various members of the family systems who may be involved in child maltreatment cases and describe what information will be important to them.
31. 3 Identify the professionals who should be involved in working with the family system during an investigation.
32. 3 Describe the importance of providing frequent updates to the family system during the investigation, and provide several examples of how the family system could be kept informed.
33. 3 Describe how the legal process works in both civil and criminal proceedings.
34. 3 Explain how community awareness of the MDT process can foster a positive attitude toward reporting child maltreatment.
35. 3 Discuss how to educate community organizations on how they can help foster resiliency in child victims and their families.
36. 3 Explain the importance of community engagement in reporting and responding to child maltreatment as well as prevention efforts.
37. 3 Identify and describe state laws that govern confidentiality with respect to reporting of child maltreatment and its exceptions.
38. 3 Discuss the importance of professional honesty in working with children involved in cases of maltreatment.
39. 3 Describe the ethical guidelines of common disciplines involved in MDTs, and identify possible conflicts for each.

CAST 2120. Prevention, Trauma Informed Treatment and Advocacy**3 Credits (3)**

The purpose of this course is to prepare students to recognize the effects of child maltreatment and apply interventions strategies for children and their families. Multidisciplinary approaches to prevention, advocacy and treatment of child maltreatment survivors will be presented and discussed. Topics include violence prevention research, interdisciplinary family programs, how to advocate for survivors of child abuse, case management, working with families, mental health service and controversial issues.

Prerequisite(s): CAST 1110.

Learning Outcomes

1. Be able to create goals and identify services needed by maltreating families.
2. Understand the development of psychopathology in the child related to maltreatment
3. Understand the documented effects of maltreatment such as depression, anxiety, sexualized behavior, neurobiological, suicide, and damaged ego development/ sense of self
4. Describe interdisciplinary family intervention programs such as in-home parenting programs, Stay Safe program, Incredible Years, Project Safe Care, ECFE, etc.
5. Explain mental health assessment, diagnosis, treatment, and availability of services for the survivor, the family and the offender.
6. Understand PTSD, reactive attachment disorder and other trauma responses; assessment and treatment
7. Describe issues for adolescent and adult survivors of maltreatment such as eating disorders, low self-esteem and personality disorders.
8. Identify professional issues related to maltreatment such as how to approach families and an awareness of the effect of working with families on the professional.
9. Discuss the role of interdisciplinary approaches to child maltreatment intervention in planning for the future and advocating for the rights of children
10. 1 Explain violence prevention research, strategies, and programs
11. 1 Understand how battering, chemical dependency/maltreatment, mental illness, chronic illnesses, disabilities, and other family stressors influence intervention with survivors, their families and the offender
12. 1 Explain how issues of race, class, sexual orientation, religion, gender and social justice can influence professional practice with children who have been maltreated
13. 1 Explain the role of the child advocate in addressing social justice issues associated with intervention and prevention of child maltreatment, and in promoting social change that will result in fewer incidents of child maltreatment.

CAST 301V. Introduction to Child Advocacy**3 Credits (3)**

Historical review and evolution of child welfare policies, initiatives and factors that influence child welfare service. Child welfare policies and services specific to the state of New Mexico are infused throughout the course. Taught with MSW 590. Cannot receive credit for CAST 301 and MSW 590.

CAST 302. Professional and Systems Responses to Child Maltreatment**3 Credits (3)**

Course examines the professionals and systems that respond to allegations of child abuse and neglect. Includes the differences between civil and criminal proceedings; components of a court-worthy child abuse and neglect investigation; basic child forensic interviewing; an overview of child sex offenders; current research and controversial issues effecting the field. Students majoring in social work, criminal justice, education, sociology, psychology, nursing, and other areas will enhance their capacity to strengthen the safety net that protects children.

Prerequisite(s): CAST 301V.

CAST 303. Prevention, Trauma Informed Treatment and Advocacy**3 Credits (3)**

The purpose of this course is to prepare students to recognize the effects of child maltreatment and to apply intervention strategies for children and their families. Multidisciplinary approaches to prevention, advocacy, and treatment of child maltreatment survivors will be presented and discussed. Topics include violence prevention research, interdisciplinary family programs, how to advocate for survivors of child abuse, short- and long-term effects of child abuse, case management, working with families, mental health services and controversial issues. Crosslisted with: FCST 300

Prerequisite(s): CAST 301V.

CAST 501. Introduction to Child Advocacy**3 Credits (3)**

This is the introductory course for child advocacy studies (CAST). It covers different models for understanding child maltreatment, types and indicators of child maltreatment, controversial topics in the field, and issues and laws related to child maltreatment in various countries around the world. Students will develop critical thinking and analytical skills in assessing child maltreatment at the graduate level.

CCDE-DEVELOPMENTAL ENGLISH

CCDE 105 N. Effective Communication Skills**4 Credits (3+2P)**

Instruction and practice in basic communication, to include written and oral presentations. Develops thinking, writing, speaking, reading, and listening skills necessary for successful entry to college and university classes. Provides laboratory. RR applicable.

CCDE 110 N. General Composition**4 Credits (3+2P)**

Instruction and practice in preparation for college-level writing. Students will develop and write short essays. Provides laboratory. May be repeated up to 4 credits. Traditional Grading with RR. Restricted to Community Colleges campuses only.

CCDM-DEVELOPMENTAL MATHEMATICS

CCDM 100 N. Mathematics Preparation for College Success**1-4 Credits**

Mathematics skills course designed for college students with math skills insufficient for success in CCDM 103N. May be repeated for a maximum of 4 credits. RR applicable.

CCDM 103 N. Pre-Algebra**4 Credits (3+2P)**

Fundamental mathematics operations and arithmetic computations. Introduction to algebra and applied geometry. Provides laboratory and individualized instruction. RR applicable.

CCDM 105 N. Mathematics Preparation and Pre-Algebra**5 Credits (4+2P)**

A total immersion course that combines CCDM 100N and CCDM 103N using tutorials, manipulatives, and classroom instruction. Completion of this class is equivalent to the completion of CCDM 100N and CCDM 103N. Restricted to: Community Colleges only.

CCDM 107 N. Pre-Algebra Fast-Track**1 Credit (1)**

An intensive review of fundamental mathematics operations and arithmetic computations. A review of introductory concepts of algebra and applied geometry. Students must meet eligibility requirements (Math Placement Exam). Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

Prerequisite(s): Math Placement Exam.

CCDM 108 N. Beginning Algebra Fast-Track**1 Credit (1)**

An intensive review of fundamental algebra topics including algebraic expressions, solving linear and quadratic equations, factoring, radicals, exponents. Students must meet eligibility requirements (math placement exam or completion of CCDM 107N). Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

Prerequisite(s): Math Placement Exam; or passing score in CCDM 105 N or CCDM 103 N, or CCDM 107 N.

CCDM 112 N. Developmental Algebra I**4 Credits (3+2P)**

Fundamental algebra operations, algebraic expressions, solving linear equations, systems of equations and applications of linear equations. Introduction to exponents and polynomials. Provides laboratory instruction. Completion of CCDM 112N and CCDM 113N is equivalent to completion of CCDM 114N. Graded: Traditional with RR. Traditional Grading with RR. Restricted to Community Colleges campuses only.

Prerequisite(s): Grade of C or better in CCDM 103N or CCDM 105N or adequate placement score.

CCDM 113 N. Developmental Algebra II**4 Credits (3+2P)**

Fundamental algebra operations, polynomials, factoring, solving quadratics by factoring, rational expressions, exponents and radical expressions (continuation of CCDM 112N). Provides laboratory instruction. Completion of CCDM 112N and CCDM 113N is equivalent to completion of CCDM 114N. Graded: Traditional with RR. Restricted to: Community Colleges only.

Prerequisite(s): Grade of C or better in CCDM 112N or consent of instructor.

CCDM 114 N. Algebra Skills**4 Credits (3+2P)**

Fundamental algebra operations: algebraic expressions, solving linear and quadratic equations, factoring, radicals, exponents. Provides laboratory and individualized instruction. Completion of CCDM 114N meets basic skills requirement. Graded: Traditional with RR. Traditional Grading with RR. Restricted to Community Colleges campuses only.

Prerequisite(s): C or better in CCDM 103N or CCDM 105N or adequate placement score.

CCDR-DEVELOPMENTAL READING

CCDR 103 N. Comprehensive Reading Development**4 Credits (3+2P)**

Provides integration of basic reading skills, including vocabulary development, text comprehension, and critical reading skills. Course earns institutional credit but will not count towards degree requirements. May be repeated up to 4 credits. Traditional Grading with RR. Restricted to Community Colleges campuses only.

Prerequisite(s): Appropriate placement score.

CCDR 105 N. Fundamentals of Academic Reading.**3 Credits (2+2P)**

Fundamentals of academic reading skills. Emphasis on vocabulary development and text comprehension through literature based instruction. Course earns institutional credit but will not count towards degree requirements. Graded: Traditional with RR. May be repeated up to 3 credits. Traditional Grading with RR. Restricted to Community Colleges campuses only.

Prerequisite(s): Appropriate placement score.

CCDR 110 N. Effective College Reading**3 Credits (2+2P)**

Provides a variety of strategies for effective reading and studying at the college level. Emphasis on reading across disciplines. Course earns institutional credit but will not count towards degree requirements. Graded: Traditional with RR. May be repeated up to 3 credits. Traditional Grading with RR. Restricted to Community Colleges campuses only.

Prerequisite(s): Appropriate placement score.

CCDS-DEVELOPMENTAL SKILLS

CCDS 109 N. Study Skills for Reading**1-3 Credits**

Individualized reading skill strategies necessary for success in college classroom. May be repeated for a maximum of 3 credits. Graded traditional or S/U.

CCDS 111 N. Study Skills for Math**1-3 Credits**

Individualized study skill strategies necessary for success in the math classroom. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

CCDS 113 N. Study Skills for English**1-3 Credits**

Individualized study skill strategies necessary for success in the composition classroom. May be repeated for a maximum of 3 credits.

CCDS 119 N. College Reading and Writing**4 Credits (4)**

Instruction and practice in preparation for college-level reading and writing. Students will develop and write essays, work on the writing process, and learn to read and analyze college-level texts. Traditional Grading with RR.

Prerequisite(s): Appropriate placement test score.

Learning Outcomes

1. Practice the reading and writing process through activities such as pre- reading/writing, annotating, drafting, summarizing, peer reviewing, discussing, revising, proofreading, journaling, researching, and citing.
2. Infer and interpret meanings in various texts through activities such as summarizing, annotating, journaling, reflecting, and textual analysis.

CEPY-COUNSELING & EDUCATIONAL PSYCHOLOGY

CEPY 1120G. Human Growth and Behavior**3 Credits (3)**

Introduction to the principles of human growth and development throughout the life span.

Learning Outcomes

1. Students will demonstrate an understanding of the scientific study of processes of change and stability throughout the human lifespan (i.e. Human Development).
2. Students will demonstrate a familiarity with the generally recognized stages of human development from conception to death.
3. Students will be able to demonstrate understanding of the normal and exceptional patterns of human development.
4. Students will be able to demonstrate understanding of recent research development regarding the identified stages of human development as they relate to gender and multicultural issues

CEPY 1150. Career Excellence**1 Credit (1)**

Professional career curriculum to assist students in developing an understanding and ability to articulate who they are as emerging professionals through personal assessment activities. The focus will be on providing students with tools and strategies for reflection, planning, and goal-setting. Course does not count toward CEP minor. Spring only course offering. Restricted to: College of Education Majors only majors. Restricted to Las Cruces campus only.

Learning Outcomes

1. Demonstrate an understanding of the relationship between academic and professional career success. Express a familiarity with professionalism and career culture and communicate a comprehension of various professional career skills. Apply material learned to other aspects to professional excellence. Develop a career life plan that will highlight goals, taking into account life circumstances. Become competent in appropriate professional communication.

CEPY 1160. Academic Excellence**1 Credit (1)**

The course is designed to provide you students with a foundation in their personal academic process. The course will assist students in developing an understanding and ability to articulate who they are as beginning college students through personal assessment activities. The focus will be on providing students with tools and strategies for reflection, planning, and goal-setting. Topics discussed will include time management, study skills, test taking skills, stress management, motivational and academic discipline skills, interpersonal skills and college survival skills. We intend for this to be a supportive, respectful and collaborative environment where everyone can learn and grow. Fall only course offering. Restricted to: College of Education majors.

Learning Outcomes

1. Students will be able to demonstrate an understanding of the relationship between time management and academic success. Students will be able to express a familiarity with college culture. Students will be able to communicate a comprehension of study skills and test taking strategies. Students will be able to apply material learned to other aspects to enhance academic excellence. Students will be able to develop an academic life plan that will highlight goals, taking into account life circumstances. Become competent in appropriate academic communication.

CEPY 2110. Learning in the Classroom**3 Credits (3)**

This class introduces you to the basic principles of learning, including cognition, motivation, and assessment. You will examine the relationships between theory, research, and practice in learning, memory, child development, motivation, and educational assessment for the school setting. This course will provide the student with concepts and principles of educational psychology that will form a framework for thinking about learning and instruction and how theories of learning are connected to classroom situations

Learning Outcomes

1. Define learning and compare and contrast the factors that cognitive, behavioral, and humanistic theories believed to influence the learning process, giving specific examples of how these principles could be used in the classroom.
2. Observe and reflect upon the teaching learning processes in economically, socially, culturally and educationally diverse classroom populations in order to develop a current understanding of students and families in public and private school.
3. Discuss how theories of information processing and cognitive theories of learning can impact memory, study strategies, and how certain teaching techniques can help students learn.
4. Compare teacher-centered and student-centered approaches to learning, and to identify a positive learning environment.
5. Identify various methods to motivate students and create effective learning environments.
6. Use major concepts of child and adolescent development, human learning, and social and cultural influences in planning and implementing classroom instruction, strategies, and management.
7. Evaluate the best means of accommodating instruction to meet individual needs and differences.
8. Students will examine how learning style, cultural and social issues and learning disabilities impact the learner's effectiveness in the classroom setting.
9. Explain different types of assessment used to assess learning and provide examples of effective assessment practices.
10. 1Discuss the relationship between motivation and classroom management

CEPY 2120. The Preschool Child**3 Credits (3)**

Survey of psychological development from conception to age five.

Learning Outcomes

1. Demonstrate an understanding of major theories of early childhood development
2. Demonstrate an understanding of recognized stages of human development from prenatal to preschool years
3. Explore cultural influences that may create variability in human development
4. Apply major theories to themselves and reflect on their early childhood development.

CEPY 2130. Adolescence - School Setting**3 Credits (3)**

This course is designed to present the student with an introduction to the area of adolescent development with an emphasis on the positive aspects of this life stage. Students will be encouraged to be reflective on the topics presented in class that will include issues on diversity, culture, health, and well-being, emerging adulthood and suggestions for improving the lives of adolescents.

Learning Outcomes

1. Students will become knowledgeable about the historical background of adolescent development.
2. Students will become knowledgeable about the major theories related to adolescence.
3. Students will evaluate different developmental theories and their fit across cultures as you reflect on your personal experiences through discussions and videos you will watch.
4. Students will identify key developmental milestones, conflicts, and concepts of each chapter presented by utilizing critical thinking skills as you complete summary questions.
5. Students will define relevant terms, ideas, and concepts in the study of adolescent development through quizzes and homework assignments.

CEPY 2140. Explorations of Counseling & Community Psychology**3 Credits (3)**

An introduction and exploration of various career options and functions within the mental health disciplines to aid in professional development. Emphasis will be placed on depth and scope of the choices available including research, teaching, community work, public policy, and clinical work and prevention (e.g. counseling, psychotherapy, assessment, consultation). May be repeated up to 6 credits.

Learning Outcomes

1. Acquire knowledge of historical and contemporary issues which affect the provision of mental health services by members of diverse mental health disciplines including clinical, counseling, school, and community psychologists, clinical mental health counselors, and others.
2. Acquire knowledge pertaining to education and training requirements for various disciplines.
3. Acquire survey-level knowledge of psychological assessment, measurement, and treatment.
4. Acquire survey-level knowledge of various inquiry approaches applicable to research pertaining to mental health and well-being—both at the individual and community level.
5. Understand the mental health recovery model and explore the lived experiences of individuals with mental health problems in contemporary society.
6. Understand the principles of sensitivity and respect for diverse populations as integral to professional practice in diverse mental health disciplines and settings, including practice in educational and community settings.

CEPY 2140H. Exploration of CCP**3 Credits (3)**

An exploration of careers, activities, & techniques in counseling, school, and community psychology. Taught with CEPY 2140 with differentiated instruction and/or independent project to be determined. Restricted to Las Cruces campus only.

Learning Outcomes

1. Demonstrating knowledge of the basic functions of careers in counseling, community and school psychology.
2. Establishing a familiarity with the educational requirements necessary for a career in counseling, community, and school psychology.
3. Acknowledging and enhancing sensitivity and respect for diverse populations in various counseling areas; including educational and community settings.
4. Beginning to develop the interpersonal skills needed to succeed in the counseling, community and school psychology professions
5. .

CEPY 300V. Human Relations Training**3 Credits (3)**

Gain skills, knowledge, and sensitivity for living and working with others.

CEPY 320. Sex Roles in Education**3 Credits (3)**

Physiological, psychological, and political aspects of sex role socialization and the effects of these factors on personal development.

CEPY 420. Introduction of Mindfulness Practice**3 Credits (3)**

Students will learn about contemplative practices through learning and participation in various mindfulness practices. Engages students in a practice or experience that leads to reflection and, thus, acquired knowledge about themselves, others, and group functioning.

CEPY 451V. Introduction to Counseling**3 Credits (3)**

Principles of counseling for nonmajors.

CEPY 455. Addictions Prevention and Recovery**3 Credits**

Understanding addictions process, prevention, and recovery, including biological, interpersonal and sociological influences, and intervention strategies. Taught with CEPY 555.

CEPY 461. Family Guidance**3 Credits (3)**

Systems based guidance procedures for enhancing family strengths and development, and application of family guidance procedures for prevention and remediation of problems. Taught with CEPY 561.

Prerequisite(s): CEPY 1120G.

CEPY 495. Psychology, Multiculturalism and Counseling**3 Credits (3)**

Understanding social identities such as race, ethnicity, sexual orientation, age, social class and spirituality as it relates to psychosocial development, academic achievement and counseling.

CEPY 495 H. Psych., Multiculturalism & Counseling**3 Credits (3)**

Understanding social identities such as race, ethnicity, sexual orientation, age, social class and spirituality as it relates to psycho-social development, academic achievement and counseling. Taught with CEPY 495. Differentiated instruction/independent project to be determined.

CEPY 498. Internship in Counseling & Community Psychology**1-6 Credits (1-6)**

Students will explore in more depth the fields of counseling, community, and school psychology professions by completing an internship. Through the completion of the internship students will gain hands on work experience, enhance sensitivity for respect with working with diverse populations, and hone their interpersonal skills needed to succeed in the counseling, community, and school psychology professions. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: CCP majors.

CEPY 499. Independent Study**1-6 Credits**

Individual study directed by consenting faculty.

CEPY 503. Introduction to Counseling**3 Credits (3)**

Overview of counseling theory, techniques, ethics, and professional issues. Same as CEPY 451V. This course is open to all majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: C G, CMHC, CEP, SPSY majors.

CEPY 505. Appraisal of Psychoeducational Achievement in a Diverse Society**3 Credits (3)**

Advanced theory and use of norm and criterion referenced instruments in the classroom: planning of prescriptive and educational programs. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Define assessment and describe the steps in the assessment process. *Practitioner Describe a flowchart for the screening/referral/evaluation process according to NewMexico regulations. *Research, Pedagogy Describe the uses of criterion and norm-referenced instruments as well as alternative forms of assessment (observation, curriculum based assessment and informal techniques). *Practitioner, Effectiveness Identify and discuss instruments/assessment procedures appropriate for use in identifying academic achievement, learning aptitude, vocational aptitude, performance in specific areas, and social emotional functioning. *Effectiveness Identify appropriate instruments/assessment procedures required for the exceptionality recognized under New Mexico regulations. *Effectiveness Administer and score 24 instruments in reading, math, written language and processing and to utilize these results in completing test interpretations and psycho-educational reports. *Effectiveness Interpret, report, and utilize assessment data in special education programming. *Reflection, Pedagogy Determine the assessment needs of students who are speakers of languages other than English. *Diversity Evaluate a test, write a review, and demonstrate and explain it in class. *Practitioners 1 Synthesize information gathered through comprehensive assessment procedures into a practical whole. *Assessment, Evaluation

CEPY 511. Introduction to Inferential Statistics**3 Credits (3)**

An introduction to the theories and techniques of inferential statistics as applied to education and psychology. Includes sampling distributions, confidence intervals, t-test, correlation, and chi-square. Intended primarily for post-baccalaureate students. Both hand calculation and computer packages will be employed. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: C G, CMHC, SPSY, CEP, NURS, FCS majors.

CEPY 512. Human Development**3 Credits (3)**

Theory and research regarding cognitive, social, and emotional development across the lifespan with emphasis on enhancing human development. Non majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CMHC,C G,CEP,SPSY majors.

CEPY 515. Learning Theory**3 Credits (3)**

Survey and comparison of theory and research regarding human learning as they apply to development, education, and counseling. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Crosslisted with: CEPY 615

Learning Outcomes

1. Students can expect to gain an understanding of a variety of learning theories. Students will learn the historical context of each theory and the interactions between the theories. Students will learn how learning theories stimulate scholarly activity, and their impact on educational practice and psychology. Students can expect to gain an understanding of the relationships of theory to practice, their origin, their strengths and limitations, and their empirical bases. Students will learn the validity of learning theories to a multicultural society. Students will be expected to acquire the ability to evaluate the quality of learning theories more critically as foundations for instructional theory and counseling strategy.

CEPY 517. Multicultural Counseling**3 Credits (3)**

Understanding age, gender, ethnicity, socioeconomic status and culture in relation to human development, education, and counseling. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Awareness will be accomplished by assisting students in the exploration and identification of students' individual cultural assumptions(i.e. WORLDVIEW) in relation to people diverse from themselves. This will be accomplished via modeling, observations, readings, group processing and other experiential exercises. Knowledge will be accomplished by exploring the question, "What is Multiculturalism" in its many forms, roles, and relationships. It will begin with the examination of the psychology of multiculturalism and the requirements of cultural competency in intercultural communications. In addition, a review of various theories of diversity (i.e. identity development, acculturation, worldview, bilingualism, and disability, to name a few) will be embedded in readings, assignments, and class discussion. Exploration of various diverse populations will also be integrated into this course. Skills will focus on "How to" of multicultural competency and its practical applications to everyday interactions. Students will learn about basic issues related to assumptions that are used in communication intra-cultural and intercultural interactions.

CEPY 519. Psychology of Social Identities**3 Credits (3)**

Theory, research and practice from feminist and multicultural perspectives will examine the integration of social identities such as gender, sexual orientation, race, ethnicity, age, social class, spirituality, and ability in relation to counseling psychology. Same as CEPY 619. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Heighten the student's awareness of multiple social identities, worldview beliefs, and other within-group variables. Aid the student in developing a knowledge base in the realms of social psychology and multicultural research, culturally-responsive interventions and professional practice. Provide experiences for the application of this awareness and knowledge as a means of developing the skills necessary for being a reflective decision-maker, creative problem solver, and responsive service provider for diverse individuals in a variety practice settings and intervention modalities.

CEPY 520. The Art & Science of Mindfulness**1-3 Credits (1-3)**

In this course students will learn about contemplative practices by learning about and participating in various mindfulness practices for self-care and to increase well-being. Students will learn about psychological theories and research that support the use of mindfulness in helping others increase their well-being. Students will learn how to teach mindfulness to others. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. To learn about mindfulness practices for self-care. To incorporate mindfulness practices into daily life. To learn how mindfulness practices may increase well-being. To increase students' knowledge of mindfulness theory and research. To develop skills to teach mindfulness to others.

CEPY 522. Organization and Administration of School Counseling Services**3 Credits (3)**

Procedures for establishing and maintaining counseling programs in the schools. Professional and ethical issues in school counseling and group laboratory experience to enhance self-awareness and interpersonal skills for effective professional relationships. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Students will learn about the history of school guidance/counseling and apply that knowledge to assess current trends and the quality of services provided in counseling programs with respect to the changing needs of today's diverse systems. Students will learn to develop and administer a school guidance/counseling program according to professional and ethical standards developed by The American School Counseling Association's (ASCA) National Model of School Counseling. Students will be introduced to a variety of technology-based career development applications, educational resources and research to promote academic advancement and social-emotional well-being. Additionally, students will explore the use of technology designed to implement, monitor, and evaluate a comprehensive school counseling program. Students will gain an understanding of effective teamwork within a school setting including theories, models, and processes of consultation and change with teachers, administrators, and other school personnel. Students will explore strategies and methods of advocacy with families and communities designed to empower them to address issues of social justice within an educational system. Students will build a framework for facilitating school-level individual and group counseling services. They will analyze and interpret trends in academic achievement by understanding the cultural context of the school environment as it relates to groups of students and to institutional functioning.

CEPY 524. Professional Issues in Mental Health Counseling**3 Credits (3)**

History, roles, organizational structures, settings, ethics, standards, laws, and credentialing related to mental health counseling. Group laboratory experience to enhance self-awareness and interpersonal skills for effective professional relationships. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Students should understand and demonstrate ethical decision-making processes and resources. Students should demonstrate understanding of the expectations and requirements of their new professional identity. Students should demonstrate knowledge of history and philosophy of the counseling profession and its specialty areas. Students should demonstrate understanding of the multiple professional roles and functions of counselors across specialty areas, and their relationships with human service and integrated behavioral health care systems, including inter-agency and inter-organizational collaboration and consultation. Students should demonstrate knowledge and understanding of counselors' roles and responsibilities as members of interdisciplinary community outreach and emergency management response teams. Students should demonstrate knowledge and understanding of the role and process of the professional counselor advocating on behalf of the profession; advocacy processes needed to address institutional and social barriers that impede access, equity, and success for clients.

CEPY 532. Research Methods**3 Credits (3)**

Develop research and program evaluation including critical literature review, generating questions, quantitative and qualitative methodology, analysis, and writing proposals. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Students will understand how to critically evaluate research relevant to the practice of clinical mental health counseling. Become knowledgeable of models of program evaluation for clinical mental health programs. Demonstrate knowledge of evidence-based treatments and basic strategies for evaluating counseling outcomes in clinical mental health counseling. Apply relevant research findings to inform the practice of clinical mental health counseling. Develop measurable outcomes for clinical mental health counseling programs, interventions, and treatments. Analyze and use data to increase the effectiveness of clinical mental health counseling interventions and programs.

CEPY 540. History and Systems of Psychology**3 Credits (3)**

History and systems of psychology related to contemporary applied psychology. This course will focus largely on the history of modern psychology and on the major systems (or schools) of psychology. Restricted to: SPSY, CEP, C G majors.

Learning Outcomes

1. Effectively discuss historical and philosophical antecedents and contexts of psychology and compare and contrast multiple perspectives on important issues in this field. Apply global awareness to this topic (e.g., intersecting identities; how interlocking oppressions vary by epoch, continent, nation, cultural group, region, organizational system; etc.) Develop professional arguments; support opinions with reason and personal experience; and demonstrate higher order thinking and creative engagement (for definitions of terms like analyze, synthesize, evaluate, and create. Develop thoughtful inquiries that inspire scholarly discourse and further investigation; consider which types of evidence are needed to find answers; and effectively facilitate respectful, thought-provoking discussions of controversies and debatable topics.

CEPY 542. Appraisal Theory and Technique**3 Credits (3)**

Selection, administration, and interpretation of tests and other assessment methods. Topics include reliability, validity, norms, cultural factors, and ethics related to appraisal. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CEP graduate majors only. majors.

Learning Outcomes

1. Basic concepts of standardized and non-standardized testing and other assessment techniques, including norm-referenced and criterion-referenced assessment, environmental assessment, performance assessment, individual and group test and inventory methods, psychological testing, and behavioral observations (II-G-7-b) Statistical concepts, including scales of measurement, measures of central tendency, indices of variability, shapes and types of distributions, and correlations (II-G-7-c) Reliability (i.e., theory of measurement error, models of reliability, and the use of reliability information) (II-G-7-d) Validity (i.e., evidence of validity, types of validity, and the relationship between reliability and validity) (II-G-7-e) Social and cultural factors related to the assessment and evaluation of individuals, groups, and specific populations (II-G-7-f) Ethical strategies for selecting, administering, and interpreting assessment and evaluation instruments and techniques in counseling (II-G-7-g)

CEPY 549. Indigenous Research Methods**3 Credits (3)**

Students will gain an understanding of ethical and respectful research practices from an Indigenous/culturally appropriate vantage. They will thoroughly examine the works of Native/Tribal and Indigenous scholarship. Additionally, safeguards for ethical research practices with native populations will be thoroughly examined with regard to intent, practice, and integration of outcome. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: C G, CMHC, CEP, SPSY majors.

CEPY 550. Counseling Theory and Technique**3 Credits (3)**

Major theories of counseling with an emphasis on development of the ability to offer theory-based counseling and consultation. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Students will demonstrate the ability to foster counseling and helping relationships that are based on studies of the counseling process in a multicultural society and include an orientation to wellness and prevention as desired counseling goals. Students will be able to apply theories and models of counseling, including a systems approach, to conceptualize clients, help select appropriate counseling interventions, and so the student begins to develop a personal model of counseling based on current professional research and practice with the aid of processes provided in this course. Students will demonstrate the ability to foster counseling and helping relationships that include essential interviewing, counseling, and case conceptualization skills as well as developing the ability to provide professional feedback in consultation with other trainees. Students will demonstrate the ability to foster counseling and helping relationships that include developmentally relevant counseling treatment or intervention plans, the development of measurable outcomes for clients, and evidence-based counseling strategies and techniques for prevention and intervention. Students will be able to demonstrate counselor characteristics and behaviors that influence helping processes. Students will demonstrate knowledge and ability to provide suicide prevention, crisis intervention, trauma-informed, and community-based strategies, such as Psychological First Aid.

CEPY 551. Diagnosis and Treatment Planning**3 Credits (3)**

Appraisal and conceptualization of mental disorders and other problems through diagnostic interviewing using the DSM. Treatment planning for counseling with children, adolescents, and adults. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Students will know the etiology, the diagnostic process and nomenclature, treatment, referral, and prevention of mental and emotional disorders. Students will know the principles, models, and documentation formats of biopsychosocial case conceptualization and treatment planning. Students will understand current literature that outlines theories, approaches, strategies, and techniques shown to be effective when working with specific populations of clients with mental and emotional disorders. Students will understand the basic classifications, indications, and contraindications of commonly prescribed psychopharmacological medications so that appropriate referrals can be made for medication evaluations and so that the side effects of such medications can be identified. Students will know the principles of the diagnostic process, including differential diagnosis, and the use of current diagnostic tools, such as the current edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM). Students will understand the established diagnostic criteria for mental and emotional disorders, and describes treatment modalities and placement criteria within the continuum of care. Students will know the impact of co-occurring substance use disorders on medical and psychological disorders. Students will understand the relevance and potential biases of commonly used diagnostic tools with multicultural populations. Students will understand appropriate use of diagnosis during a crisis, disaster, or other trauma-causing event. 1 Students will be able to differentiate between diagnosis and developmentally appropriate reactions during crises, disasters, and other trauma-causing events.

CEPY 552. Career/Life Planning and Vocational Assessment**3 Credits (3)**

Vocational choice theories, relationship between career choice and life style, sources of occupational and educational information, and approaches to decision making and values clarification. Laboratory involves supervised interpretation of vocational assessment. This course is open to all majors. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CEP graduate majors.

Learning Outcomes

1. Career development theories and decision-making models. Career, vocational, educational, occupational and labor market information resources, and career information systems. Career development program planning, organization, implementation, administration, and evaluation. Interrelationships among and between work, family, and other life roles and factors, including the role of multicultural issues in career development. Career and educational planning, placement, follow-up, and evaluation. Assessment instruments and techniques relevant to career planning and decision making. Career counseling processes, techniques, and resources, including those applicable to specific populations in a global economy.

CEPY 554. Counseling Theory and Techniques for School Psychologists**3 Credits (3)**

Major theories of counseling with an emphasis on development of the ability to offer theory-based counseling and consultation. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: SPSY, CMHC, C G, CEP majors.

CEPY 556. Addictions Counseling**3 Credits (3)**

Emphasis on alcohol and other psychoactive substance abuse. Also includes eating disorders, gambling, and other addictive behaviors. Covers review of psychopharmacology, assessment, and diagnosis with the major focus on treatment and professional issues. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Recognize the potential for substance use disorders to mimic and coexist with a variety of medical and psychological disorders. Know the disease concept and etiology of addiction and co-occurring disorders. Identify standard screening and assessment instruments for substance use disorders and process addictions.

CEPY 558. Child and Adolescent Counseling Theory and Technique**3 Credits (3)**

Counseling theory and technique applied to children and adolescents from a developmental perspective in school and mental health settings. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Students will demonstrate understanding of their psychosocial and cultural context and how such phenomena influence their values, beliefs and, therefore, theoretical orientation to counsel children and adolescents. Students will examine and apply critical perspectives related to counseling children and adolescents. Students will compare and contrast various theoretical perspectives in the area of counseling children and adolescents. Students will develop a knowledge base leading toward becoming a culturally responsive practitioner in the area of counseling with individuals from a variety of diverse backgrounds. Students will identify, describe, and apply legal and ethical issues relevant to practice in the area of counseling children and adolescents in various settings. Students will collaborate with others in the process of developing relevant treatment plans and providing counseling services to children and adolescents in diverse settings.

CEPY 562. Family Therapy Theory and Technique**3 Credits (3)**

Major theories of family therapy and associated assessment, intervention and evaluation techniques. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Students will be able to explain a systems perspective and differentiate family and other systems theories and major models of family and related interventions. Students will be able to demonstrate and apply an understanding of the family life cycle and impact on family and individual functioning. Students will be able to prepare and utilize various forms of assessment for families and couples, including observation, collection of collateral information, and interviewing. Students will be able to illustrate awareness of and skill in the use of formal and informal assessment measures used in family and couple counseling. Students will be able to summarize evidence-based interventions and treatments for family and couple counseling. Students will be able to analyze multicultural counseling theories and techniques for diverse family types and apply multicultural and family theories to one's own experience. Students will be able to demonstrate an ability to communicate and relate effectively with families and couples. Students will be able to describe ethical issues related to counseling families and couples and be able to identify a process to make sound judgments.

CEPY 563. Primary Care Psychology**3 Credits (3)**

Didactic and experiential learning in primary care psychology issues. Through this course students will learn about the cultural necessity of the integration of mental and physical health issues and multidisciplinary collaboration. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: C G,SPSY,CMHC,MSW,CEP,MPH majors.

CEPY 566. Group Work Theory and Technique**3 Credits (3)**

Didactic and experiential learning in group theory and practice. Laboratory involves experiences in group participation and leadership. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CEP graduate majors.

Learning Outcomes

1. Provide students with an intellectual understanding of group work theory and technique. Provide students with an experiential understanding of group work. To help students develop specific group facilitation competencies

CEPY 569. Indigenous Counseling Internship**1-6 Credits (1-6)**

The primary purpose for this course is to provide students with the opportunity to study and practice under a well-known and recognized indigenous healing practitioner with the primary goal of affirming and activating the holistic paradigm of Indigenous knowledge into their work as practitioners in the helping professions to reveal the wealth and richness of Indigenous languages, worldviews, teachings and experiences. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 6 credits. Restricted to: C G,CMHC,SPSY,CEP majors.

CEPY 572. Counseling Practicum**1-6 Credits (1-6P)**

Supervised experience of counseling and consultation. Weekly individual and group supervision involves review of audio, video, and/or live sessions and case presentations. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 6 credits. Crosslisted with: CEPY 662. Restricted to: CEP graduate majors only.

Learning Outcomes

1. Understands ethical and legal considerations specifically related to the practice of clinical mental health counseling. Understands a variety of models and theories related to clinical mental health counseling, including the methods, models, and principles of clinical supervision. Understands the management of mental health services and programs, including areas such as administration, finance, and accountability. Demonstrates the ability to apply and adhere to ethical and legal standards in clinical mental health counseling. Recognizes the importance of family, social networks, and community systems in the treatment of mental and emotional disorders. Uses the principles and practices of diagnosis, treatment, referral, and prevention of mental and emotional disorders to initiate, maintain, and terminate counseling. Applies multicultural competencies to clinical mental health counseling involving case conceptualization, diagnosis, treatment, referral, and prevention of mental and emotional disorders. Applies effective strategies to promote client understanding of and access to a variety of community resources. Demonstrates appropriate use of culturally responsive individual, couple, family, group, and systems modalities for initiating, maintaining, and terminating counseling. 1 Demonstrates the ability to use procedures for assessing and managing suicide risk. 1 Applies current record-keeping standards related to clinical mental health counseling. 1 Provides appropriate counseling strategies when working with clients with addiction and co-occurring disorders. 1 Demonstrates the ability to recognize his or her own limitations as a clinical mental health counselor and to seek supervision or refer clients when appropriate. 1 Maintains information regarding community resources to make appropriate referrals. 1 Advocates for policies, programs, and services that are equitable and responsive to the unique needs of clients. 1 Demonstrates the ability to modify counseling systems, theories, techniques, and interventions to make them culturally appropriate for diverse populations. 1 Knows the principles and models of assessment, case conceptualization, theories of human development, and concepts of normalcy and psychopathology leading to diagnoses and appropriate counseling treatment plans. 1 Understands various models and approaches to clinical evaluation and their appropriate uses, including diagnostic interviews, mental status examinations, symptom inventories, and psychoeducational and personality assessments. 1 Demonstrates skill in conducting an intake interview, a mental status evaluation, a biopsychosocial history, a mental health history, and a psychological assessment for treatment planning and caseload management. 2 Demonstrates appropriate use of diagnostic tools, including the current edition of the DSM, to describe the symptoms and clinical presentation of clients with mental and emotional impairments. 2 Demonstrates the ability to conceptualize an accurate multi-axial diagnosis of disorders presented by a client and discuss the differential diagnosis with collaborating professionals.

CEPY 578. Advanced Counseling Practicum**3-6 Credits (3-6P)**

Supervised experience of appraisal and individual, family, and/or group counseling and consultation serving child, adolescent, and/or adult clients. Weekly individual and group supervision involves review of counseling sessions and case presentations. This course will carry a subtitle to reflect the practicum setting. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 6 credits. Restricted to: CMHC, CEP, SPSY, C G majors.

Prerequisite(s): CEPY 572 or consent of instructor.

Learning Outcomes

1. Obtain a minimum of 150 clinical hours including 60 hours of direct service (face-to-face) with clients appropriate to the program. *For students enrolled in only 6 credits, this translates to 300 clinical hours, including 120 hours of direct service. Obtain one hour a week of individual supervision with the on-site supervisor and a minimum of 1½ hours per week of group supervision with a program faculty member. Students will have the opportunity to become familiar with a variety of professional activities in addition to direct service such as record keeping, information and referral, in-service, and staff meeting. Students will have an opportunity to gain supervised experience in the use of a variety of professional resources such as assessment instruments, technologies, professional literature, and research. Students receive a formal evaluation by site supervisor and program faculty member. Students will have opportunity to work with clients who represent the ethnic and demographic diversity of their community. Students will formally evaluate their supervisors and learning experience at the end of their internship experiences. Students will be covered by professional liability insurance while enrolled in this course. Students will adhere to ethical standards of ACA and related entities, and applications of ethical and legal considerations in professional counseling. 1 Students will have an opportunity to apply concepts of mental health education, consultation, collaboration, outreach and prevention strategies, and community mental health advocacy.

CEPY 579. Clinical Psychopharmacology**3 Credits (3)**

Basic biological aspects of psychopharmacology with applications to clinical populations and treatment implications. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Students will be able to understand and apply concepts related basic neuroanatomy, neurochemistry, and neurophysiology. Students will be able to understand and apply basic knowledge related basic biological basis of the interdependence between behavior, cognition, and emotion. Students will understand the pharmacology and pharmacodynamics of major drug groups used in the treatment of CNS diagnoses; including, but no limited to, antidepressants, antipsychotics, anxiolytics, anticonvulsants, and natural remedies or herbal supplementation. Students will recognize the strengths and weaknesses of a wide range of research methodologies to screen compounds and test the mechanisms of action of drugs. Students will understand the drug development process from target identification to FDA approval and ongoing safety surveillance. Students will appreciate how pharmacological investigation informs the understanding of the underlying pathology of the illness. Students will access, critique, and assimilate evidence from scientific studies as it relates to translational neuroscience and the search for promising targets for psychotropic drugs. Students will become familiar with to the indication, contraindication, therapeutic drug monitoring, and effectiveness of medications across DSM-V classifications. As well as psychotropic drug tapering or switching. The implications of patient characteristic and medical co-morbidities are addressed. Students will share informed opinions about advances and challenges in experimental (off-label) psychopharmacology; and of their opinions of integrated psychotherapy or combined medicine. 1 Students will work effectively with peers and Instructor; as part of multidisciplinary learning environment.

CEPY 580. Counseling Internship**3-12 Credits (3-12)**

Supervised experience in a professional counselor role in a school or agency. Students perform all counselor functions including appraisal, individual/family/group counseling, consultation, administration, program development, research, and/or evaluation. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 12 credits. Restricted to: C G, CEP, CMHC, SPSY majors.

Prerequisite(s): CEPY 578.

Learning Outcomes

1. Obtain a minimum of 600 clinical hours including 240 hours of direct service (face-to-face) with clients appropriate to the program. *For students enrolled in only 6 credits, this translates to 300 clinical hours, including 120 hours of direct service. Obtain one hour a week of individual supervision with the on-site supervisor and a minimum of 1½ hours per week of group supervision with a program faculty member. The student has the opportunity to become familiar with a variety of professional activities in addition to direct service such as record keeping, information and referral, in-service, and staff meeting. The student has an opportunity to gain supervised experience in the use of a variety of professional resources such as assessment instruments, technologies, professional literature, and research. Students receive a formal evaluation by site supervisor and program faculty member. Students will have opportunity to counsel clients who represent the ethnic and demographic diversity of their community. Students will formally evaluate their supervisors and learning experience at the end of their internship experiences. Students will be covered by professional liability insurance while enrolled in internship. Students will adhere to ethical standards of ACA and related entities, and applications of ethical and legal considerations in professional counseling. 1 Students will have an opportunity to apply concepts of mental health education, consultation, collaboration, outreach and prevention strategies, and community mental health advocacy.

CEPY 598. Special Research Programs**1-6 Credits (1-6)**

Individual investigations either analytical or experimental. Maximum of 6 credits per semester and total of 9 credits overall. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 9 credits. Restricted to: C G,SPSY,CMHC,CEP majors.

Learning Outcomes

1. Learning outcomes will vary depending on course content.

CEPY 599. Master's Thesis**1-15 Credits (1-15)**

Thesis. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. To develop and complete master's research thesis.

CEPY 607. Curriculum-Based Assessment and Intervention**3 Credits (3)**

The study and practice of curriculum-based assessment and intervention for academic skills and problems among children and adolescents. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Students will demonstrate knowledge of multiple perspectives related to construction of knowledge in the core subject areas associated with school curricula. Students will demonstrate the ability to examine and apply critical perspectives related to educational assessment. Students will demonstrate mastery of design, administration, scoring, and interpretation of curriculum-based assessment measures. Specifically, the student will demonstrate the ability to initiate and maintain rapport with students/clients; Gain mastery in constructing, administering, scoring, and interpreting curriculum-based measurement (CBA) batteries; Analyze and interpret the results of evaluations, identifying the strengths and challenges to achievement based on these tests. Communicate effectively these interpretations, along with relevant background information, in the form of concise, well-written reports; Develop appropriate recommendations based on assessment data, background information, and observational data; Develop, implement, and monitor an intervention plan for a student directly linked to assessment data.

CEPY 608. Diagnostic Class**3 Credits (3)**

Emphasis on developing the knowledge, skills, and necessary application abilities related to diagnosis and associated interventions related to mental health and psychopathology issues that impact a student's ability to navigate the education setting. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Students will be expected to demonstrate the knowledge of the etiology, the diagnostic process and nomenclature, treatment, referral, and prevention of mental and emotional disorders. Students will be expected to demonstrate knowledge of the principles, models, and documentation formats of biopsychosocial case conceptualization and treatment planning. Students will be expected to demonstrate understanding of current literature that outlines theories, approaches, strategies, and techniques shown to be effective when working with specific populations of clients with mental and emotional disorders. Students will be expected to demonstrate understanding of basic classifications, indications, and contraindications of commonly prescribed psychopharmacological medications so that appropriate referrals can be made for medication evaluations and so that the side effects of such medications can be identified. Students will be expected to demonstrate knowledge of the principles of the diagnostic process, including differential diagnosis, and the use of current diagnostic tools, such as the current edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM). Students will be expected to demonstrate understanding of the established diagnostic criteria for mental and emotional disorders, and describes treatment modalities and placement criteria within the continuum of care. Students will be expected to demonstrate knowledge of the impact of co-occurring substance use disorders on medical and psychological disorders. Students will be expected to demonstrate understanding of the relevance and potential biases of commonly used diagnostic tools with multicultural populations. Students will be expected to demonstrate understanding of the appropriate use of diagnosis during a crisis, disaster, or other trauma-causing events. Students will be expected to differentiate between diagnosis and developmentally appropriate reactions during crises, disasters, and other trauma-causing events.

CEPY 612. Human Development**3 Credits (3)**

Same as CEPY 512 with differentiated assignments for Ed.S and Ph.D. students. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: SPSY, CEP majors.

CEPY 615. Learning Theory**3 Credits (3)**

Survey and comparison of theory and research regarding human learning as they apply to development, education, and counseling. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Crosslisted with: CEPY 515

Learning Outcomes

1. Students can expect to gain an understanding of a variety of learning theories. Students will learn the historical context of each theory and the interactions between the theories. Students will learn how learning theories stimulate scholarly activity, and their impact on educational practice and psychology. Students can expect to gain an understanding of the relationships of theory to practice, their origin, their strengths and limitations, and their empirical bases. Students will learn the validity of learning theories to a multicultural society. Students will be expected to acquire the ability to evaluate the quality of learning theories more critically as foundations for instructional theory and counseling strategy.

CEPY 616. Spanish for Mental Health Professionals**3 Credits (3)**

This course emphasizes the vocabulary for Mental Health Professionals to include academic, psychological and medical terminology. Students will incorporate Spanish terms in assessment and treatment plans through role plays. Further, the course will include an overview of the use of interpreters and translators in working with culturally and linguistically diverse clientele. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: SPSY, CEP majors.

Prerequisite: Enrolled in Bilingual School Psychology Training Grant with instructor consent.

Learning Outcomes

1. Students will be able to demonstrate brief, basic conversation in Spanish using mental health and health-care related expressions and terminology. Students will be able to understand and respond to relevant cultural and linguistic client concerns related to presenting issues. Students will be able to increase their Spanish speaking capabilities when engaged in their professional roles (e.g. conducting clinical interviews, gathering mental health histories, conducting assessments and delivering interventions using various theoretical frameworks). Students will understand cultural and social factors that influence the practitioner-client relationship and communication with Latinx clients. Students will be able to engage effectively in role play situations involving application of concepts learned.

CEPY 617. Psychology of Multiculturalism**3 Credits (3)**

In this advanced course for post-master's graduate students in applied fields of psychology, students will apply psychological concepts related to multiculturalism as well as critical race theories, feminist theories, queer theories, and liberation theories to understand intersecting social identities. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: SPSY, C EP, CEP majors.

Learning Outcomes

1. Students will understand and apply multicultural and pluralistic characteristics within and among diverse groups nationally and internationally. Students will understand and apply theories and models of multicultural counseling, cultural identity development, and social justice and advocacy. Students will understand and apply multicultural counseling competencies. Students will understand and apply the impact of heritage, attitudes, beliefs, understandings, and acculturative experiences on an individual's views of others. Students will understand and apply the effects of power and privilege for counselors and clients. Students will understand and apply help-seeking behaviors of diverse clients. Students will understand the impact of spiritual beliefs on clients' and counselors' worldviews. Students will understand and apply strategies for identifying and eliminating barriers, prejudices, and processes of intentional and unintentional oppression and discrimination.

CEPY 618. Psychology of Poverty**3 Credits (3)**

This course is designed to examine the nature, extent and impact of poverty on Southwestern populations and across the United States in relation to assessment and interventions and its impact on the education and psychological well-being of children and families. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: SPSY, C EP, CEP majors.

Learning Outcomes

1. Students will learn how views of poverty have evolved in history. Students will be aware and demonstrate the skills of the different methods used to measure and understand poverty. Students will identify and apply relevant issues from education, health disparities, and criminal justice related to the psychology of poverty. Students will evaluate and present their own self-awareness and understanding of their worldview of poverty, along with its impact of how they view others in poverty. Students will conduct self-assessments regarding their range of liberalism/conservatism; implicit bias and how it impacts their interpretation of information of poverty. Students will understand and lead discussions as to why poverty remains so prevalent in U.S. society. Students will be able to articulate the within group differences and similarities of racial and ethnic backgrounds or family types that are susceptible to poverty. Students will learn successful interventions in working with children, adolescents and families impacted by the psychology of poverty.

CEPY 619. Psychology of Social Identities**3 Credits (3)**

Same as CEPY 519 with differentiated assignments for Ph.D. students. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Heighten the student's awareness of multiple social identities, worldview beliefs, and other within-group variables. Aid the student in developing a knowledge base in the realms of social psychology and multicultural research, culturally-responsive interventions and professional practice. provide experiences for the application of this awareness and knowledge as a means of Develop the skills necessary for being a reflective decision-maker, creative problem solver, and responsive service provider for diverse individuals in a variety practice settings and intervention modalities.

CEPY 622. Ethical/Professional Issues in Counseling Psychology**3 Credits (3)**

History of counseling psychology, scientist-practitioner model, American Psychological Associations Ethical Principles of Psychologists and Code of Conduct. Focus on current ethical, professional, and scientific issues. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: CEP majors.

Learning Outcomes

1. Students will be knowledgeable of and act in accordance with the current version of the APA Ethical Principles of Psychologists and Code of Conduct, relevant laws, regulations, rules, and policies governing health service psychology at the organizational, local, state, regional, and federal levels, and relevant professional standards and guidelines; Recognize ethical dilemmas as they arise, and apply ethical decision-making processes in order to resolve the dilemmas; Conduct self in an ethical manner in all professional activities. Students will develop an understanding of how their own personal/cultural history, attitudes, and biases may affect how they understand and interact with people different from themselves; Apply knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service. Students will be expected to behave in ways that reflect the values and attitudes of psychology, including integrity, deportment, professional identity, accountability, lifelong learning, and concern for the welfare of others; Engage in self-reflection regarding one's personal and professional functioning and engage in activities to maintain and improve performance, well-being, and professional effectiveness Students will be expected to produce and comprehend oral, nonverbal, and written communications that are informative and well-integrated; demonstrate a thorough grasp of professional language and concepts; Demonstrate effective interpersonal skills and the ability to manage difficult communication well.

CEPY 624. Ethics, Law & Professional Issues in School Psychology**3 Credits (3)**

This course provides an introduction and overview of the profession of school psychology with emphasis on the roles, functions, and competencies of the school psychologist within the context of legal and ethical practice. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: SPSY majors.

Learning Outcomes

1. Students will demonstrate an understanding of various professional issues, role functions, and historical contexts related to the field of school psychology. Students will demonstrate the ability to examine and apply critical perspectives related to various professional issues, role functions, and the historical contexts associated with the field of school psychology. Students will explore best practices issues associated with school psychology role functions and practices. Students will demonstrate the development of skills leading her or him toward becoming a culturally responsive practitioner in the field of school psychology. Students will obtain knowledge of the National Association of School Psychologists (NASP) Principles of Professional Ethics (2020) and the American Psychological Association's Ethical Principles of Psychologists and Code of Conduct (2010; 2016 amendments) and learn to apply these principles to specific areas of practice such as assessment, direct and indirect intervention, consultation, and research. Students will understand complexities of ethical and legal issues occurring in school settings and will develop ethical decision-making skills. Students will demonstrate knowledge of the provisions of state and federal statutes such as the Individuals with Disabilities Education Improvement Act (2004), Every Student Succeeds Act (2017) and Section 504 of the Rehabilitation Act of 1973 as well as other case laws related to the practice of school psychology and learn how to apply these mandates to the practice of school psychology. Students will understand the importance of developing awareness of the legal and ethical issues affecting their professional identity and the need to remain current on these issues throughout their careers as school psychologists. Students will continue to emerge as critical thinkers, reflective decision-makers, and creative problem-solvers, in general.

CEPY 630. School Psychology Research and Program Evaluation**3 Credits (3)**

Survey and analysis of research and program evaluation procedures in school psychology. Critical review of literature, formulating questions, quantitative and qualitative methodology, and data analysis as foundations for reading research literature and generating research, program evaluation, and/or grant proposals. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: SPSY, CEP majors.

Learning Outcomes

1. Students will advance their foundational knowledge of research methodology and research design. Students will develop skills and knowledge to conduct comprehensive literature reviews. Students will critique scientific research studies by applying attained knowledge in research methodology and design. Students will produce a research proposal they will conduct in their areas of interest within the field of school psychology. Students will present a research proposal that will conduct within the field of school psychology. Students will demonstrate skills and knowledge for program evaluation by developing a program evaluation plan. Students will demonstrate knowledge and skills necessary to conduct single-subject design studies.

CEPY 632. Counseling Psychology Research**3 Credits (3)**

Survey and analysis of research and program evaluation procedures in counseling psychology. Critical review of literature, formulating questions, quantitative and qualitative methodology, and data analysis are covered as a foundation for reading research literature and generating research, program evaluation, and/or grant proposals. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: SPSY, CEP majors..

Learning Outcomes

1. Students refine their foundational knowledge of research methods. Students learn how to conduct comprehensive literature reviews in counseling psychology. Students learn about sampling procedures and their limitations. Students refine their knowledge about measurement applied to research (including the reliability, validity, norms and cultural relevance of measurement procedures). Students refine their knowledge of statistics and the application of statistics to deriving conclusions from research data. Students learn about ethical issues related to conducting research. Students apply knowledge and skills in the areas described above to the critique of counseling psychology research. Students apply knowledge and skills in the areas described above to the development of a draft proposal for research they can conduct in their area of interest within counseling psychology. Students present and defend a proposal for research in counseling psychology.

CEPY 634. Introduction to Qualitative Research**3 Credits (3)**

This course is intended to be an introduction to qualitative research methods for persons wishing to understand, apply, and conduct qualitative studies with human subjects in the fields of counseling and psychology. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Students will understand the importance of applying and conducting culture-centered and ethical psychological research among persons from ethnic, linguistic, and racial minority backgrounds. Students will understand the shift that has taken place in the past century from ignoring cultural variables to that of valuing the vast amounts of uncharted knowledge that is contained therein. Students will gain a deeper understanding of the qualitative paradigm that informs research and the way we conduct and consume it. Students will understand the components that make up good qualitative research considering carefully the variables that inform the proposed outcome of the study. Students will assess the benefit of research to the entities, individuals and communities being studied. Students will learn to be grounded in the empirical and conceptual literature on the ways that culture influences the variables under investigation, as well as psychological and social science research traditions and skills. Students will be aware of their cultural assumptions on which their research questions are based (Egharevba, 2001). Students will learn to be aware of, and if appropriate, to apply indigenous theories when conceptualizing research studies. They are encouraged to include members of cultural communities when conceptualizing research, with particular concern for the benefits of the research to the community (Fontes, 1998; LaFromboise, 1988). Students will learn to consider the psychological (rather than demographic) contextual factors of race, ethnicity, language, gender, sexual orientation, socio-economic status, and other social dimensions of personal experience in conceptualizing their research design (Fouad Brown, 2000; Quintana et al., 2001). 1Students will strive to recognize and incorporate research methods that most effectively complement the worldview and lifestyles of persons who come from a specific cultural and linguistic population; e.g., quantitative and qualitative research strategies (Hoshmand, 1989; Marin Marin, 1991; Ponterotto Casas, 1991). 1Students will learn to consider culturally sensitive assessment techniques and data-generating procedures. 1In analyzing and interpreting data from research studies and in proposed research, students will learn to consider cultural influences as possible explanations for their findings. 1Students will learn the importance of considering the benefit to participants, and to include participants in the interpretation of results. They are encouraged to find ways for the results to be of benefit to the community, and to represent the participants' perspectives accurately and authentically.

CEPY 636. Advanced Statistics**3 Credits (3)**

An intermediate course focusing on more advanced theories and techniques of inferential statistics as applied to education and psychology. Includes ANOVA, planned contrasts, ANCOVA, simple regression, and non-parametrics. Both hand calculation and computer packages will be employed. Open to all College of Education majors.

Learning Outcomes

1. Students will understand how to describe procedural steps to submit proposals to the IRB at NMSU. Students will be able to create data files and use SPSS to clean and examine datasets to assess data quality. Students will be understand how to plan to address a research question, identify appropriate statistical tests and variables. Students will be able to use SPSS to run statistical analyses to examine differences in means or relationships between two variables. Students will understand how to assess assumptions and interpret findings of these analyses. Students will understand key concepts, such as statistical significance, error, effect size, sample size, and statistical power.of analytic approaches, findings, and interpretations of the data Students will be able to effectively communicate using scientific writing and accurate portrayal of the data in terms.

CEPY 637. Multivariate Statistics**3 Credits (3)**

Theories and techniques of multivariate statistics as applied to education and psychology. Includes multiple regression, logistic regression, MANOVA, factor analysis, and structural equation modeling. Computer packages will be the primary tool for data analysis. Open to all majors of the College of Education.

Learning Outcomes

1. To be able to construct statistical models, both non-multivariate (e.g., multiple regression) and multivariate (e.g., MANOVA, MANCOVA), and carry out the analysis using statistical software (e.g., SPSS, R). To be able to interpret results of both non-multivariate and multivariate analyses, in the context of the data. To be able to generate original research questions that can be answered with quantitative methods discussed in this course. To be able to carry out a quantitative method discussed in this course to answer a research question(s), and to be able to appropriately interpret the results. To be able to read published research in your field of study that makes use of multivariate methods, and critically interpret the results based on the claims and evidence provided.

CEPY 642. Psychometrics**3 Credits (3)**

An introduction to psychometrics, including topics such as theory and techniques of psychological measurement, scale and inventory construction, reliability, validity, evaluation of measurement quality, classical and contemporary measurement theory, and standardization. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Consent of Instructor required. Restricted to: SPSY,CEP majors.

Learning Outcomes

1. Students will acquire knowledge and skills in psychometrics. Students will understand and apply psychometric theory through the completion of instrument evaluation, instrument development,and factor analysis projects.

CEPY 646. Academic & Behavioral Assessment & Intervention**3 Credits (3)**

This course introduces basic concepts, methods, and applications of academic and behavior assessment and intervention. Students will learn how to conduct functional/informal assessments of academic and behavior and how to write behavior and academic plans. Methods appropriate for assessment and intervention of school-age children will be emphasized. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: CEP graduate majors.

Learning Outcomes

1. Students will gain and demonstrate knowledge on how behavior assessment fits within psychological/psycho-educational assessment.
2. Students will demonstrate the ability to examine and apply critical perspectives related to educational assessment.
3. Students will learn the rational, defining features and theoretical underpinnings of behavioral assessment.
4. Students will learn how to conduct and complete functional assessments of behavior.
5. Students will learn how to develop and evaluate a satisfactory positive behavior intervention plan.
6. Students will develop and/or learn techniques of behavioral observation.
7. Students will learn how to integrate behavioral observation findings with other assessment methods.

CEPY 647. Appraisal of Cognitive Functioning**3 Credits (3)**

Taught with CEPY 547 with differentiated assignments for doctoral students. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CEP,SPSY majors.

CEPY 648. Appraisal of Personality**3 Credits (3)**

Selection, administration, scoring, interpretation, and report writing using major objective and projective tests of personality. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CEP,SPSY majors.

Learning Outcomes

1. Knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service. Produce and comprehend oral, nonverbal, and written communications that are informative and well-integrated; demonstrate a thorough grasp of professional language and concepts. Demonstrate current knowledge of diagnostic classification systems, functional and dysfunctional behaviors, including consideration of client strengths and psychopathology. Demonstrate understanding of human behavior within its context (e.g., family, social, societal and cultural). Demonstrate the ability to apply the knowledge of functional and dysfunctional behaviors including context to the assessment and/or diagnostic process. Select and apply assessment methods that draw from the best available empirical literature and that reflect the science of measurement and psychometrics; collect relevant data using multiple sources and methods appropriate to the identified goals and questions of the assessment as well as relevant diversity characteristics of the service recipient. Interpret assessment results, following current research and professional standards and guidelines, to inform case conceptualization, classification, and recommendations, while guarding against decision-making biases, distinguishing the aspects of assessment that are subjective from those that are objective. Communicate orally and in written documents the findings and implications of the assessment in an accurate and effective manner sensitive to a range of audiences.

CEPY 651. Diagnosis and Treatment Planning**3 Credits (3)**

Same as CEPY 551 with differentiated assignments for Ph.D. students. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Students will be expected to demonstrate knowledge of the etiology, the diagnostic process and nomenclature, treatment, referral, and prevention of mental and emotional disorders. Students will be expected to demonstrate knowledge of the principles, models, and documentation formats of biopsychosocial case conceptualization and treatment planning. Students will be expected to demonstrate practice of using the DSM 5 to create differential diagnoses. Students will be expected to construct an initial treatment plan based upon a systemic and differential diagnosis. Students will be expected to formulate a culturally relevant diagnosis and treatment plan. Students will be expected to discuss the barriers to assessment and treatment, as it relates to mental illness stigma.

CEPY 652. Career/Life Planning and Vocational Assessment**3 Credits (3)**

Same as CEPY 552 with differentiated assignments for Ed.S and Ph.D. students. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: SPSY, CEP majors.

Learning Outcomes

1. Knowledge and understanding of career development theories and decision-making models. Knowledge and understanding of career, vocational, educational, occupational and labor market information resources, and career information systems. Knowledge and understanding of career development program planning, organization, implementation, administration, and evaluation. Knowledge and understanding of interrelationships among and between work, family, and other life roles and factors, including the role of multicultural issues in career development. Knowledge and understanding of career and educational planning, placement, follow-up, and evaluation. Knowledge and understanding of assessment instruments and techniques relevant to career planning and decision making. Knowledge and understanding of career counseling processes, techniques, and resources, including those applicable to specific populations in a global economy.

CEPY 658. Child and Adolescent Counseling Theory and Technique**3 Credits (3)**

Same as CEPY 558 with differentiated assignments for Ph.D. students. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Students will be able to demonstrate an understanding of their psychosocial and cultural context and how such phenomena influence their values, beliefs and, therefore, theoretical orientation to counsel children and adolescents. Students will be able to demonstrate the ability to examine and apply critical perspectives related to counseling children and adolescents. Students will be able to compare and contrast various theoretical perspectives in the area of counseling children and adolescents. Students will be able to demonstrate the development of a knowledge base leading toward becoming a culturally responsive practitioner in the area of counseling with individuals from a variety of diverse backgrounds. Students will be able to identify, describe, and apply legal and ethical issues relevant to practice in the area of counseling children and adolescents in various settings. Students will be able to collaborate with others in the process of developing relevant treatment plans and providing counseling services to children and adolescents in diverse settings.

CEPY 662. Family Therapy Theory and Technique**3 Credits (3)**

Taught with CEPY 562 with differentiated assignments for Ed.S and Ph.D students. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Crosslisted with: CEPY 572. Restricted to: CEP,SPSY,CEP majors.

CEPY 670. Behavioral Health Practicum**1-6 Credits**

An intensive supervised experience in providing behavioral health services at an on or off campus interdisciplinary health setting. Supervision provided by doctoral level psychologist faculty in collaboration with other team disciplines' supervising faculty involves audio, video, and/or live observation of counseling sessions and team interventions and case presentations. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 6 credits. Restricted to: MSW,CEP,SPSY majors. Graded: S/U Grading (S/U, Audit).

CEPY 671. Consultation**3 Credits (3)**

Didactic and experimental trainings in theory-based consultation. Supervision provided by faculty involves audio, video, and/or live observation consultation activities and case presentations. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CEP graduate majors.

CEPY 672. Practicum in School Psychology: Psychoeducational**1-6 Credits**

Supervised practicum in psychological and educational evaluation. Skill development in ecological assessment, including interviewing, observations micro-counseling, acculturation, world view, and ethnic identity formation. Graded: S/U. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 6 credits. Restricted to: CEP graduate majors. Graded: S/U Grading (S/U, Audit).

Prerequisite(s): CEPY 647, CEPY 505.

CEPY 673. Counseling Psychology Theory/Practicum**1-6 Credits**

Theories of counseling and psychotherapy and their application during supervised counseling with clients. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of counseling sessions and case presentations. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 6 credits. Restricted to: CEP majors.

Prerequisite(s): Consent of instructor.

CEPY 675. Practicum in School Psychology: Psychological**1-6 Credits**

School-based supervised experience for the advanced student. Provides experiences in various roles and models of service delivery (group, multifactorial, integrative, family assessments) expected of school psychologists. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: CEP graduate majors.

Learning Outcomes

1. Enhance the knowledge and skill students already possess and aid in the development of new knowledge and skills (related to psychological, behavioral needs of students). Provide students with the opportunity to respond to supervision and use supervision in a constructive manner. Provide students with the opportunity to share experiences as school psychologists in training in a supportive environment. Provide the students with the opportunity to engage in learning activities that will assist them in functioning independently as school psychologists (i.e., data-based decision-making and accountability). Provide the instructor with the opportunity to observe the student's ability to plan and execute successful interventions and demonstrate diagnostic skills. Students will be able to establish a counseling relationship with students' clients through the provision of individual and/or group counseling as stated on their IEP's. Students will be exposed to current issues, theories, and practices in the field of school psychology. Students will be able to integrate theory/research and practice via case presentations. Students will be able to demonstrate knowledge and integration of technology in their practice as school psychologist. 1 Students will refine their skills in working with culturally and linguistically diverse students, families, educators, and other professionals.

CEPY 676. Field Experience in Educational Diagnostics**1-6 Credits (1-6)**

CEPY 676 is designed to provide students with supervised school-based experiences and practices. The goal of the course is for students to master the competencies required for the delivery of academic services in the educational diagnostician role. The specific emphases in this course are placed on a data-based decision-making skills, psychoeducational assessment activities, and academic interventions. Under faculty and school-system staff supervisions, students will assume service delivery responsibilities and with increasing independence will respond to the diagnostic and intervention needs of students. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 6 credits. Restricted to: CEP,SPSY majors. Graded: S/U Grading (S/U, Audit).

Prerequisite(s): CEPY 647, CEPY 608, CEPY 505, CEPY 672.

Learning Outcomes

1. Students will demonstrate sound diagnostic reasoning and data-based decision-making through the formulation of possible preliminary hypotheses and testing of hypotheses via use of appropriate assessment methods. Students will demonstrate skills in planning appropriate assessments, taking into consideration contextual factors, referral concerns, and background information; and will select appropriate evaluation method. Students will demonstrate skills related to devising and implementing evidence-based academic interventions and provide recommendations for students in need. Students will demonstrate sensitivity in regards to cultural diversity and diversity of values, as well as begin the process of being culturally competent in their professional practices. Students will become familiar with and practice in accordance with best practices and relevant standards of the profession. Students will become familiar with the application of state special education rules and regulations. Students will identify and apply relevant legal and ethical responsibilities and requirements. Students will demonstrate effective interpersonal skills with clients and colleagues.

CEPY 677. Group Work Theory/Practicum**1-6 Credits (1-6)**

Application of theory in group work with clients and in supervising group leaders in training. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of counseling sessions and case presentations. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to: CEP,SPSY majors.

Prerequisite: CEPY 673.

Learning Outcomes

1. Apply the basic elements of group theory to small groups, including principles of group dynamics, group process components, developmental stage theories, group member roles and behaviors, and therapeutic factors. Demonstrate effective leadership skills and intervention strategies in simulated class discussions to actual group sessions in the community. Possess knowledge of ethical and professional issues encountered by group leaders. Develop awareness of the relative advantages of group work for clients and counselors, as well as other practical advantages; discern when group may not be the preferred modality for clients. Distinguish characteristics of various group theories and approaches. Identify relevant socio-cultural factors and multicultural considerations in group work and its impact on theory, process, and group leadership skills. Communicate how they have improved their skill development relative to self-awareness and group leadership. Have knowledge of professional group organizations, certifications (Certified Group Psychotherapist), and be able to effectively market group skills in preparation for the pre-doctoral internship year.

CEPY 678. Advanced Counseling Psychology Practicum**1-6 Credits (1-6P)**

Supervised counseling psychology experience including appraisal, diagnosis, case conceptualization, treatment planning, theory-based counseling and evaluation. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of counseling sessions and case presentations. Graded: S/U. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 12 credits. Restricted to: CEP majors. Graded: S/U Grading (S/U, Audit).

Prerequisite(s): CEPY 677.

Learning Outcomes

1. To increase skill level in clinical work with individual/group/couple therapy and initial intakes through practice, formal supervision, and group case discussion. To integrate one's theoretical orientation into a brief practice therapy model and to improve treatment planning ability. To improve treatment planning ability by increasing knowledge and integration of empirically supported interventions. To increase exposure and use of assessment procedures and tools in clinical work. To be cognizant of cultural/diversity issues with clients and develop enough self-awareness to respond effectively to a wide range of clients. To examine professional identity concerns as they arise and increase one's knowledge base about specific areas of clinical interest. To adhere to APA's Ethical Principles of Psychologists and Code of Conduct and Specialty Guidelines for the Delivery of Service by Counseling Psychologists and Guidelines for Providers of Psychological Services to Ethnic, Linguistic, and Culturally Diverse Populations, and to develop a more applied understanding of them. To increase one's knowledge of relevant Mental Health Statutes and the Board of Psychologist Examiners Rules and Regulations for the state in which you are practicing (NM or TX). To demonstrate self-awareness and self-reflection through ongoing self-evaluation of counseling skills. 1 To learn how to design and implement outreach presentations and to gain experience in consulting with interdisciplinary staff. 1 To become familiar with and acquire practice with career counseling and the use of career inventories.

CEPY 679. Supervision Theory and Practicum**1-6 Credits**

Didactic and experimental training in theory-based supervision. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of supervision sessions and case presentations. May be repeated for a maximum of 6 credits. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 6 credits. Restricted to: CEP majors.

Prerequisite(s): CEPY 675 or CEPY 678; and consent of instructor.

CEPY 680. Internship in Counseling Psychology I**1-18 Credits (1-18)**

Full-time equivalent of one-half calendar year of internship preferably in an APA-approved or APA-equivalent site. Available to Ph.D. students who have successfully completed their comprehensive exams. May be repeated for a maximum of 18 credits. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 18 credits. Restricted to: CEP majors.

Learning Outcomes

1. Students will complete the full-time equivalent of one calendar year internship at a site accredited by the American Psychological Association (APA) that has been matched with the student through the APPIC process.

CEPY 681. Advanced Multicultural School Psychology Field Experience**3 Credits (3)**

Supervised school psychology field experience including appraisal diagnosis, case conceptualization, treatment planning, theory-based counseling and evaluation from a multicultural perspective with diverse populations. Supervision provided by doctoral psychologist faculty involves audio, video, and/or live observation of sessions and case presentations. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Consent of Instructor required. Restricted to: SPSY, CEP, C EP majors.

Prerequisite(s): CEPY 672, CEPY 675.

CEPY 682. Internship in Counseling Psychology II**1-18 Credits**

Full-time equivalent of one-half calendar year of internship preferably in an APA-approved or APA-equivalent site. Available to Ph.D. students who have successfully complete their comprehensive exams. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean May be repeated up to 18 credits. Restricted to: CEP majors.

Prerequisite(s): Consent of instructor.

CEPY 684. Internship in School Psychology**1-12 Credits (1-12)**

Supervised experience in school psychology. May be repeated for a maximum of 12 credits. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 12 credits. Restricted to: SPSY majors. Graded: S/U Grading (S/U, Audit).

Prerequisite(s): CEPY 672 , CEPY 675.

CEPY 685. Doctoral Internship in School Psychology**6-12 Credits (6-12)**

Supervised doctoral internship experience in school psychology. 1800 to 2000 clock hours are completed on a full-time basis. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 12 credits. Consent of Instructor required. Restricted to: SPSY, C EP majors. Graded: S/U Grading (S/U, Audit).

Prerequisite(s): CEPY 672, CEPY 675, CEPY 681.

CEPY 693. Dissertation Seminar**3 Credits (3)**

Same as ELAD 693 , SPED 693. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Reflect on abilities to identify and effectively manage strengths and potential barriers that may impact progress on dissertation by thoroughly analyzing strengths and barriers and developing an action plan. Conceptualize a dissertation topic that is germane to the field of Counseling Psychology and provide a convincing argument supporting the need for such research. Conduct extensive and systematic literature searches for previous research and theory relevant to dissertation topic. Write a comprehensive outline and annotated bibliography of the literature that incorporates the most relevant research and theoretical work associated with dissertation topic to inform literature review. Clearly state research questions and hypotheses that will be examined in dissertation. Create a detailed and comprehensive action plan that adheres to APA ethical guidelines for research that a reader can use to replicate dissertation study (i.e., method section). Demonstrate understanding of the importance of having a diverse sample. Present dissertation research to the class in a simulated proposal meeting. Become more adept at providing support and challenge to student peers during weekly seminars and simulated proposal meetings. 1 Identify strategies for choosing and working with your dissertation committee effectively. 1 Demonstrate your knowledge of APA writing style.

CEPY 698. Selected Topics**1-6 Credits**

Offered under various subtitles which indicate the subject matter covered. A maximum of 6 credits in any one semester and a total of 18 credits overall. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 18 credits. Restricted to: CEP majors.

CEPY 699. Ed.S. Thesis**1-15 Credits**

Study and research at the Specialist in Education level. Each problem to be designated by a qualifying subtitle. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 88 credits. Restricted to: CEP majors. Thesis/Dissertation Grading.

CEPY 700. Doctoral Dissertation**15 Credits**

Dissertation. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 88 credits. Restricted to: CEP, CEP majors. Thesis/Dissertation Grading.

CHEF-CULINARY ARTS

CHEF 101. Culinary Arts Kitchen Orientation**3 Credits (3)**

Provides students with basic information and skills necessary for success in the Culinary Arts program. Students learn basic kitchen routines, safety and sanitation, professional conduct and deportment, standard kitchen calculations, knife handling, and are introduced to the laboratories for initial cooking experiences. Restricted to Community Colleges campuses only.

CHEF 125. Introductory Cake Decorating**1 Credit (2P)**

Introduction to the professional cake decorating techniques used by pastry chefs. Basic skills of piping a variety of icings into different patterns are taught. Restricted to Community Colleges campuses only.

Prerequisite(s): Consent of instructor.

CHEF 126. Intermediate Cake Decorating**1 Credit (2P)**

Introduction to more advanced professional cake decorating techniques used by pastry chefs. Fondant work and more complex decorating schemes are taught. Restricted to Community Colleges campuses only.

Prerequisite(s): CHEF 125.

CHEF 127. Chocolate Work**1 Credit (2P)**

Introduction to working with chocolate utilizing a variety of methods. Tempering, forming, molding, and other professional techniques will be taught. Restricted to Community Colleges campuses only.

Prerequisite(s): Consent of Instructor.

CHEF 128. Advanced Chocolate Work**1 Credit (2P)**

More advanced treatments of chocolate are explored and professional techniques for the chocolatier are developed. Restricted to Community Colleges campuses only.

Prerequisite(s): CHEF 127.

CHEF 129. Wedding Cake Design and Construction**1 Credit (2P)**

Basic skills in designing wedding (or other specialty event) cakes. Includes shaping, icing selection, decorating scheme, presentation, transportation, and remote set up. Restricted to Community Colleges campuses only.

Prerequisite(s): CHEF 125 and CHEF 126.

CHEF 155. Special Topics**1-3 Credits (1-3)**

Specific subjects to be announced in the Schedule of Classes. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

CHEF 165. Math for Kitchen Operations**3 Credits (3)**

Fundamental mathematical concepts and computations, including measurement, recipe scaling and conversions, metric unit conversion, ingredient yield calculations, ratios and cost extensions are covered. Examples of basic mathematical calculations use kitchen and food service functions, as well as situations to demonstrate principles.

CHEF 211. Food Production Management I**3 Credits (2+2P)**

Introduction to kitchen design, workflow, and commercial equipment. Techniques, methods, and application of basic food production principles. Practical experience in cooking processes from a managerial viewpoint. Crosslisted with: HOST 211. Restricted to Community Colleges only.

CHEF 212. Food Production Management II**3 Credits (2+2P)**

Selection and use of ingredients. Demonstration and application of classical and modern cooking and preparation techniques. Management techniques for kitchen personnel. Recipe design and analysis. Crosslisted with: HOST 212. Restricted to Community Colleges only.

Prerequisite(s): CHEF 211 or consent of instructor.

CHEF 213. Bakery Management I**3 Credits (2+2P)**

Fundamentals of baking from a supervisory/management perspective. Exposure to commercial equipment and processes. Introduction to commercial alternatives to scratch-preparation methods. Crosslisted with: HOST 213. Restricted to Community Colleges only.

CHEF 214. Bakery Management II**3 Credits (2+2P)**

Advanced techniques and management of bakery operations are explored. Students learn classical forms and techniques. Modern methods of preparing traditional pastry and baked goods are introduced. Crosslisted with: HOST218. Restricted to Community Colleges only.

Prerequisite(s): CHEF 213 or consent of instructor.

CHEF 233. Culinary Arts Fundamentals I**4 Credits (1+9P)**

Introduction to the basics of culinary arts, including ingredients recognition, cooking methods and techniques, knife usage, preparation of basic stocks, mother sauces, starches and vegetables. Students will participate in laboratory work designed to create an understanding of the professional role of the culinarian. Preparation and production of food products integral to service to guests is incorporated in the course. May be repeated up to 4 credits. Consent of Instructor required. Restricted to: CHEF, HOST, HSMG, HOCH majors. Restricted to Community Colleges campuses only.

CHEF 234. Culinary Arts Fundamentals II**4 Credits (1+9P)**

Continuation of introductory course focusing on meat cookery, daughter sauces, cold food preparation, poultry and seafood. Safe use of equipment is emphasized while experiencing differing methods of preparation and cooking. Preparation and production of food products integral to service of guests is incorporated in this course. May be repeated up to 4 credits. Restricted to: HOST,HSMG,CHEF majors. Restricted to Community Colleges campuses only.

Prerequisite(s): CHEF 233 with a grade of "C-" or better.

CHEF 235. Advanced Culinary Arts I**4 Credits (1+9P)**

Exploration and experience in preparation techniques beyond the basic level. Nutritional components of food are discussed, as in the application of good nutrition practices in recipe design. Students are encouraged to use creative methods to expand the individual's culinary expressions. Prepares food products for service to guests in both bulk feeding and individual service settings. Plans, prepares, serves and critiques meals provided for students, faculty and staff. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): CHEF 234 with a grade of "C" or better if course has been previously taken. Restricted to: CHEF majors. Restricted to Community Colleges campuses only.

CHEF 236. Advanced Culinary Arts II**4 Credits (1+9P)**

Advanced techniques and experimental use of food combinations to enhance the student's repertoire of skills and abilities. Utilizes knowledge to develop recipes for unique products. Plans, prepares, serves and critiques meals provided for students, faculty and staff. Restricted to: CHEF majors. Restricted to Community Colleges campuses only.

Prerequisite(s): CHEF 235 with a grade of "C" or better.

CHEF 237. Banquet/Catering Production**3 Credits (1+6P)**

Planning and implementation of the culinary aspects of catered functions. Development of time schedules, work assignments and service plans for catered events and banquet functions. Production of food items in appropriate quantities for catered events. Costing and control functions are covered. May be repeated up to 6 credits. Restricted to: CHEF, HOST majors. Restricted to Community Colleges campuses only.

Prerequisite(s): Grade of "C" or above in CHEF 233.

CHEF 240. Baking Fundamentals I**4 Credits (1+9P)**

Introduction to baking techniques, measurement and use of ingredients; equipment use and chemical reactions inherent in the baking process. Production of simple desserts and baked goods. Introduction to working with bread doughs. Restricted to: HOST,CHEF majors. Restricted to Community Colleges campuses only.

Corequisite(s): CHEF 233.

CHEF 241. Baking Fundamentals II**4 Credits (1+9P)**

More advanced baking and bread making techniques are covered in this course with emphasis on the more advanced elements of quantity production. Students work with a variety of products and ingredients. Restricted to: HOST, CHEF majors. Restricted to Community Colleges campuses only.

Prerequisite(s): grade of "C" or above in CHEF 240.

CHEF 242. Intermediate Baking I**4 Credits (1+9P)**

More advanced baking and pastry techniques are covered in this course with emphasis on the basic elements of patisserie production. Focus is on preparing students to work in a pastry kitchen. Restricted to: HOST, CHEF majors. Restricted to Community Colleges campuses only.

Prerequisite(s): Grade of "C" or above in CHEF 241.

CHEF 243. Intermediate Baking II**4 Credits (1+9P)**

Continuation of work with basic elements of patisserie products including laminated doughs and filled products. Students prepare creams, custards, fillings and are introduced to cake assembly procedures. Restricted to: CULI majors. Restricted to Community Colleges campuses only.

Prerequisite(s): Grade of "C" or above in CHEF 242.

CHEF 255. Special Topics**3 Credits (3)**

Specific subjects to be announced in the Schedule of Classes. May be repeated up to 6 credits. Restricted to: CULI, HOST, HSMG majors. Restricted to Community Colleges campuses only.

CHEF 256. International Cuisine**3 Credits (1+6P)**

Exploration into a variety of international cuisines is undertaken, including the cultural and historical backgrounds of the foods being prepared. Students work on developing themed menus and production plans for meals utilizing a single international cuisine. May be repeated up to 6 credits. Restricted to: CHEF, HOST majors. Restricted to Community Colleges campuses only.

Prerequisite(s): Grade of "C" or above in CHEF 233.

CHEF 257. Garde Manger**3 Credits (1+6P)**

Traditional garde manger skills are taught, including plated salads, cold foods, entremets, pates, forcemeat, terrines, charcuterie and chaud froid work. The art and craft of food design, preparation and service are emphasized. May be repeated up to 3 credits. Restricted to: CHEF, HOST majors. Restricted to Community Colleges campuses only.

Prerequisite(s): Grade of "C" or above in CHEF 233.

CHEF 260. Nutrition for Chefs**3 Credits (3)**

Aspects of basic human nutritional requirements are covered as are the applications of the standards to the cooking and baking. Meeting the USDA nutrient guidelines while preparing good tasting food is discussed, calorie, fat and sodium reduction techniques are explored.

CHEM-CHEMISTRY

CHEM 1111. Basic Chemistry**3 Credits (3)**

For students whose preparatory science or math training has been deficient. Does not meet the chemistry requirement in any curriculum.

Prerequisite: Enhanced ACT composite score of at least 18 or a grade of C- or better in CCDM 114 N.

Learning Outcomes

1. The goals and objectives for CHEM 1111 are to equip students with the necessary problem solving skills to be successful in CHEM 1215G/1225G

CHEM 1120G. Introduction to Chemistry Lecture and Laboratory (non majors)**4 Credits (3+3P)**

This course covers qualitative and quantitative areas of non-organic general chemistry for non-science majors and some health professions. Students will learn and apply principles pertaining, but not limited to, atomic and molecular structure, the periodic table, acids and bases, mass relationships, and solutions. The laboratory component introduces students to techniques for obtaining and analyzing experimental observations pertaining to chemistry using diverse methods and equipment.

Prerequisite: CCDM 114N or A S 103 or MATH 1215 or higher.

Learning Outcomes

1. (Lecture) Use the different systems of measurements and perform conversions within the same system of measurement and between different systems of measurements
2. (Lecture) Identify elements from their name or symbol, use the periodic table to describe reactivity patterns of elements and to predict compound formation.
3. (Lecture) Describe the basic structure of an atom using subatomic particles, and apply these concepts to nuclear reactions.
4. (Lecture) Describe ion formation and the difference between covalent and ionic compounds. Name and write formulas for ionic and simple molecular compounds.
5. (Lecture) Write and balance chemical reactions. Use balanced reactions in stoichiometric calculations.
6. (Lecture) Describe the differences between the solid, liquid and gas phases. Use the gas laws in calculations, and apply these laws to everyday situations.
7. (Lecture) Explain different types of energy, and how energy is released or absorbed in a reaction
8. (Lecture) Describe acid and base behavior.
9. (Lecture) Explain the intermolecular attractive forces that determine physical properties; apply this knowledge to qualitatively evaluate these forces and predict the physical properties that result.
10. 1(Lecture) Explain the intermolecular attractive forces that determine physical properties; apply this knowledge to qualitatively evaluate these forces and predict the physical properties that result
11. 1(Laboratory) Practice concepts associated with laboratory safety, including the possible consequences of not adhering to appropriate safety guidelines.
12. 1(Laboratory) Demonstrate the computational skills needed to perform appropriate laboratory-
13. related calculations to include, but not be limited to determining the number of significant figures in numerical value, solving problems using values represented in exponential notation, solving dimensional analysis problems, and manipulating mathematical formulas as needed to determine the value of a variable.
14. 1(Laboratory) Perform laboratory observations (both qualitative and quantitative) using sensory experience and appropriate measurement instrumentation (both analog and digital).
15. 1(Laboratory) Record quantitatively measured values to the correct number of significant figures and assign the correct units.
16. 1(Laboratory) Master basic laboratory techniques including, but not limited to weighing samples (liquid and solid), determining sample volumes, measuring the temperature of samples, heating and cooling a sample or reaction mixture, decantation, filtration, and titration.
17. 1(Laboratory) Draw appropriate conclusions based on data and analyses.
18. 1Present experimental results in laboratory reports of appropriate length, style and depth, or through other modes as required.
19. 1Determine chemical formulas and classify different types of reactions.
20. 1Relate laboratory experimental observations, operations, calculations, and findings to theoretical concepts presented in the complementary lecture course.

CHEM 1121. General Supplemental Instruction I**1 Credit (1)**

Collaborative workshop for students in General Chemistry I. Course does not count toward departmental degree requirements. May be repeated for a maximum of 2 credits.

Corequisite(s): CHEM 1215G.

CHEM 1122. General Supplemental Instruction II**1 Credit (1)**

Collaborative workshop for students in General Chemistry II. Course does not count toward departmental degree requirements. May be repeated for a maximum of 2 credits.

Corequisite(s): CHEM 1225G.

CHEM 1123. Principles of Supplemental Instruction III**1 Credit (1)**

Collaborative workshop for students in CHEM 1120G, Principles and Applications of Chemistry. Course does not count toward departmental degree requirements. May be repeated for maximum of 2 credits.

Corequisite(s): CHEM 1120G.

CHEM 1215G. General Chemistry I Lecture and Laboratory for STEM Majors**4 Credits (3+3P)**

This course covers descriptive and theoretical chemistry.

Prerequisite: (1) grade of C- or better in MATH 1215 or higher, or a Mathematics Placement Exam Score adequate to enroll in mathematics courses beyond MATH 1215.

Learning Outcomes

1. Use dimensional analysis, the SI system of units and appropriate significant figures to solve quantitative calculations in science. Understand the differences between physical and chemical changes to matter. Classify types of matter. Understand the scientific method in the context of scientific discoveries. Explain the structure of atoms, isotopes and ions in terms of subatomic particles. Analyze how periodic properties (e.g. electronegativity, atomic and ionic radii, ionization energy, electron affinity, metallic character) and reactivity of elements results from electron configurations of atoms. Understand the creation of different types of compounds (ionic and molecular), comparing and contrasting their structures, naming schemes and formulas. Apply knowledge of electronic structure to determine molecular spatial arrangement and polarity. Understand bulk pure substances, their properties and their states of matter by understanding and identifying intermolecular forces. Apply kinetic molecular theory to relate atomic level behavior to macroscopic properties. Introduce the mole and apply the mole concept to amounts on a macroscopic and a microscopic level. Understand mixtures, solubility by considering intermolecular forces and expressing concentration in molarity. Identify different reaction types. Apply the law of conservation of mass to reactions. Perform stoichiometry on balanced reactions. Laboratory Student Learning Outcomes Demonstrate and apply concepts associated with laboratory safety, including the possible consequences of not adhering to appropriate safety guidelines. Demonstrate the computational skills needed to perform appropriate laboratory related calculations to include, but not be limited to determining the number of significant figures in numerical value with the correct units, solving problems using values represented in exponential notation, solving dimensional analysis problems, and manipulating mathematical formulas as needed to determine the value of a variable. Perform laboratory observations (both qualitative and quantitative) using sensory experience and appropriate measurement instrumentation (both analog and digital). Prepare solutions with an acceptable accuracy to a known concentration using appropriate glassware. Master basic laboratory techniques including, but not limited to weighing samples (liquid and solid), determining sample volumes, measuring the temperature of samples, heating and cooling a sample or reaction mixture, decantation, filtration, and titration. Draw conclusions based on data and analyses from laboratory experiments. Relate laboratory experimental observations, operations, calculations, and findings to theoretical concepts presented in the complementary lecture course.

CHEM 1216. General Chemistry I Lecture and Laboratory for CHEM Majors**4 Credits (3+3P)**

As the first of a two-semester sequence, this course teaches fundamental concepts in chemistry, including the electronic structure of atoms, chemical periodicity, nature of chemical bonds, molecular structure, the three phases of matter, etc. Designed for majors in chemical and other physical sciences, including engineering. May be appropriate for the life science major. It is assumed that the students are familiar with college algebra, chemical nomenclature, stoichiometry, and scientific measurements. The laboratory component is designed to complement the theory and concepts presented in lecture, and will introduce students to techniques for obtaining and analyzing experimental observations pertaining to chemistry using diverse methods and equipment.

Prerequisite(s): Eligible to take MATH 1250G and an ACT composite score of 22 or higher.

Learning Outcomes

1. Apply the mole concept to amounts at a microscopic level and use this to perform stoichiometric calculations for reactions in solution, gases and thermochemistry. Calculate solution concentrations in various units. Apply the gas laws and kinetic molecular theory to relate atomic level behavior to macroscopic properties. Explain the electronic structure of atoms, isotopes and ions in terms of its subatomic particles. Analyze how periodic properties (e.g. electronegativity, atomic and ionic radii, ionization energy, electron affinity, metallic character) and reactivity of elements results from electronic configurations of atoms. Understand the nature of chemical bonds (ionic and covalent). Apply knowledge of electronic structure to determine molecular structure and polarity. Understand the formation of different phases of matter and the underlying fundamental intermolecular interactions. Describe physical states and changes, and distinguish these from chemical changes. Describe the energy conversions that occur in chemical reactions and state changes, relating heat of reaction to thermodynamic properties such as enthalpy and internal energy; apply these principles to measure and calculate energy changes in reaction. 1 Apply principles of general chemistry to specific real-world problems in environment, engineering and health-related fields.

CHEM 1225G. General Chemistry II Lecture and Laboratory for STEM Majors**4 Credits (3+3P)**

This course is intended to serve as a continuation of general chemistry principles for students enrolled in science, engineering, and certain preprofessional programs. The course includes, but is not limited to a theoretical and quantitative coverage of solutions and their properties, kinetics, chemical equilibrium, acids and bases, entropy and free energy, electrochemistry, and nuclear chemistry. Additional topics may include (as time permits) organic, polymer, atmospheric, and biochemistry. The laboratory component is designed to complement the theory and concepts presented in lecture, and will introduce students to techniques for obtaining and analyzing experimental observations pertaining to chemistry using diverse methods and equipment.

Prerequisite(s): C- or better in CHEM 1215G.

Learning Outcomes

1. Explain the intermolecular attractive forces that determine physical properties and phase transitions, and apply this knowledge to qualitatively evaluate these forces from structure and to predict the physical properties that result. Calculate solution concentrations in various units, explain the effects of temperature, pressure and structure on solubility, and describe the colligative properties of solutions, and determine solution concentrations using colligative property values and vice versa. Describe the dynamic nature of chemical equilibrium, and apply LeChatelier's Principle to predict the effect of concentration, pressure and temperature changes on equilibrium mixtures as well as describe the equilibrium constant and use it to determine whether equilibrium has been established, and calculate equilibrium constants from equilibrium concentrations and vice versa. Describe the different models of acids and base behavior and the molecular basis for acid strength, as well as apply equilibrium principles to aqueous solutions, including acid/base and solubility reactions, and calculate pH and species concentrations in buffered and unbuffered solutions. Explain titration curves as well as calculate concentrations of reactants. Explain and calculate the thermodynamic functions, enthalpy, entropy and Gibbs free energy, for a chemical system, and relate these functions to equilibrium constants. Student Learning Outcomes – Laboratory Demonstrate and apply concepts associated with laboratory safety, including the possible consequences of not adhering to appropriate safety guidelines. Demonstrate the computational skills needed to perform appropriate laboratory related calculations to include, but not be limited to determining the number of significant figures in numerical value with the correct units, solving problems using values represented in exponential notation, solving dimensional analysis problems, and manipulating mathematical formulas as needed to determine the value of a variable. Perform laboratory observations (both qualitative and quantitative) using sensory experience and appropriate measurement instrumentation (both analog and digital). Prepare solutions with an acceptable accuracy to a known concentration using appropriate glassware. Perform basic laboratory operations related to, but not limited to, colligative properties of solutions, chemical equilibria, acid/base titrations, electrochemistry. Draw conclusions based on data and analyses from laboratory experiments. Relate laboratory experimental observations, operations, calculations, and findings to theoretical concepts presented in the complementary lecture course.

CHEM 1226. General Chemistry II Lecture and Laboratory for CHEM Majors**4 Credits (3+3P)**

As the second of a two-semester sequence, this course teaches fundamental concepts in chemistry, including solutions, equilibria, electrochemistry, thermodynamics and kinetics. Designed for majors in chemical and other physical sciences, including engineering. May be appropriate for the life science major. It is assumed that the students are familiar with college algebra, chemical nomenclature, stoichiometry, and scientific measurements. The laboratory component is designed to complement the theory and concepts presented in lecture, and will introduce students to techniques for obtaining and analyzing experimental observations pertaining to chemistry using diverse methods and equipment.

Prerequisite(s): C- or better in CHEM 1216.

Learning Outcomes

1. Describe the colligative properties of solutions and explain them using intermolecular forces. Determine solution concentrations using colligative property values and vice versa. Explain rates of reactions, rate laws, and half-life; determine the rate, rate law and rate constant of a reaction and calculate concentration as a function of time and vice versa. Understand the principle of catalysis. Explain the collision model of reaction dynamics, including activation energy, catalysts and temperature; Derive a rate law from a reaction mechanism and evaluate the consistency of a mechanism with a given rate law. Describe the dynamic nature of chemical equilibrium and its relation to reaction rates; apply Le Chatelier's Principle to predict the effect of concentration, pressure and temperature changes on equilibrium mixtures. Describe the equilibrium constant and use it to determine whether equilibrium has been established; calculate equilibrium constants from equilibrium concentrations (including pressures) and vice versa. Describe the different models of acids and base behavior, and the molecular basis for acid strength.

CHEM 2111. Explorations in Chemistry**1 Credit (1)**

The major intent of this course is to deepen your interest in chemistry and make you aware of research and career opportunities in the field. During this semester we hope to discuss both old and new developments in chemistry that impact our lives. We also want to build our communication skills that are so necessary in our profession. Graded S/U.

CHEM 2115. Survey of Organic Chemistry and Laboratory**4 Credits (3+3P)**

This course is a one -semester survey of organic and biological chemicals. Students will be introduced to nomenclature, molecular structure, properties, and reactions of hydrocarbons, alcohols, carbonyls, organic acids and bases, carbohydrates, lipids, and proteins. The handling of organic chemicals, simple organic reactions, tests for functional groups, and synthesis will be learned in the laboratory component of this course. May be repeated up to 4 credits.

Prerequisite(s): CHEM 1225G.

Learning Outcomes

1. Identify common organic functional groups.
2. Translate between the IUPAC names and structures of simple organic molecules.
3. Predict the products of certain organic chemical reactions from reagents and conditions presented.
4. Predict physical and chemical behavior of organic molecules based on structure.
5. Synthesize several classes of organic compounds in the laboratory that were previously studied in the lecture component of this course.
6. Recognize and name the four basic bioorganic units and certain of their derivatives and macromolecules.
7. Construct 3 dimensional models of organic compounds.
8. Understand and apply safety principles associated with Organic Chemistry laboratory operations and activities.
9. Present experimental results in laboratory reports of appropriate length, style and depth, or through other modes as required.
10. Draw/recognize stereochemistry and explain its relevance to bioorganic molecules.

CHEM 2120. Integrated Organic Chemistry and Biochemistry**3 Credits (3)**

This course is a one- semester introduction to Organic Chemistry and Biochemistry designed for students in health and environmental occupations. The course surveys organic compounds in terms of structure, physical, and chemical properties, followed by coverage of the chemistry of specific classes of organic compounds in the biological environment. Students will apply course concepts to everyday organic and biological chemistry problems in preparation for careers in health and environmental fields.

Prerequisite: CHEM 1120G or CHEM 1215G.

Learning Outcomes

1. Identify and name basic organic compounds.
2. Construct/draw organic compounds from the names.
3. Predict the products of certain organic chemical reactions from reagents and conditions presented.
4. Recognize and name the four basic bioorganic units and certain of their derivatives and macromolecules.
5. Compare and contrast the function and location of the four bioorganic units and their macromolecules and cofactors.
6. Draw/recognize stereochemistry and explain its relevance to bioorganic molecules.
7. Discuss the pathways and functions of some of the cellular metabolic processes.
8. Recognize and describe metabolic cellular processes and macromolecular structure with respect to health and/or disease state

CHEM 2226. General Chemistry III**3 Credits (2+3P)**

Quantitative aspects of general chemistry: solid state structure, equilibrium, thermodynamics, and kinetics. Required of chemical science majors who have taken CHEM 1215G/1225G.

Prerequisite: CHEM 1225G.

Learning Outcomes

1. describe the process of scientific inquiry
2. solve problems scientifically
3. communicate scientific information
4. apply quantitative analysis to scientific problems
5. apply scientific thinking to real world problems

CHEM 2991. Introduction to Research**1-3 Credits (3+9P)**

Techniques and procedures of chemical research. May be repeated for a maximum of 3 credits.

Prerequisites: 8 credits of chemistry and a 3.0 GPA in chemistry.

Learning Outcomes

1. Varies

CHEM 2996. Special Topics in Chemistry**1-6 Credits (1-6)**

Specific subjects in Chemistry. These subjects will be announced in the 'Schedule of Classes'. It may be repeated under different topics for a maximum of 12 credits.

Learning Outcomes

1. Varies

CHEM 303. Organic Supplemental Instruction I**1 Credit (1)**

Collaborative workshop for students in Organic Chemistry I. Course does not count toward departmental degree requirements. May be repeated for a maximum of 2 credits.

Corequisite(s): CHEM 313.

CHEM 304. Organic Supplemental Instruction II**1 Credit (1)**

Collaborative workshop for students in Organic Chemistry II. Course does not count toward departmental degree requirements. May be repeated for a maximum of 2 credits.

Corequisite(s): CHEM 314.

CHEM 313. Organic Chemistry I**3 Credits (3)**

Nomenclature, uses, basic reactions, and preparation methods of the most important classes of aliphatic and aromatic compounds.

Prerequisite(s): C- or better in CHEM 1225G or CHEM 1226.

CHEM 314. Organic Chemistry II**3 Credits (3)**

An in-depth focus on reactions and mechanisms as they relate to organometallic compounds, alcohols, ethers, ketones, aldehydes, carboxylic acid derivatives, and amines. May be repeated up to 3 credits.

Prerequisite(s): C- or better in CHEM 313.

Learning Outcomes

1. Identify several new functional groups and other key features of organic compounds Interpret ^1H / ^{13}C NMR, IR, UV-Vis, and Mass spectrometry data and have the ability to correlate structural elements with spectral features Understand the chemical reactivity and reaction mechanisms relating, but not limited, to organometallic compounds, alcohols, ethers, ketones, aldehydes, carboxylic acids, and amines. Mechanistic highlights include: etherification, acetal formation / removal, alcohol oxidation, carbonyl addition reactions, enolate (and related) reactions, formation of carboxylic acid derivatives, and nucleophilic acyl substitution processes. Apply these mechanistic and reactivity considerations to these same groups when they appear as substructures in larger biologically-important molecules (e.g. carbohydrates, amino acids, and lipids). Design concise, three to five step syntheses of simple organic molecules using reactions learned in both CHEM 313 and 314 Qualitatively assess stability, solubility properties, chemical reactivity, spectral properties, and potential reactions that would lead to preparation, simply via visual inspection of structure.

CHEM 315. Organic Chemistry Laboratory**2 Credits (6P)**

Techniques, preparative and analytical methods in organic chemistry. May be repeated up to 2 credits.

Prerequisite(s)/Corequisite(s): CHEM 314. Prerequisite(s): C- or better in CHEM 313 or consent of instructor.

CHEM 351. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

CHEM 356. Descriptive Inorganic Chemistry**3 Credits (3)**

Occurrence and properties of the elements and the chemistry of their compounds.

Prerequisite(s): (CHEM 1225G or CHEM 1226) and (CHEM 2115 or CHEM 313).

CHEM 357. Synthetic Inorganic Laboratory**2 Credits (6P)**

Explores synthesis and analysis of main group and transition metal inorganic compounds. Inorganic laboratory and spectroscopic techniques will be used.

Prerequisites: CHEM 356.

CHEM 371. Analytical Chemistry**4 Credits (2+6P)**

The fundamentals of quantitative chemical analysis.

Prerequisite(s): C- or better in CHEM 1225G or CHEM 1226.

CHEM 422. Environmental Chemistry

3 Credits (3)

Chemistry of organic and metal ion pollutants in the environment and principles important to their remediation including bioremediation. Restricted to: Main campus only. Crosslisted with: ENVS 422

Prerequisite(s): CHEM 1225G and either CHEM 2115 or CHEM 313.

CHEM 424. Soil Chemistry

3 Credits (3)

Same as SOIL/GEOL 424.

CHEM 431. Physical Chemistry

3 Credits (3)

Principles that govern the physical and chemical behavior of matter. May not be counted toward Bachelor of Science degree in Chemistry.

Prerequisite(s): CHEM 1226 or CHEM 2226; MATH 1521G; PHYS 1240G or PHYS 2240G or PHYS 2140 or PHYS 1320G.

CHEM 431 H. Physical Chemistry Honors

3 Credits (3)

Same as CHEM 431. Additional work to be arranged.

Prerequisite(s): CHEM 1226 or CHEM 2226; MATH 1521G or MATH 1521H; PHYS 1240G or PHYS 2240G or PHYS 2140 or PHYS 1320G.

CHEM 433. Physical Chemistry I

3 Credits (3)

Laws and theories underlying chemical phenomena.

Prerequisite(s): CHEM 1226 or CHEM 2226; MATH 1521G; PHYS 2140 or PHYS 1320G, or consent of instructor.

CHEM 433 H. Physical Chemistry I Honors

3 Credits (3)

Same as CHEM 433. Additional work to be arranged.

Prerequisite(s): CHEM 1226 or CHEM 2226; MATH 1521G or MATH 1521H; PHYS 2140 or PHYS 1320G, or consent of instructor.

CHEM 434. Physical Chemistry II

3 Credits (3)

Laws and theories underlying chemical phenomena.

Prerequisite: CHME 302 or CHEM 433.

CHEM 435. Physical Chemistry Laboratory

2 Credits (6P)

Prerequisite: concurrent registration in CHEM 434.

CHEM 441. Advanced Research

1-3 Credits (3+9P)

Investigation of chemical problems and the development of special techniques. May be repeated for a maximum of 3 credits.

Prerequisites: consent of instructor, 16 credits of chemistry and 3.0 GPA in chemistry for nonmajors.

CHEM 443. Senior Seminar

1 Credit (1)

Discussions of current chemical research, impact of chemistry on society and/or ethics as applied to chemists. Each student will present a written and an oral report on an approved topic.

Prerequisite: CHEM 431 or CHEM 433.

CHEM 451. Special Topics

1-3 Credits

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

CHEM 455. Independent Studies

1-3 Credits

Independent studies directed by consulting faculty.

Prerequisite: consent of instructor.

CHEM 456. Inorganic Structure and Bonding

3 Credits (3)

Theoretical principles and a systematic study of the periodic table.

Prerequisite: CHEM 356 or CHEM 431 or CHEM 433.

CHEM 466. Advanced Organic Chemistry

3 Credits (3)

Recent developments in synthesis and theoretical principles of organic chemistry.

Prerequisite: CHEM 314.

CHEM 471. Instrumental Methods of Analysis**4 Credits (3+3P)**

Analytical techniques, including optical and procedures.

Prerequisites: CHEM 371 and either PHYS 1240G or PHYS 1320G.

CHEM 475. Central Concepts in Chemistry - Safety**1 Credit (1)**

Students will obtain university safety training plus departmental-specific safety guidelines for the research laboratory

Learning Outcomes

1. Students completing this course will be knowledgeable of all safety guidelines delineated by the University, College, and Department.
2. When possible accident case-studies will be incorporated within the curriculum.

CHEM 476. Central Concepts in Chemistry - Research Ethics**1 Credit (1)**

Students will complete Federal Agency (NSF, NIH, etc.) on-line training modules in responsible conduct in research and discuss relevant case-studies of research misconduct.

Learning Outcomes

1. Completion of this class will yield researchers fully aware of federal and professional guidelines regarding the ethical conduction and dissemination of data and conclusions.

CHEM 477. Central Concepts in Chemistry - Professional Development**1 Credit (1)**

Students will receive basic instruction in research dissemination strategies (presentations) and career planning.

CHEM 501. Central Concepts in Chemistry - Energy**3 Credits (3)**

This course will provide the students with a detailed examination of several topics in chemical energetics. These topics include: (1) basic thermodynamics concepts, (2) statistical thermodynamics (3) chemical equilibria, and (4) intermolecular interactions.

Learning Outcomes

1. Students completing this course will gain an understanding of chemical thermodynamics and equilibria as they relate to all areas of chemistry.

CHEM 502. Central Concepts in Chemistry - Structure**3 Credits (3)**

This course will provide the students with a detailed examination of several topics in chemical reactivity. These topics include: (1) principles of chemical bonding and (2) organic, inorganic and biochemical structure determination.

Learning Outcomes

1. Students completing this course will understand the fundamental components of molecular interactions and their impact on molecular structure and function in all areas of chemistry.
2. In addition, they will learn the theory and practice of physical techniques used to determine molecular structure.

CHEM 503. Central Concepts in Chemistry - Dynamics**3 Credits (3)**

This course will provide the students with a detailed examination of several topics in chemical reactivity. These topics include: (1) basic kinetic concepts, (2) fundamental gas phase kinetics (3) organic, inorganic and biochemical reaction mechanisms.

Learning Outcomes

1. Students who successfully complete this course will understand the fundamentals of chemical dynamics: from simple gas or solution phase reaction mechanisms to biomolecular interactions.

CHEM 504. Central Concepts in Chemistry - Measurements**3 Credits (3)**

This course will provide the students with a detailed examination of several topics in chemical measurements. These topics include: (1) spectroscopic, electrochemical and chromatographic techniques, (2) statistical methods of measurement and validation relevant to biomolecules, synthetic polymers and mixtures.

Learning Outcomes

1. The collection of quantitative data is central to all subdisciplines of chemistry.
2. Students completing this course will understand the basic principles of chemical measurements and the uncertainties inherently associated with those measurements.
3. They will also gain knowledge of tools available to minimize those uncertainties in data interpretation.

CHEM 507. Chemistry of the Elements**3 Credits (3)**

Discussion of the reactions and structures of inorganic compounds.

CHEM 510. Graduate Student Seminar**1 Credit (1)**

Research seminar for graduate students in Chemistry. Enrollment required each semester for all graduate students. Masters or Doctoral candidates presenting a research seminar enroll for a letter grade. All other participating students enroll using the S/U grading option.

Learning Outcomes

1. Graduate students will gain experience organizing a research presentation. Graduate students will develop oral presentation skills.

CHEM 514. Organic Structure Determination**3 Credits (3)**

Modern spectroscopic techniques for characterization of organic compounds.

CHEM 515. Modern Organic Chemistry**3 Credits (3)**

Recent developments in synthesis and theoretical principles of organic chemistry.

CHEM 516. Physical Organic Chemistry**3 Credits (3)**

Physical organic chemistry.

CHEM 520. Comprehensive Literature Review Seminar for Graduate Students**1 Credit (1)**

Graduate student presents a literature review on an approved topic. The seminar presentation will include cover new developments of primary significance to the topic based on current research papers and culminate in a testable hypothesis. A passing grade allows the student to take the comprehensive exam.

Learning Outcomes

1. Student will prepare an abstract of their presentation understandable to a broad chemistry/biochemistry audience Student will demonstrate a reasonable understanding of every concept introduced Student will present a well-organized topic leading to a logical hypothesis Student will demonstrate the ability to develop a data-supported hypothesis

CHEM 521. Chemical Instrumentation**3 Credits (2+3P)**

Theory and application of electronic devices to chemical analysis.

CHEM 526. Advanced Analytical Chemistry**3 Credits (3)**

Equilibria, and the theories of gravimetric, volumetric, and instrumental analysis.

CHEM 527. Separations**3 Credits (3)**

Covers the fundamentals of separation methods and relationships to modern analytical techniques such as gas chromatography and liquid chromatography.

CHEM 529. Spectrochemical Analysis**3 Credits (3)**

Fundamentals, instrumentation, and applications of spectrochemical analysis.

CHEM 536. Chemical Thermodynamics**3 Credits (3)**

First, second, and third laws of thermodynamics, and the concepts, interrelations, and applications of thermodynamic state functions.

CHEM 537. Quantum Chemistry**3 Credits (3)**

Fundamentals of quantum mechanics.

Prerequisite: consent of instructor.

CHEM 538. Chemical Kinetics**3 Credits (3)**

Empirical analysis of rate measurements, collision theory, transition state theory, and chain reactions.

CHEM 598. Special Research Programs**1-3 Credits**

Individual investigations, either analytical or experimental. Graded S/U.

CHEM 599. Master's Thesis**15 Credits**

Thesis preparation.

CHEM 600. Research**1-15 Credits**

Course used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination.

CHEM 619. Topics in Organic Chemistry**1-3 Credits**

Selected topics of current interest designated by subtitle.

CHEM 629. Advanced Topics in Analytical Chemistry**3 Credits (3)**

Discussion of advanced topics in the field of analytical chemistry. May be repeated with different subtitles. Consent of instructor required.

CHEM 639. Topics in Physical Chemistry**1-3 Credits**

Selected topics of current interest designated by subtitle.

CHEM 700. Doctoral Dissertation**17 Credits**

Dissertation preparation.

CHIN-CHINESE

CHIN 1110. Mandarin Chinese I**4 Credits (4)**

This is the first semester of a two-semester sequence in first year modern standard Chinese ("Mandarin"). This course is recommended for students who have had little or no experience in the Chinese language. A beginning Mandarin Chinese course is designed to introduce the Mandarin sound system ("pinyin"), basic vocabulary, Chinese characters (either in Simplified or Traditional characters), and basic grammatical concepts and structures. In order to help beginners develop their communicative competence in the four basic skills, the 5Cs (Communication, Cultures, Comparisons, Connections, and Communities) will be integrated consistently into the content and exercises in the course.

Learning Outcomes

1. Approach a novice-mid proficiency (ACTFL) in speaking, listening, reading, writing, as well as to develop their cultural awareness
2. Demonstrate knowledge of the phonetic system in Mandarin Chinese
3. Pronounce Chinese pinyin in correct tones
4. Demonstrate the mastery of the most commonly used characters (approximately 400-500)
5. Understand basic Chinese grammatical concepts
6. Use basic Mandarin vocabulary, introductory phrases and sentences in both oral and written forms
7. Understand greetings in China, countries and nationalities, Chinese family values, hobbies, and being someone's guest in China
8. Apply the language to greet each other, identify countries and nationalities, talk about his/her family, discuss important dates, talk about hobbies, and visit a friend in China
9. Develop basic reading and writing skills in Chinese
10. Develop initial understanding of Chinese culture, compare aspects of different cultures, make connections to their daily life, and build links among communities

CHIN 1120. Mandarin Chinese II**4 Credits (4)**

This is the second semester of a two-semester sequence in first year modern standard Chinese ("Mandarin"). This course is designed for students who have taken 1st Semester Mandarin Chinese, and focuses on enhancing pronunciation and expanding the vocabulary and grammar dealing with daily activities. In order to help beginners develop their communicative competence in the four basic skills, the 5Cs (Communication, Cultures, Comparisons, Connections, and Communities) will be integrated consistently into the content and exercises in the course.

Prerequisite(s): C or better in CHIN 1110.

Learning Outcomes

1. Maintain a novice-mid and approach a novice-high proficiency (ACTFL) in speaking, listening, reading and writing, as well as to enhance their cultural awareness
2. Demonstrate continued mastery of the four tones used in Mandarin Chinese
3. Demonstrate continued mastery of the most commonly used characters (approximately 500-600)
4. Apply basic grammatical concepts and structures, and begin exploring intermediate grammatical concepts
5. Demonstrate continued growth in vocabulary and expressions necessary for conversation in and about real life situations
6. Understand basic phone calls, discussion of studies, school life, shopping and transportation
7. Apply the language to make simple phone calls, discuss studies, talk about school life, go shopping and use transportation
8. Continue developing basic reading and writing skills in Chinese
9. Develop further understanding of Chinese culture, compare aspects of different cultures, make connections to their daily life, and build links among communities

CHIN 2110. Mandarin Chinese III**3 Credits (3)**

This is the first semester of a two-semester sequence in second year modern standard Chinese ("Mandarin"). This course is designed for students who have taken 1st and 2nd Semester Mandarin Chinese (or equivalence), and have a basic foundation on Chinese phonetics, characters, and grammars. In order to help students develop their communicative competence in the four basic skills, the 5Cs (Communication, Cultures, Comparisons, Connections, and Communities) will be integrated consistently into the content and exercises in the course. Restricted to Las Cruces campus only.

Prerequisite(s): C or better in CHIN 1120.

Learning Outcomes

1. Maintain a novice-high and approach an intermediate-low proficiency (ACTFL) in speaking, listening, reading and writing, as well as to enhance their cultural understanding
2. Pronounce the four tones used in Mandarin Chinese comfortably
3. Demonstrate continued mastery of the most commonly used characters (approximately 600-800)
4. Apply intermediate grammatical concepts and structures
5. Demonstrate continued growth in vocabulary and expressions in a variety for conversation in and about real life situations
6. Understand topics including but not limited to simple weather reports, dining, directions, birthday party stories, and seeing a doctor
7. Apply the language to talk about weather, order food, ask and give directions, describe birthday parties, and see a doctor (these are suggested topics, no intention to limit the topic range)
8. Continue developing paragraph-length reading and writing skills in Chinese
9. Deepen understanding of Chinese culture, compare aspects of different cultures, make further connections to their daily life, and build stronger links among communities

CHIN 2120. Mandarin Chinese IV**3 Credits (3)**

This is the second semester of a two-semester sequence in second year modern standard Chinese ("Mandarin"). This course is designed for students who have taken 1st, 2nd, and 3rd Semester Mandarin Chinese (or equivalence), and have a good foundation on Chinese phonetics, characters, and grammars. In order to help students develop their communicative competence in the four basic skills, the 5Cs (Communication, Cultures, Comparisons, Connections, and Communities) will be integrated consistently into the content and exercises in the course. Restricted to Las Cruces campus only.

Prerequisite(s): C or better in CHIN 2110.

Learning Outcomes

1. Maintain an intermediate-low and approach an intermediate-mid proficiency (ACTFL) in speaking, listening, reading and writing, as well as to strengthen their cultural understanding
2. Pronounce the four tones used in Mandarin Chinese fluently
3. Demonstrate continued mastery of the most commonly used characters (approximately 800-1000)
4. Apply more intermediate grammatical concepts and structures
5. Demonstrate continued growth in vocabulary and expressions in a variety for conversation in and about real life situations as well as simple academic settings
6. Demonstrate language skills that would help them travel or live in China
7. Understand topics including but not limited to dating, renting an apartment, sports, traveling, conversations at an airport
8. Apply the language to extend/decline invitations, rent an apartment, talk about sports, travel, check in and arrive at an airport (these are suggested topics, no intention to limit the topic range)
9. Continue developing multiple-paragraph-length reading and writing skills in Chinese
10. 1Deepen understanding of Chinese culture, compare aspects of different cultures, make further connections to their daily life, and build stronger links among communities

CHIN 311. Advanced Chinese Language I**3 Credits (3)**

This course emphasizes the development of advanced oral, aural, reading and writing skills in Mandarin Chinese. Expanding of vocabulary and development of reading comprehension will be through different genres of authentic texts. Students will be trained to write short essays on a variety of topics.

Prerequisite(s): Grade of C or better in CHIN 2110 and CHIN 2120.

CHIN 312. Advanced Chinese Language II**3 Credits (3)**

This course emphasizes the development of advanced oral, aural, reading and writing skills in Mandarin Chinese. Expanding of vocabulary and development of reading comprehension will be through different genres of authentic texts. Students will be trained to write short essays on a variety of topics.

Prerequisite(s): Grade of C or better in CHIN 311.

CHME-CHEMICAL & MATERIALS ENGR

CHME 101. Introduction to Chemical Engineering Calculations**2 Credits (2)**

Introduction to the discipline of chemical engineering, including: an overview of the curriculum; career opportunities; units and conversions; process variables; basic data treatments; and computing techniques including computer programming and use of spreadsheets.

Prerequisite(s)/Corequisite(s): MATH 1250G.

CHME 102. Material Balances**2 Credits (2)**

Perform material balances in single- and multi-phase, reacting and non-reacting systems under isothermal conditions.

Prerequisite(s)/Corequisite(s): CHEM 1215G or CHEM 1265. Prerequisite(s): MATH 1250G, CHME 101.

CHME 201. Energy Balances & Basic Thermodynamics**3 Credits (3)**

Chemical Engineering energy balances; combined energy and material balances including those with chemical reaction, purge and recycle; thermochemistry; application to unit operations. Introduction to the first and second laws of thermodynamics and their applications. May be repeated up to 3 credits.

Prerequisite(s): CHME 102, CHEM 1216 or CHEM 1215G, and MATH 1521G or MATH 1521H.

CHME 294. Communicating in Chemical Engineering**2 Credits (2)**

Students will master the fundamentals of communicating as an engineer, with focus on both written and oral communication, both independently and collaboratively, including development of the skills of gathering information and making decisions.

Corequisite(s): ENGL 1110G, COMM 1115G.

CHME 303. Chemical Engineering Thermodynamics**4 Credits (4)**

Applications of the First Law and Second Law to chemical process systems, especially phase and chemical equilibria and the behavior of real fluids. Development of fundamental thermodynamic property relations and complete energy and entropy balances. Modeling of physical properties for use in energy and entropy balances, heat and mass transfer, separations, reactor design, and process control.

Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): CHME 201, MATH 2530G.

CHME 305. Transport Operations I: Fluid Flow**3 Credits (3)**

Theory of momentum transport. Unified treatment via equations of change. Shell balance solution to 1-D problems in viscous flow. Analysis of chemical engineering unit operations involving fluid flow. General design and operation of fluid flow equipment and piping networks. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): CHME 201, PHYS 1310G, MATH 2530G. Restricted to: CH E, CHME, CMEG majors.

CHME 306. Transport Operations II: Heat and Mass Transfer**4 Credits (4)**

Theory of heat and mass transport. Unified treatment via equations of change. Analogies between heat and mass transfer. Shell balance solution to 1-D problems in heat and mass transfer. Analysis of chemical engineering unit operations involving heat transfer. Design principles for mass transfer equipment. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): CHME 392. Prerequisite(s): CHME 305 and MATH 392. Restricted to: CH E, CHME, CMEG, EPCHE majors.

CHME 307. Transport Operations III: Staged Operations**3 Credits (3)**

Theory of mass transport. Mass transfer coefficients. Analysis of chemical engineering unit operations involving mass transfer and separations. Equilibrium stage concept. General design and operation of mass-transfer equipment and separation sequences. May be repeated up to 3 credits. Restricted to: CHME, CMEG, CH E majors.

Prerequisite(s): CHME 303, CHME 306.

CHME 323 L. Transport Operations and Instrumentation Laboratory I**1 Credit (3P)**

Laboratory experiments demonstrate the principles of process measurement and instrumentation through the determination of thermodynamic properties, transport phenomena properties, heat transfer, and material physical properties. Treatment of data includes regression techniques, analysis of error, and statistical analysis. May be repeated up to 1 credits.

Prerequisite(s)/Corequisite(s): CHME 306. Prerequisite(s): I E 311. Restricted to: CH E, CHME, CMEG majors.

CHME 324 L. Transport Operations and Instrumentation Laboratory II**1 Credit (3P)**

Continuation of CHME 323L. Restricted to: CHME majors.

Prerequisite(s): CHME 323L.

CHME 352 L. Simulation of Unit Operations**1 Credit (1P)**

Definition, specification, and convergence of basic unit operations in a process simulator. Course will cover pipe networks, pressure changers, heat exchangers, distillation columns, and chemical reactors.

Prerequisite(s)/Corequisite(s): CHME 307, CHME 441. Restricted to: CHME majors.

CHME 361. Engineering Materials**3 Credits (3)**

Bonding and crystal structure of simple materials. Electrical and mechanical properties of materials. Phase diagrams and heat treatment. Corrosion and environmental effects. Application of concepts to metal alloys, ceramics, polymers, and composites. Selection of materials for engineering design.

Prerequisite(s): (CHEM 1215G or CHEM 1216) and MATH 1250G.

CHME 391. Industrial Employment**1-2 Credits**

Employment in chemical, petroleum, food, biotechnology, materials, environmental, pharmaceutical, or other industry relevant to the discipline, with opportunity for professional experience and training in chemical engineering. Requires written report covering work period approved by employer. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: CHME, CH E majors.

Prerequisite(s): Consent of department head.

CHME 392. Numerical Methods in Engineering**3 Credits (3)**

Study and application of numerical methods in solving problems commonly encountered in engineering. The numerical methods are motivated by engineering problems rather than by mathematics. However, sufficient mathematical theory will be provided so that students can appreciate the insight into the techniques and their shortcomings of different methods. MATLAB will be used as the working environment for implementing and performing the numerical methods in computers. This course is an engineering elective open to all engineering majors.

Prerequisite(s)/Corequisite(s): MATH 392.

CHME 395V. Brewing Science and Society**3 Credits (3)**

An overview of the science of brewing and the interrelationships between society, technology, business, and the evolution of the current beer market. Topics covered are history of brewing and the interrelationships between societal attitudes, technology, and cultural preferences; beer styles and evaluation techniques; production and characteristics of ingredients used in brewing; brewing unit operations; biochemistry of malting, mashing, and fermentation; engineering in the brewery; homebrewing; and societal and health issues related to beer and alcohol. Students must be at least 21 years of age by the first day of instruction of the semester to enroll in this course.

CHME 412. Process Dynamics and Control**3 Credits (3)**

Process modeling, dynamics, and feedback control. Linear control theory and simulation languages. Application of Laplace transforms and frequency response to the analysis of open-loop and closed-loop process dynamics. Dynamic response characteristics of processes. Stability analysis and gain/phase margins. Design and tuning of systems for control of level, flow, and temperature.

Prerequisite(s): CHME 441.

CHME 423 L. Unit Operations Laboratory I**1 Credit (3P)**

Experiments with chemical engineering unit operations including the use of computer data acquisition. Covers control system instrumentation and development of empirical models from process data. Includes written and oral reports. Restricted to: CHME majors.

Prerequisite(s): CHME 307, CHME 441, CHME 324L.

CHME 424 L. Process Control Laboratory**1 Credit (3P)**

Experiments with chemical engineering process control including the use of computer data acquisition and closed-loop process control. Covers control system instrumentation. Includes written and oral reports. Restricted to: CHME majors.

Prerequisite(s): CHME 412, CHME 423L.

CHME 441. Chemical Kinetics and Reactor Engineering**3 Credits (3)**

Analysis and interpretation of kinetic data and catalytic phenomena. Applied reaction kinetics; ideal reactor modeling; non-ideal flow models. Mass transfer accompanied by chemical reaction. Application of basic engineering principles to design, operation, and analysis of industrial reactors. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): CHME 307. Prerequisite(s): CHEM 313, CHME 303. Restricted to: CHME, CMEG, CH E majors.

CHME 448. Industrial Safety**3 Credits (3)**

An introduction to the fundamentals of chemical process safety, including toxicology, industrial hygiene, source models, fires and explosions, relief systems, hazard identification, risk assessment, environmental fate and transport, hazardous waste generation, pollution prevention, and regulatory requirements.

Prerequisite(s): CHEM 1216 or CHEM 1215G.

CHME 449. Intellectual Property for Engineers and Scientists**3 Credits (3)**

An overview of intellectual property with an emphasis on patents. Terminology, patentability requirements, invention disclosures, inventorship, scope of claims, patent application content and the patent prosecution process, and post-allowance matters including infringement and enforcement. Taught with CHME 549.

Prerequisite(s): CHEM 1120G, CHEM 1215G, or CHEM 1216; and senior standing in engineering or a fundamental science major; or consent of instructor.

CHME 452. Chemical Process Design & Economic Evaluation**3 Credits (3)**

Concepts in chemical engineering process design, including: capital and manufacture cost estimation; discounted cash flows; interest; taxes; depreciation; profitability analysis; project specifications. Restricted to: CHME, CH E majors.

Prerequisite(s): CHME 307, CHME 441.

CHME 452 L. Chemical Process Simulation**1 Credit (1P)**

Construction and convergence of chemical processes in a process simulator. Students will understand how to access variables, define and converge design specifications and converge tear/recycle streams.

Prerequisite(s)/Corequisite(s): CHME 452. Prerequisite(s): CHME 352L. Restricted to: CHME majors.

CHME 455. Chemical Plant Design**3 Credits (3)**

Design and analysis of integrated process plants. Consideration given to optimizing performance, operability, reliability, safety, control, energy integration, and cost effectiveness. Requires written report covering solution of a capstone design problem. Restricted to: CHME majors.

Prerequisite(s): CHME 452.

CHME 455 L. Chemical Plant Simulation**1 Credit (1P)**

Construction, convergence, and optimization of chemical processes in a process simulator. Dynamic process simulation and control.

Prerequisite(s)/Corequisite(s): CHME 455. Prerequisite(s): CHME 412, CHME 452L. Restricted to: CHME majors.

CHME 461. Calculation of Material and Molecular Properties**3 Credits (3)**

The aim is to describe and apply techniques for computing common properties of materials and molecules: optimized geometries, transition states, vibrational spectra, energies (electronic, internal energy, enthalpy, and Gibbs free energy), heat capacities, net atomic charges, atomic spin moments, and effective bond orders. These techniques allow one to estimate the thermodynamic properties of a chemical, as well as to compute the mechanisms and energy barriers for chemical reactions and catalytic processes, and to quantify the electronic, magnetic, and chemical ordering in materials. The theory behind these techniques will be described and students will perform hands-on computer exercises using common computational chemistry programs. Taught with CHME 561.

Prerequisite(s): CHEM 1226, MATH 1521G or MATH 1521H, (PHYS 2140 or PHYS 1320G).

CHME 463. Soft Matter**3 Credits (3)**

Bulk soft matter assemblies including polymers, macromolecules, colloids, gels, vesicles, emulsions, surfactants, micelles, suspensions and liquid crystals. Self-assembly including molecular self-organization, supramolecular systems, encapsulation, self-assembled films and monolayers. Biological aspects of soft matter including biomacromolecules, cells and soft tissues. Surfaces, interfaces and interactions including thin films, Langmuir monolayers and wetting/dewetting. Physiochemistry and characterization of soft matter. Taught with CHME 563. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): CHME 303, CHME 305, CHME 361.

CHME 464. Polymer Science & Engineering**3 Credits (3)**

This course covers concepts in science and engineering of macromolecules, such as synthesis and chemistry, characterization of molecular weight, morphology, rheology, and mechanical behavior, structure and property relationships, and polymer processing. Taught with CHME 564. May be repeated up to 3 credits.

Prerequisite(s): CHEM 314.

CHME 465. Rheology and Viscoelasticity**3 Credits (3)**

Navier-Stokes equation; non-Newtonian fluids; flow fields; rheometry; viscoelastic models; non-linear viscoelasticity; material functions; complex fluids, including emulsions, suspensions and nanocomposites. Taught with CHME 565. Consent of Instructor required.

Prerequisite(s): CHME 306.

CHME 467. Nanoscience and Nanotechnology**3 Credits (3)**

This is a lecture/laboratory course designed to present the basic concepts, the techniques and the tools to synthesize and characterize nanometer scale materials, and the latest achievements in current and future nanotechnology applications in engineering, materials, physics, chemistry, biology, electronics and energy. It is intended for a multidisciplinary audience with a variety of backgrounds. This course should be suitable for graduate students as well as advanced undergraduates. Topics covered will include: nanoscience and nanotechnology, nanofabrication, self-assembly, colloidal chemistry, sol-gel, carbon nanotubes, graphene, thin film, lithography, physical vapor deposition, chemical vapor deposition, quantum dots, lithium batteries, X-ray diffraction, scanning electron microscopy, transmission electron microscopy, nanoelectronics, nanophotonics and nanomagnetism, etc. Taught with PHYS 520 and CH E 567. Crosslisted with: PHYS 520 and PHYS 467.

Prerequisite(s): (CHEM 116 or CHEM 112G), (PHYS 211G or PHYS 215G), (EH&S Safety training to include the courses: (1) Employee & Hazard Communication Safety (HazCom); (2) Hazardous Waste Management; and (3) Laboratory Standard).

CHME 470. Introduction to Nuclear Energy**3 Credits (3)**

Atomic and nuclear structure, nuclear stability and radioactivity, nuclear reactions, detection and measurement of radiation, interaction of radiation with matter, radiation doses and hazard assessment, principles of nuclear reactors, and applications of nuclear technology.

Prerequisite(s): CHEM 1215G, MATH 1521G or MATH 1521H.

CHME 471. Health Physics**3 Credits (3)**

Introduction to radiation protection, radiation/radioactivity, radioactive decay/fission, interactions of radiation and matter, biological effects of radiation, radiation measurement and statistics, sampling for radiation protection, radiation dosimetry, environmental transport, radiation protection guidance, external and internal radiation protection, and hazards analysis.

Prerequisite(s): MATH 1521G or MATH 1521H, CHME 470.

CHME 476. Nuclear Fuel Cycles**3 Credits (3)**

Physical and chemical processes in the conventional nuclear fuel cycle: uranium mining and milling, conversion, enrichment, fuel fabrication, reactor operations, interim storage, reprocessing and recycling, waste treatment and disposal. Alternative fuel cycles and future prospects. Consent of Instructor required.

Prerequisite(s): CHME 470.

CHME 478. Electrochemistry: Basics & Applications**3 Credits (3)**

The course will integrate theoretical studies and engineering applications of the mechanisms responsible for electrochemical devices, while identifying technological restrictions to practical applications through a general overview of underlying electrochemistry concepts of various types of energy storage devices, with a few categories discussed in depth. For non-CHME majors, CHEM 1226 (or equivalent) and MATH 1521G. A prerequisite knowledge test will be given in the first class for those who do not have these courses.

Prerequisite: CHME 201 for CHME majors.

Learning Outcomes

1. Gain overview of electrochemical cells and processes Understand Potential and thermodynamics of cells

CHME 479. Corrosion and Degradation of Materials**3 Credits (3)**

Failure of engineering materials in aggressive environments. Chemical and electrochemical mechanisms of corrosion. Influence of chemical composition and microstructure on corrosion behavior. Types of corrosion and chemical attack, including uniform corrosion, galvanic corrosion, pitting and other forms of localized corrosion, stress corrosion cracking, and corrosion fatigue. Methods of corrosion mitigation including cathodic protection, coatings, passivation, and corrosion inhibitors. Corrosion in nuclear reactors and nuclear waste repositories.

Prerequisite(s): CHME 361.

CHME 481. Biomedical Engineering and Engineering Healthcare**3 Credits (3)**

Orientation to solving human and world health issues with biological engineering systems, tools, and analysis methods. Introduces general concepts including applied biology for engineers, biophotonics, biosensing, bioinstrumentation, tissue and biomaterials engineering, biomedical engineering research practices, and physical bioanalytical methods. Taught with CHME 581. Restricted to: CHME, CH E majors.

Prerequisite(s): CHEM 1226, CHME 201.

CHME 486. Biofuels**3 Credits (3)**

Introduction to the fundamentals and applications of biofuels and bioenergy production; biomass resources and their composition; types of biofuels; conversion technologies (thermochemical and biochemical conversion processes); biodiesel production, algae to biofuels; economic and environmental assessments; term paper of selected topics relevant to biofuels. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): CHME 201.

CHME 490. Senior Seminar**1 Credit (1)**

Research seminar attended by graduate students is open to CHME undergraduates who are research active May be repeated up to 2 credits. Students must be in Senior Standing to enroll in this course.

Prerequisite(s)/Corequisite(s): CHME 498. Restricted to: CHME, CH E majors.

CHME 491. Special Topics**3 Credits (3)**

Lecture and/or laboratory instruction on special topics in chemical engineering. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

CHME 495. Brewing Science & Engineering**3 Credits (3)**

Details of beer production, fermentation science, brewery operation, and process design & economics. Engineering considerations including process safety, fermentation kinetics, unit operations, and economics of scale. Beer styles, recipe formulation, product quantification for tax purposes, and brew analytical methods will also be discussed. Crosslisted with: FSTE 430. Restricted to: CH E, CHME, CMEG majors.

Prerequisite(s): CHME 395V, CHME 441, CHME 452.

CHME 495 L. Brewing Science & Technology Lab**1 Credit (3P)**

Brewing and brewing operations in a one-barrel brewery. Topics addressed will include brewery safety, characteristics and handling of brewing ingredients, recipe formulation, water treatment, wort preparation, fermentation, waste disposal, and packaging.

Corequisite(s): CHME 495.

CHME 498. Undergraduate Research**1-3 Credits (1-3P)**

Provides an opportunity for undergraduate students to work in research or areas of special interest such as design problems and economic studies under the direction of a faculty member. Written report covering work required. May be repeated up to 6 credits. Consent of Instructor required.

Restricted to: CHME, CH E majors.

Prerequisite(s): Consent of instructor and department head.

CHME 501. Graduate Thermodynamics for Chemical Engineers**3 Credits (3)**

Advanced applications of the first and second law to chemical process systems. The calculus of thermodynamics, equilibrium and stability criteria. Properties relationships for real fluids, both pure materials and mixtures. An introduction to molecular thermodynamics and statistical mechanics.

Restricted to: CHME, CH E majors.

CHME 506. Graduate Transport Phenomena(s)**3 Credits (3)**

Covers the analysis of simultaneous momentum, energy, and mass transport. Development of integral and local balance equations in vector-tensor form. Application of vector-tensor analysis to transport equations. Boundary layer theory and turbulence.

CHME 516. Graduate Numerical Methods in Chemical Engineering**3 Credits (3)**

Survey of numerical methods for solving problems commonly encountered in heat and mass transfer, fluid mechanics, and chemical reaction engineering.

CHME 542. Graduate Reactor Analysis and Design (s)**3 Credits (3)**

Application and analysis of equations of continuity to multicomponent reaction systems. Introduction to homogeneous and heterogeneous catalysis, single-phase combustion, and shock reaction systems.

CHME 548. Industrial Safety**3 Credits (3)**

Same as CHME 448 with graduate-level projects.

Prerequisite(s): CHEM 1216 or CHEM 1215G.

CHME 563. Soft Matter**3 Credits (3)**

The physiochemistry of soft materials including gels, polymers and colloids, self-assembly, intermolecular forces, and colloidal forces. Taught with CHME 463. May be repeated up to 3 credits.

Prerequisite(s): CHME 302, CHME 305, CHME 361.

CHME 564. Polymer Science & Engineering**3 Credits (3)**

Synthesis, structure, property relationships of synthetic polymers. Taught with CHME 464. May be repeated up to 3 credits.

Prerequisite(s): CHME 201, CHEM 314.

CHME 565. Rheology and Viscoelasticity**3 Credits (3)**

This course is an introduction to rheology and viscoelasticity. In particular, the flow behavior of Non-Newtonian Fluids and Viscoelastic Fluids will be covered. Rheometry, the technique for characterization of fluids, will be discussed. Most of the course is quantitative and uses mathematical modeling.

Taught with CHME 465.

Prerequisite(s): CHME 306.

CHME 567. Nanoscience and Nanotechnology**3 Credits (3)**

This is a lecture/laboratory course designed to present the basic concepts, the techniques and the tools to synthesize and characterize nanometer scale materials, and the latest achievements in current and future nanotechnology applications in engineering, materials, physics, chemistry, biology, electronics and energy. It is intended for a multidisciplinary audience with a variety of backgrounds. This course should be suitable for graduate students as well as advanced undergraduates. Topics covered will include: nanoscience and nanotechnology, nanofabrication, self-assembly, colloidal chemistry, sol-gel, carbon nanotubes, graphene, thin film, lithography, physical vapor deposition, chemical vapor deposition, quantum dots, lithium batteries, X-ray diffraction, scanning electron microscopy, transmission electron microscopy, nanoelectronics, nanophotonics and nanomagnetism, etc. Taught with CHME 467.

Prerequisite(s): (CHEM 1225G or CHEM 1226) and (PHYS 1230G or PHYS 1310G).

CHME 578. Electrochemistry: Basics & Applications**3 Credits (3)**

The course will integrate theoretical studies and engineering applications of the mechanisms responsible for electrochemical devices, while identifying technological restrictions to practical applications through a general overview of underlying electrochemistry concepts of various types of energy storage devices, with a few categories discussed in depth. Graduate project required. Student must be graduate students in chemical engineering or instructor approval.

Learning Outcomes

1. gain overview of electrochemical cells and processes understand Potential and thermodynamics of cells

CHME 579. Corrosion and Degradation of Materials**3 Credits (3)**

Failure of engineering materials in aggressive environments. Chemical and electrochemical mechanisms of corrosion. Influence of chemical composition and microstructure on corrosion behavior. Types of corrosion and chemical attack, including uniform corrosion, galvanic corrosion, pitting and other forms of localized corrosion, stress corrosion cracking, and corrosion fatigue. Methods of corrosion mitigation including cathodic protection, coatings, passivation, and corrosion inhibitors. Corrosion in nuclear reactors and nuclear waste repositories. Taught with CHME 479.

Prerequisite(s): CHME 361.

CHME 586. Biofuels**3 Credits (3)**

Introduction to the fundamentals and applications of biofuels and bioenergy production; biomass resources and their composition; types of biofuels; conversion technologies (thermochemical and biochemical conversion processes); biodiesel production, algae to biofuels; economic and environmental assessments; term paper of selected topics relevant to biofuels. May be repeated up to 3 credits. Restricted to: CHME, CH E majors.

Prerequisite(s): CHME 201.

CHME 590. Graduate Seminar**1 Credit (1)**

Presentations on topics of professional interest in chemical engineering. Includes seminars by faculty, graduate students, and invited speakers from academia, government, and industry. May be repeated up to 6 credits. Restricted to: CHME majors.

CHME 594. Professional Communication in Chemical Engineering**2 Credits (2)**

Connections between interpersonal relationships and the effective communication of information. Strategies for formal and informal written and verbal communication in the context of presentations, interviews, reports and publications. Factors affecting non-verbal communication. Special focus will be given to understanding and adapting to the audience's perspective. 2 credits. Open to chemical engineering graduate students or by permission of instructor. This class will prepare you to communicate technical information effectively within a variety of contexts and to a variety of audiences. Class assignments will be partially based on current student needs such as preparing presentations for professional conferences, giving research progress reports, and writing research manuscripts. Restricted to: CHME majors.

Prerequisite(s): CHME graduate student standing.

CHME 595. Chemical Process Design and Business Analysis**3 Credits (3)**

Graduate chemical process design principles, emphasizing literature review, patent search, heuristics application, process simulation assistance to process creation, synthesis of reactor and separator trains, second-law analysis, heat and power integration, process equipment mechanical design specifications, process design optimization, cost accounting and capital estimation, annual costs, earnings, and profitability analysis.

Prerequisite(s)/Corequisite(s): CHME 506, CHME 516, CHME 542. **Prerequisite(s):** CHME 452, CHME 455 L or equivalent.

CHME 596. Chemical Process Industries Research**1 Credit (1)**

Independent graduate-level chemical process design project development, literature search, and proposal/defense.

Prerequisite(s): CHME 595.

CHME 597. Advanced Chemical Process Industry Analysis**2 Credits (2)**

In-depth analysis and defense of a timely commercially-relevant chemical process design.

Prerequisite(s): CHME 596.

CHME 598. Ph.D. Research- Level I**1-9 Credits (1-9)**

Individual investigations either analytical or experimental. May be repeated up to 6 credits.

CHME 599. Master's Thesis**1-15 Credits (1-15)**

Thesis.

CHME 690. Graduate Seminar**1 Credit (1)**

Presentations on topics of professional interest in chemical engineering. Includes seminars by faculty, graduate students, and invited speakers from academia, government, and industry. Required each semester for every Ph.D. student. All candidates for graduate degrees required to give seminar. May be repeated up to 8 credits. Restricted to: CHME majors.

CHME 698. Ph.D. Research- Level II**1-9 Credits (1-9P)**

Advanced topics for current research. Course subtitled in the Schedule of Classes. May be repeated up to 99 credits. Consent of Instructor required.

Prerequisite(s): successful completion of Ph D qualifying exam.

CHME 700. Doctoral Dissertation**1-9 Credits (1-9)**

Individual research in selected topics of current interest in chemical engineering. Up to 6 of the 18 credits of CHME 700 that are required for the Ph D may be completed before successful completion of comprehensive exam. Thesis/Dissertation Grading.

Learning Outcomes

1. Demonstrate skills in the (1) design of experiments or simulations, (2) collection of experimental/simulated data, (3) development of appropriate models, and (4) make appropriate use of those models; Complete an independent research project, resulting in at least a thesis/dissertation and peer-reviewed journal article(s); Defend original research in front of a panel of peers and experts; Be knowledgeable of the contemporary issues that are relevant to their chosen area of research.

CHSS - COMM HEALTH/SOC SRVCS

CHSS 1110. Intro to Health & Community Services**3 Credits (3)**

This course offers a holistic and multidisciplinary approach towards health promotion, wellness and a healthy lifestyle. Emphasis is placed on the major problems/issues that have the greatest significance to personal and community health. Topics to be discussed include: nutrition, fitness, stress management, sexuality, drug education and others.

Learning Outcomes

1. Understand basic foundations of community health –history, framework and present progress: Identify key historical advances, people and events in public health; Understand Healthy People 2020 goals and objectives; Understand the levels of prevention (primary, secondary, tertiary) of public health
2. Identify organizations that help shape community health and their role in promoting health: Governmental; Quasi-Governmental; Nongovernmental; Identify local resources/agencies focused on health and human services
3. Conduct research in public health: Identify major sources for public health research; Governmental websites; Journals; Interpret and evaluate public health resources for academic use; Write a basic journal article critique
4. Understand the history and function of the school health program: Identify components of a coordinated school health program; Identify and overcome barriers common to CSHP; Apply the CSHP to contemporary issues in child/adolescent health

CHSS 2510. Service Learning**1-4 Credits (1-4)**

Service Learning Experience in Human and Community Service: Exploration of contemporary social, civil, economic and ethical problems that require student participation in collaborative efforts within the community

Prerequisite(s)/Corequisite(s): PHLS 1110G, CHSS 1110, and PHLS 2120. Prerequisite(s): PHLS 2110. Restricted to Community Colleges campuses only.

Learning Outcomes

1. Understand the importance of service learning in community building and civic participation.
2. Students should have completed at least 90 hours of service learning experience with a community agency of their choice.
3. Compile and submit a list of detailed daily service learning activities including contact individuals, meetings attended, presentations, specific tasks accomplished or contributions to agency or community, new skills learned, trainings, and number of hours spent on each activity.
4. Design a service learning project incorporating the key elements of Public Health, and addressing a need in the community.
5. Provide an oral presentation and write a personal reflection of the service learning experience in class.
6. Practice critical thinking, decision making skills, and civic responsibility in promoting better health and general well-being

CHSS 2511. Leadership/Mentorship Training for the CHSS Ambassadors Program**1 Credit (1)**

Leadership development for volunteers serving as CHSS ambassadors. Focus on public relations and CHSS undergraduate degree programs. Graded S/U.

Prerequisite: consent of instructor.

Learning Outcomes

1. Compare and contrast different theories of leadership.
2. Demonstrate skillful communication in a leadership role.
3. Work with a team to develop and manage large-scale events.

CJUS-CRIMINAL JUSTICE

CJUS 1110G. Introduction to Criminal Justice**3 Credits (3)**

This course provides an overall exploration of the historical development and structure of the United States criminal justice system, with emphasis on how the varied components of the justice system intertwine to protect and preserve individual rights. The course covers critical analysis of criminal justice processes and the ethical, legal, and political factors affecting the exercise of discretion by criminal justice professionals.

Learning Outcomes

1. Describe the history, structure and function of the criminal justice system in the United States.
2. Discuss the role of law enforcement, court systems, corrections, and security in maintaining social order.
3. Identify and describe crime causation theories, various measures of crime and their reliability and victimization theories.
4. Relate fundamental principles, concepts and terminology used in criminal justice to current events.
5. Apply basic analytical and critical thinking skills in evaluating criminal justice issues, policies, trends and disparities.

CJUS 1120. Criminal Law**3 Credits (3)**

This course covers basic principles of substantive criminal law including elements of crimes against persons, property, public order, public morality, defenses to crimes, and parties to crime. May be repeated up to 3 credits.

Learning Outcomes

1. Explain the concepts of substantive criminal liability in the United States, including actus reas, mens rea, causation, concurrence, and parties to crime.
2. Define the differences between criminal law and civil law in the United States.
3. Demonstrate basic knowledge of legal terminology as it relates to criminal law.
4. Identify the elements of crimes against persons, property, public order and the administration of justice, public morality, and the inchoate crimes.
5. Describe the various defenses to crimes.

CJUS 1996. Special Topics in Criminal Justice**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated under different topics for a maximum of 6 credits.

Learning Outcomes

1. Varies

CJUS 2120. Criminal Courts and Procedure**3 Credits (3)**

This course covers the structures and functions of American trial and appellate courts, including the roles of attorneys, judges, and other court personnel, the formal and informal process of applying constitutional law, rules of evidence, case law and an understanding of the logic used by the courts.

Learning Outcomes

1. Explain the application of the Constitutional Amendments that apply to criminal justice.
2. Explain and describe the dual court system in the U.S. and how courts enforce the rule of law.
3. Identify and list the duties and requirements of the courtroom workgroup.
4. Describe courtroom procedures, rules of the court, and due process of law.
5. Articulate basic knowledge of the U.S. criminal court system.
6. Define legal terms.
7. Explain the use of discretion in criminal procedure.
8. Differentiate the role of courts of limited jurisdiction, courts of general jurisdiction, and the appellate courts in the processing of criminal cases.

CJUS 2140. Criminal Investigations**3 Credits (3)**

This course introduces criminal investigations with in the various local, state, and federal law enforcement agencies. Emphasis is given to the theory, techniques, aids, technology, collection, and preservation procedures which insure the evidentiary integrity. Courtroom evidentiary procedures and techniques will be introduced. Community Colleges only. (Note: students completing CJUS 2140 may not take CJUS 321.)

Learning Outcomes

1. Identify developments in investigation technology.
2. Identify common types of criminal investigations and their key components.
3. Apply proper crime scene investigative protocols.
4. Explain proper evidentiary gathering and handing procedures, and utilize various interviewing techniques.
5. Identify and compare different law enforcement agencies and the role they play in criminal investigations.
6. Describe proper collection, evidence preservation, documentation, and court presentation.
7. Develop effective search authorization.

CJUS 2150. Corrections System**3 Credits (3)**

This course introduces the corrections system in the United States, including the processing of an offender in the system and the responsibilities and duties of correctional professionals. The course covers the historical development, theory, and practice, as well as the institutional and community-based alternatives available in the corrections process.

Learning Outcomes

1. Describe the purposes of the corrections system and the issues facing the corrections system.
2. Explain the components of the corrections system and describe their functions.
3. Compare and contrast the different forms of correction practices.
4. Explain the goals of corrections, the different factors affecting the sentencing process, the legal rights of prisoners, and the issues concerning prison violence.
5. Explain the impact of reentry into society.
6. Identify the issues concerning capital punishment.
7. Describe the effectiveness of various correction programs on offenders.

CJUS 2160. Field Experience in Criminal Justice**3-6 Credits**

This course is designed to provide actual experience working for a criminal justice agency and the opportunity to apply criminal justice concepts and theory to a field situation. Students already working in an agency will complete an approved learning project while on the job.

Prerequisites: CJUS 1110G, prior arrangement and consent of instructor and a GPA of 2.0 or better in major.

Learning Outcomes

1. Obtain practical experience by observing, researching, and working in a criminal justice agency.
2. Apply the knowledge of principles, theories, and methods that were learned in the classroom to situation in which field experience will be devoted.
3. Instill an understanding for general and specific problems that criminal justice agencies encounter on a daily basis.
4. Develop a professional work ethic and attitudes, including reliability, professional responsibility, and the ability to work cooperatively with others.

CJUS 2220. The American Law Enforcement System**3 Credits (3)**

This course covers the historical and philosophical foundations of law and order, with an in-depth examination of the various local, state, ad federal law enforcement agencies and how they interact within the criminal justice system.

Learning Outcomes

1. Discuss, evaluate, and analyze the role of police in the democratic society today, and the historical development of modern day law enforcement
2. Define and explain the different types of community policing and the valid reasons behind their application within a community
3. List and discuss the ways to overcome the barriers to change within a police organization, good recruitment, screening, and retention of employees
4. Analyze and discuss the history of and the different types of police patrol, as well as the use of force and deadly force, and methods used for controlling police behavior
5. Describe and discuss the different types of police behavior, potential oversight, and remedy and their limitations
6. List and discuss the benefits of higher and continued education, along with the minimum educational requirements for police officers
7. Evaluate and discuss the reasons for police stress and the methods of dealing with stressors
8. Interpret current court cases, both state and federal, that affect police procedures

CJUS 300. Introduction to Criminal Justice Research**3 Credits (3)**

Overview and evaluation of criminal justice research. Selection of research topics, methods of data selection and collection, analysis techniques, and presentation of findings.

Prerequisite: restricted to majors or consent of instructor.

CJUS 301. Advanced Research Methods**3 Credits (3)**

Study of selected quantitative and qualitative skills and their application to criminal justice research.

Prerequisite: Restricted to majors or consent of instructor.

CJUS 302. Crime, Justice and Society**3 Credits (3)**

Through critical analysis students build a rich understanding of the role of crime in our contemporary landscape and explore ideas and practices associated with justice, victimization, criminality, morality and righteousness. The course cultivates knowledge & awareness of the interactions between socially constructed phenomena (race, class, power, ethnicity, economic structures) and popular beliefs, policies, and practices associated with crime, punishment, and formal social control. It is recommended that you complete three of the following English courses before enrolling in this class:

ENGL 1110G, ENGL 2210G, ENGL 2221G & ENGL 2130G. Restricted to: Criminal Justice majors.

CJUS 303. Introduction to Criminological Theory**3 Credits (3)**

Defining and measuring crime, crime causation, and the criminal behavior system, and their linkage to criminal justice policies, procedures, and practices. Students must be enrolled or have completed third English writing class and completed two of the following: ENGL 1110G, ENGL 2210G, ENGL 2221G or ENGL 2130G. Restricted to: C J majors.

Prerequisite(s): CJUS 300.

CJUS 304. Historical Perspectives of Criminal Justice Systems**3 Credits (3)**

Examines the precursors to and development of three distinct systems associated with crime and punishment in the United States: the Courts, the Police, & Corrections. By studying the historical context and socio-political backdrop in which these institutions emerged and expanded students will come to a richer understanding of them and their attendant policies, practices, conventions, and assumptions. It is recommended that you complete three of the following English courses before enrolling in this class: ENGL 1110G, ENGL 2210G, ENGL 2221G or ENGL 2130G. Restricted to: Criminal Justice majors.

Prerequisite(s): CJUS 300.

CJUS 306. Criminal Procedural Law**3 Credits (3)**

Legal analyses of the rights of criminal defendants; legal duties and responsibilities of criminal justice personnel in the processing of criminal defendants. May be repeated up to 3 credits. Restricted to: C J majors.

Prerequisite(s): Restricted to majors, Forensic Science minors, or consent of instructor.

CJUS 307. Law of Evidence**3 Credits (3)**

Evidentiary rules and concepts and their application in a criminal trial. May be repeated up to 3 credits. Restricted to: C J majors.

Prerequisite(s): Restricted to majors, Forensic Science minors, or consent of instructor.

CJUS 321. Criminal Investigation and Intelligence**3 Credits (3)**

Principles of criminal investigation and intelligence production; processing cases from complaint through crime scene search, identification and collection of evidence, interviewing and interrogation, and case preparation for courts. May be repeated up to 3 credits. Restricted to: C J majors.

Prerequisite(s): Restricted to majors, Forensic Science minors, or consent of instructor.

CJUS 331. American Correctional Institutions**3 Credits (3)**

Structure, organization, and operations of United States jails and prisons. Overview of correctional standards and classification systems, emphasizing current theory and practice.

Prerequisite: restricted to majors or consent of instructor.

CJUS 332. Correctional Law**3 Credits (3)**

Federal and state laws and rules of post-conviction procedures; rights of the convicted related to sentencing, appeals, clemency, and restoration of rights.

Prerequisite: restricted to majors or consent of instructor.

CJUS 333. Juvenile Corrections**3 Credits (3)**

Development and implementation of juvenile facilities and community programs. Effectiveness of current corrections practices. Restricted to majors.

CJUS 345. Victimology

3 Credits (3)

Study of risk factors in crime victimization, the impact of crimes upon victims, and the role of the victim in the criminal justice system.

Prerequisite: restricted to majors or consent of instructor.

CJUS 346. Psychology and the Justice System

3 Credits (3)

Analysis of psychological underpinnings of criminal behavior and the implications of these psychological principles for criminal justice policy. May be repeated up to 3 credits. Restricted to: C J majors.

Prerequisite(s): Restricted to majors, Forensic Science minors, or consent of instructor.

CJUS 347. Sex Crimes

3 Credits (3)

Dynamics of sex crimes for victims and offenders, plus consideration of the legal and correction systems' response to sex crimes. Restricted to majors.

CJUS 348. Serial Killers

3 Credits (3)

Overview and critical assessment of serial homicide and its relevance for contemporary U.S. society. Focus on factors influencing definitions and cultural understanding of serial homicide.

Prerequisite(s): 60 credit hours.

CJUS 360. The Juvenile Justice System

3 Credits (3)

History, development, and philosophy behind a separate juvenile justice system. Role of the juvenile court, evaluation of juvenile law and procedure, and the processing of juvenile offenders.

Prerequisite: restricted to majors or consent of instructor.

CJUS 380. Introduction to Terrorism

3 Credits (3)

Overview of the phenomenon of terrorism, psychological and sociological theories of terrorism, and various contemporary governmental policies.

CJUS 391. Special Readings in Criminal Justice

1-3 Credits

Individually chosen subject areas not readily available in other courses. May be repeated for a maximum of 6 credits under different subtitles. Restricted to majors.

Prerequisites: at least a 2.5 GPA and consent of instructor.

CJUS 393. Internship in Criminal Justice

1-12 Credits

Field experience in a local, state, or federal criminal justice or private security agency. Includes orientation, observation, conferences, and work experience. Credits limited to six if student has taken CJUS 2160. May be repeated for a maximum of 12 credits. Restricted to majors. Graded S/U.

Prerequisites: consent of instructor and GPA of 2.5 or better.

CJUS 399. New Mexico Law

3 Credits (3)

New Mexico legal system, court structure and procedures; legal terms and concepts; constitutional, criminal, mass media, historical and social issues relating to New Mexico. Same as POLS 399, JOUR 399, SOCI 399, and HIST 399.

CJUS 405. Juvenile Courts and Law

3 Credits (3)

History, development, and current status of juvenile courts. Legal status of juveniles in court and constitutional protections afforded them. Restricted to majors.

CJUS 410. Criminal Justice Administrative Systems

3 Credits (3)

Administrative structures in criminal justice agencies and institutions; relationship of administrative structures to practical police, courts, and corrections problems.

Prerequisite: restricted to majors or consent of instructor.

CJUS 412. Introduction to Security Technology and Loss Prevention

3 Credits (3)

Private and public responses to security problems, including employee theft, perimeter security, and domestic or foreign terrorism; reviews related law and management practices.

CJUS 414. Race, Crime and Justice

3 Credits (3)

Historical and contemporary analysis of the relationship between race and crime in the United States with emphasis upon human equality and fairness. Overview of racial and ethnic social categorizations and how they impact law and order.

CJUS 416. Global Perspectives on Youth and Drug Use**3 Credits (3)**

Overview of global drug use among young people, comparative legal structures, formal and informal responses. Restricted to C J, ANTH, GOVT, SOC, GNDR, S WK majors.

CJUS 417. Drugs In Our World**3 Credits (3)**

Comparative analysis of patterns and theories of drug use, formal government mitigation strategies.

CJUS 424. Forensic Law**3 Credits (3)**

Overview of the rules and issues related to the use of scientific information in the legal process. May be repeated up to 3 credits. Restricted to: C J majors.

Prerequisite(s): C J major, Forensic Science minors, or consent of instructor.

CJUS 425. Issues in Ethics, Law, and Criminal Justice**3 Credits (3)**

Examination of the key ethical and decision-making dilemmas facing professionals working in the field of law and criminal justice.

Prerequisite: restricted to majors or consent of instructor.

CJUS 427. Race and Crime in Film**3 Credits (3)**

Critical analysis of film where messages relating race and crime are present, with emphasis on how this imagery informs problem definition, policies, and practice within the criminal justice system.

Prerequisite(s): 60 credit hours.

CJUS 428. Mexican-Americans and Issues of Social Justice**3 Credits (3)**

In this course we will explore and discuss social issues related to the Mexican American community in the U.S., with special emphasis on their collective historical struggles and contributions to society. We will discuss the political, economic and cultural forces that exemplify their experience as a "whole."

Prerequisite(s): Students must have completed CJUS 300 or research methods equivalent or consent from the instructor.

CJUS 429. Immigration & Justice**3 Credits (3)**

This course is designed to introduce undergraduate students to the complexities of immigration in the United States through a social justice lens. Students will explore the intersections of race, ethnicity, gender, and class in immigration through different groups' historical and contemporary experiences, including immigrants' experience with the criminal justice system.

Prerequisite(s): Student must have completed CJUS 300 or Research Methods equivalent or consent of the instructor.

CJUS 430. The U.S. Supreme Court and the Criminal Justice System**3 Credits (3)**

History and workings of the U.S. Supreme Court in the context of the criminal justice system from writs of certiorari to last minute appeals in death penalty cases, including study of specific U.S. Supreme Court cases in the areas of criminal law, criminal procedural law, 8th amendment prison sentencing issues, and death penalty cases. Consent of Instructor required. Restricted to: Criminal Justice majors.

CJUS 431. Family Violence and the Law**3 Credits (3)**

This course will examine how practitioners are involved in the criminal justice system in areas of family violence including: child physical abuse; child sexual abuse; child neglect; child ritualistic abuse; child exploitation; sibling abuse; intimate partner abuse; stalking; sexual abuse and elder abuse. This course will be helpful for those who wish to go into law enforcement or victim's advocacy work. Restricted to: Criminal Justice majors.

CJUS 432. Issues in Criminal Justice**3 Credits (3)**

Seminar on problems and conflicts encountered in major criminal justice issues. Topics announced in the Schedule of Classes. May be repeated for unlimited credits under different subtitles.

CJUS 434. Probation, Parole, and Community Corrections**3 Credits (3)**

Structure, organization, and operation of probation, parole, and other community-based correctional programs in the U.S. Overview of historical and recent trends in the supervision of offenders in the community and in the development of alternatives to incarceration. Analysis of issues related to community correctional policies and practices. Restricted to majors.

CJUS 435. Political Penology**3 Credits (3)**

Comparative analysis of incarceration and sanctions as punishment for crimes of conscience, religious intolerance, and dissidence.

CJUS 436. Courts and Sentencing**3 Credits (3)**

This course will focus on the structure, organization, and operation of the state and federal court systems in the United States. It examines courtroom decision making and dynamics of courthouse justice—prosecutorial discretion, plea bargaining practices, jury and judicial decision making and sentencing. Additional topics will include racial, gender and class disparities in sentencing outcomes and the impact of recent reforms directed at the criminal court system. Restricted to: Criminal Justice majors.

CJUS 437. Wrongful Convictions**3 Credits (3)**

This course will address causes (e.g. problems in witness identification, forensics, police and attorney conduct) as well as results of erroneous dispositions (e.g. compensation, media dynamics, possible reforms) in a critical analysis. Appropriate for prospective police, legal, and policy professionals. Restricted to: Criminal Justice majors.

CJUS 440V. Comparative Criminal Justice Systems**3 Credits (3)**

Cross-national study of selected Western and non-Western legal systems. Comparison of structures and functions of police, court systems, and corrections in different systems.

CJUS 449. Senior Seminar**3 Credits (3)**

Problems and conflicts encountered in major attempts to control crime. Restricted to majors.

Prerequisite(s): CJUS 1110G, CJUS 1120, CJUS 2220, CJUS 2150, CJUS 2120, CJUS 300, CJUS 301, 90 credit hours completed.

CJUS 453. Women and Justice**3 Credits (3)**

Critical analysis of the impact of the criminal justice system, race and class upon the lives of women. Restricted to majors.

CJUS 454. Human Trafficking**3 Credits (3)**

Study of global human trafficking, its causes and costs, and mitigation strategies. Restricted to C J, GOVT, SOC, GNDR, S WK majors.

CJUS 455. Feminist Research Methods**3 Credits (3)**

Feminist research practices and methodologies utilized in various disciplines. Definitions of research, what constitutes valid inquiry, how research can be feminist, and what it means to do interdisciplinary work. Same as GNDR 455.

CJUS 484. Hate Crimes & Groups**3 Credits (3)**

Explores the phenomenon of hate-motivated violence. Examines the hate crime laws, organized hate groups, and social theories attempting to explain violent hate.

CJUS 501. Research Methods in Criminal Justice**3 Credits (3)**

Research design, methods of data collection and analysis, and preparation of research reports. Restricted to majors.

Prerequisite: C J major or consent of instructor.

CJUS 511. Nature of Crime**3 Credits (3)**

Defining and measuring crime, crime causation, and criminal behavior systems. Restricted to majors.

Prerequisite: C J major or consent of instructor.

CJUS 514. Advanced Race, Crime, and Justice**3 Credits (3)**

Advanced analysis of the historical and contemporary relationship between race and crime in the United States with emphasis upon human equality and fairness. Overview of racial and ethnic social categorizations and how they impact law and order.

CJUS 515. A Course on Punishment**3 Credits (3)**

Exploration and analysis of the idea and practice of punishment through a variety of philosophical perspectives, seeking to understand its moral and practical viability as employed in contemporary society, including its application within the criminal justice system.

CJUS 520. Advanced Girls, Women & Crime**3 Credits (3)**

Advanced critical social science analysis of concepts of violence and justice as experienced by women impacted by the criminal justice system. Restricted to C J, GNDR majors. Crosslisted with: GNDR 520

CJUS 524. Forensic Law**3 Credits (3)**

Rules and policy implications related to the use of scientific information in legal process. Restricted to majors.

Prerequisite: C J major or consent of instructor.

CJUS 525. Issues in Ethics, Law, and Criminal Justice**3 Credits (3)**

Examination of the key ethical and decision-making dilemmas facing professionals working in the fields of law and criminal justice. Restricted to majors.

CJUS 527. Advanced Race & Crime in Film**3 Credits (3)**

Advanced critical analysis of film where messages relating race and crime are present, with emphasis on how this imagery informs problem definition, policies, and practice within the criminal justice system.

CJUS 528. Advanced Mexican-Americans and Issues of Social Justice**3 Credits (3)**

Advanced analysis of social issues related to the Mexican American community in the U.S., with special emphasis on their collective historical struggles and contributions to society. We will discuss the political, economic and cultural forces that exemplify their experience as a "whole."

Learning Outcomes

1. Explore and discuss social issues related to the Mexican American community in the U.S. Gain a better understanding of the history of the Mexican American experience in the U.S. Understand current social justice issues impacting the Mexican American community. Explore the Mexican American community experience particularly in the southwest. Critically engage the challenges faced by the Mexican American community on issues such as racial discrimination, racial profiling, immigration, and crime.

CJUS 529. Advanced Immigration & Justice**3 Credits (3)**

Advanced analysis of the complexities of immigration in the United States through a social justice lens. Students will explore the intersections of race, ethnicity, gender, and class in immigration through different groups' historical and contemporary experiences, including immigrants' experience with the criminal justice system.

CJUS 531. Advanced Family Violence and the Law**3 Credits (3)**

This course will examine how practitioners are involved in the criminal justice system in areas of family violence including: child physical abuse; child sexual abuse; child neglect; child ritualistic abuse; child exploitation; sibling abuse; intimate partner abuse; stalking; sexual abuse and elder abuse. This course will be helpful for those who wish to go into law enforcement or victim's advocacy work. Restricted to: Criminal Justice majors.

CJUS 532. Advanced Issues in Criminal Justice (f, s, sum)**3 Credits (3)**

Seminar on problems and conflicts encountered in major criminal justice issues. Topics announced in the Schedule of Classes. May be repeated under different subtitles for unlimited credit.

CJUS 535. Advanced Political Penology**3 Credits (3)**

Advanced comparative analysis of incarceration and sanctions as punishment for crimes of conscience, religious intolerance, and dissidence.

CJUS 537. Advanced Wrongful Convictions**3 Credits (3)**

This course will address causes (e.g. problems in witness identification, forensics, police and attorney conduct) as well as results of erroneous dispositions (e.g. compensation, media dynamics, possible reforms) in a critical analysis. Appropriate for prospective police, legal, and policy professionals. Restricted to: Criminal Justice majors.

CJUS 541. Seminar in Criminal Justice Policy Analysis and Planning**3 Credits (3)**

Seminar on policy development, planning and implementation processes in criminal justice. Links formal policy goals as they relate to theory and outcomes. Topics announced in the Schedule of Classes. Restricted to majors.

Prerequisite: C J major or consent of instructor.

CJUS 545. Advanced Victimology**3 Credits (3)**

Study of risk factors in crime victimization, the impact of crimes upon victims, and the role of the victim in the criminal justice system. Consideration of the impact of criminal justice policy on victim outcomes.

CJUS 555. Advanced Feminist Research Methods**3 Credits (3)**

Advanced feminist research practices and methodologies utilized in various disciplines. Definitions of research, what constitutes valid inquiry, how research can be feminist, and what it means to do interdisciplinary work. Same as GNDR 555.

CJUS 560. Juvenile Justice Systems**3 Credits**

Policy development and operations in police, court, and correctional agencies in response to juveniles. Analysis of programs designed to identify, prevent and treat juvenile offenders. CJUS 570. Probation and Parole 3 cr. Advanced analysis of goals, theories and practices of all forms of correction in the community, including probation, parole, plus other intermediate sanctions. Restricted to majors.

CJUS 581. Community Policing**3 Credits (3)**

Overview and analysis of community policing issues from various perspectives. Analysis of strategies that facilitate police and community collaboration. Restricted to majors.

CJUS 591. Directed Readings in Criminal Justice**3 Credits (3)**

Supervised review of literature in specialized areas of the nature of crime, law and social control, and criminal justice administration. Consent of instructor required.

CJUS 592. Independent Research**1-3 Credits**

Design and execution of a criminal justice research project. Requires a written paper in standard format, including literature review, hypotheses, methodology, findings, and conclusions.

CJUS 593. Internship**3-6 Credits**

Supervised placement in an applied or research setting in criminal justice. An in-depth written report of the project is required. Restricted to C J majors. May be repeated for a maximum of 6 credits. Graded S/U.

Prerequisites: introductory graduate course in the area of the internship and consent of the internship supervisor.

CJUS 599. Master's Thesis**1-15 Credits**

Thesis.

COMM-COMMUNICATION

COMM 1115G. Introduction to Communication**3 Credits (3)**

This survey course introduces the principles of communication in the areas of interpersonal, intercultural, small group, organizational, public speaking, and mass and social media.

Learning Outcomes

1. Describe basic communication terms, forms and concepts.
2. Identify basic communication research methods and theories.
3. Explain the significance of ethics and diversity in communication processes.
4. Apply various concepts and skills in multiple communication contexts

COMM 1130G. Public Speaking**3 Credits (3)**

This course introduces the theory and fundamental principles of public speaking, emphasizing audience analysis, reasoning, the use of evidence, and effective delivery. Students will study principles of communication theory and rhetoric and apply them in the analysis, preparation and presentation of speeches, including informative, persuasive, and impromptu speeches.

Learning Outcomes

1. Demonstrate effective speech preparation.
2. Demonstrate effective speech delivery through use of language, nonverbal elements and the creation of presentation aids.
3. Analyze a potential audience and tailor a speech to that audience.
4. Evaluate presentations according to specific criteria.
5. Explain common propaganda techniques and logical fallacies, and identify them in the speeches of others.
6. Recognize diversity and ethical considerations in public speaking.

COMM 2110. Communication Theory**3 Credits (3)**

This course provides an exploration of major theories, concepts and methods of research in the study of human communication.

Learning Outcomes

1. Identify, explain, and illustrate key concepts and principles of the major traditions of communication theory.
2. Analyze practical problems and situations using theories.
3. Integrate research correctly and ethically from credible sources to support the primary purpose of communication.

COMM 2111. Introduction to the Communication Major**1 Credit (1)**

This is a one-credit course for new Communication Studies majors. It helps them get acquainted with the department, the department head (professor for this course, the professors, other students, and the department student organizations. It also deals with degree mapping and career mapping and any problems the students are having in their first year. Finally, the students learn about the the Communication Studies discipline and various communication careers they can pursue with their degree. The class meets one day each week for one hour. Restricted to: Communication Studies majors. Restricted to Las Cruces campus only.

Learning Outcomes

1. To give you some knowledge about your major and this department.
2. To help you learn more about the study of human communication in general and we approach it in our various courses.
3. To make you comfortable with the department, its professors and graduate students, as well as staff.
4. To assist you in finding important resources for earning your degree in Communication Studies with a high GPA.
5. To engage you and your concerns in earning your degree.
6. To advise you in ways that match your goals with the department goals.

COMM 2996. Special Topics**1-3 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Learning Outcomes

1. Varies

COMM 2997. Independent Study**1-3 Credits**

Individualized, self-paced projects for students with a special interest in communication topics. May be repeated for a maximum of 6 credits.

Prerequisites: COMM 1115G and sophomore standing.

Learning Outcomes

1. Varies

COMM 305. Communication Research Methods**3 Credits (3)**

Introductory course in communication research. Emphasis on how to be an effective consumer of research.

COMM 310. Communication Theory and Discovery**3 Credits (3)**

This course combines the content of the former COMM 2110 and COMM 305 courses. The course explores the nature of communication science, major communication theories, and how communication research is conducted and interpreted.

COMM 351. Persuasion Theory and Practice**3 Credits (3)**

Training in understanding and applying the principles and techniques of argumentation and persuasion.

COMM 370. Organizational Communication**3 Credits (3)**

Communication strategies and patterns of private and governmental organizations, including research on the communication process.

COMM 376. Communication and Culture**3 Credits (3)**

Cultural and intercultural communication theory and behavior, with a concentration on the development of specific communication skills which should facilitate effective intercultural communication.

COMM 377. Conflict Management**3 Credits (3)**

Communication strategies to manage and negotiate conflict in intrapersonal, interpersonal, group, and organizational settings.

COMM 384. Interpersonal Communication**3 Credits (3)**

Theories of interpersonal communication and relational communication including study of relevant models, contexts and constructs.

COMM 425. Small Group Communication**3 Credits (3)**

Principles and methods of modern group discussion with emphasis on the role of the group in problem solving.

COMM 440. Political Communication**3 Credits (3)**

Presidential and congressional campaigns, political persuasion techniques, political advertising, power in language, and media aspects of political information. Ideology, resistance to political manipulation, and dependence of democracies on communication.

COMM 450. Technologies of Human Communication**3 Credits (3)**

Development and evolution of human communication technologies from prehistory through the future of computer-mediated communication networks. Examines behavioral, cognitive, social, cultural, and political issues of new communication technologies and their use and management.

Prerequisite: junior or senior standing.

COMM 455. Fundamentals of Communication and National Security**3 Credits (3)**

This course addresses communication perspectives informing national security, strategic intelligence, and the intelligence process. Students will examine U.S. national security history, policy, the development of the Intelligence Community, and intelligence as processes of communication. This course serves as an introduction to national security studies.

COMM 456. Communication and the Intelligence Cycle**3 Credits (3)**

The course addresses communication requirements and the technical, cognitive, and cultural complexity of the collaborative research environment. Students participate in novel, team-based problem scenarios that provide the foundation for acquiring advanced cognitive analytic methods and strategies. Students will engage in interdisciplinary information science processes and will develop and present analytic products responding to national security requirements.

COMM 457. Strategic Communication and Public Diplomacy**3 Credits (3)**

This course covers history, theory, and research related to the use of communication to change attitudes in favor of U.S. national security interests. Students will examine the use of strategic communication and influence in diplomacy, intelligence, and military communities in terms of specific strategies, effects, and issues. Students will learn to distinguish public diplomacy, information operations, public affairs, and other forms of political communication that are used by the U.S. government to persuade target populations about American interests and goals. Topics include soft power, intelligence-based negotiation processes, and research methods used to identify influence techniques or groups that threaten U.S. national security.

COMM 458. Intercultural Communication and National Security**3 Credits (3)**

This course provides a concentration on cultural factors in international affairs and conflicts, how culture affects perceptions of national interests, and the relationship of U.S. national security to understand the general and political cultures of other nations. Students will integrate cultural and intercultural communication theory and behavior, with an emphasis on the development of specific communication skills to facilitate developing cultural knowledge in government and political contexts. Students will learn how to study the cultural factors that affect international conflicts and how strategic communication should address such cultural factors.

COMM 460. Deception and Communication**3 Credits (3)**

Deceptive communication including nonverbal indicators of lies, types of lies, and influence of relationships on lying behavior and interpretation.

COMM 462. Family Communication**3 Credits (3)**

A communication perspective on traditional and nontraditional family configurations, roles, interaction patterns, and conflict. Includes an examination of media depictions of families and family interaction, as well as current social and political issues related to the family.

COMM 465. Nonverbal Communication**3 Credits (3)**

Study of and experimentation with nonverbal aspects of human communication as vital components of the total communication process.

COMM 470. Leadership Communication**3 Credits (3)**

Examination of traditional theories and concepts of leader-follower dynamics; presentation of cognitive, systems, and symbolic interpretative views of leadership with an emphasis on persuasion and motivation in leader-follower interactions.

COMM 471. Sports Communication**3 Credits (3)**

This course provides a senior-level exploration of the role sports and sports communication plays in contemporary culture. Readings will examine the interrelationship between sports and media in society, the identities that fans assume when engaging in fandom and sports viewership, the pervasiveness of sports communication practices in the sports industry, the role of media in story telling, and the way cultural identifiers of class, ethnicity, and gender play out in the media. This is taught with COMM 571.

COMM 475. International Communication**3 Credits (3)**

Exploration of the forms and channels of communication substantially influenced by international cultural and political factors. Covers: global communication technology; news, information and entertainment flows; international diplomacy and negotiation, communication in war and peace.

COMM 477. Environmental Communication**3 Credits (3)**

Examines the link between communication and environment within the context of communication scholarship. Topics include sense of place, cultural approaches to interacting with environment as well as exploring current themes surrounding environment.

COMM 480. Health Communication**3 Credits (3)**

Examination of central issues in communication theory and practice as applied to health care. Includes communication in health care organizations, media dissemination of health information, role of communication in disease prevention and health promotion, and symbolic meaning of illness within cultures.

COMM 485. International Teaching Assistant Development**3 Credits (3)**

International teaching assistants will receive instruction in communicative skills to enable them to meet their responsibilities at NMSU. Course includes lectures, seminars, video-taped presentations, and tutorial sessions emphasizing pedagogic and presentation skills and styles.

Prerequisite: consent of instructor.

COMM 490. Independent Study**1-3 Credits**

Individualized, self-paced projects for advanced students. May be repeated for a maximum of 6 credits.

Prerequisites: COMM 1115G and junior standing with consent of participating instructor.

COMM 491. Selected Topics**1-6 Credits**

Individual and/or group study of selected topics. To be identified by subtitle. May be repeated for a maximum of 12 credits.

Prerequisite: prior arrangement with faculty supervisor(s).

COMM 495. Communication Internship**3 Credits (3)**

Internship opportunity to apply what has been learned to a real-world situation. May be repeated for a maximum of 6 credits. Restricted to majors.

Prerequisite: junior standing and 3.0 GPA in major.

COMM 505. Research Methods**3 Credits (3)**

Seminar in the quantitative study of human communication phenomena, research design, and statistical analysis.

COMM 506. Qualitative Research Methods in Communication**3 Credits (3)**

Survey of qualitative research methods in the study of human communication, including historical and critical approaches, interviewing, participant-observation, and communication ethnography. Students apply methods to their own research.

COMM 540. Seminar in Political communication**3 Credits (3)**

Political communication theory, research, and issues. Empirical studies of campaigns, movements, news media, voter decision-making, political participation, socialization, and knowledge. Political theory, field research, communication science findings and research methods.

COMM 550. Seminar in Communication Technologies**3 Credits (3)**

Seminar on design, usage, and social impact of electronic mail, communication through computer networks, and new technologies of organizational communication such as group decision support systems (GDSS). Each student will study an actual application of a major communication technology in an organization.

COMM 551. Seminar in Persuasion**3 Credits (3)**

Work with an actual persuasion campaign, such as public information, political, or commercial marketing campaigns. Includes case studies of large-scale persuasion efforts, current theoretical models of persuasion processes, and methods for studying, evaluating, and refining messages for optimal effects.

Prerequisite: COMM 351 or consent of instructor.

COMM 555. Seminar Fundamentals of Communication and National Security**3 Credits (3)**

This seminar course addresses communication perspectives informing national security, strategic intelligence, and the intelligence process. Students will examine U.S. national security history, policy, the development of the Intelligence Community, and intelligence as processes of communication. This course serves as an introduction to national security studies. Graduate students are required to fulfill advanced research and presentation requirements.

COMM 556. Seminar Communication and the Intelligence Cycle**3 Credits (3)**

This seminar course addresses communication requirements and the technical, cognitive, and cultural complexity of the collaborative research environment. Students participate in novel, team-based problem scenarios that provide the foundation for acquiring advanced cognitive analytic methods and strategies. Students will engage in interdisciplinary information science processes and will develop and present analytic products responding to national security requirements. Graduate students will be required to fulfill advanced research and presentation requirements.

COMM 557. Seminar Strategic Communication and Public Diplomacy**3 Credits (3)**

The seminar course covers history, theory, and research related to the use of communication to change attitudes in favor of U.S. security interests. Students will examine the use of strategic communication and influence in diplomacy, intelligence, and military communities in terms of specific strategies, effects, and issues. Students will learn to distinguish public diplomacy, information operations, public affairs, and other forms of political communication that are by the U.S. government to persuade target populations about American interests and goals. Topics include soft power, intelligence-based negotiation processes, and research methods used to identify influence techniques of groups that threaten U.S. national security. Graduate students will be required to fulfill advanced research and presentation requirements.

COMM 558. Seminar Intercultural Communication and National Security**3 Credits (3)**

The seminar course provides a concentration on cultural factors in international affairs and conflicts, how culture affects perceptions of national interests, and the relationship of U.S. national security to understand the general and political cultures of other nations. Students will integrate cultural and intercultural communication theory and behavior, with an emphasis on the development of specific communication skills to facilitate developing cultural knowledge in government and political contexts. Students will learn how to study the cultural factors that affect international conflicts and how strategic communication should address such cultural factors. Graduate students will be required to fulfill advanced research and presentation requirements.

COMM 562. Seminar in Family Communication**3 Credits (3)**

This course examines cutting edge research on family communication, as well as classic theories and research findings that have influenced and revolutionized the way scholars conceptualize family interaction. Topics include basic family communication processes, communication in family subsystems, communication during family stress, and the role of family interaction in health and well-being. Students will explore how family relationships are built, maintained, and destroyed by communication as well as the potentially important and long lasting effects of family relationships on individuals.

COMM 565. Seminar in Nonverbal Communication**3 Credits (3)**

This course focuses on human physical behaviors as the basis of communication between persons. This physical behavior includes such variables as the voice, face, eyes, posture, gesture, space, territory, clothing, and touch. The content of the course considers the individual and social factors affecting the production of such behaviors, and the effects of such behaviors on others' attitudes, perceptions, cognitions, and relationships. Applications of research and theory in nonverbal communication to infant development, personality, sex differences, marital satisfaction, relationship development, culture, aging, and brain functioning are also studied throughout the course.

COMM 570. Seminar in Organizational Communication**3 Credits (3)**

Communication strategies and patterns of private and governmental organizations, including research on communication systems.

COMM 571. Seminar in Sports Communication**3 Credits (3)**

This seminar provides a graduate-level exploration of the role sports and sports communication plays in contemporary culture. Readings will examine the interrelationship between sports and media in society, the identities that fans assume when engaging in fandom and sports viewership, the pervasiveness of sports communication practices in the sports industry, the role of media in story telling, and the way cultural identifiers of class, ethnicity, and gender play out in the media. This is taught with COMM 471.

COMM 576. Seminar on Communication and Culture**3 Credits (3)**

Cultural and intercultural communication theory and research. Focuses on discovering and describing distinctive ways of speaking within and between cultures.

COMM 583. Seminar in Theories of Communication**3 Credits (3)**

Communication systems, symbolic processes, analysis of messages.

COMM 584. Seminar in Interpersonal Communication**3 Credits (3)**

Theories of interpersonal communication and communication within a relationship, including study of relevant models, contexts, and constructs.

COMM 590. Independent Study**1-6 Credits**

Individualized, self-paced projects.

Prerequisite: consent of instructor.

COMM 591. Special Topics**1-9 Credits**

Individual and/or group study of special topics. To be identified by subtitle.

Prerequisite: prior arrangement with faculty supervisor(s).

COMM 595. Communication Internship for Graduate Students**3 Credits (3)**

Internship opportunity to apply what students have learned to the real world. Restricted to majors.

Prerequisite: 9 credits of M.A. degree.

COMM 598. MA PROJECT**1-6 Credits (1-6)**

Project credits are used for the master's degree project option. May be repeated up to 6 credits. Restricted to: Comm Studies graduate majors only. majors.

COMM 599. Master's Thesis**1-15 Credits**

Thesis.

CSEC - CYBERSECURITY

CSEC 110. Principles of Cybersecurity**3 Credits (3)**

Course covers contemporary trends in cybersecurity including understanding characteristics of security vulnerabilities as they relate to hardware, software, data, procedures, and user actions. Restricted to Community Colleges campuses

Learning Outcomes

1. Explain the importance of cybersecurity in the global economy.
2. Explain why cybersecurity is a growing profession.
3. Explain how hackers use unsuspecting individuals to propagate risk
4. Explain why cybersecurity is critical to industry and public safety
5. Explain approach to cybersecurity.
6. Explain the characteristics of cyber warfare.
7. Explain trends in the cyber threat landscape.
8. Explain the framework of enterprise security solutions.

CSEC 275. Introductory to Cryptography**3 Credits (3)**

Introduction to the foundation of cryptography, principles behind cryptographic design, and cryptographic applications. Topics include encryption techniques, common cryptographic protocols and security functions.

Prerequisite(s)/Corequisite(s): MATH 1215 or above. Restricted to Las Cruces campus only.

Learning Outcomes

1. Describe the operations and benefits of cryptography
2. Able to understand necessary cryptography encoding
3. Able to use standard tools for penetration testing and compliance
4. Describe the basic need for cryptography and why it is essential for security.

CSEC 280. Introduction to Cyber Defense**3 Credits (3)**

Introduction to the foundation of cryptography, principles behind cryptographic design, and cryptographic applications. Topics include encryption techniques, common cryptographic protocols and security functions.

Prerequisite(s)/Corequisite(s): MATH 1215. Restricted to Las Cruces campus only.

CSEC 283. Ethical Hacking and Penetration Testing**3 Credits (3)**

Introduces students to the tools and software used in ethical hacking and penetration testing as well as introducing them to some of the vulnerabilities and exploits that exist within the cybersecurity field.

Prerequisite: E T 153 and E T 156.

Prerequisite/Corequisite: E T 283.

Learning Outcomes

1. Identify and describe common threats and vulnerabilities. Describe/demonstrate how to secure a network. Identify and demonstrate common tools used in ethical hacking/penetration testing. Identify and describe legal/ethical issues pertaining to ethical hacking.

CSEC 285. Introduction to Managing Information Security**3 Credits (3)**

Managerial aspects of information security and assurance including access control models, information security governance, accountability metrics, legal responsibilities, and information security program assessment.

Prerequisite(s)/Corequisite(s): CTEC 290 or OECS 269. Restricted to Las Cruces campus only.

CSEC 286. Information Security Certification Preparation**4 Credits (4)**

Covers the examination objectives and detailed preparation to prepare students to take the CompTia Security+ exam.

Prerequisite: E T 153, E T 156, and E T 283.

Learning Outcomes

1. Identify and describe common threats and vulnerabilities. Identify and demonstrate common security devices/programs. Describe/demonstrate how to secure a network.

CTEC-CYBER TECHNOLOGY

CTEC 105. Introduction to Information Technology**3 Credits (3)**

Examination of information systems and their impact on commerce, education, and personal activities. Utilization of productivity tools for communication, data analysis, information management, and decision-making. Restricted to Community Colleges campuses only.

CTEC 110. Software Applications for Technicians**1-3 Credits (1-3)**

Introduction to software applications for communication, information management, and data analysis. Students will utilize presentation, word processing, spreadsheet, database, and utility software to simulate real-world activities experienced by help desk technicians. May be repeated up to 6 credits.

Restricted to Community Colleges campuses only.

CTEC 115. TOPICS IN IT**1-3 Credits (1-3)**

Topics to be announced in the Schedule of Classes. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

CTEC 120. IT Infrastructure Support I**1-3 Credits (1-3)**

Introduction to most common types of PC configurations, installations, and failures. This course will explore troubleshooting skills for maintaining and repairing common hardware and software related problems. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

CTEC 122. IT Infrastructure Support II**1-3 Credits (1-3)**

Continuation of CTEC 120. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): CTEC 120 or OECS 185.

CTEC 127. Introduction to Internet of Things**1-3 Credits (1-3)**

Exploration of the importance of IoT in society, components of typical IoT devices and future trends. IoT design considerations, constraints, interfacing and key components of networking will also be covered. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

CTEC 130. Linux Workstation**1-3 Credits (1-3)**

Installation, configuration, and maintenance of the Linux operating system. Covers file organization, user management, and system security. Addresses general procedures for working with and modifying the operating system. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

CTEC 135. Windows Workstation**1-3 Credits (1-3)**

Installation, configuration, and maintenance of the Windows operating system. Covers file organization, user management, and system security. Addresses general procedures for working with and modifying the operating system. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

CTEC 140. Introduction to Database Design**1-3 Credits (1-3)**

Introduction to basic relational database concepts including terminology, tables, queries, forms, and reports. The course teaches data modeling concepts, building Entity Relationship Diagrams (ERDs), mapping ERDs, and use of data management system applications. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

CTEC 145. Introduction to Database Management**1-3 Credits (1-3)**

Use of SQL to analyze complex business scenarios as well as to design and create, and manage databases. Course includes exposure to Application Express (APEX) to provide practical, hands-on activities. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): CTEC 140 or OECS 220.

CTEC 150. Mobile Application Programming**1-3 Credits (1-3)**

Introduction to elements of mobile application coding including concepts, design strategies, and tools needed to create, test, and deploy applications for mobile devices. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

CTEC 152. JAVA Programming**1-3 Credits (1-3)**

Introduction to concepts of programming in the Java language. Topics include data types, control structures, functions, arrays, files, and the mechanics of running, testing, and debugging code. This is a hands-on course that does not require students to have prior programming experience. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

CTEC 154. C++ Programming**1-3 Credits (1-3)**

Introduction to concepts of programming in the C++ language. Topics include data types, control structures, functions, arrays, files, and the mechanics of running, testing, and debugging code. This is a hands-on course that does not require students to have prior programming experience. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

CTEC 156. Python Programming**1-3 Credits (1-3)**

Introduction to concepts of programming in the Python language. Topics include data types, control structures, functions, arrays, files, and the mechanics of running, testing, and debugging code. This is a hands-on course that does not require students to have prior programming experience. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

CTEC 158. Visual Basic Programming**1-3 Credits (1-3)**

Introduction to concepts of programming in the Visual Basic language. Topics include data types, control structures, functions, arrays, files, and the mechanics of running, testing, and debugging code. This is a hands-on course that does not require students to have prior programming experience. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

CTEC 180. Introduction to Networking**3-4 Credits (3-4)**

This course introduces the architecture, structure, functions, components, and models of the Internet and computer networks. Course includes the principles and structure of IP addressing and the fundamentals of Ethernet concepts, media, and operations to build simple LANs, perform basic configurations for routers and switches. May be repeated up to 8 credits. Restricted to Las Cruces campus only.

CTEC 185. Routing and Switching Essentials**3-4 Credits (3-4)**

This course covers the architecture, components, and operations of routers and switches in a small network. Students learn how to configure routers and switches for basic functionality. Course demonstrates how to configure and troubleshoot routers and switches to resolve common issues with RIPv1, RIPng, single area and multi-area OSPF, virtual LANs, and inter-VLAN routing in both IPv4 and IPv6 networks. May be repeated up to 8 credits.

Prerequisite(s)/Corequisite(s): CTEC 180 or OECS 261. Restricted to Las Cruces campus only.

CTEC 220. Internship**1-3 Credits (1-3)**

Work experience, directly related to a student's field of study, that provides an opportunity to explore career options while experiencing hands-on application, knowledge, and theory learned in the classroom. May be repeated up to 6 credits. Consent of Instructor required. Graded: S/U Grading (S/U, Audit). Restricted to Las Cruces campus only.

Prerequisite(s): (CTEC 120 or OECS 185) AND (CTEC 130 or OECS 204), AND (CTEC 180 or OECS 261).

CTEC 230. Introduction to Linux Server Administration**1-3 Credits (1-3)**

This course addresses the implementation and support needs of IT professionals that are planning to deploy and support Linux Server(s). It provides in-depth, hands-on training for IT professionals responsible for the planning, implementation, management, and support of Linux Server operating system(s). May be repeated up to 6 credits.

Prerequisite(s)/Corequisite(s): CTEC 130 or OECS 204. Restricted to Community Colleges campuses only.

CTEC 235. Introduction to Windows Server Administration**3 Credits (3)**

This course addresses the implementation and support needs of IT professionals that are planning to deploy and support Window Server(s). It provides in-depth, hands-on training for IT professionals responsible for the planning, implementation, management, and support of Windows Server operating system(s).

Prerequisite(s)/Corequisite(s): CTEC 135 or OECS 207. Restricted to Las Cruces campus only.

CTEC 240. Fundamentals of Database Management**3 Credits (3)**

Exploration of database management using SQL and PL/SQL to extend and automate SQL in administering database systems. Students will create and work with projects which challenge them to enhance the SQL of a database solution for a business or organization. May be repeated up to 6 credits.

Restricted to Las Cruces campus only.

Prerequisite(s): CTEC 145.

CTEC 245. Fundamentals of Cloud Based Data Systems**1-3 Credits (1-3)**

Introduction to the techniques and tools required to develop database driven web applications. The course teaches students how to design, develop, and deploy efficient and responsive, database-driven web applications using Oracle Application Express. May be repeated up to 6 credits.

Prerequisite(s)/Corequisite(s): CTEC 240. Restricted to Community Colleges campuses only.

CTEC 255. Special Topics**1-3 Credits (1-3)**

Topics to be announced in the Schedule of Classes. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

CTEC 280. Scaling Networks**3-4 Credits (3-4)**

This course covers the architecture, components, and operations of routers and switches in WLANs and complex networks. Students learn how to configure routers and switches for advanced functionality and to resolve common issues with OSPF, EIGRP, and STP in both IPv4 and IPv6 networks. May be repeated up to 8 credits.

Prerequisite(s)/Corequisite(s): CTEC 185 or OECS 262. Restricted to Las Cruces campus only.

Learning Outcomes

1. Configure and troubleshoot DHCP and DNS operations for IPv4 and IPv6
2. Describe the operations and benefits of the Spanning Tree Protocol (STP)
3. Configure and troubleshoot STP operations
4. Describe the operations and benefits of link aggregation and Cisco VLAN Trunk Protocol (VTP)
5. Configure and troubleshoot basic operations of routers in a complex routed network for IPv4 and IPv6
6. Configure and troubleshoot advanced operations of routers and implement RIP, OSPF, and EIGRP routing protocols for IPv4 and IPv6
7. Manage Cisco IOS® Software licensing and configuration files

CTEC 285. Connecting Networks**3-4 Credits (3-4)**

This course covers WAN technologies and network services required by converged applications in a complex network. Students learn about selection criteria of network devices, VLANs and WAN technologies to meet network requirements to resolve common issues with data link protocols. May be repeated up to 8 credits.

Prerequisite(s)/Corequisite(s): CTEC 280 or OECS 263. Restricted to Las Cruces campus only.

CTEC 290. Network Security**3-4 Credits (3-4)**

Fundamentals of design and implementation of network security solutions that will reduce the risk of system vulnerability. Topics include: threats, attacks, vulnerabilities, tools, architecture, design, access management, risk management, and cryptography. May be repeated up to 8 credits.

Prerequisite(s)/Corequisite(s): (CTEC 120 or OECS 185), AND (CTEC 180 or OECS 261). Restricted to Las Cruces campus only.

CTEC 299. Independent Study**1-4 Credits (1-4)**

Specific subject to be determined based upon student need. May be repeated up to 8 credits. Restricted to Community Colleges campuses only.

CTFM-CLTHNG/TXTLS/FSHN MRCHDSG

CTFM 1110. Fundamentals of Fashion

3 Credits (3)

Survey of the fashion business from fiber to end product.

Learning Outcomes

1. Describe the roles and functions of industry jobs and sectors involved in the designing, production, marketing, and distribution of fashion brands within the global context.
2. Describe the business strategies of industry sectors involved in the designing, production, marketing, and distribution of fashion brands within the global context.
3. Describe the interrelationships among line planning, line development, and line presentation at manufacturing and retail levels.
4. Provide examples of the fashion industry's environmental and social impact.
5. Learn about all career tracks involved in the fashion industry and the global fashion supply chain.
6. Synthesize industry-relevant information on current issues in the fashion industry.

CTFM 2120. Fashion Illustration

3 Credits (1+4P)

This course explores aspects of fashion illustration, from drawing basic fashion figures to producing finished professional illustrations in color. This course provides the opportunity for students to integrate their fashion design development with computer-aided systems. The emphasis is on fashion innovation and concept design exploration enhanced by computer applications. May be repeated up to 3 credits.. Prerequisites: ARTS 1145G and CTFM 1110

Learning Outcomes

1. To learn Adobe Illustrator and Adobe Photoshop as drawing and design tools for electronic design and rendering.
2. To understand and utilize the computer as a tool for fashion design.
3. To understand methods of design input, including scanning, digitizing and resizing.
4. To develop customer profiles
5. To Understand Concept Style

CTFM 2130. Concepts in Apparel Construction

3 Credits (1+4P)

Students are introduced to professional standard sewing techniques and apparel construction. The techniques learned are applied to produce finished garments. Restricted to: FCSE,CTFM majors. Restricted to Las Cruces campus only.

Learning Outcomes

1. Define sewing construction terminology, equipment and sewing machine parts.
2. Learn to select suitable patterns and fabrics for garments.
3. Learn to alter commercial patterns for different body types.
4. Identify fabric types, finishes, and labeling.
5. Perform standard operating procedures on sewing machines.
6. Perform clothing construction techniques for various garments.
7. Apply knowledge of industry sewing methods to recognition of garment workmanship.

CTFM 2990. Fashion Practicum

1-3 Credits (1-3)

Applied field experience in the related areas of apparel design, fashion merchandising, and textile science. May be repeated up to 3 credits. Restricted to: CTFM majors. Restricted to Las Cruces campus only.

Learning Outcomes

1. Gain hands-on knowledge of the fashion industry.
2. Demonstrate the ability to analyze the practices of management, as observed in the industry.
3. Demonstrate an attitude that is appropriate for a prospective manager in the industry.
4. Demonstrate the understanding of, and the ability to use research and problem solving methods to develop, analyze, and present a critical incident analysis.

CTFM 300. Special Topics

1-4 Credits

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. Restricted to Las Cruces campus only.

Prerequisite(s): CTFM 1110; CTFM 2120.

CTFM 365. Apparel Analysis

3 Credits (3)

An in-depth investigation of the development, production and comparison of wearing apparel. Focus on the structural, functional and decorative aspects of apparel. Emphasis on sourcing of companies and materials, costing of the product line, comparing design and manufacturing techniques that affect price, quality, and size of apparel. Restricted to: CTFM majors.

Prerequisite(s): CTFM 1110 and CTFM 2130.

CTFM 366. Historic Fashion

3 Credits (3)

The study of clothing styles from 3500 BC through the 20th century. Restricted to: CTFM majors.

Prerequisite(s): CTFM 2120.

CTFM 371. Textile Science

3 Credits (1+4P)

The study of fiber characteristics, fabric properties and the manufacturing processes that affect the selection, use, and care of textile goods. Restricted to: CTFM majors.

Prerequisite(s): CTFM 1110.

CTFM 372. Fashion Merchandising

3 Credits (3)

A study of the processes required to bring consumer goods to the marketplace.

Prerequisite(s): CTFM 1110 and CTFM 2130.

CTFM 373. Advanced Apparel Construction II

3 Credits (1+4P)

This course builds on Basics of Apparel Construction and explores the application of advanced sewing technology across a range of fashion products. Restricted to: CTFM majors.

Prerequisite(s): CTFM 2130.

CTFM 375. Fashion Buying

3 Credits (3)

The application of planning, purchasing and controlling inventories using industry data and analytics. Includes merchandising math with an emphasis on product selection and pricing.

Prerequisite(s): ACCT 2110, CTFM 1110, and CTFM 2130.

CTFM 377. Fashion Study Tour

1-3 Credits (1-3)

Study of international/domestic fashion, designers, manufacturers, merchandisers and/or retailers. May be repeated up to 6 credits. Consent of Instructor required.

CTFM 384. Clothing for Special Needs

3 Credits (3)

Selection, adaptation, and design of clothing that is functional and attractive for special needs populations such as for active sportswear, the handicapped, the elderly, and various specialty populations.

Prerequisite: consent of instructor.

CTFM 401. Professional Development

1 Credit (1)

Introduction to the field experience including resume writing, interviewing skills, understanding business ethics and etiquette. Also includes a discussion of career paths and advice from industry guest speakers. Restricted to: CTFM majors.

Prerequisite(s): CTFM 372 and CTFM 375.

CTFM 402. Field Experience

1-3 Credits (1-3)

Practical experience in fashion, clothing design, manufacturing, merchandising, or retailing. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: CTFM majors.

Prerequisite(s): CTFM 401.

CTFM 403. Post-Field Experience

1 Credit (1)

A case based approach to analyzing internship experiences. Students will share their experiences and prepare case studies about specific business issues they encountered during CTFM 402. Restricted to: CTFM majors.

Prerequisite(s): CTFM 402.

CTFM 460. Cultural Perspectives in Dress

3 Credits (3)

Explores the social, psychological and cultural aspects of dress and appearance. Consent of Instructor required.

CTFM 473. Flat Pattern for Apparel Design**3 Credits (1+4P)**

Applied design principles to flat patterns techniques including bodies, skirts, sleeves, neckline, and bodies-sleeve combinations. Projects will require three-dimensional approaches in apparel design. Restricted to: CTFM majors.

Prerequisite(s): CTFM 2120 and CTFM 373.

CTFM 474. Fashion Promotion**3 Credits (3)**

A comprehensive examination of promotion in the merchandising environment of fashion related goods. Restricted to: CTFM majors.

Prerequisite(s): CTFM 372.

CTFM 476. Draping for Apparel Design**3 Credits (1+4P)**

Development of garment shapes using draping techniques. Emphasis placed on torso development, contouring principles and design development on the form. This course exposes the student to the design process, from initial concept and muslin sample development to final execution of the finished garments. Restricted to: CTFM majors.

Prerequisite(s): CTFM 2120 and CTFM 373.

CTFM 477. Capstone in Fashion Merchandising**3 Credits (3)**

Synthesizes previous coursework. Students apply multi-disciplinary principles to the analysis of fashion merchandising case studies and industry related challenges.

Prerequisite(s): CTFM 372, CTFM 375 and CTFM 402.

CTFM 492. Special Problems**1-4 Credits**

Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 6 credits toward a degree.

CTFM 571. Textile Science**3 Credits (1+4P)**

The study of fiber characteristics, fabric properties and the manufacturing processes that affect the selection, use and care of textile goods. Students will be required to complete additional assignments beyond what is required for CTFM 371.

CTFM 598. Special Research Programs**1-4 Credits**

Individual investigations, either analytical or experimental. May be repeated for a maximum of 4 credits per semester and no more than 6 credits toward a degree.

DANC-DANCE

DANC 1110G. Dance Appreciation**3 Credits (3)**

This course introduces the student to the diverse elements that make up the world of dance, including a broad historic overview, roles of the dancer, choreographer and audience, and the evolution of the major genres. Students will learn the fundamentals of dance technique, dance history, and a variety of dance aesthetics. Restricted to: Main campus only.

Learning Outcomes

1. Explain a range of ideas about the place of dance in our society.
2. Identify and apply critical analysis while looking at significant dance works in a range of styles.
3. Identify dance as an aesthetic and social practice and compare/contrast dances across a range of historical periods and locations.
4. Recognize dance as an embodied historical and cultural artifact, as well as a mode of nonverbal expression, within the human experience across historical periods and cultures.
5. Use dance to consider contemporary issues and modes of thought.

DANC 1130. Ballet I**1 Credit (1)**

This course is the beginning level of ballet technique. Students learn the basic fundamentals and performance skills of ballet techniques, which may include flexibility, strength, body alignment, coordination, range of motion, vocabulary, and musicality. May be repeated for a maximum of 2 credits.

Learning Outcomes

1. Apply fundamental movements of ballet techniques.
2. Enhance flexibility, strength, body alignment, coordination, balance, kinesthetic awareness, range of motion, and musicality.
3. Employ basic theories of classical ballet placement and proper alignment.
4. Develop basic ballet terminology, variations in timing and changes of facing, and barre and center combinations.

DANC 1131. Introduction to Ballroom Dance**1 Credit (1)**

Introduction to ballroom dance for non dance majors. Students will learn basic ballroom technique and partnering work. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. learn to dance Figures 1-7 in 3 American Style Ballroom dances
2. develop rhythmic accuracy in movement
3. develop the skills to adapt to a variety of dance partners
4. develop adequate social and recreational dance skills
5. develop proper carriage, poise, and grace that pertain to Ballroom dance
6. learn to recognize Ballroom music and its application for the appropriate dances
7. understand different possibilities for dance variations and their applications to a variety of Ballroom dances
8. understand and appreciate the process of creating original patterns and variations
9. expand his/her knowledge of dance forms through attending two (2) NMSU Dance Department performances and writing a critique on one of the performances
10. 1enjoy the process

DANC 1135. Introduction to Argentine Tango**1 Credit (1)**

Introduction to skills and techniques of Argentine Tango.

Learning Outcomes

1. Learn to dance figures from Argentine Tango.
2. Develop a "style."
3. Gain deeper understanding of the Elements of Dance Technique
4. Develop rhythmic accuracy in movement, ability to dance on time discover phrasing
5. Further lead follow skills that will enable you to dance at more advanced levels
6. Learn practice performance dance skills
7. Understand and appreciate the process of creating original amalgamations
8. Expand your knowledge of other dance forms by attending required (2) NMSU Dance Department performances and writing a critique of one (1) performance
9. Enjoy the process!

DANC 1140. Flamenco I**1 Credit (1)**

This course introduces the student to the art of flamenco and its cultural features and significance. Students will learn the fundamentals of this art form and introductory techniques and skills, which may include handwork, footwork, postures, and specific dances. May be repeated for a maximum of 2 credits.

Learning Outcomes

1. Demonstrate a basic level of competency in the principles of alignment, anatomy, coordination, mobility, stability, and stamina.
2. Demonstrate fundamental flamenco techniques relative to spatial awareness, rhythm, phrasing, and sequencing.
3. Demonstrate competency with basic flamenco movement vocabulary.
4. Perform a variety of flamenco dances, poses, steps, hand movements, and combinations.

DANC 1150. Modern Dance I**1 Credit (1)**

Modern Dance techniques and styles. Students are introduced to proper warm-up techniques, body alignment, control and flexibility. Students work with various rhythms and combinations of movements. The course emphasizes dance technique and creative experience. The history, terminology and philosophy of Modern Dance are also discussed. May be repeated for a maximum of 2 credits.

Learning Outcomes

1. Use a more developed sense of muscle control and strength, stretch and balance, coordination.
2. Demonstrate and verbalize an increased awareness of Modern Dance techniques
3. Execute dance phrases, combining several movements and in more than one rhythm.
4. Demonstrate an increased awareness of musicality while dancing and use Modern Dance Techniques creatively.

DANC 1155. Introduction to Hip-Hop Dance**1 Credit (1)**

This course provides an atmosphere of safety and encouragement in which students can express creativity and individuality through hip-hop dance. No previous dance experience required. May be repeated up to 4 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. Demonstrate appropriate strength, stamina, balance, body alignment, and flexibility
2. Demonstrate creativity, independent thinking and self-motivation as these pertain to hip-hop dance
3. Apply appropriate integration of cognitive and kinesthetic skills
4. Execute sage and creative hip-hop dance movements

DANC 1185. Beginning Country Western Dance**1 Credit (1)**

Beginning Country Western dance, including Country Western two-step, nightclub two-step, polka, and Country Western line dance. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. Learn to dance figures in Country Western Dances.
2. Develop a "style."
3. Gain deeper understanding of the Elements of Dance Technique
4. Develop rhythmic accuracy in movement, ability to dance on time discover phrasing
5. Further lead follow skills that will enable you to dance at more advanced levels
6. Learn practice performance dance skills
7. Understand and appreciate the process of creating original amalgamations
8. Expand your knowledge of other dance forms by attending required (2) NMSU Dance Department performances and writing a critique of one (1) performance
9. Enjoy the process!

DANC 1220. Introduction Latin Social Dance**1 Credit (1)**

Introduction to Latin social dance for non dance majors. Students will learn basic Latin dance technique and partnering work. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. Learn to dance 4 of the American Rhythm Style dances.
2. Develop rhythmic accuracy in movement.
3. Develop the skills to adapt to a variety of dance partners.
4. Develop adequate social and recreational dance skills.
5. Develop Cuban Motion, hip swing, proper carriage, poise, and grace that pertain to Rhythm dance.
6. Learn to recognize Latin/Swing music and its application for the appropriate dances.
7. Understand different possibilities for dance variations and their applications to a variety of Latin dances.
8. Understand and appreciate the process of creating original patterns and variations.
9. Expand his/her knowledge of dance forms through attending two (2) NMSU Dance Department performances and writing a critique on ONE performance.

DANC 1235. Intro to West Coast Sw**1 Credit (1)**

Students will learn to dance the smooth style of Swing. The West Coast Swing may be danced to ANY style of music that has a beat (Country, R&B, Hip Hop, Disco, House). Also featured is the Hustle (fast paced and exhilarating). May be repeated up to 4 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. Learn to dance figures from both West Coast Swing and Hustle
2. Develop a "style" in both West Coast Swing and Hustle.
3. Gain deeper understanding of the Elements of Dance Technique
4. Develop rhythmic accuracy in movement, ability to dance on time discover phrasing
5. Further lead follow skills that will enable you to dance at more advanced levels
6. Learn practice performance dance skills
7. Understand and appreciate the process of creating original amalgamations
8. Expand your knowledge of other dance forms by attending required (2) NMSU Dance Department performances and writing a critique of one (1) performance
9. Enjoy the process!

DANC 1460. Dance for Musical Theater I**1 Credit (1)**

This course provides students with an understanding of the Tap and Jazz Dance technique for use in Musical Theater and other performance genres at the beginning level. This course is designed for students to gain knowledge and understanding of Tap and Jazz Dance as art forms. May be repeated up to 2 credits.

Learning Outcomes

1. An understanding of traditional styles of dance used for musical theater.
2. An understanding of anatomy, kinesiology, and development of movement principles
3. Improvement of muscular strength, flexibility, and elasticity
4. An understanding of motion awareness and movement vocabulary

DANC 2114. Dance Sport I**1 Credit (1)**

Performance-based, team formation dance in a variety of Latin and ballroom dances. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Learning Outcomes

1. Practice a variety of Ballroom and Latin dances to be expressed socially, competitively and on stage Adapt and communicate with a variety of dance partners Learn skills for successful partnership Practice advanced level technique in all styles of DanceSport Develop awareness of "what is good dancing" Create original choreography for both stage and competition Self-assess -learn to be your own best teacher Self-coach -learn to coach self through four stages of development Develop musicality skills, including rhythmic accuracy and timing 1 Work as a team to make sure that no one is left behind while furthering your leadership abilities 1 Promote DanceSport in the community and in the world as a healthy and fun lifestyle alternative 1 Develop valuable life skills such as enrollment, registration teamwork 1 Enhance cognitive thinking as described by Robert J. Sternberg's triarchic theory of intelligence 1 Learn to act and perform as a "professional" dancer 1 Produce creative spring dance concert

DANC 2130. Ballet II**2 Credits (2)**

Intermediate level of ballet technique; Introduction of more advanced Ballet vocabulary at barre/center work; increase flexibility, strength, body alignment, and coordination for practice of steps/combinations with variations in timing and changes of facing. Restricted to Las Cruces campus only.

Learning Outcomes

1. A successful student will be able to understand and execute with accuracy all the steps presented on the take home quizzes and are encouraged and expected to attend at least two semesters of each level in order to advance to the next level of ballet technique

DANC 2130L. Ballet Technique II Lab**1 Credit (1)**

This course is designed for the acquisition of intermediate level ballet technique and skill development. May be repeated up to 2 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Learning Outcomes

1. An increased level of technical proficiency in ballet
2. A greater understanding and knowledge of ballet vocabulary
3. Increased flexibility and range of motion
4. Increased strength
5. Increased awareness of body alignment

DANC 2140. Flamenco II**2 Credits (2)**

The structure of flamenco through choreographies that represent the basic flamenco dance forms: Fandangos de Huelva, Alegrias, Solea "por" Bulerias, and Tientos/Tangos. The course will also cover intermediate flamenco technique including footwork, palmas as (hand claps), braceo (movement of the arms), and floreos (movement of the hands). May be repeated up to 8 credits.

Prerequisite: DANC 1140.

Learning Outcomes

1. Demonstrate the ability to dance a short Fandangos de Huelva Demonstrate the ability to dance a short Alegrias or So lea por Bulerias Demonstrate the ability to dance a short Tientos /Tangos Demonstrate an intermediate level of Pal mas, Brazeo, Floreo, Taconeos

DANC 2140L. Flamenco Dance II Lab**1 Credit (1)**

This course is designed for the acquisition of intermediate level Flamenco dance technique and skill development. May be repeated up to 2 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Prerequisite(s): DANC 1140 or instructor permission.

Learning Outcomes

1. Intermediate to advanced understanding of musical structures, enabling the identify of 12-count from 8 count rhythms.
2. An ability to present the styles of Sevillanas and Tangos as well as other Flamenco Spanish folk dances popular in Spain today.
3. An ability to utilize and present the arm work (brazeo), hand work (floreos) and hand clapping (palmas) from the various styles (palos) being explored.

5. An introductory ability to use castanets as the rhythmic accompaniment of their dance performance.

DANC 2142. Classical Spanish II**2 Credits (1+3P)**

The study of theory, techniques, and practice of Classical Spanish at the intermediate level. Includes historical and cultural contexts of this art form. May be repeated up to 8 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Prerequisite(s): DANC 1140.

Learning Outcomes

1. Knowledge of basic Classical Spanish vocabulary
2. Understanding of the basic differences between Classical Spanish dance and Ballet techniques
3. Increased coordination and rhythmic accuracy
4. Knowledge of the onomatopoeia of castanets
5. Ability to perform a Classical Spanish Dance piece with castanets

DANC 2142L. Spanish Dance II Lab**1 Credit (1P)**

This course is designed for the acquisition of intermediate level Spanish dance technique and skill development. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. Knowledge of basic Classical Spanish vocabulary
2. Understanding of the basic differences between Classical Spanish dance and Ballet techniques
3. Increased coordination and rhythmic accuracy
4. Knowledge of the onomatopoeia of castanets
5. Ability to perform a Classical Spanish Dance piece with castanets

DANC 2150. Modern Dance II**2 Credits (2)**

Modern II is designed to further the student's abilities in modern dance technique, to enhance efficient use of weight and momentum, to release held patterns in the body's mechanics, to enrich spatial awareness, and to begin work on performance techniques.

Learning Outcomes

1. Improve accuracy in alignment and shape Improve precision in space, in timing and rhythm, and in focus/intent Learn combinations and movement dynamics quickly Begin to integrate performance techniques while working in the classroom setting Use a concentrated attitude and an open, creative mind to approach the work in an artistic manner unique to your abilities Listen, see and apply all the information given within one class period and over the semester Self-awareness and mindfulness: how much space do you take in the class and why? How aware are you of those around you, and those you are dancing with? Release of weight to create controlled momentum Locating center and moving from there

DANC 2150L. Modern Dance Technique II Lab**1 Credit (1P)**

This course is designed for the acquisition of intermediate level modern dance technique and skill development. May be repeated up to 2 credits.

Consent of Instructor required. Restricted to Las Cruces campus only.

Learning Outcomes

1. Replication of movement phrases
2. Understanding of the anatomy and kinesiology principles of movement
3. Movement initiation and movement motivation
4. Static and dynamic balance
5. Modern dance movement vocabulary
6. Temporal, spatial, effort and motion awareness
7. Artistic expression by way of movement intent, imagery, and interpretation

DANC 2155. Hip Hop Dance Ensemble I**1 Credit (1)**

Performance-based instruction for students pursuing a career in hip hop dance. Instruction includes dance repertory and choreography for stage, commercial/industry, and competitive dance areas. May be repeated up to 4 credits. Consent of Instructor required.

Learning Outcomes

1. The artistry of the dancer
2. The art and interpretation of the choreography
3. An understanding of various hip-hop isolations, footwork, and basic movements dance movement vocabulary
4. Increased awareness of stage presence and projection for different avenues of hip hop such as stage, commercial, and competition
5. An understanding of behind the scene workings of a dance performance
6. How to critically reflect

DANC 2157. Intermediate Hip-Hop Dance**2 Credits (2)**

This course is for students who have experience in Hip-Hop dance. The movement material will cover West coast and Southern styles with the inclusion of the history and evolution of Hip-Hop dance. May be repeated up to 8 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. How he/she has developed his/her hip-hop personality
2. How she/he has improved confidence through this style of dance
3. How he/she has integrated core initiation with other body parts
4. How she/he uses space, time, effort and relationship to express movement ideas
5. How he/she has improved muscular control and strength
6. How she/he has physically embodied Hip-Hop movement vocabulary

DANC 2250. Contemporary Dance Ensemble I**1 Credit (1)**

Performance-based instruction for students pursuing a career in contemporary dance. Instruction includes contemporary dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Learning Outcomes

1. (Performance) An understanding of the artistry of the dancer
2. (Performance) An understanding of the art and interpretation of choreography
3. (Performance) An improvement of movement performance skill
4. (Performance) An understanding of various dance movement vocabulary
5. (Performance) An increased awareness of stage presence and projection
6. (Performance) An understanding of technical stage production
7. (Production) An understanding of costume design and construction
8. (Production) An understanding of behind the scene workings of a dance performance

DANC 2251. Spanish Dance Ensembles I**1 Credit (1)**

Performance-based instruction for students pursuing a career in dance with an emphasis in Spanish Dance. Instruction includes dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Learning Outcomes

1. An understanding of the artistry of the dancer
2. An understanding of the art and interpretation of choreography
3. An improvement of movement performance skill
4. An understanding of various dance movement vocabulary
5. An increased awareness of stage presence and projection
6. An understanding of technical stage production
7. An understanding of behind the scene workings of a dance performance
8. An understanding of the marketing and promotional aspects of performance
9. An understanding of costume design and construction

DANC 2265. Principles of Choreography I**3 Credits (3)**

Solo dance choreography technique. The course must be passed with a grade of C- or higher. Offered only in Fall semester during even years.

Learning Outcomes

1. ability to create original choreographic material for solo work (289) or group work (389), understanding of how to create a movement theme/motif, and ability to take improvisational material and turn it into choreography

DANC 2270. Improvisation I**2 Credits (2)**

Development of movement improvisational skills with complex examination of improvisational structures. Offered only in Fall semester during odd years.

Learning Outcomes

1. An understanding of the movement potential of the body An understanding of the principles of motion An awareness and skill of movement motivation An improvement of static and dynamic balance An understanding of temporal, spatial, effort and motion awareness An understanding of group dynamics An awareness of other media that can motivate movement

DANC 2310. Bronze American Rhythm**2 Credits (2)**

Bronze level American Rhythm patterns, techniques, and partnering with emphasis on elements of dance. May be repeated up to 6 credits.

Learning Outcomes

1. Learn to dance the Bronze DIVIDA Manual in American Rhythm
2. Develop Bronze level dance technique
3. Gain deeper understanding of the Elements of Dance
4. Develop rhythmic accuracy in movement, ability to dance on time discover phrasing
5. Further develop lead follow skills that will enable you to dance at more advanced levels

DANC 2311. Bronze American Smooth**2 Credits (2)**

Bronze level American Smooth patterns, technique, and partnering with an emphasis on the elements of dance. May be repeated up to 4 credits.

Learning Outcomes

1. Learn to dance the Bronze DIVIDA Manual in International Latin
2. Develop Bronze level dance technique
3. Gain deeper understanding of the Elements of Dance
4. Develop rhythmic accuracy in movement, ability to dance on time discover phrasing
5. further develop lead follow skills that will enable you to dance at more advanced levels

DANC 2320. Bronze International Latin**2 Credits (2)**

This is the style of Latin dance that is danced around the globe and is featured in the World DanceSport Championships. Students will learn the Bronze Level figures and techniques in four (4) International Style dances: Rumba, Cha Cha, Samba & Jive. May be repeated up to 8 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. Learn to dance the Bronze DIVIDA Material for the International Latin Syllabus Develop Bronze level dance technique Gain deeper understanding of the Elements of Dance Develop Smooth accuracy in movement, ability to dance on time discover phrasing Further develop lead follow skills that will enable you to dance more advanced levels

DANC 2321. Bronze International Standard**2 Credits (2)**

This is the style of Ballroom dance that is performed around the globe and is featured in the World DanceSport Championships. Learn the Bronze Level figures and techniques in five (5) International Style dances: Waltz, Tango, Viennese Waltz, Foxtrot & Quickstep. Students will focus on understanding technical elements of dance, memorizing and performing routines. May be repeated up to 4 credits.

Learning Outcomes

1. Learn to dance the Bronze DIVIDA Manual in International Standard Develop Bronze level dance technique Gain deeper understanding of the Elements of Dance Develop Smooth accuracy in movement, ability to dance on time discover phrasing Further develop lead follow skills that will enable you to dance at more advanced levels

DANC 2460. Dance for Musical Theater II**2 Credits (2)**

This course provides students with an understanding of the Tap and Jazz Dance technique for use in Musical Theater and other performance genres at the intermediate level. This course is designed for students to gain knowledge and understanding of Tap and Jazz Dance as art forms. May be repeated up to 4 credits. Consent of Instructor required.

Prerequisite(s): DANC 1460 or consent of instructor.

Learning Outcomes

1. An understanding of traditional styles of dance used for musical theater.
2. An understanding of anatomy, kinesiology, and development of movement principles
3. Improvement of muscular strength, flexibility, and elasticity
4. An understanding of motion awareness and movement vocabulary

DANC 3110. DanceSport Pedagogy: Smooth**3 Credits (3)**

In this teacher education course, students will begin to develop skills necessary in becoming a successful, professional Ballroom Dance Instructor. Students will gain technical mastery of Bronze level figures in the four (4) American Style Smooth Ballroom Dances to include the Waltz, Foxtrot, Tango and Viennese Waltz. Students will gain practical teaching experience in the area of Group Class Instruction with required in class practicums. May be repeated up to 12 credits. Consent of Instructor required.

Prerequisite(s): DANC 2311.

Learning Outcomes

1. Students will understand several philosophies of teaching
2. They will gain teaching skills through practical experience.
3. The students will teach both group and private lessons.
4. The student will gain knowledge about learning styles.

DANC 3114. Dance Sport II**1 Credit (1)**

Advanced performance-based, team formation dance in a variety of Latin and social dances.

Prerequisite: Consent of instructor and audition-based.

Learning Outcomes

1. Strengthen the students' ability to prepare for show and medleys formation routines, Develop the skills required to learn choreography quickly, commitment to excellence and unity within a team. to proudly representing NMSU

DANC 3130. Ballet Technique III**3 Credits (3)**

The study of intermediate/advanced classical ballet technique including vocabulary, history and practical application of functional anatomy.

Prerequisite: DANC 2130 or consent of instructor.

Learning Outcomes

1. A student will learn advanced mastery of ballet skills and be able to demonstrate their skillset through performance

DANC 3130L. Ballet Technique III Lab**1 Credit (1)**

This course is designed for the acquisition of intermediate/advanced level ballet technique and skill development. May be repeated up to 2 credits.

Consent of Instructor required.

Prerequisite(s): DANC 2130.

DANC 3140. Flamenco III**3 Credits (3)**

Advanced study in flamenco dance technique, its cultural history and pedagogy methods. May be repeated up to 12 credits. Consent of Instructor required.

DANC 3140L. Flamenco Dance III Lab**1 Credit (1)**

This course is designed for the acquisition of advanced level Flamenco dance technique and skill development. May be repeated up to 2 credits.

Consent of Instructor required.

DANC 3142. Classical Spanish Dance III**3 Credits (3)**

Advanced study of Classical Spanish Dance with castanets, cultural history, and pedagogy methods. A expanded focus on integration of different classical genres with focus on solo work. May be repeated up to 12 credits. Consent of Instructor required. Prerequisite(s): DANC 2142

DANC 3142L. Spanish Dance III Lab**1 Credit**

This course is designed for the acquisition of advanced level of Spanish dance technique and skill development. May be repeated up to 2 credits.

Consent of Instructor required.

DANC 3145. Flamenco Structure and Improvisation**3 Credits (3)**

A Study of various elements necessary in an improvisational setting in Flamenco. Using a cross section of Flamenco forms as a format. Students study the compass of each palo, then move to several traditional letras appropriate to these forms.

Prerequisite: DANC 2140 or Consent of Instructor.

Learning Outcomes

1. Students will demonstrate an ability to perform the appropriate movement sequences that are dictated by the cadence of the Cante/song. They will gain an understanding of the basic cross-section of cante forms to have a complete foundation for performance and presentation especially from the perspective of improvisation.

DANC 3150. Modern Dance III**3 Credits (3)**

The study of intermediate/advanced modern dance technique using the lenses of Laban and Bartinief movement analysis and principles, functional anatomy, and imagery to increase modern vocabulary, skill development, performance accuracy, and artistic expression. May be repeated up to 6 credits.

Prerequisite(s): DANC 2150 or consent of instructor.

Learning Outcomes

1. How he/she has developed his/her unique personal voice in modern dance How she/he has improved confidence through this style of dance How he/she has integrated core initiation with other body parts How she/he uses space, time, effort and relationship to express movement ideas How he/she has improved muscular control and strength How she/he has physically embodied modern movement vocabulary

DANC 3150L. Modern Dance Technique III Lab

1 Credit (1)

This course is designed for the acquisition of intermediate/advanced level modern dance technique and skill development.

Prerequisite: DANC 2150.

Learning Outcomes

1. To advance student skillset in the art of modern dance

DANC 3155. Hip Hop Dance Ensemble II

1 Credit (1)

Advanced performance-based instruction for students pursuing a career in hip hop dance. Instruction includes dance repertory and choreography for stage, commercial/industry, and competitive dance areas. May be repeated up to 4 credits. Consent of Instructor required.

DANC 3157. Advanced Hip Hop Dance

3 Credits (3)

The study of advanced hip hop dance covering West coast and Southern styles with the inclusion of the history and evolution of Hip-Hop dance. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): DANC 2157.

DANC 3175. Dance Studio Management

3 Credits (3)

The study and practice of studio management. Includes the study of financial procedures, marketing, entrepreneurship, leadership, management, fund-raising, and other related topics. Offered Spring odd years only. May be repeated up to 3 credits.

DANC 3250. Contemporary Dance Ensemble II

1 Credit (1)

Advanced performance-based instruction for students pursuing a career in contemporary dance. Instruction includes contemporary dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 6 credits. Consent of Instructor required.

DANC 3251. Spanish Dance Ensemble II

1 Credit (1)

Performance-based instruction for students pursuing a career in dance with an emphasis in Spanish Dance. Instruction includes dance repertory and choreography for stage, outdoor arenas, and site-specific areas. May be repeated up to 4 credits. Consent of Instructor required.

DANC 3265. Principles of Choreography II

3 Credits (3)

Continued investigation of the choreographic process with an emphasis on group choreography. Course must be passed with a grade of C or higher. Consent of Instructor.

Prerequisite: DANC 2265.

Learning Outcomes

1. To learn advanced concepts associated with choreography of dance

DANC 3310. Silver American Rhythm

3 Credits (3)

Silver level American Rhythm patterns and technique with emphasis on performance.

Prerequisite: DANC 2310.

Learning Outcomes

1. To enhance advanced dance sport skills beyond Bronze Level

DANC 3311. Silver American Smooth

3 Credits (3)

Silver level American Smooth patterns and technique with emphasis on performance.

Prerequisite: DANC 2311.

Learning Outcomes

1. Advance introductory skill levels and enhancing technique towards Gold level

DANC 3320. Silver International Latin

3 Credits (3)

Students will learn Silver Level syllabus figures in four (4) International Style dances: Rumba, Cha Cha, Samba & Jive and Bronze Level figures in Paso Doble. Continued training and practice in International Style Latin dance technique.

Prerequisite: DANC 2320.

Learning Outcomes

1. Learn and work towards mastery for the four different styles of dances in Dance Sport

DANC 3321. Silver International Standard**3 Credits (3)**

Learn Silver Level syllabus figures in the five (5) International Style Standard dances: Waltz, Tango, Viennese Waltz, Foxtrot & Quickstep. Students will focus on increased technical understanding to increase their ability in partnering and musicality. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): DANC 2321.

DANC 3460. Dance For Musical Theater III**3 Credits (3)**

This course provides students with an understanding of the Tap and Jazz Dance technique for use in Musical Theater and other performance genres at the intermediate level. This course is designed for students to gain knowledge and understanding of Tap and Jazz Dance as art forms. May be repeated up to 9 credits.

Prerequisite(s): DANC 2460 or consent of instructor.

Learning Outcomes

1. An understanding of traditional styles of dance used for musical theater.
2. An understanding of anatomy, kinesiology, and development of movement principles
3. Improvement of muscular strength, flexibility, and elasticity
4. An understanding of motion awareness and movement vocabulary

DANC 3510V. World Dance**3 Credits (3)**

Examination of dance forms from a cross-cultural perspective, focusing on the role of dance in different cultures around the globe. Same as HNRS 347V. May be repeated up to 3 credits.

Learning Outcomes

1. An understanding of the social importance of dance in diverse cultural settings A familiarity with the importance of dance as a vehicle through which various identities (i.e. cultural, gender and personal), roles (i.e. social and status) and values (i.e., personal and cultural) are identified and expressed. An understanding of dance as a form of non-verbal communication. The ability to discuss and compare culture's dance forms. The ability to recognize how other art forms, religions, and political climates affect cultural identity.

DANC 4250. Dance Pedagogy: Dance Technique**3 Credits (3)**

Students will learn to develop a curriculum design, apply teaching methods, and structure lesson plans for teaching specific dance styles. Course must be passed with a grade of C- or higher.

Learning Outcomes

1. Student will be able to demonstrate how to properly teach a specific dance style.

DANC 4265. Advanced Choreographic Project**1-6 Credits (1-6)**

Individual directed studies in choreography with a culminating performance. May be repeated up to 6 credits. Consent of Instructor required.

DANC 4310. Gold American Rhythm**3 Credits (2+2P)**

Advanced level American Rhythm dance technique and partnering work with choreography and performance emphasized. Includes cultural history and pedagogy methods.

Prerequisite: DANC 3310.

Learning Outcomes

1. To enhance dance sport skills beyond Silver Rhythm

DANC 4311. Gold American Smooth**3 Credits (3)**

Gold level American Smooth technique and choreography with an emphasis on performance and competition dancing.

Prerequisite: DANC 3311.

Learning Outcomes

1. Continue to work towards mastery of dance sport perfection through advanced training

DANC 4320. Gold International Latin**3 Credits (3)**

Students will complete all syllabus figures through the Gold level in the Rumba, Cha Cha, Samba, Jive and Paso Doble. Advanced training and practice in International Style Latin dance technique. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): DANC 3320.

DANC 4321. Gold International Standard**3 Credits (3)**

Students will learn Gold Level syllabus figures in the five (5) International Style Standard dances: Waltz, Tango, Viennese Waltz, Foxtrot & Quickstep. Students will focus on physical and cognitive mastery of standard dance technique and elements as well as high-level performance ability, musicality and choreography. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): DANC 3321.

DANC 4610. DanceSport Certification Preparation**3 Credits (3)**

The Professional Certification process offers extraordinary benefits to dance teachers, deeply enriching their dancing and teaching, and greatly expanding their career opportunities. This intensive course is designed to fully prepare students in taking the DVIDA and/or ISTD exams in the Smooth, Rhythm, Standard or Latin dances depending on course offered. See subtitle for specific style being taught in schedule of classes. May be repeated up to 12 credits. Consent of Instructor required.

DANC 4710. Senior Culminating Experience**2 Credits (2)**

Exit course for graduating seniors. Students will apply comprehensive knowledge of performance and production and/or pedagogy experience, to culminate in a dance production and/or teaching project. May be repeated up to 4 credits. Restricted to: DANC majors.

DANC 4990. Flamenco Practicum**1 Credit (1)**

Directed learning experiences for careers in Spanish Dance. May be repeated up to 4 credits. Consent of Instructor required.

DANC 4996. Special Topics**1-3 Credits (1-3)**

Specific subjects to be announced in the Schedule of Classes. May be repeated up to 3 credits. Consent of Instructor required.

Learning Outcomes

1. Varies

DANC 4997. Problems**1-6 Credits (1-6)**

Problems in dance education, dance pedagogy, dance performance and independent work in their solutions. May be repeated up to 6 credits. Consent of Instructor required.

Learning Outcomes

1. Varies

DANC 5114. DanceSport Ensemble**1 Credit (1)**

Advanced Rehearsal and performance of DanceSport choreography with emphasis on formation and competition dances May be repeated up to 6 credits.

DANC 5130. Advanced Theory of Ballet Technique**1-6 Credits (1-6)**

Advanced study of dance pedagogy and theory with practice in ballet technique May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 4130.

DANC 5140. Advanced Theory of Flamenco Technique**1-6 Credits (1-6)**

Advanced study of dance pedagogy and theory with practice in Flamenco technique May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 3140.

DANC 5142. Advanced Theory of Classical Spanish Dance Technique**3 Credits (3)**

Advanced study of dance pedagogy and theory with practice in Classical Spanish Dance technique May be repeated up to 9 credits. Consent of Instructor required. Crosslisted with: DANC 3142.

DANC 5145. Advanced Theory of Flamenco Dance Structures and Improvisation**3 Credits (3)**

The advanced study of various elements necessary in an improvisational setting in Flamenco dance. Using a cross section of Flamenco musical forms as a format. Students study the compass of each palo, then move to several traditional letras appropriate to these forms. May be repeated up to 6 credits. Consent of Instructor required.

DANC 5150. Advanced Theory of Modern Dance Technique**1-6 Credits (1-6)**

Advanced study of dance pedagogy and theory with practice in Modern dance technique May be repeated up to 6 credits. Consent of Instructor required. Crosslisted with: DANC 4150.

DANC 5155. Advanced Hip Hop Dance Ensemble**1 Credit (1)**

Rehearsal and performance of Hip Hop repertory with emphasis on flamenco structures, artistic expression, and athletic versatility. May be repeated up to 6 credits.

DANC 5157. Advanced Theory of Hip Hop Dance Technique**3 Credits (3)**

Advanced study and research of Hip Hop dance styles. May be repeated up to 12 credits. Consent of Instructor required.

DANC 5250. Dance Ensemble III**1 Credit (1)**

Rehearsal and performance of dance repertory with emphasis on advanced understanding of musicality, dynamic phrasing, artistic expression, and athletic versatility within a broad range of styles. May be repeated up to 4 credits. Consent of Instructor required.

DANC 5251. Advanced Spanish Dance Ensemble**1 Credit (1)**

Rehearsal and performance of Spanish Dance repertory with emphasis on flamenco structures, artistic expression, and athletic versatility. May be repeated up to 6 credits.

DANC 5310. Advanced Theory of American Rhythm Technique**1 Credit (1)**

Advanced study of dance pedagogy and theory with practice in American Rhythm technique

Learning Outcomes

1. Student will demonstrate advanced techniques in American Rhythm style

DANC 5311. Advanced Theory of American Smooth Technique**1 Credit (1)**

Advanced study of dance pedagogy and theory with practice in American Smooth technique

Learning Outcomes

1. Student will be able to demonstration specific skills in American Smooth Techniques

DANC 5320. Advanced Theory of International Style Latin American**1 Credit (1)**

Advanced study of International Latin American technique, styling and partnering skills.

Learning Outcomes

1. Student will be able to demonstrate advanced skills in Latin American Dance

DANC 5321. Advanced Theory of International Style Ballroom**1 Credit (1)**

Advanced study of International Ballroom technique, styling and partnering skills.

Learning Outcomes

1. Student will be able to demonstrate advanced skills in Ballroom techniques

DANC 5510. Movement Research Investigation**3 Credits (3)**

Preparation for writing a master's thesis or dissertation. Writing of three chapters: Chapter 1- Introduction of topic under review, Chapter 2 - literature review, Chapter 3 – application of the literature review in the teaching or performance profession. May be repeated up to 3 credits. Consent of Instructor required.

DANC 5550. Advanced Theory of Dance Pedagogy**3 Credits (3)**

Advanced study of dance pedagogy theory and practice. To be conducted during the students second semester.

Learning Outcomes

1. Student will be able to demonstrate skill sets both academically and through practical demonstration by teaching various age groups in the art of dance

DANC 5710. Dance Administration and Leadership**2 Credits (2)**

The study and investigation of both management and leadership theories and how to apply these theories in practice.

DANC 5900. Master's Thesis**1-6 Credits (1-6)**

This course is for graduate dance students who choose to write a thesis instead of a performance or teaching project. May be repeated up to 6 credits. Thesis/Dissertation Grading.

DANC 5992. Directed Studies**1-4 Credits (1-4)**

Supervised projects and/or research in theoretical studies, inclusive of community service projects. May be repeated up to 4 credits. Consent of Instructor required.

DANC 5996. Special Topics**1-6 Credits (1-6)**

Specific subjects offered in addition to standard academic curriculum. Course title to be announced in the Schedule of Classes. May be repeated up to 6 credits. Consent of Instructor required.

DANC 5998. Dance Internship**2 Credits (2)**

Internship opportunities in either dance education, dance performance/production, or dance administration. Internship site determined by both Director of Dance Program and graduate student. Consent of Instructor required.

DANC 6998. Dance Internship II**3 Credits (3)**

Internship opportunities in either dance education, dance performance/production, or dance administration. Internship site determined by both Director of Dance Program and graduate student. May be repeated up to 3 credits.

DAS-DENTAL ASSISTING

DAS 101. Introduction to Dental Assisting**2 Credits (2)**

An introduction to the duties and responsibilities of a dental assistant. Includes brief lessons on head and neck anatomy, chair side assisting, sterilization techniques, dental office emergencies, and dental office management. Restricted to: Community Colleges only.

DAS 111. Bio-Dental Science**4 Credits (3+3P)**

An introduction to biomedical and dental sciences with emphasis on head and neck anatomy and tooth morphology. Includes microbiology, general anatomy and physiology, histology and embryology of the oral cavity, pathology and pharmacology as they relate to dentistry.

Corequisite(s): DAS 113, DAS 115, and DAS 117.

Prerequisite(s)/Corequisite(s): PSYC 1110G, PHLS 1110G, and NUTR 2110. Prerequisite(s): ENGL 1110G, BIOL 1130, and (COMM 1130G or COMM 1115G). Restricted to: OEDA majors. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

DAS 113. Dental Assisting I**4 Credits (2+6P)**

Introduction to chair side assisting procedures, instrumentation, infection control, equipment safety and maintenance, dental office emergencies, and management of pain and anxieties.

Corequisite(s): DAS 111, DAS 115, and DAS 117.

Prerequisite(s)/Corequisite(s): PSYC 1110G, PHLS 1110G, and NUTR 2110. Prerequisite(s): ENGL 1110G, BIOL 1130, and (COMM 1130G or COMM 1115G). Restricted to: OEDA majors. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

DAS 115. Dental Radiology**3 Credits (2+3P)**

Radiation physics, hygiene, and safety theories. Emphasis on the fundamentals of oral radiographic techniques and interpretation of radiographs. Includes exposure of intra-oral radiographs, quality assurance, radiographic interpretation, patient selection criteria, and other ancillary radiographic techniques.

Corequisite(s): DAS 111, DAS 113, and DAS 117.

Prerequisite(s)/Corequisite(s): PSYC 1110G, PHLS 1110G, and NUTR 2110. Prerequisite(s): ENGL 1110G, BIOL 1130, and (COMM 1130G or COMM 1115G). Restricted to: OEDA majors. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

DAS 117. Dental Materials**3 Credits (2+3P)**

Composition, chemical and physical properties, manipulation and uses of dental materials. Laboratory experiences include the application and manipulation of various materials used in dentistry.

Corequisite(s): DAS 111, DAS 113, and DAS 115.

Prerequisite(s)/Corequisite(s): PSYC 1110G, PHLS 1110G, and NUTR 2110. Prerequisite(s): ENGL 1110G, BIOL 1130, and (COMM 1130G or COMM 1115G). Restricted to: OEDA majors. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

DAS 123. Dental Assisting Practicum**6 Credits (1+15P)**

This course is the clinical component of the program that combines general practice and experiences in the work place. Seminar topics focus on the practicum experiences and critique of performance. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

Prerequisite(s): DAS 111, DAS 113, DAS 115, and DAS 117.

Corequisite(s): DAS 125, DAS 127, and DAS 129.

DAS 125. Professional Concepts**3 Credits (3)**

Emphasis on the development of professionalism for the dental office. Includes oral communication, psychology, patient relations, problem-solving skills, stress management, and employability in addition to dental jurisprudence and ethics. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

Prerequisite(s): DAS 111, DAS 113, DAS 115, and DAS 117.

Corequisite(s): DAS 123, DAS 127, and DAS 129.

DAS 127. Dental Office Management**2 Credits (2)**

This capstone course is an introduction to business office procedures, including telephone management, appointment control, accounts payable, completion of third party reimbursement forms, inventory control data entry for charges and payments, management recall, basic dental computer software and operating basic business equipment. Restricted to: OEDA majors. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

Prerequisite(s): DAS 111, DAS 113, DAS 115, and DAS 117.

Corequisite(s): DAS 123, DAS 125, and DAS 129.

DAS 129. Preventive Dentistry**2 Credits (2)**

Prevention of dental diseases, oral hygiene instruction, fluoride, community dental health, and nutrition. Development, implementation and evaluation of a community dental health project. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

Prerequisite(s): DAS 111, DAS 113, DAS 115, and DAS 117.

Corequisite(s): DAS 123, DAS 125, and DAS 127.

DAS 130. Dental Assisting II**4 Credits (2+6P)**

Continuation of chair side assisting skills and techniques with a major emphasis on four-handed dentistry. This capstone course includes specialties within dentistry and expanded chair side functions. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

Prerequisite(s): DAS 111, DAS 113, DAS 115, DAS 117, DAS 123, DAS 125, DAS 127, and DAS 129.

DAS 131. Dental Office Management I**3 Credits (3)**

Introduction to the field of dental office management with emphasis placed on professional verbal and written communication skills utilized within the dental office. Content includes dental terminology, charting, and back office experience as they relate to dental reception and management.

Prerequisite(s)/Corequisite(s): DAS 101, AHS 120, and AHS 202. **Prerequisite(s):** ENGL 1110G. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

DAS 133. Dental Office Management II**3 Credits (3)**

Places emphasis on computer programs specifically designed for dental office management (Dentrix, Sof Dent, etc.) Expanded course content on oral communication and telephone skills, appointment scheduling, patient relations, stress management solutions, and comprehensive critical thinking/problem solving skills.

Prerequisite(s)/Corequisite(s): AHS 202. **Prerequisite(s):** ENGL 1110G, DAS 101, and AHS 120. Restricted to Alamogordo, Carlsbad and Dona Ana campuses.

DAS 155. Special Topics**1-6 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

DHYG - DENTAL HYGIENE/HYGIENIST

DHYG 110. Preclinical Dental Hygiene**3 Credits (3)**

Basic scientific principles and current theory, prevention of disease transmission, ethical and professional treatment of patients, clinical learning preparation, and introduction to comprehensive patient care. Offered concurrently with DHYG 112 to provide dental hygiene students with introductory knowledge, skills and attitudes to function in the clinical setting. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 112. Preclinical Dental Hygiene Lab**3 Credits (12P)**

Clinical application to basic theories and procedures used in dental hygiene practice. Techniques of instrumentation used in performing diagnostic, preventive and therapeutic services utilized when providing comprehensive patient care. Student will practice these techniques on manikins and student partners in the clinic. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 114. Oral Histology and Embryology**2 Credits (2)**

Introduction and description of general histology and embryology with emphasis on the microscopic structures of enamel, dentin, pulp, cementum, periodontal ligament, bone, oral mucosa, epithelial attachment and development of orofacial structures. May be repeated up to 2 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 116. Head and Neck Anatomy**3 Credits (3)**

Comprehensive study of the anatomy of the head and neck regions, including skeletal, nervous, circulatory, lymphatic, and muscular systems. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 117. Dental Anatomy**2 Credits (2+1P)**

A detailed study of nomenclature, morphologic characteristics, and physiologic relationships of human primary and permanent teeth as related to the clinical practice of dental hygiene. Laboratory activities develop observation and dexterity skills. May be repeated up to 2 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 118. Dental Radiology**3 Credits (3+4P)**

Study of radiation physics, hygiene and safety theories. Fundamentals of oral radiographic techniques and interpretation of radiographs. Includes exposure of intra-oral radiographs, quality assurance, radiographic interpretation, patient selection criteria, ancillary radiographic techniques and application to dental hygiene treatment. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 120. Dental Hygiene Theory I**3 Credits (3)**

Continuation of the theoretical basis for dental hygiene clinical practice. Emphasis on emergency care, planning dental hygiene care, health promotion and disease prevention, oral rehabilitation and care of appliances, modifications of dental hygiene care through the life-span, and an introduction to medically comprised patients. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 122. Clinical Dental Hygiene I**3 Credits (16P)**

Application of dental hygiene procedures on a variety of clinical patients under direct supervision of faculty. Emphasis on patient assessment and diagnosis, treatment procedures, appointment planning and prevention techniques. Theory is simultaneously related to practical experience. Offered concurrently with DHYG 120. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 124. General and Oral Pathology**3 Credits (3)**

Introduction to general pathology with focused study of diseases and disorders of the oral cavity and their interrelationship with body systems; developmental anomalies of the teeth and jaws; manifestations of disease in the oral cavity, head and neck. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 126. Periodontology**3 Credits (3)**

Study of normal and diseased periodontium to include the structural, functional and environmental factors. Emphasis on etiology, pathology, evaluation of disease, treatment modalities, and therapeutic and preventative periodontics relative to the hygienist's role as a co-therapist in a contemporary practice setting. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 132. Clinical Dental Hygiene II**2 Credits (2)**

Continuation of clinical skills, patient assessment and diagnosis, treatment and appointment planning, preventive techniques and application of dental hygiene procedures at an intermediate level under the direct supervision of faculty. Clinical-based instruction helps students synthesize new knowledge, apply previous knowledge, and gain experience managing the workflow. Theory is simultaneously related to practical experience. May be repeated up to 2 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

Prerequisite(s): "C" or above in DHYG 120, DHYG 122, DHYG 124, DHYG 126, DHYG 134.

Corequisite(s): DHYG 218.

DHYG 134. Dental Materials**3 Credits (2+2P)**

Study of the composition, chemical and physical properties, manipulations, and uses of dental materials. Emphasis on materials and procedures for which the dental hygienist is directly responsible. Laboratory experiences include application and manipulation of various materials used in dentistry. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 210. Dental Hygiene Theory III**2 Credits (2)**

Advanced theory of dental hygiene and information on periodontal therapies relative to the hygienist's role as a co-therapist in clinical practice. Continuation of the study of dental hygiene care for medically comprised patients and an introduction to special needs patients. May be repeated up to 2 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 212. Clinical Dental Hygiene III**4 Credits (16P)**

Continuation of clinical skills, patient assessment and diagnosis, treatment and appointment planning, preventive techniques and applications of dental hygiene procedures at the intermediate to competent level under supervision of faculty. Emphasis on dental hygiene treatment for the medically compromised and periodontally involved patients. Theory is simultaneously related to practical experience. Offered concurrently with DHYG 210. May be repeated up to 4 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 214. Dental Pharmacology**3 Credits (3)**

Study of the pharmacologic aspects of drugs and drug groups with which the dentist and dental hygienist are directly and indirectly concerned. Emphasis is placed on nomenclature, origin, physical and chemical properties, preparation, modes of administration and effects of drugs upon the body systems. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 215. Medical and Dental Emergencies**2 Credits (2)**

This course provides an overview of medical and dental emergencies encountered most frequently in the dental setting. It also provides the student with knowledge and techniques on how to address those emergencies should they occur. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 217. Research Methodology**2 Credits (2)**

This course provides an introduction to the principles and application of research methods in social, behavioral and medical research. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 218. Pain and Anxiety Management**2 Credits (2)**

Study of the application of various physical, chemical, and psychological modalities to the prevention and treatment of preoperative and postoperative patient anxiety and pain. Emphasis on administration of local anesthesia and nitrous oxide. May be repeated up to 2 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 219. Pain and Anxiety Management Clinical**1 Credit (4P)**

Clinical application of concepts learned in DHYG 218. Emphasis on the administration and techniques of local anesthesia and monitoring nitrous oxide. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

Prerequisite(s): DHYG 218.

DHYG 220. Dental Hygiene Theory IV**3 Credits (3)**

Theoretical preparation for advanced clinical practice. In-depth study of dental hygiene care for patients with special needs. Case Study presentations and a Board Review are utilized to demonstrate the synthesis of comprehensive dental hygiene knowledge, skills and attitudes. The most current dental and dental hygiene technology will be reviewed as it related to clinical practice. May be repeated up to 3 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 222. Clinical Dental Hygiene IV**4 Credits (16P)**

Clinical sessions combine basic and advanced dental hygiene skills with time management techniques essential for private practice. Comprehensive patient care to include assessment, dental hygiene diagnosis, treatment planning, implementation and evaluation of dental care, nonsurgical periodontal therapy, adjunct clinical procedures, ultrasonic instrumentation, patient management, sealants, and comprehensive programs for control of oral diseases will be emphasized. Theory is simultaneously related to practical experience. Students are encouraged to develop independent decision-making with minimal faculty supervision. May be repeated up to 4 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 224. Principles of Practice**2 Credits (2)**

Examination of the dental hygienist's role in both traditional and non-traditional employment settings. Career planning, resume preparation and interviewing are practices. An understanding of the law, professional ethics of dental hygiene and the need for lifelong learning are emphasized. Future roles of the dental hygienist and emerging issues in dental hygiene will be explored. May be repeated up to 2 credits. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 225. Dental Public Health Education**3 Credits (3)**

Study of principles and concepts of community public health and dental health education. Emphasis on dental epidemiology and statistical methods, community assessment, educational planning, implementation, and evaluation, scientific review of literature, and classroom presentation. Restricted to: DHYG majors. Restricted to Community Colleges campuses only.

DHYG 255. Special Topics in Dental Hygiene**1-6 Credits (1-6)**

Study of special topics related to the advanced practice of dental hygiene. May include educational methodology as well as applications in clinical practice, research, or community service. Consent of instructor required. Restricted to: Community Colleges only. Restricted to DHYG majors.

DMS-DIAGNOSTIC MED SONOGRAPHY

DMS 100. Introduction to Clinical Practicum**1 Credit (1)**

Introduction to working in the medical environment. Includes preparation for clinical internship and observation hours in the ultrasound department. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 101. Introduction Sonography/Patient Care**2 Credits (2)**

Introduction to the careers in sonography, terminology, medical ethics, scanning planes, applications of ultrasound, professional standards and patient care. May be repeated up to 2 credits. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 116. Vascular Technology I**2 Credits (2)**

Review of basic ultrasound physics and principles, peripheral vascular anatomy, hemodynamics, Doppler evaluation, peripheral vascular scanning techniques, physiologic testing and the carotid arteries and the peripheral vascular system. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 116 L. Vascular Technology I Lab**1 Credit (2P)**

Includes protocol development, scanning techniques, recognition of anatomical relationships and the normal ultrasound appearance of the carotid arteries and peripheral vasculature utilizing real-time sonographic equipment including Doppler. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 130. Pelvic Sonography**1 Credit (1)**

Includes the anatomy, sectional anatomy and normal physiology of the pelvic structures; including the uterus, ovaries, prostate, pelvic muscles, lower GI, appendix and vessels as well as scanning techniques, sonographic appearance and Doppler evaluation of the pelvis. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 130 L. Pelvic Sonography Lab**1 Credit (2P)**

Includes protocol development, scanning techniques, recognition of anatomical relationships and the normal ultrasound appearance of the pelvic structures including the uterus, ovaries, prostate, lower gastrointestinal system, appendix and pelvic muscles utilizing real-time sonographic equipment including Doppler. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 140. Abdominal Sonography**3 Credits (3)**

Includes the anatomy, sectional anatomy and normal physiology of prevertebral vessels, liver, biliary system, pancreas, upper gastrointestinal system, kidneys, adrenals, and spleen as well as scanning techniques, sonographic appearance and Doppler evaluation of the deep abdominal organs. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 140 L. Abdominal Sonography Lab**1 Credit (4P)**

Includes protocol development, scanning techniques, recognition of anatomical relationships and the normal ultrasound appearance of prevertebral vessels, liver, biliary system, pancreas, upper gastrointestinal system, kidneys and spleen utilizing real-time sonographic equipment including Doppler. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 150. Sonographic Principles and Instrumentation I**1 Credit (1)**

Includes the fundamental properties and mathematical relationships between variables of wave parameters, acoustic variables, attenuation, pulsed wave operation, transducers, system operation, Doppler, and artifacts utilizing real-time sonographic equipment. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 160. 1st Trimester Obstetric Sonography**1 Credit (1)**

Includes the embryology, anatomy, sectional anatomy, normal physiology, biometrics, assessment, and sonographic appearance of the 1st trimester fetus, placenta, uterus and adnexa as well as scanning techniques according to recognized protocols. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 165. 2nd/3rd Trimester Obstetric Sonography**1 Credit (1)**

Includes the anatomy, sectional anatomy, normal physiology, biometrics, assessment, and sonographic appearance of the 2nd and 3rd trimester fetus, placenta, uterus, and adnexa as well as scanning techniques according to recognized protocols. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 170. Clinical Practicum I**2 Credits (8-10P)**

Development of technical and professional aspects of diagnostic ultrasound in a hospital or clinical setting at the developmental level. Ongoing reinforcement and broadening of knowledge base related to hospital procedures and policies. Continued observation, assistance and performance of patient care and sonographic duties under direct supervision. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 180. Clinical Practicum II**5 Credits (30P)**

Development of technical and professional aspects of diagnostic ultrasound in a hospital or clinical setting at the beginner level. Ongoing reinforcement and broadening of knowledge base related to hospital procedures and policies. Continue observation, assistance and performance of patient care and sonographic duties under direct supervision. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 201. Applied Sonographic Procedures**1 Credit (8P)**

Advances scanning skills, system optimization, anatomic recognition of abdominal and pelvic structures utilizing real-time sonographic equipment including Doppler. Includes sonographic evaluation of the first trimester pregnancy and normal fetus. Restricted to: DMS majors. Restricted to Las Cruces campus only.

DMS 216. Vascular Technology II**2 Credits (2)**

Includes the pathology and pathophysiology of the vascular system, scanning techniques, clinical presentation, ultrasound appearance and Doppler evaluation seen with pathological conditions of the carotid arteries, deep and peripheral vascular systems. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 216 L. Vascular Technology II Lab**1 Credit (2P)**

Includes progressive development of skills following recognized protocols, scanning techniques, recognition of anatomical relationships with differentiation of normal and abnormal ultrasound appearance of the carotid arteries, deep and peripheral vascular systems utilizing real-time sonographic equipment including Doppler. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 226. Sonographic Case Studies I**1 Credit (1)**

Includes integration of didactic knowledge, clinical presentation, laboratory values, sonographic appearance and related medical imaging of a variety of pathological conditions through a variety of case analysis and presentations. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 227. Sonographic Case Studies II**1 Credit (1)**

Continuation of DMS 226, integration of didactic knowledge, clinical presentation, laboratory values, sonographic appearance and related medical imaging of a variety of pathological conditions through a variety of case analysis and presentations. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 230. Gynecologic Pathology**2 Credits (2)**

Includes the pathology and pathophysiology of the female reproductive system, scanning techniques, clinical presentation, ultrasound appearance and Doppler evaluation seen with pathological conditions of the uterus, ovaries, and adnexa. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 240. Abdominal Pathology I**2 Credits (2)**

Includes the pathology and pathophysiology of abdominal structures of the prevertebral vessels, liver, biliary system, pancreas, spleen and gastrointestinal system; scanning techniques, ultrasound appearance, clinical presentation and Doppler evaluation seen with pathological conditions. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 245. Abdominal Pathology II**2 Credits (2)**

Includes the pathology and pathophysiology of abdominal structures of the genitourinary system, spleen, retroperitoneum, adrenal glands, abdominal wall and prostate; scanning techniques, ultrasound appearance, clinical presentation and Doppler evaluation seen with pathological conditions. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 248. Pediatric Sonography**2 Credits (2)**

Includes the anatomy of the brain, skull, spine, hips, and normal developmental changes as well as pathology and pathophysiology of specific conditions that affect the premature infant, newborn and pediatric population across a variety of body systems. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 250. Sonographic Principles and Instrumentation II**3 Credits (3)**

Includes properties of sound and its use in diagnostic imaging, artifacts, system operation, Doppler, basic hemodynamics, image optimization, bio effects, quality assurance, and new technologies in ultrasound imaging. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 255. Vascular Physics**2 Credits (2)**

Includes a review of sound properties and its use in diagnostic imaging, artifacts, system operation, Doppler, image optimization, bio effects, quality assurance, and in-depth application of fluid properties and hemodynamics in vascular ultrasound imaging. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 260. High Risk Obstetric Sonography**3 Credits (3)**

Includes congenital malformations of the developing fetus, high risk pregnancies, multiple gestation, maternal conditions and invasive procedures. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 270. Clinical Practicum III**5 Credits (20P)**

Continued development of technical and professional aspects of diagnostic ultrasound in a hospital or clinical setting at an intermediate level. Ongoing reinforcement and broadening of knowledge base related to hospital procedures and policies. Continued observation, assistance and performance of patient care and sonographic duties under limited supervision. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 280. Clinical Practicum IV**5 Credits (20P)**

Application of technical and professional aspects of diagnostic ultrasound in a hospital or clinical setting at a proficient level. Ongoing reinforcement and broadening of knowledge base related to hospital procedures and policies. Continued observation, assistance and performance of patient care and sonographic duties under limited supervision. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 290. Small Parts & Superficial Structures**2 Credits (2)**

Includes anatomy, pathology and pathophysiology, protocol development, scanning techniques, recognition of anatomical structures and the normal and pathological ultrasound appearance of the breast, thyroid, neck, scrotum, non-cardiac chest and musculoskeletal ultrasound. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 291. Registry Preparation: OB/GYN**1 Credit (1)**

Registry preparation mock examinations over materials covered in Obstetric and Gynecological ultrasound. Students must pass this course with a 74% or better OR pass national certification in OB/GYN Sonography. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 292. Registry Preparation: Abdomen**1 Credit (1)**

Registry preparation mock examinations over materials covered in abdominal ultrasound including small parts and superficial structures. Students must pass this course with a 74% or better OR pass ARDMS national certification exam in Abdominal Sonography. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DMS 293. Registry Preparation: Vascular**1 Credit (1)**

Registry preparation mock examinations over materials covered in vascular ultrasound. Students must pass this course with a 74% or better OR pass national certification in Vascular Technology. Restricted to: DMS majors. Restricted to Community Colleges campuses only.

DRFT-DRAFTING

DRFT 100. Introduction to Architecture, Engineering, & Construction

3 Credits (3)

Introduction to and exploration of careers in the fields of architecture, engineering, and construction. Specific fields to include: architecture, civil engineering, mechanical engineering, structural engineering, engineering technology, residential construction, commercial construction, geographical information systems (GIS), surveying, sustainable design, and green building. Crosslisted with: ARCH 1310. Restricted to Community Colleges campuses

Learning Outcomes

1. Prepare accurate written technical documents, Produce drawing documents that are technically sound, Develop and practice productive work skills, and Upgrade technical knowledge and skills to keep pace with real-world changes DRFT 100 Course Competencies Describe different career options in architecture, engineering, and construction, Define the roles of different design professionals and support staff, Explain related educational and professional licensing requirements, Articulate employer expectations, Explore related courses and programs of study at DACC and NMSU, and Develop good workplace skills and professional, productive work habits.

DRFT 101. Introduction to Drafting and Design Technologies

1 Credit (1)

Professional and student organizations associated with the Drafting and Design Technologies program, degree requirements, employment skills and work habits, and university and college policies and procedures will be explored. Students will be introduced to the current learning management system and career-readiness certification. Restricted to Community Colleges only.

DRFT 105. Technical Drawing for Industry

3 Credits (2+2P)

Technical sketching, basic CAD, and interpretation of drawings with visualization, speed and accuracy highly emphasized. Areas of focus include various trades such as machine parts, welding, heating and cooling, and general building sketches/plan interpretation.

DRFT 108. Drafting Concepts/Descriptive Geometry

2 Credits (1+2P)

Basic manual drafting skills, sketching, terminology and visualization. Graphical solutions utilizing applied concepts of space, planar, linear and point analyses. Metric and S.I. units introduced.

DRFT 109. Computer Drafting Fundamentals

3 Credits (2+2P)

Introduction to principles and fundamentals of drafting using both manual drawing techniques and computer-aided drafting (CAD) applications. May be repeated up to 3 credits. Crosslisted with: E T 109 and C E 109. Restricted to Community Colleges campuses only.

DRFT 112. Drafting Concepts/Computer Drafting Fundamentals I

4 Credits (2+4P)

Basic drafting skills, terminology, and visualization. Introduction to principles and fundamentals of computer-aided drafting. Same as E T 106.

Prerequisites: OECS 207, OECS 125 or consent of instructor.

DRFT 113. Drafting Concepts/Computer Drafting Fundamentals II

4 Credits (2+4P)

Drafting for mechanical/industrial applications; machine part detailing, assemblies in orthographic, isometric, auxiliary, oblique, and sectional views. Two-dimensional AutoCAD with introduction to 3-D AutoCAD. Same as E T 216. Restricted to: Community Colleges only.

Prerequisite: DRFT 112.

DRFT 114. Introduction to Solid Modeling

3 Credits (2+2P)

2D mechanical drafting and 3D mechanical solid modeling utilizing the latest version of AutoCAD software. Industry dimensioning and annotation standards will be emphasized. 2D multi-view working drawings, 3D solid models, and basic 3D model assemblies will be introduced. Restricted to Community Colleges campuses only.

Prerequisite(s): DRFT 109.

DRFT 115. General Construction Safety

3 Credits (3)

Overview of general construction safety related to building, highway and road construction, and surveying field work for entry-level individuals. Students will also have the opportunity to earn a 10-hour construction industry OSHA card. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

DRFT 124. Introduction to Geometric Dimensioning and Tolerancing

3 Credits (2+2P)

Introduction to geometric dimensioning and tolerancing (GD&T) for the mechanical CAD drafting, solid modeling, mechanical engineering technology, mechanical engineering, and manufacturing industries. Related industry standard finishes and fasteners will also be introduced and explored.

Prerequisite(s)/Corequisite(s): DRFT 114. Restricted to Community Colleges campuses only.

DRFT 130. General Building Codes**3 Credits (2+2P)**

Interpretation of the Building Code, local zoning codes, A.D.A. Standards and the Model Energy Code to study construction and design requirements and perform basic plan checking. Restricted to: Community Colleges only.

DRFT 135. Electronics Drafting I**3 Credits (2+2P)**

Drafting as it relates to device symbols; wiring, cabling, harness diagrams and assembly drawings; integrated circuits and printed circuit boards; schematic, flow and logic diagrams; industrial controls and electric power fields. Drawings produced using various CAD software packages.

Prerequisites: DRFT 108 and DRFT 109.

DRFT 143. Civil Drafting Fundamentals**3 Credits (2+2P)**

Introduction to drafting in the field of Civil Engineering. Drawings, projects, and terminologies related to topographic, contour drawings, plan and profiles, and street/highway layout. Crosslisted with: E T 143. Restricted to Community Colleges only.

Prerequisite(s): DRFT 109.

DRFT 151. Construction Principles and Print Reading**3 Credits (2+2P)**

Introduction to construction materials, methods, and basic cost estimating and print reading applicable in today's residential, commercial, and public works industry. Instruction by print reading and interpretation, field trips, and actual job-site visits and progress evaluation.

DRFT 153. Survey Drafting Applications**3 Credits (2+2P)**

Introduction to drafting in the field of survey engineering. Drawings, projects and terminologies related to Point Data, topography, land/boundary surveys, legal descriptions and plat surveys. Using the current Autodesk software. Crosslisted with: SUR 143. Restricted to: Community Colleges only.

Prerequisite(s): DRFT 109.

DRFT 160. Construction Take-Offs and Estimating**3 Credits (2+2P)**

Computing and compiling materials and labor estimates from working drawings using various techniques common in general building construction and in accordance with standard specifications and estimating formats. Use of spreadsheets and estimating software introduced.

Prerequisite: DRFT 151.

DRFT 163. Civil Infrastructure Detailing**3 Credits (2+2P)**

Infrastructure detailing related to civil engineering projects including: ponding, roadway, sewer, and storm-water structures; concrete foundations; and related utility details. Restricted to Community Colleges campuses

Prerequisite(s): DRFT 109.

Learning Outcomes

1. I. Prepare accurate written technical documents, Produce drawing documents that are technically sound, Develop and practice productive work skills, and Upgrade technical knowledge and skills to keep pace with real-world changes DRFT 163 Course Competencies I. Create applicable details utilizing AutoCAD and other software packages, Interpret local design standards, applicable codes, and industry practices, Apply local design standards, Apply applicable codes, Follow standards industry practices, Design applicable details within given parameters, and Develop good workplace skills and professional, productive work habits.

DRFT 164. Intermediate Mechanical Drafting/Solid Modeling**3 Credits (2+2P)**

Intermediate 3D mechanical parametric solid modeling and assembly creation utilizing the latest version of Autodesk Inventor software. The creation of 2D working drawings from 3D solid models will be emphasized. Geometric Dimensioning and Tolerancing (GD&T), basic material properties, and industry standard fastening and manufacturing methods will be introduced.

Prerequisite(s)/Corequisite(s): DRFT 114. Restricted to Community Colleges campuses only.

DRFT 165. Introduction to Building Information Modeling**3 Credits (2+2P)**

Introduction to Building Information Modeling (BIM) in the development of virtual 3D building models, construction documents, renderings and basic animations related to architectural, structural, and mechanical/electrical/plumbing building components. Utilizes the latest BIM technologies in the integration one, parametric BIM. Restricted to Community Colleges campuses only.

DRFT 180. Residential Drafting**3 Credits (2+2P)**

Basic residential drafting including, floor plans, foundation plans, sections, roof plans, exterior and interior elevations, and site plans. Applicable residential building and zoning codes, construction methods and materials, adaptable residential design, and drawing and sheet layout for architectural drafting will be introduced. Restricted to Community Colleges campuses only.

Prerequisite(s): DRFT 109.

DRFT 181. Commercial Drafting**3 Credits (2+2P)**

Drafting principles, plan coordination, and code analysis applicable in the development of working drawings for commercial, public, and industrial building projects. Students will utilize National Cad Standards, ADA Standards, and will be introduced to modern office practice. May be repeated up to 3 credits. Restricted to Community Colleges campuses

Prerequisite(s): DRFT 109.

DRFT 190. Finding and Maintaining Employment**2 Credits (2)**

Techniques in self-evaluations, resume writing, application completion, job interviewing, and job retention. Exposure to work ethics, employee attitudes, and employer expectations.

DRFT 204. Geographic Information Systems Technology**3 Credits (2+2P)**

The use of digital information for which various digitized data creation methods are captured. Users will capture, store, analyze and manage spatially referenced data in a modeled mapping procedure. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

DRFT 214. Advanced Solid Modeling**3 Credits (2+2P)**

Advanced 3D mechanical parametric solid modeling and assembly creation utilizing the latest version of Solidworks software. The creation of 2D working drawings from 3D solid models and the creation of 3D models for machining/manufacturing will be emphasized. Geometric Dimensioning and Tolerancing (GD&T), material properties, and industry standard fastening and manufacturing methods will be further explored.

Prerequisite(s)/Corequisite(s): DRFT 114. Restricted to Community Colleges campuses only.

DRFT 222. Introduction to Geomatics**3 Credits (2+3P)**

Theory and practice of geomatics as applied to plane surveying in the areas of linear measurements, angle measurements, area determination, differential and trigonometric leveling, and topographic mapping. Crosslisted with: SUR 222.

Prerequisite: MATH 1250G or MATH 1430G.

Learning Outcomes

1. Various

DRFT 230. Building Systems Drafting**3 Credits (2+2P)**

Development of working drawings for electrical, plumbing, and HVAC systems, for residential and commercial building through the applications of both 2D Drafting and 3D Building Information Modeling (BIM) techniques. Basics of project setup, National CAD Standards, ADA Standards, modern office practice, code analysis, as well as Sustainability and LEED for new construction. Restricted to: Community Colleges only.

Prerequisite(s): DRFT 180 or DRFT 181.

DRFT 231. Construction Methods and Equipment**3 Credits (2+2P)**

Introduction to methods and equipment utilized in the construction industry including, common construction equipment, equipment utilization, equipment operating costs, site and earthwork, applicable specifications and testing, and related planning and safety considerations. Restricted to Community Colleges campuses only.

Prerequisite(s): DRFT 151.

DRFT 240. Structural Systems Drafting**3 Credits (2+2P)**

Study of foundations, wall systems, floor systems and roof systems in residential, commercial and industrial design/construction. Produce structural drawings including foundation plans, wall and building sections, floor and roof framing plans, shop drawings and details; schedules, materials lists and specifications. Use of various software. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): DRFT 180 or DRFT 181. Restricted to Community Colleges campuses only.

DRFT 242. Roadway Development Drafting**3 Credits (2+2P)**

Advanced civil/survey technology and drafting related to roadway development. Emphasis is on relevant terminology, codes/standards, and the production of complex working drawings such as topographical/grading, drainage, master utilities, roadway P P/details/etc., according to agency standards. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): DRFT 143.

DRFT 243. Land Development Drafting**3 Credits (2+2P)**

Advanced civil/survey technology and drafting related to land development. Emphasis is on relevant terminology codes/standards, and the production of complex working drawings such as subdivision plats, local utility and drainage plans, construction details roadway P P, etc., according to local development/ agency standards.

Prerequisite: DRFT 143 and DRFT 153.

DRFT 250. Principles of Detailing and Design**3 Credits (2+2P)**

Advanced practice in construction documentation in the development and coordination of working drawings & specifications. In particular, will utilize Architectural Graphic Standards, National CAD Standards, and ADA standards to develop detail drawings related to Architectural, Civil, Structural and Building Mechanical systems. Will also be introduced to basic principles, factors, and process of building design such as space planning, site analysis, and basic architectural programming. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): DRFT 180 or DRFT 181. Restricted to Community Colleges campuses only.

DRFT 254. Spatial Data Processing**3 Credits (2+2P)**

Utilizes the tools and technologies of GIS, processing volumes of geodata identifying a numerical, coded or listed map. Involves the analysis of spatial data from various diverse applications and place in a descriptive mapping process. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): DRFT 204.

DRFT 255. Independent Study**1-3 Credits (1-3)**

Instructor-approved projects in drafting or related topics specific to the student's individual areas of interest and relevant to the drafting and graphics technology curriculum. Consent of instructor required. May be repeated for a maximum of 6 credits.

DRFT 258. Introduction to Infraworks**3 Credits (2+2P)**

Introduction to the utilization of Infraworks software for the conceptualization, optimization, and visualization of infrastructure projects in the context of the built and natural environment. Restricted to Community Colleges campuses

Prerequisite(s): DRFT 143.

Learning Outcomes

1. Prepare accurate written technical documents, Produce drawing documents that are technically sound, Develop and practice productive work skills, and Upgrade technical knowledge and skills to keep pace with real-world changes DRFT 253 Course Competencies I. Navigate within a 3D drawing/ modeling space, Connect drawings to data sources, Stylize data sources, Create models elements, Analyze models, Collaborate on a project with others, Communicate design, and Develop good workplace skills and professional, productive work habits.

DRFT 261. Construction Scheduling and Project Management**3 Credits (2+2P)**

Introduction to construction scheduling and project management. Restricted to Community Colleges campuses only.

Prerequisite(s): DRFT 161.

DRFT 265. Advanced Building Information Modeling Applications**3 Credits (2+2P)**

Advanced applications of Building Information Modeling (BIM) including the creation of, and practice in collaborative work sets, data and design analyses, energy modeling and analysis, preliminary LEED analysis, construction take-offs & estimation, and construction animation, through use of various BIM and related software. Restricted to: Community Colleges only.

Prerequisite(s): DRFT 165.

DRFT 274. GIS Theory and Analysis**3 Credits (2+2P)**

Analyzes the hypothesis in which location and spatial data sufficiently quantifies the appropriate statistical methodology. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): DRFT 254.

DRFT 276. Computer Rendering and Animation I**3 Credits (2+2P)**

Introduction to technical applications of computer generated renderings and animations for the architecture and engineering fields. 3D models, photo-realistic renderings, and basic animation movie files will be produced utilizing industry standard modeling and animation software.

DRFT 278. Advanced CAD Applications**3 Credits (2+2P)**

Introduction to advanced CAD commands, applications, usage techniques, and user customization. the latest version of the National CAD Standards will also be explored. Restricted to: Community Colleges only.

Prerequisite(s): DRFT 109.

DRFT 288. Portfolio Development**3 Credits (2+2P)**

Production of a portfolio consisting of previously produced student work related to the student's individualized degree option. Process shall include the compilation and organization of working and presentation drawings, construction documents, BIM Models, and renderings/animations. Students will learn the basics of design layout and online portfolio documentation. Job search and resume preparation activities will also be required. Production of new material and content may also be required. This course is designed as a last semester course in the Drafting & Design curricula. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): Consent of Instructor.

DRFT 290. Special Topics**1-4 Credits (1-4)**

Topics subtitled in the Schedule of Classes. May be repeated for a maximum of 12 credits.

DRFT 291. Cooperative Experience**1-6 Credits (1-6)**

Supervised cooperative work program. Student is employed in an approved occupation and supervised and rated by the employer and instructor. Student meets with advisor weekly. Graded S/U.

Prerequisite: consent of instructor.

DRFT 295. Professional Development and Leadership DAGA**1 Credit (1)**

Students gain experience in leadership, team building, performing community service, and membership and/or leadership in a student organization. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

E E-ELECTRICAL ENGINEERING

E E 200. Linear Algebra, Probability and Statistics Applications**4 Credits (3+3P)**

The theory of linear algebra (vectors and matrices) and probability (random variables and random processes) with application to electrical engineering. Computer programming to solve problems in linear algebra and probability.

Prerequisite: C- or better in ENGR 140 and (MATH 1521G or MATH 1521H or ENGR 190).

Learning Outcomes

1. Perform vector and matrix operations, including matrix inversion, eigen analysis, finding basis and dimension of vector spaces and rank of a matrix, and solving a set of linear equations. Calculate probabilities using probability mass, density, and cumulative distribution functions for single and multiple, discrete and continuous random variables, and relate them to electrical engineering applications. Perform simple parameter estimation, such as finding sample mean and variance, and relate to confidence intervals. Describe random processes in the context of signal processing and communications systems problems. Use MATLAB to solve problems involving linear algebra and probability, including designing and performing simple numerical experiments.

E E 240. Multivariate and Vector Calculus Applications**3 Credits (3)**

Vector algebra, cylindrical and spherical coordinates, partial derivatives, multiple integrals. Calculus of vector functions through electrostatic applications. Divergence, gradient, curl, divergence theorem, Stokes's theorem, Coulomb's Law, Gauss's Law, electric field, electric potential. Applications in Matlab.

Prerequisite: C- or better in (MATH 1521G or MATH 1521H or ENGR 190) and ENGR 140.

Learning Outcomes

1. Students will demonstrate conceptual understanding of the fundamental principles and theories in vector calculus Students will analyze and solve problems using vector calculus in three coordinate systems

E E 300. Cornerstone Design**2 Credits (1+3P)**

Application and realization of engineering principles to a guided team-based design project. Formulation and implementation of test procedures, evaluation of alternate solutions and oral and written communication of the design and test results. Restricted to: E E majors. Restricted to Las Cruces campus only.

Prerequisite: C- or better in ENGR 140 and ENGR 230.

Learning Outcomes

1. Formulate and implement test procedures for validation of requirements. Evaluate alternative design solutions. Document test procedures and design solutions. Implement design to include a printed-circuit board, electronics and coding.
2. Communicate the design and validation both orally and in writing to a wide range of target audiences. Work in teams.

E E 317. Semiconductor Devices and Electronics I**4 Credits (3+3P)**

Analysis and design of opamp circuits, diode circuits and single-transistor MOS and BJT amplifiers. Introduction to solid-state semiconductor devices.

Prerequisite: C- or better in ENGR 230 and CHEM 1215G.

Learning Outcomes

1. Analysis and design of single time-constant circuits, op-amp circuits, and linear power supplies. Understanding of solid-state devices. Biasing and small-signal analysis of MOS and BJT single transistor amplifiers. Using computer tools to simulate electronic circuits. Testing electronic circuits using power supplies, function generators, digital
2. multi-meters, and oscilloscopes. Writing and documenting laboratory results.

E E 320. Signals and Systems I**3 Credits (3)**

Introduction to the modeling and analysis of continuous- and discrete-time signals and systems using time- and frequency-domain methods suitable for both mathematical approaches and computer-aided simulations.

Prerequisite: C- or better in E E 200 and ENGR 230.

Prerequisite/Corequisite: MATH 392.

Learning Outcomes

1. Understand different types of signals (continuous-time, discrete-time, periodic, etc.) and how these signals are represented mathematically and in a computer. Understand systems representations (e.g., impulse responses), implementations (e.g., convolution and difference/differential equations), and properties (e.g., linearity). Gain insight into transform-domain analysis for signals and systems. Develop the ability to apply transform domain and LTI analysis to simple applications in signal processing, communications, and controls using Matlab.

E E 325. Signals and Systems II**4 Credits (3+3P)**

Introduction to communication systems including amplitude and frequency modulation. Introduction to control systems including linear feedback systems, root-locus analysis, and graphical representations. Introduction to digital signal processing including sampling, digital filtering, and spectral analysis.

Prerequisite: C- or better in E E 320 and MATH 392.

Learning Outcomes

1. To model, analyze, simulate, and perform calculations with continuous- and discrete-time systems. To develop an understanding of basic modulations in communication systems. To gain insight into the basics of control systems. To develop insight into filtering and analysis of digital signals. To learn how to use MATLAB and SIMULINK to perform analysis, design, and simulation of communication, control, and signal processing systems.

E E 333. AC Circuit Analysis and Introduction to Power Systems**3 Credits (2+3P)**

Steady-state analysis of AC circuits, three-phase circuits, and an introduction to power systems.

Prerequisite: C- or better in ENGR 230.

Learning Outcomes

1. To introduce students to the basic structure and requirements of any electric power supply system and the nature of power systems engineering and the profession which will establish background for further studies in power systems. To develop an understanding of components in a power system and to understand the basic electromagnetic and electromechanical principles involved in these components. To develop an understanding of the physical-principles—to-electric-equivalent circuit approach to the analysis and design of components and systems. To develop skills in equivalent circuit based analysis techniques building upon competencies developed in prior coursework. To explore analysis and design principles for the complete power system To understand measurement, analysis, simulation and design techniques, through laboratory exercises involving hardware and software.

E E 340. Fields and Waves**4 Credits (3+3P)**

Static electromagnetic field. Maxwell's equation and time-varying electromagnetic fields. Generalized plane wave propagation, reflection, transmission, superposition and polarization. Transmission line theory. Extensions to optical wave propagation. Applications including Time Domain Reflectometry (TDR) and fiber optic transmission. Laboratory experience with RF/microwave test equipment and optical apparatus.

Prerequisite: C- or better in ENGR 230 and E E 240.

Learning Outcomes

1. Students will demonstrate an understanding of the fundamental principles, theories, and equations (such as Maxwell's) governing transmission lines, static and time-varying fields, propagation, reflection and transmission of plane waves, waveguides, and antennas. Students will analyze and solve electromagnetic-related problems by applying fundamental principles, theories, and equations (such as Maxwell's equations). Students will demonstrate effective team work. Students will demonstrate the use of RF/microwave test equipment to perform basic RF circuit measurements.

E E 362. Introduction to Computer Organization**4 Credits (3+3P)**

Concepts of modern computer organization, CPU control, pipelining, memory hierarchies, memory mapping, hardware-software interface, and operating systems.

Prerequisite: C- or better in ENGR 120 and MATH 1250G.

Prerequisite/Corequisite: ENGR 140.

Learning Outcomes

1. Be conversant with fundamental concepts of computer organization. Compare and contrast organizational features of different computer. Understand the use of microprocessors and peripheral devices in practical applications

E E 395. Introduction to Digital Signal Processing**3 Credits (3)**

Undergraduate treatment of sampling/reconstruction, quantization, discrete-time systems, digital filtering, z-transforms, transfer functions, digital filter realizations, discrete Fourier transform (DFT) and fast Fourier transform (FFT), finite impulse response (FIR) and infinite impulse response (IIR) filter design, and digital signal processing (DSP) applications. Laboratory will emphasize practical implementation of signal processing including real-time signal processing.

Prerequisite(s): C- or better in E E 325.

E E 400. Undergraduate Research**1-3 Credits**

Directed undergraduate research. May be repeated for a maximum of 9 credits.

Prerequisite: consent of the department head.

E E 403. Geometric Algebra**3 Credits (3)**

Geometric algebra provides a common mathematical language for many areas of physics (classical and quantum mechanics, electrodynamics, special and general relativity), computer science (graphics, robotics, computer vision), engineering, and other fields. Topics include: the geometric product and multivectors; Euclidean, Lorentzian, Galilean, and Projective Geometries; Complex, Hyperbolic, and Dual Numbers; Quaternions and Rotations.

Prerequisite: C- or better in E E 320.

Learning Outcomes

1. Formulate and solve problems related to multivectors and the geometric product while building geometric intuition. Formulate and solve problems related to complex, hyperbolic, and dual numbers as well as quaternions. Formulate and solve problems related to non-Euclidean spaces including Lorentzian, Galilean, and projective geometries.

E E 409. Hardware & Software Codesign**3 Credits (3)**

This course introduces the concept and techniques of designing electronic systems that integrates both hardware and software components. Topics include nature of hardware and software, dataflow modeling, software and hardware implementations of dataflows, analysis of control flows and dataflows, FSM with Datapath, microprogramming, embedded cores, and trade-offs between hardware and software components, etc. Students gain experience in implementing hardware and software co-design solutions for solving real-world problems through hands-on laboratory/project on a programmable System-on-Chip (SoC) platform that integrates a dual-core ARM Cortex-A9 processor and FPGA fabrics. Students develop a fundamental understanding of state-of-the-art practices in developing codesign solutions to problems that prepare them well for industrial and academic careers in this field.

Prerequisite: C- or better in ENGR 140 and ENGR 130 and E E 362.

Learning Outcomes

1. Formulate and solve problems related to basic concepts and methodologies in hardware/software co-design. Analyze concurrent specification of an algorithm to be partitioned into software (C code) and hardware (HDL) components. Design and implement both the software and hardware components integration as a solution to real-world problems to achieve optimal performance, power and cost. Describe various types of system architectures regarding their attributes including speed, energy, design complexity, design cost, etc. Experience working with commercially available Computer-Aided Design (CAD) development tools such as Xilinx Vivado Experience working in translation between C code and HDL of practical problems and verify/test the solution on FPGA SoC architecture

E E 412. ASIC Design**3 Credits (3)**

This course provides students with experiential knowledge of modern application specific integrated circuits. Topics include ASIC packaging and testing, I/O pads and ESD, Verilog programming and simulation, FPGA verification, Register-transfer level synthesis, timing and area optimization, floorplanning and routing, digital interfaces, full custom and standard cell design, post-layout simulation, and PCB schematics and layout. Crosslisted with: E E 512.

Prerequisite(s)/Corequisite(s): E E 480.

E E 431. Power Systems II**3 Credits (3)**

Analysis of a power system in the steady-state. Includes the development of models and analysis procedures for major power system components and for power networks. Crosslisted with: E E 542.

Prerequisite(s): C- or better in E E 333.

E E 432. Power Electronics**3 Credits (2+3P)**

Basic principles of power electronics and its applications to power supplies, electric machine control, and power systems.

Prerequisite(s)/Corequisite(s): E E 325. **Prerequisite(s):** C- or better in E E 317 and E E 333.

E E 440. Photovoltaic Devices and Systems**3 Credits (3)**

Technical concepts of photovoltaics, with primary focus on solar cell technology. Solar cell device level operation, packaging, and manufacturing. Design of photovoltaic systems for stand-alone or grid-tied operation. Business-case analysis using real-life scenarios of photovoltaic system solutions. Crosslisted with: E E 540.

Prerequisite(s): C- or better in E E 317.

Learning Outcomes

1. Name at least three different types of photovoltaic materials and cells; Derive equations governing operation of photovoltaic cells; Design and create electrical engineering drawings for photovoltaic systems of different nameplate capacity; Describe principles of operation of the "balance of the system" (BOS) components of the photovoltaic system.

E E 443. Mobile Application Development**3 Credits (3)**

Introduction to mobile application development. Students will develop applications for iOS devices including iPhone and iPad. Topics include object-oriented programming using Swift, model-view-controller (MVC) pattern, view controllers including tables and navigation, graphical user interface (GUI) design, data persistence, GPS and mapping, camera, and cloud and web services. Crosslisted with: E E 593.

Prerequisite(s): C- or better in C S 151 or C S 152 or C S 172 or C S 271 or C S 451 or C S 452.

E E 444. Advanced Image Processing**3 Credits (3)**

Advanced topics in image processing including segmentation, feature extraction, object recognition, image understanding, big data, and applications. Crosslisted with: E E 588.

Prerequisite(s): C- or better in E E 446.

E E 446. Digital Image Processing**3 Credits (3)**

Two-dimensional transform theory, color images, image enhancement, restoration, segmentation, compression and understanding. Same as E E 596.

Prerequisite: C- or better in E E 325.

Learning Outcomes

1. Analyze human visual perception and the implications to science and society Formulate and analyze problems that utilize the mathematics behind multidimensional image processing Formulate and analyze problems involving multidimensional transformation transform-domain processing Formulate and analyze problems related to color image acquisition, processing, and display Implementing image processing algorithms on computers in Matlab or python

E E 447. Neural Signal Processing**3 Credits (3)**

Cross-disciplinary course focused on the acquisition and processing of neural signals. Students in this class will be learn about basic brain structure, different brain signal acquisition techniques (fMRI, EEG, MEG, etc.), neural modeling, and EEG signal processing. To perform EEG signal processing, students will learn and use Matlab along with an EEG analysis package. Crosslisted with: E E 597.

Prerequisite(s): C- or better in E E 325.

E E 448. Signal Compression**3 Credits (3)**

Fundamentals of information source encoding and decoding. Includes information theory bounds on source coding, lossless coding algorithms, scalar quantizing and vector quantizing.

Prerequisite: E E 200.

Learning Outcomes

1. Formulate and analyze problems related to rate-distortion tradeoffs in compression Formulate and analyze problems related to scalar and vector quantization Formulate and analyze problems related to transform coding Formulate and analyze problems related to entropy coding (Huffman arithmetic) Formulate and analyze problems related to standardized codecs, including MPEG, JPEG, MP3 Formulate and analyze problems related to compressive sensing/sampling

E E 449. Smart Antennas**3 Credits (3)**

Smart antenna and adaptive array concepts and fundamentals, uniform and planar arrays, optimum array processing. Adaptive beamforming algorithms and architectures: gradient-based algorithms, sample matrix inversion, least mean square, recursive least mean square, sidelobes cancellers, direction of arrival estimations, effects of mutual coupling and its mitigation. Crosslisted with: E E 549.

Prerequisite(s): C- or better in E E 325 and E E 340.

E E 452. Introduction to Radar**3 Credits (3)**

Basic concepts of radar. Radar equation; detection theory. AM, FM, and CW radars. Analysis of tracking, search, MTI, and imaging radar.

Recommended foundation: E E 496. Crosslisted with: E E 548.

Prerequisite(s): C- or better in E E 325 and E E 340.

E E 453. Microwave Engineering**3 Credits (3)**

Techniques for microwave measurements and communication system design, including transmission lines, waveguides, and components. Microwave network analysis and active device design. Crosslisted with: E E 521.

Prerequisite(s): C- or better in E E 340.

E E 454. Antennas and Radiation**4 Credits (3+3P)**

Basic antenna analysis and design. Fundamental antenna concepts and radiation integrals. Study of wire antennas, aperture antennas, arrays, reflectors, and broadband antennas. Crosslisted with: E E 541.

Prerequisite(s): C- or better in E E 340.

E E 458. Hardware Security and Trust**3 Credits (3)**

This course introduces and investigates recent technology development for the design and evaluation of secure and trustworthy hardware and embedded systems. Topics include IoT security, cryptography, hardware security primitives, authentication and key generation, invasive and non-invasive attacks and countermeasures, IC piracy and intellectual property protection, hardware trojans, and secure boot. Same as E E 558.

Prerequisite: C- or better in E E 362.

Learning Outcomes

1. Understand the security goals of information security Understand cryptography basics and their applications Formulate and analyze problems related to security threats in integrated circuits, electronic devices and semiconductor supply chain Formulate and analyze problems related to security countermeasures to the threats of integrated circuits and electronic devices Use metrics to measure and assess the security level of security mechanisms or primitives in hardware security applications Analyze and assess potential security vulnerabilities in hardware and embedded systems Learn state-of-art security mechanisms and research topics in the hardware and embedded security area

E E 460. Space System Mission Design and Analysis**3 Credits (3)**

Satellite system design, including development, fabrication, launch, and operations. A systems engineering approach to concepts, methodologies, models, and tools for space systems. Students must be in junior standing to enroll.

Learning Outcomes

1. Apply knowledge from science, math and engineering to satellite design. Experience the "system engineering" of satellite design through the design of a space mission. Understand the professional and ethical responsibilities related to satellite design. Understand the impact of satellite related engineering solutions in a global, economic, environmental, and societal context. Maintain a knowledge of contemporary professional, societal and global issues as they relate to satellites.

E E 462. Computer Systems Architecture**3 Credits (3)**

The course covers uniprocessors, caches, memory systems, virtual memory, storage systems, with introduction to multiprocessor and distributed computer architectures; models of parallel computation; processing element and interconnection network structures, and nontraditional architectures. Crosslisted with: E E 562.

Prerequisite: C- or better in E E 362.

Learning Outcomes

1. Recognize the basic principles and current practices of computer architectures of processors, memory systems, interconnects, and input/output systems Reason about the issues that influence the architectures of processors, memory systems, interconnects, and input/output systems Evaluate and improve computer system performance through analysis and computer simulation Solve and implement a small research problem in computer architecture.

E E 465. Machine Learning I**3 Credits (3)**

An undergraduate-level introduction to machine learning algorithms, including supervised and unsupervised learning methods. Topics covered include clustering, linear regression models, linear discriminant functions, feed-forward neural networks, statistical pattern classification and regression, maximum likelihood, naive Bayes, non-parametric density estimation, mixture models, decision trees, and ensemble learning. Crosslisted with: E E 565.

Prerequisite: C- or better in E E 200.

Learning Outcomes

1. Formulate and solve problems related to the basic concepts and mathematical techniques of machine learning. Gain an understanding of machine learning algorithms/methods by solving problems using software. Gain experience doing independent study and research. Formulate and solve problems related to the basics of regression, classification, and unsupervised learning. Gain practical experience through project-based assignments and technical report writing.

E E 467. ARM SOC Design**3 Credits (3)**

The course aims to produce students who are capable of developing ARM-based SoCs from high level functional specifications to design, implementation and testing on real FPGA hardware using standard hardware description and software programming languages. Crosslisted with: E E 567.

Prerequisite: C- or better in E E 362 and E E 317.

Learning Outcomes

1. Formulate and solve problems requiring knowledge and understanding of ARM processor architectures and ARM-based SoCs Capture the design of ARM-based SoCs in a standard hardware description
2. language Conduct low-level software design for ARM-based SoCs and high-level application development Demonstrate the ability to use and choose between different techniques for digital system design and capture; Evaluate implementation results (e.g. speed, area, power) and correlate
3. them with the corresponding high level design and capture; Demonstrate the ability to use a commercial tools to develop ARM-based SoCs

E E 473. Introduction to Optics**3 Credits (3)**

The nature of light, geometrical optics, basic optical instruments, wave optics, aberrations, polarization, and diffraction. Elements of optical radiometry, lasers and fiber optics. Crosslisted with: PHYS 473.

Prerequisite(s): C- or better in PHYS 1320G or PHYS 2120.

E E 475. Automatic Control Systems**3 Credits (3)**

Mathematical modeling of physical control systems in form of differential equations, transfer functions, and state-variables. System performance indices of feedback control systems via classical frequency-domain techniques and time-domain methods. Computer-aided solution of real-world design problems.

Prerequisite(s): C- or better in E E 325.

E E 476. Computer Control Systems**3 Credits (3)**

Representation, analysis and design of discrete-time systems using time-domain and z-domain techniques. Microprocessor control systems.

Prerequisite(s): C- or better in E E 325.

E E 478. Fundamentals of Photonics**4 Credits (3+3P)**

Ray, wave and guided optics, lasers and thermal sources, radiometry, photon detection and signal-to-noise ratio. Elements of photonic crystals, polarization, acousto-optics, electro-optics, and optical nanostructures. Taught with E E 528. Recommended foundation: E E 473 /PHYS 473. Crosslisted with: PHYS 478.

Prerequisite: C- or better in PHYS 1320G or PHYS 2120.

Learning Outcomes

1. Understand the fundamentals of the different theories of light including ray, wave, electromagnetic (vector) and photon optics, and how these theories are represented mathematically and on a computer. Develop the ability to perform calculations for the different theories (e.g., ray tracing, wave interference, polarization calculus, photon detection) to determine the propagation characteristics and describe the manipulation of light. Gain insight and experience with materials and devices for manipulating and detecting light (e.g., glass, mirrors, lenses, fiber optics, polarization elements, liquid crystals, semiconductors, and photodiodes). Apply the theoretical, mathematical, and practical understanding of optics to describe real-world applications of light technology with supporting analysis and calculations.

E E 479. Lasers and Applications**4 Credits (3+3P)**

Laser operating principles, characteristics, construction and applications. Beam propagation in free space and fibers. Laser diode construction and characteristics. Hands-on laboratory. Taught with E E 529. Crosslisted with: PHYS 479.

Prerequisite(s): C- or better in E E 340 or in PHYS 461.

E E 480. Introduction to Analog and Digital VLSI**3 Credits (3)**

Introduction to analog and digital VLSI circuits implemented in CMOS technology. Design of differential amplifiers, opamps, CMOS logic, flip-flops, and adders. Introduction to VLSI fabrication process. Crosslisted with: E E 510.

Prerequisite: C- or better in E E 362 and E E 317.

Learning Outcomes

1. Explain the basic concepts of CMOS VLSI system design Formulate and solve problems related to pseudo ideal operation of MOS transistors as switches and implementation with transistors of basic and complex Boolean functions Use modern software tools to simulate integrated circuits Formulate and solve problems related to operation and design of basic analog building blocks Formulate and solve problems related to operation and design of basic digital building blocks
2. Formulate and solve problems related to key aspects of performance characteristics (speed, power dissipation, Silicon area..) of VLSI systems and how to size transistors in order to achieve desired performance specifications.

E E 482. Electronics II**3 Credits (3)**

Feedback analysis, application of operational amplifiers, introduction to data converters, analog filters, and oscillator circuits.

Prerequisite(s): C- or better in E E 317.

E E 485. Analog VLSI Design**3 Credits (2+3P)**

Analysis, design, simulation, layout and verification of CMOS analog building blocks, including references, opamps, switches and comparators. Teams implement a complex analog IC. Crosslisted with: E E 523.

Prerequisite(s): C- or better in E E 320 and E E 480.

E E 490. Selected Topics**1-3 Credits**

May be repeated for a maximum of 9 credits. Graduate students may not use credits of E E 490 toward an M.S. or Ph.D. in electrical engineering.

Prerequisite: consent of instructor.

E E 493. Power Systems III**3 Credits (3)**

Analysis of a power system under abnormal operating conditions. Topics include symmetrical three-phase faults, theory of symmetrical components, unsymmetrical faults, system protection, and power system stability. Taught with E E 543.

Prerequisite(s)/Corequisite(s): E E 431. Prerequisite(s): C- or better in E E 333 or E E 391.

E E 496. Introduction to Communication Systems**3 Credits (3)**

Introduction to the analysis of signals in the frequency and time domains. A study of baseband digital transmission systems and digital/analog RF transmission systems. Introduction to telecom systems as well as satellite systems.

Prerequisite(s): C- or better in E E 325.

E E 497. Digital Communication Systems I**3 Credits (3)**

Techniques for transmitting digital data over commercial networks. Topics include baseband and bandpass data transmission and synchronization techniques. Recommended foundation: E E 496. Crosslisted with: E E 581.

Prerequisite(s): C- or better in E E 200 and E E 325.

E E 501. Research Topics in Electrical and Computer Engineering**1 Credit (1)**

Ethics and methods of engineering research; contemporary research topics in electrical and computer engineering.

E E 510. Introduction to Analog and Digital VLSI**3 Credits (3)**

Introduction to analog and digital VLSI circuits implemented in CMOS technology. Design of differential amplifiers, opamps, CMOS logic, flip-flops, and adders. Introduction to VLSI fabrication process. Recommended foundation: E E 212 and E E 317 Crosslisted with: E E 480.

E E 512. ASIC Design**3 Credits (3)**

This course provides students with experiential knowledge of modern application specific integrated circuits. Topics include ASIC packaging and testing, I/O pads and ESD, Verilog programming and simulation, FPGA verification, Register-transfer level synthesis, timing and area optimization, floorplanning and routing, digital interfaces, full custom and standard cell design, post-layout simulation, and PCB schematics and layout. Recommended foundation: E E 480. Crosslisted with: E E 412.

E E 515. Electromagnetic Theory I**3 Credits (3)**

Electromagnetic theory of time-harmonic fields in rectangular, cylindrical and spherical coordinates with applications to guided waves and radiated waves. Induction and equivalence theorems, perturbational and variational principles applied to engineering problems in electromagnetics.

Recommended foundation: E E 340.

E E 516. Electromagnetic Theory II**3 Credits (3)**

Continuation of E E 515.

E E 520. A/D and D/A Converter Design**3 Credits (3)**

Practical design of integrated data converters in CMOS/BJT technologies, OP-AMPS, comparators, sample and holds, MOS switches, element mismatches. Nyquist rate converter architectures: flash, successive approximation, charge redistribution, algorithmic, two step, folding, interpolating, pipelined, delta-sigma converters. Restricted to: Main campus only.

Prerequisite(s): E E 523.

E E 521. Microwave Engineering**3 Credits (3)**

Techniques for microwave measurements and communication system design, including transmission lines, waveguides, and components. Microwave network analysis and active device design. Recommended foundation: E E 340. Crosslisted with: E E 453.

E E 523. Analog VLSI Design**3 Credits (2+3P)**

Analysis, design, simulation, layout and verification of CMOS analog building blocks, including references, opamps, switches and comparators. Teams implement a complex analog IC. Recommended foundation: E E 320 and E E 480. Crosslisted with: E E 485.

E E 528. Fundamentals of Photonics**4 Credits (3+3P)**

Ray, wave and guided optics, lasers and thermal sources, radiometry, photon detection and signal-to-noise ratio. Elements of photonic crystals, polarization, acousto-optics, electro-optics, and optical nanostructures. Taught with E E 478 with differentiated assignments for graduate students. Recommended foundation: Crosslisted with: PHYS 528.

Prerequisite(s): (PHYS 1320G or PHYS 2120) and E E 473/PHYS 473.

E E 529. Lasers and Applications**4 Credits (3+3P)**

Laser operating principles, characteristics, construction and applications. Beam propagation in free space and fibers. Laser diode construction and characteristics. Hands-on laboratory. Recommended foundation: E E 351 or PHYS 461. Taught with: E E 479 with differentiated assignments for graduate students. Crosslisted with: PHYS 529

E E 534. Power System Relaying**3 Credits (3)**

Fundamental relay operating principles and characteristics. Current, voltage, directional, differential relays; distance relays; pilot relaying schemes. Standard protective schemes for system protection. Operating principles and overview of digital relays. Recommended foundation: E E 493.

E E 537. Power Electronics**3 Credits (2+3P)**

Basic principles of power electronics and its applications to power supplies, electric machine control, and power systems. Recommended foundation: E E 325, E E 317, and E E 333. Crosslisted with: E E 432.

E E 540. Photovoltaic Devices and Systems**3 Credits (3)**

Technical concepts of photovoltaics, with primary focus on solar cell technology. Solar cell device level operation, packaging, and manufacturing. Design of photovoltaic systems for stand-alone or grid-tied operation. Business-case analysis using real-life scenarios of photovoltaic system solutions. Recommended foundation: E E 317. Crosslisted with: E E 440.

Learning Outcomes

1. Name at least three different types of photovoltaic materials and cells; Derive equations governing operation of photovoltaic cells; Design and create electrical engineering drawings for photovoltaic systems of different nameplate capacity; Describe principles of operation of the "balance of the system" (BOS) components of the photovoltaic system.

E E 541. Antennas and Radiation**4 Credits (3+3P)**

Basic antenna analysis and design. Fundamental antenna concepts and radiation integrals. Study of wire antennas, aperture antennas, arrays, reflectors, and broadband antennas. Recommended foundation is E E 340. Crosslisted with: E E 454.

E E 542. Power Systems II**3 Credits (3)**

Analysis of a power system in the steady-state. Includes the development of models and analysis procedures for major power system components and for power networks. Recommended foundation: E E 333. Crosslisted with: E E 431.

E E 543. Power Systems III**3 Credits (3)**

Analysis of a power system under abnormal operating conditions. Topics include symmetrical three-phase faults, theory of symmetrical components, unsymmetrical faults, system protection, and power system stability. Recommended foundation: E E 431. Crosslisted with: E E 493.

E E 544. Distribution Systems**3 Credits (3)**

Concepts and techniques associated with the design and operation of electrical distribution systems. Recommended foundation: E E 542 and E E 543.

E E 545. Digital Signal Processing II**3 Credits (3)**

Non-ideal sampling and reconstruction, oversampling and noise shaping in A/D and D/A, finite word length effects, random signals, spectral analysis, multirate filter banks and wavelets, and applications. Recommended foundation: E E 395.

E E 548. Introduction to Radar**3 Credits (3)**

Basic concepts of radar. Radar equation; detection theory, AM, FM, and CW radars. Analysis of tracking, search, MTI, and image radar. Recommended foundation: E E 200, E E 340 and E E 496. Crosslisted with: E E 452.

E E 549. Smart Antennas**3 Credits (3)**

Smart antenna and adaptive array concepts and fundamentals, uniform and planar arrays, optimum array processing. Adaptive beamforming algorithms and architectures: gradient-based algorithms, sample matrix inversion, least mean square, recursive least mean square, sidelobes cancellers, direction of arrival estimations, effects of mutual coupling and its mitigation. Recommended foundation: E E 325 and E E 340. Crosslisted with: E E 449.

E E 551. Control System Synthesis I**3 Credits (3)**

An advanced perspective of linear modern control system analysis and design, including the essential algebraic, structural, and numerical properties of linear dynamical systems.

E E 556. Hardware & Software Codesign**3 Credits (3)**

This course introduces the concept and techniques of designing electronic systems that integrates both hardware and software components. Topics include nature of hardware and software, dataflow modeling, software and hardware implementations of dataflows, analysis of control flows and dataflows, FSM with Datapath, microprogramming, embedded cores, and trade-offs between hardware and software components, etc. Students gain experience in implementing hardware and software co-design solutions for solving real-world problems through hands-on laboratory/project on a programmable System-on-Chip (SoC) platform that integrates a dual-core ARM Cortex-A9 processor and FPGA fabrics. Students develop a fundamental understanding of state-of-the-art practices in developing codesign solutions to problems that prepare them well for industrial and academic careers in this field.

Learning Outcomes

1. Formulate and solve problems related to basic concepts and methodologies in hardware/software co-design. Analyze concurrent specification of an algorithm to be partitioned into software (C code) and hardware (HDL) components. Design and implement both the software and hardware components integration as a solution to real-world problems to achieve optimal performance, power and cost. Describe various types of system architectures regarding their attributes including speed, energy, design complexity, design cost, etc. Experience working with commercially available Computer-Aided Design (CAD) development tools such as Xilinx Vivado Experience working in translation between C code and HDL of practical problems and verify/test the solution on FPGA SoC architecture

E E 558. Hardware Security and Trust**3 Credits (3)**

This course introduces and investigates recent technology development for the design and evaluation of secure and trustworthy hardware and embedded systems. Topics include IoT security, cryptography, hardware security primitives, authentication and key generation, invasive and non-invasive attacks and countermeasures, IC piracy and intellectual property protection, hardware trojans, and secure boot. Recommended foundation: E E 212. Crosslisted with: E E 458.

E E 562. Computer Systems Architecture**3 Credits (3)**

The course covers uniprocessors, caches, memory systems, virtual memory, storage systems, with introduction to multiprocessor and distributed computer architectures; models of parallel computation; processing element and interconnection network structures, and nontraditional architectures. Recommended foundation is E E 212. Crosslisted with: E E 462.

E E 563. Computer Performance Analysis I**3 Credits (3)**

Issues involved and techniques used to analyze performance of a computer system. Topics covered include computer system workloads; statistical analysis techniques such as principal component analysis, confidence interval, and linear regression; design and analysis of experiments; queuing system analysis; computer system simulation; and random number generation. Recommended foundation: E E 200 and E E 462.

E E 564. Architectural Concepts II**3 Credits (3)**

Advanced topics related to computer architecture, guided by the current literature. Students are expected to have knowledge of computer architectures equivalent to C S 473 and of operating systems equivalent to C S 474. Crosslisted with: C S 573.

Learning Outcomes

1. Be able to explain the features in a modern multicore CPU architecture Be able to utilize hardware counter features of a CPU in performance evaluation Be able to explain the architecture of GPUs and their capabilities and drawbacks Be able to evaluate novel cutting-edge architectural features and designs Be able to present a research paper to an advanced audience

E E 565. Machine Learning I**3 Credits (3)**

A graduate-level introduction to machine learning algorithms, including supervised and unsupervised learning methods. Topics covered include clustering, linear regression models, linear discriminant functions, feed-forward neural networks, statistical pattern classification and regression, maximum likelihood, naive Bayes, non-parametric density estimation, mixture models, decision trees, and ensemble learning. Recommended foundation: E E 571 and MATH 480. Crosslisted with: E E 465.

E E 567. ARM SOC Design**3 Credits (3)**

The course aims to produce students who are capable of developing ARM-based SoCs from high level functional specifications to design, implementation and testing on real FPGA hardware using standard hardware description and software programming languages. Recommended foundation is E E 212 and E E 317. Crosslisted with: E E 467.

E E 571. Random Signal Analysis**3 Credits (3)**

Application of probability and random variables to problems in communication systems, analysis of random signal and noise in linear and nonlinear systems.

E E 572. Modern Coding Theory**3 Credits (3)**

Error control techniques for digital transmission and storage systems. Introduction to basic coding bounds, linear and cyclic block codes, Reed-Solomon codes, convolutional codes, maximum likelihood decoding, maximum a posteriori probability decoding, factor graphs, low density parity check codes, turbo codes, iterative decoding. Applications to data networks, space and satellite transmission, and data modems. Recommended foundation: E E 200 and E E 496.

E E 573. Signal Compression**3 Credits (3)**

Fundamentals of information source encoding and decoding. Includes information theory bounds on source coding, lossless coding algorithms, scalar quantizing and vector quantizing.

Learning Outcomes

1. Formulate and analyze problems related to rate-distortion tradeoffs in compression Formulate and analyze problems related to scalar and vector quantization Formulate and analyze problems related to transform coding Formulate and analyze problems related to entropy coding (Huffman arithmetic) Formulate and analyze problems related to standardized codecs, including MPEG, JPEG, MP3 Formulate and analyze problems related to compressive sensing/sampling

E E 575. Machine Learning II**3 Credits (3)**

An advanced treatment of machine learning algorithms, including supervised, unsupervised, and reinforcement learning methods. Topics covered include kernel methods, maximum margin classification, support vector machines, generative topographic maps, diffusion maps, convolutional neural networks, recurrent neural networks, Hopfield networks, Boltzmann machines, deep belief networks, Markov chains, and hidden Markov models.

Prerequisite(s): E E 565.

E E 576. Geometric Algebra**3 Credits (3)**

Geometric algebra provides a common mathematical language for many areas of physics (classical and quantum mechanics, electrodynamics, special and general relativity), computer science (graphics, robotics, computer vision), engineering, and other fields. Topics include: the geometric product and multivectors; Euclidean, Lorentzian, Galilean, and Projective Geometries; Complex, Hyperbolic, and Dual Numbers; Quaternions and Rotations.

Learning Outcomes

1. Formulate and solve problems related to multivectors and the geometric product while building geometric intuition. Formulate and solve problems related to complex, hyperbolic, and dual numbers as well as quaternions. Formulate and solve problems related to non-Euclidean spaces including Lorentzian, Galilean, and projective geometries.

E E 577. Fourier Methods in Electro-Optics**3 Credits (3)**

Linear systems theory, convolution and Fourier transformation are applied to one-dimensional and two dimensional signals encountered in electro-optical systems. Applications in diffraction, coherent and incoherent imaging, and optical signal processing. Recommended foundation: E E 320 and E E 528. Crosslisted with: PHYS 577.

E E 578. Optical System Design**3 Credits (3)**

Optical design software is used to study optical systems involving lenses, mirrors, windows and relay optics. Systems considered include camera lenses, microscopes and telescopes. Recommended foundation: E E/PHYS 473, E E/PHYS 528 and E E/PHYS 577. Crosslisted with: PHYS 578.

E E 581. Digital Communication Systems I**3 Credits (3)**

Techniques for transmitting digital data over commercial networks. Topics include baseband and bandpass data transmission and synchronization techniques. Recommended foundation: E E 200, E E 325, and E E 496. Crosslisted with: E E 497.

E E 583. Wireless Communication**3 Credits (3)**

Cellular networks, wireless channels and channel models, modulation and demodulation, MIMO, diversity and multiplexing, OFDM, wireless standards including LTE and WiMAX. Recommended foundation: E E 571 and E E 325.

E E 585. Telemetry Systems**3 Credits (3)**

Covers the integration of components into a command and telemetry system. Topics include analog and digital modulation formats, synchronization, link effects, and applicable standards. Recommended foundation: E E 395, E E 496, and E E 497.

E E 586. Information Theory**3 Credits (3)**

This class is a study of Shannon's measure of information and discusses mutual information, entropy, and channel capacity, the noiseless source coding theorem, the noisy channel coding theorem, channel coding and random coding bounds, rate-distortion theory, and data compression. Restricted to: Main campus only. Crosslisted with: MATH 509

Prerequisite(s): E E 571 or MATH 515.

E E 588. Advanced Image Processing**3 Credits (3)**

Advanced topics in image processing including segmentation, feature extraction, object recognition, image understanding, big data, and applications. Crosslisted with: E E 444.

Prerequisite(s): E E 446 or E E 596.

E E 590. Selected Topics**1-9 Credits**

May be repeated for a maximum of 18 credits.

E E 593. Mobile Application Development**3 Credits (3)**

Introduction to mobile application development. Students will develop applications for iOS devices including iPhone and iPad. Topics include object-oriented programming using Swift, model-view-controller (MVC) pattern, view controllers including tables and navigation, graphical user interface (GUI) design, data persistence, GPS and mapping, camera, and cloud and web services. Recommended foundation: C S 451 or C S 452. Crosslisted with: E E 443.

E E 596. Digital Image Processing**3 Credits (3)**

Two-dimensional transform theory, color images, image enhancement, restoration, segmentation, compression and understanding. Crosslisted with: E E 446.

E E 597. Neural Signal Processing**3 Credits (3)**

Cross-disciplinary course focused on the acquisition and processing of neural signals. Students in this class will be learn about basic brain structure, different brain signal acquisition techniques (fMRI, EEG, MEG, etc.), neural modeling, and EEG signal processing. To perform EEG signal processing, students will learn and use Matlab along with an EEG analysis package. Crosslisted with: E E 447.

E E 598. Master's Technical Report**1-9 Credits (1-9)**

Individual investigation, either analytical or experimental, culminating in a technical report. Graded PR/S/U. May be repeated up to 18 credits. Thesis/Dissertation Grading.

E E 599. Master's Thesis**1-15 Credits (1-15)**

Thesis. May be repeated up to 88 credits. Thesis/Dissertation Grading.

E E 600. Doctoral Research**1-15 Credits**

Research.

E E 615. Computational Electromagnetics**3 Credits (3)**

The numerical solution of electromagnetics problems. Topics include differential equation techniques, integral equation methods, hybrid techniques, algorithm development and implementation, and error analysis. Particular algorithms, including FEM, finite differences, direct solvers, and iterative solvers, are studied.

E E 675. Machine Learning III**3 Credits (3)**

A research-oriented treatment of machine learning algorithms, including supervised, unsupervised, and reinforcement learning methods. Topics covered include Markov decision processes, deep reinforcement learning, neural logic networks, genetic algorithms, genetic programs, generative adversarial networks, and adaptive resonance theory models.

Prerequisite(s): E E 575.

E E 690. Selected Topics**1-9 Credits**

May be repeated for a maximum of 9 credits.

E E 700. Doctoral Dissertation**1-15 Credits (1-15)**

Dissertation. May be repeated up to 88 credits. Thesis/Dissertation Grading.

E T-ENGINEERING TECHNOLOGY

E T 101. Introduction to Engineering Technology and Geomatics**1 Credit (1)**

An introduction to geomatics and the various engineering technology disciplines, the engineering approach to problem solving, and the design process. Projects emphasize the importance of teamwork, written & oral communication skills, as well as ethical responsibilities.

Learning Outcomes

1. Various

E T 104. Soldering Techniques**1 Credit (3P)**

Fundamentals of soldering, desoldering, and quality inspection of printed circuit boards.

E T 109. Computer Drafting Fundamentals**3 Credits (3+2P)**

Crosslisted with: DRFT 109, C E 109 and SUR 109

E T 110. Introduction to 3-D Modeling (Solid Works)**3 Credits (2+3P)**

Introduction to SolidWorks, a 3-D modeling software. The foundation for designing mechanical parts and assemblies.

E T 120. Computation Software**2-3 Credits (2-3)**

The use of spreadsheet software in the field of engineering technology.

E T 125. Introduction to Renewable Energy**3 Credits (3)**

Renewable energy systems, including topics in thermal-solar photovoltaic, wind, geothermal systems, and other current topics. Theory, practical applications, safety considerations and the economics of alternative renewable energy systems compared to conventional systems.

E T 143. Civil/Survey Drafting I**3 Credits (2+2P)**

Introduction to drafting in the field of Civil Engineering. Drawings, projects, and terminologies related to topographic mapping, contour drawings, plan, and profiles as street/highway layout.

Prerequisite(s): DRFT 109.

Learning Outcomes

1. Students will develop a basic knowledge of AutoCad Civil 3D software as they relate to the civil drafting process. Students will become familiar with a basic understanding of computers, drafting and trigonometry is required. Use of long-term projects will be utilized to simulate real-world work environments to aid the understanding and applying vocabulary on surveying drafting plans An ability to apply current knowledge and adapt to emerging applications of mathematics, science, engineering and technology

E T 153. Fundamentals of Networking Communications**3 Credits (3)**

Introduction to networking basics, including computer hardware and software, electricity, networking terminology, protocols, LANs, WANs, OSI model, IP addressing, and design and documentation of basic network and structure cabling.

Learning Outcomes

1. Students will identify network types/protocols utilizing the OSI reference model and compute numbering system network problems. Students will explain issues related to managing and documenting network environments. Students will list, compare, and discuss industry standards for addressing computers on a network. Students will list and distinguish between computer networking historical milestones. Students will identify, compare, and evaluate networking data transport techniques. Students will identify and compare network transmission media and build/evaluate network cabling. Students will discuss IT industry certifications and summarize current technology trends.

E T 154. Construction Methods and Communications**3 Credits (3)**

Blueprint reading, specifications, and introduction to materials used in construction.

E T 155. Network Operating Systems I**3 Credits (3+1P)**

Introduction to a computer network operating system. May not be used as part of an E T degree program on main campus. Restricted to: Community Colleges only.

Prerequisite(s): E T 120 or E T 122.

E T 156. Introduction to Information Security**2 Credits (2)**

This course introduces information security terminology, historical evolution of digital security, types of PC and network system vulnerabilities and types of information loss. In addition, methods of information protection and integrity, intrusion detection, and recovery of data are introduced.

Prerequisite(s)/Corequisite(s): E T 120. Restricted to Community Colleges campuses only.

E T 160. Windows Fundamentals for IET**3 Credits (3)**

Fundamental review of the Windows operating system including installation and upgrades as well as managing applications, files, folders, devices and maintenance.

E T 182. Digital Logic**2 Credits (1+2P)**

The use of truth tables, Boolean equations, and diagrams to define, simplify, and implement logic-valued functions.

Learning Outcomes

1. Demonstrate ability to convert numerical values to commonly-used digital representations and their use for arithmetic and logical functions. Demonstrate understanding of Boolean logic functions and truth tables. Demonstrate ability to simplify logic expressions. Demonstrate understanding of sequential logic functions, and the ability to integrate with combinational logic to produce a simple state machine. Familiarity with common integrated circuit issues, such as logic voltage levels, propagation delay, and fan-out.

E T 183. Applied DC Circuits**3 Credits (2+2P)**

Application of Ohm's law, Kirchhoff's laws, Thevenin's, and Norton's theorems to the analysis of DC passive circuits. Embedded Lab.

Prerequisite(s)/Corequisite(s): MATH 1220G.

E T 183 L. Applied DC Circuits Lab**1 Credit (2P)**

DC applied circuits lab.

Corequisite(s): E T 183.

E T 184. Applied AC Circuits**3 Credits (2+2P)**

Application of circuit laws and theorems to analysis of AC passive circuits. Resonant circuit, polyphase circuit and magnetic circuit topics are introduced. Embedded Lab.

Prerequisite(s)/Corequisite(s): MATH 1250G. Prerequisite(s): E T 183.

E T 190. Applied Circuits**4 Credits (3+2P)**

Application of Ohm's law, Kirchhoff's laws, and Thevenin's theorems to the analysis of AC and DC passive circuits. Electronic circuit topics are introduced. Embedded lab.

Prerequisite/Corequisite: MATH 1250G or MATH 1430G.

Learning Outcomes

1. Analyze and design DC circuits, including ideal op-amps, using concepts of voltage, current, power, Kirchhoff's laws, and network theorems. Design simple systems involving dc circuits. Work and learn in teams.

E T 191. Applied Circuits Laboratory**1 Credit (2P)**

Applied Circuits Lab

E T 200. Special Topics**1-3 Credits**

Directed study or project. May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

E T 203. Computational Foundations**3 Credits (3)**

Fundamental concepts of various proof techniques. These concepts will be applied to the use of computer algorithms, programming languages and other engineering and technology applications.

Prerequisite(s): MATH 1250G and E T 262.

E T 210. Intermediate 3-D Modeling (Solid Works)**3 Credits (3)**

Intermediate 3-D modeling. Applied modeling of techniques to prepare for SolidWorks certification (CSWA).

Prerequisite(s): E T 110.

E T 217. Manufacturing Processes**3 Credits (3)**

Introduction to manufacturing and processing, including: casting, forming, and machining. Emphasis on creating products with the appropriate techniques. Crosslisted with: I E 217.

Prerequisite: E T 110 and MATH 1220G.

Learning Outcomes

1. Various

E T 217 L. Manufacturing Processes Lab**1 Credit (3P)**

Hands-on laboratory in machine shop to apply topics from E T 217, including: casting, forming, and machining.

Corequisite: E T 217.

Learning Outcomes

1. Various

E T 220. Internship**1-6 Credits**

Internship requiring an approved number of hours of varied and progressive experience in the field of study. The scope and other requirements of the internship are stated in an individualized syllabus and through a memorandum of understanding between the faculty mentor and the industry partner. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): E T 283.

E T 230. Introduction to Servo Systems**1 Credit (2P)**

Introduction to Servo Systems. Topics include uses of servos in the industry, servo types, loop gains and frequency response, software control systems, damping, feedback, encoders, synchros and resolvers. Restricted to Community Colleges campuses only.

Prerequisite(s): E T 246.

E T 240. Applied Statics**3 Credits (3)**

Fundamental topics of applied statics, including force system analysis, equilibrium, free body diagrams, methods of joints and sections, distributed loads, friction, centroids, area moments, and shear and moment diagrams.

Prerequisite(s)/Corequisite(s): MATH 1430G or MATH 1511G. Prerequisite(s): PHYS 1230G or PHYS 1310G.

E T 241. Applied Dynamics**3 Credits (3)**

The foundation for understanding particles and bodies in motion and the forces involved, including: projectile motion, Newton's Laws of Motion, conservation of energy, and impulse and momentum.

Prerequisite: E T 240.

Prerequisite/Corequisite: (MATH 1440 or MATH 1521G or MATH 1521H).

Learning Outcomes

1. Various

E T 246. Electronic Devices I**4 Credits (3+3P)**

Solid-state devices including diodes, bipolar-transistors, and field effect transistors. Use of these devices in rectifier circuits, small signal and power amplifiers.

Prerequisite: E T 190 or E T 184 or ENGR 120.

Learning Outcomes

1. Various

E T 253. Networking Operating Systems II**3 Credits (3+1P)**

Introduction to a computer network operating system. May not be used as part of an E T degree program on main campus. Restricted to Community Colleges campuses only.

Prerequisite: E T 120 and E T 153.

Learning Outcomes

1. Identify Linux utilities and terminology. Use the Linux filesystem. Install, administer, and manage a Linux system. Utilize Linux user/group management. Install software packages. Apply data management skills.

E T 254. Concrete Technology**3 Credits (2+2P)**

Fundamentals of aggregates, Portland cement, and asphalt used in design and construction.

E T 255. Linux System Administration**3 Credits (3)**

Operating systems applications and interfacing with an introduction to systems administration. Topics include Shell Programming, Programming Tools, Database Management, System Backups, Security, Setup and Maintenance of Linux Servers.

Learning Outcomes

1. Describe the key features of the Linux operating system. Plan the Linux Filesystem to match system requirements. Design BASH scripts to optimize common Linux operations. Interpret Linux performance data to solve hardware and software issues. Students will demonstrate the Core Linux System Administration. Students will be able to link the use of shell commands to managing Linux server daemons and software. Students will apply these concepts to build application servers running Linux, Apache, MySQL, and PHP (LAMP); Tomcat, CUPS print servers; and create backup solutions. Students will apply problem analysis, object-oriented structured logic, and development concepts. Students will demonstrate an understanding of theory and hands-on experience administrating a Linux Based server.

E T 256. Networking Operating Systems III**3 Credits (3+1P)**

Introduction to a computer network operating system. May not be used as part of an E T degree program on main campus. Restricted to Community Colleges campuses only.

Prerequisite(s): E T 253.

E T 262. Software Technology I**3 Credits (2+2P)**

An introduction to computer programming concepts as applied to engineering technology. Includes basic logic design, algorithm development, debugging and documentation. History and use of computers and their impact on society.

Prerequisite/Corequisite: (E T 182 or ENGR 130) or (MATH 1250G or MATH 1430G).

Learning Outcomes

1. Set up and use a rich programming environment for programming with C Analyze existing code Employ effective use of basic programming and basic troubleshooting Write, debug and test code given software requirements Apply testing and documentation best practices Transfer programming knowledge and apply coding knowledge

E T 272. Electronic Devices II**4 Credits (3+3P)**

Operational amplifiers, positive and negative feedback, computer aided circuit analysis. In addition circuits include integrator, differentiators and phase shift networks.

Prerequisite: E T 246.

Prerequisite/Corequisite: MATH 1430G or MATH 1435 or MATH 1511G.

Learning Outcomes

1. Various

E T 273. Advanced Networking Communications**4 Credits (2+4P)**

Explores advanced networking communications to include Wireless Networking, Virtualization and Cloud Computing, Subnets and VLANs, Network Risk Management, Network Security Design, Network Performance, and WANS. The course covers the examination objectives and detailed preparation for students to take the CompTIA Network+ exam.

Prerequisite: E T 153.

Learning Outcomes

1. Identify, describe, and apply wireless transmission characteristics and standards. Explain the benefits of cloud virtualization and cloud computing. Explain the purpose of network segmentation and describe how VLANs work and how they are used. Identify basic concepts of network risk management and configure devices for increased security. Identify network design security features and discuss options in network access control. Use tools to evaluate network performance and discuss best practices for incident response and disaster recovery. Explain characteristics of WAN technology and troubleshoot connection methods.

E T 276. Electronic Communications**3 Credits (2+2P)**

Antennas, transmission devices, A-M and F-M transmission and detection, pulse systems, microwave systems.

Prerequisite(s): E T 246.

E T 277. Computer Networking I for IET**3 Credits (2+2P)**

Computer network design and applications for LAN, TCP/IP networks, routing and switching technologies, VLANs, and the OSI layers from physical to transport.

Prerequisite(s): E T 182.

E T 280. Web Design and Multimedia**3 Credits (3)**

Introduction to front-end web development including webpage design, structure, layout, positioning, responsiveness, and foundational layers of how the web works. Video, audio, and other digital presentation tools are covered.

Learning Outcomes

1. Create multiple frontend development micro-components. Create single and multi-page websites. Use flexbox, grid, and media queries and different design patterns. Employ effective use of web development and basic troubleshooting. Build small web site projects.

E T 282. Digital Electronics**4 Credits (3+3P)**

Applications of digital integrated circuits, multiplexers, counters, arithmetic circuits, and microprocessors.

Prerequisite(s)/Corequisite(s): (E T 190 or E T 184). Prerequisite(s): E T 182.

E T 283. Hardware PC Maintenance**3 Credits (3+1P)**

Installing, configuring, troubleshooting, and maintaining personal computer hardware components.

Prerequisite(s): E T 120 or E T 122.

E T 284. Software PC Maintenance**3 Credits (3+1P)**

Installing, configuring, troubleshooting, and maintaining personal computer operating systems.

Prerequisite(s): E T 120 or E T 122.

E T 285. Advanced Information Security**3 Credits (3)**

The course covers detailed analysis of network security, including security operations and policy adherence; internal and external vulnerabilities; methods of identifying, controlling and managing system access, and the protection of system information.

Prerequisite(s)/Corequisite(s): E T 283. **Prerequisite(s):** E T 156.

E T 286. Information Security Certification Preparation**4 Credits (4)**

The course covers the examination objectives and detailed preparation for a certification in information security.

Prerequisite(s): E T 285.

E T 290. Networking Wireless Communication**3 Credits (3+1P)**

This course provides an introduction to wireless networking and communications. Some of the topics covered are protocols, transmission methods, and IEEE 802.11 standards. Wireless LAN (WLAN) fundamentals, devices, and security, cellular telephony, broadband, and satellite communications.

Prerequisite: E T 273.

E T 291. PC Forensics and Investigation**3 Credits (3)**

Introduction to computer forensics and investigative fundamentals. Topics include understanding computer forensic and investigation law and requirements, processing crime and incident scenes, and the extraction, preservation, analysis and presentation of computer-related evidence.

Prerequisite(s): E T 120 or E T 122.

E T 300. Special Topics**1-3 Credits**

Directed study or project. May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

E T 305. Introduction to Product Design**3 Credits (2+3P)**

The process of designing an innovative product for a real customer. Working through ideas, prototypes, 3-D models, concept validation, and entrepreneurship.

Prerequisite(s)/Corequisite(s): E T 210, E T 217, and (COMM 1115G or COMM 1130G or AXED 2120G or HNRS 2175G) or consent of instructor for non-MET majors.

E T 306. Fundamental and Applied Thermodynamics**3 Credits (3)**

First and second laws, properties of substances, thermodynamic cycles including power generation and refrigeration.

Prerequisite: CHEM 1120G and E T 240 and (MATH 1430G or MATH 1435 or MATH 1511G) and (PHYS 1240G or PHYS 1320G) and (PHYS 1240L or PHYS 1320L).

Prerequisite/Corequisite: (E T 262 or ENGR 140) and (MATH 1440 or MATH 1521G).

Learning Outcomes

1. Students will acquire an understanding of the physical concepts and basic principles of fundamental and applied thermodynamics Students will become acquainted with the problem-solving methods and tools in the field of applied thermodynamics Students will gain experience through practice in the implementation of systematic, fundamental approaches to solving problems in applied thermodynamics.

E T 306 L. Thermodynamics Lab**1 Credit (3P)**

Applications of thermodynamic theory to lab devices. Practice in testing, instrumentation, and data collection.

Corequisite: E T 306 .

Prerequisite/Corequisite: (ENGR 120 or E T 184 or E T 190).

Learning Outcomes

1. To provide the student with practical exposure to some of the fundamental concepts, experimental methods, and instrumentation encountered in the field of thermodynamics To familiarize the student with the development and application of procedures for laboratory work and for the acquisition, processing, evaluation, and (oral and written)presentation of experimental data To give the student additional experience in the preparation of technical reports and oral presentations which are accurate, concise, and informative.

E T 308. Fluid Technology**3 Credits (3)**

Application of basic principles of fluid mechanics to practical applied problems.

Prerequisite: (MATH 1430G or MATH 1435 or MATH 1511G) and E T 240.

Learning Outcomes

1. To provide the student with practical exposure to some of the fundamental concepts, experimental methods, and instrumentation encountered in the field of fluid technology, To familiarize the student with the development and application of procedures for laboratory work and for the acquisition, processing, evaluation, and presentation of experimental data, To give the student additional experience in the preparation of technical reports and oral presentations that are accurate, concise, and informative.

E T 308 L. Fluid Technology Lab**1 Credit (3P)**

Measurements in fluid statics, dynamics, and hydraulic systems.

Prerequisite: (MATH 1430G or MATH 1435 or MATH 1511G) and E T 240.

Corequisite: E T 308.

Learning Outcomes

1. Various

E T 309V. Manufacturing: History and Technology**3 Credits (3)**

The history of manufacturing, the technology on which it is based, and its impact on society.

E T 310. Applied Strength of Materials**3 Credits (3)**

Application of principles of strength of materials to practical design and analysis problems.

Prerequisite: (MATH 1430G or MATH 1435 or MATH 1511G) and E T 240.

Prerequisite/Corequisite: MATH 1440 or MATH 1521G or MATH 1521H.

Learning Outcomes

1. To obtain knowledge of basic engineering materials and their use in civil and mechanical construction To perform basic structural analysis, stress, strain and deformation calculations as they apply to current engineering practices To conduct appropriate experiments in the laboratory as they apply to strength of materials and be able to interpret the results. To effectively communicate results of laboratory work and in-class studies in written memoranda, business letters, and formal technical reports. To recognize that the field of engineering materials is constantly changing and therefore, needs to be studied throughout one's career.

E T 310 L. Applied Strength of Materials Lab**1 Credit (3P)**

Testing and analyzing the physical properties of materials. cursory review of Excel, PowerPoint, FEA, Instron machine, and testing standards.

Corequisite: E T 310.

Learning Outcomes

1. Various

E T 314. Communications Systems I**3 Credits (3)**

Circuits and devices used for transmission, reception, and processing of RF signals. Prerequisite(s): E T 246 and (MATH 1250G or MATH 1430G)

Learning Outcomes

1. Learn the basics of analog and digital communication Explore the fundamental communication concepts with hands-on experiments. Learn about basic antenna theory and satellite communications Prepare technically sound reports and project.

E T 317. Advanced Manufacturing and Design**3 Credits (3)**

Advanced 3-D modeling with current engineering design practices. Students will use SolidWorks add-ins such as CAMWorks, Product Data Management (PDM), and Model-Based Definition in conjunction with Geometric Dimensioning and Tolerancing (GD&T) practices. Students will have the opportunity to take the Certification SolidWorks Professional Exam (CSWP).

Prerequisite(s): E T 210 and E T 217.

E T 324. Signal Processing and Filtering**4 Credits (3+3P)**

Application of digital and analog signal conversion models. Discrete time signals and systems. Time and frequency domain concepts. Presentation of Fourier and Z transforms. Application of analog and digital signal filtering with and without feedback.

Prerequisite: E T 272.

Prerequisite/Corequisite: (MATH 1440 or MATH 1521G or MATH 1521H) and ((PHYS 1240G or PHYS 1320G) and (PHYS 1240L or PHYS 1320L)).

Learning Outcomes

1. Analyze signals (e.g. periodic, even) and systems (e.g. causal, linear) and differentiate between discrete and continuous time signals and systems. Determine the impulse response of a differential or difference equation. Apply the convolution theorem for continuous time signals to determine the response of linear systems to any input signal. Evaluate the Fourier series of periodic signals. Analyze the Fourier Transform of energy signals Apply bilateral Laplace transforms for continuous signals Analyze discrete time signals and systems using Z transforms. Apply the Sampling theorem, reconstruction, aliasing, and Nyquist's theorem to represent continuous-time signals in discrete time so that they can be processed by digital computers Design and analyze signals and systems using the programming language MATLAB and/or Simulink

E T 328. Kinematics of Machines**3 Credits (2+3P)**

Kinematic analysis of machine elements using linkages, cams, and gears. Applied design of mechanical systems using SolidWorks simulation and Excel modeling.

Prerequisite(s)/Corequisite(s): E T 305. **Prerequisite(s):** E T 210 and E T 241.

E T 332. Applied Design of Structures I**4 Credits (3+3P)**

An introduction to structural analysis and design. Use of various building codes for development of allowable and factored loads on structures. Allowable stress and strength design concepts for structural components using concrete and steel. Required use of computer software such as spreadsheets, databases, and self-developed programs and design aids.

Prerequisite(s): E T 310 and (MATH 1440 or MATH 1521G or MATH 1521H).

E T 339. Introduction to Digital Forensics and Incident Response**3 Credits (2+3P)**

Introduction to the skills required to perform digital forensics and incident response on Windows operating systems. Topics include: live response, evidence acquisition, Windows operating system artifacts, documentation and reporting.

Prerequisite(s): E T 255 and E T 160.

E T 344. Microcomputer Systems**3 Credits (2+3P)**

Microcomputer and/or microcontroller systems applications and architectures with a software emphasis using programming languages.

Prerequisite: (E T 182 or ENGR 130) and (MATH 1250G or MATH 1430G).

Prerequisite/Corequisite: E T 362.

Learning Outcomes

1. Various

E T 354. Soil and Foundation Technology**4 Credits (3+3P)**

Fundamentals of investigation of soil properties and their importance in design, construction, and testing as related to buildings, roads, dams, and other structures. Design of foundations considering slope stability, bearing capacity and settlement.

Prerequisite(s)/Corequisite(s): E T 310. **Prerequisite(s):** E T 254. **Restricted to:** ET U,ET E,ET M,C E,ET C majors.

E T 355. Site/Land Development and Layout**3 Credits (3)**

Techniques, methods, and takeoffs for infrastructure layout, site plan design, grading, earthwork, utilities, road construction.

Prerequisite(s)/Corequisite(s): DRFT 143 or DRFT 153.

E T 360V. Technology in Business and Society**3 Credits (2+2P)**

Examination of how technology affects business and society with specific attention to understanding the role of technical personnel and their interaction with nontechnical personnel.

E T 362. Software Technology II**3 Credits (3)**

Topics include problem analysis, object-oriented programming (OOP), structured logic, and development concepts.

Prerequisite: E T 262 or ENGR 140.

Prerequisite/Corequisite: MATH 1250G or Higher.

Learning Outcomes

1. Set up and use a rich programming environment for programming with Python Analyze existing code Employ effective use of basic programming and basic troubleshooting Employ effective use of Object-Oriented Programming (OOP) and troubleshooting Apply testing and documentation best practices

E T 377. Computer Networking I**3 Credits (2+2P)**

Computer network design and applications for LAN, TCP/IP networks, routing and switching technologies, VLANs, and the OSI layers from physical to transport.

Prerequisite: (E T 182 or ENGR 130) and (MATH 1250G or Higher).

Learning Outcomes

1. Define and distinguish the role of a network administrator (from other roles in the IT world) Identify the OSI model, its layers, and relationship to TCP/IP model Identify different cable media and networking devices and their use Design, configure, and troubleshoot basic networks. Identify MAC, IPv4, and IPv6 addressing Apply different techniques for IP allocation and subnet design (IPv4) Use Cisco IOS software for basic switch and router configurations Configure and troubleshoot basic setup for static and dynamic routing protocols

E T 381. Renewable Energy Technologies**3 Credits (3)**

Renewable energy systems, including topics in thermal-solar, photovoltaic, wind, geothermal systems, and other current topics. Theory, practical applications, safety considerations and the economics of alternative renewable energy systems compared to conventional systems.

Prerequisite(s): MATH 1220G.

E T 382. Solar Energy Technologies**3 Credits (2+3P)**

Solar energy technologies, including topics in passive, solar thermal, and photovoltaic systems. Theory, practical applications, safety considerations and the economics of solar renewable energy systems compared to conventional systems.

Prerequisite(s): MATH 1220G.

E T 384. Wind and Water Energy Technologies**3 Credits (3)**

Wind and Water energy technologies, including topics in small and large scale systems. Theory, practical applications, safety considerations and the economics of wind and water renewable energy systems compared to conventional systems.

Prerequisite(s): MATH 1220G.

E T 386. Sustainable Construction and Green Building Design**3 Credits (3)**

Sustainable Building materials, methods, and techniques including green architecture and design, codes, standards and specifications.

Prerequisite(s): MATH 1220G.

E T 396. Heat Transfer and Applications**3 Credits (2+3P)**

Fundamentals of conduction, convection, and radiation heat transfer. Application of heat transfer, thermodynamics, and fluid mechanics principles to thermal system analysis and design.

Prerequisite(s): E T 306 and E T 308 and PHYS 1240G.

E T 398. Digital Systems**3 Credits (2+3P)**

Advanced analysis and design of digital systems using state machine logic, programming of logic devices, implementation and testing.

Prerequisite: (E T 282 or ENGR 230) and (MATH 1250G or MATH 1430G).

Prerequisite/Corequisite: E T 362.

Learning Outcomes

1. Various

E T 400. Special Topics**1-3 Credits**

Directed study or project. May be repeated for a maximum of 6 credits.

Prerequisite: consent of department head.

E T 401. Heating and Air-Conditioning Systems**3 Credits (3)**

HVAC system design including heating and cooling load calculations, psychometrics, piping, duct layout, and system control. Same as M E 401.

Prerequisite(s): E T 306.

Corequisite(s): E T 396.

E T 402. Instrumentation**3 Credits (2+3P)**

Sensors/transducers, signal conditioning and transmission for measurement and control systems. Student project in an area of instrumentation and/or control is required.

Prerequisite(s)/Corequisite(s): E T 396 or E T 398.

E T 407. Applied Power Technologies**4 Credits (3+3P)**

Basic elements of modern power systems, energy sources, substation configuration, load cycles, and three-phase circuits. Students will gain experience in power factor correction, transmission line configurations and impedance, voltage regulation of transformers, and the per-unit system. Study of load flow, fault analysis, and economic operations is included.

Prerequisite: A C- or better in (MATH 1430G or MATH 1435 or MATH 1511G) and E T 272 and ((PHYS 1240G or PHYS 1320G) and (PHYS 1240L or PHYS 1320L)).

Learning Outcomes

1. Various

E T 410. Senior Seminar**1 Credit (1)**

Transition from academics to business and industry. Graded S/U.

Prerequisite: senior standing in E T.

E T 412. Highway Technology**3 Credits (3)**

Road-vehicle performance, geometric alignment, traffic analysis, highway materials, pavement design, and plan and profile development.

Prerequisite(s): E T 354.

E T 415. Manufacturing Management and Productivity**3 Credits (3)**

Projects incorporating concurrent engineering, total quality management, design for manufacturability/assembly, and other contemporary topics in manufacturing.

Prerequisites: senior standing in E T.

E T 418. Applied Hydraulics**3 Credits (3)**

Introduction to hydrology, hydraulic equations, hydraulic cross-sections, control structures, and collection and distribution of water, wastewater, and storm runoff using closed conduit and open channel flow.

Prerequisite(s): E T 308.

E T 420. Senior Internship**1-6 Credits**

Internship requiring an approved number of hours of varied and progressive experience in the field of study. The scope and other requirements of the internship are stated in an individualized syllabus and through a memorandum of understanding between the faculty mentor and the industry partner. Taken in the senior year of program.

Prerequisites: Senior standing in E T.

E T 421. Senior Project**3 Credits (3)**

Project in an area of civil engineering technology conducted under the direction of civil engineering technology faculty member. Project must be one that can be completed within a semester and of sufficient complexity for 3 credits. Taken last semester of program.

E T 426. Analysis and Design of Machine Elements**3 Credits (2+3P)**

Analysis and design of power transmission components, including: gears, sprockets, belts, chains, bearings, and shafts. Experiential design project using SolidWorks and Excel modeling.

Prerequisite(s)/Corequisite(s): E T 305. Prerequisite(s): E T 210, E T 241, and E T 310.

E T 432. Applied Design of Structures II**4 Credits (3+3P)**

Continuation of E T 332. Design of structural systems and study of their responses. Wood and masonry systems included.

Prerequisite(s): E T 332.

E T 435. Senior Project**3 Credits (2+3P)**

Capstone course. Practical application of student's cumulative knowledge to an assigned design projects. Design principles, teamwork, and project management skills are stressed. Demonstration of written and oral communication skills via project documentation and presentation of results. Must be graduating senior. Consent of Instructor required.

E T 439. Advanced Digital Forensics and Incident Response**3 Credits (3)**

Advanced topics in digital forensics and incident response. Topics include network analysis and advanced cybersecurity concepts.

Prerequisite(s): E T 339 and E T 377.

Learning Outcomes

1. Students will become familiar with tools and processes to analyze and detect memory resident processes that include malware, rootkits, and user recoverable data. Students will also have exposure to methods and processes used by hackers to penetrate and compromise targets.

E T 444. Hardware and Software Senior Design**3 Credits (2+3P)**

The design, development, implementation, documentation and formal demonstration of a microprocessor-based application to solve an engineering problem. Emphasis on microprocessor architectural concepts and software interfacing. A student project is require

Prerequisite(s): E T 344 and E T 398.

E T 454. Advanced Construction Technology**3 Credits (3)**

Contractor design and construction methods concerning formwork, special foundations, shoring, excavations, pilings, steel erection, and various material handling components.

Prerequisite: E T 354 and E T 355.

E T 455. Cost Estimating and Scheduling**3 Credits (3)**

Methods and techniques in construction estimating including final bid preparation, construction planning and scheduling using various network methods and other techniques.

Prerequisite: junior or senior standing in E T.

E T 456. Applied Power Technologies**4 Credits (3+3P)**

Basic elements of modern power systems, energy sources, substation configuration, load cycles, and three-phase circuits. Students will gain experience in power factor correction, transmission line configurations and impedance, voltage regulation of transformers, and the per-unit system. Study of load flow, fault analysis, and economic operations is included.

Prerequisite: A C- or better in (MATH 1430G or MATH 1435 or MATH 1511G) and E T 272 and ((PHYS 1240G or PHYS 1320G) and (PHYS 1240L or PHYS 1320L)).

Learning Outcomes

1. Various

E T 458. Web Development and Database Applications**3 Credits (3)**

Design, planning, and building of interactive and dynamic web applications which are customizable and contain real-time information. Topics include relational databases, object oriented programming, secure-coding practices and web security, user authentication and personalization, as well as front-end and back-end technology integration.

Prerequisite(s): E T 362 and E T 280.

Learning Outcomes

1. Setting up a development server Read, design, and write code for backend web dev. Design, create, and access databases that support web applications. Implement effective security and authentication on Web applications

E T 459. Construction Technology and Management**3 Credits (3)**

This is a Technical Specialty course that builds on topics presented in the construction sequence thus far: E T 154, E T 254, E T 354, and E T 355. The course introduces students to the different civil engineering approach to construction and management, including planning, construction estimating & scheduling, foundations, formwork, concrete work, steel fabrication and erection installation, equipment basics, quality control, and safety. Methods and techniques involved in construction including use of Primavera Project Management® software.

Prerequisite/Corequisite: E T 354 and E T 355.

Learning Outcomes

1. Understand the basic concepts of construction planning, cost estimation, scheduling, and types of project management Obtain basic knowledge on techniques to construct structures based on site condition Develop work breakdown system and quantity take-offs Develop project cost estimation for different construction projects Prepare work schedule for construction project Identify and implement the suitable method and equipment to construct various structures.

E T 463. Advanced Linux and Python Scripting**3 Credits (3)**

Advanced Linux Includes installation and maintenance of Unix/Linux/Windows versions of Python. Use of Python to solve numerous engineering problems using Python scripting as infrastructure.

Prerequisite(s): E T 255 and E T 362.

E T 464. Windows Enterprise Administration**3 Credits (3)**

Installation, configuration, and maintenance of Windows Enterprise services which includes Active Directory, distributed file systems, SQL Server, Web Server, Authentication Procedures, and enterprise elasticity. Topics covered include: Server Maintenance and Troubleshooting Methodologies.

Prerequisite(s)/Corequisite(s): E T 339. **Prerequisite(s):** E T 362.

E T 472. Intelligent Transportation Systems (ITS)**3 Credits (3)**

Traffic flow theory, telecommunication and information technology application in transportation, system architecture and standards, transportation management, incident and emergency management, corridor management, dynamic route guidance, in-vehicle systems, and traffic signal timing. Consent of instructor required.

E T 475. Special Topics in Information Technology**3 Credits (3)**

Contemporary topics in Information Technology.

Prerequisite: ((E T 362 or ICT 362) and (E T 377 or ICT 377)) or Consent of Instructor .

Learning Outcomes

1. Students will learn two way Bluetooth, Wi-Fi, and NFC communication technologies The student will practice building and programming IOT prototype devices The student will develop customer value proposition and perform one round of customer discovery The student will prototype their IOT device The student will demonstrate their IOT device The student will learn to integrate IOT devices into IT architecture

E T 477. Computer Networking II**3 Credits (2+2P)**

Advanced concepts in computer network design and applications including managing the campus network infrastructure (LANs and virtual LANs), network services (DNS and DHCP), network security and firewall, network monitoring and forensics, wireless networks, high-speed optical networks and Internet.

Prerequisite(s): E T 277 or E T 377.

E T 480. Innovation and Product Development**3 Credits (3)**

Experiential product design and development. Students will learn about different types of innovation, business models, and methods for developing products. Students will apply the scientific method to develop a product idea of their own. Students will propose ideas, develop hypotheses, test hypotheses, and iterate until they have validated their product idea or identified a need to pivot.

Prerequisite(s)/Corequisite(s): (COMM 1115G or COMM 1130G or AXED 2120G or HNRS 2175G).

E T 481. Engineering Principles for Elementary Teachers**3 Credits (3)**

Introduction to hands-on engineering principles and projects useful for application in the Elementary classroom. Restricted to: Masters of Arts in Education in Elementary Mathematics and Science majors.

Learning Outcomes

1. An ability to engage in the problem-solving process within engineering applications. An ability to put scientific theory into practice within an engineering application. Knowledge of the use of engineering concepts with hands-on activities. An ability to make sense of complex engineering-related phenomenon within an elementary school frame.

E T 482. Manufacturing Technology**3 Credits (2+2P)**

Fundamentals of computer aided manufacturing (CAM) and computer numerical control (CNC) machining. Students will learn how to program several variants of CNC machines, using both G/M code programming and computer aided manufacturing software. Emphasis will be on the effective design of parts to be made on CNC machines along with a hands on lab to give students experience on CNC machines. Students will individually design, manufacture, and keep items such as keychains, bottle openers, LED clocks, ergonomic handles, and license plates.

Prerequisite(s): E T 210 and E T 217.

E T 483. Mobile App Programming and Development**3 Credits (3)**

Planning and creation of mobile device applications. Programming tools and technical design considerations. Entrepreneurship and App development.

Prerequisite: ((E T 362 or ICT 362) and (E T 377 or ICT 377)) or Consent of Instructor .

Learning Outcomes

1. The student will learn to create a modern and flexible mobile device User Interface using Java The student will develop a high functioning prototype their mobile app The student will implement a business model canvas including development of a customer value proposition and a minimum of one round of customer discovery The student will implement database and information storage using a mobile device The student will implement the developer's dashboard for their mobile app Student will publish and monetize their mobile app

E T 485. White Hat System Testing**3 Credits (3)**

System penetration testing and repair. Review of methods utilized to gain access to unprotected systems. Testing system repairs and fixes for future prevention. Test documentation.

Prerequisite: ((E T 362 or ICT 362) and (E T 377 or ICT 377)) or Consent of Instructor .

Learning Outcomes

1. The student will practice modern methods for penetration testing The student will demonstrate advanced ethical hacking methods The student will evaluate in-place security systems The student will run-through simulated attacks and system break-ins The student will learn to prepare detailed reports on system vulnerabilities and weaknesses

E T 490. Selected Topics**1-3 Credits**

Selected topics in engineering technology and related areas.

Prerequisite: consent of instructor.

E T 505. Special Topics in Information Technology**3 Credits (3)**

Contemporary topics in Information Technology Restricted to: M-IT majors.

E T 539. Advanced Enterprise Security**3 Credits (3)**

Advanced enterprise security design and analysis. Identification and minimization of cyber threats. Restricted to: M-IT majors.

E T 551. Enterprise Architecture I**3 Credits (3)**

A study of current enterprise architecture methodologies, tools, and techniques. Restricted to: M-IT majors.

E T 552. Enterprise Architecture II**3 Credits (3)**

Advanced topics in enterprise architecture including availability, access, and architecture map development. Restricted to: M-IT majors.

Prerequisite(s): E T 551.

E T 555. Virtualization**3 Credits (3)**

An analysis and review of system and IT virtualization techniques. Restricted to: M-IT majors.

E T 562. Development and Operations**3 Credits (3)**

Software development including Python scripting. Operations programming. Restricted to: M-IT majors.

E T 577. Advanced Computer Networking**3 Credits (3)**

Advanced networking design and analysis. Modernization of infrastructures. Restricted to: M-IT majors.

E T 583. Mobile App Programming and Development**3 Credits (3)**

Planning and creation of mobile device applications. Programming tools and technical design considerations. Entrepreneurship and App development.

Restricted to: M-IT majors.

E T 585. White Hat System Testing**3 Credits (3)**

System penetration testing and repair. Review of methods utilized to gain access to unprotected systems. Testing system repairs and fixes for future prevention. Test documentation. Restricted to: M-IT majors.

E T 595. Capstone Projects in Information Technology**3 Credits (3)**

Capstone course. Practical application of student's cumulative Information Technology knowledge to an assigned design projects. Project management skills. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: M-IT majors.

ECDV-ECONOMIC DEVELOPMENT

ECDV 550. Introduction to Local and Regional Development**3 Credits (3)**

Serves as the introductory course in the Doctor of Economic Development program. Overview of the economic development field.

ECDV 590. Special Topics**1-3 Credits (1-3)**

Selected topics in the area of Economic Development. Subtitle reflects content. May be repeated up to 9 credits. Consent of instructor required.

ECDV 596. Individual Study**1-3 Credits (1-3)**

Individual studies directed by consenting faculty with the prior approval of the Department Head. May be repeated up to 6 credits.

ECDV 651. Economic Development Theory**3 Credits (3)**

Builds upon a general understanding of microeconomic and macroeconomic theory to focus specifically on theories of economic development at all levels. Prerequisites: AEEC 501 and 502

ECDV 661. Regional Economic Modeling**3 Credits (3)**

Introduction to the tools and methods of regional economic development analysis. May be repeated up to 3 credits. Restricted to: ECDV majors.

Prerequisite(s): AEEC 501, AEEC 502, and AEEC 540.

ECDV 664. Population Economics**3 Credits (3)**

Examines the causes and consequences of demographic change. Examines theories of basic demographic processes, population projection and estimation. Consent of instructor required.

ECDV 668. Economic Development Finance**3 Credits (3)**

Focuses on the tools and methods of economic development finance.

ECDV 670. Research in Economic Development**3 Credits (3)**

Intense examination of the academic literature on economic development at all levels.

Prerequisites: ECDV 651, ECDV 661 and ECDV 662.

ECDV 671. Sustainable Economic Development**3 Credits (3)**

Focuses on the interconnections between economic development and the environment. Provides a broad set of tools and ideas related to the impacts of human activities on the environment.

Prerequisites: AEEC 501, AEEC 502 and AEEC 540.

ECDV 673. Research Methods**3 Credits (3)**

An overview of alternative research methods and tools. Students explore quantitative and qualitative research methods as alternatives and complements to statistical methods. Research design, ethics, and presentation are emphasized.

Prerequisites: AEEC 501, AEEC 502 and AEEC 540.

ECDV 681. Urban Economic Development**3 Credits (3)**

Examines causes and consequences of economic change in urban and metropolitan areas. Covers both theory and tools for analysis.

Prerequisites: ECDV 651, ECDV 661 and ECDV 662.

ECDV 682. Rural Development**3 Credits (3)**

Examines causes and consequences of economic change in rural areas, communities and small, open economies. Covers both theory and tools for analysis.

Prerequisites: ECDV 651, ECDV 661 and ECDV 662.

ECDV 683. Seminar in National Economic Development**3 Credits (3)**

Explores specific examples and cases of rural and urban economic development. Involves applied analysis of specific rural and/or urban economic issues/projects.

Prerequisites: ECDV 681 and ECDV 682.

ECDV 692. Seminar in Economic Development**3 Credits (3)**

Seminars in selected topics in economic development. Subtitle reflects content. May be repeated up to 9 credits.

Prerequisite: Completion of at least nine semester hours of ECDV courses.

ECDV 694. Internship**1-9 Credits (1-9)**

Internship in Economic Development. May be repeated up to 9 credits. Restricted to: ECDV majors. Graded: S/U Grading (S/U, Audit).

Prerequisite(s): Completion of core requirements of Doctor of Economic Development.

ECDV 699. Doctoral Project**1-9 Credits (1-9)**

Doctoral Project. May be repeated up to 9 credits. Completion of all DED coursework and successful completion of comprehensive exams.

ECED-EARLY CHILDHOOD EDUCATION

ECED 1110. Child Growth, Development, and Learning**3 Credits (3)**

This basic course in the growth, development, and learning of young children, prenatal through age eight, provides students with the theoretical foundation for becoming competent early childhood professionals. The course includes knowledge of how young children grow, develop and learn. Major theories of child development are integrated with all domains of development, including biological-physical, social, cultural, emotional, cognitive and language. The adult's role in supporting each child's growth, development and learning is emphasized.

Learning Outcomes

1. Incorporate understanding of developmental stages, processes, and theories of growth, development, and learning into developmentally appropriate practice. A.1
2. Demonstrate knowledge of the interaction between maturation and environmental factors that influence physical, social, emotional, cognitive, and cultural domains in the healthy development of each child. A.2
3. Demonstrate knowledge of the significance of individual differences in development and learning.
4. Demonstrate knowledge of how certain differences may be associated with rate of development and
5. developmental patterns associated with developmental delays and/or specific disabilities. A.3
6. Demonstrate knowledge of the similarities between children who are developing typically and those with diverse abilities. A.4
7. Demonstrate knowledge of the many functions that language serves in the cognitive, social, and emotional aspects of development in the formative years. A.7
8. Demonstrate knowledge of the developmental sequence of language and literacy, including the
9. influence of culture and home factors. A.8
10. 1Demonstrate knowledge of how children acquire and use verbal, non-verbal, and alternative means of communication. A.9
11. 1Demonstrate knowledge of the relationship among emotions, behaviors, and communication skills to assist children in identifying and expressing their feelings in appropriate ways. A.10
12. 1Use appropriate guidance to support the development of self-regulatory capacities in young children. A.11

ECED 1115. Health, Safety, and Nutrition**2 Credits (2)**

This course provides information related to standards and practices that promote children's physical and mental well-being sound nutritional practices, and maintenance of safe learning environments. It includes information for developing sound health and safety management procedures for indoor and outdoor learning environments for young children. The course examines the many scheduling factors that are important for children's total development, healthy nutrition, physical activity, and rest.

Learning Outcomes

1. Recognize and respond to each child's physical health, intellectual and emotional well-being, and nutritional and safety needs. B.1
2. Articulate an understanding of indoor and outdoor learning environments that provide opportunities for children to put into practice healthy behaviors (physically, socially and emotionally). B.2
3. Use appropriate health appraisal and management procedures and makes referrals when necessary. B.3
4. Recognize signs of emotional distress, child abuse, and neglect in young children and use procedures appropriate to the situation, such as initiating discussions with families, referring to appropriate professionals, and, in cases of suspected abuse or neglect, reporting to designated authorities. B.4
6. Establish an environment that provides opportunities and reinforcement for children's practice of healthy behaviors that promote appropriate nutrition and physical and psychological well-being. B.5
7. Provide a consistent daily schedule for rest/sleep, as developmentally appropriate. B.6
8. Implement health care and educational activities for children and families based on health and a nutritional information that is responsive to diverse cultures. B.7
9. Assist young children and their families, as individually appropriate, in developing decision-making and interpersonal skills that enable them to make healthy choices and establish health-promoting behaviors. B.8

ECED 1120. Guiding Young Children**3 Credits (3)**

This course explores various theories of child guidance and the practical applications of each. It provides developmentally appropriate methods for guiding children and effective strategies and suggestions for facilitating positive social interactions. Strategies for preventing challenging behaviors through the use of environment, routines and schedule will be presented. Emphasis is placed on helping children become self-responsible, competent, independent, and cooperative learners and including families as part of the guidance approach.

Learning Outcomes

1. Apply knowledge of cultural and linguistic diversity and the significance of socio-cultural and political contexts for development and learning and recognize that children are best understood in the contexts of family, culture and society. A.6
3. Demonstrate knowledge of the many functions that language serves in the cognitive, social, and emotional aspects of development in the formative years. A.7
4. Demonstrate knowledge of the relationship among emotions, behaviors, and communication skills to assist children in identifying and expressing their feelings in appropriate ways. A.10
5. Use appropriate guidance to support the development of self-regulatory capacities in young children. A.11
6. Recognize and respond to each child's physical health, intellectual and emotional well-being, and nutritional and safety needs. B.1
7. Demonstrate knowledge and skill in building positive, reciprocal relationships with families. C.1
8. Demonstrate knowledge of and respect for variations across cultures, in terms of family strengths, expectations, values, and child-rearing practices. C.4
10. Demonstrate the ability to incorporate the families' desires and goals for their children into classroom or intervention strategies. C.7
11. Demonstrate knowledge and skills in developmentally appropriate guidance techniques and strategies that provide opportunities to assist children in development positive thoughts and feelings about themselves and others through cooperative interaction with peers and adults. E.3
12. 1Demonstrate understanding of the influence of the physical setting, schedule, routines, and transitions on children and use these experiences to promote children's development and learning. E.7
13. 1Demonstrate knowledge of assessment techniques, interpretation of assessment information in the application of this

ECED 1125. Assessment of Children and Evaluation of Programs**3 Credits (3)**

This basic course familiarizes students with a variety of culturally appropriate assessment methods and instruments, including systematic observation of typically and non-typically developing children. The course addresses the development and use of formative and summative assessment and evaluation instruments to ensure comprehensive quality of the total environment for children, families, and the community. Students will develop skills for evaluating the assessment process and involving other teachers, professionals and families in the process.

Prerequisite(s): ECED 1110 and (ENGL 1110G or ENGL 1110H or ENGL 1110M).

Learning Outcomes

1. Demonstrate ability to choose valid tools that are developmentally, culturally, and linguistically appropriate; use the tools correctly; make appropriate referrals; and interpret assessment results, with the goal of obtaining valid, useful information to inform practice and decision making. F.1
2. Demonstrate knowledge of maintaining appropriate records of children's development and behavior that safeguard confidentiality and privacy. F.2
3. Demonstrate knowledge of the educator's role as a participating member of the assessment process as described and mandated by state and federal regulations for Individual family service plans (IFSP) and individual education plans (IEP). F.3
4. Demonstrate understanding of the influences of environmental factors, cultural/linguistic differences, and diverse ways of learning on assessment outcomes. F.4 Involve the family and, as appropriate, other team members in assessing the child's development, strengths, and needs in order to set goals for the child. F.5 Articulate an understanding of the distinctions and definitions of assessment concepts (e.g., screening, diagnostic assessment, standardized, testing, accountability assessment). F.6
5. Apply understanding of assessment concepts toward selection of appropriate formal assessment measures, critiquing the limitations of inappropriate measures, and discussing assessment issues as part of interdisciplinary teams. F.7
6. Articulate an understanding that responsible assessment is legally and ethically grounded and guided by sound professional. It standards is collaborative and open with the goal of supporting diverse children and families. F.8
7. Demonstrate knowledge of assessment techniques, interpretation of assessment information in the Application of this data to curriculum development and/or intervention planning. F.9
8. 1Demonstrate knowledge of a variety of techniques and procedures to evaluate and modify program goals for young children and their families. F.10
9. 1Demonstrate knowledge and use of program evaluation to ensure comprehensive quality of the total Environment for children, families, and the community. F.11
10. 1Use both self and collaborative evaluations as part of ongoing program evaluations. F.12

ECED 1130. Family and Community Collaboration**3 Credits (3)**

This beginning course examines the involvement of families and communities from diverse cultural and linguistic backgrounds in early childhood programs. Ways to establishes collaborative relationships with families in early childhood settings is discussed. Families' goals and desires for their children will be supported through culturally responsive strategies.

Prerequisite(s): ECED 1110 and (ENGL 1110G or ENGL 1110H or ENGL 1110M).

Learning Outcomes

1. Demonstrate knowledge and skill in building positive, reciprocal relationships with families. C.1
2. Articulate an understanding of a safe and welcoming environment for families and community members. C.2
3. Develop and maintain ongoing contact with families through a variety of communication strategies. C.3
4. Demonstrate knowledge of and respect for variations across cultures, in terms of family strengths, expectations, values, and child-rearing practices. C.4
5. Articulate understanding of the complexity and dynamics of family systems. C.5
6. Demonstrate understanding of the importance of families as the primary educator of their child. C.6
7. Involve families and community members in contributing to the learning environment. C.9
8. Demonstrate ability to communicate to families the program's policies, procedures, and those procedural safeguards that are mandated by state and federal regulations. C.11
9. Apply knowledge of family theory and research to understand family and community characteristics including socioeconomic conditions; family structures, relationships, stressors, and supports (including the impact of having a child with diverse abilities); home language and ethnicity. C.12
10. 1Demonstrate knowledge of and skill to access community resources that assist families and contribute directly or indirectly to children's positive development such as mental health services, health care, adult education, English language instruction, and economic assistance. C.13
11. 1Demonstrate effective written and oral communication skills when working with children, families, and early care, education, and family support professionals. E.14
12. 1Demonstrate a commitment to leadership and advocacy for excellence in programs and services for young children and their families. G.6

ECED 2110. Professionalism**2 Credits (2)**

This course provides a broad-based orientation to the field of early care and education. Early childhood history, philosophy, ethics and advocacy are introduced. Basic principles of early childhood systems are explored. Multiple perspectives on early care and education are introduced. Professional responsibilities such as cultural responsiveness and reflective practice are examined.

Learning Outcomes

1. Recognize signs of emotional distress, child abuse, and neglect in young children and use procedures appropriate to the situation, such as initiating discussions with families, referring to appropriate professionals, and, in cases of suspected abuse or neglect, reporting to designated authorities. B.4
2. Demonstrate ability to communicate to families the program's policies, procedures, and those procedural safeguards that are mandated by state and federal regulations. C.11
3. Use both self and collaborative evaluations as part of ongoing program evaluations. F.12
4. Demonstrate ability to adhere to early childhood professional codes of ethical conduct and issues of confidentiality. G.1
5. Demonstrate awareness of federal, state, and local regulations, and public policies regarding programs and services for children birth through eight years of age. G.2
6. Demonstrate understanding of conditions of children, families, and professionals; the historical and current issues and trends; legal issues; and legislation and other public policies affecting children, families, and programs for young children and the early childhood profession. G.3
7. Demonstrate critical reflection of one's own professional and educational practices from community, state, national, and global perspectives. G.4
8. Demonstrate understanding of the early childhood profession, its multiple historical, philosophical, and social foundations, and how these foundations influence current thought and practice. G.5
9. Demonstrate knowledge in technology resources to engage in ongoing professional development. G.7

ECED 2115. Introduction to Language, Literacy, and Reading**3 Credits (3)**

This course is designed to prepare early childhood professionals for promoting children's emergent literacy and reading development. Through a developmental approach, the course addresses ways in which early childhood professionals can foster young children's oral language development, phonemic awareness, and literacy problem solving skills, fluency, vocabulary, and comprehension. . This course provides the foundation for early childhood professionals to become knowledgeable about literacy development in young children. Instructional approaches and theory-based and research based strategies to support the emergent literacy and reading skills of native speakers and English language learners will be presented.

Prerequisite(s): ECED 1110 and (ENGL 1110G or ENGL 1110H, or ENGL 1110M).

Learning Outcomes

1. Demonstrate knowledge of the many functions that language serves in the cognitive, social, and
2. emotional aspects of development in the formative years. A.7
3. Demonstrate knowledge of the developmental sequence of language and literacy, including the
4. influence of culture and home factors. A.8
5. Demonstrate knowledge of how children acquire and use verbal, non-verbal, and alternative means of communication. A.9
6. Develop partnerships with family members to promote early literacy in the home. C.8
7. Establish partnerships with community members in promoting literacy. C.10
8. Demonstrate knowledge of the reading and writing components of emergent literacy at each developmental level. D.4
9. Provide and use anti-bias materials/literature and experiences in all content areas of the curriculum. D.7
10. Create and manage a literacy-rich environment that is responsive to each child's unique path of development. E.9
11. Use a variety of strategies during adult-child and child-child interactions and facilitate communication and dialogue of expressive language and thought. E.10 1
12. Demonstrate a variety of developmentally appropriate instructional strategies that facilitate the development of literacy skills. E.11

ECED 2120. Curriculum Development through Play Birth through Age 4 (PreK)**3 Credits (3)**

The beginning curriculum course places play at the center of curriculum in developmentally appropriate early childhood programs. It addresses content that is relevant for children birth through age four in developmentally and culturally sensitive ways of integrating content into teaching and learning experiences. Information on adapting content areas to meet the needs of children with special needs and the development of IFSPs is included. Curriculum development in all areas, including literacy, numeracy, the arts, health, science, social skills, and adaptive learning for children, birth through age four, is emphasized. Consent of instructor required.

Prerequisite(s): ECED 1110 and (ENGL 1110G or ENGL 1110H or ENGL 1110M).

Corequisite(s): ECED 2121.

Learning Outcomes

1. Use appropriate guidance to support the development of self-regulatory capacities in young children. A.11
2. Demonstrate knowledge of relevant content for young children and developmentally appropriate ways of integrating content into teaching and learning experiences for children from birth to four (0-4) years of age. D.1
3. Demonstrate the integration of knowledge of how young children develop and learn with knowledge of the concepts, inquiry tools, and structure of content areas appropriate for different developmental levels. D.2
4. Adapt content to meet the needs of each child, including the development of individualized family
5. service plans (IFSP) or individualized education plans (IEP) for children with diverse abilities through the team process with families and other team members. D.6
6. Demonstrate knowledge of varying program models and learning environments that meet the individual needs of all young children, including those with diverse abilities. E.1
7. Create environments that encourage active involvement, initiative, responsibility, and a growing sense of autonomy through the selection and use of materials and equipment that are suitable to individual learning, developmental levels, diverse abilities, and the language and cultures in New Mexico. E.2
8. Create and manage inclusive learning environments that provide individual and cooperative
9. opportunities for children to construct their own knowledge through various strategies that include
10. decision-making, problem solving, and inquiry experiences. E.4
11. Demonstrate understanding that each child's creative expression is unique and can be encouraged through diverse ways, including creative play. E.5
12. Plan blocks of uninterrupted time for children to persist at self-chosen activities, both indoors and outdoors. E.6
13. 1Demonstrate understanding of the influence of the physical setting, schedule, routines, and transitions on children and use these experiences to promote children's development and learning. E.7
14. 1Use and explain the rationale for developmentally appropriate methods that include play, small group projects, open-ended questioning, group discussion, problem solving, cooperative learning and inquiry experiences to help young children develop intellectual curiosity, solve problems, and make decisions. E.8
15. 1Demonstrate a variety of developmentally appropriate instructional strategies that facilitate the development of emergent literacy skills. E.11
16. 1Demonstrate knowledge of assessment techniques, interpretation of assessment information in the application of this data to curriculum development of intervention planning. F.

ECED 2121. Curriculum Development through Play Birth through Age 4 (PreK) Practicum**2 Credits (2)**

The beginning practicum course is a co-requisite with the course Curriculum Development through Play – Birth through Age 4. The field based component of this course will provide experiences that address curriculum content that is relevant for children birth through age four in developmentally and culturally sensitive ways of integrating content into teaching and learning experiences. Information on adapting content areas to meet the needs of children with special needs and the development of IFSPs is included. Curriculum development in all areas, including literacy, numeracy, the arts, health, science, social skills, and adaptive learning for children, birth through age four, is emphasized. Consent of instructor required.

Prerequisite(s): ECED 1110 and (ENGL 1110G or ENGL 1110H or ENGL 1110M).

Corequisite(s): ECED 2120.

Learning Outcomes

1. Provide a variety of activities that facilitate development of the whole child in the following areas: Physical/motor, social/emotional, language/cognitive and adaptive/living skills. A.5
2. Develop, implement and evaluate an integrated curriculum that focuses on children's development and interests, using their language, home experiences, and cultural values. D.5
3. Provides and uses anti-bias materials and literature, and experiences in all content areas of the curriculum. D.7
4. Create and manage inclusive learning environments that provide individual and cooperative opportunities for children to construct their own knowledge through various strategies that include decision-making, problem solving, and inquiry experiences. E.4
5. Demonstrate understanding that each child's creative expression is unique and can be encouraged through diverse ways, including creative play. E.5
6. Plan blocks of uninterrupted time for children to persist at self-chosen activities, both indoors and outdoors. E.6
7. Demonstrate understanding of the influence of the physical setting, schedule, routines, and transitions on children and use these experiences to promote children's development and learning. E.7
8. Use and explain the rationale for developmentally appropriate methods that include play, small group projects, open-ended questioning, group discussion, problem solving, cooperative learning and inquiry experiences to help young children develop intellectual curiosity, solve problems, and make decisions. E.8

ECED 2130. Curriculum Development and Implementation Age 3 (PreK) through Grade 3**3 Credits (3)**

The curriculum course focuses on developmentally appropriate curriculum content in early childhood programs, age 3 through third grade. Development and implementation of curriculum in all content areas, including literacy, numeracy, the arts, health and emotional wellness, science, motor and social skills, is emphasized. Information on adapting content areas to meet the needs of children with special needs and the development of IEP's is included. Consent of instructor required.

Prerequisite(s): ECED 1110 and (ENGL 1110G or ENGL 1110H or ENGL 1110M).

Corequisite(s): ECED 2131.

Learning Outcomes

1. Use appropriate guidance to support the development of self-regulatory capacities in young children. A.11
2. Demonstrate the integration of knowledge of how young children develop and learn with knowledge of the concepts, inquiry tools, and structure of content areas appropriate for different developmental levels. D.2
3. Demonstrate knowledge of what is important in each content area, why it is of value, and how it links with early and later understandings within and across areas. D.3
4. Demonstrate knowledge of the language, reading and writing components of emergent literacy at each developmental level. D.4
5. Adapt content to meet the needs of each child, including the development of individualized family service plans (IFSP) or individualized education plans (IEP) for children with diverse abilities through the team process with families and other team members. D.6
6. Demonstrate knowledge of varying program models and learning environments that meet the individual needs of all young children, including those with diverse abilities. E.1
7. Create environments that encourage active involvement, initiative, responsibility, and a growing sense of autonomy through the selection and use of materials and equipment that are suitable to individual learning, developmental levels, diverse abilities, and the language and cultures in New Mexico. E.2
8. Create and manage inclusive learning environments that provide individual and cooperative opportunities for children to construct their own knowledge through various strategies that include decision-making, problem solving, and inquiry experiences. E.4
9. Demonstrate understanding that each child's creative expression is unique and can be encouraged through diverse ways, including creative play. E.5
10. 1Plan blocks of uninterrupted time for children to persist at self-chosen activities, both indoors and outdoors. E.6
11. 1Demonstrate understanding of the influence of the physical setting, schedule, routines, and transitions on children and use these experiences to promote children's development and learning. E.7
12. 1Demonstrate knowledge of developmentally appropriate uses of technology, including assistive technology. E.12
13. 1Demonstrate knowledge of assessment techniques, interpretation of assessment information in the application of this data to curriculum development of intervention planning. F.9

ECED 2131. Curriculum Development and Implementation Age 3 (PreK) through Grade 3 Practicum**2 Credits (2)**

The beginning practicum course is a co-requisite with the course Curriculum Development and Implementation: Age 3 through Grade 3. The field based component of this course will provide experiences that address developmentally appropriate curriculum content in early childhood programs, age 3 through third grade. Development and implementation of curriculum in all content areas, including literacy, numeracy, the arts, health and emotional wellness, science, motor and social skills is emphasized. Information on adapting content areas to meet the needs of children with special needs and the development of IEPs is included. Consent of instructor required. Corequisite(s): ECED 2130

Prerequisite(s): ECED 1110 and (ENGL 1110G or ENGL 1110H or ENGL 1110M).

Learning Outcomes

1. Provide a variety of activities that facilitate development of the whole child in the following areas: Physical/motor, social/emotional, language/cognitive and adaptive/living skills. A.5
2. Develop, implement and evaluate an integrated curriculum that focuses on children's development and interests, using their language, home experiences, and cultural values. D.5
3. Provides and uses anti-bias materials and literature, and experiences in all content areas of the curriculum. D.7
4. Create and manage inclusive learning environments that provide individual and cooperative opportunities
5. for children to construct their own knowledge through various strategies that include decision-making, problem solving, and inquiry experiences. E.4
6. Demonstrate understanding that each child's creative expression is unique and can be encouraged
7. through diverse ways, including creative play. E.5
8. Plan blocks of uninterrupted time for children to persist at self-chosen activities, both indoors and outdoors. E.6
9. Demonstrate understanding of the influence of the physical setting, schedule, routines, and transitions on children and use these experiences to promote children's development and learning. E.7
10. Use and explain the rationale for developmentally appropriate methods that include play, small group projects, open-ended questioning, group discussion, problem solving, cooperative learning and inquiry experiences to help young children develop intellectual curiosity, solve problems, and make decisions. E.8

ECED 2140. Effective Program Development for Diverse Learners and their Families**3 Credits (3)**

This course addresses the role of a director/administrator in the implementation of family-centered programming that includes individually appropriate and culturally responsive curriculum in a healthy and safe learning environment for all children and their families.

Learning Outcomes

1. Describe important aspects of leadership that an administrator in an early childhood setting must demonstrate.
2. Identify and describe ways in which classrooms can have a multicultural environment.
3. Observe a classroom and identify, using photographs good practice with classroom environment.
4. Describe important aspects of a good early childhood curriculum
5. Describe how culture and socioeconomic factors influence classroom environment.

ECED 2141. Effective Program Development for Diverse Learners and their Families Practicum**2 Credits (2)**

Provides opportunities for students to apply knowledge gained from Curriculum for Diverse Learners and their Families in a practicum setting. Consent of instructor required. Restricted to ECED majors.

Corequisite(s): ECED 2140.

Learning Outcomes

1. Describe the requirements to maintain and enhance the physical and mental health, safety, and nutrition components of a program: Demonstrate knowledge of facility management to include evaluation, maintenance, security, and meeting applicable codes; Demonstrate knowledge of planning for appropriate indoor and outdoor environments; Identify ways to support early childhood educators in the selection of appropriate materials and equipment for the environment; Demonstrate knowledge of the impact of the environment on children's learning and development.
2. Demonstrate knowledge of early care and education curriculum that is individually, culturally, linguistically, and developmentally responsive: Describe a variety of curriculum goals and teaching strategies; Describe the importance of ongoing curriculum assessment and planning, and collaboration with teachers, families and community entities; Identify ways to support early childhood educators in curriculum assessment and planning.
3. Demonstrate knowledge of family/community involvement in effective program development: Describe the importance of supporting families as partners in early care and education program development; Describe both informal and formal communication systems with families that encourage information sharing and joint decision making; Identify strategies for resolving conflicts and supporting families with diverse backgrounds and parenting expectations; Identify the range of family needs including transitional periods; Identify within the community the network to support families with their special needs; Describe a "family friendly" inclusive philosophy
4. Demonstrate knowledge of a director's role as an educational leader in an inclusive setting: Describe what a director does in supporting the instructional component of the program for children, staff, and families; Identify resources that a director might use to keep current with information relating to the instructional component of the program; Describe ways to involve teachers in instructional decision making.

ECED 2215. Program Management**3 Credits (3)**

This course emphasizes the technical knowledge necessary to develop and maintain an effective early care and education program. It focuses on sound financial management and vision, the laws and legal issues that affect programs, and state and national standards such as accreditation. Consent of instructor required.

ECED 2280. Professional Relationships**3 Credits (3)**

This course addresses staff relations that will foster diverse professional relationships with families, communities and boards. Topics of staff recruitment, retention, support and supervision will lay the foundation for positive personnel, family and community relationships. Consent of instructor required.

Corequisite(s): ECED 2281.

Learning Outcomes

1. Interview an administrator and write a paper describing personnel management, staff support,
2. supervision, and professional development.
3. Identify and describe ethical and legal requirements in maintaining a professional relationship with subordinates, the community, clients, and fellow administrators.
4. Identify and describe technologies which may be used in an early childhood setting.
5. Identify and describe legal and ethical considerations in the employment of others.

ECED 2281. Professional Relationships Practicum**2 Credits (2)**

Practical experience in the development of staff relationship that will foster professional relationships with families, communities and boards. Issues of staff recruitment, retention, support and supervision will lay a foundation for positive personnel management. Consent of instructor required. Restricted to ECED majors.

Corequisite(s): ECED 2280.

Learning Outcomes

1. Demonstrate knowledge of personnel management, staff support, supervision, and professional development within a diverse and inclusive organization: Describe methods for recruiting and retaining a diverse staff; Describe job descriptions for each position; Review a sampling of personnel policies and procedures; Review a variety of staff handbooks; Explain why on-going system of supervision should include regular meetings for professional goal setting, self-assessment, and feedback; Review program needs to effectively manage the work of the program including scheduling, covering ratios, initial orientation, in-service, staff meeting, etc.
2. Demonstrate an awareness of appropriate communication and collaboration skills: Improve written and oral communication skills; Describe strategies for resolving conflicts; Explain how to promote consensus building as a decision making process.
3. Demonstrate knowledge that promotes effective professional relationships with families, communities, and board members: Describe methods for demonstrating respect, understanding, and appreciation for all people; Identify the aspects of culture that facilitate relationship building among people; Describe how to build a common vision and develop long range program plans with parents, staff, board, and the community; Communicate program goals to visitors, prospective parents, volunteers, and board members; Describe how public relations and marketing strategies can impact programs; Review assessment tools that identify needs for early care, education and family support; Develop a personal professional development plan; Describe methods to work effectively with a board and advisory group.
4. Demonstrate knowledge of technology uses and skill acquisition: Describe how to use technology resources to engage in ongoing professional development and lifelong learning; Describe how you will use technology to communicate and collaborate in your leadership role

ECED 315. Research in Child, Growth, Development and Learning**3 Credits (3)**

This advanced course in child growth, development, and learning builds upon the foundational material covered in the basic course in child growth, development, and learning. An integration of major theories of child development is provided by focusing on contemporary research in all aspects of development, including bio-ecological, social-affective, cognitive, language, and the methodological aspects of research in early childhood development and education. May be repeated up to 3 credits. Restricted to: TEP-ECED majors.

Prerequisite(s): ECED 1110.

ECED 325. Research in Child, Growth, Development and Learning**3 Credits (3)**

This advanced course in child growth, development, and learning builds upon the foundational material covered in the basic course in child growth, development, and learning. An integration of major theories of child development is provided by focusing on contemporary research in all aspects of development, including bio-ecological, social-affective, cognitive, language, and the methodological aspects of research in early childhood development and education. Intended for Zero to Four degree seeking majors and ECED minors. May be repeated up to 3 credits.

Prerequisite: ECED 1110;.

Learning Outcomes

1. Incorporate understanding of developmental stages, processes and theories of growth, development, and learning into developmentally appropriate practice. (I.A)
2. Demonstrate knowledge of the interaction between maturation and environmental factors that influence physical, social, emotional, cognitive, and cultural domains in the healthy development of each child

ECED 329. Early Primary Field Placement**2 Credits (4P)**

The field practicum is a co-requisite course with Teaching and Learning Reading and Writing; Teaching and Learning Math and Science; Teaching and Learning Social Studies, Fine Arts and Movement. The field based component will provide experiences that address curriculum content and practice teaching that is relevant for early primary children in developmentally and culturally sensitive ways. Graded: S/U. May be repeated up to 2 credits.

Restricted to: TEP-ECED majors. Graded: S/U Grading (S/U, Audit).

Corequisite(s): ECED 440, ECED 455, RDG 350.

ECED 335. Family, Language and Cultural**3 Credits (3)**

This course analyzes the interrelationships between family, language, and culture as connected to children's development and learning. In this course, language is understood as a human activity and higher mental process which build on the children's families, community and cultural background. May be repeated up to 3 credits. Restricted to: TEP-ECED majors.

Prerequisite(s): ECED 1130.

ECED 345. Family, Language, and Culture**3 Credits (3)**

This course analyzes the interrelationships between family, language, and culture as connected to children's development and learning. In this course, language is understood as a human activity and higher mental process which build on the children's families, community, and cultural background. Intended for Zero to Four degree seeking majors and ECED minors. May be repeated up to 3 credits.

Prerequisite: ECED 1130.

Learning Outcomes

1. Apply knowledge of cultural and linguistic diversity and the significance of socio-cultural and political contexts for development and learning and recognize that children are best understood in the contexts of family, culture, and society. A.6 Demonstrate knowledge of the many functions that language serves in the cognitive, social, and emotional aspects of development in the formative years. A.7

ECED 351. Emergent Literacy**3 Credits (2+2P)**

This advanced course is designed to prepare early childhood professionals to study literacy development, specifically oral language, writing and reading. This course focuses on children from birth through age 4, including children with special needs. Through a developmental approach, the course addresses: 1) recent theory and research that translates into practical strategies, assessment materials and preparation of rich literacy environments, 2) the socio-cultural contexts in which children develop literacy, 3) culturally, linguistically and developmentally appropriate literacy curricula, 4) processes used to determine the appropriateness of various literacy strategies, 5) assessment, evaluation, and accountability and 5) literacy leadership. Crosslisted with: RDG 351.

Prerequisite(s): ECED 2115.

ECED 395. Special Topics**1-3 Credits**

Each course will be identified by a qualifying subtitle. A maximum of 3 credits in any one semester and a grand total of 6 credits.

ECED 420. Integrated Early Childhood Curriculum**4 Credits (4)**

This advanced course focuses on developmentally appropriate content, learning environments, and curriculum implementation for children birth through age 4. It emphasizes integration of content areas (the arts, literacy, math, health/emotional wellness, science, social studies, motor, and adaptive living skills) and the development of rich learning environments for infants, toddlers, and preschool children.

Prerequisite(s): ECED 1115, ECED 2120, ECED 2121, ECED 2130, ECED 2131, ECED 2110, and ECED 1120.

Corequisite(s): ECED 425.

ECED 425. Integrated Curriculum Practicum**2 Credits (2)**

The advanced practicum course is a field based course that will provide opportunities for the integration of content areas (the arts, literacy, math, health/emotional wellness, science, social studies, motor, and adaptive living skills) and the development of rich learning environments for infants, toddlers, and preschool children.

Prerequisite(s): ECED 1115, ECED 2120, ECED 2121, ECED 2130, ECED 2131, ECED 2110, ECED 1120.

Corequisite(s): ECED 420.

ECED 440. Teaching and Learning Math and Science**4 Credits (4)**

Standards, principles, and practices in teaching mathematics and science to young children in preschool through grade 3. An emphasis is placed on developing a content-rich integrated math and science curriculum that focuses on children's development and interests, includes appropriate content, processes, environment, and materials with an emphasis on problem-solving as the major means of constructing basic concepts. Field experience required. May be repeated up to 4 credits.

Corequisite(s): ECED 329, ECED 455, RDG 350.

ECED 455. Teaching and Learning Social Studies, Fine Arts and Movement**3 Credits (3)**

The course focuses on the aims, scope, and integration of methods of teaching social studies, the fine arts and movement across the curriculum. This course emphasizes an integrated approach to teaching the what and why of social studies; assessing student learning; planning units, lessons, and activities; effective instructional strategies; and knowledge of social studies content. Concepts of expressive art include the visual arts, music, movement and drama. May be repeated up to 3 credits.

Corequisite(s): ECED 329, ECED 440, RDG 350.

ECED 458. Field Experience (Infants Pre-K)**1 Credit (1)**

Supervised field experiences in early childhood settings: infants, toddlers, and pre-K programs. Graded S/U.

ECED 459. Field Experience (K-3)**1 Credit (1)**

Supervised field experiences in early childhood settings: public school programs K 3. Graded S/U.

ECED 465. Advanced Caregiving for Infants and Toddlers**3 Credits (3)**

The advanced field-based course is intended to assist students to define and implement advanced elements of quality programming for all infants, toddlers in safe, healthy, responsive caring environments. The experiences in the approved setting will support strong nurturing relationships, cultural competence, diverse learning needs and styles of every child, appropriate guidance techniques and partnership with the families, cultures, and community represented. Students are assisted through the course in advancing their ability to observe, discuss, and implement elements of quality programming for infants and toddlers in home, small-group or whole-group care situations. May be repeated up to 3 credits.

Prerequisite(s): ECED 2120 and ECED 2121; ECED 2130 and ECED 2131.

ECED 470. Student Teaching/Seminar Early Childhood**3 Credits (3)**

Discussion of early childhood school issues related to student teaching. May be repeated up to 3 credit hours. Restricted to: TEP-ECED Majors.

Learning Outcomes

1. Synthesis of knowledge and skills appropriate to teaching in PreK - 3rd grade educational settings.

ECED 479. Curriculum in Early Childhood Education**3 Credits (3)**

Development and implementation of curriculum and materials for teaching young children.

ECED 489. Topics**3 Credits (3)**

Offered under various subtitles which indicate the subject matter to be covered. May be repeated three times for a maximum of 9 credits.

ECED 510. Issues in Early Childhood Education**3 Credits (3)**

Examines current trends and problems through readings of theoretical, empirical, and applied literature.

ECED 515. Working with Parents of Young Children**3 Credits (3)**

Techniques for setting up home and classroom visitations, communicating with parents, and establishing special programs.

ECED 520. Seminar on Child Development, Assessment and Well-being of Young Children**3 Credits (3)**

This course will reintroduce you to the world of young children in a variety of early childhood settings. It focuses on early childhood development, observation of young children and evaluation of classrooms, child well-being, and the many ways in young children learn. Sessions will bridge theory to practice as we explore your internship experiences and gain deeper understanding of your role as an early care and education professional. May be repeated up to 3 credits.

ECED 530. Leadership and Advocacy in Early Childhood**3 Credits (3)**

The course explores a multidisciplinary approach to early childhood educational leadership, advocacy and change. The course focuses on leadership in its many forms: in teaching, administration, policy, research, and ethics. In addition, we will examine the theory and practice of change to gain an understanding of what contributes to advocating for policy and community change. Students will gain a deeper understanding of themselves as leaders, and ways to improve early education to promote social justice in programs and systems serving families and young children.

ECED 540. Science/Math Curriculum**3 Credits (2+2P)**

Methods and materials for developmentally appropriate practices in teaching science and math for young children.

Learning Outcomes

1. Synthesis of knowledge and skills appropriate to teaching in PreK - 3rd grade educational settings.

ECED 550. Student Teaching/Seminar**3 Credits (3)**

Provides student teaching experience in a variety of settings with young children ages birth 8. Restricted to: TEP-ECED majors. Students must be Admitted into student teaching to enroll. May be repeated up to 3 credits.

Learning Outcomes

1. Our mission is to serve the people of New Mexico through education, research, extension education, and public service with specific emphasis on innovative practices, overcoming barriers to learning, international activities, technology, and literacy for the diverse populations of New Mexico, surrounding states and border communities.

ECED 570. Play in the Early Childhood Curriculum**3 Credits (3)**

Advanced exploration of the development of curriculum based on children's play. A means of exploring and learning the patterns of human living, communications, and experiences congruous with developing interests and capacities. Restricted to majors. Same as ECED 451 with differentiated assignments for graduate students.

ECED 612. History and Philosophy of Early Childhood Education**3 Credits (3)**

Critical analysis of the historical development and philosophical underpinnings of the field of early childhood education as it relates to current practice. Restricted to doctoral-level students of any major.

ECED 614. Early Childhood, Communities, and Social Policy**3 Credits (3)**

Early childhood politics and policy taken from a global, national, state, and community context. Restricted to doctoral-level students of any major.

ECED 698. Selected Topics in Early Childhood Education**1-6 Credits**

Offered under various subtitles. May be repeated for a maximum of 6 credits. Restricted to doctoral-level students of any major.

ECON-ECONOMICS

ECON 1110G. Survey of Economics**3 Credits (3)**

This course will develop students' economics literacy and teaches students how economics relates to the everyday life of individuals, businesses and society in general. The course will also introduce students to the roles different levels of governments play in influencing the economy. At the conclusion of the course, students will be able to identify economic causes for various political and social problems at national and international levels, and have a better understanding of everyday economic issues that are reported in media and public forums.

Learning Outcomes

1. Gain and demonstrate a contextual understanding of economic terms and concepts.
2. Recognize and analyze common economic issues which relate to individual markets and the aggregate economy.
3. Learn basic economic principles that influence global trading and challenges relating to globalization.
4. Outline the implications of various economic policies on individuals and on economies.
5. Demonstrate ability to use diagrams and graphs to explain economic principles, policies and their applications.
6. Appreciate and understand how individual decisions and actions, as a member of society, affect economies locally, nationally and internationally.
7. Explain the roles of governments in influencing buyer and seller behavior in the market and how government failure occurs when intervention fails to improve or actually worsens economic outcomes.
8. Be able to apply course concepts to interpret, evaluate and think critically about economic events and policies, especially as regularly reported in the media and other public forums.

ECON 2110G. Macroeconomic Principles**3 Credits (3)**

Macroeconomics is the study of national and global economies. Topics include output, unemployment and inflation; and how they are affected by financial systems, fiscal and monetary policies.

Learning Outcomes

1. Explain the concepts of opportunity cost, comparative advantage and exchange.
2. Demonstrate knowledge of the laws of supply and demand and equilibrium and use supply and demand curves to analyze responses of markets to external events.
3. Explain the circular flow model and use the concepts of aggregate demand and aggregate supply to analyze the response of the economy to disturbances.
4. Explain the concepts of gross domestic product, inflation and unemployment and how they are measured.
5. Describe the determinants of the demand for money, the supply of money and interest rates and the role of financial institutions in the economy.
6. Define fiscal policy and monetary policies and how these affect the economy.
7. Students will be able to identify the causes of prosperity, growth, and economic change over time and explain the mechanisms through which these causes operate in the economy.

ECON 2110H. Principles of Macroeconomics Honors**3 Credits (3)**

Macroeconomic theory and public policy designed: national income concepts, unemployment, inflation, economic growth and international payment problems. Must be a Crimson Scholar.

Prerequisite(s): MATH 1220G.

Learning Outcomes

1. Explain the concepts of opportunity cost, comparative advantage and exchange.
2. Demonstrate knowledge of the laws of supply and demand and equilibrium and use supply and demand curves to analyze responses of markets to external events.
3. Explain the circular flow model and use the concepts of aggregate demand and aggregate supply to analyze the response of the economy to disturbances.
4. Explain the concepts of gross domestic product, inflation and unemployment and how they are measured.
5. Describe the determinants of the demand for money, the supply of money and interest rates and the role of financial institutions in the economy.
6. Define fiscal policy and monetary policies and how these affect the economy.
7. Students will be able to identify the causes of prosperity, growth, and economic change over time and explain the mechanisms through which these causes operate in the economy.

ECON 2120G. Microeconomics Principles**3 Credits (3)**

This course will provide a broad overview of microeconomics. Microeconomics is the study of issues specific to households, firms, or industries with an emphasis on the role of markets. Topics discussed will include household and firm behavior, demand and supply, government intervention, market structures, and the efficient allocation of resources.

Learning Outcomes

1. Explain the concept of opportunity cost.
2. Demonstrate knowledge of the laws of supply and demand and equilibrium.
3. Use supply and demand curves to analyze responses of markets to external events.
4. Use supply and demand analysis to examine the impact of government intervention.
5. Explain and calculate price elasticity of demand and other elasticities.
6. Demonstrate an understanding of producer choice, including cost and break-even analysis.
7. Compare and contrast the following market structures: perfect competition, monopoly, monopolistic competition, and oligopoly.

ECON 2120H. Principles of Microeconomics Honors**3 Credits (3)**

Microeconomic theory and public policy: supply and demand, theory of the firm, market allocation of resources, income distribution, competition and monopoly, governmental regulation of businesses and unions. Must be a Crimson Scholar.

Prerequisite(s): MATH 1220G.

Learning Outcomes

1. Explain the concept of opportunity cost.
2. Demonstrate knowledge of the laws of supply and demand and equilibrium.
3. Use supply and demand curves to analyze responses of markets to external events.
4. Use supply and demand analysis to examine the impact of government intervention.
5. Explain and calculate price elasticity of demand and other elasticities.
6. Demonstrate an understanding of producer choice, including cost and break-even analysis.
7. Compare and contrast the following market structures: perfect competition, monopoly, monopolistic competition, and oligopoly.

ECON 304. Money and Banking**3 Credits (3)**

Income measurement and determination, monetary and fiscal policies.

Prerequisite(s): ECON 2110G or ECON 2110H or equivalent.

ECON 311. Intermediate Macroeconomic Theory**3 Credits (3)**

Analysis of gross domestic product, the Classical, Keynesian, and Neo- Keynesian theories of income, employment, inflation and growth.

Prerequisite(s): ECON 2110G or ECON 2110H or equivalent.

ECON 312. Intermediate Microeconomic Theory**3 Credits (3)**

Contemporary economic theory with emphasis upon value and distribution.

Prerequisite(s): ECON 2110G or ECON 2110H or equivalent.

ECON 324V. Developing Nations**3 Credits (3)**

Economic analysis of problems related to development of developing nations. Issues such as growth, industrialization, poverty, population, international trade, foreign debt, and international economic relations.

ECON 325V. Economic Development of Latin America**3 Credits (3)**

Economic analysis of problems related to development in Latin America, including the agrarian problem, debt and austerity programs, industrialization, inflation and unemployment, the drug trade, U.S.-Latin American relations, development strategies. Also individual countries problems.

ECON 332. Public Finance**3 Credits (3)**

This course will examine the roles of government in modern, market-oriented, mixed economies. It will examine justifications for government participation in resource allocation, income distribution, and economic stabilization focusing primarily on the fiscal functions of government, taxation and public expenditure. Students will apply basic microeconomic analysis to analyze the impacts of public taxation and expenditures on economic decisions made elsewhere in the economy. In this course the emphasis will be on understanding the workings of public finance in fiscal federalist systems like the United States, but the principles taught will be applicable across other economic systems. Prerequisites: ECON 2120G or ECON 2120H

ECON 335V. Business and Government**3 Credits (3)**

Relation of government to business through regulation; political, legal, and social implications. Crosslisted with: MGMT 335G

ECON 336. Labor Economics**3 Credits (3)**

This course aims at developing students' understanding of how the labor market works. Topics to be covered include: labor supply and demand, wage differentials, wage structure, unemployment, gender issues, labor market discrimination, and migration. Prerequisites: ECON 2120G or ECON 2120H

ECON 337V. Natural Resource Economics**3 Credits (3)**

Gain insight into important natural resource problems of our time. Apply economic principles to problems in the preservation, use, and development of agricultural, range, mineral, water, forestry, fishery, and environmental resources. Understand the use of cost-benefit analysis for government natural-resource projects, policies, and programs. Same as AEEC 337V.

Prerequisite: ECON 1110G or ECON 2120G or ECON 2120H.

ECON 345. Energy Economics**3 Credits (3)**

Examines the economics of energy production including oil, coal, natural gas, renewables, and conservation as a substitute for energy production. Emphasis is on federal and state regulatory framework, and resulting public policy issues from a regional and national perspective.

Prerequisite(s): (ECON 2110G or ECON 2110H), (ECON 2120G or ECON 2120H).

ECON 384V. Water Resource Economics**3 Credits (3)**

Use of economic principles to evaluate current and emerging issues in water resources. Applications focus on use of economic methods of analysis to current policy decisions surrounding agricultural, municipal, industrial, and environmental uses of water. Same as AEEC 384V.

Prerequisite: AEEC 1110 or ECON 2120G or ECON 2120H.

ECON 404. Collegiate Advisory Board, Federal Reserve**3 Credits (3)**

Students serve on the Collegiate Advisory Board of the El Paso branch of the Federal Reserve Bank of Dallas. Guest speakers provide an overview of the Federal Reserve System, role of monetary policy, and issues facing specific industries in the local, national, and global economies. Students prepare reports, including a final paper, on an assigned industry in the regional or state economy and the current economic performance of their industry. Students must be of junior rank or higher with a GPA of at least 3.5. Consent of Instructor required.

ECON 405. Introductory Econometrics**3 Credits (3)**

Multiple regression and correlation applied to economics and business; inference techniques; significance tests; simultaneous equations, estimation, and problems.

Prerequisite(s): MATH 1350G or A ST 311 (or equivalent).

ECON 432V. Economics of Health Care**3 Credits (3)**

Analysis of the allocation of resources in the field of health and medical care.

ECON 445. Oil and Natural Gas Economics**3 Credits (3)**

Examines the economics of oil and gas production. Topics covered include transportation, refining, federal and state regulatory framework, and resulting public policy issues from a regional and national perspective.

Prerequisite(s): ECON 345.

ECON 449. Open Economy Macroeconomics**3 Credits (3)**

This course studies theoretical and empirical macroeconomics in international dimension. It covers from the fundamental concepts of national income and growth, monetary/fiscal and exchange rate policies, foreign exchange markets, international trade and finance, and regionalization/economic integration to the impact analysis of these macroeconomic fundamentals in the open economy. Crosslisted with: I B 449.

Prerequisite(s): BFIN 341 OR ECON 311.

ECON 450. International Economics**3 Credits (3)**

Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations. Crosslisted with: I B 450

Prerequisite(s): ECON 2110G or ECON 2110H and ECON 2120G or ECON 2120H.

ECON 457. Mathematical Economics**3 Credits (3)**

Application of mathematical tools, especially the calculus, to economic theory.

Prerequisite(s): MATH 1430G or equivalent.

ECON 471. Electricity Economics**3 Credits (3)**

Regulatory policy and economic analysis related to the Electric Industry. Topics include characteristics of a utility and legal justification for regulation; characteristics and functions of a regulatory commission; history and structure of the industry; technology and network design; revenue requirements; cost allocation; and basic retail rate design. Crosslisted with: ECON 571.

Prerequisite(s): ECON 345.

ECON 489. Senior Economics Seminar**3 Credits (3)**

Seminar primarily for economics majors in their final semester. Provides an opportunity to apply economic theory to a broad variety of topics.

Prerequisite(s): ECON 311 or ECON 312.

ECON 490. Selected Topics**1-3 Credits**

Current topics in economics. Subject matter to be designated for each semester.

ECON 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head. May be repeated for a maximum of 3 credits.

Prerequisite: junior or above standing and consent of instructor.

ECON 503. Managerial Economics**3 Credits (3)**

Theory and application of microeconomics to the management of organizations.

Prerequisite(s): MATH 1350G or A ST 311 or equivalent with B or better.

ECON 545. Econometrics II**3 Credits (3)**

Application of statistical techniques to estimation of economic relationships: demand functions, production and cost functions, and macroeconomic equations.

Prerequisite(s): ECON 457 and AEEC 540.

ECON 550. Special Topics**1-3 Credits**

Seminars in selected current topics in the various areas of economics. Prerequisites vary according to the topic being offered.

ECON 571. Regulatory Policy and Industry Analysis: Electricity I**3 Credits (3)**

Regulatory policy and economic analysis related to the Electric Industry. Topics include: characteristics of a utility and legal justification for regulation; characteristics and functions of a regulatory commission; history and structure of the industry; technology and network design; revenue requirements; cost allocation; and basic retail rate design.

ECON 572. Regulatory Policy and Industrial Analysis: Water and Natural Gas**3 Credits (3)**

Regulatory policy and economic analysis related to the Natural Gas and Water industries. Topics include: history and structure of the industry; technology and network design; revenue requirements; cost allocation; and retail rate design.

ECON 573. Regulatory Policy and Industry Analysis: Electricity II**3 Credits (3)**

Regulatory policy and economic analysis related to the Electric industry. Topics include: optimal generation mix; ancillary services; environmental policies; rate case procedures and strategies for effective testimony; advanced retail rate design; wholesale exchanges; unbundled transmission tariffs; market institutions and how different markets function; state and federal deregulation policies; Federal Energy Regulatory Commission orders and policies; demand-side management; and regulatory treatment of non-traditional retail services. Consent of instructor required.

Prerequisite(s): ECON 571 or consent of instructor.

ECON 574. Advanced Seminar Regulatory Policy and Industry Analysis**3 Credits (3)**

Advanced seminar and writing course specializing in regulatory policy and regulatory casework. Topics Include: special policy & regulatory issues in telecommunications, electricity, natural gas, and water; preparation of written testimony; expert witness effectiveness including cross-examination; and contested case management. This course involves extensive reading and writing assignments. Consent of instructor required.

Prerequisite(s): ECON 571 or consent of instructor.

ECON 581. International Economics**3 Credits (3)**

Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations.

Prerequisite(s): ECON 311 and ECON 312.

ECON 582. Economics of Health Care**3 Credits (3)**

Analysis of the allocation of resources in the field of health and medical care. Taught with ECON 432V with differentiated assignments for graduate students.

ECON 596. Independent Study**3 Credits (3)**

Individual study program. Each offering will cover a subtitle. Maximum of 3 credits in a semester and 6 credits in a program. Consent of instructor required.

EDLT-EDUCATIONAL TECHNOLOGY

EDLT 2110. Integrating Technology with Teaching**3 Credits (3)**

Considers impact of technology on communication and knowledge development; engages students in the design of technology-integrated lessons with a constructivist approach.

Learning Outcomes

1. Students will demonstrate a sound understanding of technology operations and concepts.
2. Students will plan and design effective learning environments and experiences supported by technology.
3. Students will implement curriculum plans that include methods and strategies for applying technology to maximize learning.
4. Students will apply technology to facilitate a variety of effective assessment and evaluation strategies.
5. Students will use technology to enhance their productivity and professional practice.
6. Students will better understand the social, ethical, legal, and human issues surrounding the use of technology on PreK-12 schools and apply that knowledge into future practice.

EDLT 368. Integrating Technology with Teaching**3 Credits (3)**

Considers impact of technology on communication and knowledge development; engages students in the design of technology-integrated lessons with a constructivist approach.

EDLT 520. Critical Digital Literacy**3 Credits (3)**

Explore, evaluate and use a variety of multimedia authoring tools including website, video, audio, image editing and apps (iOS/Android) for educational applications. Prerequisite(s)/Corequisite(s): EDUC 518

EDLT 522. Technology and Language Learning**3 Credits (3)**

Use of technology to enhance second language and dual language programs. Organized around technology enhanced communicative and interactive language learning environments. May be repeated up to 3 credits.

EDLT 528. Foundations of Learning Design & Technology**3 Credits (3)**

This course covers how to access, use, design, and evaluate instructional resources on the Internet, for blended and online learning environments.

Learning Outcomes

1. Provide a rationale for using a systematic approach to learning design. Identify and summarize the major elements commonly included in instructional development models. Define terms used to describe the phases and strategies of the learning design process. Conduct a needs assessment. Demonstrate the following competency in the completion of an instructional development project: a) identify an instructional problem, b) analyze learners and learning contexts, c) plan and implement a goal analysis, d) specify terminal and enabling learning objectives, e) design criterion measures, f) prepare appropriate testing instruments and procedures, g) select appropriate instructional strategies, h) select appropriate instructional media (delivery systems), i) construct a prototype product, j) plan and conduct formative evaluations, and k) specify revisions resulting from formative evaluation. Compare and contrast various instructional design perspectives and philosophies. Develop effective and efficient instructional products.

EDLT 560. Fostering Online Learning Communities**3 Credits (3)**

Examines theoretical and practical aspects of communication and collaboration and their impact on the formation of online learning communities for those teaching adults in higher education, business, or government settings.

EDLT 561. Social Media in Blended and Online Learning Environments**3 Credits (3)**

This course will explore the role of social media in online and blended learning environments through practical hands-on activities, critical dialogue, and collaborative projects which will prepare you to utilize social media personally and pedagogically.

EDLT 572. Emerging Models for Learning Design and Technology**3 Credits (3)**

Applies instructional strategy development supported by technology for classroom curriculum.

EDLT 573. Culturally Responsive Teaching with Technology**3 Credits (3)**

Use of inquiry and problem-based learning supported by computer-based applications. Critical analysis of multiple forms of electronic media.

Prerequisite(s)/Corequisite(s): EDUC 518

EDLT 575. Designing and Organizing Online Learning Environments**3 Credits (3)**

Explores the theories, models, approaches, technologies, and methods of online teaching and adult learning. Provides a foundation for examining the roles and characteristics of the online teacher and learner for those teaching adults in higher education, business, or government settings.

EDLT 577. Online Teaching and Learning**3 Credits (3)**

This course provides a survey of theories, models and methods used to design and delivery online education through the use of technologies in K-12, higher education, business/industry, and continuing education.

EDLT 578. Design and Delivery of Webconferences and Webinars**3 Credits (3)**

This course provides hands-on experiences with web conferencing and examines the theory and research of webconferencing's impact on teaching and learning.

EDLT 579. Universal Design in Online Course Design**3 Credits (3)**

Examines theory, practical application of strategies, and global and policy implications of universal design (UD) in online learning environments.

EDLT 580. Tools and Techniques for Online Teaching**3 Credits (3)**

Examines the theoretical and practical implications of various asynchronous and synchronous tools and their impact on teaching and learning through research and hands-on experience.

EDLT 581. Emerging Technology Tools and Techniques**3 Credits (3)**

This course examines the theory, research, and practice of emerging technologies for educational practice and their impact on online teaching and learning.

EDLT 590. Capstone**3 Credits (3)**

Explores a variety of online assessment and evaluation options with an emphasis on continual assessment and evaluation to improve teaching and learning.

EDLT 592. Directed Studies**3 Credits (3)**

Supervised academic work. Consent of Instructor required.

EDLT 607. Current Research in Learning and Technology**3 Credits (3)**

Explores models and methods for examining and researching the impact of technology on learning and education.

EDLT 610. Technology, Society, and Education**3 Credits (3)**

Same as EDUC 610.

EDLT 612. Advanced Fieldwork**3 Credits (3)**

Fieldwork in learning technologies provides opportunities to integrate theory and practice through research, teaching and/or development.

EDLT 620. Multimedia, Authoring and Curriculum Design**3 Credits (3)**

Explore, evaluate and use a variety of multimedia authoring tools including website, video, audio, image editing and apps (iOS/Android) for educational applications. Includes additional theoretical research component for doctoral students.

EDLT 628. Foundations of Learning Design & Technology**3 Credits (3)**

This course covers how to access, use, design, and evaluate instructional resources on the Internet, for blended and online learning environments. Includes a theoretical and research component for doctoral students.

Learning Outcomes

1. Provide a rationale for using a systematic approach to learning design. Identify and summarize the major elements commonly included in instructional development models. Define terms used to describe the phases and strategies of the learning design process. Conduct a needs assessment. Demonstrate the following competency in the completion of an instructional development project: a) identify an instructional problem, b) analyze learners and learning contexts, c) plan and implement a goal analysis, d) specify terminal and enabling learning objectives, e) design criterion measures, f) prepare appropriate testing instruments and procedures, g) select appropriate instructional strategies, h) select appropriate instructional media (delivery systems), i) construct a prototype product, j) plan and conduct formative evaluations, and k) specify revisions resulting from formative evaluation. Compare and contrast various instructional design perspectives and philosophies. Develop effective and efficient instructional products.

EDLT 633. Praxis and Reflexivity**3 Credits (3)**

Same as BLED 633, ECED 633, EDUC 633, RDG, 633. Consent of Instructor required.

EDLT 672. Emerging Models for Learning Design & Technology**3 Credits (3)**

Integration of technology into content areas. May be repeated up to 3 credits.

EDLT 677. Online Teaching and Learning**3 Credits (3)**

This course provides a survey of theories; models and methods used to design and deliver online education through the use of technologies in K-12, higher education, business/industry, and continuing education. Topics covered include accreditation, assessment, culturally responsive course design, current trends and best practices, hybrid and blended learning, learning management systems, online support services, social justice issues in online education, learner engagement, and retention. Crosslisted with: EDLT 577.

EDUC-EDUCATION

EDUC 1110. Freshman Orientation

1 Credit (1)

Introduction to the university and to the College of Education. Discussion of planning for individualized education program and field experience.

Restricted to Las Cruces campus only.

Learning Outcomes

1. Demonstrates knowledge of and uses theories, approaches, methods, and techniques for teaching, reading, writing, and other academic skills in English and the native language.
2. Demonstrates knowledge of and applies management techniques appropriate to classrooms containing students who have varying levels of proficiency and academic experience in both languages.
3. Community/Family Involvement
4. The bilingual teacher:
5. Recognizes the importance of parental and community involvement for facilitating the learner's successful integration to his/her school environment.
6. Demonstrates knowledge of the teaching and learning patterns of the students' home environment and incorporates these into the instructional areas of program.
7. Assessment
8. The bilingual teacher:
9. Assesses oral and written language proficiency in academic areas in both languages utilizing the results for instructional placement, prescription, and evaluation.
10. Evaluates the growth of the learner's native and second language in the context of the curriculum.
11. Continuously assesses and adjusts her or his own language use in the classroom in order to maximize learner comprehension and verbal participation

EDUC 1120. Introduction to Education

2 Credits (2)

Introduction to the historical, philosophical, sociological foundations of education, current trends, and issues in education; especially as it relates to a multicultural environment. Students will use those foundations to develop effective strategies related to problems, issues and responsibilities in the field of education. Restricted to Las Cruces campus only.

Learning Outcomes

1. Describe the teaching and learning of various American education settings including early childhood, elementary, middle school, high school, and special education.
2. Describe how teachers use educational theory and the results of research of students' learning.
3. Explain the techniques for establishing a positive and supportive environment in the classroom
4. Identify and describe instructional strategies supported by current research to promote thinking skills of all learners.
5. Recognize the teachers' role and responsibilities in an increasingly diverse, multicultural society.

EDUC 1140. Math for Paraprofessionals

3 Credits (3)

Applied math skills for paraprofessionals working with children.

Prerequisite: CCDM 103 N.

Learning Outcomes

1. Students will plan developmentally appropriate math activities for young children.
2. Students will plan adaptations to math activities for children with diverse abilities.
3. Students will demonstrate understanding of recent research in methods of teaching mathematics.
4. Students will demonstrate understanding of early childhood theories as they relate to the teaching of mathematics.
5. Students will demonstrate understanding of unique needs of children from diverse economic or cultural backgrounds.

EDUC 1150. Math for Paraprofessionals II**3 Credits (3)**

Applied math skills for paraprofessionals working under the direction of a teacher.

Prerequisite(s): EDUC 1140.

Learning Outcomes

1. Students will plan developmentally appropriate math activities for young children.
2. Students will plan adaptations to math activities for children with diverse abilities.
3. Students will demonstrate understanding of recent research in methods of teaching mathematics.
4. Students will demonstrate understanding of early childhood theories as they relate to the teaching of mathematics.
5. Students will demonstrate understanding of unique needs of children from diverse economic or cultural backgrounds.

EDUC 1185. Introduction to Secondary Education and Youth**3 Credits (3)**

Introductory course for students considering a career in secondary education. Includes historical, philosophical, and sociological foundations, program organization, critical dispositions, and understanding the context of schools and youth. Practicum required. Restricted to: Secondary Ed majors.

Traditional Grading with RR.

Learning Outcomes

1. Articulate the attributes of an education professional entering the field.
2. Differentiate and summarize the major educational philosophies and historical events that have influenced the progression of educational practice.
3. Describe the role of law in education with emphasis on the rights and responsibilities of teachers and learners.
4. Develop a preliminary personal philosophy of teaching and learning.
5. Discuss the characteristics and roles of the teacher, the student, and the school in today's education.
6. Identify effective teaching methods, instructional strategies and learning styles.
7. Evaluate the Lesson Planning Process using various lesson planning templates, formats, and rubrics.
8. Explain classroom management techniques.
9. Identify different types of diversity in the classroom environment.
10. 1Describe how learning differences are manifested in schools.
11. 1Describe how teachers use multiple methods of assessment to engage learners in their own growth, to monitor learner progress
12. 1Describe how teachers use multiple methods of assessment to modify instruction and inform decision making.
13. 1Identify the role of Standards and High Stakes Testing in the life of an educational professional
14. 1Complete 24 hours internship in a classroom, preferably a bilingual classroom.
15. 1Document and reflect on your observations throughout your internship.
16. 1Construct an individualized map to teacher licensure in the State of New Mexico.

EDUC 1995. Field Experience I**1 Credit (1)**

Introduction to public school teaching, school visits, classroom observations and discussion seminar.

Learning Outcomes

1. Demonstrate an understanding of personal attitudes and motivations for entering the field of education.
2. Identify effective teaching strategies that enhance student learning outcomes.
3. Identify classroom management techniques and learning styles.
4. Develop observational skills and reflective thinking skills.
5. Evaluate instructional methods that enhance upper level thinking skills in children.

EDUC 1996. Special Topics in Education**1 Credit (1)**

Supervised study in a specific area of interest. Each course shall be designated by a qualifying subtitle. May be repeated for a maximum of 9 credits.

Learning Outcomes

1. Varies

EDUC 1998. Internship I**3 Credits (3)**

Supervised experience in elementary education settings.

Learning Outcomes

1. Varies

EDUC 2710. Pre-Teacher Preparation**3 Credits (3)**

Assists students in developing the necessary competencies needed for acceptance to the Teacher Education Program. Course content includes basic skill development, test taking skills, and completion of teacher preparation packet. Maybe repeated for a maximum of 6 credits. Graded S/U. Community Colleges only.

Learning Outcomes

1. Investigate the process and requirements of the Teacher Education Program
2. Read critically about teacher's experiences and write brief reactions
3. Discuss philosophies of education and draft a written personal philosophy of education
4. Discuss the nature of education for students with diverse languages, cultures and abilities
5. Draft personal position statements concerning education for students with disabilities and diverse cultures

EDUC 2998. Internship II**3 Credits (3)**

Supervised experience in junior high settings.

Prerequisite: must be a co-op student.

Learning Outcomes

1. Varies

EDUC 302. Internship III**3 Credits (3)**

Student teaching in public school classroom according to major area of interest.

EDUC 315. Multicultural Education**3 Credits (2+2P)**

The conceptual manifestations of culture, race and ethnicity, class, gender, sexual orientation, exceptionalities, language, bilingualism, and global citizenship within the schooling process. May be repeated up to 3 credits. Crosslisted with: EDUC 317V.

EDUC 317V. Multicultural Issues in Society**3 Credits (3)**

Conceptual manifestations of culture, race, ethnicity, class, gender, exceptionalities, language, and bilingualism within and across society. Crosslisted with: EDUC 315.

EDUC 381. Secondary Field Experience**3 Credits (2+2P)**

Develop professional skills, dispositions, and understanding of secondary bilingual youth, content, and pedagogy through discussion seminar and interactions with public education mentor teachers. Focused observations, study of classroom language and culture, introduction to lesson planning and student assessment. Requires 32 hours of practicum field experience. Same as EDUC 303. May be repeated up to 3 credits. Crosslisted with: BLED 303.

EDUC 395. Special Topics in Education**1-3 Credits**

Offered under various subtitles in the Schedule of Classes. May be taken for a maximum of 3 cr. per semester and a total of 6 credits overall.

EDUC 402. Data Literacy and Assessment**3 Credits (3)**

Methods for selecting, constructing, and using multiple methods of assessment to monitor learner progress and improve student learning. Students will learn to analyze and use classroom and standardized assessment data to understand patterns and gaps in learning, to guide planning and instruction, and employ technology to support practice. May be repeated up to 6 credits.

EDUC 451. Methods of Teaching Elementary School Science**3 Credits (2+2P)**

Methods and materials for teaching elementary school science. Includes components of lessons and the use of multimedia. May be repeated up to 3 credits. Restricted to: TEP-EED majors.

Prerequisite(s): 9 hours of science from biology, chemistry, physics, and earth sciences, with no more than 3 hours from any one department.

EDUC 452. Methods of Teaching Elementary School Mathematics**3 Credits (3)**

Content, theories of cognition, and instructional approaches for the teaching of mathematics in the elementary grades.

Prerequisite(s): MATH 1134.

EDUC 454. Methods of Teaching Elementary School Social Studies**3 Credits (2+2P)**

Focus on social studies curriculum and instruction including student-centered approaches, active learning, educational technology, nontextual curriculum, integration, multicultural education, authentic assessment, and practical applications. May be repeated up to 3 credits. Restricted to: TEP-EED majors.

EDUC 460. Teaching Language Arts at the Middle and High School Level**3 Credits (2+2P)**

Implications of cognition and language development for appropriate secondary instructional practices. Focus on construction of meaning, student-centered response to literature, writing process, print and oral language development, based on socio-psycholinguistic research and theory. Practicum required. Same as EDUC 560. May be repeated up to 3 credits. Restricted to: TEP-SED majors.

EDUC 461. Teaching Social Studies at the Middle and High School Level**3 Credits (2+2P)**

Integrating content knowledge and pedagogy for the middle and high school teacher in social studies. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of social studies. Practicum required. Same as EDUC 561. May be repeated up to 3 credits. Restricted to: TEP-SED majors.

EDUC 462. Teaching Mathematics at the Middle and High School Level**3 Credits (2+2P)**

Integrating content knowledge and pedagogy for the middle and high school teacher in mathematics. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of mathematics. Practicum required. Same as EDUC 562. May be repeated up to 3 credits. Restricted to: TEP-SED majors.

EDUC 463. Teaching Science at the Middle and High School Level**3 Credits (2+2P)**

Integrating content knowledge and pedagogy for the middle and high school teacher in science. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of science for students in grades 6-12. Practicum required. Same as EDUC 563. May be repeated up to 3 credits. Restricted to: TEP-SED majors.

EDUC 470. Elementary Student Teaching**9 Credits (9)**

Synthesis of knowledge and skills appropriate to teaching in elementary schools. May be repeated up to 9 credits. Restricted to: TEP-EED majors. Graded: S/U Grading (S/U, Audit).

EDUC 471. Secondary Student Teaching**9 Credits (9)**

Synthesis of knowledge and skills appropriate to teaching in secondary schools. May be repeated up to 9 credits. Restricted to: TEP-SED majors. Graded: S/U Grading (S/U, Audit).

EDUC 475. Contemporary Issues in Education**3 Credits (2+2P)**

Discussion of contemporary issues including: classroom management, motivation, conferences, professional organizations, professional ethics, community influences, cultural pluralism, reform movements, instructional influences, and educational technology. Requires field experience component in a school or community setting. Same as EDUC 575. May be repeated up to 3 credits. Restricted to: TEP-SED majors.

EDUC 476. Science for Educators**3 Credits (3)**

This course will focus on the exploration of key central science concepts and how to connect learners to resources, tools of inquiry, and collaborative problem solving related to authentic local and global issues in classroom, lab, and digital science environments. Topics include: The nature of science, Physical Science, Life Science, Earth and Space Science.

EDUC 480. International Student Teaching Seminar**1 Credit (1)**

Preparation for students planning to teach in an international setting.

Prerequisite: Must be scheduled one semester before graduation.

EDUC 481. Elementary Student Teaching Seminar**3 Credits (3)**

Discussion of elementary school issues related to student teaching. Taken concurrently with EDUC 470. May be repeated up to 3 credits. Restricted to: TEP-EED majors.

EDUC 482. Middle and High School Student Teaching Seminar**3 Credits (3)**

Discussion of secondary school issues related to student teaching. Taken concurrently with EDUC 471. May be repeated up to 3 credits. Restricted to: TEP-SED majors.

EDUC 489. Topics**1-3 Credits**

Offered under various subtitles which indicate the subject matter to be covered. A maximum of 3 credits in any one semester and a grand total of 3 credits. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: TEP-SPED majors.

EDUC 495. Directed Study Courses in Education**1-3 Credits**

Each course shall be identified by a qualifying subtitle. Maximum of 3 credits in any one semester and a grand total of 6 credits.

EDUC 501. Special Topics**1-3 Credits**

Course subtitled in the Schedule of Classes. A maximum of 3 credits per semester and a total of 6 credits overall.

EDUC 505. Classroom Management**3 Credits (3)**

Strategies for managing classroom settings and determining appropriate modification of instructional approaches to meet changing classroom situations.

EDUC 509. Teaching Methods Laboratory**3 Credits (3)**

Practical application of previously learned content.

Prerequisite(s): Bachelors degree and admission to the Graduate School and departmental special program.

EDUC 510. Internship/Student Teaching**3 Credits (3)**

Integrated with EDUC 509. Student is assigned to an elementary or secondary classroom for 14-16 weeks. Elementary or secondary.

Prerequisite(s): EDUC 509.

EDUC 515. Multicultural Education**3 Credits (2+2P)**

Conceptual manifestations of culture, race, and ethnicity, class, gender, exceptionalities, language and bilingualism within the schooling process. Same as EDUC 315 with differentiated assignments for graduate students.

EDUC 516. Curriculum and Pedagogy I**3 Credits (3)**

Introduction, reconstruction, and other connections among historical, philosophical, sociocultural, psychological, and theoretical foundations of curriculum and pedagogy and their application to culturally and linguistically diverse teaching and learning settings.

EDUC 518. Technology and Pedagogy**3 Credits (3)**

Critical analysis, design, and evaluation of computer-based technologies in teaching and learning for diverse communities. May be repeated up to 3 credits.

Prerequisite(s): Graduate standing.

EDUC 519. Research in Curriculum and Pedagogy**3 Credits (3)**

An introduction to qualitative and quantitative designs for research in curriculum and instruction, with emphasis on action research.

EDUC 520. Action Research Projects**3 Credits (3)**

Deeper explorations and connections among foundations of curriculum and pedagogy and their application to culturally and linguistically diverse teaching and learning settings through action research projects, approaches to assessment, and agency.

Prerequisite: EDUC 515, EDUC 519.

Learning Outcomes

1. Understanding of Action Research Develop an Action Research plan: Question Development; Data collection plan; Analysis Analysis to Action for teaching: Applying data results to planning; Decision-making for changes in teaching
2. Presentation of Research: Research writing process

EDUC 530. Exploration in Education**3 Credits (3+3P)**

Overview of elementary and secondary schooling. Includes opportunities to gain teaching experience in diverse settings.

EDUC 537. Independent Readings**1-3 Credits**

Each project will be designated by a qualifying subtitle.

EDUC 550. Methods of Teaching Early Childhood Education**3 Credits (3)**

Characteristics of the young child, play, guidance, communication, methods, materials, models, issues. Same as EDUC 450 with differentiated assignments for graduate students.

EDUC 551. Methods of Teaching Elementary School Science**3 Credits (2+2P)**

Methods and materials for teaching elementary school science. Includes components of lessons, planning and teaching lessons in schools, and multimedia. Students should have 9 hours of science from biology, chemistry, physics, and earth science with no more than 3 hours from any one department to enroll in this course. Same as EDUC 451 with differentiated assignments for graduate students.

Corequisite(s): ECED 550; EDUC 552; RDG 560.

EDUC 552. Methods of Teaching Elementary School Mathematics**3 Credits (2+2P)**

Content, theories of cognition, and instructional approaches for the teaching of mathematics in the elementary grades. Same as EDUC 452 with differentiated assignments for graduate students.

Prerequisite(s): MATH 1134.

Corequisite(s): ECED 550; EDUC 551; RDG 560.

EDUC 553. Methods of Teaching Elementary School Language Arts**3 Credits (2+2P)**

Implications of language acquisition and development for instructional practices. Focus on student-centered response to literature, writing process, whole language learning, based on socio-psycholinguistic theory and research. Same as EDUC 453 with differentiated assignments for graduate students.

Corequisite(s): EDUC 554; EDUC 555; RDG 561.

EDUC 554. Methods of Teaching Elementary School Social Studies**3 Credits (2+2P)**

Focus on social studies curriculum and instruction including student-centered approaches, active learning, educational technology, nontextual curriculum, integration, multicultural education, authentic assessment, and practical applications. Same as EDUC 454 with differentiated assignments for graduate students.

Corequisite(s): EDUC 553; EDUC 555; RDG 561.

EDUC 557. Science and Math Methods: Internship**3 Credits (3)**

Elementary alternative licensure process course designed to introduce intern licensed teachers to methods of instruction for mathematics and science. University supervision provided simultaneously with EDUC 557. Restricted to CI and HSS non-degree students.

EDUC 558. Social Studies/Language Arts Methods Internship**3 Credits (3)**

Elementary alternative licensure process course designed to introduce intern licensed teachers to methods of instruction of social studies and language arts. University supervision provided simultaneously with EDUC 558. Restricted to CI and HSS non-degree students.

EDUC 560. Teaching Language Arts at the Middle and High School Level**3 Credits (2+2P)**

Implications of cognition and language development for appropriate secondary instructional practices. Focus on construction of meaning, student-centered response to literature, writing process, print and oral language development, based on socio-psycholinguistic research and theory. Practicum required. Same as EDUC 460 with differentiated assignments for graduate students. Prerequisite(s): TEP required EDUC 515 & EDUC 530.

EDUC 561. Teaching Social Studies at the Middle and High School Level**3 Credits (2+2P)**

Integrating content knowledge and pedagogy for the middle and high school teacher in social studies. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of social studies for student in grades 6-12. Practicum required. Same as EDUC 461 with differentiated assignments for graduate students. Prerequisite(s): TEP required EDUC 515 & EDUC 530.

EDUC 562. Teaching Mathematics at the Middle and High School Level**3 Credits (2+2P)**

Integrating content knowledge and pedagogy for the middle and high school teacher in mathematics. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of students in 6-12 setting settings for mathematics. Same as 462 with differentiated assignments for graduate students.

Prerequisite(s): TEP required EDUC 515 & EDUC 530.

EDUC 563. Teaching Science at the Middle and High School Level**3 Credits (2+2P)**

Integrating content knowledge and pedagogy for the middle and high school teacher in science. The focus will be on a variety of instructional strategies and pedagogical skills that will enhance the learning of science for student in grades 6-12. Practicum required. Same as EDUC 463 with differentiated assignments for graduate students.

Prerequisite(s): TEP required EDUC 515 & EDUC 530.

EDUC 571. Elementary Mathematics Development I**3 Credits (3)**

Understanding of the research on elementary development of mathematics and its application in the classroom. Focus on how elementary students come to understand counting, the base 10 number system, and connections between early number understanding, geometric representations, fractions, and operations in later grades. Course assignments require working with elementary students. Consent of Instructor required. Restricted to: Master of Arts in Education: Elementary Mathematics and Science majors.

Learning Outcomes

1. To put current research on elementary students' development of mathematics into practice. To analyze student thinking to construct models of cognitive structures. To select, sequence, and administer tasks to test models of students' cognitive structures. To develop and facilitate a classroom lesson plan to build on models of students' cognitive structures. To reflect on observations of student learning in relation to current research on elementary students' development of mathematics.

EDUC 572. Elementary Mathematics Development 2**3 Credits (3)**

Understanding of the research on elementary development of science and its application in the classroom. Focus on how elementary students come to understand topics in the physical sciences, life sciences, and earth and space sciences. Includes applications to engineering and technology.

Course assignments require working with elementary students. Consent of Instructor required. Restricted to: Master of Arts in Education: Elementary Mathematics and Science majors.

Learning Outcomes

1. To put current research on elementary students' development of science into practice. To analyze student thinking to construct models of cognitive structures. To select, sequence, and administer tasks to test models of students' cognitive structures. To develop and facilitate a classroom lesson plan to build on models of students' cognitive structures. To reflect on observations of student learning in relation to current research on elementary students' development of science.

EDUC 573. Elementary Science Development**3 Credits (3)**

Understanding of the research on elementary development of science and its application in the classroom. Focus on how elementary students come to understand topics in the physical sciences, life sciences, and earth and space sciences. Includes applications to engineering and technology.

Course assignments require working with elementary students. Consent of Instructor required. Restricted to: Master of Arts in Education: Elementary Mathematics and Science majors.

Learning Outcomes

1. To put current research on elementary students' development of science into practice. To analyze student thinking to construct models of cognitive structures. To select, sequence, and administer tasks to test models of students' cognitive structures. To develop and facilitate a classroom lesson plan to build on models of students' cognitive structures. To reflect on observations of student learning in relation to current research on elementary students' development of science.

EDUC 577. Leadership Advocacy in Elementary Mathematics and Science**3 Credits (3)**

This course focuses on development of elementary mathematics and science specialists' leadership qualities necessary to promote and advocate for positive change through active participation with other professionals and in their own professional growth that draws upon current research in their respective fields, development of professional development programs, evaluation of educational structures that impact equitable access to high quality instruction, and communication with stakeholders directly and indirectly associated with education institutions. Consent of Instructor required. Restricted to: Master of Arts in Education: Elementary Mathematics and Science majors.

Learning Outcomes

1. To leverage current research on elementary students' development of mathematics science to enact change in teaching practice and education policy. To make use of leadership skills to facilitate discussion with education stakeholders, school and district administrators, and teaching professionals. To make use of leadership skills to collaborate with education stakeholders, school and district administrators, and teaching professionals. To examine current mathematics and science teaching practice within a school or district and create a professional development plan that aligns with current research on best practices. To examine current mathematics and science teaching practice within a school or district and create a professional development plan that aligns with district and/or school mission and vision.

EDUC 590. TESOL Practicum**3 Credits (3)**

Classroom applications of ESL literacy development through supervised teaching experiences accompanied by a seminar. Same as RDG 590.

EDUC 595. Directed Study Courses in Education**1-3 Credits**

Each course will be identified by a qualifying subtitle. Maximum of 3 credits in any one semester and a total of 6 credits overall.

EDUC 597. Capstone Research Project**1-3 Credits (1-3)**

Capstone project. Maximum of 3 credits per semester and a total of 6 credits overall. Consent of Instructor required. Restricted to: Admittance into the Master of Arts in Education: Elementary Mathematics and Science program; Instructor Approval Needed majors.

Learning Outcomes

1. To investigate a problem or issue in education. To communicate results of the investigation in a scholarly manner.

EDUC 598. Special Research Programs**1-3 Credits**

Individual investigations either analytical or experimental. Maximum of 3 credits per semester and a total of 6 credits overall.

EDUC 599. Master's Thesis**15 Credits**

Thesis.

EDUC 600. Doctoral Research**1-15 Credits**

Research.

EDUC 601. Contemporary Curriculum/Instruction Practices**1-3 Credits**

Course subtitled in the Schedule of Classes. A maximum of 3 credits per semester and a total of 6 credits overall.

EDUC 602. Internship in Curriculum and Instruction**3-6 Credits**

For those pursuing an advanced graduate degree to meet the requirement for field work. Each course to bear an appropriate subtitle.

EDUC 603. Curriculum for a Diverse Society**3 Credits (3)**

Builds upon knowledge of the foundations of curriculum and professional experience in an educational setting. Focus on the role of the curriculum leader in understanding curriculum theory, designing curriculum, and implementing curriculum in various settings.

EDUC 604. Pedagogy of Learning in a Diverse Society**3 Credits (3)**

Builds upon knowledge of the foundations of instruction and professional experience in teaching and learning. Focus on diverse theories of instruction with relevant practices in pluralistic settings and multicultural interactions of teaching and learning.

EDUC 605. Independent Study Topics**1-3 Credits**

A problem and seminar course for those pursuing an advanced graduate degree. Course subtitled in the Schedule of Classes.

EDUC 606. Qualitative Research I**3 Credits (3)**

This course offers an examination of qualitative research approaches used in educational and social settings, with a focus upon research design, field relations, data collection and analysis, and writing from a qualitative perspective. May be repeated up to 3 credits.

EDUC 607. Current Research in Educational Practice**3 Credits (3)**

A seminar for doctoral and education specialist students emphasizing current research and educational practices. Same as BLED 607, ECED 607, RDG 607, and SPED 607.

EDUC 608. Issues in Multicultural Curriculum and Instruction and Teacher Education**3 Credits (3)**

Builds upon multicultural theories and practices of teacher education. Restricted to doctoral-level students of any major.

EDUC 613. Evaluation of Quantitative Research in Education**3 Credits (3)**

A doctoral-level exploration of a broad range of quantitative research designs and methodologies for collection and analysis of data as applied to critical review of the literature. May be repeated up to 3 credits.

EDUC 623. Curricular Mediation for Democratic Communities**3 Credits (3)**

Problematization of the various relationships, roles, and leadership considerations which emerge within educational institutions, their structures, and their culturally democratic practices in the classroom, community, and society. Restricted to doctoral-level students of any major. Same as BLED 623, ECED 623.

EDUC 630. Critical Race Theory & Storytelling in Educational Spaces**3 Credits (3)**

An upper-level doctoral course focusing on the philosophical, theoretical, and methodological origins and practices of CRT and the sister frameworks that emerged from CRT, i.e., AsianCrit, BlackCrit, FemCrit, LatCrit, QueerCrit, TribalCrit, and WhiteCrit within educational spaces.

EDUC 633. Praxis and Reflexivity**3 Credits (3)**

The cyclical research processes of continuous self and systemic (re)evaluation vis-a-vis classroom, community, and society with an eye toward reflection, growth, change, and larger forms of social agency. Restricted to doctoral-level students of any major. Same as BLED 633, ECED 633, EDLT 633, RDG 633.

EDUC 634. Research as Praxis**3 Credits (3)**

Alternative community-or-school-based research aimed at investigating and transforming educational realities, with the participants for their own benefit. Students will experience the dynamic between research theory and practice in education. Crosslisted with: BLED 634, EDLT 634 and RDG 634. Restricted to: EDUC, C I, C ID majors.

Prerequisite(s): EDUC 576 and EDUC 613.

EDUC 635. Critical Theory and Pedagogy**3 Credits (3)**

Covers the various schools of thought on pedagogy, the historical and philosophical foundations embedded in these schools, and their impact on educational settings. Restricted to doctoral-level students of any major. Same as BLED 635.

EDUC 636. Advanced Statistics**3 Credits (3)**

An intermediate course focusing on more advanced theories and techniques of inferential statistics as applied to education and psychology. Includes ANOVA, planned contrasts, ANCOVA, simple regression, and non-parametrics. A computer package will be the primary tool for data analysis. Crosslisted with: CEPY 636.

Prerequisite(s): EDUC 613 or equivalent course work.

EDUC 637. Social Justice Issues in Education**3 Credits (3)**

Covers the systems of oppression located within the constructs of power and hegemony and their impact on schooling. Restricted to doctoral-level students of any major. Same as BLED 637.

EDUC 685. Practicum**2-6 Credits**

Provision for field inquiries and experiences designed to prepare the doctoral student for assuming responsibilities in the areas of curriculum and instruction.

Prerequisite: post-master's standing.

EDUC 694. Dissertation Seminar**3 Credits (3)**

Dissertation seminar course for doctoral students utilizing a qualitative research design. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: C ID, EDUC majors.

EDUC 698. Selected Topics**1-6 Credits**

Offered under various subtitles which indicate the subject matter to be covered. A maximum of 6 credits per semester and a total of 6 credits overall.

EDUC 699. Ed.S. Thesis**1-15 Credits**

Offered primarily for those pursuing the research requirements for the Ed.S. degree. Course may be repeated up to a maximum allowed for this degree. Each research project will be designated by a qualifying subtitle.

EDUC 700. Doctoral Dissertation**1-15 Credits**

Dissertation.

ELAD-EDUCATIONAL LEADERSHIP ADMINISTRATION

ELAD 2210. Leadership and Change in Education

3 Credits (3)

This course will introduce students to the challenges and key strategies in initiating, implementing, and sustaining educational change and reform. In the first part of the course, participants will learn about the challenges of educational change in the United States and the role that they as school leaders play in facilitating change and reform. The course continues with an examination of how culture, micro-politics, and power structures support or impede national and global change initiatives. The last part of the course offers suggestions for change agents including community organizing, culture building, and embracing sustainable leadership practices. Participants will learn how to apply the change theories and concepts introduced in the course to practice through course readings, online discussions with the instructor and colleagues, group work, active examination of daily practice in schools, and personal reflection.

Learning Outcomes

1. Students will be able to communicate in clear manners that articulate, convey and deepen the understandings others have of issues affecting their communities.
2. Students will be able to collaborate on democratic processes.
3. Students will be able to communicate engage in critical social analysis and how the status quo fits into a larger movement for social change.

ELAD 2340. Multicultural Leadership in Education

3 Credits (3)

Introduction to the social and cultural constructions of gender, class, and race. Students will critically apply theoretical constructs to everyday life and discuss the intersection of gender and race with class inequality in national and global contexts. Using a social justice framework, readings, and assignments integrate a variety of racial/ethnic groups while considering the effects of historically uneven resource distribution, unearned privilege, forms of domination and subordination, immigration status, and cultural representation and ideologies. Participants will learn how to apply the change theories and concepts introduced in the course to practice through course readings, online discussions with the instructor and colleagues, group work, active examination of daily practice in schools, and personal reflection.

Learning Outcomes

1. Students will develop awareness of their own social identities.
2. Students will recognize differences among various communities, perspectives, and world-views.
3. Students will describe how privilege and biases impact our communities and systems.
4. Students will create meaningful peer-to-peer relationships.
5. Students will understand the impact of their actions on community members.
6. Students will identify their leadership skills to shape social change on and off campus.
7. Students will act on opportunities to promote social change.
8. Students will use academic resources including advising, computers, printing, library, and space.

ELAD 2996. Special Topics in Educational Leadership

1-3 Credits (1-3)

Special topics course in education for undergraduate students. Course will be identified by a subtitle. May be repeated up to 12 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. Students will be able to engage in systems thinking which aids in seeing how individual situations are shaped by a broader contexts
2. Students will be able to understand how to apply theoretical frameworks for understanding social problems.
3. Students will be able to help develop leadership capacity in others.
4. Students will be able to gain an understanding of cultural competence, which recognizes that diverse perspectives strengthen the dialogue and approaches to solving social problems.

ELAD 342. Current Issues In Educational Leadership

3 Credits (3)

This course addresses issues such as the rise in international education, education's costs, social media's role and influence, changes in state and national funding trends, student and faculty/staff diversity, among others. The focus of this course is centered on the actions and responses of administrators to the current issues they are facing.

ELAD 350V. Introduction to Educational Leadership in a Global Society

3 Credits (3)

Multinational educational systems covered through knowledge of the U.S. system of education promoting critical leadership roles every citizen plays in the success of educational systems.

ELAD 398. Special Topics in Education**1-3 Credits (1-3)**

Special topics course in education for undergraduate students. Course will be identified by a subtitle. May be repeated for a maximum of 12 credits.

ELAD 411. Foundation for School Library Specialists**3 Credits (3)**

Elements of librarianship. Introduction to the history, purpose, and role of the school library. Overview of current issues and legislation affecting school libraries. Same as ELAD 511. May be repeated up to 3 credits.

ELAD 412. Administration of the School Library**3 Credits (3)**

Principles and practices related to the function, structure, and management of school libraries. Same as ELAD 512. May be repeated up to 3 credits.

ELAD 413. Curriculum Role of the School Library Specialist**3 Credits (3)**

Introduction to the integration of curriculum in school library programs. Current trends in collaborative planning and teaching between the school librarians and teachers. Taught with ELAD 513. May be repeated up to 3 credits.

ELAD 414. Collection Management and Development in School Libraries**3 Credits (3)**

Principles of identifying, selecting, acquiring, managing, and evaluating information for school libraries. Same as ELAD 514. May be repeated up to 3 credits.

ELAD 440. Management of Student Services**3 Credits (3)**

History and overview of student services (e.g., admissions, counseling, registration, financial aid, housing, food services, student organizations) for early entry level positions. This course will provide students with an examination of foundations and principals of student services. Important theories and essential competencies needed in order to be successful will be explored through a social justice perspective of leadership.

ELAD 450. Principles of Education Law and Policy**3 Credits (3)**

Overview of the use of law and policy in schools and higher education. May be repeated up to 3 credits. Restricted to: E AD, majors.

ELAD 455. Principles of Education Budgeting and Finance**3 Credits (3)**

Analysis of budget and finance practices in education. Restricted to: E AD majors.

ELAD 485. Elements of Research**3 Credits (3)**

This course provides students with a foundation for understanding educational research. The course will also provide grounding in proper writing format for use in the education profession. Students will be introduced to various research paradigms and the symbiosis of theory and practice. Besides introducing students to the symbiosis of theory and practice, students will complete assignments and activities that demonstrate the use of that symbiosis. Ultimately, students will be able to use the knowledge they gain through the course to be able to critique educational research.

ELAD 499. Internship**3 Credits (3)**

The undergraduate Educational Leadership major requires that students complete two internships. Internships provide students with either experience working in an area of administration that is different from the student's regular job or experience conducting research for a program or project. Each internship placement site and scope of work is determined through consultation with the course instructor. Students must complete 120 hours of work with the selected internship site. May be repeated up to 6 credits.

Prerequisite(s): Student must be an E AD major and be within (at least) one year of graduation.

ELAD 502. Special Problems.**1-3 Credits**

Offered under various subtitles which indicate the subject matter covered. May be taken for a maximum of 3 credits per semester and a total of 6 credits overall. May be repeated up to 6 credits. Consent of Instructor required.

ELAD 511. Foundation for School Library Specialists**3 Credits (3)**

Elements of librarianship. Introduction to the history, purpose, and role of the school library. Overview of current issues and legislation affecting school libraries. Same as ELAD 411. May be repeated up to 3 credits.

ELAD 513. Curriculum Role of the School Library Specialist**3 Credits (3)**

Introduction to the integration of curriculum in school library programs. Current trends in collaborative planning and teaching between school librarians and teachers. Same as ELAD 413. May be repeated up to 3 credits.

ELAD 514. Collection Management and Development in School Libraries**3 Credits (3)**

Principles of identifying, selecting, acquiring, managing, and evaluating information for school libraries. Same as ELAD 414. May be repeated up to 3 credits.

ELAD 520. Management of Educational Change: Higher Education**3 Credits (3)**

Leadership in implementing innovations in education in higher education. The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to: E AD majors.

Prerequisite: 3.0 GPA or better.

Learning Outcomes

1. Student will gain the insight into how the structure of schools in the United States impacts the success or failure of educational change. Student will understand the role of implementing or resisting educational change efforts

ELAD 530. Management of Educational Change: Public Schools**3 Credits (3)**

Leadership in implementing innovations in education. The course must be passed with a grade of "B" or higher. Consent of instructor required.

Restricted to E AD majors.

Prerequisite: 3.0 GPA or better.

Learning Outcomes

1. Students will gain insight into how the structure of schools in the United States impacts the success or failure of educational change and reform.
2. Students will understand the role of implementing or resisting educational change efforts

ELAD 531. Special Education Administration**3 Credits (3)**

Competencies for the administration of special education programs with an emphasis upon New Mexico public school standards. The course must be passed with a grade of "B" or better. Consent of Instructor required. Restricted to E AD majors.

Prerequisite: 3.0 GPA or better.

Learning Outcomes

1. Knowledge of interactive systems and sub-systems and the influence of internal and external environments on the supervisory and improvement processes. Understanding of research and effective professional development practices tied to curriculum, improvement of instructional delivery and student achievement.

ELAD 540. Management of Student Services in Higher Education**3 Credits (3)**

History and overview of student services (e.g., admissions, counseling, registration, financial aid, housing, food services, student organizations) and a review of management components used in student services. The course must be passed with a grade of "B" or higher. Consent of Instructor required.

Restricted to E AD majors.

Prerequisite: 3.0 GPA or better.

Learning Outcomes

1. Explain the origins of student services in relationship to social and historical events
2. Describe the theoretical foundations and development of student services.
3. Evaluate the organizational and administrative models for the delivery of student services programs.

ELAD 550. Higher Education Law**3 Credits (3)**

This course is designed to review the impact of the legal process and the judiciary on higher education. The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to E AD majors.

Prerequisite: 3.0 GPA or better.

Learning Outcomes

1. Analyze the options on policy issues using the statutes, cases, regulations, and legislative history as their tool.
2. Evaluate legal developments in higher education.
3. Synthesis legal trends in their particular area of professional interest.

ELAD 555. Higher Education Finance and Funding**3 Credits (3)**

This course examines the impact and process of financing and funding higher education. The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to E AD majors.

Prerequisite: 3.0 GPA or better.

Learning Outcomes

1. Identify opportunities to use research and individual projects to explore issues related to issues of topics of interest
2. Describe the ways in which budget and finance skills are important to administrators in college and university settings
3. Distinguish how financial and budgetary issues vary with respect to state, private, and various funding sources within higher education

ELAD 563. Higher Education Administration**3 Credits (3)**

This course provides an overview of higher education in the United States including history, mission, and governance, in the context of organizational theory. The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to E AD majors.

Prerequisite: 3.0 GPA or better.

Learning Outcomes

1. Understand the purpose of higher education and how this purpose has changed and affected various types of community colleges and universities and groups of people
2. Consider how organization, governance, and finance in higher education vary by institutional type, control and mission
3. Gain familiarity with major issues facing U.S. higher education

ELAD 564. Internship Public Schools Part I**3 Credits (3)**

First half of a practical internship in Pk-12 schools under supervision of school administrator. The course must be passed with a grade of "B" or higher. Consent of Instructor required. 3 years of Pk-12 teaching experience required. Restricted to: E AD majors. .

Prerequisite: 18 cr. of ELAD course work; 3.0 GPA or better.

Learning Outcomes

1. A clear understanding of the roles and responsibilities of the school leader in an adaptive, culturally diverse and changing environment
2. Provide a platform for prospective leaders to analytically reflect on the complexity of ethical cases in which the school administrator is likely to confront in the scope of his/her administrative career in public education

ELAD 565. Internship: Public Schools Part II**3 Credits (3)**

Second half of a practical internship in Pk-12 administrative setting under supervision of experienced higher education administrator. Internship site determined by class instructor and graduate student. The class must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to: E AD majors.

Prerequisite: ELAD 564; 3.0 GPA or better.

Learning Outcomes

1. A understanding of the roles and responsibilities of the school leader in an adaptive, culturally diverse and changing environment.
2. Provide a platform for prospective leaders to analytically reflect on the complexity of ethical cases in which the school administrator is likely to confront in the scope of his/her administrative career in public education.

ELAD 566. Internship: Higher Education Part I**3 Credits (3)**

First half of practical internship in administrative setting under supervision of experienced higher education administrator. Internship site determined by class instructor and graduate student. The course must be passed with a grade of "B" or higher. Restricted to: E AD majors.

Prerequisite: 15 credits of ELAD coursework and consent of instructor; .

Learning Outcomes

1. Understand the roles and responsibilities of the school leader in an adaptive, culturally diverse and changing environment Will provide a platform for leaders to analytically reflect on the complexity of ethical cases in which the administrator will confront in the scope of administrative role

ELAD 567. Internship: Higher Education Part II**3 Credits (3)**

Second half of a practical internship in an administrative setting under supervision of an experienced higher education administrator. Internship placement determined by class instructor and graduate student. The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to: E AD majors.

Prerequisite: ELAD 566; 3.0 GPA or better; .

Learning Outcomes

1. Enhance knowledge and practice of higher education administration, keeping in mind that experiences should provide opportunities for thoughtful examination of the diversity of the ways and manners in which office supervisors and staff conduct their work. Provide practical experience and opportunity to examine and apply learned theoretical concepts within a supportive, supervised environment. Develop skills related to higher education management and leadership.

ELAD 568. Topics in School Administration**1-3 Credits**

Designated by subtitle.

ELAD 569. Basing Decision on Data: Higher Education.**3 Credits (3)**

Analysis of accountability data and other evidence to support educational decision making. Disaggregating and interpreting assessment data to guide improvement of instruction. Moving from evidence to plans for action. The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to E AD majors.

Prerequisite: 3.0 GPA or higher; .

Learning Outcomes

1. Participants will understand the importance of using assessment data in
2. decision-making and identify reasons why these skills are important to educational leaders in college and university settings.
3. Participants will evaluate the assessment structure of one institution or department in higher education, using a criteria-based measurement tool (rubric).
4. Participants will reflect on possibilities of using assessment data to further social justice outcomes in higher education.

ELAD 570. Educational Leadership, Supervision, and Evaluation**3 Credits (3)**

Leadership, supervision, and evaluation in Pk-12 and post secondary education. The course must be passed with a grade of "B" or better. Consent of Instructor required. Restricted to E AD majors

Prerequisite: 3.0 GPA or higher; .

Learning Outcomes

1. To acquire a basic knowledge of the processes, persons, and practices of educational leadership and supervision.
2. To develop personalized understandings of leadership and supervisory roles.
3. To relate leadership and supervision theory to practice.
4. To develop a concept of good administrative/supervisory practice.
5. To develop a diverse awareness of leadership and supervisory issues and techniques.

ELAD 572. History and Philosophy of Education**3 Credits (3)**

An overview of the historical development of the American school system and the relation of various philosophies to American education.

ELAD 575. The Principalship**3 Credits (3)**

Key issues surrounding the role of school-site leaders. The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to E AD majors.

Prerequisite: 3.0 GPA or better; .

Learning Outcomes

1. Students will examine the complexities of school leadership.
2. Students will create a school culture representative of their own core values.
3. Students will assess the role and importance of the principal in facilitating change, managing conflict, promoting an active anti-racist environment, celebrating diversity, and establishing accountability for all students' learning.

ELAD 576. Educational Financial Management**3 Credits (3)**

Educational finance and business applications. The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to E AD majors.

Prerequisite: 3.0 GPA or better; .

Learning Outcomes

1. Understand and be able to use and explain to lay people the technical language used to discuss education finance issues.
2. Analyze, interpret, and present financial data, trends, and issues to various publics served by the schools and outline possible actions and their implications

ELAD 578. Leadership and Administration of Bilingual Education**3 Credits (3)**

Concepts and practical approaches to improving the education of English languages learners through higher education. The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to E AD majors.

Prerequisite: 3.0 GPA or higher; .

Learning Outcomes

1. Examine the complexity and overarching issues encompassing the role of the school leader as it pertains to the broader and narrower goals of bilingual education
2. Develop critical understandings of educating equitably, involving the development and sustainability of bilingual education programs which focus on making schooling meaningful and comprehensible for the millions of children whose home languages are different from the dominant language of school and society

ELAD 579. Public School Law**3 Credits (3)**

Legal processes of education, major court decisions, and the legislative process will be studied. The course must be passed with a grade of "B" or better. Consent of Instructor required. Restricted to E AD majors.

Prerequisite: 3.0 GPA or better; .

Learning Outcomes

1. Understand the critical issues involved in applying the law fairly and justly
2. Understand the complex nature of the federal, state, and local authority levels as they relate to applying statutory and constitutional law

ELAD 580. Administration of Adult and Continuing Education**3 Credits (3)**

Administration of programs in public schools, higher education, community and nontraditional educational settings. The class must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to E AD majors.

Prerequisite: 3.0 GPA or higher; .

Learning Outcomes

1. Analyze adult education theory and the intersection of social justice to inform adult education program planning.
2. Assess the needs of specific populations for adult education programming

ELAD 582. Community College Administration**3 Credits (3)**

An overview of the history, role, objectives and patterns governing the effectiveness of the community college. The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to E AD majors.

Prerequisite: 3.0 GPA or better; .

Learning Outcomes

1. Understand the purpose of higher education and how this purpose has changed and affected various types of community colleges and universities and groups of people;
2. Consider how organization, governance, and finance in higher education vary by institutional type, control, and mission;

ELAD 585. Elements of Research**3 Credits (3)**

Survey and analysis of research methods and designs focusing on sound educational research and its presentation. The course must be passed with a grade of "B" or higher. Consent of Instructor required. Restricted to E AD majors.

Prerequisite: 3.0 GPA or better; .

Learning Outcomes

1. Explain the purpose of research
2. Analyze the need for research by practicing educational administrators
3. Describe the differences between qualitative research and quantitative research

ELAD 586. Leadership for Social Justice and Equity**3 Credits (3)**

Examine cultural diversity and how appropriate understanding, leadership and instructional strategies can be used to reach all learners. Enhances understanding of what it means to be an educator in culturally diverse contexts. The course must be passed with a grade of "B" or higher. Consent of instructor required. Restricted to E AD majors.

Prerequisite: 3.0 GPA or better, .

Learning Outcomes

1. Acquired knowledge of multicultural issues as they relate to race, ethnicity, class, and gender and how these factors intersect with current educational leadership trends; Developed a more multicultural perspective which will lead to greater awareness of the needs of culturally, linguistically, and socio-economically diverse students and an ability to develop/enhance an educational leadership lens designed to promote equity and access for all students;

ELAD 590. Basing Decision on Data: Pk-12**3 Credits (3)**

Analysis of accountability data and other evidence to support educational decision making. Disaggregating and interpreting assessment data to guide improvement of instruction. Moving from evidence to plans for action. The course must be passed with a grade of "B" or higher. Consent of instructor is required. Restricted to E AD majors.

Prerequisite: 3.0 GPA or better.

Learning Outcomes

1. Identify various types of data and their uses in decision-making Identify federal and state assessment programs, as well as local assessment requirements, and the policies that drive them Explain how data from multiple sources is used to inform decision making about student achievement

ELAD 595. Current Topics**1-6 Credits**

Offered under various subtitles which indicate the subject matter covered. May be taken for a maximum of 6 credits.

ELAD 598. Independent Studies**1-3 Credits**

Individual investigation in special topic areas. Requires prior approval of project advisor.

ELAD 600. Doctoral Research**1-15 Credits**

Research. S/U to traditional grade options. May be repeated up to 88 credits. Consent of Instructor required. Thesis/Dissertation Grading.

ELAD 615. Organizational Theory**3 Credits (3)**

The overarching objectives of this class is to prepare educational leaders who comprehend the complexities of educational organizations, especially those with significant underrepresented populations; to initiate or maintain leaders' commitment to educational programs that embrace all learners; and to promote within leaders an understanding of the necessity of upholding social justice, primarily as it applies to issues, such as race, ethnicity, class, ability, religion, and gender. Consent of Instructor required. Restricted to: E AD majors.

ELAD 620. Doctoral Seminar**1-3 Credits**

A study of current issues in educational administration at the national, state, and local levels. May be repeated up to 6 credits. Consent of Instructor required.

ELAD 622. Quantitative Research I**3 Credits (3)**

Explores quantitative research methods, the rationale and assumptions that guide statistical decisions, beginning level statistical analyses, and how all of these are applied in the field of educational leadership. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

ELAD 623. Qualitative Research I**3 Credits (3)**

Explores qualitative research methods and models and their application in the field of educational leadership. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

ELAD 630. Concepts of Leadership in Education**3 Credits (3)**

Survey of concepts of leadership in general and educational leadership in particular. Consideration of implications for practice. May be repeated up to 3 credits. Consent of Instructor required.

ELAD 635. Scholarly Writing and the Southwest Border**3 Credits (3)**

This course is designed to provide doctoral-level students with an opportunity to engage with scholarly and academic writing in a meaningful manner. Scholarly writing and academic writing are often used interchangeably. They will be used in that manner for this course. Generally defined, academic writing refers to a particular style of expression that researchers use to define the intellectual boundaries of their disciplines and their areas of expertise. Scholarly writing is the specific genre of writing that is used in all academic fields. For this course, the scholarly writing is contained to the context of the Southwest Border and Borderland issues. This is designed in consideration of and relates to the Department and Program's mission, which takes into account social justice and border education issues. Additionally, the course will cover topics associated with scholarly writing that include, but not limited to: formal language, tone, precision, clarity, word choice, and assumptive statements versus research-supported rationale. Consent of Instructor required. Restricted to: E AD majors.

ELAD 645. The Professoriate**3 Credits (3)**

The purpose of this course is to explore the body of scholarly knowledge and research appropriate for the study of American higher education, the context in which teaching and learning occurs, and faculty's roles in the process. We will discuss the number, variety, and purpose of the various types of institutions; the different roles that faculty members play within these institutions; how faculty work is assessed and valued within the outside of the university; administrative regulations related to faculty work; current issues related to the general state of the professoriate; as well as how does one prepare to enter the professoriate.

ELAD 650. Higher Education Law**3 Credits (3)**

This advanced course is designed to review the impact of the judiciary on higher education. The legal standing of institutions of higher education on issues of staff rights, student rights, and tort liability will be addressed. In addition, the impact of local ordinances, state and federal laws and regulations will be examined. Consent of Instructor required.

ELAD 655. Higher Education Finance and Funding**3 Credits (3)**

This advanced course examines the impact and process of financing and funding higher education. The course is an examination of higher education finance as it relates to operational budgets, capital budgets, and policy issues which impact the financing of higher education. Consent of Instructor required.

ELAD 670. Advanced Internship**1-6 Credits**

For those pursuing an advanced degree to meet the field work requirement. To bear an appropriate subtitle. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: E AD majors. Graded: S/U Grading (S/U, Audit).

ELAD 671. Foundations of Educational Administration**3 Credits (3)**

Advanced course about the political, economic, and social forces on policy making and governance of Pk-12 and postsecondary education. May be repeated up to 3 credits. Consent of Instructor required.

ELAD 676. Educational Financial Management**3 Credits (3)**

This advanced course offers an overview of economic and financial concerns relating to the public school system of the United States. Consent of Instructor required.

ELAD 679. Public School Law**3 Credits (3)**

Advanced course in which the legal processes of education, major court decisions, and the legislative process will be studied. Consent of Instructor required.

ELAD 682. Quantitative Research II**3 Credits (3)**

Intermediate quantitative methods of research, statistical analyses, and their application in the field of educational leadership. May be repeated up to 3 credits. Consent of Instructor required. Restricted to Doctoral students only.

Prerequisite(s): ELAD 622.

ELAD 683. Qualitative Research II**3 Credits (3)**

Advanced qualitative methods of research and implementation in the field of educational leadership. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): ELAD 623.

ELAD 685. Elements of Research**3 Credits (3)**

Advanced survey and analysis of research methods and designs focusing on sound educational research and its presentation. Consent of Instructor required.

ELAD 689. Evaluation Design in Education**3 Credits (3)**

Advanced course that focuses on evaluation and accountability models; application to educational programs. Consent of Instructor required.

ELAD 693. Dissertation Seminar**3 Credits (3)**

Same as CEPY, EDUC, SPED 693. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Consent of Instructor required.

ELAD 698. Selected Topics**1-6 Credits**

Offered under various subtitles which indicate the subject matter covered. May be repeated up to 6 credits.

ELAD 700. Doctoral Dissertation**1-9 Credits**

Dissertation. Minimum of 3 credits per regular semester. May be taken for a maximum of 36 credits. Consent of instructor required.

ELT - ELECTRONICS TECHNOLOGY

ELT 103. Math Study Skills for Electronics**1 Credit (1)**

Covers specific math study skills and critical thinking processes to reinforce practical applications of math and its use with electronics. The student will be introduced to electronic mathematical formulas during the problem-solving steps required for circuit analysis. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): E T 183 OR E T 184. Restricted to Community Colleges only.

ELT 105. Basic Electricity and Electronics**3 Credits (2+2P)**

Fundamentals of electricity and electronics, basic circuit devices, meters, transistors, integrated circuits and other solid state devices, computers, fiber optics, and industrial application topics. Minimum math proficiency of CCDM 103 or CCDM 104 required or math placement into CCDM 114 or higher. Restricted to: Community Colleges only. Crosslisted with: AERT 111

ELT 110. Electronics I**4 Credits (3+3P)**

Fundamentals of electronics including: components, schematics, Ohm's law, Thevenin's and Norton's theorems, and series/parallel circuits incorporating passive, active and magnetic elements. Introduction to AC circuits. Crosslisted with: AERT123. Restricted to: Community Colleges only.

ELT 120. Mathematics for Electronics**4 Credits (4)**

Includes fundamental mathematics, algebra, sine, cosine, and other elementary functions as they specifically apply to the operation, manipulation, and evaluation of direct current (DC) and alternating current (AC) circuits. Minimum math proficiency of CCDM 114 required or math placement into MATH 1215 or higher. Restricted to: Community Colleges only. Crosslisted with: AERT 124

ELT 135. Electronics II**4 Credits (3+3P)**

Analysis of AC circuits, filters, and resonance. Introduction to solid state fundamentals including diodes and rectifier circuits, voltage regulators, various transistors and transistor characteristics, amplification and amplifiers, photoelectric effects, gates and timing circuits. Restricted to Community Colleges campuses only.

Prerequisite(s): ELT 110 and ELT 120.

ELT 155. Electronics CAD and PCB Design**3 Credits (2+2P)**

Introduction to and the use of commercially available CAD software covering schematic representation of electronic components and circuits. Printed circuit board layout techniques including proper schematic capture, netlist generation, design rule checking and manual routing covered.

ELT 160. Digital Electronics I

4 Credits (3+3P)

Number systems, codes, Boolean algebra, logic gates, Karnaugh maps, combination circuits, flip-flops, and digital troubleshooting techniques.

Restricted to: Community Colleges only.

Prerequisite(s): ELT 110 and (ELT 120 or MATH 1215).

ELT 175. Soldering Practices

3 Credits (2+2P)

Methods and techniques of hand soldering in the production of high quality and reliable soldering connections. Restricted to: Community Colleges only.

ELT 205. Semiconductor Devices

4 Credits (3+3P)

Analysis and trouble shooting of linear electronic circuits including amplifiers, op-amps, power supplies, and oscillators. Restricted to: Community Colleges only.

Prerequisite(s): ELT 110 and ELT 135.

ELT 215. Microprocessor Applications I

4 Credits (3+2P)

Fundamentals of microprocessor architecture and assembly language with an emphasis on hardware interfacing applications.

Prerequisite(s)/Corequisite(s): ELT 235. Prerequisite(s): ELT 160. Restricted to: Community Colleges only.

ELT 220. Electronic Communication Systems

4 Credits (3+2P)

Principles and applications of circuits and devices used in the transmission, reception, and processing of RF, microwave, digital and telecommunications systems.

Prerequisite(s)/Corequisite(s): ELT 205. Prerequisite(s): ELT 135. Restricted to: Community Colleges only.

ELT 221. Cooperative Experience I

1-6 Credits

Supervised cooperative work program. Student is employed in an approved occupation and supervised and rated by the employer and instructor.

Student will meet in a weekly class. Graded S/U.

Prerequisite: consent of instructor.

ELT 222. Cooperative Experience II

1-6 Credits

Continuation of ELT 221. Maximum of 6 credits. Graded S/U.

Prerequisite: consent of instructor.

ELT 225. Computer Applications for Technicians

3 Credits (2+2P)

An overview of computer hardware, software applications, operating systems, high level programming languages and networking systems.

ELT 230. Microprocessor Applications II

4 Credits (3+2P)

Advanced microprocessor interfacing techniques. Topics in A/D and D/A conversion, I/O port address decoding, direct memory accessing, and peripheral device interfacing applications.

Prerequisite: ELT 215.

ELT 235. Digital Electronics II

3 Credits (2+2P)

Sequential logic circuits, latches, counters, shift-registers, fault analysis and troubleshooting of digital IC s, multiplexers, timers, encoders/decoders, arithmetic circuits, pulse shaping, and memory devices. Restricted to: Community Colleges only.

Prerequisite(s): ELT 160.

ELT 240. Introduction to Photonics

4 Credits (3+2P)

Nature of light, light emitters, lasers, detectors, fiber optics communications systems, and other applications of light to electronics.

Prerequisite: ELT 135 or consent of instructor.

ELT 245. Radar: Principles and Applications**3 Credits (3)**

Explores the principles of operation for microwave radar applications and supporting subsystems.

Prerequisite: E T 246.

Learning Outcomes

1. Students will analyze the various factors that comprise the Radar Equation and apply the equation in calculations for various scenarios. Students will explain the principles of Moving Target Indication, Pulse Doppler, Phased Array, and Synthetic Aperture Radars, and their advantages and disadvantages. Students will analyze and calculate the effects of clutter and environmental noise, earth surface scattering, and atmospheric attenuation, diffraction, and refraction on radar propagation. Students will analyze the performance of supporting radar subsystems, including transmitters, receivers, antennas, tracking servos, and signal processing. Students will explain the kinds of information that can be obtained from radar signals and perform calculations associated with range determination, target motion resolution, and error. Students will explain the use of telemetry, and correlate test radar and telemetry measurements. Students will explain and compare radar countermeasures and analyze their effect on radar return cross-sections.

ELT 250. Electronics Systems Analysis**2 Credits (1+3P)**

Capstone course emphasizing a systems approach to troubleshooting and maintaining complex electronics systems. Includes program review in preparation for technician certification.

Prerequisite: consent of instructor.

ELT 260. Instrumentation Control and Signal Conditioning**4 Credits (3+2P)**

Introduction to sensors and transducers, signal conditioning and transmission for measuring and process control systems. Includes AD, DA converter, small servos and actuators. Prerequisite:ELT 205.

ELT 265. Special Topics**1-6 Credits**

Topic to be announced in the Schedule of Classes.

ELT 270. Biomedical Equipment Instrumentation**4 Credits (3+2P)**

Principles and applications of electronic circuits and devices used in biomedical equipment. Skills taught to include evaluating, troubleshooting and repairing various types of medical equipment.

Prerequisite(s)/Corequisite(s): ELT 260. Prerequisite(s): ELT 205. Restricted to: Community Colleges only.

ELWK-ELECTRICAL LINEWORKER

ELWK 130. Introduction to Electrical Power Systems**2 Credits (2)**

An overview of electrical power systems, equipment, safety practices, first aid and CPR. May be repeated up to 2 credits. Students must be accepted into the electrical lineworker program before enrolling in this course. Restricted to: OEET majors. Restricted to Community Colleges campuses only.

Corequisite(s): OEET 110,OEET 131.

ELWK 131. Electrical Lineworker Lab I**6 Credits (12P)**

Climbing and work on utility poles using ropes and rigging, pole setting and an introduction to transmission and distribution line construction.

Maintenance and troubleshooting to include the use of hot sticks. May be repeated up to 6 credits. Students must be accepted into the electrical lineworker program before enrolling in this course. Restricted to: OEET majors. Restricted to Community Colleges campuses only.

Corequisite(s): OEET 110,OEET 130.

ELWK 140. Electrical Power Systems II**3 Credits (2+2P)**

Theory of power generation and distribution with emphasis on three phase systems to include transformers, voltage regulators, surge arrestors. Includes troubleshooting. May be repeated up to 3 credits. Students must be accepted into the electrical lineworker program before enrolling in this course.

Restricted to: OEET majors. Restricted to Community Colleges campuses only.

Corequisite(s): OEET 141.

ELWK 141. Electrical Lineworker II**6 Credits (12P)**

Practice in the installation of electrical power lines including transformers, voltage regulators, and surge arrestors. Also advanced hot sticking procedures, troubleshooting, underground systems procedures, and pole-top rescue. May be repeated up to 6 credits. Students must be accepted into the electrical lineworker program before enrolling in this course. Restricted to: OEET majors. Restricted to Community Colleges campuses only.

Corequisite(s): OEET 140.

ELWK 221. Cooperative Experience I**1-4 Credits (1-4)**

Supervised cooperative work program. Student is employed in an approved occupation and is supervised and rated by the employer and instructor. Student will meet in a weekly class. May be repeated up to 4 credits. Consent of Instructor required. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

Prerequisite(s): Consent of instructor.

ENGL-ENGLISH

ENGL 1105M. Intermediate ESL Composition and Grammar Review**3 Credits (3)**

Development of fluent academic writing skills, with an emphasis on grammar review for editing purposes. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

Prerequisite(s): Placement based on English language screening test, and either a minimum TOEFL score of 500 or consent of instructor.

ENGL 1110G. Composition I**4 Credits (4)**

In this course, students will read, write, and think about a variety of issues and texts. They will develop reading and writing skills that will help with the writing required in their fields of study and other personal and professional contexts. Students will learn to analyze rhetorical situations in terms of audience, contexts, purpose, mediums, and technologies and apply this knowledge to their reading and writing. They will also gain an understanding of how writing and other modes of communication work together for rhetorical purposes. Students will learn to analyze the rhetorical context of any writing task and compose with purpose, audience, and genre in mind. Students will reflect on their own writing processes, learn to workshop drafts with other writers, and practice techniques for writing, revising, and editing.

Prerequisite: ACT standard score in English of 16 or higher, or an Accuplacer score 250 or higher, or an SAT score of 400 or higher or CCDE 1110 N.

Learning Outcomes

1. Analyze communication through reading and writing skills.
2. Employ writing processes such as planning, organizing, composing, and revising.
3. Express a primary purpose and organize supporting points logically.
4. Use and document research evidence appropriate for college-level writing.
5. Employ academic writing styles appropriate for different genres and audiences.
6. Identify and correct grammatical and mechanical errors in their writing

ENGL 1110H. Composition I Honors**4 Credits (4)**

In this course, students will read, write, and think about a variety of issues and texts. They will develop reading and writing skills that will help with the writing required in their fields of study and other personal and professional contexts. Students will learn to analyze rhetorical situations in terms of audience, contexts, purpose, mediums, and technologies and apply this knowledge to their reading and writing. They will also gain an understanding of how writing and other modes of communication work together for rhetorical purposes. Students will learn to analyze the rhetorical context of any writing task and compose with purpose, audience, and genre in mind. Students will reflect on their own writing processes, learn to workshop drafts with other writers, and practice techniques for writing, revising, and editing. Individualized assignments and independent study.

Prerequisite: ACT standard English score of 25 or higher, or an SAT score of 550 or higher.

Learning Outcomes

1. Analyze communication through reading and writing skills.
2. Employ writing processes such as planning, organizing, composing, and revising.
3. Express a primary purpose and organize supporting points logically.
4. Use and document research evidence appropriate for college-level writing.
5. Employ academic writing styles appropriate for different genres and audiences.
6. Identify and correct grammatical and mechanical errors in their writing.

ENGL 1110M. Composition I Multilingual**4 Credits (4)**

In this course, students will read, write, and think about a variety of issues and texts. They will develop reading and writing skills that will help with the writing required in their fields of study and other personal and professional contexts. Students will learn to analyze rhetorical situations in terms of audience, contexts, purpose, mediums, and technologies and apply this knowledge to their reading and writing. They will also gain an understanding of how writing and other modes of communication work together for rhetorical purposes. Students will learn to analyze the rhetorical context of any writing task and compose with purpose, audience, and genre in mind. Students will reflect on their own writing processes, learn to workshop drafts with other writers, and practice techniques for writing, revising, and editing. For international and multilingual students. Your instructor and classmates will serve as your readers and will give you helpful and constructive criticism, which will in turn assist you in becoming a more fluent and engaging communicator in English. Restricted to Las Cruces campus only.

Prerequisite(s): CBT/PB score of 500, or IBT score of 61, or SPCD 110, or consent of instructor.

Learning Outcomes

1. Analyze communication through reading and writing skills.
2. Employ writing processes such as planning, organizing, composing, and revising.
3. Express a primary purpose and organize supporting points logically.
4. Use and document research evidence appropriate for college-level writing.
5. Employ academic writing styles appropriate for different genres and audiences.
6. Identify and correct grammatical and mechanical errors in their writing.

ENGL 1120. Composition II**2 Credits (2)**

In this course, students will explore argument in multiple genres. Research and writing practices emphasize summary, analysis, evaluation, and integration of secondary sources. Students will analyze rhetorical situations in terms of audience, contexts, purpose, mediums, and technologies and apply this knowledge to their reading, writing, and research. Students will sharpen their understanding of how writing and other modes of communication work together for rhetorical purposes. The emphasis of this course will be on research methods.

Prerequisite: successful completion of ENGL 1110G or ENGL 1110H or ENGL 1110M.

Learning Outcomes

1. Analyze the rhetorical situation for purpose, main ideas, support, audience, and organizational strategies in a variety of genres.
2. Employ writing processes such as planning, organizing, composing, and revising.
3. Use a variety of research methods to gather appropriate, credible information.
4. Evaluate sources, claims, and evidence for their relevance, credibility, and purpose.
5. Quote, paraphrase, and summarize sources ethically, citing and documenting them appropriately.
6. Integrate information from sources to effectively support claims as well as other purposes (to provide background information, evidence/examples, illustrate an alternative view, etc.).
7. Use an appropriate voice (including syntax and word choice).

ENGL 1410G. Introduction to Literature**3 Credits (3)**

In this course, students will examine a variety of literary genres, including fiction, poetry, and drama. Students will identify common literary elements in each genre, understanding how specific elements influence meaning.

Learning Outcomes

1. Identify, define, and understand basic literary conventions and themes in fiction, poetry and drama.
2. Write reasonable, well-supported analyses of literature that ethically integrate evidence from texts

ENGL 2130G. Advanced Composition**3 Credits (3)**

This course is for students who are striving for fluency, maturity, clarity and significance in their writing. It is an intermediate writing course that builds on and refines writing skills acquired in previous courses. It focuses on non-fiction writing for the professions, business, science, technical fields, academe and/or the popular press. Short works of master writers are studied for ideas, style and structure.

Learning Outcomes

1. Students will examine and apply different writing styles and modes used by masters of personal essay and keep a reading response journal of assigned readings as demonstrated by scoring a 70% in faculty designed assignments.
2. Students will develop a sense of audience by discussing their papers with each other in small groups during class or by reading each other's papers and participating in positive, helpful peer reviews as demonstrated by scoring a 70% in faculty designed assignments.

ENGL 2210G. Professional & Technical Communication**3 Credits (3)**

Professional and Technical Communication will introduce students to the different types of documents and correspondence that they will create in their professional careers. This course emphasizes the importance of audience, document design, and the use of technology in designing, developing, and delivering documents. This course will provide students with experience in professional correspondence and communicating technical information to a non-technical audience.

Prerequisite(s): Grade of C- or better in ENGL 1110G or ENGL 1110H or ENGL 1110M.

Learning Outcomes

1. Choose professional communication appropriate for audiences and situations.
2. Write in different genres of professional communication.
3. Identify the purpose of a work-related communication and assess the audiences' informationa
4. I needs and organizational constraints.
5. Employ appropriate design/visuals to support and enhance various texts.
6. Demonstrate effective collaboration and presentation skills.
7. Integrate research and information from credible sources into professional communication

ENGL 2210H. Professional and Technical Communication Honors**3 Credits (3)**

Professional and Technical Communication writing for Crimson Scholars/Honors students will introduce students to the different types of documents and correspondence that they will create in their professional careers. This course emphasizes the importance of audience, document design, and the use of technology in designing, developing, and delivering documents. This course will provide students with experience in professional correspondence and communicating technical information to a non-technical audience. 3.5 GPA is also required. Restricted to Las Cruces campus only.

Prerequisite(s): grade of C- or better in ENGL 1110G or the equivalent; approval of the honors college.

Learning Outcomes

1. Choose professional communication appropriate for audiences and situations.
2. Write in different genres of professional communication.
3. Identify the purpose of a work-related communication and assess the audiences' informational needs and organizational constraints.
4. Employ appropriate design/visuals to support and enhance various texts.
5. Demonstrate effective collaboration and presentation skills.
6. Integrate research and information from credible sources into professional communication.

ENGL 2210M. Professional and Technical Communication for Multilingual Students**3 Credits (3)**

Professional and Technical Communication will introduce students to the different types of documents and correspondence that they will create in their professional careers. This course emphasizes the importance of audience, document design, and the use of technology in designing, developing, and delivering documents. This course will provide students with experience in professional correspondence and communicating technical information to a non-technical audience. NMSU specific description: In this course, students will explore the unique advantages and challenges of being multilingual writers. This course is designed for international and domestic multilingual students.

Prerequisite: Grade of C- or better in ENGL 1110G or ENGL 1110H or ENGL 1110M.

Learning Outcomes

1. Choose professional communication appropriate for audiences and situations.
2. Write in different genres of professional communication.
3. Identify the purpose of a work-related communication and assess the audiences' informational needs and organizational constraints. Employ appropriate design/visuals to support and enhance various texts.
4. Demonstrate effective collaboration and presentation skills.
5. Integrate research and information from credible sources into professional communication.

ENGL 2215G. Advanced Technical and Professional Communication**3 Credits (3)**

Theory and practice of writing in technical and professional fields, individualized to each student's field. Emphasizes efficient writing processes and effective written products. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

Prerequisite(s): Junior or above standing, or consent of instructor.

Learning Outcomes

1. To complicate the definition of "technical and scientific communication" and its relationship(s) to studying and practicing "rhetoric."
2. To complicate our relationship to concepts like "science", "knowledge", "objectivity," "neutrality," "clarity," etc.
3. To use a community-based approach to study and practice technical and scientific documents within various discourse communities.
4. To study and practice different genres (i.e. memos, letters, e-mails, reports, proposals, and instruction sets) attending to issues of audience and purpose within discourse communities.
5. To practice some mindful reading strategies that allow you to attend to the use of language and its material and discursive effects in different situations.
6. To examine the material effects of producing, circulating, and consuming technical and scientific texts on the bodies of people within different contexts.
7. To complicate our understanding of "ethics," "responsibility," and "accountability" toward ourselves and others.
8. To work collaboratively and individually to research, to analyze, and to write about public debates regarding the conduct of science and technology.
9. To understand and use basic principles of document design attending to issues of usability and accessibility.
10. 1 To articulate the relationship between technical and scientific communication and issues of inclusion and social justice in the world.

ENGL 2221G. Writing in the Humanities and Social Science**3 Credits (3)**

Theory and practice in interpreting texts from various disciplines in the humanities and social sciences. Strategies for researching, evaluating, constructing, and writing researched arguments. Course subtitled in the Schedule of Classes. May be repeated up to 3 credits.

Prerequisite(s): Grade of C- or better in ENGL 1110G or ENGL 1110H, or ENGL 1110M.

Learning Outcomes

1. Develop the ability to interpret and respond to humanities and social sciences texts
2. Analyze and evaluate cultural artifacts such as texts, images, and practices as a means of academic inquiry
3. Critique arguments offered in the readings to determine the underlying methodology as well as underlying values
4. Construct a rhetorical argument with evidence appropriate for an explicit audience and purpose
5. Use written, visual, or oral strategies to persuade, inform, or engage, considering situation, audience, purpose, aesthetics, and diverse points of view
6. Practice effective research strategies, and integrate research correctly and ethically from credible sources
7. Understand and apply components of the writing process such as planning, collaborating, organizing, composing, revising, and editing

ENGL 2280. History of Argument**3 Credits (3)**

Investigates the major figures and movements in rhetoric from the classical period to modern rhetorical theory, examining relations between rhetorical teaching and practice, culture, epistemology, and ideology. Main campus only. Prerequisite(s): ENGL 1110G, or ENGL 1110GH, or ENGL 1110M

Learning Outcomes

1. Understand how rhetoric, argument, and persuasion work. Become familiar with the key terms and various contexts in which rhetoric, argument, and persuasion function and the contingencies that influence their use and effectiveness;
2. be familiar with the broad history and major figures of western rhetoric;
3. apply a number of approaches used to analyze and construct/deconstruct rhetorical arguments, including (but not limited to) Aristotelian appeals and commonplaces, stasis theory, toulmin analysis, pentadic/dramatistic analysis, fallacy analysis, and rogerian analysis;
4. complete an analysis as well as design and present a project regarding a contemporary issue or concern about which you feel deep passion and commitment; and
5. Improve general critical thinking and communication skills, both oral and written.

ENGL 2310G. Introduction to Creative Writing**3 Credits (3)**

This course will introduce students to the basic elements of creative writing, including short fiction, poetry, and creative nonfiction. Students will read and study published works as models, but the focus of this "workshop" course is on students revising and reflecting on their own writing. Throughout this course, students will be expected to read poetry, fiction, and nonfiction closely, and analyze the craft features employed. They will be expected to write frequently in each of these genres.

Prerequisite(s): ENGL 1110G or ENGL 1110H or ENGL 1110M.

Learning Outcomes

1. Participate in a constructive conversation and community about creative writing.
2. Read and critically engage with a variety of texts.
3. Compose creative works in various genres of creative writing.
4. Provide respectful, honest, and critical feedback to peers about their work.
5. Revise creative work based on peer feedback and critique.
6. Develop thoughtful workshop reflection on students' own writing and writing process.
7. Evaluate and engage with publication process.

ENGL 2381. Script Development and Storyboarding**3 Credits (3)**

Examines effective writing principles for creating storyboards that communicate the overall picture of a project, timing, scene complexity, emotion and resource requirements. Crosslisted with: FDMA 2381.

Learning Outcomes

1. develop a story idea into a complete storyboard
2. describe and visualize the creative aspects of a media project from conception to completion
3. write a scene in the professional script format
4. deliver a professional verbal and visual presentation of a story idea to an audience
5. the ability to conceive, illustrate and plan a visual project
6. proficiency in oral, written, and visual communication via storyboarding, script writing and verbal
7. presentations

ENGL 2382. Narrative: Principles of Story Across the Media**3 Credits (3)**

Examines the various strategies of written and visual storytelling, narrative structure and its principal components (plot, theme, character, imagery, symbolism, point of view) with an attempt to connect them to elements of contemporary forms of media expression, including screenwriting, playwriting, writing for documentaries and animation, etc. Crosslisted with: FDMA 2382

Learning Outcomes

1. Identify use the building blocks of storytelling: plot, theme, character, imagery,
2. Symbolism and point of view
3. Develop these building blocks into a cohesive narrative within a written document
4. Effectively communicate in different written formats
5. Create design documents for varied genres of media: narrative short, documentary,
6. Animation, commercial/industrial video, computer game
7. Describe how a written narrative can be translated into a visual medium

ENGL 2520G. Film as Literature**3 Credits (3+3P)**

The purpose of this course is to teach students how to analyze film as a visual text. Students will learn to analyze films, film techniques, eras, and genres. Students will also identify significant trends and developments in film-making, examining the ways in which film reflects and creates cultural trends and values.

Learning Outcomes

1. Develop an understanding of the cultural, historical, and technical contexts for various films.
2. Identify, define, and analyze basic film techniques used in different genres and time periods.
3. Analyze how film uses literature by studying different sources of adaptation.
4. Demonstrate an understanding of film in its various aspects by writing film analysis, reviews, and/or other projects.

ENGL 2521. The Bible as Literature**3 Credits (3)**

Develops informed readings of Hebrew and Christian scriptures. Emphasizes understanding Biblical literary forms, techniques, themes; historical, cultural contexts for interpretation; authorship, composition, audience for individual books; development of Biblical canon.

Learning Outcomes

1. Develop and articulate historically informed and textually supported arguments regarding the form and meaning of biblical texts
2. Express arguments and explication in clear, organized,
3. Understand the Jewish and Christian scriptures as cultural artifacts, using some fundamental techniques of literary analysis and interpretation, especially: thematic interpretation, stylistic analysis, narrative analysis, poetics, and the rhetorical analysis of figurative language.
4. Use socio-historically informed interpretive methods focused on these fundamental contextual questions : 1) who probably wrote and edited these texts, 2) why and how they most likely did so, 3) how their earliest audiences probably responded to them, and 4) why and how they were later combined to form the canonical Jewish and Christian bibles read today.
5. Know in detail substantial selections of representative, influential, and historically informative biblical texts
6. Distinguish literary critical and historical analysis of the Bible from those based on faith, tradition, authority, and theology
7. Recognize, understand, and analyze the forms, genres, and techniques used by biblical authors
8. Become familiar with and be able to use essential knowledge of the historical, cultural, and geographical contexts of Biblical writing
9. Learn how evaluate texts as historical documents, as well as how doing so relates to and differs from literary critical analysis and interpretation
10. 1 Become familiar with common and influential scholarly, critical, and aesthetic ways of reading Biblical texts from a contemporary perspective
11. 1 Understand the cultural influence of the Bible and its relevance for other areas of scholarly and artistic work

ENGL 2610. American Literature I**3 Credits (3)**

This course surveys American literature from the colonial period to the mid-nineteenth century. This course provides students with the contexts and documents necessary to understand the origins of American Literature and the aesthetic, cultural, and ideological debates central to early American culture.

Learning Outcomes

1. Recognize the traditions of American literature and their connection to issues of culture, race, class, and gender.
2. Demonstrate familiarity with a variety of major works by American authors.
3. Explore the various influences and sources of American literature.
4. Apply effective analytic and interpretive strategies to American literary works using academic conventions of citation and style.

ENGL 2620. American Literature II**3 Credits (3)**

This course surveys American literature from the mid-nineteenth-century to the contemporary period. This course provides students with the contexts and documents necessary to understand American literature and the aesthetic, cultural, and ideological debates central to American culture.

Learning Outcomes

1. Recognize the traditions of American literature and their connection to issues of culture, race, class, and gender.
2. Demonstrate familiarity with a variety of major works by American authors.
3. Explore the various influences and sources of American literature.
4. Apply effective analytic and interpretive strategies to American literary works using academic
5. conventions of citation and style.

ENGL 2630. British Literature I**3 Credits (3)**

This course offers a study of British literature from its origins in Old English to the 18th century. This survey covers specific literary works--essays, short stories, novels, poems, and plays--as well as the social, cultural, and intellectual currents that influenced the literature.

Learning Outcomes

1. Read and discuss representative works of British writers from its origins in Old English to the 18th century to understand cultural and historical movements which influenced those writers and their works.
2. Identify the characteristics of various British literary genres, such as the essay, novel, short story, poetry, and dramatic literature.
3. Apply effective analytic and interpretive strategies to British literary works using academic conventions of citation and style.

ENGL 2640. British Literature II**3 Credits (3)**

This course offers a study of British literature from the 18th century to the present. This survey covers specific literary works--essays, short stories, novels, poems, and plays--as well as the social, cultural, and intellectual currents that influenced the literature.

Learning Outcomes

1. Read and discuss representative works of British writers from the 18th century to the present to understand cultural and historical movements, which influenced those writers, and their works.
2. Identify the characteristics of various British literary genres, such as the essay, novel, short story, poetry, and dramatic literature.
3. Apply effective analytic and interpretive strategies to British literary works using academic conventions of citation and style.

ENGL 2650G. World Literature I**3 Credits (3)**

In this course, students will read representative world masterpieces from ancient, medieval and Renaissance literature. Students will broaden their understanding of literature and their knowledge of other cultures through exploration of how literature represents individuals, ideas and customs of the world cultures. The course focuses strongly on examining the ways literature and culture intersect and define each other.

Learning Outcomes

1. Identify and comprehend key authors and literary works from ancient periods to the Enlightenment.
2. Understand each text's historical and cultural context.
3. Identify and analyze a variety of literary forms, including poetry, plays, and philosophical and religious texts.
4. Compare works from different cultures and historical periods examining genre, style, and content or theme.
5. Analyze how literary works reflect historical, national, cultural, and ethnic differences.

ENGL 2996. Special Topics**1-3 Credits**

Emphasis on a literary and/or writing subject chosen for the semester. Repeatable for a unlimited credit under different subtitles.

Learning Outcomes

1. Varies

ENGL 301. Theory and Criticism: Rhetoric and Culture**3 Credits (3)**

Introduction to rhetorical criticism with an emphasis on understanding the theoretical and cultural underpinnings for the rhetorical analyses of texts.

ENGL 302. Theory and Criticism: Literature and Culture**3 Credits (3)**

Introduction to literary criticism, from its classical beginnings through contemporary critical approaches.

ENGL 303. Theory and Criticism: Film, Media and Culture**3 Credits (3)**

Surveys classical and contemporary film theory. Explores the relationship of theory to textual analysis and filmmaking practices. Includes auteurism, semiotics, psychoanalysis, and other theories, as well as theories of other media.

ENGL 304. Creative Writing: Prose**3 Credits (3)**

Imaginative writing, chiefly prose narrative. Repeatable for a maximum of 9 credits.

ENGL 306. Creative Writing: Poetry**3 Credits (3)**

Introduction to the writing of poetry. Repeatable for a total of 9 credits.

ENGL 307. Creative Writing: Creative Nonfiction**3 Credits (3)**

Introduction to creative nonfiction. Skills emphasized will include the personal voice, powers of observation and reflection, advocacy, argument, and a creative, powerful use of language. Repeatable for a maximum of 9 credits.

ENGL 308. Creative Writing: Playwriting**3 Credits (3)**

Technique of one-act playwriting, and analysis of dramatic structure. Crosslisted with: THEA 308

ENGL 309. Screenwriting I**3 Credits (3)**

Writing intensive. Students learn the craft of screenwriting, honing skills in writing dialogue and visual narrative, crafting dynamic characters and dramatic action. Original student scripts will be performed and discussed in class. Consent of instructor required. Crosslisted with: CMI 309 and THTR 306

Prerequisite(s): ENGL 235 or CMI 235.

ENGL 310. Critical Writing**3 Credits (3)**

A course in critical reading, writing, and research designed to prepare English majors for upper-division courses.

ENGL 315. Writing for the Web**3 Credits (3)**

Introduction to writing for the World Wide Web through practical application and analysis on both theory and research. Allows hands-on learning in a computer classroom.

ENGL 321V. Modern European Drama**3 Credits (3)**

Masterworks of European drama from the late 18th century to present. Crosslisted with: THEA 321V

ENGL 322. Dramatic Character**3 Credits (3)**

How characters have been created for the stage from the beginning of theatrical performances in ancient Greece to the present day. Exploring characterization related to dramatic structure, style, and genre, and how dramatic characters differ from those in literary fiction. Crosslisted with: THEA 322.

ENGL 323. American Drama**3 Credits (3)**

Masterworks of American drama by noted American playwrights. Crosslisted with: THEA 323

ENGL 326. Cultural Identity and Representation Across the Media**3 Credits (3)**

Considers complex relationships between representation and culture including how images and language shape racial, ethnic, gender, sexual, and class identities. Examines theories from several disciplines. Includes lecture, discussion and production exercises.

ENGL 327V. Shakespeare around the Globe**3 Credits (3)**

Introduction to multicultural issues in Shakespeare's plays and to adaptations of Shakespeare's plays in other cultures.

ENGL 328V. Literature of Science Fiction and Fantasy**3 Credits (3)**

Survey and critical examination of the development of science fiction and fantasy as literature genres through selected authors and texts.

ENGL 329. Studies in Drama**3 Credits (3)**

Emphasis on a group of related works of European or American drama; topics will vary. Crosslisted with: THEA 329 and FDMA 329

ENGL 339V. Chicana/o Literature**3 Credits (3)**

Introduction to Chicano novels, short stories and selected creative nonfiction.

ENGL 354. Form and Technique in Fiction**3 Credits (3)**

Literature course designed for fiction writers, especially those English majors in the Creative Writing emphasis. The course combines the study of published fiction with the study of craft. Some of the assignments will require the student to write original fiction based on exercises provided by the instructor. Repeatable for up to 9 credits.

ENGL 356. Form and Technique in Poetry**3 Credits (3)**

Literature course designed for poets, especially those English majors in the Creative Writing emphasis. The course combines the study of published poetry with the study of craft. Some of the assignments will require the student to write original poems based on exercises provided by the instructor. Repeatable for up to 9 credits.

ENGL 358. Form and Technique in Playwriting**3 Credits (3)**

Literature course designed for playwrights, especially those English majors in the Creative Writing emphasis. The course combines the study of published plays and performances with the study of craft. Some of the assignments will require the student to write original plays based on exercises provided by the instructor. Repeatable up to 9 credits.

ENGL 363. Literature for Children and Young Adults**3 Credits (3)**

A comparative, historical survey of literature for young (K to 12th grade) readers. Emphasis on critical evaluation.

Prerequisite: junior or above standing.

ENGL 380V. Women Writers**3 Credits (3)**

Introduction to multicultural women's traditions through intensive study of works by women writers. Crosslisted with: GNDR 380V.

ENGL 392V. Mythology**3 Credits (3)**

Greek and Roman mythology and its impact on European and English literature. Readings in myths, classical plays, and other literature with mythological interest, including nonclassical myths.

ENGL 394V. Southwestern Literature**3 Credits (3)**

Introduction to multicultural literature of the Southwest: oral folk literature, literary fiction (classic and contemporary), nonfiction and poetry.

ENGL 399. Special Topics**3 Credits (3)**

Emphasis on a theme, genre, figure, or technique chosen for study during the semester. Repeatable under different subtitles.

ENGL 400. Independent Study: Upper Division**1-3 Credits**

For students with demonstrated aptitude for independent work. Approval of instructor required before registration. Repeatable under different subtitles.

ENGL 403. Web Design and Development**3 Credits (3)**

Combines study and practice of web design and development as rhetoric, technical, processual, and collaborative.

Learning Outcomes

1. Read and write HTML without the use of an editor Design and format web pages via CSS Understand what JavaScript is and how it's used Understand the methods for accessibility Create usable, aesthetically pleasing, and functional websites

ENGL 404. User Experience and Assistance**3 Credits (3)**

Includes theories and discussions of users, usability, accessibility, disability, design, embodiment, and ethics to prepare students to understand, write for, and collaborate with users and audiences in technical and professional communication contexts.

Learning Outcomes

1. Understand histories and politics that inform contemporary best practices and ethics conversations associated with the development of user-oriented documentation Develop a robust vocabulary that permits engagement in both academic and industry-based conversations about users, access, and documentation Discuss pros, cons, and nuances of multiple user-centered research methods Produce professional user-assistance documents and discuss the ethics of design decisions.

ENGL 405. Chaucer**3 Credits (3)**

Principal works, with emphasis on The Canterbury Tales.

ENGL 407. Milton**3 Credits (3)**

Studies in Milton's works, including Paradise Lost.

Learning Outcomes

1. Analyze Milton's poetry using the methods of close reading; Demonstrate ability to read and develop persuasive literary-critical interpretations of Milton's poetry and prose; Demonstrate ability to locate Milton's writings in historical and cultural context; Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a Working Bibliography and Research Paper on a topic related to our course material.

ENGL 408. Shakespeare I**3 Credits (3)**

Study in Shakespeare's early poems and plays. Repeatable for up to six credits under different subtitles.

Learning Outcomes

1. Analyze Shakespeare's poetry using the methods of close reading Demonstrate ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays; Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material; Work effectively in small groups to interpret a scene through performance

ENGL 409. Shakespeare II**3 Credits (3)**

Study in Shakespeare's later plays. ENGL 408 is not a prerequisite. Repeatable for up to six credits under different subtitles. Crosslisted with THEA 409.

Learning Outcomes

1. Analyze Shakespeare's poetry using the methods of close reading; Demonstrate ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays; Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material; Work effectively in small groups to interpret a scene through performance.

ENGL 412. Writing in the Workplace**3 Credits (3)**

Study of workplace writing practices, including a focus on research-based, theoretical, and pedagogical approaches to professional communication.

ENGL 413. Advanced Creative Writing: Prose Workshop**3 Credits (3)**

Imaginative writing, chiefly the narrative. May be repeated up to 12 credits.

Prerequisite(s): ENGL 304 or consent of instructor.

ENGL 414. Advanced Creative Writing: Poetry Workshop**3 Credits (3)**

For advanced writers of poetry. Repeatable for a total of 12 credits.

Prerequisite(s): ENGL 306 or consent of instructor.

ENGL 416. Approaches to Literature**3 Credits (3)**

Understanding, appreciation, techniques of instruction in the high school.

Prerequisite: at least 6 credits in upper-division English courses.

ENGL 417. Advanced Study in Critical Theory**3 Credits (3)**

Advanced study of one or more major trends in theoretical inquiry within English studies. Some prior study of theory, such as English 301-303, strongly recommended. Repeatable under different subtitles.

ENGL 418. History of Rhetoric**3 Credits (3)**

Investigation of crucial writings that have shaped Western attitudes towards and practice of rhetoric. Will examine key concepts from the Greeks through the Enlightenment, especially as they have influenced contemporary rhetorical theory.

ENGL 419. Modern Rhetorical Theory**3 Credits (3)**

Major figures in rhetorical theory, with particular emphasis on developments in rhetorical theory in the twentieth century.

ENGL 422. Advanced Study in a Literary Form or Genre**3 Credits (3)**

Close study of a topic in a particular literary form or genre. May be repeated under different subtitles.

ENGL 423. Advanced Study in a Major Author**3 Credits (3)**

Close study of selected works by a major author. May be repeated under different subtitles.

ENGL 424. Advanced Study in a Major Text**3 Credits (3)**

Close study of a major text. Course subtitled in the Schedule of Classes. Repeatable under different subtitles.

ENGL 430. Online Publishing**3 Credits (3)**

This three-credit course provides a theoretical background for online publishing and design as well as hands on experience publishing an online arts magazine.

ENGL 431. Technical Editing**3 Credits (3)**

Uses workshops, readings, hands-on projects, and discussion to improve skills in gathering, writing, designing, and editing technical information. For students interested in technical communication as well as students interested in developing strengths in communicating in scientific and technical fields.

ENGL 433. Victorian Literature**3 Credits (3)**

Intensive study of major writers and critical topics from the Victorian period. Repeatable under different subtitles.

ENGL 442. Modern and Contemporary American Poetry**3 Credits (3)**

Studies the development of American poetry from World War I to the present. Repeatable under a different subtitle. May be repeated up to 6 credits.

ENGL 445. Postmodern Fiction**3 Credits (3)**

Study of the various forms of formally innovative experimental fiction produced since 1945, with a focus on the relationship between literary history and its sociohistorical contexts. Some texts will be read in translation. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 446. Advanced Creative Writing: Nonfiction Prose**3 Credits (3)**

This workshop-format class for advanced writers will examine the many varieties of Creative Nonfiction. Students should be prepared for a rigorous reading load of published nonfiction and student submissions. Because of the workshop format, every student is expected to contribute extensively to every class, both in printed form and oral comments. Taught with ENGL 546. May be repeated up to 12 credits.

Prerequisite(s): ENGL 307 or consent of instructor.

ENGL 449. Advanced Study in Writing**3 Credits (3)**

Close study of a topic in composition, rhetoric and/or technical and professional communication. Repeatable for a maximum of 6 credits with permission of department.

ENGL 453. World Literatures**3 Credits (3)**

Study of one or more literary traditions exclusive of those originating in Europe and the United States. Readings will include texts in translation. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 458. Latino/a Literature and Culture**3 Credits (3)**

Focuses on established and emergent Latino/a literary and cultural production. Incorporates both literary and sociocultural readings of texts. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 460. Proposal Writing**3 Credits (3)**

Developing proposals and grants in a workshop setting.

ENGL 469. Advanced Study in American Literature**3 Credits (3)**

Covers selected works for a particular period of American literary history. Repeatable under different subtitles.

ENGL 470. Approaches to Composition**3 Credits (3)**

Theory and practice of teaching writing. Discussion and application of classroom practices, definition of standards, and evaluation of student writing.

ENGL 471 M. Scholarly Writing for International Graduate Students**3 Credits (3)**

Instruction and practice in writing major academic genres, including experimental, descriptive, and problem-solution research reports, proposals, and library referenced papers. May be repeated up to 3 credits. Graded: S/U Grading (S/U, Audit).

Prerequisite(s): Placement based on English language screening test or successful completion of ENGL 1105M; a minimum TOEFL score of 500 or consent of instructor; and successful completion of SPCD 108/490 where indicated by placement.

ENGL 478. Document Design**3 Credits (3)**

Advanced study in writing, with an emphasis on the computer as a tool for designing visually informative text. Includes theory and research in document design and the use of page composition and graphics software.

ENGL 479. Computers and Writing**3 Credits (3)**

This course will trace the history of computers and composition as a field by looking at the work of important scholars including Selfe, Hawisher, Johnson-Eilola, and Wysocki. We will then focus on specific ways new media might be integrated into composition classrooms. The course will include discussions, student facilitations, and experimentation with technologies.

ENGL 481. Women's Literature**3 Credits (3)**

Intensive study of literature by women, in particular historical, aesthetic, cultural, or intellectual contexts. Repeatable under different subtitles. Crosslisted with: GNDR 484

ENGL 489. Cultural Studies: Literature and Theory**3 Credits (3)**

Examines the theory and practice of cultural studies in relation to the variety of discourse describable as literary, including autobiography, avant-garde writing, nonfiction prose, the essay, online writing, folklore, and popular genre fiction (such as mystery, romance, thriller, or horror). Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 497. Internship**3-6 Credits (3-6)**

Supervised technical and professional communication internship in business, industry, government, or the university. Repeatable for a total of 6 credits. Consent of instructor required.

ENGL 500. Supervised Study**1-3 Credits**

To prepare the student for the master's degree examinations by special studies in fields not covered in routine course work.

Prerequisite: consent of instructor.

ENGL 501. Online Publishing**3 Credits (3)**

This three-credit course provides a theoretical background for online publishing and design as well as hands-on experience publishing an online arts magazine. Taught with ENGL 430.

ENGL 502. Critical Conversations in Technical and Professional Communication**3 Credits (3)**

Introduces students to critical histories, theories, and key concepts in technical and professional communication across academic and industry boundaries.

Learning Outcomes

1. Understand the histories and politics of emergence of technical and professional communication as a field of study and expertise; Identify and track key concepts, terms, and conversations that give shape to technical and professional communication; Draw on a range of theories and methodologies to articulate and critique the function and effects of technical and professional communication; Participate in disciplinary conversations through research and writing.

ENGL 503. Web Design and Development**3 Credits (3)**

Combines study and practice of web design and development as rhetorical, technical, processual, and collaborative.

Learning Outcomes

1. Read and write HTML without the use of an editor Design and format web pages via CSS Understand what JavaScript is and how it's used Understand the methods for accessibility

ENGL 504. User Experience and Assistance**3 Credits (3)**

Includes theories and discussions of users, usability, accessibility, disability, design, embodiment, and ethics to prepare students to understand, write for, and collaborate with users and audiences in technical and professional communication contexts.

Learning Outcomes

1. Understand histories and politics that inform contemporary best practices and ethics conversations associated with the development of user-oriented documentation Develop a robust vocabulary that permits engagement in both academic and industry-based conversations about users, access, and documentation Discuss pros, cons, and nuances of multiple user-centered research methods Produce professional user-assistance documents and discuss the ethics of design decisions

ENGL 505. Graduate Study in Chaucer**3 Credits (3)**

Principal works, with emphasis on the Canterbury Tales. Requirements include independent directed research. May be repeated up to 3 credits.

ENGL 507. Special Topics in Rhetoric and Technical and Professional Communication**3 Credits (3)**

Seminar course centered on contemporary issues in rhetoric and technical and professional communication. Repeatable under different subtitles, for up to 6 credits.

Learning Outcomes

1. Use rhetoric inquiry and theory to contextualize and study technical and professional communication. Understand the disciplinary overlaps, tensions, and possibilities among rhetoric and technical and professional communication. Track a contemporary thematic trend, issue, or question through rhetoric and technical and professional communication.

ENGL 508. Graduate Study in Shakespeare I**3 Credits (3)**

Graduate study in Shakespeare's early poems and plays. Requirements include independent directed research. Repeatable for up to six credits under different subtitles.

Learning Outcomes

1. Analyze Shakespeare's poetry using the methods of close reading Demonstrate graduate-level ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays Demonstrate graduate-level skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material; Work effectively in small groups to interpret a scene through performance

ENGL 509. Graduate Study in Shakespeare II**3 Credits (3)**

Study in Shakespeare's late poems and plays. Requirements include independent directed research. Repeatable for up to six credits under different subtitles.

Learning Outcomes

1. Analyze Shakespeare's poetry using the methods of close reading Demonstrate graduate-level ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays; Demonstrate graduate-level skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material; Work effectively in small groups to interpret a scene through performance

ENGL 510. Proseminar in Rhetoric and Professional Communication**3 Credits (3)**

Introduction to research in rhetoric and professional communication. Taught with ENGL 610.

ENGL 512. Graduate Study in Writing in the Workplace**3 Credits (3)**

Study of workplace writing practices, including a focus on research-based, theoretical, and pedagogical approaches to professional communication.

ENGL 513. Creative Writing Workshop: Fiction**3 Credits (3)**

Advanced creative writing prose workshop. Imaginative writing, chiefly the narrative. Graduate level workshop for students who are not in the English Department MFA program. May be repeated for a maximum of 12 credits. Taught with ENGL 413 with additional work required at the graduate level.

ENGL 514. Creative Writing Workshop: Poetry**3 Credits (3)**

Creative writing poetry workshop for advanced writers of poetry. Graduate level works for students who are not in the English Department MFA program. Repeatable for a maximum of 12 credits. Taught with ENGL 414 with additional work required at the graduate level.

ENGL 516. Graduate Study in Approaches to Literature**3 Credits (3)**

Understanding, appreciation, techniques of instruction in the high school. Requirements include independent directed research.

Prerequisite: at least 6 credits in upper-division English courses.

ENGL 517. Graduate Study in Critical Theory**3 Credits (3)**

Advanced study of one or more major trends in theoretical inquiry within English studies. Some prior study of theory, such as English 301, 302, or 303, strongly recommended. Repeatable under different subtitles.

ENGL 518. History of Rhetoric**3 Credits (3)**

An investigation of the crucial writings that have shaped Western attitudes towards and practice of rhetoric. Course will examine key texts from the Greeks through the Enlightenment, especially as they have influenced contemporary rhetorical theory.

ENGL 519. Graduate Study in Modern Rhetorical Theory**3 Credits (3)**

Major figures in rhetorical theory, with particular emphasis on developments in rhetorical theory in the 20th century. Students will be responsible for all requirements of ENGL 419 and will in addition undertake independent directed research.

ENGL 521. Graduate Study in a Literary Period or Movement**3 Credits (3)**

Close study of a topic in a particular literary period or movement. Requirements include independent directed research. Repeatable under different subtitles.

ENGL 522. Graduate Study in a Literary Form or Genre**3 Credits (3)**

Close study of a topic in a particular literary form or genre. Requirements include independent directed research. Repeatable under different subtitles.

ENGL 523. Graduate Study of a Major Author**3 Credits (3)**

Close study of selected works of a major author. Requirements include independent directed research. Repeatable under different subtitles.

ENGL 524. Graduate Study in a Major Text**3 Credits (3)**

Close study of a major text. Requirements include independent directed research. Repeatable under different subtitles.

ENGL 525. Graduate Study in Comparative Literature**3 Credits (3)**

Close study of a selection on non-English literary works read in translation. English-language works from a similar literary period or genre may also be read. Requirements include independent directed research. Repeatable under different subtitles.

Prerequisite: graduate standing or consent of instructor.

ENGL 526. Special Topics in Critical Theory**3 Credits (3)**

Study of a specific historical or theoretical topic, trend, or movement in Critical Theory. Repeatable under different subtitles.

ENGL 527. Graduate Study in Film and Digital Media**3 Credits (3)**

Offers close graduate study of a form or genre, a major figure or style, a historical period or movement, or a major theme or text. Topics vary from semester to semester.

ENGL 529. British Romanticism**3 Credits (3)**

Intensive study of major writers and critical topics from the Romantic period. Repeatable under different subtitles.

ENGL 531. Technical Editing**3 Credits (3)**

Uses workshops, readings, hands-on projects, and discussion to improve skills in gathering, writing, designing, and editing technical information. For students interested in technical communication as well as students interested in developing strengths in communicating in scientific and technical fields.

ENGL 533. Victorian Literature**3 Credits (3)**

Intensive study of major writers and critical topics from the Victorian period. Repeatable under different subtitles.

ENGL 534. Graduate Study: Form and Technique in Fiction**3 Credits (3)**

Advanced study of issues in form and technique in fiction, including point of view, scene and dialogue, and story structure. Repeatable for a maximum of 6 credits.

ENGL 535. Graduate Study: Form and Technique in Poetry**3 Credits (3)**

Advanced study of issues in form and technique in poetry, including voice, tone, syntax, and structure. Repeatable for a maximum of 12 credits.

ENGL 536. The Borderlands Writing Project**3-6 Credits (3-6)**

Intensive month-long seminar for practicing teachers and educators designed to improve the teaching of writing and the writing process and literacy and reading in schools and other educational contexts. Reading, discussing, and writing about current professional literature; completing teacher inquiry; and planning action research. Participants complete personal and professional writing, as well as additional professional development activities. By invitation only. Affiliated with the National Writing Project. Consent of instructor required. Crosslisted with: RDG 536

ENGL 542. Modern and Contemporary American Poetry**3 Credits (3)**

Studies the development of American poetry from World War I to the present. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 543. Multimedia Theory and Production**3 Credits (3)**

Issues, theories, and production practices underlying design of multimedia, including rhetorical choices, aesthetic approaches, usability concerns, and diverse academic and popular discourses contributing to continued development of digital texts. Taught with ENGL 643.

ENGL 544. Modern British Fiction**3 Credits (3)**

Study of the fiction produced in the British Isles in the 20th and 21st centuries. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 545. Postmodern Fiction**3 Credits (3)**

Study of the various forms of formally innovative experimental fiction produced since 1945, with a focus on the relationship between literary history and its sociohistorical contexts. Some texts will be read in translation. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 546. Advanced Creative Writing: Nonfiction Prose**3 Credits (3)**

This graduate-level workshop will examine the many varieties of Creative Nonfiction. Students should be prepared for a rigorous reading load of published nonfiction and student submissions. Because of the workshop format, every student is expected to contribute extensively to every class, both in printed form and oral comments. Taught with ENGL 446 with additional work required at the graduate level. Consent of Instructor required. Crosslisted with: ENGL 446.

ENGL 548. Graduate Study in Empirical Research**3 Credits (3)**

Introduction to empirical research methods in composition, professional communication, and rhetoric.

ENGL 549. Graduate Study in Writing**3 Credits (3)**

Close study of a topic in composition, rhetoric, and/or technical and professional communication. Topics vary. Repeatable for a maximum of 6 credits.

ENGL 550. Graduate Study in Literacy**3 Credits (3)**

Studies in literacy theory and literacy research. Topics may vary. Taught with ENGL 650.

ENGL 552. Graduate Study in History of the English Language**3 Credits (3)**

This course examines the history of the English language from its Indo-European origins through its development into an international language. The aim is to describe the English language formally and to trace linguistic change over time. Samples of written English will illustrate various stages in the development of English. Also considered are contemporary social and political issues related to language, including the problem of 'standard English' and the uses of language in advertising, the media, and politics.

ENGL 553. World Literatures**3 Credits (3)**

Study of one or more literary traditions exclusive of those originating in Europe and the United States. Readings will include texts in translation. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 555. Graduate Study in Rhetoric of Scientific Literature**3 Credits (3)**

Intensive study of the rhetoric of selected works of scientific literature.

ENGL 558. Latino/a Literature and Culture**3 Credits (3)**

Focuses on established and emergent Latino/a literary and cultural production. Incorporates both literary and sociocultural readings of texts. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 559. Black Literature and Culture in the United States**3 Credits (3)**

Focuses on established and emergent Black U.S. literary and cultural production. Incorporates both literary and sociocultural readings of texts. Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 560. Proposal and Grant Writing**3 Credits (3)**

Developing proposals and grants in a workshop setting.

ENGL 561. Topics in Writing Program Administration**3 Credits (3)**

Explores issues, theories, and research underlying the design of writing programs and the administration of writing centers. Repeatable for a maximum of 6 credits. Taught with ENGL 661.

ENGL 562. Interdisciplinary, Client-Based Project Practicum**3 Credits (3)**

Hands-on experience in collaborating within interdisciplinary teams designing projects for organizational clients. Taught with ENGL 462.

ENGL 563. Graduate Study in English Literature**3 Credits (3)**

Covers selected works for a particular period of English literary history. Repeatable under different subtitles.

ENGL 564. History and Theory of Composition Studies**3 Credits (3)**

Studies in the history and theory of composition as a discipline. Taught with ENGL 664.

ENGL 565. Intercultural Rhetoric and Professional Communication**3 Credits (3)**

Examines rhetorical traditions in intercultural professional, technical, academic, and governmental contexts. Taught with ENGL 665.

ENGL 567. Documentary Film Theory and Criticism**3 Credits (3+3P)**

Course offers critical survey of documentary film theory and criticism including considerations of the epistemological assumptions, rhetorical choices, aesthetic approaches, political circumstances of historical and contemporary documentary film.

ENGL 568. Rhetoric and Cultural Studies**3 Credits (3)**

Explores intersections between rhetoric and cultural studies. Examines theories and practices of texts and discourses in political and cultural contexts. Taught with ENGL 668.

ENGL 569. Graduate in American Literature**3 Credits (3)**

A group of works from a particular period of American literary history. Repeatable under different subtitles.

ENGL 570. Graduate Study in Approaches to Composition**3 Credits (3)**

Theory and practice of teaching writing, including classroom practices, definition of standards, and evaluation of student writing. Requirements include independent directed research.

ENGL 571. Composition Pedagogy and Practicum**3 Credits (3)**

Examines the pedagogical implications of contemporary composition theory and research. Focuses on teaching composition at the college level. Consent of instructor required.

ENGL 572. Technical-Professional Communication Pedagogies**3 Credits (3)**

Combines theoretical and practical attention to the pedagogies that underwrite the teaching of technical and professional communication; culminates in the development of a TPC course proposal, syllabus, and rationale. For Graduate students only.

Learning Outcomes

1. Engage with research and scholarship that reflects a range of approaches to conceptualize the purposes and goals of technical and professional communication courses; Articulate a range of possibilities for and responsibilities of technical and professional communication pedagogy; Compose and substantiate a teaching philosophy and course plan for teaching technical and professional communication.

ENGL 574. Workshop: Advanced Writing Prose**3 Credits (3)**

Intensive practice in prose writing, primarily fiction, in a workshop environment with peer criticism. Repeatable for a total of 15 credits. Consent of instructor required.

ENGL 575. Workshop: Advanced Writing Poetry**3 Credits (3)**

Intensive practice in poetry writing in a workshop environment with peer criticism. Repeatable for a total of 15 credits. Consent of instructor required.

ENGL 576. Workshop: Advanced Writing Playwriting**3 Credits (3)**

Intensive practice in dramatic writing in a workshop environment with peer criticism. Repeatable for a total of 9 credits. Consent of instructor required.

ENGL 577. Workshop: Advanced Technical and Professional Writing**3 Credits (3)**

Intensive practice in technical and professional writing and editing in a workshop environment. May be repeated for a total of 6 credits. Consent of instructor required.

ENGL 578. Topics in Rhetoric and Technology**3 Credits (3)**

Explores intersections between rhetoric and technology, approaches may highlight theory, media production, and/or research. Repeatable for a maximum of 6 credits. Taught with ENGL 678.

ENGL 579. Computers and Writing**3 Credits (3)**

This course will trace the history of computers and composition as a field by looking at the work of important scholars including Selfe, Hawisher, Johnson-Eilola, and Wysocki. We will then focus on specific ways new media might be integrated into composition classrooms. The course will include discussions, student facilitations, and experimentation with technologies.

ENGL 580. Graduate Problems in Creative Writing**3 Credits (3)**

Independent study in creative writing. Consent of instructor required. Repeatable for a total of 9 credits.

ENGL 581. Women's Literature**3 Credits (3)**

Intensive study of literature by women, in particular historical, aesthetic, cultural, or intellectual contexts. Repeatable under different subtitles. Crosslisted with: GNDR 584

ENGL 582. Gender and Popular Culture**3 Credits (3)**

Intensive study of the representations of gender in popular culture. Examines the historical, aesthetic, and cultural contexts of these representation and the various critical and theoretical lenses we use to understand them. Repeatable under different subtitles. Crosslisted with: GNDR 582

ENGL 583. Critical Writing Studies**3 Credits (3)**

Overview of current and historical approaches to the critical study of gender and language: how gender theoretically manifests in linguistic, social, cultural, academic, and professional contexts.

ENGL 584. Workshop: Advanced Academic Writing for International Students**3 Credits (3)**

This workshop-based course is for graduate-level multilingual writers from all disciplines who want to improve their English academic writing in an intensive and collaborative environment. Students will propose a major writing project to workshop throughout the semester, such as dissertation, thesis, comprehensive exams, etc. Some of the topics covered will be academic language, cohesion/coherence, organization, and supporting academic arguments. Other topics to be determined by needs of the class.) 4.Consent of instructor.

Prerequisite(s): 1.Be classified as a graduate student by the Graduate School 2.Be classified as an international student whose first language is not English 3.Have a major writing project in progress (comprehensive exams, thesis, dissertation, conference paper, etc.

ENGL 585. Advanced Writing Workshop: RPC Capstone**3 Credits (3)**

Students work to develop and revise their chosen Master's program Capstone Project (a portfolio, thesis or master essay) in consultation with instructor and classmates. Students provide and receive feedback on their work-in-progress. Consent of Instructor required.

ENGL 589. Cultural Studies: Literature and Theory**3 Credits (3)**

Examines the theory and practice of cultural studies in relation to the variety of discourse describable as literary, including autobiography, avant-garde writing, nonfiction prose, the essay, online writing, folklore, and popular genre fiction (such as mystery, romance, thriller, or horror). Repeatable under different subtitles. May be repeated up to 6 credits.

ENGL 590. Master's Seminar in Rhetoric**3 Credits (3)**

Studies in theories of and issues in rhetoric. Topics may vary from year to year. Repeatable for a total of 9 credits.

ENGL 591. Graduate Screenwriting**3 Credits (3)**

Students will prepare a feature-length screenplay. Script analysis will be in an advanced workshop format. Scripts will be read and discussed, scenes performed and reactions analyzed to consider effect of dialogue, character development, etc. Aimed at preparing writers for the professional market. Consent of instructor required.

ENGL 592. Master's Theory, Practice, and Profession**3 Credits (3)**

Students will study major poetics/narratology pieces in the field and other related professional topics such as literary citizenship, publishing, and job seeking skills. Students will also propose and develop a year-long project in one of the above categories, such as a community reading or workshop, a conference panel proposal, a paper presentation, a chapbook press launch, writing/placing literary book reviews, or work on an outreach project. Must be taken in each of the last two semesters of the MFA and currently with ENGL 594 (Master's Workshop). Restricted to MFA-Creative Writing students, or by consent of instructor.

Learning Outcomes

1. Understand, analyze, and effectively use the critical discourse of poetics/narratology/craft in the field of creative writing Design and execute an outreach or professional project that contributes to a creative writing community Explore applications of their training in professional contexts. Analyze how students' own reading, writing, and research respond to existing leadership in professional creative writing communities, help provide new leadership, and answer community needs.

ENGL 594. Master's Workshop**3 Credits (3)**

Students will submit a draft of their thesis project, in their major genre, for workshop critique. Revision of the thesis draft will be submitted to the instructor. Restricted to MFA Creative Writing students, or by consent of instructor. Must be taken in each of the last two semesters of the MFA, and concurrently with ENGL 592 (Master's Theory, Practice, and Profession).

Learning Outcomes

1. Understand, analyze, and effectively use the critical discourse of the field of creative writing to discuss a thesis. Examine how their thesis operates with the genre and within the context of contemporary literature. Critically contextualize their thesis and those of their peers Apply various revision strategies across a thesis-length manuscript, responding to the critiques of the instructor and their peers Achieve the standards of publication of the University's thesis editor and learn those of the publishing environment in their genre.

ENGL 595. Master's Workshop: Poetry**3-6 Credits (3-6)**

Students will submit a draft of thesis project for workshop critique. Revision of the thesis draft submitted to the instructor. Restricted to MFA CW majors.

Prerequisite(s): Enrolled in MFA penultimate semester.

ENGL 596. Master's Workshop: Fiction**3-6 Credits (3)**

Students will submit a draft of thesis project for workshop critique. Revision of the thesis draft submitted to the instructor. Restricted to MFA CW majors.

Prerequisite(s): Enrolled in MFA penultimate semester.

ENGL 597. Internship in Technical and Professional Communication**3-6 Credits (3-6)**

Supervised technical and professional communication in business, industry, government, or the university. May be repeated for a total of 6 credits.

Consent of instructor required.

ENGL 598. Master's Essay**3 Credits (3)**

Students electing the master essay option complete revision of a scholarly essay of 25-30 pages, the approximate length of a journal article, and reformulation of this essay to the 7-8 pages appropriate for presentation at a conference. This option also requires research of appropriate publication venues and a final oral defense of the project. A supervising faculty member will approve the selected essay, guide revision, and help students form an examining committee, which consists of at least two members of the graduate English faculty and one member of the graduate faculty from outside the department. Students are encouraged to undertake the Master Essay process in the first half of their third semester of full time graduate work, or soon after completing 18 hours of course work. This option is the preferred exam option, particularly for those students who intend to pursue Ph.D. study. Consent of instructor required.

ENGL 599. Master's Thesis**1-15 Credits**

Thesis.

ENGL 600. Doctoral Research**1-15 Credits**

Assigns credit for research performed prior to the doctoral comprehensive examination.

ENGL 601. Qualitative Research**3 Credits (3)**

Theory and practice of designing research studies and of collecting and analyzing data. Emphasis on qualitative methods of research in composition, professional communication, and rhetoric.

ENGL 602. Quantitative Research**3 Credits (3)**

Theory and practice of designing quantitative research studies and of collecting and analyzing data. Emphasis on quantitative methods of research in composition, professional communication, and rhetoric.

ENGL 603. Rhetorical Criticism and Methodology**3 Credits (3)**

Theory and practice of designing research studies and of collecting and analyzing data. Emphasis on methods of rhetorical criticism.

ENGL 604. Digital Research Methods**3 Credits (3)**

This course will serve as one of the core methods courses in the RPC PhD program, focusing on "digital" methods in rhetorical studies. As such, the aim of this class is to help you begin to gain confidence in conducting research in rhetoric, professional communication, and composition using digital methods. In this course we will assume that digital methods in rhetoric take broadly two forms: first, digital methods of acquisition, processing, and presentation of research data. And second, digital methods of production and circulation of rhetorical objects. The former closely resembles the methods of "digital humanities" while the latter will be closer to media archaeology and "critical making" practices. In all cases, we will relate these tools and methods to key questions and theories in our field, asking how and why we might apply digital methods in rhetorical scholarship.

Prerequisite(s): graduate standing.

ENGL 610. Proseminar in Rhetoric and Professional Communication**3 Credits (3)**

Introduction to research in rhetoric and professional communication. Required of and limited to students enrolled in the Ph.D. program in Rhetoric and Professional Communication.

ENGL 643. Multimedia Theory and Production**3 Credits (3)**

Issues, theories, and production practices underlying design of multimedia, including rhetorical choices, aesthetic approaches, usability concerns, and diverse academic and popular discourses contributing to continued development of digital texts. Taught with ENGL 543.

ENGL 646. Teaching Rhetoric and Writing with English Language Learners**3 Credits (3)**

This course introduces students to the rich interdisciplinary world of writing for English language learners with the goal of helping researchers and instructors understand the unique characteristics and needs of ELL writers. It also examines Generation 1.5, bilingualism, and Spanish-dominant writers along the U.S.-Mexico Border. The course prepares students to work with ELL writing in curriculum design, needs analysis, classroom implementation, assessment, writing program administration, and institutional policies. The course will be a requirement for those GAs seeking to teach experimental sections of first-year multilingual composition at NMSU.

Prerequisite(s): graduate standing.

ENGL 649. Graduate Study in Writing**3 Credits (3)**

Close study of a topic in composition, rhetoric, and/or technical and profession communication. Repeatable for a total of 6 credits.

ENGL 650. Graduate Study in Literacy**3 Credits (3)**

Studies in literacy theory and literacy research. Topics may vary. Taught with ENGL 550.

ENGL 661. Topics in Writing Program Administration**3 Credits (3)**

Explores issues, theories, and research underlying writing programs and the administration of writing centers. Repeatable for a maximum of 6 credits. Taught with ENGL 561.

ENGL 664. History and Theory of Composition Studies**3 Credits (3)**

Studies in the history and theory of composition as a discipline. Taught with ENGL 564.

ENGL 665. Intercultural Rhetoric and Professional Communication**3 Credits (3)**

Examines rhetorical traditions in intercultural professional, technical, academic, and governmental contexts. Taught with ENGL 565.

ENGL 668. Rhetoric and Cultural Studies**3 Credits (3)**

Explores intersections between rhetoric and cultural studies. Examines theories and practices of texts and discourses in political and cultural contexts. Taught with ENGL 568.

ENGL 678. Topics in Rhetoric and Technology**3 Credits (3)**

Explores intersections between rhetoric and technology, approaches may highlight theory, media production, and/or research. Repeatable for a maximum of 6 credits. Taught with ENGL 578.

ENGL 683. Critical Writing Studies**3 Credits (3)**

This course investigates the field of Writing Studies as a distinct field of study, related to but not synonymous with Composition Studies. While debates surrounding the relationships among Writing Studies and Composition Studies flourish, this course centers on the former—investigating writing as a practice, process, and object that merits attention in its own right. Such attention will be grounded in contemporary critical and cultural theory that contests writing as a positive or neutral sign (i.e. activity theory, posthumanism, ecocriticism, new materialism, new media studies; feminist, queer, critical race or decolonial theory). Crosslisted with: ENGL 583.

Prerequisite(s): graduate standing.

ENGL 690. Doctoral Seminar in Rhetoric**3 Credits (3)**

Studies in theories of and issues in rhetoric. Topics may vary from year to year. Repeatable for a maximum of 9 credits.

ENGL 700. Doctoral Dissertation**1-15 Credits**

Dissertation.

ENGR-ENGINEERING

ENGR 100G. Introduction to Engineering

3 Credits (2+3P)

An introduction to the various engineering disciplines, the engineering approach to problem solving, and the design process. Projects emphasize the importance of teamwork, written & oral communication skills, as well as ethical responsibilities. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 1220G or above.

Learning Outcomes

1. Analyze the engineering road maps and have a solid curriculum plan for each semester including summers.
2. Discuss the importance of information on engineering student organizations.
3. Demonstrate an understanding of the design process from initial conception to final solution through the application of critical thinking while learning important team building skills approaches to problem solving.
4. Identify the different engineering fields, the engineering profession, career paths open to engineers, and the process to professional licensure.
5. Apply clear communication and critical thinking skills by collecting, organizing, and analyzing data in a complete, clearly written, and oral presentation of their work.
6. Make use of basic knowledge and skills in Microsoft Excel to complete engineering assignments.
7. Identify, compute, and apply how dimensions, length, time, mass, force, temperature, electric current, energy and power, and related parameters are related to the different fields of engineering.
8. recognize ethical and professional responsibilities in engineering situations and make informed judgements.

ENGR 100GH. Introduction to Engineering Honors

3 Credits (2+3P)

An introduction to the various engineering disciplines, the engineering approach to problem solving, and the design process. Projects emphasize the importance of teamwork, written & oral communication skills, as well as ethical responsibilities. May be repeated up to 3 credits. Crosslisted with: ENGR 100.

Prerequisite(s)/Corequisite(s): MATH 1220G or above.

Learning Outcomes

1. Analyze the engineering road maps and have a solid curriculum plan for each semester including summers.
2. Discuss the importance of information on engineering student organizations.
3. Demonstrate an understanding of the design process from initial conception to final solution through the application of critical thinking while learning important team building skills approaches to problem solving.
4. Identify the different engineering fields, the engineering profession, career paths open to engineers, and the process to professional licensure.
5. Apply clear communication and critical thinking skills by collecting, organizing, and analyzing data in a complete, clearly written, and oral presentation of their work.
6. Make use of basic knowledge and skills in Microsoft Excel to complete engineering assignments.
7. Identify, compute, and apply how dimensions, length, time, mass, force, temperature, electric current, energy and power, and related parameters are related to the different fields of engineering.
8. recognize ethical and professional responsibilities in engineering situations and make informed judgements.

ENGR 110. Introduction to Engineering Design

3 Credits (2+3P)

Sketching and orthographic projection. Covers detail and assembly working drawings, dimensioning, tolerance specification, and design project

Learning Outcomes

1. Students will learn the fundamentals of part modeling and assemblies using modeling techniques in the SolidWorks solid modeling software.
2. They will learn how to put these parts and assemblies into production drawings using proper Geometric Dimensioning.

ENGR 111. Mathematics for Engineering Applications

3 Credits (3)

An introduction to engineering mathematics and basic programming skills needed to perform elementary data manipulation and analysis. Consent of Instructor required.

Prerequisite(s)/Corequisite(s): MATH 1250G. Prerequisite(s): MATH 1220G.

ENGR 120. DC Circuit Analysis**4 Credits (3+3P)**

This course provides an introduction DC circuit analysis using Ohm's law, Kirchhoff laws, Thevenin's and Norton's theorems.

Prerequisite: MATH 1250G or MATH 1430G.

Learning Outcomes

1. Analyze and design DC circuits, including ideal op-amps, using concepts of voltage, current, power, Kirchhoff's laws, and network theorems. Design simple systems involving dc circuits Work and learn in teams.

ENGR 130. Digital Logic**4 Credits (3+3P)**

This course introduces logic design and the basic building blocks used in digital systems, as well as introducing applications of digital integrated circuits. Topics include Numbering systems (binary & hexadecimal), Boolean algebra and digital logic theory, simple logic circuits, combinational logic, and sequential logic, and applications such as ALU (Arithmetic Logic Units), multiplexers, encoders, counters, and registers. These basic logic units are the main parts of microprocessors. Includes hands-on labs and software designs.

Prerequisite/Corequisite: ENGR 120.

Learning Outcomes

1. Demonstrate ability to convert numerical values to the commonly used digital representations and their use for arithmetic and logical functions. Formulate and solve problems related to Boolean logic functions and truth tables and using them to simplify logic expressions. Formulate and solve problems related to sequential logic functions, and the ability to integrate with combinational logic to produce a simple state machine. Formulate and solve problems related to common integrated circuit issues, such as logic voltage levels, propagation delay, and fan-out.

ENGR 140. Arduino Programming**4 Credits (3+3P)**

An introduction to computer programming concepts as applied to engineering technology. Includes basic logic design, algorithm development, debugging and documentation. History and use of computers and their impact on society.

Prerequisite: MATH 1250G or MATH 1430G.

Prerequisite/Corequisite: E T 182 or ENGR 130.

Learning Outcomes

1. Set up and use a rich programming environment for programming with Arduino hardware Analyze existing code Employ effective use of basic programming and basic troubleshooting Write, debug and test code given software requirements Apply testing and documentation best practices Transfer programming knowledge and apply coding knowledge

ENGR 190. Introduction to Engineering Mathematics**4 Credits (4)**

Engineering applications involving involved Math topics most heavily used in first and second-year engineering courses. Topics include engineering applications of algebra, trigonometry, vectors, complex numbers, sinusoids and signals, systems of equations and matrices, derivatives, integrals and differential equations.

Prerequisite: MATH 1250G or higher.

Learning Outcomes

1. Ability to solve systems of linear equations by use of matrices Ability to use complex numbers and periodic function to solve engineering problems Ability to solve problems using various coordinate system Write and Solve problems with 2-D 3D vectors Write and Solve problems with derivatives Write and solve problems with integrals

ENGR 198. Special Topics in Engineering**1-3 Credits**

Directed individual study of topics in engineering. Written reports covering work required. May be repeated for a maximum of 6 credits. Restricted to engineering majors. Graded S/U.

Prerequisite: consent of academic dean.

ENGR 230. AC Circuit Analysis**4 Credits (3+3P)**

This course provides an introduction to Circuit analysis techniques, RLC transients, phasors, filter response, and an introduction to discrete electronic devices.

Prerequisite: ENGR 120 and (MATH 1521G or MATH 1521H or MATH 1440 or ENGR 190).

Learning Outcomes

1. Analyze and design AC circuits, including ideal op-amps, using concepts of voltage, current, power, Kirchhoff's laws, and network theorems. Design simple systems involving ac circuits
2. Work and learn in teams.

ENGR 233. Engineering Mechanics I**3 Credits (3)**

Engineering mechanics using vector methods. Force systems, resultants, equilibrium, distributed forces, area moments, and friction.

Prerequisite(s)/Corequisite(s): PHYS 1310G. Prerequisite: MATH 1521G or MATH 1521H or ENGR 190.

Learning Outcomes

1. Have an understanding of the force systems, resultants, equilibrium, distributed forces, area moments, and friction; Be able to apply the acquired knowledge to formulate, solve and interpret solutions of engineering mechanics problems

ENGR 234. Engineering Mechanics II**3 Credits (3)**

Kinetics of particles, kinematics and kinetics rigid bodies, systems of particles, energy and momentum principles, and kinetics of rigid bodies in three dimensions.

Prerequisite(s): M E 236, C E 233, or ENGR 233.

Learning Outcomes

1. Have a good understanding of the kinetics of particles, kinematics and kinetics rigid bodies, energy and momentum principles, and kinetics of rigid bodies. Be able to apply the acquired knowledge to formulate, solve and interpret solutions of engineering mechanics problems

ENGR 398. Engineering Leadership Seminar**3 Credits (3)**

This course introduces students to concepts and skills related to leadership positions held at the University in the College of Engineering. The course will provide theory and practice in leadership; provide skills in effective oral communications and presentation, team building skills, and general knowledge of NMSU and the College of Engineering. May be repeated up to 18 credits. Consent of Instructor required.

ENGR 401. Engineering Capstone I**3 Credits (1+6P)**

Seniors will work in teams to apply a systematic design process to real world multidisciplinary problems. Problems selected from a broad spectrum of interest areas. Students will utilize the knowledge and skills acquired in earlier course work, and incorporate appropriate engineering standards and multiple realistic constraints. Emphasis is placed on the design process, the technical aspects of the design, and the development of a prototype that meets design objectives. 1st of 2 course sequence.

ENGR 402. Engineering Capstone II**3 Credits (1+6P)**

Seniors will work in teams to apply a systematic design process to real world multidisciplinary problems. Problems are selected from a broad spectrum of interest areas. Students will utilize the knowledge and skills acquired in earlier course work, and incorporate appropriate engineering standards and multiple realistic constraints. Emphasis is placed on the design process, the technical aspects of the design, and the development of a prototype that meets design objectives. Students must be a Senior to enroll in this course.

Prerequisite(s): ENGR 401.

ENTR-ENTREPRENEURSHIP AND INNOVATION

ENTR 1110. Entrepreneurship**3 Credits (3)**

Introduces students to the concept of entrepreneurship and to the process of business startups.

Prerequisite(s): BUSA 1110.

Learning Outcomes

1. Identify the unique characteristics of an entrepreneur.
2. Identify opportunities and conduct needs analysis.
3. Develop value proposition/market fit for proposed products and services.
4. Develop an appropriate business model.
5. Identify availability of necessary resources.

ENTR 331. Business Creation and Valuation**3 Credits (3)**

The course is designed to provide a first look at the entrepreneurship process by focusing how the firm will/does create value in the marketplace. As such, it is designed to integrate knowledge of business functions and apply business analysis techniques to the valuation of new ventures/entrepreneurial firms.

ENTR 531. Business Creation and Valuation**3 Credits (3)**

The course is designed to provide a first look at the entrepreneurship process by focusing how the firm will/does create value in the marketplace. As such, it is designed to integrate knowledge of business functions and apply business analysis techniques to the valuation of new ventures/entrepreneurial firms. Crosslisted with: ENTR 331.

ENVE-ENVIRONMENTAL ENGINEERING

ENVE 450. Aquatic Chemistry**3 Credits (3)**

Theoretical aspects of physical chemistry applied to the solution of environmental engineering problems. Emphasis on acid-base reactions, precipitation-dissolution reactions, complexation, and redox reactions. Same as ENVE 550.

Prerequisite: C E 256.

Learning Outcomes

1. Students will be able to use fundamental principles of physical chemistry as applied to acid-base, precipitation-dissolution, complexation, and redox reactions to determine the composition of waters, including natural waters and waters encountered in water and wastewater treatment processes.

ENVE 451. Unit Processes/Operation of Water Treatment**3 Credits (3)**

Theory and applications of unit processes in environmental engineering. Physical and chemical water treatment methods are emphasized. Crosslisted with: ENVE 551.

Prerequisite: C E 356.

Learning Outcomes

1. Students will be able to use fundamental reactor design principles to design unit operations for water treatment, including sedimentation, coagulation, flocculation, filtration, and disinfection.

ENVE 452. Unit Processes/Operation of Wastewater Treatment**3 Credits (3)**

Theory and applications of unit processes in environmental engineering. Biological wastewater treatment methods are emphasized. Crosslisted with: ENVE 552.

Prerequisite: C E 356.

Learning Outcomes

1. Students will be able to use fundamental reactor design principles to design unit operations for wastewater treatment, including sedimentation, aerobic and anaerobic microbial treatment, and disinfection.

ENVE 456. Environmental Engineering Design**3 Credits (3)**

Design of chemical, physical, and biological operations and processes involved in water and wastewater treatment. Student can also be a graduate student to enroll if they have not completed C E 356.

Prerequisite: C E 356.

Learning Outcomes

1. Students will be able to incorporate knowledge from previously taken engineering design and economics courses to complete an environmental design and solve a real world problem. Students will be able to communicate and explain their solution approach to a variety of audiences using different communication methods.

ENVE 459. Environmental Microbiology**3 Credits (3)**

An introduction to the diverse roles of microorganisms in natural and engineered environments. The topics include cellular architecture, energetics, and growth; population and community dynamics; water and soil microbiology; biogeochemical cycling; and microorganisms in biodegradation and bioremediation of contaminants. Students must be a Senior or in Graduate Standing to enroll.

Learning Outcomes

1. Students will be able to demonstrate the significance of microbial processes in natural and engineered processes.

ENVE 487. Air Pollution Control Systems Design**3 Credits (3)**

An introduction to sources and nature of air pollution, regulations, and risk analysis. Detailed study of air pollution control technologies and design of air pollution control equipment. Students must be a Senior or in graduate standing to enroll.

Learning Outcomes

1. Students will be able to explain the source and nature of air pollution. Students will be able to relate air pollution to regulations using a risk analysis approach. Students will be able to design air pollution control systems.

ENVE 504. Advanced Environmental Engineering Design**3 Credits (3)**

Advanced engineering design covering the subject matter of the Environmental Engineering capstone undergraduate design course plus an additional report or project. May be subtitled. Consent of instructor required.

Learning Outcomes

1. Students will be able to incorporate knowledge from previously taken engineering design and economics courses to complete an environmental design and solve a real world problem. Students will be able to communicate and explain their solution approach to a variety of audiences using different communication methods.

ENVE 550. Aquatic Chemistry**3 Credits (3)**

Theoretical aspects of physical chemistry applied to the solution of environmental engineering problems. Emphasis on carbonate equilibria solubility, buffering and redox conditions. May be repeated up to 3 credits. Consent of Instructor required. Crosslisted with: ENVE 450.

Prerequisite(s): C E 256.

ENVE 551. Unit Processes/Operation of Water Treatment**3 Credits (3)**

Theory and applications with unit processes in environmental engineering. Physical / chemical treatment methods emphasized. May be repeated up to 3 credits. Crosslisted with: ENVE 451.

Prerequisite(s): C E 356.

ENVE 552. Unit Processes/Operation of Wastewater Treatment**3 Credits (3)**

Theory and applications with unit processes in environmental engineering. Biological treatment methods emphasized. May be repeated up to 3 credits. Crosslisted with: ENVE 452.

Prerequisite(s): Consent of instructor.

ENVE 556. Advanced Water Treatment and Reuse**3 Credits (3)**

Overview of both the theoretical and practical aspects of advanced water treatment technologies and water reuse applications. Basic design features of the processes are presented, with emphasis on the underlying principles, including why and how a process works, what the significant variables are, and what the limitations of the process are. Problem solving skills and technical communication skills are emphasized.

Prerequisite: ENVE 551.

Learning Outcomes

1. Students will be able to design advanced water treatment processes, including membrane filtration, electrodialysis, ion exchange, advanced oxidation, photolysis, and distillation. Students will gain knowledge in water reuse applications including water quality criteria, regulations, and implementation issues.

ENVE 557. Surface Water Quality Modeling**3 Credits (3)**

Modeling the impacts of waste disposal practices on surface waters. Emphasis on fate and transport of bacteria, dissolved oxygen, nutrients, and toxicants in rivers, lakes, and tidal waters. Students must be in Graduate standing to enroll.

Learning Outcomes

1. The students will be able to use mathematical models to model the transport of constituents important for water quality, such as bacteria, viruses, nutrients, contaminants, and oxygen, in aqueous environments.

ENVE 598. Special Research Programs**1-3 Credits**

Individual investigations either analytical or experimental. May be repeated up to 6 credits.

ENVE 599. Master's Thesis**15 Credits**

Thesis. May be repeated for a maximum of 6 credits.

ENVE 630. Fate and Transport of Environmental Contaminants**3 Credits (3)**

Modeling of transport phenomena in natural and engineered systems for predicting the fate of contaminants in the air, soil, sediment, and water compartments of the ecosystem.

Prerequisite: ENVE 557.

Learning Outcomes

1. The students will be able to use mathematical models to model the transport of contaminants in gas, aqueous, and soil environments.

ENVS-ENVIRONMENTAL SCIENCE

ENVS 1110G. Environmental Science I**4 Credits (3+2P)**

Introduction to environmental science as related to the protection, remediation, and sustainability of land, air, water, and food resources. Emphasis on the use of the scientific method and critical thinking skills in understanding environmental issues.

Learning Outcomes

1. Students will learn to critically analyze cause-and-effect relationships in the environment
2. Students will integrate and synthesize knowledge and draw appropriate conclusions based on the scientific method

ENVS 2111. Environmental Engineering and Science**3 Credits (3)**

Principles in environmental engineering and science: physical chemical systems and biological processes as applied to pollution control. Crosslisted with: C E 256

Prerequisite: CHEM 1215G and MATH 1511G or ENGR 190.

Learning Outcomes

1. To understand the nature of water quality parameters in the context of Civil Engineering and Environmental Science (Water Treatment/Wastewater Treatment/Environmental Science) To learn to apply engineering and scientific solutions to water quality problems To understand environmental regulations and their consequences on the design of pollution control systems

ENVS 2111L. Environmental Science Laboratory**1 Credit (1)**

Laboratory experiments associated with the material presented in ENVS 2111. Same as C E 256 L.

Corequisite(s): ENVS 2111.

Learning Outcomes

1. List typical analyses commonly performed to evaluate physical, chemical, and microbiological parameters used to describe water quality.
2. Follow experimental procedures listed in the class laboratory manual, or other publications such as Standards Methods, to perform common water quality analyses.
3. Evaluate, analyze, and discuss experimental results and present the conclusions in the form of a professional report

ENVS 300. Special Topics**1-4 Credits**

Special subjects and credits to be announced in the Schedule of Classes. Consent of instructor required. Maximum of 4 credits per semester. Restricted to majors.

ENVS 301. Principles of Ecology**3 Credits (3)**

A survey of ecology including general theory, the adaptations of organisms, population dynamics, species interactions, and the structure and function of natural communities and ecosystems. Crosslisted with: BIOL 301

Prerequisite(s): BIOL 2610G, A ST 311, and grade of C or better in MATH 1511G or Math Placement Exam score adequate to enroll in mathematics courses beyond MATH 1511G.

ENVS 312. Emergency Response to Hazardous Material Incidents**2 Credits (2)**

EPA approved Environmental Response Training Program Course 165.15. In compliance with OSHA 29 CFR 1910.120. Normally taken during last year of study. Same as E T 312 and WERC 312.

Prerequisite: consent of instructor.

ENVS 361. Basic Toxicology**3 Credits (3)**

Same as TOX 361.

Prerequisite: CHEM 1120G or CHEM 1225G and BIOL 1190G.

ENVS 370. Environmental Soil Science**3 Credits (3)**

Continuation of SOIL 2110 that emphasizes soil properties and processes that directly relate to environmental pollution problems. Same as SOIL 370.

Prerequisite: SOIL 2110.

ENVS 391. Internship**3 Credits (3)**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. Maximum of 3 credits toward a degree. Consent of Instructor required. Graded: S/U Grading (S/U, Audit).

ENVS 422. Environmental Chemistry**3 Credits (3)**

Chemistry of organic and metal ion pollutants in the environment and principles important to their remediation including bioremediation. Restricted to: Main campus only. Crosslisted with: CHEM 422

Prerequisite(s): CHEM 1225G and either CHEM 2115 or CHEM 313.

ENVS 447. Seminar**1 Credit (1)**

Organization, preparation, and presentation of current topics in agronomy, environmental sciences, horticulture, and soil science. Crosslisted with: AGRO 447, HORT 447 and SOIL 447.

ENVS 449. Special Problems**1-3 Credits**

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and 6 credits toward a degree. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: E S majors.

ENVS 451. Special Topics**1-4 Credits (1-4)**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

ENVS 452. Geohydrology**4 Credits (3+2P)**

Origin, occurrence, and movement of fluids in porous media and assessment of aquifer characteristics. Development and conservation of ground water resources, design of well fields. Crosslisted with: C E 452 and GEOL 452.

ENVS 457. Water Measurement**3 Credits (3)**

The fundamentals of measuring water will be covered. Participants will learn about measurement techniques that are used to estimate evapotranspiration as well as commonly used water measurement structures to estimate water use. The benefits and problems that are associated with using each measurement will be discussed. Students will also learn about the principles of how to use water measurement as a management tool.

Prerequisite(s): MATH 1215 or higher, or consent of Instructor.

ENVS 460. Introduction to Air Pollution**3 Credits (3)**

An introduction to the physics and chemistry of tropospheric air pollution including sources of air pollution, local and long-range transport, instrumentation, regulatory requirements, control technology.

Prerequisite(s): PHYS 1310G, CHEM 1225G, MATH 1511G.

ENVS 462. Sampling and Analysis of Environmental Contaminants**3 Credits (1+6P)**

Theory, application, methodology, and instrumentation used in the sampling and analysis of environmental contaminants. Same as ENVE 462.

Prerequisites: ENVS 2111.

ENVS 470. Environmental Impacts of Land Use and Contaminant Remediation**3 Credits (3)**

The course will cover the integrated assessment of soil erosion, contaminant transport in soil and water, and contaminant remediation from site scale to watershed scales. Understanding of the controlling factors for each type land use impact will be gained through the use of risk assessment, case studies, and computer modeling. Case studies will illustrate the processes under various environmental applications. This course will also cover the application of solute transport principles and methods for the remediation of contaminated soil and groundwater. It will also discuss the contaminated site characterization, monitoring, and remediation design. Discussions of innovative methodologies will be supported with case studies. May be repeated up to 3 credits. Crosslisted with: WSAM 470.

Prerequisite(s): ENVS 2111, ENVS 370, ENVS 452, ENVS 462.

ENVS 471. Water Quality and Geochemistry**3 Credits (3)**

We will cover the connection of water chemistry with water quality and apply geochemical modeling to practical problems. Discussions of assessment methodologies will be supported with case studies. The focus of this course is on team-based project learning. Computer software and models (mainly PHREEQC from USGS) will be used to learn analysis techniques.

Prerequisite(s): ENVS 370 or ENVS 452 or consent of instructor.

ENVS 505. Research Orientation**4 Credits (4)**

Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: AGRO 505, HORT 505 and SOIL 505.

ENVS 557. Water Measurement**3 Credits (3)**

The fundamentals of measuring water will be covered. Participants will learn about measurement techniques that are used to estimate evapotranspiration as well as commonly used water measurement structures to estimate water use. The benefits and problems that are associated with using each measurement will be discussed. Students will also learn about the principles of how to use water measurement as a management tool.

ENVS 596. Masters Proposal**1 Credit (1)**

Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 596, GENE 596, HORT 596 and SOIL 596. Restricted to: Masters HORT; Masters PLEN majors.

Prerequisite(s): Master level graduate students.

ENVS 599. Master's Thesis**1-15 Credits**

Thesis Graded: Thesis/Disertation.

ENVS 605. Arid Land Water Resources**3 Credits (2+2P)**

The course will cover various issues of relevance to water resources and water supply management within the Southwest US and other semiarid and arid regions. Discussions may include development and sustainability, climate change and drought, socioeconomic and cultural, and transboundary issues. Students will develop literature reviews, draft proposals, and conduct presentations. May be repeated up to 3 credits. Crosslisted with: WSAM 605.

ENVS 696. Doctors Proposal**1 Credit (1)**

Current research proposal written by PhD level graduate students. Consent of Instructor required. Crosslisted with: AGRO 696, HORT 696 and SOIL 696. Restricted to: Doctors PLEN majors.

Prerequisite(s): PhD level graduate students.

ENVS 700. Doctoral Dissertation**1-15 Credits**

Dissertation Graded: Thesis/Disertation.

EPWS-ETMLGY/PLNT PTHLGY/WD SCI

EPWS 1110. Applied Biology**3 Credits (3)**

Introduction to applied biology and ecology focusing on insects, plants and pathogens in natural areas, crops and urban settings. EPWS 1110L is strongly recommended to take in the same semester. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. Students will learn about the Department of Entomology Plant Pathology and Weed Science and will have the opportunity to meet the Las Cruces-based faculty in the department.
2. By the end of this course students will have gained a broad understanding of the pests in a wide range of systems, their interactions with other organisms, and the methods available to minimize the influence of pests on target commodities.

EPWS 1110L. Applied Biology Lab**1 Credit (1)**

Study of applied biology and ecology of insects, plants and pathogens in natural areas, crops, and urban settings. EPWS 1110 strongly recommended to take in the same semester. May be repeated up to 1 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. Students will learn about the Department of Entomology Plant Pathology and Weed Science and will have the opportunity to meet the Las Cruces-based faculty in the department.
2. By the end of this course students will have gained a broad understanding of the pests in a wide range of systems, their interactions with other organisms, and the methods available to minimize the influence of pests on target commodities.

EPWS 2996. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

Learning Outcomes

1. Varies

EPWS 300. Special Topics**1-4 Credits**

Specific topics and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

EPWS 301. Agricultural Biotechnology**3 Credits (2+2P)**

The principles of molecular biology will be introduced and used to explore the past, present, and future applications of biotechnology in agriculture. Specific topics include methodologies for making transgenic plants with increased pest resistance, the use of biotechnology in pest detection, and improving nutritional value. The laboratory will provide students with hands-on experience with equipment used for biotechnology research.

Prerequisites: CHEM 1225G, BIOL 2610G, or BIOL 2110G.

EPWS 301 H. Agricultural Biotechnology Honors**3 Credits (3)**

The principles of molecular biology will be introduced and used to explore the past, present, and future applications of biotechnology in agriculture. Specific topics include methodologies for making transgenic plants with increased pest resistance, the use of biotechnology in pest detection, and improving nutritional value. The laboratory will provide students with hands-on experience with equipment use for biotechnology research. May be repeated up to 3 credits.

Prerequisites: CHEM 1225G, BIOL 2610G, or BIOL 2110G.

EPWS 302. General Entomology**4 Credits (4)**

An introduction to the biology and classification of insects. Lecture covers life histories, classification, ecology and behavior of insect orders and families. Laboratory focuses on identification of insect orders and families.

Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 302 H. General Entomology Honors**4 Credits (4)**

An introduction to the biology and classification of insects. Lecture covers life histories, classification, ecology and behavior of insects orders and families. Laboratory focuses on identification of insect orders and families. Students in the Honors section will be given the opportunity to enhance their understanding of entomology with a more detailed examination into the lives of these fascinating organisms.

Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 303. Economic Entomology**3 Credits (3+2P)**

Identification and life cycles of insects of economic significance, their relationship to humans and agriculture including biological interactions and controls. May be repeated up to 3 credits.

Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 310. Plant Pathology**4 Credits (3+2P)**

Causes and methods of prevention and treatment of diseases in plants.

Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 310 H. Plant Pathology Honors**4 Credits (4)**

Cause and methods of prevention and treatment of diseases in plants. Students with an Honors designation will have additional project and report assignments.

Prerequisite(s): BIOL 2610G, or BIOL 2110G.

EPWS 311. Introduction to Weed Science**4 Credits (3+2P)**

Principles of weed science, with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Identification of local weeds. Crosslisted with: AGRO 311.

Prerequisite(s): CHEM 1215G, and BIOL 2110G.

EPWS 311 H. Introduction to Weed Science Honors**4 Credits (4)**

Principles of weed science, with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Identification of local weeds. Students in the Honors section will be required to synthesize information from peer-reviewed journals pertaining to weed science. Crosslisted with: AGRO 311.

Prerequisite(s): CHEM 1120G, and BIOL 2110G.

EPWS 314. Plant Physiology**3 Credits (3)**

Overview of photosynthesis, respiration, water relations of plants, minerals and organic nutrition, growth and development. Same as BIOL 314.

Prerequisites: BIOL 2110G, CHEM 1225G.

EPWS 314 H. Plant Physiology Honors**3 Credits (3)**

Overview of photosynthesis, respiration, water relations of plants, minerals and organic nutrition, growth and development. Students with an Honors designation will have additional assignments that require them to synthesize information from primary literature sources.

Prerequisite(s): BIOL 2110G, CHEM 1225G.

EPWS 325V. Insects, Humans, and the Environment**3 Credits (3)**

Overview of the interactions of the world's largest group of organisms with humans. Emphasizing the role of insects in the development of human cultures, including health, food and fiber production, art, music, and environmental issues; with discussions of historic, present day, and future impacts in underdeveloped, developing, and developed civilizations.

EPWS 373. Fungal Biology**3 Credits (2+2P)**

Introduction to the taxonomy, morphology, physiology, and ecology of fungi. Same as BIOL 373.

Prerequisites: EPWS 310 or BIOL 311, or consent of instructor.

EPWS 380 H. Science and Society Honors**3 Credits (3)**

Analysis and evaluation of how human activities affect the earth's environment and ecosystems. Examples of issues (local to global) will be examined in detail. Current science and the intersection of science and society will be discussed in relation to problems like world population, agricultural productivity, deforestation, climate change, medical advances and challenges, using fact based critical thinking approaches. Critical thinking and writing skills will be emphasized in independent assignments. Students seeking honors credit will perform additional work.

Prerequisite(s): Honors eligibility requirements.

EPWS 380V. Science & Society**3 Credits (3)**

Analysis and evaluation of how human activities affect the earth's environment or ecosystems. Several examples, from global issues to local issues will be studied in detail. Current science and the intersection of science and public policy will be discussed in relation to problems like world population, agricultural productivity, deforestation, medical advances, and future prospects for the environment. May be repeated up to 3 credits.

EPWS 390. Internship**1-3 Credits**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. Maximum of 3 credits. Graded S/U.

Prerequisite: consent of instructor.

EPWS 420. Environmental Behavior of Pesticides**3 Credits (3)**

Behavior of pesticide compounds in the environment, their function toward target and non target pest organisms including humans, effect of environmental conditions on pesticide function, ecology of organisms involved in pesticides degradation, overview of environmental regulation. CHEM 2115 recommended prior to course. May be repeated up to 3 credits.

EPWS 447. Seminar**1 Credit (1)**

Organization and techniques for the oral presentation of research information. Restricted to: Main campus only.

EPWS 447 H. Seminar Honors**1 Credit (1)**

Organization and techniques for the oral presentation of research information. Students taking EPWS 447 H will have the additional assignment of making a poster on either scientific research or a scientific topic.

Prerequisite(s): Honors eligibility requirements.

EPWS 449. Special Problems**1-3 Credits**

Individual investigation in specific areas of entomology, plant pathology or plant physiology. Maximum of 3 credits per semester and a grand total of 6 credits.

EPWS 451. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

Prerequisite: consent of instructor.

EPWS 455. Advanced Integrated Pest Management**3 Credits (3)**

Examination of factors affecting the biology and ecology, population evaluations, and control of insect, disease, and weed pests with an emphasis on integrating management practices. Credit cannot be given for both EPWS 455 and EPWS 505. Crosslisted with: EPWS 505.

Prerequisite(s): Either EPWS 303 or EPWS 310 or EPWS 311, or consent of instructor.

EPWS 456. Biological Control**3 Credits (3)**

Principles of plant and animal suppression using living organisms. Interaction of biological control organisms with biotic and abiotic factors will be stressed. Credit cannot be given for both EPWS 456 and EPWS 506.

Prerequisite: introductory course in entomology.

EPWS 462. Parasitology**3 Credits (3)**

Introduction to classification, biology, ecology and management of the major parasites of human, domestic animals and wildlife.

EPWS 462 L. Parasitology Lab**1 Credit (1)**

Introduction to classification, biology, ecology and management of the major parasites of human, domestic animals and wildlife. May be repeated up to 1 credits.

EPWS 471. Plant Mineral Nutrition**3 Credits (3)**

Same as HORT 471 and AGRO 471.

EPWS 475. Urban Entomology**3 Credits (3)**

Study of insects and related arthropods in urban settings, about their impact on humans and damages to building. Principles of Integrate Pest Management (IPM) strategies with emphasis on current control techniques for detection, control and monitoring. May be repeated up to 3 credits.

Prerequisite(s): Either BIOL 2610G or BIOL 2110G.

EPWS 486. Plant Virology**3 Credits (3)**

An overview of viral pathogens associated with infectious plant disease. Includes pathogens, replication, genetics, transmission, and movement of plant viruses.

EPWS 492. Diagnosing Plant Disorders**3 Credits (2+3P)**

Systematic diagnosis of the physiological, pathological, and entomological causes of plant disorders. Same as AGRO 492 and HORT 492.

Prerequisites: EPWS 303, EPWS 310.

EPWS 502. General Entomology**4 Credits (4)**

An introduction to the biology and classification of insects. Lecture covers life histories, classification, ecology and behavior of insect orders and families. Laboratory focuses on identification of insect orders and families.

Prerequisite(s): Either BIOL 2610G or BIOL 2110G.

EPWS 505. Advanced Integrated Pest Management**3 Credits (3)**

Examination of the factors affecting the biology and ecology, population evaluations, and control of insect, disease, and weed pests, with an emphasis on integrating management practices. Crosslisted with: EPWS 455.

Prerequisite(s): EPWS 303 or EPWS 310 or EPWS 311 or consent of instructor.

EPWS 506. Biological Control**3 Credits (3)**

Principles of plant and animal pest suppression using living organisms. Interaction of biological control organisms with biotic and abiotic factors will be stressed. Individual paper or project required. Credit cannot be given for both EPWS 456 and EPWS 506.

Prerequisite: introductory course in entomology.

EPWS 510. Plant Pathology**4 Credits (4)**

Cause and methods of prevention and treatment of diseases in plants. Projects and reports will be adjusted to graduate level status.

Prerequisite(s): Graduate status.

EPWS 511. Introduction to Weed Science (f)**4 Credits (3+2P)**

Covers the principles of weed science with emphasis on characteristics of invasive plants, methods of integrated weed management, and current issues impacting weed management. Includes identification of local weeds. Research paper required for graduate credit. Crosslisted with: AGRO 511.

Prerequisite(s): CHEM 1215G and BIOL 2110G.

EPWS 514. Plant Physiology**3 Credits (3)**

Overview of photosynthesis, respiration, water relations of plants, minerals and organic nutrition, growth and development.

Prerequisite(s): BIOL 2110G, CHEM 1225G.

EPWS 520. Environmental Behavior of Pesticides (so)**3 Credits (3)**

Behavior of these compounds in the environment, their function toward target and non target pest organisms including humans, effect of environmental conditions on pesticide function, ecology of organisms involved in pesticides degradation, overview of environmental regulation. CHEM 2115 recommended prior to course. May be repeated up to 3 credits.

EPWS 525. Scientific Writing- How to be a Productive and Effective Writing**1-3 Credits (1-3)**

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Crosslisted with: AGRO 525, HORT 525 and SOIL 525.

EPWS 549. Special Problems**1-4 Credits**

Individual investigation in specific areas of entomology, plant pathology, and weed science. Maximum of 4 credits per semester and a total of 6 credits.

EPWS 551. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

EPWS 573. Fungal Biology**3 Credits (2+2P)**

Introduction to the taxonomy, morphology, physiology, and ecology of fungi. Same as BIOL 573.

Prerequisite: EPWS 310 or consent of instructor.

EPWS 575. Urban Entomology**3 Credits (3)**

Study of insects and related arthropods in urban settings, about their impact on humans and damages to building. Principles of Integrate Pest Management (IPM) strategies with emphasis on current control techniques for detection, control, and monitoring.

Prerequisite(s): Either BIOL 2610G or BIOL 2110G.

EPWS 590. Graduate Seminar**1 Credit (1)**

Review of current scientific literature in entomology, plant pathology, and weed science, and verbal presentation of information. No more than 2 credits toward a degree.

EPWS 598. Graduate Internship**1-6 Credits**

Supervised professional on-the-job learning experience. Limited to Master of Agriculture candidates. Not more than 6 credits toward the degree.

EPWS 599. Master's Thesis**15 Credits**

Thesis.

FCSC-FAMILY & CONSUMER SCI

FCSC 2250. Overview of Family and Consumer Sciences Teaching

3 Credits (3)

Overview of planning and teaching skills. Supervised experiences in observing and directing the learning of secondary family and consumer sciences students. Philosophy and history of the profession.

Learning Outcomes

1. Explain the foci of FCS—past, present and future.
2. Begin to develop a professional role in FCS.
3. Formulate a personal philosophy of FCS, and of teaching.
4. Explain the teaching process.
5. Give examples of roles, responsibilities and qualities of effective and ethical teachers.
6. Assess the characteristics, backgrounds, and needs of learner audiences.
7. Explain various learning theories/principles.
8. Illustrate how various input factors influence teaching decisions.
9. Plan a researched based student-centered lesson with a learning activity in a FCS content area.
10. 1 Give examples of ways to evaluate learner growth.
11. 1 Present a FCS content-based lesson effectively to learners using PowerPoint presentation software and a selected teaching method.
12. 1 Evaluate one's own teaching and the teaching of others.
13. 1 Exhibit increased confidence in one's abilities as a teacher/educator.
14. 1 Exhibit excitement about assuming the teacher/educator role.

FCSC 2330. Housing and Interior Design

3 Credits (3)

Investigation of types of housing and factors impacting housing decisions for families. Selection, planning, and arrangement of interior components of homes to meet the needs of the family. Restricted to Las Cruces campus only.

Learning Outcomes

1. Differentiate between different architectural designs (i.e., Cape Cod, contemporary, craftsman, ranch, southern colonial, Spanish, Victorian, pueblo, New Mexican territorial, and territorial revival) and be able to identify historical, cultural, demographic, geographical, and environmental influences on style and aesthetics.
2. Analyze the fundamentals of housing for all families and cultures and understand the role housing plays in the ecological model of human ecology.
3. Define elements of design as related to housing and interiors (i.e., color, form, line, space texture).
4. Define principles of design as related to housing and interiors (i.e., balance emphasis, harmony, proportion, unity).
5. Compare and contrast the different periods of interior design from the 20th century to the present.
6. Analyze the influence of historical and cultural factors in the development of current interior trends.
7. Select and arrange interiors that are functional and aesthetically pleasing to designated interior design situations.
8. Identify, describe and make application of textiles as related to various furniture and interior design styles.
9. Design a three-dimensional tiny house or an interior space, using all concepts learned.

FCSC 345. Management Concepts in Family and Consumer Sciences Teaching

3 Credits (3)

Incorporation and application of management concepts in family and consumer sciences subject matter. Practical experience teaching management and ways to use management skills to plan, implement, and evaluate the teaching-learning transaction.

FCSC 348. Teaching in Informal Family and Consumer Sciences Settings

3 Credits (3)

Learning principles and theories with application in informal family and consumer sciences education situations. Includes supervised experience in use of teaching strategies.

Prerequisite: overall GPA of at least 2.5 or consent of instructor.

FCSC 400. Research Methods in Family and Consumer Sciences

3 Credits (3)

Introduction to research design and methodology in Family and Consumer Sciences. Overview of common research designs and data collection strategies. Prepares students to critique published research and perform basic skills including hypotheses development and conducting a literature search.

FCSC 445. Career and Technical Education Programs**3 Credits (3)**

History and development of career and technical programs. Ancillary functions of family and consumer sciences teachers, including student evaluation and leadership development for students. Experiences in extension programs and teaching. Ethical issues and concerns of educators are introduced. Lifelong leadership development and evaluation tools for educators are explored. May be repeated up to 3 credits.

FCSC 446. Teaching Methods I for Family and Consumer Sciences**3 Credits (3)**

Methods and strategies for teaching Family & Consumer Sciences content in middle and secondary schools. Organization and development of curriculum. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): FCSC 2250 and FCSC 345 and an overall GPA of 2.75, admitted to FCSE program; completion of NES Essential Basic Skills Tests I, II, & III.

Corequisite(s): FCSC 445.

FCSC 447. Teaching Methods II for Family and Consumer Sciences**3 Credits (3)**

Planning, preparation, and strategies for teaching family and consumer sciences in middle and secondary schools. Preparation for employment. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: FCSE majors.

Prerequisite(s): FCSC 446; overall GPA of 2.75, admitted to program.

FCSC 448. Supervised Teaching in Family and Consumer Sciences**12 Credits (12)**

Seventy (70) days of full-time supervised teaching in selected middle or secondary schools. May be repeated up to 12 credits. Consent of Instructor required. Restricted to: FCSE majors.

Prerequisite(s): FCSC 446, an overall GPA of 2.75, and admitted to FCSE Program.

Corequisite(s): FCSC 447.

FCSC 492. Special Problems**1-4 Credits**

Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and 6 credits toward degree.

FCSC 500. Research Methods**3 Credits (3)**

This course covers the critical evaluation of research literature, development of research proposals and principles of program evaluation. Students will be introduced to the application of qualitative or quantitative methods. Students will be expected to develop research questions and test hypotheses using statistical analysis and a variety of methodologies.

FCSC 545. Graduate Study in Vocational Programs for Youth and Adults**3 Credits (3)**

History and development of career and technical programs. Ancillary functions of family and consumer sciences teachers, including student evaluation and leadership development for students. Experiences in extension programs and teaching. Ethical issues and concerns of educators are introduced. Lifelong leadership development and evaluation tools for educators are explored. May be repeated up to 3 credits.

FCSC 546. Graduate Study in Teaching Methods I**3 Credits (3)**

Objectives, content, and organization of family and consumer sciences in high schools; materials and methods of teaching. Additional assignments beyond FCSC 446 required for students registering in FCSC 546.

FCSC 547. Graduate Study in Teaching Methods II**3 Credits (3)**

Planning, preparation, and strategies for teaching family and consumer sciences in the secondary schools. Additional assignments beyond FCSC 447 required for students registering in FCSC 547.

FCSC 548. Graduate Study in Supervised Teaching in Family and Consumer Sciences**12 Credits (70P)**

Seventy of full-time, supervised teaching in selected schools. Additional assignments beyond FCSC 448 required for students registering in FCSC 548. Consent of Instructor required.

Prerequisite(s): FCSC 446 or FCSC 546, and consent of instructor.

FCSC 590. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits toward a degree, 4 credits per semester.

FCSC 598. Special Research Programs**1-4 Credits**

Individual investigations, either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree.

FCSC 599. Master's Thesis**1-15 Credits**

May be repeated for unlimited credit, maximum of 6 credits toward a degree.

FCST-FAMILY AND CHILD STUDIES

FCST 1130. Interpersonal Skills in Intimate Relationships**3 Credits (3)**

Developing social skills within friendships, dating relationships, marriage, parenting, and families.

Learning Outcomes

1. To understand several theories that explain why some people have healthy interpersonal relationships while others do not.
2. To gain insight about one's self.
3. To learn and improve upon selected relationship skills that improve quality of life.
4. To learn skills that improve interpersonal relationships

FCST 2110. Infancy and Early Childhood in the Family**3 Credits (3)**

Research and theory relevant to prenatal development and the physical, mental, and socio-emotional development of the child from birth to age five. Attitudes, knowledge, and skills needed for working with young children and their families. Restricted to Las Cruces campus only.

Learning Outcomes

1. Evaluate how genes and the environment interact to impact human development. Describe the major events during the three periods of prenatal development. Assess the effects of environmental influences on the developing fetus. Outline the stages of birth and medical interventions that may be used. Discuss the capacities of the newborn baby. Evaluate how individuals and couples change during the transition to parenthood. Analyze the physical, cognitive, and social-emotional development of the child from birth through age 5. Formulate ways that parents and professionals can promote the development of the child from birth to age 5

FCST 2135. Adolescent Development and the Family**3 Credits (3)**

Research and theory relevant to the physical, mental, social, and emotional development of the children ages 12 to 18. Attitudes, knowledge, and skills related to working with adolescents in the family system. Observation in a variety of settings may be required. Restricted to Las Cruces campus only.

Learning Outcomes

1. Compare adolescents of today with adolescents of the past.
2. Describe the physical, cognitive, and psychosocial development of the adolescent in the family system and evaluate individual differences in development.
3. Compare and contrast ways in which culture impacts adolescent development.
4. Assess effective parenting strategies with adolescents.
5. Analyze the influence of family, peers, school, and work on adolescent development.

FCST 2140. Adult Development and Aging**3 Credits (3)**

Research and theory related to the physical, mental, social, and emotional development of older adults. Attitudes, knowledge, and skills related to working with older adults in the family system, including normative, and nonnormative transitions. Restricted to Las Cruces campus only.

Learning Outcomes

1. Compare and contrast theories of adult development and aging and apply theories to adult behavior.
2. Distinguish the similarities and differences of physical, emotional, cognitive, and psychosocial aspects of adult development.
3. Describe multicultural factors that impact attitudes toward aging and coping with aging family members.
4. Evaluate ways in which special issues (including but limited to Alzheimer's Disease, heart disease, end of life issues) impact aging.
5. Devise a conceptualization of one's own perspective in dealing with aging and aging family members.

FCST 300. Special Topics**1-4 Credits**

Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

FCST 301. Family Resource Management**3 Credits (3)**

This course provides an understanding of the decision-making process of families concerning the utilization of financial, personal, environmental, and social resources. In particular, the class will focus on how families develop, exchange, and allocate resources throughout the lifespan with the expectation that the most effective resource management decisions are made from positions of knowledge and understanding. May be repeated up to 3 credits.

FCST 380. Family Dynamics**3 Credits (3)**

The dynamics of family relationships and changes influencing contemporary families. Interaction between the family and other social systems will be examined. Open to nonmajors.

FCST 383. Parenting and Child Guidance**3 Credits (3)**

Theories, principles, and skills essential for parents and professionals in guiding children within the family system. Problem prevention techniques are stressed.

FCST 424. Field Experience: Issues and Ethics**3 Credits (3)**

Supervised work experience in community agencies providing services to family systems. Discussion of professional issues and ethical dilemmas. A total of 6 credits must be taken. Restricted to: FCS majors. Students must be in junior standing to enroll.

Prerequisite: FCST 380 or equivalent, and an overall GPA of at least 2.5.

Learning Outcomes

1. Upon completion of this course students will be able to integrate learning into applied settings.

FCST 449V. Family Ethnicities and Subcultures**3 Credits (3)**

Comparative study of American family subsystems with respect to selected social, economic, and cultural backgrounds. Interaction of these subsystems in American society. Differentiated assignments for graduate students.

FCST 456. Research Methods**3 Credits (3)**

Introduction to research design and methodology in education and behavioral sciences. Overview of common research designs and data collection strategies. Prepares students to critique published research and understand basic skills including hypothesis development and conducting a literature search. Same as AXED 456.

FCST 492. Special Problems**1-4 Credits**

Individual research in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 6 credits.

FCST 510. Infancy and Early Childhood in the Family**3 Credits (3)**

Research and theory relevant to prenatal development and the physical, mental, and socio-emotional development of the child from birth to age 5. Attitudes, knowledge, and skills needed for working with young children and their families. May be repeated up to 3 credits.

FCST 511. Middle Childhood Development in the Family**3 Credits (3)**

Research and theory relevant to the physical, mental, and socio-emotional development of children from ages five to twelve. Attitudes, knowledge, and skills needed for working with school-age children and their families. May be repeated up to 3 credits.

FCST 524. Supervised Practicum**1-9 Credits**

Supervised experience in organizations providing services to families and children. Course subtitled in the Schedule of Classes. May be repeated for a maximum of 9 credits. Graded S/U.

Prerequisite: consent of instructor.

FCST 525. Supervised Clinical Practice**1-9 Credits (2-18P)**

Supervised clinical experience in Marriage and Family Therapy. Includes reviews of audio, video, and/or live sessions and case presentations. Maximum of 9 credits toward a degree. May be repeated up to 20 credits.

FCST 548. Adult Development and Aging**3 Credits (3)**

Advanced study in research and theory related to the physical, mental, social, and emotional development of older adults. Attitudes, knowledge, and skills related to working with older adults in the family system, including normative and non-normative role transitions.

FCST 562. The Business and Practice of Marriage and Family Therapy**1 Credit (1)**

This seminar course will provide students with an overview of the business and practice of Marriage and Family Therapy to the end that they will understand how to develop and maintain a private practice in the field of MFT. Restricted to: FCS (MFT) majors. Graded: S/U Grading (S/U, Audit).

FCST 572. Family Dysfunction and Diagnosis**3 Credits (3)**

A study of the development of abnormal behavior patterns and characteristics to include the major mental and personality disorders and how these can influence and impact family systems. Emphasis is on the symptomology and/or life circumstances and events described in the various diagnostic categories.

Prerequisite(s): Students must be enrolled in a clinical program (i.e MFT, CEP, MSW).

FCST 582. Theories of Marriage and Family Therapy**3 Credits (3)**

A balanced study of major theories, research, applications and principles of marriage and family therapy. This course will examine major therapy models and the theories they are derived from as well as the effectiveness of specific therapy models for specific mental health disorders through research.

FCST 583. Parenting and Child Guidance**3 Credits (3)**

Theories, principles, and skills essential for parents and professionals in guiding children within the family system. Problem prevention techniques are stressed.

FCST 584. Family Law and Ethics**3 Credits (3)**

Study of selected aspects of federal and state laws and ethical issues as they relate to the family system.

FCST 585. The Family System**3 Credits (3)**

Contemporary family interaction: concepts, composition, resource and environment.

FCST 586. Sexuality and Family Dynamics**3 Credits (3)**

Psychosocial and physiological aspects of human sexuality from a life span and family systems perspective.

FCST 587. Contemporary Marriage and Family Issues**3 Credits (3)**

Investigation of one of the following topics each semester: dual career marriages, nontraditional relationships, aged in marriage.

FCST 589. Family Crises and Rehabilitation**3 Credits (3)**

Examination of the major crises experienced by families. Emphasis on family system functioning rather than individual functioning. Preventative measures, positive coping strategies, and therapeutic intervention approaches examined.

FCST 590. Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree.

FCST 592. Strategies in Family Therapy**3 Credits (3)**

Effective intervention strategies in family therapy practice. Live and taped role plays of interventions for various family problems required. Constructive approaches for working with family systems and third-party payers.

FCST 598. Special Research Programs**1-4 Credits**

Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree.

FCST 599. Master's Thesis**15 Credits**

Thesis

FDMA-FILM & DIGITAL MEDIA ARTS

FDMA 1110. Film History

3 Credits (3)

This course surveys the history of cinema -investigating the process by which the original "cinema of attractions" evolved into a globally dominant form of visual storytelling. We will explore the development of cinema both as an art form and as an industry, and consider the technological, economic, cultural factors, and key international movements that shape it.

Learning Outcomes

1. Develop appreciation for the history of cinema.
2. Develop knowledge of the key eras in the history of US cinema.
3. Learn the characteristics of major movements in international cinema.
4. Explain technological innovations that were necessary for, and integral to, the advancement of cinema.
5. Recognize the various elements that go into telling a story in cinema.

FDMA 1120. Desktop Publishing

3 Credits (2+2P)

This course is designed to teach introductory skills for designing and creating publications and presentations with layout software. The course will focus on graphics and typographic design, fonts, and other skills for print and web publishing.

Learning Outcomes

1. Demonstrate knowledge of fundamental features and navigation of desktop publishing software.
2. Combine text and images for effective communication.
3. Develop a balanced composition through use of color, contrast, and alignment.
4. Place images within a composition and wrap around text.
5. Produce documents with professional layout and typography skills.
6. Create attractive and effective designs.
7. Combine knowledge of typography, images, and design principles to produce professional print and web media.
8. Create or add to a professional design portfolio for future use.

FDMA 1210. Digital Video Production I

3 Credits (2+4P)

An introduction to digital video production. Students learn camera operation, lights and audio equipment. Hands-on production is completed in the studio and on location.

Learning Outcomes

1. Plan and produce a digital video project
2. Apply post-production workflow
3. Work in team and as individual to complete digital video projects.

FDMA 1220. Introduction to Digital Video Editing

3 Credits (3)

In this course, students learn the basics of the post-production process for non-linear video editing. Students work with multiple video formats and create short movies for multiple distribution platforms. Skills include media management and professional terminology. Sections on the Main Campus will be restricted to CMI students.

Learning Outcomes

1. Define concepts related to digital video editing.
2. Use non-linear video editing software for editing a short film
3. Enhance storytelling through the use of continuity, timing, cutaways, intercutting, compositing, transitioning, jump cutting, montaging and animating.
4. Use text, titles, transitions, video effects, sound effects, dialogue, and visual assets for digital video editing.

FDMA 1260. Introduction to Digital Media**1-3 Credits (1-3)**

Explores concepts of how text, graphics, sound, images and video come together in a digital media program and researching new trends and current issues related to media applications and design. Students will be involved in teamwork, communication and workplace interaction simulation . May be repeated up to 12 credits. Restricted to Community Colleges campuses only.

Learning Outcomes

1. Describe and identify the principal components and terminology of digital media.
2. Analyze and examine the use of digital media as a communication tool
3. Plan and implement a digital media project
4. Critique professional digital media products.
5. Create projects using a variety of digital media tools
6. Demonstrate a working knowledge of copyright and usage rights
7. Present completed projects in a professional manner for critique.

FDMA 1360. Web Design I**3 Credits (2+2P)**

This course provides an introduction to web development techniques, theory, and design. Students will learn HTML, CSS application, and strategies for effective site navigation and design, along with industry standard web editing software to develop various websites. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): ARTS 1520 OR FDMA 1515.

Learning Outcomes

1. Acquire and utilize web design terminology.
2. Create basic web pages using HTML.
3. Demonstrate how to use industry-standard, web editing software.
4. Design professional pages that are easy to navigate and quick to load.
5. Develop a basic comprehension of CSS
6. Prepare and export a variety of graphics to be used online.
7. Compare and contrast designing for web media vs. print media.
8. Analyze the importance of web presence in today's business/social climate

FDMA 1410. Audio Production I**3 Credits (2+2P)**

Students will learn about and apply essential tools and techniques in analog and digital audio production. Topics include acoustic science, microphones, recording and mixing techniques, analog and digital audio hardware and software, including, multi-track, computer-based recording and editing systems. Restricted to: Community Colleges only.

Prerequisite(s): FDMA 1210 and FDMA 2410.

Learning Outcomes

1. Apply tools and techniques in analog and digital audio production
2. Illustrate the fundamentals of acoustic science.
3. Model professional behavior used in audio recording.

FDMA 1415. Principles of Sound**3 Credits (2+2P)**

The creation of a professional quality original media soundtrack is possible for relatively low production/post production cost. This class is designed to give the student and overview of creating sound for a variety of digital media. Topics include acoustic principles, sound design, audio hardware, recording techniques; and editing, processing, and multi-track mixing, using software applications. Restricted to: Community Colleges only.

Prerequisite(s)/Corequisite(s): FDMA 1220.

Learning Outcomes

1. Record and edit wild sound effects and synced dialogue
2. Discover, upload, and edit on-linemusic, ambience and sound effect loops
3. Implement audio design theories
4. Create an aesthetic soundtrack which incorporates multiple elements and dimensions
5. Design, edit, process, mix and master a synced multi-track soundtrack
6. Demonstrate capable use of digital audio production and post-production workflow
7. Produce short audio projects which meet media industry technical standards

FDMA 1510. Introduction to 3D Animation**3 Credits (3)**

This course provides an overview of 3D animation production processes. Students will be introduced to basic story development and the creation of computer-generated assets and cinematic sequences. The course will survey specialty areas of digital animation and various software and techniques applied in entertainment and information media. Students will review and critique other's animation, as well as plan and produce original animation for review by classmates and as part of a CGI demo reel.

Prerequisite(s): FDMA 2382 or FDMA 2381 or consent of instructor.

Learning Outcomes

1. Demonstrate a fundamental understanding of 3D animation history and principles.
2. Analyze animation work of other artists.
3. Appropriately utilize the various media technologies for digital 3D animation.
4. Demonstrate and apply basic techniques of digital 3D animation.
5. Demonstrate and apply basic processes of creating CGI for a narrative.
6. Apply some basic strategies for developing and creating a story visually, and create original animations.
7. Present original animations to instructor and classmates for critique.
8. Create a CGI demo reel of work completed during the course.

FDMA 1515. Introduction to Digital Image Editing - Photoshop**3 Credits (2+2P)**

In this course, students will learn how to use the tools in Adobe Photoshop to create new images and edit existing images. Tools used will include selections, layers, and adjustments, among other pixel editing tools. Basic composition and output will be emphasized in all projects. May be repeated for a maximum of 6 credits.

Learning Outcomes

1. Make and refine selections
2. Adjust color and tone in an image
3. Eliminate unwanted objects in an image
4. Apply layers to organize and create effects
5. Create brushes, styles and vector shapes
6. Prepare image for print and screen output
7. Apply masking and layers to non-destructively edit an image
8. Effectively utilize blending modes and layer styles
9. 1Apply adjustment layers
10. 1Apply design principles including typography

FDMA 1531. Evolution of Electronic Games**3 Credits (2+2P)**

Focus on the evolution of video games and how they have shaped mainstream entertainment. May be repeated up to 6 credits.

FDMA 1535. Introduction to Illustrator**3 Credits (2+2P)**

Students receive instruction on vector graphics creation using vector illustration software. The students will create professional-quality artwork for print publishing and multimedia graphics. Instruction includes creating and manipulating basic shapes, drawing with the pen tool, using various brushes, working with type and preparing graphics for web, print, and digital publication. May be repeated for a maximum of 6 credits.

Learning Outcomes

1. Apply a variety of shape blending options
2. Create and apply new gradients
3. Apply Gradient Meshes and Envelopes
4. Create symbols, brushes and vector shapes
5. Apply Pathfinder and other effects
6. Effectively utilize the pen tool to draw and edit shapes
7. Effectively utilize Vector tools
8. Prepare image for print and screen output
9. Apply clipping masks
10. 1Prepare image for use in another program
11. 1Apply design principles including typography

FDMA 1536. Advanced Computer Illustration**3 Credits (2+2P)**

Advanced techniques in 2D vector drawing and fundamentals of 3D illustration for use in print, web, and multimedia applications. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): FDMA 1535.

Learning Outcomes

1. Demonstrate proficiency in using advanced features of Illustrator.
2. Identify and create different illustrator/art styles using advanced techniques for shading, perspective, light, reflection.
3. Produce high quality digital imagery incorporating basic principles of composition.
4. Create a series of illustrations demonstrating a design competency in layout foundation and illustrative moods or client/project based solutions.
5. Create high quality portfolio pieces that demonstrate an advanced knowledge of design, composition and Illustrator techniques.
6. The students will produce finished printed portfolio pieces demonstrating a comprehensive knowledge of typographical, design, illustrative and layout skills

FDMA 1545. Introduction to Photography & Digital Imaging**3 Credits (2+2P)**

This course is a study of the principles and techniques of photography using digital equipment, and discusses how digital cameras, imaging editing, and technology have changed the world of photography. Students will learn about studies in resolution, lighting, software, editing, printing, and web applications. They will gain fundamental knowledge in the rapidly expanding technology of photography and imaging, and be able to incorporate the knowledge into all areas of digital graphics.

Learning Outcomes

1. Exhibit proper usage of the principles and techniques of photography using digital equipment.
2. Utilize features and techniques of a digital camera with proper use of lenses, settings, and flashes.
3. Create photo collections that represent proper use of technical skills.
4. Demonstrate proficiency in planning, lighting, capturing, and distributing photographic projects which show ability to create photographs artistically and to tell a story or express an idea.
5. Utilize appropriate software to create original projects.
6. Demonstrate knowledge in post-production of photos as to sizing, sampling, resolution, and exporting.
7. Produce original projects which respect intellectual property of others.
8. Create a digital portfolio of work completed during the course.

FDMA 1555. Introduction to the Creative Media Industry**3 Credits (3)**

This class is an introductory course for students who are beginning their understanding of Media and how it affects them and our society. It offers a broad-stroked view of the entire industry including Marketing, Production, History, Jobs, Design, Architecture, New Media Literacy, and industry standards. Students will listen to experts in the field, get involved in open discussions about the industry and use new information to complete hands-on individual & group assignments.

Learning Outcomes

1. The basic philosophies and methods that guide people working in the Creative Media industry.
2. Knowledge of a wide variety of different jobs, qualifications and paradigms used in the industry.
3. Marketing, Production, Budgets, History, New Media, Inspiration and other aspects of the industry.
4. An accurate view of the Creative Media field.

FDMA 1630. Principles of Design**3 Credits (2+2P)**

This course will explore how we see and use visuals to communicate information. Students will develop critical thinking skills in applying concepts of basic design principles. Students will apply the concepts with hands-on and analysis assignments. These concepts will then be applied to design for advertising, print, digital media, and web design. The business of design will also be covered with emphasis on client relations and networking. Restricted to: Community Colleges only. Prerequisite(s): FDMA 1535

Learning Outcomes

1. Practice Creativity
2. Plan a Design project
3. Demonstrate the effective use of Emphasis Contrast
4. Demonstrate the effective use of Balance and Alignment
5. Demonstrate the effective use of Harmony and Repetition
6. Demonstrate the effective use of Flow, Movement, and Rhythm
7. Demonstrate the effective use of Simplicity and Economy
8. Effectively apply basic color theory
9. Demonstrate the effective use of Typography principles
10. 1Apply design principles to Screen Print Projects
11. 1Develop client relations

FDMA 1710. 2D Animation**3 Credits (2+2P)**

Concepts and techniques in storyboarding and creating interactive 2D animations for web, multimedia and video.

Prerequisite(s): FDMA 1535.

Learning Outcomes

1. Be able to correctly storyboard an animation scene
2. Define and demonstrate basic animation terminology and principles.
3. Produce a complete hand drawn animation using industry standard software and processes.

FDMA 1715. 2-D COMPOSING & FX**3 Credits (3)**

The purpose of this course is to familiarize students with the powerful compositing and special effects tools of Adobe After Effects for 2D, traditional animation. Students will learn how to assemble an existing un-rendered animation into a final piece with advanced 3D lighting, spacing, and digital effects so that it can achieve a dynamic, professionally rendered look. Restricted to Las Cruces campus only.

Learning Outcomes

1. The goal of this class is for students to learn how to use advanced compositing and effects tools in order to achieve a more dynamic and professional visual look for their animations or motion graphics.
2. By the end of the class, you should be proficient animation compositors that can assemble and
3. synthesize a basic animation into a rendered, visually sophisticated piece.
4. Students who pass this class will have a basic to intermediate knowledge of Adobe After Effects

FDMA 1720. 3-D Character Design**3 Credits (2+4P)**

Focus on designing a character and then taking that design and building it in 3D using intermediate modeling techniques. May be repeated for a maximum of 6 credits.

Prerequisite(s): FDMA 1510 or FDMA 2530.

Learning Outcomes

1. Translate concept art into a low and high resolution 3D model using proper modeling techniques
2. Use Polygon modeling techniques to create a 3D character
3. Layout UVs and utilize Adobe Photoshop to texture a model.

FDMA 1996. Selected Topics**1-4 Credits (1-4)**

Specific titles to be announced in the Schedule of Classes. May be repeated for a maximum of 18 credits. Restricted to Community Colleges campuses only.

Learning Outcomes

1. Varies

FDMA 2111. Environmental Scene Design**3 Credits (2+4P)**

Modeling design techniques used to create environments and scenes for use in animated films and games. Investigation of both natural and architectural environments to be recreated in the virtual world.

Prerequisite(s): FDMA 1510 or FDMA 2530.

FDMA 2120. Film Crew I/ Introduction to Film and Media Workflow**9 Credits (9)**

An introduction to the film industry. This class teaches film production processes, film crew hierarchy, film production set-safety and etiquette and provides hands-on training in industry standard film production equipment. Students complete the semester by participating as a below-the-line crew member on a short film. Restricted to: Community Colleges only.

Learning Outcomes

1. Explain film production processes; Interpret call sheets and deal memos, model basic on-set protocols and professional behavior
2. Assist producers and directors in completing a professional film project
3. Work effectively in production crew positions in a group environment.
4. Recognize and articulate specific film production structure, from original concept to final release

FDMA 2125. Film Crew II**9 Credits (9)**

The second course designed to train students to become working members of film crews. It will be taught by working film professionals. Content will be lecture and hands-on. Students complete the semester by working as part of an actual film crew as below-the-line and above-the-line crew members. Restricted to: Community Colleges only.

Prerequisite(s): FDMA 2120.

Learning Outcomes

1. Understand film production processes used to produce a film
2. Manage craft area job functions
3. Model on-set protocols and professional behaviors
4. Assist producers and directors in completing a professional film project

FDMA 2150. Desktop Publishing II**3 Credits (2+2P)**

This class will enhance and build upon student layout/design skills developed in the Introduction to Desktop Publishing course, incorporating intermediate to advanced concepts in typography and layout design. Upon completion of this course, students will be able to use page layout software to prepare a variety of documents for presentation and critique, including newsletters, instructional flyers, and other complex design/typographic pieces. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): FDMA 1120.

Learning Outcomes

1. Build upon knowledge of design and design terminology.
2. Exhibit intermediate to advanced design principles using type, layout, and color.
3. Demonstrate skill in intermediate to advanced concepts and features of page layout software.
4. Exhibit knowledge of styles, tables, images and clipping paths and interactive documents as well as printing preparations and procedures.
5. Create layouts for print, web, and other media that demonstrate an intermediate to advanced knowledge in typography and layout design.
6. Format and produce newsletters and instructional flyers, as well as larger, complex projects such as packaging mechanicals, multiple master page documents, and books.
7. Assess works of graphic design for quality and effectiveness.
8. Utilize produced material to create or add to a design portfolio for future use.

FDMA 2210. Digital Video Production II**3 Credits (2+2P)**

Advanced techniques of the tools and application of professional film making. May be repeated for a maximum of 6 credits.

Prerequisite: FDMA 1210.

Learning Outcomes

1. Demonstrate the ability to produce and manage a video project: Produce a script, storyboard, and production schedule for a video project designed for a specific audience.
2. Demonstrate proficiency in producing quality digital video footage and audio tracks: Shoot to the script and storyboard using a variety of camera and lighting techniques; Produce a finished complex sound track including narration, music, and sound effect.
3. Demonstrate ability to produce and edit a professional quality video project: Integrate all production aspects of the project including video, audio, graphics, titles, transitions, and effects. Guide the project through the final production stages.
4. Develop competency in digital video distribution using various formats and techniques: Distribute project in various formats which could include DVD and web posting.

FDMA 2241. Advanced Camera Techniques**3 Credits (2+2P)**

Professional camera techniques and training for electronic news gathering and studio filmmaking. Utilizes high-end handheld shooting techniques, cranes, dollies, and steadicam training. May be repeated for a maximum of 6 credits.

Prerequisite(s): FDMA 1210.

Learning Outcomes

1. Students knowledge of high-end video camera operation and features.
2. Students must know all the working features of the video production equipment being used during the course in order to achieve the desired footage as required by the instructor.
3. Demonstrate proficiency in producing quality digital video footage.
4. Individuals must acquire the knowledge of different shooting styles in different productions situations and use those acquired skills to produce the appropriate video footage.
5. Using the proper lighting in different on location shooting styles.
6. Skill of each individual utilizing the usage of high-end camera equipment such as dollies, cranes and Steadicam.
7. Each individual must work as a team player to create professional style video footage.

FDMA 2285. Digital Video Production and Editing II**3 Credits (2+2P)**

Advanced features of digital video, audio/music, and titling production software. Included are color correction, vector scopes, motion effects, and advanced editing techniques used by filmmakers. Restricted to Community Colleges campuses only. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): FDMA 1220.

Learning Outcomes

1. Intermediate to advanced video editing create short films and training videos, create TV quality commercials, direct a news broadcast, and work as a mentor to students on digital media equipment

FDMA 2287. Digital Design Studio**1-3 Credits**

A design studio environment in which students obtain real-world experience while providing service to college and non-profit associations with faculty supervision using a variety of media. Can be used with permission to fulfill cooperative requirement. May be repeated for a maximum of 6 credits.

Prerequisite(s): FDMA 1630 or ARTS 1712.

Learning Outcomes

1. Demonstrate competency in the use of InDesign software.
2. Create appropriate visual solutions based on target marketing information.
3. Demonstrate competency in the design and production of advertising and promotional materials.
4. Present ideas and concepts effectively and competently.
5. Visually demonstrate design solutions to be used in a portfolio.

FDMA 2310. History of Cinema I**3 Credits (3)**

This course surveys the history of cinema - investigating the process by which the original "cinema of attractions" evolved into a globally dominant form of visual storytelling. We will explore the development of cinema both as an art form and as an industry, and consider the technological, economic, cultural factors, as well as many key international movements that helped shape it. Restricted to: G-CMI, DFM, ANVE majors.

Learning Outcomes

1. Gain a greater appreciation for the history of cinema
2. Develop knowledge of the key eras in the history of U.S. cinema
3. Learn the characteristics of major movements in international cinema
4. Understand the various elements that go into telling a story in cinema: screenplay, narrative devices, director, producer, talent, production design, cinematography, editing, sound design
5. Learn how major genres in U.S. cinema have evolved in the past 100+ years
6. Gain a basic understanding of the operations and organization of the Hollywood film industry, from the studio system until today
7. Gain an awareness of the shifts in the film industry that present new opportunities for independent filmmakers
8. Understand the importance of learning about the history of cinema to the process of becoming a filmmaker
9. Strengthen public speaking skills

FDMA 2311. History of Animation**3 Credits (3)**

Explores the history of Animation as an art form and industry through readings, screenings, lecture and periodic guest speakers. Restricted to: G-CMI, ANVE, DFM majors. Restricted to Las Cruces campus only.

Learning Outcomes

1. To expand your knowledge of the history of animation and its evolution to the modern day.
2. To expand your ability to view animation critically and to understand its early connections to cartooning as well as its ongoing cultural presence and relevance.
3. To expand your comfort with accessing information and completing assignments both online and independently. Canvas will be utilized for many of our readings and for some response assignments.

FDMA 2312. History of Media Design**3 Credits (3)**

An introduction to the principles of design history and theory within a chronological framework of historical and emerging media.

Learning Outcomes

1. Introduction to visual communication: Defines design media; Discuss universal design principles and strengthen student basic design skills.
2. Historical technological development and design: Prehistoric communication; Beginnings of alphabet and written language; Movable type and the printing press; Industrial revolution; Digital Age; Designers and Trends; Personalities and their influence and contributions
3. Identify design styles and discuss the relevance of how design influences: Idea generation; Trend sources; Influences or appropriation; Propaganda and advertising.

FDMA 2325. Advanced Photoshop**3 Credits (2+2P)**

This course expands on the Photoshop skill set to develop proficiency with selections, masking, channels, filters, color correction, painting tools, vector integration, video, special effects, and compositing techniques. The focus is on the core image-editing tools of Photoshop that can be universally applied to photography, print, film or the web. The material is covered in production-oriented projects and students develop work suitable for portfolios. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): FDMA 1515.

Learning Outcomes

1. Create effects using advanced blending techniques
2. Effectively utilize advanced masking techniques
3. Refine Selections with advanced techniques
4. Assess Adjust color in an image
5. Utilize advanced photo enhancement techniques
6. Alter images using Photoshop painting techniques
7. Create brush presets
8. Create vector elements with paths
9. 1Add manipulate type on a path
10. 1Create advanced special effects
11. 1Apply vanishing point warping
12. 1Create a video clip
13. 1Apply color adjustments to video

FDMA 2326. Digital Photography and Imaging II**3 Credits (2+2P)**

Provide understanding and skills needed for advanced digital capture, editing, optimizing and manipulating photographic images for print, web and multimedia applications. The course will prepare students to make more advanced technical and more refined aesthetic decisions relative to specific photographic applications. Restricted to: Alamogordo campus, Carlsbad campus, Dona Ana campus.

Prerequisite(s): FDMA 1545.

Learning Outcomes

1. Apply proper exposure techniques.
2. Practice effective composition techniques.
3. Demonstrate knowledge of working with Camera RAW files.
4. Demonstrate proper image adjustment and correction techniques.
5. Successfully apply the basics of HDR digital photography.
6. Apply techniques for modifying light.

FDMA 2360. Web Design II**3 Credits (2+2P)**

In this course, students will refine their skills in coding and web graphic design as well as be introduced to methods in constructing sites that adhere to the standards of responsive web design. Students will expand their knowledge of HTML and CSS using a code editor, and they will both analyze existing websites and also construct an interactive website. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): FDMA 1360.

Learning Outcomes

1. Plan and produce web design mockups.
2. Demonstrate a proficiency in HTML/CSS coding.
3. Utilize basic web scripts.
4. Integrate animation into web design.
5. Create fully functional websites using one or more web editors.
6. Make a website "live."
7. Evaluate web designs for aesthetics and functionality.
8. Demonstrate the utilization of responsive design.

FDMA 2365. Web Design for Small Business**3 Credits (2+2P)**

Technology and techniques for designing and building a web presence for small business. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): FDMA 1360.

Learning Outcomes

1. Learning advanced tools and techniques for creating and maintaining complex Business web sites. We will be using CSS, PHP, HTML, Photoshop, and Wordpress.
2. design a complete and fully functional online web business.
3. understand and develop a plan to better manage a web store/business.
4. review basic design guidelines in preparing a variety of web applications for business.
5. develop technical skills in using various web based solutions.
6. reinforce your knowledge of web design software.
7. introduce alternate sources of data, communication and financial solutions.

FDMA 2370. Advanced Web Techniques**3 Credits (2+2P)**

Creating and managing complex web sites using advanced techniques and tools. May be repeated for a maximum of 6 credits. Restricted to: Community Colleges only.

Prerequisite(s): FDMA 1515 and FDMA 2360.

Learning Outcomes

1. Create webpages using Hypertext Markup Language (HTML) elements and tags
2. Format webpages using Cascading Style Sheets (CSS)
3. Validate webpage code
4. Apply industry-standard webpage design and organization principles
5. Publish a website

FDMA 2381. Storyboarding**3 Credits (3)**

Examines effective writing principles to create storyboards that communicate the overall picture of a project, timing, scene complexity, emotion and resource requirements. Further, the purpose of this course is to introduce students to the principles of visual storytelling—in film--through the use of the storyboard. In other words, to show how storyboards are critical "architectural component" of the filmmaking process, used as a blueprint (or guide) to communicate the complex elements of a film story. Crosslisted with: ENGL 2381. Restricted to: DFM, ANVE, G-CMI majors. Restricted to Las Cruces campus only.

Learning Outcomes

1. Learn to conceive and draw original images.
2. Learn to use images to tell a story.
3. Design, develop, and order images (shots) into storyboarded scenes.
4. Understand how storyboarded sequences are a tool in the process of filmmaking.
5. Understand how the storyboard image is translated from the written page.
6. Build scenes from the scripted sequences into a storyboard.

FDMA 2382. Principles of Story Across the Media**3 Credits (3)**

The purpose of this course is to help students understand the basic elements of narrative structure (e.g. character, dramatic conflict, theme, etc.) and how these elements may be used effectively in media expression. Crosslisted with: ENGL 2382. Restricted to: G-CMI, DFM, ANVE majors. Restricted to Las Cruces campus only.

Learning Outcomes

1. Identify the elements of storytelling in scripted text or improvised performance
2. Understand how these elements work together across different media
3. Apply these elements of storytelling in original work
4. Appreciate and master these elements for independent or collaborative work

FDMA 2410. Audio Production II**3 Credits (2+2P)**

Students will use skills developed in the Audio Production I course to produce audio projects utilizing a variety of analog and digital audio hardware and software, including continued use of multi-track, computer-based recording and editing systems, as well as exploring more advanced audio techniques and concepts. Restricted to: Community Colleges only.

Learning Outcomes

1. Apply analog and digital audio hardware and software in audio recording.
2. Apply common professional set-up practices of audio production facilities.
3. Produce audio projects, sync sound recordings, and audio dialogue replacement (ADR) demonstrating technical expertise.
4. Perform an audio mix and master for a final professional product.
5. Analyze and compare existing audio productions for quality.

FDMA 2510. Introduction to Sound Design for Film**3 Credits (3)**

This course is an introduction to the principles, techniques and applications of sound design and film scoring. Students learn how sound affects storytelling in a film, examine the role of sound from the script to screen, and the professional process of creating a soundtrack. Students learn how to use sound equipment in a production environment and execute basic techniques used to develop a soundtrack. Crosslisted with: FDMA 1415.

Prerequisite(s)/Corequisite(s): FDMA 2382. Restricted to: DFM, ANVE majors. Restricted to Las Cruces campus only.

Learning Outcomes

1. Compare the properties and propagation of sound and importance of sound to the storytelling aspect of
2. filmmaking
3. Learn the process of designing a soundtrack for film and recording live audio dialogue for use in post-production editing.
4. Learn methods of capturing sound including live audio recording, dialogue recording, foley, orchestration and audio dialogue replacement
5. Design a soundtrack for motion media project.

FDMA 2520. Introduction to Cinematography**3 Credits (3)**

The Director of Photography (or Cinematographer), in close collaboration with the Director and Production Designer, helps determine the look of a film. This course is designed to introduce students to the technical and aesthetic fundamentals of creating, developing, and collaborating on the visual elements of storytelling, using camera framing, lensing, and lighting fundamentals such as shadows, light and color. May be repeated up to 6 credits. only. Prerequisite(s)/Corequisite(s): FDMA 2382 (Las Cruces Campus) or FDMA 1210 (Community College Campus(es))

Learning Outcomes

1. Define and explain the fundamental concepts of cinematography, such as exposure, lighting solutions, and color temperature.
2. Understand how cinematography brings the Director's vision to reality.
3. Demonstrate proficiency in plotting and executing interior and exterior lighting solutions.

FDMA 2530. Introduction to 3D Modeling**3 Credits (3)**

This course will introduce 3D modeling methods and current practices. Students will learn preliminary and detailed modeling techniques using industry standard software. Methods will emphasize formal and functional aspects of modeling as they apply to mechanical, organic, and sculpted topology for application in animation, games, and information media. May be repeated for a maximum of 6 credits.

Learning Outcomes

1. Identify the role of a 3D modeler in a production pipeline within various fields of digital animation.
2. Apply techniques in modeling mechanical and organic objects.
3. Utilize tools available in professional 3D modeling software.
4. Create simple animations and renders.
5. Present original animations to instructor and classmates for critique.
6. Create a demo reel of work completed during the course.

FDMA 2535. Digital Illustration**3 Credits (3)**

Introductory course examining traditional artistic expressions and translating visual art experiences into a digital art medium to enhance visual storytelling. Students acquire basic principles of drawing and painting through hands-on experience manipulating tonal value, composition, form development, light and shadow, color theory, rendering realism, and graphic design. Restricted to: DFM,ANVE majors. Restricted to Las Cruces campus only.

Learning Outcomes

1. Be familiar with the CMI computer system, facilities, equipment and policies.
2. Appropriately utilize the various media technologies available at CMI for digital illustration.
3. Understand the different roles and areas of digital illustration.
4. Understand and apply some basic techniques of digital illustration.
5. Understand and apply some basic processes of creating pleasing images based on knowledge of traditional art principles.
6. Begin to apply some basic strategies for developing and creating aesthetically pleasing images.

FDMA 2570. Creative Media Studio**3 Credits (2+2P)**

A studio environment where students specialize in creating film-festival quality and portfolio-ready projects under the supervision of faculty. May be repeated for a maximum of 6 credits.

Prerequisite(s): FDMA 1210 and FDMA 1220 or FDMA 2530.

Learning Outcomes

1. Students will work together to create portfolio-quality work in a studio environment.
2. Through classroom discussion and reporting the students will collaborate to produce a professional quality "vertical slice" game concept within a defined timeline and financial budget

FDMA 2710. Beginning 2-D Animation**3 Credits (3)**

Students will learn the basics of digital 2D animation by working through a variety of exercises, creating an original storyboard, and animating five or more shots utilizing industry standard software. Restricted to: DFM,ANVE majors. Restricted to Las Cruces campus only.

Learning Outcomes

1. The student will demonstrate an overall knowledge of computers as a tool of the animation artist and be able to produce simple animations using the techniques learned in class.
2. Use major software tools with ease
3. Manage time lines through key frames
4. Build storyboards
5. Demonstrate knowledge of 2-D and animation terminology
6. Produce actions, set environments and constraints for 2-D animation
7. Render full animation.

FDMA 2715. Special Effects**3 Credits (2+4P)**

Creating advanced virtual special effects for both rigid and soft bodies. Using MEL, dynamic principles, mixing nodes, and advanced particle systems. How to drive particles over surfaces, add texture to flow, create surface tensions, and use collision events to drive texture. Study of integrating computer-generated images with real-life video and audio.

Prerequisite(s): FDMA 2530 or FDMA 2765.

FDMA 2720. 3-D Animation**3 Credits (3)**

Overview of the essentials and principles of 3D animation; creative methods for using industry standard tools to produce the illusion of movement for storytelling. Topics include, keyframe and curve animation, kinematics, cycle animation, camera animation, deformers, and constraints.

Prerequisite(s): FDMA 1510, FDMA 2710 or consent of instructor.

Learning Outcomes

1. Clearly describe the role of an animator in cinema, gaming and related fields.
2. Recognize leading animators and their methods.
3. Demonstrate knowledge of advances in contemporary animation.
4. Utilize current industry standard animation tools.
5. Apply fundamental animation processes and techniques

FDMA 2725. Rigging for 3D Animation**3 Credits (3)**

This course will introduce principles and practices of current 3D animation rigging. Students will develop fundamental methods necessary to create character rigs. Students will learn aesthetic, technical, and optimization concepts as they apply to organic and mechanical designs. Topics will include: hierarchies, constraints, deformation rigging, skeleton creation, skinning, forward and inverse kinematics, controls, body and facial rigging. Restricted to: DFM, ANVE majors.

Prerequisite(s): FDMA 1510.

Learning Outcomes

1. Understand what Rigging is and the role it plays in the world of cinema and video games.
2. Be familiar with industry professionals and their techniques and approaches to rigging.
3. Understand and be able to apply the fundamentals of rigging to industry standard applications.
4. Demonstrate ability to rig basic to intermediate machines, bipeds and quadrupeds

FDMA 2730. Advanced Character Animation**3 Credits (2+2P)**

Focus on complex rigging techniques as well as utilizing advanced animation functions to blend multiple animations into complex animations. May be repeated for a maximum of 6 credits. Restricted to: Community Colleges only.

Prerequisite(s): FDMA 2530.

Learning Outcomes

1. Create skeletal riggings for use with a 3D model
2. Attach riggings to a 3D model using Smooth and rigid binding and refine the bindings so that they are properly weighted
3. Animate a 3D model using skeletal and vertex animation techniques

FDMA 2735. Advanced 3D Animation Workshop A**3 Credits (2+4P)**

Program capstone. Students will utilize the skills learned in the program to produce their final animation. Group integrated projects are strongly recommended to emulate a real-work animation studio environment. May be repeated for a maximum of 9 credits. Consent of instructor required.

Corequisite(s): FDMA 2740.

Learning Outcomes

1. Define the duties and skills sets required for a career in 3D Modeling.
2. Understand the Maya interface, the uses for all of the major modes and menus of the interface and be able to describe how to access the tools, actions and the options of those tools and actions.
3. Complete and compile a multi shot animated short.

FDMA 2740. Advanced 3D Animation Workshop B**3 Credits (2+4P)**

Program capstone. Students will utilize the skills learned in the program to produce their final animation. Group integrated projects are strongly recommended to emulate a real-work animation studio environment. May be repeated for a maximum of 9 credits. Consent of instructor is required.

Corequisite(s): FDMA 2735.

Learning Outcomes

1. Define the duties and skills sets required for a career in 3D Modeling.
2. Understand the Maya interface, the uses for all of the major modes and menus of the interface and be able to describe how to access the tools, actions and the options of those tools and actions.
3. Complete and compile a multi shot animated short.

FDMA 2745. Light, Shade, Render**3 Credits (3)**

This course will explore the theory and practice of 3D lighting and rendering methodologies. Techniques covered will implement cameras, lighting sources, textures, surface-mapping and algorithmic rendering to produce stylized and photo realistic images. Topics covered will include direct and indirect lighting, shaders that simulate physical substances and effects, rendering multiple passes and simulating physical lens effects. Restricted to: DFM,ANVE majors. Restricted to Las Cruces campus only.

Prerequisite(s): FDMA 1510, FDMA 2530, or Consent of Instructor.

Learning Outcomes

1. Understand the role of lighting and surfacing to tell a story.
2. Be familiar with leading lighting artist and their approaches.
3. Utilize the software implemented in the entertainment industry.
4. Understand and apply fundamental lighting and rendering techniques.
5. Demonstrate ability to create successfully rendered scenes from concept through production.

FDMA 2750. Digital Sculpting**3 Credits (3)**

Introduce students to the 3D Sculpting programs which are the industry standard sculpting programs. Students will learn how to create complex high polygon sculpts and normal maps and transfer the models into 3D studio Max and Autodesk Maya. May be repeated up to 6 credits. Restricted to: Community Colleges only.

Prerequisite(s): FDMA 2530.

Learning Outcomes

1. Demonstrate communication skills through written critiques and explanations
2. Students will demonstrate visual communication skills through critiques, written explanations, and storyboarding
3. Demonstrate a working knowledge of Zbrush's interface
4. Demonstrate a working knowledge of Zpheres and how they are best used to create sculpts
5. Demonstrate a working knowledge of painting a mesh using Spotlight
6. Demonstrate a working knowledge of retopologizing and exporting the mesh
7. Demonstrate a working knowledge of integrating the full Zbrush pipeline into Unity and Unreal

FDMA 2755. Drawing for Animation**3 Credits (3)**

Introductory study of the human and animal form in relation to animation. Students learn fundamentals and exaggeration of the figure, as related to proportion, rhythm, mechanics, and motion. Areas of focus are: basic form, proportion, shape, contour, gesture, anatomy, portraiture, perspective, clothing effects and drawing from observation. Restricted to: CMT,DFM,ANVE majors.

Learning Outcomes

1. Students will have an opportunity to gain hands on experience using industry standard state of the art animation software.
2. Understand what the basics of drawing the human form.
3. Have a general understanding of human anatomy as needed for the artist.
4. Be able to design the human form from imagination.

FDMA 2770. Critical Game Studies**3 Credits (2+2P)**

Focus on creating a complete design document utilizing techniques and standards used in the industry today. May be repeated for up to 6 credits. Restricted to: Community Colleges only.

FDMA 2775. Game Tools and Techniques**3 Credits (2+2P)**

Focus on the different engines and gaming technologies that power the games of today. May be repeated for a maximum of 6 credits.

Prerequisite(s): FDMA 2770.

Learning Outcomes

1. Students will develop rapid prototyping techniques.
2. Through classroom exercises the students will gain competency in industry-standard game creation engines and tools, and learn to work together in groups to create rapid prototypes.
3. This includes creating art, sound and music, and creating basic scripts within an engine.

FDMA 2785. Level Design Concepts**3 Credits (2+2P)**

Focus on the design and creation of video game levels. Dealing with the challenges and pitfalls of different video game genres. May be repeated for a maximum of 6 credits. Prerequisite(s): FDMA 2770

Learning Outcomes

1. Students will develop level design skills.
2. Through classroom exercises the students will gain a comfortable competency with designing levels both on paper and digitally.
3. This includes creating first person shooter levels, third person levels, multiplayer level design, and more.

FDMA 2993. Workshops (Advanced Photography)**1 Credit (1)**

This is a series of 1-credit workshops offering specialized and intense advanced skill training and upgrading applications of photography for commercial purposes and training in photographic skills and styles presented by a variety of professional lecturers. May be repeated up to 7 credits. Restricted to Community Colleges only.

Prerequisite(s): FDMA 1545.

Learning Outcomes

1. Varies

FDMA 2994. Portfolio Design & Development**1-3 Credits**

Personalized design and creation of the student's professional portfolio including hard-copy, demo reel, and online. May be repeated up to 6 credits. Consent of Instructor required. Restricted to Community Colleges campuses only.

Learning Outcomes

1. Varies

FDMA 2995. Film Crew Cooperative Experience**3-6 Credits (3-6)**

Industry production experience in specific craft areas for film crew technicians who have successfully completed two semesters of FTTP. Restricted to: Dona Ana campus, Carlsbad campus.

Prerequisite(s): FDMA 2125.

Learning Outcomes

1. Varies

FDMA 2996. Special Topics**1-4 Credits**

Specific topics to be announced in the Schedule of Classes. May be repeated for a maximum of 18 credits.

Learning Outcomes

1. Varies

FDMA 2997. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with prior approval of department head. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): Minimum GPA of 3.0 and sophomore standing.

Learning Outcomes

1. Varies

FDMA 2998. Internship**1-3 Credits**

Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. May be repeated up to 9 credits. Consent of Instructor required. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only. Consent of instructor required.

Learning Outcomes

1. Varies

FDMA 300. History of Cinema II**3 Credits (3)**

An advanced, in-depth analysis of cinema's history. Course may focus on one specific area of cinema history depending on instructor.

Prerequisite(s)/Corequisite(s): FDMA 2382, FDMA 2310. Restricted to: DFM, ANVE, G-CMI majors. Restricted to Las Cruces campus only.

FDMA 301. Sound Design II**3 Credits (3)**

Mixing and balancing dialogue, sound effects and music in postproduction. Study the role of sound effects, foley, soundtrack choices, and music supervision. Restricted to: DFM, ANVE majors.

Prerequisite(s): FDMA 2510.

FDMA 303. Cinema Review and Critique**3 Credits (3)**

This course is for the student who wants to learn to be a more active, intelligent film viewer. It encourages critical thinking about films and educates students on how to write a film review. Students will meet in the movie theater to watch essential films that serious movie watchers should see from classic motion pictures, to current release major motion pictures, independent films and world cinema features. The course will serve as a guide to the illuminating process of evaluating, analyzing, and reviewing movies. Restricted to: DFM, ANVE majors.

Prerequisite(s): FDMA 2382.

FDMA 305. Business of Filmmaking/Animation**3 Credits (3)**

Explores the roles of unions, basic contracts, legal arrangements, and the economics of the production process, distribution, and financing. Consent of Instructor required.

Prerequisite(s): FDMA 2382.

FDMA 308. Writing for Animation**3 Credits (3)**

This class explores methods for, and approaches to, writing for animation. Students study and produce scripts for a range of animation outlets while engaging in writing exercises based on character and story development.

Prerequisite(s): FDMA 2382 or consent of instructor.

FDMA 309. Screenwriting I**3 Credits (3)**

Writing intensive. Students learn the craft of screenwriting, honing skills in writing dialogue and visual narrative, crafting dynamic characters and dramatic action. Original student scripts will be performed and discussed in class. Crosslisted with: ENGL 309 and THEA 306.

Prerequisite(s): ENGL 2382/FDMA 2382 or consent of instructor.

FDMA 310. Cinematography II**3 Credits (3)**

Advanced tools of the cinematographer, lighting and composition techniques. Artistic and technological elements of cinematography. Restricted to: DFM,ANVE majors.

Prerequisite(s): FDMA 2520.

FDMA 311. Editing II**3 Credits (3)**

Advanced techniques in digital films using professional non-linear editing systems. Restricted to: DFM,ANVE majors.

Prerequisite(s): FDMA 1220.

FDMA 312. Post Production Color Grading**3 Credits (3)**

Color grading is an important part of the overall look of a film. It used to be a craft that only a small number of people knew how to do. However, due to advances in technology and business models, more and more people are diving into color grading. This class is an introductory look into the art and techniques of color grading. Restricted to: DFM, ANVE majors.

Prerequisite(s): FDMA 1220.

FDMA 314. Acting for Film**3 Credits (3)**

Techniques for film and television acting. In-depth analysis of film performance creation among actor, director, writer, cinematographer, and editor. Restricted to: THTR,DFM majors.

Prerequisite(s): FDMA 2382.

FDMA 315. Adventures in Genre**3 Credits (3)**

Students learn storytelling strategies for the screen by studying various structural genres and components of screenplays and films. Utilizing these strategies, students develop a number of their own original screenplay ideas. Additionally, pitch workshops are held and students learn to present their ideas in various, practical situations.

Prerequisite(s): FDMA 2382 and FDMA 309.

FDMA 316. Border Cinema Around the World**3 Credits (3)**

What is the relationship between borders, identity, and vulnerability - and how is this relationship explored in cinema? How are borderlands also testing grounds - the sites of serious ethical dilemmas? By examining powerful feature films from such regions as the Middle East, the Balkans, and the US/Mexico border, we will explore ways in which personal, familial, communal, and national identities are defined through the complex process of bordering. We will investigate the role of cinema in reflecting and/or facilitating this process.

FDMA 318. Documentary Production**3 Credits (3)**

Survey of theory and history of documentary film making including viewings and discussions of notable films and directors. Class works with actual documentary project. May be repeated up to 6 credits. Restricted to: ANVE, DFM majors.

Prerequisite(s): FDMA 1220, FDMA 2520.

FDMA 320. Race and Gender in Film**3 Credits (3)**

In this course students will analyze film as an art form as well as be exposed to Race and Gender Feminist Film Theory. We will consider the role of film in our understandings of sex, gender and sexuality. Through discussions and writing we will work to discern relevant social, political, ideological, and aesthetic concepts in the media we examine. Crosslisted with: ENGL 399, GNDR 450 and GNDR 550.

FDMA 325. Film Festival Production**3 Credits (3)**

A course for students interested in learning about the processes of orchestrating an independent film festival. Students will engage in a professional environment with other film students and filmmakers, as well as learn about film event administration and organization. May be repeated up to 6 credits. Restricted to: DFM, ANVE majors.

FDMA 328. Producing**3 Credits (3)**

Examines the role of the Producer, essential to every film production. The course will revolve around the best practices in organizational design, the production process, the budgeting process, financial controls, scheduling, insurance and distribution.

Prerequisite(s)/Corequisite(s): FDMA 2510, FDMA 1220, FDMA 2382. Restricted to: ANVE,DFM majors.

FDMA 332. 3-D Character Animation**3 Credits (3)**

Essentials and principles of 3D character animation. Techniques and craft of breathing life into characters through movement, including dynamic poses, blocking action, run and walk cycles, lip synching and realism. THEA 1221, Acting and FDMA 2510, Sound Design are recommended. Restricted to: DFM,ANVE majors.

Prerequisite(s): THEA 1210 (or FDMA 314 or FDMA 348), FDMA 1510 and FDMA 2720 or consent of instructor.

FDMA 341. Visual Effects I**3 Credits (3)**

Fundamentals and principles of live action footage and computer generated imagery integration, including 3D animation, matchmoving, green screen setup, keying and compositing. Restricted to: ANVE,DFM majors.

Prerequisite(s): FDMA 2520, FDMA 1510, FDMA 2530 (or consent of instructor).

FDMA 348. Acting for Animation**3 Credits (3)**

This course explores performance techniques relevant to animators including 2D and 3D animation and motion capture. Students learn to create dynamic, dramatic performances and believable character interactions. Students learn to analyze scripts, sound, acting, action and performance for production. Topics include: acting theory, emotional/mental states, character movement and style, dynamic facial expression, scene construction, posing, layering and rhythm, simplification and exaggeration, and voice-over. May be repeated up to 3 credits. Restricted to: DFM,ANVE majors.

FDMA 350. Intermediate 2-D Animation**3 Credits (3)**

Learn the more refined aspects of motion for character animation by focusing on Disney's 12 Principles of Animation, practicing these advanced drawing techniques in exercises and incorporating them into a brief final short.

Prerequisite(s): FDMA 2710.

FDMA 360. Previsualization**3 Credits (3)**

Implements 3D animation tools in preproduction shot and sequence design for motion picture and broadcast industries; including 3D storyboarding, technical planning and editing basics. LC Campus Only. Restricted to ANVE, DFM majors.

Prerequisite(s): FDMA 1510, FDMA 2530, and FDMA 2720 or consent of instructor.

FDMA 362. Motion Graphics**3 Credits (3)**

Students will learn the basics of Motion Graphics by working through a variety of exercises and a final project that will combine animation, text, visual effects, and sound using Adobe After Effects, Photoshop, and Illustrator. Restricted to: ANVE, DFM majors.

FDMA 365. Character Design and Development**3 Credits (3)**

Digital character design for the entertainment industry. Provides insight into the process of creating iconic characters. Traditional and contemporary character designers are explored. Industry workflow is introduced and necessary skills are developed to design detailed 3D characters from concept through production. Restricted to ANVE, DFM majors.

Prerequisite(s): FDMA 2710, FDMA 1510 and FDMA 2530, or consent of instructor.

FDMA 377. Game Design Workshop**3 Credits (3)**

In this course we will learn to design, develop, and playtest games. This approach will be exercise driven and involve nontechnical approaches as well as digital production techniques. This playcentric approach will involve player participation from conception through production. We will explore the iterative processes of prototyping, playtesting, and revising based on feedback. Consent of Instructor required. Restricted to: ANVE, DFM majors.

FDMA 395. Directing I**3 Credits (3)**

Study and application through short scene work of the basic tools of a director and relationships with actors, designers, playwright, and stage managers. Interpreting as well as organizing. May be repeated up to 3 credits. Restricted to: DFM, ANVE majors.

Prerequisite(s): FDMA 2510, AND FDMA 2520, AND FDMA 1220.

FDMA 396. Directing II**3 Credits (3)**

Addresses pre-production concerns including script breakdown, casting ground plans and coverage. The criteria employed when selecting the creative team including a director of photography, art director, light, sound and wardrobe designers. Introduction to budgeting, scheduling, and script breakdowns. Prerequisite: FDMA 395

FDMA 397. Practicum**1-3 Credits (1-3)**

Practical application of the student's field of study in a project environment. May be repeated up to 9 credits. Consent of Instructor required.

FDMA 398. Special Topics**3 Credits (3)**

This course addresses specific subjects and issues as identified by the department. Topics and credits to be announced in the Schedule of classes. May be repeated up to 12 credits.

FDMA 400. Directed Studies**1-6 Credits (1-6)**

Directed study course in CMI under the supervision of a CMI faculty member. May be repeated up to 9 credits.

FDMA 401. Motion Capture Techniques**3 Credits (3)**

Implement industry standard motion capture techniques to capture and integrate performance for movie making, 3D animation and game production. Restricted to: ANVE, DFM majors.

Prerequisite(s): FDMA 1510, FDMA 2720 and FDMA 2725 (or consent of instructor).

FDMA 410. Cinematography III**3 Credits (3)**

This class is geared towards those who want to learn more about cinematography, color grading, and digital technology as it pertains to cinematography. Shooting high-end codecs (ProRes/DNxHD) or RAW are becoming more and more popular in filmmaking as camera manufactures and computer processing get better. This class will be a mix of production and post-production as learning how to shoot these higher end codecs do not end with the camera. Focus will be on techniques of shooting raw, understanding how to operate a camera capable of high end image acquisition, properly building up the camera rig and accessories, managing data and the post-production workflow. Consent of Instructor required. Restricted to: DFM, ANVE majors.

Prerequisite(s): FDMA 310.

FDMA 412. Advanced Equipment Training**3 Credits (3)**

This class is designed for students who want to dive deep into building and operating much of our advanced camera and G&E equipment. Though these on-set tasks are performed by below-the-line crew members, having the knowledge of and ability to use this equipment will serve you greatly as a DP. We will go over a wide variety of devices in this class, ranging from car mounts and our GlideCam to our large jib, 3-axis gimbal, 500-amp generator, and 6K HMI lights. We will also do some advanced lighting scenarios. The goal of this class is to get you "certified" on all the above items, resulting in your being able to build this equipment for other CMI sets, such as the Mixed Class Productions, Senior Projects, etc. Restricted to: DFM, ANVE majors.

Prerequisite(s): FDMA 310.

FDMA 425. Film Festival Production**3 Credits (3)**

This course is designed to enhance student knowledge about film festivals and, specifically, the Las Cruces International Film Festival. From soup to nuts, students will build upon what they learned in CMI 325 Film Festival Preparation regarding how to manage and execute a major film festival, including film solicitation and submissions, festival event marketing, celebrity appearances, industry workshops, filmmaker coordination and brand management. Students will gain an appreciation of the value of a film festival to the community and for visiting filmmakers. Students will apply this knowledge in their written assignments, film evaluations, and departmental responsibilities. May be repeated up to 6 credits. Restricted to: DFM, ANVE majors.

Prerequisite(s): FDMA 325.

FDMA 433. Sets and Environments**3 Credits (3)**

Digital environment design and creation for movies and games from concept to production; including illustration, modeling, matte painting, texturing, lighting, rendering, integration, and camera projection. May be repeated up to 3 credits. Restricted to: DFM, ANVE majors.

Prerequisite(s): FDMA 1510, FDMA 2530, and FDMA 2745 or consent of instructor.

FDMA 450. Advanced 2-D Animation**3 Credits (3)**

Advanced techniques in two dimensional animation including motion graphics and integration of live action. Restricted to: ANVE, DFM majors.

Prerequisite(s): FDMA 350.

FDMA 477. Digital Game Design**3 Credits (3)**

This course covers the theory and practice of digital game production using industry standard media and game engine applications. Students apply animation and game development approaches toward game engine constraints and requirements to create gameplay experiences. Design and production methods are implemented to create game levels and populate them with original assets. Team based game prototyping will require multiple disciplines to devise unique digital game experiences. Consent of Instructor required. Restricted to: ANVE, DFM majors.

Prerequisite(s): FDMA 377.

FDMA 480. Screenwriting II**3 Credits (3)**

Students will write 2 short scripts, 10-15 pages each throughout the semester. Focus will be on learning how to take notes and rewrite. Script analysis will be in a workshop format. Scripts will be read and discussed, scenes performed and reactions analyzed to consider effect of dialogue, character development, etc. Restricted to ENGL, DFM, ANVE majors. Crosslisted with: ENGL 480

Prerequisite(s): ENGL 309 or FDMA 309 or THEA 306 or consent of instructor.

FDMA 490. Advanced Screenwriting**3 Credits (3)**

Students will prepare a 30-60 page screenplay. Script analysis will be in an advanced workshop format. Scripts will be read and discussed, scenes performed and reactions analyzed to consider effect of dialogue, character development, etc. This course is aimed at preparing writers for the professional market. Consent of instructor required. Restricted to ENGL, DFM, ANVE majors. Crosslisted with: ENGL 491

FDMA 491. 3D Production Studio I**6 Credits (6)**

The course is the first semester of a year-long effort to complete a Senior Project. The project will be narrative-driven short form, 3D animation or visual effects movie. Emphasis will be on pre-production and some production depending on ongoing CMI productions. You will produce a professional quality product with the aim to assist you in gaining entry into professional employment or graduate school. The course may be adapted toward a specific concentration in animation, visual effects, or digital film making, for group and individual productions. Each project must be approved by the Instructor and work within departmental policies and procedures.

Prerequisite(s)/Corequisite(s): FDMA 332, FDMA 360, FDMA 365, FDMA 433. **Prerequisite(s):** FDMA 308. Restricted to: ANVE majors.

FDMA 492. 2D Production Studio I**6 Credits (6)**

In CMI 498, Pre-Production, students will write a script, create a storyboard, record voice over and/or dialogue and time these storyboards to this dialogue/voice over creating an Animatic. For those doing demo reels, students will start to compile exercises from all of all their prior classes. Additional exercises will then be assigned to augment the skill set of the student according to the needs of each student. Restricted to: ANVE majors.

Prerequisite(s): FDMA 350, FDMA 361.

FDMA 493. 3D Production Studio II**6 Credits (6)**

The course is the final semester of a year-long concentration on your Senior Project. Emphasis will be on the production, post-production, and distribution of the work created in the first semester. You will produce a professional quality product that will help you gain entry into professional employment or graduate school. The overall objective is that you will demonstrate mastery of craft through synthesis of concept and technique, resulting in an original cinematic experience. Restricted to: ANVE majors.

Prerequisite(s): FDMA 491.

FDMA 494. 2D Production Studio II**6 Credits (6)**

Students will complete an entire animated short, trailer, or demo reel for their portfolios by the end of Senior Project II. In FDMA 494, Production and Post-Production, students will animate their stories according to the layout set in the animatic from Senior Project I. Lastly, they will composite and edit their shorts into a final piece that will be viewable in time for the Senior Showcase. For demo reels, students will continue to hone their reel into a finished piece that can be presented at the Senior showcase. Restricted to: ANVE majors.

Prerequisite(s): FDMA 492.

FDMA 495. Internship**1-12 Credits (1-12)**

Placement in a production facility and supervised experience required. With CMI advisor approval only. May be repeated up to 18 credits. Consent of Instructor required. Restricted to: DFM,ANVE majors.

FDMA 497. Portfolio Design and Development**3 Credits (3)**

Advanced graphic design projects with an emphasis on conceptual development, portfolio preparation, and professional practices. Refine general marketing strategies, personal portfolio, and resumes. Define, target, and penetrate personal target markets. Students develop individual promotional/demo packages. Restricted to: DFM,ANVE majors.

FIRE-FIRE INVESTIGATION

FIRE 101. Firefighter I**8 Credits (6+6P)**

This course will train the student to the Firefighter I level as outlined in NFPA 1001, Standard for Firefighter Professional Qualifications. Firefighter I certification issued through the New Mexico Firefighter's Training Academy upon successful completion (IFSAC accredited). May be repeated up to 8 credits. Consent of Instructor required.

Prerequisite(s)/Corequisite(s): OEEM 103 and FIRE 115. Restricted to Community Colleges campuses only.

FIRE 102. Fire Fighter I and II**12 Credits (12)**

This course will train the student as outlined in NFPA 1001, Fire Fighter Professional Qualifications. Firefighter I & II Certification issued through the New Mexico Firefighter's Training Academy (NMFTA) upon successful completion [International Fire Service Accreditation Congress (IFSAC) & Pro Board accredited]. Consent of Instructor required.

Prerequisite(s)/Corequisite(s): FIRE 115, FIRE 252, OEEM 103. Restricted to Dona Ana campus only.

FIRE 104. Firefighter II**8 Credits (6+6P)**

This course will train the student to the Firefighter II level as outlined in NFPA 1001, Standard for Firefighter Professional Qualifications. Firefighter II certification issued through the New Mexico Firefighter's Training Academy upon successful completion (IFSAC accredited). May be repeated up to 8 credits. Consent of Instructor required.

Prerequisite(s)/Corequisite(s): FIRE 252. Prerequisite(s): FIRE 101. Restricted to Community Colleges campuses only.

FIRE 112. Principles of Emergency Services**3 Credits (3)**

This course provides an overview to fire protection and emergency services including career opportunities in fire protection and related fields. The organization and function of public and private fire protection services is studied including how fire departments fit as part of local government. An overview of laws and regulations affecting the fire service is explored along with specific fire protection functions and responsibilities including basic fire chemistry and physics, introduction to fire strategy and tactics and life safety initiatives. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

FIRE 114. Fire Behavior and Combustion**3 Credits (3)**

This course explores the theories and fundamentals of how and why fires start, spread, and are controlled. Restricted to: Community colleges only.

FIRE 115. Hazardous Materials Awareness and Operations**3 Credits (3)**

This course will train the student to the Hazardous Materials Awareness and Operations level as outlined in NFPA 472, Standard for Competence of Responders to Hazardous Materials/Weapons of Mass Destruction Incidents and OSHA 29 CFR 1910.120. Hazardous Materials Awareness and Operations certification issued through the New Mexico Firefighter's Training Academy upon successful completion (IFSAC accredited). May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

FIRE 120. Fire Protection Hydraulics and Water Supply**3 Credits (3)**

This course will train students on skill requirements for becoming a safe and effective fire apparatus driver/operator. The focus will be on pump operation, construction, testing, and mathematical calculation required for effective pump operation and fire control. Responsibilities of the driver/operator will be taught and assessed consistent with applicable NFPA standards and the New Mexico Firefighters' Training Academy (NMFTA) guidelines. Students who meet all course requirements will be eligible for International Fire Service Accreditation Congress (IFSAC) certification through the NMFTA. Consent of Instructor required. Restricted to Community Colleges campuses

Prerequisite(s)/Corequisite(s): FIRE 128.

FIRE 126. Fire Prevention**3 Credits (3)**

This course will educate students about the principles and techniques of fire prevention and life-safety inspection and code compliance in accordance to NFPA 1031, Standard for Professional Qualifications for Fire Inspector and Plan Examiner, Level I. Students who meet all course requirements will be eligible for International Fire Service Accreditation Congress (IFSAC) certification through the New Mexico Firefighters' Training Academy (NMFTA). Restricted to Community Colleges campuses only.

FIRE 128. Apparatus and Equipment**2 Credits (2)**

The course will train students on attitude and skill requirements for becoming a safe and effective fire apparatus driver/operator. The focus will be on apparatus inspection, operation, maintenance, and specification. Responsibilities of the driver/operator will be taught and assessed consistent with applicable NFPA standards and the New Mexico Firefighters' Training Academy (NMFTA) guidelines. Students pursuing certification must possess a current and valid New Mexico driver's license. Students who meet all course requirements will be eligible for International Fire Service Accreditation Congress (IFSAC) certification through the NMFTA. Restricted to Community Colleges campuses only.

FIRE 130. Principles of Fire and Emergency Services Safety and Survival**3 Credits (3)**

This course introduces the basic principles and history related to the national firefighter life safety initiatives, focusing on the need for cultural and behavior change throughout the emergency services. Consent of instructor required. Restricted to: Community colleges only.

FIRE 200. Special Topics**1-12 Credits (1-12)**

Specific subjects to be announced in the Schedule of Classes. Course may be repeated for credit as topics change. May be repeated up to 12 credits. Consent of Instructor required. Restricted to Community Colleges campuses only.

FIRE 201. Independent Study**1-3 Credits**

Research on an approved topic to meet graduation requirements. Meets or exceeds NFPA standards. May be repeated for total of 9 credits.

Prerequisite: consent of instructor.

FIRE 202. Wildland Fire Control**1-3 Credits**

Focuses on factors affecting wildland fire control and prevention, fire behavior, control techniques, command structure and other operations including Standards for Survival I-100, S-130 and S-190 Meets or exceeds NWCG Training Curriculum and NFPA 1051 standards. Restricted to: Community Colleges Only.

FIRE 203. Fire and Emergency Services Administration**3 Credits (3)**

This course will provide students entry-level training in company operations and administration at the first-line supervisory level. The student will learn how to effectively manage human resources and community/public relations. Students will learn about fire department organization and administration; including budgets, reports, and planning. Students will learn the process involved in fire inspection, investigation, public education, emergency service delivery, and safety, per NFPA Standard 1021, Fire Officer Professional Qualifications. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

FIRE 210. Building Construction for Fire Protection**3 Credits (3)**

This course provides the components of building construction related to firefighter and life safety. The elements of construction and design of structures are shown to be key factors when inspecting buildings, preplanning fire operations, and operating at emergencies. Restricted to: Community colleges only.

FIRE 220. Cooperative Experience I**1-3 Credits**

Supervised cooperative work program. Student is employed in an approved occupation and rated by the employer and instructor. May be repeated for a maximum of 6 credits. Graded S/U.

Prerequisite: consent of instructor.

FIRE 221. Cooperative Experience II**3 Credits (3)**

Apply advanced firefighting knowledge and skills while working with fire protection agencies. Meets or exceeds NFPA standards. Consent of instructor required. Graded: S/U. Restricted to: Community Colleges only.

Prerequisite(s): FIRE 220.

FIRE 223. Fire Investigations I**3 Credits (3)**

This course meets the requirements set forth in NFPA 1033 Professional Qualifications for Fire Investigator. This course will give a comprehensive understanding of the principles of fire investigation, scene examination, documentation, evidence collection/preservation, interview techniques, and post-incident investigations. Student who meet all course requirements are eligible for International Fire Service Accreditation Congress (IFSAC) certification through New Mexico Firefighters' Training Academy (NMFTA). Restricted to Community Colleges campuses only.

FIRE 224. Strategy and Tactics**3 Credits (3)**

Provides an in-depth analysis of the principles of fire control through utilization of personnel, equipment and extinguishing agents on the fire ground. Covers the development of systematic action plans for emergency situations. Includes recognizing and prioritizing emergency scene needs and developing related strategies, tactics and contingencies. Educates students on how resources should be deployed to implement those plans. Restricted to Community Colleges campuses only.

FIRE 225. Fire Protection Systems**3 Credits (3)**

This course provides information relating to the features and design and operation of fire alarm systems, water-based fire suppression systems, special hazard fire suppression systems, water supply for fire protection and portable fire extinguishers. Restricted to: Community colleges only.

FIRE 230. Fire Service Instructor**3 Credits (3)**

Provides the instructor candidate with methods and techniques of instruction including oral communications, preparing lesson plans, writing performance objectives, use of audio and other training aids, and the selection, evaluation and preparation of performance tests. Meets and exceeds NFPA 1041 Level I standards. Restricted to: Community Colleges only.

FIRE 232. Firefighter Internship**3 Credits (3)**

Application of knowledge, skills and abilities in a fire service department, as a firefighter intern and integrated member of a fire affiliated agency. Restricted to majors.

Prerequisites: FIRE 101, FIRE 102, FIRE 115, FIRE 202 and EMT-B and consent of instructor.

FIRE 233. Practical Approach to Terrorism**3 Credits (3)**

Gives responder an overall safety approach in recognizing and responding to incidents involving terrorism. Presents an overview in types of harm, explosive weapons, chemical weapons, biological weapons and radiological weapons. Restricted to: Community Colleges only. Crosslisted with: LAWE 233

FIRE 252. Vehicle Extrication**2 Credits (1+2P)**

This course will train the student to the Vehicle & Machinery Extrication level I as outlined in NFPA 1006, Standard for Technical Rescuer Professional Qualifications. Vehicle & Machinery Extrication certification issued through the New Mexico Firefighter's Training Academy upon successful completion (IFSAC accredited). May be repeated up to 2 credits. Restricted to Community Colleges campuses only.

FREN-FRENCH

FREN 1110. French I

4 Credits (4)

Intended for students with no previous exposure to French, this course develops basic listening, speaking, reading, and writing skills aiming toward the ACTFL novice-high level. This is an introductory course designed to teach the student to communicate in French in everyday situations and to develop an understanding of French and Francophone cultures through the identification of cultural products and practices, of cultural perspectives, and the ability to function at a survival level in an authentic cultural content. This course will also develop the student's sense of personal and social responsibility through the identification of social issues.

Learning Outcomes

1. Students can communicate and exchange information about familiar topics using phrases and simple sentences, sometimes supported by memorized language.
2. Students can usually handle short social interactions in everyday situations by asking and answering simple questions
3. Students can write short messages and notes on familiar topics related to everyday life.
4. Students can often understand words, phrases, and simple sentences related to everyday life.
5. Students can recognize pieces of information and sometimes understand the main topic of what is being said.
6. Students can understand familiar words, phrases, and sentences within short and simple texts related to everyday life.
7. Students can sometimes understand the main idea of what they have read.
8. Students can identify beliefs, behaviors and cultural artifacts of the French-speaking world.
9. In English, students will engage with social issues confronting the French-speaking world to develop their sense of personal and social responsibility.

FREN 1120. French II

4 Credits (4)

A continuation of French 1, students will develop a broader foundation in skills gained during the first semester, including understanding, speaking, reading and writing French aiming toward the ACTFL intermediate-low level. This course is designed to increase student fluency in French as applied to everyday situations. Students will also learn to recognize and understand various French and Francophone products, practices, and perspectives, identifying common cultural patterns, describing basic cultural viewpoints, and further developing their sense of personal and social responsibility through the investigation of cultural issues.

Prerequisite(s): C or better in FREN 1110.

Learning Outcomes

1. Students can participate in conversations on a number of familiar topics using simple sentences.
2. Students can handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can write briefly about most familiar topics and present information using a series of simple sentences.
4. Students can understand the main idea in short, simple messages and presentations on familiar topics.
5. Students can understand the main idea of simple conversations that they overhear.
6. Students can understand the main idea of short and simple texts when the topic is familiar.
7. Students can describe and make comparisons between decisions about beliefs, behaviors and cultural artifacts of the French-speaking world.
8. Students will engage with social issues confronting the French-speaking world to continue to develop their sense of personal and social responsibility

FREN 2110. French III**3 Credits (3)**

In this third semester course, students will continue to develop a broader foundation in skills gained during the first year, including understanding, speaking, reading and writing French aiming toward the ACTFL intermediate-mid level. This course is designed to teach the student to communicate in a more sustained way in areas of personal interest and in everyday situations. Students will engage in and analyze various French and Francophone products, practices, and perspectives, as well as continue to develop their sense of personal and social responsibility through comparison and contrast of cultural perspectives.

Prerequisite(s): C or better in FREN 1120.

Learning Outcomes

1. Students can participate in conversations on familiar topics using sentences and series of sentences.
2. Students can engage in short social interactions in everyday situations by asking and answering a variety of questions. Students can usually say what they want to say about themselves and their everyday life.
3. Students can write on a wide variety of familiar topics using connected sentences.
4. Students can understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
5. Students can understand the main idea of conversations that they overhear.
6. Students can understand the main idea of texts related to everyday life and personal interests or studies.
7. Students can analyze beliefs, behaviors and cultural artifacts of the French-speaking world, and discuss the nature and value of French and Francophone products, practices, and perspectives.
8. Students will engage with social issues confronting the French-speaking world to continue to develop their sense of personal and social responsibility

FREN 2120. French IV**3 Credits (3)**

In this fourth semester course, students will continue to broaden and refine skills gained during previous semesters, including understanding, speaking, reading and writing French aiming at the ACTFL intermediate-high level. This course is designed to teach the student to communicate in a more sustained way in situations that go beyond the everyday. Students will evaluate various French and Francophone products, practices, and create ways to demonstrate their sense of personal and social responsibility through participation in cultural interaction.

Prerequisite(s): C or better in FREN 2110.

Learning Outcomes

1. Students can participate with ease and confidence in conversations on familiar topics. They can usually describe people, places, and things. They can usually talk about events and experiences in various time frames.
2. Students can handle social interactions in everyday situations, sometimes even when there is an unexpected complication.
3. Students can write about topics related to school, work, and community in a generally organized way. They can write some simple paragraphs about events and experiences in various time frames.
4. Students can easily understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
5. Students can usually understand a few details of what I overhear in conversations, even when something unexpected is expressed. The student can sometimes follow what they hear about events and experiences in various time frames.
6. Students can understand the main idea of texts with topics related to everyday life, personal interests, and studies, as well as sometimes follow stories and descriptions about events and experiences in various time frames.
7. Students can analyze beliefs, behaviors and cultural artifacts of the French-speaking world, and recognize and discuss the representations and controversies of French and Francophone products, practices, and perspectives.

FREN 306. Topics in French Culture and Civilization**3 Credits (3)**

Selected topics focusing on French culture and civilization. This course is linked to FLIP (Faculty-Led International Programs) when applicable. May be repeated up to 6 credits. Corequisite(s): FREN 2120

FREN 315. French Grammar**3 Credits (3)**

A thorough review of French grammar through the study of grammatical elements and the use of grammatical exercises. May be repeated up to 3 credits. Corequisite(s): FREN 2120

FREN 325. Intermediate Conversation**3 Credits (3)**

French conversation through intensive oral practice with emphasis on vocabulary acquisition and pronunciation. May be repeated up to 3 credits. Corequisite(s): FREN 2120

FREN 330. Business French**3 Credits (3)**

An introduction to standard language within the corporate world in French-speaking countries. Students practice reading, writing, listening, speaking and expanding their vocabulary in professional fields related to business. Corequisite(s): FREN 2120

FREN 352. French Phonetics**3 Credits (3)**

Systematic description of modern French pronunciation. Corrective exercises for foreign learners. Formal study of spelling/pronunciation relationships. May be repeated up to 3 credits. Corequisite(s): FREN 2120

FREN 360. French Cinema**3 Credits (3)**

The evolution of contemporary French cinema. A critical understanding of film as an art form and as cultural expression.

Prerequisite: FREN 2120 or consent of instructor.

FREN 362. Contemporary French Culture**3 Credits (3)**

Institutions, lifestyles and popular attitudes in modern France.

Prerequisite: FREN 2120 or consent of instructor.

FREN 365V. Perspectives in French Culture**3 Credits (3)**

Examines components of French culture through literature, films and other sources. Taught in English. Does not satisfy Arts and Sciences second language requirement. Does not satisfy French major or minor requirements.

FREN 378. Studies in Francophone Cultures**3 Credits (3)**

Studies of representative Francophone cultures through their history, literature, music and films.

Prerequisite: FREN 2120 or consent of instructor.

FREN 381. Survey of French Literature I**3 Credits (3)**

Literary movements, authors and selected texts of the Middle Ages through the eighteenth century.

Prerequisite: FREN 2120 or consent of instructor.

FREN 382. Survey of French Literature II**3 Credits (3)**

Literary movements, authors and selected texts of the nineteenth and twentieth centuries.

Prerequisite: FREN 2120 or consent of instructor.

FREN 385. French Civilization**3 Credits (3)**

A detailed study of important events in French civilization from its origins to the twentieth century through the study and discussion of history, literature, fine arts and politics.

Prerequisite: FREN 2120 or consent of instructor.

FREN 386. Contemporary Women Writers in French**3 Credits (3)**

Exploration of literary texts by contemporary women writers in France and the Francophone world; emphasizes the cultural contexts that have defined women's relationship to writing. Selections will vary from year to year.

Prerequisite: FREN 2120 or consent of instructor.

FREN 410. Paris: History and Cultures**3 Credits (3)**

An in-depth look at history and culture of Paris from its origins to the present.

Prerequisite(s): FREN 212 or consent of instructor.

FREN 425. Advanced French Conversation**3 Credits (3)**

Mastery of spoken French language through discussion of personal readings and group work to develop vocabulary, syntactical and conversational skills. The class is conducted entirely in French.

Prerequisite(s): FREN 325 or consent of instructor.

FREN 449. French for Specific Purposes**3 Credits (3)**

Directed reading for students to satisfy language requirement for master's or doctoral programs. May be repeated up to 6 credits.

FREN 451. Special Topics in French**1-3 Credits**

Selected topics relating to the cultures or literatures of the countries where French is spoken will be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

FREN 453. Independent Studies in French**1-3 Credits**

Individualized, self-paced projects for advanced students. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

FREN 472. The French Short Story**3 Credits (3)**

Study and discussion of French short stories through the ages.

Prerequisite: FREN 2120 or consent of instructor.

FREN 478. Studies in Francophone Cultures Around the World**3 Credits (3)**

Advanced studies of representative Francophone cultures through their history, literature, music and films.

Prerequisite: FREN 2120 or consent of instructor.

FREN 486. Advanced Contemporary Women Writers in French**3 Credits (3)**

Advanced study of literary texts by contemporary women writers in France and the Francophone world; emphasizes the cultural contexts that have defined women's relationship to writing. Selections will vary from year to year.

Prerequisite: FREN 2120 or consent of instructor.

FRMG-FAMILY RESOURCE MGT

FRMG 450. Special Topics**1-4 Credits**

Special subjects and credits to be announced in the Schedule of Classes. May be taken for a maximum of 4 credits per semester and a total of 9 credits toward a degree.

FRMG 492. Special Problems**1-4 Credits (1-4)**

Individual research study in a selected subject of Family and Consumer Sciences. Maximum of 4 credits per semester and a grand total of 8 credits towards a degree. Consent of Instructor required.

FRMG 590. Special Topics**1-4 Credits**

Special subjects and credits to be announced in the Schedule of Classes. May be taken for a maximum of 4 credits per semester and a total of 9 credits toward a degree.

FSTE-FOOD SCIENCE & TECHNOLOGY

FSTE 1120. ACES in the Hole Foods I**4 Credits (4)**

Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products Restricted to Las Cruces campus only. Students enrolled in this class must possess A Food Handler Card

Learning Outcomes

1. Apply basic scientific principles, procedures, techniques and standards in the production of food products.
2. Apply principles of sanitation and safety to the production of food products.
3. Assist in the development and evaluation of new and/or existing food products made for human consumption.
4. Prepare a resume and portfolio

FSTE 2110G. Food Science I**4 Credits (3+2P)**

The scientific study of the principles involved in the preparation and evaluation of foods. May be repeated up to 4 credits.

Learning Outcomes

1. Explain basic scientific principles involved in the preparation of high quality food products.
2. Utilize scientific inquiry in the experimental investigation of factors influencing the chemical, physical and sensory properties of food products.
3. Apply basic scientific principles, procedures, techniques and standards in the preparation of all types of high quality food products.
4. Use basic methods of quantitative analysis to critically evaluate quality characteristics of food.
5. Use sensory science techniques and terminology to critically evaluate acceptability and quality characteristics of food.
6. Describe high quality characteristics of a variety of food products using appropriate terminology.
7. Apply principles of sanitation and safety to food preparation.

FSTE 2120. ACES in the Hole Foods II**4 Credits (8P)**

Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products. Student must also have a Food Handler Card to enroll in this course.

Prerequisite(s): FSTE 1120.

Learning Outcomes

1. Apply basic scientific principles, procedures, techniques and standards in the production of food products.
2. Apply principles of sanitation and safety to the production of food products.
3. Assist in the development and evaluation of new and/or existing food products made for human consumption.
4. Prepare a resume and portfolio

FSTE 2130G. Survey of Food and Agricultural Issues**3 Credits (3)**

Survey of food and agricultural issues, including: geography of food production and consumption; human-agricultural-natural resource relations; agriculture in the United States and abroad; modern agribusiness; food safety; food, agriculture, and natural resources policy; ethical questions; role and impact of technology. Crosslisted with AEEC 2130G.

Learning Outcomes

1. Understand of global agriculture including production techniques used in various geographical regions, consumption trends, and political and social constraints.
2. Synthesis information about agricultural issues and make informed arguments
3. Articulate modern issues in agriculture
4. Write coherent arguments relative to personal beliefs regarding agricultural issues

FSTE 2996. Special Topics**1-4 Credits**

Specific topics and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

Learning Outcomes

1. Varies

FSTE 320. Food Microbiology**4 Credits (3+2P)**

Detrimental and beneficial microbiological aspects of food products. Methods of quantification and identification of microorganisms associated with food spoilage and preservation. May be repeated up to 4 credits. **Prerequisite(s):** (BIOL 2610G and BIOL 2610L), or (BIOL 2110G and BIOL 2110L)

FSTE 325. Food Analysis**3 Credits (2+2P)**

Basic chemical and physical techniques used in establishing nutritional properties and overall acceptance of food products. May be repeated up to 3 credits.

Prerequisite(s): CHEM 1215G or consent of instructor.

FSTE 328. Introduction to Food Engineering**3 Credits (2+2P)**

Basic engineering principles including mass and energy balances, fluid flow, heat transfer and chemical kinetics and their application to food processing unit operations. Video and laboratory participation are used to enhance course content and relevance. May be repeated up to 3 credits.

Prerequisite(s): MATH 1430G or consent of instructor.

FSTE 331. Food Preservation**3 Credits (2+2P)**

Processes used in home and commercial food preservation, including canning, freezing, drying, and irradiation. May be repeated up to 3 credits.

Prerequisite(s): FSTE 2110G.

FSTE 375. ACES in the Hole Foods III**4 Credits (2+8P)**

Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products May be repeated up to 8 credits. Restricted to: FSTE majors.

Prerequisite(s): FSTE 2120 and Have a Food Handler Card.

FSTE 421. Food Chemistry**3 Credits (3)**

Comprehensive study of the chemical and physiochemical properties of food constituents. Chemical changes involved in the production, processing, and storage of food products and basic techniques used to evaluate chemical and physiochemical properties of foods.

Prerequisites: CHEM 1215G, CHEM 1225G, and CHEM 2115, or consent of instructor.

FSTE 423. Food Processing Technologies**4 Credits (3+2P)**

Common food processing unit operations such as raw material preparation, separation, concentration, fermentation, pasteurization, sterilization, extrusion, dehydration, baking, frying, chilling, freezing, controlled atmosphere storage, water, waste and energy management, packaging, materials handling and storage and process control. Application of principles to processing food in a laboratory setting.

Prerequisite(s): FSTE 328.

FSTE 425. Sensory Evaluation of Foods**3 Credits (2+2P)**

Principles and procedures involved in the sensory evaluation of foods. Physiological, psychological and environmental factors affecting the evaluation of sensory properties. Analysis and interpretation of sensory data.

Prerequisite(s): FSTE 2110G and A ST 311 or MATH 1350G.

FSTE 429. Product Development**3 Credits (1+4P)**

Application of chemical, physical, nutritional and psychological principles and experimental methods to the development and evaluation of a food product for a specified food product development competition.

Prerequisite(s): FSTE 320 and FSTE 425.

FSTE 430. Designing and Brewing Great Beers of the World**3 Credits (1+4P)**

The science and technology of brewing unit operations and the ingredients used in beer brewing. That knowledge is then applied to designing and brewing classic world beer styles. Styles investigated change every semester but typically include India Pale Ale, Pale Ale, Stout, Porter, Hefeweizen, Scottish Ale, and Black IPA. Comprehensive evaluation of the product relative to style guidelines completes the design-brew-evaluate cycle. Students must be at least 21 years of age on the first day of class. May be repeated up to 3 credits.

FSTE 450. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits towards a degree. Consent of instructor required.

FSTE 475. ACES in the Hole Foods IV**1-4 Credits (2-8P)**

Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products May be repeated up to 8 credits. Restricted to: FSTE majors.

Prerequisite(s): FSTE 375 Have a Food Handler Card.

FSTE 480. Food Safety**3 Credits (3)**

Provide students' knowledge on good manufacturing practices and prerequisite programs, conduct hazard analysis and determine preventive controls, define process, food allergen, sanitation and supply-chain preventive controls and discuss verification validation, recall and recordkeeping requirements with training and educational opportunities related to current best practices and guidance, and future regulatory requirements by establishing the Produce Safety Alliance. Students participate in a Mock Audit. Participants will receive an official FSPCA Preventive Controls Qualified Individual certificate issues by AFDO after attending this training program.

Prerequisite(s): FSTE 320 or BIOL 311, or consent of instructor.

FSTE 492. Special Problems**1-4 Credits**

Individual research study in a selected subject of Family and Consumer Sciences. Maximum of 4 credits per semester and a grand total of 8 credits towards a degree. Consent of instructor required.

FSTE 500. Data Analysis for Food Scientists**3 Credits (3)**

An introduction to data analysis of food scientists. Modern statistical techniques used to analyze typical data collected by food scientists and researchers will be covered. Consent of Instructor required.

FSTE 520. Graduate Study in Food Microbiology**3 Credits (2+3P)**

Detrimental and beneficial microbiological aspects of food products. Methods of quantification and identification of microorganisms associated with food spoilage and preservation. Additional work required at the graduate level.

Prerequisites: BIOL 2610G/2610L, or BIOL 2110G/2110L, or consent of instructor.

FSTE 521. Graduate Study in Food Chemistry**3 Credits (3)**

Comprehensive study of the chemical and physiochemical properties of food constituents. Chemical changes involved in the production, processing and storage of food products and basic techniques used to evaluate chemical and physiochemical properties of foods. Additional work required at the graduate level.

Prerequisites: CHEM 1215G, CHEM 1225G, and CHEM 2115, or consent of instructor.

FSTE 523. Food Processing Technologies**4 Credits (3+2P)**

Common food processing unit operations such as raw material preparation, separation, concentration, fermentation, pasteurization, sterilization, extrusion, dehydration, baking, frying, chilling, freezing, controlled atmosphere storage, water, waste and energy management, packaging, materials handling and storage and process control. Application of principles to processing food in a laboratory setting. Additional work beyond that for FSTE 423 required at the graduate level.

Prerequisite(s): FSTE 528.

FSTE 524. Sensory Evaluation of Foods**3 Credits (2+3P)**

Principles and procedures involved in the sensory evaluation of foods. Physiological, psychological and environmental factors affecting the evaluation of sensory properties. Analysis and interpretation of sensory data.

Prerequisite(s): FSTE 2110G and A ST 311 or MATH 1350G.

FSTE 525. Graduate Study in Food Analysis**3 Credits (2+3P)**

Covers basic chemical and physical techniques used in establishing nutritional properties and overall acceptance of food products. Additional work required at the graduate level.

Prerequisite(s): CHEM 1215G or consent of instructor.

FSTE 531. Food Preservation**3 Credits (3)**

Processes used in home and commercial food preservation, including canning, freezing, drying, and irradiation. Same as FSTE 331 with additional work required at the graduate level.

FSTE 532. Designing and Brewing Great Beers of the World**3 Credits (2+2P)**

The science and technology of brewing unit operations and the ingredients used in beer brewing. That knowledge is then applied to designing and brewing classic world beer styles. Styles investigated change every semester but typically include India Pale Ale, Pale Ale, Stout, Porter, Hefeweizen, Scottish Ale, and Black IPA. Comprehensive evaluation of the product relative to style guidelines completes the design-brew-evaluate cycle. Students must be at least 21 years of age on the first day of class.

FSTE 560. Rumen Microbiology (so)**3 Credits (3)**

Same as ANSC 560.

FSTE 575. ACES in the Hole Foods**1-4 Credits (2-8P)**

Food production activities related to operation of ACES in the Hole Foods, a student-run food company that will give FSTE majors hands-on experience in all aspects of developing, producing and marketing food products May be repeated up to 8 credits.

Prerequisite(s): Students must possess a food handler card.

FSTE 598. Special Research Programs**1-4 Credits**

Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits towards a degree. Consent of instructor required.

FSTE 600. Special Research Program**1-6 Credits (1-6)**

Special research for doctoral students May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

FSTE 601. Cooperative Extension Service Field Experience**1-3 Credits (1-3)**

This course will provide students with knowledge and experience in community outreach through the cooperative extension service. This course is required for students pursuing a Ph.D. in FSHN. Students will work collaboratively with extension faculty on applied projects. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: FSHN majors.

FSTE 605. Doctoral Seminar**1 Credit (1)**

Current topics and research in Food Science and Human Nutrition. Course will include experts from the field as guest speakers. Students will have the opportunity to present their doctoral proposals and/or research findings.

FSTE 620. Advanced Studies in Food Microbiology**3 Credits (3)**

Lectures, directed study, discussion and laboratory work in microflora of foods.

Prerequisite(s): FSTE 520 or consent of instructor.

FSTE 621. Advanced Studies in Food Chemistry**3 Credits (3)**

Lectures, seminars and/or laboratory work dealing with chemical and physiochemical properties of food constituents. Chemical changes involved in the production and storage of food products.

Prerequisite(s): FSTE 521 or consent of instructor.

FSTE 625. Advanced Studies in Food Analysis**3 Credits (3)**

Lectures, seminars, and/or laboratory work dealing with problem solving in food analysis. Consent of Instructor required.

Prerequisite(s): Consent of Instructor.

FSTE 626. Advanced Studies in Sensory Evaluation of Foods**3 Credits (3)**

Lectures, direct study, and discussion of such topics as sensory evaluation of foods. Analysis and interpretation of sensory data.

Prerequisite(s): FSTE 525 or consent of instructor.

FSTE 652. Functional Foods for Health**3 Credits (3)**

Integration of food science and human nutrition to analyze chemical properties and constituents that make a food product functional. Investigation of the physiological effects of functional foods and their relation to health. Overview of functional food development and production.

FSTE 698. Doctoral Research**1-6 Credits (1-6)**

Research May be repeated up to 6 credits. Consent of Instructor required.

FSTE 700. Doctoral Dissertation**1-12 Credits (1-12)**

Dissertation May be repeated up to 18 credits. Consent of Instructor required.

Prerequisite(s): Passed the qualifying exam and comprehensive exam.

FWCE-FISH,WILDLF,CONSERV ECOL

FWCE 1110G. Introduction to Natural Resources Management

4 Credits (3+2P)

This class covers historical and current issues affecting the management of renewable natural resources with an emphasis on water, soil, rangeland, forest, fish, and wildlife resources. An emphasis is placed on the scientific method and critical thinking. In the laboratory students collect and analyze field data on topics covered above and write up each unit as a laboratory report.

Learning Outcomes

1. Students should be able to recall, describe and explain the laws, treaties and acts that have led to our current management of natural resources in the United States.
2. Students should recognize or explain what ecological processes are, the importance of ecological processes in maintaining ecosystem function and how human activities change ecological processes and the ecosystems dependent on those processes.
3. In each of the six course and lab modules (water quality, soils, forestry, rangelands, wildlife and fisheries) students should be able to recall, describe and explain basic terminology, fundamental ecological principles and management techniques and challenges.
4. Students should be able to interpret data presented graphically and in tables from class exercises and lectures.
5. Students should be able to solve problems scientifically through field data collection, laboratory analyses and the use of quantitative methods (basic statistics, tables and graphs).
6. Students should be able to communicate results from laboratory exercises (6 lab modules) orally and in writing.
7. Students will learn to apply scientific thinking to real world problems through in class discussion and short essays
8. based on material from case studies presented in class and guest speakers.

FWCE 1120. Contemporary Issues in Wildlife and Natural Resources Management

3 Credits (3)

Ecological, socioeconomic, and political issues surrounding the management of our natural resources with an emphasis on fish and wildlife resources.

FWCE 2110. Principles of Fish and Wildlife Management

3 Credits (3)

Basic principles of fish and wildlife management including history, ecology, economics, and policy. Emphasis on wildlife and fisheries. Uses an ecosystem approach integrating living and nonliving resources.

Prerequisite(s): FWCE 1110G.

Learning Outcomes

1. The goal of this course is to provide a firm foundation in the principles of wildlife and fisheries management.
2. Material will include a background in biological principles geared towards animal populations,
3. characteristics and management of the habitats utilized by fish and wildlife, techniques used to study and manage animals and their habitats, and aspects of the human dimension involved in wildlife and fisheries issues.
4. This course serves as a core requirement for degrees offered in the Department of Fish, Wildlife and Conservation Ecology and as a required course for degrees in other departments such as Rangeland Resources.

FWCE 301. Wildlife Ecology

3 Credits (3)

General ecological theory with emphasis on concepts including biogeography, species interactions, population dynamics and disease ecology as they relate to the management and conservation of vertebrates. **Prerequisite(s):** BIOL 2610G

FWCE 330. Natural History of the Vertebrates

4 Credits (3+3P)

Evolution, ecology, and diversity of vertebrates. Topics include comparative anatomy and physiology, biogeography, community ecology, behavior, and conservation. Laboratory emphasizes identification of local taxa. Field trips may be required.

Prerequisite(s)/Corequisite(s): BIOL 322. **Prerequisite(s):** BIOL 2610G and BIOL 2610L.

FWCE 355. Wildlife Techniques and Analysis

4 Credits (3+2P)

FWCE 355 will provide a broad overview of basic skills and techniques that are commonly used by biologists in performing management, research, and reporting functions in natural resource fields with an emphasis on wildlife techniques, data processing and analysis.

Prerequisite(s): FWCE 301, A ST 311.

FWCE 357. Fisheries Management and Analysis

4 Credits (3+2P)

Lectures and laboratory exercises provide a broad overview of basic skills and techniques used for assessing and managing fish populations.

Prerequisite(s): FWCE 301 and A ST 311.

FWCE 391. Internship**1-3 Credits (1-3)**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. Consent of Instructor required. Graded: S/U Grading (S/U, Audit).

Prerequisite(s): Consent of instructor.

FWCE 393. Professional Experience and Communication**3 Credits (3)**

Professional work experience under the supervision of employer and/or a faculty member. Written report and presentation is required.

Prerequisite(s)/Corequisite(s): FWCE 2110.

FWCE 402. Seminar in Natural Resource Management**1 Credit (1)**

Review and discussion of current topics in natural resource management.

Prerequisite(s): Senior standing or above.

FWCE 409. Introduction to Population Ecology**3 Credits (3)**

Quantitative analysis of vital statistics and mechanisms affecting dynamics of wild populations. Patterns of growth, age structure, survival, and natality. Population theories and life tables.

Prerequisite(s): MATH 1430G and FWCE 2110.

FWCE 430. Avian Field Ecology**4 Credits (3+3P)**

Principles of avian ecology and management with an emphasis on taxonomy, physiology, behavior and field studies. Includes weekly field trips focusing on identification and behavior of Southwest birds.

Prerequisite(s)/Corequisite(s): FWCE 330.

FWCE 431. Mammalogy**4 Credits (3+2P)**

Classification, identification, anatomy, physiology, life history, and ecology of mammals. Field trips required.

Prerequisite(s): FWCE 2110 and FWCE 330.

FWCE 432. Environmental Biology of Fishes**4 Credits (3+3P)**

What makes a fish, a fish? Mechanisms of circulation, gas exchange, osmotic and ionic regulation, swimming, migration, reproduction, and chemoreception will be covered in this class. Taught with FWCE 532.

Prerequisite(s): CHEM 1215G and senior standing.

FWCE 434. Aquatic Contaminants and Toxicology**4 Credits (3+3P)**

Basic principles and methodologies of aquatic toxicity testing; routes of exposure and modes of action; environmental legislation and ecological risk assessment. Taught with FWCE 534. Crosslisted with: ENV 434.

Prerequisite(s): CHEM 1215G and senior standing.

FWCE 437. Wildlife Damage Management**3 Credits (3)**

Introduction to basic need and appropriate methods for resolving human-wildlife conflicts and management of animal damage. Socioeconomic, ecological, and political factors. Field trips required. Taught with FWCE 537.

Prerequisite(s): BIOL 2610G, FWCE 2110, FWCE 301, FWCE 409.

FWCE 447. Wildlife Law and Policy**3 Credits (3)**

Introduction to state and federal laws and policies for wildlife and the historical context for their development. Taught with FWCE 547.

Prerequisite(s): Junior or Senior level standing.

FWCE 448. Problems**1-3 Credits (1-3)**

Individual investigations in fishery or wildlife science. Maximum 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): 18 credits in WLSC.

FWCE 450. Special Topics**1-4 Credits (1-4)**

Specific subjects and credits as announced in the Schedule of Classes. Maximum of 4 credits per semester. May be repeated up to 9 credits. Consent of Instructor required.

FWCE 457. Ecological Biometry**3 Credits (3)**

Use of ecological data to test scientific hypotheses, stochastic and statistical models for environmental data, data visualization, likelihood-based and information-based model selection. Emphasis on open-source software tools.

Prerequisite(s): MATH 1430G or MATH 1511G, A ST 311, FWCE 301.

FWCE 459. Aquatic Ecology**4 Credits (4)**

Ecological functions of plant and animal communities in aquatic ecosystems with emphasis on chemical and physical properties, productivity, species interactions, population dynamics, and concepts for diagnosing problems and restoring aquatic ecosystems. Taught with FWCE 559.

Prerequisite(s): FWCE 301 or BIOL 301, CHEM 1225G, MATH 1430G.

FWCE 464. Management of Aquatic and Terrestrial Ecosystems**4 Credits (3+2P)**

Principles and methods for managing aquatic and terrestrial ecosystems and their fish and wildlife resources. Emphasis on quantitative techniques, data collection and analysis for management of systems at a landscape spatial scale.

Prerequisite(s): (BIOL 301 or FWCE 301) FWCE 330, A ST 311.

FWCE 467. Herpetology**4 Credits (4)**

Systematics, taxonomy, ecology, behavior, and conservation of amphibians and reptiles. Field trips required. Taught with FWCE 567.

Prerequisite(s): FWCE 330.

FWCE 471. GIS for Natural Resource Scientists**4 Credits (4)**

Practical GIS class for students with little or no GIS experience. Class focuses on learning to use industry-standard software and applications in natural resource management. Taught with FWCE 571.

FWCE 472. Wildlife Museum Internship**1-4 Credits (1-4)**

Substantial directed work experience in various functions of the wildlife natural history museum developed by the student in consultation with the faculty curator. Internships may involve aspects of collection development and management, public education programs, or other related museum activities. Internship must be approved by the faculty curator. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): BIOL 2610G and BIOL 2610L.

FWCE 482. Ichthyology**4 Credits (3+2P)**

Classification, morphology, identification, life history, and ecology of fishes.

Prerequisite(s): FWCE 330 or consent of instructor.

FWCE 509. Population Ecology (s)**3 Credits (2+2P)**

Quantitative analysis of vital statistics and mechanisms promoting stability in wild populations. Theory and application of life tables and population models.

FWCE 515. Graduate Seminar**1 Credit (1)**

Current topics.

FWCE 530. Large Mammal Ecology, Conservation and Management**3 Credits (3)**

This course will cover aspects of large mammal ecology, management and conservation. Will include aspects of foraging ecology, resource and habitat selection, competition and resource partitioning, predation and population dynamics. Taught with FWCE 436.

FWCE 532. Environmental Biology of Fishes**4 Credits (3+3P)**

What makes a fish, a fish? Mechanisms of circulation, gas exchange, osmotic and ionic regulation, swimming, migration, reproduction, and chemoreception will be covered in this class. Taught with FWCE 432; however, students are responsible for all requirements in FWCE 432, plus additional assignments.

FWCE 534. Aquatic Contaminants and Toxicology**4 Credits (3+3P)**

Basic principles and methodologies of aquatic toxicity testing; routes of exposure and modes of action; environmental legislation and ecological risk assessment. Students are responsible for all requirements for FWCE 434 plus additional work.

FWCE 535. Special Topics**1-4 Credits (1-4)**

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

FWCE 536. Advanced Avian Ecology**3 Credits (3)**

Focuses on current topics and literature in avian ecology including systematics, mating systems, behavior, physiology, movement patterns and conservation. Includes required overnight field trips.

Prerequisite(s): Graduate standing or consent of instructor.

FWCE 537. Wildlife Damage Management**3 Credits (3)**

Introduction to basic need and appropriate methods for resolving human-wildlife conflicts and management of animal damage. Socioeconomic, ecological, and political factors. Field trips required. Taught with FWCE 437. Students are responsible for all requirements for FWCE 437 plus additional work. **Prerequisite(s):** BIOL 2610G, FWCE 2110, FWCE 301 and FWCE 409

FWCE 540. Wildlife Habitat Relationships**3 Credits (3)**

The study of wildlife-habitat relationships primarily seeks to describe how the distribution and abundance of resources used for food, cover and security, and constraints on the use of these resources influence the distribution of animals. This course will cover aspects of animal behavior related to how animals select habitat, theoretical models of habitat selection, the influence of inter- and intra-specific interactions on habitat selection, habitat quality, study designs for wildlife-habitat studies, modeling habitat selection and data analyses. Taught with FWCE 440.

FWCE 547. Wildlife Law and Policy**3 Credits (3)**

Introduction to state and federal laws and policies for wildlife and the historical context for their development. Taught with FWCE 447.

FWCE 548. Graduate Problems**1-3 Credits (1-3)**

Individual studies in fishery and wildlife sciences. Maximum of 3 credits per semester. No more than 6 credits of this course and FWCE 598, combined, toward a degree. May be repeated up to 6 credits.

FWCE 558. Nonthesis Project**1-6 Credits (1-6)**

Independent study to satisfy nonthesis project requirement. Maximum of 6 credits toward degree. Available only to nonthesis students. May be repeated up to 6 credits.

FWCE 559. Aquatic Ecology**4 Credits (4)**

Ecological functions of plant and animal communities in aquatic ecosystems with emphasis on chemical and physical properties, productivity, species interactions, population dynamics, and concepts for diagnosing problems and restoring aquatic ecosystems. Taught with FWCE 459.

Prerequisite(s): FWCE 301 or BIOL 301, CHEM 1225G, MATH 1430G.

FWCE 567. Herpetology**4 Credits (4)**

Systematics, taxonomy, ecology, behavior and conservation of amphibians and reptiles. Field trips required. Taught with FWCE 467.

FWCE 571. GIS for Natural Resource Scientists**4 Credits (4)**

Practical GIS class for students with little or no GIS experience. Class focuses on learning to use industry-standard software and applications in natural resource management. Taught with FWCE 471.

FWCE 582. Ichthyology**4 Credits (4)**

Classification, morphology, identification, life history, and ecology of fishes. Taught with FWCE 482.

FWCE 598. Special Research Programs**1-3 Credits (1-3)**

Individual investigations, either analytical or experimental. Maximum of 3 credits per semester. No more than 6 credits of this course and FWCE 548, combined, toward a degree. Not available to students in the nonthesis program. May be repeated up to 6 credits.

FWCE 599. Master's Thesis**1-9 Credits (1-9)**

Thesis. May be repeated up to 30 credits. Thesis/Dissertation Grading.

FYEX-FIRST YEAR EXPERIENCE

FYEX 1110. First-year Seminar

1-3 Credits

This course is designed to help students achieve greater success in college and in life. Students will learn many proven strategies for creating greater academic, professional, and personal success. Topics may include career exploration, time management, study and test-taking strategies to adapt to different learning environments, interpersonal relationships, wellness management, financial literacy, and campus and community resources.

Learning Outcomes

1. Recognize the ways in which s/he is responsible for her/his own experience in education.
2. Identify, locate, and utilize available campus resources essential for academic success.
3. Create long-and short-term goals associated with student success and career planning.
4. Implement time management techniques to organize the semester's workload.
5. Develop strategies to use individual strengths to succeed and reflect upon coursework and course progress in multiple classes to alter academic behaviors and create deeper meaning and learning.
6. Apply the skills essential for analyzing and solving problems in her/his academic, professional, and personal life, which may include financial literacy and wellness management.
7. Develop and apply essential skills such as reading, taking notes, studying, memorizing, taking tests, and self-management skills necessary for college success.
8. Identify and revise self-defeating patterns of behavior, thought, and emotion as well as unconscious limiting beliefs.
9. Develop supportive relationships with members of the campus community.
10. 1Develop essential reading, writing, and critical thinking skills used in study and in research.
11. 1Demonstrate understanding of how to use the computer for academic purposes, including learning management systems, email communications, research databases, degree audit, and other online resources.

FYEX 1112. The Freshman Year Experience

3 Credits (3)

An introduction to the university and its resources; emphasis on development of academic and personal skills that enable freshmen to become successful learners. Restricted to: Main campus only.

Prerequisite(s): Freshman Standing Only.

Learning Outcomes

1. Appreciate the goals, methods, and values of higher education
2. Expand intellectual development and self-direction
3. Establish a faculty mentor relationship
4. Enhance knowledge and practice of collaborative learning principles
5. Establish a familiarity with campus resources and student services
6. Develop public speaking, critical thinking, library research, and study strategies
7. Evaluate talents and interest in relation to selecting a major and career planning
8. Examine and clarify values
9. Acknowledge and enhance respect for diversity

FYEX 1116. Managing Your Money**1 Credit (1)**

Principles and strategies for effective money management. Includes financial goal setting, both short and long term. Explores the relationship between career and income earning potential. Explores issues of credit and debt management and prevention of identity theft.

Learning Outcomes

1. Demonstrate understanding of the psychology of money and how it relates to personal financial decisions
2. Create realistic short- and long-term financial goals and a personal budget
3. Comprehend and manage college finances, including types of financial aid
4. Appreciate the importance of the Free Application for Federal Student Aid (FAFSA)
5. Describe the financial aspects of career development and how they apply to their own lives, including resume, taxes, salary, benefits
6. Apply principles of student loan management
7. Demonstrate use of credit reports in the prevention identity theft
8. Identify essential elements of smart spending and borrowing
9. Recognize debt and repayment costs
10. 1 Explain the basics of saving and planning for the financial future
11. 1 Create focused, developed, clear discussion posts and other written work for this class

FYEX 1117. Financial Literacy Money Matters**2 Credits (2)**

This course will cover a variety of financial literacy topics ranging from budgeting to student loan repayment. This course is designed to assist students in becoming more financially literate. Restricted to Las Cruces campus only.

Learning Outcomes

1. Master effective strategies and other skills related to financial literacy
2. Establish a familiarity with campus resources designed to foster financial literacy and wellness
3. Exhibit intellectual development and self-direction in relation to financial literacy and wellness
4. Identify financial literacy skills which best support individual financial well-being
5. Demonstrate skills and knowledge that allows the student to make informed and effective decisions with all of their financial resources

FYEX 1131. Personal Learning Skills I**1-3 Credits**

Individualized programs for self-improvement in skill areas necessary for academic success in the university environment. Each course to bear an appropriate subtitle. May be repeated up to 3 credits. Graded S/U.

Learning Outcomes

1. Synthesize the importance of critical thinking through self-reflection and self-exploration
2. Analyze and apply critical thinking skills using the eight intellectual standards
3. Describe the common barriers to critical thinking and construct problem solving strategies
4. Evaluate information and knowledge to determine misinformation and inaccuracies
5. Demonstrate information literacy by recognizing when information is needed and being able to
6. efficiently locate, accurately evaluate, effectively use, and clearly communicate the information in various formats and mediums

FYEX 1132. Academic and Personal Effectiveness**2 Credits (2)**

Learn academic self-analysis skills through the application of study and learning techniques to current course demands. Exposure to a variety of topics which enhance university and life-long learning.

Learning Outcomes

1. Students will demonstrate mastery of course objectives in time management, stress management, test taking, and other skills through completion of activities, quizzes, discussions, and more.
2. Students will be able to identify NMSU campus resources, including their services, location, and contact information.
3. Students will exhibit intellectual development and an improved self-direction through participation in the course.
4. Students will be able to identify and adopt those management skills which best support academic and career choices.

FYEX 1133. Academic Reading and Study Skills**1-4 Credits**

Introduction to and practice with strategies for effective reading and studying at the college level. Provides laboratory.

Learning Outcomes

1. Use reading strategies to synthesize texts
2. Identify rhetorical elements of texts
3. Identify and apply different study methods
4. Recognize the role of student support services for student success
5. Identify and practice effective time management skills
6. Demonstrate proficient computer skills
7. Write an effective summary

FYEX 1134. Speed Reading**1 Credit (1)**

Introduction to strategies and techniques for increasing reading rate and comprehension related to academic areas.

Learning Outcomes

1. Demonstrate an understanding of speed reading strategies and eye movement drills
2. Expand vocabulary and reading comprehension
3. Improve reading rates and develop reading techniques
4. Demonstrate an understanding of skimming techniques and scanning strategies

FYEX 1140. Career Exploration**1 Credit (1)**

Survey of careers possible with community college associate degrees. Information on how to make a career choice.

Learning Outcomes

1. Desired career and lifestyle
2. Areas of interest
3. Skills and abilities
4. Personal values
5. DACC programs that match the student's interests, abilities, and values
6. Three careers that match the student's interests, abilities, values, and personality

FYEX 1160. Tutorial**1-3 Credits**

Development of specific skills required for college courses, such as note-taking, listening, and test-taking. To be taken in conjunction with a regular designated college course.

Learning Outcomes

1. Demonstrate the ability to organize their time in order to improve study habits.
2. Apply pre-reading strategies to improve reading concentration and comprehension.
3. Demonstrate basic understanding of the systems of the body.
4. Identify techniques to improve personal concentration and comprehension skills.
5. Identify and demonstrate listening skills.
6. Identify effective study and note taking skills.
7. Identify and demonstrate effective test-taking skills.
8. Identify critical thinking skills used in nursing.
9. Demonstrate knowledge of key terms.

FYEX 1170. NMSU Gospel Choir**1 Credit (1)**

Students will gain performance experience and exposure to urban contemporary gospel music. Open to all majors. May be taken for unlimited credit. Restricted to: Main campus only.

Learning Outcomes

1. Comprehended the foundation related to singing in a gospel choir setting
2. Demonstrate an understanding of the difference between the musical treble and bass clef
3. Expand vocabulary and reading comprehension of gospel music terminology.
4. Improve the speed and accuracy of music sheet and sight reading

FYEX 1995. Preparing for Cooperative Education & Internship**1 Credit (1)**

The Cooperative Education Course provides students with a comprehensive overview of career-related topics designed to assist with securing Cooperative Education and Internship employment. Students learn about philosophies and approaches to resumes, cover letters, interviewing, job searching, networking, and professionalism. A primary focus of the course is on experiential learning where students have opportunities to practice and implement course concepts including interviewing, networking, job searching, and document creation. In addition to exploring topics related to Cooperative Education and Internship, the course is designed to provide students with tools and strategies for successfully navigating the transition from student to employee. Graded: S/U Grading (S/U, Audit). Restricted to Las Cruces campus only.

Learning Outcomes

1. Demonstrate skills related to securing experiential learning experiences
2. Demonstrate knowledge related to the philosophies and approaches to resumes, cover letters, interviewing, cooperative education and internship search, and networking
3. Comprehend the importance of experiential learning experiences in relation to career development
4. Evaluate experiential learning opportunities and demonstrate comprehension of the skills and strategies necessary to transition from student to career

FYEX 1996. Special Topics**1-4 Credits**

Covers specific study skills and critical thinking topics. Specific sub-titles to be listed in the Schedule of Classes. May be repeated for a maximum of 8 credits.

Learning Outcomes

1. Varies

FYEX 2111. Critical Thinking Skills**3 Credits (3)**

Introduction to critical thinking processes. Develops higher order thinking necessary to evaluate clearly, logically, and accurately one's academic and life experiences. Practical emphases on assertive thinking and perspectives. Prerequisite(s): CCDE 110 N

Learning Outcomes

1. Students will raise vital questions and problems, formulating them clearly and precisely.
2. Students will gather and assess relevant information, using abstract ideas to interpret it effectively, come to well-reasoned conclusions and solutions, and them against relevant criteria and standards.
3. Students will think open-mindedly within alternative systems of thought, recognizing and assessing assumptions, implications, and practical consequences.
4. Students will communicate effectively in figuring out solutions to complex problems.

FYEX 2994. Prior Learning: Professional Portfolio**1-6 Credits**

Creating a portfolio that outlines professional and educational experiences. Life skills and education learned through workplace training and non-traditional education experiences will be evaluated for consideration of awarding college credit. Students will draft a life history paper, prepare a professional resume, assemble supporting documentation and evidence in support of their petition to receive college credit for prior learning. Culminating activities will include an oral presentation of the portfolio contents. Graded S/U.

Prerequisite(s): CCDE 110 N or equivalent.

Learning Outcomes

1. produce writing that is focused on a main point
2. produce writing that is organized
3. produce writing follows task-specific conventions of paragraphing, sentence boundaries, usage, agreement, punctuation and spelling
4. deliver effective speeches
5. organize and present information with a purpose
6. apply effective communication strategies in their personal and professional lives

G S-GRADUATE STUDIES

G S 500. Masters Non-Thesis Final Exam Credit**1 Credit (1)**

Course for non-thesis masters students who have completed all program requirements except the final comprehensive exam. A maximum of 12 credits may be earned. Graded S/U.

Prerequisites: advisor signature required.

G S 596. Special Topics**12 Credits (12)**

Special Topics course for masters and doctoral students. Max be repeated up to 12 credits. Graded S/U.

Learning Outcomes

1. Varies

G S 600. Doctoral Research**1-15 Credits**

Course number is used for assigning credit for research performed prior to successful completion of the doctoral comprehensive examination.

G S 700. Doctoral Dissertation**15 Credits**

Dissertation.

GENE-GENETICS

GENE 1110. Experimental Systems in Genetics**1 Credit (1)**

Survey of molecular, biochemical, organismal, and computer science based approaches to investigate how genes determine important traits. Historical development and topics of current interest will be discussed.

Learning Outcomes

1. To give the students a historical perspective on the field of genetics.
2. To familiarize the students to introductory concepts and vocabulary to the field of genetics.
3. Introduce experimental systems within the field of genetics and to give perspective to current genetic research.
4. As this course is designed for beginning students as an overview of faculty and research labs on campus. The students majoring in genetics are encouraged to meet with faculty and to explore opportunities available to them on campus

GENE 305. Principles of Genetics**3 Credits (3)**

Covers fundamental principles of reproduction, variation, and heredity in plants and animals. Crosslisted with: AGRO 305, ANSC 305, BIOL 305 and HORT 305

Prerequisite(s): BIOL 2610G, BIOL 2110G and either CHEM 1215G or CHEM 1216.

GENE 305 L. Genetic Techniques**1 Credit (3P)**

Experimental procedures used in genetic research including: sexual transmission genetics, eukaryotic DNA isolation, DNA marker development and genotyping, polymerase chain reaction, and cytogenetics.

Prerequisite(s)/Corequisite(s): GENE 315, or AGRO/ANSC/BIOL/HORT 305.

GENE 315. Molecular Genetics**3 Credits (3)**

Covers fundamental principles of DNA structure and replication, transcription, translation, gene regulation, recombinant DNA technology, and a survey of genomics and bioinformatics. Recommend CHEM 313.

Prerequisite(s): CHEM 1225G and BIOL 2110G.

GENE 320. Hereditary and Population Genetics**3 Credits (3)**

Covers fundamental principles of reproduction, variation, and heredity in plants and animals including: Mendelian inheritance, mitosis, meiosis, genetic linkage, random mating, genetic drift, natural selection, inbreeding, migration, mutation, interrelationships between individuals, populations and communities and the environment.

Prerequisite(s): CHEM 1215G & BIOL 2110G.

GENE 391. Genetics Internship**1-6 Credits (1-6)**

Professional work experience in genetics under the joint supervision of an employer and a faculty member. Documentation of proposed internship activities must be submitted prior to the start of the internship. A written report is required after the internship is completed. No more than 6 credits toward a degree. May be repeated up to 6 credits. Graded: S/U Grading (S/U, Audit).

GENE 440. Genetics Seminar**1 Credit (1)**

Organization, preparation, and presentation of genetic studies in model microorganism, plant, or animal systems that have been used to solve problems in molecular, cellular, and developmental biology. Consent of instructor required.

Prerequisite(s): Seniors only; GENE 315 & GENE 320.

GENE 449. Special Problems**1-3 Credits (1-3)**

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 3 credits toward a degree. Consent of instructor required.

GENE 450. Special Topics**1-3 Credits (1-3)**

Specific subjects to be announced in the schedule of classes. Maximum of 3 credits per semester and a total of 3 credits toward a degree. Consent of instructor required.

GENE 452. Applied Bioinformatics**3 Credits (3)**

Survey and application of publicly available bioinformatic tools that treat genomic DNA, cDNA, and protein sequences, RNA abundance, as well as tools that allow inference based on phylogenetic relationships.

Prerequisites: AGRO/ANSC/BIOL/HORT 305 or GENE 315 and GENE 320, and BCHE 341, or BCHE 395.

GENE 486. Genes and Genomes**3 Credits (3)**

Extensive coverage of nuclear and organelle genome structure in plants and animals, genome restructuring including duplication, aneuploidy, chromosome translocations and inversions, comparative genomics, and molecular systematics.

Prerequisites: AGRO/ANSC/BIOL/HORT 305 or GENE 315, and GENE 320.

GENE 488. Gene Regulation**3 Credits (3)**

Extensive coverage of signal transduction processes and approaches used to monitor large scale changes in gene regulation and protein synthesis that occur during development and in response to environmental changes.

Prerequisites: AGRO/ANSC/BIOL/HORT 305 or GENE 315.

GEOG-GEOGRAPHY

GEOG 1110G. Physical Geography

4 Credits (3+3P)

This course introduces the physical elements of world geography through the study of climate and weather, vegetation, soils, plate tectonics, and the various types of landforms as well as the environmental cycles and the distributions of these components and their significance to humans.

Learning Outcomes

1. Define, describe, illustrate, distinguish among or explain the use of maps, map scale, globes, map projections, and remote sensing.
2. Define, describe, illustrate, distinguish among or explain the various elements of the earth's atmosphere, earth's relation to the sun, incoming solar radiation, the ozone layer, the primary temperature controls, and the unequal heating of land and water.
3. Define, describe, illustrate, distinguish among or explain the weather makers (air temperature, air pressure, humidity, clouds, precipitation, visibility, and wind [including pressure gradient, the Coriolis force, and friction]).
4. Define, describe, illustrate, distinguish among or explain air masses, pressure systems, the various fronts and associated types of storms, weather symbols, monsoons, the various forms of precipitation, along with causes and effects of lightning.
5. Define, describe, illustrate or explain the hydrologic cycle, the characteristics and influences of the oceans and continents on the weather, the Southern Oscillation (i.e., El Nino), the effects of land/water distribution, and climates and their global distribution.
6. Define, describe, illustrate or explain the biosphere, including organisms (flora and fauna), food chains, ecosystems and relationships. Define, describe, illustrate or explain soils in terms of soil-forming processes, components, properties, and classification.
7. Define, describe, illustrate or explain the structure of the earth, the internal processes, weathering and mass wasting, fluvial processes, characteristics and processes of arid regions, processes of coastal and Karst topographical regions, the processes and characteristics of glaciation (mountainous and continental).
8. Define, describe, illustrate, distinguish among or explain specific impacts by humans on weather, climate, and on the ecosystem at large.
9. Perform tests and collect data to analyze and classify weather, climate and landforms characteristics, processes, and impacts both quantitatively and qualitatively. This includes reading and extracting basic information from maps, diagrams, remote sensing devices, graphs, and tables.
10. 1 Apply critical thinking skills such as inductive, deductive, and mathematical reasoning to solve problems using the scientific method. This includes interpreting maps, graphs and photos.
11. 1 Recognize and discuss the effect of human activity on climate, climate change, the greenhouse effect, and on landforms at large.
12. 1Synthesize information from external, current sources and personal observations and discuss their relationships to class material.

GEOG 1120G. World Regional Geography**3 Credits (3)**

Overview of the physical geography, natural resources, cultural landscapes, and current problems of the world's major regions. Students will also examine current events at a variety of geographic scales.

Learning Outcomes

1. Identify, describe, illustrate, distinguish among or explain the basic concepts of geography, the major world regions, areal differences and similarities, the processes that shape geography natural and human, the use of maps, and the key topics of geographical interpretation (e.g., location, world importance, population, political status, resources, etc.).
2. Identify, describe, illustrate, distinguish among or explain the regional groups of Europe, its historical background, its languages and religions, major features, the diversified economy, political structures, and impact on globalization.
3. Identify, describe, illustrate, distinguish among or explain the regional groups of Russia and its satellite nations, its historical background, their languages and religions, major features, their diversified economies, political structures, current problems, and impact on globalization.
4. Identify, describe, illustrate or explain the regional nations of Middle East, their historical background, their languages and religions, the major features, the diversified economies and political structures, the current problems.
5. Identify, describe, illustrate, distinguish among or explain the regional groups of Asia, their historical background its languages and religions, major features, the diversified economy and political structures, current problems, and impact on globalization.
6. Identify, describe, illustrate, distinguish among or explain the regional groups of the Pacific World, their historical background its languages and religions, major features, the diversified economy and political structures, current problems, and impact on globalization.
7. Identify, describe, illustrate, distinguish among or explain the regional groups of Africa, their historical background its languages and religions, major features, the diversified economy and political structures, current problems, and impact on globalization.
8. Identify, describe, illustrate, distinguish among or explain the regional groups of Latin America, their historical background its languages and religions, major features, the diversified economy and political structures, current problems, and impact on globalization.
9. Identify, describe, illustrate, distinguish among or explain the regional groups of Anglo-America, their historical background its languages and religions, major features, the diversified economy and political structures, current problems, and impact on globalization.
10. 1Collect data to analyze or classify the region various historical developments and trends relating to globalization
11. 1Apply critical thinking skills in predicting future developments and impacts in economics, cultural diversity, and political stability globally.
12. 1Recognize and discuss current political "hot-spots," their causes, and potential results with regards to globalization.
13. 1Synthesize information the data into a comprehensive world-view.

GEOG 1130G. Human Geography**3 Credits (3)**

This course serves as an introduction to the study of human geography. Human geography examines the dynamic and often complex relationships that exist between people as members of particular cultural groups and the geographical "spaces" and "places" in which they exist over time and the world today.

Learning Outcomes

1. Locate on maps, globes, and other technologies various geo-political spaces and places around the world, including in the United States.
2. Describe the primary concepts, theories, methods and terms prevalent in the field of human geography.
3. Apply core geographic concepts to the spatial patterns demonstrated in real-world scenarios.
4. Identify the relationships that influence human-environment interaction in a specific location at a specific time.
5. Define and utilize key concepts to explain human social and cultural change over time and across geographical space.
6. Explain the geographic context of a current event or conflict.
7. Identify a current event that illustrates a core cultural geographic concept.
8. Think critically, discuss, and write about the relationships of the natural world to human geography.

GEOG 2130. Map Use and Analysis**3 Credits (2+3P)**

Exploration of the cartographic medium. Development of critical map analysis and interpretation skills, and map literacy. Comprised of traditional lecture, labs, and map use projects.

Learning Outcomes

1. Accurately measure bearings and distances on maps.
2. Read and interpret terrain and landform representation.
3. Utilize a magnetic compass for basic land navigation and basic map making.
4. Utilize a GPS instrument for basic land navigation.
5. Recognize and describe basic physical and cultural spatial patterns portrayed on maps.
6. Analyze and interpret the significance of spatial patterns portrayed on maps.
7. Perform elementary spatial statistical analysis on geographic data.
8. Appreciate and utilize the significance of place names and cultural patterns.
9. Critically examine maps for evidence of information misuse or propagandist motives.
10. 1Recognize and utilize appropriate map categories, symbols, projections, and coordinate systems to effectively and accurately portray, read, analyze, and interpret geographic data.

GEOG 2996. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Learning Outcomes

1. Varies

GEOG 315V. World Agriculture and Food Problems**3 Credits (3)**

Survey of food and agricultural issues in the U.S. and other countries. Covers: role of agriculture in economic development; trade in food and agricultural products; global food production, consumption, and marketing patterns; economics of technical change and food assistance; agriculture and the environment. Same as AECC 315V.

GEOG 325V. New Mexico and the American West**3 Credits (3)**

Examination of the cultural and historical patterns, economic activities, and physical characteristics of New Mexico and the American West. Special focus is given to human, environmental, and cultural landscapes, as well as current issues and challenges in New Mexico, the West, and the border region.

GEOG 326. U.S. National Parks**3 Credits (3)**

Exploration of origins, landscapes, ecosystems, management issues, and conflicts in U.S. National Parks. The regional geography of the United States as seen through the creation and protection of biologically and culturally significant lands.

GEOG 328V. Geography of Latin America**3 Credits (3)**

Explores Latin America from a geographical perspective, integrating environmental, cultural and socioeconomic factors in an in-depth study of the development of the region and contemporary issues and challenges facing the region. Special focus is given to examining applied problems facing Latin America at a range of scales.

GEOG 331V. Europe**3 Credits (3)**

Focus on the cultural continent of Europe. An overview of climate, physical geography, and human geography of Europe, including a brief historical geography of the continent. Current environmental, social, and political issues of Europe will be discussed, with a particular focus on the fate of EU.

GEOG 351. Fundamentals of Biogeography**3 Credits (3)**

Exploration of life in space and time. Floristic and physiognomic characteristics of the Earth's major ecosystems and their distributions; ecosystem dynamics, evolution, and physical environment. Includes an individual research project resulting in a poster presentation. Crosslisted with: GEOG 557.

GEOG 353. Geomorphology**3 Credits (2+3P)**

Examination of the principle theories and concepts of landform creation; exploration of the roles of structure, processes, climate, and time in the formation of various types of landforms. Taught with GEOG 553. Crosslisted with: GEOL 353.

GEOG 357. Climatology**3 Credits (3)**

Elements and controls of climate. Energy and hydrologic cycles, general circulation, climate classification, distribution of climate types, microscale effects, applications.

Learning Outcomes

1. Students will be able to describe the fundamental processes that create climate on Earth. Students will be able to describe the physical laws that comprise the climate system. Students will be able to describe the trends in Earth's climate system. Students will be able to summarize our current knowledge of climate change.

GEOG 361V. Economic Geography**3 Credits (3)**

The geographic relationships of supply and demand resources, population, and transportation. Site analysis and decision-making in different economic systems and cultures and how these decisions affect the environment and the location of economic activities.

GEOG 363V. Cultural Geography**3 Credits (3)**

The world's diverse cultural landscapes. Emphasis on the connections between social, political, religious, and agricultural patterns and the impact of societies on the natural environment.

GEOG 365V. Urban Geography**3 Credits (3)**

The global historical development of urban areas, as well as the changing functions of today's cities. A comparison between the North American city system and cities in Europe, Asia, and South America, including the development of the city form, the internal spatial organization of commercial, residential, and industrial areas, and socio-economic and political factors.

GEOG 373. Introduction to Remote Sensing**4 Credits (3+3P)**

Introduction to the theory, techniques, and applications of remote sensing. Topics include electromagnetic radiation; remote sensing systems; remote sensing of the biosphere, hydrosphere, atmosphere, lithosphere, and cultural landscapes. Course includes lectures and also labs focused on the basic analysis and interpretation of remote sensing products. Taught with GEOG 573.

GEOG 381. Cartography and Geographic Information Systems**4 Credits (3+3P)**

Design and construction of thematic maps. Introduction to cartographic principles in lecture. Emphasis on map-making using GIS software in the labs. Taught with GEOG 571.

GEOG 401. Internship/Co-op**1-3 Credits (1-3)**

Provides an opportunity whereby students work with a local, regional, or federal agency, or private sector firm on applied geographic work, under the supervision of an agency or firm professional and a geography faculty member. Consent of instructor required.

GEOG 435. Environmental Planning**3 Credits (3)**

Exploration of planning tools that advance the management of land and water resources, meeting current societal needs, while also minimizing damage to nature and society. Class activities include applied exercises that explore contemporary planning issues, including land conservation, natural hazards, biophysical analysis, water resource management, Federal land issues, and remediation of Superfund sites. Taught with GEOG 535.

GEOG 441. System Design for Geographic Information Science (GIS)**3 Credits (3)**

A critical aspect of GIS is its ability to provide the necessary products within the organization within which it is implemented. This is an in-depth analysis of currently accepted system design methodologies intended to create a successful implementation of GIS inside organizations. Crosslisted with: GEOG 581.

GEOG 452. Landscape Ecology**4 Credits (3+2P)**

Analysis of the structure, function and change of natural and anthropogenic landscapes. Patches, corridors, matrix and network, spatial organization, landscape dynamics, and role of disturbance in overall functioning of landscapes. Role of landscape heterogeneity in landscape management. Crosslisted with: GEOG 552.

GEOG 455. Southwest Environments**3 Credits (3)**

The U.S. Southwest: physical and human geography, coupled human-environment interactions, causes and consequences of environmental issues, and implications for sustainable development. Taught with GEOG 555.

GEOG 467. Transportation Geography**3 Credits (3)**

Nature and distribution of land, air and water transport facilities and their importance in regional development.

Prerequisite(s): C- or better in GEOG 1130G.

GEOG 472. Soil Morphology and Classification**4 Credits (2+2P)**

Same as SOIL 472. Crosslisted with: SOIL 472.

GEOG 473. Advanced Remote Sensing**4 Credits (3+3P)**

Introduction to advanced topics in digital image processing, analysis, interpretation, and visualization. Topics include geometric and radiometric correction, image enhancement, image classification, change detection, and accuracy assessment. Lectures focus on the discussion of advanced remote sensing concepts, techniques, and applications; labs are applications-oriented. Taught with GEOG 573.

Prerequisite(s): C- or better in GEOG 373.

GEOG 481. Fundamentals of Geographic Information Science (GIS)**4 Credits (3+3P)**

Fundamentals of computer-based systems which organize, analyze, and present spatially referenced data. Crosslisted with: GEOG 578.

GEOG 482. Geodatabase Design**3 Credits (2+3P)**

A practical introduction to designing geodatabases. The course takes you through the eleven steps of geodatabase design divided into four stages: thematic characterization; developing the database elements, relationships and properties; capture and collection; and finally, implementation and documentation. Taught with GEOG 572.

Prerequisite(s): C- or better in GEOG 481.

GEOG 483. Field Explorations in Geography**3 Credits (6P)**

A field-based class where students complete exercises in physical, human, and environmental geography in the Southwest. May be offered as a two-week intensive class where students are away from Las Cruces and camping; or may be offered with weekend field trips depending on the instructor. A lab fee for transportation and other expenses is required. Taught with GEOG 583.

GEOG 488. GIS and Water Resources**3 Credits (3)**

Explores a range of GIS tools, routines, and data structures and then applies them to a range of research questions and management issues in the area of Water Resources. The class has both a lecture and laboratory component, and students will have opportunities to explore a range of GIS tools in formal lab exercises and a project in the student area of interest. Taught with GEOG 588.

GEOG 491. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

GEOG 493. Special Problem Research**1-3 Credits**

For advanced and exceptional students. Research, and preparation of a paper in some phase of geography. A maximum of 6 credits may be earned. Consent of instructor required.

GEOG 495. Directed Readings**1-3 Credits**

Individual study through selected readings. A maximum of 6 credits may be earned. Consent of instructor required.

GEOG 501. Research Design and History of Geographic Thought**3 Credits (3)**

Understanding and application of the research process, including conceptualization and definition of a research problem, study designs, data sources, data collection, and report writing in development of geographic thought.

GEOG 535. Environmental Planning**3 Credits (3)**

Exploration of planning tools that advance the management of land and water resources, meeting current societal needs, while also minimizing damage to nature and society. Class activities include applied exercises that explore contemporary planning issues, including land conservation, natural hazards, biophysical analysis, water resource management, Federal land issues, and remediation of Superfund sites. Taught with GEOG 435.

GEOG 552. Landscape Ecology**4 Credits (3+2P)**

Analysis of the structure, function and change of natural and anthropogenic landscapes. Patches, corridors, matrix and network, spatial organization, landscape dynamics, and role of disturbance in overall functioning of landscapes. Role of landscape heterogeneity in landscape management. Taught with GEOG 452.

GEOG 553. Geomorphology**3 Credits (2+3P)**

Examination of the principle theories and concepts of landform creation; exploration of the roles of structure, processes, climate, and time in the formation of various types of landforms. Taught with GEOG 353.

GEOG 555. Southwest Environments**3 Credits (3)**

The U.S. Southwest: physical and human geography, coupled human-environment interactions, causes and consequences of environmental issues, and implications for sustainable development. Taught with GEOG 455.

GEOG 557. Fundamentals of Biogeography**3 Credits (3)**

Exploration of life in space and time. Floristic and physiognomic characteristics of the Earth's major ecosystems and their distributions; ecosystem dynamics, evolution, and physical environment. Includes an individual research project resulting in a poster presentation. Additional work for graduate students. Crosslisted with: GEOG 351.

GEOG 571. Cartography and Geographic Information Systems**4 Credits (3+3P)**

Graduate level design and construction of thematic maps. Introduction to cartographic principles in lecture. Emphasis on map-making using GIS software in the labs. Taught with GEOG 381.

GEOG 572. Geodatabase Design**3 Credits (2+3P)**

Graduate level introduction to designing geodatabases. The course takes you through the eleven steps of geodatabase design divided into four stages: thematic characterization; developing the database elements, relationships and properties; capture and collection; and finally implementation and documentation. Taught with GEOG 482.

GEOG 573. Introduction to Remote Sensing**4 Credits (3+3P)**

Graduate level introduction to the theory, techniques, and applications of remote sensing. Topics include electromagnetic radiation; remote sensing systems; remote sensing of the biosphere, hydrosphere, atmosphere, lithosphere, and cultural landscapes. Course includes lectures and also labs focused on the basic analysis and interpretation of remote sensing product. Taught with GEOG 373.

GEOG 578. Fundamentals of Geographic Information Science (GIS)**4 Credits (3+3P)**

Graduate level fundamentals of computer-based systems which organize, analyze, and present spatially referenced data. Additional work for graduate students. Crosslisted with: GEOG 481.

GEOG 581. System Design for Geographic Information Science (GIS)**3 Credits (3)**

A critical aspect of GIS is its ability to provide the necessary products within the organization within which it is implemented. This is an in-depth analysis of currently accepted planning methodologies designed to create a successful implementation of GIS inside organizations. Taught with GEOG 441.

GEOG 582. Advanced Remote Sensing**4 Credits (3+3P)**

Graduate level introduction to advanced topics in digital image processing, analysis, interpretation, and visualization. Topics include geometric and radiometric correction, image enhancement, image classification, change detection, and accuracy assessment. Lectures focus on the discussion of advanced remote sensing concepts, techniques, and applications; labs are applications-oriented. May be repeated up to 4 credits.

GEOG 583. Field Explorations in Geography**3 Credits (6P)**

A graduate level field-based class where students complete exercises in physical, cultural, and environmental geography in the Southwest. May be offered as a two-week intensive class where students are away from Las Cruces and camping; or may be offered with weekend field trips depending on the instructor. A lab fee for transportation and other expenses is required. May be repeated up to 3 credits.

GEOG 585. Advanced Spatial Analysis**3 Credits (3+2P)**

Introduction to basic spatial and aspatial descriptive statistics, statistical analysis of point and area patterns, critical review of quantitative research in geography, and exploration of advanced spatial analysis routines including cluster analysis, hot/cold spot analysis, and spatially weighted regression.

Prerequisite(s): Knowledge of basic statistics recommended.

GEOG 588. GIS and Water Resources**3 Credits (3)**

This is a graduate level class that explores a range of GIS tools, routines, and data structures and then applies them to a range of research questions and management issues in the area of Water Resources. The class has both a lecture and laboratory component, and students will have opportunities to explore a range of GIS tools in formal lab exercises and a project in the student's area of interest. Taught with GEOG 488.

GEOG 595. Directed Readings**1-3 Credits**

Advanced individual study through selected readings. May be repeated for a maximum of 6 credits.

GEOG 596. Residency**1-12 Credits (1-12)**

A contractual learning experience in the public or private sector under the supervision of a field supervisor and two faculty members. May be repeated up to 12 credits. Consent of Instructor required. Restricted to: Geography majors.

GEOG 598. Selected Topics**1-3 Credits**

Readings, discussions, lectures or laboratory studies of selected geographic themes. May be repeated for unlimited credit.

GEOG 599. Master's Thesis**1-12 Credits (1-12)**

Supervised individual study of a student's thesis topic. May be repeated for an unlimited number of credits. Thesis/Dissertation Grading.

GEOG 601. Introduction to Geographic Theory & Application**3 Credits (3)**

This course is intended to introduce Ph.D. and Masters level students to the history, theory, methods, and contemporary literature of Geography as a discipline. It also serves to prepare incoming students to engage in an integrative, theoretically informed and applied research project. Crosslisted with: GEOG 501.

Learning Outcomes

1. Students will be able to demonstrate a clear understanding of multiple themes and topics in Geography. Students will be able to demonstrate a clear understanding of multiple methods suitable for geographic research. Students will be able to identify and summarize recent scholarship relevant to the student's own research interests. Students will be able to communicate clearly and effectively in an oral format. Students will be able to communicate clearly and effectively in a written format. Students will be able to identify a committee chairperson who will guide her or his graduate work. Students will be able to design an integrative program of studies for the remainder of her or his graduate work.

GEOG 602. INTEGRATIVE RESEARCH DESIGN**3 Credits (3)**

This seminar focuses on the basic elements of research design, guiding students through the development of a formal proposal for original academic research. This course should be taken after GEOG 601 as part of the required course sequence for PhD students in Geography.

Prerequisite(s): GEOG 601.

GEOG 700. Doctoral Dissertation**1-18 Credits (1-18)**

This highly individualized independent study course is for students who have completed their comprehensive exams and are currently working on their doctoral dissertation. May be repeated up to 18 credits. Thesis/Dissertation Grading.

Learning Outcomes

1. Expand their knowledge in a specific area of interest in the discipline of geography.
2. Develop their skills in analyzing, synthesizing, and interpreting geographic data and information.
3. Develop their skills in technical and/or professional writing.
4. Develop their skills in the management and completion of a professional research project.

GEOL-GEOLOGY

GEOL 1110G. Physical Geology

4 Credits (3+3P)

Physical Geology is an introduction to our dynamic Earth introducing students to the materials that make up Earth (rocks and minerals) and the processes that create and modify the features of our planet. The course will help students learn how mountains are formed, how volcanoes erupt, where earthquakes occur, and how water, wind, and ice can shape landscapes. Students will also develop a basic understanding of the ways humans have altered the planet including our impact on natural resources and global climate change.

Learning Outcomes

1. Recall, describe or explain geologic vocabulary.
2. Identify or explain aspects of the geologic time scale and compare the uses and limitations of relative and absolute dating.
3. Recognize or explain the evidence used to support the theory of plate tectonics. Describe or identify how plate tectonics is related to the structure and features of the Earth.
4. Describe the formation of, and describe, compare, and classify minerals.
5. Identify or describe the three main rock types, how each forms in the context of the rock cycle and what each indicates about its environment of formation.
6. Recognize or explain the fundamentals of surface and groundwater hydrology and discuss the impact of human activities on water quality and quantity.
7. Describe or discuss the processes that are responsible for specific geologic hazards (e.g., earthquakes, volcanic eruptions, mass movement, flooding, etc.).
8. Recognize or describe the geologic processes involved in the formation and concentration of geologic
9. resources.

GEOL 1150. Introduction to Rocks and Minerals

3 Credits (2+3P)

This course is an introduction to the characteristics and the formation of the three main types of rocks, the rock-forming minerals, and important ore minerals. An outline of Plate Tectonics will give students the basis to understand how many of these rocks and minerals form. In laboratory exercises, students will gain practice in describing and identifying hand-specimens of the main types of rocks and minerals.

Prerequisite(s)/Corequisite(s): GEOL 1110G.

Learning Outcomes

1. The student Identify the main rock-forming minerals from each mineral group as demonstrated by scoring a total of 70% or more on the relevant laboratory exercise component. Studying minerals, the student will: Identify the main minerals in hand specimens; Describe the environments in which these minerals form; Identify the rock types in which these minerals are found.
2. The student will understand the structure, composition, and genesis of rocks by identifying the principal igneous, sedimentary, and metamorphic rocks, as demonstrated by scoring a total of 70% or more on the relevant laboratory exercise components.
3. Studying rocks, the student will: Define the principal igneous processes and features, identify the most common igneous rocks and their constituting minerals in hand specimens, and discuss their origin and interpretation; Describe the principles of sedimentary processes and features, identify the most common sedimentary rocks in hand specimens, and discuss their origin and interpretation; Describe the principles of metamorphic processes and features, identify the most common metamorphic rocks and constituting minerals in hand specimens, and discuss their origin and interpretation.

GEOL 2130. Introduction to Meteorology**4 Credits (3+3P)**

Introduction to Earth's atmosphere and the dynamic world of weather as it happens. Working with current meteorological data delivered via the Internet and coordinated with learning investigations keyed to the current weather; and via study of select archives.

Learning Outcomes

1. Recall, describe, or explain the various elements of the Earth's atmosphere, Earth's relation to the sun, incoming solar radiation, the ozone layer, the primary temperature controls, and the unequal heating of land and water.
2. Recall, describe, or explain weather variables and parameters.
3. Recall, describe, or explain air masses, pressure systems, the various fronts and associated types of storms, weather symbols, monsoons, the various forms of precipitation, along with causes and effects of lightning.
4. Recall, describe, or explain the hydrologic cycle, the characteristics and influences of the oceans and continents on the weather, the Southern Oscillation (i.e., El Nino), and the effects of land/water distribution.
5. Recall, describe, or explain specific impacts by humans on weather, climate, and on the ecosystem at large.
6. Evaluate and interpret information from maps, diagrams, remote sensing devices, graphs, and tables.
7. Apply critical thinking skills such as inductive, deductive, and mathematical reasoning to solve problems using the scientific method.
8. Recognize and discuss the effect of human activity on climate, climate change and the greenhouse effect.
9. Synthesize information from external, current sources and personal observations and discuss their relationships to class material.

GEOL 2996. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. Community Colleges only. May be repeated for a maximum of 12 credits.

Learning Outcomes

1. Varies

GEOL 305V. Fossils and the Evolution of Life**3 Credits (3)**

Examination of the fossil record within the context of geologic time. Special emphasis on critical evaluation of possible terrestrial and extra-terrestrial causes for the evolution of plants and animals and for periods of mass extinction.

GEOL 310. Mineralogy**3 Credits (2+3P)**

Crystallography and the physical and chemical aspects of minerals.

Prerequisite(s): GEOL 1110G and CHEM 1215G.

GEOL 312. Mineralogy and Optics**3 Credits (2+3P)**

Principles of crystallography, optical mineralogy, and mineral chemistry as applied to the identification and characterization of rock-forming minerals.

May be repeated up to 3 credits.

Prerequisite(s): GEOL 1110G and GEOL 1150.

Learning Outcomes

1. Students will understand how polarized light interacts with isotropic, uniaxial, and biaxial crystals. Students will be able to recognize optical phenomena resulting from the interaction of polarized light with minerals. Students will become proficient in the recognition of the major rock-forming minerals in thin section. Students will recognize crystal faces according to the Miller Indices. Students will be able to calculate the structural formula of any mineral.

GEOL 320. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

GEOL 335V. Earthquakes, Volcanoes, Hurricanes, and Floods: The Role of Natural Hazards in Civ Past and Present**3 Credits (3)**

This class will provide an introduction to geologic hazards and natural disasters, their effects on society and the attempts at preparation and mitigation for these events. Hazards to be covered include earthquakes, volcanic eruptions, floods, landslides, hurricanes, tsunamis and others.

GEOL 353. Geomorphology**3 Credits (2+3P)**

Same as GEOG 353. May be repeated up to 3 credits.

GEOL 360. General Geochemistry**3 Credits (3)**

The chemistry of the earth and its parts, with emphasis on geochemical systems and cycles, distribution of the elements, and mineral equilibria.

Crosslisted with: CHEM 360

Prerequisite(s): CHEM 1215G or CHEM 1120G.

GEOL 399. Igneous and Metamorphic Petrology**3 Credits (2+3P)**

Mineralogical composition, classification, and genesis of igneous and metamorphic rocks.

Prerequisite(s): GEOL 312 for geology majors, GEOL 310 for majors other than geology.

GEOL 401. Geology Colloquium**1 Credit (1)**

Presentations by visiting speakers and students. May be repeated up to 6 credits.

GEOL 420. Stratigraphy and Sedimentology**3 Credits (2+3P)**

Identification and interpretation of sedimentary rocks with emphasis on classification, deposition, and stratal geometry.

Prerequisite: GEOL 310.

GEOL 424. Soil Chemistry**3 Credits (3)**

Same as SOIL 424, CHEM 424.

GEOL 441. Tutorial Geology**2 Credits (1+3P)**

Participation in teaching lower-division laboratories and conducting tutorial sessions. May be repeated for a total of 4 credits.

Prerequisite: junior or above standing and nomination by faculty.

GEOL 442. Zuhl Collection Internship**1-3 Credits (3-9P)**

Applied experience with the NMSU Zuhl Collection, under supervision of the Zuhl Collection Director. Possible activities include developing displays, giving tours, developing outreach materials, etc. May be repeated up to 6 credits. Consent of Instructor required.

GEOL 444. GIS for Geology**3 Credits (3)**

Tools-based introduction to using GIS software for solving problems in geology. Emphasis on effectively portraying and analyzing geologic maps. One required field trip. Crosslisted with: GEOG 544.

Prerequisite(s): GEOL 470.

GEOL 449. The Geological Profession**1 Credit (1)**

Outcomes assessment exit exams. For graduating seniors only. May be repeated up to 1 credits.

Prerequisite(s): Graduating seniors only.

GEOL 452. Geohydrology**4 Credits (3+2P)**

Origin, occurrence, and movement of fluids in porous media assessment of aquifer characteristics. Development and conservation of ground water resources, design of well fields. May be repeated up to 4 credits. Crosslisted with: ENVS 452 and C E 452.

GEOL 455. Undergraduate Research**1-3 Credits**

Geological research and field projects for the advanced student. May be repeated for a total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

GEOL 465. Isotope Geochemistry**3 Credits (3)**

Geochemistry of stable and radiogenic isotopes and its application to a wide range of problems in the earth and planetary sciences.

Prerequisite(s): CHEM 1225G, GEOL 360, GEOL 399.

GEOL 470. Structural Geology**3 Credits (2+3P)**

Deformation of rocks of the earth. Prerequisite: GEOL 310

GEOL 471. Volcanology**3 Credits (3)**

Identification and interpretation of volcanic deposits (including air fall, ash flow tuffs, surges, lava flows), with focus on how the characteristics of these deposits can reveal eruption styles and eruption dynamics. Other topics covered include: magma migration and storage, volcanic hazards, volcano monitoring and volcanoes and climate. Crosslisted with: GEOL 571.

Prerequisite(s): GEOL 399.

GEOL 477. Special Problems**1-3 Credits**

Selected advanced topics of current interest or importance. May be repeated for a total of 6 credits.

Prerequisite: consent of instructor.

GEOL 478. Petroleum Systems and Stratigraphy**3 Credits (2+3P)**

Sedimentation, stratigraphy, depositional environments, and tectonics in relation to the occurrences and exploration of hydrocarbons. Course includes two off-campus field trips. May be repeated up to 3 credits.

Prerequisite(s): GEOL 420.

GEOL 480. Seminar**1-3 Credits**

Supervised study of a subject not covered by regular courses. For organized group meetings treating selected advanced topics. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

GEOL 482. Zuhl Collection Internship**1-3 Credits (1-3)**

Applied experience working with the Zuhl Collection of rocks, minerals, fossils, and petrified wood, supervised by the Director of the Zuhl Collection. Activities include tours, display development, research on aspects of the collection, and other work in the museum. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: GEOL majors.

GEOL 490. Field Geology**3 Credits (9P)**

Mapping, instrumentation, and interpretation of geology in the field.

Prerequisites: either GEOL 420 and GEOL 470.

GEOL 491. Tectonic Evolution of North America**3 Credits (3)**

Current ideas regarding the plate-tectonic evolution of North America from Archean through Holocene time, emphasizing the use of regional stratigraphy and structural geology to interpret mountain building, magmatism, and basin development.

Prerequisites: GEOL 1110G, GEOL 399, GEOL 420 and GEOL 470.

GEOL 495. Geology Field Camp**4 Credits (12P)**

Three week intensive summer course. Geologic mapping in a site-based setting, emphasizing spatial relations, cross-section construction, and preparation of geologic reports. Prerequisite: GEOL 490

GEOL 499. Senior Thesis**1-3 Credits**

Writing a formal paper describing original geologic research conducted under supervision of a faculty advisor. Restricted to majors.

Prerequisite: consent of instructor.

GEOL 501. Geology Colloquium**1 Credit (1)**

Presentations by visiting speakers and graduate students.

GEOL 520. Selected Topics**1-3 Credits**

Selected topics in geology. May be repeated for unlimited credit.

Prerequisites: graduate standing and consent of instructor.

GEOL 534. Tectonics of Sedimentary Basins**3 Credits (3)**

Origin of sedimentary basins with emphasis on subsidence mechanisms, geometry of basin fill, depositional systems and tectonic setting. Course includes two off-campus field trips. Restricted to: GEOL majors.

Prerequisites: GEOL 420 or equivalent or consent of instructor.

GEOL 537. Topics in Volcanology**3 Credits (3)**

A seminar-style class exploring volcanic processes. Course topics vary by semester and include: magmatism and volcanism at different tectonic settings (subduction zones, intraplate) and plumbing systems and eruptions of volcanoes (calderas, monogenetic volcanoes).

GEOL 544. GIS for Geology**3 Credits (3)**

Tools-based introduction to using GIS software for solving problems in geology. Emphasis on effectively portraying and analyzing geologic maps. One required field trip. Crosslisted with: GEOL 444.

Prerequisite(s): GEOL 470 or equivalent.

GEOL 558. Neotectonics**3 Credits (3)**

Recognition, measurement, and dating of deformation related to earthquakes in the Quaternary geologic record.

GEOL 562. Analytical Geochemistry**3 Credits (3)**

Techniques used to determine the major element, trace element and isotopic composition of rocks and minerals and the determination of mineral structure.

GEOL 565. Isotope Geochemistry**3 Credits (3)**

Trace element partitioning and isotope systematics applied to problems in petrology and ore genesis.

GEOL 571. Volcanology**3 Credits (3)**

Identification and interpretation of volcanic deposits (including air fall, ash flow tuffs, surges, lava flows), with focus on how the characteristics of these deposits can reveal eruption styles and eruptions dynamics. Other topics covered include: magma migration and storage, volcanic hazards, volcano monitoring and volcanoes and climate. Crosslisted with: GEOL 471.

GEOL 578. Petroleum Systems and Stratigraphy**3 Credits (2+3P)**

Sedimentation, stratigraphy, depositional environments and tectonics in relation to the occurrences and exploration of hydrocarbons. Course includes two off-campus field trips.

GEOL 582. Plate Tectonics**3 Credits (3)**

Plate tectonics as a fundamental model for geological activity on a dynamic earth. Focuses on plate tectonic theory development and mechanisms, plus modern analogs of ancient processes.

GEOL 585. Geochronology**3 Credits (3)**

The principles, analytical methods, and interpretation of the most common geochronologic methods.

GEOL 598. Special Research Programs**1-3 Credits**

Investigations into contemporary geological problems. May be repeated for unlimited credit.

Prerequisites: graduate standing and consent of instructor.

GEOL 599. Master's Thesis**15 Credits**

Thesis research.

GERO-GERONTOLOGY

GERO 415. Introduction to Gerontology**3 Credits (3)**

Social, psychological, and physiological aspects of aging, with an interdisciplinary emphasis on health promotion. Demographic characteristics of the aging population. Taught with MPH 515.

GERO 450. Health Promotion for the Older Adult**3 Credits (3)**

Common health concerns and lifestyle issues relevant to older adults. Facts about the content area, health behaviors, and practices to promote health and prevent disease; program development strategies applicable to a variety of settings. Same as MPH 557.

GERO 451. Aging and Public Policy**3 Credits (3)**

Exploration of public policies relating to elders, historical development, current status and trends in public policy for this age group. Impact of political behavior of elders on policy making and implementing processes.

GERO 493. Adulthood and Aging**3 Credits (3)**

Normal transitions in later life; those occurring from 40 years of age to the end of life are discussed. Changes in interpersonal relationships and adaptations commonly made by individuals and meeting those alterations are presented through research findings, case studies, and autobiographies. Same as MPH 593.

GERO 498. Independent Study**1-3 Credits**

Individual studies with prior approval of health science department head. May be repeated for maximum of 6 credits.

Prerequisite: senior standing and consent of instructor.

GNDR-WOMEN'S STUDIES

GNDR 2110G. Introduction to Women, Gender, and Sexuality Studies

3 Credits (3)

This course introduces students to key concepts, debates, and analytical tools informing Women's, Gender, and Sexuality Studies. As an interdisciplinary field of study, Women's, Gender, and Sexuality Studies employs academic perspectives from a range of disciplines and theoretical approaches. It also incorporates lived experience and social location into its object of analysis. Though content will vary according to the expertise and focus of the instructor, this course will develop tools through readings and assignments that critically analyze how gender and sexuality are shaped by different networks of power and social relations and demonstrate how the intersections of race, class, disability, national status, and other categories identity and difference are central to their understanding and deployment. In addition to feminist thought, areas of focus might include gender and sexuality in relation to social, cultural, political, creative, economic, or scientific discourses. This class is recommended for those with a general interest in the topic area as well as for those seeking a foundational course for further study.

Learning Outcomes

1. Understand foundational concepts, theories, and approaches to gender and sexuality in conjunction with contemporary social justice movements such as feminism.
2. Describe the range of social and political forces that shape and are shaped by gender, sexuality, race/ethnicity, and other intersecting categories of identity.
3. Demonstrate the ability to conduct intersectional analysis.
4. Develop and improve skills in reading, critical thinking, academic writing, and public speaking.

GNDR 2120G. Representing Women Across Cultures

3 Credits (3)

Historical and critical examination of women's contributions to the humanities, with emphasis on the issues of representation that have contributed to exclusion and marginalization of women and their achievements.

Learning Outcomes

1. To think critically about contemporary discourses on gender, race, sexuality, and class.
2. To understand how forms of identity intersect with one another
3. To explore the ways power and privilege operate in contemporary society
4. To understand some of the ways social inequalities develop, function, and change
5. To further students' interest in developing their own ideas and research in issues of women and gender, sexuality, race, class, and nation

GNDR 350. Special Topics

3 Credits (3)

The topic of course will vary and will be indicated by subtitle. May be cross-listed with relevant courses at the 300-level from any specific department. May be repeated under different subtitle(s).

GNDR 352. Women's & Mass Media

3 Credits (3)

Portrayal and participation of women in mass media from colonial to contemporary times. Same as JOUR 380. May be repeated up to 3 credits.

GNDR 359. Psychology of Gender

3 Credits (3)

Examines theories and research on the psychological functioning of women and men in North American society, including influential theories of gender in psychology and current controversies in the psychological literature. Topics include those unique to women and unique to men in development across the lifespan, work, physical and mental health, sexuality, victimization, gender stereotypes, gender comparisons in abilities and personality, and biological, social, and cultural influences on behavior. Crosslisted with: PSYC 359.

Prerequisite(s): PSYC 1110G.

GNDR 360. Masculinities Studies

3 Credits (3)

Explores how contemporary American culture constructs manhood and masculinity. Interrogates ideas and enactments of masculinity, especially as they intersect with race/ethnicity, class, and sexuality. The class asks how sexuality, gender construction, and sex roles inform our understanding of masculinity, as well as how masculinity relates to social power.

GNDR 380V. Women Writers

3 Credits (3)

Introduction to multicultural women's traditions through intensive study of works by women writers. Same as ENGL 380V.

GNDR 381V. Women's Health Issues

3 Credits (3)

A focus on the unique issues and problems that confront women today and how they affect the health of women. Same as PHLS 380V.

GNDR 401. Women & Immigration**3 Credits (3)**

Explores historical and contemporary immigration processes in/to the U.S. that are shaped by gendered dynamics, societal structures, and the socio-economic conditions that impact immigrant women. Examines how immigrant women use their agency and resistance to overcome exploitative circumstances, and the restraints of immigration laws and policies that impact individual, communal and societal change.

GNDR 402. Transnational Feminisms**3 Credits (3)**

Explores dimensions of gender, race, class, and sexuality in conjunction with nationalisms, anti-capitalist struggles, religious fundamentalism, militarism, globalization, eco-critique, and the politics of resistance and social movements.

GNDR 403. Gender & Horror**3 Credits (3)**

Explores cultural anxieties and crises through the genre of horror as they relate to issues of gender, sexuality, feminism, and race. Traces ways horror films represent and reconfigure notions of sexuality and gender and ways they reinforce and/or challenge social norms.

GNDR 405. Alternative Genders and Sexualities**3 Credits (3)**

Examination of queer, transgender, non-binary, and intersex gender identities and queer/non-heterosexual sexualities through literature, film, and critical theory

GNDR 407. Gender and Graphic Narrative**3 Credits (3)**

Examines graphic novels that disrupt stereotypical ideas about genre, gender, race, class sexuality, as well as common notions about comics. Considers texts that address underrepresented experiences.

GNDR 408. Feminist Food Studies**3 Credits (3)**

Examines contemporary food writing as a way to study identity, social structures, and notions of acceptability. Explores how constructions of food shape bodies, desires, and notions of belonging.

Learning Outcomes

1. Apply critical thinking and critical writing competencies about race ethnicity, gender sexuality, and class, as well as food and culture.
2. Analyze representations of food and culinary practices in literature, film, and other cultural production as a reflection of larger social forces.
3. Develop a scholarly vocabulary for discussing themes of race and ethnicity, gender and sexuality, class, citizenship and belonging, dislocation and exile, labor and consumption.

GNDR 411. Gender and Migration**3 Credits (3)**

Explores multiple experiences of forced migration and displacement. Examines violence, structural dislocation, neoliberalism, globalization, economic collapse and civil war. Discusses local, regional and global responses to creating meaningful change in communities most affected by migration.

GNDR 412. Gender and Film Studies**3 Credits (3)**

Examines the shifting cultural and theoretical meanings of gender and sexuality across a variety of film genres while also analyzing the role of formal film elements in shaping representation and reception.

GNDR 433V. Sex, Gender & Culture**3 Credits (3)**

This seminar course introduces students to the anthropological study of gender. We take an integrated approach to the subject, considering the ways that different kinds of anthropological research, including archaeology, biological anthropology, ethnography, etc., expand our understanding of the various ways gender is defined across space and time, how it is lived, and what it means to us and others. Students will review the historical context and development of this subject within the field, and will explore such topics as sex versus gender, embodiment and gendered performance, gender hierarchies, the politics of reproduction, and globalization. May be repeated up to 3 credits. Crosslisted with: ANTH 433V.

Learning Outcomes

1. Identify and evaluate different anthropological approaches to the study of gender Develop and employ analytical and critical thinking skills Demonstrate proficiency in oral and written communication Integrate and synthesize knowledge of gender-related topics in a research paper

GNDR 450. Special Topics**3 Credits (3)**

The topic of course will vary and will be indicated by subtitle. May be cross-listed with relevant courses at the 400-level from any specific department. May be repeated under different subtitle(s).

GNDR 451. Women's Studies Practicum**3 Credits (3)**

Supervised field work in community setting relating to women. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

GNDR 453. Women and Politics**3 Credits (3)**

An examination of women's participation in U.S. electoral politics as voters, candidates, and officeholders; political activism in issue-based movements and strategies for affecting public policy; leadership as administrators and managers in public service agencies. Also explores the influence of feminism in changing women's roles socially, legally, and politically. Crosslisted with: POLS 353

GNDR 454. Women Crossing Borders**3 Credits (3)**

Experiences of women who cross class, race, cultural, national, or sexual borders including theories regarding women's interactions across borders. Emphasis will vary with professor and discipline.

GNDR 455. Feminist Research Methodologies**3 Credits (3)**

Study of feminist methodologies, covering transnational decolonizing Indigenous, Chicana feminist approaches to research, such as storytelling, narrative, testimonio, platica, research-based art, performed ethnography and participatory action research.

GNDR 461. Women's Studies: Independent Study**3 Credits (3)**

Individual study of selected topic and writing of research paper. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

GNDR 465. Sex, Gender and the Body**3 Credits (3)**

Examines forces at work in defining and differentiating gender, race, sexuality. How ideas about what is 'natural' and 'normal' for men and women shifted over time. Considers different discourses shaping embodied experiences and categories of identity.

GNDR 471. Seminar in Feminist Theory**3 Credits (3)**

Contemporary feminist inquiry and knowledge production concerning social structures and systems, lived realities, and the ways these impact each other.

Learning Outcomes

1. Demonstrate through discussion, research, and writing knowledge of shifts, differences, and debates in feminist theoretical discourse.
2. Analyze a range of contemporary feminist critical theory in discussions, essay assignments, and exams.
3. Formulate theories and forge connections between feminist discourses through written and other assignments

GNDR 474. Gender in East Asian History**3 Credits (3)**

Examines the position of women and the social roles of both sexes in traditional China and Japan, and traces the changes taking place in those societies in the course of modernization in the last century and a half. Scholarly literature and works of Chinese and Japanese literature in translation and cinema used. Same as HIST 474.

GNDR 482. Gender and Popular Culture**3 Credits (3)**

Intensive study of the representations of gender in popular culture. Examines the historical, aesthetic, and cultural contexts of these representation and the various critical and theoretical lenses we use to understand them. Repeatable under different subtitles. May be repeated up to 6 credits.

GNDR 484. Women's Literature**3 Credits (3)**

Intensive study of literature by women, in particular historical, aesthetic, cultural, or intellectual contexts. Repeatable under different subtitles. May be repeated up to 12 credits. Crosslisted with: ENGL 481.

GNDR 501. Advanced Women & Immigration**3 Credits (3)**

Advanced exploration of historical and contemporary immigration processes in/to the U.S. that are shaped by gendered dynamics, societal structures, and the socio-economic conditions that impact immigrant women. Examines how immigrant women use their agency and resistance to overcome exploitative circumstances, and the restraints of immigration laws and policies that impact individual, communal and societal change.

GNDR 502. Advanced Transnational Feminisms**3 Credits (3)**

Advanced analysis of dimensions of gender, race, class, and sexuality in conjunction with nationalisms, anti-capitalist struggles, religious fundamentalism, militarism, globalization, eco-critique, and the politics of resistance and social movements.

GNDR 505. Advanced Alternative Genders and Sexualities**3 Credits (3)**

Intensive exploration of queer, transgender, non-binary, and intersex gender identities and queer/non-heterosexual sexualities through literature, film, and critical theory.

GNDR 507. Advanced Gender and Graphic Narrative**3 Credits (3)**

Advanced examination of graphic novels that disrupt stereotypical ideas about genre, gender, race, class sexuality, as well as common notions about comics. Considers texts that address underrepresented experiences.

GNDR 508. Advanced Feminist Food Studies**3 Credits (3)**

Advanced examination of contemporary food writing as a way to study identity, social structures, and notions of acceptability. Intensive exploration of how constructions of food shape bodies, desires, and notions of belonging.

Learning Outcomes

1. Apply critical thinking and critical writing competencies about race ethnicity, gender sexuality, and class, as well as food and culture.
2. Analyze representations of food and culinary practices in literature, film, and other cultural production as a reflection of larger social forces.
3. Develop a scholarly vocabulary for discussing themes of race and ethnicity, gender and sexuality, class, citizenship and belonging, dislocation and exile, labor and consumption.

GNDR 511. Advanced Gender and Migration**3 Credits (3)**

Advanced exploration of multiple experiences of forced migration and displacement. Intensive examination of violence, structural dislocation, neoliberalism, globalization, economic collapse and civil war. Discusses local, regional and global responses to creating meaningful change in communities most affected by migration.

GNDR 512. Advanced Gender and Film Studies**3 Credits (3)**

Advanced study of the shifting cultural and theoretical meanings of gender and sexuality across a variety of film genres while also analyzing the role of formal film elements in shaping representation and reception.

GNDR 533. Advanced Issues in Women, Gender, and Culture**3 Credits (3)**

Survey of the history of anthropological ideas about gender and women, and a comparison of gender roles, relations, and ideologies across a range of cultures.

GNDR 550. Special Topics**3 Credits (3)**

The topic of course will vary and will be indicated by subtitle. May be cross-listed with relevant courses at the 500-level from any specific department. May be repeated under different subtitle(s).

GNDR 554. Advanced Issues in Women Crossing Borders**3 Credits (3)**

Experiences of women who cross class, race, cultural, national, or sexual borders including theories regarding women's interactions across borders. Consent of Instructor required.

GNDR 555. Advanced Feminist Research Methodologies**3 Credits (3)**

Advanced study of feminist methodologies, covering transnational decolonizing Indigenous, Chicana feminist approaches to research, such as storytelling, narrative, testimonio, plática, research-based art, performed ethnography and participatory action research.

GNDR 561. Independent Graduate Research in Women's Studies**3 Credits (3)**

Individual study of selected topics and writing of a research paper. May be repeated for a maximum of 6 credits. Graded S/U.

Prerequisite: consent of instructor.

GNDR 565. Advanced Sex, Gender & the Body**3 Credits (3)**

Advanced examination of forces at work in defining and differentiating gender, race, sexuality. How ideas about what is 'natural' and 'normal' for men and women shifted over time. Considers different discourses shaping embodied experiences and categories of identity.

GNDR 571. Advanced Seminar in Feminist Theory**3 Credits (3)**

Intensive study of contemporary feminist inquiry and knowledge production concerning social structures and systems, lived realities, and the ways these impact each other.

Learning Outcomes

1. Students will be able to demonstrate through discussion, research, and writing knowledge of shifts, differences, and debates in feminist theoretical discourse.
2. Students will be able to analyze a range of contemporary feminist critical theory in discussions, essay assignments, and exams.
3. Students will be able to formulate theories and forge connections between feminist discourses through written and other assignments

GNDR 582. Gender and Popular Culture**3 Credits (3)**

Intensive study of the representations of gender in popular culture. Examines the historical, aesthetic, and cultural contexts of these representation and the various critical and theoretical lenses we use to understand them. Repeatable under different subtitles. May be repeated up to 6 credits. Crosslisted with: ENGL 582.

GNDR 584. Women's Literature**3 Credits (3)**

Intensive study of literature by women, in particular historical, aesthetic, cultural, or intellectual contexts. Repeatable under different subtitles. May be repeated up to 6 credits. Crosslisted with: ENGL 581.

GPHY-GEOPHYSICS

GPHY 340V. Planet Earth**3 Credits (3)**

Formation and evolution of the Earth. Plate tectonics, volcanoes and earthquakes. Role of geological processes in the origin and evolution of life. Uniqueness of the Earth in the solar system.

GPHY 450. Selected Topics**1-3 Credits**

Readings, discussions, lectures or laboratory studies of selected areas of geophysics. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

GPHY 520. Selected Topics**1-3 Credits**

Formal treatment of graduate topics not covered in regular courses. May be repeated for unlimited credit.

Prerequisites: graduate standing, consent of instructor, and selection of a specific topic prior to registration.

GPHY 560. Applied Inverse Theory**3 Credits (3)**

Inversion of data with an emphasis on geophysical problems. Curve fitting, tomography, earthquake location, over determined and under determined problems, linear and nonlinear problems. Computing experience desirable. Consent of Instructor required.

GPHY 598. Special Research Problems**1-3 Credits**

Individual investigations, either analytical or experimental. May be repeated for unlimited credit.

GPHY 599. Master's Thesis**1-15 Credits (1-15)**

Thesis.

GPHY 620. Advanced Topics in Geophysics**3 Credits (3)**

Advanced formal treatment of a topic or topics not covered in regular courses. May be repeated for unlimited credit.

Prerequisite: consent of instructor.

GPHY 700. Doctoral Dissertation**1-15 Credits (1-15)**

Dissertation.

GREX-GRAD CROSS UNIV EXCH

GREX 600. Graduate Cross University Exchange**1-9 Credits**

GRMN-GERMAN

GRMN 1110. German I

4 Credits (4)

Intended for students with no previous exposure to German, this course develops basic listening, speaking, reading, and writing skills aiming toward the ACTFL novice-mid level. This is an introductory course designed to teach the student to communicate in German in everyday situations and to develop an understanding of German cultures through the identification of cultural products and practices, of cultural perspectives, and the ability to function at a survival level in an authentic cultural content. This course will also develop the student's sense of personal and social responsibility through the identification of social issues.

Learning Outcomes

1. Students can communicate on very familiar topics using a variety of words and phrases that they have practiced and memorized.
2. Students can write lists and memorized phrases on familiar topics.
3. Students can recognize some familiar words and phrases when they hear them spoken.
4. Students can recognize some letters or characters.
5. Students can understand some learned or memorized words and phrases when they read.
6. Students can identify beliefs, behaviors and cultural artifacts of the German-speaking world.
7. In English, students will engage with social issues confronting the German-speaking world to develop their sense of personal and social responsibility

GRMN 1120. German II

4 Credits (4)

A continuation of German 1, students will develop a broader foundation in skills gained during the first semester, including understanding, speaking, reading and writing German aiming toward the ACTFL novice-high level. This course is designed to increase student fluency in German as applied to everyday situations. Students will also learn to recognize and understand various German products, practices, and perspectives, identifying common cultural patterns, describing basic cultural viewpoints, and further developing their sense of personal and social responsibility through the investigation of cultural issues.

Prerequisite(s): C or better in GRMN 1110.

Learning Outcomes

1. Students can communicate and exchange information about familiar topics using phrases and simple sentences, sometimes supported by memorized language.
2. Students can usually handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can write short messages and notes on familiar topics related to everyday life.
4. Students can often understand words, phrases, and simple sentences related to everyday life.
5. Students can recognize pieces of information and sometimes understand the main topic of what is being said.
6. Students can understand familiar words, phrases, and sentences within short and simple texts related to everyday life.
7. Students can sometimes understand the main idea of what they have read.
8. Students can describe and make comparisons between decisions about beliefs, behaviors and cultural artifacts of the German-speaking world.
9. Students will engage with social issues confronting the German-speaking world to continue to develop their sense of personal and social responsibility.

GRMN 2110. German III**3 Credits (3)**

In this third semester course, students will continue to develop a broader foundation in skills gained during the first two semesters, including understanding, speaking, reading and writing German aiming toward the ACTFL intermediate-low level. This course is designed to teach the student to communicate in a more sustained way in areas of personal interest and in everyday situations. Students will engage in and analyze various German products, practices, and perspectives, as well as continue to develop their sense of personal and social responsibility through comparison and contrast of cultural perspectives.

Prerequisite(s): C or better in GRMN 1120.

Learning Outcomes

1. Students can participate in conversations on a number of familiar topics using simple sentences.
2. Students can handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can write briefly about most familiar topics and present information using a series of simple sentences.
4. Students can understand the main idea in short, simple messages and presentations on familiar topics.
5. Students can understand the main idea of simple conversations that they overhear.
6. Students can understand the main idea of short and simple texts when the topic is familiar.
7. Students can analyze beliefs, behaviors and cultural artifacts of the German-speaking world, and discuss the nature and value of German products, practices, and perspectives.
8. Students will engage with social issues confronting the German-speaking world to continue to develop their sense of personal and social responsibility.

GRMN 2120. German IV**3 Credits (3)**

In this fourth semester course, students will continue to broaden and refine skills gained during previous semesters, including understanding, speaking, reading and writing German aiming at the ACTFL intermediate- mid level. This course is designed to teach the student to communicate in a more sustained way in situations that go beyond the everyday. Students will evaluate various German products, practices, and create ways to demonstrate their sense of personal and social responsibility through participation in cultural interaction.

Prerequisite(s): C or better in GRMN 2110.

Learning Outcomes

1. Students can participate in conversations on familiar topics using sentences and series of sentences.
2. Students can engage in short social interactions in everyday situations by asking and answering a variety of questions. Students can usually say what they want to say about themselves and their everyday life.
3. Students can write on a wide variety of familiar topics using connected sentences.
4. Students can understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
5. Students can understand the main idea of conversations that they overhear.
6. Students can understand the main idea of texts related to everyday life and personal interests or studies.
7. Students can analyze beliefs, behaviors and cultural artifacts of the German-speaking world, and recognize and discuss the representations and controversies of German products, practices, and perspectives.
8. Students will engage with social issues confronting the German-speaking world to create ways to demonstrate their sense of personal and social responsibility.

GRMN 305. Topics in German Culture**3 Credits (3)**

Group study of selected topics focusing on German culture and civilization. This course is linked to FLiP courses (Faculty-Led international Programs) when applicable. Topics identified by subtitle in the Schedule of Classes. GRMN 2120 or equivalent is recommended. May be repeated for up to 6 credits with different topics.

Learning Outcomes

1. (Language) Students will show more confidence in their German speaking, listening and writing abilities.
2. (Culture): Students will demonstrate knowledge of the culture of German institutions, of Berlin (through reflection and discussion sessions) after visits to historical, architectural and cultural sites as well as direct interaction with the locals.
3. (Culture): Students will demonstrate competence at navigating a culture different from their own.
4. (Culture): Students will demonstrate (through reflection and discussion sessions) a greater appreciation for the diversity of German identity.

GRMN 313. Intermediate Composition and Grammar**3 Credits (3)**

A review of the rules of German grammar. Development of written German skills. GRMN 2120 or equivalent is recommended. May be repeated up to 3 credits.

Learning Outcomes

1. Students will show their improvement in writing skills in German through the application of accurate grammar rules practiced in the course.
2. Students will show their improvement in vocabulary usage in German by using more varied and appropriate vocabulary in their writing.
3. Students will show their improvement in writing organization.

GRMN 325. German Conversation I**3 Credits (3)**

Intensive oral communication practice. Not open to heritage/native speakers of German. GRMN 2120 or equivalent is recommended. May be repeated up to 3 credits.

Learning Outcomes

1. Students will be able to demonstrate a quantifiable increase in your conversational skills by comparing your their final score (post-test) to their score in the oral pre-test, taken on the first/second day of classes.
2. This means being able to communicate their thoughts, opinions, emotions, etc. as they intend them to be understood by others. AND to be able to understand what others are saying to them so they can respond accordingly better than they did at the beginning of the course, according to the ACTFL Oral Proficiency (OPI) standards.

GRMN 330. Business German**3 Credits (3)**

An introduction to standard language within the corporate world in German-speaking countries. During the semester, students will practice reading, writing, listening, speaking and expanding their vocabulary in the fields related to business, technology (ex. Engineering) and health (ex. Nursing, Psychology, etc.).

GRMN 333V. German Culture through Cinema**3 Credits (3)**

Events, values and issues in German culture as reflected in motion pictures made in Germany between 1913 and 1990. Familiarization with cinema as art form. Taught in English. Does not satisfy Arts and Sciences second language requirement.

GRMN 340. Introduction to Translation**3 Credits (3)**

General aspects of Translation from German to English and English to German. GRMN 2120 or equivalent is recommended. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate understanding of the concept of translation by reading translation theory.
2. Demonstrate an enhanced knowledge of German as related to translation practices.
3. Demonstrate the ability to use specialized vocabulary and concepts in various professional areas.
4. Demonstrate knowledge of the translator's place as a professional.
5. Develop and enhance their linguistic competence and cultural awareness.

GRMN 341. German Folklore and Culture**3 Credits (3)**

Customs, traditions, mythology, folk literature and art. Special focus on Grimms' fairy tales. GRMN 2120 or equivalent is recommended. May be repeated up to 3 credits.

Learning Outcomes

1. Demonstrate improvement in reading skills in German by one ACTFL level by augmenting vocabulary, grammatical accuracy, and reading comprehension skills.
2. Describe the 5 basic motifs in folktales (FT) and where they supposedly come from.
3. List and define the 9 types of FT (Teverson) according to their functions.
4. Discuss the impact of the enlightenment in the structure of FT, Evaluate the influence of the industrial revolution and the development of a bourgeois society in FT.
5. Critique the position of the present-day, pop-cult media in its recently created versions of FT.

GRMN 350. Introduction to German Literature**3 Credits (3)**

Basic literary genres and major figures in German language literature from its beginnings to the 19th century. GRMN 2120 or equivalent is recommended. To be followed by GRMN 471 - Studies in German Literature. May be repeated up to 3 credits. Consent of Instructor required.

Learning Outcomes

1. Demonstrate an improvement on reading skills in German by one ACTFL level by augmenting active vocabulary, grammatical accuracy and reading comprehension skills.
2. Describe the authors, styles and basic discourses of 3 periods of German-language literature (old and middle high German from early the medieval literature, the protestant reformation; High German and literature academies: the fifteenth to seventeenth Centuries; and the Eighteenth Century).

GRMN 399. Intermediate Independent Study in German**1-3 Credits (1-3)**

Tutorial in reading, writing and oral expression for intermediate-level students of German. Topics identified in the Schedule of Classes. GRMN 2120 or equivalent is recommended. May be repeated for up to 6 credits with different topics. May be repeated up to 6 credits. Consent of Instructor required.

Learning Outcomes

1. Objectives for independent study courses will depend on the study/research interests of the student; they will always vary.

GRMN 410. Practicum in Conversational German**1-3 Credits**

Intensive oral communication practice for students with a strong German language foundation. May be repeated up to 6 credits.

Prerequisite(s): GRMN 325 or consent of instructor.

Learning Outcomes

1. Objectives for independent study courses will depend on the study/research interests of the student; they will always vary.

GRMN 413. Advanced Composition and Grammar**3 Credits (3)**

Exercises in written German with emphasis on stylistic features.

Prerequisite: GRMN 313 or consent of instructor.

GRMN 425. Advanced German Conversation**3 Credits (3)**

Advanced conversation through intensive oral practice.

Prerequisite(s): GRMN 325 or consent of instructor.

GRMN 451. Special Topics in German**1-3 Credits**

Selected topics to be identified by subtitle in the Schedule of Classes. May be repeated for up to 6 credits with different topic. May be repeated up to 12 credits.

Learning Outcomes

1. Objectives for independent study courses will depend on the study/research interests of the student; they will always vary.

GRMN 453. Independent Studies in German**1-3 Credits (1-3)**

Individualized, self-paced research projects for advanced-level students of German. Topics identified by subtitle in the Schedule of Classes. GRMN 2120 or equivalent is recommended. May be repeated up to 12 credits.

Learning Outcomes

1. Objectives for independent study courses will depend on the study/research interests of the student; they will always vary.

GRMN 455. German for Specific Purposes**1-3 Credits (1-3)**

Directed reading for students to satisfy language requirements for master's and doctoral programs. Topics identified by subtitle in the Schedule of Classes. May be repeated up to 6 credits.

Learning Outcomes

1. Objectives for independent study courses will depend on the study/research interests of the student; they will always vary.

GRMN 471. Studies in German Literature**3 Credits (3)**

Specific literary genres and major figures in German language literature from the 20th century and beyond. Topics identified by subtitle in the Schedule of Classes. May be repeated up to 6 credits. Consent of Instructor required.

Learning Outcomes

1. Demonstrate an improvement of readings skills in German by one ACTFL level by augmenting active vocabulary, grammatical accuracy and reading comprehension skills.
2. Describe the authors, styles and basic discourse of the 5 mentioned periods of German-language literature: 19th Century Realism and Naturalism; The 20th Century; Post-war; Post-Communist Era; The 21st Century. Critique the position of the present day pop cult, transnational, global discourses in recent works of literature.

HIST-HISTORY

HIST 1105G. Making History**3 Credits (3)**

General introduction to history: how historians carry out research and develop interpretations about the past.

Learning Outcomes

1. Understand and articulate the differences and similarities between history and memory;
2. Analyze and critically interpret primary sources and understand how others might interpret and use the same material in different ways;
3. Recognize and appreciate the diversity of historical experiences and the uses of historical memory in various societies;
4. Understand how historical experiences that include political, geographical, social, cultural, religious and intellectual experiences have been expressed across historical periods;
5. Understand how historical experiences and memories have shaped contemporary societies;
6. Identify and understand the degree to which history has been used and misused in the past;
7. Demonstrate improvement in their ability to read critically, think logically, and express themselves clearly in writing.

HIST 1110G. United States History I**3 Credits (3)**

The primary objective of this course is to serve as an introduction to the history of the United States from the pre-colonial period to the immediate aftermath of the Civil War. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of the United States within the context of world societies.

Learning Outcomes

1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of the United States from the pre-colonial period to the immediate aftermath of the Civil War. Bloom Taxonomy's Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy's Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy's Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy's Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy's Cognitive Process: Create, Apply 8
6. Students will APPLY historical knowledge and historical thinking "in order to infer what drives and motivates human behavior in both past and present." Bloom Taxonomy's Cognitive Process: Apply, Analyze 9

HIST 1120G. United States History II**3 Credits (3)**

The primary objective of this course is to serve as an introduction to the history of the United States from reconstruction to the present. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of the United States within the context of world societies.

Learning Outcomes

1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of the United States from the reconstruction to the present. Bloom Taxonomy's Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy's Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy's Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy's Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy's Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking "in order to infer what drives and motivates human behavior in both past and present." Bloom Taxonomy's Cognitive Process: Apply, Analyze 10 11

HIST 1130G. World History I**3 Credits (3)**

The primary objective of this course is to serve as an introduction to global history from the 16th century to the present. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of world societies.

Learning Outcomes

1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for global history from ancient times to the 16th century. Bloom Taxonomy's Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy's Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy's Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy's Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy's Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking "in order to infer what drives and motivates human behavior in both past and present." Bloom Taxonomy's Cognitive Process: Apply, Analyze 12

HIST 1140G. World History II**3 Credits (3)**

The primary objective of this course is to serve as an introduction to global history from ancient times to the 16th century. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of world societies.

Learning Outcomes

1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of global history from the 16th century to the present. Bloom Taxonomy's Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy's Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy's Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy's Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy's Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking "in order to infer what drives and motivates human behavior in both past and present." Bloom Taxonomy's Cognitive Process: Apply, Analyze 13

HIST 1150G. Western Civilization I**3 Credits (3)**

This course is a chronological treatment of the history of the western world from ancient times to the early modern era. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of western civilization within the context of world societies. Selective attention will be given to "non-western" civilizations which impact and influence the development of "western" civilization.

Learning Outcomes

1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of the western world from ancient times to the early modern era. Bloom Taxonomy's Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy's Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to
4. construct past events. Bloom Taxonomy's Cognitive Process: Understand, Evaluate, Apply
5. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy's Cognitive Process: Remember, Understand, Evaluate
6. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy's Cognitive Process: Create, Apply
7. Students will apply historical knowledge and historical thinking "in order to infer what drives and motivates human behavior in both past and present." Bloom Taxonomy's Cognitive Process: Apply, Analyze 14

HIST 1160G. Western Civilization II**3 Credits (3)**

This course is a chronological treatment of the history of the western world from the early modern era to the present. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of western civilization within the context of world societies. Selective attention will be given to "non-western" civilizations which impact and influence the development of "western" civilization.

Learning Outcomes

1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of the western world from the early modern era to the present. Bloom Taxonomy's Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy's Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy's Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance. Bloom Taxonomy's Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy's Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking "in order to infer what drives and motivates human behavior in both past and present." Bloom Taxonomy's Cognitive Process: Apply, Analyze

HIST 1170. Survey of Early Latin America**3 Credits (3)**

The primary objective of this course is to serve as a survey of the history of Latin America from pre-Columbian times through independence. This course will explore the contributions of Indigenous peoples, Africans, and Europeans to the creation of Latin America's diverse societies. The elements of this course are designed to inform students on the major events and trends that are essential to the understanding of the history of Latin America within the context of world societies.

Learning Outcomes

1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of Latin America from independence to the present.
2. Bloom Taxonomy's Cognitive Process: Remember and Understand
3. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context.
4. Bloom Taxonomy's Cognitive Process: analyze, remember, evaluate, create
5. Students will summarize and appraise different historical interpretations and evidence in order to construct past events.
6. Bloom Taxonomy's Cognitive Process: understand, evaluate, apply
7. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance.
8. Bloom Taxonomy's Cognitive Process: remember, understand, evaluate
9. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience.
10. Bloom Taxonomy's Cognitive Process: create. apply
11. Students will apply historical knowledge and historical thinking "in order to infer what drives and motivates human behavior in both past and present."
12. Bloom Taxonomy's Cognitive Process: apply, analyze

HIST 1180. Survey of Modern Latin America**3 Credits (3)**

The primary objective of this course is to serve as a survey of the history of Latin America from independence to the present. This course will explore the contributions of Indigenous peoples, Africans, and Europeans to the creation of Latin America's diverse societies. The elements of this course are designed to inform students on the major events and trends that are essential to the understanding of the history of Latin America within the context of world societies.

Learning Outcomes

1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of Latin America from independence to the present.
2. Bloom Taxonomy's Cognitive Process: Remember and Understand
3. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context.
4. Bloom Taxonomy's Cognitive Process: analyze, remember, evaluate, create
5. Students will summarize and appraise different historical interpretations and evidence in order to construct past events.
6. Bloom Taxonomy's Cognitive Process: understand, evaluate, apply
7. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating credibility, perspective, and relevance.
8. Bloom Taxonomy's Cognitive Process: remember, understand, evaluate
9. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience.
10. Bloom Taxonomy's Cognitive Process: create. apply
11. Students will apply historical knowledge and historical thinking "in order to infer what drives and motivates human behavior in both past and present."
12. Bloom Taxonomy's Cognitive Process: apply, analyze

HIST 2110. Survey of New Mexico History**3 Credits (3)**

The primary objective of this course is to serve as an introduction to the history of New Mexico from the pre- Columbian times to the present day. The elements of this course are designed to inform students on the major events and trends that are essential in the understanding of the development of New Mexico within the context of the Americas.

Learning Outcomes

1. Students will be able to explain in their work how humans in the past shaped their own unique historical moments and were shaped by those moments, and how those cultures changed over the course of the centuries for the history of New Mexico from pre-Columbian times to the present day. Bloom Taxonomy's Cognitive Process: Remember and Understand
2. Students will distinguish between primary and secondary sources, identify and evaluate evidence and empathize with people in their historical context. Bloom Taxonomy's Cognitive Process: Analyze, Remember, Evaluate, Create
3. Students will summarize and appraise different historical interpretations and evidence in order to construct past events. Bloom Taxonomy's Cognitive Process: Understand, Evaluate, Apply
4. Students will identify historical arguments in a variety of sources and explain how they were constructed, evaluating, credibility, perspective, and relevance. Bloom Taxonomy's Cognitive Process: Remember, Understand, Evaluate
5. Students will create well-supported historical arguments and narratives that demonstrate an awareness of audience. Bloom Taxonomy's Cognitive Process: Create, Apply
6. Students will apply historical knowledge and historical thinking "in order to infer what drives and motivates human behavior in both past and present." Bloom Taxonomy's Cognitive Process: Apply, Analyze 16

HIST 2245G. Islamic Civilizations to 1800**3 Credits (3)**

History of Islamic civilizations to 1800.

Learning Outcomes

1. By the conclusion of the course, the student will be able to demonstrate a knowledge of the history of cultural encounters, exchanges, and conflicts between the Islamic world and the West from the seventh to the sixteenth century;
2. Be able to evaluate the major themes of cultural contact, conflict, and interchange between the Islamic world and the West;
3. Critically read and evaluate historical evidence with the goal of forming an argument about historical evidence
4. Communicate a historical argument logically, clearly, and effectively in writing.

HIST 2246G. Islamic Civilizations since 1800**3 Credits (3)**

History of Islamic civilizations since 1800.

Learning Outcomes

1. By the conclusion of the course, the student will be able to demonstrate a knowledge of the history of cultural encounters, exchanges, and conflicts between the Islamic world and the West from the sixteenth century;
2. Be able to evaluate the major themes of cultural contact, conflict, and interchange between the Islamic world and the West;
3. Critically read and evaluate historical evidence with the goal of forming an argument about historical evidence
4. Communicate a historical argument logically, clearly, and effectively in writing.

HIST 2250G. East Asia to 1600**3 Credits (3)**

History of China, Korea, Vietnam, and Japan from earliest times through the sixteenth century. Emphasis on cultural and political developments and their social and economic contexts, and the interaction between East Asian societies.

Learning Outcomes

1. Students will learn the analytic skills of interpreting historical changes and continuity.
2. They will assess and use historical documents, and learn how to evaluate varying historical interpretations.
3. Students will understand the chronological and geographic context of important historical events, and will understand the social, technological, economic, cultural and political components of the society under study in this course.
4. Students will understand how people shape their culture and its beliefs, and the way in which prevailing cultures and beliefs shape them.
5. They will understand the historical origins of present-day societies, to learn about their own historical roots.
6. They will learn about the development of structures of power, the production of and distribution of goods, and the relationship between science and technology and human values and behavior.

HIST 2251G. East Asia since 1600**3 Credits (3)**

History of China, Korea, Vietnam, and Japan from the sixteenth through the twentieth centuries. Emphasis on internal development of each country, as well as the social and political impact of Western Imperialism, and the emergence of each country's unique version of modern society.

Learning Outcomes

1. Students will learn the analytical skills of interpreting historical changes and continuity.
2. They will assess and use historical documents, and learn how to evaluate varying historical interpretations.
3. Students will understand the chronological and geographic context of important historical events, and will understand the social, technological, economic, cultural and political components of the society under study in this course.
4. Students will understand how people shape their culture and its beliefs, and the way in which prevailing cultures and beliefs shape them.
5. They will understand the historical origins of present-day societies, to learn about their own historical roots.
6. They will learn about the development of structures of power, the production of and distribution of goods, and the relationship between science and technology and human values and behavior.

HIST 2996. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. Community Colleges only. May be repeated for a maximum of 12 credits.

Learning Outcomes

1. Varies

HIST 300. Special Topics**1-9 Credits (1-9)**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 18 credits.

HIST 302V. Science in Modern Society**3 Credits (3)**

The social impact of scientific activity and thought from Newton to the present. The growth of modern scientific institutions; the political and social context of modern science. ENGL 1110G recommended.

HIST 308V. The History of Food**3 Credits (3)**

From the earliest uses of fire for cooking up through our modern age of fast food and organic gardening, human culinary traditions have long shaped and been shaped by the forces of history. This course offers a general overview of the history of food production and consumption in the West from prehistoric times through the 21st century, with a special focus on the various ways in which social and political history have impacted dining, taste, and cooking. Among a great variety of topics, we will focus on the origins of cooked food; ancient Hebrew dietary laws; the "spice revolution" and the great influence of Arabic cuisine on the kitchens of medieval Europe; emerging ideas about etiquette and table manners including the use of the fork; the advent of print and the first printed cookbooks; the Columbian Exchange and the arrival of foods from the New World; the rise of French cuisine; food and immigration; the global dominance of fast food; and sustainable food production and consumption in the modern era. We will pay a special emphasis throughout the course to the myriad ways in which food production and consumption in history have always been gendered, as well as influenced by ideas about social class.

Learning Outcomes

1. Master a general master narrative about the history of food in the Western World, including a variety of European countries;
2. Analyze the relationship between food and culture in a variety of countries and traditions;
3. Critically read and learn to evaluate secondary historical literature, grasping the strengths and weaknesses of historical monographs; and
4. Communicate a historical argument logically and effectively in a 20-page original research paper.

HIST 311V. Colonial Latin America**3 Credits (3)**

Social, political, and economic development from Columbus to the Wars of Independence. Research paper required.

HIST 312V. Modern Latin America**3 Credits (3)**

Post-revolutionary developments in the nineteenth and twentieth centuries; the role of Latin America in world affairs and the Inter-American system. Research paper required.

HIST 313. Making the American West**3 Credits (3)**

Development of the American West from 1803 to 1900 with emphasis on conquest, federal and corporate roles in western development, environmental change, and the Mythic West. Includes meetings outside regular class time to view feature-length films.

HIST 321V. History of Korea**3 Credits (3)**

Social, political, and cultural history of Korea from earliest times through twentieth century. Emphasis on the interaction between Korean traditions and influences from China and the West. May be repeated up to 3 credits.

Learning Outcomes

1. Students will learn the analytical skills of interpreting historical changes and continuity.
2. They will assess and use historical documents, and learn how to evaluate varying historical interpretations.
3. Students will also understand the chronological and geographic context of important historical events, and will understand the social, technological, economic, cultural and political components of the society under study in this course.
4. Students will examine how people shape their culture and beliefs, and the way in which prevailing cultures and beliefs shape them.
5. They will understand the historical origins of present-day societies, to learn about their own historical roots.
6. They will learn about the development of structures of power, the production of and distribution of goods, and the relationships between science and technology and human values and behavior.

HIST 323. Cultural History of Later Imperial China**3 Credits (3)**

Covers art and literature of China from the Tang Dynasty (618-907) through the eighteenth century. Developments in cultural theory and practice are traced in the context of the social and economic changes fostering an understanding of Chinese cultural history and its legacy in East Asia today.

HIST 329. History of Egypt**3 Credits (3)**

History of Egypt from ancient times to the present.

HIST 330V. Introduction to Religious Studies**3 Credits (3)**

Provides an overview of old and new methods and theories for the study of religion. Exposure to the ways groups of people in diverse cultural systems construct and change their religious traditions to serve practical and meaningful ends. Same as SOCI 330V and ANTH 330V.

HIST 331. Rebels, Guerrillas, and Terrorists in Modern Latin America**3 Credits (3)**

Explores history of rebels in Latin America. Examines guerilla struggles attaining national dimension. Focus on modern events, including Peru's Shining Path, Colombia's FARC, and Mexico's Zapatistas. Same as POLS 468.

HIST 333. Renaissance Europe**3 Credits (3)**

This course explores the cultural, social, and political developments of early modern Europe between 1350-1650. This period witnessed a dramatic transformation between the medieval and modern worlds: a transition marked by new historical and artistic visions, the invention of the printing press, the discovery of the New World, the permanent fracturing of Christianity during the Protestant Reformation, the scientific revolution, and the rise of capitalism as a world system. We will consider these and other transformations in this time period both as they were understood by elite society as well as the impact of these innovations upon the daily lives of everyday people and women in particular.

Learning Outcomes

1. Identify the key historical facts, values, and ideas that shaped the history of Europe between 1400--1650;
2. Analyze the causes and effects of the Renaissance, the Age of Encounters, the Reformation, and the Scientific Revolution;
3. Identify the major artistic, literary, and technological contributions of individuals during this time period;
4. Describe how cultural exchanges reveal the global context of events in early modern Europe; and
5. Create well-supported historical arguments based on primary and secondary source evidence.

HIST 334. Art and Life in Renaissance Italy**3 Credits (3)**

Examines how Italian Renaissance textual and visual culture offered Europe new ways of seeing and portraying itself, 1350-1550. Topics include: Florence, Venice, Rome, Leonardo, Michelangelo, Titian, humanism, the Medici, and republican and courtly culture. Same as ARTH 444.

HIST 338. World War I**3 Credits (3)**

Cultural, social, and intellectual background and impact of World War I. Military and diplomatic events of the war. Consequences of the war.

HIST 339. World War II**3 Credits (3)**

Social, cultural and political aspects of World War II, in addition to traditional military events. Emphasis on U.S. involvement.

HIST 343. Recent American Military History**3 Credits (3)**

Emphasis on American wars since the Civil War, and on factors contributing to the development of modern military systems.

HIST 347. Civil War Era 1840-1877**3 Credits (3)**

Mexican-American War, development of secession, American Civil War, Reconstruction.

HIST 354. Modern Mexico**3 Credits (3)**

Examines interactions of peasants, women, indigenous peoples, and economically/politically dominant groups within the Mexican state from 1810 to the present. Assesses the contentious relationship between Mexico and the United States, focusing on the Mexican-U.S. border.

HIST 356. The Mexican Revolution**3 Credits (3)**

Examines the history of modern Mexico through the lens of the Mexican Revolution, 1910-1920. Course covers military, political, social, cultural and economic developments that shaped Mexico during and after the Revolution.

HIST 361. Afro-American History I**3 Credits (3)**

African background, slave trade, slavery; Civil War and Reconstruction; free blacks in a white society to about 1900.

HIST 362. Afro-American History II**3 Credits (3)**

Black Americans in the United States in the twentieth century; segregation; black leaders, organizations, methods and goals; white reaction; the struggle for equality.

Learning Outcomes

1. Students will evaluate and employ primary and secondary sources in order to understand varying historical interpretations and craft their own interpretations of historical evidence in discussions and essays. Students will analyze and compare political, economic, social and intellectual institutions, structures and processes over the period of the Civil Rights Movement through readings, interaction with primary source documents, essays, and discussions. Students will strengthen their argumentative skills through online class discussions and written assignments. Students will demonstrate an understanding of academic honesty and the ability to cite, paraphrase, and quote sources. Students will demonstrate an ability to think about the interaction between present and past issues presented in the class.

HIST 366V. British Imperialism**3 Credits (3)**

Survey of the activities of the British empire from the 16th century through the 20th century, with emphasis on Ireland, North America and India. Assesses the impact of imperial activities on British domestic politics, culture and social history, and the process and impact of decolonization.

HIST 368. Teaching History**3 Credits (3)**

Philosophical and practical issues of teaching history are explored. Designed to help prospective teachers at all levels clarify their views about studying history. A variety of pedagogical strategies for teaching history are explored.

HIST 369. History of Latinos in the United States**3 Credits (3)**

Development of Latino communities since 1500 in what is today the U.S. Emphasis on 1846 to present, and on Mexican Americans, Puerto Ricans, and Cuban Americans. Major themes: race, colonialism, immigration, nationalism, class, culture, gender, and politics.

HIST 371. Ancient Greece**3 Credits (3)**

Social, cultural, and political history of Greece from the Minoan to Hellenistic periods.

HIST 372. The Roman World**3 Credits (3)**

Republic and Empire; Rome as a world power; institutional, cultural, and intellectual contributions; decline and fall.

HIST 373. Islam and the West: Cultural Contacts, Conflicts and Exchanges**3 Credits (3)**

Examines interactions, encounters and cross-fertilization between the Islamic world and the West from the seventh to the twenty-first centuries. Course includes origins of Islam, relationships between Islam, Judaism, and Christianity, and concludes with the post 9/11 present.

HIST 374V. The European City: History and Culture**3 Credits (3)**

Course presents the rich, complex history and cultures of European cities from ancient to modern times, linking these cities to crucial issues in European history. Crosslisted with HNRS 374V, GEOG 374V, POLS 374V.

HIST 379V. The History of Italy from the Etruscans to the Mafia**3 Credits (3)**

Italy is beloved by many, for its food, language, and art; however, we often understand it only superficially, and often fail to grasp the darker elements of its history. This class will consider the history of the Italian peninsula from the time of its earliest inhabitants, the Etruscans, up through the twenty-first century. We will consider topics such as the Roman world and its legacy, the rise of Christianity, the growth of medieval towns and their economies, Renaissance, the Risorgimento or the formation of the modern nation of Italy, Italian fascism, the wars of the twentieth century, Italian film, the history of Italian food including pizza and pasta, Italian communism, and the growth of organized crime and the mafia. Special attention will be paid throughout to the relationship between Northern and Southern Italy, as well as the special city of Venice and its relationship to the rest of the peninsula.

Learning Outcomes

1. Master a general master narrative about the history of Italy from its earliest inhabitants through the twenty-first century
2. Identify a variety of developments in the history of Italian culture, including art, literature, food, and film;
3. Critically read and evaluate primary and secondary historical sources and
4. Communicate a historical argument logically and effectively in a 15-page original research paper.

HIST 382V. Modern Russia**3 Credits (3)**

Domestic policies and foreign relations from mid-nineteenth century to the present with emphasis on the Soviet period.

HIST 383. Germany**3 Credits (3)**

Political, social, and cultural developments from the eighteenth century to the present, with emphasis on the Nazi era. Same as POLS 473.

HIST 386. New Mexico History**3 Credits (3)**

Economic, political and social development of New Mexico from exploration to modern times.

HIST 387. Spain in the New World: Conquest, Conflict, and Cultural Exchange**3 Credits (3)**

The history of Spain, with a focus on Spain's interaction with the New World. May be repeated up to 3 credits.

Learning Outcomes

1. The student will be able to demonstrate a knowledge of the history of Spanish contacts, conquests, and influences in the New World from the late fifteenth century until the early twenty first century;
2. Be able to evaluate the major themes of cultural contact, conflict, and interchange between the Spain and the New World; Critically read and evaluate historical evidence in order to construct past events;
3. Communicate a historical argument logically, clearly, and effectively in writing.

HIST 390V. The Holocaust**3 Credits (3)**

The attack upon European Jews by Adolf Hitler and the National Socialist Party in Germany and occupied Europe from his accession to chancellor in 1933 until the end of the Third Reich in 1945.

HIST 395. From Rule Britannia to Cool Britannia: Twentieth-Century Britain**3 Credits (3)**

Edwardian Era, World War I; Reconversion, the 1926 General Strike; the Great Depression and appeasement; Churchill and the war against Nazi Germany; nationalization and the Welfare State.

HIST 397. Introduction to Public History**3 Credits (3)**

Surveys how historians do history in museums, archives, government agencies, and in communities. Hands-on experience provides students a better understanding of history and how historians work outside of the classroom. Seminar project required.

HIST 398. Historians and History**3 Credits (3)**

General historiography and philosophy of history; historical methodology, research, and writing; bibliographical aids and their uses. May be repeated up to 3 credits. Restricted to: HIST majors.

HIST 400. Special Topics**1-9 Credits (1-9)**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 18 credits.

HIST 402. Special Topics in European History**3 Credits (3)**

Special topics in European history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 403. Special Topics in Middle Eastern History**3 Credits (3)**

Special topics in Middle Eastern history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 404. Special Topics in Asian History**3 Credits (3)**

Special topics in Asian history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 406. Special Topics in United States History**3 Credits (3)**

Special topics in United States history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 412. Travel Writing**3 Credits (3)**

Explores how writers describe their travels with an emphasis on the history of a place. Semester paper required. Crosslisted with: HIST 512.

HIST 413. Native American History**3 Credits (3)**

Seminar explores the history of Native Americans, including tribal conflicts, interactions with Europeans and Euro-Americans, land loss, degradation of natural resources, federal Indian policy, pan-Indian movements, cultural resistance and revitalization, and modern tribal economies.

HIST 423. The History of Food**3 Credits (3)**

Considers the history of the production and consumption of food in the West from the Neolithic Age to the present with an emphasis on the historical relationships between food, gender, social class, social identity and nationalism. Crosslisted with: HIST 523.

HIST 425V. History of Magic and Witchcraft in Medieval and Renaissance Europe**3 Credits (3)**

Examines history of popular and scientific beliefs about magic and witchcraft in medieval and early modern Europe. Includes origins of occult Western sciences; Arabic sources of medieval magic; the occult sciences in scholasticism; witchcraft and scholasticism; witchcraft and medieval theology, witch hunts of the 16th and 17th centuries; and the decline of belief in magic and witchcraft. Emphasis on boundaries that defined and separated magic, science, and religion in Western thought from late antiquity through the Scientific Revolution. Crosslisted with: HNRS 425V.

HIST 428. History of Terrorism in Modern Europe and the Middle East**3 Credits (3)**

Analyzes causes, methods, and consequences of terrorism in Europe and the Middle East from the Reign of Terror in the French Revolution to Al-Qaeda, Hamas and Hezbollah in the contemporary Middle East and beyond.

HIST 431. History of Race and Ethnicity**3 Credits (3)**

Seminar explores the historical social construction of race and ethnicity, and their relationship to other systems of social difference such as class and gender. Course will examine popular and academic theories of race and ethnicity as well as historical concrete effects of racial and ethnic differences in society.

HIST 432. United States Labor History to 1877**3 Credits (3)**

Seminar discussions explore United States labor and working-class history to 1877, including such topics as pre-industrial and industrial labor, slavery, debt peonage, indentured servitude, and housework. May explore the history of labor organization, working-class culture and leisure activities, and responses to labor issues by the state.

HIST 433. United States Labor History Since 1877**3 Credits (3)**

Seminar discussions explore United States labor and working-class history since 1877, including such topics as industrial labor, debt peonage, and housework. May explore the history of labor organization, working-class culture and leisure activities, and responses to labor issues by the state.

HIST 434. Urban History**3 Credits (3)**

Seminar discusses cities as complex catalysts for cultural, political, and scientific development, both within cities themselves and more broadly for their nations and regions. Course deals with such topics as the relationship between social organization and physical space; city development, morphology and dynamics; and the cultural and intellectual history of cities.

HIST 435. History of War and Revolution**3 Credits (3)**

Seminar covers historical dynamics of violent social, political, and economic transitions. May focus upon a particular war or upheaval, such as World War II or the French Revolution, or may examine more generic characteristics of conflict and radical change across many historical examples. Extensive readings in scholarly literature. Research projects relating to specific course contents.

HIST 438. Antiquity and Modernity**3 Credits (3)**

Seminar explores links between earlier and more recent historical periods. Examples may include the Renaissance rediscovery of ancient Rome or the early modern Chinese reassessment of its classical Confucian heritage. Readings include ancient sources and the modern reception of such works, and the scholarly assessment of these processes. Individual research projects required in areas of student interests.

HIST 443. The Cold War in Latin America**3 Credits (3)**

Seminar discusses Latin American political history during the Cold War. Course focuses on how Latin Americans (individuals, parties, militaries, states) acted in an increasingly politicized arena defined by growing United States concerns over Cuban and Soviet influence in the area.

HIST 448. Nuclear Nation**3 Credits (3)**

Explores post-World War II history and the impact atomic energy has had on the United States and the world.

HIST 449. Readings**1-3 Credits**

Individual study of selected readings and problems. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

HIST 453. Cuba: Colony to Castro**3 Credits (3)**

Economic, social, and political development of Cuba and other colonies and nations in the Caribbean with emphasis on recent events.

HIST 471. China through the Ming Dynasty**3 Credits (3)**

History of China from origins to Ming dynasty, (1368-1644). Cultural and political development with emphasis on social and economic contexts and long term trends.

HIST 472. China in the Modern World**3 Credits (3)**

History of China from seventeenth through twentieth centuries. Rise and fall of the Manchu Qing dynasty, internal dynamics of social and political change in nineteenth and twentieth centuries, impact of Western Imperialism, and development of the Peoples Republic since 1949.

Learning Outcomes

1. Students will learn the basic narrative of modern Chinese history.
2. Students will learn to understand and evaluate historical arguments and interpretations. Students will learn to work with primary sources and to analyze and interpret their contents. Students will complete a research paper combining primary and secondary sources and making a sustained historical argument.

HIST 473. History of Japan**3 Credits (3)**

History of Japan through twentieth century. Political and cultural developments and their social and economic contexts. Chinese influence on early Japan, rise of Samurai and Shogunate, impact of Western Imperialism, and emergence of modern Japan.

HIST 474. Gender in East Asian History**3 Credits (3)**

Examines the position of women and the social roles of both sexes in traditional China and Japan, and traces the changes taking place in those societies in the course of modernization in the last century and a half. Scholarly literature and works of Chinese and Japanese literature in translation and cinema used. Same as GNDR 474.

HIST 475. History of the Global Political Economy**3 Credits (3)**

Traces development of global systems of economic interaction and the rise of European military and political dominance in the 18th and 19th centuries. Emphasis on East and South Asian roles in early modern history, and on challenges to European dominance in the 20th and 21st centuries.

HIST 479. Oral History**3 Credits (3)**

Oral history through readings, discussions, and interviews. Semester project required that includes an interview and transcript.

HIST 481. Time Traveling Through New Mexico's Past**3 Credits (3)**

Teaches historians and educators how to make history come alive. Semester project includes role playing characters and activities from a past era with local schools and museums.

HIST 483. Historic Preservation**3 Credits (3)**

Study of community development, the historic preservation movement, and the built environment. Field project.

HIST 486. Interpreting Historic Places for the Public**3 Credits (3)**

Explores historic site interpretation, the scholarship and philosophy of historic interpretation, and the nature of heritage interpretation for historic places.

HIST 489. Projects in History**3 Credits (3)**

Individual projects in history. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

HIST 500. Special Topics**1-9 Credits (1-9)**

Specific subjects to be announced in the Schedule of Classes. Graduate research paper required. May be repeated for a maximum of 12 credits.

HIST 504. Civil War Era, 1840-1877**3 Credits (3)**

Mexican-American War, development of secession, American Civil War, Reconstruction. Graduate research paper required.

HIST 511. Making the American West**3 Credits (3)**

Development of the American West from 1803 to 1900, with emphasis on conquest, federal and corporate roles in western development, environmental change, and the mythic West. Includes extra class meetings to view feature-length films. Graduate research paper required.

HIST 512. Travel Writing**3 Credits (3)**

Explores how writers describe their travels with an emphasis on the history of a place. Semester paper required. Crosslisted with: HIST 412.

HIST 516. History of Latinos in the United States**3 Credits (3)**

Development of Latino communities since 1500 in what is today the United States. Emphasis on 1846 to present, and on Mexican Americans, Puerto Ricans, and Cuban Americans. Major themes: race, colonialism, immigration, nationalism, class, culture, gender, and politics. Graduate research paper required.

HIST 525. History of Magic and Witchcraft in Medieval and Renaissance Europe**3 Credits (3)**

Examines history of popular and scientific beliefs about magic and witchcraft in medieval and early modern Europe. Includes origins of occult Western sciences; Arabic sources of medieval magic; the occult sciences in scholasticism; witchcraft and scholasticism; witchcraft and medieval theology, witch hunts of the 16th and 17th centuries; and the decline of belief in magic and witchcraft. Emphasis on boundaries that defined and separated magic, science, and religion in Western thought from late antiquity through the Scientific Revolution. May be repeated up to 3 credits.

HIST 527. Labor History**3 Credits (3)**

Seminar discussions explore labor and working-class history, including such topics as pre-industrial labor, slavery, debt peonage, indentured servitude, and housework. May explore the history of labor organization, working-class culture and leisure activities, and responses to labor issues by the state.

HIST 528. History of Terrorism in Modern Europe and the Middle East**3 Credits (3)**

Advanced analyses of causes, methods, and consequences of terrorism in Europe and the Middle East from the Reign of Terror in the French Revolution to Al-Qaeda, Hamas, and Hezbollah in the contemporary Middle East and beyond.

HIST 535. War and Revolution**3 Credits (3)**

Seminar covers historical dynamics of violent social, political and economic transitions. May focus upon a particular war or upheaval, such as World War II or the French Revolution, or may examine more generic characteristics of conflict and radical change across many historical examples. Extensive readings in scholarly literature. Research projects relating to specific course contents.

HIST 538. Special Topics in European History**3 Credits (3)**

Advanced special topics in European history to be announced in the schedule of classes. May be repeated for a maximum of 12 credits.

HIST 540. Special Topics in Middle Eastern History**3 Credits (3)**

Advanced special topics in Middle Eastern history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 543. Special Topics in Asian History**3 Credits (3)**

Advanced special topics in Asian history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 545. Special Topics in United States History**3 Credits (3)**

Advanced special topics in United States history to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

HIST 548. Nuclear Nation**3 Credits (3)**

Explores post-World War II history and the impact that atomic energy has had on the United States and the world.

HIST 549. Graduate Readings**1-3 Credits**

Individual study of selected readings and problems. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

HIST 553. Cuba: Colony to Castro**3 Credits (3)**

Economic, social, and political development of Cuba and other colonies and nations in the Caribbean, with emphasis on recent events. Graduate research paper required.

HIST 557. The Mexican Revolution**3 Credits (3)**

Origins, causes, and scope of the Mexican Revolution, including leading personalities, with emphasis on the U.S.-Mexican border. Graduate research paper required.

HIST 561. Islam and the West: Cultural Contacts, Conflicts and Exchanges**3 Credits (3)**

Examines interactions, encounters and cross-fertilization between the Islamic world and the West from the seventh to the twenty-first centuries. Course includes origins of Islam, relationships between Islam, Judaism, and Christianity, and concludes with the post 9/11 present. May be repeated up to 3 credits.

HIST 566. British Imperialism**3 Credits (3)**

Survey of the activities of the British empire from the 16th century through the 20th century, with emphasis on Ireland, North America and India. Assesses the impact of imperial activities on British domestic politics, culture and social history, and the process and impact of decolonization.

HIST 568. Urban History**3 Credits (3)**

Seminar discusses cities as complex catalysts for cultural, political, and scientific development, both within cities themselves and more broadly for their nations and regions. Course deals with such topics as the relationship between social organization and physical space; city development, morphology and dynamics; and the cultural and intellectual history of cities.

HIST 570. The Cold War in Latin America**3 Credits (3)**

Seminar discusses Latin American political history during the Cold War. Course focuses on how Latin Americans (individuals, parties, militaries, states) acted in an increasingly politicized arena defined by growing United States concerns over Cuban and Soviet influence in the area.

HIST 571. China through the Ming Dynasty**3 Credits (3)**

History of China from origins to Ming Dynasty, 1368-1644. Cultural and political development with emphasis on social and economic contexts and long term trends. Research paper required.

HIST 573. History of Japan**3 Credits (3)**

Covers the history of Japan through the 20th century. Political and cultural developments and their social and economic contexts. Chinese influence on early Japan, rise of Samurai and Shogunate, impact of Western imperialism, and the emergence of modern Japan. Research paper required.

HIST 574. Gender in East Asian History**3 Credits (3+2P)**

Examines the position of women and the social roles of both sexes in traditional China and Japan, and traces the changes taking place in those societies in the course of modernization in the last century and a half. Scholarly literature and works of Chinese and Japanese literature (in translation) and cinema used. Same as GNDR 574.

HIST 575. History of the Global Political Economy**3 Credits (3)**

Traces development of global systems of economic interaction and the rise of European dominance in the 18th and 19th centuries. Emphasis on East and South Asian roles in early modern history, and on challenges to European dominance in the 20th and 21st centuries.

HIST 576. The Holocaust**3 Credits (3)**

Advanced study of the attack on European Jews by Adolf Hitler and the National Socialist Party in Germany and occupied Europe from his accession as chancellor in 1933 until the end of the Third Reich in 1945.

HIST 578. Modern Russia**3 Credits (3)**

Domestic policies and international relations from the mid-nineteenth century to the present with emphasis on the Soviet experience.

HIST 579. Oral History**3 Credits (3)**

Oral history through readings, discussion, and interviews. Course project required that includes an interview and transcription.

HIST 580. Graduate Research Projects**1-6 Credits (1-6)**

Intensive investigation of a selected area of history, including the completion of a research paper or a public history project. Consent of instructor required.

HIST 581. Time Traveling Through New Mexico's Past**3 Credits (3)**

Instructs historians and educators on how to make history come alive. Semester project includes role playing characters and activities from a past era with local schools and museums.

HIST 582. History and Memory**3 Credits (3)**

Seminar examines the interplay of memory and history. Explores how various nations and people construct the narratives of their past.

HIST 583. Advanced Historic Preservation**3 Credits (3)**

Covers the community development, the historic preservation movement, and the built environment. Field project and additional graduate work.

HIST 585. Public History Internship**3 Credits (3)**

Individual project in an area of public history, including a final written report. Research project required. May be repeated for a maximum of 9 credits.

Prerequisite: consent of instructor.

HIST 586. Interpreting Historic Places for the Public**3 Credits (3)**

Advanced study of historic site interpretation, the scholarship and philosophy of historic interpretation, and the nature of heritage interpretation for historic places.

HIST 587. United States Labor History to 1877**3 Credits (3)**

Seminar discussions explore United States labor and working-class history to 1877, including such topics as pre-industrial and industrial labor, slavery, debt peonage, indentured servitude and housework. May explore the history of labor organization, working-class culture and leisure activities, and responses to labor issues by the state.

HIST 590. Reading Seminar: Borders, Boundaries and Frontiers**3 Credits (3)**

Explores questions and issues concerning different kinds of borders, boundaries and frontiers. Introduces relevant theoretical literature and considers specific places and times through case studies, including U.S.-Mexico border. Restricted to students in HIST program.

HIST 591. Reading Seminar: Modernity and its Discontents**3 Credits (3)**

Examines the problem of modernization and the meaning of becoming and being modern, including positive and negative effects on individuals, cultures, environments and societies.

HIST 592. Reading Seminar: Nature and Society**3 Credits (3)**

Considers how humans and nature have reshaped each other, how people have perceived nature, how different cultures have understood their relationships to nature, and how social groups and nations have struggled over natural resources. Takes a comparative, transnational approach.

HIST 593. Reading Seminar: History, Myth and Memory**3 Credits (3)**

Course analyzes the complex and often contested process of writing national histories, creating national heroes, and forging collective memories. Students assess written texts, memorials, parades and celebrations.

HIST 594. Public History Seminar**3 Credits (3)**

Introduction to the discipline of public history, including its methodology and literature. Fieldwork is required.

HIST 596. Research Seminar**3 Credits (3)**

Research seminar teaches students the process of conducting original historical research with primary source documents. Students will then use these research skills to produce a polished chapter or article-length manuscript. Restricted to HIST majors.

HIST 597. Public History Article**1-9 Credits (1-9)**

Researching and writing an article suitable for publication about a student's public history internship or other topic of interest within the field of public history.

HIST 598. Craft of History: Historical Theories, Methods, and Criticism (f)**3 Credits (3)**

Introduction to historical theories, methodologies, criticism, and skills essential to graduate study in history. Required for all history graduate students; restricted to history majors.

HIST 599. Master's Thesis**1-15 Credits (1-15)**

Thesis.

HIT-HEALTH INFO TECHNOLOGY

HIT 110. Electronic Health Records**3 Credits (3)**

Current electronic health record principles, methods and procedures, and computerized medical record concepts and software applications will be introduced. Restricted to: Community Colleges only.

HIT 120. Health Information Introduction to Pharmacology**3 Credits (3)**

Introduction to the principles of pharmacology, including drug terminology; drug origins, forms, and actions; routes of administration; as well as the use of generic name drugs, trade name drugs and categories of drugs to treat multiple and specific body systems. May be repeated up to 3 credits. Crosslisted with: NURS 120. Restricted to Community Colleges campuses only.

HIT 130. Health Information Technology Anatomy & Physiology**3 Credits (3)**

An introductory course in the basics of human structure and function. Body systems are examined as to how they relate to proper code selection and as part of the functioning of the body as a whole. Restricted to Community Colleges campuses only.

HIT 140. Health Information Introduction to Pathophysiology**3 Credits (3)**

Introduction to the nature of disease and its effect on body systems. Disease processes affecting the human body via an integrated approach to specific disease entities will be presented including a review of normal functions of the appropriate body systems. Diseases will be studied in relation to their etiology, pathology, physical signs and symptoms, diagnostic procedures, complications, treatment modalities and prognosis.

HIT 150. Introduction to Medical Terminology**3 Credits (3)**

The study and understanding of medical terminology as it relates to diseases, their causes and effects, and the terminology used in various medical specialties. Emphasis will be placed on learning the basic elements of medical words, appropriate spelling and use of medical terms, and use of medical abbreviations. May be repeated up to 3 credits. Crosslisted with: NURS 150, AHS 120 and BOT 150. Restricted to Community Colleges campuses only.

HIT 158. Advanced Medical Terminology**3 Credits (3)**

Builds upon the concepts covered in HIT 150 or AHS 120 providing greater understanding of how to properly use and apply medical terminology used in the various health fields. Medical terminology associated with the body system's anatomy and physiology, pathology, diagnostic and therapeutic procedures, pharmacology, and abbreviations will be emphasized. Restricted to Community Colleges campuses only.

Prerequisite(s): HIT 150 or AHS 120.

HIT 221. Internship I**3 Credits (3)**

Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. C- or better is required for this course. Consent of Instructor required. Restricted to: BOT,HIT majors. Restricted to Community Colleges campuses

HIT 228. Medical Insurance Billing**3 Credits (3)**

Comprehensive overview of the insurance specialist's roll and responsibilities. Concepts and applications that will assist the student in understanding the steps necessary for successfully completing the insurance claim filing and reimbursement processes for various insurance carriers, both private and government, will be emphasized. Restricted to Carlsbad campus only.

Prerequisite(s): HIT/NURS 150; BOT 208.

HIT 240. Health Information Quality Management**3 Credits (3)**

Introduction to basic concepts of quality improvement and performance improvement as they apply to health record systems and the health care industry. Quality assessment and improvement standards and requirements of licensing, accrediting fiscal and other regulatory agencies will be presented.

HIT 248. Medical Coding I**3 Credits (2+2P)**

Comprehensive overview of the fundamentals, coding conventions, and principles of selecting the most appropriate ICD-10-CM/PCS diagnostic and procedure codes. The most recent version of ICD-10-CM/PCS and an in depth study of current Official Coding Guidelines for coding and reporting will be emphasized. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): BOT 228.

HIT 255. Special Topics**3 Credits (3)**

Specific topics to be announced in the Schedule of Classes. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

HIT 258. Medical Coding II**3 Credits (2+2P)**

Continuation of Medical Coding I. Comprehensive overview of the coding and reporting guidelines, fundamentals, coding conventions, and principles of selecting the most appropriate CPT and HCPCS procedural codes for all medical specialties. The most recent version of CPT and a continued study of the ICD-10-CM/PCS coding conventions and principles will be emphasized. Designed as a medical coding capstone course. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): HIT 248.

HIT 268. Health Information Systems**3 Credits (3)**

Overview of health data management, work planning, and organization principles; an introduction to health care information systems; and review of the fundamentals of information systems for managerial, clinical support, and information systems.

HLED-HEALTH EDUCATION

HLED 1154. Lifeguarding**2 Credits (2)**

Skills training for a nonsurf lifeguard. Course will include Standard First Aid and CPR certification. May be repeated up to 2 credits. Students must be able to Swim 500 yards, dive to 9-foot depth and retrieve a 10-pound brick, surface dive to 5 feet then swim underwater 15 yards, tread water one minute.

Learning Outcomes

1. To help the student become aware of the common hazards associated with various types of aquatic facilities and to develop the knowledge and skills to eliminate or minimize such hazards.
2. To help the student develop the skills necessary to recognize a person in distress or in a drowning situation and to effectively rescue that person.
3. To help the student understand their responsibility to their employer, fellow employees and especially to the patrons of their facility.
4. To provide explanations, demonstrations, practice and review of the rescue skills essential for lifeguarding.
5. To instill in the students an understanding and appreciation for the responsibilities, swimming skills and additional duties of lifeguarding.
6. To develop more advance swimming skills to assist in a water rescue.

HMSV-HUMAN SERVICES

HMSV 2110. Case Management

3 Credits (3)

This course introduces students to the concept of case management, how it is used in human services, and skills necessary to function effectively as case managers. The emphasis is on the client assessment process, service planning and delivery, and client advocacy. Topics introduced include observation, data collection, documentation, and reporting of client behaviors, identification and referral to appropriate services, monitoring, planning, and evaluation. This course provides student with basic knowledge and beginning case management skills.

Prerequisite(s): PSYC 1110G and SOWK 2110G.

Learning Outcomes

1. Define the purpose of case management and explain the role of the case manager
2. Explain the process of case management and what it entails
3. Explain the ethical, professional and legal responsibilities of case managers
4. Describe several settings within which case management takes place
5. Apply principles of client record management, and protect client rights to privacy and confidentiality
6. Use data to determine the appropriate referral service to professional, agencies, community programs or other resource, and clearly and specifically explain the referral service's role in treatment and contact information
7. Apply standards of clinical evaluation, including establishing rapport, data gathering and screening, analysis of substance abuse implications, treatment possibilities, initial actions, and documentation of findings and treatment recommendations
8. Incorporate individual and cultural relevance in concert with established situation-specific policies and procedures for crisis management.

HNRS-HONORS

HNRS 1110. Journeys of Discovery

1 Credit (1)

Weekly conversations among students and a faculty member; organized around a particular subject and a small selection of readings. The seminars illuminate the many paths of discovery explored by the New Mexico State University faculty.

Prerequisite(s): Honors eligible.

Learning Outcomes

1. Students will comprehend and condense information to contribute to class discussions.
2. Students will develop public speaking and presentation skills based on research conducted in and outside of class.
3. Students will expand upon collaborative skills as both group presentations and group written reports.

HNRS 1115. Honors First Year Seminar

3 Credits (3)

This course is designed to introduce new first semester students to the life of the mind, the life of the University, and the principles that guide the NMSU University Honors Program. Combining critical thinking and experiential exploration, students will develop a personalized plan for success, both in and out of the classroom, consistent with the values of the Conroy Honors College and the mission of the University.

Learning Outcomes

1. Demonstrate critical thought about the nature of knowledge, learning, and student development in the contemporary University. Explain how key concepts and principles serve as the foundation for the Honors College mission and values. Create a plan for their experiences at NMSU, in and out of the classroom, that will maximize their academic achievement and personal success beyond graduation.

HNRS 1135G. Introduction to Biological Anthropology

3 Credits (3)

This course provides a basic introduction to the broad field of biological anthropology. The research interests of biological anthropologists include the history and development of modern evolutionary biology, molecular and population genetics, modern primates, the primate and human fossil record, and modern human biological diversity. This is an Honors version of ANTH 1135G. It is taught with ANTH 1135G with differentiated assignments. .

Corequisite: HNRS 1135L.

Learning Outcomes

1. Summarize the basic principles of evolution and recognize how they apply to the human species. Recognize the biological and behavioral continuity of humans with all life, and especially other modern primate species. Identify ways in which the human species is biologically and behaviorally unique. Summarize fossil evidence for human evolution. Distinguish the major Paleolithic industries and outline the behavioral and cognitive changes indicated by the fossil and archeological evidence. Critically evaluate popular accounts of human variation and human evolution. Interpret modern human dilemmas (e.g., overpopulation, co-evolution of disease, and genetic engineering) from an evolutionary perspective. Discuss in class and analyze in writing scholarly arguments concerning course concepts.

HNRS 1135L. Introduction to Biological Anthropology Lab**1 Credit (1P)**

This laboratory course expand on the topics covered in lecture course and uses scientific methods and principles to examine evidence for the process of evolution, the nature of heredity, human evolutionary history and family tree relationships, primate ecology and behavior, and modern human diversity. Hands-on experience with fossil and skeletal material will be an important part of the learning process. This is an Honors version of ANTH 1135L.

Corequisite: HNRS 1135G.

Learning Outcomes

1. Demonstrate an understanding of the scientific method. Employ principles of Mendelian genetics to determine genotype and phenotype probabilities, and calculate gene, genotype, and phenotype frequencies using the Hardy-Weinberg Equilibrium formula. Demonstrate an understanding of cell structure and functions. Use common lab and anthropometric equipment such as a compound microscope and calipers. Discuss primate evolution, and compare and contrast members of the Primate order in terms of structure, behavior, and phylogeny. Classify hominid species based upon selected traits such as anatomical changes associated with bipedalism, changes in the size and structure of the brain, and the development of culture. Locate and describe the major bones of the human skeleton, and identify characteristics of human skeletons or skulls such as gender, age, and ancestry. Discuss current research in genome analysis of various hominid populations.

HNRS 2110G. The Present in the Past: Contemporary Issues and their Historical Roots**3 Credits (3)**

This course will take today's concerns, trends, and customs and contextualize them in the past, explaining their historical origins and development. As an example, we will examine the history of celebrity and how celebrities -- from Lord Byron to the Kardashians' made an impact on their contemporaries and the broader society of their time. This reading- and writing-intensive course will help students develop skills related to critical thinking, logical argumentation, and written and oral communication.

Learning Outcomes

1. Analyze and critically interpret primary sources and understand how others might interpret and use the same material in different ways;
2. Recognize and articulate the diversity of human experience across a range of historical periods and/or cultural perspectives.
3. Understand how historical experiences and memories have shaped contemporary societies;
4. Identify and understand the degree to which history has been used and misused in the past;
5. Draw on historical and/or cultural perspectives to evaluate any or all of the following: contemporary problems/issues, contemporary modes of expression, and contemporary thought.
6. Demonstrate improvement in their ability to read critically, think logically, and express themselves clearly in writing.

HNRS 2111. Successful Fellowship Writing**1 Credit (1)**

Provides scholars with hands-on skills to complete proposals for scholarships and fellowships, such as the Truman, Rhodes, Marshall, Goldwater, Udall, and others. Other skills include how to write resumes, develop general research skills, and find grant and foundation sources. For freshmen and sophomores. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Review of Prestigious International and National scholarships
2. Best practices in preparing competitive proposals and applications
3. Effective strategies for writing compelling Executive summaries, Resumes, and Personal Statements

HNRS 2114G. Music in Time and Space**3 Credits (3)**

Introduction to all forms of Music. Through our auditory senses and intellectual faculties music is an ideal means for intelligent and humanistic examination of peoples and cultures, and for the enhancement of life. Types of music covered include classical, jazz, rock and roll, and world music. Music videos, live in-class performances, evening concerts, and lectures will be used as a basis for discussions and research. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. Analyze and critically interpret significant primary texts and/or works of art (this includes fine art, literature, music, theatre, and film).
2. Compare art forms, modes of thought and expression, and processes across a range of historical periods and/or structures (such as political, geographic, social, cultural, religious, intellectual).
3. Recognize and articulate the diversity of human experience across a range of historical periods and/or cultural perspectives.
4. Draw on historical and/or cultural perspectives to evaluate all of the following: contemporary problems/issues, contemporary modes of expression, and contemporary thought

HNRS 2115G. Encounters with Art**3 Credits (3)**

A multicultural examination of the principles and philosophies of the visual arts and the ideas expressed through them. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Articulate the relationship of art to the human experience
2. Apply the vocabulary of art to critical writings and discussions
3. Interpret art works within cultural, social, personal and historical contexts

HNRS 2116G. Earth, Time and Life**4 Credits (3+3P)**

Covers how the earth's materials form, processes involved in changing the earth's configuration, and extent of people's dependence upon the earth's resources. Includes mineral and energy resources, development of landscapes, environmental problems, evolution of the earth and life forms. May be taken in place of GEOL 1110. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Gain a general understanding of geology and the geological processes that have been occurring throughout Earth's history.
2. Learn about some of the common minerals and rocks that are the building blocks to geology and the rock cycle.
3. Investigate the processes associated with each rock type (e.g., volcanoes, faults, depositional processes, etc.) and as well as potential geologic hazards (e.g., volcanic eruptions, earthquakes, flooding, etc.).
4. Recognize and identify common minerals and rocks and understand the basic processes and conditions responsible for their formation and occurrence.
5. Comprehensively understand how the internal and external parts of the Earth have functioned throughout geologic time.

HNRS 2117G. The World of the Renaissance: Discovering the Modern**3 Credits (3)**

An introduction to the literature and thought of Renaissance Europe. Humanism and the Reformation will be approached through the intensive study of major writers such as Petrarch, Machiavelli, Luther, Erasmus, Montaigne, and Shakespeare. Restricted to Las Cruces campus only. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Analyze and critically interpret significant primary texts and/or works of fine art, literature, philosophy, and theatre from the early modern period;
2. Locate art forms, modes of thought and expression, and processes from the early modern period in historical and/or cultural context and compare them to those of other time periods;
3. Demonstrate an understanding of how early modern historical and/or cultural perspectives and key
4. technological developments contributed to the development of contemporary thought and modes of expression;
5. Recognize and articulate the diversity of human experience across historical periods and/or cultural perspectives;
6. Demonstrate skill in working with relevant secondary resources and research tools to develop a class

HNRS 2120G. Foundations of Western Culture**3 Credits (3)**

Critical reading of seminal texts relating to the foundations of culture and values in Western civilization, from ancient Greece to about 1700. Focus on the development of concepts of nature, human nature, and the state. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Students will enhance abilities to quickly read, comprehend, and evaluate lengthy, complex texts to extract their fundamental arguments.
2. Students will improve critical thinking by grappling with ethical issues about the rights of individuals versus societies.
3. Students will use historical analysis to contextualize current social, political, geographic, and economic issues and how the foundations continue to affect contemporary society.

HNRS 2130G. Shakespeare on Film**3 Credits (3)**

How do Shakespeare's plays continue to speak to us through the medium of film? Written in a time of rapid social change, Shakespeare's plays invited audiences to think critically about the relationship between the self and others and to question conventions. Performances of Shakespeare have long been used to call out social injustice, from western anti-Semitism prior to World War II (*The Merchant of Venice*), to civil rights-era white supremacy in the US and apartheid in South African (*Othello*), and authoritarianism in the Arab Spring (*Richard III*). This course focuses on post-1980 Hollywood film versions of Shakespeare's plays and a few prior landmark adaptations around the world, examining how they use Shakespeare as a medium for debate and even a catalyst for social change.

Learning Outcomes

1. Demonstrate critical thinking by identifying issues and problems in the film adaptation of Shakespeare;
2. Engage in intercultural reasoning and develop intercultural competence and historical consciousness in analyzing film adaptations from the US, Europe, and Asia;
3. Engage with questions of personal and social responsibility as explored in Shakespeare's plays and modern film adaptations;
4. Conduct effective research on a relevant topic, evaluating the validity and authority of secondary sources, synthesizing ideas, and drawing reasonable conclusions;
5. Present independent research in collaboration with other student researchers and reflect on this teamwork experience

HNRS 2140G. Plato and the Discovery of Philosophy**3 Credits (3)**

Examines arguments and theories found in the Platonic dialogues with a view to determining the nature and value of philosophy both from Plato's point of view and absolutely. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Students will evaluate a number of Plato's dialogues to understand his doctrines and arguments.
2. Students will use their understanding to further evaluate why his philosophies have remained influential in modern, Western society and beyond.
3. Students will develop well-formulated, compelling arguments from philosophical texts.

HNRS 2141G. Bamboo and Silk: The Fabric of Chinese Literature**3 Credits (3)**

Introductory survey of traditional and modern Chinese prose and poetry in translation with emphasis on genre, theme, and social/historical context. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Students will acquire extensive knowledge of one of the world's oldest and richest literary traditions.
2. Not incidentally, students will also gain knowledge of China's history and philosophical traditions.
3. As this class is based on reading, writing, and discussion, students will hone their interpretive and
4. expressive skills.

HNRS 2145G. Celtic Literature**3 Credits (3)**

This course provides an overview of the most important early literary works of the so-called Celtic nations, principally Ireland and Wales, from a literary and historical approach. This literature stems from the period 600-1200 and ends with the development of the Romances under influence from the French

Learning Outcomes

1. Students will learn the concept of the international folk tale,
2. Students will learn about the history of the Celts
3. Students will learn about the concept of Celtic nations' formed during the 19th Century.
4. Students will enhance critical thinking skills.
5. Students will enhance written and oral communication.

HNRS 2160G. New Testament as Literature**3 Credits (3)**

Literature of the New Testament examined from a literary perspective. Emphasis on translation history of the New Testament, generic features of gospel, epistle and apocalypse, precedent literary models, problems of authorship, classification of New Testament texts. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Students will hone critical thinking skills by analyzing arguments and controversies surrounding the roots of Christianity.
2. Students will discern and discuss the viability of both literary and historical sources with debated authorship, dating, and interdependency.
3. Students will practice interpersonal navigation and maintaining an academic environment of respect as they discuss a number of topics that can be considered controversial or subjective.

HNRS 2161G. Window of Humanity**3 Credits (3)**

Anthropology is the most humanistic of the sciences, and the most scientific of the humanities. This course will use anthropological perspectives to examine the human experience from our earliest origins, through the experiences of contemporary societies. We will gain insights into the influence of both culture and biology on shaping our shared human universals, and on the many ways in which human groups are diverse. Restricted to Las Cruces campus only. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Explain the concepts that define Anthropology (along with its subfields) as a specific research discipline.
2. Possess a growing vocabulary for anthropology, cultural study, ethnographic research and writing that will empower them as they continue with their degrees and professional careers.
3. Recognize how Anthropological concepts, terms, and methods are valuable for present-day concerns and how these tools can be used to engage life and the world at large.

HNRS 2165. Humanities in the 21st Century**3 Credits (3)**

An exploration of the humanities, of their intrinsic and extrinsic values, and of the skills and habits of mind they cultivate.

Learning Outcomes

1. Articulate what the humanities are and what role they have played in education throughout the ages
2. Articulate examples of the intrinsic value of the humanities
3. Articulate the skills and habits of thought in at least one chosen discipline in the humanities
4. Articulate common misconceptions about university majors and reframe the common misconceptions
5. Create at least three employment scenarios based on your skills and interests
6. Exercise divergent thinking with regards to future career paths

HNRS 2170G. The Human Mind**3 Credits (3)**

The primary course objective is to develop an appreciation of the variety and complexity of problems that are solved by the human mind. The course explores how problems are solved by a combined computational analysis (computational theory of mind), and evolutionary (evolution by natural selection) perspective. The mind is what the brain does (i.e. information processing) and the brain is a computational device that is a product of evolution by natural selection. Note that this is not a neuroscience course, we will be focusing on the mind (what the brain does) rather than on the brain. Restricted to Las Cruces campus only.

Learning Outcomes

1. Enhance written and oral communication
2. Stimulate critical thinking and learn to weigh scientific evidence
3. Challenge students to make ethical decisions and promote personal and social responsibility

HNRS 2171G. The Worlds of Arthur**3 Credits (3)**

Arthurian texts and traditions from medieval chronicles to contemporary literature. Emphasis on both the continuities of the Arthurian tradition and the diversity of genres, media, and cultures that have given expression to the legend. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. Students will examine how texts and narratives, even with fictional implications, still held psychological, social, cultural, and religious sway within developed societies throughout history.
2. Students will synthesize information from an array of both primary and secondary sources to measure the cultural significance King Arthur holds in contemporary societies.
3. Students will extrapolate how a society's values at any point in history will affect the transference of mythos, just as a myth transmits the values of that society.

HNRS 2172G. Archaeology: Search for the Past**3 Credits (3)**

A critical evaluation of various approaches to understanding prehistory and history. The methods and theories of legitimate archaeology are contrasted with fantastic claims that invoke extraterrestrials, global catastrophes, transoceanic voyages, and extra-sensory perception. May be repeated up to 3 credits. Restricted to Las Cruces campus only. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Identify, describe, and explain how human lifeways changed in diverse communities in different parts of the globe.
2. Select and use relevant archaeological evidence to articulate how people's beliefs and values were influenced by politics, geography, economics, culture, biology, history, and social institutions in the past.
3. Analyze the significance of archaeological artifacts in context and explain their relevance to understanding relations among individuals, their society, and the environment.
4. Evaluate how practices in research, conservation, and tourism to archaeological sites promote ethical stewardship of non-renewable archaeological resources.
5. Design a study tour to archaeological sites that will address a key question or argument in prehistory and promote historic/archaeological preservation.

HNRS 2173G. Middle Ages**3 Credits (3)**

Intensive, interdisciplinary introduction to the thought and culture of medieval Europe. Core texts will include works by St. Augustine, Marie de France, and Dante, as well as anonymous works such as Sir Gawain and the Green Knight, all supplemented by study of medieval art, architecture, philosophy, and social history. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Students will hone critical reading skills as they read through a wealth of texts, by prioritizing attention to details and how it affects the overall narrative.
2. Students will recognize how the social, religious, and political environments of the medieval era shaped contemporary society in affected regions beyond Europe.
3. Students will employ comparative analysis skills as they examine how Islamic culture might have influenced poetry and music in medieval Europe.

HNRS 2174G. American Politics in a Changing World**3 Credits (3)**

American politics and policies examined from a historical and global perspective. Philosophical underpinnings of American national government, the structure of government based on that philosophy, and the practical implications of both the philosophical and structural base. How American government influences and is influenced by the world community. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Students will enhance their understanding of the operation of major American political institutions and processes.
2. Students will investigate how the uniquely American form of constitutional governance has sought to adapt to changing historical and cultural conditions.
3. Students will practice interpersonal navigation and maintaining an academic environment of respect as they discuss a number of topics that can be considered controversial or subjective.

HNRS 2175G. Introduction to Communications Honors**3 Credits (3)**

Study and practice of interpersonal, small group, and presentational skills essential to effective social, business, and professional interaction. 5 or higher
Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Analyze and evaluate oral and written communication in terms of situation, audience, purpose, aesthetics, and diverse points of view.
2. Express a primary purpose in a compelling statement and order supporting points logically and convincingly.
3. Use effective rhetorical strategies to persuade, inform and engage.
4. Employ writing and/or speaking processes such as planning, collaborating, organizing, composing, revising editing to create presentations using correct diction, syntax, grammar and mechanics.
5. Integrate research correctly and ethically from credible sources to support the primary purpose of a communication.
6. Engage in reasoned civil discourse while recognizing the distinctions among opinions, facts, and inferences.

HNRS 2176. Acting for Everyone**3 Credits (3)**

To provide fundamental training in acting techniques, including stage voice and movement, improvisation, ensemble building, characterization, emotion exploration and basic performance analysis. The course will provide a correlation between theatre skills and everyday "life" skills and seek to encourage an appreciation for the art of theatre.

Learning Outcomes

1. Improve effectiveness of oral communication.
2. Enhance creativity and appreciation of theatre.
3. Build confidence and expressiveness.

HNRS 2178G. Theatre: Beginnings to Broadway**3 Credits (3)**

Intercultural and historical overview of live theatre production and performance, including history, literature and professionals. Students attend and report on stage productions. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Distinguish and differentiate the characteristics of theatre from other art forms.
2. Describe the major components of a theatrical event.
3. Describe the functions of various theatre personnel.
4. Define specific terms relating to the study of theatre.
5. List and describe the parts of a play.
6. Define the different parts of plot.
7. Critique plays
8. Describe the characteristics of theatre in the different periods of history.
9. Develop an appreciation for theatre as an art form and a reflection of society

HNRS 2180G. Citizen and State Great Political Issues**3 Credits (3)**

The fundamental questions of politics: why and how political societies are organized, what values they express, and how well they satisfy those normative goals and the differing conceptions of citizenship, representation, and freedom. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Students will investigate the fluid state of American politics by discerning the decisions and policies of a selection of presidents.
2. Students will investigate the complex operations behind a representative democracy.
3. Students will examine how the sociopolitical environment surrounding a president influences his policies, and how a president's policies affect the broader society.
4. Students will assess and measure how politics can be affected by active and engaged citizens

HNRS 2185G. Democracies, Despots and Daily Life**3 Credits (3)**

This course will offer students the chance to read firsthand accounts of ordinary citizens' lives under different political systems, from the earliest age to the present day. This reading- and writing-intensive course will help students develop skills related to critical thinking, logical argumentation, and written and oral communication.

Learning Outcomes

1. Analyze and critically interpret primary sources and understand how others might interpret and use the same material in different ways;
2. Recognize and articulate the diversity of human experience across a range of historical periods and/or cultural perspectives.
3. Understand how historical experiences and memories have shaped contemporary societies;
4. Identify and understand the degree to which history has been used and misused in the past;
5. Draw on historical and/or cultural perspectives to evaluate any or all of the following: contemporary problems/issues, contemporary modes of expression, and contemporary thought.
6. Demonstrate improvement in their ability to read critically, think logically, and express themselves clearly in writing.

HNRS 2190G. Claiming a Multiracial Past**3 Credits (3)**

Survey of history of the United States in the nineteenth and twentieth centuries, with an emphasis on multicultural social and cultural history. Focus on understanding American history from the point of view of dispossessed, impoverished, and disenfranchised Americans who have fought to claim both their rights as Americans and American past. 5 or higher

Prerequisite(s): An ACT score of 26 or higher; or a combination of an ACT score of 24-25 with a High School GPA of 3.75; or a NMSU cumulative GPA of 3.

Learning Outcomes

1. Students will contextualize the current state of American "being" by focusing on the multicultural-social and cultural history of the U.S. in the nineteenth and twentieth centuries.
2. Students will hone public speaking and presentation skills through classroom discussions and activities.
3. Students will practice interpersonal navigation and maintaining an academic environment of respect as they discuss a number of topics that can be considered controversial or subjective.

HNRS 2996. Special Topics**1-3 Credits (1-3)**

Special course offerings, with unique titles listed in Schedule of Classes. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

HNRS 304V. Dilemmas of War and Peace**3 Credits (3)**

A multi-disciplinary introduction to war, peace, and world order studies. The origins of war and the foundations of peace are explored in the context of a rapidly changing world order.

HNRS 305V. Is Fake News Real: Journalism, Community, and Mass Communications**3 Credits (3)**

Overview of how technology, money, politics, and human desire have changed journalism since 1963. Explores role of journalism in news dissemination, influencing opinion, and political behavior. Course includes guest lectures from regional journalists and media experts.

HNRS 306V. Science, Ethics and Society**3 Credits (3)**

Investigation of the ethical issues related to scientific investigation and the ethical implications of scientific discoveries for society. Emphasis on discussion of case studies about specific ethical issues in science, and readings by both scientists and non-scientists.

HNRS 313. Research and Writing**3 Credits (3)**

Workshop format designed to prepare students for research and writing associated with production of an honors thesis or a major research assignment. Does not count for general education or honors certification credit.

HNRS 314. Successful Fellowship Writing**1 Credit (1)**

Provides scholars with hands-on skills to complete proposals for scholarships and fellowships, such as the Truman, Rhodes, Marshall, Goldwater, Udall, and others. Other skills include how to write resumes, develop general research skills, and find grant and foundation sources.

HNRS 317V. Cultural Lessons on Nazism**3 Credits (3)**

Examination of the values and cultural manifestations of fascism in the period 1918-45 with multidisciplinary emphasis on European forms of fascism, particularly German Nazism. Course features a survey of literary, dramatic, poetic, cinematic, and artistic treatments of human behavior leading up to fascism, living under fascist rule, and coming to grips with the consequences of war and genocide.

HNRS 318V. The World of Cinema**3 Credits (3)**

Appreciation of the art of motion pictures as world-wide medium specific to national cultures. Refinement of cinematic literacy and critical viewing skills. Historical and thematic overview emphasizes collaborative nature of medium in various genres from 1895 to present. Selected films from different periods and different countries. Substantial library research projects.

HNRS 321V. Agriculture in an Interconnected World**3 Credits (3)**

Study of the impact of agriculture on cultural and social systems, with special emphasis on twentieth century urban development.

HNRS 324V. Science and the Arts: Theatre and Story**3 Credits (3)**

This course examines present day relations between the sciences and the representation and communication of science, especially in connection with theatre, narrative fiction, and autobiography. Crosslisted with: THEA 329.

HNRS 326V. Art and Mythology**3 Credits (3)**

Mythological figures, past and present, in the visual arts. Through iconographical studies (attributes and symbols), trace the development of visual traditions that evolved from the literary sources of classical Mediterranean mythology.

HNRS 328V. Rock History: 20th Century Popular Music**3 Credits (3)**

Evolution of popular music in the 20th Century. Examines the history of popular music conventions, influences, and breakthroughs through the 20th Century. Topics include the originations of major music styles and their evolution as cultivated by key artists, scientific advancements, and sociopolitical change, contextualized within the contemporaneous history. Of particular concern are the influences of groundbreaking artists; the effect of evolving playback electronics, recording devices, and musical instruments; and the interplay between music and economic depression, war, civil rights, sexual revolution, and other sociopolitical events.

HNRS 335V. Legal Issues in Modern Society**3 Credits (3)**

Case study approach to contemporary legal problems involving environment, consumer protection, international law, corporate responsibility.

HNRS 336V. Testimonios from the Borderlands**3 Credits (3)**

This course is about the testimonies (testimonios) and autobiographical writings about and by Latinas in the United States. Life stories are told through many forms: "testimonios," memoirs, autobiographies and autobiographical fiction, oral histories and short stories, poetry and poetic prose pieces, essays, and audio-stories. The course focuses on testimonios as method, epistemology, and pedagogy. Among the questions we will examine will be those concerning knowledge production, sexual politics, the mind-body-spirit connection, voice, representation, and truth. May be repeated up to 3 credits.

HNRS 340V. Indian Law and Policy**3 Credits (3)**

Explores the principles, doctrines, and texts governing the legal relations between the United States and Indian tribes, the history of federal Indian law and policy, tribal property, treaty rights and sovereignty, congressional plenary power, the trust doctrine, jurisdiction in Indian country, and tribal government. Topic specifically examined in the course include tribal lawmaking powers, gaming and economic development in Indian country, protection of Indian religious rights and cultural property, water rights, fishing, hunting and other treaty-based rights.

HNRS 341V. The Old Testament as Literature**3 Credits (3)**

Old Testament surveys a portion of the thirty-nine canonical books of the Old Testament from a literary approach, centered on the so-called historical-critical method that developed in the 19th C under such figures as Julius Wellhausen. Higher criticism of the texts, their sources, authorship, dating and interdependency has led to deepened insights as well as scholarly conflict. In addition, we will examine several apocryphal books that have continuing importance in our understanding of Old Testament. We will read the Old Testament along with an introduction and some supplementary materials.

HNRS 347V. World Dance**3 Credits (3)**

Examination of dance forms from a cross-cultural perspective, focusing on the role of dance in different cultures around the globe. Same as DANC 3510V with differential assignments for Honors students.

HNRS 348V. Comparative Mythology: Myth, Ritual, and the Life Cycle**3 Credits (3)**

Exploration of the central myths of several religious traditions and investigation of how each, through ritual, has given meaning to key moments in the journey of the individual through life.

HNRS 349V. Islam and the West: Cultural Contacts, Conflicts, and Exchanges**3 Credits (3)**

This course examines interactions, encounters and cross-fertilization between the Islamic world and the West from the 7th -21st century. It begins with the origins of Islam and its relationship to Judaism and Christianity and ends in the post 9/11 present, an era some characterize as dominated by a "clash of civilizations."

HNRS 353V. Justice without Prejudice**3 Credits (3)**

Exploration of central questions about race, ethnicity, and justice. Students will learn to argue persuasively from different perspectives, both orally and in writing.

HNRS 362V. Native American Philosophy and Spirituality**3 Credits (3)**

Survey of philosophical traditions of Indigenous peoples of the Western Hemisphere. This course examines various forms of spiritual expression which encompasses art, dance, music, political/social activism, and the relationship to land. This course looks at present-day spiritual issues and on-going practices in Native America.

HNRS 370V. Design: The Creative Act**3 Credits (3)**

Explores the nature of design and what it means to design in various diverse media. Included are creative efforts in writing, art, music, and technology. Commonalities and differences are considered.

HNRS 371V. Paris: Beyond the Eiffel Tower**3 Credits (3+3P)**

This interdisciplinary course focuses on the evolution of the city of Paris from its earliest beginnings in the fifth century to modern times. Through the use of historical, political, sociological and artistic texts and films, we will explore the various narratives which emerge from the built environment of Paris as well as its mythic status as the "City of Light and Romance" and "Capital of Revolution., Modernity and Art."

HNRS 374V. The European City: History and Culture**3 Credits (3)**

Historical overview of development, growth, and culture of European cities.

HNRS 378V. Technology and Policy**3 Credits (3)**

Study of the processes through which society sets goals for science and technology, of the allocation of resources needed to achieve these goals, and of the obligations and conflicts that develop as the goals are realized. International comparisons of public policies.

HNRS 379V. Literature as Film**3 Credits (3)**

Considers the various results of literary adaptations to the screen. Participants will read literary texts written or translated into English and watch films from various countries as illustrations of this process.

HNRS 381V. Economic Development of Latin America**3 Credits (3)**

Economic analysis of problems related to development in Latin America, including the agrarian problem, debt and austerity programs, industrialization, inflation and unemployment, the drug trade, U.S.-Latin American relations, development strategies. Also individual countries' problems.

Prerequisite(s): 3.2 cumulative GPA.

HNRS 384V. Ethical Decisions in Organizations**3 Credits (3)**

Examines ethical decisions in business, non-profit, and governmental organizations from a managerial perspective. Topics include ethical principles, recognition and application of principle-based ethics, stakeholders in ethical decisions, and analysis of the consistency between organizational decisions and ethical principles.

HNRS 387V. Comparative Perspectives on Women**3 Credits (3)**

The history, antecedents, and consequences of sex and gender systems around the world from the perspective of sociology, anthropology, and psychology.

HNRS 388V. Leadership and Society**3 Credits (3)**

Exploration of the multifaceted nature of leadership in modern society through readings and seminar discussion.

HNRS 390V. Worlds of Buddhism**3 Credits (3)**

This course is an introduction to Buddhism and its contribution to the formation of (East) Asian cultures. It provides students with Buddhist and (East) Asian "case studies" - i.e., examples of the ways in which Buddhism has influenced, and has been influenced by, the region's various cultural and social milieus over time. The course is designed to offer opportunities to critically reflect on Buddhism as a transformative philosophical, cultural and individual system. May be repeated up to 3 credits.

HNRS 394V. Southwestern and Border Literature**3 Credits (3)**

Introduction to the culturally diverse literature of the American Southwest and borderlands region. Class analyzes evolution of the Southwest concept and considers degree to which the existence of a borderlands culture is manifest in literature.

Prerequisite: honors eligibility.

HNRS 400. Honors Thesis**3 Credits (3)**

Independent-study research and writing project to be carried out under the supervision of a faculty member.

Prerequisite: consent of instructor.

HNRS 410. Honors Internship**3-6 Credits**

Assignments in departments to be supervised by faculty in the area. A cumulative 3.5 GPA is required. May be repeated up to 12 credits. Consent of Instructor required.

HNRS 411V. Great Theorems: The Art of Mathematics**3 Credits (3)**

Same as MATH 411V.

HNRS 412. Medical College Admission Test Preparation**3 Credits (3)**

This course prepares students to optimize their performance on the Medical College Admission Test that is required for admission to medical schools throughout North America. This course should be taken only after completing requisite courses in biology, chemistry and biochemistry, physics, health sciences, and appropriate social science electives.

Prerequisite(s): Completion of basic courses in STEM, health sciences and behavioral sciences.

HNRS 413. Medical Shadowing**1-3 Credits (1-3)**

For students who are shadowing medical professionals this course will provide academic credit for completion of this experience. May be repeated up to 6 credits.

Prerequisite(s): Completion of 57 credits, of any subject.

HNRS 420. Independent Studies**1-3 Credits**

Directed, individual studies and projects.

Prerequisites: consent of instructor and honors eligibility.

HNRS 421. Special Topics**1-3 Credits**

Special course offerings, with specific titles listed in Schedule of Classes. May be repeated up to 6 credits.

HNRS 422. Directed Research**3 Credits (3)**

Individual research projects supervised by faculty advisers. Consent of instructor required.

HNRS 425V. Magic and Witchcraft in Medieval and Renaissance**3 Credits (3)**

Examines the history of popular and scientific beliefs about magic and witchcraft in medieval and early modern Europe. Topics include the origins of the occult sciences in the West, Arabic sources of medieval magic, the occult sciences in scholasticism, witchcraft and medieval theology, the witch hunts of the sixteenth and seventeenth centuries, and the decline of belief in magic and witchcraft in the seventeenth century. Of particular concern are the boundaries that defined and separated magic, science, and religion in western thought from late antiquity through the Scientific Revolution. Same as HIST 425 with differential assignments for HNRS 425V students. Crosslisted with: HIST 425.

HNRS 450V. The Sundt Honors Seminar**3 Credits (3)**

The Sundt Honors Seminar is a unique, experience-based, interdisciplinary seminar developed and taught by the holder of the Sundt Honors Professorship for the year. The subject of the course will vary according to the discipline of the Sundt Professor. The course may include a travel experience related to the seminar topic, hosting of outside specialists, or other unique activity. Open to students by application. Students selected for the course are named Sundt Scholars.

Prerequisite(s): ENGL 1110G or equivalent.

HNRS 521. Special Topics**3 Credits (3)**

Graduate level to be cross-listed with HNRS 421 Special Topics at the undergraduate level.

HORT-HORTICULTURE

HORT 1115G. Introductory Plant Science**4 Credits (3+2P)**

Introduction to the physical, biological, and chemical principles underlying plant growth and development in managed ecosystems. In the laboratory portion of the class, students perform experiments demonstrating the principles covered in lecture. The course uses economic plants and agriculturally relevant ecosystems to demonstrate basic principles. Appropriate for nonscience majors. Same as AGRO 1110G.

Learning Outcomes

1. Describe the role plants play in everyday lives
2. Introduce career opportunities in plant and soil sciences, and related fields
3. Define plants through the concepts of plant structure and anatomy
4. Introduce the wide variety of plants cultivated throughout the world
5. Describe how plants work (growth, reproduction, physiology, and soil)
6. Describe how plants are manipulated to feed, clothe and entertain the world

HORT 2110. Ornamental Plants I**4 Credits (2+3P)**

Covers identification, botanical characteristics, culture, and landscape uses of woody plants. Emphasis on deciduous trees, native shrubs, and evergreens.

Learning Outcomes

1. Given 35 ornamental plants selected from the course's plant list, 100% of students will be expected to correctly identify the genus, species, and common names of the plants with 70% accuracy.
2. Given plants selected from the course's plant list, 100% students will be expected to identify to
3. landscape use of those plants with 85% accuracy.

HORT 2120. Ornamental Plants II**4 Credits (2+3P)**

Identification, botanical characteristics, culture, and landscape uses of woody plants. Emphasis on flowering trees, cacti, and members of the pea and rose families.

Learning Outcomes

1. Given 35 ornamental plants selected from the course's plant list, 100% of students will be expected to correctly identify the genus, species, and common names of the plants with 70% accuracy.
2. Given plants selected from the course's plant list, 100% students will be expected to identify to landscape use of those plants with 85% accuracy.

HORT 2130. Floral Quality Evaluation and Design**2 Credits (1+2P)**

Critical hands-on evaluation of the quality of cut and potted floral and tropical foliage crops, their specific merits and faults, and fundamentals of floral design.

Learning Outcomes

1. Identify common floriculture crops, or know resourcing to help identify the crop.
2. Evaluate quality (merit and fault) of common floriculture crops, based on industry standards and merit. Pi Alpha Xi and American Floral Endowment standards will be used for the purpose of this class.
3. Have a basic understanding of the floriculture industry, and identify career pathways within the industry.
4. Know, understand, creatively interpret, and execute basic principles of design in regards to floral design.
5. Use interpersonal communication, problem solving, basic math, and marketing during cash and carry "lab" time (flower sales) in developing job ready skills in floristry.
6. Layer principles of design, marketing, sales, and time management to create floral art in real-world scenarios.

HORT 2160. Plant Propagation**3 Credits (2+2P)**

Practical methods of propagating horticultural plants by seed, cuttings, layering, grafting, division and tissue culture. Examination of relevant physiological processes involved with successful plant propagation techniques. Same as AGRO 2160.

Learning Outcomes

1. Practical methods of propagating plants by seed, cuttings, layering, grafting, division, and tissue culture through experiential, "hands-on" laboratories.
2. Relevant physiological principles involved in propagating horticultural plants through lecture discussions and readings.

HORT 2990. Floriculture Field Practicum**1 Credit (1)**

Participation as team member in the National Intercollegiate Floral Quality Evaluation and Design Competition. Intensive week-long travel for competition, networking with industry, academia, and floriculture tours. May be repeated for a maximum of 3 credits.

Prerequisite(s): HORT 2130 or consent of instructor.

Learning Outcomes

1. Varies

HORT 2996. Special Topics**1-4 Credits**

Specific subjects and credits as announced. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.

Learning Outcomes

1. Varies

HORT 300. Special Topics**1-4 Credits**

Specific subjects as announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

HORT 302V. Forestry and Society**3 Credits (3)**

Global study of the development and use of forest resources for production of wood, fuel, fiber, and food products. Climatic, edaphic, cultural, and economic influences on forests of the world evaluated. Same as RGSC 302V.

HORT 305. Principles of Genetics**3 Credits (3)**

Covers fundamental principles of reproduction, variation, and heredity in plants and animals. Crosslisted with: AGRO 305, ANSC 305, BIOL 305 and GENE 305

Prerequisite(s): BIOL 2610G, BIOL 2110G and either CHEM 1215G or CHEM 1216.

HORT 307. Landscape Design**3 Credits (2+3P)**

Design elements, the design process, and contemporary planting design used in the design of residential and small commercial landscapes. Basic drafting, drawing, and landscape plan presentation techniques. Prerequisites : HORT 2110 or HORT 2120 or concurrent enrollment or consent of instructor.

HORT 310. Medicinal Herbs**3 Credits (3)**

Introduction to ethnobotany, including plant cultivation, extraction methods, and analysis of active chemistries.

HORT 315. Crop Physiology**3 Credits (3)**

Whole plant physiological processes as related to growth, development, yield, quality and post harvest physiology of crop plants within the environment of the crop community. Crosslisted with: AGRO 315

Prerequisite(s): EPWS/BIOL 314 or consent of instructor.

HORT 365. Principles of Crop Production**4 Credits (3+3P)**

Basic principles of crop production including environmental and physiological factors limiting production, plant nutrition and soil science, soil-water management, cropping systems and management, pest management, and economic factors influencing crop production. Crosslisted with: AGRO 365

Prerequisite(s): AGRO 1110G/HORT 1115G, CHEM 1215G or equivalent and MATH 1215 or equivalent.

HORT 377. Introduction to Turfgrass Management**4 Credits (3+3P)**

Establishment and maintenance of turfgrass with emphasis on seeding methods, soil and water management, mowing, disease insects and turfgrass varieties. Crosslisted with: AGRO 377

HORT 378. Turfgrass Science**4 Credits (3+3P)**

Introduction to the scientific fundamentals for turfgrass management cultural practices, pest management, rootzone construction and ecology.

Prerequisite(s): HORT 377 or consent of instructor.

HORT 391. Internship**1-6 Credits**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 6 credits toward a degree. Consent of instructor required. Graded: S/U. Crosslisted with: AGRO 391 and SOIL 391

HORT 447. Seminar**1 Credit (1)**

Organization, preparation, and presentation of current topics in agronomy, environmental sciences, horticulture, and soil science. Crosslisted with: AGRO 447, ENVS 447 and SOIL 447.

HORT 449. Special Problems**1-3 Credits**

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

HORT 450. Special Topics**1-4 Credits**

Specific subjects as announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.

HORT 462. Plant Breeding**3 Credits (3)**

Principles and practices involved with the genetic improvement of plants. May be repeated up to 3 credits.

Prerequisite(s): ANSC/AGRO/BIOL/HORT/GENE 305 or GENE 315 and GENE 320.

HORT 471. Plant Mineral Nutrition**3 Credits (3)**

Basic and applied aspects of plant requirements for soil-derived minerals and the processes whereby minerals are acquired, absorbed, translocated, and utilized throughout the plant. Same as AGRO/EPWS 471.

Prerequisite: EPWS/BIOL 314, or concurrent enrollment, or consent of instructor.

HORT 479. Advanced Turfgrass Science**3 Credits (3)**

Extensive reviews of turfgrass sciences including ecology, physiology, entomology, pathology, weed science, and soil science.

Prerequisite: HORT 378 or consent of instructor.

HORT 485. Vegetable Crop Management**4 Credits (3+2P)**

Physiological, environmental and cultural aspects of vegetable crop production. Corequisite(s): AGRO 365/HORT 365

HORT 488. Greenhouse Management**4 Credits (3+3P)**

Principles and practices involved in greenhouse structures and construction, site considerations, heating and cooling systems, greenhouse crop production techniques, sustainability practices. May be repeated up to 4 credits.

Prerequisite(s): HORT/AGRO 365 or consent of instructor.

HORT 492. Diagnosing Plant Disorders**3 Credits (2+3P)**

Systematic diagnosis of the physiological, pathological, and entomological causes of plant disorders. Same as EPWS 492 and AGRO 492.

Prerequisites: EPWS 303 and EPWS 310.

HORT 500. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes . Maximum of 4 credits per semester. No more than 9 credits toward a degree.

HORT 505. Research Orientation**4 Credits (3+2P)**

Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: AGRO 505, SOIL 505 and ENVS 505.

HORT 506. Plant Genetics**3 Credits (3)**

Advanced treatment of the principles of classical genetics and heredity with emphasis on the nature and action of the gene including molecular analysis. May be repeated up to 3 credits. Crosslisted with: AGRO 506, BCHE 341 recommended.

Prerequisite(s): AGRO 305/GENE 305/HORT 305/BIOL 305/ANSC 305 or consent of instructor.

HORT 515. Crop Physiology**3 Credits (3)**

Whole plant physiological processes as related to growth, development, yield, quality and post harvest physiology of crop plants within the environment of the crop community. Crosslisted with: AGRO 515

Prerequisite(s): EPWS/BIOL 314 or consent of instructor.

HORT 525. Scientific Writing How to be a Productive and Effective Writer**1-3 Credits (1-3)**

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review Crosslisted with: AGRO 525, AGRO 625, EPWS 525, SOIL 625 and SOIL 525.

HORT 590. Graduate Seminar**1 Credit (1)**

Current research discussions presented by masters level graduate students. Not more than one credit toward the degree. Same as AGRO/SOIL 590. Crosslisted with: AGRO 590 and SOIL 590.

HORT 595. Internship**1-6 Credits**

Supervised professional on-the-job learning experience. Limited to Master of Horticulture or Plant & Environmental Science candidates. Not more than 6 credits toward the degree.

HORT 596. Masters Proposal**1 Credit (1)**

Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 596, ENVS 596, GENE 596 and SOIL 596. Restricted to: Masters HORT; Masters PLEN majors.

Prerequisite(s): Master level graduate students.

HORT 597. University Teaching Experience**1-3 Credits (1-3)**

Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ENVS course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Crosslisted with: AGRO 597 and SOIL 597

HORT 598. Special Research Programs**1-6 Credits**

Individual investigations, either analytical or experimental. Maximum of 6 credits per semester. No more than 9 credits toward a degree.

Prerequisite: consent of instructor.

HORT 599. Master's Thesis**15 Credits**

Thesis.

HORT 609. Breeding for Plant Disease Resistance**3 Credits (3)**

A practically-oriented course of lectures and discussion on concepts and principles of breeding for disease and pest resistance. Labs familiarize students with preparation, quantification, and application of inoculum to hosts. Same as AGRO 609.

HORT 610. Advanced Crop Breeding**4 Credits (3+3P)**

Applications of breeding principles to crop improvement. Emphasis on breeding methodologies using modern techniques, including biotechnology. Same as AGRO 610.

Prerequisite: AGRO 462 or consent of instructor.

HORT 620. Instrumentation in Agronomy**3 Credits (3)**

Use of instruments used in research in all areas of agronomy including gas chromatography, high performance liquid chromatography, neutron soil moisture probe, and other instruments. Same as AGRO/SOIL 620.

HORT 625. Scientific Writing- How to be a Productive and Effective Writer**1-3 Credits (1-3)**

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Students in the 625 course will be required to perform additional research than those students in the 525 cross-listing

Crosslisted with: AGRO 525, EPWS 525, HORT 525 and SOIL 525.

HORT 696. Doctors Proposal**1 Credit (1)**

Current research proposal written by PhD level graduate students. Consent of Instructor required. Crosslisted with: AGRO 696, ENVS 696 and SOIL 696. Restricted to: Doctors PLEN majors.

Prerequisite(s): PhD level graduate students.

HORT 697. University Teaching Experience**1-3 Credits (1-3)**

Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ENVS course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Crosslisted with: AGRO 697 and SOIL 697

HOST-HOSPITALITY AND TOURISM

HOST 155. Special Topics**1-3 Credits (1-3)**

Specific subjects to be announced in the Schedule of Classes. Restricted to: Community Colleges only.

HOST 201. Introduction to Hospitality Industry**3 Credits (3)**

Overview of hospitality industry; organization and operation of lodging, food and beverage, and travel and tourism segments; focus on career opportunities and future trends of hospitality industry. Restricted to: Community College campuses only.

HOST 202. Front Office Operations**3 Credits (3)**

Hotel/motel front office procedures detailing flow of business, beginning with reservations and extending to the night audit process. Restricted to: Community College campuses only.

HOST 203. Hospitality Operations Cost Control**3 Credits (3)**

Management of Food & Beverage facilities using cost control techniques. Functional training in menu analysis and development with all phases of product flow through a Food & Beverage organization explored. Restricted to: Community Colleges only.

HOST 204. Promotion of Hospitality Services**3 Credits (3)**

Organization of hotel marketing functions; developing a marketing plan to sell the varied services of the hotel/motel property. Restricted to: Community College campuses only.

HOST 205. Housekeeping, Maintenance, and Security**3 Credits (3)**

Function of housekeeping departments, including personnel, sanitation, maintenance, and materials. A survey of security procedures to include guest protection and internal security of hotel/motel assets. Restricted to: Community College campuses only.

HOST 206. Travel and Tourism Operations**3 Credits (3)**

Transportation, wholesale and retail operations, attractions, the traveler, tourism development, and operational characteristics of tourism business. Restricted to: Community College campuses only.

HOST 207. Customer Service for the Hospitality Industry**3 Credits (3)**

Concepts of service and the customer, integrating the need for service quality, and the continuing efforts to maximize returns for the operation. Classic service styles as well as more modern service techniques are covered. Students gain in-depth managerial knowledge, planning skills, and hands-on techniques for consistently delivering quality and service in a variety of operations. Restricted to: Community College campuses only.

HOST 208. Hospitality Supervision**3 Credits (3)**

Strategies for directing, leading, managing change and resolving conflict. Prepares students to meet expectations of management, guests, employees, and governmental agencies. Restricted to: Community College campuses only.

HOST 209. Managerial Accounting for Hospitality**3 Credits (3)**

Prepares students to make effective business decisions based on financial report information; forecasting, budgeting, cost analysis. Restricted to: Community College campuses only.

Prerequisite(s): BOT 120 or ACCT 2110.

HOST 210. Catering and Banquet Operations**3 Credits (3)**

Teaches the basics of catering and banquet operations, including computer coordination, planning, set up, service, and completion. Restricted to Community Colleges campuses only.

HOST 214. Purchasing and Kitchen Management**3 Credits (3)**

Technical purchasing concepts, product selection, and specifications. Safety and sanitation as they relate to food service establishments. Prepares student for work with HACCP programs. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): HOST 203.

HOST 216. Event, Conference and Convention Operations**3 Credits (3)**

The ability to successfully plan, organize, arrange, and execute special events is critical to the success of many hospitality organizations. This course gives the student a grounding in the skills necessary to achieve success in this area. A variety of events are discussed and the similarities and differences with conferences and conventions are explored. Students are taught to organize and plan events of varying type and durations. Sales, logistics, and organizing skills are emphasized. Restricted to: Community College campuses only.

HOST 219. Safety, Security and Sanitation in Hospitality Operations**3 Credits (3)**

It is the responsibility of the manager to provide appropriate security, sanitation, and safety precautions in hospitality operations. Preparation for internal and external disasters is an important task for the Hospitality Manager. This course uses the National Restaurant Association ServSafe® training material. Restricted to: Community College campuses only.

HOST 221. Internship I**1-3 Credits (1-3)**

Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEHS, HOST majors. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

HOST 222. Cooperative Experience II**3 Credits (3)**

Continuation of HOST 221. Restricted to majors. Graded: S/U. Restricted to: Community College campuses only. Restricted to HOST majors.

Prerequisite(s): HOST 221.

HOST 239. Introduction to Hotel Management**3 Credits (3)**

This course covers basic management functions in hotels, resorts, Boutique Hotels, Bed & Breakfast establishments, and other lodging operations. All aspects of the operation are covered including guest management, operations, and sales and marketing. Restricted to: Branch campuses only.

HOST 255. Special Topics**3 Credits (3)**

Specific subjects to be announced in the Schedule of Classes. May be repeated up to 9 credits. Restricted to Community Colleges campuses only.

HOST 298. Independent Study**1-3 Credits (1-3)**

Individual studies directed by consenting faculty with prior approval of department chair. May be repeated for a maximum of 3 credits. Restricted to: Community College campuses only.

Prerequisite(s): Minimum 3.0 GPA and sophomore standing.

HRTM-HOTEL/RESTRNT/TOURISM MGT

HRTM 1120G. Introduction to Tourism

3 Credits (3)

Survey of travel and tourism development and operating characteristics.

Learning Outcomes

1. Define tourism and related terms. Identify and explain the role of the elements of the destination mix. Identify the potential socio-cultural, economic and environmental impacts of tourism.
2. Identify and describe the role of key governmental and nongovernmental organizations in tourism.
3. Describe basic tourism planning and development principles.
4. Discuss the unique challenges of tourism marketing and standard marketing methods.
5. Describe the components of the tourism distribution system.
6. Demonstrate a basic understanding of traveler behavior including motivations and barriers to travel. Identify major factors that influence traveler flows. 1Describe the role of major modes of transportation in the tourism system.
7. 1Identify and describe the three pillars of sustainable tourism development. 1Explain personal and social responsibility as it relates to sustainable tourism development. 1Demonstrate effective communication and critical thinking skills.

HRTM 1130. Introduction to Hospitality Management

3 Credits (3)

Overview of the major segments of the hospitality industry, with a focus on basic management principles.

Learning Outcomes

1. Understand the concept of management contracts and franchising.
2. Recognize and understand needed leadership qualities to achieve organizational objectives.
3. Understand the hospitality industry within the global environment.
4. Identify company and industry trends.
5. Understand the functions of all departments in a hospitality organization (restaurant, hotel, club, etc.).
6. Apply the concepts of convention management, meeting and event planning, and casino management.
7. Understand the concepts of quick and institutional/contract foodservice management.
8. Understand the principles of bar management and compare and contrast wines, beers and distilled spirits.
9. Manage the process of service delivery.
10. 1Identify and solve managerial problems
11. 1Manage a diverse workforce and develop positive employee relations to reduce turnover.

HRTM 2110. Safety, Sanitation and Health in the Hospitality Industry

1 Credit (1)

Addresses public health, HACCP, and food safety responsibilities in the hospitality industry. Sanitation certification test allows students to receive national ServSafe Food Protection Manager Certification. Restricted to Las Cruces campus only.

Learning Outcomes

1. Identify the hazards to safe food and the foods at risk in a foodservice operation.
2. Identify and discuss the Hazard Analysis Critical Control Point (HACCP) system and be able to design a HACCP flowchart.
3. Demonstrate knowledge of how to protect food during purchasing, receiving, storing, preparing, holding, and serving.
4. Discuss the procedures for ensuring sanitary equipment, facilities, and food-handling practices.
5. Explain how to set-up cleaning, safety, pest control, crisis management, and training programs.

HRTM 2120. Food Production and Service Fundamentals**3 Credits (1+4P)**

Basic overview of food service systems including menu management, purchasing and production. The course includes basic principles of food fabrication and production. Topics include knife skills, culinary terminology, product identification, quality standards, nutritional cooking theory and application of food preparation techniques. The course includes laboratory aspects and demonstration of basic food production techniques, service styles, practices and procedures in food service operations including culinary math. This course provides students with an understanding of food service sanitation and culinary nutrition. Completion of a national certification examination is required. Students who have not completed HRTM 2110 before enrolling in the course must have proof of valid ServSafe Food Protection Manager certificate. Restricted to Las Cruces campus only. Prerequisite(s)/

Corequisite(s): HRTM 2110

Prerequisite(s): HRTM 1130 or FSTE 2110G.

Learning Outcomes

1. Demonstrate use of standard recipes and how to reduce and increase their yields.
2. Demonstrate basic culinary knife cuts, basic fabrication and mise en place
3. Demonstrate basic cookery techniques of dry, moist and a combination of heat
4. Demonstrate the proper plating and garnishing of foods
5. Describe proper personal behaviors required for the safe handling of food
6. Identify and properly operate kitchen equipment.
7. Pass the ServSafe Exam
8. Describe the three forms of food contaminants and preventative measures.
9. Demonstrate how to properly "set" a table for service
10. 1Demonstrate how to provide dining room service with proper etiquette
11. 1Demonstrate safe work habits, identify safety hazards, and employ preventative safety measures.
12. 1Maintain positive relations with fellow students and faculty through teamwork.
13. 1Exhibit appropriate work habits and attitudes; demonstrate a willingness to compromise.
14. 1Demonstrate a positive attitude, conversation skills, personal hygiene and work attire.

HRTM 2130. Hotel Operations I**3 Credits (3)**

Analysis of hotel operations to include: guest services, reservations, reception, guest/city ledger and the night audit. May be repeated up to 3 credits.

Restricted to Las Cruces campus only.

Prerequisite(s): HRTM 1130.

Learning Outcomes

1. Outline the history, magnitude and culture of the hotel industry
2. Define and identify hotel ownership and operational structures
3. Outline the organization and structure of a hotel and resort.
4. Describe and calculate the components and processes of room reservation forecasting, pricing and revenue management.
5. Outline and explain the flow of the guest from pre-arrival through arrival, room occupancy and departure.
6. Demonstrate the procedures and processes for Guest Accounting, the City Ledger, Guest Credit and the Night Audit.
7. Discuss problem solving and guest service associated with the front office and other departments of the hotel and resort.
8. Forecast impacts of technology to the guest services and hotel operations
9. Describe the day to day activities and responsibilities of a Hotel Front Office Manager or a Hotel Assistant General Manager (AGM).

HRTM 2996. Special Topics**1-4 Credits**

Specific subjects and credits to be assigned on a semester basis for both lecture and laboratory assignments. May be repeated for a maximum of 4 credits.

Prerequisite: consent of instructor.

Learning Outcomes

1. Varies

HRTM 301. Hotel, Restaurant, and Tourism Marketing**3 Credits (3)**

The development of effective marketing programs for hospitality service organizations. Prerequisites: HRTM 1130

HRTM 302. Hospitality Management Accounting**3 Credits (3)**

Specialized accounting for hotel revenue and expenses; accounting for inventory, property, and equipment; hospitality payroll accounting; hotel departmental financial statements; income statement, balance sheet, and statement of cash flows; the analysis of financial statements; interim and annual reports; budgeting expenses; forecasting sales; budgetary reporting and analysis; and financial decision making.

Prerequisite: ACCT 2110.

HRTM 304. Hospitality and Travel Law**3 Credits (3)**

Specialized applications of the law to the hospitality and tourism industry. **Prerequisite:** Prerequisites: HRTM 1130

HRTM 307. Professional Development**1 Credit (1)**

Covers essential elements of career management including preparation for a successful internship. Restricted to majors. Graded S/U.

HRTM 311. Hospitality Leadership Management**3 Credits (3)**

Examines modern leadership theory in the context of the hospitality industry. Connects contemporary leadership topics to their historical antecedents through focused reading, discussion and film.

Prerequisites: HRTM 1130 and HRTM 1120.

HRTM 363. Quantity Food Production and Service**4 Credits (1+6P)**

Covers quantity food production and service including cooking concepts, sanitation and safety, teamwork, dining room service, and management responsibilities. Students will apply this knowledge developing product for sale in a student run restaurant. Proof of current ServSafe Food Protection Manager or NM Food Handler certification required. May be repeated up to 4 credits.

Prerequisite(s): HRTM 2120.

HRTM 408. Hospitality Internship**1 Credit (1)**

Hospitality and tourism professional work experience for HRTM majors only. Restricted to majors.

Prerequisites: HRTM 307 and consent of instructor.

HRTM 409. HRTM Internship Seminar**1 Credit (1)**

A case based approach to analyzing internship experiences. Students will write case studies about specific business issues they encountered during HRTM 408 (Internship) and analyze them. Restricted to majors.

Prerequisites: HRTM 408.

HRTM 410. Hospitality Cost Control**3 Credits (3)**

Familiarizes students with all aspects of cost control including financial data entry and hospitality accounting practices, financial report production, analysis and problem solving. Students will learn to understand the roles of the various stakeholders (owners, managers, employees and customers.) Provides tools needed to communicate effectively about global financial issues affecting the hospitality business. May be repeated up to 3 credits.

Prerequisite(s): HRTM 302, HRTM 363.

HRTM 412. Beverage Management**3 Credits (3)**

Survey of all aspects of beverage management, including wine/beer/distilled spirits origins and trends, cost control, bar management, beverage purchasing, and wine appreciation. May be repeated up to 3 credits.

Prerequisite(s): HRTM 363.

HRTM 413. Restaurant Operations Management**4 Credits (1+6P)**

Provides a detailed understanding of the processes of restaurant operations management. Students are expected to increase kitchen and service technical skills, develop and cook from recipes, develop a personal leadership style, understand food and wine pairing, and supervise front and back of the house operations. Provides the opportunity to perform a detailed analysis of a food and beverage operation. Proof of valid ServSafe Food Protection Manager or NM Food Handler certification and current NM Alcohol Server certification required. May be repeated up to 4 credits.

Prerequisite(s): HRTM 363.

HRTM 414. Wine Appreciation**3 Credits (3)**

An experiential examination of wine through lectures, guest speakers and focused tasting of wine and food. Topics include viticulture, wine making varietals, terroir, wine service, tasting and evaluation techniques, and food pairings. Student must be at least 21 years old. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Consent of instructor.

HRTM 416. Hotel, Restaurant and Tourism Industry Purchasing, Selection, and Procurement**3 Credits (3)**

Purchasing methods for the hotel, restaurant and tourism industries based on standards of quality, grade, care, and storage for food and nonfood supplies. Purchasing, installation, operation, and care of large foodservice equipment.

Learning Outcomes

1. Differentiate purchasing functions in different types of hotel, restaurant and tourism operations and determine how internal and external forces impact purchasing decisions.
2. Outline and describe the duties and responsibilities of hotel, restaurant and tourism purchasing managers.
3. Develop product recommendations for hotel, restaurant and tourism food and equipment through the use of various product evaluation methods.
4. Identify examples of unethical purchasing practices throughout history, research present a code of purchasing ethics for a hotel, restaurant or tourism company.
5. Analyze hotel, restaurant and tourism industry supplier selection criteria and recommend a supplier based on those criteria.
6. Apply mathematical models to calculate recipe costs as well as order quantities and times. Determine how to reduce AP prices.
7. Outline and describe each step of the flow of inventory and determine which controls are needed for security of inventory.
8. Explain product grades and explain grading procedures and procurement criteria for meats, poultry, eggs, dairy, produce, marine products, groceries, and nonfood items.

HRTM 420. Club Management and Marketing**3 Credits (3)**

Provides an understanding of the general operational and administrative procedures practiced in private clubs from a marketing perspective with a special emphasis on managing and marketing club food and beverage operations and service. It will provide the professional golf management and hospitality students with the unique sensitivities required in managing and operating in the increasingly lucrative club management market.

HRTM 430. Hospitality Facilities Management**3 Credits (3)**

Exploration of the engineering and maintenance requirements specific to the hospitality industry. Emphasis on environmental issues, renovation and management of the physical plant. May be repeated up to 3 credits.

Prerequisite(s): HRTM 2130, HRTM 408.

HRTM 431. Hotel Operations II**3 Credits (3)**

The duties and administration of a hotel front office, including housekeeping. Additional focus on the procedures of reservations and night audit. Students also gain exposure to property management systems. May be repeated up to 3 credits.

Prerequisite(s): HRTM 2130.

HRTM 432. Hotel Revenue and Sales Management**3 Credits (3)**

Examines methods used for profitably managing capacity, including dynamic pricing and allocation of the rooms inventory across market segments to maximize revenues. Focuses on the integration of revenue management principles with information technology, management, marketing and sales concerns at the property and market level. May be repeated up to 3 credits.

Prerequisite(s): HRTM 2130.

HRTM 434. Senior Capstone Experience**3 Credits (3)**

Synthesizes all previous work. Students apply multi-disciplinary principles to the analysis of hospitality business cases and tourism problems.

Prerequisite: HRTM 408.

HRTM 435. Resort Management**3 Credits (3)**

This course introduces students to the operation and management of full service resort properties, including the management of resort recreational amenities.

Prerequisite(s): HRTM 2130 or consent of instructor.

HRTM 436. Sustainability in the Hospitality Industry**3 Credits (3)**

This course provides a summary and definition of the concept and roots of sustainability and climate change as well as their impact and effect on the hospitality industry while providing the rationale for sustainable development for the industry. A review of environmentally sound management strategies for all operational management areas ranging from eco-design, energy, waste and water management, food security, sourcing of agricultural products leads to a detailed strategy for planning and evaluating the sustainability of a hospitality operation in terms of corporate responsibility and social entrepreneurship. The content is focused on a global perspective of sustainability in the industry.

Learning Outcomes

1. Recognize, interpret and summarize the global challenges facing the hospitality industry caused by climate change driving the need for sustainability in the industry.
2. Explain implementation strategies for responsible environmentally sound hospitality management practices for hotel, food and beverage and tourism businesses.
3. Evaluate sustainable development practices and the importance of personal and corporate social development.
4. Analyze, evaluate and communicate the sustainability practices of a hospitality operation.

HRTM 443. Meetings, Conventions and Special Events**3 Credits (3)**

Examination of the role of the meeting/event planner, including setting objectives, site selection, negotiations, design, budgeting, marketing, registration, on-site logistics, and evaluation. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Consent of Instructor.

HRTM 444. Entertainment Business and Venue Management**3 Credits (3)**

This course will review and examine the principles and practices associated with managing a public assembly venue and the nature of the venue and entertainment business. This is a comprehensive course designed to cover all aspects of incorporated event practices such as marketing, production, contracts, ticketing, and security.

Learning Outcomes

1. Analyze the origin and history of public assembly venues and the role they play within the community.
2. Analyze different ownership and management structures and how governance relationships impact operational management.
3. Analyze the business and financial operations of a public assembly venue.
4. Describe the booking process, the entities involved, and the importance of relationships.
5. Analyze and create marketing and sales strategies for both a public assembly venue and an event that is booked in the venue.
6. Identify and analyze the ticket system options available to venue managers, as well as their importance in access management, financial accountability, and data collection.
7. Analyze the role and importance of ancillary revenue sources, as well as the need for creativity and entrepreneurship.
8. Describe the operational systems and processes required to maintain a venue and produce events.
9. Analyze the event planning process and how it is used to produce an event experience for guests and clients.
10. 1 Analyze management's role in developing and maintaining a safe and secure public assembly venue.

HRTM 450. Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

Prerequisite: consent of instructor.

HRTM 492. Special Problems**1-4 Credits**

Individual research in a selected subject area of hospitality management. Maximum of 4 credits per semester and a total of 6 credits toward a degree.

Prerequisite: consent of instructor.

HRTM 501. The Hospitality Industry and Sustainable Competitive Strategy**3 Credits (3)**

An examination of the hospitality industry, and its contemporary strategic management principles and practices. Key components, industry organization, and competitive environment of the hospitality industry are analyzed. Strategic decision making principles are examined to create sustainable competitive advantages for hospitality and service industry leaders and organizations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Analyze key components, industry organization, and competitive environment of the hospitality industry.
2. Examine strategic decision making principles to create sustainable competitive advantages for hospitality and service industry leaders and organizations

HRTM 502. Advanced Hospitality Services Management**3 Credits (3)**

This course explores and applies the design and management of service quality in global hospitality organizations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Investigate the design and management of service quality in global hospitality organizations to create authentic and memorable hospitality experiences.
2. Design and manage service delivery systems to create a culture of service excellence
3. Define and discuss the relationship between service and financial performance in hospitality organizations

HRTM 503. Hospitality Organizational Leadership and Human Resources**3 Credits (3)**

Application of key organizational, leadership and human resource theories to global hospitality organizations. Analysis of key hospitality industry leaders, companies and systems. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Apply organizational, leadership and human resource theories to global hospitality organizations.
2. Analyze key hospitality industry leaders, companies and systems.
3. Coordinate teams to provide effective management and maintain successful employee and guest relations.

HRTM 504. Marketing Strategy for Global Hospitality**3 Credits (3)**

Application, analysis and evaluation of marketing theories, strategies and tactics for developing sustainable competitive advantage in the global hospitality industry. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Explore and analyze global hospitality markets, including the values and expectations of global hospitality consumers
2. Analyze and evaluate marketing theories, strategies and tactics for developing sustainable competitive advantage in the global hospitality industry.
3. Design marketing strategies that will promote and sustain positive guest/customer relationships
4. Apply concepts of digital marketing to hospitality organizations.

HRTM 505. Hospitality Research Methods & Analysis**3 Credits (3)**

Application of appropriate statistical procedures and research methodologies within the hospitality industry. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Analyze hospitality operational data.
2. Develop the framework for researching hospitality operations and organizations.
3. Implement appropriate statistical procedures and research methodologies to hospitality operations.
4. Examine problems in hospitality, formulate and clarify research topics to address these problems

HRTM 506. Contemporary Global Issues in Hospitality**3 Credits (3)**

Contemporary issues confronting the global hospitality industry. Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Discuss contemporary issues confronting the global hospitality industry.
2. Project how contemporary global issues will impact hospitality organizations.
3. Evaluate new developments in hotel and restaurant management

HRTM 510. Hospitality Cost Control**3 Credits (3)**

Familiarizes students with all aspects of cost control including financial data entry and hospitality accounting practices, financial report production, analysis and problem solving. Students will learn to understand the roles of the various stakeholders (owners, managers, employees and customers). Provides tools needed to communicate effectively about global financial issues affecting the hospitality business. Same as HRTM 410 with additional work for graduate credit. Consent of Instructor required.

HRTM 511. Hospitality Financial Analysis**3 Credits (3)**

Financial and accounting decision processes as applied to the hospitality industry. Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Use the Uniform Systems of Accounts for the Lodging and Restaurant industries, and accounting and financial reporting standards and procedures for the hospitality industry.
2. Use hospitality financial and accounting tools such as REVPAR and Food Cost Percentage to analyze hospitality operations
3. Define and apply terminology and principles required to develop and analyze Hospitality Management financial statements.
4. Analyze and interpret hospitality accounting and financial statements
5. Perform financial and accounting decision making as applied to the hospitality industry.

HRTM 512. Beverage Management**3 Credits (3)**

Survey of all aspects of beverage management, including wine/beer/distilled spirits origins and trends, cost control, bar management, beverage purchasing, and wine appreciation. Same as HRTM 412 with additional work for graduate credit. Consent of Instructor required.

HRTM 515. Applied Management Project**3 Credits (3)**

Students will develop a project scope based on problems presented within the hospitality industry. Projects incorporate concepts and skills developed in previous coursework. Students will take this course in their last semester of the Master of Hospitality Degree. Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Develop a project scope based on problems presented within the hospitality industry.
2. Use collaborative problem solving to execute the project.
3. Define and identify a business research problem and explain its importance to study.
4. Identify sources and strategies for locating related literature.
5. Plan research regarding the business problem.
6. Write the professional paper.
7. Present the professional paper.

HRTM 516. Hotel, Restaurant and Tourism Industry Purchasing, Selection and Procurement**3 Credits (3)**

Purchasing methods for the hotel, restaurant and tourism industries based on standards of quality, grade, care, and storage for food and nonfood supplies. Purchasing, installation, operation, and care of large foodservice equipment.

Learning Outcomes

1. Differentiate purchasing functions in different types of hotel, restaurant and tourism operations and determine how internal and external forces impact purchasing decisions.
2. Outline and describe the duties and responsibilities of hotel, restaurant and tourism purchasing managers.
3. Develop product recommendations for hotel, restaurant and tourism food and equipment through the use of various product evaluation methods.
4. Identify examples of unethical purchasing practices throughout history, research present a code of purchasing ethics for a hotel, restaurant or tourism company.
5. Analyze hotel, restaurant and tourism industry supplier selection criteria and recommend a supplier based on those criteria.
6. Apply mathematical models to calculate recipe costs as well as order quantities and times. Determine how to reduce AP prices.
7. Outline and describe each step of the flow of inventory and determine which controls are needed for security of inventory.
8. Explain product grades and explain grading procedures and procurement criteria for meats, poultry, eggs, dairy, produce, marine products, groceries, and nonfood items.

HRTM 530. Facilities Management**3 Credits (3)**

Exploration of the engineering and maintenance requirements specific to the hospitality industry. Emphasis on environmental issues, renovation and management of the physical plant. Same as HRTM 430 with additional work for graduate credit. Consent of Instructor required.

HRTM 531. Hotel Operations II**3 Credits (3)**

The duties and administration of a hotel front office, including housekeeping. Additional focus on the procedures of reservations and night audit. Students also gain exposure to property management systems. Same as HRTM 431 with additional work for graduate credit. Consent of Instructor required.

HRTM 532. Hotel Revenue and Sales Management**3 Credits (3)**

Examines methods used for profitably managing capacity, including dynamic pricing and allocation of the rooms inventory across market segments to maximize revenues. Focuses on the integration of revenue management principles with information technology, management, marketing and sales concerns at the property and market level. Same as HRTM 432 with additional work for graduate credit. Consent of Instructor required.

HRTM 535. Resort Management**3 Credits (3)**

This course introduces students to the operation and management of full service resort properties, including the management of resort recreational amenities.

Prerequisite(s): Consent of instructor.

HRTM 536. Sustainability in the Hospitality Industry**3 Credits (3)**

This course provides a summary and definition of the concept and roots of sustainability and climate change as well as their impact and effect on the hospitality industry while providing the rationale for sustainable development for the industry. A review of environmentally sound management strategies for all operational management areas ranging from eco-design, energy, waste and water management, food security, sourcing of agricultural products leads to a detailed strategy for planning and evaluating the sustainability of a hospitality operation in terms of corporate responsibility and social entrepreneurship. The content is focused on a global perspective of sustainability in the industry.

Learning Outcomes

1. Recognize, interpret and summarize the global challenges facing the hospitality industry caused by climate change driving the need for sustainability in the industry.
2. Explain implementation strategies for responsible environmentally sound hospitality management practices for hotel, food and beverage and tourism businesses.
3. Evaluate sustainable development practices and the importance of personal and corporate social development.
4. Analyze, evaluate and communicate the sustainability practices of a hospitality operation.

HRTM 543. Meetings, Conventions and Special Events**3 Credits (3)**

Examination of the role of the meeting/event planner, including setting objectives, site selection, negotiations, design, budgeting, marketing, registration, on-site logistics, and evaluation. Same as HRTM 443 with additional work for graduate credit. Consent of Instructor required.

HRTM 546. Methods for Teaching Hospitality and Culinary Education**3 Credits (3)**

Methods of instruction and presentation, selection of teaching aids and support materials, classroom management, development of a complete educational program, and microteaching experiences Restricted to: HRTM minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Compare and contrast curriculum theories.
2. Develop syllabi for hospitality courses using theories and models of course design.
3. Apply instructional techniques in hospitality education.
4. Design tests and other assessments for hospitality courses.
5. Write a teaching philosophy.

HRTM 550. The World of Hospitality Higher Education**3 Credits (3)**

Survey of the history, organization, and administration of hospitality higher education programs. Explores differences between types of degree programs – associate, bachelor, graduate and sources of funding – public, private, proprietary. Investigates the role of the faculty member in non-instructional activities, such as working with administrative and support departments, accreditation, service, community outreach, fundraising, and industry relations. Restricted to: HRTM Minor or Master of Science in Family and Consumer Sciences majors.

Learning Outcomes

1. Discuss the history of higher education and hospitality management programs.
2. Analyze how general higher education principles, laws, and finance apply to hospitality management programs.
3. Compare the characteristics, administration, and operations of programs based on type of degrees offered.
4. Compare the characteristics, administration, and operations of programs based on sources of funding.
5. Analyze the role of the faculty in hospitality education in collaborating with various educational departments and support services.
6. Analyze the role of the faculty in hospitality education in collaborating with external stakeholders.

HRTM 590. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree.

Prerequisite: consent of instructor.

HRTM 598. Special Research Programs**1-4 Credits**

Individual investigations, either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree.

Prerequisite: consent of instructor.

HRTM 599. Master's Thesis**1-6 Credits (1-6)**

Thesis.

Prerequisite: consent of instructor.

HVAC-HEATING/AC/REFRIGERATION

HVAC 100. EPA Clean Air Act: Section 608**1 Credit (1)**

Refrigerant certification preparation to include basics of refrigerant bearing equipment, ozone depletion and the new legislation, technician categories covered and the certification examination.

HVAC 101. Fundamentals of Refrigeration**4 Credits (3+2P)**

Refrigeration cycle and the various mechanical components. Use of special tools, equipment, and safety precautions.

HVAC 102. Fundamentals of Electricity**4 Credits (3+2P)**

Introduction to electricity theory, OHM s Law, circuits, AC/DC, and practical applications.

HVAC 103. Electrical and Mechanical Controls I**4 Credits (3+2P)**

Applications of basic electrical and mechanical controls. Reading and drawing diagrams of simple refrigerating equipment. Safe use of testing equipment.

Prerequisites: HVAC 101 and HVAC 102, or consent of instructor.

HVAC 110. Professional Development and Leadership**1 Credit (1)**

As members and/or officers of various student professional organizations, students gain experience in leadership, team building, and community service. Students competing in Skills USA are required to register for the course. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: HVAC majors. Graded: S/U Grading (S/U, Audit). Restricted to: Community Colleges only.

HVAC 113. Job Shadowing**1 Credit (1)**

Course will expose students to actual HVAC/R field work and provide them knowledge of the expectations of field work as they shadow an HVAC/R technician. Consent of instructor required. Restricted to: Community colleges only.

HVAC 205. Commercial Refrigeration Systems**4 Credits (3+2P)**

Service and maintenance of commercial refrigeration equipment to include evacuation and charging procedures, electrical diagrams, and compressors and accessories.

Prerequisites: HVAC 103 or consent of instructor.

HVAC 207. Residential Air Conditioning Systems**4 Credits (3+2P)**

Applications and types of equipment used in comfort cooling. Preventive maintenance, service, and repairs common to evaporative coolers and refrigerated air conditioning systems. Air properties and psychometrics.

Prerequisite: HVAC 103 or consent of instructor.

HVAC 209. Residential Heating Systems**4 Credits (3+2P)**

Gas and electric systems used in comfort heating. Maintenance procedures, safety, troubleshooting, and servicing malfunctions in equipment.

Prerequisite: HVAC 103 or consent of instructor.

HVAC 210. Commercial Air Conditioning and Heating Systems**4 Credits (3+3P)**

Covers troubleshooting mechanical and electrical problems associated with HVAC equipment in commercial buildings. Includes gas, electric, and heat pump systems. Restricted to Community Colleges campuses only.

Prerequisite(s): HVAC 103 or consent of instructor.

HVAC 211. Heat Pump Systems**4 Credits (3+2P)**

Reverse cycle refrigeration systems utilized in comfort heating and cooling. Troubleshooting mechanical electrical problems associated with heat pumps. HVAC 103 or consent of instructor.

HVAC 213. Practicum**3 Credits (3)**

Working in the field with journeymen service technicians. Develop and apply job skills. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HVAC majors. Restricted to Community Colleges campuses only.

Prerequisite(s): HVAC 113 and Consent of instructor.

HVAC 220. Introduction to Sheet Metal Fabrication**4 Credits (3+2P)**

Introduction to sheet metal fabrication to include hands-on practical laboratory applications, cutting and forming procedures, identifying types and gauges. Design and layout techniques.

Prerequisite: OETS 118 or equivalent math or consent of instructor.

HVAC 225. New Mexico Mechanical Codes: HVAC**1-4 Credits**

Principles and regulations developed for HVAC, sheet metal, and plumbing occupations to include terminology, ventilation air supply, exhaust systems, duct systems, combustion air, chimneys and vents, boilers/water heaters, refrigeration, panel and hydronic panel heating, fuel gas piping, storage systems, solar systems, and workmanship standards. May be repeated for a maximum of 12 credits.

HVAC 255. Special Topics**1-6 Credits**

Topics to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

HVAC 290. Special Problems**1-4 Credits**

Individual studies related to heating, air conditioning, and refrigeration.

Prerequisites: HVAC 101, HVAC 102, and consent of instructor.

I B-INTERNATIONAL BUSINESS

I B 317. International Marketing**3 Credits (3)**

Focuses on decisions relating to entering markets, market segmentation, marketing strategies, and tactics in the international arena. Same as MKTG 317.

Learning Outcomes

1. Develop understanding about what is involved in making international marketing decisions, including product, price, promotion, and place decisions to create a marketing mix. Acquire an overview on the contemporary issues in global marketing and the unique challenges faced by marketing managers in the dynamic global environment. Develop insights into how differences in global economic, cultural, social, political, and legal environments can affect marketing decisions. Develop strategic thinking in the context of complex problems and challenges faced by the contemporary global executives and managers. Develop ability to integrate the important global societal dimensions of diversity, environmental concerns, ethics, and technological change into their thinking. Develop knowledge and skills to analyze cross-cultural variables and their impact on international marketing. Discover sources of information for researching and evaluating international markets. Communicate effectively about marketing issues in group discussions, oral presentations and written reports. Work effectively as a team member in analyzing marketing issues. 1. Develop leadership skills necessary to deal with the uncertainty and changes faced by today's global marketers.

I B 351. International Business**3 Credits (3)**

The various aspects of international business, and identification and analysis of problems encountered by multinational companies.

Prerequisite: junior standing or consent of instructor.

I B 398. International Business and Economic Environments**3 Credits (3)**

Description and analysis of various world regions, e.g., Pacific Rim, Eastern Europe, South Asia. Region will vary from semester to semester.

I B 449. Open Economy Macroeconomics**3 Credits (3)**

This course studies theoretical and empirical macroeconomics in international dimension. It covers from the fundamental concepts of national income and growth, monetary/fiscal and exchange rate policies, foreign exchange markets, international trade and finance, and regionalization/economic integration to the impact analysis of these macroeconomic fundamentals in the open economy. Crosslisted with: ECON 449.

Prerequisite(s): BFIN 341 OR ECON 311.

I B 450. International Economics**3 Credits (3)**

Trade and capital flows between countries, international payments, government policy in balance-of-payments and tariff matters, international organizations. Crosslisted with: ECON 450G

Prerequisite(s): ECON 2110G or ECON 2110H and ECON 2120G or ECON 2120H.

I B 475. International Finance**3 Credits (3)**

International aspects of financial transactions, decision-making, banking and financial markets. Crosslisted with: BFIN 475 and BFIN 575.

Prerequisite(s): BFIN 341.

I B 489. Senior Seminar in International Business**3 Credits (3)**

Capstone class for I B majors. Integration of previous classwork via the examination of case studies and completion of a major project.

Prerequisite: I B core.

I E-INDUSTRIAL ENGINEERING

I E 151. Computational Methods in Industrial Engineering**3 Credits (3)**

History, social implications, and application of computers and an introduction to computer programming, word processing, and database management systems. Satisfies General Education computer science requirement.

Prerequisite: MATH 1220G.

I E 200. Special Problems-Sophomore**1-3 Credits**

Directed individual projects. May be repeated for a total of 3 credits.

Prerequisite: consent of faculty member.

I E 217. Manufacturing Processes**3 Credits (3)**

Introduction to manufacturing and processing, including: casting, forming, and machining. Emphasis on creating products with the appropriate techniques. Crosslisted with: E T 217.

Prerequisite: E T 110 and MATH 1220G.

Learning Outcomes

1. Various

I E 217 L. Manufacturing Processes Laboratory**1 Credit (3P)**

Laboratory associated with I E 217. May be repeated up to 1 credits.

Prerequisite(s): E T 110.

Corequisite(s): I E 217.

I E 300. Special Problems-Junior**1-3 Credits**

Directed individual projects. May be repeated for a total of 3 credits.

Prerequisite: consent of faculty member.

I E 311. Engineering Data Analysis**3 Credits (3)**

Methodology and techniques associated with identifying and analyzing industrial data.

Prerequisite: C- or better in MATH 1521G or MATH 1521H or ENGR 190.

Learning Outcomes

1. Ability to correctly interpret statistical reports Ability to correctly identify and solve problems involving continuous and discrete probability and random variables. Ability to correctly analyze random samples using methods that include: point estimates, confidence intervals, tests of hypothesis, analysis of variance (ANOVA), and linear regression.

I E 316. Methods Engineering**3 Credits (2+3P)**

Methods analysis and design. Work measurement techniques. Job evaluation and wage incentive methods. May be repeated up to 3 credits.

Prerequisite(s): I E 217, I E 311, E T 110.

I E 351. Applied Problem Solving in Industrial Engineering**3 Credits (3)**

Application of computational techniques to engineering problems including the use of commercial programs in statistics and applied mathematics. Restricted to majors.

Corequisite(s): I E 311.

I E 365. Quality Control**3 Credits (3)**

Statistical analysis of quality in manufacturing. Acceptance sampling and control charts.

Prerequisite: I E 311 or equivalent.

I E 375. Manufacturing Processes II**3 Credits (3)**

Review of basic manufacturing processes. Advanced topics in casting, forming, machining and joining; major process parameters; economics of processes.

Prerequisite: I E 217 or E T 217.

I E 381. Technology Ventures**3 Credits (3)**

This course looks at how new technology ventures are formed at the individual entrepreneur and corporate levels. It covers the development of science and engineering based ventures from ideas through creating customer value. This is the first course in the Entrepreneurship Minor. The roles of science and engineering specialists in the creation of customer value are defined in preparation for development of technology-based enterprises.

I E 382. Business for the Practicing Engineer**3 Credits (3)**

Business tools and skills, including technology commercialization, patent applications, preparing a technology-oriented business plan, reading and constructing financial documents, modeling and understanding markets, e-commerce, QFD, concurrent engineering, engineer's role in the global economy, and engineer's impact on product design and cost.

Prerequisite: engineering major, junior level or above.

I E 400. Undergraduate Research**1-3 Credits**

May be repeated for a maximum of 6 credits.

Prerequisite: consent of faculty member.

I E 411. Occupational Safety**3 Credits (3)**

Practical methods to improve safety in the workplace. Topics include OSHA and other regulations, hazard recognition, assessment and control, industry standards, risk assessment and safety management. Material is applicable to a variety of workplace settings. This course is intended for College of Engineering students who have completed their lower-division requirements in mathematics, engineering, technology, and basic science. Same as I E 561 with differential assignments. **Prerequisite:** Junior standing

I E 413. Engineering Operations Research I**3 Credits (3)**

Deterministic operations research modeling including linear and integer programming.

Prerequisite: MATH 1521G or MATH 1521H or ENGR 190.

Corequisite: MATH 480.

Learning Outcomes

1. Ability to model optimization problems that can be solved by linear optimization. Ability to solve linear optimization problems Ability to interpret solutions of linear optimization problems in the context of the larger problem.

I E 423. Engineering Operations Research II**3 Credits (3)**

Probabilistic operations research modeling, including queuing systems and their optimization; Markov chains. May be repeated up to 3 credits.

Prerequisite(s): I E 311.

Corequisite(s): MATH 392.

I E 424. Manufacturing Systems**3 Credits (3)**

Organization and functions of manufacturing planning and control systems including forecasting, MRP, capacity planning, JIT systems, scheduling, and inventory control.

Prerequisite: I E 311.

I E 451. Engineering Economy**3 Credits (3)**

Discounted cash flows, economics of project, contract and specifications as related to engineering design.

I E 460. Evaluation of Engineering Data**3 Credits (3)**

Analysis of engineering systems possessing variability, employing regression, analysis of variance, distribution theory, and experimental design methods.

Prerequisite: I E 311 or equivalent.

I E 466. Reliability**3 Credits (3)**

Application of statistical theory to engineering reliability estimation, reliability improvement, and the analysis of reliability test data.

Prerequisite: I E 311 or equivalent.

I E 467. Discrete-Event Simulation Modeling**3 Credits (3)**

Basic modeling concepts, organizations of simulations, input data analysis, random variate generation, simulation design and analysis, model validation, output analysis, and management of simulations. Differentiated graduate assignments. May be repeated up to 3 credits.

Prerequisite(s): I E 311 or equivalent.

I E 478. Facilities Planning and Design**3 Credits (3)**

Plant location methods, total process analysis, process integration, materials handling analysis, and traditional and computerized plant layout methodologies.

Prerequisite(s): I E 316.

Prerequisite(s)/Corequisite(s): I E 424.

I E 480. Senior Design**3 Credits (2+3P)**

Multi-disciplinary team design project for external clients. Involves semester long activities including major design report and presentation.

Prerequisites: senior standing, I E 467.

I E 490. Selected Topics**1-3 Credits**

May be repeated for a maximum of 9 credits.

Prerequisite: consent of the head of the department.

I E 505. Directed Readings**1-3 Credits**

May be repeated for a maximum total of 6 credits.

Prerequisite: consent of the head of the department.

I E 515. Stochastic Processes Modeling**3 Credits (3)**

Introduction to the use of stochastic processes in the modeling of physical and natural systems. Use of generating functions, conditional probability and expectation, Poisson processes, random walk models, Markov chains, branching processes, Markov processes, and queuing processes in an applied setting.

Prerequisites: I E 311 or equivalent; and MATH 392 or equivalent.

I E 522. Queuing Systems**3 Credits (3)**

Elements and classification of queuing systems, single server models, multi-server models, cost analysis and applications.

Learning Outcomes

1. Ability to model, analyze, and apply solutions to problems involving queueing systems Ability to read and understand literature in the queueing system analysis field.

I E 523. Advanced Engineering Economy**3 Credits (3)**

Theoretical basis for engineering economy methods, problems of cost estimation, replacement, nonmonetary factors, and feasibility studies. Same as C E 523.

I E 524. Advanced Production and Inventory Control**3 Credits (3)**

Organization and functions of manufacturing planning and control systems including forecasting, MRP, capacity planning, JIT systems, scheduling and inventory control. Same as I E 424 with differentiated assignments.

I E 525. Systems Synthesis and Design**3 Credits (3)**

Examination of the production management complex in terms of its components and the synthesis of these components into an effective operating unit. Development of input-output models representing the basis structure of all production activities.

I E 530. Environmental Management Seminar**1 Credit (1)**

Survey of practical and new developments in hazardous and radioactive waste management provided through a series of guest lectures and reports of ongoing research. Same as C E 530, E E 530, CHME 530.

I E 533. Linear Programming**3 Credits (3)**

Linear programming problem formulation, simplex algorithm, theory of linear programming, duality, revised simplex algorithm, and sensitivity analysis.

I E 534. Nonlinear Programming**3 Credits (3)**

Theoretical and computational methods to solve optimization problems in engineering, statistics, economics, and operations research. Topics include convexity, optimality conditions, Newton's method, Lagrange multipliers, search algorithms for unconstrained and constrained problems, as well as barrier and penalty methods.

Learning Outcomes

1. Ability to model situations which may be solved by nonlinear optimization and to interpret the results in the context of the larger problem Ability to employ several computer tools to correctly solve nonlinear optimization problems. Ability to read and understand literature in the field of nonlinear optimization Ability to select appropriate methods and algorithms from a core representative set of methods and tools to solve nonlinear optimization problems

I E 535. Discrete Optimization**3 Credits (3)**

Combinatorial Optimization problems using both integer programming and graph theoretic approaches. Emphasis on modeling and computational algorithms.

I E 537. Large Scale Systems Engineering**3 Credits (3)**

Systems engineering approaches to large-scale complex technological and societal problems. Concepts of interaction and structural graphs, matrices, delta, and Gantt charts. The hall matrix approach, structural concepts, reachability matrices, and cross impact-analysis, modeling and decision making.

I E 545. Characterizing Time-Dependent Engineering Data**3 Credits (3)**

Theory and techniques employed in the characterization of stochastic processes commonly found in engineering applications. Distribution models include exponential, gamma, Weibull, and extreme value. Design and analysis of experiments involving complete and censored data and elevated stress. Analytical techniques include parametric, nonparametric, and graphical approaches with emphasis on modern computer tools. Exact and approximate maximum-likelihood techniques are stressed.

Learning Outcomes

1. Ability to characterize a process, based on data that is time-dependent or sequential in nature.

I E 561. Advanced Safety Engineering**3 Credits (3)**

Regulation as well as qualitative, and quantitative methods to achieve and maintain safety in the workplace. Includes liability, worker's compensation, OSHA, hazard control, safety assessment, cost justification, and system analysis.

Prerequisite: graduate status in engineering.

I E 563. Topics in Engineering Administration**3 Credits (3)**

Study of qualitative and quantitative aspects. Consideration given to philosophical, psychological, political and social implications of engineering administrative decisions.

I E 567. Design and Implementation of Discrete-Event Simulation**3 Credits (3)**

Basic modeling concepts, organizations of simulations, input data analysis, random variate generation, simulation design and analysis, model validation, output analysis, and management of simulations. Taught with I E 467 with differentiated assignments for graduate students.

I E 571. Advanced Quality Control**3 Credits (3)**

Advanced topics in quality control and design of experiments for improvement of quality.

Prerequisite: I E 311 or equivalent.

I E 575. Advanced Manufacturing Processes**3 Credits (3)**

Covers major process parameters in casting, forming, machining, and joining. Process economics and selection of processes design and interactions.

Prerequisite: graduate standing.

I E 590. Selected Topics

1-3 Credits

May be repeated for a maximum of 9 credits.

Prerequisite: consent of the head of the department.

I E 598. Special Research Programs

1-3 Credits

Individual analytical or experimental investigations. May be repeated for a maximum total of 6 credits.

Prerequisite: consent of instructor.

I E 599. Master's Thesis

1-15 Credits

Thesis.

I E 610. Topics in Operations Research

3 Credits (3)

Selected topics of current interest, to be designated by subtitle. May be repeated for a maximum of 6 credits.

I E 620. Topics in Computer Modeling

3 Credits (3)

Selected topics of current interest, to be designated by subtitle. May be repeated for a maximum of 6 credits.

I E 630. Topics in Engineering Management

3 Credits (3)

Selected topics of current interest, to be designated by subtitle. May be repeated for a maximum of 6 credits.

I E 690. Selected Topics

1-15 Credits

May be repeated.

Prerequisite: consent of department head.

I E 700. Doctoral Dissertation

15 Credits

Dissertation.

ICT-INFO & COMMUNICATION TECH

ICT 320. Introduction to Internet Protocols

3 Credits (3)

Present an overview of Internet Protocols Applications.

ICT 339. Introduction to Digital Forensics and Incident Response

3 Credits (3)

Introduction to the skills required to perform digital forensics and incident response on Windows operating systems. Topics include: live response, evidence acquisition, Windows operating system artifacts, documentation and reporting.

Prerequisite(s): ICT 360.

ICT 350V. Introduction to Personal Computer Security and Privacy

3 Credits (3)

Introduction to Information Security and Privacy – Have you ever wondered what happens to all of your browsing history or data you fill out on websites go? Who has this data? What do they do with this data? How do you stop sharing your private information? This class will answer those questions and provide steps to make your online presence more secure.

Learning Outcomes

1. Classify security issues Classify Privacy protections Evaluate threats and countermeasures based on personal security breaches. Formulate a real-time privacy response Assess international privacy protections through a multicultural focus.

ICT 352. Software Programming for Information and Communication Technology

3 Credits (3)

Computer programming techniques for information and communication technology topics.

ICT 355. Linux System Administration**3 Credits (3)**

Operating systems applications and interfacing with an introduction to systems administration. Topics include Shell Programming, Programming Tools, Database Management, System Backups, Security, Setup, and Maintenance of Linux Servers.

Learning Outcomes

1. Create a virtual environment on a host system using VirtualBox. Develop single and multiple Linux Operating Systems within The VirtualBox Virtual Environment. Select applications on production Linux Operating systems. Support the operation of the Linux Operating system using System Administration Techniques.

ICT 360. Operating Systems for ICT**3 Credits (3)**

Fundamentals of operating systems with Windows and Linux including installation and configuration using the GUI as well as the command line, text editors, file systems, scripting and operating system management.

ICT 362. Software Technology II**3 Credits (3)**

Topics include problem analysis, object-oriented programming (OOP), structured logic, and development concepts.

Prerequisite/Corequisite: ICT 352 or E T 262 or OECS 195 or C S 152 or C S 172.

Learning Outcomes

1. Set up and use a rich programming environment for programming with Python. Analyze existing code. Employ effective use of basic programming and basic troubleshooting. Employ effective use of Object-Oriented Programming (OOP) and troubleshooting. Apply testing and documentation best practices

ICT 364. Windows Enterprise Administration**3 Credits (3)**

Installation, configuration, and maintenance of Windows Enterprise services which includes Active Directory, distributed file systems, SQL Server, Web Server, Authentication Procedures, and enterprise elasticity. Topics covered include: Server Maintenance and Troubleshooting Methodologies.

Prerequisite(s)/Corequisite(s): ICT 339. Prerequisite(s): ICT 352.

ICT 377. Computer Networking I**3 Credits (3)**

Computer network design and applications for LAN, TCP/IP networks, routing and switching technologies, VLANs, and the OSI layers from physical to transport.

Prerequisite(s)/Corequisite(s): MATH 1220G or above.

ICT 380. Web Design and Multimedia**3 Credits (3)**

Introduction to front-end web development including webpage design, structure, layout, positioning, responsiveness, and foundational layers of how the web works. Video, audio, and other digital presentation tools are covered.

Learning Outcomes

1. Create multiple front-end development micro-components. Create single and multi-page websites. Use flexbox, grid, and media queries and different design patterns. Employ effective use of web development and basic troubleshooting. Build small web site projects.

ICT 435. Senior Project**3 Credits (3)**

Capstone course. Practical application of student's cumulative knowledge to an assigned design project. Design principles, teamwork, and project management skills are stressed. Demonstration of written and oral communication skills via project documentation and presentation of results. Must be graduating senior. Consent of Instructor required. Restricted to: ICT majors.

Prerequisite(s): ICT 364, ICT 377, and ICT 462.

ICT 450. Ethical Hacking**3 Credits (3)**

Ethical Hacking and Penetration testing techniques.

Prerequisite(s): ICT 339.

ICT 457. Introduction to Information Security Technology**3 Credits (3)**

This course provides an overview of security challenges and strategies of countermeasure in the information systems environment. Topics include definition of terms, concepts, elements, and goals incorporating industry standards and practices with a focus on availability, vulnerability, integrity and confidentiality aspects of information systems.

ICT 458. Web Development and Database Applications**3 Credits (3)**

Design, planning, and building of interactive and dynamic web applications. Topics include relational databases, object oriented programming, and web security.

Prerequisite(s)/Corequisite(s): ICT 362.

ICT 460. Multimedia Tools and Support**3 Credits (3)**

Introduction to video, audio and other digital presentation methods. Addresses the latest multimedia technology advances and how they apply to the information and communication technology fields. Sample tools like ffmpeg, and Audacity are covered.

Prerequisite(s): ICT 360.

ICT 462. Linux System Administration**3 Credits (3)**

Operating system applications and interfacing with an introduction to systems administration. Topics include Shell Programming, Programming Tools, Database Management, System Backups, Security, Setup and Maintenance of Linux Servers.

Learning Outcomes

1. Create a virtual environment on a host system using VirtualBox. Develop single and multiple Linux Operating Systems within The VirtualBox Virtual Environment. Select applications on production Linux Operating systems. Support the operation of the Linux Operating system using System Administration Techniques.

ICT 463. Advanced Linux and Python Scripting**3 Credits (3)**

Advanced Linux Includes installation and maintenance of Unix/Linux/Windows versions of Python. Use of Python to solve numerous engineering problems using Python scripting as infrastructure.

Prerequisite(s): ICT 362 and ICT 462.

ICT 477. Computer Networking II**3 Credits (3)**

Advanced concepts in computer network design and applications including managing the campus network infrastructure (LANs and virtual LANs), network services (DNS and DHCP), network security as well as network monitoring.

Prerequisite: ICT 377 or E T 377.

Learning Outcomes

1. VLSM, Summarization, and the TCP/IP model. Understanding of IPv6 basics Configuration of routing protocols using IPv6 Configuration of advanced router configurations Configuration of route redistribution, DHCP, DNS, NAT and PAT Configure network security and Access Control Lists (ACLs) Perform basic analysis of network data traffic Create, test and troubleshoot software simulations (Cisco Packet Tracer)

INMT - INDUSTRIAL MAINTENANCE

INMT 133. Process Technology and Systems**4 Credits (4)**

Provides instruction in the use of common process equipment. Students will use appropriate terminology and identify process equipment components such as piping and tubing, valves, pumps, compressors, turbines, motors, engines, heat exchangers, heaters, furnaces, boilers, filters dryers and other miscellaneous vessels. Included are the basic functions, scientific principles and symbols. Students will identify components on typical Process Flow Diagrams and Process and Instrument Diagrams. Restricted to Carlsbad campus only.

INMT 134. Maintenance Principles**4 Credits (4)**

The course is an introduction to the maintenance of equipment utilizing mechanical, electrical and instrumentation concepts. Topics include: hand tools, bearing fundamentals, equipment lubrication, material handling, electrical safety, battery systems, diagrams, electrical production and distribution, transformers, breakers, switches, AC and DC motors, motor controllers and operations, and introduction to automation and instrumentation control. Restricted to Carlsbad campus only.

INMT 165. Equipment Processes**4 Credits (4)**

This course introduces power transmission equipment and machinery components, including belt/chain driven equipment, speed reducers, variable speed drives, couplings, clutches, and conveying equipment. Students will learn the operation, maintenance, and troubleshooting for these types of equipment. The course also includes Overhead Crane Certification and Safety. Restricted to Carlsbad campus only.

INMT 205. Programmable Logic Controllers and Applications**4 Credits (4)**

Students learn about programmable logic controllers; architecture; programming, interfacing, and applications. Hands-on experience on modern commercial PLC units is the main component. Restricted to Carlsbad campus only.

Prerequisite(s): BCIS 1110.

INMT 223. Electrical Repairs**4 Credits (4)**

This course outlines for students the types of problems that occur in electrical machinery and systems. The course covers trouble-shooting and diagnosis, preventative maintenance, and how to make necessary repairs. Restricted to Carlsbad campus only.

INMT 235. Mechanical Drives I**4 Credits (4)**

This course teaches the fundamentals of mechanical transmission systems used in industrial, agricultural, and mobile applications. Students will learn industrial relevant skills including how to: operate, install and analyze performance, and design basic transmission systems using chains, feed-belts, spur gears, bearings, and couplings. Vibration analysis will be used to determine when to perform maintenance of power transmission components. The course also covers power transmission safety, and introduction to belt and chain drives (applications, installations, and tensioning), and introduction to gear drives, coupling, and bearing, basic troubleshooting, blueprint and print reading, learning the basics of electrical drives and PDM and PM. Restricted to Carlsbad campus only.

INMT 237. Hydraulics I**2 Credits (2)**

This course teaches fundamentals of hydraulic systems used in industry mobile application. Students learn the basic theory of application of hydraulic and electricity as it applies to hydraulics. Covered in the course are basic systems, principles of flow, pressure, viscosity, filtration, and colling. Also covered are basic components such as motor, pumps, cylinders, piping and control and relief valves. Troubleshooting strategies are discussed, along with blueprint and print reading, and PDM and PM. Industry, relevant skills including how to operate, install, analyze performance, and design basic hydraulic systems, reviewing intermediate hydraulic components and system applications. Restricted to Carlsbad campus only.

INMT 261. Pump Operations I**4 Credits (4)**

This course teaches how to select, operate, install, maintain and repair the many types of pumps used by industry. Students learn the theory and practical application of all types of processed pumps and pipe systems. It covers types, components, and systems operation. It also covers troubleshooting for flow loss and cavitation. Students learn how to select, operate, install, maintain and repair the many types of pumps used by industry. Other topics covered include: Net Positive Suction Head, pump flow/head measurement, pressure head conversion, pressure flow characteristics, cavitation, series/parallel pump operation, mechanical seal/stuffing box maintenance, multi stage operation and construction, positive displacement pumps, turbine, diaphragm, peristaltic, piston, gear, and magnetic pump systems. Restricted to Carlsbad campus only.

INMT 262. Piping Systems**2 Credits (2)**

This course teaches students how to install, maintain and troubleshoot fluid systems such as how to select, size, identify, install a variety of types of piping, fittings, and valves. Measurement techniques from basic to precision measurement, gauging, including the fundamentals of demonsioning and tolerancing will taught. Restricted to Carlsbad campus only.

INMT 263. Mechanical Drives II**4 Credits (4)**

This course teaches the bearings and gears used in heavy duty mechanical transmission systems. This course will emphasize linear access drives, clutches, and brakes. In addition, this course teaches how to set up, operate and apply laser shaft alignment to a variety of industrial applications. This course is a study of the basic concepts and procedures for the maintenance and operations of pumps, turbines, seals, bearings, and compressors. The course will provide the student with the knowledge and skills necessary to perform proper maintenance, repair, replacement and selection of pumps, turbines, seals, bearings and compressors. Also covered are advanced gearbox, coupling and bearings, precision alignment (shaft, flange, and sheave), as well as basic vibration analysis and thermography as troubleshooting and RCA aids. Restricted to Carlsbad campus only.

INMT 264. Rigging**2 Credits (2)**

This course teaches how to safely move loads of different shapes and sizes using a variety of different methods. Students will lift loads and demonstrate how to move it. Students will use hoists, slings, ropes and fittings to learn how to safely lift a wide variety of loads. Included are weight estimation, lifting rules, load ratings (sling, wire, ropes and hoists). Restricted to Carlsbad campus only.

INMT 265. Hydraulics II**2 Credits (2)**

This course teaches advanced hydraulics systems. The student will learn operation of advanced hydraulic systems applications, equipment installation, performance analysis of motors and pumps, accumulators, control, relief and check valve, equipment maintenance, and system design. The course covers accumulators, sequence valves, pilot circuits and unloader valves. Students learn more troubleshooting, hydraulic drives and other applications. Restricted to Carlsbad campus only.

INMT 267. Pump Operations II**2 Credits (2)**

This course teaches the student the disassembly, inspection and reassembly of centrifugal and positive displacement pumps. This course allows the student to identify and replace worn or broken components of pumps, and learn predictive and preventive maintenance principles. Lockout of the pump will be performed in addition to measurements and alignment. Restricted to Carlsbad campus only.

INST-INSTRUMENT & CONT TECH

INST 133. Process Technology and Systems

4 Credits (4)

Provides instruction in the use of common process equipment. Students will use appropriate terminology and identify process equipment components such as piping and tubing, valves, pumps, compressors, turbines, motors, engines, heat exchangers, heaters, furnaces, boilers, filters dryers and other miscellaneous vessels. Included are the basic functions, scientific principles and symbols. Students will identify components on typical Process Flow Diagrams and Process and Instrument Diagrams. Restricted to: Instrumentation and Control Technology majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. Explain the different pieces of equipment used in moving fluids through a process plant such as piping, valves, pumps, compressors, motors, engines, turbines, and power transmission devices. Explain the purpose of each component. Understand the applications for the different types of equipment in each classification and their operating principles. Explain the different types of heat exchangers and cooling towers used in the Process Industry as well as their components. Describe their operating principles and the operator's role in their operation. Explain the different types of boilers and furnaces as well as their components. Describe their operating principles and the operator's role in their operation. Explain the function of filters and dryers along with their principles of operation and the operator's role in their operation. Explain the different types of vessels used in the process industry and well as their components and auxiliary systems. Define what happens internally in the different vessels. Demonstrate reading Process Flow Diagrams and Piping and Instrumentation Diagrams. Apply terms used when describing the various pieces of equipment

INST 165. Equipment Processes

4 Credits (4)

This course introduces Thermal Energy and Mechanical alignment in equipment and machinery components. Students will learn the operation, maintenance, and troubleshooting of these types of equipment. Consent of Instructor required. Restricted to: Instrumentation and Control majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. Explain how Thermal Process System works.
2. Identify parts of Thermal System and Steam machines.
3. Identify troubleshooting of thermal machine.
4. Explain the steps of how to operate the Thermal Systems

INST 205. Programmable Logic Controllers and Applications

4 Credits (4)

This learning system is set up in a self-directed format where students can proceed forward at their own pace. The directions are provided in a series of Learning Activity Packets (LAPs), which include text and lab activity directions. LAPs book will be handed out at the start of every class day and must be returned before the class day begins. This learning system can be used as a stand-alone teaching learning system within any class to give hands-on experience in electrical systems. Computer Literacy and internet literacy is required to enroll in this course. Restricted to: Instrumentation and Control Technology majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. Explain the basics of PLCs.
2. Describe how PLCs are used in industrial environments.
3. Demonstrate ability to program a PLC unit to solve a problem

INST 251. Instrumentation and Measurement

5 Credits (5)

The overall aim of this course is to present the students with the basic principles and techniques required for the design and analysis of measurement systems. The course introduces the theory of measurement as well as the sensors and instruments typically used for measuring various physical quantities. Restricted to: Instrumentation and Control Technology majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. Understand measurement principles and apply them within measurement systems Select and specify suitable instrumentation for measurement of physical quantities Analyze and interpret experimental data Perform analog and digital signal processing Identify various sensor technologies and their use in measurement systems

INTR-INTERDISCIPLINARY STUDIES

INTR 300. Foundations of Interdisciplinary Studies

3 Credits (3)

Introduction to Bachelor of Individualized Studies (BIS) and Bachelor of Applied Studies (BAS) degree programs. Explores roles of interdisciplinary studies in contemporary world and how emerging and perennial problems and issues can be comprehended utilizing multiple theoretical and analytic methods. Students design or update their course of study for earning the BIS or BAS degree. Consent of Instructor required. Restricted to Las Cruces campus only.

INTR 301. Interdisciplinary Research: Theory & Practice

3 Credits (3)

Focuses on knowledge gained through interdisciplinary research. Students develop comprehensive understanding of steps of systematic inquiry into interdisciplinary research questions. Includes active learning through design and implementation of an interdisciplinary research project. For BIS and BAS majors only. Consent of Instructor required.

JAPN-JAPANESE

JAPN 1110. Japanese I

4 Credits (4)

This course focuses on the basics of the Japanese language with a balanced approach to the development of four skills: listening, speaking, reading and writing. The course is designed to teach students to communicate with Japanese socially and to utilize culturally appropriate manners to engage in Japanese daily life. While conversational skills are emphasized, the student will also be introduced to the various Japanese scripts.

Learning Outcomes

1. Become introduced to the sound system of the Japanese language.
2. Gain a basic understanding of Japanese scripts.
3. Learn and utilize vocabulary needed for basic conversation.
4. Converse and write on topics related to immediate personal needs, greetings, introductions, personal data, daily routines and school.
5. Comprehend both artificial and authentic written and aural texts of short length on familiar topics.
6. Comprehend and use essential grammar concepts.
7. Identify patterns of cultural behavior or customs in Japan, including gestures, greetings, and body language.
8. Gain the ability to converse using Japanese idiomatic expressions.

JAPN 1120. Japanese II

4 Credits (4)

This course focuses on building upon the basics of the Japanese language with a balanced approach to the development of four skills: listening, speaking, reading and writing. The course is designed to teach students to communicate with Japanese socially and to utilize culturally appropriate manners to engage in Japanese daily life. Along with further developing conversational skills, the student will also continue to learn about and utilize various Japanese scripts.

Prerequisite: grade of C or better in JPNS 1110 or consent of instructor.

Learning Outcomes

1. Understand and utilize in more depth the sound system of the Japanese language.
2. Gain a greater understanding of Japanese scripts.
3. Utilize expanded vocabulary in conversation.
4. Converse and write on topics related to personal, social, geographical, and political life.
5. Comprehend both artificial and authentic written and aural texts of longer, but still brief length, such as personal letters, messages, journals, and narrative accounts.
6. Comprehend and use essential and more complex grammatical concepts.
7. Continue to develop a sense of culturally appropriate conduct.
8. Build upon the ability to converse using Japanese idiomatic expressions.

JAPN 2110. Japanese III**3 Credits (3)**

This course is designed for students who have completed 12 credit hours or the equivalent of Japanese study. This course continues to expand vocabulary, grammar and 209 Kanji to deal with daily activities. Its objective is to teach students to communicate in a meaningful way using all four language skills: speaking, listening comprehension, reading and writing. Students will be able to manage not-complicated daily situation. Students will attain ACTFL intermediate-low level in four skills.

Prerequisite: grade of C or better in JPNS 1120 or consent of instructor.

Learning Outcomes

1. Participate in conversations on familiar topics, such as applying part-time job, gift giving/receiving,
2. planning a trip, lost and found, using sentences and short series of sentences.
3. Handle short social interactions in everyday situations by asking and answering a variety of questions.
4. Usually say what they want to say about themselves and their everyday life.
5. Write on a variety of familiar topics in Japanese characters using connected sentences.
6. Understand the main idea in messages and presentations in Japanese on a variety of topics related to everyday life and personal interests and studies.
7. Sometimes understand the main idea of conversations that they overhear.
8. Understand the main idea of texts in Japanese characters related to everyday life and personal interests or studies.
9. Describe and make comparisons between cultures about beliefs, behaviors and cultural artifacts in Japan.

JAPN 2120. Japanese IV**3 Credits (3)**

This course is designed for students who have completed 15 credit hours or the equivalent of Japanese study. This course continues to expand vocabulary, grammar and 271 Kanji to deal with not-complicated daily situation with ease. Also students acquire a competence for Japanese pragmatic usage. This course follows ACTFL language guidelines, integrating the five C's: communication, cultures, connections, comparisons and communities, to offer the student a well- rounded classroom experience. Students will attain ACTFL intermediate-mid level in four skills.

Prerequisite: grade of C or better in JPNS 2110 or consent of instructor.

Learning Outcomes

1. Participate with ease and confidence in conversations on familiar topics, such as relationships, par-time job, shopping with a variety of request, meeting socially superiors.
2. Usually describe people, places, and things, and talk about events and experiences in various time frames.
3. Handle social interactions in everyday situations, sometimes even when there is an unexpected complication.
4. Write about topics related to school, work, and community in a generally organized way in Japanese characters.
5. Write some simple paragraphs in Japanese characters about events and experiences in various time frames.
6. Easily understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
7. Usually understand a few details of what they overhear in conversations, even when something unexpected is expressed.
8. Sometimes follow what they hear about events and experiences in various time frames.
9. Understand the main idea of texts in Japanese characters with topics related to everyday life, personal interests, and studies, as well as sometimes follow stories and descriptions about events and experiences in various time frames.
10. 1Describe and make comparisons between cultures about beliefs, behaviors and cultural artifact in Japan.
11. 1Start using languages in a culturally appropriate way based on the understanding of cultural similarities and differences, including the use of "honorific" and "humble" expression.

JOUR-JOURNALISM

JOUR 102. Grammar for Journalists**2 Credits (2)**

Instruction of basic grammar, spelling and punctuation. Required for all journalism students with an ACT English score below 25, SAT Verbal below 570, or students who have not taken ACT/SAT tests. Restricted to Las Cruces campus only.

JOUR 105G. Media and Society**3 Credits (3)**

Functions and organization of the mass media system in the United States; power of the mass media to affect knowledge, opinions, and social values; and the impact of new technologies.

JOUR 110. Introduction to Media Writing**3 Credits (2+2P)**

Preparation of copy for broadcasting, print, advertising, and public relations. Introduction to Web applications. May be repeated up to 3 credits.

Prerequisite(s): JOUR 102 or ACT score of 25 and above or SAT score of 570 and above.

JOUR 201. Introduction to Multimedia**3 Credits (3)**

Provide students with the basic skills to produce multimedia packages using text, photos, audio and video, as well as social media for professional purposes. Intensive hands-on class using editing software such as Adobe Premiere. Adobe Audition and Photoshop. May be repeated up to 3 credits.

JOUR 210. Newswriting & Reporting**3 Credits (2+2P)**

Intensive laboratory practice in writing and field reporting news for print and Internet. May be repeated up to 3 credits. Restricted to Las Cruces campus only.

Prerequisite(s): JOUR 102 or ACT score of 25 and above or SAT score of 570 and above and JOUR 110.

JOUR 300. Introduction to Advertising**3 Credits (3)**

Role of IMC (integrated marketing communications) in marketing of goods, services, and organizations. Creative process, strategic planning media, message design, consumer behavior, and social issues of IMC.

JOUR 302. Video Production and Editing**3 Credits (3)**

Classroom instruction on basic studio and single camera video productions, with focus on practical aspects of news production. Lab experience in camera basics, studio functions and digital video editing Includes practical experience through crew assignments on the live student -produced newscast, News22. which airs on KRWG-TV, a PBS affiliate station. May be repeated up to 3 credits.

JOUR 306. Feature Writing**3 Credits (3)**

The preparation of feature stories for newspapers and magazines. How to develop a variety of stories, research topics, interview sources, polish writing and market work. May be repeated up to 6 credits.

Prerequisite(s): JOUR 210 or consent of instructor.

JOUR 310. News Reporting & Publishing**3 Credits (3)**

Field reporting and news writing for print and Web applications. Instruction in community coverage, reporter responsibility, ethics and news values. May be repeated up to 3 credits.

Prerequisite(s): JOUR 210.

JOUR 312. Advertising/Copywriting**3 Credits (3)**

Creative process, strategic thinking, and principles of advertising in execution of copy, storyboards, and layouts for clients.

Prerequisite(s): JOUR 110 or consent.

JOUR 314. Broadcast Reporting**3 Credits (3)**

Writing, editing, producing, announcing and reporting of TV and radio news. May be repeated up to 3 credits.

Prerequisite(s): JOUR 210 or Consent of Instructor.

JOUR 315. News 22**1-3 Credits (1-3)**

Write, report, produce, anchor, shoot and edit video for live student television newscast airing on KRWG, public television for Southern New Mexico sports, weather, and news.

Prerequisite(s): JOUR 314 or JOUR 330 or instructor consent.

JOUR 317. News Editing**3 Credits (3)**

Extensive, directed practice in various aspects of computer editing for printed publication. Headline writing, copy editing, design, and layout.

Prerequisite(s): JOUR 210.

JOUR 319. Intro Photography**3 Credits (3)**

Introduction to photography emphasizing composition, basic camera technique, language of photography and storytelling. Photojournalism emphasis. Basic camera and processing techniques and skills. May be repeated up to 3 credits.

JOUR 320. Photojournalism**3 Credits (3)**

Communication photography for magazine, news, advertising/public relations and other communication needs. Digital Photography, lighting techniques, photo-editing software, and web site skills. Students provide camera and flash. May be repeated up to 3 credits.

Prerequisite(s): JOUR 319 or Consent of instructor.

JOUR 321. Media Graphic Design**3 Credits (3)**

Concepts and design skills useful for all aspects of journalism - print media and newsletters, basics of Photoshop and introduction to Web design. May be repeated up to 3 credits.

JOUR 330. TV News Shooting & Editing**3 Credits (2+4P)**

Overview of technical and aesthetic skills and journalism basics needed for shooting and editing on-location news productions. Single camera videography and nonlinear/digital editing. May be repeated up to 3 credits.

Prerequisite(s): JOUR 302 or permission of instructor.

JOUR 350. Media History**3 Credits (3)**

Historical overview of mass media with emphasis on roots of journalism, technological developments, and American role in international media. May be repeated up to 3 credits.

JOUR 374. Introduction to Public Relations**3 Credits (3)**

Introduction to public relations as a communication process that builds relationships between organizations and their publics. Explores basic techniques, strategies, and tactics used in businesses, nonprofits, and in government.

Prerequisite(s): JOUR 110.

JOUR 377V. Mass Media Ethics**3 Credits (3)**

Philosophical and moral examination of problems relating to mass media. Use of case study method to analyze media situations; development of framework for media professionalism.

JOUR 380. Women and the Media**3 Credits (3)**

Portrayal and participation of women in mass media from colonial to contemporary times. Same as GNDR 450. May be repeated up to 3 credits.

JOUR 384. Branding and Storytelling in IMC**1-3 Credits (1-3)**

Introduction to the concept of using PR as a tool for creating branding. Through the concept of storytelling on traditional and social media, this class addresses the importance of branding by PR under IMC context. In addition to this, it also includes how to use a variety of effective, strategic media materials produced by public relations practitioners, under the concept of branding.

Prerequisite(s): JOUR 210 and JOUR 374.

Learning Outcomes

1. Students will learn the actual role of PR under the concept of branding in IMC.
2. They will be able to apply this concept to the actual brands and will be able to create PR messages under branding.

JOUR 407. Media Internship**1-3 Credits (1-3)**

Supervised work with a media organization. 1-3 credits. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: JOUR majors.

Prerequisite(s): Consent of internship coordinator.

JOUR 408. Media Practicum**1-3 Credits**

Advanced supervised work with a media organization. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Consent of internship coordinator.

JOUR 412. Documentary Photojournalism**3 Credits (3)**

Production of documentary photography for web, print, books and exhibition emphasizing storytelling techniques. Multimedia and Web site techniques. Field Trips to produce material for the Small Village New Mexico project (SVNM). Produce Term projectbook. May be repeated up to 3 credits.

Prerequisite(s): JOUR 319.

JOUR 414. RTV Scriptwriting/Performance**3 Credits (3)**

Writing and delivery of news scripts for radio and television. Focus on anchoring announcing, voice technique and performance. May be repeated up to 3 credits.

Prerequisite(s): JOUR 314 or consent of instructor.

JOUR 425. Media Planning and Buying**3 Credits (3)**

Covers the principles of media planning for an IMC campaign and procedures for purchasing ad time or space.

Prerequisite(s): JOUR 300 or consent of instructor.

JOUR 427. Multimedia Publishing**3 Credits (3)**

Advanced multimedia reporting and editing for online news publication. Preparation of professional news portfolios and resumes. Capstone for News/Editorial sequence. May be repeated up to 3 credits. Consent of instructor required.

Prerequisite(s): JOUR 310.

JOUR 457. Social Media Management and Analytics**3 Credits (3)**

This course is designed to help students to understand how marketing has (and has not) changed due to the rise of social media and changes in various underlying contextual factors, such as dramatically increased speed of information dissemination across consumers and brands. The overarching goal is to obtain a clear perspective on what's really going on in digital/social/mobile marketing so that you can begin to appreciate its true value to consumers, to managers, and to other corporate stakeholders. It will equip students with the relevant knowledge, perspectives, and practical skills required to develop marketing strategies that leverage the opportunities inherent in social media and consumer-to-consumer social interactions for achieving business and marketing goals.

Prerequisite: JOUR 374.

Learning Outcomes

1. Understand what social media is and how this new type of media and communications technology influences how business and marketing is done
Develop skill in using the predominant social media tools currently available for business/marketing communication Understand how to use various social media channels to publish and disseminate relevant branded content in order to engage consumers and to increase social impact, influence, and value Develop a strategic plan for identifying opportunities for using social media in a company

JOUR 460. Sports & Entertainment P.R.**3 Credits (3)**

Introduction to a wide range of persuasive activities, strategies, tactics and media materials produced by public relations practitioners employed by sports and entertainment organizations. May be repeated up to 3 credits.

JOUR 470. Strategic Corporate Social Responsibility Marketing**3 Credits (3)**

This course will explore how corporates create values, broadly defined, by investigating the concept of strategic corporate social responsibility (Strategic CSR) in the light of public relations. Strategic CSR draws on what we know about economic exchange and human psychology to explain how markets work (or don't) and how value is added (or subtracted) across the range of the firm's stakeholders. Understanding these processes allows managers to build a strategic competitive advantage for the firm. Thus, Strategic CSR is at the center of business success in the 21st century.

Prerequisite: JOUR 374.

Learning Outcomes

1. Understand the basic concepts and elements of Strategic Corporate Social Responsibility (Strategic CSR). Understand company's value-creating activities through strategic CSR. Understand company's CSR strategy under the context of economical and social exchanges Understand the process of creating comprehensive strategic CSR communications plan

JOUR 476. Public Relations Campaigns**3 Credits (3)**

Utilizing the principles and techniques of public relations to research and develop a comprehensive plan for a long-term national, regional, or local campaign. May be repeated up to 3 credits. Restricted to: Restricted to Journalism majors.

Prerequisite(s): JOUR 210, JOUR 374.

JOUR 489. Media Research**3 Credits (3)**

Examination of the role of empirical research in solving mass communication problems. Survey techniques, field studies, content analysis, data analysis. May be repeated up to 3 credits.

JOUR 490. IMC Campaign**3 Credits (3)**

Capstone course utilizing all previous instruction to create and develop plans for a long-term national or local IMC (Integrated Marketing Communications) campaign. May be repeated up to 3 credits. Consent of instructor required.

Prerequisite(s): JOUR 300 and 312 or consent of instructor.

Learning Outcomes

1. Students will learn how to create IMC campaign for client or for brands, and will be able to apply this for the real world when they apply for job.

JOUR 493. Media Law**3 Credits (3)**

Examination of legal issues relating to mass media in the United States. Invasion of privacy, libel, sedition, copyright, and advertising regulation. Same as COMM 493, POLS 493. May be repeated up to 3 credits.

JOUR 494. Special Topics**3 Credits (3)**

Specific subjects to be announced in the Schedule of Classes.

JOUR 495. Media Theory**3 Credits (3)**

Theoretical approaches to media communications. Examination of media effects, audiences, and media socialization May be repeated up to 3 credits.

JOUR 499. Independent Study in Media**1-3 Credits**

Individual study directed by consenting instructor with prior approval of department head. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s): 2.5 GPA and consent of instructor.

JPNS-JAPANESE

JPNS 320. Oral Practicum in Japanese**1-3 Credits**

Service training for facilitators leading informal conversation groups in Japanese. May be repeated for a maximum of 4 credits.

Prerequisites: fluency in Japanese and consent of instructor.

JPNS 453. Independent Studies in Japanese**1-3 Credits (1-3)**

Individualized, self-paced projects for advanced students.

L SC-LIBRARY SCIENCE

L SC 100. Introduction to Libraries**3 Credits (3)**

Overview of libraries, including history and development, responsibilities of library personnel, types of libraries and services, and technology and trends. Restricted to Dona Ana campus only.

L SC 110. Reference and Information Resources I**3 Credits (3)**

Overview of reference services. Introduction to, and evaluation of, basic types of information resources (both print and electronic) and their application in libraries.

L SC 111. Introduction to Information Literacy in an Electronic Environment**3 Credits (3)**

Introduction to the basics of the research process; the organization, location and evaluation of information using print, non-print and electronic resources. Restricted to: Community Colleges only.

L SC 120. Cataloging Basics I: Descriptive Cataloging**3 Credits (3)**

Introduction to descriptive cataloging. Restricted to: Dona Ana campus only.

L SC 130. Introduction to Technical Services in Libraries**3 Credits (3)**

Introduction to technical services in libraries, including acquisitions, bindery, cataloging, gifts, and serials. Restricted to Dona Ana campus only.

L SC 140. Multimedia Materials and Presentations in Libraries**3 Credits (3)**

Overview of media formats and equipment. Introduction to desktop publishing, presentations, and web-page creation applications in libraries. Restricted to: Community Colleges only.

L SC 160. Introduction to Public Services in Libraries**3 Credits (3)**

Introduction to public services in libraries, including circulation, inter-library loan, reference, media services, special collections, and government documents. Restricted to Dona Ana campus only.

L SC 175. Civic Involvement in Library Science**1-3 Credits**

Involvement in an organized community service project or group with a library or information technology component. Promotes awareness of volunteer and community service opportunities. May be repeated for a maximum of 6 credits. Graded: S/U. Restricted to: Dona Ana campus only.

L SC 200. Collection Management and Development in Libraries**3 Credits (3)**

Principles of identifying, selecting, acquiring, managing, and evaluating resources for libraries. Restricted to Dona Ana campus only.

L SC 203. School Library Media Specialist**3 Credits (3)**

Principles and practice of managing the school library media center, with an emphasis on its specific educational mission. Topics may include collection development, classes and lesson plans, public relations, administrative procedures, and use of technology. Restricted to Dona Ana campus only.

L SC 210. Technology Planning in Libraries**3 Credits (3)**

Overview of computer applications in libraries. Topics may include automated systems and electronic resources, introduction to evaluation of technology, and writing a technology plan. Restricted to Dona Ana campus only.

L SC 221. Experiential Learning I**1-3 Credits**

Student is employed (paid or non-paid) in an approved work site and evaluated by their supervisor. Each credit requires a specified number of hours of on-the job work experience. Consent of Instructor required. Graded: S/U Grading (S/U, Audit). Restricted to Dona Ana campus only.

Prerequisite(s): Consent of instructor.

L SC 230. Issues and Ethics in Libraries**3 Credits (3)**

Discussions of current and continuing challenges to effective library service. Topics may include copyright, censorship, intellectual freedom, Internet filtering, problem patrons, security, or other current issues. Restricted to Dona Ana campus only.

L SC 240. Internet Resources and Research Strategies**3 Credits (3)**

Introduction to retrieving and evaluating information found on the Internet and in selected Internet-accessible databases. Restricted to: Dona Ana campus only.

L SC 255. Special Topics**1-3 Credits**

Special topics to be announced in Schedule of Classes. May be repeated for a maximum of 12 credits. Restricted to: Dona Ana campus only.

L SC 270. Library Science Capstone**3 Credits (3)**

A culmination of all technical courses that are required to receive an Associate of Applied Science from the program centering around the completion of a library related project. Discussions on the role of paraprofessionals in libraries. Restricted to: Dona Ana campus only.

L SC 296. Multicultural Books for Children and Youth**3 Credits (3)**

This course explores a wide range of multicultural children's literature including: African American, Native American, Latino, Asian, Jewish, and Middle Eastern. Topics covered include: nonfiction of the cultures, historical fiction of the cultures, and contemporary literature of the cultures. Restricted to: Community Colleges only.

L SC 298. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with prior approval of department chair. May be repeated for a maximum of 12 credits. Restricted to: Dona Ana campus only.

LANG-LANGUAGE

LANG 111. Beginning Language I**4 Credits (4)**

Developing language skills through study abroad for languages not offered at NMSU main campus. Specific languages to be identified with course subtitles. Main campus only.

Prerequisite: Language placement exam or consent of the instructor.

LANG 451. Special Topics**1-3 Credits**

Selected topics relating to cultures or literatures of a specific country. Credit can be applied only towards fulfilling second language requirement. Credit is not accepted towards any graduate level major or minor. May be repeated for a maximum of 12 credits. Consent of instructor required.

LANG 453. Independent Studies**1-3 Credits**

Individualized, self-paced projects for advanced students. May be repeated under different subtitles for a maximum of 6 credits.

Prerequisite: consent of instructor.

LANG 490. Introduction to Yucatec Maya Language and Culture I**3 Credits (3)**

This course provides the student with an introduction to Yucatec Maya language and culture of Yucatan.

Learning Outcomes

1. students will be able to identify who and where Yucatec Maya is spoken, describe the sound system and basic syntax of the language, participate in basic introductory conversations and make connections between the language and culture of Yucatan.

LAWE-LAW ENFORCEMENT

LAWE 180. Public Safety First Line Supervisor**3-6 Credits (3-6)**

This course is designed to enhance public safety personnel's human resource management and reduce organizational liability. Consent of Instructor required. Restricted to Community Colleges campuses

Learning Outcomes

1. Describe and explain police administration.
2. Explain and discuss the various leadership and management theories.
3. Define and discuss the various types of leadership skills and management styles.
4. Express and discuss the role of the police administrator and police administration.
5. Explain the leadership required of police administrators for an effective Law Enforcement administration.
6. Describe and interpret the "quality approach to managing community relations"
7. Explain and discuss the necessities of introducing organizational change.
8. Explain and discuss the planning, programming and budgetary process including: variables that affect the decision-making process.
9. Analyze and discuss the role of effective communications in a police organization including negotiations and conflict resolution.
10. 1 Explain and analyze the role of human resources in the organization including: their role in the recruitment and selection process; training; performance evaluations; promotions; and assessment centers.
11. K) Discuss the role of police unions and explain their significance in labor relations.

LAWE 201. Introduction to Juvenile Delinquency**3 Credits (3)**

An introductory overview of the juvenile justice system of due process, custody, detention and release. Note: course does not meet upper division requirements towards completion of Bachelor of Science in Criminal Justice. Restricted to: Community Colleges Only.

LAWE 202. Police Patrol Procedures**3 Credits (3)**

A critical review of police procedures and the influences on police behavior; policy development, including the police role; discretion; police community interaction and arrest, search and seizure. Restricted to: Community Colleges only.

LAWE 203. Introduction to Police Supervision**3 Credits (3)**

An introductory overview of police supervision and concerns as it applies to law enforcement. (Note: Course does not meet upper division requirements toward completion of Bachelor of Science in Criminal Justice.) Restricted to: Community Colleges only.

LAWE 204. Introduction to Homeland Security**3 Credits (3)**

A historical perspective of international and domestic terrorist threats and the need to develop cohesive response policies and practices in the interest of National Security. [Course does not meet requirements towards completion of Bachelor of Science in Criminal Justice.] Restricted to: Community Colleges only.

Prerequisite(s): CJUS 1110G.

LAWE 205. Practical Field Investigations**4 Credits (3+3P)**

Incorporates the current methods and techniques for the management of the crime scene, includes documentation, collection and preservation of evidence and case presentations. [Course does not meet requirements towards completion of Bachelor of Science in Criminal Justice.] Restricted to Community Colleges campuses only.

Prerequisite(s): CJUS 1110G and CJUS 2140.

LAWE 206. Traffic Enforcement and Crash Investigations**3 Credits (3)**

History and development of traffic laws and regulations, including basic elements of traffic violations, detection, apprehension, impaired drivers and guidelines and procedures for effective crash investigations and reporting. Restricted to: Community Colleges only.

LAWE 207. Legal Aspects of Law Enforcement**3 Credits (3)**

An evaluation of police authority including responsibilities, civil liability, liability implications, legal obligations, legal restraints, laws of arrest, and search and seizure. Restricted to: Community Colleges only.

LAWE 221. Law Enforcement Internship**3 Credits (3)**

Application of knowledge, skills and abilities, in an agency as an intern and integrated member of a law enforcement affiliated agency.

Prerequisite: consent of instructor.

LAWE 233. Practical Approach to Terrorism**3 Credits (3)**

Gives responders an overall safety approach in recognizing and responding to incidents involving terrorism. Presents and overview in types of harm, explosive weapons, chemical weapons, biological weapons and radiological weapons. [Course does not meet requirements towards completion of Bachelor of Science in Criminal Justice.] Restricted to: Dona Ana campus only. Crosslisted with: FIRE 233

LAWE 255. Special Topics**1-3 Credits (1-3)**

Introductory special topics of lower division level work that provides a variety of timely subjects and content material. Specific subjects to be announced in the Schedule of Classes. A passing grade of C- or better is required. May be repeated up to 6 credits. Consent of Instructor required. Restricted to Community Colleges campuses

Learning Outcomes

1. Obtaining foundational skills in the administration of justice by differentiating the role of police and corrections in contemporary America.
2. Competence in the legal elements of constitutional, criminal, and substantive law, rules of evidence, search and seizure, and the role of the courts in the adjudication of the law in America.
3. Ability to identify, analyze, and synthesize knowledge from discipline-specific courses in criminalistics, legal aspects, homeland security, terrorism, and patrol operations to effectively conduct a practical field investigation and traffic crash investigation.
4. Ability to develop a criminal justice ethical perspective consistent with 21st century America to, effectively and ethically, perform a criminal justice role in law enforcement or corrections.
5. Basic crime scene management, crime scene note-taking techniques, collection of evidence, and case presentations.
6. An application of knowledge, skills, and abilities, as an intern or integrated member of a criminal justice affiliated agency.

LAWE 298. Independent Study**3 Credits (3)**

Individual studies directed by the consenting faculty with prior approval of the department chair. A passing grade of C- or better is required. May be repeated up to 6 credits. Consent of Instructor required. Restricted to Community Colleges campuses

Prerequisite(s): Sophomore standing with a 3.0 or better GPA.

Learning Outcomes

1. Obtaining foundational skills in the administration of justice by differentiating the role of police and corrections in contemporary America.
2. Competence in the legal elements of constitutional, criminal, and substantive law, rules of evidence, search and seizure, and the role of the courts in the adjudication of the law in America.
3. Ability to identify, analyze, and synthesize knowledge from discipline-specific courses in criminalistics, legal aspects, homeland security, terrorism, and patrol operations to effectively conduct a practical field investigation and traffic crash investigation.
4. Ability to develop a criminal justice ethical perspective consistent with 21 st century America to, effectively and ethically, perform a criminal justice role in law enforcement or corrections.
5. Basic crime scene management, crime scene note-taking techniques, collection of evidence, and case presentations.
6. An application of knowledge, skills, and abilities, as an intern or integrated member of a criminal justice affiliated agency.
7. Effective communication, orally and in writing, using appropriate references and technologies.
8. Analytical and critical thinking skills when solving complex issues in criminology and the criminal justice system.
9. Competence using and applying appropriate criminological theories on crime causation.
10. 1 Competence in understanding and describing how gender, race, ethnicity, age, social class, and sexuality contribute to differing experiences in the criminal justice system.
11. 1 Competence in understanding how the inter-dependence of the major components of the criminal justice system (i.e., police, courts, correctional agencies) affect victims, offenders, justice professionals, and society.
12. 1 Competence in understanding and applying the fundamental elements of both criminal and constitutional law.
13. 1 Competence in the legal foundation of criminal justice and the importance of due process.

LIBR-LIBRARY SCIENCE

LIBR 1110. Introduction to Research

1 Credit (1)

The goal of this course is to provide students with techniques and tools to become better researchers. This course introduces students to the research process, and the organization, location, and evaluation of information.

Learning Outcomes

1. Develop a research plan based on an information need.
2. Find information efficiently and effectively using a variety of search tools.
3. Evaluate the reliability of an information resource.
4. Practice ethical behavior in using information.

LIBR 1111. Introduction to Information Literacy in an Electronic Environment

3 Credits (3)

Introduction to the basics of the research process; the organization, location and evaluation of information using print, non-print and electronic resources; and techniques of effective personal information management in a computerized setting. Uses a combination of active and hands-on learning methods as well as lectures.

Learning Outcomes

1. Develop a discipline-specific research guide based on an established subject area. Select appropriate information sources and use them to find information efficiently. Evaluate information and its sources. Practice ethical behavior in using information.

LIBR 311V. Information Literacy

3 Credits (3)

Lecture, hands-on assignments, and written research projects to give students the technological skills and critical thinking abilities needed to use the printed and electronic information resources found on the Information Highway. Includes how to locate, critically evaluate, and apply information for academic, professional, and personal purposes.

Prerequisite: ENGL 1110G or equivalent; and consent of instructor.

LING-LINGUISTICS

LING 2110G. Introduction to the Study of Language and Linguistics

3 Credits (3)

This course presents an introduction to the study of language through the basic aspects of linguistic analysis: the sound system (phonetics and phonology), the structure of words and sentences (morphology and syntax), and the ways in which language is used to convey meaning (semantics and pragmatics). In addition, the course will investigate how language is acquired and stored in the brain, and how differences in speech styles and dialects reflect different social and cultural backgrounds of individual speakers.

Learning Outcomes

1. Understand the basic concepts and terminology associated with phonetics, phonology, morphology, syntax, semantics, and pragmatics.
2. Comprehend how language evolves over history and over an individual's lifespan.
3. Describe some common, but mistaken, beliefs about language and to distinguish between descriptive and prescriptive approaches to language.
4. Describe the social, psychological, geographic and historical influences that lead to language dominance or language endangerment.
5. Be aware of the relations among various languages in the world, between dialects and slang, and between human and non-human languages.
6. Apply methods of linguistic analysis as introduced in the course.
7. Critically engage with the works of linguistic researchers.
8. Stimulate curiosity about language and what it reveals about the human mind.

LING 301. Introduction to Psycholinguistics

3 Credits (3)

Psychological aspects of language, including linguistic theories of grammar, psychological factors influencing language performance, primary language acquisition and the relationship of language to thought processes. Same as PSYC 301.

LING 302V. Language and Society

3 Credits (3)

Study of how social identity including such factors as ethnicity, age, sex, education, power and socio-economic class is expressed in language systems and how misunderstandings arise between groups. Research skills are emphasized.

LING 303. Exploring Language Systems

3 Credits (3)

Forms of linguistic semantic, syntactic and phonological organization.

Prerequisite(s): LING 2110G.

LING 405. Topics in Linguistics**3 Credits (3)**

Selected linguistics topics subtitled in the Schedule of Classes. May be repeated for a maximum of 6 credits under different subtitles.

Prerequisite: consent of instructor.

LING 425. Language and the Mind: Introduction to Psycholinguistics**3 Credits (3)**

This course is an introduction to psycholinguistics; the study of how humans learn, represent, comprehend and produce language. Throughout this course, we address a variety of questions on the psychology of language most of which are still being answered. These include: What does it mean to know a language? What are the cognitive processes involved in language use? How do we produce and recognize speech? How can we improve texts and make them easier to read? How can we control speech in special situations to avoid errors?

Prerequisite(s): LING 2110G or consent of instructor.

LING 451. Independent Studies in Linguistics**1-3 Credits**

Individual or group study of selected topics to be identified by subtitle. May be repeated for a maximum of 6 credits.

Prerequisites: LING 2110G and prior arrangement with faculty supervisor.

LING 455. Research in Linguistics**3 Credits (3)**

This course will provide a capstone experience for students who have progressed through the program in linguistics and provide the foundation for further study at the post-graduate level in a linguistics-related field. Students will apply their foundation of knowledge and skills in linguistics through the realization of an individualized, inquiry-based project. Consent of instructor may enroll student only in case of elective credit shortfall with concurrent enrollment.

Prerequisite(s): LING 2110G, LING 301, LING 302V, LING 303, plus 9 credit hours of related electives.

LING 500. Introduction to Linguistics**3 Credits (3)**

Survey of the main branches of linguistics: phonology, morphology, syntax, semantics, language acquisition, sociolinguistics, historical linguistics and some of the theoretical issues in the field.

LING 502. Graduate Study in Sociolinguistics**3 Credits (3)**

Study of how social identity including factors such as ethnicity, age, gender education and socio-economic class is expressed in language systems.

Prerequisites: LING 2110G or LING 500 recommended.

LING 503. Exploring Language Systems- Grad**3 Credits (3)**

Students will be responsible for all requirements of LING 303 and will undertake independent, directed research.

Prerequisite(s): LING 2110G or LING 500.

LING 505. Selected Topics**3 Credits (3)**

Studies, varying from year to year, in linguistics.

M E-MECHANICAL ENGINEERING

M E 159. Graphical Communication and Design**2 Credits (1+3P)**

Sketching and orthographic projection. Covers detail and assembly working drawings, dimensioning, tolerance specification, and design projects.

Prerequisite(s)/Corequisite(s): MATH 1250G.

M E 210. Electronics and System Engineering**3 Credits (2+3P)**

Introduction to microcontrollers, measurement systems, motion actuators, sensors, electric circuits, and electronic devices and interfacing. Students required to work individually and in teams to design and test simple electromechanical systems. Restricted to Las Cruces campus only.

Prerequisite: MATH 1521G or MATH 1521H or ENGR 190.

Learning Outcomes

1. Ability to apply knowledge of mathematics, science, and engineering;
2. Ability to design and conduct experiments, as well as to analyze and interpret data;
3. Ability to design a system, component or process to meet desired needs within realistic constraints;
4. Ability to identify, formulate, and solve engineering problems;
5. Ability to use the techniques, skills and modern tools necessary for engineering practice.

M E 222. Introduction to Product Development**3 Credits (2+3P)**

Introduction to modern methods used in the realization of products. Traditional manufacturing processes, such as metal stamping, turning, milling, and casting are reviewed. Modern methods of rapid prototyping and model making are discussed in context of computer-aided design. Techniques for joining metals, plastics, and composites are discussed. Role of quality control is introduced. May be repeated up to 3 credits. Restricted to: exclude majors.

Prerequisite(s): M E 159 or E T 110.

M E 228. Engineering Analysis I**3 Credits (3)**

Introduction to engineering analysis with emphasis on engineering applications. Topics include ordinary differential equations, linear algebra, and vector calculus with focus on analytical methods. Restricted to Las Cruces campus only.

Prerequisite(s): MATH 2530G.

M E 234. Mechanics-Dynamics**3 Credits (3)**

Kinematics and dynamic behavior of solid bodies utilizing vector methods.

Prerequisite(s)/Corequisite(s): MATH 2530G. **Prerequisite(s):** C E 233.

M E 236. Engineering Mechanics I**3 Credits (3)**

Force systems, resultants, equilibrium, distributed forces, area moments, friction, and kinematics of particles. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): PHYS 1310G. **Prerequisite(s):** MATH 1521G or MATH 1521H.

M E 237. Engineering Mechanics II**3 Credits (3)**

Kinetics of particles, kinematics and kinetics rigid bodies, systems of particles, energy and momentum principles, and kinetics of rigid bodies in three dimensions. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 2530G. **Prerequisite(s):** M E 236.

M E 240. Thermodynamics**3 Credits (3)**

First and second laws of thermodynamics, irreversibility and availability, applications to pure substances and ideal gases.

Prerequisite: PHYS 1310G.

M E 261. Mechanical Engineering Problem Solving**3 Credits (2+3P)**

Introduction to programming syntax, logic, and structure. Numerical techniques for root finding, solution of linear and nonlinear systems of equations, integration, differentiation, and solution of ordinary differential equations will be covered. Multi function computer algorithms will be developed to solve engineering problems.

Prerequisite: MATH 1521G or MATH 1521H or ENGR 190.

Learning Outcomes

1. Ability to apply knowledge of mathematics, science, and engineering;
2. Ability to identify, formulate, and solve engineering problems;
3. Ability to use the techniques, skills and modern tools necessary for engineering practice.

M E 326. Mechanical Design**3 Credits (3)**

Design methodology and practice for mechanical engineers.

Prerequisite: (M E 237 or ENGR 234) and C E 301.

Learning Outcomes

1. Ability to design a system, component or process to meet desired needs within realistic constraints;
2. Ability to function on multidisciplinary teams;
3. Understanding of professional and ethical responsibility;
4. knowledge of contemporary issues.

M E 328. Engineering Analysis II**3 Credits (3)**

Advanced engineering analysis with emphasis on engineering applications. Topics include systems of ordinary differential equations, Fourier analysis, partial differential equations, and functions of complex variable with focus on analytical methods. May be repeated up to 3 credits.

Prerequisite(s): M E 228.

M E 331. Intermediate Strength of Materials**3 Credits (3)**

Covers stress and strain, theories of failure, curved flexural members, flat plates, pressure vessels, buckling, and composites. May be repeated up to 3 credits.

Prerequisite(s): C E 301 and M E 328.

M E 332. Vibrations**3 Credits (3)**

Vibration of single and n-degree of freedom systems considering free, forced, and damped motion. Lagrange s equations. Dynamic stability. Controls. Matrix iteration. May be repeated up to 3 credits.

Prerequisite(s): M E 328, M E 237, and M E 261.

M E 333. Intermediate Dynamics**3 Credits (3)**

Three dimensional kinematics and kinetics, orbal motion, Lagrange s equations, dynamic stability, and controls. May be repeated up to 3 credits.

Prerequisite(s): M E 328 and M E 237.

M E 338. Fluid Mechanics**3 Credits (3)**

Properties of fluids. Fluid statics and fluid dynamics. Applications of the conservation equations continuity, energy, and momentum to fluid systems. Restricted to: M E majors.

Prerequisite: (M E 237 or ENGR 234) and (M E 228 or PHYS 395).

Learning Outcomes

1. Ability to apply knowledge of mathematics, science, and engineering;
2. Ability to design and conduct experiments, as well as to analyze and interpret data;
3. Ability to design a system, component or process to meet desired needs within realistic constraints;
4. Ability to identify, formulate, and solve engineering problems.

M E 340. Applied Thermodynamics**3 Credits (3)**

Thermodynamic cycles, Maxwell relations, Gibbs and Helmholtz functions, mixtures, psychometrics, chemical reactions, chemical equilibrium.

Prerequisite: M E 240.

M E 341. Heat Transfer**3 Credits (3)**

Fundamentals of conduction, convection, and radiation. Design of heat transfer systems.

Prerequisite: M E 240, (M E 338 or A E 339), and (M E 228 or PHYS 395).

Learning Outcomes

1. Students have the ability to apply knowledge of mathematics, science, and engineering;
2. Students have the ability to identify, formulate, and solve engineering problems.

M E 345. Experimental Methods I**3 Credits (2+3P)**

Emphasis on experimental techniques, basic instrumentation, data acquisition and analysis, and written presentation of results. Includes experiments in dynamics and deformable body mechanics.

Prerequisite: (M E 228 or PHYS 395), (M E 210 or PHYS 2140), and (M E 237 or ENGR 234).

Prerequisite/Corequisite: C E 301.

Learning Outcomes

1. Ability to design and conduct experiments, as well as to analyze and interpret data;
2. Ability to communicate effectively;
3. Ability to use the techniques, skills and modern tools necessary for engineering practice.

M E 349. MAE Career Seminar**1 Credit (1)**

Seminar course covering topics relevant to mechanical and aerospace engineering juniors (job placement, interviewing techniques, resume preparation, etc.). Restricted to: M E and A E majors.

Prerequisite(s): Junior Standing.

M E 400. Undergraduate Research**1-3 Credits**

Performed with the direction of a department faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of faculty member.

M E 401. Heating/Air-Conditioning System**3 Credits (3)**

HVAC system design including heating and cooling load calculations, psychometrics, piping, duct layout, and system control. May be repeated up to 3 credits.

Prerequisite(s): M E 340 and M E 341.

M E 405. Special Topics**3 Credits (3)**

Topics of modern interest to be offered by the departmental staff. May be repeated up to 12 credits.

Prerequisite(s): Senior standing.

M E 425. Design of Machine Elements**3 Credits (3)**

Design of machine elements through the application of mechanics. Fatigue and theories of failure. Design projects assigned.

Prerequisite(s): M E 326.

M E 426. Design Project Laboratory I**3 Credits (6P)**

Students address a design problem in which innovation and attention to detail are emphasized. Solution of the problem entails applications of mechanics and/or the thermal sciences.

Prerequisite(s)/Corequisite(s): M E 425.

M E 427. Design Project Laboratory II**3 Credits (6P)**

Continuation of M E 426.

Prerequisite: M E 426.

M E 445. Experimental Methods II**3 Credits (2+3P)**

Emphasis on experimental techniques, instrumentation and data acquisition in fluid mechanics, heat transfer, and thermodynamics. Laboratory results will be presented in written and verbal formats.

Prerequisite(s): (M E 338 or A E 339), M E 340, M E 341, and M E 345.

M E 449. Mechanical Engineering Senior Seminar**1 Credit (1)**

Senior seminar course covering topics relevant to graduating mechanical engineering seniors (job placement, interviewing techniques, resume preparation).

Prerequisite: senior standing.

M E 452. Control System Design**3 Credits (3)**

Introduction to the control of dynamical systems, with a focus on mechanical and aerospace systems, including basic systems theory, controllability / observability, feedback and stabilization, PID controls, root-locus plot, and Bode diagram.

Prerequisite: M E 261, M E 328 and (M E 237 or ENGR 234) .

Learning Outcomes

1. Construct a block diagram to find a transfer function for a dynamical system; Analyze control systems by utilizing various linear control theories such as root-locus design method, bode / Nyquist plots, and lead / lag compensation techniques; Design and simulate automatic control systems for mechanical and aerospace engineering applications.

M E 456. Experimental Modal Analysis**3 Credits (3)**

Emphasis on hands-on techniques for structural vibration tests for practical applications. Interpretation of experimental results by means of advanced signal processing tools, basic system identification methodology, and reduced-order modeling procedures. May be repeated up to 3 credits.

Prerequisite(s): M E 332, M E 228, and M E 261, or consent of instructor.

M E 458. Properties and Mechanical Behavior of Materials**3 Credits (3)**

Understanding the microstructure of engineering materials and their influence on mechanical behavior. Topics include Material Structure and Physical Properties, Thermodynamics and Kinetics of Materials, Mechanical Properties, Strengthening Mechanisms, Time and Temperature Dependent Behavior, Degradation, Fatigue, and Fracture.

Prerequisite: CHME 361.

Learning Outcomes

1. Students will learn how to correlate mechanical behavior of materials with their microstructure, processing history and composition. As practicing engineers, they will be able to recognize impact of operating conditions, predict life span, and design materials to improve reliability and efficiency. They will be able to select appropriate materials for a given application from class of materials such as metals, polymers, ceramics and composites.

M E 460. Applied Finite Elements**3 Credits (3)**

Introduction to the practical aspects of structural finite element modeling. Course focuses on providing a working knowledge of how to effectively incorporate finite element techniques into the design process. May be repeated up to 3 credits. Crosslisted with: M E 518.

Prerequisite(s): M E 425.

M E 481. Alternative and Renewable Energy**3 Credits (3)**

Current and future energy needs of the United States and the world will be considered primarily from the standpoint of renewable energy sources such as solar, wind, ocean, and biomass. Technical, economic, and environmental aspects of each technology will be addressed.

Prerequisite(s): M E 341, and (M E 338 or A E 339).

M E 486. Introduction to Robotics**3 Credits (3)**

This course provides students with an introduction to the theories and methods for analysis, design, and control of robotic manipulators. This course is devoted to understanding the spatial descriptions and transformations, kinematics, and dynamics of these mechanisms and how to practically implement these concepts into actual robotic manipulators.

Prerequisite: M E 328 and (ENGR 234 or M E 237).

Learning Outcomes

1. Model and analyze the kinematics and dynamics of robotic manipulators; Program and control these robotic platforms; Apply the theoretical methods into industrial robots; Implement the knowledge and experiences in real-world engineering projects.

M E 487. Mechatronics**3 Credits (2+3P)**

Introduction to the analysis and design of computer-controlled electromechanical systems, including data acquisition and conversion, force and motion sensors, actuators, mechanisms, feedback control, and robotic devices. Students required to work in teams to construct and test simple robotic systems. May be repeated up to 3 credits.

Prerequisite(s): M E 210 and M E 345.

M E 502. Elasticity I**3 Credits (3)**

Introduction to stress tensor, strain tensor, constitutive law, energy theorems, plane stress and plane strain. Also covers torsion of shafts and propagation of stress waves in elastic solids.

M E 503. Thermodynamics**3 Credits (3)**

A comprehensive study of the first and second laws of thermodynamics, nonequilibrium processes, equations of state, and statistical thermodynamics.

M E 504. Continuum Mechanics**3 Credits (3)**

Basic introduction to the Mechanics of Continuous Media. Its aim is to prepare the student for more advanced courses in Solid and Fluid Mechanics. The topics to be covered include: introduction to Cartesian tensors, tensor algebra and calculus; Lagrangian and Eulerian kinematics; Cauchy and Piola-Kirchhoff stresses; general principles of conservation; constitutive theory for ideal fluids, Newtonian and non-Newtonian fluids, finite and linear elasticity.

M E 505. Fundamentals of the Theory of Plasticity**3 Credits (3)**

Basic concepts in continuum mechanics, equations of the plastic state, equations of elastic-plastic equilibrium, criteria for yielding, initial and subsequent yield surfaces, two-dimensional and axi-symmetric plasticity problems, dynamic problems.

Prerequisite(s): M E 502.

M E 509. Individualized Study**3 Credits (3)**

Individualized study covering specialized topics in mechanical and aerospace engineering. Consent of instructor required.

M E 510. Special Topics**1-6 Credits**

Topics in mechanical engineering. May be repeated for a maximum of 6 credits.

Prerequisite: consent of the department head.

M E 511. Dynamics**3 Credits (3)**

An advanced study of the dynamical behavior of systems of particles and rigid bodies, with emphasis on the theoretical background of dynamics.

M E 512. Vibrations**3 Credits (3)**

Free and forced vibrations for discrete and continuous systems with single or multiple degrees of freedom. Introduction to nonlinear and random vibration and solution techniques for such systems.

M E 517. Nonlinear Dynamics and Chaos**3 Credits (3)**

Singular points, periodic solutions, stability, and local bifurcations for ODEs and maps; phase space methods, invariant manifolds, and Poincare maps; nonsmooth, periodic, time-delay, and Hamiltonian systems; perturbation, averaging, and harmonic balance methods; center manifold reduction and normal forms; strange attractors, Liapunov exponents, attractor dimension; dissipative and Hamiltonian chaos

M E 518. Finite Element Analysis**3 Credits (3)**

Introduction to finite element method. Topics include mathematical modeling, variational formulation, shape functions, truss, beam, solid, and shell elements. Includes static, dynamic, and nonlinear analysis. May be repeated up to 3 credits. Crosslisted with: M E 460.

M E 527. Linear Systems Theory**3 Credits (3)**

Introduction to control of linear multi-input-multi-output (MIMO) systems. Topics include representation of system dynamics using the state-space model, linearization, internal and input-to-output stability, controllability, observability, optimal control, linear quadratic regulator, and observer.

Prerequisite: (M E 452 or A E 452) equivalent, or consent of instructor.

Learning Outcomes

1. Students are able to design linear multi-input-multi-output (MIMO) control systems.

M E 529. Nonlinear and Optimal Control**3 Credits (3)**

Introduction to nonlinear systems and optimal control theory and its mathematical foundations. Includes equilibrium finding, phase plane analysis, Lyapunov stability theorems, feedback linearization, Pontryagin's maximum principle, necessary conditions and sufficient conditions for optimality, and optimal control problems in mechanical and aerospace engineering.

Prerequisite: (M E 452 or A E 452) or equivalent or consent of instructor.

Learning Outcomes

1. Analyze the stability and performance properties of nonlinear systems and design nonlinear feedback control systems; Use optimal control theory and numerical optimization methods to solve engineering problems; Design and simulate nonlinear and optimal control systems for mechanical and aerospace engineering applications.

M E 530. Intermediate Fluid Mechanics**3 Credits (3)**

Application of exact and empirical solutions to fundamental flow problems, including viscous and inviscid behavior. These applications establish a theoretical basis for the origin and physical role of common terms in the governing equations.

M E 533. Computational and Theoretical Fluid Mechanics**3 Credits (3)**

Application of fluid mechanics theory and computational approaches to advanced flow problems, including viscous/inviscid and laminar/turbulent behavior. Complex flow problems addressed through development of a theoretical formulation, followed by application of computational fluid dynamic (CFD) tools, and finally presentation and validation of solution data.

Prerequisite: M E 530 or consent of instructor.

M E 534. Advance Computational Fluid Dynamics**3 Credits (3)**

Advanced techniques for large-scale numerical simulations of fluid flows: spectral numerical methods, including Fourier and other expansions, Galerkin and collocation projections, computational methods to solve incompressible and compressible Navier-Stokes equations, high-resolution methods for hyperbolic equations with discontinuous solutions, and issues related to implementation on supercomputers.

Prerequisite(s): M E 533.

M E 536. Hydrodynamic Stability and Turbulence**3 Credits (3)**

Introduction to fundamentals of hydrodynamic stability, classical linear stability analysis of parallel shear flows and rotating flows, nonlinear stability, basic concepts in turbulence theory

Prerequisite(s): M E 533.

M E 540. Intermediate Heat Transfer**3 Credits (3)**

Fundamentals of conduction, convection, and radiation heat transfer. Emphasis on the application of combined heat transfer to the solution of problems not accessible at the undergraduate level.

M E 558. Properties and Mechanical Behavior of Materials**3 Credits (3)**

Understanding the microstructure of engineering materials and their influence on mechanical behavior. Topics include Material Structure and Physical Properties, Thermodynamics and Kinetics of Materials, Mechanical Properties, Strengthening Mechanisms, Time and Temperature Dependent Behavior, Degradation, Fatigue, and Fracture.

Prerequisite: CHME 361.

M E 570. Engineering Analysis I**3 Credits (3)**

Introduction to engineering analysis with emphasis on engineering applications. Topics include linear algebra, linear ordinary differential equations, and linear partial differential equations with focus on analytical methods.

M E 580. Engineering Analysis II**3 Credits (3)**

Engineering analysis with emphasis on engineering applications. Topics include analytical and numerical methods in linear and nonlinear ordinary and partial differential equations.

Prerequisite: M E 570 or consent of instructor.

M E 586. Introduction to Robotics**3 Credits (3)**

This course provides students with an introduction to the theories and methods for analysis, design, and control of robotic manipulators. This course is devoted to understanding the spatial descriptions and transformations, kinematics, and dynamics of these mechanisms and how to practically implement these concepts into actual robotic manipulators.

Prerequisite: M E 328 and (ENGR 234 or M E 237).

M E 587. Mechatronics**3 Credits (2+3P)**

Introduction to the analysis and design of computer-controlled electromechanical systems, including data acquisition and conversion, force and motion sensors, actuators, mechanisms, feedback control, and robotic devices. Students required to work in teams to construct and test simple robotic systems. Crosslisted with: M E 487.

M E 598. Special Research Programs**1-3 Credits**

Individual investigations, either analytical or experimental. May be repeated for a maximum of 6 credits.

M E 599. Master's Thesis**15 Credits**

Thesis.

M E 600. Doctoral Research**1-15 Credits**

This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination.

M E 698. Special Research Programs**1-3 Credits**

May be repeated for a maximum of 6 credits.

M E 700. Doctoral Dissertation**15 Credits**

Dissertation.

M SC-MILITARY SCIENCE

M SC 110. Introduction to Military Science**2 Credits (2+1P)**

Introduction to the Army, the Profession of Arms, and critical thinking. Students will examine the Army Profession and what it means to be a professional in the U.S. Army. The overall focus is on developing basic knowledge and comprehension of the Army Leadership Requirements Model while gaining a complete understanding of the Reserve Officers' Training Corps (ROTC) program, its purpose in the Army, and its advantages for the student. Cadets also learn how resiliency and fitness supports their development as an Army leader. Includes a weekly lab facilitated by MSL III Cadets and supervised by Cadre. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

M SC 110 L. Introduction to Military Science Lab**1 Credit (1P)**

Planning, coordination, execution and evaluation of training and activities in a collaborative training environment with both basic and advanced course students from within the ROTC program. Students develop and refine leadership skills in positions of responsibility. Restricted to Las Cruces campus only.

Prerequisite(s): MSC 110.

M SC 111. Introduction to Leadership**2 Credits (2+1P)**

Introduction to the personal challenges and competencies that are critical for effective leadership. Students learn how the personal development of life skills such as critical thinking, time management, goal setting, and communication contribute to effective leadership. Students learn the basics of the communications process and the importance for leaders to develop the essential skills to effectively communicate in the Army. Students will begin learning the basics of squad level tactics that will be reinforced during a weekly lab facilitated by MSL III Cadets and supervised by Cadre. May be repeated up to 2 credits. Restricted to Las Cruces campus only.

M SC 111 L. Introduction to Leadership Lab**1 Credit (1P)**

Planning, coordination, execution and evaluation of training and activities in a collaborative training environment with both basic and advanced course students from within the ROTC program. Students develop and refine leadership skills in positions of responsibility. Restricted to Las Cruces campus only.

Prerequisite(s): MSC 111.

M SC 210. Self/Team Development**3 Credits (3+1P)**

A focus on leadership and decision making. The course adds depth to the student's understanding of the Adaptability Army Learning Area. Outcomes are demonstrated through Critical and Creative Thinking and the ability to apply Troop Leading Procedures (TLP) to apply Innovative Solutions to Problems. The Army Profession is also stressed through leadership forums and a leadership self-assessment. Students are then required to apply their knowledge outside the classroom in a hands-on performance-oriented environment during a weekly lab facilitated by MSL III Cadets and supervised by Cadre and three physical fitness sessions per week. Restricted to Las Cruces campus only.

M SC 210 L. Self/Team Development Lab**1 Credit (1P)**

Planning, coordination, execution and evaluation of training and activities in a collaborative training environment with both basic and advanced course students from within the ROTC program. Students develop and refine leadership skills in positions of responsibility. Restricted to Las Cruces campus only.

Prerequisite(s): MSC 210.

M SC 211. Leadership in Action and Team Building**3 Credits (3+1P)**

A focus on Army doctrine and team development. The course begins the journey to understand and demonstrate competencies as they relate to Army doctrine. Army Values, Teamwork, and Warrior Ethos and their relationship to the Law of Land Warfare and philosophy of military service are also stressed. The ability to lead and follow is also covered through Team Building exercises at squad level. Students are then required to apply their knowledge outside the classroom in a hands-on performance-oriented environment during a weekly lab facilitated by MSL III Cadets and supervised by cadre and three physical fitness sessions per week. Restricted to Las Cruces campus only.

M SC 211 L. Leadership in Action and Team Building Lab**1 Credit (1P)**

Planning, coordination, execution and evaluation of training and activities in a collaborative training environment with both basic and advanced course students from within the ROTC program. Students develop and refine leadership skills in positions of responsibility. Restricted to Las Cruces campus only.

Prerequisite(s): MSC 211.

M SC 225. Directed Studies**1-3 Credits**

Individual directed studies under supervision of the Professor of Military Science. May be repeated up to 12 credits. Restricted to Las Cruces campus only.

Prerequisite(s): GPA 2.5 or better.

M SC 310. Leading Small Organizations I**3 Credits (3)**

Part of the Senior ROTC Advanced Course, this course provides a Focus on training management and the warfighting functions. It is an academically challenging course where Cadets study, practice, and apply the fundamentals of Training Management and how the Army operates through the Warfighting functions. At the conclusion of this course, Cadets will be capable of planning, preparing, and executing training for a squad conducting small unit tactics. Includes one lab meeting per week using peer facilitation overseen by MSL IVs, supervised by ROTC Cadre and three physical fitness sessions per week. Students must meet Basic Course of Military Science requirements to enroll in this course.

Corequisite(s): M SC 310 L.

M SC 310 L. Leading Small Organizations I Lab**1 Credit (1P)**

Planning, coordination, execution and evaluation of training and activities with basic course students and ROTC program. Students develop and refine leadership skills in positions of responsibility. Open only to students taking M SC 310.

Corequisite(s): M SC 310.

M SC 320. Leading Small Organizations II**3 Credits (3)**

Part of the Senior ROTC Advanced Course, this course provides a focus on applied leadership in small unit operations. It is an academically challenging course where Cadets study, practice, and apply the fundamentals of direct level leadership and small unit tactics at the platoon level. At the conclusion of this course, Cadets will be capable of planning, coordinating, navigating, motivating and leading a platoon in the execution of a mission. Includes one lab meeting per week using peer facilitation overseen by MSL IVs, supervised by ROTC Cadre and three physical fitness sessions per week. Successful completion of this course is a requirement to Cadet Summer Training Advance Camp during the summer, at Fort Knox, KY. Prerequisite(s): M SC 310

Corequisite(s): M SC 320 L.

M SC 320 L. Leading Small Organizations II Lab**1 Credit (1P)**

Practice and refinement of leadership skills. Different roles assigned for students at different levels in the program. Planning, coordination, execution and evaluation of training and activities with basic course students and ROTC program. Open to students taking M SC 320.

Corequisite(s): M SC 320.

M SC 325. Advanced Directed Studies**1-3 Credits**

Directed individual study of advanced subjects under the guidance of the Professor of Military Science. May be repeated up to 12 credits.

Prerequisite(s): GPA 2.5 or better.

M SC 350. Cadet Summer Training Advanced Course**3 Credits (3)**

Advanced Camp. Advanced Camp is a 31-day training event which takes place at Fort Knox, KY. It is designed to assess a Cadet's ability to demonstrate proficiency in basic officer leadership tasks. Cadets are evaluated on their ability to lead at the Squad and Platoon levels, both in garrison and tactical environments. Cadets are mentally and physically tested during a 12-day consequence driven field training exercise that replicates a combat training center rotation. Successful completion of the Advanced Camp is a requirement for commissioning. Consent of Instructor required.

Prerequisite(s): M SC 310, M SC 310 L, M SC 320, and M SC 320 L.

M SC 401. Leadership Challenges and Goal Setting**3 Credits (3)**

Part of the Senior ROTC Advanced Course, this course provides a focus on development of the Army Officer. It is an academically challenging course where Cadets develop knowledge, skills, and abilities to plan, resource, and assess training at the small unit level. Cadets also learn about Army programs that support counseling subordinates and evaluating performance, values and ethics, career planning, and legal responsibilities. At the conclusion of this course, Cadets will be familiar with how to plan, prepare, execute, and continuously assess the conduct of training at the company or field grade officer level. Includes a lab per week overseeing MSL III lesson facilitation and supervised by ROTC Cadre and three physical fitness sessions per week. May be repeated up to 3 credits. Prerequisite(s): M SC 320

Corequisite(s): M SC 401 L.

M SC 401 L. Leadership Challenges and Goal Setting Lab**1 Credit (1P)**

Different roles assigned for students at different levels in the program. Practice and refinement of leadership skills. Planning coordination, execution and evaluation of training and activities with basic course students and ROTC program. Open only to students taking M SC 401. May be repeated up to 1 credits.

Corequisite(s): M SC 401.

M SC 402. Transition to Lieutenant**3 Credits (3)**

The final course within the Senior ROTC Advanced Course, this course is an academically challenging course where Cadets further develop knowledge, skills, and abilities required of junior officers pertaining to the Army in Unified Land Operations and Company Grade Officer roles and responsibilities. This course includes reading assignments, homework assignments, small group assignments, briefings, case studies, practical exercises, a mid-term exam, and an Oral Practicum as the final exam. The Oral Practicum explores the Cadet's knowledge of how they will be prepared for the 20 Army Warfighting Challenges (AWFC) covered throughout the ROTC Advanced Course. Successful completion of this course will assist in preparing Cadets for their BOLC B course following graduation and commissioning. It is a mandatory requirement for commissioning. Includes a lab per week overseeing MSL III lesson facilitation and supervised by ROTC Cadre and three physical fitness sessions per week. May be repeated up to 3 credits.

Prerequisite(s): M SC 401

Corequisite(s): M SC 402 L.

M SC 402 L. Transition to Lieutenant Lab**1 Credit (1)**

Different roles assigned for students at different levels in the program. Practice and refinement of leadership skills. Planning, coordination, execution, and evaluation of training and activities with basic course students and ROTC program. Open only to students taking M SC 402. May be repeated up to 1 credits.

Corequisite(s): M SC 402.

M SC 425. Practicum**1-4 Credits**

Independent projects conducted under the direction of the Professor of Military Science, and concerned with analysis of selected leadership or management problems. Course not eligible for S/U grade. May be repeated up to 16 credits.

M SC 465. Military Decision Making - Graduate Level**3 Credits (3)**

This course and its associated lab meeting will expose students to the military decision making process. Students will learn about the roles of military staff members and work as part of a staff to develop a training and associated guidance for a notional Army unit. Students will also spend time relating concepts from the MDMP to relevant civilian scenarios within both business and government decision making. May be repeated up to 3 credits. Consent of Instructor required. Consent of Professor of Military Science (PMS) is required and the PMS will interview all prospective students prior to enrolling into this course.

Corequisite(s): M SC 465 L.

M SC 465 L. Military Decision Making - Graduate Level Lab**1 Credit (1)**

Students will work as part of a planning team in the application of the Military Decision Making Process to planning, coordination, and publish a comprehensive training plan and guidance which outlines all training and activities of the NMSU Army ROTC program for the semester following the semester of the course (i.e. the fall course develops the spring plan). Students develop and refine leadership skills in positions of responsibility. Open only to students taking M SC 465. May be repeated up to 1 credits. Consent of Instructor required. Consent of Professor of Military Science (PMS) is required and the PMS will interview all prospective students prior to enrolling into this course.

Corequisite(s): M SC 465.

MAT-AUTOMATION & MANUFACTURING

MAT 102. Print Reading for Industry**3 Credits (2+2P)**

Reading, interpretation, and revisions of industrial technical drawings common to manufacturing, Aerospace, machine parts, electrical, hydraulic, and Pneumatic drawings. Interpretation of engineering drawings and related shop calculations. Introductory Crosslisted with: AERT 113. Restricted to: Community Colleges only.

MAT 105. Introduction to Manufacturing**3 Credits (2+2P)**

Introduction to manufacturing evolution from basic assembly process to modern automated processes. Covers history, employability, soft skills, quality measurements, teamwork concept, production requirements, and considerations in plan layout and design. Minimum math proficiency of CCDM 114 required or math placement into MATH 1215 or higher. Restricted to: Community Colleges only. Crosslisted with: AERT 112

MAT 106. Applied Manufacturing Practices**3 Credits (2+2P)**

Course will illustrate how various products are manufactured along with associated process. Mechanical behavior such as bending, cold worked, strained, work hardened, and heat transfer will be emphasized as well. In lab, students will learn how to make selected products starting from prints to complete projects including quality control. Crosslisted with: AERT 114. Restricted to: Community Colleges only.

MAT 110. Machine Operation and Safety**3 Credits (2+2P)**

Introduction to the operation and safety aspects of various types of machinery and equipment, including both mechanical and electrical machines, Rigid Tubing, and Flexible Lines. Maintenance and safety operation of industrial equipment will also be covered. Restricted to: Community Colleges only. Crosslisted with: AERT 115

MAT 130. Applied Industrial Electricity I**4 Credits (3+2P)**

Electrical safety, AC and DC circuits, use and care of common measuring instrumentation, schematic and wiring diagrams, electromagnetism, National Electric Code branch circuits. Restricted to: Community Colleges only.

Prerequisite(s): MATH 1215 or ELT 120 or OETS 118.

MAT 135. Applied Industrial Electricity II**4 Credits (3+2P)**

Relationship between motor power, speed, and torque, basic application of relay circuits, motor control circuits, inductance and capacitance factors, transformers, solid state devices circuits and applications. Restricted to: Community Colleges only.

Prerequisite(s): MAT 130.

MAT 145. Electromechanical Systems for Non-Majors**4 Credits (3+3P)**

Electromechanical system interfacing. Principles and applications of preventive and corrective maintenance procedures on automated industrial production machines using system technical and maintenance manuals to develop troubleshooting procedures using systems block and schematic diagrams.

Prerequisite: consent of instructor.

MAT 221. Cooperative Experience I**1-6 Credits**

Supervised cooperative work program. Student is employed in an approved occupation and rated by employer and instructor. Student meets in a weekly class. Graded S/U.

Prerequisite: consent of instructor.

MAT 234. Industrial Electricity Maintenance**3 Credits (2+2P)**

Introduction into electrical systems, theory and uses for the different types of motors used in the industry and related industrial safety practices. DC, AC stepper and servo motors, motor speed and torque, motor performance, and efficiency, motor control fundamentals using variable frequency drives, vector controls, servo and stepper drives. Restricted to: Community Colleges only.

MAT 265. Special Topics**1-6 Credits**

Course subtitled in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

MATH-MATHEMATICS

A student may not receive credit for a lower-division mathematics course if it serves as a prerequisite to a lower-division math course that the student had previously passed with a grade of C- or better.

Students without adequate placement to enroll in MATH 1134, MATH 1215 or MATH 1130G can gain admission to the course by earning a C- or better in CCDM 114 N at an NMSU Community College campus, or in A S 103.

Students wishing to enroll in MATH 1220G, MATH 1430G, MATH 1511G, MATH 1521G, or MATH 1350G must satisfy one of the following:

1. have passed the stated prerequisite course or an equivalent transfer course with a C- or better
2. have placed into the course with an adequate ACT Math score or through the Mathematics Placement Examination (MPE), the results of which will be made available to the student's advisor. The MPE is given daily in Walden Hall when school is in session and during new student orientation programs.

MATH 1130G. Survey of Mathematics**3 Credits (3)**

This course will develop students' ability to work with and interpret numerical data, to apply logical and symbolic analysis to a variety of problems, and/or to model phenomena with mathematical or logical reasoning. Topics include financial mathematics used in everyday life situations, statistics, and optional topics from a wide array of authentic contexts. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in CCDM 113 N or CCDM 114 N or A S 103 or higher

Learning Outcomes

1. Construct and analyze graphs and/or data sets: Gather and organize information; Understand the purpose and use of various graphical representations such as tables, line graphs, tilings, networks, bar graphs, etc.; Interpret results through graphs, lists, tables, sequences, etc.; Draw conclusions from data or various graphical representations.
2. Use and solve various kinds of equations: Understand the purpose of and use appropriate formulas within a mathematical application; Solve equations within a mathematical application; Check answers to problems and determine the reasonableness of results.
3. Understand and write mathematical explanations using appropriate definitions and symbols: Translate mathematical information into symbolic form; Define mathematical concepts in the student's own words; Use basic mathematical skills to solve problems.
4. Demonstrate problem solving skills within the context of mathematical applications; Show an understanding of a mathematical application both orally and in writing; Choose an effective strategy to solve a problem; Gather and organize relevant information for a given application.

MATH 1134. Fundamentals of Elementary Mathematics I**3 Credits (3)**

Numbers and the four operations of arithmetic. Understanding and comparing multiple representations of numbers and operations, in particular how these representations build from whole numbers to integers to fractions and decimals. Applying properties of numbers and operations in contextual situations. Reasoning, communicating, and problem solving with numbers and operations. Applications to ratio, and connections with algebra. Taught primarily through student activities and investigations. Restricted to: EDUC,EPAR,E ED,ECED majors. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1215 or higher

Learning Outcomes

1. As future elementary teachers you will be teaching mathematics to children.
2. In order to teach a subject well you need not only to know the material that you will teach, but you need to know more than what you will teach, and know it well, in order to be able to answer questions, understand student reasoning, give alternate explanations when your students do not understand something, and be able to adjust to changes in the mathematical curriculum.
3. Furthermore, even if you hope to teach a given grade, you should be prepared to teach a variety of grades since what a person ends up teaching is often not what they planned to do.
4. We will explore ideas of arithmetic in a way to help you improve your mathematical ability, gain confidence in your ability, introduce to you different ideas and models, and to see a variety of mathematical activities that are appropriate for people of all ages.
5. Everything we study will be done with the aim of developing your ability to relate to the mathematics of elementary school and to help children develop mathematical understanding

MATH 1215. Intermediate Algebra**3 Credits (3)**

A study of linear and quadratic functions, and an introduction to polynomial, absolute value, rational, radical, exponential, and logarithmic functions. A development of strategies for solving single-variable equations and contextual problems. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in CCDM 113 N or CCDM 114 N or A S 103 or higher

Learning Outcomes

1. Students will build on their knowledge of linear and quadratic functions and will begin to build an understanding of absolute value, polynomial, rational, power, radical, exponential and logarithmic functions in the following contexts: Demonstrate appropriate use of basic function language and notation; Convert between equivalent forms of algebraic expressions; Solve single-variable equations of the types listed above; Interpret and communicate algebraic solutions graphically and numerically; Demonstrate contextual problem-solving skills that include setting up and solving problems, and interpreting solutions in context; Apply appropriate problem solving methods from among algebraic, graphical, and numerical.

MATH 1217. General Supplemental Instruction I**1 Credit (2P)**

Collaborative workshop for students enrolled in Intermediate Algebra. Graded: S/U Grading (S/U, Audit). Corequisite(s): MATH 1215

Learning Outcomes

1. Intermediate Algebra Workshop provides time for students to work on problems from Intermediate Algebra under the guidance of their Intermediate Algebra instructor

MATH 1220G. College Algebra**3 Credits (3)**

The study of equations, functions and graphs, reviewing linear and quadratic functions, and concentrating on polynomial, rational, exponential and logarithmic functions. Emphasizes algebraic problem solving skills and graphical representation of functions. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1215 or higher

Learning Outcomes

1. Use function notation; perform function arithmetic, including composition; find inverse functions.
2. Identify functions and their transformations given in algebraic, graphical, numerical, and verbal representations, and explain the connections between these representations.
3. Graph and interpret key feature of functions, e.g., intercepts, leading term, end behavior, asymptotes.
4. Solve equations algebraically to answer questions about graphs, and use graphs to estimate solutions to equations.
5. Solve contextual problems by identifying the appropriate type of function given the context and creating a formula based on the information given.
6. Communicate mathematical information using proper notation and verbal explanations.

MATH 1221. General Supplemental Instruction II**1 Credit (1+2P)**

Collaborative workshop for students enrolled in College Algebra. Graded: S/U Grading (S/U, Audit).

Corequisite(s): MATH 1220G.

Learning Outcomes

1. College Algebra Workshop provides time for students to work on problems from College Algebra under the guidance of their College Algebra instructor

MATH 1250G. Trigonometry & Pre-Calculus**4 Credits (3+2P)**

Trigonometry & Pre-Calculus includes the study of functions in general with emphasis on the elementary functions: algebraic, exponential, logarithmic, trigonometric and inverse trigonometric functions. Topics include rates of change, limits, systems of equations, conic sections, sequences and series, trigonometric equations and identities, complex number, vectors, and applications. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1220G or higher

Learning Outcomes

1. (Trigonometry) Students will be able to define and evaluate the trigonometric functions as functions of angle in both degree and radian measure using the definitions in terms of x , y , and r ; as the ratio of sides of a right triangle; using the unit circle; using reference angles, commonly used (0° , 30° , 45° , 60° , 90°) angles and using a calculator.
2. (Trigonometry) Students will be able to solve right triangles. They will be able to draw a sketch in an applied problem when necessary.
3. (Trigonometry) Students will be able to solve non-right triangles using the law of sines and the law of cosines.
4. (Trigonometry) Students will be able to prove trigonometric identities and apply addition and subtraction, double-angle, half-angle and power reduction formulas.
5. (Trigonometry) Students will be able to graph the six trigonometric functions, their transformations and their inverses.
6. (Trigonometry) Students will be able to use algebraic methods, including the use of identities and inverses, to solve trigonometric equations and demonstrate connections to graphical and numerical representations of the solutions.
7. (Trigonometry) Students will be able to add and subtract vectors in two dimensions. They will be able to use the dot product to project one vector onto another and to determine the angle between two vectors. They will be able to solve a variety of word problems using vectors.
8. (Trigonometry) Students will be able to work with polar coordinates; this includes graphing in polar coordinates and transforming an equation with polar coordinates into one with rectangular coordinates, and vice versa.
9. (Trigonometry) Students will be able to work with the trigonometric form of complex numbers, including using De Moivre's formula.
10. 1 (Pre-Calculus) Functions: Reinforce recognizing a function from its graph and from its algebraic expression; Reinforce identification of a one-to-one function graphically and from its algebraic expression; Reinforce identification of inverse functions graphically and algebraically; Reinforce combining functions arithmetically and compositionally; Be able to calculate the average rate of change of a function using the difference quotient and depict it graphically; Be able to find a limiting value of a function and be able to identify and use the notation that describes this.
11. (Pre-Calculus) Graphing: Reinforce using key characteristics of functions to graph them; Be able to graph conic sections from their key characteristics such as foci, eccentricity and asymptotes; Be able to identify all functions mentioned from their graphs, describing their key aspects.
12. (Pre-Calculus) Solving: Exponential/Logarithmic equations using the rules of exponents and logarithms; Systems of linear equations by elimination; Non-linear systems algebraically and graphically.
13. (Pre-Calculus) Applications: Modeling with functions with an emphasis on exponential and logarithmic functions, growth and decay.
14. (Pre-Calculus) Sequences and series: Understand the concept and notation of a sequence; Understand the concept and notation of a series; Be able to find limits of basic sequences; Be able to find sums of basic series.

MATH 1350G. Introduction to Statistics**3 Credits (3)**

This course discusses the fundamentals of descriptive and inferential statistics. Students will gain introductions to topics such as descriptive statistics, probability and basic probability models used in statistics, sampling and statistical inference, and techniques for the visual presentation of numerical data. These concepts will be illustrated by examples from a variety of fields. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1215 or higher

Learning Outcomes

1. Explain the general concepts of statistics: Explain and evaluate statistics used in the real world (from a news article, research project, etc.); Use statistical vocabulary appropriately; Distinguish between descriptive and inferential statistics; Distinguish between qualitative and quantitative data; Distinguish between populations and samples, and parameters and statistics; Give examples of independent and dependent variables.
2. Presentation and description of data: Present data graphically using histograms, frequency curves and other statistical graphs; Interpret graphs of data, including histograms and shapes of distributions.
3. Summarize data using measures of central tendency and variation: Calculate and interpret the mean, median, and mode to describe data; Calculate and interpret range, variance, and standard deviation to describe data.
4. Present the concepts of probability: Interpret basic probabilities; Calculate probabilities using compound probability rules and the binomial distribution; Calculate probabilities using the standard normal distribution and relate them to areas under the curve; Determine if the binomial distribution can be approximated with the normal distribution; Describe the relationship between the sampling distribution and the population distribution; Use the central limit theorem to approximate the probability distribution and calculate probabilities.
5. Compute point and interval estimates: Determine the confidence interval for a parameter; Interpret the confidence level and margin of error; Determine whether a statistical technique is appropriate under stated conditions.
6. Perform hypothesis tests: Determine whether a statistical test is appropriate under stated conditions; Identify null and alternative hypothesis; Perform and interpret statistical tests (e.g. z-test, t-test, one-tailed and two-tailed, one-sample, two-sample) and determine whether data is statistically significant; State the conclusion of a hypothesis test; Interpret a p-value as compared to a significance level; Explain why a test can lead us to reject a null hypothesis, not accept one; Distinguish between Type I and Type II errors.
7. Analyze data using regression and correlation: Explain the difference between correlation and causation; Construct and interpret scatter plots; Calculate and interpret the linear correlation coefficient; Determine and use the equation of a least-squares regression line between two variables to make predictions; Interpret the meaning of the coefficient of determination.
8. Optional topics: Inter-quartile range, box-plots, stem-and-leaf plots; Combinations and permutations; The Poisson distribution; Statistical power; Chi-square; Analysis of variance

MATH 1430G. Applications of Calculus I**3 Credits (2+2P)**

An algebraic and graphical study of derivatives and integrals, with an emphasis on applications to business, social science, economics and the sciences. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1220G or higher

Learning Outcomes

1. Find limits algebraically and graphically, and use limits to analyze continuity.
2. Find the derivative of a function by applying appropriate techniques (limit of the difference quotient, general derivative rules, product rule, quotient rule, chain rule, and higher order derivatives).
3. Perform implicit differentiation. Use implicit differentiation to solve related rate application problems.
4. Use the derivative to describe the rate of change and slope of a curve in general and at particular points. Compare and contrast average rates of change to instantaneous rates of change.
5. Find the maxima, minima, points of inflections, and determine concavity of a function by applying the first and second derivatives. Use these results to sketch graphs of functions and to solve optimization problems in context.
6. Find the antiderivative and indefinite integral functions to include integration by substitution. Apply the Fundamental Theorem of Calculus in computing definite integrals of functions.
7. Approximate the area under the curve using Riemann sums.
8. Use the integral to determine the area under a curve and to find the accumulated value of a function in context.
9. Solve contextual problems by identifying the appropriate type of function given the context, creating a formula based on the information given, applying knowledge of algebra and calculus, and interpreting the results in context.
10. Communicate mathematical information using proper notation and verbal explanations.

MATH 1435. Applications of Calculus I**3 Credits (3)**

Intuitive differential calculus with applications to engineering.

Prerequisite(s): C- or better in MATH 1250G.

Learning Outcomes

1. Find limits algebraically and graphically, and use limits to analyze continuity.
2. Find the derivative of a function by applying appropriate techniques (limit of the difference quotient, general derivative rules, product rule, quotient rule, chain rule, and higher order derivatives).
3. Learn derivative rules for polynomial, exponential, logarithmic, trigonometric and inverse trigonometric functions.
4. Perform implicit differentiation. Use implicit differentiation to solve related rate application problems.
5. Find the maxima, minima, points of inflections, and determine concavity of a function by applying the first and second derivatives. Use these results to sketch graphs of functions and to solve optimization problems in context.
6. Find partial derivatives and find maxima, minima in three dimensions.
7. Find the linear approximation of a function.
8. Find Maclaurin and Taylor series.
9. Find limits via L'Hospital's rule.
10. 1 Communicate mathematical information using proper notation and verbal explanations.

MATH 1440. Applications of Calculus II**3 Credits (3)**

Topics in this second course of Applications of Calculus include functions of several variables, techniques of integration, an introduction to basic differential equations, and other applications.

Prerequisites: C or better in MATH 1435 or in MATH 1521G, or in MATH 1521H.

Learning Outcomes

1. Find definite and indefinite integrals using integration by parts, integral tables, and numerical integration.
2. Analyze multivariable functions using partial derivatives and double integrals, and apply these techniques to applications such as optimization, least squares, and volumes.
3. Solve differential equations graphically, numerically, and algebraically using separation of variables, and apply differential equations in context.
4. Apply differentiation and integration to other areas, for example to Taylor polynomials and Taylor series, probability, trigonometric functions, etc.

MATH 1511G. Calculus and Analytic Geometry I**4 Credits (4)**

Limits and continuity, theory and computation of derivatives, applications of derivatives, extreme values, critical points, derivative tests, L'Hopital's Rule.

Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1250G or higher

Learning Outcomes

1. The goals are to present the concepts of calculus, stressing techniques, applications, and problem solving, and emphasizing numerical aspects such as approximations and order of magnitude.
2. Overall, the goals are to illustrate the power of calculus as a tool for modeling situations arising in physics, science, engineering and other fields.
3. In fulfillment of these goals, this and later courses will stress topics such as polynomial approximation, setting up integrals, as well as the use of appropriate technology

MATH 1521G. Calculus and Analytic Geometry II**4 Credits (4)**

Riemann sums, the definite integral, antiderivatives, fundamental theorems, techniques of integration, applications of integrals, improper integrals, Taylor polynomials, sequences and series, power series and Taylor series.

Prerequisite(s): C or better in MATH 1511G.

Learning Outcomes

1. Recognize the interplay between Riemann sums and definite integrals
2. Use the Fundamental Theorem of Calculus to compute definite and indefinite integrals
3. Demonstrate an understand of the relationship between the derivative and the definite integral
4. Evaluate integrals numerically using standard rules (midpoint, trapezoid, Simpson's)
5. Evaluate integrals analytically using standard methods (substitution, integration by parts, trigonometric substitution and identities, inverse functions and partial fractions
6. Use integration to solve problems in geometry, physics, science, engineering and other fields
7. Use appropriate methods such as L'Hopital's Rule to evaluate improper integrals
8. Approximate functions using Taylor polynomials
9. Apply standard tests to determine convergence or divergence of sequences and series
10. 1Find a power series representation for a function and determine where it converges
11. 1Identify and evaluate first order differential equations

MATH 1521H. Calculus and Analytic Geometry II Honors**4 Credits (3+1P)**

A more advanced treatment of the material of MATH 1521G with additional topics. Consent of Instructor required. Restricted to Las Cruces campus only. Consent of Department.

Learning Outcomes

1. Recognize the interplay between Riemann sums and definite integrals
2. Use the Fundamental Theorem of Calculus to compute definite and indefinite integrals
3. Demonstrate an understand of the relationship between the derivative and the definite integral
4. Evaluate integrals numerically using standard rules (midpoint, trapezoid, Simpson's)
5. Evaluate integrals analytically using standard methods (substitution, integration by parts, trigonometric substitution and identities, inverse functions and partial fractions
6. Use integration to solve problems in geometry, physics, science, engineering and other fields
7. Use appropriate methods such as L'Hopital's Rule to evaluate improper integrals
8. Approximate functions using Taylor polynomials
9. Apply standard tests to determine convergence or divergence of sequences and series
10. 1Find a power series representation for a function and determine where it converges
11. 1Identify and evaluate first order differential equations

MATH 1531. Introduction to Higher Mathematics**3 Credits (3)**

Logic; sets, relations, and functions; introduction to mathematical proofs.

Prerequisite(s): C- or better in MATH 1521G or MATH 1521H.

Learning Outcomes

1. The primary objective of this course is to serve as a bridge between the calculus courses you have taken, where the focus is on computations and solving problems, to more abstract mathematics courses.
2. In particular, we will discuss logical reasoning, definitions, proofs, and certain basic building blocks such as sets, functions, and relations.
3. By the end of the course, you should be able to understand and construct well-written proofs of basic mathematical arguments involving simple properties of the real numbers, integers, sets, functions, and relations using universal and existential quantifiers, absolute values and inequalities, modular arithmetic, and proof by induction.

MATH 1996. Topics in Mathematics**1-3 Credits**

Topics to be announced in the Schedule of Classes. Maximum of 3 credits per semester. Total credit not to exceed 6 credits. Community Colleges only.

Prerequisite: consent of instructor.

Learning Outcomes

1. Varies

MATH 2134G. Fundamentals of Elementary Math II**3 Credits (3)**

Geometry and measurement. Multiple approaches to solving problems and understanding concepts in geometry. Analyzing and constructing two- and three-dimensional shapes. Measurable attributes, including angle, length, area, and volume. Understanding and applying units and unit conversions. Transformations, congruence, and symmetry. Scale factor and similarity. Coordinate geometry and connections with algebra. Reasoning and communicating about geometric concepts. Taught primarily through student activities and investigations.

Prerequisite(s): C or better in MATH 1134.

Learning Outcomes

1. The primary objectives are mathematical: to understand some of the basic
2. concepts of geometry, and measurement with an appropriate level of rigor; to appreciate the historical, cultural and educational contributions and potential applications in real life situations; and to gain problem solving skills using these concepts.
3. The secondary goal is to appreciate the importance of this material in the elementary school curriculum.

MATH 2234. Fundamentals of Elementary Mathematics III**3 Credits (3)**

Probability, statistics, ratios, and proportional relationships. Experimental and theoretical probability. Collecting, analyzing, and displaying data, including measurement data. Multiple approaches to solving problems involving proportional relationships, with connections to number and operation, geometry and measurement, and algebra. Understanding data in professional contexts of teaching. Taught primarily through student activities and investigations.

Prerequisite(s): C or better in MATH 2134G.

Learning Outcomes

1. In order to teach a subject well you need not only to know the material that you will teach, but you need to know more than what you will teach, and know it well, in order to be able to answer questions, give alternate explanations when your students do not understand something, and be able to adjust to changes in the mathematical curriculum.
2. Furthermore, even if you hope to teach a certain grade, you should be prepared to teach anything between kindergarten and 8th grade.
3. You also need to be aware of where a student is coming from in order to make adjustments in their curriculum.
4. A strong elementary school teacher must understand where his/her students are headed in order to most effectively direct them there.
5. This is especially true in mathematics, where students continue to build on the concepts they learn each year.

MATH 2350G. Statistical Methods**3 Credits (3)**

Exploratory data analysis. Introduction to probability, random variables and probability distributions. Concepts of Central Limit Theorem and Sampling Distributions such as sample mean and sample proportion. Estimation and hypothesis testing single population parameter for means and proportions and difference of two population parameters for means and proportions. Analysis categorical data for goodness of fit. Fitting simple linear regression model and inference for regression parameters. Analysis of variance for several population means. Techniques in data analysis using statistical packages. Prerequisite(s): adequate scoring on the Mathematics Placement Exam, or any ACT/SAT and GPA combination that is considered equivalent, or a C- or better in MATH 1215 or higher

Learning Outcomes

1. Summarize Data through graphs and Descriptive statistics: Define qualitative and quantitative data; Provide examples of a population, a sample, independent and dependent variables, parameters and statistics; Construct and interpret histograms, stem plots, bar charts, and boxplot; Summarize distributions with numerical measures such as mean, median, standard deviation, percentiles, interquartile range.
2. Present the concepts of probability: Explain related to probability axioms (e.g. mutually exclusive events and independent events); Apply applications of probability rules; Apply Conditional probability and Bayes Rule.
3. Distinguish between discrete and continuous random variables: Calculate probabilities using Binomial and Poisson distributions; Calculate probabilities using the standard normal distribution by finding the area underneath the curve.
4. Explain the Central Limit Theorem: Introduce the concept of a sampling distribution; Discuss the distribution of the sample mean and sample proportion under repeated sampling; Generate and interpret a sampling distribution using repeated sampling; Determine if the Binomial and Poisson distribution can be approximated with the normal distribution.
5. Estimate a population parameter: Determine confidence interval for population mean, proportion, difference of means, and difference of proportions; Interpret the confidence interval and margin of error; Explain the dependence of margin of error on sample size and confidence level.
6. Perform hypothesis tests for population parameters (population mean, proportion, difference of means, and difference of proportions); Describe the logic and framework of the inference of hypothesis testing; Make a decision using a p-value and draw an appropriate conclusion; Distinguish between Type I and Type II errors; Explain power of the test.
7. Perform Hypothesis Tests for Categorical data: Determine and analyze Chi-square test for Independence; Determine and analyze Chi-square test for Goodness of fit.
8. Analyze data using regression and correlation: Construct scatterplots and analyze the scatter plots; Calculate the linear correlation coefficient and determine whether a linear relationship exists between two variables; Fit the least-squares regression line between two variables; Predict the response variable from the regression line; Apply statistical inference to regression parameters.
9. Perform analysis of variance: State hypotheses for the test of several population means; Construct the AVOVA Table; Explain the significance of multiple comparisons.
10. Demonstrate the appropriate use of technology (e.g., Excel, an appropriate graphing calculator or other software (Minitab, SAS))

MATH 2415. Introduction to Linear Algebra**3 Credits (3)**

Systems of equations, matrices, vector spaces and linear transformations. Applications to computer science.

Prerequisite(s): Grade of C- or better in MATH 1521G or MATH 1521H.

Learning Outcomes

1. Use row reduction and echelon forms of a matrix to solve linear systems of equations.
2. Use matrix operations, inverse matrices, and matrix factorizations to solve matrix equations.
3. Study the properties of vector spaces and subspaces (e.g., the null and column spaces of a matrix); linear transformations, isomorphisms and kernels; linear independence, bases, and dimension.
4. Apply appropriate matrix manipulations to perform a change of basis.
5. Understand determinants and their properties.
6. Find eigenvalues and eigenvectors and use them to diagonalize matrices.
7. Understand inner product spaces and apply them to real-world problems.

MATH 2530G. Calculus III**3 Credits (3)**

The purpose of this course, which is a continuation of Calculus II, is to study the methods of calculus in more detail. The course will cover the material in the textbook from Chapters 10-14. Vectors in the plane and 3-space, vector calculus in two-dimensions, partial differentiation, multiple integration, topics in vector calculus, and complex numbers and functions.

Prerequisite(s): Grade of C- or better in MATH 1521G or MATH 1521H.

Learning Outcomes

1. Perform the algebra operations on vectors in the plane.
2. Describe lines, planes, and surfaces in 3-space.
3. Compute the tangent and normal vectors to space curves.
4. Compute tangential and normal components of acceleration.
5. Sketch functions of several variables.
6. Compute the tangent plane to a surface.
7. Describe and use the chain rule.
8. Compute extreme values of functions of several variables.
9. Compute multiple integrals.
10. 1Compute surface area, mass, and moments.
11. 1Compute line integrals and test for independence of path.
12. 1State and use Green's, Stokes' and Divergence Theorem.
13. 1Solve first and second order differential equations.

MATH 2992. Directed Study**1-3 Credits**

May be repeated for a maximum of 6 credits. Graded S/U.

Prerequisite: consent of the instructor.

Learning Outcomes

1. Varies

MATH 300. Readings**1-3 Credits**

A selection of readings and reports in the mathematical sciences, the breadth and depth of which is deemed to fit the needs of the student. Graded S/U.

Prerequisite: consent of instructor.

MATH 313. Fundamentals of Algebra and Geometry I**3 Credits (3+1P)**

Covers algebra combined with geometry based on measurements of distance (metric geometry). Secondary mathematics education majors may take course as a math elective. MATH 313 does not substitute for other required math courses. Does not fulfill requirements for major in mathematics.

Prerequisites: MATH 1134 and MATH 2134G.

MATH 331. Introduction to Modern Algebra**3 Credits (3)**

Elements of abstract algebra, including groups, rings and fields.

Prerequisite: C or better in MATH 1531 and MATH 2415.

MATH 332. Introduction to Analysis**3 Credits (3)**

Development of the real numbers, a rigorous treatment of sequences, limits, continuity, differentiation, and integration.

Prerequisite: C or better in MATH 1521G or MATH 1521H and MATH 1531.

MATH 377. Introduction to Numerical Methods**3 Credits (3)**

Basic numerical methods for interpolation, approximation, locating zeros of functions, integration, and solution of linear equations. Computer-oriented methods will be emphasized.

Prerequisites: grade of C or better in MATH 1521G or MATH 1521H and some programming experience.

MATH 391. Vector Analysis**3 Credits (3)**

Calculus of vector valued functions, Green's and Stokes' theorems and applications.

Prerequisite: grade of C or better in MATH 2530G.

MATH 392. Introduction to Ordinary Differential Equations**3 Credits (3)**

Introduction to differential equations and dynamical systems with emphasis on modeling and applications. Basic analytic, qualitative and numerical methods. Equilibria and bifurcations. Linear systems with matrix methods, real and complex solutions.

Prerequisite: C or better in MATH 1521G or MATH 1521H or B or better in MATH 1440.

MATH 400. Undergraduate Research**1-3 Credits**

May be repeated for a maximum of 6 credits. Graded S/U.

Prerequisite: consent of faculty member.

MATH 401. Special Topics**1-3 Credits (1-3)**

Specific subjects to be announced in the Schedule of Classes. May be used to fulfill a course requirement for the mathematics major. Consent of Instructor required.

MATH 411V. Great Theorems: The Art of Mathematics**3 Credits (3)**

Adopts the view of mathematics as art, using original sources displaying the creation of mathematical masterpieces from antiquity to the modern era. Original sources are supplemented by cultural, biographical, and mathematical history placing mathematics in a broad human context.

Prerequisites: Grades of B or better in MATH 1521G or MATH 1521H and any upper division MATH course, with overall GPA of 3.2 or better, or consent of instructor.

MATH 450. Introduction to Topology**3 Credits (3)**

Topological spaces: general spaces and specific examples such as metric spaces, Hausdorff spaces and/or normed vector spaces; separation axioms; continuity, compactness, connectedness; related theorems. Crosslisted with: MATH 520.

Prerequisite(s): MATH 332.

MATH 451. Introduction to Differential Geometry**3 Credits (3)**

Applies calculus to curves and surfaces in three dimensional Euclidean space.

Prerequisite(s): C- or better in each of MATH 2415 and MATH 391, or consent of instructor.

MATH 452. Foundations of Geometry**3 Credits (3)**

Topics in projective, axiomatic Euclidean or non-Euclidean geometries. Restricted to: Main campus only.

Prerequisite(s): C or better in MATH 331 or MATH 332.

MATH 454. Logic and Set Theory**3 Credits (3)**

Propositional and first order logic; axioms, proofs, models. Semantic and syntactic consequence. Soundness, completeness, compactness, and Loewenheim –Skolem theorems. The Zermelo-Fraenkel axioms for set theory. Well orderings, ordinals, cardinals, the axiom of choice, and the von Neumann hierarchy. Crosslisted with: MATH 524.

Prerequisite(s): C- or better in MATH 331 or MATH 332, or consent of instructor.

MATH 455. Elementary Number Theory**3 Credits (3)**

Covers primes, congruences and related topics.

Prerequisite: grade of C or better in MATH 331 or consent of instructor.

MATH 456. Abstract Algebra I: Groups and Rings**3 Credits (3)**

Group theory, including cyclic groups, homomorphisms, cosets, quotient groups and Lagrange's theorem. Introduction to rings: ring homomorphisms, ideals, quotient rings, polynomial rings, and principal ideal domains. Crosslisted with: MATH 526.

Prerequisite(s): MATH 331 or consent of instructor.

MATH 459. Survey of Geometry**3 Credits (3)**

Basic concepts of Euclidean geometry, ruler and compass constructions. May include topics in non-Euclidean geometry. For non-math majors. Restricted to: Main campus only.

Prerequisite(s): C or better in MATH 331 or MATH 332.

MATH 471. Complex Variables**3 Credits (3)**

A first course in complex function theory, with emphasis on applications.

Prerequisite(s): C- or better in MATH 391 or C- or better in both MATH 392 and MATH 2530G.

MATH 472. Fourier Series and Boundary Value Problems**3 Credits (3)**

Fourier series and methods of solution of the boundary value problems of applied mathematics.

Prerequisite(s): C- or better in MATH 392.

MATH 473. Calculus of Variations and Optimal Control**3 Credits (3)**

Euler's equations, conditions for extrema, direct methods, dynamic programming, and the Pontryagin maximal principle.

Prerequisite(s): C- or better in MATH 392.

MATH 480. Matrix Theory and Applied Linear Algebra**3 Credits (3)**

An application driven course, whose topics include rectangular systems, matrix algebra, vector spaces and linear transformations, inner products, and eigenvalues and eigenvectors. Applications may include LU factorization, least squares, data compression, QR factorization, singular value decomposition, and search engines.

Prerequisite(s): C or better in any 300-level course with a MATH prefix.

MATH 481. Advanced Linear Algebra**3 Credits (3)**

Rigorous treatment of vector spaces and linear transformations including canonical forms, spectral theory, inner product spaces and related topics.

Prerequisite: grade of C or better in MATH 331.

MATH 491. Introduction to Real Analysis I**3 Credits (3)**

Rigorous discussion of the topics introduced in calculus. Sequences, series, limits, continuity, differentiation.

Prerequisite: grade of C or better in MATH 332 or consent of instructor.

MATH 492. Introduction to Real Analysis II**3 Credits (3)**

Continuation of MATH 491. Integration, metric spaces and selected topics.

Prerequisite(s): C- or better in MATH 491 or consent of instructor.

MATH 498. Directed Reading**1-6 Credits**

May be repeated for a maximum of 6 credits. Graded S/U.

MATH 499. Complex Analysis**3 Credits (3)**

Rigorous treatment of complex differentiation and integration, properties of analytic functions, series and Cauchy's integral representations. Crosslisted with: MATH 529.

Prerequisite(s): MATH 332.

MATH 501. Introduction to Differential Geometry**3 Credits (3)**

Same as MATH 451 with additional work for graduate students.

MATH 502. Foundations of Geometry**3 Credits (3)**

Same as MATH 452 with additional assignments for graduate students.

MATH 505. Elementary Number Theory**3 Credits (3)**

Same as MATH 455 with additional assignments for graduate students.

MATH 511. Fundamentals of Elementary Mathematics I**3 Credits (3+1P)**

Topics from real numbers, geometry, measurement, and algorithms, incorporating calculator technology. Intended for K-8 teachers. As part of course students mentor MATH 1134 undergraduates. Does not fulfill degree requirements for M.S. in mathematics.

MATH 512. Fundamentals of Elementary Mathematics II**3 Credits (3+1P)**

Real numbers, geometry, and statistics, incorporating calculator technology. Intended for K-8 teachers. Students serve as mentors to MATH 2134G undergraduates. Does not fulfill degree requirements for M.S. in mathematics.

MATH 513. Fundamentals of Algebra and Geometry I**3 Credits (3+1P)**

Algebra and metric geometry, incorporating appropriate calculator technology. Intended for K-8 teachers. Students serve as mentors to MATH 313 undergraduates. Does not fulfill degree requirements for M.S. in mathematics.

MATH 517. Complex Variables**3 Credits (3)**

Same as MATH 471 with additional work for graduate students.

MATH 518. Fourier Series and Boundary Value Problems**3 Credits (3)**

Same as MATH 472 with additional work for graduate students.

MATH 519. Calculus of Variations and Optimal Control**3 Credits (3)**

Same as MATH 473 with additional work for graduate students.

MATH 520. Introduction to Topology**3 Credits (3)**

Same as MATH 450 with additional work for graduate students. Crosslisted with: MATH 450.

MATH 524. Logic and Set Theory**3 Credits (3)**

Same as MATH 454 with additional assignments for graduate students. Crosslisted with: MATH 454.

Prerequisite(s): consent of instructor.

MATH 525. Advanced Linear Algebra**3 Credits (3)**

Same as MATH 481 with additional work for graduate students. May be repeated up to 3 credits.

MATH 526. Abstract Algebra I: Groups and Rings**3 Credits (3)**

Same as MATH 456 with additional work for graduate students. Crosslisted with: MATH 456.

Prerequisite(s): MATH 525 or consent of instructor.

MATH 527. Introduction to Real Analysis I**3 Credits (3)**

Same as MATH 491 with additional work for graduate students.

MATH 528. Introduction to Real Analysis II**3 Credits (3)**

Same as MATH 492 with additional work for graduate students.

MATH 529. Complex Analysis**3 Credits (3)**

Same as Math 499 with additional work for graduate students. Crosslisted with: MATH 499.

Prerequisite(s): MATH 528.

MATH 530. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be for unlimited credit with approval of the department.

MATH 531. Ordinary Differential Equations**3 Credits (3)**

Linear algebra and linear ordinary differential equations, existence and uniqueness of solution, smooth dependence on initial conditions, flows, introduction to smooth dynamical systems. May be repeated up to 3 credits.

Prerequisite(s): MATH 527, or consent of instructor.

MATH 532. Nonlinear Dynamics**3 Credits (3)**

Introduction to nonlinear dynamics and deterministic chaos. Core topics include stability and bifurcations; chaos in one dimensional maps; universality and re-normalization group. Further topics include symbolic dynamics, fractals, sensitive dependence on initial data, self-organization and complexity and cellular automata. Knowledge of differential equations and linear algebra is desired.

MATH 540. Directed Reading**1-6 Credits**

May be repeated for a maximum of 6 credits. Consent of instructor required. Graded: S/U.

MATH 541. Topology I**3 Credits (3)**

Connectedness and compactness of topological spaces, introduction to the quotient topology, elementary homotopy theory, the fundamental group, the Seifert-van Kampen theorem

Prerequisite(s): MATH 525 and MATH 528, or consent of instructor.

MATH 542. Topology II**3 Credits (3)**

Covering spaces and their classification, singular homology, degree theory, Brouwer's fixed point theorem, CW-complexes and cellular homology, and other applications.

Prerequisite(s): MATH 541 or consent of instructor.

MATH 551. Mathematical Structures in Logic**3 Credits (3)**

Lattices, distributive lattices, Boolean algebras, Heyting algebras. Lindenbaum-Tarski algebras of classical and intuitionistic logics. Representation theorems. Modal logics and their algebraic counterparts. Kripke semantics. Goedel translation.

Prerequisite(s): MATH 524.

MATH 552. Universal Algebra and Model Theory**3 Credits (3)**

Universal algebra, homomorphisms, subalgebras, products, congruences. Varieties and class operators. Free algebras and Birkhoff's theorem. Ultraproducts and Los's theorem. Congruence distributive varieties and Jonsson's theorem. Universal classes and quasi-varieties.

Prerequisite(s): MATH 524.

MATH 562. History and Theories of Mathematics Education**3 Credits (3)**

A study of the history of the mathematics taught in American schools, including an examination of authentic original textbooks and the changes in their content and the approach to the subject over time, together with writings of people who have influenced the development and changes of mathematics education. Theories of learning mathematics, and current issues in mathematics education.

Prerequisite(s): Restricted to graduate students.

MATH 563. Algebra with Connections**3 Credits (3)**

Connections between Algebra and other K-12 curriculum strands, especially Geometry and Probability / Data Analysis. Apply algebraic modeling and reasoning to a variety of mathematical problem solving situations. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.

Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 564. From Number to Algebra**3 Credits (3)**

The progression from Number to Algebra in the K-12 curriculum as a concrete-to-abstract progression. Key concepts considered across the grade levels include the different uses of variables, equivalence in different contexts, patterns, and ratios. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.

Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 566. Data Analysis with Applications**3 Credits (3)**

Statistical concepts and terminology in professional uses of data by teachers, such as standardized test score reports and educational research; visual displays of data; measures of variation and central tendency; consideration of how K-12 topics in Data Analysis are developed from one grade level to the next. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.

Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 567. From Measurement to Geometry**3 Credits (3)**

The progression from Measurement to Geometry in the K-12 curriculum as a concrete-to abstract progression. Important concepts such as angle, length, and area progress from concrete, measurable situations to more abstract problems which require reasoning and proof. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.

Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 568. Using Number Throughout the Curriculum**3 Credits (3)**

Understand number concepts more deeply by seeing many examples of those concepts applied in other content strands. Develop mathematical knowledge and understanding to build a repertoire of ways for students to practice and review basic number skills and concepts as part of later, more advanced courses. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.

Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 569. Geometry with Connections**3 Credits (3)**

Connections between Geometry and other K-12 curriculum strands, especially Algebra and Probability / Data Analysis. Address key attributes of geometric concepts by considering their connections within and across grade levels. Does not fulfill requirements for degrees in mathematics. Consent of instructor required.

Prerequisite(s): Admittance into the MC2-LIFT program.

MATH 571. Partial Differential Equations I**3 Credits (3)**

The basic equations of mathematical physics. Laplace, Heat and Wave Equations. The method of characteristics, introduction to conservation laws, special solutions.

Prerequisite(s): MATH 518 and MATH 528 or consent of instructor.

MATH 572. Partial Differential Equations II**3 Credits (3)**

Sobolev spaces theory: basic definitions and properties, embedding theorems, weak solutions of boundary value problems and variational methods for partial differential equations.

Prerequisite(s): MATH 593 or consent of instructor.

MATH 581. Abstract Algebra II: Fields, Rings and Modules**3 Credits (3)**

Topics covered include field extensions; algebraic closure; polynomials rings; irreducibility criteria; Noetherian rings; algebraic sets; Nullstellensatz; modules; applications to linear algebra.

Prerequisite(s): MATH 526 or consent of instructor.

MATH 582. Module Theory and Homological Algebra**3 Credits (3)**

Introductory concepts of homological algebra, including projective, injective and flat modules; projective and injective resolutions; exactness of functors; homology of chain complexes; derived functors.

Prerequisite(s): MATH 581 or consent of instructor.

MATH 583. Introduction to Commutative Algebra and Algebraic Geometry**3 Credits (3)**

Introduction to the basic notions and techniques of modern algebraic geometry, including the necessary commutative algebra foundation. Topics likely to include algebraic and projective varieties, Nullstellensatz, morphisms, rational and regular functions, local properties. Other topics may include Noether normalization, dimension theory, singularities, sheaves, schemes, Grobner bases.

Prerequisite(s): MATH 581 or consent of instructor.

MATH 593. Measure and Integration**3 Credits (3)**

Measure spaces, measurable functions, extension and decomposition theorems for measures, integration on measure spaces, absolute continuity, iterated integrals.

Prerequisite: MATH 528 or consent of instructor.

MATH 594. Real Analysis**3 Credits (3)**

Differentiation, L_p spaces, Banach spaces, measure and topology, other selected topics.

Prerequisite: MATH 593.

MATH 595. Introduction to Functional Analysis**3 Credits (3)**

Banach spaces. The three basic principles: uniform boundedness principle, closed graph/open mapping theorems, Hahn-Banach theorem.

Prerequisite(s): MATH 594, or consent of instructor.

MATH 599. Master's Thesis**1-15 Credits**

Thesis.

MATH 600. Doctoral Research**1-15 Credits**

Research.

MATH 698. Selected Topics**1-15 Credits**

Selected topics.

MATH 700. Doctoral Dissertation**1-15 Credits**

Dissertation.

MGMT-MANAGEMENT

MGMT 2110. Principles of Management

3 Credits (3)

An introduction to the basic theory of management including the functions of planning, organizing, staffing, leading, and controlling; while considering management's ethical and social responsibilities.

Learning Outcomes

1. Explain the major functions of management including planning, organizing, communications, controlling, motivating, leading, and staffing.
2. Recognize major developments in the history of management thought.
3. Describe the basic managerial processes including decision-making and other key skills necessary for managers to perform their roles.
4. Identify an organization's stakeholders and the importance of social and ethical responsibility of managers.
5. Explain the formulation and implementation of strategic planning, including the relationship between goals, plans, vision statements, and mission statements.
6. Describe the strategies managers use to help organizations adapt to changing internal and external environments.
7. Explain organizational change, forces for change, sources of resistance to change, and the techniques managers can use to implement and facilitate change.

MGMT 309. Human Behavior in Organizations

3 Credits (3)

Interpersonal and organizational behavior, motivation, communication, team building, leadership, diversity management, legal and ethical issues, and politics in organizations. Credit may not be earned for both MGMT 309 and MGMT 315V.

MGMT 310V. Entrepreneurial Mindset

3 Credits (3)

This course provides the opportunity to learn to think like an entrepreneur in the broader context of social entrepreneurship, intrapreneurship, creative problem solving, opportunity recognition, and innovation.

MGMT 332. Human Resources Management

3 Credits (3)

Survey course in human resources management. Includes recruitment, selection, equal employment opportunity, performance appraisal, training, compensation, safety, and union-management relations.

MGMT 333. Training and Development

3 Credits (3)

Training and development of human resources, including training needs assessment, training approaches and techniques, and evaluation of training effectiveness.

MGMT 335V. Business and Government

3 Credits (3)

Crosslisted with: ECON 335G

MGMT 344. Production and Operations Management

3 Credits (3)

Management of physical and human resources; management information systems in operations; applications in various organizations.

Prerequisite: MATH 1350G or A ST 311; and BCIS 338 or BCIS 350.

MGMT 347. Management Functions and Processes

3 Credits (3)

Planning, organizing, directing, and controlling operating units in an organization. Applications to a variety of types of organizations.

MGMT 351. Supply Chain Management

3 Credits (3)

Acquisition and control and delivery of materials, parts, equipment, and services for end use in the organization. Applications to service and manufacturing industries, nonprofit, and governmental institutions.

MGMT 361. Small Business Management

3 Credits (3)

Principles and practice of managing a small enterprise with emphasis on growth and performance.

MGMT 375V. Global Environmental Assessment and Management

3 Credits (3)

Examines the principles of environmental assessment and management. Topics include global environmental concerns, industrial environmental management, life cycle assessment, system analysis, process improvement, and sustainable development, among others.

MGMT 388V. Leadership and Ethics**3 Credits (3)**

Exploration of the multifaceted nature of leadership and principal-based ethics in modern society through readings and seminar discussion. May be repeated up to 3 credits.

MGMT 391. Management Internship and Cooperative Education I**1-3 Credits**

Application of management skills to the work environment. Open only to students majoring or minoring in management. The amount of academic credit (1-3 cr.) will be determined by the academic experience and not by the work experience. May be repeated for a maximum of 3 credits. Restricted to majors and minors.

Prerequisites: MGMT 309 and consent of instructor.

MGMT 448. Small Business Consulting**3 Credits (3)**

Study analysis and presentation of recommendations for solving significant problems confronting small businesses.

Prerequisite(s): Senior standing or consent of instructor.

MGMT 449. Strategic Management**3 Credits (3)**

Integrative approach to envisioning the future and shaping strategies for business success.

Prerequisite(s): BCIS 338 or BCIS 350; BLAW 316; BFIN 341; MGMT 309; MKTG 303; and one of the following: MGMT 344 or MGMT 470 or BCIS 485.

MGMT 451. Selection, Placement, and Performance Evaluation**3 Credits (3)**

Staffing processes for organizations and the evaluation of employee performance. Use of selection methods and measurement of work behavior.

MGMT 453. Leadership and Motivation**3 Credits (3)**

Theories of leadership and motivation. Motivational programs for complex organizations. Relationships between organizational power, authority, and management styles. Crosslisted with: I E 453

MGMT 454. Work Teams in Organizations**3 Credits (3)**

Theories of small groups and their application to the work situation. Why and how groups form, grow, communicate, and maintain themselves.

Prerequisites: senior or above standing.

MGMT 458. Comparative International Management**3 Credits (3)**

Cultural influences on management are examined in a global business environment with a particular emphasis on human behavior in multinational organizations and the management of human resources. Same as I B 458.

MGMT 460. Compensation Management**3 Credits (3)**

An overview of wage and salary administration, including job evaluation, wage and salary surveys, program administration, legal aspects of pay systems, and benefits administration.

Prerequisite(s): MGMT 332 or consent of instructor.

MGMT 461. Seminar in Entrepreneurship**3 Credits (3)**

For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business.

Crosslisted with: MKTG 461.

Prerequisite(s): Senior standing or consent of instructor.

MGMT 465. Contemporary Issues in Human Resources Management**3 Credits (3)**

Integrative course in human resources management, emphasizing the application of advanced concepts to complex personnel cases.

Prerequisite: MGMT 332.

MGMT 470. Project Management in Organizations**3 Credits (3)**

Roles, responsibilities, and techniques of project managers in managing projects effectively. Preparation for professional certification.

MGMT 490. Selected Topics**1-18 Credits (1-18)**

Seminars in selected current topics in the various areas of management and administration. Prerequisites vary according to the seminar being offered.

MGMT 491. Management Internship and Cooperative Education II**1-3 Credits**

Covers the application of management skills to the work environment. The amount of academic credit (1-3 cr.) will be determined by the academic experience and not be the work experience. May be repeated for a maximum of 3 credits. Restricted to majors and minors.

Prerequisite: MGMT 309 and consent of instructor.

MGMT 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.

Prerequisites: junior or above standing and consent of instructor.

MGMT 502. Operations Management**3 Credits (3)**

Systems and specialized models applied to the management of production facilities and service operations, including physical and human resources.

Prerequisite(s): Graduate students only.

MGMT 503. Organizational Behavior and Management Processes**3 Credits (3)**

Covers the theory and practice related to the successful management of human resources in organizations operating within a dynamic global environment. Course goals include developing alternative frameworks for analyzing issues related to human behavior, management science, and organizational structure and theory.

Prerequisite: graduate students only.

MGMT 512. Quantitative Analysis for Business Decisions**3 Credits (3)**

Identification, collection, and analysis of an organization's data both internal and external, and use of the resultant information in managerial decision making.

Prerequisite: graduate students only.

MGMT 527. Negotiation and Business Dispute Resolution**3 Credits (3)**

Same as BLAW 527.

MGMT 548. Small Business Consulting**3 Credits (3)**

Study, analysis, and presentation of recommendations for solving significant problems confronting small businesses. Same as MGMT 448 with differentiated assignments for graduate students.

Prerequisite(s): Graduate standing.

MGMT 590. Strategic Management**3 Credits (3)**

Covers the integration of functional, human, technological, and environmental aspects of business within the framework of management policy and strategy formulation. Formulate, implement, evaluate and control the various functions of the organization from a systems perspective. Understand the external environment and its impact on the organization. Restricted to majors.

Prerequisite: M.B.A. student in his or her final semester.

MGMT 591. Seminar in Entrepreneurship**3 Credits (3)**

For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business. Same as MGT 461 with differentiated assignments for graduate students. Crosslisted with: MKTG 591.

Prerequisite(s): Graduate standing.

MGMT 598. Special Research Programs**1-3 Credits**

Individual investigations either analytical or experimental. A maximum of 6 credits may be earned.

Prerequisite: consent of instructor.

MGMT 600. Doctoral Research**1-15 Credits**

This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination. Restricted to management majors.

MGMT 601. Research in Management**1 Credit (1)**

Ph.D. course provides opportunities for significant interaction between Management faculty and Management Ph.D. students. The course also provides opportunities for development of professional scholarly standards, ethics, and critiques, as well as insight into current research areas and topics supported by the Management Department and other relevant disciplinary areas. May be repeated for a maximum of 6 credits. Restricted to Ph.D. students. Graded S/U.

MGMT 640. Instructional Development for Teaching Business**3 Credits (3)**

Pedagogical issues and techniques in collegiate business education. Includes course and curriculum development, outcomes assessment, class management, and teaching techniques. Practical issues faced in college instruction. Restricted to doctoral students.

MGMT 645. Seminar in Human Resources Management**3 Credits (3)**

Seminar will address current issues in human resources management. Focus on research related to the selection, development, and effective use of human resources. Restricted to doctoral students.

MGMT 650. Seminar in Organizational Behavior**3 Credits (3)**

Seminar will include specific organizational behavior topics; motivation, leadership, group and inter-group relations, and attitude theory. Focus on current research and theory. Restricted to doctoral students.

MGMT 655. Seminar in Organizational Systems and Theory**3 Credits (3)**

Analysis of organizations from a macro perspective. Topics include organizational theory, organizational design, organizational environment, and sociotechnical systems. Restricted to doctoral students.

MGMT 660. Research Design and Methodology**3 Credits (3)**

Topics will include philosophy of science, theory building, and research methods applicable to the study of organizational behavior. Restricted to doctoral students.

MGMT 661. Qualitative Research Methods**3 Credits (3)**

In-depth coverage of selected topics in research methodology, including theory and logic of scientific investigation, grounded theory, action research, and ethnomethodology. Restricted to doctoral students.

MGMT 670. Seminar in Operations Management**3 Credits (3)**

Seminar examines the major problem areas, research findings, and research methodologies of operations management. Focus on the critical evaluation of current theory and methodology.

Prerequisite(s): Restricted to Doctoral students.

MGMT 675. Seminar in Strategic Management**3 Credits (3)**

Survey of current and classical readings in strategy. Introduces the doctoral level student to strategic issues, strategic topics for research, and publication venues. Restricted to doctoral students.

MGMT 685. Story Consulting to Organizations**3 Credits (3)**

Apply various qualitative story and narrative research methods (plot analysis, script analysis, life history, and restoring) to action research consulting project. Students will conduct story assessment and (propose or enact) intervention with a local consenting organization. Restricted to doctoral students.

MGMT 690. Special Topics**3 Credits (3)**

Seminars in selected current topics in the various areas of management. May be repeated for unlimited credit. Restricted to doctoral students.

Prerequisite(s): Vary according to seminar being offered.

MGMT 698. Special Topics**1-3 Credits**

Prerequisite: consent of instructor.

MGMT 700. Doctoral Dissertation**15 Credits**

Prerequisite: advancement to candidacy.

MKTG-MARKETING

MKTG 1210. Advertising

3 Credits (3)

A survey of currently available advertising media. A psychological approach to consumer persuasion; applied techniques in media selection, layout mechanics, production methods, and campaign structures.

Prerequisite: MKTG 2110.

Learning Outcomes

1. Define advertising and the relevant application of psychology in delivering the message. Explain the importance of various advertising media in the marketing mix. Identify and explain the social, ethical and legal issues advertisers must consider. Describe the significance of the marketing function in business. Explain the importance of advertising and other marketing communication tools. Demonstrate application of the planning process as it applies to marketing and advertising. Describe the factors that are weighted when considering the use of radio and television in the creative advertising mix. Describe the relationship between market segment, consumer behavior and selection of advertising campaign types. List the alternative means of reaching a target market and the technical challenges of each.

MKTG 1220. Small Business Marketing

3 Credits (3)

An overview of public relations principles, practices and purposes as applied to small business. Topics include basics of news release writing, media awareness, development and maintenance of a positive public image, branding, ethical marketing, and the relationships of public relations with advertising and marketing. Methods and practices used in small business are explored.

Prerequisite: MKTG 2110.

Learning Outcomes

1. Explain the importance of creating and sustaining a positive public awareness and image. Identify public relations practices as they relate to the management and marketing processes. Define branding and discuss its importance for small business. Describe the value of business event management and promotion for small business. Discuss how media relations, public relations, advertising and marketing efforts are interrelated and the importance of each.

MKTG 180. Level 1, PGA's PGM Education Program (Part 1)

3 Credits (3)

Level 1 Part 1 of the PGA PGM Education Program. Introduction to the Policies and Procedures of the PGA Golf Mgt. Program and the PGA of America. Students will complete the PGA Qualifying Level, Facility Management 1A (Tournament Ops A, Rules of Golf B, and Career Enhancement B), and the corresponding Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.

MKTG 181. Level 1, PGA's PGM Education Program (Part 2)

3 Credits (3)

Level 1 Part 2 of the PGA PGM Education Program. This class will focus on Teaching and Coaching 1, the corresponding PGA Work Experience Activities, and PGA Teaching Seminars. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.

Learning Outcomes

1. Know how students learn and process golf knowledge and skills, and identify the implications for teaching Know how to define and distinguish between learning and performance Understand how juniors learn golf knowledge and skills, and identify implications for teaching Conduct a physical evaluation of a junior golfer and create developmentally appropriate exercise and training programs Establish student/teacher relationships that promote greater student learning and enjoyment Develop a communication style that fits the student and increases instructional effectiveness Analyze student's instructional needs and set clear, purposeful learning and practice goals Know the format for an effective golf lesson Deliver effective explanations and demonstrations during a golf lesson 1Engage in self-assessment of teaching skills and competencies 1Recognize the appropriate clubhead path and clubface position information to improve a golfer's performance 1Conduct appropriate assessments to determine the short game skill level of the golfer 1Gain understanding of the short game elements to help lower scores and improve the player 1Define club performance terms and specifications, including lie angle and clubface angle or position, and describe their effect on ball flight and player performance: Define what information is require to properly assess a player's golf equipment 1Define club performance terms and specifications, including lie angle and clubface angle or position, and describe their effect on ball flight and player performance: Observe a player's swinging motion, ball flight, and equipment to evaluate the effectiveness of their equipment

MKTG 2110. Principles of Marketing**3 Credits (3)**

Survey of modern marketing concepts and practices focusing on the marketing mix: product, pricing, promotion, and distribution strategies. Topics include: the marketing environment, consumer behavior, marketing research, target marketing, and the ethical and social responsibilities of marketers. May be repeated up to 3 credits.

Prerequisite(s): BUSA 1110.

Learning Outcomes

1. Describe the professional, ethical, and social responsibilities of marketers.
2. Explain the role of the product in the marketing mix, including the product life cycle, the relevance of product innovation, and product classifications.
3. Illustrate the role of promotion in the marketing mix, including the communication process and the promotional mix.
4. Explain the role of price in the marketing mix, including pricing objectives, pricing policies, and pricing methods.
5. Describe the operation of channels of distribution and supply chains, including functions of intermediaries and degrees of coverage.
6. Define the concepts of target markets and market segmentation with respect to elements of the marketing mix.
7. Explain the importance of market research and information systems in supporting marketing decision making.
8. Describe the dynamic environment(s) in which marketing decisions must be made.

MKTG 2220. Digital Marketing**3 Credits (3)**

This course focuses on planning to create and market a website. Internal marketing topics such as registering with search engines, increasing traffic, segmenting and targeting markets, establishing an online presence, developing a marketing plan and reshaping business for the Web market are covered.

Prerequisite: MKTG 2110.

Learning Outcomes

1. Describe how search engines work. (Use knowledge to make recommendations to a website on how it can improve its organic search rankings - perform search engine optimization). Describe the various methods of online display advertising. Determine the appropriate key performance indicators (KPIs) for any type of website. Describe and implement best practices in marketing to a database of current and potential customers via email. Utilize knowledge of social media tactics to design an effective social media campaign. Implement online reputation management tactics to improve the online reputation of a brand. Develop and present a digital marketing plan for a small, local business.

MKTG 280. Level 1, PGA's PGM Education Program (Part 3)**3 Credits (3)**

Level 1 Part 3 of the PGA PGM Education Program. This class will focus on Facility Management 1B (Business Planning A, Customer Relations A, Golf Car A, Merchandising A, Turfgrass A), Level 1 Checkpoint Exams, and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.

MKTG 281. Level 2, PGA's PGM Education Program (Part 1)**3 Credits (3)**

Level 2 Part 1 of the PGA PGM Education Program. This class will focus on Teaching and Coaching 2, Teaching and Coaching Seminars, and the corresponding PGA Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG majors.

Learning Outcomes

1. Explain how students learn golf knowledge and skills, and identify the implications for teaching Explain how students process information when learning golf skills Identify and explain the principles of effective practice Explain how juniors learn golf knowledge and skills, and identify the implications for teaching Structure an effective golf lesson Analyze student's instructional needs and set clear, purposeful learning and practice goals Deliver effective explanations and demonstrations during a golf lesson Engage in self-assessment of teaching skills and competencies Recognize and apply the appropriate clubhead path and clubface position information to improve a golfer's performance 1Conduct appropriate assessments to determine the skill level of the golfer 1Demonstrate basic knowledge of anatomy and physiology, and conduct a physical observation to identify movement capabilities and limitations that may affect a golfer's performance 1Define club performance terms and specifications, and describe their effect on ball flight and player performance

MKTG 303. Principles of Marketing**3 Credits (3)**

Process, functions, and principles in the current marketing system.

Learning Outcomes

1. Understand primary and changing perspectives on marketing and strategic management. Understand the fundamental principles and theories of marketing. Develop the capacity to obtain and process relevant information and analytical skills. Evaluate the impact of interactive media on marketing management. Apply relevant marketing concepts and analytical tools, identify viable alternatives, make informed choices, and recommend marketing implementation plans. Develop skills in organizing more effective strategic marketing and in implementing the market planning process. Develop, evaluate, and implement marketing management strategies in complex environments through recent, popular case study analyses. Formulate marketing management strategies on critical issues, problems, and business opportunities. Broaden perspectives of ethics and social responsibility, keep abreast of global developments, and adapt to changing environments.

MKTG 305. Marketing and Food Agricultural Products**3 Credits (3)**

This course provides a review of marketing principles and techniques used throughout the food and fiber supply chain. The course introduces a broad variety of marketing topics including marketing strategy, consumer behavior, market segmentation, market research, competitive analysis, and the marketing mix. The course serves as a foundation for advanced courses in agricultural marketing. May be repeated up to 3 credits. Crosslisted with: AEEC 305.

Prerequisite(s): ECON 1110G or ECON 2120G.

Learning Outcomes

1. Articulate how agricultural commodities move through the food and fiber supply chain. Understand the importance of strategic marketing and how organizations within the food and fiber supply chain identify consumers and their preferences. Understand key marketing concepts used by agribusiness marketers, including SWOT analysis, the marketing mix, advertising and public relations. Know the basic outline and components of a marketing plan.

MKTG 310. Marketing Research**3 Credits (3)**

Design, collection analysis, and presentation of research data.

Prerequisite(s): MATH 1350G and MKTG 303 or consent of instructor.

Learning Outcomes

1. Translate a marketing problem into a feasible research question. Recognize marketing research as a process that involves a sequence of activities, each compatible with the preceding activities. Compare and contrast alternative research designs. Identify the sources of marketing information and the various means for gathering such information. Recognize the biases and limitations of marketing data and basic data analysis. Interpret univariate and basic bivariate data analysis techniques (i.e., should be able to decide when a technique is appropriate and recognize the managerial implications of analytical results). Design and execute a basic survey research project. Assess ethical issues associated with various research approaches.

MKTG 311V. Consumer Behavior**3 Credits (3)**

The different aspects of consumer behavior and the variables affecting consumer decisions. Analysis of current concepts and models.

Learning Outcomes

1. Know the consumer behavior concepts by integrating and adapting theories developed in disciplines such as psychology, sociology, anthropology, and economics. Use specific tools to tackle and analyze customer issues. Develop the ability to apply consumer behavior concepts from the perspective of marketing managers and public policy makers. Increase the awareness of and enhance the ability to make ethical decisions in consumer-related issues.

MKTG 311VH. Consumer Behavior Honors**3 Credits (3)**

The different aspects of consumer behavior and the variables affecting consumer decisions. Analysis of current concepts and models. Same as MKTG 311V with differentiated assignments for honors students.

Prerequisite(s): 3.5 GPA or Higher.

MKTG 312. Personal Selling**3 Credits (3)**

Implementation of the promotion process through interpersonal communications between salesperson and prospects. Serving customers by sales representatives.

Learning Outcomes

1. Demonstrate how personal selling can strategically enhance interpersonal communication skills, career management, personal productivity. Identify key issues and trends such as opportunities or threats, for evolving emerging sales approaches platforms.

MKTG 313. Retail Management**3 Credits (3)**

Investigates retail business operations and focuses on the strategic profit model, store location, layout, display, merchandising, operations, and personnel.

Learning Outcomes

1. Analyze the role of retailing in society and basic retailing principles, ideas, and concepts as they relate to an understanding of our market-driven system Compare and contrast segmentation and target market selection relative to a specific population product/service for different markets and retailing opportunities Apply the concepts of the marketing mix to the formulation and evaluation of retailing strategies relative to particular target markets, environments (economic, technological and competitive), and desired positions in market places (both local and global) Areas to be addressed include communication strategy, branding, packaging, pricing, product/service design, methods of delivery and the product life cycle Relate the concepts of marketing and retailing research, consumer behavior and strategy and their interrelationships Compare and contrast analysis techniques and judgment that are useful to managers in acting with integrity to make decisions and taking action

MKTG 314. Advertising Strategy**3 Credits (3)**

Utilization of advertising as a business administration function; communication with consumers as a means of attaining marketing goals.

Learning Outcomes

1. Analyze advertising from a consumer perspective Compare advertising strategy theories and concepts Evaluate advertising critically and creatively

MKTG 317. International Marketing**3 Credits (3)**

Focuses on decisions relating to entering markets, market segmentation, marketing strategies, and tactics in the international arena. Same as I B 317.

Learning Outcomes

1. Develop understanding about what is involved in making international marketing decisions, including product, price, promotion, and place decisions to create a marketing mix. Acquire an overview on the contemporary issues in global marketing and the unique challenges faced by marketing managers in the dynamic global environment. Develop insights into how differences in global economic, cultural, social, political, and legal environments can affect marketing decisions. Develop strategic thinking in the context of complex problems and challenges faced by the contemporary global executives and managers. Develop ability to integrate the important global societal dimensions of diversity, environmental concerns, ethics, and technological change into their thinking. Develop knowledge and skills to analyze cross-cultural variables and their impact on international marketing. Discover sources of information for researching and evaluating international markets. Communicate effectively about marketing issues in group discussions, oral presentations and written reports. Work effectively as a team member in analyzing marketing issues. 1 Develop leadership skills necessary to deal with the uncertainty and changes faced by today's global marketers.

MKTG 324. Product/Service Development**3 Credits (3)**

Covers product innovation, development, commercialization and resource recovery, price determination and administration strategies, and complementing planning processes.

Learning Outcomes

1. Understand the product/service development process. Identify market opportunities for new products. Use structured methods to evaluate and test product concepts. Apply tools learned in class to develop new products/services. Plan the launch of a product and evaluate its impact on the market. Efficiently work with and communicate ideas to team members.

MKTG 354. Sports Marketing**3 Credits (3)**

The application of marketing concepts to the sports industry. Topics include fans/customers, products, and promotions across a range of sports.

Learning Outcomes

1. Discuss the domain of sports marketing Apply basic marketing tools (e.g., research, segmentation) to sports marketing contexts Recognize, evaluate, and accommodate the perspectives of participants and spectators as sports consumers Identify appropriate marketing mix options for sports products Appraise recent sports marketing trends Plan a career in sports marketing

MKTG 357. Internet and Social Media Marketing**3 Credits (3)**

Focuses on the consumer psychology and marketing strategies at work in advertising and selling brands via the Internet and social media networks.

Learning Outcomes

1. Apply the concepts of the marketing mix to the formulation/evaluation of marketing strategies relative to Social Media policies that combine business objectives with appropriate use of Social Media channels and content. Compare and contrast the history of Social Media and recognize the various platforms of Social Media. Select/defend segmentation and target market selection relative to a specific population product/service that engages target audiences with a marketing message. Analyze business objectives and connect to appropriate Social Media tactics. Evaluate Social Media marketing content to shape the way we connect to and build relationships with users, consumers and businesses. Relate the concepts of marketing research to establish metrics for measuring Social Media marketing success.

MKTG 380. Level 2, PGA's PGM Education Program (Part 2)**3 Credits (3)**

Level 2 Part 2 of the PGA PGM Education Program. This class will focus on Facility Management 2 and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management majors.

Learning Outcomes

1. Define the business at the facility level in terms of vision, core values, facility characteristics and mission. Utilize the four Interaction Strategies in a variety of routine and challenging customer situations. Identify core business areas that support a customer-focused environment Know the characteristics of a merchandising operation that align with a facility's business plan Understand how to define, assess, and develop tournament business at a facility.

MKTG 381. Level 3, PGA's PGM Education Program (Part 1)**3 Credits (3)**

Level 3 Part 1 of the PGA's PGM Education Program. This class will focus on Teaching and Coaching 3, Teaching and Coaching Seminars, and the corresponding PGA Work Experience Activities. Additional course fee required. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management

Learning Outcomes

1. Explain how various types of feedback function to influence learning Define the major variables that influence learning and explain how they operate with implications for practice, learning, and teaching Provide effective instructional feedback after students' practice and performance Explain how the form, precision, timing, frequency, and regulation of augmented feedback influence learning with implications for teaching and practice conditions Explain how the key practice factors influence learning with implication for designing practice conditions Establish relationships that promote greater student learning and enjoyment Plan long-term developmental programs for beginning and intermediate players Communicate effectively with students Develop a communication style that increases instructional effectiveness 1 Effectively determine and design an appropriate practice routine to the benefit of the golfer 1 Effectively determine and assign the appropriate drill or drill with an aid to improve the swing shape of the golfer 1 Use relevant technology to promote student learning 1 Effectively demonstrate and apply the appropriate specialty shot information to the benefit of the golfer 1 Demonstrate basic knowledge of current swing methodologies of noted instructors 1 Physical development of junior golfers 1 Assess the physical capabilities of adult golfer, describe implications for performance, and provide potential physical adjustments 1 Describe how to use bench skills, tools, and technologies for measuring and altering club performance 1 Perform analyses and make appropriate alterations to change ball flight, players performance, and teacher effectiveness

MKTG 400. Marketing Internship/Field Experience**3 Credits (3)**

Internship of field experience in application of marketing principles. The student must accept an internship before being allowed to enroll in the course. Consent of instructor required. Restricted to MKTG majors.

MKTG 405. Negotiations in Marketing**3 Credits (3)**

Negotiations in Marketing is designed to introduce and explore the major concepts and theories surrounding bargaining and negotiation strategies in marketing. Additionally, the course gives practical hands-on experience in negotiating, through a range of applied negotiations exercises and activities.

Prerequisite(s): MKTG 303.

MKTG 449. Promotion Management**3 Credits (3)**

Covers concepts and problems in the use of advertising, internet marketing, social media marketing, personal selling, publicity, and other forms of promotion; planning, coordination, control, and evaluation of effectiveness.

Learning Outcomes

1. Analyze the role of advertising and promotion in society and basic marketing principles, ideas, and concepts as they relate to an understanding of our market-driven system Compare and contrast segmentation and target market selection relative to a specific population product/service for different markets and promotional opportunities Apply the concepts of the marketing mix to the formulation and evaluation of promotional strategies relative to particular target markets, environments (economic, technological and competitive), and desired positions in market places (both local and global) Areas to be addressed include communication strategy, branding, pricing, product/service design, and e-commerce Relate the concepts of marketing and advertising research, consumer behavior and strategy and their interrelationships Compare and contrast analysis techniques and judgment that are useful to managers in acting with integrity to make decisions and taking action in the promotional environment

MKTG 451. Food and Agribusiness Market Assessment**3 Credits (3)**

This course is an application course in which self-managed teams develop and present marketing plans for agribusiness firms. Emphasis on integrating the marketing mix, particularly promotional elements. May be repeated up to 3 credits. Crosslisted with: AEEC 451.

Prerequisite(s): AEEC 305 or MKTG 305 or consent of instructor.

Learning Outcomes

1. Identify, organize and conduct market research specific to the project Develop an understanding of primary and secondary research collection and analysis Exhibit enhanced relationship management, communication skills, and team building Develop written communication with final deliverable for implementation into the business world

MKTG 453. Sales Management**3 Credits (3)**

The nature of the sales management function in industry. Focuses on intra and interdepartmental sales management activities.

Prerequisite: MKTG 312.

Learning Outcomes

1. Examined the linkage between personal selling, as a basket of activities, and the management of those marketing personnel who do selling (i.e., salespeople). Examined the role of the sales force in the achievement of a firm's marketing objectives. Undertaken numerous case-based analyses of typical sales management issues, including the hiring, firing, training, motivation, compensation, deployment, and evaluation of the firm's sales personnel. Developed decision-making skills and analytic capabilities in the development and management of both sales programs and salespeople.

MKTG 461. Seminar in Entrepreneurship**3 Credits (3)**

For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business.

Crosslisted with: MGMT 461.

Prerequisite(s): Senior standing or consent of instructor.

MKTG 462. Advanced Sales**3 Credits (3)**

Advanced instruction and skill development in interpersonal communication skills to broaden understanding of the professional sales role (especially in team selling situation), career management, personal productivity, negotiation, and coordination with other functional areas.

Prerequisite: MKTG 312.

Learning Outcomes

1. Students will learn "how" to sell (i.e., the behaviors and planning associated with selling today). Analyze the concept of what/how is perhaps equally important but not nearly as obvious, how and why buyers "buy". The course focus will be particularly on so-called "business-to-business" (B2B) sales jobs, as that is where many of the most interesting – and lucrative – sales positions reside.

MKTG 480. Level 3, PGA's PGM Education Program (Part 2)**3 Credits (3)**

Level 3 Part 2 of the PGA's PGM Education Program. This class will focus on Facility Management 3, the Business Simulation Seminars, and the corresponding PGA Work Experience Activities. Students will also be required to provide an internship evaluation report. Additional course fee required.

Consent of Instructor required. Restricted to: MKTG/PGA Golf Management Majors

Learning Outcomes

1. Assess the current state of the business by conducting a SWOT Analysis Describe the golf industry job market and the knowledge and skills required to succeed Identify areas where food services and golf operations should coordinate efforts Determine golf car needs in order to acquire a fleet that supports the facility's mission, customers, and physical characteristics Describe the organizational structure, key departments, reporting relationships, and job descriptions of a facility Utilize industry-proven pricing strategies to meet business objectives Describe the Performance System for supervising and delegating Describe practices that improve the golf course and protect the environment

MKTG 481. PGA Golf Management Final Experience**1 Credit (1)**

The following are requirements for successful completion of this senior level PGA Golf Management capstone course: 16 months of internship, completion of the Qualifying Level, Level 1, Level 2, and Level 3 of the PGA's PGM Education Program and successful completion of the PGA's Playing Ability Test. Consent of Instructor required. Restricted to: MKTG/PGA Golf Management majors.

Learning Outcomes

1. Describe the golf industry job market and the knowledge and skills required to succeed Access PGA employment resources and participate in professional growth and development

MKTG 489. Strategy and Policy**3 Credits (3)**

Techniques and analysis of marketing strategy and policy planning and formulation. Senior standing or consent of instructor.

Prerequisite(s): MKTG 310.

Learning Outcomes

1. Relate marketing strategy to the environmental constraints and opportunities with which managers must deal Compare marketing strategy theories and concepts Evaluate appropriate strategic marketing decisions in various situations

MKTG 490. Selected Topics**1-18 Credits (1-18)**

Covers materials and subjects not offered in regular Marketing courses. Students can take 18 credit hours of MKTG 490 if each class is a different subtitle. A maximum of 18 credit hours can be earned through MKTG 490.

MKTG 498. Independent Study**1-3 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head. A maximum of 3 credits may be earned.

Prerequisites: junior or above standing and consent of instructor.

MKTG 503. Marketing Management**3 Credits (3)**

Analysis of marketing problems and the integration of organizational resources as well as behavioral and quantitative techniques into the development and implementation of solutions.

Learning Outcomes

1. Identify the fundamental principles and theories of marketing Outline primary and changing perspectives on marketing and strategic management Apply relevant marketing concepts and analytical tools Develop capacity to obtain and process relevant information with enhanced analytical skills Identify viable alternative to make informed choices and recommend marketing implementation plans Evaluate the impact of interactive media on marketing management Develop skills in organizing more effective strategic marketing and implementing the market planning process Practice implementing marketing management strategies in complex environments through case study analyses Formulate marketing management strategies on critical issues, problems, and business opportunities 1Synthesize perspectives of ethics and social responsibility in adapting to changing environments

MKTG 591. Seminar in Entrepreneurship**3 Credits (3)**

For students interested in owning and operating their own business; students desiring hands-on, real-time experience in helping start up a business. Same as MKTG 461 with differentiated assignments for graduate students. Crosslisted with: MGMT 591.

Prerequisite(s): Graduate standing.

MKTG 601. Marketing Management**3 Credits (3)**

Covers the conceptual foundations of contemporary marketing management research, concepts, and literature. Fundamental to the understanding of contemporary marketing and the breadth of the field of marketing study.

Learning Outcomes

1. Identify the contemporary principles and theories of marketing strategy research Outline primary guidelines and trendy directions of marketing strategic research Improve theoretical foundation for research development in marketing strategy Develop capacity of analytical and quantitative skills required for empirics Apply relevant marketing theories, concepts and analytical methodology in research development Formulate research ideas pertinent to marketing strategies on critical issues, problems, and phenomena Practice complex research design, theoretical development and empirical operationalization Synthesize perspectives of ethics and social responsibility in scholarly research

MKTG 610. Marketing and the Scientific Method**3 Credits (3)**

Issues related to the evolution of research philosophies and methodologies. Critical to the development of appreciation for the value of research and experimentation.

MKTG 620. Research- Theory Interface**3 Credits (3)**

Theoretical and methodological issues involved in translating a theory into a research study. Prepares Ph.D. students to undertake dissertation research. Consent of instructor required.

MKTG 625. Consumer Behavior**3 Credits (3)**

Extensive reading of seminal and contemporary articles on consumer behavior and developing original research to explore cross-disciplinary issues relevant to the study of marketing.

MKTG 640. Measurement and Structural Equation Modeling**3 Credits (3)**

Explores theories of measurement that underlie all quantitative analysis, including the use of structural equation models. Contrasts classical test theory with item response theory and generalizability theory. Covers PRELIS and LISREL, and critiquing structural equation models by other researchers. May be repeated up to 3 credits.

Prerequisite(s): A ST 505.

MKTG 670. Marketing Theory**3 Credits (3)**

The evolution, development, construction, and evaluation of the major theoretical perspectives of marketing. Fundamental to the understanding of contemporary marketing and preparation for investigations into the nature and role of theory in marketing.

MKTG 690. Special Topics in Marketing**3 Credits (3)**

A seminar on special topics in marketing. The topic of the course will vary according to the needs of the students in the program and the instructor. Ph.D. students may repeat this course up to three times for a maximum total of 9 credits.

MKTG 698. Selected Topics**1-9 Credits (1-9)**

Materials and subjects not offered in regular marketing courses. May be repeated for a maximum of 18 credits under different subtitles.

MKTG 700. Doctoral Dissertation**15 Credits**

Prerequisite: advancement to candidacy.

MOLB-MOLECULAR BIOLOGY

MOLB 448. Special Research Problems**1-3 Credits**

Individual investigation, theoretical or experimental, under the supervision of a molecular biology faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

MOLB 520. Molecular Cell Biology**3 Credits (3)**

Same as BIOL 520.

MOLB 542. Biochemistry I**3 Credits (3)**

Same as BCHE 542. B or better required.

MOLB 545. Molecular and Biochemical Genetics**3 Credits (3)**

Same as BCHE 545 and BIOL 545.

MOLB 546. Biochemistry II**3 Credits (3)**

Same as BCHE 546.

MOLB 550. Topics in Molecular Biology**1-3 Credits**

Selected topics of current interest in field of molecular biology for master's level students.

MOLB 590. Discussions in Molecular Biology**1 Credit (1)**

Oral presentations of ongoing research and/or research proposal for the masters thesis. Must be repeated twice for masters and three times for doctoral students. Graded by 2 options: S/U or Letter Grade

MOLB 597. Laboratory Rotations/Research Discussions**1-3 Credits**

All entering students are required to take at least one credit, during their first semester, in which they will circulate through at least three different labs working on assigned problems and discussing research programs. May be repeated for a maximum of 4 credits. Graded S/U.

MOLB 598. Special Research Programs**1-3 Credits**

Individual investigation, experimental or theoretical, under the supervision of a molecular biology faculty member. Course may be repeated up to a total of 6 credits with committee approval.

MOLB 599. Master's Thesis**1-15 Credits (1-15)**

Experimental and scholarly research leading to the preparation of a master's thesis.

MOLB 600. Molecular Biology Research**1-15 Credits**

Laboratory research efforts prior to successful completion of doctoral comprehensive exam.

MOLB 650. Advanced Topics in Molecular Biology**1-3 Credits**

Discussions and lectures on topics of current interest in molecular biology for doctoral students.

MOLB 698. Advanced Research Projects**1-9 Credits**

Individualized special research assignments for doctoral-level students. Up to 9 credits, with approval of committee. Graded S/U.

MOLB 700. Doctoral Dissertation Research**1-15 Credits**

Research for doctoral students after completing comprehensive exams.

MPH-MASTER OF PUBLIC HEALTH

MPH 510. Community and Psychosocial Aspects of Public Health**3 Credits (3)**

Social, behavioral, and educational aspects of disease prevention and health promotion programs. Restricted to MPH majors.

MPH 515. Introduction to Gerontology**3 Credits (3)**

Social, psychological, and physiological aspects of aging with an interdisciplinary emphasis on health promotion. Demographic characteristics of the aging population.

MPH 520. Biostatistical Applications in Public Health**3 Credits (3)**

Quantitative methods for public health students including tabular, graphical, and numerical descriptive methods, random sampling, principles of statistical inference, confidence intervals, statistical tests of hypothesis through analysis of variance and regression. Restricted to MPH majors.

MPH 530. Epidemiological Approaches to Disease Control and Prevention**3 Credits (3)**

Basic epidemiological principles applicable to infectious and noninfectious disease. Descriptive techniques and analytic designs, and application of statistical and epidemiological investigation methods included. Restricted to MPH majors.

MPH 540. Health Services System: Administration and Organization**3 Credits (3)**

This course focuses on using a systems approach to identify and analyze factors and interrelationships that influence the operation of health services organizations. Specific attention is to administrative structures and operations, finance and quality among public health departments, hospitals, multi-institutional systems, integrated health systems and strategic alliances. May be repeated up to 3 credits. Restricted to: MPH majors.

MPH 541. Principles of Health Program Management**3 Credits (3)**

This course prepares the student to assume a supervisory role in the management of health and human services programs. The course will cover essential management functions such as leadership, organizational assessment, planning, decision-making, organizational structure, budgeting, marketing, and human resource management. May be repeated up to 3 credits. Restricted to: MPH majors.

MPH 545. Health Services Organization and Delivery**3 Credits (3)**

This course includes the framework of the United States healthcare system; organization and administration of health services; alternate ways of organizing and financing health systems; the roles of the government and free market on health care services; and the barriers to health services delivery. May be repeated up to 3 credits. Restricted to: MPH majors.

MPH 546. Public Health Finance and Budget Management**3 Credits (3)**

Introduces health care accounting and finance to non-financial students. Students are exposed to the financial structure of health care organizations and the environment within which they operate. Instruction also introduces the use of accounting and financial information in investor-owned and not-for-profit organizations in the health care industry. Topics include understanding the creation and interpretation of financial statements, financial accounting and reporting requirements, financial analysis, budgeting, and resource allocation. May be repeated up to 3 credits. Restricted to: MPH majors.

MPH 547. Public Health Law and Ethics**3 Credits (3)**

This course examines major legal and ethical concepts and their impact on public health policy and practice. The course examines governmental authority, at various jurisdictional levels, to improve public health. This course will focus on public health law in the United States. May be repeated up to 3 credits. Restricted to: MPH majors.

MPH 550. Environmental Public Health Issues**3 Credits (3)**

Environmental health issues from a public health perspective. Restricted to MPH majors.

MPH 557. Health Promotion for the Older Adult**3 Credits (3)**

Common health concerns and lifestyle issues relevant to older adults. Facts about the content area, health behaviors, and practices to promote health and prevent disease; program development strategies applicable to a variety of settings.

MPH 558. Public Health Policy Analysis**3 Credits (3)**

Covers issues related to U.S.-health policy and allocation of resources. Examination of local, state, and federal public health and health care funding. Assessment of impact of health policy on health education, medical practice, and the workplace. May be repeated up to 3 credits. Restricted to: MPH majors.

MPH 559. Infectious and Noninfectious Disease Prevention**3 Credits (3)**

History, etiology, and prevention of diseases affecting humans. Consent of Instructor required. Crosslisted with: PHLS 459.

MPH 560. American Indian Health**3 Credits (3)**

Critical health issues facing American Indians in the contemporary world. May be repeated up to 3 credits. Crosslisted with: PHLS 460.

MPH 561. Health Disparities: Determinants and Interventions**3 Credits (3)**

Investigates: descriptions of health disparities and measurement issues; physical environmental factors, behavioral and emotional variables; impact of aging of the populations, increased racial and ethnic diversity, and technological developments; intervention strategies and evaluation results. May be repeated up to 3 credits. Crosslisted with: PHLS 461.

MPH 564. Cross-Cultural Aspects of Health**3 Credits (3)**

An examination of health practices from a variety of cultural perspectives; communication, observation, research, and assimilation. Issues to be addressed will be examined from a number of viewpoints, such as individual, family, community, and professional roles. May be repeated up to 3 credits. Crosslisted with: PHLS 464V.

MPH 565. International Health Problems**3 Credits (3)**

Comparison of domestic health programs and problems with those in other parts of the world; emphasis on political parameters and delivery processes. Additional attention is focused on the health issues of the U.S.-Mexico border. May be repeated up to 3 credits. Crosslisted with: PHLS 465.

MPH 566. International Health Practicum**1-3 Credits**

Intensive examination of health practices and beliefs from a cultural perspective. Focus on health structure, index of diseases, morbidity, mortality and epidemiological approaches to planning. Required travel (personal travel, lodging, and related expenses are extra). May be repeated up to 3 credits. Crosslisted with: PHLS 466.

MPH 567. Rural Health Issues**3 Credits (3)**

Comprehensive overview of rural health services with southwestern United States and New Mexico focus. Crosslisted with: PHLS 467.

MPH 568. Coping with Loss and Grief: A Cross-Cultural Perspective**3 Credits (3)**

A cross-cultural perspective to death, loss and grief. Hospice philosophy of caring for the dying will be included. May be repeated up to 3 credits. Crosslisted with: PHLS 468.

MPH 569. U.S.-Mexico Border Health Issues**3 Credits (3)**

Interdisciplinary analysis of the impact of living conditions and health issues of communities along the U.S.-Mexico border and of the strategies and initiatives to address these issues. Problem-based learning, case analysis, lecture, guest speakers, computer based instruction, and field trips. May be repeated up to 3 credits. Crosslisted with: PHLS 469.

MPH 570. Foundations of Public Health Education**3 Credits (3)**

Social, behavioral, and educational aspects of disease prevention and health promotion. Includes history and theoretical basis of health education.

MPH 571. Health Informatics**3 Credits (3)**

The application of technology to engage communities and individuals in behavioral and environmental change processes. The course will focus on the use of technology to describe the magnitude of health problems and their sources; analyze risk factors; identify community strengths from which strategies may be defined and tools created to intervene, prevent problems, and promote health and well-being; and continuously evaluate, refine, and implement what works. May be repeated up to 3 credits. Crosslisted with: PHLS 471.

MPH 572. Techniques of Health Communication/Education**3 Credits (3)**

Application of a wide range of communication and education theories/methods, including program planning and evaluation, in public health programming. Restricted to: MPH majors.

Prerequisite(s): MPH 510.

MPH 573. Community Organization in Public Health**3 Credits (3)**

Strategies for identifying and involving community leaders, community needs assessment, small area analysis and planning, and community-level development strategies. Restricted to: MPH majors.

Prerequisite(s): MPH 510.

MPH 574. Health Program Planning**3 Credits (3)**

Covers process of successful public health education program planning and grant writing. Restricted to: MPH majors.

Prerequisite(s): MPH 510.

MPH 578. Evaluative Approaches in Public Health**3 Credits (3)**

Survey and analyses of health testing and evaluation procedures, uses and limitations of knowledge and attitude tests, behavioral inventories, check lists, questionnaires, interviews, and other techniques. Restricted to: MPH majors.

Prerequisite(s): MPH 520.

MPH 579. Research and Resources in Community Health**3 Credits (3)**

Exploration of available public health research studies, data, results and implications. Restricted to MPH majors.

Prerequisite(s): MPH 520.

MPH 586. Special Topics**3 Credits (3)**

Specific subjects to be announced in the Schedule of Classes. May be repeated up to 12 credits. Restricted to: MPH majors.

MPH 590. Independent Study**1-6 Credits**

Individual studies with prior approval of department head. May be repeated up to 6 credits. Consent of Instructor required.

MPH 593. Adulthood and Aging**3 Credits (3)**

Normal transitions in later life; those occurring from 40 years of age to the end of life are discussed. Changes in interpersonal relationships and adaptations commonly made by individuals and meeting those alterations are presented through research findings, case studies, and autobiographies.

MPH 594. Aging in a Multicultural Society**3 Credits (3)**

Study and comparison of aging in the southwestern multi-cultural society with emphasis on health care. Same as GERO 494 with differentiated assignments for graduate students.

MPH 596. Field Experience**1-4 Credits**

Student will work in a public health setting under the supervision of an experienced public health professional and will use acquired knowledge and skills to conduct a project which addresses a specific public health problem or program need. Projects are agreed upon by the student and faculty. May be repeated for a maximum of 4 credits. Restricted to MPH majors.

Prerequisite: consent of department head.

MPH 599. Master's Thesis**1-6 Credits**

Minimum of 4 credits required but may be repeated for a maximum of 6 credits. May be repeated up to 6 credits. Consent of Instructor required. Thesis/ Dissertation Grading.

MSW-SOCIAL WORK (MASTERS)

MSW 500. Social Problems and Social Welfare Policy

3 Credits (3)

An overview of social and economic problems in the United States and the historical and current social welfare policies aimed at alleviating these problems. Emphasis on developing an awareness and ability to change policies that impact vulnerable populations. May be repeated up to 3 credits.

MSW 503. Policy Analysis and Change

3 Credits (3)

This course will emphasize policy practice focusing on policy analysis and creating and implementing policy change. Restricted to MSW majors.

Prerequisite(s): MSW 500.

MSW 509. Sociocultural Concepts and Populations of the Southwest

3 Credits (3)

Theoretical and sociohistorical perspectives on racism, sexism, ageism, heterosexism, classism, ableism, and other forms of discrimination and oppression. Cultural diversity, strengths, and Southwest and border issues are emphasized.

MSW 510. Human Behavior and the Social Environment I

3 Credits (3)

The major theories of human behavior and the life span from conception to adolescence. Focuses both on the areas of concern and risk for client systems and on the opportunities and strengths in the social environment. Required. May be repeated up to 3 credits. Restricted to: MSW majors.

Corequisite(s): MSW 509.

MSW 514. Human Behavior & the Social Environment II

3 Credits (3)

The major theories of human behavior from young adulthood to old age. This course will focus on both areas of concern and risk for client systems and on the opportunities and strengths in the social environment. Restricted to: MSW majors.

Prerequisite(s): MSW 510.

MSW 520. Social Work Practice I

3 Credits (3)

This is the first course of a two-course sequence. An introduction to the generalist crosscultural, social work practice perspective with individuals and families, focusing on social work as a profession, social work knowledge base, professional development, relationship building and assessment with individuals and families within a framework of social work values and ethics. May be repeated up to 3 credits.

Corequisite(s): MSW 551.

Prerequisite(s)/Corequisite(s): MSW 510. Restricted to: MSW majors.

MSW 521. Social Work Practice II

3 Credits (3)

This is the second course of a two-course sequence. A continuation of the generalist crosscultural, social work practice perspective with individuals and families, focusing on goal setting, contracting, implementation, and outcome assessment. The course also applies the generalist practice perspective and methods to larger systems: groups, organizations, and communities and includes relationship building, assessment, goal setting, contracting, implementation and outcome assessment within a framework of social work values and ethics. May be repeated up to 3 credits. Restricted to: MSW majors.

Prerequisite(s): MSW 520.

Corequisite(s): MSW 552.

MSW 524. Practice III: Advanced Practice with Individuals

3 Credits (3)

This class builds on Foundation Year Practice courses (MSW 520, 521) by integrating theory and practice, and advancing skills in selecting, applying and evaluating practice interventions in a culturally sensitive manner with individuals. May be repeated up to 3 credits. Restricted to: MSW majors.

Prerequisite(s): MSW 521.

Corequisite(s): MSW 556; MSW 568; MSW 554.

MSW 525. Practice IV: Advanced Generalist Practice with Groups

3 Credits (3)

This course will address the knowledge, values and skills needed to work effectively with diverse populations in group settings. The course will build on Foundation Year courses (MSW 520 and 521) by integrating theory and practice, and advancing skills in selecting, applying and evaluating practice interventions in a culturally sensitive manner with social work groups. May be repeated up to 3 credits. Restricted to: MSW majors.

Prerequisite(s): MSW 521.

Corequisite(s): MSW 556; MSW 568; MSW 554.

MSW 526. Practice V: Advanced Practice with Families**3 Credits (3)**

This class builds on Foundation Year Practice courses (MSW 520 and 521) by integrating theory and practice, and advancing skills in selecting, applying, and evaluating practice interventions in a culturally sensitive manner with families. May be repeated up to 3 credits. Restricted to: MSW majors.

Prerequisite(s): MSW 524, MSW 525.

Corequisite(s): MSW 555; MSW 557; MSW 569.

MSW 527. Practice VI: Advanced Practice with Organizations and Communities**3 Credits (3)**

This class builds on Foundation Year Practice courses (MSW 520, 521) by integrating theory and practice, and advancing skills in selecting, applying, and evaluating practice interventions in a culturally sensitive manner with organizations and communities. May be repeated up to 3 credits. Restricted to: MSW majors.

Prerequisite(s): MSW 524, MSW 525.

Corequisite(s): MSW 557; MSW 569; MSW 555.

MSW 547. Social Work Mental Health Practice**3 Credits (3)**

This course is designed to add to the practice sequence for Masters Level students in Social Work. It addresses social work assessment of major mental health issues across the life span with an emphasis on resiliency and coping skills. Culturally responsive practices are applied to the major issues of mental health. Basic psychopharmacology, neurobiology and the ways in which Social Workers interact with clients to aid education and effective treatment of medical interventions will be a prominent part of this course. Evidence-based practices useful for work in various disorders will be incorporated. May be repeated up to 3 credits. Restricted to: MSW majors.

Prerequisite(s): MSW 520.

MSW 549. Generalist Field Practicum A**3 Credits (3P)**

Supervised professional practice in a community social service agency, providing experiential instruction and learning; seminar required. Evaluation criteria for this course will include upholding social work practice standards for interpersonal and ethical conduct. Total of 225 hours in the field each semester is required, 3 credits each semester. May be repeated up to 3 credits. Restricted to: MSW majors. Graded: S/U Grading (S/U, Audit).

Corequisite(s): MSW 520, MSW 566.

MSW 550. Generalist Field Practicum B**3 Credits (3P)**

Supervised professional practice in a community social service agency, providing experiential instruction and learning; seminar required. Evaluation criteria for this course will include upholding social work practice standards for interpersonal and ethical conduct. Total of 225 hours in the field each semester is required. Letter grade, 3 credits each semester. May be repeated up to 3 credits. Restricted to: MSW majors.

Prerequisite(s): MSW 549.

Corequisite(s): MSW 521, MSW 567.

MSW 551. Generalist Field Practicum I**3 Credits (3)**

Supervised professional practice in a community social service agency, providing experiential instruction and learning. 225 clock hours required. Seminar required. Restricted to: MSW majors. Graded: S/U Grading (S/U, Audit).

Corequisite(s): MSW 520.

MSW 552. Generalist Field Practicum II**3 Credits (3)**

Supervised professional practice in a community social service agency. 225 clock hours required. Seminar required. Restricted to: MSW majors.

Prerequisite(s): MSW 551.

Corequisite(s): MSW 521.

MSW 554. Advanced Generalist Field Experience I**3 Credits (3)**

Supervised professional practice in a community social service agency providing experiential learning in advanced generalist practice. 250 clock hours required. Seminar required. Crosslisted with: MSW 568. Restricted to: MSW majors.

Prerequisite(s): MSW 552.

Corequisite(s): MSW 524, MSW 525.

MSW 555. Advanced Generalist Field Experience II**3 Credits (3)**

Supervised professional practice in a community social service agency providing experiential learning in advanced generalist practice. 250 clock hours required. Seminar required. Crosslisted with: MSW 569. Restricted to: MSW majors.

Prerequisite(s): MSW 554.

Corequisite(s): MSW 526, MSW 527.

MSW 556. Advanced Generalist Field Practicum A**3 Credits (3P)**

Supervised professional practice in a community social service agency, providing experiential instruction and learning in advanced generalist practice: seminar required. Total of 250 hours in the field each semester is required. Letter grade, 3 credits each semester. May be repeated up to 3 credits.

Restricted to: MSW majors.

Prerequisite(s): MSW 550.

Corequisite(s): MSW 524, MSW 525, MSW 568.

MSW 557. Advanced Generalist Field Practicum B**3 Credits (3P)**

Supervised professional practice in a community social service agency, providing experiential instruction and learning in advanced generalist practice: seminar required. Total of 250 hours in the field each semester is required. Letter grade, 3 credits each semester. May be repeated up to 3 credits.

Restricted to: MSW majors.

Prerequisite(s): MSW 556.

Corequisite(s): MSW 526, MSW 527, MSW 569.

MSW 559. Social Work Practice & Research for Advanced Standing**4 Credits (4)**

This course is required for all advanced standing students and targets provision of the conceptual orientation for the concentration year of the MSW program. The goal of this course is to enhance social work practice theory, knowledge and application skills as well as knowledge in preparation for concentration year courses in advanced generalist social work practice. The key themes and concepts presented, explored and analyzed in this course include: the fit between Social Work code of ethics and personal values and belief systems; analysis of theory, ethics, and conceptual frameworks for concentration year advanced evidenced based Social Work practice courses in diverse settings. Restricted to: MSW Advanced Standing majors.

MSW 560. Social Work Research I**3 Credits (3)**

Introduction to analytical skills used in social work research: problem formulation, research designs, measurement, instrumentation, data collection and analysis, use of human participants in research, and application of research knowledge and professional ethics to social work practice. May be repeated up to 3 credits. Restricted to: MSW majors.

Corequisite(s): MSW 500.

MSW 562. Social Work Research II**3 Credits (3)**

Focused on advanced generalist practice research in multicultural settings. Advanced skills to evaluate practice with individuals, families, groups, organizations, and communities in multicultural settings. Needs assessment as well as program and practice evaluation are emphasized. Restricted to: MSW majors.

Prerequisite(s): MSW 560.

MSW 566. Generalist Field Seminar I**3 Credits (3)**

The field seminar assists the student in fortifying a relationship between classroom knowledge and the field experience. In addition, it assists the student in the integration of social work practice processes in service planning and delivery. May be repeated up to 3 credits

Prerequisite(s)/Corequisite(s): MSW 551 or MSW 549, MSW 509, MSW 510, MSW 520. Restricted to: MSW majors. Graded: S/U Grading (S/U, Audit).

MSW 567. Generalist Field Seminar II**3 Credits (3)**

The field seminar assists the student in fortifying a relationship between classroom knowledge and the field experience. In addition, it assists the student in the integration of social work practice processes in service planning and delivery. May be repeated up to 3 credits. Restricted to: MSW majors.

Prerequisite(s): MSW 566.

Corequisite(s): MSW 521, MSW 550.

MSW 568. Advanced Generalist Field Seminar I**3 Credits (3)**

The field seminar assists the student in fortifying a relationship between classroom knowledge and the field experience. In addition, it assists the student in the integration of social work practice processes in service planning and delivery. May be repeated up to 3 credits. Crosslisted with: MSW 554.

Restricted to: MSW majors.

Prerequisite(s): MSW 567.

Corequisite(s): MSW 556, MSW 524, MSW 525.

MSW 569. Advanced Generalist Field Seminar II**3 Credits (3)**

The field seminar assists the student in fortifying a relationship between classroom knowledge and the field experience. In addition, it assists the student in the integration of social work practice processes in service planning and delivery. May be repeated up to 3 credits. Restricted to: MSW majors.

Prerequisite(s): MSW 568.

Corequisite(s): MSW 526, MSW 527, MSW 557.

MSW 590. Family and Child Welfare Policy**3 Credits (3)**

This course will enhance students' ability to offer child welfare services that respect cultural differences, reflect current policy knowledge concerning child maltreatment, build on the advocacy and protective capacities of individuals, families and communities and encourage permanency for children and preservation of families. Required basic knowledge of child welfare and assessment skills. Outside majors require instructor permission. May be repeated up to 3 credits.

MSW 595. Independent Study**1-3 Credits**

Individual study to augment depth of knowledge in area related to course of study. May be repeated for maximum of 6 credits.

Prerequisite: consent of instructor.

MSW 597. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. Open to graduate students in related disciplines and to community professionals in related disciplines and to community professionals in related fields. May be repeated for unlimited credit under different subtitles.

Prerequisite: consent of instructor.

MSW 599. Graduate Thesis**6 Credits**

Required for thesis option. May be repeated for a maximum of 6 credits. Restricted to MSW students.

Prerequisite: consent of instructor.

MUSC-MUSIC

MUSC 1110G. Music Appreciation: Jazz**3 Credits (3)**

This course explores the ideas of music in society and its cultural relevance and is designed to increase the students' appreciation of music as well as to enhance their listening skills. Students are introduced to various periods, styles, and composers of music and become acquainted with knowledge and appreciation of Jazz from various cultures and times.

Learning Outcomes

1. Develop a vocabulary of musical terms, and be able to describe music using those terms
2. Demonstrate knowledge of composers, their music and their relationship to historical periods
3. Recognize how music played and plays a political, social, and cultural function
4. Identify well-known pieces and the historical and social context in which they were composed
5. Demonstrate basic understanding of music notation and musical communication

MUSC 1130G. Music Appreciation: Western Music**3 Credits (3)**

This course explores the ideas of music in society and its cultural relevance and is designed to increase the students' appreciation of music as well as to enhance their listening skills. Students are introduced to various periods, styles, and composers of music and become acquainted with knowledge and appreciation of Western music from various cultures and times.

Learning Outcomes

1. Develop a vocabulary of musical terms, and be able to describe music using those terms
2. Demonstrate knowledge of composers, their music and their relationship to historical periods
3. Recognize how music played and plays a political, social, and cultural function
4. Identify well-known pieces and the historical and social context in which they were composed
5. Demonstrate basic understanding of music notation and musical communication

MUSC 1210. Fundamentals of Music for Non-majors**3 Credits (3)**

A beginning course in the fundamentals of music, this course includes notation, scales, key signatures and intervals. Aural comprehension is introduced through singing intervals, scales and triads and dictating simple rhythmic and melodic patterns and students explore the basic components of music. Traditional Grading with RR.

Learning Outcomes

1. Demonstrate and apply standard notation of pitch, rhythm, scales, intervals, key signatures, triads, and simple melodic and harmonic composition
2. Develop and improve basic aural skills
3. Read musical notation
4. Improve and expand understanding of fundamental musical techniques and concepts

MUSC 1310. Recital Attendance**0.5 Credits (.5+1P)**

This course is for music students to attend and participate in a good number of convocation, concert, and recital performances, creating a wider appreciation for the performing arts. May be repeated up to 4 credits. Restricted to: Music and Music Education majors. S/U Grading with RR. Restricted to Las Cruces campus only.

Learning Outcomes

1. Encourage student observation of serious music
2. Provide opportunities for public performances
3. To create a greater sense of community within the student body

MUSC 1410. Introduction to Music Education**2 Credits (2)**

This course is an overview of teaching in the music classroom through readings and observations. Students will be introduced to the skills needed to become a reflective educator, develop observation techniques, and demonstrate knowledge of the current state of the profession. Restricted to Las Cruces campus only.

Learning Outcomes

1. Make observations and analyze the current state of musical education in public schools
2. Describe characteristics of good teaching in music
3. Articulate a personal philosophy of music education
4. Reflect on personal strengths and weaknesses as a teacher of music

MUSC 1440. Class Voice I**1 Credit (1)**

Group instruction in voice and vocal pedagogy for instrumental Music Education majors, offering basic principles of healthy vocal production with particular attention to diction, development of vocal range, and the ability to impart that knowledge to elementary, junior and/or high school age students. Restricted to: Music Education majors. Traditional Grading with RR. Restricted to Las Cruces campus only.

Learning Outcomes

1. Provide the basic understanding of healthy vocal production. Including, but is not limited to, the
2. following topics: Expanding vocal range; Learning how to practice and learn songs effectively and efficiently; Provide basic understanding of vocal pedagogy; Introduction to diction
3. Aims to equip students with the ability to impart that knowledge to elementary, junior and/or high school age students.

MUSC 1450. Ear Training I**1 Credit (1)**

To develop the ability to accurately hear, identify, sing and notate musical elements including rhythm, melody, intervals and harmony Traditional Grading with RR. Restricted to Las Cruces campus only.

Prerequisite(s): Passing the Theory Placement exam or making a C or better in MUSC 1210.

Learning Outcomes

1. Counting rhythms at sight using the Eastman Counting System
2. Singing melodies at sight using solfege syllables
3. Writing out rhythmic patterns
4. Writing out melodic patterns
5. Identifying and singing intervals
6. Identifying and singing chord / triad qualities

MUSC 1451. Ear Training II**1 Credit (1)**

To develop the ability to accurately hear, identify, sing and notate musical elements including rhythm, melody, intervals and harmony Restricted to Las Cruces campus only.

Prerequisite(s): Grade of C- or better in MUSC 1450.

Learning Outcomes

1. Counting rhythms at sight using the Eastman Counting System
2. Singing melodies at sight using solfege syllables
3. Writing out rhythmic patterns
4. Writing out melodic patterns
5. Identifying and singing intervals
6. Identifying and singing chord / triad qualities

MUSC 1460. Music Theory I**3 Credits (3)**

Introduction to vocabulary and syntax of 4-voice 18th c. chorale music through study and harmonic analysis.

Prerequisite(s): Passing the Theory Placement exam or making a C or better in MUSC 1210.

Learning Outcomes

1. To learn the vocabulary and syntax of 4-voice 18th c. chorale music through study and harmonic analysis

MUSC 1461. Music Theory II**3 Credits (3)**

Expansion of vocabulary and syntax of 4-voice 18th c. chorale music through study, harmonic analysis, and part writing.

Prerequisite(s): Grade of C or better in MUSC 1460.

Learning Outcomes

1. To expand and apply the vocabulary and syntax of 4-voice, 18th c. chorale music through study, harmonic analysis, and part writing.

MUSC 1470. Functional Piano I**2 Credits (2)**

Scales, chords, memorization. Harmonization of simple melodies with the ability to play simple melodies and rhythms. May be taken for unlimited credit.

Restricted to music majors. No S/U option.

Learning Outcomes

1. 5 finger hand position in all keys
2. I-IV-I-V7-I cadences in all keys
3. One octave scales with hands together in C, G, D and F (major and minor)
4. Root position cross--over triads, solid and broken (major and minor)
5. Simple sight reading, harmonizing and transposition
6. Prepared pieces from the textbook
7. Simple improvisation
8. Play 2 simple vocal exercises
9. Identify intervals, key signatures and chords
10. 1Correct posture and hand position
11. 1Musical issues such as phrasing, slurs and dynamics
12. 1Good practice habits and techniques

MUSC 1471. Functional Piano II**2 Credits (2)**

Scales, chords, memorization. Harmonization of simple melodies with the ability to play simple melodies and rhythms. May be taken for unlimited credit.

Restricted to music majors. No S/U option.

Prerequisite: MUSC 1470 or consent of instructor.

Learning Outcomes

1. Two octave scales with hands separate in C, G, D, A, E, B and F (major and minor)
2. I-IV-I-V-V7-I cadences in above mentioned keys in root position and 1st inversion
3. Simple sight reading, harmonization and transposition
4. Prepared pieces from the book
5. Simple improvisation
6. Identify intervals, key signatures and chords
7. Correct posture and hand position
8. Musical issues such as phrasing, slurs and dynamics
9. Good practice habits and techniques

MUSC 1472. Functional Piano III**2 Credits (2)**

For music majors preparing for the Piano Proficiency Examination. May be taken for unlimited credit. Restricted to music majors. No S/U option.

Prerequisite: MUSC 1471 or consent of instructor.

Learning Outcomes

1. Keys learned in previous semesters, adding F# and C# (D flat)
2. Secondary dominant chords added to cadence patterns
3. Two-octave, , root position arpeggios, major and minor
4. Intro to chord charts, harmonization
5. More difficult sight-reading and transpositions
6. More difficult prepared pieces
7. Accompany a piece for any instrument on the Mid-Term Recital (required)

MUSC 1992. Applied Music**1-2 Credits**

Private or group instruction for non-music majors, secondary instruments, and music majors preparing for 200-level applied music. May be taken for unlimited credit.

Learning Outcomes

1. Varies

MUSC 2110. Chamber Ensemble**1 Credit (1)**

This course is an exploration of chamber ensembles, allowing students to develop their abilities with their instruments in a group setting. Students will gain a broader understanding of chamber ensemble through study of musical history, as well as various practice exercises and performances. May be repeated up to 16 credits. Restricted to Las Cruces campus only.

Prerequisite(s): by audition only.

Learning Outcomes

1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage

MUSC 2120. Major Ensemble**1 Credit (1)**

This course is an exploration of major ensembles, allowing students to develop their abilities with their instruments in a group setting. Students will gain a broader understanding of major ensemble through study of musical history, as well as various practice exercises and performances. May be repeated up to 10 credits. Restricted to Las Cruces campus only.

Prerequisite(s): by audition only.

Learning Outcomes

1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage

MUSC 2130. Jazz Ensemble**1 Credit (1)**

This course is an exploration of jazz ensembles, allowing students to develop their abilities with their instruments in a group setting. Students will gain a broader understanding of jazz ensemble through study of musical history, as well as various practice exercises and performances. May be repeated up to 10 credits. Restricted to Las Cruces campus only.

Prerequisite(s): By audition only.

Learning Outcomes

1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage
6. Develop and improve improvisation skills

MUSC 2132. Percussion Ensemble**1 Credit (1)**

Study and performance of contemporary percussion ensemble literature. May be repeated up to 5 credits. Restricted to Las Cruces campus only.

Prerequisite(s): by audition only.

Learning Outcomes

1. Improve performance skills
2. Develop and improve performance skills in a group setting
3. Develop understanding and interpretation within the context of music history
4. Refine and improve technical ability
5. Demonstrate proper technique and usage

MUSC 2151. An Introduction to World Music, Jazz and Music Research**3 Credits (3)**

Introduces world music and jazz within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works. A major component will be the development of effective research and scholarly writing skills for the music major or minor. May be repeated up to 3 credits. Restricted to: Music majors and minors. Restricted to Las Cruces campus only.

Learning Outcomes

1. This course will cover fundamental concepts and styles associated with world music (ethnomusicology), jazz and popular music, an overview of the Western European tradition, and an intense focus on research and writing about music.
2. Emphasis will be placed on writing skills as they apply to the college experience in general and the world of music education and performance in particular.
3. Students will become acquainted with the diverse ways cultures create and are affected by their respective musical arts.
4. Focus will be on style evolution, forms, genres, composers, literature, and, where appropriate, performers

MUSC 2210. Diction I**2 Credits (2)**

This course is designed to prepare students for singing in multiple languages using concepts of the International Phonetic Alphabet. Students will work to master the basics of phonetic singing to improve their overall musical abilities. Restricted to Las Cruces campus only.

Learning Outcomes

1. Correctly and consistently form vowel and consonant sounds when speaking and singing in multiple languages
2. Correctly and consistently transcribe texts in multiple languages using the International Phonetic Alphabet
3. Understand and explain the International Phonetic Alphabet's usage and symbols
4. Develop and apply the concept of lyric diction to singing
5. Gain fluency, accuracy, and confidence in pronunciation of sung text

MUSC 2220. Diction II**2 Credits (2)**

This course serves as a continuing study in the concepts of the International Phonetic Alphabet. Students will continue to improve and practice their diction to develop their singing and musical abilities in order to begin the mastery of lyric diction. Restricted to music majors. Restricted to Las Cruces campus only.

Prerequisite: MUSC 2210 or consent of instructor.

Learning Outcomes

1. Correctly and consistently form vowel and consonant sounds when speaking and singing in multiple languages
2. Correctly and consistently transcribe texts in multiple languages using the International Phonetic Alphabet
3. Understand and explain the International Phonetic Alphabet's usage and symbols
4. Develop and apply the concept of lyric diction to singing.
5. Gain fluency, accuracy, and confidence in pronunciation of sung text.
6. Demonstrate ability to notate song texts according to IPA standards

MUSC 2240. Music History and Literature: Antiquity through Baroque**3 Credits (3)**

Surveys Western art music within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works from antiquity through the end of the Baroque era. An additional emphasis will be given to effective research and scholarly writing skills. Restricted to: M ED, MUSC majors.

Prerequisite(s): A grade of C- or better in MUSC 1450, 1460, and 2151.

Learning Outcomes

1. The purpose of the course is to survey the beginning history of music from the earliest ancient times through the Baroque period, ca. 175

MUSC 2310. Sound and Music Technology**1 Credit (1)**

This course serves as an overview of current technologies and principles for the recording and production of sound, and the use of computer-based technologies for the production of music. Restricted to: MUSC, M ED majors. Traditional Grading with RR. Restricted to Las Cruces campus only.

Prerequisite(s): MUSC 1460.

Learning Outcomes

1. Demonstrate fundamental knowledge of techniques and practices of music recording and production
2. Demonstrate ability to properly use computer-based technologies to produce and record music
3. Demonstrate ability to create music recordings
4. Work with a variety of recording, production, and sound reinforcement tools
5. Apply basic and mixed editing techniques
6. Use audio editing and file management techniques
7. Demonstrate knowledge of music technology vocabulary
8. Explain and understand the development of various music technologies

MUSC 2451. Ear Training III**1 Credit (1)**

Continuation of MUSC 1451, advanced sight singing, dictation. Restricted to Las Cruces campus only.

Prerequisite(s): Grade of C- or better in MUSC 1451.

Learning Outcomes

1. Count rhythms at sight using the Eastman Counting System
2. Sing melodies at sight and prepared using Solfege syllables
3. Write out rhythmic patterns
4. Write out melodic patterns
5. Identify and singing intervals
6. Identify and sing chord / triad qualities
7. Write out harmonic dictation

MUSC 2452. Ear Training IV**1 Credit (1)**

Continuation of MUS 2451, advanced sight singing, dictation. Restricted to Las Cruces campus only.

Prerequisite(s): Grade of C or better in MUSC 2451 and MUSC 2460.

Learning Outcomes

1. Count rhythms at sight using the Eastman Counting System
2. Sing scales and sequences as assigned for the level
3. Sing melodies at sight using solfege syllables
4. Write out rhythmic patterns in both simple and compound meters
5. Write out melodic patterns in both major and minor tonalities
6. Identify, label and sing intervals
7. Identify, label and sing chords and extended harmonic qualities, i.e. V7 and inversions
8. Write out harmonic progressions in both two and four part forms including secondary dominants and modulations.
9. Accurately detect melodic and rhythmic errors in dictation examples.

MUSC 2460. Music Theory III**3 Credits (3)**

Analysis of Baroque and Classical Music. Vocabulary and syntax of 18th and 19th c. Western art music through study, chordal/formal analysis, and composition. Restricted to Las Cruces campus only.

Prerequisite(s): Grade of C or better in MUSC 1461.

Learning Outcomes

1. To learn and apply the vocabulary and syntax of 18th and 19th c. Western art music through study, chordal/formal analysis, and composition.
2. Topics covered include: Two-Voice Eighteenth Century Counterpoint; Fugue; Borrowed Chords; Neapolitan 6th Chords; Augmented 6th Chords; Sonata Form; Rondo Form.

MUSC 2461. Music Theory IV**3 Credits (3)**

Analysis of Romantic, Post-Romantic, Impressionist, and Twelve-Tone Music. Vocabulary and syntax of late 19th and early 20th c. Western art music through study, micro/macro analysis, and composition. Restricted to Las Cruces campus only.

Prerequisite(s): Grade of C or better in MUSC 2460.

Learning Outcomes

1. To learn and apply the vocabulary and syntax of late 19th and early 20th c. music through study, micro/macro analysis, and composition.

MUSC 2470. Functional Piano IV**2 Credits (2)**

For music majors preparing for Piano Proficiency Examination. May be taken for unlimited credit. Restricted to music majors. No S/U option.

Prerequisite: MUSC 1472 or consent of instructor.

Learning Outcomes

1. Keys learned in previous semesters, adding A flat, E flat, and B flat
2. Secondary dominant chords added to cadence patterns, all inversions
3. Arpeggios, all inversions
4. More difficult sight-reading and transpositions
5. More difficult prepared pieces
6. Four part pieces (hymns)
7. Accompany a piece for any instrument on the Mid-Term Recital (required) Score reading and transposition

MUSC 2510. Applied Music I**1-4 Credits**

Individual instruction to develop technique, musicianship, performance and improvisational skills, as well as knowledge of significant repertoire. May be repeated up to 16 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR. Restricted to Las Cruces campus only.

Prerequisite(s): Audition.

Learning Outcomes

1. Varies

MUSC 2993. Opera Workshop**1 Credit (1)**

Study, translation, analysis, rehearsal and performance of opera. May be repeated up to 10 credits. Restricted to Las Cruces campus only.

Prerequisite(s): by audition only.

Learning Outcomes

1. Varies

MUSC 2996. Special Topics I**1-3 Credits**

Emphasis on special areas of music; designed for highly motivated students. May be taken for unlimited credit.

Learning Outcomes

1. Varies

MUSC 301. Marching Band Techniques**2 Credits (2)**

This course will help students develop the techniques needed to administer and teach all aspects of a contemporary high school marching band.

This includes drill conception and design, instruction, organization, and administration. Stylistic varieties of marching fundamentals, show conception, fundamentals of charting and teaching drill, computer-aided drill design, traditional show design, contemporary show design, rehearsal techniques, and organizational concepts. Restricted to: Music, Music Education majors. Traditional Grading with RR.

MUSC 302. Music History and Literature: Classic through Romantic**3 Credits (3)**

Surveys Western art music within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works from the beginnings of the Classic era through the end of the Romantic era. An additional emphasis will be given to effective research and scholarly writing skills. Restricted to: Music Majors and Minors majors.

Prerequisite(s): A grade of C- or better in MUSC 2240.

MUSC 303. Music History and Literature: 20th Century Through the Present**3 Credits (3)**

Surveys Western art music within a historical and cultural context, considering significant musical figures, forms, genres, styles, and representative works from the beginning of the 20th Century through the Present. An additional emphasis will be given to effective research and scholarly writing skills. Restricted to: MUS minors and majors.

Prerequisite(s): A grade of C- or better in MUSC 302.

MUSC 315. Brass Techniques I**1 Credit (1)**

Methods and techniques of teaching high brass instruments, for music education majors. Main campus only.

MUSC 316. Brass Techniques II**1 Credit (1)**

Methods and techniques of teaching low brass instruments, for music education majors. Main campus only.

MUSC 317. Woodwind Techniques I**1 Credit (1)**

Methods and techniques of teaching high woodwind instruments, for music education majors. Main campus only.

MUSC 318. Woodwind Techniques II**1 Credit (1)**

Methods and techniques of teaching saxophone and double reed instruments, for music education majors. Main campus only.

MUSC 319. String Techniques I**1 Credit (1)**

Methods and techniques of teaching low string instruments, for music education majors. Main campus only.

MUSC 320. String Technique II**1 Credit (1)**

Methods and techniques of teaching high string instruments, for music education majors. Main campus only.

MUSC 321. Instrumental Techniques for Vocal Music Education Majors**2 Credits (2)**

Methods of teaching brass, woodwind, percussion, stringed and fretted instruments for vocal music education majors. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 322. Guitar Methods**1 Credit (1)**

Methods and techniques of teaching guitar, for Music Education majors. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 323. Percussion Technique I**1 Credit (1)**

Methods and techniques of teaching fundamental percussion instruments (snare drum, timpani, keyboards and essential accessories). May be repeated up to 1 credits. Restricted to: MUS,M ED majors.

MUSC 324. Percussion Technique II**1 Credit (1)**

Methods and techniques of teaching marching percussion, drum set, and a continuation of techniques discussed in MUS 323. May be repeated up to 1 credits. Restricted to: MUS,M ED majors. Traditional Grading with RR.

Prerequisite(s): A grade of C- or better in MUS 323.

MUSC 325. Beginning Conducting**1 Credit (1)**

A study of the fundamentals of conducting and rehearsal strategies with an emphasis on beginning technique applicable to all ensembles. Reading of musical scores with application via laboratory ensemble experience is included. Restricted to: Music and Music Education majors. Traditional Grading with RR.

Prerequisite(s): A grade of C or better in MUSC 2452 and MUSC 2461.

MUSC 326. Instrumental Conducting**3 Credits (3)**

Will continue from MUSC 325 in the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques as it relates to the instrumental ensemble. The class will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. May be repeated up to 3 credits. Restricted to: MUS,M ED majors. Traditional Grading with RR.

Prerequisite(s): A grade of C- or better in MUSC 325.

MUSC 327. Choral Conducting**3 Credits (3)**

Continuation of conducting study with emphasis on choral rehearsal techniques, ensemble management, and literature. Restricted to: Music and Music Education majors. Traditional Grading with RR.

Prerequisite(s): A grade of C or better in MUSC 325.

MUSC 330. Applied Music II**1-4 Credits**

Continuation from MUS 230. Individual instruction to develop technique, musicianship, performance and improvisational skills, as well as knowledge of significant repertoire. May be repeated up to 16 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

Prerequisite(s): A grade of C or better in MUSC 2992 plus a juried audition.

MUSC 339. Survey of Music Business**3 Credits (3)**

Survey of career options and exploration of current events/trends within the Music Industry. Non-Music Business majors may be admitted with instructor's approval.

MUSC 340. Junior Recital**1 Credit (1)**

Public solo performance under the supervision of the appropriate applied instructor. 30 minutes of musical performance is required. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

Corequisite(s): MUSC 330.

MUSC 341. BA Capstone**1-2 Credits (1-2)**

The objective of the Capstone course for the BA degree in Music is to demonstrate the accumulation, understanding and knowledge of the student's course of study. This will take the form of an analytical paper, recital, research paper, composition or other equally encompassing project approved by the Instructor of Record. This may involve coursework from the student's minor area of study and be a multi-disciplinary collaborative effort. Restricted to: Music majors.

Prerequisite(s): A B- or better in MUSC 2460 and MUSC 302.

MUSC 346. Elementary Music Methods**2 Credits (2)**

Lesson planning, curriculum, teaching methodology, materials, and procedures for teaching music in an elementary school. Emphasis on methodology of Kodaly and Orff, teaching in a multicultural setting, and developing reflective practitioners. This course requires field experience in the public schools. Restricted to: Music Education majors.

Prerequisite(s): A grade of C or better in MUSC 1410 and passing the TEP exam.

MUSC 349. Secondary Music Methods**2 Credits (2)**

Lesson planning, curriculum, teaching methodology, materials, and procedures for teaching music in the middle school and high school. Emphasis on teaching in a multicultural setting and developing reflective practitioners. Restricted to: Music Education majors.

Prerequisite(s): A grade of C or better in MUSC 346.

MUSC 350. Chamber Music**1 Credit (1)**

Small performing ensembles that may include strings, woodwinds, brass, pianos, percussion, and voices. May be repeated up to 16 credits.

Prerequisite(s): by audition only.

MUSC 351. Opera Workshop**1 Credit (1)**

Study, translation analysis, rehearsal and performance of opera. May be repeated up to 10 credits.

Prerequisite(s): by audition only.

MUSC 360. Special Topics II**1-3 Credits**

Emphasis on special areas of music; designed for highly motivated students. May be taken for unlimited credit.

MUSC 361. Concert Choir II**1 Credit (1)**

Composed of both music and nonmusic majors. Emphasis on vocal techniques, sight-singing, and basics of choral musicianship. Students must assume leadership role. May be repeated up to 88 credits.

Prerequisite(s): by audition only.

MUSC 362. Philharmonic Orchestra II**1 Credit (1)**

The University Philharmonic Orchestra is open to all students and performs a wide variety of standard orchestral literature. The orchestra performs each semester and the objectives include refining technique, stylistic characteristics, intonation, balance, bowings, color, rhythmic integrity and dynamics. May be repeated up to 10 credits.

Prerequisite(s): by audition only.

MUSC 363. Jazz Ensembles II**1 Credit (1)**

Performance ensemble that explore repertoire written for big band, including (but not limited to) dance band, swing, and contemporary compositions. May be repeated up to 10 credits.

Prerequisite(s): by audition only.

MUSC 365. Composition I**2 Credits (2)**

Significant forms for various media. Emphasis on structural aspects of original composition. Restricted to: M ED, MUS majors.

Prerequisite(s): A grade of B or better in MUSC 1460.

MUSC 368. University Singers II**1 Credit (1)**

Select concert and touring choir of undergraduate and graduate students performing a cappella and accompanied choral literature. May be repeated up to 10 credits. Consent of Instructor required.

Prerequisite(s): by audition only.

MUSC 370. Wind Symphony II**1 Credit (1)**

This elite ensemble of 50 highly qualified graduate and undergraduate students performs a varied repertoire of the highest quality literature for winds. Members will also perform concerts of chamber winds literature each semester. This ensemble is dedicated to professional level performance while fostering the musical growth of its members. Conducted by the Director of Bands, this group serves as the flagship for the entire university bands program. May be repeated up to 10 credits.

Prerequisite(s): by audition only.

MUSC 372. Marching Band II**1 Credit (1)**

Composed of both majors and nonmajors. Opportunity to perform all varieties of music in a contemporary style marching unit. May be repeated up to 5 credits. Consent of Instructor required. Traditional Grading with RR.

MUSC 374. Percussion Ensembles II**1 Credit (1)**

Study and performance of contemporary percussion ensemble literature. Students must assume a leadership role. May be repeated up to 5 credits.

Prerequisite(s): by audition only.

MUSC 380. Symphonic Band II**1 Credit (1)**

This is a select large ensemble, chosen by audition. It provides a challenging musical environment for skilled performers by programming repertoire that ranges from works for chamber winds, to standards of the wind band literature, to cutting edge literature. Conducted by the Associate Director of Bands, this ensemble is comprised of music majors and non-music majors alike and provides the less experienced student an opportunity to hone and refine performance skills. May be repeated up to 10 credits.

Prerequisite(s): by audition only.

MUSC 381. Campus Band II**1 Credit (1)**

This is a non-auditioned ensemble designed to meet the needs of students from all majors across campus. Music majors are encouraged to enroll while performing on a secondary instrument. Marching band members are also encouraged to take the course to build skills and leadership. This ensemble provides an educational experience and serves as an outlet for students who wish to remain musically active in a less intense setting. May be repeated up to 10 credits.

MUSC 386. Applied Music Pedagogy and Literature I**2 Credits (2)**

Methods, materials, problems, literature, and techniques in teaching individual lessons. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 390. Survey of Wind Literature**2 Credits (2)**

An examination of beginning to advanced literature for wind bands with an emphasis on the needs of middle and high school ensembles. It will include a means to determine the quality of a piece as well as the standardized level of difficulty (grading). Restricted to: Music and Music Education majors.

Prerequisite(s): A grade of C- or better in MUSC 2452 and MUSC 2461.

MUSC 391. Survey of Orchestral Literature**2 Credits (2)**

An examination of beginning to advanced literature for both string orchestra and symphony orchestra with an emphasis on the needs of middle and high school ensembles. A means to determine the quality of a piece as well as the standardized level of difficulty (grading) will be included. Restricted to: Music and Music Education majors.

Prerequisite(s): A grade of C- or better in MUSC 2452 and MUSC 2461.

MUSC 392. Survey of Choral Literature**2 Credits (2)**

An examination of beginning to advanced literature for choir with an emphasis on the needs of middle and high school ensembles. A means to determine the quality of a piece as well as the standardized level of difficulty (grading) will be included. Restricted to: Music and Music Education majors.

Prerequisite(s): A grade of C- or better in MUSC 2452 and MUSC 2461.

MUSC 413. Form and Analysis**3 Credits (3)**

Forms in tonal music and basic analytic techniques including music from diverse cultures and media.

Prerequisite(s): A grade of C- or better in MUSC 2452 and MUSC 2461.

MUSC 415. Orchestration**3 Credits (3)**

Scoring for full orchestra and various instrumental combinations with consideration of instrument timbres, strengths, weaknesses and ranges. Restricted to: Music and Music Education majors.

Prerequisite(s): A grade of C or better in MUSC 2452 and MUSC 2461.

MUSC 417. Studio Accompanying**2 Credits (2)**

Practical application of collaborative piano skills in a studio setting for Piano Performance majors. May be repeated up to 8 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 421. Music of the Baroque Era**3 Credits (3)**

An overview of the music of the Baroque era with an emphasis on history and literature.

Prerequisite(s): MUSC 303.

MUSC 422. Music of the Classic Era**3 Credits (3)**

An overview of the music of the Classic era with an emphasis on history and literature.

Prerequisite(s): MUSC 303.

MUSC 424. Music of the Twentieth Century**3 Credits (3)**

An overview of the music of the Twentieth Century with an emphasis on history and literature. Consent of Instructor required.

Prerequisite(s): MUSC 303.

MUSC 429. Opera: History and Literature**3 Credits (3)**

An overview of the operatic art form from the Florentine Camerata and Baroque opera through current 21st-century works, with an emphasis on historical context, composers, and significant works. Restricted to: Music, Music Education majors.

Prerequisite(s): MUSC 303 or consent of instructor.

Learning Outcomes

1. The student will be able to effectively identify and discuss operatic developments and traditions in historical context as well as demonstrate a knowledge of operatic composers and significant operatic works.

MUSC 430. Applied Music III**1-4 Credits**

Continuation from MUS 330. Individual instruction to develop technique, musicianship, performance and improvisational skills, as well as knowledge of significant repertoire. May be repeated up to 16 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

Prerequisite(s): A grade of C or better in MUSC 330 plus a juried audition.

MUSC 440. Senior Recital**1-2 Credits (1-2)**

Public solo performance under the supervision of the appropriate applied instructor. 60 minutes of musical performance is required for enrollment of 2 hours credit. 30 minutes of musical performance is required for enrollment of 1 hour credit. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

Corequisite(s): MUSC 430.

MUSC 441. Supervised Studio Teaching**2 Credits (2)**

Teaching of private lessons under supervision. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: Music and Music Education majors. Traditional Grading with RR.

MUSC 450. Research Methods**3 Credits (3)**

Introduction to methodology of music research. Emphasis on important scholarly resources and academic writing. Restricted to majors. Main campus only. No S/U option.

Prerequisite: consent of instructor.

MUSC 455. Music Business Internship**3 Credits (3)**

Capstone course for the Music Business degree. Working with the music business coordinator, students must have been accepted as an intern in a music business setting before enrolling. Credit given for the internship based on criteria developed for each placement. Restricted to majors. S/U only.

Prerequisites: MUSC 330 and piano proficiency.

MUSC 470. Special Topics III**1-3 Credits**

Designed for highly motivated students. Independent study and individual guidance. May be taken for unlimited credit.

MUSC 471. Graduate Theory Review**3 Credits (3)**

Comprehensive and accelerated study of modes, diatonic harmony, and classical form of the common practice period. Restricted to: Music majors. Traditional Grading with RR.

MUSC 475. Intermediate Conducting**3 Credits (3)**

Serves as a bridge from undergraduate conducting study to the graduate level. Advanced undergraduate students may enroll to learn how the graduate program in conducting functions. The course also serves as the introductory experience for newly admitted graduate conducting majors. After successful completion of this course, students will be able to: Study musical scores from a conducting perspective; Demonstrate effective predetermined gestures and movements; Lead an ensemble; Research and give presentations related to composers and their music; Demonstrate advanced knowledge of conducting practices.

Prerequisite(s): A grade of C- or better in MUSC 326 or MUSC 327.

MUSC 477. Graduate Music History Review**3 Credits (3)**

Comprehensive and accelerated study of music history from antiquity to the present Restricted to: Music majors. Traditional Grading with RR.

MUSC 486. Applied Music Pedagogy and Literature II**2 Credits (2)**

Methods, materials, problems, literature, and techniques in teaching individual lessons. Consent of Instructor required. Restricted to: Music majors. Traditional Grading with RR.

MUSC 498. Independent Study**1-3 Credits**

For students with a strong musical background wishing to explore content beyond the traditional curriculum. Restricted to majors. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

MUSC 511. Survey of Traditional Harmony**3 Credits (3)**

Tonal harmony in common practice and theory of the late 17th, 18th, and early 19th centuries. Restricted to: Music majors. Traditional Grading with RR.

Prerequisite(s): A grade of B or better in MUSC 471.

MUSC 513. Twentieth Century Art Music**3 Credits (3)**

Analytical techniques, structural design and compositional materials from Debussy to the Minimalist school in historical context. Restricted to: Music majors.

Prerequisite(s): A grade of B or better in MUSC 471.

MUSC 518. Seminar in Music Theory**3 Credits (3)**

Varying topics in Music Theory, providing a more specific and in-depth study of the particular topic. May be repeated up to 6 credits. Restricted to: Music majors. Traditional Grading with RR.

Prerequisite(s): A grade of B or better in MUSC 471.

MUSC 519. Seminar in Music History**3 Credits (3)**

Varying topics in Music History, providing a more specific and in-depth study of the particular topic. May be repeated up to 6 credits. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 477.

MUSC 521. Music of the Baroque Era: History and Literature**3 Credits (3)**

An overview of the music of the Baroque Era with an emphasis on history and literature.

MUSC 522. Music of the Classical Era: History and Literature**3 Credits (3)**

An overview of the music of the Classical era with an emphasis on history and literature. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 477.

MUSC 523. Music of the Romantic Era: History and Literature**3 Credits (3)**

An overview of Romantic era music, with an emphasis on history and literature. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 477.

MUSC 527. History and Analysis of the Symphony**3 Credits (3)**

Historical background and development of the symphony from its inception (ca. 1740s) to mid-twentieth century. Analysis of major works by significant composers with emphasis on Sonata form. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 471 and MUSC 477.

MUSC 529. Opera History and Literature**3 Credits (3)**

An overview of the operatic art form from the Florentine Camerata and Baroque opera through current 21st-century works, with an emphasis on historical context, composers, and significant works. Restricted to: M ED, MUS majors.

Prerequisite(s): A grade of B or better in MUSC 477.

Learning Outcomes

1. The student will be able to effectively identify and discuss operatic developments and traditions in historical context as well as demonstrate a knowledge of operatic composers and significant operatic works.

MUSC 530. Seminar in Music Education**3 Credits (3)**

Varying topics in Music Education, providing a more specific and in-depth study of the particular topic. Restricted to: MUS majors.

MUSC 531. Music Education in the Diverse Classroom**3 Credits (3)**

This course is designed to provide an introduction to diverse and at-risk student groups in educational settings in the music classroom. It will help the course participants explore strategies and gain skills to enhance the musical growth of marginalized groups of students. There is an emphasis on identification, behavioral patterns, building interpersonal relationships, and will include a critical review of selected current research studies in music education. Armed with this knowledge, course participants will be better prepared to understand at-risk students and how best to implement strategies in the classroom. May be repeated up to 3 credits. Restricted to: MUS majors.

Learning Outcomes

1. Students will access and utilize the basic research journals and other sources of research reports and summaries, including those identified using computer technology in the field of music education. Students will describe the structure of most qualitative research studies and their aide in identifying student traits. Students will understand and use most of the language, terms and vocabulary found in qualitative research reports in discussing and identifying behavioral patterns of at-risk students. Students will appraise qualitative research in a systematic way; analyze and review what the research produced in order to isolate the strategies available to incorporate in classroom teaching scenarios. Students will independently retrieve, critique and summarize research related to at-risk students in music education.

MUSC 535. Current Issues in Music Education**3 Credits (3)**

This course examines the rich and challenging complexities of music teaching and learning from a variety of perspectives. Educational theory to pedagogical inquiry of current educational practice will be examined, calling students to critically reflect on such professional activities as lesson planning, curriculum design, repertoire choice, program assessment, advocacy in the arts, and student evaluation. Restricted to: MUS (Music Ed track only) majors.

MUSC 540. Graduate Recital/Analytical Paper**4 Credits (4)**

This course is for students completing a Master of Music with a Performance emphasis. A public recital will be given and an accompanying research paper will be submitted. Restricted to: MUS majors.

MUSC 574. Advanced Choral Conducting I**3 Credits (3)**

This course will continue the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 575. Advanced Choral Conducting II**3 Credits (3)**

This is the final course in preparation for the student's graduate conducting concert. It will continue the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 574.

MUSC 576. Advanced Instrumental Conducting I**3 Credits (3)**

The role of the conductor is to lead, react to, alter, and reinforce the performance of the ensemble. This course will continue in the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 577. Advanced Instrumental Conducting II**3 Credits (3)**

The role of the conductor is to lead, react to, alter, and reinforce the performance of the ensemble. This course will continue in the training for competent musicianship with a focus on conducting gestures and movements, score study, and rehearsal techniques. Lessons will focus primarily on the development of a non-verbal vocabulary that will allow each student to clearly and artistically communicate with the members of an ensemble to solicit a predetermined musical result. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 576.

MUSC 578. Advanced Choral Literature**2-3 Credits (2-3)**

An examination of significant choral works from 1200 to the present, including composers, genres, and historical context May be repeated up to 3 credits. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 579. Advanced Instrumental Literature**2-3 Credits (2-3)**

An examination of significant instrumental works from the Baroque period to the present, including composers, genres, and historical context May be repeated up to 3 credits. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 475.

MUSC 580. Ensemble Performance**1 Credit (1)**

Performance in university ensembles. May be repeated up to 99 credits.

Prerequisite(s): by audition only.

MUSC 582. Applied Music**2-4 Credits**

For music majors, individual instruction, including improvisation skills and techniques. Students may enroll for 2 or 4 credits. May be repeated for a maximum of 16 credits.

Prerequisites: audition and consent of instructor.

MUSC 586. Applied Music Pedagogy and Literature III**2 Credits (2)**

Methods, materials, problems, literature, and techniques in teaching individual lessons. Restricted to: MUS majors.

Prerequisite(s): A grade of B or better in MUSC 486.

MUSC 598. Special Research Programs**1-4 Credits**

May be taken for unlimited credit.

MUSC 599. Master's Thesis**15 Credits**

Thesis.

NA - NURSING ASSISTANT

NA 101. Nursing Assistant Theory and Lab**6 Credits (5+2P)**

Nurse aide skills with emphasis on a bio-psychosocial-cultural approach to client care. Practice of these skills is provided in the laboratory as well as at a clinical site. Successful completion of the course prepares and qualifies the student to take the NACES certification examination. Requires a C or better to pass. Restricted to Community Colleges campuses only.

Learning Outcomes

1. Apply theoretical knowledge associated with nursing assisting in providing basic healthcare services. Perform essential clinical skills within the nursing assistant scope of practice in long-term, acute care, and ambulatory care settings. Recognize factors that affect procedures and results, and take appropriate actions within predetermined limits when indicated, including resident/patient compromise or complications. Demonstrate professional conduct and interpersonal communication skills with patients, other health care professionals, and with the public. Recognize the responsibilities of other health care personnel and interact with them with respect for their healthcare roles and resident/patient care. Apply basic scientific principles and evidenced-based practice in learning new techniques and procedures. Relate vital signs, point-of-care testing, and physical psychological findings to common disease processes. Evaluate occupational exposures, environmental safety hazards, high risk situations, and emergency responses related to health care professions. Demonstrate soft skills related to assisting with patient assessment, mobility, safety, nutrition, and care of the environment. 1 Demonstrate professionalism when interacting with patient populations across the lifespan; including patient education and emergent situations. 1 Explain legal and ethical considerations, including HIPAA and scope of practice related to healthcare settings.

NA 102. Sterile Processing Technician**4 Credits (3+3P)**

This course will prepare the student to work as a Sterile Processing Technician, performing critical functions that support both the hospital and Operating Room. The student will learn about infection control, instrument reprocessing, decontamination, disinfection, and sterilization. All critical aspects of sterile processing will be covered to include applicable standards and regulations. This field is constantly evolving and those desiring to work in this profession must ensure that they stay abreast of the science behind the discipline. Restricted to Community Colleges campuses

Prerequisite(s): CCDE 110 N General Composition Placement exam scores, or specific course work.

Learning Outcomes

1. Summarized the legal responsibilities, ethical standards, and safety practices related to Sterile Processing Control and eliminate the spread of microorganisms Articulate standards and regulations as well as recommendations by professional organizations Properly clean, decontaminate, disinfect, and sterilize basic surgical instrumentation Prepare and assemble surgical trays and kits to include packaging and quality assurance indicators Utilize various sterilization modalities

NA 104. Nursing Assistant Fundamentals**3 Credits (3)**

This course prepares students for employment as a Nursing Assistant in a Long Term Care Facility. Theory and basic nursing care skills will be taught with an emphasis being placed on the psychosocial-cultural approach to client care. Students will learn communication skills, basic anatomy and physiology, growth and development, infection control, body mechanics, basic nutrition, client/resident elimination needs, the client/resident unit, vital signs, range of motion exercises, bed making, rehabilitation and restorative care, client admission and discharge, common health problems, dealing with death and dying, and basic medical terminology. NA 104 and NA 104L (laboratory) must be successfully completed with a C- or better in order to continue to NA 105 Nursing Assistant Clinical. NA 105 must also be successfully completed with a C- or better to be eligible to take the state certification competency examination. Attendance is required to meet the federal requirements for training hours and content prior to direct contact with a patient/resident and the state competency examination. Students must test out of all CCDE and CCDR courses and eligible to take ENGL 1110G to enroll in this course. Restricted to Community Colleges campuses only.

Corequisite(s): NA 104 L.

NA 104 L. Nursing Assistant Fundamentals Lab**1 Credit (3P)**

This course prepares students for employment as a Nursing Assistant in a Long Term Care Facility. Students will learn and demonstrate personal care skills including bathing, grooming, dressing, toileting, assisting with eating and hydration, skin care, transfers and positioning. Students will also learn and demonstrate the use of assistive devices, and how to maintain resident safety, dignity and privacy. NA 104 & NA 104L must be successfully completed with a C- or greater in order to continue to NA 105 Clinical. NA 105 must be successfully completed with a C- or greater to be eligible to take the state certification competency examination.

Prerequisite(s)/Corequisite(s): NA 104. Prerequisite(s): English COMPASS score of 35 or greater or CCDE 110N, and reading COMPASS score of 55 or greater or CCDR 105N. Restricted to Community Colleges campuses only.

NA 105. Nursing Assistant Clinicals**4 Credits (3+3P)**

Extension of basic fundamentals of personal care, including theory, skills and clinical experience leading to the certified Nursing Assistant Examination at the conclusion of the semester. Continuation of NA 104. Requires a C or better to pass. Restricted to: Community Colleges only.

Prerequisite(s): C or better in NA 104 or consent of instructor.

NA 109. Phlebotomist Basic**4 Credits (2+4P)**

This course provides the latest information, techniques, skills, and equipment for blood and specimen collection based on the standards of the Clinical and Laboratory Standards Institute, Needlestick Prevention Act, Joint Commission 2008 National Patient Safety Goals, OSHA and CDC. An advanced skills lab is included in the course to provide a "hands-on" practice experience and a 30 hour practicum in a supervised work environment collecting blood and specimens on actual patients for laboratory tests. Attendance is mandatory. Prepares students for employment as a phlebotomist in health care settings. Requires a "C" or better to pass. Upon successful completion of the course, student has the opportunity to test for National Healthcareer Certification. Consent of Instructor required.

Prerequisite(s)/Corequisite(s): BIOL 1130 or BIOL 2225. Restricted to Community Colleges campuses only.

NA 110. Electrocardiogram Technician Basic**4 Credits (3+2P)**

Prepares students for employment as an Electrocardiogram Technician. Includes basic theory of the cardiovascular system, cardiac rhythm interpretation, 12 lead ECG lead placement, and ECG equipment trouble shooting. The course includes an advanced skills laboratory for "hands-on" practice and 16 hours of supervised clinical in the work environment assisting with ECG testing. Attendance is mandatory. Course requires a grade of "C" or better to pass. Upon successful completion of course, student has the opportunity to test for National Healthcareer Certification. Restricted to Community Colleges campuses only.

Learning Outcomes

1. Perform ECG's, including patient preparation, electrode placement, recording ECG's, mounting upload of ECG to patient's chart. Calculate a patient's heart rate and identify the heart rhythm from an ECG tracing. Identify artifacts; waveform elements of the cardiac cycle, including variances related to ischemia, injury or infarction; as well as, major classifications of arrhythmias. Prepare and monitor patient's for Holter monitoring and telemetry. Prepare, conduct and monitor patients during stress testing. Recognize factors that affect procedures and results, and take appropriate actions within predetermined limits when indicated, including patient compromise or complications. Demonstrate professional conduct and interpersonal communication skills with patients, other health care professionals, and with the public. Recognize the responsibilities of other health care personnel and interact with them with respect for their jobs and patient care. Apply basic scientific principles in learning new techniques and procedures. 1 Relate electrocardiogram findings to common disease processes.

NA 111. Alzheimer/Dementia Care Focus**3 Credits (3)**

Students will learn respectful care of Alzheimer/Dementia persons while ensuring their dignity, maximizing safe independence focusing on strengths and abilities.

Prerequisite(s)/Corequisite(s): NA 104 or NA 101. Restricted to: Community Colleges only.

NA 113. Sterile Processing Practicum**5 Credits (1+4P)**

This course will allow students to get hands on training in the Sterile Processing Department. They will perform critical functions learned in the Sterile Processing Technician course. They will apply principles of medical asepsis and infection control and by the end of the practicum be able to independently function in all work areas of the Sterile Processing Department. This field is constantly evolving and those desiring to work in this profession must ensure that they stay abreast of the science behind the discipline. Restricted to Community Colleges campuses

Prerequisite(s)/Corequisite(s): NA 102. Prerequisite(s): CCDE 110 N.

Learning Outcomes

1. Utilize equipment safely in the Sterile Processing Department Apply concepts of infection control and medical asepsis Effectively demonstrate professional ethical concepts Demonstrate proper cleaning, decontamination, disinfection, and sterilization practices Properly prepare and assemble surgical trays and kits to include packaging and quality assurance indicators Validate sterilization loads to ensure patient safety

NA 115. Phlebotomist Technician**6 Credits (3+6P)**

Basic theory and skills of phlebotomy following OSHA and Center for Disease Control guidelines. Prepares students for the requirements of testing for the ASCP certification exam and employment in a healthcare organization as a phlebotomist in licensed settings. Laboratory hours include infection control skills & practice, patient assessment & teaching, and practice in venipuncture. Clinical time includes clinical laboratory processes and operations, patient assessment, venipuncture, and exposure to clinical policies and procedures. Upon successful completion students are workforce ready. Requires C or better to pass. Restricted to Community Colleges campuses only.

Learning Outcomes

1. Collect and process biological specimens for analysis. Recognize factors that affect procedures and results, and take appropriate actions within predetermined limits when corrections are indicated. Monitor quality control within predetermined limits. Perform preventative and corrective maintenance of equipment and instruments or refer to appropriate source for repairs. Demonstrate professional conduct and interpersonal communication skills with patients, laboratory personnel, other health care professionals, and with the public. Recognize the responsibilities of other laboratory and health care personnel and interact with them with respect for their jobs and patient care. Apply basic scientific principles in learning new techniques and procedures.

NA 204. Patient Care Technician**4 Credits (3+3P)**

This course will prepare Certified Nursing Assistants (CNAs) to work in the acute care setting through an expansion of their existing basic skill set. Students will acquire expanded acute care skills, critical thinking skills, and knowledge in caring for patients of all ages. Currently CNA certified. Restricted to Community Colleges campuses only.

Prerequisite(s): (NA 104, NA 105, NA 109, NA 110, AHS 120, and (BIOL 1130 or (BIOL 2210 & BIOL 2225))).

Corequisite(s): NA 205.

NA 205. Patient Care Technicians Practicum**4 Credits (1+9P)**

This course will prepare Certified Nursing Assistants (CNAs) to work in the acute care setting through an expansion of their existing basic skill set. Students will acquire expanded acute care skills, critical thinking skills, and knowledge in caring for patients of all ages. Students will go to acute care settings to practice newly acquired skills. Must have a "C" or better to pass. Restricted to Community Colleges campuses only.

Prerequisite(s): (NA 104, NA 105, NA 109, NA 110, AHS 120, & (BIOL 1130 or (BIOL 2210 & BIOL 2225))) Currently CNA Certified.

Corequisite(s): NA 204.

NA 209. Phlebotomy Laboratory Technician**4 Credits (2+4P)**

A continuation of NA 109, Phlebotomy Basic. This course furthers the experience, knowledge and skills of the phlebotomist by providing advanced specimen collection techniques, skills to assist with lab management, patient data processing, quality control measures, and customer service. Completion of thirty clinical hours and fifty successful venipunctures are required. Attendance is mandatory. Requires a final grade of "C" or better to pass. Consent of Instructor required. Restricted to Community Colleges campuses

Prerequisite(s)/Corequisite(s): ENGL 1110G or ENGL 1110H or ENGL 1110M. Prerequisite(s): (BIOL 1130 or BIOL 2310 & BIOL 2225), and AHS 120, and NA 109.

Learning Outcomes

1. Students will learn and demonstrate advanced specimen collection techniques. Students will learn and demonstrate advanced laboratory processing skills. Students will effectively employ skills required for patient information processing. Students will employ concepts of medical asepsis and infection control. Students will apply knowledge and skills required for quality control measures in the laboratory setting. Students will demonstrate professional and appropriate communication, in addition to soft skills. Students will learn and practice blood collection techniques in preparation for the PBTASCP national certification exam.

NA 210. Administrative Procedures for Medical Assistants**4 Credits (4)**

This course will provide students with the administrative procedures needed for a medical assistant. Skills will include creating a welcoming environment, cultural considerations, office safety, opening and closing procedures, computer operation and management, written and telephonic communications, financial procedures, patient scheduling, medical record management, and medical insurance, billing, and coding. Restricted to Community Colleges campuses.

Prerequisite(s)/Corequisite(s): NA 212. Prerequisite(s): MATH 1215, and ENGL 1110G, and AHS 120, and BIOL 1130 or BIOL 2225.

Learning Outcomes

1. Create and maintain a medical facility environment
2. Demonstrate professional business communications in writing, via telephone, and email.
3. Demonstrate patient scheduling, screening calls, and check-in.
4. Create a patient chart and demonstrate medical record management.
5. Demonstrate the use and management of an electronic health record.
6. Identify insurance and billing terminology.
7. Identify the different characteristics of third party medical payer sources.
8. Collect information for billing, and precertification for services.
9. Identify common procedure codes for diseases and procedures
10. 1 Complete billing and coding forms.
11. 1 Demonstrate office financial practices, managing patient accounts, and tracking, collecting payments, documentation, and performing banking procedures.
12. 1 Performing inventory, and purchasing of supplies.
13. 1 Identify billing and collection procedures.
14. 1 Demonstrate office accounting practices.
15. 1 Apply laboratory regulations for safety and quality in the medical laboratory
16. 1 Identify legal considerations in the management of a medical office.

NA 212. Medical Assistant Capstone Course**6 Credits (6)**

This course provides the student with entry-level theory and limited "hands-on" training in basic and routine clinical office tasks. The course will equip the Medical Assistant (MA) student with the competencies required to perform in a medical office under the direct supervision of a physician. The graduate will be able to assist the physician with physical exams, ECGs, phlebotomy, and minor surgical procedures. CNA Certification within the last 5 years.

Prerequisite(s): NA 105, NA 110, NA 109, AHS 120, BIOL 1130, BOT 208, HIT 228, HIT 248.

NA 214. Medical Assistant Practicum**6 Credits (1+6P)**

This course is the practicum for NA 212 Medical Assistant Fundamentals Capstone Course. Students will prepare for a career as a medical assistant in medical offices and clinics. During practicum students will observe and participate in 180 hours in a supervised work environment using knowledge and skills learned in NA 212. This course includes weekly post-practicum conferences with the instructor. The student will be evaluated by both the employer and the instructor. Requires a "C" or better to pass. Upon successful completion the student may be eligible to test for National Certification. Students who have been CNA Certified within the last 5 years can use this to enroll into this course. Consent of Instructor required.

Prerequisite(s)/Corequisite(s): NA 212. Prerequisite(s): NA 105, NA 110, NA 109, AHS 120, BIOL 1130, BOT 208, HIT 228, HIT 248. Restricted to Las Cruces campus only.

NAV-NAVAJO

NAV 101. Introduction to Navajo Studies**3 Credits (3)**

Covers geography, demography, institutions of modern Navajo society with historical overview. Restricted to: Community Colleges only.

NAV 111. Elementary Navajo I**4 Credits (4)**

Navajo for beginners with emphasis on speaking skills.

Prerequisite: not open to Navajo-speaking students except by consent of instructor.

NGEC-NATURAL GAS ENGINE COMP

NGEC 133. Natural Gas Engine Repair Technology

5 Credits (5)

This course will cover the engine fundamentals, cylinder head and valve trains, engine block, engine servicing, lubrication and cooling Systems.

Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. A basic knowledge about engine operation.
2. Practice shop safety, ability to identify potential hazards, tool identification, proper rigging and crane operation.
3. Ability to identify specific components of a natural gas engine and their function.
4. Locate and identify various components on and off an engine.
5. Safely start large stationary industrial natural gas engines.
6. List the steps of preventive maintenance on natural gas engines.
7. Completely disassemble a natural gas engine, clean and organize parts, and measure critical clearances using appropriate precision measuring tools.
8. Replace or repair any defects that are found on assigned engine, compile a list of parts needed to make repairs, assemble engine correctly, and start and run the engine.

NGEC 175. Natural Gas Compression Technology I

4 Credits (4)

This course delivers an introduction to the theory, application, rotary, and centrifugal natural gas compressor including operating principles, maintenance, and repair of the reciprocating, identification of the component parts and their functions, methods of balancing, and lubrication systems, and design characteristics. This course will also include calculations of gas flow, compressor sizing, rod loads, compressor analysis charts and horsepower ratings. In addition, this course will cover safety, precision measurement, use of the manuals, use of tools, and proper adjustments will be included with overhaul exercises. Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. Identify and analyze the re-usability of basic compressor parts.
2. Accurately diagnose failure of key core components of basic compressors.
3. Identify basic preventive maintenance tasks on natural gas compressors.
4. Identify the key concept of troubleshooting of natural gas compressors by applying failure analysis techniques to arrive at the root cause of the failure.
5. Demonstrate safety procedures in the workshop and follow appropriate steps to work with the compressor.

NGEC 185. Natural Gas Compression Technology II

4 Credits (4)

This course delivers the principles of operation for natural gas engines and compressors. It includes process of startup and shutdown of natural gas compressor skid. Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.

Prerequisite(s): Grade of C or better in NGEC 175.

Learning Outcomes

1. Demonstrate a hub alignment.
2. Describe start up procedures.
3. Describe shutdown procedures.
4. Demonstrate proper bolt torquing with appropriate tools.
5. Demonstrate proper valve removal.
6. Demonstrate proper safety procedures including lockout and tag-out.

NGEC 245. Natural Gas Engine Management and Control Technology

5 Credits (5)

This course delivers operational and application studies of Engine Management System Fundamentals, Sensors, Engine Inspection, and Engine Management Fault Investigation. Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. Identify specific components of a natural gas engine and their function.
2. Explain the four major systems of a natural gas engine.
3. Identify specific components of a natural gas engine and their function.
4. List the steps of preventive maintenance on natural gas engines.

NGEC 246. Fuel and Emissions Technology**5 Credits (5)**

This course delivers operational and application studies of fuel components and emissions control system. Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. Identify specific components of a natural gas engine and their function.
2. List the steps of preventive maintenance on natural gas engines.
3. Know the fuel components and operation
4. Locate and identify various components on and off an engine.
5. Safely start stationary industrial natural gas engines.

NGEC 295. Special Topics**2 Credits (2)**

Topics are to be announced in the Schedule of Classes. The topic and project are to be discussed and implemented between faculty member and student. Student gives presentation to class at the end of the term of study. All-Natural Gas Compression Technology classes in the NGEC Program must be completed or in progress before enrolling in this course. Restricted to: Natural Gas Engine Compression majors. Restricted to Carlsbad campus only.

Learning Outcomes

1. The student should provide an overall meaning during the individual time in the NGEC Program for this final project.

NMNC-NEW MEXICO NURSING EDUCATION CONSORTIUM

NMNC 3110. Introduction to Nursing Concepts**3 Credits (3)**

This course introduces the nursing student to the concepts of nursing practice and conceptual learning. Same as NMNC course no.: NMNC 1110. Restricted to: BSN,BSNP,BSNR,NMNC majors. Restricted to Las Cruces campus only.

Learning Outcomes

1. Integrate knowledge from nursing pre- and co-requisites into a conceptual learning model.
2. Apply conceptual learning to select nursing concepts.
3. Define personal values, beliefs, and attitudes about health and wellness.
4. Describe importance of identifying patient safety issues.
5. Describe roles and values of nursing and members of the health care team.
6. Describe standards and regulations that apply to nursing practice.

NMNC 3120. Evidence-Based Practice**3 Credits (3)**

The focus of this course is the principles of evidence-based nursing practice. It includes the identification of clinical practice problems, the evaluation of available evidence, and the integration of evidence with clinical expertise and patient preferences in application to practice. Restricted to: NURS majors. Students must be admitted to the nursing program to enroll in this course.

Corequisite(s): NMNC 3110, NMNC 3135.

Learning Outcomes

1. Examine integrating evidence-based practice with diverse patients' values.
2. Identify clinical practice problems and issues.
3. Explain the research process.
4. Describe how evidence is generated through the research process.
5. Appraise evidence and standards of care that support best clinical outcomes and patient safety.
6. Utilize informatics to access evidence-based practice guidelines.

NMNC 3135. Principles of Nursing Practice**4 Credits (4)**

This course introduces the nursing student to the application of concepts through clinical skills in seminar, laboratory, and/or clinical settings. Principles of communication, assessments, safety, and interventions including accurate calculation, measurement, and administration of medications will be included. Same as NMNC course no.: NMNC 1135. Students must be admitted to the nursing program to enroll in this course. May be repeated up to 4 credits. Restricted to: BSN majors only.

Corequisite(s): NMNC 3110, NMNC 3120.

Learning Outcomes

1. Describe the different types and characteristics of communication in professional nursing practice.
2. Utilize the concepts presented in Level One nursing courses in the application to the care of the patient.
3. Demonstrate the principles of safety during the implementation of nursing skills.
4. Demonstrate the learned skills in patient based scenarios.
5. Utilize the nursing process to provide safe and effective care.

NMNC 3210. Health and Illness Concepts I**3 Credits (3)**

This course will focus on health and illness concepts across the lifespan. Concepts covered are related to homeostasis/regulation, sexuality/reproductive, protection/movement, and emotional processes. Same as NMNC course no.: NMNC 1210 Restricted to: NURS majors.

Prerequisite(s): NMNC 3110, NMNC 3120 & NMNC 3135.

Corequisite(s): NMNC 3220, NMNC 3230, NMNC 3235.

Learning Outcomes

1. Describe the scope, risk factors, physiologic processes, attributes, and clinical management of selected concepts and exemplars across the lifespan.
2. Discuss evidence-based practices and health care standards of care related to the concepts/exemplars of the course.
3. Explain the collaboration necessary related to the concepts/exemplars of the course.
4. Utilize informatics and resources related to the concepts/exemplars of the course.
5. Integrate considerations of normal physiology and healthy adaptations into nursing practice of patients across the lifespan.

NMNC 3220. Health Care Participant**3 Credits (3)**

This course introduces the nursing student to the attributes of the health care participant as an individual, a family, or a community. Same as NMNC course no.: NMNC 1220. Restricted to: NURS majors.

Prerequisite(s): NMNC 3110, NMNC 3120 & NMNC 3135.

Corequisite(s): NMNC 3210, NMNC 3230, NMNC 3235.

Learning Outcomes

1. Identify values, beliefs and attitudes toward health and illness of the health care recipient.
2. Articulate the role of nursing in relation to the health of vulnerable populations and elimination of health disparities.
3. Describe the protective and predictive factors which influence the health of families, groups, communities, and populations.
4. Describe the use of evidence-based practices to guide health teaching, health counseling, screening, outreach, disease and outbreak investigation, referral, and follow-up throughout the lifespan.
5. Describe the use of information and communication technologies in preventive care.
6. Examine the health care and emergence preparedness needs of the local community and in the state of New Mexico.
7. Identify clinical prevention and population-focused interventions with attention to effectiveness, efficiency, cost-effectiveness, and equity.

NMNC 3230. Nursing Pharmacology**3 Credits (3)**

This course introduces the nursing student to pharmacologic nursing practice from a conceptual approach. Same as NMNC course no.: NMNC 1230. Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): NMNC 3110, NMNC 3120 & NMNC 3135.

Corequisite(s): NMNC 3210, NMNC 3220, and NMNC 3235.

Learning Outcomes

1. Identify the nurse's professional role related to pharmacotherapeutics in diverse populations across the lifespan.
2. Identify safety issues and minimize risk potential associated with pharmacotherapeutics and complementary and alternative medicine.
3. Utilize evidence-based information integrating pharmacologic and pathophysiologic concepts to guide medication therapeutics.
4. Describe health care system protocols related to pharmacotherapeutics.
5. Identify methods of communication with the health care team related to pharmacotherapeutics.
6. Utilize informatics systems related pharmacotherapeutics.
7. Describe common classes of drugs that are used in health care, including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics.

NMNC 3235. Assessment and Health Promotion**4 Credits (4)**

This course introduces the nursing student to the assessment of and the health promotion for the health care participant as an individual, a family, or a community. This course uses seminar, laboratory and/or clinical settings. Same as NMNC course no.: NMNC 1235. Restricted to: NURS majors.

Prerequisite(s): NMNC 3110, NMNC 3120 & NMNC 3135.

Corequisite(s): NMNC 3210, NMNC 3220, NMNC 3230.

Learning Outcomes

1. Assess physical health including a focus on the health/illness beliefs, values, attitudes, developmental level, functional ability, culture, and spirituality of the
2. participant.
3. Assess family health including a focus on family health history, environmental exposures, and family genetic history to identify current and future health problems.
4. Collaborate with a community to assess their health needs
5. Utilize community assessment data and evidence-based practice as basis for identifying community health needs.
6. Document health assessments in electronic health record or written formats.
7. Share community assessment data with other health care professionals to identify needed interventions.
8. Explain the role of the nurse in relation to advocacy for the health care recipient.
9. Analyze education materials for health literacy concerns.

NMNC 4310. Health & Illness Concepts II**3 Credits (3)**

This course covers health and illness concepts across the lifespan with the focus on chronic conditions. Concepts covered are related to oxygenation and hemostasis, homeostasis and regulation, protection and movement, and cognition and behavior processes. Same as NMNC course no.: NMNC 2310. Restricted to: NURS majors.

Prerequisite(s): NURS 328, NMNC 3210, NMNC 3220, NMNC 3230, & NMNC 3235.

Corequisite(s): NMNC 4320 & NMNC 4335.

Learning Outcomes

1. Relate the scope, risk factors, physiologic processes, attributes, and clinical management of selected concepts and exemplars across the lifespan.
2. Investigate evidenced-based practice, standards of nursing care, and factors to improve safety related to selected concepts and exemplars.
3. Examine how members of the health care team collaborate in the delivery of care related to selected concepts and exemplars.
4. Discuss available technology for the delivery of nursing care related to selected concepts and exemplars.
5. Apply selected health and illness concepts to the nursing care of patients across the lifespan.

NMNC 4320. Professional Nursing Concepts I**3 Credits (3)**

This course covers foundational concepts for professional development, including selected professional attributes and care competencies. Same as NMNC course no.: NMNC 2320. Restricted to: BSN,BSNP,BSNR,NURS majors. Corequisite(s): NMNC 4310 & NMNC 4335

Prerequisite(s): NURS 328, NMNC 3210, NMNC 3220, NMNC 3230, & NMNC 3235.

Learning Outcomes

1. Examine the ethical values, virtues, principles, and policies that guide the moral delivery of health care.
2. Relate the nurse's interpretation of patient needs, concerns, and health problems with nursing decisions.
3. Discuss the factors which motivate individuals, groups, and organization to deliver quality nursing care.
4. Determine how interactions of health care team members provide quality patient care.

NMNC 4335. Care of Patients with Chronic Cndtns**4 Credits (8P)**

The focus of this course is to provide safe, evidence-based nursing care for patients with chronic conditions, across the lifespan in a variety of settings. This course builds upon curricular concepts. This course is a combination of lab and clinical. Same as NMNC course no.: NMNC 2335. Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): NURS 328, NMNC 3210, NMNC 3220, NMNC 3230, & NMNC 3235.

Corequisite(s): NMNC 4310 & NMNC 4320.

Learning Outcomes

1. Demonstrate ethical practice in the delivery of nursing care to patients with chronic conditions.
2. Apply understanding of the principles of safe nursing care for patients with chronic conditions.
3. Demonstrate knowledge of appropriate evidence-based protocols when providing nursing care to patients with chronic conditions.
4. Apply understanding of appropriate health care policy, finance, and regulatory environments in the care of patients with chronic conditions.
5. Communicate effectively with patients with chronic conditions and health care team members.
6. Demonstrate an understanding of the technology used in the care of patients with chronic conditions.
7. Utilize the nursing process to deliver nursing care to patients with chronic conditions.

NMNC 4410. Health & Illness Concepts III**4 Credits (4)**

This course will cover health and illness concepts, with the focus on acute conditions across the lifespan. Concepts covered are related to homeostasis/ regulation, oxygenation/ hemostasis, protection/ movement, and emotional processes. Same as NMNC course no.: NMNC 2410. Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): NURS 360, NURS 361, & NMNC 3120.

Corequisite(s): NMNC 4435 & NMNC 4445.

Learning Outcomes

1. Anticipate health care participant's risk for potentially harmful situations related to the concepts/exemplars of the course.
2. Integrate evidence-based practices and health care standards of care related to the concepts/exemplars of the course.
3. Differentiate the multiple roles of the health care team related to the concepts/exemplars of the course.
4. Integrate use of appropriate technology related to the concepts/exemplars of the course.
5. Interrelate risk factors, concepts, physiologic processes, patient attributes, and clinical management of the exemplars covered in this course.

NMNC 4435. Clinical Intensive I**4 Credits (4)**

This is the first of two Level Four clinical courses in which the student will apply the curricular concepts in the management of care participants with acute conditions across the lifespan. Same as NMNC course no.: NMNC 2435. Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): NMNC 4310, NMNC 4320 & NMNC 4335.

Corequisite(s): NMNC 4435 & NMNC 4445.

Learning Outcomes

1. Integrate nursing practice concepts into their professional nursing practice.
2. Integrate diverse patient values into plan of care for patients with acute illness.
3. Interpret and analyze factors and system contributions that impact the quality and safety of nursing practice.
4. Integrate an evidence-based approach in the delivery and evaluation of nursing care to acutely ill patients across the lifespan.
5. Evaluate the use of policies and procedures within the acute care settings.
6. Effectively collaborate with the health care team in the delivery of patient care.
7. Integrate use of appropriate technology for the delivery of nursing care to acutely ill patients.

NMNC 4445. Clinical Intensive II**4 Credits (4)**

This is the second of two Level Four clinical courses in which the student will apply the curricular concepts in the management of care participants with acute conditions across the lifespan. Same as NMNEC course no.: NMNEC404. Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): NMNC 4310, NMNC 4320 & NMNC 4335.

Corequisite(s): NMNC 4410 & NMNC 4435.

Learning Outcomes

1. Integrate nursing practice concepts into their professional nursing practice.
2. Integrate diverse patient values into plan of care for patients with acute illness.
3. Interpret and analyze factors and system contributions that impact the quality and safety of nursing practice.
4. Integrate an evidence-based approach in the delivery and evaluation of nursing care to acutely ill patients across the lifespan.
5. Evaluate the use of policies and procedures within the acute care setting.
6. Effectively collaborate with the health care team in the delivery of patient care.
7. Integrate use of appropriate technology for the delivery of nursing care to acutely ill patients.

NMNC 4510. Concept Synthesis**3 Credits (3)**

This course focuses on the synthesis of curricular concepts in the care of complex patients. Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): NMNC 4410, NMNC 4435 & NMNC 4445.

Corequisite(s): NMNC 4520, NMNC 4535, & NMNC 4545.

Learning Outcomes

1. Synthesize curricular concepts into patient-centered nursing practice that is appropriate for diverse individuals, families, and communities.
2. Synthesize the evidence base into nursing care of patients across the lifespan.
3. Evaluate leadership principles that integrate the application of health care policies and standards.
4. Evaluate effectiveness of interprofessional collaboration in the delivery of health care for quality patient outcomes.
5. Evaluate technologies for the management of information and in the delivery of patient care.

NMNC 4520. Professional Nursing Concepts II**3 Credits (3)**

This course covers policy concepts for professional nursing. Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): NMNC 4410, NMNC 4435, & NMNC 4445.

Learning Outcomes

1. Integrate principles of quality improvement and safety into nursing practice within health care organizations and systems.
2. Demonstrate leadership behaviors through the application of policies that apply to health care delivery.
3. Synthesize care delivery concepts to improve quality patient outcomes and professional nursing practice.
4. Analyze impact of health care delivery systems on patient care outcomes.
5. Compare and contrast health care policies and evidence-based practice.

NMNC 4535. Clinical Intensive III**4 Credits (4)**

The focus of this clinical course is application of the curricular concepts in the management of care participants with complex conditions across the lifespan. Same as NMNEC course no.: NMNEC503. Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): NMNC 4410, NMNC 4435, & NMNC 4445.

Corequisite(s): NMNC 4510, NMNC 4520, & NMNC 4545.

Learning Outcomes

1. Integrate diverse patient values into plan of care for patients with complex illness.
2. Interpret and analyze factors and system contributions that impact the quality and safety of nursing practice.
3. Integrate an evidence-based approach in the delivery and evaluation of nursing care to patients with complex illness across the lifespan.
4. Evaluate the use of policies and procedures within the complex care setting.
5. Effectively collaborate with the health care team in the delivery of patient care.
6. Integrate use of appropriate technology for the delivery of nursing care to patients with complex illness.

NMNC 4545. BSN Capstone**4 Credits (4)**

The synthesis, integration, and application of concepts to professional nursing practice will be applied in the final clinical course to ensure readiness to enter practice. Restricted to: BSN,BSNP,BSNR,NURS majors.

Prerequisite(s): Successful completion of all previous nursing courses.

Corequisite(s): NMNC 4510, NMNC 4520, & NMNC 4535.

Learning Outcomes

1. Synthesize and integrate nursing practice concepts into their professional nursing practice.
2. Engage in professional nursing practice that is patient-centered and appropriate for diverse individual, families, and communities.
3. Integrate principles of quality improvement and safety into nursing practice within health care organizations and systems.
4. Deliver nursing care that is evidence-based.
5. Demonstrate leadership behaviors through the application of policies that apply to health care delivery.
6. Engage in effective interprofessional collaboration in the delivery of health care for quality patient outcomes.
7. Utilize technologies for the management of information and in the delivery of patient care.

NURS-NURSING

NURS 110. Pre-Nursing Freshman Seminar**1 Credit (1)**

This Freshman seminar provides an introduction to the university and its resources, an orientation to the pre-nursing curriculum, and overview of concepts for professional nursing practice. Emphasis is placed on exploring the nurse's role as an integral member of the healthcare team across multiple contexts and settings, and developing a professional identity. Consent of Instructor required.

NURS 120. Introduction to Pharmacology**3 Credits (3)**

General principles of pharmacology including methods of administration, effect on the body, interactions with other drugs, and classification of drugs. Focus on the health care provider's role in safe pharmacologic intervention. May be repeated up to 3 credits. Crosslisted with: HIT 120. Restricted to Community Colleges campuses only.

NURS 130. Foundations of Pharmacology**3 Credits (3)**

This course provides the nursing student with an introduction to the foundations of pharmacology including: science of drug action, principles of medication administration, accurate calculation of drug doses, medication therapy across the lifespan, application of medications to treat health alterations, normal and adverse responses by the client to medication therapy, medication safety, medication regulation, national patient safety goals, and appropriate nursing interventions to achieve the desired goals of medication therapy. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: Community Colleges only.

Corequisite(s): NURS 147 & NURS 149. Restricted to: NUR majors.

NURS 134. Foundation of Nursing Skills and Assessment**3 Credits (1+6P)**

This course provides nursing students with introductory nursing knowledge related to performance of nursing skills and assessment including: techniques of fundamental nursing care, basic and intermediate nursing skills, and foundational physical assessment techniques associated with care across the lifespan. Open to students who have been accepted into the nursing program. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.

Corequisite(s): NURS 136 & NURS 137 or permission of the Program Director.

NURS 136. Foundations of Nursing Practice**6 Credits (4+6P)**

This course will introduce the nursing student to foundational theoretical concepts of professional nursing practice, the nursing process, and foundational nursing skills. It includes developmental concepts related to clients across the lifespan. Clinical experiences in the simulation lab, long-term care, the community, and rehabilitation settings will provide the student with the opportunity to apply learned skills to provide total care to meet needs of one adult client and to develop care planning skills related to actual problems. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.

Corequisite(s): NURS 134, NURS 137.

NURS 137. Care of Geriatric Patient**3 Credits (3)**

This course will introduce the nursing student to foundational concepts of age-appropriate/specific care of the older adult who represents the largest population of individuals placing demands on the healthcare system. It includes basic and complex concepts and issues related to care of the older client across the care continuum, provision of cost-effective care in a resource sparse environment. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the nursing program to enroll in this course. Restricted to: NURS majors. Restricted to Community Colleges campuses only.

Corequisite(s): NURS 134 & NURS 136.

NURS 140. Pathophysiology for Allied Health Professionals**3 Credits (3)**

Introduction to the nature of disease and its effect on body systems. Deals with the disease processes affecting the human body via an integrated approach to specific disease entities. Includes a review of normal functions of the appropriate body systems. Diseases are studied in relationship to their etiology, pathology, physical signs and symptoms, diagnostic procedures, complication, treatment modalities, and prognosis. Restricted to Allied Health and Health Information Technology majors. Restricted to: Community Colleges only.

NURS 146. Common Health Deviations**6 Credits (4+6P)**

Common health deviations and the manner by which they alter various body functions are explored. The role of the licensed practical nurse in assisting clients with common health deviations is presented. Ethical and legal implications and the role of the practical nurse are also considered. The licensed practical nursing student will utilize the application of knowledge to client care situation both in the subacute and acute care settings. The nursing process is presented as guide for coordinating client care. Grade of C or better. May be repeated up to 6 credits. Restricted to: NURSING majors. Restricted to Carlsbad campus only.

Prerequisite(s): NURS 153, NURS 156, NURS 154, NURS 157, and NURS 210 or consent of program director.

NURS 147. Adult Health I**6 Credits (4+6P)**

This course focuses on application of the nursing process and theoretical concepts of care for adults with commonly occurring health problems. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to continue development of: prioritization skills, proficiency in performance of nursing skills, collaborative skills with clients, families, peers and health care team members, care planning skills related to patient actual, psychosocial, and potential problems in the delivery of total nursing care to meet needs of one adult client. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to Community Colleges campuses only.

Corequisite(s): NURS 130, NURS 147 lab, & NURS 149.

NURS 149. Mental Health Nursing**3 Credits (2+3P)**

This course will allow the nursing student to develop skills necessary to provide nursing care for clients with mental health problems in various health care settings including: common mental health disorders, psychosocial dysfunction, psychosocial safety/substance abuse issues, violence, suicide, restraints, developmental age related pathophysiology, psychopharmacology, cultural/religious considerations, grief/loss, promotion of mental health, and therapeutic communication. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to develop ability to develop: proficiency in performance of nursing skills, collaborative skills with clients, families, peers and health care team members, care planning skills related to patient actual, psychosocial, and potential problems in the delivery of total nursing care to meet needs of one client across the life span with acute/chronic mental health needs. Students must be concurrently enrolled in both the lecture and lab sections of this course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program in order to enroll in the course. Restricted to: NUR majors. Restricted to: Community Colleges only.

Corequisite(s): NURS 130, NURS 147, & NURS 149L.

NURS 150. Medical Terminology**3 Credits (3)**

Understanding of the basic elements of medical words. Use of medical abbreviations. Same as OEHO 120 and BOT 150. May be repeated up to 3 credits. Crosslisted with: BOT 150, AHS 120 and HIT 150.

NURS 153. Medication and Dosage Calculation**1 Credit (1)**

Techniques of dosage calculation for medication and fluid administration. RR applicable. Students must meet NMSU basic skills requirement in mathematics to enroll in this course.

Corequisite(s): NURS 156 and NURS 154.

NURS 154. Physical Assessment**2 Credits (2)**

Beginning techniques of physical assessment by systems will be presented using the nursing process as a guide for providing safe client centered care throughout the life span. Grade of C or better is required. May be repeated up to 2 credits. Restricted to: NURSING majors. Restricted to Carlsbad campus only.

Prerequisite(s): BIOL 1130 or BIOL 2210.

Corequisite(s): NURS 153, NURS 156.

NURS 155. Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes.

NURS 156. Basic Nursing Theory and Practice**6 Credits (4+6P)**

Introduction to the nursing profession and the beginning skills of nursing practice as it relates to normalcy. The nursing process is presented as a means of guiding the student in providing safe client centered care. Ethical and legal aspects of nursing practice are also included. Basic clinical nursing skills will be presented and practiced in the nursing lab. The student will perform these skills with clients in an actual health care setting. May be repeated up to 6 credits. Consent of Program Director requires. Restricted to: NURSING majors. Restricted to Carlsbad campus only.

Corequisite(s): NURS 153, NURS 154.

NURS 157. Maternal/Child Health Deviations**8 Credits (6+6P)**

This course introduces the student to the concepts and principles of nursing care of the family from conception to adolescence. Utilizing the assessment, analyzing, planning, and implementation phases of the nursing process (the Care map), the student focuses on the supportive-educative nursing system to assist members of the family in meeting self-care requisites and how they are affected by the health deviations common to each developmental level beginning with conception and ending with adolescence. Knowledge gained in theoretical instruction is then applied to the patient care situation. After an introduction to the necessary clinical skills in the campus laboratory setting, students will participate in clinical experiences with the focus on the family from conception to adolescence. The assessment, analysis, planning, and implementation phases of the nursing process are emphasized as a tool to assist patients in meeting universal and developmental self-care requisites. Utilizing the nursing process, the student provides safe, client-centered care to diverse clients and families. Theoretical instruction is applied to client care situations. Students collaborate with clients, families, and the interdisciplinary team in meeting health care needs. Experiences may occur in the physician's office, local health department, day care centers, schools, or the hospital. Grade of C or better required. Restricted to: NURSING majors. Restricted to Carlsbad campus only.

Prerequisite: NURS 156, NURS 153, and NURS 154.

Corequisite: NURS 210.

Learning Outcomes

1. Determine how values of clients, families and medical personnel impact the involvement of clients in their health care related to maternal/child and pediatric clients. Implement individualized client care utilizing an evidenced based approach related to maternal/child and pediatric clients. Choose health protection, health promotion, and disease prevention strategies in the care of maternal/child and pediatric clients. Apply the scope, risk factors, physiologic processes, and clinical management strategies to maternal/child and pediatric clients. Choose resources for continuity of client care related to maternal/child and pediatric clients. Give examples of significant information to report to other disciplines. Apply the principles of delegation in the provision of client care with maternal/child and pediatric clients. Utilize evidenced based information to implement a plan of care and employ nursing interventions for maternal/child and pediatric clients. Use the principles of ethical practice in the delivery of nursing care for maternal/child and pediatric clients. 1 Apply policies, procedures and standards of care related to maternal/child and pediatrics in the provision of client care. 1 Apply nursing interventions to reduce risk of harm to self and others related to maternal/child and pediatric clients. 1 Choose available technology for delivery of nursing care related to maternal/child and pediatric clients.

NURS 201. Special Topics**1-4 Credits**

Specific topics to be announced in the Schedule of Classes. May be repeated for a maximum of 10 credits. Restricted to: Community Colleges only.

Prerequisite: admission to the nursing program.

NURS 209. Independent Study**1-4 Credits**

Individual studies to meet identified student needs. May be repeated for a maximum of 10 credits. Restricted to: Community Colleges only.

Prerequisite: admission to the nursing program.

NURS 210. Pharmacological Requisites of the Childbearing Family**1 Credit (1)**

Basic concepts of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics, and their relationship to nursing care will be discussed focusing on medications commonly utilized with the childbearing family. Medication classes to be discussed include labor and delivery, analgesic, vitamins, respiratory, gynecological, endocrine, and anti-microbial/anti-infective drugs. Grade of C or better required.

Prerequisite(s): NURS 153, NURS 154 and NURS 156.

Corequisite(s): NURS 157.

Learning Outcomes

1. Effective communication skills in reading, writing, listening, and speaking. Basic critical thinking skills including problem identification, evidence acquisition, evidence evaluation, and reasoning/conclusion. An understanding of personal and social responsibility. An ability to apply the fundamental concepts of quantitative reasoning in mathematics and science. Appropriate information and digital literacy, and skills for personal and professional use.

NURS 211. Pharmacological Requisites of Simple Health Deviations**1 Credit (1)**

Basic concepts of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics, and their relationship to nursing care are addressed focusing on medications related to the psychiatric, gastrointestinal, musculoskeletal, gynecological, hematological, and anti-neoplastic client. Grade of C or better required. Restricted to: Carlsbad campus only.

Prerequisite(s): BIOL 2210 and BIOL 2225 and NURS 153, NURS 154, NURS 156, NURS 157 and NURS 210.

Corequisite(s): NURS 246 and NURS 258.

NURS 212. Pharmacological Requisites of Complex Health Deviations**1 Credit (1)**

Basic concepts of pharmacology including pharmacokinetics, pharmacodynamics, and pharmacotherapeutics, and their relationship to nursing care is examined focusing on medications related to complex health deviations. Drug classes to be discussed include cardiovascular, renal, endocrine, and neurological. Grade of C or better required.

Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157, NURS 246, NURS 258, NURS 210 and NURS 211.

Corequisite(s): NURS 256 and NURS 260.

Learning Outcomes

1. Apply principles of teaching/learning in educating clients on the use, adverse effects and interactions of pharmacotherapeutic agents used to treat complex health deviations. Collaborate with members of the health care team in the delivery of pharmacotherapeutics to clients with complex health deviations. Give examples of commonly prescribed drugs used to treat clients with complex health deviations and related pharmacokinetics and pharmacodynamics. Discuss the relationship between the use of pharmacotherapeutics and the treatment of disease in clients with complex health deviations. Identify safety issues and minimize risk potential associated with pharmacotherapeutics.

NURS 224. Maternal Child Nursing**5 Credits (4+3P)**

This course provides the intermediate nursing student with an in-depth review of care of the childbearing woman, family structures and roles, and nursing care of the child from birth through adolescence. Emphasis includes the care of pre-partum, intra-partum and postpartum clients, the neonate and health deviations in pediatric clients. Clinical experiences in the simulation lab, the community, and acute care settings will provide the student with the opportunity to apply learned skills to provide total care to meet needs of up to two adult, neonatal, or pediatric clients and to apply care planning skills related to actual, psychosocial and potential problems. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.

Corequisite(s): NURS 235, & NURS 236.

NURS 226. Adult Health II**6 Credits (4+6P)**

This course focuses on application of nursing process and theoretical concepts of care for adults with complex health alterations. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to apply: prioritization skills, maintain proficiency in performance of nursing skills, collaborative skills with clients, families, peers and health care team members, and care planning skills related to patient actual, psychosocial, and potential problems in the delivery of nursing care to meet needs of three adult clients. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program may enroll in this course. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.

Corequisite(s): NURS 224 & NURS 235.

NURS 235. Nursing Leadership and Management**1 Credit (1)**

This course introduces the intermediate nursing student to professional practice principles of nursing leadership and management including: health policy and politics, fiscal management & budgeting, conflict management, decision making, interdisciplinary practice, working with teams, roles in disaster planning and management, application of standards of care to risk management, organization of care delivery, health care systems, processes, and practice environments. May be repeated up to 1 credits. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to Community Colleges campuses only.

Corequisite(s): NURS 224,NURS 226.

NURS 236. Nursing Preceptorship - Adult Health III**6 Credits (2+12P)**

This course is the final course involving care of the patient with acute or chronic illness. It focuses on care of patients with complex or multi-system problems allowing the graduating nursing student to discuss and apply all the skills learned in previous nursing courses. After successfully passing the HESI exam, students have clinical practice with preceptor in various health care settings. Selected clinical learning experiences in the simulation lab, acute care, and community settings will allow the student to: organize care of a group of clients, maintain proficiency in performance of nursing skills, collaborate with clients, families, peers and health care team members, and support care planning skills related to patient actual, psychosocial, and potential problems in the delivery of nursing care to meet needs of the preceptors group of clients. Students must be concurrently enrolled in both the lecture and lab sections of the course. Only students who have been admitted to the nursing program and have successfully completed all level 1, 2 and 3 nursing courses may enroll in this course. Clinical may include inpatient or outpatient care, days, evenings, nights, or weekend experiences. Students are required to work the preceptors assigned schedule. NCLEX Review must be done concurrently. Students must be admitted into the Nursing Program to enroll in this course. Restricted to: NUR majors. Restricted to: Community Colleges only.

Corequisite(s): NURS 201.

NURS 246. Health Deviations I**7 Credits (4+9P)**

Introduction to medical/surgical clients, whose health care needs are routine and predictable. Focus is on simple health deviations, including concepts relative to health promotion and maintenance. The nursing process is utilized to provide evidenced based, safe client centered care. Students are expected to apply clinical judgment, communicate and collaborate with clients and the interdisciplinary team in providing care for a group of two to three clients. Grade of C or better required. May be repeated up to 7 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.

Prerequisite(s): NURS 153, NURS 156, NURS 154, NURS 157 and NURS 210.

Corequisite(s): NURS 211,NURS 258.

NURS 256. Health Deviations II**8 Credits (6+12P)**

Concepts and principles applied to clients with complex health deviations. Building upon knowledge gained in NURS 246, focus will be on acutely ill clients. The nursing process continues to serve as a guide to provide safe, client centered care. The student collaborates with the interdisciplinary team in all aspects of client care. Student experiences the role of the staff nurse under the guidance and direction of the nursing instructor. Grade of C or better required. May be repeated up to 8 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.

Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157, NURS 210, NURS 211, NURS 246, and NURS 258.

Corequisite(s): NURS 212,NURS 260.

Learning Outcomes

1. Apply each step of the nursing process as a method of organizing the nursing care for patients with complex health deviations. Discuss the patient's health care needs that occur as a result of complex health deviations. Explain methods the nurse can employ in allowing the patient to assume the right and responsibility for his own care. Incorporate the concepts and principles derived from the biological, developmental, social, nutritional and computer sciences and nursing knowledge that relate to the nursing care of patients with complex health deviations. Explain the roles and functions of the members of the health care team including ancillary personnel as they relate to the care of patients with complex health deviations. Explain the rationale for the performance of the following technical skills: a. EKG monitoring; b. Rhythm strip interpretation; c. Hemodynamic monitoring and interpretation; d. Tracheal suctioning Recognize the nurse's role in establishing a therapeutic relationship with patients experiencing complex health deviations.

NURS 258. Psychosocial Requisites: A Deficit Approach**3 Credits (2+3P)**

Nursing theory and practice as it relates to the care of the client experiencing psychosocial health deviations. The role of the nurse is discussed along with the ethical and legal aspects of care for the client with psychosocial disorders. Building upon the communication skills of listening and responding, the student develops the therapeutic skills of interpersonal relationships. Grade of C or better is required. May be repeated up to 3 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.

Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157, NURS 210, and NURS 246.

Corequisite(s): NURS 211,NURS 246.

NURS 260. Management of Patients with Health Deviations**2 Credits (2)**

A capstone course to the nursing program in which principles in management and delegation to less prepared personnel is explored. A review of leadership roles, legal issues, quality initiatives, informatics and scope of practice is included. Preparation for the NCLEX is an integral portion of the course. Grade of C or better is required. May be repeated up to 2 credits. Restricted to: Nursing majors. Restricted to Carlsbad campus only.

Prerequisite(s): NURS 153, NURS 154, NURS 156, NURS 157, NURS 210, NURS 211, NURS 246, and NURS 258.

Corequisite(s): NURS 212, NURS 256.

Learning Outcomes

1. Discuss nursing practice concepts relevant to the practice of professional nursing. Evaluate principles of quality improvement and safety into nursing practice within healthcare organizations and systems. Apply leadership concepts through the application of policies that apply to healthcare delivery. Promote a culture of safety through anticipating and eliminating potentially harmful situations. Collaborate in systems analysis when clinical errors or near misses occur to reduce harm, minimize blame, and encourage transparency. Integrate evidence in determining best clinical practice. Demonstrate basic knowledge of healthcare policy, finance, and regulatory environments, including local, state, national, and global healthcare trends. Use an ethical framework to evaluate the impact of policies of healthcare, especially for vulnerable populations.

NURS 315. Introduction to Professional Nursing for the R. N.**3 Credits (3)**

Transition course for the R.N. providing an overview of theories and concepts that are the bases for professional nursing practice.

NURS 322. Nursing Health Assessment**3 Credits (3)**

Theoretical basis for the biopsychosocial assessment of individual patients across the life span for the RN. Restricted to Majors.

NURS 324. Nursing Care of the Older Adult**3 Credits (3)**

Survey course addressing nursing care provisions for the elderly population in a variety of acute, community and home settings.

NURS 325. Human Pathophysiology for Nursing**3 Credits (3)**

Concepts of alteration and adaptation in structure and function of the human body across the life span.

NURS 328. Human Pathophysiology Foundation for Nursing**4 Credits (4)**

Human pathophysiology concepts of adaptation and alteration in function and structure across the life span and their implications for nursing practice.

May be repeated up to 4 credits. Restricted to: BSNR,BSN,BSNP or consent of instructor majors.

Prerequisite(s): Grade of C or better in both (BIOL 353 & BIOL 2221/BIOL 354), or (BIOL 2210 & BIOL 2225), or (SPMD 2210 & SPMD 371).

Corequisite(s): NMNC 3110, NMNC 3135, NURS 362.

NURS 353. Nursing Informatics**3 Credits (3)**

This course addresses nursing informatics principles and practices. Key concepts include relationship with evidence-based nursing practice, use of decision support systems, clinical information systems, telehealth, and standardized nursing language. May be repeated up to 3 credits. Restricted to: BSNC majors.

NURS 360. Introduction to Nursing Concepts**3 Credits (3)**

This course introduces the nursing student to the concepts of nursing practice and conceptual learning. Same as NMNEC course no.: NMNEC 101

Students must be admitted to the Nursing Program to enroll in this course. Restricted to: NURS majors.

Corequisite(s): NMNC 3120.

NURS 376. Research and Evidence-Based Practice for the Practicing RN**3 Credits (3)**

Course provides introduction to evidenced-based practice and research principles for the practicing RN. Evidence-based practice principles and processes are covered. Foundations of research (quantitative and qualitative) research designs and research evaluation are included. Emphasis is placed on ethical and practical issues in critiquing and using research/evidence-based findings. Restricted to BSNC majors.

Prerequisite(s): A ST 311, or admission to RN-BSN Option with consent of instructor.

NURS 397. Special Topics**1-9 Credits (1-9)**

Specific subjects to be announced in the Schedule of Classes. May be repeated for at total of 21 credits.

NURS 420. Community Health Nursing**3 Credits (3)**

Concepts basic to the nursing care of families, groups, and communities with an emphasis on health promotion, disease prevention, and health maintenance.

NURS 425. Health Literacy for a Global Society**3 Credits (3)**

This is a course which addresses the importance of health literacy in an emerging global society, covering the primary aspects of global health literacy. The course explores and analyzes the challenges of health literacy in various areas of our world today, with an emphasis on the development of an action plan to improve health literacy in a select world area. The course is designed to assist students in locating, interpreting, and evaluating sources and content of health information, and in developing effective strategies and tools to assess, communicate, and educate about health literacy. Approximately one-third of the course is dedicated to exploring and evaluating emerging technologies and health literacy. Active student participation is expected and group work within class or online is commonly utilized.

Learning Outcomes

1. Apply the principles of health literacy to selected health care cases, using global, regional, and local perspectives. Apply international and national standards and recommendations for health literacy to selected health care cases, using global, regional, and local perspectives. Analyze the impact of health literacy on quality of life at the local, regional and global level. Use emerging technologies to evaluate and promote health literacy at the local, regional, and global level. Analyze the impact of cultural issues on the health literacy of selected health care cases and world areas. Analyze the use of an interdisciplinary approach to health literacy on selected health care cases and world areas. Analyze the impact of ethical issues on the health literacy of selected health care cases and world areas. Assessment: Discussion board and Final project grading rubrics.

NURS 426. Community Health Nursing for the R.N.: Clinical**3 Credits (6P)**

Nursing process applied to the care of families, groups, and communities.

NURS 460. Strategies for Student Success**3 Credits (3)**

This course is designed to assist and support students as they identify learning needs and develop a plan for successfully mastering nursing knowledge. Course activities and assignments will be designed to address student's self-identified learning goals to enhance their opportunity for success. Restricted to NURS, BSN, BSNP, BSNR majors.

NURS 475. Issues and Trends in Professional Nursing**3 Credits (3)**

Explores the challenges associated with issues and trends in health care and the legal and ethical implications of professional nursing practice.

NURS 476. Nursing Organization & Management for the R.N.: Clinical**3 Credits (6P)**

Nursing process applied to organization, management, and delivery of health care. An integrating experience for the R.N. student designed to facilitate the transition to professional practice. Students work with mentors in a clinical setting to develop professional nursing roles related to leadership and management.

NURS 477. Nursing Organization and Management for the RN**3 Credits (3)**

Course covers nursing organization, leadership, and management principles, theories, and research for the practicing RN. Restricted to BSNC majors.

NURS 490. Independent Study**1-3 Credits**

Individual studies with prior approval of department head.

NURS 505. Theoretical Foundations of Advanced Nursing**3 Credits (3)**

This course is a graduate-level introduction to nursing theory. This course assists students in understanding the nature of theory development in nursing, evidence-based practice and related disciplines. Students examine the definitions and meanings of the basic concepts of theory along with theory development and will explore an analysis of selected theories/models and their application to nursing practice, research, education, and administration. Students must be enrolled in the graduate program in nursing or have the permission of advisor and faculty of course to enroll in course. Restricted to: NURS majors.

NURS 506. Health Policy for Advanced Nursing Practice**3 Credits (3)**

Course provides a conceptual approach to understanding health policy including the social, legal, political and ethical factors that influence policy development. Strategies for influencing policy direction and change are examined. Restricted to: NURS, NUSC, NURP majors.

NURS 507. Evidence-Based Practice for Healthcare Leaders**3 Credits (3)**

This course is designed to prepare nurse administrators and other healthcare leaders with the skills and knowledge needed to critically analyze and synthesize scholarly evidence to promote high quality evidence-based practice. May be repeated up to 3 credits. Restricted to: Online MSN in Nursing Administration majors.

Learning Outcomes

1. Utilize information sources, such as bibliographic databases and electronic resources and experts, to locate existing knowledge relevant to healthcare and nursing practice.
2. Critically appraise selected research designs, methods of data collection (quantitative and qualitative), and data analytic methods in relation to selected clinical practice and healthcare systems problems.
3. Discuss the relevance of theory and conceptual frameworks to health care research and practice.
4. Evaluate the use of evidence-based practice models to investigate clinical practice and healthcare systems problems.
5. Discuss the ethical, cultural, and professional concerns with human subjects in nursing research and considerations for evidence-based practice.
6. Propose a clinical practice change utilizing evidence-based practice guidelines.

NURS 509. Quality Improvement for Healthcare Leaders**3 Credits (3)**

This course is designed to prepare nurse administrators and other healthcare leaders with the skills and knowledge needed to critically analyze and synthesize scholarly evidence to promote high quality evidence-based practice. Restricted to: exclude Online MSN in Nursing Administration majors.

Learning Outcomes

1. Explain the value of improvement science in healthcare and its impact on healthcare quality.
2. Articulate the role of administrators in leading and facilitating change in healthcare systems through quality improvement processes.
3. Compare and contrast conceptual models and frameworks that guide quality improvement work in healthcare systems.
4. Articulate the principles for selecting a systems-level problem for continuous quality improvement action.
5. Demonstrate the use of quality improvement methods, tools and clinical data to address a systems-level problem in the clinical setting.
6. Understand the role of health policy and national standards in guiding quality improvement initiatives.

NURS 511. Advanced Pathophysiology for Clinical Nursing**3 Credits (3)**

In-depth study of the physiological and pathological bases of altered health states of patients across the life span. Case studies facilitate application of complex concepts to clinical nursing practice. Restricted to: NURS, NUSC, NURP majors.

NURS 512. Advanced Clinical Pharmacology**3 Credits (3)**

Principles of clinical pharmacology for advanced clinical practice. Focus on pharmacology as it relates to human physiology and pathophysiology across the lifespan. Restricted to: NURS, NUSC, NURP majors.

NURS 514. Psychopharmacology for Advanced Practice**3 Credits (3)**

Principles of clinical psychopharmacology with emphasis on clinical application of major drug classifications including decision making, prescribing, drug monitoring and patient education.

NURS 515. Advanced Health Assessment**3 Credits (2+1P)**

Assessment theory and skills for advanced clinical practice. Emphasis on assessment of patients across the life span. May be repeated up to 3 credits. Restricted to: NURS, NUSC, NURP majors.

NURS 530. Promoting Health Behavior**3 Credits (3)**

Emphasis is on the role of the advanced practice nurse in facilitating health behavior change. The impact of health status on health behavior, ethical issues relate to health promotion, and the processes for promoting healthy behaviors are explored. Theoretical models of behavior change and primary, secondary, and tertiary prevention concepts serve as a basis for developing nursing interventions that promote behavior change.

NURS 549. Management of Human and Fiscal Resources in Nursing**4 Credits (1P)**

This graduate level course examines and applies contemporary concepts of human and fiscal resource management for the nurse administrator. Focus is placed on achieving quality outcomes through effective management of human assets and organizational resources in health care settings. The course includes a clinical component. May be repeated up to 4 credits. Restricted to: MSN majors.

NURS 563. Human Resource Management in Nursing**3 Credits (3)**

Contemporary approaches to the development and management of nursing resources that complement organizational vision, strategies and management goals. Management of a diverse, quality workforce that results in an improved organizational performance. Performance evaluation, motivation, professional development and legal and regulatory aspects will be explored.

NURS 564. Nursing Fiscal Management**3 Credits (3)**

Concepts of financial management emphasizing principles of health care budgeting and finance in managing health care resources. A focus is to achieve quality outcomes through financial resource management. May be repeated up to 3 credits. Restricted to: NURS majors.

NURS 565. Advanced Leadership in Healthcare**3-5 Credits (3+1-2P)**

Analysis of leadership theories as they pertain to the nurse executive and the advanced practice nurse in complex health care organizations. Emphasis will be placed on organizational change and conflict management in working with interdisciplinary health care teams. Clinical component included for DNP students only. May be repeated up to 5 credits. Restricted to: NURS, NUSC, NURP majors.

Prerequisite(s): NURS 562.

NURS 566. Seminar in Nursing Administration- Roles**3 Credits (3)**

Role preparation for the nurse administrator as manager, leader, collaborator and change agent. Synthesis of concepts from management and nursing as a basis for role effectiveness in nursing administration.

Corequisite(s): NURS 595.

NURS 567. Nursing Informatics**3 Credits (3)**

This course is provides the foundational knowledge necessary to integrate systems and information technologies. Topics include informatics, knowledge management, healthcare information systems/telehealth including the electronic health record. Focuses on using available technology to enhance safety and monitor the health status and outcomes of populations. Restricted to: NURS, NUSC, NURP majors.

Prerequisite(s): Consent of Instructor.

NURS 572. Pharmacology of Addictions**4 Credits (4)**

Concepts and principles of the pharmacology of psychoactive substances and the addiction process; including the pharmacological approach to treatment. Restricted to: NURS majors.

NURS 590. Independent Study**1-10 Credits**

Individual studies and directed research with prior approval of department head. May be repeated on a different topic. May be repeated for a maximum of 20 credits.

Prerequisite: consent of instructor.

NURS 595. Advanced Field Work in Nursing**1-3 Credits (1P)**

A practicum in Nursing Administration. Application of concepts from management and nursing to the clinical, educational, or community setting. May be repeated up to 12 credits. Restricted to: MSN, DNP, PHD majors. Graded: S/U Grading (S/U, Audit).

Prerequisite(s): NURS 565.

Corequisite(s): NURS 566.

NURS 597. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a different subject area. May be repeated for a maximum of 8 credits.

Prerequisite: consent of instructor.

NURS 603. Introduction to Population Health**1 Credit (1)**

This required course for the Doctor of Nursing Practice program prepares the student to implement specialty population-based disease prevention and health promotion activities to achieve national and international goals of improving worldwide health status. The course focuses on a spectrum of issues affecting health, which include emerging infectious diseases, emergency preparedness, disparities in health and healthcare services, and the impact of behavior and lifestyle choices on health.

Learning Outcomes

1. Analyze data to identify potential and emerging health hazards in individuals and communities. Evaluate care delivery models to address disease prevention and population health. Identify gaps in the care of individuals, aggregates, or populations. Identify gaps in the care of individuals, aggregates, or populations.

NURS 606. Quantitative Methods in Nursing Research**3 Credits (3)**

Focus on approaches to developing nursing knowledge by means of quantitative research methods as applied to clinical problems, theoretical modeling of human responses to health and illness, and health policy issues. Emphasizes detailed analysis and critique of non-experimental and experimental designs, issues pertaining to sampling and statistical power, the reliability and validity of measures, and uses and abuses of descriptive and inferential statistics in nursing research literature. Students are expected to develop sufficient discernment to read, critique, evaluate, and discuss the quality, significance, and limitations of published quantitative nursing research.

Prerequisite: NURS 621.

NURS 607. Qualitative Methods in Nursing Research**3 Credits (3)**

Major methodological traditions of qualitative research and their applications to knowledge development and clinical research in nursing are the emphasis. Overview of at least one computer-assisted qualitative data analysis software application. Students will engage in detailed critique and discussion of significant nursing investigation representing various qualitative approaches and traditions.

NURS 610. Nursing Education: Pedagogy and Roles**3 Credits (3)**

Teaching-learning process in the clinical and classroom settings. Focuses on educational patterns and pathways in nursing and the roles of faculty in academia. Educational reform is analyzed in relationship to diversity in students, faculty, practice settings and technology-driven learning environments. Instructional designs, teaching strategies, and outcome evaluations are examined for their pedagogic use. The development of critical thinking outcomes, mentorships and partnerships to meet the needs of students are addressed. The course examines issues and challenges that impact the educational process such as student and faculty recruitment, the changing healthcare environment, differentiation of practice, advanced practice, reduced resources and links with theory and research.

NURS 612. Healthcare Policy and Ethics**3 Credits (3)**

This course examines complex challenges faced in the US healthcare system for nurses in advanced practice roles within an ethical framework. Ethical, social, and political issues that affect the provision of health care, communities, and society are critically analyzed with an emphasis on interprofessional roles in health care. Concepts that support advocating for social justice, reducing healthcare disparities, improving quality, promoting ethical aspects of care, and cost containment are overarching themes in the course discussions and assignments. Students use self-reflection, case studies and presentations to apply ethical principles, develop healthcare policy recommendations to improve care access, and reduce disparities in professional practice and population health.

Learning Outcomes

1. Analyze the historical evolution of health care systems and their influence on the development of institutional, local, state, federal and international health policy. Critique socioeconomic, legal, ethical, and political issues relevant to policymaking and provision of equitable, safe, and quality health care at the local, state, and national levels. Assess health policies, infrastructure, financing, and complex systems in the US in contrast to other nations. Critically analyze bioethical issues in clinical practice settings as they impact policy, disparities, advocacy, ethics, improved patient outcomes and reduced costs. Synthesize the principle of human rights and ethics in conduct of health care research and policy design. Interpret the value and importance of advanced practice nursing role(s) to policy makers, health care professionals, and consumers.

NURS 622. Clinical Data Management and Analysis**2 Credits (2)**

This required course provides students with the knowledge base to understand, collect, manage, and measure clinical data. Students will explore data collection and management processes, levels of measurement, basic statistics, and measurement for improvement in order to effectively use clinical data. Data entry exercises employed through analytical tools and statistical software packages will allow the students practice and apply the basic data management and analysis skills needed for the evaluation of clinical data and evidence-based practice.

Learning Outcomes

1. Apply principles of sound data collection and management. Create a database to collect and aggregate data. Apply levels of measurement. Perform basic statistics including descriptive, parametric, and non-parametric statistics. Perform basic analysis of aggregate population level data. Use common tools (excel) and statistical software packages (SPSS) for data collection, entry, management, and analysis.

NURS 623. Mixed Methods**3 Credits (3)**

Presents a brief overview of research paradigms with emphasis on formulating research questions, aims and methods for a mixed method/model approach. Students may use proposals developed in earlier qualitative and quantitative research classes to devise mixed method proposal integrating readings on these methods and own research interests. **Prerequisite:** NURS 606 and NURS 607

NURS 624. Measurement in Culturally Diverse Border Populations**3 Credits (3)**

The focus of this course is the development of essential competencies required to locate, select, evaluate, and use instruments to operationalize nursing variables. Ethical considerations in nursing research and research issues in diverse populations will be discussed. Specific attention is given to the process of moving from concept to construct, measurement theory, validity/reliability issues, and measurement issues in diverse populations including literacy, social desirability bias, sensitive data, translations, and cultural equivalency. Restricted to PhD in Nursing majors.

Prerequisite(s): Admission to PhD in Nursing program; NURS 606; NURS 623; or consent of Instructor.

NURS 630. Issues in Studying Health of Culturally Diverse and Border Populations**3 Credits (3)**

Analysis and evaluation of the unique health care needs of culturally diverse and rural populations across the lifespan from ethnic, economic, gender, and sexual orientation perspectives. Interdisciplinary strategies to affect positive health outcomes are discussed, analyzed, and evaluated. Restricted to: NURS, NUSC, NURP majors.

NURS 631. Population Based Approaches to Health Promotion**3 Credits (3)**

Population based approaches to health promotion focuses on preparing nursing students to identify, critically analyze and evaluate health promotion initiatives in culturally diverse and border populations using the Southwestern U.S. and U.S./Mexico border as the case exemplar. It examines historical, socio-economic, legal and professional issues associated with health promotion and policy initiatives. It considers prospects for social change, political movements and alternative approaches to develop and hasten adaption of health promotion initiatives in partnership with communities, advocacy groups and health care agencies.

NURS 642. Strategic and Financial Planning for Population Health Programs**3 Credits (3)**

This course explores the role of nurses in advanced nursing practice within a rapidly changing healthcare system. Theories of leadership, quality, risk outcomes, and financial structures for healthcare organizations are discussed providing a framework for change within advanced nursing practice specialties. Accounting, finance, and marketing principles are presented enabling students to complete a financial plan for an evidence based practice change.

Prerequisite: NURS 622.

Learning Outcomes

1. Use the principles of population focused program planning, development, implementation, and evaluation to develop an evidence-based population focused strategy to address a health priority issue. Analyze the potential influence of cultural, ethical, and public health policy issues when working with diverse populations. Analyze aspects of organizational culture and planned change that may influence success of planned interventions. Evaluate feasibility issues related to implementing planned interventions such as cost, time, and available resources. Integrate principles of program evaluation to determine impact and sustainability of evidence-based interventions. Analyze the impact of financial models on costs, quality and health outcomes.

NURS 648. Interdisciplinary Leadership and Role Development for Practice Excellence**3 Credits (3)**

This required course prepares students for organizational and systems leadership and knowledge and skills critical to role development in independent and inter and intra-disciplinary practice. Content includes communication, conflict resolution, collaboration and negotiation, leadership, and team functioning to maximize success in the establishment of safe, effective patient-centered care in complex environments.

Learning Outcomes

1. Evaluate interdisciplinary care delivery models from a systems perspective using evidence-based findings. Incorporate principles of specialty practice management, quality improvement, and interdisciplinary teamwork in order to meet the health needs of the specialty population served. Analyze effective strategies for the management of ethical dilemmas, incorporation of sensitivity to diverse cultures, and elimination of health disparities. Differentiate among the multiple roles in advanced nursing practice. Evaluate leadership styles in a team environment in the analysis of complex practice and organizational issues. Incorporate consultative and leadership skills with inter and intra-disciplinary teams to facilitate change.

NURS 649. Innovations and Health Care Organizations**3 Credits (3)**

Examines complexity and innovation within health care systems, health care delivery, and population health. Areas of focus are systems, organizations, health disparities, and ethical decision making. Emphasis is on improvement in services and outcomes. Taught with NURS 562. Restricted to: NURS, NUSC, NURP majors.

NURS 650. Behavioral Approaches and Determinants of Nursing and Health**3 Credits (3)**

Focuses on how behavioral/mental health concepts are applied in determining health outcomes for individuals, families, and communities. Students will apply and synthesize theoretical constructs within practice and research focusing on behavioral/mental health concepts. Health outcomes are viewed in a traditionally holistic manner in that health outcomes are discussed as an integral part of the human experience of healing and health.

NURS 651. Quality Improvement in Healthcare for Nurse Practitioners**3 Credits (3)**

This course prepares nurse practitioners and other advanced practice nurses to be leaders of interprofessional teams engaged in the process of continuous quality improvement in healthcare settings. Healthcare quality improvement principles and practice will focus on improving patient care and outcomes, lowering costs, reducing health disparities, and increasing access to healthcare. May be repeated up to 3 credits. Restricted to: Family Nurse Practitioner; Psych/Mental Health Nursing; Nursing Practice; Family Nurse Practitioner Certificate; and Psych/Mental Health Nursing Certificate majors.

Learning Outcomes

1. Explain the value of improvement science in healthcare and its impact on healthcare quality.
2. Articulate the role of the doctorally-prepared Advance Practice Registered Nurse in leading and facilitating change in healthcare systems through quality improvement processes.
3. Compare and contrast conceptual models and frameworks that guide quality improvement work in healthcare systems.
4. Articulate the principles for selecting a systems-level problem for continuous quality improvement action.
5. Demonstrate the use of quality improvement methods, tools and clinical data to address a systems-level problem in the clinical setting.
6. Analyze the role of health policy and national standards in guiding quality improvement initiatives.

NURS 652. Applied Evidence-Based Practice and Quality Improvement**3 Credits (3)**

This course is designed to prepare DNP student to demonstrate systems thinking, and accountability in design, delivery, and evaluating evidence-based care to improve clinical outcomes through the development of the DNP prospectus. May be repeated up to 3 credits. Restricted to: DNP majors.

Prerequisite(s): NURS 651.

NURS 653. Evidence-Based Practice for Nurse Practitioners**3 Credits (3)**

This course is designed to prepare nurse practitioners and other advanced practice nurses with the skills and knowledge needed to critically analyze and synthesize scholarly evidence to promote high quality evidence-based practice. Restricted to: Family Nurse Practitioner; Psych/Mental Health Nursing; Nursing Practice; Family Nurse Practitioner Certificate; and Psych/Mental Health Nursing Certificate majors.

Prerequisite(s): NURS 651.

Learning Outcomes

1. Utilize information sources, such as bibliographic databases and electronic resources and experts, to locate existing knowledge relevant to healthcare and nursing practice.
2. Critically appraise selected research designs, methods of data collection (quantitative and qualitative), and data analytic methods in relation to selected clinical practice and healthcare systems problems.
3. Discuss the relevance of theory and conceptual frameworks to health care research and practice.
4. Evaluate the use of evidence-based practice models to investigate clinical practice and healthcare systems problems.
5. Discuss the ethical, cultural, and professional concerns with human subjects in nursing research and considerations for evidence-based practice.
6. Propose a clinical practice change utilizing evidence-based practice guidelines.

NURS 657. Population Health and the Environment**3 Credits (3)**

This course will examine and evaluate prevention strategies, healthcare quality measures, diversity principles, and patient safety considerations related to population health. There is a focus on how environmental health can be integrated into nursing education, practice, research, and policy/advocacy efforts. Students will explore community, environmental, cultural, and socioeconomic dimensions of care as evidenced by completion of a community assessment.

Prerequisite: NURS 603.

Learning Outcomes

1. Analyze theoretical frameworks/conceptual models for relevance to population health. Analyze the impact of a population health focus on the health of individuals, families and communities. Differentiate the impact of biologic factors, the natural environment, built environment and altered environment on health. Describe the impact of discrimination, sexism, and racism on equity and inclusion in healthcare and on health. Analyze the relationship between human health, animal health and ecosystem health. Apply the principles of patient and community engagement for population health improvement. Discriminate between population growth, health and development as factors in global health. Examine institutional, local/state/federal, and global policies that address the relationship between population health and the environment.

NURS 660. PMHNP Across the Lifespan I**6 Credits (3+1-3P)**

This is the first in a series of three didactic/clinical courses for the psychiatric mental health nurse practitioner (PMHNP) student. This course introduces the PMHNP student to the scope and standards of practice; legal and ethical issues; comprehensive psychiatric assessment and evaluation; developmental theories; and the theory and practice of psychotherapy. Emphasis is placed on individuals across the lifespan from diverse populations. The clinical component of this course involves working with a preceptor on psychiatric assessment and evaluation, as well as therapy in an outpatient setting. May be repeated up to 6 credits. Restricted to: NURP,NURS majors.

Prerequisite(s): NURS 511, NURS 512, NURS 515.

Learning Outcomes

1. Demonstrate advanced self-awareness to the core professional values and ethical/legal standards in the implementation of the Nurse Practitioner role and identifies and maintains professional boundaries to preserve the integrity of the therapeutic process.
2. Integrate history and physical exam data with the knowledge of pathophysiology and psychopathology of acute and chronic diseases across the life span, to construct comprehensive and concise biopsychosocial assessments of individuals with common psychiatric disorders.
3. Focuses on interdisciplinary communication, care coordination by seeking consultation with colleagues to improve clinical outcomes for individuals with mental health problems and psychiatric disorders.
4. Apply theoretical concepts and psychotherapeutic modalities to develop age appropriate therapeutic alliances with mental health individuals during developmental transitions and life-style adjustments across the lifespan, including focus on vulnerable populations at risk for mental health problems, based on current evidence and clinical practice guidelines.
5. Provides patient-centered care recognizing cultural diversity, spiritual preferences, values, and beliefs to create a climate of patient- centered care to include confidentiality, privacy, comfort, emotional support, mutual trust, and respect.
6. Applies supportive, psychodynamic principles, cognitive-behavioral and other evidence- based psychotherapy/-ies to both brief and long-term individual practice.
7. Demonstrates progressive self-directed learning of course concepts by applying knowledge of theoretical concepts and related theories to individuals with mental illness by independently conducting individual psychotherapy, under supervision of a preceptor.

NURS 662. PMHNP Across the Lifespan II**5-7 Credits (3+2-4P)**

This is the second in a series of three didactic/clinical courses for the psychiatric mental health nurse practitioner (PMHNP) student. This course provides further theoretical foundations, knowledge and evidence-based practice experiences in differential diagnosis for mental health conditions; family and group therapy; and integrated management of mental health conditions. Emphasis is placed on working with families from diverse populations. The clinical component of this course involves working with a preceptor to develop and implement comprehensive treatment plans that include psychotherapy and psychopharmacology in inpatient and/or outpatient settings. May be repeated up to 7 credits. Restricted to: NURP,NURS majors.

Prerequisite(s): NURS 660.

Learning Outcomes

1. Demonstrate self-awareness of core professional values and ethical/legal standards in the implementation of the nurse practitioner role, identifying and maintaining professional boundaries to preserve the integrity of the therapeutic process.
2. Integrate history, laboratory and physical exam data with the knowledge of pathophysiology and psychopathology of acute and chronic diseases across the life span, to construct comprehensive and concise biopsychosocial assessments and diagnosis of individuals with common psychiatric disorders.
3. Demonstrate interdisciplinary communication and care coordination by seeking consultation with colleagues to improve clinical outcomes for individuals with mental health problems and psychiatric disorders.
4. Apply theoretical concepts and psychotherapeutic modalities to develop age-appropriate therapeutic alliances with individuals and families during developmental transitions and life-style adjustments across the lifespan based on current evidence and clinical practice guidelines.
5. Recognize cultural diversity, spiritual preferences, values, and beliefs to create a climate of patient-centered care demonstrating confidentiality, privacy, comfort, emotional support, mutual trust, and respect.
6. Demonstrate increasing independence in the application of supportive, psychodynamic principles, cognitive-behavioral and other evidence- based psychotherapy/-ies to both brief and long-term individual encounters, family therapy and group therapy.
7. Demonstrate knowledge of psychotherapeutic theories and concepts by independently conducting psychotherapy with individuals with mental illness or at risk for mental health problems, under the supervision of a preceptor.
8. Apply theoretical concepts, evidence-based psychotherapeutic modalities, and knowledge of psychopharmacology to develop, implement and document comprehensive treatment plans.

NURS 664. PMHNP Across the Lifespan III**5 Credits (1+3-4P)**

Demonstrate self-awareness of core professional values and ethical/legal standards in the implementation of the nurse practitioner role, identifying and maintaining professional boundaries to preserve the integrity of the therapeutic process. Integrate history, laboratory and physical exam data with the knowledge of pathophysiology and psychopathology of acute and chronic diseases across the life span, to construct comprehensive and concise biopsychosocial assessments and diagnosis of individuals with common psychiatric disorders. Demonstrate interdisciplinary communication and care coordination by seeking consultation with colleagues to improve clinical outcomes for individuals with mental health problems and psychiatric disorders. Apply theoretical concepts and psychotherapeutic modalities to develop age-appropriate therapeutic alliances with individuals and families during developmental transitions and life-style adjustments across the lifespan based on current evidence and clinical practice guidelines. Recognize cultural diversity, spiritual preferences, values, and beliefs to create a climate of patient-centered care demonstrating confidentiality, privacy, comfort, emotional support, mutual trust, and respect. Demonstrate increasing independence in the application of supportive, psychodynamic principles, cognitive-behavioral and other evidence-based psychotherapy/-ies to both brief and long-term individual encounters, family therapy and group therapy. Demonstrate knowledge of psychotherapeutic theories and concepts by independently conducting psychotherapy with individuals with mental illness or at risk for mental health problems, under the supervision of a preceptor. Apply theoretical concepts, evidence-based psychotherapeutic modalities, and knowledge of psychopharmacology to develop, implement and document comprehensive treatment plans.

Learning Outcomes

1. Demonstrate self-awareness of core professional values and ethical/legal standards in the implementation of the nurse practitioner role, identifying and maintaining professional boundaries to preserve the integrity of the therapeutic process.
2. Independently integrate history, laboratory and physical exam data with the knowledge of pathophysiology and psychopathology of acute and chronic diseases across the life span, to construct comprehensive and concise biopsychosocial assessments and diagnosis of individuals with common psychiatric disorders.
3. Demonstrate interdisciplinary communication and care coordination by seeking consultation with colleagues to improve clinical outcomes for individuals with mental health problems and psychiatric disorders.
4. Apply theoretical concepts and psychotherapeutic modalities to develop age-appropriate therapeutic alliances with individuals and/or families during developmental transitions and life-style adjustments across the lifespan based on current evidence and clinical practice guidelines.
5. Recognize cultural diversity, spiritual preferences, values, and beliefs to create a climate of patient-centered care demonstrating confidentiality, privacy, comfort, emotional support, mutual trust, and respect.
6. Demonstrate independence in the application of supportive, psychodynamic principles, cognitive-behavioral and other evidence-based psychotherapy/-ies to both brief and long-term individual encounters and/or group therapy.
7. Demonstrate knowledge of psychotherapeutic theories and concepts by independently conducting psychotherapy with individuals with mental illness or at risk for mental health problems, under the supervision of a preceptor.
8. Demonstrate theoretical concepts, evidence-based psychotherapeutic modalities, and knowledge of psychopharmacology to independently develop, implement and document comprehensive treatment plans.

NURS 665. Advanced Concepts in the Treatment of Substance Use Disorders**1 Credit (1)**

This course examines scope of practice, epidemiology, cultural issues, and common co-occurring psychiatric, medical and legal problems related to substance use disorders, including opioid use disorder. Students will review theories and research as the basis for psychometric screening and evidence-based interventions, including medication-assisted treatment for substance use disorders. Emphasis is placed on individuals across the lifespan from diverse populations. Consent of Instructor required.

Learning Outcomes

1. Demonstrate the significance of professionalism and self-awareness by maintaining professional, ethical and legal standards, preserving the integrity of the therapeutic process, demonstrating commitment to the health and well-being of individuals and society ethical practice, and upholding high personal standards of behavior. Recognize addictive disorders as developmental biopsychosocial disorders using a model of interconnection encompassing neurobiology, genetic, medical and mental health co-morbidities, familial, social, environmental, cultural, spiritual influences as contributors of substance use disorders. Apply an evidence-based approach to detecting substance use disorders by recognizing medical, psychological, social, and functional indicators of subclinical addiction disorders through use of validated standardized substance use disorder screening instruments, and accurately interpret screening results indicative of hazardous and harmful substance use. Integrate positive substance use screening results with therapeutic and counseling strategies appropriate to the patient's readiness to change, by assessing the patient's background, ethnicity, and belief system to accommodate and respect the values and attitudes of various cultures. Recognize the indications, contraindications, duration and utilization of evidence-based medication-assisted treatment and pharmacotherapy for substance use disorders including medications for acute withdrawal and relapse prevention. Diagnose substance use disorders and existing co-occurring mental health and/or medical disorders, and match appropriate level of care, secure consultation and referrals for specialty treatment of addiction and other medical and psychiatric conditions.

NURS 671. FNP Across the Lifespan I**6 Credits (3+1-3P)**

This is the first in a series of three didactic/clinical courses for the family nurse practitioner (FNP) student. This course introduces the FNP student to the scope and standards of practice; legal and ethical issues; differential diagnosis; as well as the identification and management of specific symptoms and conditions. Emphasis is placed on individuals across the lifespan from diverse populations. The clinical component of this course involves working with a preceptor to advance skills in patient history taking, performing physical assessments, and interpreting laboratory and other test results. Development of a plan of care with health promotion components is also expected. May be repeated up to 6 credits. Restricted to: NURP,NURS majors.

Prerequisite(s): NURS 511, NURS 512, NURS 515.

Learning Outcomes

1. Demonstrate understanding of cultural, social and spiritual differences, their impact on health care, and utilize this knowledge in the management of patients from all cultures and apply this understanding in establishing a therapeutic, respectful interactions and relationship with the patient and families.
2. Apply theoretical concepts of patient-centered care with emphasis on health promotion, disease prevention, guidance/counseling, disease management, and palliative care during developmental transitions and life-style adjustments.
3. Incorporate primary/secondary prevention guidance into comprehensive treatment plans for patients across the lifespan. Integrate history, physical examination laboratory and other test data with knowledge of pathophysiology of acute and chronic diseases/conditions to develop a comprehensive exploration (or assessment) of a chief complaint.
4. Identify pharmacological interventions in the treatment and management of illness for diverse populations.
5. Translate knowledge of acute and chronic illness to the development, implementation and documentation of appropriate comprehensive treatment plans, including referrals to other specialties and services.
6. Integrate evidence-based clinical guidelines into the diagnosis and management of illness in patients across the lifespan.
7. Create a climate of patient-centered care to include confidentiality, privacy, comfort, emotional support, education, mutual trust and respect.
8. Use self-reflection to evaluate progress in professional development as an integral member of the interprofessional team. Integrate ethical principles in decision-making and demonstrate core professional values in the implementation of the nurse practitioner role.

NURS 672. FNP Across the Lifespan II**5-7 Credits (3+2-4P)**

This is the second in a series of three didactic/clinical courses for the family nurse practitioner (FNP) student. This course provides further theoretical foundations, knowledge and evidence-based practice experiences in the differential diagnosis and management of acute and chronic diseases. Emphasis is placed on individuals across the lifespan from diverse populations. Building on knowledge and skills from the previous course, students will be expected to manage patients with an increasing complexity of health issues and multiple co-morbidities. The clinical component of this course involves working with a preceptor to refine skills in assessment and differential diagnosis and well as the development and implementation of comprehensive treatment plans, that include referrals to other specialties and services. May be repeated up to 7 credits. Restricted to: NURP,NURS majors.

Prerequisite(s): NURS 671.

Learning Outcomes

1. Demonstrate understanding of cultural, social and spiritual differences, their impact on health care, and utilize this knowledge in the management of patients from all cultures and apply this understanding in establishing a therapeutic, respectful interactions and relationship with the patient and families.
2. Apply theoretical concepts of patient-centered care with emphasis on health promotion, disease prevention, guidance/counseling, disease management, and palliative care during developmental transitions and life-style adjustments. Incorporate primary/secondary prevention guidance into comprehensive treatment plans for patients across the lifespan. Integrate history, physical examination laboratory and other test data with knowledge of pathophysiology of acute and chronic diseases/conditions to develop appropriate differential diagnoses.
3. Identify pharmacological interventions in the treatment and management of illness for diverse populations.
4. Translate knowledge of acute and chronic illness to the development, implementation and documentation of appropriate comprehensive treatment plans, including referrals to other specialties and services.
5. Integrate evidence-based clinical guidelines into the diagnosis and management of illness in patients across the lifespan.
6. Create a climate of patient-centered care to include confidentiality, privacy, comfort, emotional support, education, mutual trust and respect.
7. Use self-reflection to evaluate progress in professional development as an integral member of the interprofessional team.
8. Integrate ethical principles in decision-making and demonstrate core professional values in the implementation of the nurse practitioner role.
9. Evaluate the relationships between access, cost, quality, and safety and their influence on health care.

NURS 673. FNP Across the Lifespan III**5 Credits (1+3-4P)**

This is the final didactic/clinical course for the family nurse practitioner (FNP) student. In this course, the student works with a preceptor to develop mastery of skills required to assess, diagnose and manage acute and chronic conditions in primary care settings. Advancement of knowledge and skills attained through previous practicum experiences and this final course produces a capable, qualified provider, who will transition into a safe, novice, primary care nurse practitioner. The didactic component of this course includes preparation for the FNP board certification examination. May be repeated up to 5 credits. Restricted to: NURP, NURS majors.

Prerequisite(s): NURS 672.

Learning Outcomes

1. Demonstrate understanding of cultural, social and spiritual differences, their impact on health care, and utilize this knowledge in the management of patients from all cultures and apply this understanding in establishing a therapeutic, respectful interactions and relationship with the patient and families.
2. Apply theoretical concepts of patient-centered care with emphasis on health promotion, disease prevention, guidance/counseling, disease management, and palliative care during developmental transitions and life-style adjustments.
3. Incorporate primary/secondary prevention guidance into comprehensive treatment plans for patients across the lifespan.
4. Integrate history, physical examination laboratory and other test data with knowledge of pathophysiology of acute and chronic diseases/conditions to develop appropriate differential diagnoses.
5. Identify pharmacological interventions in the treatment and management of illness for diverse populations.
6. Translate knowledge of acute and chronic illness to the development, implementation and documentation of appropriate comprehensive treatment plans, including referrals to other specialties and services.
7. Integrate evidence-based clinical guidelines into the diagnosis and management of illness in patients across the lifespan.
8. Create a climate of patient-centered care to include confidentiality, privacy, comfort, emotional support, education, mutual trust and respect.
9. Use self-reflection to evaluate progress in professional development as an integral member of the interprofessional team.
10. 1 Integrate ethical principles in decision-making and demonstrate core professional values in the implementation of the nurse practitioner role.
11. 1 Evaluate the relationships between access, cost, quality, and safety and their influence on health care.

NURS 676. Women's Health**3 Credits (3)**

The course will examine patient and family perspectives as well as health care system variables and societal issues that affect the organization and delivery of women's health care. Students will engage in critical analysis of the evidence base concerning psychosocial and spiritual concerns and barriers to and opportunities for improving women's health care across the diverse settings in which health care is delivered. Focus on evidence-based approaches to the primary care management of women. May be repeated up to 3 credits.

NURS 678. Health Needs of Special Populations**2-4 Credits (2+1-2P)**

This course provides an overview of infant, child, adult and older adult health needs and interventions that promote and support optimal health. The conceptual and theoretical foundation for advanced practice with individuals and families across the lifespan is emphasized, including pharmacotherapeutic and integrated bio-psychosocial interventions for diverse populations across the continuum of care. Advanced practice nurses in the certificate program will have varying hours of credit. May be repeated up to 4 credits.

Prerequisite(s): NURS 660 or NURS 671 or permission of instructor.

NURS 679. Introduction to the DNP Project**1 Credit (1)**

This required course is designed to assist the student in exploring a clinical problem and selecting an area of interest within a practice specialization, and in demonstrating professional competencies related to an area of interest to begin foundational development of the DNP scholarly project. The student will document previously acquired abilities and competencies while developing an understanding of the DNP project process. Students will work towards selection of a setting (hospital, long-term, primary care or community health agency) where concepts, theories, and principles of leadership, administration, and management can be applied.

Learning Outcomes

1. Examine the role of the DNP in the development and implementation of evidence based change of practice projects. Identify a DNP Project practice site and clinical advisor. Develop a portfolio demonstrating expertise in the specialty area of interest and understanding of a clinical problem.

NURS 685. Epidemiology for Advanced Nursing Practice**2 Credits**

Emphasis is on the practical application of the principles of epidemiology in the measurement and evaluation of population health. Epidemiological literature will be critiqued and synthesized to evaluate population-based public health nursing problems. Issues related to disease surveillance, causation, genetic patterns, screening and social trends in population health will be examined. Use of existing data bases and technology programs are covered. Restricted to: NURP, NURS, NUSC majors.

NURS 686. DNP Project I**1 Credit (1)**

This is the first in a three-course series that culminates in the implementation, evaluation and dissemination of scholarly work that demonstrates the student's synthesis of the Essentials of Doctoral Education for Advanced Practice Nursing (i.e., the DNP Essentials). The project must use evidence to improve clinical practice, healthcare delivery and/or patient outcomes. Upon completion of this course, students will identify a problem in healthcare, explore the existing evidence and develop a preliminary proposal for a project that demonstrates synthesis of DNP coursework and lays the groundwork for future scholarship.

Prerequisites: NURS 651 and NURS 653.

Learning Outcomes

1. Systematically review the existing evidence pertaining to selected clinical problem, generating a written review of the existing evidence. Identify a theoretical framework or model that will guide the development of a solution or intervention and/or the execution of the DNP project. Identify a theoretical framework or model that will guide the development of a solution or intervention and/or the execution of the DNP project. Defend the DNP project proposal in front of the student's project committee and submit to IRB

NURS 687. DNP Project II**1 Credit (1)**

This is the second in a three-course series that culminates in the implementation, evaluation and dissemination of scholarly work that demonstrates the student's synthesis of the Essentials of Doctoral Education for Advanced Practice Nursing (i.e., the DNP Essentials). The project must use evidence to improve clinical practice, healthcare delivery and/or patient outcomes. Upon completion of this course, students will have designed and defended a plan for implementation and evaluation of the proposed project, submitted an IRB application, and initiated the project upon obtaining IRB approval.

Prerequisite(s): NURS 686.

Learning Outcomes

1. Execute the approved DNP project implementation and evaluation plan. Develop a plan for local, regional and/or national dissemination of the DNP project outcomes as scholarly work. Identify the DNP Essentials that are represented in the project and describe how the project addressed the requirement.

NURS 688. DNP Project III**1 Credit (1)**

This is the third in a three-course series that culminates in the implementation, evaluation and dissemination of scholarly work that demonstrates the student's synthesis of the Essentials of Doctoral Education for Advanced Practice Nursing (i.e., the DNP Essentials). The project must use evidence to improve clinical practice, healthcare delivery and/or patient outcomes. Upon completion of this semester, students will demonstrate the ability execute the proposed project plan. If additional time is needed to complete the proposed DNP project, the student must register for NURS 699 in subsequent semesters until the project outcomes are successfully defended in front of the project committee.

Prerequisite(s): NURS 687.

Learning Outcomes

1. Defend the DNP project outcomes in front of the student's project committee and a public audience. Generate a comprehensive written paper (i.e., professional manuscript, white paper, or technical report) that outlines the DNP project problem statement, objectives, review of evidence, implementation, and outcomes.

NURS 689. DNP Project Practicum**1-3 Credits (1-3P)**

This leadership practicum courses provide for the development of a population health leader as demonstrated through the DNP project. The student will conduct an assessment of a population, community and/or organization where evidence-based leadership activities may be employed. Once a problem or issue is identified in the practice setting, the student will develop an evidence-based project designed to positively impact population-specific and/or patient care outcomes. After approval of the DNP project proposal, the student will implement an evidence-based project designed to positively impact population health and/or patient/client care outcomes. The culmination of the DNP project is evaluation and dissemination of the evidence-based changes. May be repeated up to 9 credits.

Learning Outcomes

1. Demonstrate competence in the role of population health leader who delivers advanced practice nursing, including educators, clinicians, administrators, and translators of research. Execute the DNP Project that meets the needs of diverse populations Collaborate with DNP committee and the organization to establish an intra- and inter-professional continuous quality improvement process for achievement of the desired outcomes Exhibit consistent professional behavior, performance, accountability, and responsibility within a population health leadership role

NURS 690. Doctoral Nursing Seminar**1-3 Credits (1-3)**

Seminar to build nursing scholarship skills, consisting of a series of 1 credit seminars that are taken as part of the doctoral degree plan. May be repeated up to 7 credits. Restricted to: NUSC majors.

NURS 691. Independent Study**1-6 Credits (1-6)**

Individual studies and directed research with prior approval of department head. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

NURS 697. Professional Roles for Advanced Practice Clinical Nursing**3 Credits (3)**

This course will focus on providing an in depth understanding of the legal, historical, political, social, and ethical aspects of advanced practice nursing. Traditional and emerging roles for advanced practice nursing are examined. Restricted to DNP majors.

Prerequisite(s): Admission to DNP program, NURS 664 OR NURS 672.

NURS 698. Advanced Practice Nursing Immersion**1-4 Credits (1-4)**

Practicum experience for advanced practice students. Focus will be on a practice issue chosen by the student for further development as an evidence-based doctoral project. Clinical practice hours as needed to meet DNP requirements. Up to 24 credits may be completed by student. May be repeated up to 4 credits. Restricted to: NURP majors. Graded: S/U Grading (S/U, Audit).

Prerequisite(s): NURS 511, NURS 512, NURS 515 or enrollment in post-masters track.

NURS 699. Clinical Scholarly Project**1-4 Credits (1-4)**

Building on the practice expertise of the DNP student, this series of credits is to provide the student with the opportunity to design an innovative clinical practice improvement project/program addressing an actual health care concern. Through mentored activities, the DNP student will identify, develop, implement, evaluate, and disseminate an independent analytic. Graded: S/U. NURS 652. Restricted to: NURP majors. Graded: S/U Grading (S/U, Audit).

Prerequisite(s): Admission to DNP program.

NURS 700. Doctoral Dissertation**1-9 Credits (1-9)**

Dissertation may be repeated to maximum of 30 credits. Minimum requirements are 21 credit hours. Comprehensive examine is included within these 21 credits.

NURS 999. Practical Nursing Requirements Completed**99 Credits**

A phantom course created to indicate a student has met Practical Nursing requirements. Used to indicate this in academic history to replace an administrative message not converted from SOLAR to VISTAS. 01/97

NUTR-NUTRITION

NUTR 2110. Human Nutrition**3 Credits (3)**

This course provides an overview of nutrients, including requirements, digestion, absorption, transport, function in the body and food sources. Dietary guidelines intended to promote long-term health are stressed.

Learning Outcomes

1. Evaluate sources of nutrition information for reliability
2. Identify elements of a nutritious diet
3. Describe the digestion, transport, and absorption of nutrients
4. Describe the importance of nutrition in weight control and health
5. Identify nutritional needs as they relate to the life cycle and performance
6. Describe behavior modification techniques that promote good health
7. Evaluate popular nutrition trends for scientific accuracy and effectiveness
8. Develop skills in the planning and assessing of healthy meal plans
9. Describe the role of food choices in the development of chronic disease
10. 1Describe the role of food in the promotion of a healthful lifestyle

NUTR 2120. Seminar I - Becoming a Nutrition Professional**1 Credit (1)**

This course will introduce students to the field experience, careers, and professions in nutrition. This course is required for students pursuing a Didactic Program in Dietetics verification statement. May be repeated up to 1 credits. Consent of Instructor required. Restricted to: HNDS majors.

Learning Outcomes

1. Describe career options within the fields of Nutrition Dietetics.
2. Outline the HNDS field experience process.
3. Explain the educational pathways in HNDS.
4. List requirements for admission into the HNDS Dietetics pathway.
5. Begin an HNDS student portfolio.
6. Discuss the importance of personal responsibility accountability

NUTR 3110. Nutrition Throughout the Lifecycle**3 Credits (3)**

Relationship of the stages of the human life cycle to changes in nutrient need. Consent of Instructor required.

Prerequisite(s): NUTR 2110.

Learning Outcomes

1. Understand the value of collaborative work in nutrition care of individuals. Compare and contrast the physiological, behavioral, and psychosocial factors associated with each life stage that affect nutritional status. For each life cycle stage, create a nutritionally adequate menu that meets key nutrient needs. Culturally appropriate evidence-based interventions to address common nutrition-related conditions experienced in each lifecycle stage. Utilize the Nutrition Care Process to complete a nutrition assessment.

NUTR 3120. Food for Health**4 Credits (4)**

This course is designed to provide students the opportunity to learn about the intersection of nutrition and health in terms of food and diet. Students will be introduced to basic concepts within nutrition education, nutrition communication, nutrition and health and food culture. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): NUTR 3110. Prerequisite(s): NUTR 2110, FSTE 2110G, HRTM 2120.

Learning Outcomes

1. Complete nutritional analysis of a recipe/meal.
2. Modify traditional recipes to improve nutritional value and/or meet standards of a therapeutic diet.
3. Explain cultural and religious considerations when planning menus for diverse groups.
4. Critically evaluate and modify recipes to meet the needs of various ethnic, religious, and special populations.
5. Develop and conduct a hands-on nutrition education for a target group to teach healthy eating skills.

NUTR 3710. Food Systems & Policy in Dietetics**3 Credits (3)**

This course introduces students to food and nutrition policy issues, institutions, and stakeholders and their impacts on public health, sustainability, and the practice of dietetics in the US. The course will examine policy development and the roles of federal agencies, private firms, non-governmental organizations, and the media in food and nutrition policy. It will also examine international perspectives on food and nutrition policies and programs used to support global nutrition, health promotion, and wellness.

Prerequisite(s): Junior standing, NUTR 3110, NUTR 3120.

Learning Outcomes

1. Discuss the economic, political, social, and cultural factors that influence US food and nutrition policies and impact national food systems and population health.
2. Identify the psychological, social, cultural, and environmental factors that influence food choices, eating behaviors, and nutrition-related practices.
3. Describe the processes and major players involved in US food and nutrition policy development, implementation, monitoring/evaluation, and regulation.
4. Recognize the influence of food and nutrition policy on the practice of dietetics.

NUTR 3750. Applied Nutrition Research**3 Credits (3)**

This course will introduce students to various types of nutrition research and equip them to locate and critique nutrition and dietetics research articles. Research analysis skills will then be applied to a review of the current literature on a nutrition topic and applied to dietetics practice. May be repeated up to 3 credits.

Prerequisite(s): MATH 1350G (or A ST 311); NUTR 2110, NUTR 3110, and NUTR 3120, .

Learning Outcomes

1. Recall the various research methods, study designs, and statistical analyses used in nutrition research.
2. Compare and contrast research methods and analyses in nutrition research.
3. Analyze nutrition research for appropriateness of the methods and analyses.
4. Evaluate nutrition research to form sound, ethical conclusions and practice recommendations.

NUTR 3996. Special Topics**1-4 Credits (1-4)**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): Junior or Senior standing, consent of instructor.

Learning Outcomes

1. Develop foundational knowledge in a specialized area of dietetics practice.

NUTR 4110. Advanced Nutrition**3 Credits (3)**

Application of biochemistry and physiology to nutrition. May be repeated up to 3 credits. Prerequisite(s): BIOL 2221, (OR A ST 311); NUTR 3110

Learning Outcomes

1. Describe the processes of digestion and absorption within the human body. Compare and contrast the structure and function of key nutrients. Describe the metabolism of key nutrients under various conditions. Apply concepts of energy and nutrient metabolism to common medical conditions and other relevant situations such as exercising or fasting.

NUTR 4210. Community Nutrition**3 Credits (3)**

Overview of the practice of community nutrition. Includes program planning, needs assessment, program implementation and program evaluation. Role of public and private agencies in nutrition programs that impact on nutrition of individuals and groups in the community. Same as NUTR 5210.

Prerequisite: NUTR 3110, NUTR 3710.

Learning Outcomes

1. Summarize the components of current national and local community nutrition programs. Explain how national or state level policy influences a community nutrition issue. Write a needs assessment for a community nutrition issue using reliable sources of community nutrition information and data and relevant research. Develop goals and objectives of a nutrition program that address a community nutrition issue. Develop a culturally appropriate nutrition education lesson plan that addresses a specific nutrition program objective.

NUTR 4220. Food Service Organization and Management**3 Credits (3)**

Personnel, financial and general management in institutional and commercial food service operations.

Prerequisite: HRTM 2120.

Learning Outcomes

1. Evaluate food products and menu plans through the application of food service management theories and principles. Describe the process of and ethical considerations surrounding purchasing, receiving, storing and controlling inventory of a given food item. Evaluate food system, food safety practices, and scenarios. Evaluate a nutrition and foodservice budget and interpret financial data.

NUTR 4230. Medical Nutrition Therapy I**3 Credits (3)**

Special diets and physiological basis for their use. Laws and regulations concerning the practice of dietetics.

Prerequisite: NUTR 4110, BCHE 341.

Corequisite: NUTR 4230; NUTR 4233.

Learning Outcomes

1. Examine the role of medical nutritional therapy in disease processes. Apply nutritional assessment techniques utilizing the Nutrition Care Process. Compose nutrition care plans and utilize various styles of medical charting. Describe the interdisciplinary nature of working with a health care team in the delivery of medical nutritional therapy.

NUTR 4230L. Medical Nutrition Therapy I Lab**1 Credit (1P)**

Supplements NUTR 4230. Students will perform nutrition assessments, nutrition focused physical exams, apply medical nutrition therapy-based interventions and practice patient discharge education for specific disease states. Elements of pathology and biochemistry of nutrition-related conditions are integrated into course topics. Restricted to: HNDS majors.

Corequisite(s): HNDS 4230.

Learning Outcomes**NUTR 4233. Nutrition Counseling and Education****3 Credits (3)**

This course is designed to meet the needs of individuals entering the healthcare/dietetics field who have little counseling experience, but have a strong foundational knowledge in the field of dietetics. It includes counseling techniques and strategies, behavior change, interviewing, cultural competence, mass media, and nutrition education.

Prerequisite: NUTR 3110; FCSC 348.

Learning Outcomes

1. Evaluate nutrition counseling strategies tools in promoting behavior change and self-management. Apply behavior change theories and models to nutrition counseling sessions. Develop nutrition care plans for nutrition counseling clients. Analyze professionalism and ethics within nutrition counseling and education. Develop and present a nutrition education lesson based on current nutrition research.

NUTR 4235. Entering the Field of Dietetics**1 Credit (1)**

Students will develop professional materials that will be used in their future careers including a personal statement, resume, and interview dialogues. Students will become familiar with career options in the field of dietetics and learn to navigate the processes of becoming a registered dietitian or dietetic technician, registered. Restricted to: HNDS majors. Students must be a Senior to enroll.

Prerequisite/Corequisite: NUTR 4210.

Learning Outcomes

1. Students will develop professional materials that will be used in their future careers including a personal statement, resume, and interview dialogues. Students will become familiar with career options in the field of dietetics and learn to navigate the processes of becoming a registered dietitian or dietetic technician, registered

NUTR 4240. Medical Nutrition Therapy II**3 Credits (3)**

Continuation of NUTR 4230.

Prerequisite: NUTR 4230.

Corequisite: NUTR 4240L.

Learning Outcomes

1. Select appropriate medical nutrition therapy interventions for various disease processes. Master nutrition assessment of patients/clients utilizing the Nutrition Care Process Model. Interpret medical terminology in patient chart notes and medical history records. Evaluate laws regulations concerning dietetics.

NUTR 4240L. Medical Nutrition Therapy II Laboratory**1 Credit (1P)**

Supplements NUTR 4240. Students will apply medical nutrition therapy to specific disease states with special emphasis on writing nutrition support orders and learning to utilize nutrition support equipment. Students will learn and apply advanced nutritional therapies and patient management strategies. Restricted to: HNDS majors.

Corequisite(s): HNDS 4240.

Learning Outcomes

1. Calculate nutrition support recommendations and document orders in the patient's medical chart.
2. Demonstrate safe use of nutritional support equipment.
3. Master use of the Nutrition Care Process in case-based and simulated patient scenarios to conduct nutrition assessments and implement evidence-based interventions.
4. Critically evaluate lab values and client anthropometric data.
5. Select therapeutic diets for the treatment of medical conditions and their symptoms.

NUTR 4550. Billing and Coding for Dietetics**1 Credit (1)**

This course provides students with an overview of billing and coding practices for medical nutrition therapy that ensure proper reimbursement for services. Students will learn nutrition related billing codes, apply nutrition care process terminology to documentation, and discover how policy affects current and future coverage of nutrition services.

Prerequisite(s)/Corequisite(s): NUTR 4240. Students must be in Senior standing to enroll in this course, NUTR 4230.

Learning Outcomes

1. Explain the use of Medical Nutrition Therapy CPT codes.
2. Properly document nutrition services in the medical record for full reimbursement of services.
3. Describe different Health Care Delivery Systems and how they impact nutrition services.
4. Explain Medicare, Medicaid, and private payer coverage for Medical Nutrition Therapy.

NUTR 4560. Field Experience- Clinical Dietetics**1-8 Credits (1-8)**

Experience in various areas of clinical nutrition facilities with emphasis on nutrition care of patients. Practical experience with supervision by resident faculty as well as supervisor at work site. Performance at work site graded in accordance with university standards. One credit is earned for 40 hours of work. A total of 40 hours is required. May be repeated up to 8 credits. Consent of Instructor required.

Prerequisite(s): Senior standing, NUTR 4230, NUTR 4230L, consent of instructor.

Learning Outcomes

1. Apply dietetics knowledge to practice in various clinical settings.
2. Develop a field experience portfolio highlighting the development of clinical nutrition knowledge and skills.
3. Compare and contrast the responsibilities of Registered Dietitians in various clinical practice settings.

NUTR 4565. Field Experience Community Nutrition**1-8 Credits (1-8)**

Experience working with nutritional problems of individual families of all socioeconomic and age levels and with agencies concerned with community nutrition. Practical experience with supervision by resident faculty as well as supervisor at the work site. Performance at work site graded in accordance with university standards. May be repeated up to 8 credits. Consent of Instructor required.

Prerequisite(s): Senior standing, NUTR 4210, consent of instructor.

Learning Outcomes

1. Apply dietetics knowledge to practice in various community settings.
2. Develop a field experience portfolio highlighting the development of community nutrition knowledge and skills.
3. Compare and contrast the responsibilities of Registered Dietitians in various community practice organizations.

NUTR 4991. Special Problems**1-4 Credits (1-4)**

Individual research study in a selected subject area of family and consumer sciences. Maximum of 4 credits per semester and a total of 8 credits. May be repeated up to 8 credits. Consent of Instructor required.

Prerequisite(s): Junior or Senior standing.

Learning Outcomes

1. Develop specialized knowledge and competencies in a selected nutrition and dietetics subject area.

NUTR 5110. Graduate Studies in Advanced Nutrition**3 Credits (3)**

Covers biochemistry and physiology applied to nutrition. Students enrolled in the 5000-level class will be required to complete additional assignments beyond what is required for NUTR 4110. Crosslisted with: NUTR 4110.

Prerequisite(s)/Corequisite(s): NUTR 3110. Student must be classified as a Graduate student to enroll in this course, BIOL 2221, BCHE 341, and NUTR 2110, or consent of instructor.

Learning Outcomes

1. Describe the processes of digestion and absorption within the human body.
2. Compare and contrast the structure and function of key nutrients.
3. Describe the metabolism of key nutrients under various conditions.
4. Apply concepts of energy and nutrient metabolism to common medical conditions and other relevant situations such as exercise or fasting.

NUTR 5150. Orientation to Dietetic Internship**3 Credits (3)**

Dietetic interns prepare for supervised practice rotations. Topics include professionalism, Code of Ethics, and dietetic internship portfolios. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. Assembly of dietetic intern portfolio that will be kept throughout dietetic internship.
2. Readiness to begin supervised practice rotations.
3. Understanding of steps and processes to successfully complete requirements of dietetic internship and Masters of Science in Family Consumer Sciences.
4. Upon completion of the course, students will be able to understand the importance of evidence-based information, research ethics, the Code of Ethics of the Profession of Dietetics, and the basic structure of an IRB proposal.

NUTR 5210. Graduate Study in Community Nutrition**3 Credits (3)**

Overview on the practice of community nutrition to include program planning, needs assessment, program implementation and program evaluation. Role of public and private agencies in nutrition programs that impact on nutrition of individuals and groups in the community. Students enrolled in the 5000-level class will be required to complete additional assignments beyond what is required for NUTR 4110. May be repeated up to 3 credits. Crosslisted with: NUTR 4210.

Prerequisite(s): Graduate student, NUTR 3110, NUTR 3710, NUTR 3750, or consent of the instructor.

Learning Outcomes

1. Summarize the components of current national and local community nutrition programs.
2. Explain how national or state-level policy influences a community nutrition issue.
3. Write a needs assessment for a community nutrition issue using reliable sources of community nutrition information and data, and relevant research.
4. Develop goals and objectives of a nutrition program that address a community nutrition issue.
5. Develop a culturally appropriate nutrition education lesson plan that addresses a specific nutrition program objective.

NUTR 5220. Graduate Studies in Food Service Organization and Management**3 Credits (3)**

Personnel, financial and general management in institutional and commercial food service operations. Students enrolled in the 5000-level class will be required to complete additional assignments beyond what is required for NUTR 4220. May be repeated up to 3 credits.

Prerequisite(s): Graduate Students; HRTM 2120, NUTR 3120, or consent of instructor.

Learning Outcomes

1. Evaluate food products and menu plans through the application of food service management theories and principles.
2. Describe the process of and ethical considerations surrounding purchasing, receiving, storing, and controlling inventory of a given food item.
3. Evaluate food system, food safety practices, and management practices of a specific food service establishment.
4. Apply management theories and principles to quality assurance and human resource case scenarios.
5. Evaluate a nutrition and food service budget and interpret financial data.

NUTR 5230. Graduate Studies in Medical Nutrition I**3 Credits (3)**

Special diets and physiological basis for their use. Laws and regulations concerning the practice of dietetics. Additional assignments beyond NUTR 4230 required. May be repeated up to 3 credits. Crosslisted with: NUTR 4230.

Prerequisite(s): Graduate student, NUTR 3110, NUTR 4110, BIOL 2225 or BIOL 2221, or consent of instructor.

Learning Outcomes

1. Examine the role of medical nutritional therapy in disease processes.
2. Apply nutritional assessment techniques utilizing the Nutrition Care Process.
3. Compose nutrition care plans and utilize various styles of medical charting.
4. Describe the interdisciplinary nature of working with a health care team in the delivery of medical nutritional therapy.

NUTR 5233. Graduate Studies in Nutrition Counseling & Education**3 Credits (3)**

This course is designed to meet the needs of individuals entering the healthcare/dietetics field who have little counseling experience, but have a strong foundational knowledge in the field of dietetics. It includes counseling techniques and strategies, behavior change, interviewing, cultural competence, mass media, and nutrition education. Additional assignments beyond NUTR 4233 required. May be repeated up to 3 credits. Crosslisted with: HNDS 4233.

Prerequisite(s)/Corequisite(s): NUTR 5230. Students must be classified as a Graduate student to enroll in this course, NUTR 2110, NUTR 3110, FCSC 348.

Learning Outcomes

1. Evaluate nutrition counseling strategies and tools in promoting behavior change and self-management.
2. Apply behavior change theories and models to nutrition counseling sessions.
3. Develop nutrition care plans for nutrition counseling clients.
4. Analyze professionalism and ethics within nutrition counseling and education.
5. Develop and present a nutrition education lesson based on current nutrition research.

NUTR 5240. Graduate Studies in Medical Nutrition Therapy II**3 Credits (3)**

Continuation of HNDS 546. May be repeated up to 3 credits. Crosslisted with: NUTR 4240.

Prerequisite(s): Graduate student, NUTR 5230 and NUTR 4230L or consent of instructor.

Learning Outcomes

1. Select appropriate medical nutrition therapy interventions for various disease processes.
2. Master nutrition assessment of patients/clients utilizing the Nutrition Care Process model.
3. Interpret medical terminology in patient chart notes and medical history records.
4. Evaluate laws regulations concerning dietetics.

NUTR 5610. Dietetic Intern Seminar**1 Credit (1)**

Portfolio development for dietetic interns during supervised practice rotations. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. CRDN 2: Apply evidence-based guidelines, systematic reviews and scientific literature.
2. CRDN 3: Justify programs, products, services and care using appropriate evidence or data.
3. CRDN 4: Evaluate emerging research for application in nutrition and dietetics practice.
4. CRDN 6: Incorporate critical-thinking skills in overall practice.
5. CRDN 1: Practice in compliance with current federal regulations and state statutes and rules, as applicable and in accordance with accreditation standards and the Scope of Nutrition and Dietetics Practice and Code of Ethics for the Profession of Nutrition and Dietetics.
6. CRDN 2: Demonstrate professional writing skills in preparing professional communications.

NUTR 5620. Dietetic Internship: Supervised Practice in Community Nutrition**1-8 Credits (2-6P)**

Provides dietetic interns with a minimum of 500 clock hours of supervised practice in community nutrition to include an emphasis in Cooperative Extension Service. Dietetic interns work under the the guidance of faculty and community nutrition professionals. May be repeated up to 8 credits. Consent of Instructor required. Restricted to: HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. CRDN 1 Select indicators of program quality and/or customer service and measure achievement of objectives.
2. CRDN 2 Apply evidence-based guidelines, systematic reviews and scientific literature.
3. CRDN 4 Evaluate emerging research for application in nutrition and dietetics practice.
4. CRDN 5 Conduct projects using appropriate research methods, ethical procedures and data analysis.
5. CRDN 14 Demonstrate advocacy on local, state or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession.
6. CRDN 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
7. CRDN 5 Develop nutrition education materials that are culturally and age appropriate and designed for the literacy level of the audience.
8. CES Consult with organizations regarding food access for target populations.
9. CES Evaluate the operation of Cooperative Extension Service nutrition programs in the areas of policies and procedures.
10. 1 CES Develop and deliver nutrition presentations to client/consumer audiences on various topics related to client/consumer needs.
11. 1 CES Ensure cultural relevancy and appropriateness of nutrition education.
12. 1 CES Assess educational needs and provide nutrition counseling based on individual needs, knowledge, medical needs, and socioeconomic status.

NUTR 5630. Community Nutrition for Dietetic Interns**3 Credits (3)**

Advanced topics in community nutrition to include conducting community nutrition needs assessments, program planning and grant writing. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. CRDN 1 Select indicators of program quality and/or customer service and measure achievement of objectives.
2. CRDN 2 Apply evidence-based guidelines, systematic reviews and scientific literature.
3. CRDN 4 Evaluate emerging research for application in nutrition and dietetics practice.
4. CRDN 5 Conduct projects using appropriate research methods, ethical procedures and data analysis.
5. CRDN 14 Demonstrate advocacy on local, state or national legislative and regulatory issues or policies impacting the nutrition and dietetics profession.
6. CRDN 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
7. CRDN 5 Develop nutrition education materials that are culturally and age appropriate and designed for the literacy level of the audience.
8. CES Consult with organizations regarding food access for target populations.
9. CES Ensure cultural relevancy and appropriateness of nutrition education.

NUTR 5640. DI SUP PRACT FS MGT**1-5 Credits (2-10P)**

Provides dietetic interns with a minimum of 300 clock hours of supervised practice in foodservice management. Dietetic interns work under the guidance of faculty and foodservice management professionals. Students must complete a total of 4 credit hours of NUTR 5640. May be repeated up to 5 credits. Consent of Instructor required. Restricted to: HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

NUTR 5650. Foodservice Management for Dietetic Interns**3 Credits (3)**

Advanced topics in foodservice systems management to include business planning and marketing. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. CRDN 2: Demonstrate professional writing skills in preparing professional communications.
2. CRDN 15: Practice and/or role play mentoring and precepting others.
3. CRDN 4: Design, implement and evaluate presentations to target audiences.
4. CRDN 3: Demonstrate active participation, teamwork and contributions in group setting.
5. CRDN 7: Apply leadership skills to achieve desired outcomes.
6. CRDN 8: Demonstrate negotiation skills.
7. CRDN 4: Apply current informatics technology to develop, store, retrieve and disseminate information and data.
8. CRDN 6: Analyze quality, financial and productivity data for use in planning.
9. CRDN 7: Conduct feasibility studies for products, programs, or services with consideration of costs and benefits.
10. 1 CRDN 8: Develop a plan to provide or develop a product, program, or service that includes a budget, staffing needs, equipment and supplies.

NUTR 5660. Dietetic Internship: Supervised Practice in Clinical Dietetics**1-8 Credits (2-16P)**

Provides dietetic interns with a minimum of 500 clock hours of supervised practice in clinical dietetics. Dietetic interns work under the guidance of faculty and dietetics professionals. May be repeated up to 8 credits. Consent of Instructor required. Restricted to: HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. CRDN 1 Select indicators of program quality and/or customer service and measure achievement of objectives.
2. CRDN 4 Function as a member of interprofessional teams.
3. CRDN 11 Show cultural competence/sensitivity in interactions with clients, colleagues and staff.
4. CRDN 1 Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
5. CRDN 2 Conduct nutrition focused physical exams.
6. CRDN 3 Demonstrate effective communication skills for clinical and customer services in a variety of formats

NUTR 5670. Nutrition Care Process for Dietetic Interns**3 Credits (3)**

Advanced topics in nutrition care process and model to include medical nutrition therapy and evidence-based research and outcomes assessment in clinical dietetics. Consent of Instructor required.

Prerequisite(s): Acceptance into Dietetic Internship. Restricted to: HNDS majors.

Learning Outcomes

1. CRDN 2: Apply evidence-based guidelines, systematic reviews and scientific literature.
2. CRDN 3: Justify programs, products, services and care using appropriate evidence or data.
3. CRDN 4: Evaluate emerging research for application in nutrition and diet.
4. CRDN 4 Evaluate emerging research for application in dietetics practice.
5. CRDN 2 Demonstrate professional writing skills in preparing professional communication. Perform the nutrition care process and use standardized nutrition language for individuals, groups, and populations of differing ages and health status, in a variety of settings.
6. CRND 2 Conduct nutrition focused physical exams.

NUTR 5680. Review Course for National RD Exam**3 Credits (3)**

Completion of dietetic internship portfolio and preparation for the national registration examination for dietitians. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: exclude HNDS majors.

Prerequisite(s): Acceptance into Dietetic Internship.

Learning Outcomes

1. Demonstrate readiness to take the National Registration Examination for Dietitians.
2. Completion of all requirements of the NMSU Dietetic Internship.
3. Completion of all requirements to receive a Master of Science in Family Consumer Sciences from New Mexico State University

NUTR 5991. Special Research Programs**1-4 Credits (1-4)**

Individual investigations either analytical or experimental. Maximum of 4 credits per semester and no more than 6 credits toward a degree. May be repeated up to 6 credits.

Prerequisite(s): Graduate Student.

Learning Outcomes

1. Develop analytical or experimental research skills in the areas of human nutrition and dietetics.

NUTR 5996. Special Topics**1-4 Credits (1-4)**

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

Prerequisite(s): Graduate student.

Learning Outcomes

1. Evaluate issues surrounding advanced nutrition and dietetics topics.

OATS-OFFICE ADMINISTRATION TECHNOLOGY SYSTEMS

OATS 101. Keyboarding Basics**3 Credits (2+2P)**

Covers the skills necessary to touch type on the computer keyboard using correct techniques. This includes the development of speed, accuracy, and formatting of basic business documents. May be repeated up to 3 credits. Restricted to Community Colleges campuses

Learning Outcomes

1. Demonstrate the correct operation of the alphabetic, numeric, symbol keys, space bar, shift keys, and return (enter) keys.
2. Have a thorough knowledge of correct hand position and posture for accurate keyboarding.
3. Keyboard words, sentences, and paragraphs smoothly, quickly, and accurately using the touch typing method.
4. Have the ability to keyboard with speed and accuracy.
5. Perform keyboarding and basic formatting functions to create professional business documents.

OATS 102. Keyboarding: Document Formatting**3 Credits (2+2P)**

Designed to improve keyboarding speed and accuracy; introduce formats of letters, tables and reports. A speed and accuracy competency requirement must be met.

Prerequisite: OATS 101 or consent of instructor.

OATS 105. Business English**3 Credits (3)**

Training and application of the fundamentals of basic grammar, capitalization, punctuation, basic writing, sentence structure, and editing skills. May be repeated up to 3 credits. Restricted to Community Colleges campuses

Learning Outcomes

1. Identify and apply the rules for each of the parts of speech.
2. Construct four basic sentence patterns.
3. Apply punctuation, capitalization and numbers style to writing proficiently.
4. Utilize proofreader's marks in the editing of business correspondence.
5. Make use of appropriate reference materials to locate answers to language questions.

OATS 106. Business Mathematics**3 Credits (2+2P)**

Mathematical applications for business. May be repeated up to 3 credits. Restricted to Community Colleges campuses

Prerequisite(s): CCDM 103 N or adequate score on math placement exam.

Learning Outcomes

1. Apply fundamental concepts to personal and business math operations.
2. Maintain a checkbook.
3. Solve percent and percentage applications.
4. Calculate discounts, markups, and markdowns.
5. Calculate wages, salaries, deductions, and net pay.
6. Compare various borrowing options and identify the most cost effective option.
7. Interpret consumer loans and credit card accounts.
8. Compare various home ownership options.
9. Calculate taxes and identify insurance options.

OATS 110. Records Management**3 Credits (3)**

Principles, methods and procedures for the selection, operation and control of manual and automated records systems.

OATS 120. Accounting Procedures I**3 Credits (2+2P)**

Business accounting principles and procedures. Use of special journals, cash control, and merchandising concepts. Reports for sole proprietorships.

OATS 121. Accounting Procedures II**3 Credits (2+2P)**

Continuation of OATS 120, emphasizing accounting principles and procedures for notes and interest, depreciation, partnerships and corporations, cash flow and financial statement analysis. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): OATS 120 or ACCT 2110.

OATS 140. Payroll Accounting**3 Credits (2+2P)**

Payroll procedures including payroll tax forms and deposits. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): ACCT 2110 or OATS 120.

OATS 150. Medical Terminology**3 Credits (3)**

Understanding of the basic elements of medical words. Use of medical abbreviations. Same as NURS 150 and OEHO 120. May be repeated up to 3 credits. Crosslisted with: NURS 150, AHS 120 and HIT 150. Restricted to Community Colleges campuses only.

OATS 169. Spanish Grammar for Business Administration**3 Credits (3)**

Introductory course in Spanish grammar and practical business terms required for the proper application of fundamental oral and written business communication skills for Spanish speakers in the field of business administration. Restricted to Community Colleges campuses only.

Prerequisite(s): Spanish-speaking ability and computer keyboarding ability.

OATS 170. Office Communications in Spanish I**3 Credits (3)**

Develop oral and written communications skills of native or near-native speakers of Spanish. The student will learn basic letter writing skills, customer service techniques, and telephone etiquette in Spanish. Spanish speaking ability is required to enroll in this course. May be repeated up to 3 credits. Consent of Instructor required. Restricted to Community Colleges campuses

OATS 171. Office Communications in Spanish II**3 Credits (3)**

Develop oral and written communications skills of native or near-native speakers of Spanish. Emphasis placed on learning the office assistant's role within the office environment. Compose complex business correspondence and learn to make international travel arrangements. May be repeated up to 3 credits. Consent of Instructor required. Restricted to Community Colleges campuses

Prerequisite(s): OATS 170, Spanish speaking ability.

OATS 191. Taking Minutes & Proofreading**3 Credits (3)**

Preparation and practice producing minutes suited for different meeting types and purposes. Provides strategies to prepare for meetings, to record proceedings, and to transcribe minutes while incorporating proofreading skills practice. Topics include legal requirements, meeting types, minute formats, and duties/expectations of the minute taker and the meeting chair. Graded: S/U. May be repeated up to 3 credits. Restricted to Community Colleges campuses

OATS 202. Keyboarding Document Production**3 Credits (2+2P)**

Further development of keyboarding speed and accuracy. Production of complex letters, memos, tables, reports and business forms. A speed and accuracy competency requirement must be met. Restricted to Community Colleges campuses

OATS 203. Office Equipment and Procedures I**3 Credits (2+2P)**

Office organization, telephone techniques, equipment and supplies, handling meetings, human relations, mail procedures, and travel. May be repeated up to 3 credits. Restricted to Community Colleges campuses

OATS 205. Accounting Software I**3 Credits (2+2P)**

Introduction to accounting software. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): Working knowledge of computers and accounting or consent of instructor.

OATS 206. Accounting Software II**3 Credits (2+2P)**

Accounting software and office applications. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): OATS 121 or OATS 215.

OATS 207. Machine Transcription**3 Credits (2+2P)**

Creating office documents using transcribing equipment and word processing software. Emphasis on proofreading, editing and grammar. May be repeated up to 3 credits. Restricted to Community Colleges campuses

Prerequisite(s): BOT 105.

OATS 208. Medical Office Procedures**3 Credits (2+2P)**

Current computerized and traditional administrative medical office procedures will be introduced. Practical knowledge on managing required record keeping in a medical office environment will be emphasized. May be repeated up to 3 credits. Restricted to Community Colleges campuses

Prerequisite(s): HIT 150 or AHS 120, and computer keyboarding ability or consent of instructor.

OATS 209. Business and Technical Communications**3 Credits (3)**

Effective written communication skills and techniques for career success in the work place. Composition of letters, memos, short reports, forms, and proposals, and technical descriptions and directions.

Prerequisites: ENGL 1110G and computer keyboarding ability or consent of instructor.

OATS 211. Information Processing I**3 Credits (2+2P)**

Defining and applying fundamental information processing concepts and techniques using the current version of leading software. May be repeated up to 6 credits. Restricted to Community Colleges campuses

OATS 213. Word Processing I**3 Credits (2+2P)**

Operation and function of a word processor. Specific equipment to be announced in the Schedule of Classes.

Prerequisite: OATS 101 or keyboarding proficiency.

OATS 214. Word Processing II**3 Credits (2+2P)**

Advanced operation and functions of a word processor. Specific equipment to be announced in the Schedule of Classes.

Prerequisite: OATS 213 or consent of instructor.

OATS 215. Spreadsheet Applications**1-3 Credits**

Use of spreadsheets to include graphics and business applications. Same as OECS 215. May be repeated under different subtitles listed in the Schedule of Classes.

OATS 217. Powerpoint Presentation**3 Credits (3)**

Comprehensive, hands-on approach to learning and applying basic and advanced features of PowerPoint. These include text enhancements, objects, fills, colors, animation, charts, sound, video, and hyperlinks. Students demonstrate appropriate audience and communication tools to deliver presentations.

Prerequisites: OATS 211 or ability to demonstrate keyboarding and Windows proficiency.

OATS 218. Information Processing II**3 Credits (2+2P)**

Advanced information processing techniques using current version of leading software. May be repeated for a maximum of 6 credits.

Prerequisite: OATS 211 or consent of instructor.

OATS 220. Internship in Business Office Technology**2 Credits (2)**

Experience in a supervised office position. Student must work at least eight hours per week. May be repeated for a maximum of 4 credits.

Prerequisites: sophomore standing and consent of instructor.

OATS 221. Internship I**1-3 Credits**

Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. C- or better in the course is required. Consent of Instructor required. Restricted to: BOT, HIT. majors. Restricted to Community Colleges campuses

OATS 222. Internship II**1-3 Credits**

Continuation of OATS 221. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: OATS & HIT majors. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

Prerequisite(s): OATS 221 and consent of instructor.

OATS 223. Medical Transcription I**3 Credits (2+2P)**

Concepts in medical transcription are introduced on how to produce a variety of reports required in a medical office or facility utilizing accurate medical terminology, spelling, grammar, and document formatting. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): HIT 150 or AHS 120 and HIT 158 and OATS 209.

OATS 228. Medical Insurance Billing**3 Credits (2+2P)**

Comprehensive overview of the insurance concepts and applications required for successfully and accurately completing and submitting insurance claims and reimbursement processes for various insurance carriers, both private and government, will be emphasized. May be repeated up to 3 credits. Restricted to Community Colleges campuses

Prerequisite(s): HIT 150 or AHS 120.

OATS 233. Advanced Medical Transcription**3 Credits (2+2P)**

Builds upon the concepts introduced in Medical Transcription I providing greater understanding of how to produce advanced reports dictated by physicians with increasing speed and accuracy. Emphasis will be on proofreading and editing of operative reports, patient history and physicals, office notes, labor and delivery reports, consultation reports, discharge summaries, and other medical reports. May be repeated up to 3 credits. Consent of Instructor required. Restricted to Community Colleges campuses only.

Prerequisite(s): OATS 223 and HIT 130.

OATS 239. Personal Development**3 Credits (3)**

Development of a marketable, employable office systems person, to include interview, voice, manners, and apparel.

OATS 240. Introduction to Individual Taxation**3 Credits (3)**

Overview of Individual Federal Taxation; awareness of tax problems pitfalls and planning opportunities; focus on individual personal financial concerns and tax planning. One semester of accounting principles/procedures is recommended.

OATS 241. Auditing and Business Issues**3 Credits (3)**

Introduction to basic auditing concepts, the purpose for the auditing process, and requirements of persons assisting with the audit process. The course will also deal with issues of business law including contracts, sales, torts, strict liability, and business ethics. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): OATS 120 or ACCT 2110.

OATS 244. Tax Preparation**3 Credits (3)**

Introduces basic federal and state tax codes for preparing individual income tax returns. Emphasis on use of tax software.

Prerequisite: keyboarding proficiency.

OATS 250. Electronic Office Systems**3 Credits (2+2P)**

Management of the electronic office. Office use of computers, printers, fax machines, copiers, and scanner concepts will be covered.

Prerequisite: OATS 211.

OATS 255. Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes.

OATS 260. Bookkeeping Simulation Capstone**3 Credits (2+2P)**

Refines the professional and technical skills students have learned while completing the Bookkeeping Assistant Option curriculum by demonstrating how coursework ties together. Designed as a bookkeeping assistant capstone course.

Prerequisite(s): OATS 121 or ACCT 2110, OATS 140, OATS 205, and OATS 244, or consent of instructor.

OATS 270. Office Administration Technology Capstone**3 Credits (2+2P)**

Refines professional skills learned in the BOT program and ties all BOT coursework together. May be repeated up to 3 credits. Consent of Instructor required. Restricted to Community Colleges campuses

Prerequisite(s): OATS 102 or OATS 129; and OATS 120; and OAT S 209 or ENGL 2210G; and OATS 211 or OECS 211.

Learning Outcomes

1. Construct professional, error-free business documents that demonstrate appropriate formats and ideas in clear, concise, and correct written and spoken language.
2. Utilize effective administration skills to enhance the productive operation of the workplace.
3. Demonstrate professional behaviors and workplace ethics for the professional office environment.
4. Demonstrate proficiency in the use of productivity software in business applications

OEBM-BIOMEDICAL TECHNOLOGY

OEBM 140. Applied Human Biology for Biomedical Technology**3 Credits (3)**

Essential human biology, anatomy, physiology and medical terminology for biomedical equipment technicians. Focus on the vocabulary necessary for effective communication in the hospital environment as part of the health care team. Restricted to: Community Colleges only.

OEBM 141. Medical Electronics and Safety in Healthcare**3 Credits (3)**

Introduction to the biomedical equipment technology field. Operation of common biomedical equipment to include pressure and temperature systems, infusion devices, patient monitors, and other physiologic and patient systems. Hospital safety and health regulations explained. Restricted to Community Colleges campuses only.

Prerequisite(s): OEBM 140.

OEBM 200. Biomedical Internship**1-4 Credits (3-12P)**

Practice working in industry as a biomedical electronics technologist. Students work on a variety of medical equipment and job tasks. An employer evaluation, student report, and a minimum of 100 work hours are required. May be repeated up to 8 credits. Consent of Instructor required. Restricted to Community Colleges campuses only.

Prerequisite(s): OEBM 140 and OEBM 141.

OEBM 211. CBET Exam Preparation**1 Credit (1)**

An overview of the Certified Biomedical Equipment Technician exam. Topics include anatomy and physiology, electronics principles, safety issues, equipment operation, and equipment troubleshooting.

Prerequisite(s)/Corequisite(s): OEBM 241 AND OEBM 240. Restricted to Community Colleges campuses only.

OEBM 240. Medical Imaging Systems**3 Credits (3)**

The fundamentals of diagnostic radiography equipment will be explored. Principles of an x-ray system will be explained including the x-ray generation, image formation and film processing. Focus will be on both safety and quality. Restricted to Community Colleges campuses only.

Prerequisite(s): OEBM 140.

OEBM 241. Advanced Medical Electronics**3 Credits (3+1P)**

Advanced study in biomedical equipment to include cardiovascular, pulmonary, telemetry and other critical life support systems. Restricted to Community Colleges campuses only.

Prerequisite(s): OEBM 141.

OECS-COMPUTER TECHNOLOGY

OECS 101. Computer Basics**1 Credit (1)**

Hands-on instruction to introduce computer use and commonly used software. Graded S/U.

OECS 105. Introduction to Information Technology**3 Credits (3)**

Examination of information systems and their impact on commerce, education, and personal activities. Utilization of productivity tools for communication, data analysis, information management and decision-making. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

OECS 110. Introduction to Power Point**1-3 Credits (1-3)**

An introduction to Power Point software to develop business presentations. Includes concepts of basic presentation methods and graphic design principles. Students will create and deliver presentations using text, charts, digitized images, and sound. Restricted to Community Colleges campuses only.

OECS 125. Operating Systems**1-3 Credits**

Installation, configuration and optimization of current operating systems. Restricted to: Community Colleges only.

OECS 128. Operating Systems Linux/Unix**3 Credits (3)**

Installation, configuration, and use of Linux/Unix operating system software and utilities including hardware management, file management, use of command line, and scripting. Restricted to: Community Colleges only.

OECS 140. Introduction to Game Production Industry**1-3 Credits (1-3)**

Students explore the business behind game production, understanding how game companies are organized and funded, positions within the game industry, and what skills game producers need. Restricted to Community Colleges campuses only.

OECS 141. Introduction to Interactive Game Programming**1-3 Credits (1-3)**

This introductory programming class reviews the basics of programming, including the object-oriented approach. Students will de-construct existing games, develop their own code, and gain an appreciation for coding strategies. May be repeated for a maximum of 6 credits. Restricted to Community Colleges campuses only.

OECS 145. Mobile Application Development**1-3 Credits (1-3)**

Introduction to elements of mobile application coding including concepts, design strategies, tools needed to create, test and deploy applications for mobile devices. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

OECS 155. Special Topics - Introductory Computer Technology**0.5-4 Credits (.5-4)**

Topics to be announced in the Schedule of Classes. May be repeated up to 8 credits.

OECS 185. PC Maintenance and Repair I**1-3 Credits**

Introduction to most common types of PC configurations, installations, and failures. This course will explore troubleshooting skills for maintaining and repairing common hardware and software related problems. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

OECS 192. C++ Programming I**3 Credits (3)**

Development of skills in programming using the C++ programming language. Restricted to: Community Colleges only.

OECS 195. Java Programming I**1-3 Credits**

Developing of skills in programming using the Java programming language. Restricted to: Community Colleges only.

OECS 200. Accounting on Microcomputers**3 Credits (3)**

Fundamental accounting principles using popular microcomputer software to include G/L, A/R, A/P, purchase order, billing, inventory, and forecasting modules.

Prerequisite: ACCT 2110 or OATS 121.

OECS 204. Linux Operating System**1-3 Credits**

Install and configure the Linux operating system on X86 systems. Covers issues involved in maintaining operating system, networking, creating and managing users, and installing and updating software. General procedures for working with operating system includes maintaining disk space, preserving system security, and other related topics. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

OECS 205. Advanced Operating Systems: Administration**3 Credits (3)**

Examines operating systems designed for PC, minicomputers and mainframes. Covers maintaining operating systems, creating and managing users, and installing and updating software. General procedures for working with operating systems will include maintaining disk space, preserving system security, providing mail services, among other topics. May be repeated for a maximum of 6 credits.

Prerequisite: OECS 128.

OECS 207. Windows**0.5-3 Credits**

Covers local installation, configuration of core local services, managing users, and the general local management and maintenance of Windows workstations. May be repeated up to 6 credits.

Prerequisite(s)/Corequisite(s): OECS 185. Restricted to Community Colleges campuses only.

OECS 208. Internet Applications**1-3 Credits**

Survey of the Internet to include e-mail, file transfer, current search techniques, the World Wide Web and basic Web page development. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

OECS 209. Computer Graphic Arts**1-3 Credits**

Basic graphics composition using computer programs to include editing and manipulating graphic images, clip-art, and printing of pictures. May be repeated for a maximum of 6 credits under different subtitles listed in the Schedule of Classes.

Prerequisite: OECS 105, BCIS 1110, or OECS 101.

OECS 211. Word Processing Applications**1-3 Credits**

Basic word processing to include composing, editing, formatting, and printing of documents. May be repeated under different subtitles listed in the Schedule of Classes for a maximum of 6 credits.

Prerequisites: BCIS 1110 or OECS 105.

OECS 215. Spreadsheet Applications**1-3 Credits**

Use of spreadsheets to include graphics and business applications. May be repeated for a maximum of 6 credits.

Prerequisites: BCIS 1110 or OECS 105.

OECS 220. Database Application and Design**1-3 Credits**

Creating, sorting, and searching of single and multifile databases to include report generation and programming database commands. May be repeated for a maximum of 6 credits under different subtitles listed in the Schedule of Classes. Restricted to: Community Colleges only.

Prerequisite(s): BCIS 1110 OR E T 120 OR E T 122 OR OECS 105.

OECS 221. Internship I**1-3 Credits**

Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships may be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OECS majors. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

Prerequisite(s): Consent of instructor.

OECS 222. Internship II**1-3 Credits**

Continuation of OECS 221. Each credit requires specified number of hours of on-the-job work experience. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OECS majors. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

Prerequisite(s): OECS 221 and consent of instructor.

OECS 223. Web Design for Business**3 Credits (3)**

Design and create a website using HTML, CSS, web development tools and industry-recognized software while applying best practices in site management and business web presence.

Learning Outcomes

1. Students will identify and apply best practices for web design in a business setting. Students will create a basic web page utilizing WC3 principles. Students will explain the importance and impact of web presence in today's business environment. Students will determine and utilize web page features and techniques for a specific business. Students will create a web design management plan for business. Students will discuss web page tools for performance and web traffic analytics. Students will identify web design components for a motble society.

OECS 227. Computer Applications for Technicians**3 Credits (3)**

Computer applications for service technicians in various disciplines. Hardware and software applications explored. Includes operating systems, high level programming, and networking hardware and software.

OECS 230. Data Communications and Networks I**1-3 Credits**

Definition of data communication; survey of hardware applications and teleprocessor software; examination and design of networks. May be repeated for a maximum of 6 credits.

Prerequisite: OECS 185.

OECS 231. Data Communications and Networks II**1-3 Credits**

Installation and application of popular microcomputer network software. May be repeated for a maximum of 6 credits.

Prerequisite: OECS 230.

OECS 234. Linux Server**3-4 Credits (3-4)**

This course addresses the implementation and support needs of IT professionals that are planning to deploy and support Linux Server(s). It provides in-depth, hands-on training for planning, implementation, management and support of Linux networking services. May be repeated up to 8 credits.

Prerequisite(s)/Corequisite(s): OECS 204. Restricted to: OECS majors. Restricted to Community Colleges campuses only.

OECS 235. Structured Query Language (SQL)**1-3 Credits**

Installation, configuration, administration, and troubleshooting of SQL client/server database management system. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): OECS 220. Restricted to Community Colleges campuses only.

OECS 237. Windows Server**3-4 Credits (3-4)**

This course addresses the implementation and support needs of IT professionals that are planning to deploy and support Microsoft Windows Server Active Directory Domain Services in medium to large businesses. It provides in-depth, hands-on training for Information Technology (IT) professionals responsible for the planning, implementation, management, and support of Windows Active Directory services. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): OECS 207. Restricted to Community Colleges campuses only.

OECS 245. Game Programming I**3 Credits (3)**

Development of programming skills for games and animation using current programming languages and tools. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

OECS 246. Game Programming II**3 Credits (3)**

Continuation of OECS 245. May be repeated for a maximum of 6 credits.

Prerequisite: OECS 245.

OECS 250. Systems Analysis and Design I**3 Credits (3)**

Analysis, configuration, design and testing of organizations' work flow as it relates to hardware, software, data, procedures and personnel. Systems Life Cycle approach matching end users' needs to feasible financial, technical and operational solutions. Restricted to Community Colleges campuses only.

Prerequisite(s): OECS 220.

OECS 253. Applied Data Analysis and Management**3 Credits (3)**

Applied use of advanced spreadsheet tools for data analysis and database tools for data and information management. Connect emerging topics in business to tools used in analyzing data and making raw data useful for business decision making.

Prerequisite: BCIS 1110.

Learning Outcomes

1. Manage, integrate, and analyze data with data tools. Generate and summarize data. Use tools for business projections, comparisons, trends, and informed decisions. Create advanced queries and enhance table design. Use form tools and create custom forms. Use automation tools for efficiency. Secure and maintain data. Plan, research, create, and revise spreadsheets and databases for a specific business application. Discuss emerging topics in business related to data analysis and management.

OECS 255. Special Topics**1-4 Credits**

Topics to be announced in the Schedule of Classes.

OECS 261. Introduction to Networks**3-4 Credits (3-4)**

Introduction to networking principles including the practical and conceptual skills for understanding basic networking, planning and designing networks, implementing IP addressing schemes, examining the OSI and TCP/IP layers, and performing basic configurations for routers and switches. Aligns to the first course of the Cisco Networking Academy CCNA curriculum. Restricted to Community Colleges campuses only.

OECS 262. Essentials of Routing and Switching**3-4 Credits (3-4)**

Examination of the architecture, components, and operations of routers and switches in a small network. Student will learn how to configure, verify and troubleshoot: routers and switches, static routing, default routing, VLANs, and ACLs. Aligns to the second course of the Cisco Networking Academy CCNA curriculum. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): OECS 261. Restricted to Community Colleges campuses only.

OECS 263. Network Fundamentals**3-4 Credits (3-4)**

Fundamentals of networking architecture, components, and operations including practical and conceptual skills using routers and switches. Student will learn how to configure, verify and troubleshoot static routing, default routing, VLANs, and ACLs. This course aligns to the third course of the Cisco Networking Academy CCNA curriculum. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): OECS 262. Restricted to Community Colleges campuses only.

OECS 264. Network Routing Protocols**3-4 Credits (3-4)**

Fundamentals of routing protocols for troubleshooting advanced network operations. Covers common networking issues such as RIP, OSPF, and EIGRP for IPv4 and IPv6 networks. This course aligns to the fourth course of the Cisco Networking Academy CCNA curriculum. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): OECS 263. Restricted to Community Colleges campuses only.

OECS 269. Network Security**3-4 Credits (3-4)**

Fundamentals of design and implementation of network security solutions that will reduce the risk of system vulnerability. May be repeated up to 8 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): OECS 204 or OECS 207 or OECS 261 or consent of instructor.

OECS 275. PC Maintenance and Repair II**1-3 Credits**

Continuation of OECS 185. May be repeated up to 6 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): OECS 185.

OECS 280. Desktop Publishing I**3 Credits (3)**

Design and production of publication materials to fill the needs of business communities, using a microcomputer. May be repeated for a maximum of 6 credits. Same as OATS 280.

Prerequisites: either BCIS 1110, OECS 105.

OECS 290. Computer Technology Capstone**1-3 Credits**

Refines skills learned in the OECS program. Culminates in a review and practice of advanced software applications. May be repeated up to 3 credits. Restricted to: OECS & OECT majors. Restricted to Community Colleges campuses only.

Prerequisite(s): (OECS 125, OECS 128, OECS 207, OR OECS 203) AND (OECS 185 OR E T 283).

OECS 299. Independent Study**1-3 Credits**

Specific subjects to be determined based on need. Restricted to: Community Colleges only.

OEEM- PARAMEDIC

OEEM 101. CPR for the Health Care Professional**1 Credit (1)**

Students learn identification and response to airway and circulation emergencies, including use of a SAED and accessing the EMS system. This course is taught using the American Heart Association guidelines for course completion. Required: grade of C or better.

OEEM 103. Heartsaver First Aid/CPR**1 Credit (1)**

Students learn how to identify and respond to airway, circulation and basic first aid emergencies, to include using a SAED and accessing the EMS system. This course is intended for students who are not Allied Health Majors and utilizes the American Heart Association guidelines for course completion. Restricted to: Community Colleges only.

OEEM 115. First Responder Prehospital Professional**3 Credits (2+3P)**

Provides training in prehospital medical and traumatic emergencies. Consent of instructor required. Requires a C or better to pass. Restricted to majors.

Corequisite(s): OEEM 101.

OEEM 120. Emergency Medical Technician Basic**6 Credits (6)**

EMT-Basic skills to include care of soft tissue and muscular/skeletal injuries, circulatory, nervous, general medical and respiratory emergencies.

Requires a "C" or better to pass. May be repeated up to 6 credits. Consent of Instructor required.

Corequisite(s): OEEM 101, OEEM 120L, OEEM 121.

Prerequisite(s)/Corequisite(s): OEEM 153. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

OEEM 120 L. Emergency Medical Technician Basic Lab**2 Credits (6P)**

EMT-Basic skills development with emphasis on assessment, skills competency and team-work in patient care in the prehospital setting. May be repeated up to 2 credits.

Corequisite(s): OEEM 101, OEEM 120, OEEM 121.

Prerequisite(s)/Corequisite(s): OEEM 153. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

OEEM 121. Emergency Medical Technician Basic Field/Clinical**1 Credit (3P)**

Covers the patient care experience provided through assigned shifts in the hospital and/or ambulance setting. Requires a "C" or better to pass. May be repeated up to 1 credits. Consent of Instructor required.

Prerequisite(s)/Corequisite(s): OEEM 101, OEEM 120, OEEM 120L OEEM 153. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

OEEM 122. Emergency Medical Technician Basic Advanced Field/Internship**2 Credits (6P)**

Expanded patient care experience provided through assigned shifts in the hospital and/or ambulance setting. May be repeated up to 2 credits. Consent of Instructor required. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

Prerequisite(s): Current EMT-basic license and consent of instructor.

OEEM 150. Emergency Medical Technician Intermediate**5 Credits (5)**

Theory of the roles, responsibilities and scope of practice of the EMT-Intermediate. Assessment and management of respiratory, cardiac, trauma, environmental, behavior, reproduction, and childhood emergencies. May be repeated up to 5 credits. Consent of Instructor required. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

Prerequisite(s): Current EMT-basic license, pretest and consent of instructor.

OEEM 150 L. Emergency Medical Technician Intermediate Lab**2 Credits (6P)**

EMT-Intermediate skills development with an emphasis on assessment, skills competency, and team work in patient care in the prehospital setting. Requires a C or better to pass.

Prerequisite(s)/Corequisite(s): OEEM 150, OEEM 151. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

OEEM 151. Emergency Medical Technician Intermediate Field/Clinical**2 Credits (6P)**

Patient care experience provided through assigned shifts in the hospital and/or ambulance setting.

Prerequisite(s)/Corequisite(s): OEEM 150, OEEM 150 L. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

OEEM 153. Introduction to Anatomy and Physiology for the EMS Provider**3 Credits (3)**

To properly assess and manage a patient, a prehospital provider must have a solid foundation in human anatomy and physiology. This course provides a systematic approach to building this foundation. Grade of "C" or better is required to pass the course. Consent of Instructor required. Restricted to Community Colleges campuses only.

OEEM 155. Special Topics**1-6 Credits**

Specific topics to be listed in Schedule of Classes. May be repeated for a maximum of 10 credits.

OEEM 177. Emergency Medical Services Instructor**4 Credits (4)**

Theory of student learning, methodology, instructional components, evaluation, and course coordination for the EMS profession. May be repeated up to 4 credits. Consent of Instructor required. Restricted to Community Colleges campuses only.

Prerequisite(s): Minimum of an EMT-Basic License required.

OEEM 201. Human Pathophysiology**3 Credits (2+3P)**

Overview of anatomy and physiology. Emphasis on human body pathophysiology including a medical illness component. Requires a "C" or better to pass. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEMS, OEEM majors. Restricted to Community Colleges campuses only.

Prerequisite(s): OEEM 120, OEEM 120 L.

OEEM 202. EMT-Paramedic Respiratory Emergencies**3 Credits (2+3P)**

Review anatomy, physiology and pathophysiology of the respiratory system. Assessment and management of respiratory emergencies and acute respiratory failure in the prehospital setting. Requires a "C" or better to pass. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEMS, OEEM majors. Restricted to Community Colleges campuses only.

Prerequisite(s): OEEM 122.

OEEM 203. EMT-Paramedic Trauma Emergencies**3 Credits (2+3P)**

Study of the effects of trauma on the human body. Assessment and management of trauma patients and scenes, including vehicular extrication. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

Prerequisite(s): OEEM 216.

OEEM 206. Introduction to Advanced Prehospital Care**3 Credits (2+3P)**

Overview of prehospital care including roles and responsibilities of EMT-P, EMS systems, medical, legal, ethical issues, stress management, medical terminology, medical report writing and communication. Includes ride-along with ambulance and dispatch observation. Requires a C or better to pass. Restricted to majors. Consent of instructor required. Restricted to: Community Colleges only. Restricted to OEEM majors.

Prerequisite(s): OEEM 120.

OEEM 207. Introduction to Pharmacology**3 Credits (2+3P)**

Drug actions, factors modifying drugs and dosages: characteristics of drug effects, and drug history and dosages. Prehospital protocol, transport, and common patient prescription medications. Restricted to majors. Requires a C or better to pass. Restricted to: Community Colleges only. Restricted to OEEM majors.

Prerequisite(s): OEEM 120.

OEEM 210. Cardiac Rhythm Interpretation**3 Credits (2+3P)**

Cardiac conduction system: electrophysiology, electrocardiogram, monitor, atrial, sinus, ventricular and junctional dysrhythmias, multiple lead EKG and 12 lead EKG interpretation. Requires a "C" or better to pass. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEEM, OEMS majors. Restricted to Community Colleges campuses only.

Prerequisite(s): OEEM 201, OEEM 206, OEEM 207.

OEEM 212. EMT-Paramedic Cardiovascular Emergencies**3 Credits (2+3P)**

Review anatomy, physiology, and pathophysiology of cardiovascular system. Assessment and management of cardiovascular emergencies in the prehospital setting. Requires a "C" or better to pass. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEMS, OEEM majors. Restricted to Community Colleges campuses only.

Prerequisite(s): OEEM 210.

OEEM 213. EMT-Paramedic: Medical Emergencies I**3 Credits (2+3P)**

Study of the disease process; assessment and management of neurological, endocrine, gastrointestinal, renal emergencies and infectious disease. Requires a "C" or better to pass. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEEM, OEMS majors. Restricted to Community Colleges campuses only.

Prerequisite(s): OEEM 212.

OEEM 214. EMT--Paramedic: Medical Environmental Emergencies II**3 Credits (2+3P)**

Study of disease process, assessment, and management of poisoning, drug and alcohol abuse, environmental, behavioral and geriatric emergencies. Requires a "C" or better to pass. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: OEMS, OEEM majors. Restricted to Community Colleges campuses only.

Prerequisite(s): OEEM 213.

OEEM 216. EMT-Paramedic: Reproductive and Childhood Emergencies**3 Credits (2+3P)**

Covers anatomy, physiology, disease processes, assessment and management of male and female reproductive system emergencies, childhood emergencies and growth and development. Restricted to majors. Requires a C or better to pass. Restricted to: Community Colleges only.

Prerequisite(s): OEEM 214 and consent of instructor.

OEEM 218. Pediatric Advance Life Support for the Healthcare Professional**1 Credit (1)**

Identify and respond to life threatening pediatric emergencies. Taught using the American Heart Association guidelines for course completion. Graded S/U.

Prerequisite: OEEM 101.

OEEM 219. Advance Cardiac Life Support for the Healthcare Provider**1 Credit (1)**

Identify and respond to life threatening cardiac emergencies. Taught using the American Heart Association guidelines for course completion. Graded S/U.

Prerequisite: OEEM 101.

OEEM 230. EMT-Paramedic Clinical Experience I**3 Credits (9P)**

Assigned clinical experiences in patient assessment and specific management techniques. Successful completion includes minimum required hours and completion of course objectives. Restricted to majors. Requires a C or better to pass.

Prerequisite: consent of instructor.

OEEM 231. EMT-Paramedic Clinical Experience II**3 Credits (9P)**

Assigned clinical experiences in patient assessment and specific management techniques. Successful completion includes minimum required hours and completion of course objectives. Requires a "C" or better to pass. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s)/Corequisite(s): OEEM 230. Restricted to: OEMS, OEEM majors. Restricted to Community Colleges campuses only.

OEEM 240. EMT-Paramedic Field Experience I**3 Credits (9P)**

Advanced prehospital skills and knowledge. Successful completion of at least the minimum required hours and course objectives. Restricted to majors. Requires a C or better to pass.

Prerequisite: consent of instructor.

OEEM 241. EMT-Paramedic Field Experience II**3 Credits (9P)**

Continued focus on advanced prehospital skills and knowledge, with increasing responsibility for patient care. Successful completion includes meeting at least the minimum required hours and course objectives.

Prerequisite(s)/Corequisite(s): OEEM 240. Requires a C- or better to pass.

OEEM 242. EMT-Paramedic Field Internship**3 Credits (9P)**

Emphasis on total patient care responsibility and team leadership skills. Successful completion includes meeting the minimum hours required and course objectives. Pre/ Consent of Instructor required. Restricted to: OEEM majors. Restricted to Community Colleges campuses only.

Prerequisite(s): OEEM 231, OEEM 241.

OEEM 243. EMT-Paramedic Preparation for Practice**2 Credits (2)**

Comprehensive final program testing to prepare for licensing examination. Requires a "C" or better to pass. May be repeated up to 2 credits. Consent of Instructor required. Restricted to: OEMS, OEEM majors. Restricted to Community Colleges campuses only.

Prerequisite(s): OEEM 242.

OEEM 253. Critical Care Emergency Medical Transport Program**6 Credits (5+6P)**

This course will provide further education to Paramedics, Registered Nurses and Registered Respiratory Therapists who wish to function as part of a critical care transport team. Consent of instructor required. Restricted to: Community Colleges only.

Prerequisite(s): Licensed Paramedic, Registered Nurse or Registered Respiratory Therapist with one or more years experience.

OEET- ELECTRICAL TRADES

OEET 110. Basic Electricity and Electronics**4 Credits (3+3P)**

An introduction to electricity theory and practice, including electron theory, Ohm's law, construction of electrical circuits, direct and alternating currents, magnetism, transformers, and practical applications. Same as HVAC 102, ELT 105, OEPB 102.

OEET 120. Basic Motor Controls**5 Credits (2+6P)**

Developing schematics and wiring simple manual and electromechanical control devices.

Prerequisite: OEET 110 or consent of instructor.

OEET 151. Electrical Apprenticeship I**6 Credits (6)**

Apprenticeship responsibilities and benefits as well as first aid and CPR will be covered. Hand tools, electrical theory, and the regulations imposed by national codes and OSHA. Students will apply theory taught in their jobs.

Prerequisite: consent of instructor.

OEET 152. Electrical Apprenticeship II**6 Credits (6)**

OHM s law circuit sizing and service panel sizing will be covered in detail. Other topics include low voltage systems, heating and air conditioning circuits, alarm systems and smoke detectors.

Prerequisites: OEET 151 and consent of instructor.

OEET 153. Electrical Apprenticeship III**6 Credits (6)**

Various electrical measuring devices will be covered in detail. Inductance, transformers, capacitance, and simple motors will be studied.

Prerequisites: OEET 152 and consent of instructor.

OEET 154. Electrical Apprenticeship IV**6 Credits (6)**

Theory and application of three-phase transformers and autotransformers. Electrical distribution using switchboards, panelboards, and circuit breakers.

Prerequisites: OEET 153 and consent of instructor.

OEET 205. National Electric Code**3 Credits (3)**

Interpretation and application of the National Electric Code.

Prerequisite: OEET 110.

OEET 251. Electrical Apprenticeship V**6 Credits (6)**

Commercial/industrial applications for electricians. Blueprint interpretation, commercial construction types and processes, wiring methods, wiring materials, and motor controls.

Prerequisites: OEET 154 and consent of instructor.

OEET 252. Electrical Apprenticeship VI**6 Credits (6)**

In-depth commercial applications to include commercial/industrial service calculations, mobile home parks, multi-family dwellings, and commercial fire/security systems.

Prerequisites: OEET 251 and consent of instructor.

OEET 253. Electrical Apprenticeship VII**6 Credits (6)**

Control devices in commercial/industrial applications; emphasis on logic in-line diagrams, time delay starters, reversing starters, and manual/magnetic solenoids.

Prerequisites: OEET 252 and consent of instructor.

OEET 254. Electrical Apprenticeship VIII**6 Credits (6)**

Miscellaneous topics for the journey person electrician to include power distribution/transmission, solid state controls and relays, photoelectric and proximity controls and programmable controllers.

Prerequisites: OEET 253 and consent of instructor.

OEET 295. Special Topics**1-6 Credits**

Topics to be announced in the Schedule of Classes.

OEGR-DIGITAL GRAPHIC TECH

OEGR 221. Cooperative Experience I**1-3 Credits**

Student employed in approved work site; supervised and rated by employer and instructor. Each credit requires specified number of hours of on-the-job work experience. Restricted to majors. Graded S/U.

Prerequisite: consent of instructor.

OEGS-GEOGRAPHIC INFO SYS

OEGS 181. Introduction to Principles of Geographic Information Systems

4 Credits (3+3P)

This course will introduce students to fundamental software capabilities of geographic information systems (GIS), along with the underlying conceptual framework. Topics include origins, development, and methods of cartography, components of a GIS, the nature and characteristics of spatial data, methods of data capture and sources of data, review of typical GIS operations and applications. Producing useful, aesthetically pleasing maps will be an integral part of the course. ArcGIS software will be used for this course. May be repeated up to 4 credits.

OEGS 187. GIS Data Acquisition and Management

4 Credits (3+3P)

An introduction to defining data needs and evaluating whether a given dataset matches those needs. Students will explore some common geographic data formats used in ArcGIS and learn about sources of data and maps that can be incorporated into a GIS project. The student will learn the advanced functionality and versatility of using geodatabases. The student will demonstrate how to design and build a geodatabase, migrate existing data to a geodatabase and edit data stored in a geodatabase. Methods for georeferencing scanned maps, aerial photos and computer aided drafting files will be explored and discussed. May be repeated up to 4 credits.

Prerequisite(s): OEGS 181.

OEGS 291. Special Topics in Geographic Information Systems

1-3 Credits (1-3)

Topics to be announced in the Schedule of Classes. May be repeated up to 12 credits. Restricted to Community Colleges campuses only.

OETS-TECHNICAL STUDIES

OETS 100. Industrial/Construction Safety

2 Credits (2)

Covers safety issues such as PPE, BBP, ladder safety,, RTK, HazCom, MSDS and information about safety organizations such as OSHA, NIOSH, NFPA, National Safety Council. Community Colleges only. Restricted to Dona Ana and Carlsbad campuses.

OETS 102. Career Readiness Certification Preparation

1 Credit (1)

This course is designed to prepare students to successfully obtain Career Readiness Certifications in all areas and at the appropriate levels for their program of study. Graded: S/U Grading (S/U, Audit). May be repeated up to 3 credits. S/U Grading (S/U, Audit).

OETS 103. Technical Career Skills

4 Credits (4)

This course will be project-based and will encompass writing, presentation, math, reading, and critical thinking skills applied in a technical environment. Restricted to: Community Colleges only.

OETS 104. Basic Mathematics for Technicians

4 Credits (4)

Fundamental mathematical concepts and computations including measurement, ratio and proportions, and pre-algebra as it relates to technical programs.

Prerequisite: appropriate placement test score.

OETS 117. Writing for Technicians

3 Credits (3)

Instruction in the skills for developing clear, written descriptions of processes and procedures used by technicians in various fields. Emphasis on correct grammar, logical organization, and receiving audience. Focuses on clarity, structure, and concise writing methods. Does not substitute for ENGL 111G. Restricted to: Community Colleges only.

OETS 118. Mathematics for Technicians

3 Credits (2+2P)

Analysis and problem solving of technical problems using measuring instruments and techniques of arithmetic, algebra, geometry, and trigonometry. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): Grade of "C-" or better in OETS 104 or CCDM 103 N, or appropriate placement test score.

OETS 120. Business Fundamentals

3 Credits (3)

Instruction in the skills for basic business concepts used by technicians in various fields. Emphasis placed on basic business concepts; business ownership including marketing, management, accounting, and customer services; interpersonal communication; and basic computer concepts including word processing, spreadsheets, and presentation software. Restricted to Community Colleges campuses only.

OETS 255. Special Topics Technical Studies**1-6 Credits**

Topics to be announced in the Schedule of Classes. Restricted to: Community Colleges only.

Prerequisite(s): Consent of instructor.

PHED-PHYSICAL EDUCATION

PHED 1110. Dance:**1 Credit (1)**

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1230. Individual Sport:**1 Credit (1)**

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1290. Team Sport:**1 Credit (1)**

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1310. Swim I:**1 Credit (1)**

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1320. Aqua Fit:**1 Credit (1)**

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1410. Yoga:**1 Credit (1)**

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1430. Pilates:**1 Credit (1)**

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1510. Training:**1 Credit (1)**

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1620. Fitness:

1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1630. Career Fitness:

1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation.

Learning Outcomes

1. Varies

PHED 1670. Aerobics:

1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1710. Martial Arts:

1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 1830. Running:

1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation.

Learning Outcomes

1. Varies

PHED 1910. Outdoor Experience

1 Credit (1)

Individual sections vary based on topic content; "audience"; type or level of participation. May be repeated up to 6 credits.

Learning Outcomes

1. Varies

PHED 2996. Special Topics

1-3 Credits

Specific subjects to be announced in the Schedule of Classes. Each offering will carry appropriate subtitle. May be repeated for a maximum of 6 credits.

Learning Outcomes

1. Varies

PHIL-PHILOSOPHY

PHIL 1115G. Introduction to Philosophy

3 Credits (3)

In this course, students will be introduced to some of the key questions of philosophy through the study of classical and contemporary thinkers. Some of the questions students might consider are: Do we have free will? What is knowledge? What is the mind? What are our moral obligations to others? Students will engage with and learn to critically assess various philosophical approaches to such questions.

Learning Outcomes

1. Comprehend and differentiate between various philosophical approaches to questions within fields such as metaphysics, epistemology, ethics, and aesthetics.
2. Critically evaluate various philosophical arguments and positions.

PHIL 1120G. Logic, Reasoning, & Critical Thinking**3 Credits (3)**

The purpose of this course is to teach students how to analyze, critique, and construct arguments. The course includes an introductory survey of important logical concepts and tools needed for argument analysis. These concepts and tools will be used to examine select philosophical and scholarly texts.

Learning Outcomes

1. Comprehend components of arguments.
2. Acquire a general understanding of the essential logical concepts needed for argument analysis, such as validity, soundness, deduction, and induction.
3. Critically assess arguments with an aim toward identifying what constitutes effective and reasonable argument strategies.
4. Learn to identify common logical fallacies.
5. Apply knowledge of argumentation principles to philosophical and scholarly texts

PHIL 1140G. Quest for God**3 Credits (3)**

An effort to understand the religious life; a consideration of some of the traditional approaches to God and what it means to be religious.

Learning Outcomes

1. Identify and describe theories regarding religion
2. Develop and enhance your critical thinking skills, particularly in the evaluation of arguments about the truth or applicability of particular religious or secular viewpoints.
3. Analyze the teachings of world religions by describing their similarities and differences.
4. Explain the beliefs, practices, and ethical standards of the major world religions as well as emerging religious movements.
5. While traditional expressions of each faith are emphasized, students will learn how each religion evolved historically and spiritually as well as the contemporary ideas and practices of each religion.

PHIL 1145G. Philosophy, Law, and Ethics**3 Credits (3)**

An introduction to practical problems in moral, social, political, and legal philosophy. Topics to be discussed may include ecology, animal rights, pornography, hate speech on campus, same-sex marriage, justice, abortion, terrorism, treatment of illegal immigrants, and New Mexican Aboriginal Peoples' land claims.

Learning Outcomes

1. The aim of this course is to familiarize students with some of the ethical and philosophical issues that arise in connection with laws/legality in general and criminal and constitutional law in the U.S. in particular.
2. It examines issues in moral philosophy, political philosophy, and philosophy of law.
3. A question to which we repeatedly return is whether the law does and/or ought to have some necessary relation to the demands of justice and morality. Among the topics we'll cover are: What is a law? Natural law vs. positive law and legal positivism vs. natural law theory; Utilitarian, divine command, Kantian, and natural law theories of moral rightness/wrongness; The distinction between the normative and the non-normative; Is there a moral duty to obey the law? Plato's Crito and R.P. Wolff's "philosophical anarchism."; J.S. Mill and classical liberalism; Mill's "harm principle" ("the state should restrict the liberty of competent adults via the criminal law only to prevent them from wrongfully harming other persons"); Legal paternalism. Should the state make it harder for citizens to smoke tobacco and/or marijuana, for their own good?; Should voluntary euthanasia be legal? Is there a constitutional "right to die"?; How should judges determine the meaning of vaguely worded constitutional requirements (e.g. "free exercise of religion," no "unreasonable search and seizure," no "cruel and unusual punishment," etc.)? Originalist vs. nonoriginalist approaches; The First Amendment, free speech, and freedom of religion; The death penalty and "cruel and unusual punishment"; The insanity defense in criminal law; Does the 14th Amendment's requirement of "equal protection" under the law compel states to recognize same sex marriage?; The Fourth Amendment and its prohibition of "unreasonable search and seizure."

PHIL 1155G. Philosophy of Music**3 Credits (3)**

This is an introductory course in the philosophy of music. This course will survey three questions: What is music? Why is music important? How can we distinguish good music from bad music? We will draw examples from a wide variety of musical genres, from classical music, jazz and blues to punk and rap. Students will be encouraged to apply philosophical theorizing to think about their preferred musical form.

PHIL 2110G. Introduction to Ethics**3 Credits (3)**

This course introduces students to the philosophical study of morality and will explore questions concerning our human obligations to others and related issues. Students may be asked to relate various approaches to ethics to present-day ethical debates and their own lives.

Learning Outcomes

1. Differential between various ethical theories, which may include virtue ethics, deontology, and consequentialism.
2. Critically evaluate various ethical theories and positions.

PHIL 2230G. Philosophical Thought**3 Credits (3)**

In this course, students will grapple with some of the key questions of philosophy through the study of classical and contemporary thinkers. Students will become familiar with the perennial problems in subfields of philosophy such as metaphysics, epistemology, ethics, and aesthetics. They will learn to approach these problems both critically and sympathetically.

Learning Outcomes

1. Comprehend and differentiate between various philosophical approaches to questions within fields such as metaphysics, epistemology, ethics, and aesthetics.
2. Critically evaluate various philosophical arguments and positions.
3. Identify the differences that characterize the major subfields of philosophy.

PHIL 305. Philosophy and Literature**3 Credits (3)**

Examination of philosophical ideas as presented in selected literary works and literary criticism.

PHIL 306. Philosophy Through Film**3 Credits (3)**

An exploration of a range of philosophical issues through the use of film. Topics include personal identity and memory, faith and the problem of evil, free will and moral responsibility, and the meaning of life. Films may include *The Prestige*, *Memento*, *The Third Man*, *A Clockwork Orange*, *Fight Club*, and *Synecdoche, New York*.

PHIL 312. Formal Logic**3 Credits (3)**

Introduction to symbolic logic and its application in the analysis of arguments in scientific and ordinary discourse.

PHIL 315. Philosophy of Language**3 Credits (3)**

A critical examination of philosophical inquiries into the syntactic, semantic, and pragmatic dimensions of language.

PHIL 316. Philosophy of Mathematics**3 Credits (3)**

Survey of traditional philosophical problems and views concerning the nature of mathematics including such questions as: What is the nature of mathematical knowledge? What is mathematical truth? What is a number? What is proof? What is the relationship between logic and mathematics?

PHIL 320. Social and Political Philosophy**3 Credits (3)**

This course critically examines such fundamental concepts as liberty, equality and human rights.

PHIL 321. Biomedical Ethics**3 Credits (3)**

Examines ethical dimensions of such issues as abortion, euthanasia, and physician-assisted suicide; informed consent as a condition of treating patients and experimenting on subjects; genetic engineering; and alternative reproductive methods, including surrogate motherhood. Also considers what implications moral theories have for these issues.

PHIL 322. Environmental Ethics**3 Credits (3)**

Explores the ethical and topical issues raised by mining and grazing, air and water pollution, factory farming, global warming, and treatment of animals. It also studies some recent ecological movements such as ecofeminism, social ecology, and deep ecology.

PHIL 323V. Engineering Ethics**3 Credits (3)**

The moral legal responsibilities of engineers to clients, employers, the public, and the environment. Topics include criteria for judging when risk is acceptable, the duty to safeguard public health and welfare, conflicts of interest, and whistle-blowing.

Prerequisite: Junior standing or higher.

PHIL 328. Applied Ethics**3 Credits (3)**

Examines the implications of utilitarianism, Kantian ethics, natural law theory, and other moral theories for controversial moral issues such as the death penalty, euthanasia, abortion, genetic engineering, gay marriage, affirmative action, and pornography.

PHIL 331. Philosophy of Religion**3 Credits (3)**

The nature, fundamental concepts, and problems of religion. Emphasis on the significance of religion for creative and practical value.

PHIL 332. Ethics and Global Poverty**3 Credits (3)**

Philosophical scrutiny of and moral reflection on various aspects of global poverty and foreign aid. For example: Is poverty fundamentally a lack of income, or can it be understood as a failure to meet basic needs, or as a lack of valuable freedom? Do human rights exist? What, if any, are the moral obligations of rich countries to poor countries? Can foreign aid be immoral? How should the answers to these questions influence public policy? Restricted to: Main campus only.

PHIL 341. Ancient Philosophy**3 Credits (3)**

Introduction to the philosophies of the pre-Socratics, Socrates, Plato, Aristotle, with brief discussion of the Epicureans and Stoics.

PHIL 344. Modern Philosophy**3 Credits (3)**

Foundations of contemporary thought: introduction to the philosophies of Descartes, Bacon, Spinoza, Leibniz, Locke, Berkeley, Hume, Kant, and Hegel.

PHIL 346. Philosophy of Mind**3 Credits (3)**

Examination of some of the most influential accounts of the mind, focusing on such issues as the relation between the mind and the body, mental causation and consciousness.

PHIL 350. Epistemology**3 Credits (3)**

Introduction to epistemology. The philosophical critique of alleged ways of knowing. An examination of the nature of truth.

PHIL 351. Philosophy of Science**3 Credits (3)**

Philosophical examination of the methodology of science. The logical, metaphysical, epistemological, and ethical critique of science and its impact on human affairs.

PHIL 361. Special Topics**3 Credits (3)**

Specific subjects announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.

PHIL 363. Independent Studies**1-3 Credits**

For students with some background in philosophy. Independent work in a specific area. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHIL 373. Ethical Theory**3 Credits (3)**

The critical examination of the justification of ethical theories with particular attention to the language of moral discourse.

PHIL 376. Philosophy of Law**3 Credits (3)**

Ethical, logical, and epistemological implications of law, together with an analysis of the rhetoric of legal practice.

PHIL 380. Metaphysics**3 Credits (3)**

Introduction to metaphysics: a treatment of such issues as the meaning of existence, the mind-body problem, the problem of universals, and free will versus determinism.

PHIL 385. Human Nature and the Good Life**3 Credits (3)**

An examination of some of the most historically and philosophically influential conceptions of human nature and corresponding accounts of the good life.

PHIL 397. Existentialism**3 Credits (3)**

The origins of existentialist thought in philosophy and literature, including the thought of Nietzsche, Kierkegaard, Dostoyevsky, Camus, and Sartre. The course covers topics in ethics and political philosophy, metaphysics, philosophical psychology, philosophy of religion, and other sub-disciplines of philosophy.

PHIL 448. Writing Philosophy**3 Credits (3)**

A workshop on writing philosophy papers. Includes how to read and understand philosophical writing, organize a paper effectively, present a clear and forceful argument, and avoid common mistakes.

Prerequisite(s): completed 18 hours of philosophy credit.

PHIL 463. Independent Studies**1-3 Credits**

For students with a strong background in philosophy. Independent work in a specific area. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHIL 505. Advanced Studies in Philosophy and Literature**3 Credits (3)**

Examination of philosophical issues (e.g. personal identity, free will, moral dilemmas, the meaning of life) as presented in selected literary works and literary criticism. Consent of Instructor required.

PHIL 532. Advance Studies in Ethics and Global Poverty**3 Credits (3)**

Advanced philosophical scrutiny of and moral reflection on various aspects of global poverty and foreign aid. For example: Is poverty fundamentally a lack of income, or can it be understood as a failure to meet basic needs, or as a lack of valuable freedom? Do human rights exist? What, if any, are the moral obligations of rich countries to poor countries? Can foreign aid be immoral? How should the answers to these questions influence public policy? Restricted to: Main campus only.

PHLS-PUBLIC HEALTH SCIENCES

PHLS 1110G. Personal Health & Wellness**3 Credits (3)**

A holistic and multi-disciplinary approach towards promoting positive lifestyles. Special emphasis is placed on major problems that have greatest significance to personal and community health. Topics to include nutrition, stress management, fitness, aging, sexuality, drug education, and others.

Learning Outcomes

1. Students will identify, describe and explain human health behaviors and how they are influenced by social structures, institutions, and processes within the contexts of complex and diverse communities. Students should: Develop an understanding of self and the world by examining content and processes used by social and behavioral sciences to discover, describe, explain, and predict human behaviors and social systems.
2. Students will articulate how beliefs, assumptions, and values are influenced by factors such as politics, geography, economics, culture, biology, history, and social institutions. Students should: Enhance knowledge of social and cultural institutions and the values of their society and other societies and cultures in the world.
3. Students will describe ongoing reciprocal interactions among self, society, and the environment. Students should: Understand the interdependent nature of the individual, family/social group, and society in shaping human behavior and determining quality of life.
4. Students will apply the knowledge base of the social and behavioral sciences to identify, describe, explain, and critically evaluate relevant issues, ethical dilemmas, and arguments. Students should: Articulate their role in a global context and develop an awareness and appreciation for diverse value systems in order to understand how to be good citizens who can critically examine and work toward quality of life within a framework of understanding and justice.

PHLS 2110. Foundations of Health Education**3 Credits (3)**

Role and responsibility of the health educator with emphasis on small group dynamics, oral and written communication skills, building community coalitions and introduction to grant writing. Taught with PHLS 375. Cannot receive credit for both PHLS 2110 and PHLS 375. May be repeated up to 3 credits.

Prerequisite(s): PHLS 1110G, or consent of instructor.

Learning Outcomes

1. Define health, three levels of prevention, health education and health promotion, and describe the major determinants of health.
2. Describe the 7 major areas of responsibility, major competencies and sub-competencies of a
3. professional health educator and the CHES's possible roles in various community health settings.
4. Describe and examine the historical context and development of the profession of health education.
5. Identify and critique major processes and practices of health education programming.
6. Describe the steps involved in conducting needs assessments, program and intervention planning, implementation, and program evaluation.
7. Identify, examine and describe elected health behavior change theories and models and explore possible applications in health education practice.
8. Describe and discuss the process of community mobilization and building of a community coalition.
9. Identify health issues and describe effective methods/strategies in health education advocacy.
10. Describe and discuss the future trends and issues in the professional preparation and practice of professional health educators.
11. 1Demonstrate effective and appropriate oral and written communication skills for health education professionals.

PHLS 2120. Essentials of Public Health**3 Credits (3)**

The course will focus on principles and major areas of public health, including ecological and total personal concept of health care system, epidemiological approaches to disease prevention and control. Consent of Instructor required.

Learning Outcomes

1. Understand the sources of public health data, and how to interpret that information.
2. Access existing health related data.
3. Analyze health related data.
4. Identify populations for health education programs.
5. Incorporate data analysis and principles of community organization.
6. Interpret results from evaluation and research.
7. Infer implications from findings for future health-related activities.
8. Have a basic understanding of health topics faced by various populations.

PHLS 301V. Human Sexuality**3 Credits (3)**

Examination of human sexuality from a variety of perspectives: cultural, sociological, physiological and psychological. Issues examined from viewpoints such as gender, individual, family, and professional roles.

PHLS 305V. Global Environmental Health Issues**3 Credits (3)**

Introduction to global environmental health challenges in the 21st century with an emphasis on environmental problems as they affect public health and personal well-being.

PHLS 375. Foundations of Community Health Education**3 Credits (3)**

Role and responsibility of the health educator, with emphasis on small-group dynamics, oral and written communication skills, building community coalitions, and an introduction to grant writing. Equivalent to PHLS 2110. May be repeated up to 3 credits.

PHLS 380V. Women's Health Issues**3 Credits (3)**

A focus on the unique issues and problems that confront women today and how they affect the health of women. Same as GNDR 381V.

PHLS 395. Foundations of Public Health**3 Credits (3)**

The course will focus on principles and major areas of public health, including ecological concepts of healthcare systems and epidemiological approaches to disease promotion and control. Equivalent to PHLS 2120. May be repeated up to 3 credits. Restricted to: Public Health majors.

PHLS 450. Epidemiology**3 Credits (3)**

Epidemiologic approaches to disease prevention and control. Factors influencing health status. May be repeated up to 3 credits. Restricted to: PHL majors.

Prerequisite(s): PHLS 395 or PHLS 2120.

PHLS 451. Biometrics and Health Research**3 Credits (3)**

Critical analysis of community health research and related methodologies. May be repeated up to 3 credits. Restricted to: Public Health majors.

Prerequisite(s): (MATH 1350G) or MATH 2350G or A ST 311.

PHLS 452. Environmental Health**3 Credits (3)**

Introduction to environmental health designed to address public health issues. May be repeated up to 3 credits. Restricted to: PH,PHL majors.

Prerequisite(s): PHLS 395 or PHLS 2120.

PHLS 457. Administration of Health Programs**3 Credits (3)**

Covers administrative responsibilities, organizational theory, strategic planning, and systems theory as applied to the administration of a variety of health programs. May be repeated up to 3 credits. Restricted to: C HL,PHL majors.

Prerequisite(s): PHLS 395, PHLS 2120, or consent of instructor.

PHLS 459. Infectious and Noninfectious Disease Prevention**3 Credits (3)**

History, etiology, and prevention of diseases affecting humans. May be repeated up to 3 credits. Consent of Instructor required. Crosslisted with: MPH 559. Restricted to: Public Health majors.

Prerequisite(s): PHLS 395 or PHLS 2120, PHLS 450 and Consent of Instructor.

PHLS 460. American Indian Health**3 Credits (3)**

Critical health issues facing American Indians in the contemporary world. Course included in the undergraduate American Indian Program minor. May be repeated up to 3 credits. Crosslisted with: MPH 560. Restricted to: Public Health minors or Public Health majors.

PHLS 461. Health Disparities: Determinants and Interventions**3 Credits (3)**

Investigates: descriptions of health disparities and measurement issues; physical environmental factors, behavioral and emotional variables; impact of aging of the populations, increased racial and ethnic diversity, and technological developments; intervention strategies and evaluation results. May be repeated up to 3 credits. Crosslisted with: MPH 561.

PHLS 464V. Cross-Cultural Aspects of Health**3 Credits (3)**

An examination of health practices from a variety of cultural perspectives: communication, observation, research, and assimilation. Issues to be addressed will be examined from a number of viewpoints, such as individual, family, community, and professional roles.

PHLS 465. International Health Problems**3 Credits (3)**

Comparison of domestic health programs and problems with those in other parts of the world; emphasis on political parameters and delivery processes. Additional attention is focused on the health issues of the U.S.-Mexico border. May be repeated up to 3 credits. Crosslisted with: MPH 565.

Prerequisite(s): PHLS 395 or PHLS 2120 or consent of instructor.

PHLS 467. Rural Health Issues**3 Credits (3)**

Comprehensive overview of rural health services with Southwestern United States and New Mexico focus. May be repeated up to 3 credits. Crosslisted with: MPH 567.

PHLS 468. Coping with Loss and Grief: A Cross-Cultural Perspective**3 Credits (3)**

A cross-cultural perspective to death, loss and grief. Hospice philosophy of caring for the dying will be included.

PHLS 469. U.S.-Mexico Border Health Issues**3 Credits (3)**

Interdisciplinary analysis of the impact of living conditions and health issues of communities along the U.S.-Mexico border and of the strategies and initiatives to address these issues. Problem-based learning, case analysis, lecture, guest speakers, computer based instruction, and field trips. May be repeated up to 3 credits. Crosslisted with: MPH 569.

PHLS 471. Health Informatics**3 Credits (3)**

The application of technology to engage communities and individuals in behavioral and environmental change processes. The course will focus on the use of technology to describe the magnitude of health problems and their sources; analyze risk factors; identify community strengths from which strategies may be defined and tools created to intervene, prevent problems, and promote health and well-being; and continuously evaluate, refine, and implement what works. May be repeated up to 3 credits. Crosslisted with: MPH 571. Restricted to: Restricted to Public Health majors.

Prerequisite(s): PHLS 395 or PHLS 2120 or consent of instructor.

PHLS 473. Health Program Planning**3 Credits (3)**

Planning and development of community health education interventions for behavior change at the individual, family, social network levels of practice. Emphasis on applying program-planning models and designs into a grant-writing project. May be repeated up to 3 credits. Restricted to: Public Health majors.

Prerequisite(s): PHLS 375 or PHLS 2120 and PHLS 476.

PHLS 475. Methods of Community Health Education**3 Credits (3)**

Responsibilities of health educators, analysis of social forces affecting health needs, application of wide range of health education methods and instructional media, and program implementation skills. May be repeated up to 3 credits. Crosslisted with: MPH 575. Restricted to: Public Health majors.

Prerequisite(s): PHLS 395 or PHLS 2120.

PHLS 476. Theoretically-Based Interventions**3 Credits (3)**

Identifying and developing interventions to problematic health-related behaviors. May be repeated up to 3 credits. Restricted to: Public Health majors.

Prerequisite(s): PHLS 395 or PHLS 2120.

PHLS 478. Health Program Evaluation and Research**3 Credits (3)**

Covers the application of research and evaluation models for decision-making program and policy development of community health education interventions. Focus on the individual, family, and social network levels of practice. May be repeated up to 3 credits.

Prerequisite(s): PHLS 473.

PHLS 481. Public Health Preparedness and Response**3 Credits (3)**

This course is designed to teach students about the role of public health in emergency preparedness and response. It focuses on the nature of public emergencies as well as the role various sectors have in responding to them. One purpose of this online course is to introduce students to the basics of disaster preparedness and responding to disasters, and to build a base for further development in responder training. The course provides training and resources for a basic understanding of the Incident Command System (ICS) and National Incident Management System (NIMS). May be repeated up to 3 credits. Crosslisted with: MPH 581.

PHLS 486. Special Topics**3 Credits (3)**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

PHLS 490. Independent Study**1-6 Credits**

Individual studies with prior approval of department head. May be repeated up to 12 credits. Consent of Instructor required.

PHLS 496. Community Health Education Field Experience**1-6 Credits**

Senior-standing community health education majors will integrate and apply various concepts related to actual community health education practice. Experience aims to prepare students to integrate the competencies and responsibilities of community health education. Approximately 55 hours at field agency required per credit hour. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: Public Health majors.

Prerequisite(s): PHLS 475 or concurrent enrollment.

PHLS 497. Public Health Seminar in Community Health Education**1 Credit (1)**

Critical analysis of issues in CHE and health care. Readings focus on social, economic, cultural, and political issues as they affect the profession and practice. Emphasis on future, local, national, and international health trends. May be repeated up to 1 credits. Restricted to: Public Health majors.

Prerequisite(s): PHLS 450, PHLS 473, and PHLS 476 or consent of instructor.

PHLS 499. Problems in Health Education**3 Credits (3)**

Provides opportunity for synthesis of program planning, implementation, and evaluation methodologies in the preparation and delivery of health education topics. Some field trips will be required. May be repeated up to 3 credits. Restricted to: C HL,PHL majors.

Prerequisite(s): Either PHLS 395, PHLS 2120, PHLS 478, PHLS 476, or consent of instructor.

PHYS-PHYSICS

PHYS 1111. Introductory Computational Physics**3 Credits (2+2P)**

Introduction to computational techniques for the solution of physics-related problems.

Prerequisite(s): a C- or better in MATH 1220G or MATH 1250G or MATH 1511G.

PHYS 1112. Introductory Physics for the Health Sciences**3 Credits (3)**

Algebra-level introduction to topics required for the Health Sciences including basic mechanics (including sound, mechanical waves and fluids), heat and thermodynamics, electricity and magnetism, optics and electromagnetic waves, atomic and nuclear physics and applications to medical imaging. Restricted to Community Colleges campuses only.

Prerequisite(s): MATH 1215 or Equivalent.

Learning Outcomes

1. The objective of the course is to familiarize the student with the concepts and methods used in the underlying physics associated with various Health Science disciplines.
2. The course will demonstrate how the basic principles of mechanics, thermodynamics, electricity, magnetism, electromagnetic waves and optics can be applied to solve particular problems in Health Sciences applications. Introduces the student to selected topics in modern physics including quantum physics, atomic and nuclear physics.

PHYS 1115G. Survey of Physics with Lab**4 Credits (3+3P)**

Overview of the concepts and basic phenomena of physics. This course provides a largely descriptive and qualitative treatment with a minimum use of elementary mathematics to solve problems. No previous knowledge of physics is assumed. Includes laboratory.

Learning Outcomes

1. Apply concepts of classical mechanics (such as velocity, acceleration, force, inertia, momentum, torque, work, energy) to simple static and dynamic systems.
2. Apply concepts of thermodynamics (such as heat, temperature, internal energy, entropy) to simple processes.
3. Apply concepts of electricity and magnetism (such as fields, potential, charge conservation, static and dynamic induction) to simple circuits, motors, and other simple contrivances.
4. Apply simple geometric and wave optics in simple situations.
5. Test ideas using modern laboratory equipment.
6. Estimate experimental uncertainties.
7. Use computers to analyze and report laboratory results.
8. Draw appropriate conclusions from quantitative scientific observations.
9. Accurately and clearly communicate the results of scientific experiments.

PHYS 1125G. Physics of Music**4 Credits (3+2P)**

Introduction for non-science majors to basic concepts, laws, and skills in physics, in the context of a study of sound, acoustics, and music.

Learning Outcomes

1. Demonstrate converting units and other aspects of dimensional analysis in the working of numerical problems.
2. Apply basic classical mechanics to static and dynamic fluids, including Archimedes' principle and Bernoulli's principle.
3. Apply the general properties of waves to simple models of musical instruments.
4. Demonstrate knowledge of basic operating principles of wind, string, and percussion instruments.
5. Demonstrate knowledge of how objectively measurable properties of sound waves correspond to the perceptions of pitch, loudness, and timbre.
6. Demonstrate understanding of the description of vibrations and waves in terms of Fourier's Theorem and normal modes.
7. Demonstrate understanding of vocalization in terms of physical principles such as resonance and fluid dynamics.
8. Demonstrate understanding of how the ear works.

PHYS 1230G. Algebra-Based Physics I**3 Credits (3)**

An algebra-based treatment of Newtonian mechanics. Topics include kinematics and dynamics in one and two dimensions, conservation of energy and momentum, rotational motion, equilibrium, and fluids.

Learning Outcomes

1. Demonstrate converting units and other aspects of dimensional analysis in the working of numerical problems.
2. Apply principles of Newtonian mechanics to predict and account for simple phenomena modeled by the motion of particles in one and two dimensions.
3. Apply principles of Newtonian mechanics to predict and account for simple phenomena modeled by the motion of a rigid body in two dimensions.
4. Apply Newton's theory of gravitation to circular orbits and demonstrate understanding of how Kepler's laws of planetary motion provide the empirical foundation for Newton's theory.
5. Apply the mathematics of vectors to the principles of Newtonian mechanics.
6. Apply principles of Newtonian mechanics to the case of static and dynamic incompressible fluids, including Archimedes' and Bernoulli's principles.

PHYS 1230L. Algebra-Based Physics I Lab**1 Credit (1)**

A series of laboratory experiments associated with the material presented in PHYS 1230G.

Prerequisite(s)/Corequisite(s): PHYS 1230G.

Learning Outcomes

1. Explain the scientific method.
2. Test ideas using modern laboratory equipment.
3. Estimate experimental uncertainties using statistical methods.
4. Use computers to analyze and report laboratory results.
5. Draw appropriate conclusions from quantitative scientific observations.
6. Accurately and clearly communicate the results of scientific experiments.

PHYS 1240G. Algebra-Based Physics II**3 Credits (3)**

The second half of a two semester algebra-based introduction to Physics. This course covers electricity, magnetism and optics.

Prerequisite(s): a C- or better in PHYS 1230G or PHYS 2230G.

Learning Outcomes

1. Be able to state Coulomb's Law and Gauss's laws and apply them.
2. Apply the concepts of electric charge, electric field and electric potential to solve problems.
3. Analyze simple DC and AC circuits.
4. Apply the Lorentz force to solve problems.
5. Apply Faraday's law of induction (and Lenz's law) to solve problems.
6. Apply ray optics to practical lens systems such as microscopes and corrective lenses.
7. Apply the wave nature of light to the phenomena of reflection, refraction, and diffraction.

PHYS 1240L. Algebra-Based Physics II Lab**1 Credit (1)**

A series of laboratory experiments associated with the material presented in PHYS 1240

Prerequisite(s)/Corequisite(s): PHYS 1240G.

Learning Outcomes

1. Explain the scientific method.
2. Test ideas using modern laboratory equipment.
3. Estimate experimental uncertainties using statistical methods.
4. Use computers to analyze and report laboratory results.
5. Draw appropriate conclusions from quantitative scientific observations.
6. Accurately and clearly communicate the results of scientific experiments.

PHYS 1310G. Calculus -Based Physics I**3 Credits (3)**

A calculus level treatment of classical mechanics and waves, which is concerned with the physical motion concepts, forces, energy concepts, momentum, rotational motion, angular momentum, gravity, and static equilibrium. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in MATH 1511G or higher.

Learning Outcomes

1. Describe the relationships among position, velocity, and acceleration as functions of time.
2. Use the equations of kinematics to describe motion under constant acceleration.
3. Analyze linear motion using Newton's laws, force, and linear momentum.
4. Analyze rotational motion using torque and angular momentum.
5. Analyze motion using work and energy.

PHYS 1310L. Calculus -Based Physics I Lab**1 Credit (3P)**

A series of laboratory experiments associated with the material presented in Calculus-based Physics I. Students will apply the principles and concepts highlighting the main objectives covered in coursework for Calculus-based Physics I.

Prerequisite(s)/Corequisite(s): PHYS 1310G.

Learning Outcomes

1. Develop a reasonable hypothesis.
2. Work effectively as part of a team.
3. Take measurements and record measured quantities to the appropriate precision.
4. Estimate error sources in experimental techniques.
5. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
6. Determine whether results and conclusions are reasonable.
7. Present experimental results in written form in appropriate style and depth.
8. Experience the relationship between theory and experiment.

PHYS 1311. Problems in Calculus-Based Physics I**0.5-1 Credits (.5-1)**

This is a supplemental course for Calculus-based Physics I. May be repeated up to 1 credits.

Corequisite(s): PHYS 1310G.

PHYS 1320G. Calculus -Based Physics II**3 Credits (3)**

A calculus level treatment of classical electricity and magnetism. It is strongly recommended that this course is taken at the same time as Calculus-based Physics II laboratory. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G and MATH 1521G or higher.

Learning Outcomes

1. Apply the concepts of electric charge, electric field and electric potential to solve problems.
2. Sketch the electric field in the vicinity of point, line, sheet, and spherical distributions of static electric charge.
3. Sketch the magnetic field in the vicinity of line, ring, sheet, and solenoid distributions of steady current.
4. Describe the relationship between electric field and electric potential.
5. Calculate the Lorentz force on a moving charge for simple geometries of the fields and use it to analyze the motion of charged particles.
6. Apply the integral forms of Maxwell's equations.
7. Calculate the energy of electromagnetic fields.
8. Analyze DC circuits.

PHYS 1320L. Calculus -Based Physics II Lab**1 Credit (3P)**

A series of Laboratory experiments associated with the material presented in Calculus-Based Physics II. Students will apply the principles and concepts highlighting the main objectives covered in coursework for Calculus-Based Physics II.

Prerequisite(s)/Corequisite(s): PHYS 1320G. Prerequisite(s): A C- or better in PHYS 2110L or PHYS 1310L.

Learning Outcomes

1. Develop a reasonable hypothesis.
2. Work effectively as part of a team.
3. Take measurements and record measured quantities to the appropriate precision.
4. Estimate error sources in experimental techniques.
5. Apply appropriate methods of analysis to raw data, including using graphical and statistical methods via computer-based tools.
6. Determine whether results and conclusions are reasonable.
7. Present experimental results in written form in appropriate style and depth.
8. Experience the relationship between theory and experiment

PHYS 1321. Problems in Calculus-Based Physics II**0.5-1 Credits (.5-1)**

This is a supplemental course for Calculus-based Physics II.

Corequisite(s): PHYS 1320G.

PHYS 2110. Mechanics**3 Credits (3)**

Newtonian mechanics.

Prerequisite(s)/Corequisite(s): MATH 1511G or higher.

PHYS 2110L. Experimental Mechanics**1 Credit (3P)**

Laboratory experiments associated with the material presented in PHYS 2110. Science majors.

Prerequisite(s)/Corequisite(s): PHYS 2110.

PHYS 2111. Supplemental Instruction to PHYS 2110**0.5-1 Credits (.5-1)**

This Optional workshop as a supplement to PHYS 2110. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.

Corequisite(s): PHYS 2110.

Learning Outcomes

1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2110, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2120. Heat, Light, and Sound**3 Credits (3)**

Calculus-level treatment of thermodynamics, geometrical and physical optics, and sound. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 1511G or higher.

PHYS 2120L. Heat, Light, and Sound Laboratory**1 Credit (3P)**

Laboratory experiments associated with the material presented in PHYS 2120. Science majors.

Prerequisite(s)/Corequisite(s): PHYS 2120. Prerequisite(s): a C- or better in PHYS 2110L or PHYS 1310L.

PHYS 2121. Supplemental Instruction to PHYS 2120**0.5-1 Credits (.5-1)**

This optional workshop supplements PHYS 2120 "Heat, Light, and Sound". Students actively apply concepts and methods introduced in PHYS 2120 to problem solving and quantitative analysis. May be repeated up to 1 credits.

Corequisite(s): PHYS 2120.

Learning Outcomes

1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2121, apply quantitative analysis to solve problems involving wave propagation and interference, geometric optics, heat transfer and thermodynamics.
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline

PHYS 2140. Electricity and Magnetism**3 Credits (3)**

Charges and matter, the electric field, Gauss law, the electric potential, the magnetic field, Ampere's law, Faraday's law, electric circuits, alternating currents, Maxwell's equations, and electromagnetic waves. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 1521G. Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 1511G or higher.

PHYS 2140L. Electricity & Magnetism Laboratory**1 Credit (3P)**

Laboratory experiments associated with the material presented in PHYS 2140.

Prerequisite(s)/Corequisite(s): PHYS 2140. Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G.

PHYS 2141. Supplemental Instruction to PHYS 2140**0.5-1 Credits (.5-1)**

Optional workshop as a supplement to PHYS 2140. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.

Corequisite(s): PHYS 2140.

PHYS 2230G. General Physics for Life Science I**3 Credits (3)**

This algebra-based introduction to general physics covers mechanics, waves, sound, and heat. Special emphasis is given to applications in the life sciences. This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT. May be repeated up to 3 credits.

Prerequisite(s): A C or better in MATH 1215 or higher.

Learning Outcomes

1. Modeling: analyze real-world phenomena by deciding what information is relevant and constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain phenomena or function; use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text; critique assumptions and determine how to test the validity of a model and use the comparison of experimental data and prediction to refine the model.
2. Conceptual understanding: describe the motion of any object in terms of displacement, velocity, and acceleration; analyze external forces acting on an object and determine if a system is in equilibrium or relate the net force to changes in motion; predict or analyze motion using conservation laws for energy and momentum; analyze forces and torques for a rigid object in static equilibrium; for a static fluid determine pressure and the buoyant force; apply idealized models of fluid flow to the circulatory system; describe the properties of pressure waves known as sound, apply the model of standing waves to musical instruments and discuss how sound is used to sense the environment; predict qualitative changes in the internal energy of a thermodynamic system when energy has been transferred due to work or heat and justify those predictions using conservation of energy (First law of thermodynamics). Identify which heat transfer processes occur in a described situation.
3. Quantitative reasoning: use a physics problem-solving strategy (Identify relevant concepts; Introduce and study simplified models; Use symmetry arguments; Establish the relation between known and unknown quantities; Calculate a quantitative result using appropriate mathematical methods; Self-check reasonableness of assumptions and solutions); use scientific notation accurately and convert units if necessary.
4. Communicating scientific information: interpret or generate graphs or other visual representations and be able to switch between various representations including text, mathematical description, or diagrams.

PHYS 2230L. Laboratory to General Physics for Life Science I**1 Credit (1)**

Laboratory experiments in topics associated with material presented in PHYS 2230G.

Prerequisite(s)/Corequisite(s): PHYS 2230G. Restricted to Las Cruces campus only.

PHYS 2231. Supplemental Instruction to General Physics for Life Sciences I**1 Credit (1)**

This optional workshop supplements Physics for Life Sciences I. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.

Corequisite(s): PHYS 2230G.

Learning Outcomes

1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2230, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2240G. General Physics for Life Science II**3 Credits (3)**

This algebra-based course covers electricity, magnetism, light, atomic physics, and radioactivity. Special emphasis is given to applications in the life sciences. This course is recommended for students in the life sciences and those preparing for the physics part of the MCAT. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in PHYS 1230G or PHYS 2230G, and MATH 1220G or higher.

Learning Outcomes

1. Modeling: analyze real world phenomena by constructing simplified idealized models (an abstract description) that allow making predictions or explaining a phenomena or function; use multiple representations to build and communicate the model, including sketches, mathematical expressions, diagrams or graphs; decide what information is relevant and critique assumptions and models of others; determine how to test the validity of a model and use comparison of experimental data and prediction to refine the model.
2. Conceptual understanding: electric or magnetic fields can be used to describe interactions of objects that contain charges with their surroundings; changes that occur as a result of interactions are constrained by conservation laws (such as conservation of energy, conservation of charge or conservation of nucleon number); many macroscopic properties of materials can be described using microscopic models or related to their geometry; electromagnetic radiation can be modeled as a wave or as fundamental particles (photons); the direction of propagation of a wave may change when it encounters a boundary surface between two media of different properties (reflection or refraction); the spontaneous radioactive decay of nuclei is described by probability.
3. Quantitative reasoning: apply quantitative analysis and appropriate mathematical reasoning to describe or explain phenomena; use scientific notation accurately and convert units if necessary.
4. Communicating scientific information: interpret or generate graphs or other visual representations (e.g. field lines, equipotential lines) and be able to switch between various representations including text, mathematical description, or diagrams.

PHYS 2240L. Laboratory to General Physics for Life Science II**1 Credit (1)**

Laboratory experiments in topics associated with material presented in PHYS 2240.

Prerequisite(s)/Corequisite(s): PHYS 2240G. Restricted to Las Cruces campus only.

PHYS 2241. Supplemental Instruction to General Physics for Life Sciences II**1 Credit (1)**

This optional workshop is a supplement to Physics for Life Science II. The tutorial sessions focus on reasoning and hands-on problem solving. May be repeated up to 1 credits.

Corequisite(s): PHYS 2240G.

Learning Outcomes

1. analyze real world phenomena by constructing simplified idealized models and appropriate mathematical reasoning to make predictions or explain a phenomena or function.
2. use multiple representations to build, interpret and communicate the model, including visual representations such as sketches or diagrams, mathematical expressions, graphs, or text.
3. in the contexts of concepts and physical laws discussed in PHYS 2240, apply quantitative analysis to solve problems, including the use of scientific notation, unit conversion and vector algebra.
4. self-check reasonableness of assumptions and solutions, making use of limiting cases or symmetry arguments.
5. develop learning strategies and use metacognition to promote thinking in the discipline.

PHYS 2996. Special Topics**1-3 Credits**

Topics to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Learning Outcomes

1. Varies

PHYS 2997. Independent Study**1-3 Credits**

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

Learning Outcomes

1. Varies

PHYS 303V. Energy and Society in the New Millennium**3 Credits (3)**

Traditional and alternative sources of energy. Contemporary areas of concern such as the state of depletion of fossil fuels; nuclear energy, solar energy, and other energy sources; environmental effects; nuclear weapons; and health effects of radiation. Discussion of physical principles and impact on society. Focus on scientific questions involved in making decisions in these areas. No physics background required.

PHYS 304. Forensic Physics**4 Credits (3+3P)**

Theories, laboratory, and field techniques in the area of forensic physics.

PHYS 305V. The Search for Water in the Solar System**3 Credits (3)**

Examines the formation, abundance and ubiquity of water in our Solar System stemming from comets, Martian and Lunar poles, Earth's interior and into the outer reaches of the Solar System. Topics will include nuclear synthesis, Solar System formation, remote sensing, as well as past, present and future NASA missions for water.

PHYS 315. Modern Physics**3 Credits (3)**

An introduction to relativity and quantum mechanics, with applications to atoms molecules, solids, nuclei, and elementary particles. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in MATH 2530G and PHYS 2140 or PHYS 1320G.

PHYS 315 L. Experimental Modern Physics**3 Credits (1+6P)**

Elementary laboratory in modern physics which supports the subject matter in PHYS 315. Required for physics majors. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): PHYS 315. **Prerequisite(s):** a C- or better in PHYS 2140L or 1320L.

PHYS 316. Supplemental Instructions to PHYS 315**1 Credit (1)**

This optional workshop supplements PHYS 315 "Modern Physics". Students actively apply concepts and methods introduced in PHYS 315 to problem solving and quantitative analysis.

Corequisite(s): PHYS 315.

PHYS 325. Intermediate Experimental Physics**3 Credits (1+6P)**

An exploration of a variety of experimental techniques in physics with an emphasis on the proper determination of statistical and systematic uncertainties. Students will work in teams and prepare professional written and oral reports of their work. This course cannot be used to replace M E 345 for students majoring in engineering.

Prerequisite(s)/Corequisite(s): PHYS 315. **Prerequisite(s):** a C- or better in PHYS 2140L or PHYS 1320L.

Learning Outcomes

1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
2. Communication: an ability to communicate effectively with a range of audiences.
3. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
4. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
5. Collect, Analyze, and Interpret Data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 350. Special Topics**1-3 Credits**

Lectures, demonstrations, and discussions on such topics as lasers and holography, energy sources, clouds, and biophysics. May be repeated for a maximum of 12 credits under different subtitles.

PHYS 380. Individual Study**1-3 Credits**

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHYS 395. Intermediate Mathematical Methods of Physics**3 Credits (3)**

Introduction to the mathematics used in intermediate-level physics courses. Topics include vector calculus, curvilinear coordinates, matrices, linear algebra, function spaces, partial differential equations, and special functions. This course cannot be used to replace M E 228 or M E 328 for students majoring in engineering. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 392. **Prerequisite(s):** a C- or better in MATH 2530G.

Learning Outcomes

1. Problem solving: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. Ability to learn on your own: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

PHYS 400. Undergraduate Research**1-3 Credits**

May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHYS 420. Capstone Project I**3 Credits (3P)**

Application of engineering physics principles to a significant design project. Includes teamwork, written and oral communication and realistic technical, economic and public safety requirements.

PHYS 421. Capstone Project II**3 Credits (3P)**

Continuation of PHYS 420.

PHYS 450. Selected Topics**1-3 Credits**

Readings, lectures or laboratory studies in selected areas of physics. May be repeated for a maximum of 12 credits.

PHYS 451. Intermediate Mechanics I**3 Credits (3)**

Newtonian mechanics, including an introduction to the Lagrangian formulation. Topics include central force motion, rigid body motion, noninertial reference frames, oscillating systems, and classical scattering.

Prerequisite(s)/Corequisite(s): MATH 392. Prerequisite(s): a C- or better in PHYS 2110 or PHYS 1310G, and MATH 2530G.

Learning Outcomes

1. Set up equations of motion for classical mechanical systems and solve them. Identify conserved quantities and understand the circumstances under which they arise (symmetries); in particular, know how to use conservation of energy, momentum, angular momentum to solve problems. Fluently use three-dimensional calculus as a language to do the above; be able to use spherical and cylindrical coordinates. Understand the paradigmatic examples of the harmonic oscillator, central force (in particular, gravitational) motion and rigid body motion, which serve as starting points for investigating more complicated realistic problems.

PHYS 454. Intermediate Modern Physics I**3 Credits (3)**

Introduction to quantum mechanics, focusing on the role of angular momentum and symmetries, with application to many atomic and subatomic systems. Specific topics include intrinsic spin, matrix representation of wave functions and observables, time evolution, and motion in one dimension. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 392 and PHYS 395. Prerequisite(s): a C- or better in PHYS 315.

PHYS 455. Intermediate Modern Physics II**3 Credits (3)**

Continuation of subject matter of PHYS 454. Specific topics include rotation and translation in three dimensions, solution of central potential problems, perturbation theory, physics of identical particles, scattering theory, and the interaction between photons and atoms. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in PHYS 454, MATH 392, and PHYS 395.

PHYS 461. Intermediate Electricity and Magnetism I**3 Credits (3)**

The first part of a two-course sequence in classical electrodynamics. Covered topics include static electric and magnetic fields, Laplace's and Poisson's equations, electromagnetic work and energy, Lorentz force, Gauss's, Biot-Savart, and Ampere's laws, Maxwell's equations, as well as electric and magnetic fields in matter. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): MATH 392 and PHYS 395. Prerequisite(s): a C- or better in PHYS 2140 or PHYS 1320G or equivalent and a C- or better in MATH 2530G.

PHYS 462. Intermediate Electricity and Magnetism II**3 Credits (3)**

Continuation of subject matter of PHYS 461. Covered topics include Maxwell's equations and their applications, electromagnetic waves, reflection, refraction, dispersion, radiating systems, interference and diffraction, as well as Lorentz transformations and relativistic electrodynamics. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in PHYS 461, MATH 392, and PHYS 395.

PHYS 468. Intermediate X-ray Diffraction**3 Credits (3)**

Introduction to x-ray diffraction and reflectivity spectra. Topics include X-ray sources and detectors, atomic spectra, characteristic x-rays, thermionic emission, synchrotron radiation, instrument components, and beam conditioners. Prerequisite(s): a C- or better in PHYS 315 and PHYS 325

Learning Outcomes

1. Knowledge of structural properties of materials Experimental x-ray characterization techniques Presentation and writing skills in the discipline Ethics, teamwork, and career opportunities

PHYS 471. Modern Experimental Optics**3 Credits (1+6P)**

Cumulative experience course in optics related to the material presented in PHYS 473 and PHYS 489.

Prerequisite: a C- or better in PHYS 315 and (PHYS 315 L or PHYS 325).

Learning Outcomes

1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communication: an ability to communicate effectively with a range of audiences. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 475. Advanced Physics Laboratory**3 Credits (3P)**

Cumulative experience course involving experiments in atomic, molecular, nuclear, and condensed-matter physics.

Prerequisite: a C- or better in PHYS 315 and (PHYS 315 L or PHYS 325).

Learning Outcomes

1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communication: an ability to communicate effectively with a range of audiences. Ethical and Professional Responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, Analyze, and Interpret Data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 476. Computational Physics**3 Credits (3)**

Scientific visualization, numerical differentiation and interpolation, numerical integration, root finding, linear algebra, eigensystems, ODE's, Boundary value problems, PDE's, Monte-Carlo calculations, data description and analysis, Fast Fourier Transforms, and applications to advanced physics problems. Recommended is the knowledge of a programming language.

Prerequisite(s): a C- or better in PHYS 1111 or equivalent and MATH 392.

Learning Outcomes

1. learn how to use computers for solving problems in the physical sciences,
2. obtain skills to implement numerical simulation and modeling strategies,
3. learn how to monitor and analyze data graphically, during and after computation,
4. obtain workflow organization skills needed for the solution of complicated systems.

PHYS 478. Fundamentals of Photonics**4 Credits (3+3P)**

Ray, wave and guided optics, lasers and thermal sources, radiometry, photon detection and signal-to-noise ratio. Elements of photonic crystals, polarization, acousto-optics, electro-optics, and optical nanostructures. Taught with E E 528. Recommended foundation: E E 473 /PHYS 473.

Crosslisted with: E E 478.

Prerequisite: C- or better in PHYS 1320G or PHYS 2120.

Learning Outcomes

1. Understand the fundamentals of the different theories of light including ray, wave, electromagnetic (vector) and photon optics, and how these theories are represented mathematically and on a computer. Develop the ability to perform calculations for the different theories (e.g., ray tracing, wave interference, polarization calculus, photon detection) to determine the propagation characteristics and describe the manipulation of light. Gain insight and experience with materials and devices for manipulating and detecting light (e.g., glass, mirrors, lenses, fiber optics, polarization elements, liquid crystals, semiconductors, and photodiodes). Apply the theoretical, mathematical, and practical understanding of optics to describe real-world applications of light technology with supporting analysis and calculations.

PHYS 480. Thermodynamics**3 Credits (3)**

Thermodynamics and statistical mechanics. Basic concepts of temperature, heat, entropy, equilibrium, reversible and irreversible processes.

Applications to solids, liquids, and gases. May be repeated up to 3 credits.

Prerequisite(s): a C- or better in PHYS 2120, PHYS 315, and MATH 2530G.

PHYS 485. Independent Study**1-3 Credits**

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

PHYS 488. Introduction to Condensed Matter Physics**3 Credits (3)**

Crystal structure, X-ray diffraction, energy band theory, phonons, cohesive energy, conductivities, specific heats, p-n junctions, defects, surfaces, and magnetic, optical, and low-temperature properties.

Prerequisite: a C- or better in PHYS 315.

Learning Outcomes

1. Learn the fundamental concepts of solid-state physics: classification of solids, crystal structure, band structure of solids, lattice vibrations, optical and magnetic properties of solids. Develop an ability to formulate and solve complex problems in solid state physics by applying the fundamental principles of physics and mathematics. Develop and ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 489. Introduction to Modern Materials**3 Credits (3)**

Structure and mechanical, thermal, electric, and magnetic properties of materials. Modern experimental techniques for the study of material properties.

Prerequisite: a C- or better in PHYS 315.

Learning Outcomes

1. Learn the fundamental concepts of the physics of modern materials, such as crystal structure, properties of materials, and experimental techniques. Develop an ability to formulate and solve complex problems in the area of physics of modern materials by applying the principles of physics and mathematics. Develop an ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 493. Experimental Nuclear Physics**3 Credits (1+6P)**

Cumulative experience course in nuclear physics such as measurement of radioactivity, absorption of radiation, nuclear spectrometry.

Prerequisite: a C- or better in PHYS 315 and (PHYS 315L or PHYS 325).

Learning Outcomes

1. Design within constraints: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors. Communications: an ability to communicate effectively with a range of audiences. Ethical and professional responsibilities: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. Teamwork: an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. Collect, analyze, and interpret data: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

PHYS 495. Mathematical Methods of Physics I**3 Credits (3)**

Applications of mathematics to experimental and theoretical physics. Topics include vector analysis, Fourier series and transforms, Green's functions, special functions, complex variables, tensor algebra and analysis.

Prerequisite(s): a C- or better in MATH 392 and PHYS 395.

Learning Outcomes

1. Deploy the tools of vector analysis and expansion into complete sets of functions to treat problems arising, e.g., in electrodynamics. Understand the elements of functional analysis underpinning, e.g., quantum mechanics, such as representations, operators and their inverses and spectra. Evaluate integrals of analytic functions using the calculus of residues. Take advantage of the transformation behavior, under symmetry operations, of representations of physical quantities, by casting physical relations in tensor language.

PHYS 500. Special Topics Seminar**1-2 Credits**

Treatment of topics not covered by regular courses. Graded S/U. May be repeated.

PHYS 511. Mathematical Methods of Physics I**3 Credits (3)**

Applications of mathematics to experimental and theoretical physics. Topics include vector analysis, Fourier series and transforms, Green's functions, special functions, complex variables, tensor algebra and analysis.

Learning Outcomes

1. Deploy the tools of vector analysis and expansion into complete sets of functions to treat problems arising, e.g., in electrodynamics. Understand the elements of functional analysis underpinning, e.g., quantum mechanics, such as representations, operators and their inverses and spectra. Evaluate integrals of analytic functions using the calculus of residues. Take advantage of the transformation behavior, under symmetry operations, of representations of physical quantities, by casting physical relations in tensor language.

PHYS 520. Selected Topics**1-3 Credits**

Formal treatment of graduate-level topics not covered in regular courses. May be repeated for a maximum of 9 credits.

Prerequisites: graduate standing, consent of instructor, and selection of a specific topic prior to registration.

PHYS 521. Individual Study**1-3 Credits**

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisites: graduate standing, consent of instructor, and selection of a specific topic prior to registration.

PHYS 551. Classical Mechanics**3 Credits (3)**

Lagrangian and Hamiltonian formulation of dynamics. Advanced treatments of most topics listed under PHYS 451, plus canonical transformations and Hamilton-Jacobi theory. PHYS 451 strongly recommended.

PHYS 554. Quantum Mechanics I**3 Credits (3)**

Wave function, indeterminacy, classical limit. Schrodinger equation. Atomic and nuclear systems. Angular momentum, intrinsic spin, identical particles. Scattering theory. Mathematical formalism, symmetry and conserved quantities. Perturbation theory. Dirac theory, introduction to quantized fields.

PHYS 451 and PHYS 454 strongly recommended.

PHYS 555. Quantum Mechanics II**3 Credits (3)**

Continuation of topics in PHYS 554.

Prerequisites: PHYS 554 or consent of instructor.

PHYS 561. Electromagnetic Theory I**3 Credits (3)**

Detailed advanced treatments of most topics listed under PHYS 461, PHYS 462, plus multipole radiation, collisions of charged particles and bremsstrahlung, scattering, and radiation reaction. PHYS 461 and PHYS 462 strongly recommended.

PHYS 562. Electromagnetic Theory II**3 Credits (3)**

Continuation of topics in PHYS 561.

Prerequisites: PHYS 561 or consent of instructor.

PHYS 568. Elements of X-ray Diffraction**3 Credits (3)**

Same as PHYS 468, but additional work required. Crosslisted with: CHME 588.

PHYS 571. Advanced Experimental Optics**3 Credits (3)**

Taught with PHYS 471 with additional work required at the graduate level. Consent of Instructor required.

Prerequisite(s): PHYS 473 or PHYS 562.

PHYS 575. Advanced Physics Laboratory**3 Credits (3P)**

Selected experiments in atomic, molecular, nuclear and condensed-matter physics.

PHYS 576. Advanced Computational Physics I**3 Credits (3)**

Advanced treatment of topics listed under PHYS 476 plus additional work. Applications of numerical methods to advanced physics problems.

Recommended is the knowledge of a programming language.

Learning Outcomes

1. learn to numerically solve problems that require higher mathematical and theoretical analysis,
2. experience how graduate research will be advanced and accelerated by the use of scientific computing skills.

PHYS 584. Statistical Mechanics**3 Credits (3)**

Thermodynamics review. Probability, entropy, equilibrium. Canonical and grand canonical ensembles. Classical and quantum statistics. Degenerate and classical gases. Application to the equilibrium properties of solids, liquids, and gases. Kinetic theory and transport processes.

PHYS 588. Condensed Matter Physics**3 Credits (3)**

Same as PHYS 488, but additional work required.

Learning Outcomes

1. Learn the fundamental concepts of solid-state physics: classification of solids, crystal structure, band structure of solids, lattice vibrations, optical and magnetic properties of solids. Develop an ability to formulate and solve complex problems in solid state physics by applying the fundamental principles of physics and mathematics. Develop and ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 589. Modern Materials**3 Credits (3)**

Same as PHYS 489 with differentiated assignments for graduate students. PHYS 554 recommended.

Learning Outcomes

1. Learn the fundamental concepts of the physics of modern materials, such as crystal structure, properties of materials, and experimental techniques. Develop an ability to formulate and solve complex problems in the area of physics of modern materials by applying the principles of physics and mathematics. Develop an ability to acquire and apply new knowledge using appropriate learning strategies.

PHYS 591. Advanced High-Energy Physics I**3 Credits (3)**

Taught with PHYS 491 with additional work required at the graduate level.

Prerequisite(s): PHYS 555 or consent of instructor.

PHYS 593. Advanced Experimental Nuclear Physics**3 Credits (1+6P)**

Advanced experimental investigation of topics such as measurement of radioactivity, absorption of radiation, and nuclear spectrometry.

PHYS 597. Space Plasma Physics**3 Credits (3)**

Same as PHYS 497 but with added requirements.

PHYS 599. Master's Thesis**1-15 Credits (1-15)**

Thesis.

PHYS 600. Research**1-15 Credits**

Doctoral research. May be repeated.

PHYS 620. Advanced Topics in Physics**1-3 Credits**

Advanced formal treatment of topics not covered in regular courses. May be repeated for a maximum of 9 credits.

Prerequisite: consent of instructor.

PHYS 650. General Relativity I**3 Credits (3)**

Basic foundations and principles of general relativity, derivation of the Einstein field equations and their consequences, the linearized theory, the Bel-Petrov classification of the curvature tensor, derivation of the Schwarzschild solution and the four basic tests of general relativity.

Prerequisite(s): PHYS 511 or PHYS 561 or consent of instructor.

PHYS 680. Independent Study**1-3 Credits**

Individual analytical or laboratory studies directed by a faculty member. May be repeated for a maximum of 6 credits.

Prerequisite: graduate standing or consent of instructor.

PHYS 688. Advanced Condensed Matter Physics**3 Credits (3)**

Continuation of the advanced condensed matter physics presented in PHYS 588. Topics include electronic structure methods, optical, magnetic, and transport properties of solids, semiconductors, crystalline defects, nanostructures, and noncrystalline solids. PHYS 588 strongly recommended.

Learning Outcomes

1. Learn the fundamental concepts of advanced condensed state physics: band theory of solids, electronic structure methods, optical and magnetic properties of solids, bulk semiconductors, and properties of nano-structured materials. Develop an ability to formulate and solve complex problems in advanced condensed matter physics. Develop an ability to study independently and acquire new knowledge using appropriate learning strategies.

PHYS 689. Advanced Modern Materials**3 Credits (3)**

Advanced topics in the physics of modern materials, such as crystalline, amorphous, polymeric, nanocrystalline, layered, and composite materials and their surfaces and interfaces. PHYS 555, PHYS 588, and PHYS 589 recommended.

Learning Outcomes

1. Learn the fundamental concepts of the physics of modern materials, such as crystalline, amorphous, polymeric, nanostructured, layered, and composite materials. Develop an ability to formulate and solve complex problems in the area of advanced physics of modern materials. Develop an ability to study independently and acquire new knowledge using appropriate learning strategies.

PHYS 691. Quantum Field Theory I**3 Credits (3)**

Path integrals, gauge invariance, relativistic quantum mechanics, canonical quantization, relativistic quantum field theory, introduction to QED.

Prerequisites: PHYS 555 and PHYS 562, or consent of instructor.

PHYS 692. Quantum Field Theory II**3 Credits (3)**

QED, running coupling constant, QCD, electroweak theory, asymptotic freedom, deep inelastic scattering, basic QCD phenomenology, path integrals in quantum field theory, lattice QCD.

Prerequisite: PHYS 691 or consent of instructor.

PHYS 700. Doctoral Dissertation**1-15 Credits (1-15)**

Dissertation.

PL-S-PARALEGAL SERVICES

PL S 160. Legal System for the Paralegal**3 Credits (3)**

Introduction to the court system, administrative agencies, functions of law offices, and professional conduct and legal ethics. Restricted to: Community Colleges only.

Prerequisite(s): ACT standard score in English of 16 or higher or a Compass score 76 or higher; for those scoring 13-15 in English on ACT or 35-75 on Compass, successful complete of CCDE 105N or CCDE 110N; for those scoring 12 or below on the ACT standard score in English or 34 or below on the Compass, successful completion of CCDE 105N & CCDE 110N.

PL S 161. Legal Terminology**3 Credits (3)**

Survey of the language of the law that will serve either as an introductory course or as a review course to prepare students for the certification test.

PL S 162. The Virtual Law Office**3 Credits (3)**

The Virtual Law Office class is a 'hands-on', project oriented course designated to provide the student with the basic law office skills needed to function successfully in a law office setting. The student will gain a practical, working knowledge of the procedures necessary to work in a law office. The skills learned in the class will directly translate to real life situations. Restricted to: Community Colleges only.

Prerequisite(s): PL S 160.

PL S 180. Constitutional Law for the Paralegal**3 Credits (3)**

Case standing of the law of the Constitution and Bill of Rights with regard to day-to-day applications in the law practice. Documents dealing with constitutional problems in both civil and criminal areas of law will be drafted and discussed.

Prerequisite: PL S 160.

PL S 190. Criminal Law for the Paralegal**3 Credits (3)**

Introduction to federal and state criminal law; criminal proceedings, prosecution and defense, sentencing and appeal.

Prerequisite: PL S 160.

PL S 200. Legal Ethics for the Paralegal**3 Credits (3)**

Introduction to ethical dilemmas faced in the workforce and the rules of ethics developed by the American Bar Association, various national paralegal organizations, and the Supreme Court of New Mexico. Restricted to: Community Colleges only.

Prerequisite(s): PL S 160.

PL S 203. Immigration Law**3 Credits (3)**

Survey of the basics of immigration law including the rights and obligations of citizenship and the naturalization process.

Prerequisite: PL S 160.

PL S 221. Internship I**2-4 Credits**

Work experience that directly relates to a student's major field of study that provides the student an opportunity to explore career paths and apply knowledge and theory learned in the classroom. Internships can be paid or unpaid. Students are supervised/evaluated by both the employer and the instructor. Restricted to Community Colleges campuses only.

Prerequisite(s): PL S 274.

PL S 222. Internship II**1-3 Credits**

Continuation of PL S 221. Each credit requires specified number of hours of on-the-job work experience. Restricted to Community Colleges campuses only.

Prerequisite(s): PL S 221.

PL S 231. The Law of Commerce for the Paralegal**3 Credits (3)**

Law of contracts, negotiable instruments, bank transfers, secured transactions, debtor-creditor relations, agency, and business types and their formation. Students will study the relevant statutes as well as draft documents associated with these types of legal practice. Restricted to: Community Colleges only.

Prerequisite(s): PL S 160.

PL S 272. Bankruptcy Law for the Paralegal**3 Credits (3)**

Individual and corporate bankruptcy; the basic principles and processes of bankruptcy law as a system of debtor relief and debt collection.

Prerequisite: PL S 160.

PL S 274. Legal Research and Writing for the Paralegal I**3 Credits (3)**

Legal memoranda, briefs, and pleadings will be prepared and written based on the student's original research. Research materials and techniques will be identified and studied; introduction of computer usage in legal research.

Prerequisite: PL S 160 and ENGL 1110G.

PL S 275. Tort and Insurance for the Paralegal**3 Credits (3)**

Primary legal principles of tort and insurance law and means of establishing insurance plans, types of torts and insurance, as well as use of specific forms and procedures relating to these areas.

Prerequisite: PL S 160.

PL S 276. Wills, Trusts, and Probate for the Paralegal**3 Credits (3)**

Cases and statutes dealing with wills, trusts, and probate. Emphasis on preparation and drafting of documents and the application of the law and documents to the client's problems.

Prerequisite: PL S 160.

PL S 277. Family Law for the Paralegal**3 Credits (3)**

Methods of conducting client interviews and drafting of pleadings and research relative to families. Laws relating to marriage, divorce, custody, support, adoption, name change, guardianship, and paternity.

Prerequisite: PL S 160.

PL S 278. Litigation for the Paralegal**3 Credits (3)**

The law of procedure and evidence will be considered through rules and cases. Case situations will be used to identify and solve problems.

Prerequisite: PL S 160.

PL S 279. Legal Research and Writing for the Paralegal II**3 Credits (3)**

Continuation of PL S 274. Advanced training in legal research problems with a focus on analysis, writing, and preparation of sophisticated legal memoranda and documents.

Prerequisite: PL S 274.

PL S 280. Interviewing and Investigation for the Paralegal**3 Credits (3)**

Techniques of legal interviewing and investigation with emphasis on development of human relations and communication skills.

Prerequisite: PL S 160.

PL S 298. Independent Study**1-3 Credits (1-3)**

Individual studies directed by consenting faculty with prior approval by department head. Restricted to Community Colleges campuses only.

Prerequisite(s): PL S 160.

POLS-POLITICAL SCIENCE

POLS 1110G. Introduction to Political Science**3 Credits (3)**

This course covers fundamental concepts in political science, such as political theories, ideologies, and government systems.

Learning Outcomes

1. Construct reasoned civic discourse to advocate a stance or examine alternate positions.
2. Identify fundamental concepts and theories in political science.
3. Analyze data and information in order to gain a deeper understanding of the material.
4. Articulate how the public influence and are influenced by politics.
5. Identify and compare government systems from democracy to authoritarian, as well as models of analysis of contemporary international relations.

POLS 1111. Introductory Government Seminar**1 Credit (1)**

Introduction to the government major. Designed to assist students in planning college experience and preparing for professional or advanced educational opportunities upon graduation. Graded: S/U. Restricted to: Main campus only.

Learning Outcomes

1. This course is designed for the "beginning" government major.
2. Its goal is to improve your educational experience at the university and within the Department of Government. In this class we hope to develop some basic skills necessary for successful completion of a degree in Government.
3. These include the skills of critical reading, critical writing, oral presentation and research methods.
4. Additionally, we will use this seminar to introduce you to Government faculty, to plan your government degree and to acquaint you with the services and opportunities the department and the university has to offer.
5. Finally, we hope to begin the discussion of where you will go next, when you complete your degree in Government.

POLS 1120G. American National Government**3 Credits (3)**

This course explains the role of American national government, its formation and principles of the Constitution; relation of state to the national government; political parties and their relationship to interest groups. This course also explains the structure of the legislative, executive, and judicial branches.

Learning Outcomes

1. Explain the historical and political foundations of the government of the United States;
2. Explain the precursors to, and the development and adoption of the United States Constitution;
3. Explain the United States federal system, the basics of federalism, and the changing relationship of state and federal power;
4. Describe the power, structure and operation of the main institutions of government, namely the legislative, executive, judicial, and the federal bureaucracy;
5. Explain the development and role of political parties and interest groups;
6. Identify the constitutional basis of civil rights and civil liberties and their changing interpretation; and
7. Describe the role of demographics, public opinion and the media in American politics.

POLS 1130G. Issues in American Politics**3 Credits (3)**

This course is designed to introduce the students to the contemporary study of American political issues. The course analysis of government policies, examining various approaches to the economy, democracy and the structure and the function of American political institutions.

Learning Outcomes

1. Explain the basic themes and concepts of political science and their application to contemporary issues.
2. Explain the major forces, interests, and institutions of American democratic politics.
3. Describe and define how beliefs, assumptions, and values are influenced by factors such as politics, geography, economics, culture, biology, history, and social institutions.

POLS 2120G. International Relations**3 Credits (3)**

This course covers the analysis of significant factors in world politics, including nationalism, national interest, political economy, ideology, international conflict and collaboration, balance of power, deterrence, international law, and international organization.

Learning Outcomes

1. Explain the interrelationships between countries and people in the world,
2. Demonstrate an awareness of current events in the world.
3. Describe several theories of International Relations
4. Explain and identify theories of power and decision making among states in the world.
5. Describe and evaluate issues that relate to International Politics, and how individuals are affected by them.
6. Describe the role of Intergovernmental Organizations in International Politics.
7. Identify the role war plays in International Politics.
8. Explain how economics is intertwined with International Politics.
9. Demonstrate an understanding of role of international terrorism and its impacts on global diplomacy.
10. 1Articulate how beliefs, assumptions, and values are influenced by factors such as politics, geography, economics, culture, history, government, and social institutions.

POLS 2996. Special Topics**3 Credits (3)**

Specific topics to be announced in Schedule of Classes. Community Colleges only. May be repeated for a maximum of 12 credits.

Learning Outcomes

1. Varies

POLS 300. Political Research Skills**3 Credits (3)**

Introduction to methods of political analysis and fundamentals of research design, including basic methods for the collection and analysis of political data.

POLS 308. Prepping for Law School Admissions Test**1 Credit (1)**

This workshop helps students prepare to take the Law School Admissions Test and apply for law school. Graded: S/U.

POLS 313. Model United Nations**3 Credits (3)**

Issues related to the United Nations and international law/organizations through simulations, discussions and research projects.

Prerequisites: GPA of 2.5 or better and consent of instructor.

POLS 314. Advanced Model UN**3 Credits (3)**

Advanced topics, research and preparation for Model United Nations activities. Consent of instructor required. Restricted to: Main campus only.

Prerequisite(s): POLS 313, minimum GPA 2.5.

POLS 315. Politics and Film**3 Credits (3)**

Exploration of political themes, images, and representation in film and other media. May be repeated for a maximum of 6 credits under different subtitles.

POLS 320. Domestic Policy**3 Credits (3)**

The course examines how U.S. public policy is made, including the players, politics, issues and power critical to the policy process. An interactive class that bridges theory and political action. Restricted to: Main campus only.

POLS 321. Topics in Public Policy**3 Credits (3)**

Course examines issues in public policy. May be repeated under different subtitles.

POLS 324. Environmental Policy**3 Credits (3)**

This introductory course explores environmental policy issues. Students study perspectives of policy-makers, political activists and policy analysts, and apply policy models to solve pressing environmental problems. Focus may be on U.S. or global concerns.

POLS 330. Introduction to Public Administration**3 Credits (3)**

What is public administration? Course examines public service, focusing on federal and state government. Issues include management and leadership, personnel, bureaucratic politics, organizational theory, personnel, budgeting and administrative law. Restricted to: Main campus only.

POLS 331. Special Topics in Public Administration**3 Credits (3)**

Special topics in public administration. May be repeated for a maximum of 6 credits under different subtitles.

POLS 335. Management of Nonprofit Organizations**3 Credits (3)**

This course provides an overview of a range of nonprofit management concerns and practices. Students will be challenged to assess their own theories of nonprofit accountability and excellence, while confronting critical issues facing the sector. Activities are designed to expand the management skills of students by offering analytical tools and knowledge, and providing opportunities to test the application of these skills.

POLS 343. Congress and the Legislative Process**3 Credits (3)**

This class reviews the history, structure, membership, operation, power and culture of the American Congress. Restricted to: Main campus only.

POLS 344. The American Presidency**3 Credits (3)**

A comprehensive overview of the U.S. presidency, including powers, electoral politics, decision-making styles, domestic and foreign policy, and relations with Congress, courts, media and interest groups.

POLS 345. The Supreme Court**3 Credits (3)**

This class studies the history and operation of the Supreme Court, as well as landmark cases that have shaped American government and the Court.

POLS 348. Political Parties and Interest Groups**3 Credits (3)**

Organization, principles, and functions of political parties and interest groups in the U.S.

POLS 350. Special Topics in American Government**3 Credits (3)**

Special topics in American government. May be repeated for a maximum of 6 credits under different subtitles.

POLS 353. Women, Politics and Administration**3 Credits (3)**

An examination of women's participation in U.S. electoral politics as voters, candidates, and officeholders; political activism in issue-based movements and strategies for affecting public policy; leadership as administrators and managers in public service agencies. Also explores the influence of feminism in changing women's roles socially, legally, and politically. Crosslisted with: GNDR 453

POLS 354. American Indian Politics**3 Credits (3)**

Introduction to American Indian tribal governments, politics, policy, and administration; historical and contemporary leadership of Indian Nations; and the history and current status of American Indian-U.S. relations. Students learn about Native peoples' cultural responses, forms of resistance, and adaptations to colonization. Restricted to: Main campus only.

POLS 360. International Relations**3 Credits (3)**

Introduction to world politics; fundamental international issues and problems.

POLS 361. Special Topics in International Relations**3 Credits (3)**

Course examines contemporary issues in international relations. May be repeated under different subtitles.

POLS 362. International Political Economy**3 Credits (3)**

Political factors in international economic relations; theories of political economy.

POLS 366. American Foreign Policy**3 Credits (3)**

Formulation, content and rationale of current foreign policies of the U.S.

POLS 367. Terrorism**3 Credits (3)**

An introductory course using an interdisciplinary framework to explore definitions, historical roots, contemporary manifestations and future trends in political terrorism.

POLS 370. Comparative Politics**3 Credits (3)**

Introduction to functional approaches to comparing similarities and differences among political systems.

POLS 371. Latin American Politics**3 Credits (3)**

Basic structure of politics in major Latin American countries; role of groups, including church, labor, and parties.

POLS 372. Special Topics in Comparative Politics**3 Credits (3)**

Course examines contemporary issues in comparative politics. May be repeated under different subtitles. Restricted to: Main campus only.

POLS 373. Resistance Movements in World Politics**3 Credits (3)**

Research on violent and non-violent resistance movements around the world. Focus on their origins, demands, ideologies, strategies and impacts in the post-Cold War context of economic globalization, US military power and new geopolitical dynamics.

POLS 378. U.S.-Mexico Border Politics**3 Credits (3)**

Comparative perspectives applied to the problems of the U.S.-Mexican border.

POLS 379. Mexican Politics**3 Credits (3)**

Introduction to the politics and government of contemporary Mexico.

POLS 380V. Contemporary World Political Ideologies**3 Credits (3)**

Introduction to the prevailing political ideologies in the modern world and the ways in which modern nations operating under one or more of these ideologies attempt to answer fundamental questions about the allocation and distribution of rights, liberties, and other things of value. In addition, the course work and discussions attempt to address recent political, social, and economic events in various areas of the world.

POLS 382. Classical Political Thought**3 Credits (3)**

Analysis of main currents in political thought from ancient Greece and Rome to the high Middle Ages.

POLS 383. Modern Political Thought**3 Credits (3)**

Historical and theoretical examination of political ideas and ideologies from Machiavelli to Nietzsche. Topics include liberalism, conservatism, romanticism, communism, and Nihilism.

POLS 385. American Political Thought**3 Credits (3)**

Introduction to major American thinkers and historical currents from colonial time to the present.

POLS 386. Political Economy**3 Credits (3)**

Analysis of political ideas concerning the role of the state in management of national economies, in both European and American contexts.

POLS 387. Religion and Politics**3 Credits (3)**

Survey of major points of interaction between politics and religion in the U.S., using theoretical, historical, and institutional analysis.

POLS 390. Special Topics in Public Law**3 Credits (3)**

Course examines various issues in public law. May be repeated under different subtitles.

POLS 391. Constitutional Law**3 Credits (3)**

The class explores the reasoning and political context of the Supreme Court cases that define the distribution and limits of governmental powers and duties under the U.S. Constitution, including separation of powers and federalism. Restricted to: Main campus only.

POLS 392. Civil Liberties**3 Credits (3)**

The course examines the reasoning and political context of major Supreme Court cases defining constitutional rights of free speech, religious liberty, free press and criminal procedural rights.

POLS 394. Judicial Process**3 Credits (3)**

Class examines the structure, function and purpose of the American judicial system. Restricted to: Main campus only.

POLS 395. Law and Society**3 Credits (3)**

Class critically explores the development, role and impact of law on our society, covering different theories of law, conceptions of justice and the values they reflect. These models are then applied to current legal issues. Not a class in legal reasoning, but one where students evaluate their beliefs about the legal system. Restricted to: Main campus only.

POLS 396. International Law**3 Credits (3)**

Nature, growth, and scope of law of nations, rights and obligations of states in peace and war, current issues.

POLS 399. New Mexico Law**3 Credits (3)**

New Mexico legal system, court structure and procedures; legal terms and concepts; constitutional, criminal, mass media, historical and social issues relating to New Mexico. Same as CJUS 399, HIST 399, JOUR 399, and SOCI 399.

POLS 405. Directed Readings**1-3 Credits**

Individualized readings. Course subtitled. May be repeated for a maximum of 6 credits. Graded S/U. Consent of instructor required.

POLS 406. Independent Study**1-3 Credits**

Individualized research. Course subtitled. May be repeated for a maximum of 6 credits. Consent of instructor required.

POLS 407. Workshop**1-6 Credits**

Focus on skills related to careers in government and political science. Specific topics announced in the Schedule of Classes; may be repeated for a total of 6 credits. Only 3 credits apply toward government major or minor requirements. Graded S/U.

POLS 410. Internship**1-12 Credits**

Hands-on experience working with public agencies, political campaigns, elected officials & non-profits. May be repeated for a maximum of 12 credits; only 3 credits apply toward government major or minor requirements. Consent of instructor required. Graded: S/U.

Prerequisite(s): Completion of 12 government credits, 2.5 GPA, junior and above standing.

POLS 411. Service Learning Experience**3 Credits (3)**

Experiential learning through a community service project. May be subtitled to reflect service activity. May be repeated for a total of 6 credits; only 3 credits apply toward government major or minor requirements.

Prerequisites: completion of 12 government credits, junior or above standing, and consent of instructor.

POLS 412. Practicum in Student Government**3 Credits (3)**

Research of issues in student government. Consent of instructor required. Graded: S/U.

Prerequisite(s): Student government participation, completion of 12 POLS credits, junior or senior standing.

POLS 415. Senior Seminar**2 Credits (2)**

Review and integration of political skills acquired in the Government Department. Students will prepare a professional portfolio for entry into the workforce, advanced study, and civic participation. Graded: S/U Grading (S/U, Audit).

POLS 468. Rebels, Guerrillas, and Terrorists in Modern Latin America**3 Credits (3)**

Explores history of rebels in Latin America. Examines guerilla struggles attaining national dimension. Focus on modern events, including Peru's Shining Path, Columbia's FARC, and Mexico's Zapatistas. Same as HIST 331.

POLS 469. Globalization**3 Credits (3)**

Analysis of the globalization process. Covers theories of globalization, the global economy, political globalization, global culture, transnational social movements, transnational migration and world labor market, global cities, and local-global linkages. Same as SOCI 489.

POLS 493. Mass Communications Law**3 Credits (3)**

Examination of legal issues relating to mass media in the United States. Invasion of privacy, libel, sedition, copyright, and advertising regulation. Same as JOUR 493 and COMM 493.

POLS 502. Research Methods in Government**3 Credits (3)**

Contemporary methods of political analysis, including mathematical and statistical techniques and computer applications. MPA students must complete this class with a B- or better. MA students must complete either POLS 502 or POLS 503 with a B- or better.

POLS 503. Qualitative Research Methods**3 Credits (3)**

An overview of qualitative research methods such as fieldwork, ethnography, content analysis, case studies, focus groups and grounded theory. Introduces students to epistemology (the study of knowledge) and to basic components of research design. Explores activist scholarship, ethical dilemmas in research, and software tools for computer assisted analysis. Especially useful for students preparing theses, dissertation, or other research projects. MA students must complete either POLS 503 or POLS 502 with a B- or better.

POLS 505. Directed Readings**1-3 Credits**

Selected topics in government. May be repeated for a total of 6 credits. Graded S/U.

Prerequisite: consent of instructor.

POLS 510. Internship**1-6 Credits**

Assignment with a public agency and research report. Only 3 credits apply toward degree requirements. Graded S/U.

Prerequisite: approval of graduate advisor.

POLS 517. Selected Topics in Government**3 Credits (3)**

Selected issues which may cross sub-fields of the discipline. May be repeated for a total of 6 credits.

POLS 519. Proseminar in Public Administration**3 Credits (3)**

Review of classic and contemporary theory and practice in public administration. Application of written and oral skills to the presentation and defense of essays on various aspects of public administration. To be completed with a B- or better.

Prerequisite(s): 30 credits of M.P.A.

POLS 522. Public Sector Economics I**3 Credits (3)**

Introduction to the economic rationale for government intervention in the economy and the effects of that intervention on economic agents and the economy in general. Emphasis on the expenditure side of government policies. Same as AEEC 522.

POLS 527. Issues in Public Management**3 Credits (3)**

Selected issues in public management. May be repeated under different subtitles for a total of 6 credits.

POLS 530. Seminar in Public Policy**3 Credits (3)**

Survey of the political, administrative, and technical aspects of policy making in government. MA students taking POLS 530 as part of their core requirements must complete the class with a B- or better.

POLS 536. Public Policy and Indigenous Communities**3 Credits (3)**

Indigenous communities are found throughout North, Central and South America. This course addresses the history, development and governance of these communities. Different sections of the course may choose to focus on different indigenous communities. All courses will consider the principles of governance internal to indigenous communities as well as the governing relationships between indigenous communities and modern states.

POLS 537. Issues in Public Policy**3 Credits (3)**

Selected issues in public policy. May be repeated under a different subtitle for a total of 6 credits.

POLS 540. Seminar in Public Administration**3 Credits (3)**

Survey course on the theory and practice of program, personnel, and financial management in government and the private, nonprofit sector. MA students taking POLS 540 as part of their core requirements must complete the class with a B- or better.

POLS 541. Public Budgeting**3 Credits (3)**

Budgetary processes; budget classification, analysis, and evaluation. MPA students must complete this class with a B- or better.

POLS 542. Public Sector Human Resources Management**3 Credits (3)**

Exploration of public personnel systems and practices, including job analysis, compensation, performance evaluation, recruitment, and labor-management relations. MPA students must complete this class with a B- or better.

POLS 543. Skills Workshop**1-6 Credits**

Focus on management of task skills in selected areas of public administration. Specific topics will appear in the Schedule of Classes; may be repeated for a total of 6 credits.

POLS 544. Public Policy Analysis**3 Credits (3)**

Environment of policy analysis; various descriptive and quantitative designs for analyzing and evaluating public policy. Problems of policy analysis. MPA students must complete this class with a B- or better.

Prerequisite(s): POLS 502 or consent of instructor.

POLS 547. Government Organizations

3 Credits (3)

Historical overview and present applications of organization theory in public management. MPA students must complete this class with a B- or better.

POLS 548. Public Sector Leadership

3 Credits (3)

Theories and styles of leadership.

POLS 549. Ethics in Government

3 Credits (3)

Examination of standards, perspectives, and issues for ethical decision-making in public agencies. MPA students must complete this class with a B- or better.

POLS 550. Seminar in American Politics

3 Credits (3)

Overview of American political institutions. Includes study of American constitutional theory; legislative, executive, and judicial functions and processes; political parties and interest groups; and public policy formulation. MA students taking POLS 550 as part of their core requirements must complete the class with a B- or better.

POLS 560. Seminar in International Relations Theory

3 Credits (3)

A critical overview of leading approaches and controversies in international relations theory. The purpose of the course is to introduce students to contending theoretical perspectives and conceptual frameworks that help make sense of contemporary world politics. MA students taking POLS 560 as part of their core requirements must complete the class with a B- or better.

POLS 561. Nations and Soft Power

3 Credits (3)

Course employs historical, theoretical and practical "best/worst practices" lenses to deal with key questions, such as how do the US and other states present themselves to the world? What are "soft power" and "national reputation management"? How does one build or damage a country's image and "brand"? What are "public diplomacy" and "cultural diplomacy", and how do they factor into the foreign relations of the US and other states?

POLS 563. Issues in International Relations

3 Credits (3)

Selected issues in international relations. May be repeated under a different subtitle for a total of 6 credits.

POLS 564. Advanced National Security Policy

3 Credits (3)

Major topical, theoretical, and regional issues in national security policy.

POLS 569. Advanced Issues in Globalization

3 Credits (3)

Analysis of the globalization process. Covers theories of globalization; global economy; political globalization; global culture; transnational social movements; transnational migration and world labor market; global cities; local-global linkages. Same as SOCI 589.

POLS 570. Seminar in Comparative Politics

3 Credits (3)

Examination of methods used for comparing various types of political entities. Investigation of criteria needed to examine a concept across cultures or national boundaries. MA students taking POLS 570 as part of their core requirements must complete the class with a B- or better.

POLS 574. Contemporary Comparative Studies

3 Credits (3)

Major topical, theoretical, and regional issues in international politics. May be repeated once.

POLS 578. Seminar in the U.S.-Mexican Border

3 Credits (3)

An analysis of the political environment along the United States-Mexico border and a survey of the literature available for a number of contemporary issues.

POLS 579. Seminar in Mexican Politics

3 Credits (3)

Advanced research on politics and government of Mexico.

POLS 580. Seminar in Political Theory

3 Credits (3)

Examination of major issues in political theory, including democracy, sovereignty, classical and modern traditions of thought. May be repeated with different subject matter. MA students taking POLS 580 as part of their core requirements must complete the class with a B- or better.

POLS 587. Seminar in Religion and Politics

3 Credits (3)

Historical, theoretical and comparative analyses of the interaction between politics and religion.

POLS 590. Seminar Public Law and Legal Systems**3 Credits (3)**

Focus on U.S. Constitutional Law and other national legal systems. MA students taking POLS 590 as part of their core requirements must complete the class with a B- or better.

POLS 593. Issues in Public Law**3 Credits (3)**

Selected issues in public law. May be repeated under a different subtitle for a total of 6 credits.

POLS 596. International Law**3 Credits (3)**

Nature, growth and scope of law of nations; rights and obligations of states in peace and war; current issues.

POLS 598. Special Research Programs**1-3 Credits**

Individual investigations either theoretical, analytical or experimental. Three credits may be taken per semester for a total of 6 credits for thesis students, and 9 credits for non-thesis students. Consent of instructor required.

POLS 599. Master's Thesis**1-15 Credits**

Thesis.

PORT-PORTUGUESE

PORT 1110. Portuguese I**3 Credits (3)**

Designed for students with no previous exposure to Portuguese, this course develops basic listening, speaking, reading, and writing skills. This is an introductory course aimed at teaching the student to communicate in Portuguese in everyday situations.

Learning Outcomes

1. Students can communicate and exchange information about familiar topics using phrases and simple sentences, sometimes supported by memorized language.
2. Students can handle most short social interactions in everyday situations by asking and answering simple questions.
3. Students can write short messages and notes on familiar topics related to everyday life.
4. Students can often understand words, phrases, and simple sentences related to everyday life.
5. Students can recognize pieces of information and sometimes understand the main topic of what is being said.
6. Students can understand familiar words, phrases, and sentences within short and simple texts related to everyday life.
7. Students can sometimes understand the main idea of what they have read.
8. Students can make connections between beliefs, behaviors and cultural artifacts of the Portuguese-speaking world, and make informed cross-cultural comparisons.

PORT 1120. Portuguese II**3 Credits (3)**

A continuation of Portuguese I, students will develop a broader foundation in skills gained during the first semester, including understanding, speaking, reading and writing Portuguese. Students will also gain more in-depth knowledge of Portuguese-speaking cultures.

Prerequisite: C or better in PORT 1110 or consent of instructor.

Learning Outcomes

1. Students can participate in conversations on a number of familiar topics using simple sentences.
2. Students can handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can write about familiar topics and present information using a series of simple sentences.
4. Students can understand the main idea in short, simple messages and presentations on familiar topics.
5. Students can understand the main idea of simple conversations that they overhear.
6. Students can understand the main idea of short and simple texts when the topic is familiar.
7. Students can begin to narrate and describe simple events in the past.
8. Students can make broader connections between beliefs, behaviors and cultural artifacts of the Portuguese-speaking world, and make informed cross-cultural comparisons.

PORT 453. Independent Luso-Brazilian Studies**1-3 Credits (1-3)**

Individualized, self-paced projects for advanced students in Luso-Brazilian studies. May be repeated up to 12 credits. Consent of Instructor required.

PORT 513. Graduate Portuguese for Romance Language Students I**3 Credits (3)**

Portuguese for beginners at the graduate level. May be completed on campus or via Study Abroad. Credit can be applied towards fulfilling the second language requirement. Credit is not accepted towards any graduate level major or minor.

PORT 514. Graduate Portuguese for Romance Language Students II**3 Credits (3)**

Portuguese for beginners at the graduate level. May be completed on campus or via Study Abroad. Credit can be applied towards fulfilling the second language requirement. Credit is not accepted towards any graduate level major or minor.

Prerequisite(s): Language placement exam or C or better in PORT 513, or consent of instructor.

PSYC-PSYCHOLOGY

PSYC 1110G. Introduction to Psychology**3 Credits (3)**

This course will introduce students to the concepts, theories, significant findings, methodologies, and terminology that apply to the field of psychology.

Learning Outcomes

1. Explain how the scientific method and psychological research methodologies are used to study the mind and behavior.
2. Recall key terms, concepts, and theories in the areas of neuroscience, learning, memory, cognition, intelligence, motivation and emotion, development, personality, health, disorders and therapies, and social psychology.
3. Explain how information provided in this course can be applied to life in the real world.
4. Identify the major theoretical schools of thought that exist in psychology as they relate to the self, the culture, and the society.

PSYC 2221. Applied Psychology**3 Credits (3)**

Explanation of the psychological principles of everyday living. Emphasizes motivation, learning of intelligent behavior, and applications of psychology to social issues. Community Colleges only.

Learning Outcomes

1. The objective of this course is to orient students to the personality characteristics, interpersonal competencies, ethical decision-making skills, and other professional traits associated with pursuing a career in a helping profession.
2. Identify the requirements for becoming a helping professional, characteristics of a skilled helper, and cultural factors that impact helping professionals
3. Explain your personal strengths and weaknesses as a potential helper.
4. Demonstrate appropriate helping strategies based upon the special characteristics of clients.
5. Compare the capabilities that individual, family, group, community, and online interventions offer you as a future helper.
6. Identify the ethical and legal issues that impact helping professionals
7. Analyze the potential impact of your future ethical and professional standards as a helping professional
8. Explain how your role as a helping professional is impacted by your professional affiliation and ethical principles
9. Analyze how worsening personal problems and increasing stress can impact the kinds and quality of our responses to life and the people around us.

PSYC 2230. Psychology of Adjustment**3 Credits (3)**

This course focuses on the individual's adjustment to society, and the application of psychological principles to the understanding of adjustment.

Learning Outcomes

1. Explain the internal and external factors associated with the psychology of adjustment.
2. Evaluate contributions from psychology to adjustment concepts and processes.
3. Describe the different explanations of how individuals adjust to their environments.
4. Describe how self-identities develop and how they affect relations with others.
5. Identify resources available for assistance with adjustment-related concerns.

PSYC 2311. A Study of Substance Abuse through Learning**3 Credits (3)**

Physiological and psychological impact of drug use on human behavior. Emphasizes practical applications of intervention and prevention in the community. Community Colleges only.

Learning Outcomes

1. Through readings and discussions, students will be able to describe the role that gender, ethnicity, and age have in alcohol and drug use.
2. Through readings and discussions, students will be able to learn past and current perspectives of addiction.
3. Through readings, discussions and student presentations, students will be able to distinguish between different types of abuse-able drugs and be able to classify them.
4. Through readings, discussions, lectures and guest speaker's students will be able to describe the role of addiction and criminal behavior.
5. Through readings and discussions, students will be able to discuss the Models and Theories of Drug Dependence and Addiction.
6. Through readings, discussions and evaluation of case studies students will be able to discuss the definitions of Substance Abuse, Dependence Addiction.
7. Through readings and discussions, students will be able to acquaint themselves with the effects of Addictive Behavior on Family Systems.
8. Through readings discussions, students will be able to Discuss Disorders Co-Occurring with Substance Abuse
9. Through readings and community service learning outing, students will be able to discuss how important the concepts of Prevention, Intervention and Treatment in drug addiction.
10. 1 Through readings and community service learning outing students will be able to discuss Alcohol/Drug Recovery Treatment Relapse Prevention
11. 1 Through completion of Service Learning and field assignment students will be able to discuss the role of AA/NA in Recovery Treatment.
12. 1 Through attendance of a Drug Court Hearing students will be knowledgeable of the role of Drug Courts in prevention and treatment of drug addiction.

PSYC 301. Introduction to Psycholinguistics**3 Credits (3)**

Psychological aspects of language, including linguistic theories of grammar, psychological factors influencing language performance, primary language acquisition and the relationship of language to thought processes. Same as LING 301.

Prerequisites: PSYC 1110G and one of: MATH 1350G, MATH 2350G, or A ST 311; and PSYC 310 or consent of instructor.

PSYC 302. Abnormal Psychology**3 Credits (3)**

Introduces the types, causes, and treatment of mental disorders. Descriptions and explanations of the neuroses, affective disorders and the psychoses. Case histories are also analyzed.

Prerequisites: PSYC 1110G, MATH 1215 and ENGL 1110G.

PSYC 310. Experimental Methods**4 Credits (2+4P)**

The basic skills of literature search, experimental design, research methodology, and research reporting are emphasized; includes laboratory.

Prerequisite(s): PSYC 1110G, and either MATH 1350G, MATH 2350G, or A ST 311.

PSYC 311. Advanced Research Seminar**4 Credits (2+4P)**

Psychological research in conjunction with designing, conducting, writing, and presenting an independent research project. May also include various computer applications. Will discuss issues regarding application to graduate programs. Course should be taken no later than the first semester of senior year.

Prerequisite: PSYC 310.

PSYC 315. Emotion**3 Credits (3)**

An overview of the past century of research on human emotion from William James to Antonio Damasio. Explores a cognitive science perspective on emotion that includes questions about developmental, physiological, and evolutionary aspects of emotion and an exploration of the proximate and ultimate functions of emotion. Topics range from understanding the feeling component of emotion to understanding the role of facial displays of emotion.

Prerequisite(s): PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311G, and PSYC 310 or consent of instructor.

PSYC 317. Social Psychology**3 Credits (3)**

Ways in which people are influenced by the behavior of others are analyzed. Includes aggression, altruism, conformity, attraction, sexual behavior, prejudice, and nonverbal behavior.

Prerequisites: PSYC 1110G, MATH 1215, and ENGL 1110G.

PSYC 320. Learning**4 Credits (3+2P)**

Covers: habituation, Pavlovian conditioning, Thorndikian learning, stimulus generalization, transfer of training, and the learning and forgetting of related and unrelated material.

Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310.

PSYC 321. Psychology of Personality**3 Credits (3)**

Introduces personality theories and supporting research. Psychoanalytic, physiological, and behavioral theories as they apply to personality are examined. Focuses on normal personality functioning.

Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310.

PSYC 324. Sexual Behavior**3 Credits (3)**

Examines viewpoints of the evolution, control and function of human sexual behavior. Includes human sexuality, reproduction, male-female conflicts and the social implications of sex. **Prerequisites:** PSYC 1110G, MATH 1215, and ENGL 1110G

PSYC 325. Health Psychology**3 Credits (3)**

Life stress, surgical stress, coronary-prone behavior, biofeedback, pain control, psychosocial approaches to geriatrics and cancer, behavioral treatments for addictions, obesity, and interpersonal issues in health care.

Prerequisite: PSYC 1110G.

PSYC 330. Psychology and the Law**3 Credits (3)**

Discretionary practices in the judicial system including pretrial procedures, jury selection, jury decision making, eyewitness testimony, insanity, expert witnesses, and probation judgments.

Prerequisite: PSYC 1110G.

PSYC 340. Cognitive Psychology**3 Credits (3)**

Review of research and theory in the study of human cognitive processes. Topics include information processing, pattern recognition, memory, attention, language, problem solving, decision making, and reasoning. May be repeated up to 3 credits.

Prerequisite(s): PSYC 1110G, MATH 1215, and ENGL 1110G.

PSYC 350. Developmental Psychology: Conception through Childhood**3 Credits (3)**

Covers a wide range of topics concerning human psychological development from conception through childhood with special emphasis on current research and theory. May be repeated up to 3 credits.

Prerequisite(s): PSYC 1110G, MATH 1215, and ENGL 1110G.

PSYC 351. Developmental Psychology: Adolescence through Old Age**3 Credits (3)**

Covers a wide range of topics concerning human psychological development from adolescence through old age with special emphasis on current research and theory.

Prerequisite: PSYC 1110G.

PSYC 359. Psychology of Gender**3 Credits (3)**

Examines theories and research on the psychological functioning of women and men in North American society, including influential theories of gender in psychology and current controversies in the psychological literature. Topics include those unique to women and unique to men in development across the lifespan, work, physical and mental health, sexuality, victimization, gender stereotypes, gender comparisons in abilities and personality, and biological, social, and cultural influences on behavior. May be repeated up to 3 credits. Crosslisted with: GNDR 359.

Prerequisite(s): PSYC 1110G.

PSYC 370. Special Topics**1-3 Credits**

May be taken under different subtitles announced in the Schedule of Classes for unlimited credit. May be repeated for a maximum of 12 credits.

Prerequisite: PSYC 1110G.

PSYC 375. Psychology and the Brain**3 Credits (3)**

An exploration of how the brain produces thinking, emotion, and behavior. May be repeated up to 3 credits.

Prerequisite(s): PSYC 1110G, MATH 1215 and ENGL 1110G.

PSYC 376. Evolutionary Psychology**3 Credits (3)**

This course introduces the student to the science of Evolutionary Psychology. In this class we will explore how evolutionary psychologists think about a variety of topics ranging from our capacity for (and appreciation of) art, emotions, and beauty to an exploration of the "design" of our minds in regards to mating, status striving, social behavior and cultural production.

Prerequisite(s): PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311G, and PSYC 310 or consent of instructor.

PSYC 380. Perception**4 Credits (4+4P)**

Primary emphasis on vision. Topics include measurement of sensations, development of visual-motor coordination, reading, speech perception, picture perception, illusions, 3-dimensional space, and causes and consequences of visual abnormalities.

Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310.

PSYC 383. Memory**3 Credits (3)**

Examines facets of human memory from the information processing viewpoint, including encoding, storage, and retrieval and memory-aiding techniques.

Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310 or consent of instructor.

PSYC 400. Research**1-3 Credits**

Individual research projects supervised by a department faculty member. May be repeated for a maximum of 6 credits.

Prerequisites: PSYC 310 and consent of instructor.

PSYC 401. Directed Readings**1-3 Credits**

May be repeated for a maximum of 6 credits.

Prerequisites: PSYC 1110G and consent of instructor.

PSYC 402. Field Experience**1-3 Credits**

Working with preschool, juvenile delinquent, handicapped, aged, convict, or mentally ill. Approximately five hours scheduled work per week per credit. May be repeated to 6 credits.

Prerequisites: 6 psychology credits and consent of instructor.

PSYC 430. Human-Computer Psychology**3 Credits (3)**

Theories, methodologies, and data from psychology applicable to interface design, with an emphasis on construction and application of conceptual psychological models.

Prerequisites: PSYC 1110G, and one of: MATH 1350G, MATH 2350G, or A ST 311, and PSYC 310 or consent of instructor.

PSYC 442. Thinking**3 Credits (3)**

Research and theory pertaining to human thinking and problem solving. Effective problem-solving methods and common obstacles to problem solving are analyzed.

Prerequisites: PSYC 1110G and PSYC 310.

PSYC 450. Senior Thesis**3 Credits (3)**

A laboratory or field research project conducted under faculty supervision. Requires written research proposal, conduct of research, data analysis, and final written report. May be repeated for a maximum of 6 credits.

Prerequisites: PSYC 310, 6 additional psychology credits, consent of supervising faculty member, and junior or above standing.

PSYC 470. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

PSYC 507. Quantitative Methods in Psychology I**3 Credits (3)**

Statistical concepts emphasizing distributions and methods most appropriate to the data, models, and theories in psychology. Emphasis on distributions, probability and basic inferential statistics in Psychological research. Includes basics of Analysis of Variance (ANOVA) and Multiple Regression in Psychological research. May be repeated up to 3 credits.

Learning Outcomes

1. Students will be able to recognize appropriate usage of, and be able to implement, basic statistical techniques: Central tendency, variability, z-scores, t-tests, ANOVA, correlation, two predictor regression.

PSYC 508. Quantitative Methods in Psychology II**3 Credits (3)**

Statistical concepts emphasizing distributions and methods most appropriate to the data, models, and theories in psychology. Emphasis on advanced ANOVA and Multiple Regression in Psychological research. May be repeated up to 3 credits.

Prerequisite(s): PSYC 507 or equivalent.

Learning Outcomes

1. Students will become familiar with situations and applications of advanced ANOVA techniques and Multiple Regression and Correlation.

PSYC 509. Quantitative Methods in Psychology III**3 Credits (3)**

Advanced quantitative methods as applied to research in Psychology: Topics may include: Multivariate techniques, advanced Bayesian analyses, Random walk modelling etc. May be repeated up to 3 credits.

Prerequisite(s): PSYC 507 or equivalent.

PSYC 510. Computer Methodology**3 Credits (3)**

Use of computers in psychological research with emphasis on developing experimental control programs.

PSYC 520. Learning**3 Credits (3)**

Classical areas of learning, including instrumental and classical conditioning paradigms, habituation, reinforcement variables, stimulus generalization and transfer, and memory.

PSYC 522. Sensation and Perception**3 Credits (3)**

Stimulus and decision variables in judging auditory and visual events. Topics include: detection of signals; signal intensity versus perceived strength; size, shape, and movement perception; reading and listening.

PSYC 523. Methods in Cognitive Psychology**3 Credits (3)**

Experimental and correlational methodologies appropriate for investigating cognitive psychological theories and problems.

Prerequisite(s): PSYC 524 or consent of instructor.

PSYC 524. Cognitive Psychology**3 Credits (3)**

Examines theoretical and empirical work on human cognition. Topics include: information processing theories, pattern recognition, memory, attention, language, problem solving, decision making, and reasoning.

PSYC 527. Social Psychology**3 Credits (3)**

Current and traditional theories, research findings, and research methodologies of social psychology.

PSYC 529. Methods in Social Psychology**3 Credits (3)**

Experimental, quasi-experimental, and correlational methodologies appropriate for investigating social psychological theories and problems.

Prerequisite(s): Graduate student in psychology or consent of instructor.

PSYC 540. History and Systems of Psychology**3 Credits (3)**

History of scientific method emphasizing outstanding methodological problems of contemporary science, especially psychology. Covers recent history of psychology and development of schools of psychology.

PSYC 547. Engineering Psychology**3 Credits (3)**

Covers concepts, methods, and findings of human performance. Treats the human as a subsystem that receives, stores and processes information, makes decisions, and acts within a human-machine environment system.

PSYC 550. Teaching of Psychology**3 Credits (3)**

This class serves both new and experienced teachers. It will help new teachers design and conduct a successful course and help experienced teachers improve their teaching.

PSYC 570. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes.

PSYC 590. Research Seminar in Psychology**1 Credit (1)**

Presentations on research by students, faculty, and guest speakers. May be repeated for credit.

PSYC 598. Special Research Programs**1-3 Credits**

Individual investigations either analytical or experimental. May be repeated for credit.

PSYC 599. Master's Thesis**1-15 Credits**

Thesis.

PSYC 600. Doctoral Research**1-15 Credits**

This course number is used for assigning credit for research performed prior to successful completion of the doctoral qualifying examination.

PSYC 698. Special Research Programs**1-3 Credits**

Individual investigations either analytical or experimental. May be repeated for credit.

PSYC 700. Doctoral Dissertation**1-15 Credits**

Dissertation.

RADT-RADIOLOGIC TECHNOLOGY

RADT 100. Introduction to Radiologic Technology and Patient Care**2 Credits (2)**

Overview of the profession, including ethics, terminology, and basic radiation protection. Addresses basic and specialized procedures and topics related to the care of the patient. Restricted to: Community Colleges only. Restricted to Majors.

RADT 101. Radiographic Positioning I**4 Credits (2+6P)**

Covers radiographic procedure and positioning concepts, techniques, terminology, and mechanics related to the thorax, abdomen, extremities, spine and pelvis. Includes positioning lab and clinical observation.

RADT 102. Radiographic Positioning II**4 Credits (2+6P)**

Continuation of RADT 101. Includes skull, gastrointestinal, urinary, reproductive, biliary systems, and more advanced skeletal positions. Includes positioning lab and clinical observation. Restricted to: Community Colleges only. Restricted to Majors.

Prerequisite: RADT 101.

RADT 103. Introduction to Radiographic Imaging**3 Credits (2+2P)**

Provides the student with an in-depth knowledge of radiographic exposure technique and the factors affecting radiographic image quality. Includes lab experiments. Restricted to majors.

Learning Outcomes

1. Students will demonstrate the ability to safely produce quality diagnostic radiographic images. Students will demonstrate effective communication skills. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed.

RADT 104. Special Radiologic Modalities**2 Credits (2)**

Discussion of various special procedures used in medical imaging such as, angiography, ultrasound, computerized tomography, magnetic resonance imaging, digital imaging, nuclear medicine, radiation therapy, etc. Includes guest lectures and field trips.

Prerequisite: RADT 103.

RADT 105. Radiographic Physics and Equipment**3 Credits (3)**

Fundamentals of radiographic physics and imaging theory. Includes the atom, electromagnetism, x-ray production and interactions, x-ray circuitry, digital fluoroscopic units, digital x-ray equipment and quality assurance/control; with brief overview of mammography, computed tomography (CT), and MRI imaging. Restricted to: Community Colleges only. Restricted to Majors.

Prerequisite/Corequisite: RADT 103.

Learning Outcomes

1. Students will have knowledge of and be able to operate radiographic equipment to produce quality diagnostic radiographic images. Students will demonstrate radiation safety application through ALARA Principles.

RADT 110. Radiographic Pathology**1 Credit (1)**

Overview of pathology demonstrated by radiographic procedures. Restricted to majors.

Prerequisite: RADT 154.

RADT 154. Radiographic Anatomy and Physiology**3 Credits (3)**

Basic A&P for radiographic application. Includes a systems approach to body structures and organs as they relate to anatomical projections, radiographic identification, and various imaging modalities. Restricted to: RADT majors. Restricted to: Community Colleges only.

Prerequisite(s): AHS 153 or AHS 140 or BIOL 2210 or BIOL 1130, or consent of instructor.

RADT 156. Independent Study**1-6 Credits (1-6)**

Individual studies/research on topics related to the radiological sciences. May be repeated for a maximum of 6 credits. Restricted to: Community Colleges only.

RADT 190. CT Equipment and Methodology**3 Credits (3)**

Skill development in the operation of computed tomographic equipment, focusing on routine protocols, image quality, and quality assurance and radiation protection. May be repeated up to 3 credits. Restricted to: CTOM or RADT majors. Restricted to Community Colleges campuses only.

RADT 200. Radiation Biology and Protection**2 Credits (2)**

Biological effects of ionizing radiation on cells and tissues. Includes radiation measurements, policies and protection measures for self, patients, and others. Restricted to majors. Restricted to: Community Colleges only.

Prerequisite(s): RADT 103.

RADT 201. Clinical Education I**7 Credits (32P)**

Supervised practice in a radiology department under direct supervision of a registered technician. Includes film critiques.

Prerequisite: RADT 105.

Learning Outcomes

1. Students will demonstrate the ability to safely produce diagnostic radiographic images. Students will be able to appropriately position patients, identify radiographic anatomy and pathological conditions. Students will demonstrate effective communication skills. Students will accurately document/record data in accordance with clinical site policies and procedures.
2. Students will demonstrate the ability to use independent judgement. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed. Students will conduct themselves in a professional manner to function effectively as a member of the healthcare team. Students will identify various opportunities for professional growth within medical imaging sciences.

RADT 202. Clinical Education II**11 Credits (33P)**

Continuation of RADT 201. Student will work under indirect supervision of registered personnel.

Prerequisite(s): RADT 201.

Learning Outcomes

1. Students will demonstrate the ability to safely produce diagnostic radiographic images. Students will be able to appropriately position patients, identify radiographic anatomy and pathological conditions. Students will demonstrate effective communication skills. Students will accurately document/record data in accordance with clinical site policies and procedures. Students will demonstrate the ability to use independent judgement. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed. Students will conduct themselves in a professional manner to function effectively as a member of the healthcare team. Students will identify various opportunities for professional growth within medical imaging sciences.

RADT 203. Clinical Education III**11 Credits (33P)**

Continuation of RADT 202 to include special rotations in advanced imaging modalities.

Prerequisite(s): RADT 202.

Learning Outcomes

1. Students will demonstrate the ability to safely produce diagnostic radiographic images. Students will be able to appropriately position patients, identify radiographic anatomy and pathological conditions. Students will demonstrate effective communication skills. Students will accurately document/record data in accordance with clinical site policies and procedures. Students will demonstrate the ability to use independent judgement. Students will analyze radiographic images for technical and positioning accuracy to make modifications as needed. Students will conduct themselves in a professional manner to function effectively as a member of the healthcare team. Students will identify various opportunities for professional growth within medical imaging sciences.

RADT 205. Radiographic Image Critique**1 Credit (1)**

Review of radiographs produced in clinical settings to evaluate anatomy and technical issues. Restricted to majors.

Prerequisite: RADT 201.

RADT 206. Applied Radiographic Procedures**2 Credits (1+3P)**

Advanced course which integrates the principles and techniques of radiologic technology. Restricted to majors.

Prerequisite: RADT 202.

RADT 207. Cross Sectional Anatomy for Medical Imaging**3 Credits (3)**

Anatomic relationships that are present under various sectional orientations as depicted by computed tomography or magnetic resonance imaging. May be repeated up to 3 credits. Restricted to: CTOM or RADT majors. Restricted to Community Colleges campuses only.

RADT 208. Clinical I (Computed Tomography)**3 Credits (9P)**

A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinic professional. May be repeated up to 3 credits. Restricted to: RADT or CTOM majors. Restricted to Community Colleges campuses only.

RADT 209. Clinical II (Computed Tomography)**3 Credits (9P)**

A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinic professional. (Capstone Course). May be repeated up to 3 credits. Restricted to: CTOM or RADT majors. Restricted to Community Colleges campuses only.

RDG-READING

RDG 350. Teaching and Learning Reading and Writing**3 Credits (3)**

The foundation of this course is on understanding the reading process including the relationship between reading, writing, listening, and speaking; individual needs and abilities in reading instruction; and how to organize classrooms and select materials to support literacy development. Concepts of phonemic awareness, phonic instruction, vocabulary development, fluency and comprehension are integrated with the developmentally appropriate use of authentic assessment techniques, language/literacy immersion, and multicultural children's literature. May be repeated up to 3 credits.

Prerequisite(s): ECED 2115.

Corequisite(s): ECED 329, ECED 440, ECED 455.

RDG 360. Elementary School Literacy I**3 Credits (2+2P)**

Reading development, curriculum, and instruction in the elementary grades. Required of all elementary education majors as a May be repeated up to 3 credits. Crosslisted with: RDG 350. Restricted to: TEP-EED majors.

RDG 361. Elementary School Literacy II**3 Credits (2+2P)**

Reading development in curriculum and instruction with assessment and evaluation in the elementary grades (K-8). May be repeated up to 3 credits. Restricted to: TEP-EED majors.

Prerequisite(s): RDG 360.

RDG 371. Instruction for Special Reading Needs**3 Credits (3)**

Emphasizes appropriate techniques for teaching reading to learners with special needs. May be repeated up to 3 credits. Restricted to: TEP: EED, ECED, SED, and SPED majors.

RDG 395. Special Topics**1-3 Credits**

Each course will be identified by a qualifying subtitle. A maximum of 3 credits in any one semester and a grand total of 6 credits.

RDG 414. Content Area Literacy**3 Credits (2+2P)**

Surveys integrated reading/writing/discursive practices in middle/secondary content areas. Same as RDG 514. May be repeated up to 3 credits. Restricted to: TEP-SED majors.

RDG 510. Adult and Family Literacy**3 Credits (3)**

Principles, practices, and instructional materials for adult and family literacy. Same as EDUC 506.

RDG 511. Literacy Assessment and Evaluation**3 Credits (3)**

Theoretical and practical aspects of using formal and informal assessment and evaluation procedures in literacy curriculum and instruction. Same as EDUC 511.

RDG 514. Content Area Literacy**3 Credits (3)**

Surveys integrated reading/writing/discursive practices in middle/secondary content areas. Same as RDG 314.

RDG 518. Digital Literacies**3 Credits (3)**

Digital Literacies study focuses on the multiple relationships between how we express ourselves to one another and the multiple technological systems and networks that provide context, meaning, and shape to those expressions in both social and academic spaces. This course is designed to examine new literacies theory as it applies to teaching applications and current research on digital literacies within K-12 education. As 21st Century practitioner scholars, we are concerned with both the social aspects of literacy practices, understanding that school-based operations are inseparable from the sociocultural contexts in which they are enacted. Must be an NMSU graduate student to participate in this course.

Prerequisite(s): RDG 511 with a B- or better.

Learning Outcomes

1. Critically assess K-12 implementation of digital literacies across content area curriculum and instruction.
2. Examine seminal and current research on digital literacies' theory, pedagogy, and practice.
3. Determine the level of cultural relevance in schools and pedagogies for 21st Century students.
4. Interpret how social categories relevant to digital literacy contribute to construction of identity.
5. Develop a critical digital pedagogy that addresses the literacy practices of all learners.

RDG 522. Language and Literacy Acquisition**3 Credits (3)**

Framework and strategies of language and literacy acquisition with attention to bilingual learners and the interrelationship among reading, writing, and oral language. Same as BIL 522, RDG 422.

RDG 525. Theory and Pedagogy of Literature for Children and Adolescents**3 Credits (3)**

This course provides an in-depth exploration of pedagogy and theory related to literature for adolescents May be repeated up to 3 credits.

Prerequisite(s): Graduate Standing.

RDG 530. Sociopsycholinguistics of Reading**3 Credits (3)**

Examines current research on reading process, learning to read, and teaching children to read and evaluates current programs and materials.

RDG 536. Special Studies in Literacy**1-6 Credits**

Each study will be designated by a qualifying subtitle. Same as RDG 636.

RDG 550. Advanced Teaching and Learning of Literacy**3 Credits (3)**

This advanced graduate early literacy course reviews the reading process including the relationship between reading, writing, listening, and speaking; individual needs and abilities in reading instruction; and how to organize classrooms and select materials to support literacy development. Concepts of phonemic awareness, phonic instruction, vocabulary development, fluency and comprehension are integrated with the developmentally appropriate use of authentic assessment techniques, language/literacy immersion, and multicultural children's literature.

Learning Outcomes

1. This course will focus on the following New Mexico early childhood teacher education competencies and New Mexico State University's conceptual framework for teacher preparation.
2. Articulate an understanding of developmental theories and processes and their implications for appropriate methods of teaching reading in the K-third grade classroom.
3. Demonstrate knowledge of various instructional approaches and strategies for promoting literacy within an integrated curriculum framework.
4. Provide and use anti-bias literacy materials and experiences, including primary language materials.
5. Plan appropriate whole group, small group, and individual activities that include appropriate accommodations for working with children with special needs.
6. Understand and articulate the concept of emergent literacy and the processes toward becoming an authentic reader and writer.
7. Understand the role of family in literacy development.
8. Respect and promote the use of the child's home language for learning.
9. Demonstrate knowledge of, and use effectively, a wide range of literacy assessment strategies and instruments to determine a child's strengths and areas of need.
10. 1 Engage in reflection on current theoretical perspectives on the reading process and the role of print literacy in schools and our society. Our focus will be on rigorous inquiry about literacy education in U.S. schools and methods of literacy instruction. We will be examining how invisible cultural, historical, political, and social contexts have influenced and continue to influence teachers and schools. In your observations of reading and literacy education in your field experience it is critical that you become aware of these subtle but pervasive influences. To achieve this, we will focus our inquiry this semester on the following questions:
11. 1 What is literacy in early childhood education?
12. 1 Is that different from literacy outside of school?
13. 1 How do young children use and pursue literacy?
14. 1 How do I promote literacy for all the children with whom I work?

RDG 551. Literacy Development in Early Childhood**3 Credits (3)**

Advanced theory, research, and practice relating to early childhood reading. Same as RDG 351.

RDG 555. Introduction to Instructional Leadership for Literacy Educators**3 Credits (3)**

Three credit course will introduce students to the roles and responsibilities of literacy specialists in the k-12 school setting.

Prerequisite(s): Graduate standing, RDG 511 & RDG 530.

RDG 560. Elementary School Literacy I**3 Credits (2+2P)**

Reading development, curriculum, and instruction in the elementary grades. Same as RDG 360 with differentiated assignments for graduate students.

Corequisite(s): ECED 550, EDUC 551, and EDUC 552.

RDG 561. Elementary School Literacy II**3 Credits (2+2P)**

Reading development in curriculum and instruction with assessment and evaluation in the elementary grades (K-8). Same as RDG 361 with differentiated assignments for graduate students.

Prerequisite(s): RDG 560.

Corequisite(s): EDUC 553, EDUC 554, and EDUC 555.

RDG 585. Practicum in Literacy Education**1-6 Credits**

Supervised laboratory experience with children with reading difficulties. The student implements a program of specific procedures to aid the disabled reader.

Prerequisite: RDG 511.

RDG 590. Theory and Pedagogy of Writing**3 Credits (3)**

This course is designed to examine critical writing theory and pedagogy for K-12 teaching and learning, including inclusive and multicultural approaches, with an emphasis in constructive, collaborative practices, and the integration of digital tools across several genres of writing. Through sequential, thematic units, coursework will emphasize: 1) the study of formative theories along with the development of instructional practices to promote achievement and equity in writing education; 2) the application of these skills through pedagogy and curriculum building, and 3) the construction of broad understandings of craft within the context of the current policies and standards which impact education both regionally and nationally.

RDG 598. Selected Topics in Literacy**1-6 Credits**

Offered under different subtitles in the Schedule of Classes. Same as RDG 698 with differentiated subjects for doctoral students.

RDG 600. Doctoral Research in Literacy**1-15 Credits**

Research on topic of interest.

RDG 605. Independent Study Topics in Reading**1-6 Credits**

A problem and seminar course for those pursuing an advanced degree. Each course will have an appropriate subtitle.

RDG 608. Critical Issues in Literacy Education**3 Credits (3)**

Critical issues from historical to current perspectives.

RDG 617. Multiple Critical Literacies**3 Credits (3)**

An exploration of the multiple literacies that operate on the individual, classroom, community, cultural and societal levels. Same as BLED 617.

RDG 630. Ethnography of Reading and Writing**3 Credits (3)**

Covers the dynamics of data interpretation and critical analysis in the study of literacy.

RDG 633. Praxis and Reflexivity**3 Credits (3)**

The cyclical research processes of continuous self and systemic (re)evaluation vis-a-vis classroom, community, and society with an eye toward reflection, growth, change, and larger forms of social agency. Restricted to doctoral-level students of any major. Same as BLED 633, ECED 633, EDLT 633, EDUC 633.

RDG 636. Special Studies in Literacy**1-6 Credits**

Offered under different subtitles in the Schedule of Classes. Same as RDG 536 with differentiated assignments for doctoral students.

RDG 639. Multiculturalism, Literature, and Inquiry**3 Credits (3)**

Advanced exploration and examination of critical multicultural language education vis-a-vis children's adolescent, young adult, and adult literature, with an eye toward problematizing assumptions about literacy, articulating issues of social justice and enacting transactive, transformative pedagogy.

RDG 640. Higher Education Teaching Apprenticeship**1-6 Credits**

Instructor apprenticeship in teaching university-level literacy-related classes. Each course should bear a qualifying subtitle. Maximum of 6 credits per semester and a maximum of 6 credits.

RDG 685. Advanced Internship K-12 Literacy**3 Credits (3)**

Advanced internship in a professional position/research/application within K-12 schools and classes. Restricted to doctoral-level students of any major.

RDG 698. Selected Topics in Literacy**1-6 Credits**

Offered under various subtitles that indicate the subject matter. Same as RDG 598.

RDG 699. Research Project**1-15 Credits**

Offered primarily for those pursuing the research requirement for the Ed.S. degree. Each research project will be designated by a qualifying subtitle.

RESP - RESPIRATORY THERAPY

RESP 110. Respiratory Therapy I

3 Credits (3)

Introduction to basic respiratory care techniques. Includes history, professional organizations, medical gas administration, oxygen therapy, cardiopulmonary AP, patient assessments, and medical terminology. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 110 L. Respiratory Therapy I Lab

2 Credits (2)

Laboratory practice of basic respiratory care procedures. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 115. Respiratory Therapy Pharmacology

3 Credits (3)

Concepts of physics as they apply to the physiology of the lungs. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 120. Respiratory Therapy II

4 Credits (4)

Advanced respiratory care techniques. Emphasis on airway management, aerosol treatment, chest physiotherapy, pharmacology, posture pressure breathing, and pulmonary rehabilitation. Requires a C or better to remain in program. May be repeated up to 4 credits. Students must be admitted into program to enroll in this course. Restricted to Community Colleges campuses only.

Prerequisite(s): RESP 110.

Corequisite(s): RESP 120 L.

RESP 120 L. Respiratory Therapy II Lab

2 Credits (6P)

Continuation of lab practices and procedures learned in RESP 120, Respiratory Care II, using equipment and simulations. Requires a C or better to remain in program. Students must be admitted to the program to enroll in this course. Corequisite(s):RESP 120. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 110, RESP 110L and RESP 112.

RESP 124. Respiratory Therapy II Clinical

3 Credits (9P)

Supervised practice and application in a hospital setting. Requires a C or better to remain in program. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 110, RESP 110L and RESP 112.

Corequisite(s): RESP 120 and RESP 120L.

RESP 155. Respiratory Therapy Special Topics

1-4 Credits

Topics to be announced in the Schedule of Classes. May be repeated for a maximum of 10 credits. Consent of instructor required. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): Admission to program.

RESP 210. Respiratory Therapy III

2 Credits (2)

Introduction to adult, mechanical, neonatal ventilator theory and concepts of critical care medicine. Requires a C or better to remain in program. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 115, RESP 120, RESP 120L, and RESP 124.

Corequisite(s): RESP 210L.

RESP 210 L. Respiratory Therapy III Lab

2 Credits (2)

Advanced practice procedures using mechanical ventilation devices. Requires a C or better to remain in program. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 115, RESP 120, RESP 120 L, and RESP 124.

Corequisite(s): RESP 210.

RESP 224. Respiratory Therapy IV Clinical

3 Credits (9P)

Continuation of RESP 124. Emphasis on mechanical ventilators. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): Admission to program, and RESP 115, RESP 120, RESP 120 L, and RESP 124.

RESP 230. Respiratory Therapy V**3 Credits (3)**

Continuation of RESP 215. Emphasis on special modalities. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 230 L. Respiratory Therapy V Lab**2 Credits (2)**

Advanced practice and procedures of respiratory care. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 233. Respiratory Therapy Cardiopulmonary**2 Credits (2)**

Concepts of physics as they apply to the physiology of the lung. Emphasis on laws pertaining to gas flow, humidity, and the mechanics of the breathing process. Requires a C or better to remain in program. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 234. Respiratory Therapy V Clinical**3 Credits (3)**

Continuation of RESP 214. Emphasis on special modalities. Restricted to: Community Colleges only. Restricted to DA-RESP-AA majors.

RESP 240. Respiratory Therapy VI**3 Credits (3)**

Advanced theory of hemodynamics, neonate, pediatric, and new specialties that apply to respiratory care. Requires a C or better to remain in program. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 230, RESP 230L, RESP 233 and RESP 234.

Corequisite(s): RESP 240L.

RESP 240 L. Respiratory Therapy VI Lab**2 Credits (6P)**

Advanced laboratory practice and procedures. Requires a C or better to remain in program. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 230, RESP 230L, RESP 233 and RESP 234.

Corequisite(s): RESP 240.

RESP 242. Pediatric Advanced Life Support (PALS)**1 Credit (1)**

Etiology, diagnosis, clinical manifestations, and management of cardiopulmonary disorders related to respiratory care. Restricted to majors.

Corequisite(s): RESP 230.

RESP 243. Respiratory Therapy Neonatal Resuscitation**1 Credit (1)**

Advanced practice of the neonatal resuscitation and certification. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 230, RESP 230L, RESP 233, and RESP 234.

Corequisite(s): RESP 240 and RESP 244.

RESP 244. Respiratory Therapy VI Clinical**3 Credits (9P)**

Clinical experience on special modalities. Requires a C or better to remain in program. Students must be admitted into program to enroll in this course. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): RESP 230, RESP 230L, RESP 233 and RESP 234.

Corequisite(s): RESP 240.

RESP 255. Respiratory Therapy Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 4 credits. Consent of instructor required. Restricted to: Community Colleges only. Restricted to RESP majors.

Prerequisite(s): Admission to program.

RGSC-RANGE SCIENCE

RGSC 1110. The Range Science Profession

1 Credit (1)

Introduction to scientific disciplines and career opportunities in rangeland science and management.

Learning Outcomes

1. To introduce students to the Range Science program and to a variety of career opportunities in Range Science.
2. To develop an individualized course curriculum that prepares the student to achieve their career goals.
3. To examine opportunities to gain practical work experience through internships and cooperative employment.

RGSC 2110. Introduction to Rangeland Management

3 Credits (3)

This course covers the principles of managing and understanding pasture and rangelands. Plant physiology and ecology, plant communities and rangeland sustainability and how they relate to livestock production and wildlife management will be discussed. Restricted to: Main campus only.

Learning Outcomes

1. Understand rangeland management operations.
2. Identify rangeland plants.
3. Gain a perspective of watershed management.
4. Discuss the management of rangeland resources.
5. Understand the process of rangeland evaluation through a broad understanding of monitoring and production of these rangelands.
6. Gain a perspective of the correlation of rangelands and the economic principles guiding resource management.
7. Understand the process of rangeland condition.
8. Understand the concepts of stocking rates and usage of rangelands.
9. Gain a broad perspective of different classes of land ownership; Tribal, federal, private and state.
10. 1Recognize vegetative communities, ecological sites, plant physiology and application to rangeland management considerations.

RGSC 2996. Special Topics

1-4 Credits

Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

Learning Outcomes

1. Varies

RGSC 302V. Forestry and Society

3 Credits (3)

Global study of the development and use of forest resources for production of wood, fuel, fiber, and food products. Climatic, edaphic, cultural, and economic influences on forests of the world evaluated. Same as HORT 302V.

RGSC 316. Rangeland Plants

3 Credits (2+3P)

Identification, classification, cultural uses, and economic importance of native and introduced rangeland plants.

RGSC 317. Rangeland Communities

3 Credits (3)

Rangeland associations and communities, their plant species composition, and ecological factors affecting management of communities.

RGSC 318. Watershed Management

3 Credits (2+2P)

Management of rangeland and forest watersheds with emphasis on hydrologic cycle and land use effects on runoff and water quality.

RGSC 325. Rangeland Restoration Ecology

3 Credits (3)

Principles and practices of vegetation management and ecological restoration. Course emphasizes problems associated with rangeland degradation, and implementation of rangeland restoration and improvements.

Prerequisite(s): Sophomore standing or consent of instructor.

RGSC 350. Special Topics

1-4 Credits

Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester and a grand total of 9 credits.

RGSC 357. Grass Taxonomy and Identification**3 Credits (1+4P)**

Taxonomy of grasses; grass anatomy, variation in reproductive structures, and identification of grasses by sight and through the use of dichotomous keys. Students must be Junior standing to enroll in this course.

RGSC 390. Internship**1-3 Credits**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 3 credits toward a degree. Graded S/U.

Prerequisite: consent of instructor.

RGSC 402. Seminar**1 Credit (1)**

A seminar course designed to inform students of the career opportunities, develop their interviewing and other interpersonal skills may also include reading, discussions, written reports, and seminar presentations of current relevant literature.

Prerequisite(s): Senior standing.

RGSC 402 H. Range Science Seminar**1 Credit (1)**

Taught with RGSC 402 with additional work.

Prerequisite(s): Meets Honors eligibility and/or Crimson Scholar status and senior standing.

RGSC 406. Rangeland Team Competition**1 Credit (1)**

Description and characteristics of range plants. May be repeated for a maximum of 4 credits.

RGSC 440. Rangeland Resource Ecology**3 Credits (3)**

Plant adaptations to arid environments. Life histories of arid land plants. Biotic interactions among rangeland organisms. Arid land plant communities: their physiognomy, diversity, productivity, and response to disturbance. Arid land ecosystem dynamics.

Prerequisite(s): Senior standing.

RGSC 440 L. Rangeland Resource Ecology Lab**1 Credit (2P)**

Living and nonliving factors of the range environment, the life forms and role of range plants and animals on succession and interactions in range ecosystems. Corequisite(s): RGSC 440.

RGSC 448. Problems**1-4 Credits (1-4)**

Individual investigation in a specific area of range science. Maximum of 4 credits per semester and a grand total of 6 credits. Consent of Instructor required.

RGSC 452. Vegetation Measurements for Rangeland Assessment**4 Credits (2+4P)**

Sampling principles, sampling design, and measurement methods used to quantify vegetation attributes and to assess the structure and function of rangeland ecosystems. Laboratory emphasizes practical field techniques, quantitative analysis, and interpretation of results.

Prerequisite(s): RGSC 294 and A ST 311.

RGSC 458. Livestock Behavior, Welfare and Handling**3 Credits (2+3P)**

Principles of animal behavior and evaluation of management practices on animal welfare in confined and rangeland livestock operations. Low stress livestock handling techniques. Design of livestock handling facilities. Crosslisted with: ANSC 458

Prerequisite(s): RGSC 2110 or ANSC 1120.

RGSC 460. Rangeland and Natural Resource Planning and Management**4 Credits (3+3P)**

Planning and problem solving in rangeland and natural resource management. Public land planning and policy. Application of land management principles to resolve rangeland, riparian and habitat issues.

Prerequisite(s): Senior or graduate student standing.

RGSC 475. Climate Studies, Water , and Society**3 Credits (3)**

The course provides a brief description of the Earth's climate system, an in-depth review and methodologies used to investigate climate change and variability, evidence of climate change on natural systems (water availability) vulnerability of human systems (e.g. agriculture) to climate change, and mitigation and adaptation strategies.

RGSC 485. Land Cover Analysis for Natural Resources**3 Credits (3)**

This course is designed to help students understand, manipulate and extract Earth Observation (EO) data and to conduct land cover analysis related to natural resources including water and vegetation. The course provides and highlights means to identify and access EO data in different formats, extract meaningful information, and to help students developing critical thinking skills. The course introduces tools such as python and ArcGIS Pro to handle different data formats (e.g. hdf) efficiently; develop and present creative maps. The course provides basic information about how to conduct land use, land cover change analysis, mapping vegetation, water related variables and plant and animal distribution analysis.

RGSC 509. Approaches to Rangeland Research**3 Credits (3)**

Experimental design and statistical analysis of experimental results.

Prerequisite(s): A ST 505 or consent of instructor.

RGSC 513. Advanced Rangeland Ecology**3 Credits (3)**

Overview of the current state of knowledge in selected areas of rangeland ecology, with emphasis on currently developing ideas and issues relevant to rangeland management.

Prerequisite(s): RGSC 440 or equivalent.

RGSC 515. Graduate Seminar**1 Credit (1)**

Current topics. Graded S/U.

RGSC 516. Arid Land Management**3 Credits (3)**

Survey of seminal and current literature dealing with management of arid and semiarid lands including soil-plant-animal interactions, plant community ecology, arid land assessment methods, and arid land hydrology.

RGSC 518. Watershed Methods and Management**3 Credits (3)**

Management of rangeland and forest watersheds with emphasis on the hydrologic cycle and land use effects on runoff and water quality. Hydrologic monitoring methods problem sets required for graduate credit.

RGSC 520. Arid Land Plant Herbivore Interactions**3 Credits (3)**

Survey of seminal and current literature dealing with plant- and animal-related factors that influence herbivory patterns in arid landscapes. Although ungulate herbivory is a central focus of the course, the role of plant defenses in deterring both vertebrate and invertebrate herbivores is discussed in detail.

RGSC 525. Advanced Rangeland Restoration Ecology**3 Credits (3)**

Theory and application of restoration ecology and the principles and practices of ecological restoration. Course emphasizes problems associated with rangeland degradation and highlights current restoration management actions. May be repeated up to 3 credits.

RGSC 550. Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

RGSC 551. Earth Data Retrieval**3 Credits (3)**

This course covers topics related to identifying sources, preprocessing, utilizing earth data that can be used to monitor some hydrological and water related variables, vegetation growth and related biophysical properties. The course focuses on developing students' skills on how to handle and analyze high-level large amounts of research data in different formats (i.e. .hdf). The course highlights the use of remote sensing and land surface models-based (NLDAS) earth observation datasets (e.g. NDVI, LST, Ta, and ET). The course uses some open-source tools including Python, API as well as MATLAB. Crosslisted with: WSAM 551.

RGSC 557. Advanced Grass Taxonomy and Identification**3 Credits (1+4P)**

Taxonomy of grasses; grass anatomy, variation in reproductive structures, and identification of grasses by sight and through the use of dichotomous keys. Additional writing and grass identification assignments are required for graduate credit.

RGSC 575. Climate Studies, Water and Society**3 Credits (3)**

The course provides a brief description of the Earth's climate system, an in-depth review and methodologies used to investigate climate change and variability, evidence of climate change on natural systems (water availability) vulnerability of human systems (e.g. agriculture) to climate change, and mitigation and adaptation strategies. Crosslisted with: WSAM 575.

RGSC 585. Land Cover Analysis for Natural Resources**3 Credits (3)**

This course is designed to help students understand, manipulate and extract Earth Observation (EO) data and to conduct land cover analysis related to natural resources including water and vegetation. The course provides and highlights means to identify and access EO data in different formats, extract meaningful information, and to help students developing critical thinking skills. The course introduces tools such as python and ArcGIS Pro to handle different data formats (e.g. hdf) efficiently; develop and present creative maps. The course provides basic information about how to conduct land use, land cover change analysis, mapping vegetation, water related variables and plant and animal distribution analysis. Crosslisted with: WSAM 585.

RGSC 589. Landscape Hydrology Modeling**3 Credits (3)**

The course "Landscape Hydrology Modeling" offers topics related to the physical hydrological processes that occur at different spatial and temporal scales in terms of understanding, quantitative evaluation, modeling, and visualization. It addresses precipitation, runoff, infiltration, and evaporation, as well as understanding impact of land use change on these processes. The course highlights and provide training on the use of hydrological modeling tools including WMS software, HydroVIS and ArcGIS software to help students understand, model, manipulate, and visualize hydrological data processes. The course offers hands-on learning experience on the use of these tools. Consent of Instructor required. Crosslisted with: WSAM 589.

RGSC 590. System Dynamics**3 Credits (3)**

This course takes a system dynamics approach to the study of economics and natural resources management. We will examine some of the example theories such as Solow-Swan model and endogenous growth theories as well as the tragedy of the commons, using system dynamics tools to uncover the feedback and explicitly examine its impact on the dynamic behavior of the system. Through these examples, we will learn how to develop, validate, and use system dynamics models for policy design and analysis. Crosslisted with: WSAM 590.

Learning Outcomes

1. identify common generic structures and behavioral modes in socioeconomic and ecological systems,
2. define important feedback theories that explain the behavioral modes in socioeconomic and ecological systems, and
3. implement the system dynamics method to translate the feedback theories into dynamic simulation models.

RGSC 598. Special Research Program**1-4 Credits**

Individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

RGSC 599. Master's Thesis**15 Credits**

Thesis. Consent of Instructor required. Thesis/Dissertation Grading.

RGSC 600. Doctoral Research**1-15 Credits**

Research. Consent of Instructor required. Thesis/Dissertation Grading.

RGSC 616. Advanced Arid Land Management**3 Credits (3)**

In depth discussion of seminal and current literature dealing with management of arid and semiarid lands including land tenure systems, soil-plant-animal interactions (emphasis on livestock grazing), plant community ecology and assessment methods, and arid land hydrology.

RGSC 620. Advanced Arid Land Plant-Herbivore Interactions**3 Credits (3)**

In depth discussion of seminal work dealing with plant- and animal-related factors that influence herbivory patterns in arid landscapes. Although ungulate herbivory is a central focus of the course, the role of plant defenses in deterring both vertebrate and invertebrate herbivores is discussed in detail.

RGSC 698. Special Research Programs**1-4 Credits (1-4)**

Advanced individual investigations, either analytical or experimental. Maximum of 4 credits per semester. No more than 6 credits toward a degree. Consent of Instructor required.

RGSC 700. Doctoral Dissertation**15 Credits**

Dissertation. Consent of Instructor required. Thesis/Dissertation Grading.

RXPP-PRESCRIP PRIV PRAC PSYCH

RXPP 601. Introduction to Psychopharmacology for Psychologists I

3 Credits (3)

This course is an introduction to physiology and an overview of gross and microanatomy, with a focus on gross, micro, and chemical anatomy of the nervous system. By the end of the course, psychologists will have an up-to-date understanding of human psychology, anatomy, and neuroanatomy. Doctorate of Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CLPY majors.

RXPP 602. Introduction to Psychopharmacology for Psychologists II

3 Credits (3)

Principles of organic chemistry and human biochemistry necessary for the understanding of psychopharmacology are discussed and related to the major transmitter systems and dynamics of transmission. By the end of the course, students will have an up-to-date understanding of biochemistry on which to base further didactic study in psychopharmacology. Doctorate of Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CLPY majors.

RXPP 603. Clinical Psychopharmacology I

3 Credits (3)

This course begins with an introduction to the scope of pharmacology; pharmacoepidemiology, ethical, and legal issues (informed consent, State and Federal regulation of drugs and prescribing, sources of drug information and computer aids) and continues with the principles of pharmacokinetics and pharmacodynamics as they relate to the use of psychotropic medications. It concludes with an introduction to the treatment of anxiety disorders from a biopsychosocial model of care with special emphasis on psychopharmacology for anxiety disorders. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CLPY majors.

RXPP 604. Clinical Psychopharmacology II

3 Credits (3)

This course is a thorough investigation of the diagnosis and treatment of affective disorders from a biopsychosocial model of care. Particular emphasis is given to psychopharmacological treatment of depressive disorders and bipolar disorders. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CLPY majors.

RXPP 605. Clinical Psychopharmacology III

3 Credits (3)

This course is an intensive study of the treatment of psychosis from a biopsychosocial model of care. Special consideration is given to: first, second, and third generation antipsychotic drugs and their pharmacology and clinical uses; neurological and metabolic disorders associated with antipsychotic use; and appropriate use of antipsychotics in children and the elderly. Special attention is then given to child and adolescent psychopharmacology, including drugs used in pregnancy and lactation, teratogenicity, embryotoxicity, developmental disorders, conduct disorders, ADHD, and special considerations in use of approved drugs in children. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. Restricted to the Clinical Psychopharmacology program.

Learning Outcomes

1. Delineate the biochemical mechanisms underlying the pharmacological efficacy of the three generations of antipsychotic drugs. Differentiate the effects and side effects of first, second and third generation of antipsychotic drugs. Describe the effects of various antipsychotic drugs on the positive and negative symptoms of schizophrenia; including the neurological projections within the Central Nervous System. Describe the biochemical and physiological basis of adverse reactions with antipsychotic treatments. Select anti-psychotics using evidence based criteria and manage the medical issues that arise from their use. Identify the various signs of side effects to antipsychotic drugs and use the appropriate techniques for assessing their severity including the administration of appropriate rating scales assessing those side effects (e.g. AIMS, BMI) Examine the cost-benefit ratio of psychotropic use for adult, child, adolescent and elderly patients with psychotic disorders. Become familiar with current treatment algorithms for the management of psychotic disorders and their limitations. Learn which anti-psychotics that have FDA approval, as well as those that are used off-label in the treatment of children, adolescents and the elderly.

RXPP 606. Pathophysiology for Psychologists I

3 Credits (3)

This course is an introduction to human clinical physical assessment, history taking, charting, and laboratory testing and neuroimaging. An important emphasis is in functional neuroanatomy and diagnosis and assessment of neurological disorders; role of different components of human nervous system in health and disease; stroke, seizures, and movement disorders (chorea, athetosis, dystonias, dyskinesias, Parkinsonism, akathisia, iatrogenic neurological disorders). Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CLPY majors.

RXPP 607. Pathophysiology for Psychologists II**1-6 Credits (1-6)**

Physical assessment and pathophysiology of the cardiovascular system is studied in depth: structure and function of the heart and major blood vessels; innervation of the heart and vessels; electrocardiogram; components of blood; lymphatics; and physical assessment of cardiac function. The physical assessment and pathophysiology of eyes, ears, nose, and the immune system are studied in depth; anatomy and physiology of special senses; assessment of cranial nerves and sensory function; immune function and psychoimmunology. The physical examination and pathophysiology of the chest and pulmonary system and its relationship to the cardiac system is also studied. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 6 credits. Restricted to: CLPY majors.

RXPP 608. Pathophysiology for Psychologists III**3 Credits (3)**

This course continues with an in-depth study of the chest and pulmonary system: pulmonary function and assessment; respiratory exchange and respiratory involvement in acid: base regulation, disorders of respiratory function. The physical assessment of pathophysiology of the gastrointestinal system is discussed in depth: digestion, absorption and excretion of drugs and nutrients from the GI system; disorders of GI function; hepatic function; innervation of GI tract; endocrine and exocrine functions of GI system; physical assessment of GI function. The functions and pathophysiology of the male and female reproductive system, endocrine system, and renal system are discussed as they relate to psychopharmacology. Doctorate of Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CLPY majors.

RXPP 609. Psychopharmacological Treatment in Special Populations I**3 Credits (3)**

The psychopharmacology of several special populations are discussed in detail in this course. Geriatric psychopharmacology includes: geriatric physiology; cardiac, renal, hepatic changes with aging; pharmacokinetics/dynamics in the elderly; cognition enhancers in Alzheimer's and other dementias. Special treatment of personality disorders, eating disorders, the importance of racial, ethnic, and gender differences and culturally sensitive practice is presented with applications. Pain management psychopharmacology is over-viewed, including: pharmacology of opioid and non-opioid analgesics; pain syndromes; acute and chronic pain; headache; pharmacological and non-pharmacological approaches to pain management; pharmacology and actions of abused substances: acute effects, withdrawal, biochemistry of tolerance and dependence, brain central reward pathways. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean.

Learning Outcomes

1. Use a GFR calculator to assess the renal function of an elderly patient. Select the most appropriate antidepressant medication for an elderly patient considering the patient's current level of renal function. Analyze a patient's medication list and calculate the Beers score for the patients' medication list. Use knowledge gained from analysis of the patient's Beers score to select an appropriate medication for the following conditions: insomnia; psychosis; depression anxiety. List three psychotropic medications that do not require a dose adjustment based on the patient's GFR. Analyze an elderly patient's current medication list using the STOPP/START guidelines. Select the most appropriate medication for a patient experiencing delirium consistent with the STOPP/START guidelines. Calculate an elderly patient's vulnerability score using the VES – thirteen. List three psychotropic medications that are hepatotoxic and should not be used in patients with cirrhosis. 1List the 10 most common medical illnesses in the elderly. 1Calculate the Child-Turcotte-Pugh Score of hepatic function for a patient. 1Review the current availability of empirically validated Decision Support Tools (DST's) for the treatment of Late Life Depression (LLD) and decide whether the use of DST is supported by the evidence. 1Defend a risk/benefit analysis for the use of the following medication classes in the elderly: SGA's; AZD Rx's; hypnotics; mood stabilizers. 1Explain the relationship between outcome and sponsorship in studies of the comparative efficacy of psychotropic medications and psychotherapy in older adults. 1List expected dosage adjustments for benzodiazepines, SSRI's, anticonvulsants, and hypnotics in older adults. 1Select the appropriate medication for each of 5 patients in cases presented during the class.

RXPP 610. Psychopharmacological Treatment in Special Populations II**3 Credits (3)**

The pathophysiology and treatment of substance use disorders from a biopsychosocial model is presented. Issues of medical comorbidity are studied: psychopharmacological treatment in the medically compromised patient, including case studies and review of comprehensive treatment models; mental disorders due to a general medical condition and/or adverse drug reactions; and referral practices to specialists. Diagnostic rating scales and psychiatric instruments of use to the prescribing psychologist are presented. The course ends with an integration of psychotherapy and pharmacotherapy, including ethical issues such as the right to refuse treatment, treatment compliance/adherence, risk management, and the role of the medical psychologist in the modern, integrated healthcare system. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CLPY majors.

RXPP 611. Supervised Experience in Psychopharmacology I**1-3 Credits (1-3)**

In this applied course, students employ their knowledge of psychopharmacology in treatment setting. Students will participate in the treatment of 50 patients for a minimum of 200 hours under the supervision of a physician. Number of credits taken to be determined in consultation with RXPP Training Director. Maximum of 3 credit hours required by degree program. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CLPY majors. Graded: S/U Grading (S/U, Audit).

Learning Outcomes

1. Students will complete eighty hours of practicum in a health care setting while supervised by a licensed physician. Students will demonstrate expertise in providing basic vitals, physical assessment, and laboratory interpretation skills they have been taught in class. Students will demonstrate expertise in performing diagnostics (e.g. imagining studies), differential diagnoses, clinical medicine, and instrumentation.

RXPP 612. Supervised Experience in Psychopharmacology II**1-3 Credits (1-3)**

Continuation and completion of supervised experience in RXPP 611. Students will participate in the treatment of 50 additional patients for a minimum of 200 hours under the supervision of a physician. The RXPP 611/612 sequence must be completed no sooner than three months and no later than three years from initiation. Number of credit hours taken to be determined in consultation with RXPP Training Director. Maximum of 3 credit hours required by degree program. Doctorate in Psychology required. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 3 credits. Restricted to: CLPY majors. Graded: S/U Grading (S/U, Audit).

Learning Outcomes

1. Students will be monitoring the psycho-biosocial treatment of 100 patients, for a minimum of 400 hours. Students will demonstrate expertise in combining psychotropic medication along with psychotherapy. Students will demonstrate knowledge and expertise in practicing enhanced patient education; and making psychotropic medication recommendations, management, and/or consulting with, as needed, allied health professionals.

RXPP 698. Selected Topics**1-6 Credits (1-6)**

Offered under various subtitles which indicate the subject matter covered. A maximum of 6 credits in any one semester and a total of 18 credits overall. Non-majors may be permitted to enroll in this course under limited circumstances with the permission of the course instructor, department head, and graduate school dean. May be repeated up to 18 credits. Consent of Instructor required. Restricted to: CLPY majors.

SIGN-SIGN LANGUAGE

SIGN 1110. American Sign Language I**3 Credits (3)**

American Sign Language I is an introductory level language course in the language of the American Deaf Culture. Content includes ASL vocabulary and conversational skills; linguistic features of ASL; and skills in narrative/storytelling. In-class activities, comprehension and expressive examinations, narrative and storytelling assignments in addition to semester projects are venues for students to demonstrate their learning. In addition, Deaf Culture and Deaf Community issues are addressed.

Learning Outcomes

1. Engage in basic conversations using ASL, such as introducing oneself, exchanging personnel information, and talking about one's surroundings.
2. Demonstrate the use of grammatical structures, including spatial referencing, use of classifiers, role shifting, ASL syntax, and non-manual signals (NMS).
3. Demonstrate clear sign production using an understanding of sign parameters: handshapes, movement, location, palm orientation, and NMS in targeted lexicon.
4. Demonstrate the use of basic ASL vocabulary and expressions necessary for conversations about real-life situations.
5. Evaluate and provide feedback concerning peers' and one's own uses of ASL.
6. Develop culturally-appropriate behaviors and conversation strategies within a variety of contexts for interacting with people who are Deaf.
7. Demonstrate effective use of comprehension and expressive ASL skills through narrative and/or storytelling activities.
8. Describe issues of the American Deaf community and Culture.

SIGN 1120. American Sign Language II**3 Credits (3)**

American Sign Language II is a continuation course that builds on concepts and skills developed in American Sign Language I. Students gain further exposure to ASL structure and grammar, and Deaf Culture and the Deaf community. Emphasis is on increasing students' ability to comprehend other signers and express themselves with more elaboration when conversing or presenting in ASL.

Prerequisite: SIGN 1110 or consent of instructor.

Learning Outcomes

1. Further develop basic conversational skills in ASL, taking on more complicated topics.
2. Apply knowledge of ASL grammar, including classifiers, spatial referencing and agreement, role shifting, and non-manual markers.
3. Develop ASL vocabulary, fingerspelling, number, narrative and storytelling skills.
4. Evaluate and provide feedback concerning peers' and one's own uses of ASL.
5. Demonstrate effective use of comprehension and expressive ASL skills through conversation, discussion, narrative and/or storytelling activities.
6. Demonstrate knowledge and appreciation of the American Deaf community and ASL
7. Through first-hand experience in the American Deaf community and ASL, relate and reflect on
8. perspectives of the community.

SIGN 2110. American Sign Language III**3 Credits (3)**

This is an intermediate level course in American Sign Language (ASL). Expected areas of intermediate skill and knowledge development include: language comprehension and production, conversational use, narratives, ASL language features and further knowledge of and interaction with Deaf culture and the Deaf community.

Prerequisite: SIGN 1120.

Learning Outcomes

1. Demonstrate intermediate ASL vocabulary, conversation and narrative/storytelling skills.
2. Demonstrate fundamental ASL features including visual/spatial orientation, constructed dialogue and action, spatial referencing, classifiers, non-manual behaviors and syntax/word order.
3. Demonstrate appropriate use of cultural behaviors and conversational strategies.
4. Translate written and spoken English to ASL and vice versa.
5. Self-evaluate and provide feedback to peers concerning ASL usage.
6. Examine the culture of the American Deaf community through engaging in community activities and its language.

SIGN 574. American Sign Language III**3 Credits (3)**

Continuation of ASL II. Focus on more complex grammatical features. Students will comprehend and generate medium length stories, narratives, and discussions including culturally significant topics.

Prerequisite: SPHS 375 or consent of instructor.

SMET-SCIENCE/MATH/ENG/TECH

SMET 101. Introduction to Science, Mathematics, Engineering, and Technology**1 Credit (1)**

An introductory course for science, mathematics, engineering, or technology students, emphasizing introduction to their disciplines. Development of critical thinking and academic success skills for technical disciplines, as well as degree planning for the major.

Learning Outcomes

1. Apply the scientific method of constructing and testing hypotheses. Design and conduct an experiment using Radio Jove. Apply astrobiological knowledge to solve human problems. Develop competence in appropriate scientific laboratory techniques.

SMET 102. Introduction to Engineering Design.**1 Credit (1)**

Fundamental concepts of engineering design developed through analysis of case studies and hands-on design projects.

Learning Outcomes

1. Identify assumptions within a given context and be able to predict outcomes through data analysis. Obtain, interpret and analyze numerical information through the use of appropriate tables, diagrams, and algorithms. Develop competency in conveying astrobiological knowledge through laboratory reports and/or written assignments following proper APA documentation style. Design antenna configurations to increase the frequency of the radio Jove.

SMET 201. Research for Visiting Community College Students**1 Credit (1)**

Research experience for visiting community college students. Consent of instructor required. Restricted to: Main campus only.

SMET 301. Undergraduate Research Assistantship**0.5 Credits (.5)**

Undergraduate research experience in science, technology, engineering, and mathematics. Consent of instructor required. Graded: S/U.

SOCI-SOCIOLOGY

SOCI 1110G. Introduction to Sociology**3 Credits (3)**

This course will introduce students to the basic concepts and theories of sociology, as well as to the methods utilized in sociological research. The course will address how sociological concepts and theories can be utilized to analyze and interpret our social world, and how profoundly our society and the groups to which students belong influence them. Students will be given the opportunity to challenge their "taken-for-granted" or "common sense" understandings about society, social institutions, and social issues. Special attention will also be paid to the intimate connections between their personal lives and the larger structural features of social life. In addition, the implications of social inequalities, such as race/ethnicity, gender, and social class will be central to the course's examination of social life in the United States.

Learning Outcomes

1. Define sociological perspectives and the contributions that sociological knowledge can bring to the social sciences.
2. Understand the sociological imagination and explain the relationships between social structures, social forces and individuals.
3. Demonstrate the ability to apply the perspectives of symbolic interactionist theory, conflict theory, and structural-functionalist theory to qualitative and/or quantitative data.
4. Understand and explain intersectionality and the connections between race, class, gender, disability, sexual identity and other forms of structural inequality.

SOCI 2230. Sociology of Sexuality**3 Credits (3)**

This course explores all aspects of human sexuality from a sociological perspective. Topics include, but are not limited to, sex work, intimate relationships, sexual response, political movements, power, and the social construction of sexuality. The course also considers how various social statuses such as ethnicity, gender, and social class intersect with sexuality.

Learning Outcomes

1. Identify the central research questions, theories, and methodologies used in the study of human sexuality.
2. Identify and describe biological, cultural, social, and psychological sexual behaviors and response across the lifespan.
3. Identify and describe trends and changes that influence sexual attitudes and values in the U.S. and globally.
4. Describe how sexuality is influenced by contextual factors, such as race/ethnicity, gender, socioeconomic status, disability, and nationality.

SOCI 2240. Sociology of Intimate Relationships and Family**3 Credits (3)**

This course provides an overview of contemporary intimate relationships and families from sociological perspectives. We will examine intimate relationships and families as social constructions whose meanings have changed over time and from place to place. This course will aid students in developing a greater understanding of intimate relationships and families as institutions in contemporary U.S. society. Intersections of race, class, gender, sexual orientation, nationality, and other factors within these institutions will be addressed. Community Colleges only.

Learning Outcomes

1. Explain the sociological approaches to researching intimate relationships and families.
2. Describe important sociological research findings concerning intimate relationships and families.
3. Explain how intimate and familial relationships are affected by multiple intersecting inequalities and ongoing events in other social institutions.

SOCI 2261. Issues in Death and Dying**3 Credits (3)**

Major personal and social issues related to the process of dying in our culture. Community Colleges only.

Learning Outcomes

1. be able to understand the diversity of the death experience and the various options available in coping with death and bereavement as shown by the student's participation in class discussions and field trips.
2. better understand death and dying as social phenomena as shown by the student's reaction papers.
3. have taken an in-depth look at her or his own death with a researched paper. Comprehension will be shown by the student's grade on the paper.

SOCI 2310G. Contemporary Social Problems**3 Credits (3)**

This course studies the nature, scope, and effects of social problems and their solutions. The course will concentrate on sociological perspectives, theories, and key concepts when investigating problems, such as inequality, poverty, racism, alienation, family life, sexuality, gender, urbanization, work, aging, crime, war and terrorism, environmental degradation, and mass media. This course is designed to build students' sociological understanding of how sociological approaches attempt to clarify various issues confronting contemporary life, as well as how sociologists view solutions to these problems.

Learning Outcomes

1. Identify and explain major social problems in the United States, and how social problems become constructed as problems.
2. Describe and analyze policy related solutions associated with social problems from various perspectives.
3. Critically examine social problems through the use of sociological theories, methods, and empirical techniques.
4. Identify connections, both national and global, between social problems and social inequalities (e.g., social class, race/ethnicity, and gender/sexuality).

SOCI 330V. Introduction to Religious Studies**3 Credits (3)**

Provides an overview of old and new methods and theories for the study of religion. Exposure to the ways groups of people in diverse cultural systems construct and change their religious traditions to serve practical and meaningful ends. Same as ANTH 330V and HIST 330V.

SOCI 336V. Sociology of Pop Culture**3 Credits (3)**

This course will provide students with a sociological look at creation, distribution, and effects of popular culture that have shaped, preserved, and conveyed distorted images of social class, race, gender and history to unwary consumers.

SOCI 350. Sociological Foundations**3 Credits (3)**

Focus is on becoming a sociologist including career opportunities, thinking critically about society, and conducting sociological inquiry. Emphasis is on identifying and using resources available to sociologists, communication skills for sociologists and acquisition of basic analytic techniques. Restricted to BA Sociology majors.

Prerequisite(s): SOCI 1110G or consent of instructor.

SOCI 351. Sociological Theory**3 Credits (3)**

Analysis of the main historical themes underlying contemporary sociological theory. May be repeated up to 3 credits.

Prerequisite(s): SOCI 1110G.

SOCI 352. Social Research: Methods**3 Credits (3)**

An introduction to research design and data collection strategies commonly employed in the social sciences. Topics include experiments, survey research and various other quantitative and qualitative methods. May be repeated up to 3 credits.

Prerequisite(s): SOCI 1110G.

SOCI 353. Sociological Research: Analysis**3 Credits (3)**

Elementary data analysis class emphasizing descriptive and inferential statistical techniques commonly employed in the social sciences. Topics range from one variable analysis through regression and correlation analysis of two variables. May be repeated up to 3 credits.

Prerequisite(s): SOCI 1110G.

Learning Outcomes

1. Critically evaluate understand social statistics from various common sources such as TV, newspapers, research reports, and scholarly articles. -- Assessed via discussion, assignments and exams.

SOCI 357. Gender and Society**3 Credits (3)**

Overview of issues related to gender, including how gender is constructed and reproduced in our society. Gender is examined from social psychological and institutional perspectives.

SOCI 359. Sociology of the Family**3 Credits (3)**

Family patterns, dynamics, and processes in North American and other contemporary families. Emphasis on diversity.

SOCI 360V. Introduction to Population Studies**3 Credits (3)**

Determinants and consequences of changes in fertility, mortality and migration patterns. Introduction to techniques of demographic analysis. Focus on U.S. and world population issues and their relation to social, cultural, and economic systems.

SOCI 361V. Social Issues in the Rural Americas**3 Credits (3)**

Discussion of the major social issues facing the rural United States and borderland areas. Topics include the social history, governmental policies, water rights, land issues and labor. May be repeated up to 3 credits.

SOCI 362. Urban Society in a Global World: Problems, Prospects, and Promises**3 Credits (3)**

Identification and analysis of the causes and consequences of social issues in urban environments including poverty, crime, terrorism, urban social policy, suburban flight, disinvestment, and deindustrialization. Special emphasis on global forces affecting global urban environments around the world.

SOCI 365. Environmental Sociology**3 Credits (3)**

Societal responses to environmental problems including social adjustments to natural and technological hazards, socio-cultural aspects of technological risk and impact assessment, and emergence of environmental social movements.

SOCI 371. Race and Ethnic Relations**3 Credits (3)**

Dynamics of racial prejudice and patterns of racial and ethnic interaction in the United States.

SOCI 374V. Comparative Family Systems**3 Credits (3)**

A comparative analysis of family forms and characteristics in various societies. An examination of the diversity of family practices among ethnic and class groups in the United States.

SOCI 375. Social Inequality**3 Credits (3)**

Analysis of the social distinctions arising from sex, age, occupation, and ethnicity. Emphasis on indicators of social class and patterns of social mobility.

SOCI 376V. Social Change**3 Credits (3)**

Explanations of autonomous and directed social change as occurring at the individual, organizational, societal, and international levels. Case studies from around the world.

SOCI 390. Sociology of Childhood**3 Credits (3)**

This course examines theories, methods, and empirical research in several areas of the sociology of childhood. Major themes are: (1) how social structure constrains children's lives, (2) how children negotiate, share, and create culture, and (3) how children's experiences vary within and across societies.

SOCI 391. Crime and Society**3 Credits (3)**

Analysis of crime at the interpersonal, organizational, and social structure levels in society. Exploration of contemporary images of crime in mass media. Examination of connections between race, class, gender, and crime in U.S. society.

SOCI 392. Juvenile Delinquency**3 Credits (3)**

Nature, extent, and causes of juvenile delinquency; juvenile justice; modern methods of treatment; programs of prevention.

SOCI 393. Youth and Society**3 Credits (3)**

Comparative historical analysis of social, economic and cultural forces affecting young people. Emphasis on organizational and institutional effects on the well being of children and young adults.

SOCI 394V. Sports and Society: A Global Perspective**3 Credits (3)**

A critical examination of sports in a global context, emphasizing the social and cultural factors that shape the world of sports and the consequences of sports for societies. Course examines issues of social inequality, violence, media and corporate influence, religion and sports, and the student-athlete experience.

SOCI 401. Introduction to Sociological Practice**3 Credits (3)**

The application of sociological theory and research method. May be taught as service learning course. May be repeated up to 3 credits. Restricted to: SOC majors.

Prerequisite(s): SOCI 1110G, senior standing or consent of instructor.

SOCI 409. Community Development**3 Credits (3)**

This is a holistic view of community development with an emphasis upon how economic development efforts can become more inclusive and sustainable. Topics include examining what 'community' means, community development versus economic development, and alternative economic activities.

Prerequisite(s): SOCI 1110G.

SOCI 430. Collective Behavior and Social Movements**3 Credits (3)**

An overview and exploration of the key concepts of collective behavior and social movements as they apply to both historical and contemporary trends and movements. We examine also social movement tactics and their effectiveness in shaping policy and social norms. May be repeated up to 3 credits.

SOCI 444. Social Networks**3 Credits (3)**

Introduction to social network analysis in sociology. First half of the course focuses on understanding the structure of social networks. Second half of the course involves examining real-world social networks ranging from romantic relationships to political parties.

Learning Outcomes

1. Finish the course with the ability to interpret, question, and discuss network science theories and methods. Understand which type of network method is appropriate for different kinds of research questions. Finish the course with basic programming and network analysis skills in the R statistical computing environment.

SOCI 445. Textual Analysis of Digital and Social Media**3 Credits (3)**

Introduction to some of the methods that social scientists use to analyze digital and social media. Focus is on developing the fundamentals for designing and conducting text analysis projects.

Learning Outcomes

1. Finish the course with the ability to interpret, question, and discuss text analysis methods accurately. Understand which type of text analysis method is appropriate for different kinds of research questions. Finish the course with basic programming and data analysis skills in the R statistical computing environment.

SOCI 446. Visualizing Social Life**3 Credits (3)**

Introduction to how to communicate sociological findings using graphics. Emphasis is on finding meaningful trends in real-world social science data and creating graphics that best communicate those associations or trends.

Learning Outcomes

1. Finish the course with the ability to create, interrogate, and interpret data visualization. Understand which type of graphic is appropriate for different kinds of social science data. Finish the course with basic programming and data visualization skills in the R statistical computing environment, especially with the ggplot2 package.

SOCI 448. Special Topics**3 Credits (3)**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

SOCI 449. Directed Readings**1-3 Credits**

Individual readings or research for either majors or nonmajors. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

SOCI 458V. Comparative Global Family Systems**3 Credits (3)**

The study of families around the world. The comparison will include how capitalism and power differentials have affected the course of family history, gender relations, and family life today.

SOCI 460. Sociology of Religion**3 Credits (3)**

Examination of religion in its social context to understand the intricate relations of religion, culture and U.S. society. Recommended preparatory courses: SOCI 1110G, SOCI 2220, SOCI 376, ANTH 1140G.

SOCI 464. Human Society and the Environment**3 Credits (3)**

This course explores the relationship between human societies and the natural environment, with an emphasis on both sustainable human and environmental relationships.

Prerequisite(s): SOCI 1110G.

SOCI 465V. Environmental Sociology**3 Credits (3)**

Advanced examination of societal responses to environmental problems including social adjustments to natural and technological hazards, sociocultural aspects of technological risk and impact assessment, and emergence of environmental social movements.

SOCI 470. Sociology of Latinos/as in the United States**3 Credits (3)**

In-depth examination and comparative analysis of political and economic issues affecting Latino/a culture and behavior. Includes the Chicano/a and larger Latino/a movements, the border, immigration, language policies, education, religion, labor, and Latina women's issues. Recommended preparatory courses: SOCI 1110G, SOCI 371, or HIST 367.

SOCI 473. International Migration**3 Credits (3)**

This course examines international migration as a social process, focusing on the American experience. Students will examine historical and comparative literature on immigration that puts contemporary questions about policy and immigrant assimilation into a broader sociological perspective.

Prerequisite(s): SOCI 1110G.

SOCI 477. Sociology of Education**3 Credits (3)**

Socio-political and economic factors that shape the structure and operation of educational institutions in modern complex societies. Socio-historical development of the school as a microcosm of society, with examples from American and other school systems.

SOCI 480. Diversity in Alternative Families**3 Credits (3)**

Cross-cultural examination of diversity among and within families: analysis of family diversity includes consideration of the theoretical frameworks, ideological commitments, personal experiences, and methodological approaches to examine family life.

SOCI 481. Social Deviance**3 Credits (3)**

Theoretical approaches to the study of social deviance with emphasis on critical theories. Exploration of forms of deviance in society. Examination of social construction of deviance within mass media and systems of social control.

SOCI 482. Advanced Individual and Society**3 Credits (3)**

Examines reciprocal relationship between individual and society. Topics include socialization, social influence and persuasion, group structure and performance, altruism, aggression, interpersonal attraction, group cohesion and conformity, and inter-group conflict.

SOCI 486. Power and Politics in America**3 Credits (3)**

This course provides an introduction to the study of Political Sociology with a focus on the United States. Political Sociology studies the social bases of politics and political systems and facilitates the understanding of the processes and consequences of power distributions in the United States.

Prerequisite(s): SOCI 1110G.

SOCI 489. Globalization**3 Credits (3)**

Analysis of the globalization process. Covers theories of globalization, the global economy, political globalization, global culture, transnational social movements, transnational migration and world labor market, global cities, and local-global linkages. Same as POLS 469.

SOCI 491. Criminological Theory**3 Credits (3)**

Schools of thought, contrasting approaches, and contemporary efforts in theory construction relevant to adult and juvenile offenders.

SOCI 496. Internship**1-6 Credits**

Supervised participation in an appropriate community setting. Taught with SOCI 596. May be repeated up to 9 credits. Consent of Instructor required. Graded: S/U Grading (S/U, Audit).

SOCI 501. Perspectives on Sociology**3 Credits (3)**

Overview of Sociology and development of students' sociological imaginations. Understanding the place of sociology in career development and the application of Sociology and sociological concepts to the real world. May be repeated up to 3 credits. Restricted to: SOC majors.

Learning Outcomes

1. Refine students' sociological imaginations.
2. Engage in critical self-reflection by practicing sociological mindfulness on a regular basis.
3. Have the opportunity to apply sociological concepts to the real world.
4. Explore how students can utilize sociology in achieving their career goals.
5. Refine students' critical writing and thinking skills through class discussions.

SOCI 509. Advanced Seminar in Community Development**3 Credits (3)**

This is in an advanced seminar addressing a holistic view of community development with an emphasis upon how economic development efforts can become more inclusive and sustainable.

Prerequisite(s): Graduate student standing.

SOCI 530. Advanced Collective Behavior and Social Movements**3 Credits (3)**

An advanced exploration of the key concepts of collective behavior and social movements as they apply to both historical and contemporary trends and movements. We examine also social movement tactics and their effectiveness in shaping policy and social norms. May be repeated up to 3 credits.

SOCI 544. Advanced Seminar in Social Networks**3 Credits (3)**

Advanced introduction to social network methods. First half of the course focuses on understanding the structure of social networks. Second half of the course involves examining real-world social networks ranging from romantic relationships to political parties. Includes hands-on experience with the R statistical computing environment

Learning Outcomes

1. Finish the course with the ability to interpret, question, and discuss network science theories and methods. Understand which type of network method is appropriate for different kinds of research questions. Finish the course with basic programming and network analysis skills in the R statistical computing environment.

SOCI 545. Advanced Seminar in Text Analysis for the Social Sciences**3 Credits (3)**

Advanced exploration into some of the methods that social scientists use to analyze digital and social media. Focus is on developing the fundamentals for designing and conducting text analysis projects. Includes hands-on experience with the R statistical computing environment.

Learning Outcomes

1. Finish the course with the ability to interpret, question, and discuss text analysis methods accurately. Understand which type of text analysis method is appropriate for different kinds of research questions. Finish the course with basic programming and data analysis skills in the R statistical computing environment.

SOCI 546. Advanced Seminar in Data Visualization**3 Credits (3)**

Advanced exploration into how to communicate sociological findings using graphics. Emphasis is on finding meaningful trends in real-world social science data and creating graphics that best communicate those associations or trends. Includes hands-on experience with the R statistical computing environment, especially the ggplot2 package.

Learning Outcomes

1. Finish the course with the ability to create, interrogate, and interpret data visualization. Understand which type of graphic is appropriate for different kinds of social science data. Finish the course with basic programming and data visualization skills in the R statistical computing environment, especially with the ggplot2 package.

SOCI 548. Graduate Special Topics**3 Credits (3)**

Specific subjects to be announced in the Schedule of Classes.

SOCI 549. Special Research Problems**1-3 Credits**

Individual analytic or experimental investigations. May be repeated for a maximum of 6 credits.

Prerequisite: consent of instructor.

SOCI 551. Issues in Advanced Quantitative Analysis**3 Credits (3)**

Advanced methods of sociological analysis are examined in detail. Restricted to: SOC majors.

SOCI 552. Seminar in Classical Social Theory**3 Credits (3)**

Analysis of classical social thought within the discipline. Restricted to: SOC majors.

SOCI 553. Seminar in Sociological Research**3 Credits (3)**

Exploration of research methods, issues, and practical application. May be repeated up to 3 credits. Restricted to: Soc majors.

SOCI 559. Graduate Seminar in Sex and Gender**3 Credits (3)**

Comprehensive examination of current gender identity and gender stratification issues.

SOCI 560. Advanced Sociology of Religion**3 Credits (3)**

Examination of religion in its social context to understand the intricate relations of religion, culture and U.S. society.

SOCI 561. Seminar in Qualitative Research Methods**3 Credits (3)**

This course provides an in-depth examination of qualitative research methods, including the logic, time, and purpose of using such methods.

Prerequisite(s): Graduate standing.

SOCI 564. Seminar in Human Society and the Environment**3 Credits (3)**

This is an advanced seminar exploring the relationship between human societies and the natural environment, with an emphasis on both sustainable human and environmental relationships.

Prerequisite(s): Graduate Student Status.

SOCI 565. Advanced Environmental Sociology**3 Credits (3)**

Advanced examination of societal responses to environmental problems including social adjustments to natural and technological hazards, sociocultural aspects of technological risk and impact assessment, and emergence of environmental social movements.

SOCI 569. Advanced Issues in Sexualities**3 Credits (3)**

Various issues in sexualities are addressed through a wide range of theoretical and empirical sociological literatures that involve quantitative and qualitative data. Advanced examination of the ways in which sexuality is constituted in local, cultural and institutional environments.

SOCI 570. Advanced Sociology of Latinos/as in the United States**3 Credits (3)**

In-depth examination and comparative analysis of political and economic issues affecting Latino/a culture and behavior. Topics include the Chicano/a and larger Latina/o movements, the border, immigration, language policies, education, religion, labor and Latina women's issues.

SOCI 571. Advanced Race and Ethnic Relations**3 Credits (3)**

In-depth analysis of the dynamics of prejudice/discrimination and patterns of intergroup interaction in the U.S.

SOCI 572. Advanced Sociology of Medical Ethics**3 Credits (3)**

Major issues in the roles and relationships of health care providers and consumers, problems in communication, malpractice, patients rights, and ethics. Taught with SOCI 472 with additional work required at the graduate level.

SOCI 574. Sociology of Organizations**3 Credits (3)**

Sociological models of formal organizations relevant to business, education, government, healthcare, military, and religion. Focus on internal organizational structure and dynamics plus the reciprocal relationship between organizations and their operating environment.

SOCI 575. Graduate Social Stratification**3 Credits (3)**

Advanced examination of theories of stratification and current methods of stratification research. Focus on differences by ethnicity, race, class and gender.

SOCI 577. Advanced Sociology of Education**3 Credits (3)**

Socio-political and economic factors that shape the structure and operation of educational institutions in modern complex societies. Socio-historical development of the school as a microcosm of society, with examples from American and other school systems.

SOCI 579. Advanced Sociological Perspectives on the U.S.-Mexico Border**3 Credits (3)**

Theoretical perspectives and current research on U.S.-Mexico border region, including migration, identity, health, gender, and environment.

SOCI 581. Issues in Social Deviance**3 Credits (3)**

Selected forms of deviant behavior, social issues, and social problems.

SOCI 582. Individual and Society**3 Credits (3)**

Examines reciprocal relationship between individual and society. Topics include socialization, social influence and persuasion, group structure and performance, altruism, aggression, interpersonal attraction, group cohesion and conformity, and intergroup conflict.

SOCI 583. Symbolic Interaction**3 Credits (3)**

This seminar will provide you a backdrop on Symbolic Interactionism, focusing on the direct and indirect antecedents of the theory, as well as current research and theoretical development up to the present. May be repeated up to 3 credits.

SOCI 586. Advanced Seminar in Power and Politics in the United States**3 Credits (3)**

This is an advanced seminar addressing the study of Political Sociology with a focus on the United States. Political Sociology studies the social bases of politics and political systems. It facilitates an understanding of the processes and consequences of power distributions in the United States.

Prerequisite(s): Graduate student standing.

SOCI 587. Advanced International Migration**3 Credits (3)**

This course examines international migration as a social process, focusing on the American experience. Students will examine historical and comparative literature on immigration that puts contemporary questions about policy and immigrant assimilation into a broader sociological perspective.

Prerequisite(s): Graduate student standing.

SOCI 589. Advanced Issues in Globalization**3 Credits (3)**

Analysis of the globalization process. Covers theories of globalization; global economy; political globalization; global culture; transnational social movements; transnational migration and world labor market; global cities; local-global linkages. Same as POLS 569.

SOCI 596. Internship**1-6 Credits**

Supervised participation in appropriate occupational setting. May be repeated for a maximum of 12 credits. Taught with SOCI 496 with additional work required at the graduate level.

SOCI 599. Master's Thesis**1-6 Credits**

Thesis. Consent of instructor required. Restricted to: Main campus only. Restricted to SOC majors.

SOIL-SOIL

SOIL 2110. Introduction to Soil Science**3 Credits (3)**

An overview of fundamental concepts in soil science and soils as a natural resource. Students will be introduced to the physical, chemical, and biological properties as it relates to soil management in environmental science, conservation, and agronomy. **Prerequisite:** (CHEM 1120G or MATH 1215 or higher) or CHEM 1215G

Learning Outcomes

1. Understand and use the technical terminology associated with the use and management of soils.
2. Understand the classification of soils and the processes leading to their formation.
3. Identify key physical, chemical, and biological properties of soils.
4. Explain the impact of land use and management decisions as it relates to soil degradation and environmental problems.

SOIL 2110L. Introduction to Soil Science Laboratory**1 Credit (1)**

Morphological, chemical, physical and biological properties of soil in the laboratory and field.

Corequisite(s): SOIL 2110.

Learning Outcomes

1. Learn techniques for sampling and characterizing soils in the region.
2. Understand how soils are formed and the processes that occur within the soil profile.
3. Gain fundamental knowledge on soil physical, chemical, and biological properties and how each can influence the overall function of a particular soil.
4. Develop critical thinking and analytical skills within laboratory and field settings.
5. Encourage collaboration, inclusiveness and critical thinking.

SOIL 2996. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required.

Learning Outcomes

1. Varies

SOIL 300. Special Topics**1-4 Credits**

Specific subjects and credits announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree. May be repeated up to 9 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

SOIL 312. Soil Management and Fertility**3 Credits (3)**

Management, conservation, and fertility of soils; physical conditions affecting growth, nutrition, and plant production.

Prerequisite(s): SOIL 2110.

Corequisite(s): SOIL 312L.

SOIL 312 L. Soil Management and Fertility Lab**1 Credit (1)**

Hands-on experience. Includes field trips, videos, calculations, visiting lecturers and other lab activities as possible.

Prerequisite(s): SOIL 2110.

Corequisite(s): SOIL 312.

SOIL 370. Environmental Soil Science**3 Credits (3)**

Continuation of SOIL 2110 that emphasizes soil properties and processes that directly relate to environmental pollution problems. Same as ENVS 370.

Prerequisite: SOIL 2110.

SOIL 391. Internship**1-6 Credits (1-6)**

Professional work experience under the joint supervision of the employer and a faculty member. A written report is required. No more than 6 credits toward a degree. Consent of Instructor required. Graded: S/U Grading (S/U, Audit).

SOIL 424. Soil Chemistry**3 Credits (3)**

Basic elements of soil chemistry including clay mineralogy, cation and anion exchange and the chemistry of problem (acid, saline and flooded) soils.

Credit not given for both SOIL 424 and SOIL 479.

Prerequisite(s): SOIL 2110L or CHEM 1215G and CHEM 1225G.

SOIL 447. Seminar**1 Credit (1)**

Organization, preparation, and presentation of current topics in agronomy, environmental sciences, horticulture, and soil science. Crosslisted with: AGRO 447, HORT 447 and ENVS 447.

SOIL 449. Special Problems**1-3 Credits**

Research problem, experience training, or other special study approved by a faculty adviser. Maximum of 3 credits per semester and a grand total of 6 credits. May be repeated up to 6 credits. Consent of Instructor required.

SOIL 450. Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes. Maximum of 4 credits per semester and a total of 9 credits towards a degree. May be repeated up to 9 credits. Consent of Instructor required.

SOIL 456. Irrigation and Drainage**3 Credits (3)**

Principles and practices required for irrigation to exist as a permanent economy. Equipment and methods for measurement and control of water.

SOIL 472. Soil Morphology and Classification**4 Credits (2+2P)**

Terminology used to describe soils. Soil classification systems of the world with emphasis on systems used in the United States. Theory of classification and taxonomy as applied to soils. May be repeated up to 4 credits. Crosslisted with: GEOG 472.

Prerequisite(s): SOIL 2110.

SOIL 476. Soil Microbiology**3 Credits (3)**

Nature and physiology of soil microorganisms, how they affect plant growth and recycle nutrients. Land farming, bioremediation and other environmental problems as influenced by soil microorganisms. SOIL 2110 and BIOL 311 recommended. Same as BIOL 476.

SOIL 476 L. Soil Microbiology Laboratory**1 Credit (3P)**

Enumeration of soil microorganisms, their activities, and transformations they mediate. Same as BIOL 476L.

Prerequisites: SOIL 476 or concurrent enrollment.

SOIL 477. Environmental Soil Physics**3 Credits (3)**

A description of the physical characteristics of porous media including soil. Examination of processes describing the transport of water, chemicals, heat and gases through porous media with application to environmental quality, waste management, and crop production.

SOIL 477 L. Environmental Soil Physics Laboratory**1 Credit (1)**

Concurrent enrollment with SOIL 477 recommended. Hands on experience with techniques for characterizing soil physical properties such as particle size distribution, bulk density, water retention, hydraulic conductivity and solute transport. Demonstrations of field and laboratory techniques for measuring moisture content, soil water potential, gas/air flow and thermal conductivity.

Prerequisite(s): SOIL 2110.

SOIL 479. Environmental Soil Chemistry**3 Credits (3)**

Basic elements of soil chemistry including discussion of clay mineralogy, cation and anion exchange and the chemistry of problem (acid, saline and flooded) soils. Credit not given for both SOIL 424 and SOIL 479.

Prerequisite(s): SOIL 2110L or CHEM 1215G and CHEM 1225G.

SOIL 500. Special Topics**1-4 Credits**

Specific subjects and credits to be announced in the Schedule of Classes. Maximum of 4 credits per semester. No more than 9 credits toward a degree.

SOIL 505. Research Orientation**4 Credits (3+2P)**

Training in writing research proposals, presentation of research results, and interpretation of research results. Crosslisted with: HORT 505, AGRO 505 and ENVS 505.

SOIL 525. Scientific Writing- How to be a Productive and Effective Writer**1-3 Credits (1-3)**

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Crosslisted with: AGRO 525, AGRO 625, HORT 525, HORT 625, SOIL 625 and EPWS 525.

SOIL 590. Graduate Seminar**1 Credit (1)**

Current research discussions presented by master level graduate students. Not more than one credit toward the degree. Same as AGRO/HORT 590. Crosslisted with: AGRO 590 and HORT 590.

SOIL 596. Masters Proposal**1 Credit (1)**

Current research proposal written by masters level graduate students. Consent of Instructor required. Crosslisted with: AGRO 596, ENVS 596, GENE 596 and HORT 596. Students must be a Master level graduate student to enroll in this course. Restricted to: Masters HORT; Masters PLEN majors.

SOIL 597. University Teaching Experience**1-3 Credits (1-3)**

Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ENVS course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Crosslisted with: AGRO 597 and HORT 597

SOIL 598. Special Research Programs**1-6 Credits**

Individual investigations, either analytical or experimental. Maximum of 6 credits per semester. No more than 9 credits toward a degree.

SOIL 600. Doctoral Research**1-15 Credits**

Research.

SOIL 625. Scientific Writing- How to be a Productive and Effective Writer**1-3 Credits (1-3)**

Students will learn to improve their writing skills so that their manuscript preparation process is more efficient and productive. Students will also gain experience in peer-review. Students in the 625 course will be required to perform additional research than those students in the 525 cross-listing. Crosslisted with: AGRO 525, HORT 525 and EPWS 525.

SOIL 650. Advanced Topics**1-3 Credits**

Colloquium on contemporary topics associated with agriculture, environmental science and engineering. Multidisciplinary topics will be chosen to encourage participation of students from diverse disciplines. May be repeated for a maximum of 9 credits.

Prerequisite: consent of instructor.

SOIL 652. Advanced Soil Physics**3 Credits (3)**

Advanced treatment of soil physics, modeling, includes working on an existing/new research project, modeling existing or new data, step by step guide on the use of some 1-D and 2-D models. Specific areas of specialization will be field scale variability of soil properties, water flow, solute transport, and plant water relations.

Prerequisite(s): SOIL 477 and computer literacy; or consent of instructor.

SOIL 655. Moisture Heat Contaminant Transport Modeling**3 Credits (3)**

Provides clear coverage of the basic principles of heat, moisture and contaminant transport through porous media, and a step-by-step guidance and hands on application on the use of some spreadsheet based and physically based one-and two-dimensional transport models. A similar course does not exist in the college for students that can encourage them to pursue modeling as a means of solving vadose zone and groundwater contamination and remediation problems. Consent of instructor required.

SOIL 694. Doctoral Seminar**1 Credit (1)**

Current research discussions presented by doctoral level graduate students. Not more than 2 credits toward the degree. Same as AGRO 694.

Prerequisite: doctoral level graduate students.

SOIL 696. Doctoral Proposal**1 Credit (1)**

Current research proposal written by doctoral level graduate students. Not more than 1 credit toward the degree. Same as AGRO 696.

Prerequisite: doctoral level graduate students.

SOIL 697. University Teaching Experience**1-3 Credits (1-3)**

Certain graduate students will be permitted to teach up to one-third of one AGRO/HORT/SOIL/ENVS course. The student will prepare and deliver lectures and will prepare, administer, and grade at least one examination. The professor in charge of the course will attend and evaluate the student's lectures. Consent of instructor required. Crosslisted with: AGRO 697 and HORT 697

SOIL 698. Topics in Agronomy**1-6 Credits**

Topics of current interest, designated by title and credit. Maximum of 6 credits per semester. No more than 9 credits toward a degree.

SOWK-SOCIAL WORK

SOWK 2110G. Introduction to Human Services & Social Work**3 Credits (3)**

This course is for students who are interested in social welfare issues and/or are considering entering a social service profession. The course presents an overview of social problems, issues and trends, and the network of social agencies developed to address these concerns. The course examines the influence of personal and professional values and ethics on the helping relationship. The concept of social welfare will be discussed from a social work perspective (with an emphasis on social justice), and students will gain a basic understanding of social work in U.S. society, social work career opportunities, and contemporary issues facing social workers. Approaches relevant to work with individuals, families, groups and communities are presented, with special emphasis on Hispanic and Indigenous populations of New Mexico and the Southwest.

Learning Outcomes

1. Explain the interactions of social institutions, cultural factors, dimensions of identity, and environment with the human development and behavior of individuals.
2. Demonstrate knowledge of the social work profession's focus on addressing contemporary social issues in the United States.
3. Describe the mission and services provided by social service agencies at the regional, national, and global levels.
4. Demonstrate a basic understanding of the social work profession, its history, career opportunities, and contemporary issues facing social workers in the United States today.
5. Recognize how students' knowledge, skills, and attitudes impact their competence as helping professionals.

SOWK 2111. Women's Issues in Social Work**3 Credits (3)**

Examines gender-specific social problems and their identification and resolution through the use of social agencies and community resources.

Community Colleges only.

Learning Outcomes

1. Understand the commonalities among all women, identifying commonalities and differences among oppressed and dominant groups, recognize multiple oppressions, and respect diversity while conducting social work practice through readings, class discussions, and/or written assignments.
2. Identify the various needs of women as individuals, family members and community members through readings, class discussions, and/or written assignments.
3. Demonstrate skills in working effectively with diverse issues involving women with an emphasis on building strengths, interdependence, self-direction, shared power, and cooperation through experiential exercises, written assignments, companion book, and instructor presentations.
4. Demonstrate skills in addressing issues that affect women such as parental issues, relationship problems, physical abuse, sexual abuse, crime, substance abuse, eating disorders, housing concerns, psychological issues and physical abilities written reports.
5. Understand the importance of and demonstrating skills in caring and empathetic connection in the change process through written assignments, experiential activities in the companion book.
6. Understanding the Importance of the Professionals Self-Care through experiential activities and journaling in the companion book.

SOWK 300. Social Work Practice Skills**3 Credits (3)**

Introduction to generalist social work practice. Interpersonal skills, values, and ethics required in the helping relationship. Taught in a small-group format. May be repeated up to 3 credits. Restricted to: S WK majors. Restricted to Las Cruces campus only.

SOWK 301. Orientation to Field**1 Credit (1)**

This course will provide an orientation to requirements for a social work field practicum and to establish the transfer of learning between classroom instruction and future practicum skill application. Restricted to S WK majors.

Corequisite(s): SOWK 300.

SOWK 309. Sociocultural Concepts**3 Credits (3)**

Theoretical and sociohistorical perspectives on racism, sexism, ageism, heterosexism, classism, ableism, and other forms of discrimination and oppression. Cultural diversity, strengths, and Southwest and border issues are examined.

SOWK 311. Human Behavior and the Social Environment I**3 Credits (3)**

Major theories of human behavior and the life span from conception to adolescence. May be repeated up to 3 credits. Restricted to: S WK majors.

SOWK 312. Human Behavior and the Social Environment II**3 Credits (3)**

Continuation of S WK 311. Major theories of human behavior and the life span from young adulthood through old age. Restricted to: S WK majors.

Prerequisite(s): SOWK 311.

SOWK 313. Social Work Practice with Individuals**3 Credits (3)**

Generalist social work practice theory and skills in engagement, information gathering, assessments, planning, interventions, evaluation, and termination with individual client systems. Restricted to: S WK majors.

Prerequisite(s): SOWK 300.

SOWK 315. Social Work Practice with Families**3 Credits (3)**

Generalist social work practice theory and skills in engagement, information gathering, assessments, planning, interventions, evaluation, and termination with multicultural family systems. May be repeated up to 3 credits.

Prerequisite(s): SOWK 300.

SOWK 316. Social Work Research**3 Credits (3)**

This undergraduate course is designed to prepare students to be effective consumers of research and to evaluate their own practice. Students will learn to read, critically evaluate and use the research of others to select interventions that are based on evidence of effectiveness. Students will demonstrate the knowledge, values and skills to be critical consumers of research for effective and ethical practice as well as possess the basic skills necessary to evaluate their own social work professional practice. May be repeated up to 3 credits. Restricted to: Restricted to Social Work majors.

Prerequisite(s): STAT 1350G or STAT 2350G.

SOWK 331V. Introduction to Social Policy: History**3 Credits (3)**

Historical overview of the economic, political, and cultural impact on social welfare policy, institutions, and professions with international content.

SOWK 401. Field Experience I**3 Credits (3)**

Supervised professional practice in a community social service agency, providing experiential learning and instruction. 240 clock hours required.

Restricted to: S WK majors. Graded: S/U Grading (S/U, Audit).

Corequisite(s): SOWK 412.

SOWK 403. Social Work Practicum II**3 Credits (3)**

This course is a continuation of a supervised professional practice in a community social service agency, providing experiential learning and instruction. 240 clock hours required. Restricted to: S WK majors. Graded: S/U Grading (S/U, Audit).

Corequisite(s): SOWK 419.

SOWK 405. Service Learning**3 Credits (3)**

This course introduces students to field work as an essential component of social work education. Students are required to provide a minimum of 40 hours of service to a human services agency. This course will focus on the connection between coursework, field work, the NASW Code of Ethics and skills needed to work with people.

Prerequisite(s): SOWK 301, SOWK 313.

SOWK 412. Practicum Seminar I**3 Credits (3)**

The practicum seminar course will provide students the opportunities to integrate coursework and field practice experience learning to develop social work competencies. Restricted to: S WK majors. Graded: S/U Grading (S/U, Audit).

Corequisite(s): SOWK 401.

SOWK 415. Generalist Social Work Practice with Organizations and Communities**3 Credits (3)**

This course focuses on generalist social work values, knowledge and skills regarding practice with larger systems. Course content will include theories of community and organizational assessment and intervention. Strategies for advocacy and change, leadership for community and organizational change. May be repeated up to 3 credits.

Prerequisite(s): SOWK 300, SOWK 313, SOWK 315.

SOWK 416. Generalist Social Work Practice with Groups**3 Credits (3)**

Generalist social work practice skills with group client systems focusing on the planned change process and the empowerment of oppressed populations. May be repeated up to 3 credits. Restricted to: S WK majors.

SOWK 417. Social Welfare Policy: Legislation**3 Credits (3)**

Policy practice related to the formation of current social welfare policies that promote social and economic justice. Emphasis is on the development and influences of social policy, policy analysis, and the policy change process. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: S WK majors.

SOWK 418. Professionalism in the Field of Social Work**3 Credits (3)**

Students will use the field experience as the backdrop for assessing their own progress toward entry level generalist social work practice; to integrate coursework and field experience to develop their professional foundation. May be repeated up to 3 credits. Restricted to: S WK majors.

Corequisite(s): SOWK 419.

SOWK 419. Practicum Seminar II**3 Credits (3)**

The practicum seminar course will provide students the opportunities to integrate coursework and field practice experience learning to demonstrate social work competencies. May be repeated up to 3 credits. Restricted to: S WK majors. Graded: S/U Grading (S/U, Audit).

Corequisite(s): SOWK 403.

SOWK 443. Family and Child Welfare Practice**3 Credits (3)**

Current issues and interventions in child protection, foster care, family preservation and support, family reunification, adoption and permanency planning. Cannot receive credit for SOWK 443 and M SW 543. May be repeated up to 3 credits. Crosslisted with: MSW 543.

SOWK 449. Independent Study**1-6 Credits**

Individual studies directed by consenting faculty with the prior approval of the department head.

Prerequisite: majors or consent of instructor.

SOWK 490. Family and Child Welfare Policy**3 Credits (3)**

This course is designed to provide students with an understanding of the history and evolution of child welfare policies, initiatives and factors that influence advocacy and practices within the child welfare system. Child welfare policies and services specific to the state of New Mexico are infused throughout the course. Cannot receive credit for both SOWK 490 and MSW 590 May be repeated up to 3 credits. Crosslisted with: MSW 590.

SOWK 497. Special Topics**3 Credits (3)**

Specific subjects to be announced in the Schedule of Classes. May be used as a mandatory practice elective. Restricted to: S WK majors.

Prerequisite(s): Junior or above standing, majors or consent of instructor.

SPAN-SPANISH

SPAN 1110. Spanish I**4 Credits (4)**

Designed for students with little exposure to Spanish, this course develops basic listening, speaking, reading, and writing skills and basic intercultural competence in interpretive, interpersonal and presentational modes of communication at the Novice Level of proficiency based on ACTFL guidelines. During this course, students perform better and stronger in the Novice Mid level while some abilities emerge in the Novice High range. This is an introductory course aimed at helping the student to communicate in Spanish in everyday familiar situations via recognition and production of practiced or memorized words, phrases, and simple sentences.

Prerequisite(s): language placement and/or assessment by departmental examination.

Learning Outcomes

1. Students can communicate on very familiar topics using a variety of words and phrases that they have practiced and memorized.
2. Students can present information about myself and some other very familiar topics using a variety of words, phrases, and memorized expressions.
3. Students can write short messages and notes on familiar topics related to everyday life.
4. Students can often understand words, phrases, and simple sentences related to everyday life.
5. Students can recognize pieces of information and some-times understand the main topic of what is being said.
6. Students can understand familiar words, phrases, and sentences within short and simple texts related to everyday life.
7. Students can sometimes understand the main idea of what they have read.

SPAN 1120. Spanish II**4 Credits (4)**

Designed for students with some degree of exposure to Spanish in high school and/or at home, this course continues to develop basic listening, speaking, reading, and writing skills and basic intercultural competence in interpretive, interpersonal and presentational modes of communication based at the Novice High Level of proficiency based on ACTFL guidelines, although a few abilities may emerge in the Intermediate Low Level. Students in this course communicate in Spanish in familiar topics using a variety of words, phrases, simple sentences and questions that have been highly practiced and memorized.

Prerequisite: language placement and/or assessment by departmental examination or a C- or better in SPAN 1110.

Learning Outcomes

1. Students can participate in conversations on a number of familiar topics using simple sentences.
2. Students can handle short social interactions in everyday situations by asking and answering simple questions.
3. Students can present basic information on familiar topics using language they have practiced using phrases and simple sentences.
4. Students can write briefly about most familiar topics and present information using a series of simple sentences.
5. Students can understand the main idea in short, simple messages and presentations on familiar topics.
6. Students can understand the main idea of simple conversations that they overhear.
7. Students can understand the main idea of short and simple texts when the topic is familiar.

SPAN 1210. Elementary Spanish for Heritage Learners I**3 Credits (3)**

This is a beginning-level Spanish course designed for students who have a cultural connection to the Spanish language. Some students have had very little exposure to the language and enter the class to develop beginning-level skills. Other students may have grown up hearing the heritage language in the community and may understand some Spanish and speak at a basic level as a result. The objective is to draw upon the connection to the heritage language as a source of motivation and engagement for our learning communities. At the same time, we build upon the language base that students may already have as a result of their heritage learner experience in order to develop new proficiencies in Spanish and reactivate the Spanish that students have learned previously. By the end of this course, students will be able to describe their home, campus surroundings and common activities including cultural traditions. At the same time, students gain cultural competency and develop a critical understanding of their linguistic and cultural background. Students who have previously earned a C or better in SPAN 1110 or SPAN 1120 may not receive credit for this course.

Learning Outcomes

1. Interpersonal Communication: Students can engage in exchanges in culturally appropriate ways using understandable pronunciation on familiar topics using contextualized words, phrases, common idiomatic expressions, and simple sentences.
2. Written expression: Students can write an essay/poem/story/creative sketch/lyric in the target language that describes a past/present/future (fictional) event to the reader.
3. Interpretive listening: Students can understand familiar questions and statements from simple sentences in conversations.
4. Interpretive reading: Students can identify the topic and some isolated facts from simple sentences in informational and fictional texts.
5. Critical cultural awareness: Students can recognize and explain some of the issues facing bilingual communities in accordance to the instructor expertise and articulation with subsequent courses.

SPAN 1220. Spanish for Heritage Learners II**3 Credits (3)**

Spanish as a Heritage Language II is a second semester class designed for students who have developed some basic Spanish proficiency from previous classes and/or from community experiences. This course provides students with the opportunity to develop their proficiency in the four language skills (speaking, listening, reading, and writing). Class activities are designed to strengthen oral communication skills (speaking and listening) through a variety of group activities. By the end of the course students will be able to understand and produce narrations of past events in oral and written Spanish. In order to foster a desire to revitalize and maintain the Spanish language in the US context we attempt to raise students' critical awareness of what it means to be part of a specific speech community.

Learning Outcomes

1. Interpersonal Communication: Students can engage in basic but authentic conversations through
2. providing and obtaining information, expressing likes and dislikes, describing their daily lives, and narrating simple events in the past.
3. Written expression: Students can write an essay/poem/story/creative sketch/lyric in the target language, and that describes a past (fictional) event to the reader.
4. Interpretive listening: can identify the main idea in short conversations.
5. Interpretive reading: Students can identify the topic and related information from simple sentences in short informational and fictional texts.
6. Critical cultural awareness: Students can recognize and explain some of the issues facing bilingual communities in accordance to the instructor expertise and articulation with previous and subsequent
7. courses.

SPAN 2110. Spanish III**3 Credits (3)**

This course is based on the integration of learning outcomes across Interpersonal, Interpretive, and Presentational Modes of Communication at the Intermediate Low Level of proficiency based on ACTFL guidelines. Students accomplish real-world communicative tasks in culturally appropriate ways as they gain familiarity with the target culture(s). This is an intermediate course aimed at helping the student to communicate in Spanish on familiar topics about self, others and everyday life at the same time that they recognize and handle short social interactions in interactions in everyday situations by asking and answering a variety of questions.

Prerequisite: language placement and assessment by departmental examination or C or better in SPAN 1120.

Learning Outcomes

1. Students can participate in conversations on familiar topics using sentences and series of sentences.
2. Students can handle short social interactions in everyday situations by asking and answering a variety of questions.
3. Students can usually say what they want to say about themselves and their everyday life.
4. Students can make presentations on a wide variety of familiar topics using connected sentences.
5. Students can write on a wide variety of familiar topics using connected sentences.
6. Students can understand the main idea in messages and presentations on a variety of topics related to everyday life and personal interests and studies.
7. Students can understand the main idea in conversations that they overhear.
8. Students can understand the main idea of texts related to everyday life and personal interests or studies.

SPAN 2120. Spanish IV**3 Credits (3)**

This course is based on the integration of learning outcomes across Interpersonal, Interpretive, and Presentational Modes of Communication at the Intermediate Low Level of proficiency based on ACTFL guidelines. Students accomplish real-world communicative tasks in culturally appropriate ways as they gain familiarity with the target culture(s). This is an intermediate course aimed at helping the student to communicate in Spanish on familiar topics about self, others and everyday life at the same time that they recognize and handle short social interactions in interactions in everyday situations by asking and answering a variety of questions.

Prerequisite: language placement and assessment by departmental examination or C or better in SPAN 2110.

Learning Outcomes

1. Students can participate with ease and confidence in conversations on familiar topics.
2. Students can usually talk about events and experiences in various time frames.
3. Students can usually describe people, places, and things.
4. Students can handle social interactions in everyday situations, sometimes even when there is an
5. unexpected complication.
6. Students can make presentations in a generally organized way on school, work, and community topics, and on topics they have researched.
7. Students can make presentations on some events and experiences in various time frames.
8. Students can write on topics related to school, work, and community in a generally organized way.
9. Students can write some simple paragraphs about events and experiences in various time frames.
10. Students can easily understand the main idea in messages and presentations on a variety of topics
11. related to everyday life and personal interests and studies.
12. 1Students can usually understand a few details of what they overhear in conversations, even when
13. something unexpected is expressed.
14. 1Students can sometimes follow what they hear about events and experiences in various time frames.
15. 1Students can easily understand the main idea of texts related to everyday life, personal interests, and studies.
16. 1Students can sometimes follow stories and descriptions about events and experiences in various time frames.

SPAN 2210. Spanish for Heritage Learners III**3 Credits (3)**

Intermediate Spanish for Heritage Speakers I is a third semester course designed for students who have been raised in a Spanish-speaking environment and speak, or understand, some Spanish as a result of hearing it in the home, and in the community by family, friends, and neighbors. Students in this course will continue to develop their ability to narrate events in the past and will be able to describe hypothetical situations. Students will also develop their ability to express wishes, desires, and necessities. This course will help the student build confidence in their Spanish abilities and expand the language use in the areas of writing, reading, oral production and listening comprehension. In order to foster a desire to revitalize and maintain the Spanish language we attempt to raise students' critical awareness of wider issues facing Spanish speakers in the US context.

Learning Outcomes

1. Interpersonal Communication: Students can exchange information on a wide variety of familiar topics in which the students use appropriate vocabulary to describe their daily lives and narrate events in the past with some degree of ease and confidence.
2. Written expression: Students can write an essay/poem/story/creative sketch/lyric in the target
3. language, and that effectively conveys a series of past (fictional) events to the reader that may include recent and distant past.
4. Interpretive listening: Students can identify the main idea and key information in short straightforward conversations.
5. Interpretive reading: Students can understand the main idea and key information in short straightforward informational and fictional texts.
6. Critical cultural awareness: Students can recognize and explain some of the issues facing bilingual communities in accordance to the instructor expertise and articulation with previous and subsequent courses.

SPAN 305. Topics in Hispanic Civilization**3 Credits (3)**

Group study of selected topics focusing on Hispanic culture and civilization. Topics announced in the Schedule of Classes. May be repeated for a maximum of 6 credits.

Prerequisite: SPAN 2120 or SPAN 2210 or consent of instructor.

SPAN 306. Special Topics**3 Credits (3)**

Group study of Spanish for specialized purposes (e.g. court interpreting, professional language for bilingual teachers, technical writing for the business community). Course subtitled in the Schedule of Classes. May be repeated for a maximum of 12 credits.

Prerequisite: SPAN 2120 or SPAN 2210 or consent of instructor.

SPAN 316. Grammar for Non-Native Speakers of Spanish**3 Credits (3)**

For students who did not grow up speaking Spanish. A review of the rules of Spanish grammar. Students cannot receive credit for both SPAN 316 and SPAN 318.

Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.

Learning Outcomes

1. Students will be better equipped academically to continue into upper-division Spanish courses. Students will be better equipped to communicate in Spanish by becoming more adept at using a variety of grammatical structures. Students will gain an appreciation for diverse languages and cultures that exist in the borderlands and will be able to contribute to the diversity. Students will gain critical thinking skills as they develop their bilingual abilities. Students will be encouraged after becoming bilingual and will desire to make language learning life-long goal.

SPAN 317. Composition for Non-Native Speakers of Spanish**3 Credits (3)**

For students who did not grow up speaking Spanish. Development of professional and academic writing skills in Spanish. Students cannot receive credit for both SPAN 317 and SPAN 319.

Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.

Learning Outcomes

1. Students will be better equipped academically to continue into upper-division Spanish courses. Students will be better equipped to communicate in written Spanish by employing a more clear and structured writing style. Students will gain an appreciation for diverse languages and cultures that exist in the borderlands and will be able to contribute to the diversity. Students will gain critical thinking skills as they develop their bilingual abilities. Students will be encouraged after becoming bilingual and will desire to make language learning life-long goal.

SPAN 318. Grammar for Heritage/Native Speakers of Spanish**3 Credits (3)**

For students who speak or have been exposed to Spanish at home or in the community. A review of grammatical concepts and analysis of both spoken and written Spanish. Students cannot receive credit for both SPAN 316 and SPAN 318.

Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.

Learning Outcomes

1. Students will be better equipped academically to continue into upper division Spanish courses. Students will be better equipped to communicate in written and spoken Spanish by using a variety of grammatical structures. Students will sharpen their Spanish communication skills, which will assist them in securing employment as bilingual speakers. Students will develop a stronger appreciation for the Spanish communication skills and cultural awareness which will assist them in contributing to their communities in meaningful ways. Students will gain critical thinking skills as they sharpen their bilingual abilities.

SPAN 319. Composition for Heritage/Native Speakers of Spanish**3 Credits (3)**

For students who speak or have been exposed to Spanish at home or in the community. Development of writing strategies, styles and techniques in the Spanish language. Students cannot receive credit for both SPAN 317 and SPAN 319.

Prerequisite(s): SPAN 2120 or SPAN 2210 or consent of instructor.

Learning Outcomes

1. Students will be better equipped academically to continue into upper-division Spanish courses. Students will be better equipped to communicate in written Spanish by employing a more clear and structured writing style. Students will gain an appreciation for diverse languages and cultures that exist in the borderlands and will be able to contribute to the diversity. Students will gain critical thinking skills as they develop their bilingual abilities. Students will be encouraged after becoming bilingual and will desire to make language learning life-long goal.

SPAN 325. Advanced Conversation**3 Credits (3)**

Intensive oral practice. Not open to heritage/native speakers of Spanish.

Prerequisite(s): SPAN 2120 or consent of instructor.

SPAN 327. Spanish in the Community**3 Credits (3)**

Emphasis on use of Spanish outside the classroom in the local communities. Activities include but are not limited to oral histories, language mentoring in schools, assisting with cultural activities and language research.

Prerequisite: SPAN 2120 or SPAN 2210 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will learn how to apply bilingual and bicultural skills to serve the community.

SPAN 330. Variations in Spanish**3 Credits (3)**

The study of social variation within the Spanish language, examining both social and linguistic factors that affect language change.

Prerequisite: SPAN 316 or SPAN 318 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the terms and concepts related to linguistic variations. Students will learn about variations in the Spanish language and how to apply these ideas to a greater linguistics body of knowledge.

SPAN 340. Introduction to Spanish Linguistics**3 Credits (3)**

General aspects of Spanish linguistics: traditional, descriptive, historical and dialectal.

Prerequisite: SPAN 316 or SPAN 318 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the terms and concepts related to Spanish linguistics. Students will learn about a wide range of linguistics topics and how to apply these ideas to a greater linguistics body of knowledge.

SPAN 350. Introduction to Chicano Studies**3 Credits (3)**

Covers Mexican-American life including language, history, education, politics and literature.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of Chicano Studies. Students will learn about various Chicano cultural and historical themes and how they affect the Chicano community today.

SPAN 352. Spanish in Social Contexts**3 Credits (3)**

The study of Spanish in the contexts of the societies in which it is spoken.

Prerequisite: SPAN 316 or SPAN 318 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the terms and concepts related to linguistics and social contexts. Students will learn about a Spanish in social contexts and how to apply these ideas to a greater linguistics body of knowledge.

SPAN 353. Spanglish**3 Credits (3)**

Covers lexical borrowing, code choice, language loss and maintenance, and bilingual cognition.

Prerequisite: SPAN 316 or SPAN 318 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the terms and concepts related to Spanglish. Students will learn about the formation and social context of Spanglish and how to apply these ideas to a greater linguistics body of knowledge.

SPAN 361. US-Mexico Border Culture & Literature**3 Credits (3)**

Study of major authors and/or cultural trends in the U.S.-Mexico border. Selected subject to be identified by subtitle in the Schedule of Classes. May be repeated up to 6 credits.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of border literature and culture. Students will learn about the value of US-Mexico border culture and literature and how they help form unique border communities.

SPAN 364V. Culture and Civilization of Mexico**3 Credits (3)**

Familiarization with culture, civilization and regions of Mexico. History, geography, art, literature, folklore, customs, economics and politics of each region. Impact of Mexican culture and civilization on the Southwest United States. Taught in English. Does not satisfy Arts and Sciences second language requirement.

SPAN 365V. Culture and Civilization of Spanish America**3 Credits (3)**

Familiarization with culture, civilization and regions of Spanish America. Study of history, geography, art, literature, folklore, customs, economics and politics of each region. Impact of Spanish American culture and civilization on the Southwest United States. Taught in English. Does not satisfy College of Arts and Sciences second language requirement.

SPAN 380. Introduction to Hispanic Literature**3 Credits (3)**

Works in Spanish, all genres and periods. How to read literature in all forms.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of Hispanic literature.. Students will read foundational Hispanic texts of various genres and periods and learn how they create and inform Hispanic histories, identities, and nations.

SPAN 385. Introduction to Chicano/US-Mexican Literature**3 Credits (3)**

Introduction to the study of major works by Chicano/US-Mexican authors.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of Chicano literature. Students will read foundational Chicano texts of various genres and learn how they create and sustain a national Chicano consciousness.

SPAN 388. Contemporary Hispanic Literature**3 Credits (3)**

Study of Peninsular and Spanish-American literature from the 20th century to the present.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of Hispanic literature. Students will read foundational Hispanic texts of various genres from the 20th and 21st centuries and learn how they create and inform Hispanic histories, identities, and nations.

SPAN 393. Introduction to Translation and Interpretation**3 Credits (3)**

General aspects of translation and interpretation from English to Spanish and Spanish to English. Selected subject to be identified by subtitle in the Schedule of Classes.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms, concepts, and strategies related to translation and interpretation. Students will learn how to translate written texts and/or interpret live communication between the Spanish and English languages. However, other languages may be included at instructor's discretion.

SPAN 399. Independent Studies in Literature, Language, or Culture**1-3 Credits**

Individualized, self-paced projects for advanced students. Students must present formal proposal of study.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will learn how to connect the value between literature, language, and culture and how to apply this knowledge to serve their community.

SPAN 411. Creative Writing**3 Credits (3)**

Creative writing in Spanish.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of creative writing and the publication process. Students will read and learn about the process and types of creative writing and publication, how to create original texts, and how to edit and publish creating works.

SPAN 412. Spanish-American Poetry**3 Credits (3)**

Study of major works by Spanish-American poets.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of the poetry genre. Students will read foundational Hispanic poetry from different periods and learn how poets and poetry create and inform Hispanic histories, identities, and nations.

SPAN 415. Spanish-American Women Writers**3 Credits (3)**

All genres of Spanish-American literature written by women.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of female/feminist literature. Students will read foundational Hispanic literary production by women writers from different periods and various genres and learn how these writers create and reimagine personal and communal identities, histories, and knowledge.

SPAN 416. Nineteenth Century Spanish-American Literature**3 Credits (3)**

Study of major works by Spanish-American authors of the 19th century.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of Spanish-American literature. Students will read foundational Hispanic texts of various genres from the 19th century and learn how they create and inform Hispanic histories, identities, and nations.

SPAN 418. Spanish-American Short Story**3 Credits (3)**

Study of major short stories by Spanish-American authors.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of the short story genre. Students will read foundational Hispanic short stories from various periods and learn how this genre creates and informs Hispanic histories, identities, and nations.

SPAN 419. Spanish American Drama**3 Credits (3)**

Study of major works by Spanish-American dramatists.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of the drama genre. Students will read foundational Hispanic short stories from various periods and learn how this genre creates and informs Hispanic histories, identities, and nations.

SPAN 420. The Art of Storytelling**3 Credits (3)**

The study of the genesis of storytelling and its structure, learning how and why to apply oral storytelling in our personal and professional lives, and practicing the art of storytelling in front of an audience.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of oral storytelling and the significance of this skill in creating personal and national narratives. Students will learn how to write and present original oral stories, myths, and other forms of oral storytelling for a public audience.

SPAN 421. New Mexico Culture and Literature**3 Credits (3)**

The study of the development and flourishing of New Mexican culture and literature.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will learn about key cultural, literary, and historical elements of New Mexico. Students will learn how to apply knowledge about New Mexico to serve their communities.

SPAN 422. Cultural Production of Hispanic Revolutions and Wars**3 Credits (3)**

The study of Hispanic literature, art, and film dealing with revolutionary movements and wars.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of revolutions and wars as they relate to literary production and other modes of cultural expression. Students will learn about various revolutions and wars throughout Spain and Latin America and how they have helped form our regional and national identities, especially through a cultural production lens.

SPAN 424. Post-Modern Hispanic Literature**3 Credits (3)**

The study of Post-Modern experimental literary genres, from Post-boom to the present.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of post-modernism, especially in relation to Hispanic literary production. Students will read a variety of post-modern Hispanic texts from various genres and learn how they help develop regional and national identities.

SPAN 426. Spanish-American Novel**3 Credits (3)**

Study of major works by Spanish-American novelists.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of the novel genre. Students will read foundational Hispanic novels from various periods and learn how this genre creates and informs Hispanic histories, identities, and nations.

SPAN 427. Chicano Literature**3 Credits (3)**

Study of Chicano/US-Mexican authors.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop advanced comprehension of the terms and concepts of Chicano literature. Students will read foundational Chicano texts of various genres, but with a focus on narratives, and learn how they create and sustain a national Chicano consciousness.

SPAN 439. Topics in Applied Spanish Linguistics**3 Credits (3)**

Group study of selected topics to be identified by subtitle in the Schedule of Classes. May be repeated once under different subtitle for a maximum of 6 credits.

Prerequisite: SPAN 340.

SPAN 442. Formation of Hispanic National Identities**3 Credits (3)**

Study of seminal texts on the formation of Hispanic national identities and counternarratives against homogenous notions of nationhood.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Improve critical thinking skills through deep-level readings and class discussions. Strengthen academic research and writing skills through high-level research and writing projects. Understand how Hispanic identities were formed through various narrative practices and how that informs media representations of Hispanic people and culture. Analyze how Hispanic identities were formed and with what motivations. Assess national narratives and counter-narratives to understand their political-social worlds better.

SPAN 444. Body Studies**3 Credits (3)**

Interdisciplinary study of the body in Hispanic societies and others and its associated political meaning.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Improve critical thinking skills through deep-level readings and class discussions. Strengthen academic research and writing skills through high-level research and writing projects. Understand how the Hispanic body became a cultural and political object and how it is changing by the means of new media. Analyze how the understanding of the Hispanic body has changed throughout history and how local politics affect it. Learn how the body has served as the locus of culture and the principle of social interaction and politics.

SPAN 446. Speculative Fiction**3 Credits (3)**

Study of Hispanic speculative fiction and its related utopian/dystopian societies.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Improve critical thinking skills through deep-level readings and class discussions. Strengthen academic research and writing skills through high-level research and writing projects. Understand how social anxieties produced a Hispanic literary corpus to deal with the past, the present, and the future. Analyze and compare how genre fiction challenges or supports hegemonic national discourses. Learn how speculative fiction serves as an expression of social desires.

SPAN 447. Hispanic Film**3 Credits (3)**

Study of major films from Spain and Spanish-America. Restricted to: Main campus only.

SPAN 448. U.S.-Hispanic Film**3 Credits (3)**

Study of major films about and/or by Hispanics of the U.S. Restricted to: Main campus only.

SPAN 449. Special Problems**1-3 Credits**

Directed reading for graduate students in their specific fields to satisfy language requirement for master's or doctoral programs. May be repeated for a maximum of 6 credits.

SPAN 451. Hispanic Cultures**3 Credits (3)**

Issues in Hispanic cultures of the U.S., Spanish-America and Spain. Also focuses on U.S.-Mexico border culture. Selected topics to be identified by subtitle in the Schedule of Classes.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will learn about various modes of Hispanic cultural production and how they create regional and national Hispanic identities.

SPAN 457. Strategies for Teaching Spanish for Heritage/Native Speakers**3 Credits (3)**

Overview of the main theories, research, pedagogical approaches, assessment and practice concerning the teaching of Spanish to heritage learners and native speakers. Taught with SPAN 597.

Prerequisite: SPAN 317 or SPAN 319 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop advanced comprehension of the terms and concepts related to the study and application of Spanish for Heritage/Native Speakers of Spanish. Students will learn how to become more effective teachers of Spanish for Heritage/Native Speakers of Spanish.

SPAN 461. Introduction to Spanish Phonetics**3 Credits (3)**

An introduction to Spanish phonetics including basic dialectal variation and comparison with English.

Prerequisite: SPAN 340.

SPAN 474. Pragmatics**3 Credits (3)**

The study of theory and pragmatic notions such as implicatures, presuppositions, deixis, speech acts, and politeness.

Prerequisite(s): SPAN 340.

SPAN 476. Semantics**3 Credits (3)**

The investigation of language from a semantic-pragmatic perspective and the use of formal logic to communicate meaning.

Prerequisite(s): SPAN 340.

SPAN 478. Spanish and Language Contact**3 Credits (3)**

The study of several areas of language in contact with Spanish, including cases in Europe, Africa and the Americas.

Prerequisite(s): SPAN 340.

SPAN 483. Literature and Law**3 Credits (3)**

The advanced study of Latin American and Latino literature and its historical and cultural connections to the development of laws and the influence of both on modern society.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of legal themes as found in literature. Students will read foundational Hispanic texts of various genres and learn how they create a narrative that embodies or implies legal issues that affect the Hispanic community.

SPAN 485. Literature and Mental Health**3 Credits (3)**

The advanced study of Latin American and Latino literature and how storytelling, through various literary genres, can inform our understanding of mental health issues and propose possible solutions to improve our quality of mental health.

Prerequisite: SPAN 380 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of mental health themes as found in literature. Students will read foundational Hispanic texts of various genres and learn how they create a narrative that embodies or implies mental health issues that affect the Hispanic community.

SPAN 490. Special Topics**3 Credits (3)**

Selected topic to be identified by subtitle in the Schedule of Classes.

Prerequisite: SPAN 316 or SPAN 318 or consent of instructor.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will learn about various topics of Hispanic literature or linguistics that can be applied to advanced research projects.

SPAN 491. History of the Spanish Language**3 Credits (3)**

The development of Spanish from its origins.

Prerequisite(s): SPAN 340.

SPAN 492. Structure of Spanish**3 Credits (3)**

Topics in Spanish linguistics including phonology, morphology, syntax and semantics.

Prerequisite: SPAN 316 or SPAN 318 or SPAN 340.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the terms and concepts related to the structure of Spanish. Students will learn about the formation of the structure of Spanish and how to apply these ideas to a greater linguistics body of knowledge.

SPAN 493. Espanol de los Estados Unidos**3 Credits (3)**

Linguistic issues and studies of U.S. Spanish-speaking communities. Taught with SPAN 593. May be repeated up to 3 credits.

Prerequisite(s): SPAN 340.

SPAN 500. Methods of Research and Literary Criticism**3 Credits (3)**

Advanced methods of research and literary criticism.

SPAN 507. Technology Enhanced Language Learning**3 Credits (3)**

Strategies for enhancing language learning with emerging technologies. Course is taught in Spanish.

SPAN 508. Teaching Literature with Technology**3 Credits (3)**

Strategies and techniques for enhancing the teaching of all literature genres using emerging technologies. Course is taught in Spanish. Co/

Prerequisite(s): SPAN 507, and/or consent of instructor.

SPAN 509. Teaching Culture with Technology**3 Credits (3)**

Strategies and techniques for enhancing the teaching of culture using emerging technologies. Course is taught in Spanish. Co/

Prerequisite(s): SPAN 507, and/or consent of instructor.

SPAN 510. Assessing the National Standards**3 Credits (3)**

Analysis of the National Standards for Foreign Language Learning (the 5 Cs) in the 21st Century. Course will also cover the Integrated Performance Assessment as applied to the national standards. Other assessments will be reviewed to evaluate effectiveness in all levels of Spanish language classrooms.

SPAN 512. Contemporary Spanish-American Poetry**3 Credits (3)**

Readings and interpretation of Spanish-American poetry from the 20th century to the present.

SPAN 520. Adv. The Art of Storytelling**3 Credits (3)**

The study of the genesis of storytelling and its structure, learning how and why to apply oral storytelling in our personal and professional lives, and practicing the art of storytelling in front of an audience.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the terms and concepts of storytelling and the significance of this skill in creating personal and national narratives. Students will learn how to write and present original oral stories, myths, and other forms of oral storytelling for a public audience.

SPAN 521. Advanced Culture and Literature of New Mexico**3 Credits (3)**

The advanced study of the development and flourishing of New Mexican culture and literature.

SPAN 522. Adv. Cultural Production of Hispanic Revolutions and Wars**3 Credits (3)**

The study of Hispanic literature, art, and film dealing with revolutionary movements and wars.

Learning Outcomes

1. Students will strengthen their written and oral communication in Spanish for personal, academic, and professional success to serve as conduits for a bilingual community. Students will improve their critical thinking skills through deep-level readings and engaged dialogue. Students will improve their academic research, writing, and presentation skills through advanced investigative and writing projects. Students will develop comprehension of the basic terms and concepts of revolutions and wars as they relate to literary production and other modes of cultural expression. Students will learn about various revolutions and wars throughout Spain and Latin America and how they have helped form regional and national identities, especially through a cultural production lens

SPAN 528. Advanced U.S. Latino Culture and Literature**3 Credits (3)**

The advanced study of major works by Latino writers in the U.S.

SPAN 540. Introduccion a la Linguistica**3 Credits (3)**

Introduces students to the foundational topics of linguistic study with particular reference given to the Spanish language: properties of language and communication, morphology, syntax, phonetics, phonology, language variation and change.

Prerequisite(s): Eligibility to take graduate level courses.

SPAN 542. Adv. Formation of Hispanic National Identities**3 Credits (3)**

Study of seminal texts on the formation of Hispanic national identities and counternarratives against homogenous notions of nationhood.

Learning Outcomes

1. Improve critical thinking skills through deep-level readings and class discussions. Strengthen academic research and writing skills through high-level research and writing projects. Understand how Hispanic identities were formed through various narrative practices and how that informs media representations of Hispanic people and culture. Analyze how Hispanic identities were formed and with what motivations. Assess national narratives and counter-narratives to understand their political-social worlds better.

SPAN 544. Adv. Body Studies**3 Credits (3)**

Interdisciplinary study of the body in Hispanic societies and others and its associated political meaning.

Learning Outcomes

1. Improve critical thinking skills through deep-level readings and class discussions. Strengthen academic research and writing skills through high-level research and writing projects. Understand how the Hispanic body became a cultural and political object and how it is changing by the means of new media. Analyze how the understanding of the Hispanic body has changed throughout history and how local politics affect it. Learn how the body has served as the locus of culture and the principle of social interaction and politics.

SPAN 545. Advanced Dialectos del Espanol**3 Credits (3)**

Advanced research of Spanish dialects including their formal characteristics, historical formation and regional variation.

SPAN 546. Adv. Speculative Fiction**3 Credits (3)**

Study of Hispanic speculative fiction and its related utopian/dystopian societies.

Learning Outcomes

1. Improve critical thinking skills through deep-level readings and class discussions. Strengthen academic research and writing skills through high-level research and writing projects. Understand how social anxieties produced a Hispanic literary corpus to deal with the past, the present, and the future. Analyze and compare how genre fiction challenges or supports hegemonic national discourses. Learn how speculative fiction serves as an expression of social desires.

SPAN 547. Advanced Hispanic Film**3 Credits (3)**

Advanced study of major films from Spain and Spanish-America. Restricted to: Main campus only.

SPAN 548. Advanced U.S.-Hispanic Film**3 Credits (3)**

Advanced study of major films about and/or by Hispanics of the U.S. Restricted to: Main campus only.

SPAN 550. Advanced Chicana and Chicano Studies**3 Credits (3)**

Multidisciplinary examination of issues that have historically affected/influenced the Chicana/o community regionally, in the borderlands, and beyond borders.

Learning Outcomes

1. Students will become better equipped to teach this material at the high school or community college levels.
2. Students will become better equipped to attend a PhD program in a related field.
3. Students will gain access to a more diverse curriculum which broaden their educational and cultural perspectives.
4. Students will be able to develop their scholarship on a more creative level.
5. Students will strengthen their academic writing, which will help in their graduate studies and/or post-graduate careers.

SPAN 551. Advanced Hispanic Cultures**3 Credits (3)**

Advanced study on Hispanic cultures of the U.S., Spanish-America and/or Spain. Selected topic to be identified by subtitle. Taught with SPAN 451. May be repeated up to 6 credits.

SPAN 552. Advanced Literature of the Mexican Revolution**3 Credits (3)**

Study of Mexican authors dealing with the Mexican Revolution. Restricted to: Main campus only.

SPAN 558. Bilinguismo**3 Credits (3)**

Examines the topics of bilingualism from a psycholinguistic perspective including the development of the bilingual brain, lexical acquisition, retrieval and storage, and experimental techniques in measuring language competence.

Prerequisite(s): SPAN 540 or consent of instructor.

SPAN 561. Advanced Spanish Phonetics**3 Credits (3)**

Advanced study of Spanish phonetics, including basic dialectal variation and comparisons with English.

SPAN 562. Advanced Spanish Phonology**3 Credits (3)**

An advanced formal examination of the sound system of Spanish including formal characterizations, dialectal variation and laboratory data. May be repeated up to 3 credits.

Prerequisite(s): SPAN 561 or consent of instructor.

SPAN 563. Advanced Study in Mexican Literature**3 Credits (3)**

Mexican literature from the Pre-Columbian period to the present.

SPAN 564. Advanced Post-Modern Hispanic Literature**3 Credits (3)**

The advanced study of Post-Modern experimental literary genres, from Post-boom to the present.

SPAN 566. Contemporary Spanish-American Novel**3 Credits (3)**

The Spanish-American novel from the 20th century to the present.

SPAN 567. Advanced Study in Chicano Literature**3 Credits (3)**

Study of all genres of Chicano literature.

SPAN 570. Advanced Study in Technical Translation**3 Credits (3)**

Translation of a variety of non-literary texts from English to Spanish and from Spanish to English. Course is taught in Spanish.

SPAN 573. Advanced Study in Creative Writing**3 Credits (3)**

Advanced creative writing in Spanish.

SPAN 574. Advanced Pragmatics**3 Credits (3)**

The study of theory and pragmatic notions such as implicatures, presuppositions, deixis, speech acts, and politeness.

Prerequisite(s): SPAN 540 or consent of instructor.

SPAN 576. Advanced Semantics

3 Credits (3)

The investigation of language from a semantic-pragmatic perspective and the use of formal logic to communicate meaning.

Prerequisite(s): SPAN 540 or consent of instructor.

SPAN 578. Adv Spanish and Language Contact

3 Credits (3)

The study of several areas of language in contact with Spanish, including cases in Europe, Africa, and the Americas.

Prerequisite(s): SPAN 540 or consent of instructor.

SPAN 580. Research Methodology in Spanish Linguistics

3 Credits (3)

Study and practical application of techniques in linguistic research.

SPAN 583. Advanced Study in Spanish-American Women Writers

3 Credits (3)

All genres of Spanish-American literature written by women. Research paper required.

SPAN 584. Spanish Morphosyntax

3 Credits (3)

Examination of the morphological and syntactic structure of the Spanish language as well as their interaction. Practical applications are also explored.

SPAN 586. Contemporary Spanish-American Essay

3 Credits (3)

Main currents in the Spanish-American thought from the 20th century to the present.

SPAN 587. Contemporary Spanish-American Short Story

3 Credits (3)

The Spanish-American short story from the 20th century to the present.

SPAN 588. Contemporary Spanish-American Drama

3 Credits (3)

The Spanish-American drama from the 20th century to the present.

SPAN 589. Spanish Sociolinguistics

3 Credits (3)

Relationship between language and society in the Spanish-speaking world.

SPAN 590. Advanced Special Topics

3 Credits (3)

Specific subject to be announced in the Schedule of Classes. May be repeated up to 6 credits.

SPAN 591. Advanced Study in History of the Spanish Language

3 Credits (3)

The development of Spanish from its origins.

SPAN 592. Advanced Structure of Spanish

3 Credits (3)

Advanced study of Spanish linguistics topics such as phonology, morphology, syntax and semantics.

SPAN 594. Theory and Methodology of Spanish Pedagogy

3 Credits (3)

Advanced studies in current theories and methodologies of Spanish language pedagogy. Taught as a practicum.

SPAN 595. Advanced Topics in Applied Spanish Linguistics

3 Credits (3)

Selected topics to be identified by subtitle in the Schedule of Classes. May be repeated for a total of 9 credits under a different subtitle.

SPAN 597. Advanced Strategies for Teaching Spanish for Heritage/Native Speakers

3 Credits (3)

Advanced overview of the main theories, research, pedagogical approaches, assessment and practice concerning the teaching of Spanish to heritage learners and native speakers.

SPAN 598. Independent Reading, Research, and/or Creative Writing

1-3 Credits

Individual study of selected readings and problems; or individual research, either analytical or experimental, or creative writing. May be repeated for unlimited credits.

SPAN 599. Master's Thesis

15 Credits

Thesis.

SPED-SPECIAL EDUCATION

SPED 2130. Society**3 Credits (3)**

Development of culturally responsive learning strategies, skills and utilization of support services, to enhance academic achievement. Restricted to: Main campus only.

SPED 2996. Topics**3 Credits (3)**

Offered under various subtitles that indicate the subject matter to be covered. May be repeated 3 times for a maximum of 9 credits.

Learning Outcomes

1. Varies

SPED 350. Introduction to Special Education in a Diverse Society**3 Credits (3)**

Characteristics, identification, and educational needs of exceptional learners. Attention is given to the various types of programs serving exceptional learners. Designed for all professional personnel who work with exceptional learners.

SPED 355. Introduction to Bilingual/Multicultural Special Education**3 Credits (3)**

Introduction to issues related to the provision of services to culturally and linguistically diverse students with exceptionalities. May be repeated up to 3 credits. Crosslisted with: BLED 355.

SPED 360. Elementary Curriculum, Methods, and Materials for Special Education in a Diverse Society**3 Credits (3)**

Curriculum theory and development for special education programs. Various teaching methods utilized with elementary exceptional learners and techniques involved in identifying, adapting, and developing materials will be addressed.

SPED 406. High Incidence Disabilities in a Diverse Society**3 Credits (3)**

Examines those areas of disability that most frequently occur in the special education population, including mental retardation, learning disabilities, communication disorders, and behavioral and emotional disorders.

SPED 407. Low Incidence Disabilities in a Diverse Society**3 Credits (3)**

Examines those disabilities that occur less frequently in the special education population, including hearing loss, visual disorders, autism, and other severe manifestations.

SPED 409. Reading for Elementary Exceptional Learners in a Diverse Society, K-6**3 Credits (3)**

Emphasizes reading diagnosis and materials for students with special developmental and learning problems. Taught with SPED 509.

SPED 411. Reading for Elementary Exceptional Learners in a Diverse Society, 7-12**3 Credits (3)**

Extends information covered in SPED 509, which covers grades K 6. Strategies and materials are addressed.

SPED 450. Working with Young Children with Special Needs, Ages 3-8**3 Credits (3)**

Addresses competencies for working with young children with exceptionalities, ages three-eight, and their families. Public school, private school, Head Start and other models are included. Taught with SPED 550. Restricted to: TEP-ECED majors. May be repeated up to 3 credits.

Prerequisite: SPED 350; .

Corequisite: SPED 451.

Learning Outcomes

1. Demonstrate knowledge of the significance of individual differences in development and learning.
2. Demonstrate knowledge of how certain differences may be associated with rate of development and developmental patterns associated with developmental delays or specific disabilities. Demonstrate knowledge of the similarities between children who are developing typically and those with diverse disabilities.

SPED 451. Assessment of Young Children, Birth-Eight**3 Credits (3)**

Covers instruments and procedures for assessing young children and their families in order to determine atypical development. Screening, diagnosis, program planning, placement and evaluation issues are covered.

Prerequisite: SPED 350; .

Corequisite: SPED 450.

Learning Outcomes

1. Understand the technical aspects of early childhood assessments Conduct and utilize assessments Collaborate with other professionals

SPED 459. Classroom Management for Diverse Learners**3 Credits (3)**

Behavior-change strategies for exceptional learners.

SPED 460. Working with Young Children with Special Needs, Ages 3-8**3 Credits (3)**

Addresses competencies for working with young children with exceptionalities, ages three-eight, and their families. Public schools, private schools, Head Start, and other models are included. Intended for Zero to Four degree-seeking majors and ECED minors.

Prerequisite: SPED 350.

Corequisite: SPED 461.

Learning Outcomes

1. Demonstrate knowledge of the significance of individual differences in development and learning
2. Demonstrate knowledge of how certain differences may be associated with rate of development and developmental patterns associated with developmental delays or specific disabilities.

SPED 461. Assessment of Young Children, Birth-Eight**3 Credits (3)**

Covers instruments and procedures for assessing young children and their families in order to determine atypical development. Screening, diagnosis, program planning, placement and evaluation issues are covered. Intended for Zero to Four degree seeking majors and ECED minors. May be repeated up to 3 credits.

Prerequisite: SPED 350.

Corequisite: SPED 460.

Learning Outcomes

1. Understands the technical aspects of early childhood assessments
2. Conduct and utilize assessments
3. Collaborate with other professionals

SPED 463. Introduction to Assessment of Diverse Exceptional Learners**3 Credits (3)**

Theory and use of norm and criterion-referenced instruments and learning theories in the classroom; planning of prescriptive instructional programs.

SPED 480. Secondary Curriculum, Methods, and Materials for Special Education in a Diverse Society**3 Credits (3)**

Curriculum theory and development for elementary special education programs. Various teaching methods utilized with secondary exceptional learners and techniques for identifying, adapting, and developing materials will be addressed. Taught with SPED 580.

SPED 481. Practicum in Education, Equity and Cultural Diversity**3 Credits (3)**

This is a supervised experience in providing special education services to local preK-12 students. In the context of the public school classroom, teacher candidates are guided to apply content knowledge from the seminar meetings and from prior coursework. Restricted to: SPED majors.

Prerequisite(s): SPED 350 and SPED 360 or consent of instructor.

SPED 482. Student Teaching SPED**12 Credits (12)**

Supervised teaching in a special education classroom and participation in a required seminar. Restricted to: SPED majors.

Prerequisite(s): SPED 481 and admission to student teaching.

SPED 483. Early Childhood SPED Student Teaching**9 Credits (9P)**

Synthesis of knowledge and skills appropriate to teaching in PreK - 3rd grade educational settings. Restricted to: TEP-ECED majors. Grading (S/U, Audit). Students must be Admitted into student teaching

Learning Outcomes

1. Varies

SPED 485. Introduction to Autism**3 Credits (3)**

This course will provide an overview of autism spectrum disorders as a triad of impairments, including historical and theoretical perspectives, assessment issues, characteristics of autism, intervention programs, and family issues. Taught with SPED 585 and SPED 685.

SPED 486. Behavior and Autism**3 Credits (3)**

This course will cover the first of the triad of impairments. Students will gain an understanding of the behaviors of children with autism. Students will examine several behavior management philosophies and research based interventions and how they can be applied in the educational setting. Attention will also be given to play skills. The family perspective and participation in the proactive behavior management process will be incorporated throughout the course. Taught with SPED 586 and SPED 686 with differentiated assignments.

Prerequisite(s)/Corequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 487. Social Skills and Autism**3 Credits (3)**

This course will cover the second of the triad of impairments. As a blend of researched based models and evidenced based practical applications, students will gain an understanding of the social skill deficits often associated with autism spectrum disorders. Review a variety of social cognition theories and explore effective social skill interventions for children functioning at a variety of levels along the autism spectrum. Taught with SPED 587 and SPED 687 with differentiated assignments.

Prerequisite(s)/Corequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 488. Communication and Autism**3 Credits (3)**

This course will cover the third of the triad of impairments. Students will gain an overview of communication characteristics and difficulties often associated with autism spectrum disorders. Review current tools and strategies used to assess speech, language, and interaction skills. Use assessment results to identify needs and implement appropriate interventions. Explore a variety of intervention strategies aimed at building receptive, expressive, and pragmatic language of children functioning at a variety of levels along the autism spectrum. Taught with SPED 588 and SPED 688 with differentiated assignments.

Prerequisite(s): SPED485 or SPED585 or SPED685.

SPED 489. Topics**3 Credits (3)**

Offered under various subtitles which indicate the subject matter to be covered. May be repeated 3 times for a maximum of 9 credits.

SPED 495. Directed Study courses in Special Education**1-3 Credits**

Each course shall be identified by a qualifying subtitle. A maximum of 3 credits per semester and a grand total of 9 credits.

SPED 500. Introduction to Special Education in a Diverse Society**3 Credits (3)**

This course introduces the field of special education to regular educators.

SPED 501. Topics in Special Education**1-3 Credits**

Offered under various subtitles which indicate the subject matter to be covered. Maximum of 6 credits, 3 credits per semester.

SPED 502. Problems**1-3 Credits**

Offered under various subtitles which indicate the subject matter to be covered. Maximum of 6 credits, 3 credits per semester.

SPED 504. Introduction to Assessment of Diverse Exceptional Learners**3 Credits (3)**

Required for students seeking licensure at graduate level. Theory and use of norm-and criterion-referenced instruments and learning theories in the classroom; planning of prescriptive instructional programs with differentiated assignments for graduate students. Crosslisted with: SPED 463. Restricted to: SPED majors.

SPED 506. High Incidence Disabilities in a Diverse Society**3 Credits (3)**

Examines those areas of disability that most frequently occur in the special education population, including mental retardation, learning disabilities, communication disorders, and behavioral and emotional disorders.

SPED 507. Low Incidence Disabilities in a Diverse Society**3 Credits (3)**

Examines those disabilities that occur less frequently in the special education population, including hearing loss, visual disorders, autism, and other severe manifestations. Taught with SPED 607 with differentiated assignments.

SPED 509. Reading for Elementary Exceptional Learners in a Diverse Society, K-6**3 Credits (3)**

Emphasizes reading diagnosis and materials for students with special developmental and learning problems. Taught with SPED 409.

SPED 510. Current Issues in Special Education for Teaching in Culturally Responsive Society**3 Credits (3)**

Theoretical and empirical bases for special education practices. Skill development in critical thinking, reading, and writing in relation to contemporary problems. Taught with SPED 610.

SPED 511. Reading for Secondary Exceptional Learners in a Diverse Society, 7-12**3 Credits (3)**

Extends information covered in SPED 509, which covers grades K 6. Strategies and materials are addressed. Taught with SPED 411.

SPED 513. Current Research in Special Education**3 Credits (3)**

Current investigations and research techniques.

SPED 522. Practicum in Reading Disabilities**3 Credits (3)**

Supervised experience in assessing a student with reading disability, developing and intervention plan, and implementing and monitoring the interventions across time.

SPED 523. Advanced Curriculum for Diverse Exceptional Learners**3 Credits (3)**

Strategies for developing curricula appropriate to handicapped and gifted learners.

SPED 532. Foundations of Visual Impairment**3 Credits (3)**

This course provides an overview of the history and theory of teaching students with visual impairments, including those with additional disabilities. The impact of educational, legislative, and societal trends on the psychosocial adjustment, quality of life, and post-school outcomes of individuals with visual impairments is explored. Taught with SPED 452 and SPED 632 with differentiated assignment.

SPED 533. Functional Implications of Low Vision**3 Credits (3)**

This course examines the structure and function of the visual system in relation to associated diseases and syndromes with an emphasis on measuring functional vision and determining appropriate educational adaptations. Taught with SPED 453 and SPED 633.

SPED 534. Strategies for Teaching Students with Visual and Multisensory Impairments**3 Credits (3)**

This course defines the roles and responsibilities of the teacher of students with visual impairments as part of the transdisciplinary team that serves students with visual impairments and additional disabilities. Emphasis is on assessment, curricula (both academic and functional), communication, behavior management, assistive technologies, inclusion, transition, and independent living. Taught with SPED 454 and SPED 634.

Prerequisite(s): SPED 533.

SPED 536. Braille I: Literacy for Students with Visual Impairments**3 Credits (3)**

This course facilitates an in depth study of the Uncontracted and Contracted Literary Braille codes as well as methods of teaching pre-braille, braille reading, and braille writing skills to tactual learners. Taught with SPED 455 and SPED 636.

SPED 537. Independent Readings in Special Education**1-3 Credits**

Each course shall be identified by a qualifying subtitle. Maximum of 6 credits, 3 credits per semester.

SPED 538. Braille II: Numeracy for Students with Visual Impairments**3 Credits (3)**

This course facilitates an indepth study of the Nemeth Braille Code for Mathematics and Science Notation as well as instructional strategies for using the abacus and developing numeracy. Specialized braille codes for computers, music, and foreign languages will be introduced. Taught with SPED 457 and SPED 638 with differentiated assignments.

Prerequisite(s): SPED 455 or SPED 536 or SPED 636 consent of instructor.

SPED 539. Strategies for Teaching Students with Visual Impairments**3 Credits (3)**

This course covers individualized educational programming in both the core and expanded core curriculums for children and youth with visual impairments with an emphasis on assessment, curricular adaptations, IFSP/IEP/ITP planning, and evidence-based practices. Taught with 460 and SPED 639. Restricted to: SPED majors.

Prerequisite(s): SPED 533, SPED 536, SPED 538.

SPED 545. Technology and Exceptionality in a Diverse Society**3 Credits (3)**

This class will address the unique educational needs of learners with exceptionalities, and will provide information and practice in addressing those needs through the use of technology-based interventions. Taught with SPED 645.

SPED 548. Field Experience in Education, Equity & Cultural Diversity**3 Credits (3)**

This is a supervised experience in providing special education services to local preK-12 students. In the context of the public school classroom, teacher candidates are guided to apply content knowledge from the seminar meetings and from prior coursework. This experience is designed for both the practicing general education classroom teacher pursuing special education licensure and for graduate teacher candidates pursuing initial special education licensure. Restricted to: SPED majors.

Prerequisite(s): SPED 350 and SPED 360, or SPED 500 and SPED 523, or consent of instructor.

SPED 550. Working with Young Children with Special Needs, Ages 3-8**3 Credits (3)**

Addresses competencies for working with young children with exceptionalities, ages three eight, and their families. Public school, private school, Head Start and other models are included. Same as SPED 450 with differentiated assignments for graduate students. May be repeated up to 3 credits.

SPED 551. Assessment of Young Children, Birth Eight**3 Credits (3)**

Covers instruments and procedures for assessing young children and their families in order to determine atypical development. Screening, diagnosis, program planning, placement and evaluation issues are covered. Same as SPED 451.

Prerequisite: SPED 550 or consent of instructor.

SPED 552. Introduction to Orientation and Mobility**3 Credits (3)**

This course provides an overview of the history and theory of formalized orientation and mobility instruction as it relates to the ability to live independently. The impact of visual impairment and concomitant impairments on the development of spatial concepts and motor skills in relation to independent locomotion is emphasized. Topics covered include mobility aids; navigation, familiarization, and protective techniques; structured pre-cane assessment and instruction; the development and use of tactual maps; and the relationship of orientation and mobility to other areas of the expanded core curriculum. Consent of Instructor required. Restricted to: SPED, EDUC majors.

SPED 553. Beginning Orientation and Mobility**3 Credits (3)**

This course provides an overview of the profession of orientation and mobility and how sensory, motor, and psychosocial function affects movement and spatial orientation. Consent of Instructor required. Restricted to: SPED majors.

Prerequisite(s): SPED 552.

SPED 554. Intermediate Orientation and Mobility**3 Credits (3)**

This course focuses on strategies and methods for conducting assessments and appropriately sequencing skill acquisition for learners across the lifespan who may or may not have additional disabilities. Adaptive technology and other aids that assist with travel in a variety of environmental conditions using different mobility systems will also be covered. Consent of Instructor required. Restricted to: SPED majors.

Prerequisite(s): SPED 553.

SPED 555. Advanced Orientation and Mobility**3 Credits (3)**

This course focuses on the development and monitoring of cane skills needed for safe and efficient travel in indoor, residential, and business districts, including the use of public transportation systems. Development, administration, and supervision of orientation and mobility services is also covered.

Consent of Instructor required. Restricted to: SPED majors.

Prerequisite(s): SPED 554.

SPED 559. Classroom Management for Diverse Learners**3 Credits (3)**

Behavior-change strategies for exceptional learners. Taught with SPED 459 with differentiated assignments for graduate students.

SPED 580. Curriculum, Methods, and Materials for Secondary Special Education**3 Credits (3)**

Curriculum theory and development for elementary special education programs. Various teaching methods utilized with secondary exceptional learners and techniques for identifying, adapting, and developing materials will be addressed. Taught with SPED 480.

SPED 582. Student Teaching SPED**12 Credits (12)**

Culminating course required for graduate level students seeking initial licensure. Restricted to: SPED majors.

Prerequisite(s): Bachelor s degree, SPED 548, and admission to student teaching.

SPED 583. Early Childhood SPED Student Teaching**9 Credits (9)**

A student teaching experience designed for students studying early childhood special education. Restricted to TEP-ECED majors. Students must be admitted to student teaching to enroll.

Learning Outcomes

1. Our mission is to serve the people of New Mexico through education, research, extension education, and public service with specific emphasis on innovative practices, overcoming barriers to learning, international activities, technology, and literacy for the diverse populations of New Mexico, surrounding states and border communities.

SPED 585. Introduction to Autism**3 Credits (3)**

This course will provide an overview of autism spectrum disorders as a triad of impairments, including historical and theoretical perspectives, assessment issues, characteristics of autism, intervention programs, and family issues. Taught with SPED 485 and SPED 685. Differentiated Assignments.

SPED 586. Behavior and Autism**3 Credits (3)**

This course will cover the first of the triad of impairments. Students will gain an understanding of the behaviors of children with autism. Students will examine several behavior management philosophies and research based interventions and how they can be applied in the educational setting. Attention will also be given to play skills. The family perspective and participation in the proactive behavior management process will be incorporated throughout the course. Taught with SPED 486 and SPED 686 with differentiated assignments.

Prerequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 587. Social Skills and Autism**3 Credits (3)**

This course will cover the second of the triad of impairments. As a blend of researched based models and evidenced based practical applications, students will gain an understanding of the social skill deficits often associated with autism spectrum disorders. Review a variety of social cognition theories and explore effective social skill interventions for children functioning at a variety of levels along the autism spectrum. Taught with SPED 487 and SPED 687 with differentiated assignments.

Prerequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 588. Communication and Autism**3 Credits (3)**

This course will cover the third of the triad of impairments. Students will gain an overview of communication characteristics and difficulties often associated with autism spectrum disorders. Review current tools and strategies used to assess speech, language, and interaction skills. Use assessment results to identify needs and implement appropriate interventions. Explore a variety of intervention strategies aimed at building receptive, expressive, and pragmatic language of children functioning at a variety of levels along the autism spectrum. Taught with SPED 488 and SPED 688 with differentiated assignments.

Prerequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 590. Masters Degree Seminar**3 Credits (3)**

Capstone review of current issues in special education. Each student will participate in a practice comprehensive oral exam.

SPED 598. Special Research Problems**1-3 Credits**

Individual investigation either analytical or experimental. May be repeated for a maximum of 6 credits, 3 credits per semester.

SPED 599. Master's Thesis**15 Credits**

Thesis.

SPED 600. Doctoral Research**1-15 Credits**

Research.

SPED 605. Independent Study Topics in Special Education**1-6 Credits**

A problem and seminar course for those pursuing an advanced graduate degree. Each course to bear an appropriate subtitle.

SPED 606. High Incidence Disabilities in a Diverse Society**3 Credits (3)**

Examines those areas of disability that most frequently occur in the special education population, including mental retardation, learning disabilities, communication disorders, and behavioral and emotional disorders. Taught with SPED 506. Restricted to SPED and C D majors.

Prerequisite: Master's Degree.

SPED 607. Low Incidence Disabilities**3 Credits (3)**

Examines those disabilities that occur less frequently in the special education population, including hearing loss, visual disorders, autism, and other severe manifestations. Taught with SPED 507 with differentiated assignments.

SPED 610. Current Issues in Special Education for Teaching in a Culturally Responsive Society**3 Credits (3)**

Required for students seeking the Ed.D./Ph.D. Taught with SPED 510.

SPED 613. Current Research in Special Education**3 Credits (3)**

Required for students seeking the Ed.D./Ph.D. Restricted to majors. Same as SPED 513.

Prerequisite: M.A. degree.

SPED 619. School Intervention and Organization in a Diverse Society**3 Credits (3)**

Introduces public school organization and laws and the psycho-sociological perspective of education. Curriculum and theory, teaching methods and materials will be presented and operationalized through a psycho-educational point of view. May be repeated up to 3 credits. Crosslisted with: SPED 519. Restricted to: SPSY majors.

SPED 640. Internship in Special Education**1-6 Credits**

Each course bears a qualifying subtitle. Maximum of 6 credits per semester.

SPED 645. Technology and Exceptionality in a Diverse Society**3 Credits (3)**

This class will address the unique educational needs of learners with exceptionalities, and will provide information and practice in addressing those needs through the use of technology-based interventions. Taught with SPED 545.

SPED 685. Introduction to Autism**3 Credits (3)**

This course will provide an overview of autism spectrum disorders as a triad of impairments, including historical and theoretical perspectives, assessment issues, characteristics of autism, intervention programs, and family issues. Differentiated Assignments. Taught with SPED 585 and SPED 485.

SPED 687. Social Skills and Autism**3 Credits (3)**

This course will cover the second of the triad of impairments. As a blend of researched based models and evidenced based practical applications, students will gain an understanding of the social skill deficits often associated with autism spectrum disorders. Review a variety of social cognition theories and explore effective social skill interventions for children functioning at a variety of levels along the autism spectrum. Taught with SPED 487 and SPED 587 with differentiated assignments.

Prerequisite(s)/Corequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 688. Communication and Autism**3 Credits (3)**

This course will cover the third of the triad of impairments. Students will gain an overview of communication characteristics and difficulties often associated with autism spectrum disorders. Review current tools and strategies used to assess speech, language, and interaction skills. Use assessment results to identify needs and implement appropriate interventions. Explore a variety of intervention strategies aimed at building receptive, expressive, and pragmatic language of children functioning at a variety of levels along the autism spectrum. Taught with SPED 488 and SPED 588 and differentiated assignments.

Prerequisite(s): SPED 485 or SPED 585 or SPED 685.

SPED 690. Doctoral Seminar**1-4 Credits (1-4)**

The seminar will engage doctoral students in scholarly dialogue and production. It will assist in preparing them for future careers in leadership roles. Same as CD 690.

SPED 698. Selected Topics in Special Education**1-6 Credits**

Offered under various subtitles which indicate the subject matter to be covered. Maximum of 6 credits, 3 credits per semester.

SPED 700. Dissertation**9 Credits**

Credit may be earned by students who have successfully completed their doctoral comprehensive exams and presented their dissertation proposals to their committees. At least 18 credits are required during the course of dissertation study. May be repeated for a maximum of 24 credits. Restricted to majors.

SPHS-SPEECH & HEARING SCIENCE

SPHS 2110. Introduction to Communication Disorders

3 Credits (3)

This introductory course provides an overview of common speech, language, and hearing disorders in children and adults including etiologies, characteristics, prevention, identification, assessment and intervention. The course provides an overview of the field of speech-language pathology and audiology.

Learning Outcomes

1. Describe normal human communication anatomy and processes as they relate to speech and language production.
2. Describe the nature of speech, language, and hearing disorders and differences.
3. Describe the principles of prevention, assessment and intervention of communication disorders.
4. List requirements for licensure, certification, and other relevant professional credentials.
5. Exhibit basic knowledge of contemporary professional issues in speech-language pathology.
6. List possible psychosocial implications of various communication disorders.
7. Identify cultural, educational, legal, and ethical issues related to communication disorders.
8. Describe the scope of practice of speech-language pathologists and audiologists.

SPHS 301. Language Acquisition

3 Credits (3)

This course introduces students to the study of the development of language, speech, and communication. Includes language sampling. May be repeated up to 3 credits. Crosslisted with: SPHS 509. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in SPHS 2110; Cumulative GPA of 3.2 or higher.

SPHS 322. Anatomy and Physiology of Speech Mechanisms

3 Credits (3)

Structure and function of systems underlying human speech sound production and processing, including respiratory, phonatory, and articulatory components. May be repeated up to 3 credits. Crosslisted with: SPHS 502. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in SPHS 2110, SPHS 323, SPHS 422, SPHS 324, and SPHS 301; and minimum 3.2 GPA.

SPHS 323. Phonetics

3 Credits (3)

The science of phonetics, including work with the International Phonetic Alphabet. Taught with SPHS 501. May be repeated up to 3 credits. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in SPHS 2110; Cumulative GPA of 3.2 or better.

SPHS 324. Introduction to Speech Science

3 Credits (3)

Basic concepts and theories in acoustics, speech production and speech perception. Includes laboratory experience with instrumental measurement and analysis of speech systems. May be repeated up to 3 credits. Crosslisted with: SPHS 503. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in SPHS 2110, SPHS 323, SPHS 422; and minimum 3.2 GPA.

SPHS 326. Clinical Methods and Procedures

3 Credits (3)

Guidelines and procedures associated with the clinical and supervisory processes. Provide opportunities to complete the supervised clinical observation requirement for participation in clinical practicum. May be repeated up to 3 credits. Crosslisted with: SPHS 506. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in SPHS 2110, SPHS 323, SPHS 422, SPHS 324, SPHS 301; and minimum 3.2 GPA.

SPHS 421. Speech and Language Disorders

3 Credits (3)

Bases, symptoms, etiologies, and clinical management of issues related to disorders of articulation, phonology, voice and resonance, and fluency. May be repeated up to 3 credits. Crosslisted with: SPHS 504. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in SPHS 2110, SPHS 323, SPHS 422, SPHS 324, and SPHS 301; and minimum 3.2 GPA.

SPHS 422. Audiology

3 Credits (3)

Anatomy and physiology of the auditory system, bases of auditory disorders, and basic audiometric procedures. May be repeated up to 3 credits. Crosslisted with: SPHS 507. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in SPHS 2110, and a minimum of 3.2 GPA.

SPHS 423. Neural Bases of Communication Disorders**3 Credits (3)**

Study of the neuroanatomy and neurophysiology of communication and communication disorders. Includes review of the central nervous system and peripheral nervous system relationship to speech motor control, language, and hearing. May be repeated up to 3 credits. Crosslisted with: SPHS 510. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in SPHS 2110, SPHS 301, SPHS 323, SPHS 422, SPHS 324, SPHS 421, SPHS 322, SPHS 326 and minimum 3.0 GPA.

SPHS 424. Aural Rehabilitation**3 Credits (3)**

Overview of hearing aids and amplification devices including cochlear implants. Review of the bases and psychosocial aspects of hearing loss. Clinical management of hearing loss consistent with ASHA's scope of practice for SLPs. May be repeated up to 3 credits. Crosslisted with: SPHS 508. Restricted to: C DS,C D majors.

Prerequisite(s): B or better in SPHS 2110, SPHS 323, SPHS 422, SPHS 324, SPHS 301, SPHS 421, SPHS 322, SPHS 326; and minimum 3.2 GPA.

SPHS 501. Phonetics**3 Credits (3)**

The science of phonetics, including work with the International Phonetic Alphabet. Restricted to majors. Same as SPHS 390 with differentiated assignments for graduate students.

Prerequisites: a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 502. Anatomy and Physiology of Speech Mechanisms**3 Credits (3)**

Structure and function of systems underlying human speech sound production and processing including nervous, respiratory, and articulatory components. Restricted to majors. Same as SPHS 370 with differentiated assignments for graduate students.

Prerequisites: a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 503. Speech Science**3 Credits (2+3P)**

Basic concepts and theories in acoustics, speech production, and speech perception. Laboratory experience with instrumental measurement and analysis of speech systems. Restricted to majors. Same as SPHS 380 with differentiated assignments for graduate students.

Prerequisites: a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 504. Speech and Language Disorders**3 Credits (3)**

Bases, symptoms, etiologies, and treatment of language disorders. Includes review of normal language acquisition. Taught SPHS 421.

Prerequisite(s): B or better GPA.

SPHS 505. Research Methods**3 Credits (3)**

Introduction to basic qualitative, quantitative, and single subject research methodology in speech-language pathology and audiology. Restricted to majors.

Prerequisites: a course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 506. Clinical Methods and Procedures**3 Credits (3)**

Guidelines and procedures associated with the clinical and supervisory processes. Provide opportunities to complete the supervised clinical observation requirement for participation in clinical practicum. Differentiated assignments for graduate students. Taught with SPHS 326. Restricted to: C DS,C D majors.

Prerequisite(s): B or better GPA.

SPHS 507. Audiology**3 Credits (3)**

Anatomy and physiology of the auditory system, bases of auditory disorders, and basic audiometric procedures. Differentiated assignments for graduate students. Taught with SPHS 422. Restricted to: C D, C DS majors.

Prerequisite(s): Minimum of 3.0 GPA.

SPHS 508. Aural Rehabilitation**3 Credits (3)**

Overview of hearing aids and amplification devices including cochlear implants. Review of the bases and psycho-social aspects of hearing loss. Clinical management of hearing loss consistent with ASHA's scope of practice for SLPs. Taught with SPHS 424. Differentiated assignments for graduate students. Restricted to: C D, C DS majors.

Prerequisite(s): Minimum 3.0 GPA.

SPHS 509. Language Acquisition**3 Credits (3)**

Normal development of communication across the age span. Includes language sampling and analysis. A minimum grade of B- in all graduate courses and a minimum overall GPA of 3.0 required. Taught with SPHS 360 with differentiated assignments for graduate students. Restricted to CD majors and LING majors.

SPHS 510. Neural Bases of Communication Disorders**3 Credits (3)**

Study of the neuroanatomy and neurophysiology of communication and communication disorders. Includes review of the central nervous system and peripheral nervous system relationship to speech motor control, language, and hearing. Crosslisted with: SPHS 423. Restricted to: CD, CDS majors.

SPHS 521. Professional Issues and Multicultural Practices in Communication Disorders**3 Credits (3)**

This course includes a range of topics pertinent to students entering professional practice as speech-language pathologists including current legal, cultural, ethical, and clinical service provision issues. Restricted to: C DS,C D majors.

Prerequisite(s): Minimum of 3.0 GPA.

SPHS 523. Assessment of Communication Disorders**3 Credits (3)**

Diagnostic theories and management of communication disorders using standardized and descriptive methodology. Includes the practice of interviewing, testing, and oral and written reporting. Restricted to: C DS,C D majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 525. Pediatric Language and Disorders**3 Credits (3)**

Normal communication development of neonates, infants, toddlers, and preschoolers; etiologies, and treatment of cognitive, linguistic and social elements of communication problems in family systems. May be repeated up to 3 credits. Restricted to: C DS,C D majors.

Prerequisite(s): Minimum grade of B and an overall GPA of 3.0 or higher.

SPHS 530. School Age Language and Disorders**3 Credits (3)**

Normal communication-learning development of elementary, secondary, and postsecondary students; etiologies, diagnosis, and treatment of interpersonal communication and language-based academic disorders. May be repeated up to 3 credits. Restricted to: C DS,C D majors.

Prerequisite(s): A minimum grade of B in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 535. Aphasia & Cognitive Linguistic Disorders**3 Credits (3)**

Etiologies, diagnosis, assessment, and treatment of adult aphasia and cognitive-linguistic disorders. Restricted to: C DS,C D majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 541. Advanced Spanish Morpho-Syntax for Education Professionals**3 Credits (3)**

This class has been designed for Heritage Speakers of Spanish who work in educational settings. It will cover the essential linguistic theory and fundamental structures of the Spanish language. This includes, but is not limited to, verb morphology, morphosyntactic and syntactic structures. The main goal of this course is to determine what usages fall within the norms of an individual's speech community, or if there are elements that fall outside those norms.

Prerequisite(s): Students have to be fluent in Spanish as course will be conducted in Spanish.

SPHS 542. Articulation and Phonological Disorders**3 Credits (3)**

Advanced study of the symptoms, etiologies, assessment, and clinical management of articulation and phonological disorders including cleft palate and disorders of resonance. Restricted to: C DS,C D majors.

Prerequisite(s): A minimum grade of B- in all graduate courses and a minimum overall GPA of 3.0 is required.

SPHS 545. Introduction to Augmentative and Alternative Communication**3 Credits (3)**

Assessment and intervention for children and adults with developmental disabilities; Alternative communication strategies and systems for individuals with severe speech and/or language impairments. May be repeated up to 3 credits. Restricted to: C DS,C D majors.

Prerequisite(s): Graduate standing; overall GPA of 3.0.

SPHS 547. Cognitive-Linguistic Communication Disorders**3 Credits (3)**

Topics include attention, memory, executive function, and underlying neuropathologies, with emphasis on assessment, diagnosis, prognosis, treatment and recovery processes in cognitive communication disorders related to traumatic brain injury, dementia, and right hemisphere brain damage. May be repeated up to 3 credits. Restricted to: C DS,C D majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0.

SPHS 548. Best Practices in Bilingual/Multicultural Assessment for Practitioners**3 Credits (3)**

The purpose of this course is to provide future speech-language pathologists, educational diagnosticians and special educators with a foundation for evaluating the linguistic, cognitive and academic skills of students from any cultural linguistic background. The course covers a review of the literature on best practices for working with interpreters during assessments. Practitioners will be expected to gather qualitative information about cultural/linguistic and educational histories of school-age children and integrate those results with the results of standardized tests.

SPHS 583. Dysphagia**3 Credits (3)**

Study of the anatomy and physiology of swallowing and upper aerodigestive systems. Review of the bases and etiologies of child and adult swallowing disorders, including diagnosis, assessment, and treatment. Restricted to: C DS,C D majors.

Prerequisite(s): A course grade of B- or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 584. Fluency Disorders**3 Credits (3)**

Speech fluency development and the disorders of stuttering, cluttering, and neurogenic dysfluency. Restricted to: C DS,C D majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 585. Motor Speech Disorders**3 Credits (3)**

Advanced studies of dysfunction of the nervous system that affect speech. Includes evaluation, diagnosis, and treatment of speech apraxias and dysarthrias. Restricted to: C DS,C D majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 586. Voice Disorders/Head and Neck Anomalies**3 Credits (3)**

Advanced studies of anatomy and physiology of the vocal tract with emphasis on diagnosis, assessment, and treatment of voice disorders, laryngectomy, cleft palate, and other oral-facial anomalies. Restricted to: C DS,C D majors.

Prerequisite(s): A course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 589. Practicum in Speech-Language Pathology**1-4 Credits (1-4)**

Supervised clinical practice in a variety of speech, language, and hearing disorders. Practicum includes diagnostic, treatment, and management work through direct patient/client contact. Attendance at weekly clinical staff meetings is required. May be repeated up to 15 credits. Restricted to: C DS,C D majors.

Prerequisite(s): Good standing in the graduate school; a course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 590. Clinical Education**1 Credit (1)**

This course is specifically designed to target the knowledge base necessary to initiate clinical practicum in the CD Program. The learning objectives are based upon the Council of Academic Accreditation in Audiology and Speech-language Pathology (CAA) standards and knowledge areas. These learning outcomes are developed to assist students in clinical practicum and are specific to the services provided to clients of the NMSU Edgar R. Garrett Speech and Hearing Center. Restricted to: C DS,C D majors.

Corequisite(s): SPHS 589.

Learning Outcomes

1. Demonstrate an understanding of successful strategies to work with families and clients from various clinical settings/cultural backgrounds. Demonstrate an understanding of ethical and confidential service delivery. Identify characteristics of properly written clinical reports. Demonstrate skill in oral and written or other forms of communication sufficient for entry into professional practice. Demonstrate knowledge of entry level and advanced certifications, licensure, and other relevant professional credentials.

SPHS 591. Special Topics**1-9 Credits**

Individual and/or group study of special topics identified by subtitle. May be repeated up to 9 credits. Restricted to: C DS majors.

Prerequisite(s): Prior arrangement with faculty; a course grade of B or higher in all graduate courses and an overall GPA of 3.0 or higher.

SPHS 599. Master's Thesis**15 Credits**

Thesis.

SPHS 640. Externship in Communication Disorders**3-9 Credits (3-9)**

This course is designed to provide opportunities for the developing clinician to provide treatment to and evaluations for clients in a full term externship experience under the supervision of a licensed SLP. May be repeated up to 9 credits. Consent of Instructor required. Restricted to: C DS,C D majors.

SPMD-SPORTS MEDICINE

SPMD 1110. Introduction to Athletic Training

3 Credits (3)

Introduction to the principles of athletic training. May be repeated up to 3 credits. Consent of Instructor required. Restricted to Las Cruces campus only.

Learning Outcomes

1. Understand the historical development of athletic training and sports medicine.
2. Understand the knowledge and experiences needed to become a Certified Athletic Trainer.
3. Understand the specific responsibilities and duties of an athletic trainer.
4. Understand the diverse jobs settings within the profession of athletic training.
5. Understand the relationship between the athletic trainer and the sports medicine team.
6. Understand some of the general and specific injuries and medical conditions that occur in athletics; their causes, signs and symptoms, treatments, rehabilitation, and prevention.
7. Understand some of the contemporary issues and problems facing the athletic training profession.

SPMD 1120. Medical Terminology

3 Credits (3)

Study of the structure of medical language with emphasis on sports medicine-related terminology. To include analysis and interpretation of medical documentation. Restricted to: Las Cruces campus only.

Learning Outcomes

1. Master the fundamentals of word analysis, including the separation of terms into word roots or combining forms, common prefixes, and suffixes.
2. Differentiate types of medical terms and the relationships among terms.
3. Develop a proficiency in the use of physiological and anatomical terms as reflected in medical documents.
4. Master the terms, words, phrases, and symbols that describe the human body in its various states of health and disease, including essential anatomical terms.

SPMD 1190. Clinical Practicum I

2 Credits (2)

Introduction to the clinical aspects of the athletic training education program. Must maintain at least 3.0 GPA. May be repeated up to 4 credits. Consent of Instructor required. Restricted to: Athletic Training majors. Restricted to Las Cruces campus only.

Learning Outcomes

1. The Athletic Training Program application procedures.
2. The ability to perform selected taping and wrapping techniques.
3. Knowledge of HIPAA guidelines, pre-participation physical examinations, environmental illnesses, the history of Athletic Training and its governing bodies, Evidence Based Practice and its implications in the field of athletic training, evaluation procedures for the injured athlete, NMSU AT program and its affiliated clinical sites.
4. Proper documentation for the athletic training environment including SOAP notes.

SPMD 1195. Clinical Practicum II

3 Credits (3)

Athletic training related content and psycho-motor skills are introduced, enhanced, and assessed in the classroom and clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses while providing increased depth of understanding and clinical practice. Must maintain a 3.0 GPA. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes

1. Demonstrate knowledge and skill in emergency situation prevention, recognition, and management.
2. Demonstrate proficiency in basic skills of musculoskeletal injury recognition and management.
3. Demonstrate competency in basic pre-participation exam skills, including but not limited to taking vital signs.
4. Demonstrate competency in wound care and first aid.

SPMD 1310. Introduction to Kinesiology**3 Credits (3)**

An introduction to the field of Kinesiology which will explore areas such as exercise physiology, sport and exercise psychology, motor behavior, biomechanics, strength and conditioning, exercise prescription, as well as professional and graduate programs, and allied health and applied careers opportunities.

Learning Outcomes**SPMD 1350. Social Foundations of Physical Activity****3 Credits (3)**

Historical and cultural foundations and vocational, scientific, and educational data on careers in health education, physical education, and recreation.

Learning Outcomes

1. Improve students' knowledge of foundations of physical education. (Research) (Standard 4 j, k, l, m, o, p)
2. Improve students' abilities to analyze current physical activity issues based on historical, philosophical, sociological, and psychological perspectives. (Research) (Standard 4 l, m, e, g)
3. Improve students' knowledge of and ability to critically analyze how gender, race, social class, sexual orientation, and ability issues affect physical education and performance programs. (Research, Diversity) (Standard 4j, k, l, m, o; Standard 2 d, g, j, f, k)
4. Improve students' knowledge of forces influencing the development of physical education programs. In particular, attitudes, values, and beliefs about gender, race, social class, sexual orientation, and ability, etc. (Diversity, Practitioners, Reflection, Pedagogy) (Standard 1 a, b, h, l; Standard 4 j, k, l, m, o; Standard 2 a, d, g, j, f, k)
5. Improve students' knowledge of strategies for becoming an advocate in the school and/or community to promote a variety of physical activity opportunities. (Practitioners) (Standard 2 m, n; Standard 3 n, o, p, q, r; Standard 10 d, j, p)
6. Improve students' knowledge of current educational issues and trends. In particular, socio-cultural issues that affect educational, fitness, and sports settings. (Diversity, Research) (Standard 4 j, k, l, m, o, p Standard 9 a, c, e, f m, n)
7. Improve students' knowledge of how students' learning is influenced by individual experiences, talents, and prior learning, including language and family/community values and conditions. (Diversity, Research) (Standard 1 b, h, l; Standard 2 d, g, j, k, m, n, o; Standard 3 l)
8. Improve students' knowledge of the impact of international changes on the content of physical education, fitness, and sports programs. (Research) (Standard 4 j, k, l, m, o, p)
9. Improve students' ability to critically analyze how gender, race, sexuality and social class issues affect how we view the body, and how these views can affect students' health and participation in physical education, fitness, and sports programs. (Diversity, Reflection) (Standard 2 d, g, j, f, k, m, o)
10. 1Improve students' ability to become critically aware of how their feelings, beliefs, and values in relation to gender, race, social class, sexual orientation, and ability issues will affect their abilities to work as professionals in the fields of physical education, sport, or fitness. (Diversity, Reflection) (Standard 2d, g, j, f, k, m, o Standard 9 e, d, g, l, m)
11. 1Improve students' knowledge of and ability to critically analyze cultural stereotypes of diverse
12. populations of people. (Diversity) (Standard 2 d, g, j, f, k, m, o)
13. 1Improve students' knowledge of how cultural stereotypes influence the development of physical education, fitness and sport programs. (Research, Diversity) (Standard 2 d, g, j, f, k, m, o; Standard 4 j, k, m, o, p, q Standard 8 p)
14. 1Improve students' knowledge of how groups influence individuals, and how individuals influence groups in a democratic society. (Diversity) (Standard 2 d, g, j, f, k, m, o; Standard 4 m, p;)
15. 1Improve students' abilities to communicate in ways that demonstrate sensitivity to all learners. (Diversity, Effectiveness) (Standard 1 d, h, l; Standard 2 d, g, j, f, k, m, o)
16. 1Students will demonstrate through writing the ability to apply the issues discussed in class to their
17. specific fields in ways that benefit society. (Evaluation) (Standard 9 e, g, l, m)
18. 1Students will improve their ability to take the content from readings and present it in thought provoking ways to their classmates. (Research, Evaluation, Reflection) (Standard 9 e, g, l, m; Standard 10 a, d, h, n)
19. 1Writing proficiency is required for a passing grade in this course. (Standard 4 l)
20. 1Improve students' abilities to use computers and other technologies to communicate, network, and/or foster inquiry. (Standard 10 g)
21. 1Consult professional literature, colleagues, and other resources to develop as a professional.(Standard 10 e, f, h, l, n, r)

SPMD 2130. Emergency Response in Sports Medicine**2 Credits (2)**

Designed to provide knowledge and experience in emergency care procedures, blood borne pathogens, and first aid. Students will receive certification in CPR/AED for the Professional Rescuer and in First Aid, upon successful completion of course. May be repeated up to 4 credits. Restricted to Las Cruces campus only.

Prerequisite(s): Consent of Instructor.

Learning Outcomes

1. Identify the individuals involved in the Emergency Response Team
2. Construct the components of an effective emergency Action Plan
3. Assess the scene and patient during an emergency situation
4. Demonstrate proper universal precautions and wound care
5. Demonstrate effective Cardiopulmonary Resuscitation, AED use
6. Demonstrate effective Rescue Breathing Airway Management techniques
7. Demonstrate effective splinting techniques
8. Demonstrate understanding of the techniques utilized in cervical stabilization
9. Identify components of acute care for general medical and orthopedic emergencies.

SPMD 2210. Anatomy and Physiology I**3 Credits (3)**

Detailed study of the structure and function of the human musculoskeletal, cardiovascular, respiratory, and peripheral nervous systems. Designed specifically for students interested in allied health professions.

Learning Outcomes

1. The student will learn and identify bones, connective tissue, joints and muscular structures of the human body. The student will study joints and associated structures of the body. The student will learn about skeletal muscle, origins, insertions, and actions. The student will learn about the fundamentals of the nervous system and associated structures. The student will learn about smooth and cardiac muscle and their association actions. The student will learn the structures associated with the cardiovascular system (heart and blood vessels). The student will learn the location of all visceral organs. Evaluation of knowledge is determined through practical identification of anatomical structures via written opened ended exams.

SPMD 2210L. Anatomy and Physiology Laboratory**1 Credit (1P)**

Students will engage in activities designed to enhance appreciation of the anatomical structures related to the content areas for SPMD 2210. Restricted to Las Cruces campus only.

Learning Outcomes

1. The student will learn and identify bones, connective tissue, joints and muscular structures of the human body.
2. The student will study joints and associated structures of the body.
3. The student will learn about skeletal muscle, origins, insertions, and actions.
4. The student will learn about the fundamentals of the nervous system and associated structures.
5. The student will learn about smooth and cardiac muscle and their association actions.
6. The student will learn the structures associated with the cardiovascular system (heart and blood vessels).
7. The student will learn the location of all visceral organs.
8. Evaluation of knowledge is determined through practical identification of anatomical structures via written opened ended exams.

SPMD 2250. Fitness for Health and Sport**3 Credits (3)**

A study of the fitness needs for health enhancement and sport participation.

Learning Outcomes

1. Recognize the importance of incorporating positive fitness/wellness habits within one's lifestyle in terms of enhancing longevity, disease prevention, and overall quality of life. Examine various physiological benefits and adaptations to such factors as muscular strength, muscular endurance, cardiovascular fitness, flexibility, and body composition when certain stimuli are applied to each. Assessment of these characteristics will be witnessed primarily in practical experiences within the course's laboratory settings. Identify current trends and/or health patterns within society in regards to scientific findings, declination in health habits, and increases in health ailments. Compare various nutritional concepts, specifically proper dietary habits and their impact on weight management aspects. Describe the role physical activity and sport specific training play on competitive athletic performance.

SPMD 2310. Career Preparation**1 Credit (1)**

From concept to implementation: Career exploration, setting up degree plans, finding graduate programs, developing professional resumes, writing letters of application, seeking letters of recommendation, and interview preparation. Graded: S/U Grading (S/U, Audit).

Learning Outcomes

1. Career opportunities within human movement and allied health fields
2. Chose both a primary and secondary career of their interest
3. Search for appropriate graduate schools to match their career choices
4. Create a plan by aligning their undergraduate curriculum with their career choices
5. Explore additional education (dual majors, minors, and certifications specific to their chosen field)
6. Study and create a professional resume
7. Create a curriculum vita as a historical reference for future job prospects
8. Write a professional letter of application for jobs and school applications
9. Learn how to seek "outstanding" letters of recommendation
10. 1Study appropriate interview protocol
11. 1Practice interviews (one on one, panel and group)

SPMD 3010. Orthopedic Examination, Evaluation and Diagnosis of Lower Extremity Injuries**4 Credits (3+1P)**

Examines normal human anatomy, mechanisms of athletic injury, and deviation from normal anatomy following athletic injury to the lower extremity. Must maintain at least 3.0 GPA. Consent of Instructor required.

Learning Outcomes

1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the lower extremity
Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries. Determine and apply therapeutic interventions designed to maximize the patient's participation and health-related quality of life. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries.

SPMD 3050. Therapeutic Modalities**4 Credits (4)**

The physiological effects, indications, contraindication, dosage, and maintenance of therapeutic modalities related to the treatment of athletic or activity-related injuries. May be repeated up to 4 credits. Consent of Instructor required. Must maintain 2.75 GPA.

Prerequisite(s): Consent of Instructor, SPMD 2210.

Learning Outcomes

1. Demonstrate proper assessment techniques to identify appropriate therapeutic modalities for the treatment of injury and illnesses. Design treatment plans based upon sound clinical assessment and appropriate selection of modalities that address the physiological and psychological needs of the patient. Demonstrate competence with the application of a wide variety of modalities including patient preparation, modality application and modification based upon clinical findings using principles of evidence based practice. Perform appropriate documentation of treatments to include patient history, evaluation, treatment goals, expectations and treatment outcomes. Demonstrate competence with the collection and analysis of baseline and post-treatment data to evaluate and interpret treatment outcomes based upon principles of evidence-based practice.

SPMD 3090. Clinical Practicum III**3 Credits (3)**

Athletic training psychomotor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes

1. Practice sessions are conducted to assist the student in achieving clinical proficiency skills.
2. Depending on the difficulty level, selected clinical proficiencies will be evaluated in this clinical.
3. For those proficiencies indicated, students will need to show proficiency either in this clinical or in a later clinical class.

SPMD 3093. Clinical Practicum IV**3 Credits (3)**

Athletic training psychomotor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes

1. Identify and locate muscles, tendons, ligaments and bony structures. Demonstrate basic evaluation skills, including but not limited to: taking a history, observation, differential diagnoses, palpation, ROM, neurological/circulation, MMT, special tests, clinical impression, plan. Demonstrate taping, bracing skills, appropriate emergency care skills, select and properly fit athletic equipment, appropriate removal of athletic equipment in the event of an emergency, the ability to develop and answer a clinically relevant question.

SPMD 3110. Racquet Sports**2 Credits (2)**

Knowledge and skills related to the racquet sports of tennis, badminton, and pickleball with emphasis on developmental strategies and skill performance that influences pedagogical content knowledge. Administrative issues will be addressed.

SPMD 3120. Theory and Technique of Lifelong Outdoor Leisure Activities**2 Credits (2)**

Knowledge and skills related to lifelong outdoor leisure activities, including the examination of environmental science and awareness, kinesiology, and fundamental motor skills.

SPMD 3130. Theory and Technique of Sports and Games**2 Credits (2)**

Knowledge and skills related to team sports and games, with emphasis on developmental strategies and skill performance that influence pedagogical content knowledge. Administrative issues will also be addressed.

SPMD 3140. Designing Student Centered Afterschool Physical Activity Clubs**3 Credits (3)**

Knowledge, skills and field based practical application for creating student centered and student designed after school physical activity clubs.

SPMD 3150. Theory and Technique of Dance and Rhythms**2 Credits (2)**

Knowledge and skills related to dance and rhythms, with emphasis on the analysis of dance elements and its role in physical education.

SPMD 3160. Elementary School Physical Education**3 Credits (2+2P)**

Methods for teaching physical education at the elementary level. Primary focus on creating a learning environment for the acquisition and enhancement of developmentally appropriate locomotor, manipulative, and nonmanipulative skills. Field experience included. Consent of Instructor required.

Prerequisite(s): GPA of 2.5.

Learning Outcomes

1. All course objectives are linked to the InTASC Teaching Standards
2. Improve your knowledge of K-5 physical education content, disciplinary concepts, and tools of inquiry related to the development of a physically educated person (Standard 4 j, k, l, n, o; Standard 5 i, Standard 6 j; Standard 7 g, k, l; Standard 8 l; Standard 9 o).
3. Improve your knowledge of and ability to plan instruction based on curriculum goals/objectives and students' experiences. (Standard 1 a, b, d, e, h, i; Standard 2 a, b, c, g, e; Standard 4 j, m, n, o; Standard 5 j, k; Standard 9 a, c, h, l)
4. Improve your ability to design and teach developmentally appropriate K-5 physical education curriculum for diverse learners. (Standard 1 a, b, d, e, h, j; Standard 2 a, b, c, d, f, g, h, j, k, l, m; Standard 4 b, c, d, e, f; Standard 5 b, d, h, r; Standard 7 a, b, c, d, e, g, h, j, k, l, n, q)
5. Improve your knowledge of, and ability to, teach a variety of manipulative, nonmanipulative and locomotor skills and concepts. (Standard 7 a, b, c, d, e, g, h, j, k, l, n, q; Standard 8 l)
6. Improve your ability to teach using a variety of strategies such as cooperative learning, problem-based learning, direct instruction, etc. that facilitate learning (Standard 8 a, b, d, e, f, h, l, j, k, l, m, n, s)

SPMD 3210. Anatomy and Physiology II**3 Credits (3)**

Detailed study of the structure and function of the human endocrine, immune, digestive, reproductive, integumentary, central nervous and renal systems. Designed specifically for students interested in allied health professions.

Prerequisite: SPMD 2210 or consent of instructor.

Learning Outcomes

1. Students will demonstrate knowledge through testing, practical skills and demonstration an understanding in visceral anatomy and physiological functioning.

SPMD 3210L. Anatomy and Physiology II Lab**1 Credit (1)**

The students will develop skills in palpating various bony landmarks as well as origins and insertions of major soft tissues. In addition, problem based learning scenarios will be used to complement the SPMD 3210 lecture material and thereby further students understanding of certain physiologic systems including neural, digestive, reproductive, endocrine, and integumentary.

Prerequisite: SPMD 2210; SPMD 2210L; or approved transfer equivalent.

Learning Outcomes

1. To demonstrate through practical application and demonstration a comprehensive understanding of visceral operations and diseases.

SPMD 3250. Introduction to Exercise Science: Exercise Physiology and Biomechanics**3 Credits (3)**

This course serves to provide a broad introduction to both the physiology of exercise and the mechanics of human movement. The conceptual framework of the course will allow for the development of a broad knowledge base regarding these concepts and the latter portions of the course will focus on real world application of the concepts.

Learning Outcomes

1. Students will learn a basic introduction to both exercise physiology and biomechanics and be able to demonstrate their knowledge of the introductory topics by providing real world examples.

SPMD 3310. Lifetime Activities**2 Credits (2)**

Knowledge and skills related to the lifetime activities of swimming, weight training, and other fitness promoting activities with emphasis on learning progressions.

Prerequisite(s): GPA 2.5.

Learning Outcomes

1. All course objectives are linked to the InTASC Teaching Standards
2. Improve your ability to design and teach developmentally appropriate fitness lesson plans for diverse learners (e.g. aerobics, yoga, strength training). (Standard 7 a, b, c, i, j Standard 8 a, b, d)
3. Improve your ability to modify instructions, lesson plans and tasks based on students' strengths and needs. (Standard 1 b, Standard 3 e, Standard 7 b, c, i, j, l, Standard 8 a, b, d)
4. Improve your knowledge of, and ability to teach a variety fitness content (Standard 7 a, g, h, k, l, n)
5. Improve your ability to plan effective lesson plans to insure equity and sensitivity to students with diverse characteristics. This includes structuring a safe, educational environment that facilitates learning for all students. (Standard 3, e, Standard 7 q, i)
6. Improve your ability to use self-assessment and peer-assessment to reflect on your teaching and plan for adaptations/adjustments (Standard 8 b, d, Standard 9 g).
7. Improve your ability to evaluate and modify instructional resources and curriculum to better meet the needs of their students. (Standard 4 f, Standard 7 g, Standard 8 a)

SPMD 3350. Inferential Statistics in Sport and Exercise Science**3 Credits (3)**

Statistical concepts and methods basic to experiential research to include normal distribution, z-tests, t-tests, analysis of variance and regression analysis. An understanding of sport and exercise science theory is required for students enrolling in this course

Learning Outcomes

1. Upon successful completion of this course the student will be able to competently assess exercise data using a variety of techniques that include measures of central tendency, variability, distributional assessments, correlation, regression, and mean testing (t-test and ANOVA).

SPMD 3410. Exercise Physiology**3 Credits (3)**

Basic physiological principles as they apply to exercise and fitness programs. Laboratory experiences included. Requires 2.75 GPA.

Prerequisite: SPMD 2210 or SPMD 2250; GPA 2.75.

Learning Outcomes

1. To gain knowledge of the structure and function of the body systems (muscle, cardiorespiratory, etc.). To gain knowledge related to the body system in reference to acute bout of exercise (responses), as well as following chronic exposure to exercise (adaptions). To understand laboratory procedures used to study the body system. To be able to integrate knowledge related to the function of each system and apply this information to humans undergoing exercise training.

SPMD 3450. Biomechanics**3 Credits (3)**

The application of anatomical, mechanical and electrical concepts to better understand the fundamental nature of human movement.

Prerequisite: SPMD 2210 and GPA of 2.75.

Learning Outcomes

1. Learn the basic anatomical, kinematic, and kinetic concepts Learn how the human body generates mobility Learn the kinematic concepts, laws, and principle that govern the human body motion Learn the kinetic concepts laws, and principle that govern the human body motion Learn the forces acting on the body in a fluid and how the human body motion is affected Learn how to utilize the principles and concepts to solve problems

SPMD 3450L. Biomechanics Laboratory**1 Credit (1)**

This course serves to provide an introduction to human movement and its analysis. The conceptual framework of the course will allow for the application of anatomical, mechanical, and electrical concepts in order to better understand the fundamental nature of movement.

Prerequisite(s): SPMD 2210; GPA 2.75.

Learning Outcomes

1. Use physical laws of motion to quantitatively analyze human performance.
2. Use physical descriptors of movement to qualitatively analyze human performance.
3. Apply principles of kinetics kinematics to solve problems of human motion.
4. Gain exposure to the various data collection and analysis tools in biomechanics.
5. Apply critical thinking skills to problem solving and writing assignments.
6. Use teamwork to complete an experimental motion analysis projects.

SPMD 3550. Psychology of Sport**3 Credits (3)**

Development of coaching techniques to enhance sport performance based on understanding and use of psychological principles.

Prerequisite: GPA 2.75.

Learning Outcomes

1. Identify psychological characteristics associated with peak performance Describe and explain factors practitioners should consider when diagnosing, designing, and implementing a mental training intervention. Recognize and define the psychological constructs of —for example but not limited to —concentration, confidence, motivation, stress/anxiety, and arousal Understand how personality attributes and the environment affect human performance and injury rehabilitation

SPMD 3610. Health and Exercise Psychology**3 Credits (3)**

The course examines the reciprocal relationship among physical activity, exercise behavior, and psychological determinants associated with adopting and maintaining an exercise program. Topics include theories of behavioral change, exercise psychology interventions, the benefits/pitfalls of exercise, and psychological factors influencing patient rehabilitation.

Prerequisite(s): GPA 2.75.

SPMD 3650. Motor Development**3 Credits (3)**

Covers development of motor skills from infancy through maturity. Focus on the principles of motor development, early motor behavior, stage theory, and assessment. Field experiences will augment lecture and readings.

Prerequisite(s): GPA 2.5.

SPMD 3710. Motor Learning**3 Credits (3)**

An examination of the theoretical foundations and related literature that underline the learning, performing, and retention of motor skills with implications for effective teaching and coaching.

Prerequisite(s): GPA 2.5.

Learning Outcomes

1. Assess functional differences between motor skill types
2. Compare motor control theories and how they control human movement.
3. Critically evaluate current research in motor learning
4. Assess practice schedules and provide recommendations on how practice might be improved in both therapy and sport settings.
5. Compare the pros and cons for retention and transfer testing.
6. Examine the influence of attention on skill performance and debate the role of attention on motor skill preparation

SPMD 4010. Orthopedic Examination, Evaluation and Diagnosis of Upper Extremity Injuries**4 Credits (3+1P)**

Examines normal human anatomy, mechanisms of athletic injury, and deviation from normal anatomy following athletic injury to the upper extremity. Must maintain a 3.0 GPA. Consent of Instructor required.

Learning Outcomes

1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the upper extremity. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries. Determine a therapeutic intervention designed to maximize the patient's participation and health-related quality of life. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries and optimize their patients' overall health and quality of life.

SPMD 4015. Therapeutic Exercise**3 Credits (3)**

The physiological effects, indications, contraindications, dosage, and maintenance of therapeutic modalities related to the treatment of athletic or activity-related injuries. Must maintain a 3.0 GPA. May be repeated up to 3 credits. Consent of Instructor required.

Learning Outcomes

1. Apply appropriate clinical reasoning to the selection of therapeutic exercises based upon evidence-based practice guidelines, relevant physical findings, indications, contradictions and precautions. Demonstrate appropriate application of therapeutic exercises and techniques including selection, application, patient instruction, and documentation. Design an individualized therapeutic exercise program incorporating appropriate modifications for tissue repair timelines, physiological and psychological factors, and any additional clinical findings. Demonstrate effective assessment skills to determine safe levels of physical activity for patients.

SPMD 4020. Orthopedic Examination, Evaluation and Diagnosis of Core, Spine and Head Injuries**3 Credits (3)**

Advanced clinical assessment techniques and applications. Must maintain at least a 3.0 GPA. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes

1. Students will incorporate advanced clinical reasoning skills and apply clinical prediction rules as appropriate. Interpret and apply physical examination findings for appropriate treatment or referral. Apply clinical knowledge for diagnosing injuries and illness of the core, spine, head, and face. Implement prevention guidelines associated with sudden death and catastrophic injury in athletics.

SPMD 4025. Pharmacology in Athletic Training**2 Credits (2)**

An introduction to general medical conditions and pharmacological applications in the athletic training setting. Emphasis on the laws governing the development and distribution, indications, contraindications, precautions, and interactions of prescription and over-the-counter medications. Must maintain a 3.0 GPA. May be repeated up to 2 credits. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes

1. Describe the principles of pharmacology as they relate to the field of sports medicine. Demonstrate the uses and abuses of drugs in sports. Formulate a philosophical and ethical base of thinking in reference to the field of athletic training as it relates to pharmacology. Describe federal, state and local laws, regulations and procedures for proper storage, disposal, transportation, dispensing and documentation for prescription and nonprescription medications.

SPMD 4030. Organization and Administration in Athletic Training**3 Credits (3)**

An introduction to management, leadership, financial strategies, professional development and legal issues related to the athletic training setting. Must maintain 3.0 GPA. May be repeated up to 3 credits. Restricted to: Athletic Training majors.

Learning Outcomes

1. Demonstrate mastery of health care management concepts. Demonstrate comprehension of legal and ethical issue in Athletic Training and healthcare management. Construct policies and procedures relevant to running an athletic training clinic or organization. Demonstrate basic concepts of management including distribution of financial resources, inventory and athletic training facility design/evaluation. Summarize appropriate human resources policies relevant to athletic training staffing.

SPMD 4090. Clinical Practicum V**3 Credits (3)**

Athletic training psychomotor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Must maintain a 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes

1. Utilize critical thinking skills and apply relevant clinical evidence in the evaluation, treatment and rehabilitation of athletic injuries of the upper extremity. Perform a comprehensive evaluation of the upper extremity to include the shoulder, elbow, forearm, wrist and hand; and then design a specific plan of treatment, and rehabilitation program for injuries and conditions of the upper extremity. Demonstrate an understanding of the referral process as warranted in situations dealing with athletic injuries. Demonstrate an understanding of professional communication as it relates to rehabilitation, plan of care documentation and the referral process. Demonstrate an understanding of the time commitment needed to perform as an ATC by completing the clinical hours required for this course.

SPMD 4093. Clinical Practicum VI**3 Credits (3)**

Athletic training psycho-motor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Students might complete a general medical rotation with this course. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes

1. Recognition of general medical conditions including emergent physical and psychological conditions for intervention, referral or return to play criteria as appropriate. Demonstrate proper clinical examination techniques for the assessment of general medical conditions including signs and symptoms of catastrophic and emergent conditions. Develop and implement prevention strategies for at-risk individuals and large groups. Demonstrate professional communication skills as related to athletic training including both written and verbal communication. Define and utilize evidence-based practice in the clinical decision making process.

SPMD 4095. Clinical Practicum VII**3 Credits (3)**

Athletic training psycho-motor skills are enhanced and assessed by a preceptor during clinical rotations. Emphasis is on competencies and proficiencies previously instructed in didactic courses. Students may complete a general medical rotation as part of this course. Must maintain 3.0 GPA. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes

1. Be prepared to sit for the Board of Certification (BOC) examination. Confidently understand the BOC exam format, and method of delivery. Meet the requirements to maintain certification, including evidence based practice requirements and continuing education units and their reporting cycles. Demonstrate competence in the following educational content areas for the practice of Athletic Training: evidence-based practice, prevention and health promotion, clinical examination and diagnosis, acute care of injury and illness, therapeutic interventions, psychosocial strategies and referral, healthcare administration, professional development and responsibility.

SPMD 4098. Advanced Athletic Training I**1-3 Credits (1-3)**

Advanced clinical experiences and education in athletic training. Assessment of Athletic Training Program clinical proficiencies as described by the National Athletic Trainer's Association Education Council. May be repeated up to 9 credits. Consent of Instructor required. Restricted to: Athletic Training majors.

Learning Outcomes

1. Describe an advanced clinical setting. Demonstrate advanced clinical reasoning skills. Demonstrate advanced clinical competence in one or more of the domains as described by the National Athletic Trainers Association Education Council.

SPMD 4110. Adapted Physical Education**3 Credits (3)**

Selection and scope of corrective activities in posture and body mechanics, and the adaptation of movement activities for the exceptional student.

SPMD 4130. Methods of Teaching Secondary Physical Education**6 Credits (6)**

Theoretical and practical applications of curriculum, pedagogy and assessment for teaching secondary physical education. Provides the students opportunities to develop curriculum, teach, and assess student learning through a supervised practicum in both middle and high school physical education settings. Consent of Instructor required.

Prerequisite(s): SPMD 3160.

SPMD 4210. Advanced Exercise Physiology**3 Credits (3)**

Detailed study of the integrated response of neuromuscular, cardiovascular, and respiratory systems to acute and chronic exercise, nutrition, and environmental conditions with a strong emphasis on laboratory experiences.

Prerequisite(s): SPMD 3410 and GPA of 2.75 or consent of instructor.

Learning Outcomes

1. Fundamental concepts about nutrition and its application to human performance
2. Advanced understanding of nutrition and its association with human bioenergetics
3. Human bioenergetics and its responsibility for performance enhancement and outcomes
4. Energy transfer and expenditure under various physical and environmental conditions
5. Pulmonary and cardiovascular responses to exercise
6. Cardiovascular and cellular adaptations to altitude

SPMD 4250. Principles of Strength and Conditioning**3 Credits (3)**

Application of research, theory, and methods of high-intensity, resistive overload training. Performance-specific topics include management, nutrition. Requires SPMD 2250 or SPMD 3410; GPA of 2.75.

Prerequisite: SPMD 2250 or SPMD 3410: GPA 2.75.

Learning Outcomes

1. Examine both applied and theoretical practices implemented towards various strength and conditioning concepts based on National Strength and Conditioning Association (NSCA) guidelines. Discuss various acute and chronic adaptations to the above said applied and theoretical practices to include, but not limited to, musculoskeletal adaptation, muscular power output, speed and agility characteristics, plyometric training, body composition characteristics, and cardiovascular characteristics, among many others. Recognize strength and conditioning adaptations regarding special populations, such as youth, female, and elderly populations.

SPMD 4250L. Principles of Strength and Conditioning Laboratory**1 Credit (2P)**

An applied examination of the theory, principles, rules and regulations associated with various strength and conditioning exercises to include but not limited to Olympic lifting, powerlifting, bodybuilding, plyometrics, speed, agility and speed-endurance development. Lab required for Kinesiology majors. GPA of 2.75.

Prerequisite: SPMD 2250 or SPMD 3410; GPA 2.75.

Learning Outcomes

1. Examine applied practices towards various human performance concepts based on National Strength and Conditioning Association (NSCA) guidelines. Assess various physiological adaptations to the above applied practices, including muscular hypertrophy, muscular power output, speed and agility drills, plyometric training, body composition assessment, and non-traditional training modes, among numerous others. Demonstrate proficiency towards proper administration of performance assessments and exercises to participants of various skill levels as well as possess the capability of instruction and demonstration of said assessments and exercises

SPMD 4350. Exercise Testing and Prescription**3 Credits (3)**

This combined lecture and lab class introduces students to the scientific basis for and principles of exercise testing and prescription. The focus is on basic approaches to exercise testing and prescription for healthy adults, while application to some special populations with chronic disease will be discussed.

Prerequisite: SPMD 3410 or consent of instructor; GPA 2.75.

Learning Outcomes

1. Examine the appropriate administration of exercise tests for the assessment of health-related and performance-related fitness. Apply principles pertaining to appropriate exercise prescription for the general population of healthy adults. Analyze the psychological determinants of appropriate exercise programming. Demonstrate the ability of proper diagnosis and interpretation towards a standard 12-lead ECG reading, including heart rates, heart rhythms, and common arrhythmias. Assist every course participant in the preparation processes to sit for any of ACSM's credential-based exams.

SPMD 4410. Exercise for Special Populations**3 Credits (3)**

Fundamentals of kinesiology adapted for adults with various diseases and disabilities. Focus will be on the application of exercise assessment and prescription for selected conditions.

Prerequisite: SPMD 3410 or consent of instructor; GPA of 2.75.

Learning Outcomes

1. Pathophysiology of various cardiovascular, pulmonary, metabolic, skeletal muscle, orthopedic, and mental diseases. Diagnostic testing of various diseases. Medical management of various diseases. Exercise testing and prescription for a variety of chronic disease states

SPMD 4450. Pathophysiology and Human Function(s)**3 Credits (3)**

Students will discuss basic concepts of pathophysiology such as inflammation & repair, infectious diseases, neoplasms, and diseases of specific physiological systems. In addition, students will discuss a variety of case studies, and in so doing will be able to relate pathophysiologic conditions to symptoms, activity restrictions and disability.

Prerequisite(s): SPMD 2210; SPMD 2210L; SPMD 3410; GPA 2.75.

SPMD 4510. Neurophysiology and Human Function**3 Credits (3)**

Students will discuss neurological control of human movement. Topics will include central and peripheral nervous system functions, with particular emphasis given to somatosensory afferent and motor efferent control. In addition, students will develop an understanding of the techniques employed to assess neurologic function in various patient populations.

Prerequisite(s): SPMD 2210; SPMD 2210L; SPMD 3410; and GPA of 2.75.

SPMD 4550. Exploring Extreme Human Performance**3 Credits (3)**

A reading, writing and documentary based course studying human's quest and the related sacrifices associated with participating in extreme performance activities such as the Olympics, wakeboarding, snowboarding, military special forces, ultra-run events, marathons, etc. Consent of Instructor required.

Prerequisite(s): Consent of instructor and GPA 2.75.

SPMD 4610. Senior Seminar**3 Credits (3)**

Capstone course for Kinesiology. Consent of Instructor required and a minimum GPA of 2.75. Students must be in Senior Standing to enroll.

Prerequisite: GPA 2.75.

Learning Outcomes

1. The Student Learning Outcomes are dependent on instructor and specific direction of course with individual group of students. Similar to an independent instruction.

SPMD 4805. Emergency Response**2 Credits (2)**

Comprehensive approach to the identification of risk factors, preparation of emergency action plans, and recognition and care of emergency medical conditions including those that may lead to sudden death. This is a hybrid course combining online instructional components and clinical skills experience including clinical safety (blood-borne pathogens, ECC, first-aid, etc), and on-field emergency management. Consent of Instructor required.

Learning Outcomes

1. Identify the individuals involved in the Emergency Response Team
2. Construct the components of an effective Emergency Action Plan.
3. Assess the scene and patient during an emergency situation.
4. Demonstrate proper universal precautions and wound care.
5. Demonstrate effective Cardiopulmonary Resuscitation, AED use.
6. Demonstrate effective Rescue Breathing Airway Management techniques.
7. Demonstrate effective splinting techniques.
8. Demonstrate understanding of the techniques utilized in cervical stabilization
9. Identify components of acute care for general medical and orthopedic emergencies

SPMD 4997. Problems**1-3 Credits (1-3)**

Independent study in either Kinesiology and/or Athletic Training May be repeated up to 9 credits. Consent of Instructor required.

SPMD 4998. Internship**6 Credits (6P)**

A part-time internship in an approved wellness, fitness, athletic, recreation, research lab or other program as agreed upon by the internship supervisor. The student will gain experience in all phases of management and operation. This is a 6-hour internship which can be repeated for an additional 6-credit hours at the same or a different location allowing the student to gain one or multiple field experiences. Field instructor supervision will oversee the students performance. This internship may require relocation to a site outside of the Las Cruces area.

Learning Outcomes

1. Students will apply their academic program didactic knowledge, skills and abilities at a professional site gaining hands-on learning experiences under the supervision of a practicing professional. Students will learn in a working environment such that the internship becomes the capstone of their undergraduate education allowing them practical experience in a career field of their choice.

SPMD 5005. Foundations of Athletic Training**3 Credits (3)**

This course provides an introduction to clinical decision making and covers standard techniques and procedures for the evaluation and diagnosis of musculoskeletal injuries and common illnesses, injury prevention concepts, documentation and management. Consent of Instructor required.

Learning Outcomes

1. Demonstration of clinical decision making skills Articulation of standard techniques and procedures for evaluation and diagnosis Produce standardized documentation of clinical findings.

SPMD 5010. Graduate Athletic Training Seminar I**1-3 Credits (1-3)**

Advanced seminar topics in athletic training. Students will explore generalized topics within the field of athletic training under the direct supervision of a Commission on Accreditation of Athletic Training Education (CAATE) accredited Athletic Training Program. Students may engage in teaching and research opportunities in unique areas. Students may explore athletic training topics within the classroom or independently through designated resources May be repeated up to 3 credits. Consent of Instructor required.

Learning Outcomes

1. Demonstrate increased knowledge within the designated topic areas identified for the semester. Demonstrate increased skill in teaching or academic preparation techniques as identified for the semester.

SPMD 5015. Graduate Athletic Training Seminar II**1-3 Credits (1-3)**

Advanced seminar topics in athletic training. Students will explore more specialized topics within the field of athletic training under the direct supervision of a Commission on Accreditation of Athletic Training Education (CAATE) accredited Athletic Training Program. Students should be prepared to further explore topics previously covered in SPMD 5310 (Graduate Athletic Training Seminar I) Students may engage in teaching and research opportunities in unique areas. Students may explore athletic training topics within the classroom or independently through designated resources. May be repeated up to 3 credits. Consent of Instructor required.

Learning Outcomes

1. Demonstrate increased knowledge within the designated topic areas identified for the semester. Demonstrate increased skill in teaching or academic preparation techniques as identified for the semester.

SPMD 5020. Graduate Athletic Training Research I**1-3 Credits (1-3)**

Advanced research topics in athletic training. Students will explore research and evidence based practices within the field of athletic training. Students will work under the direct supervision of a Commission on Accreditation of Athletic Training Education (CAATE) accredited Athletic Training Program faculty member. Students should be prepared to further explore research topics within a specific discipline with the intent of disseminating and sharing information with the athletic training community. topics previously covered in SPMD 5310 (Graduate Athletic Training Seminar I) Students may engage in teaching and research opportunities in unique areas May be repeated up to 3 credits. Consent of Instructor required.

Learning Outcomes

1. Demonstrate increased knowledge within the designated topic areas identified for the semester. Demonstrate increased skill in assessing and conducting research for the athletic training community

SPMD 5025. Graduate Athletic Training I**1-3 Credits (1-3)**

Advanced clinical experiences and education in athletic training. Students will examine topics in athletic training in conjunction with faculty members within the Commission on the Accreditation of Athletic Training Education (CAATE) Athletic Training Program at New Mexico State University . Assessment of Athletic Training Program clinical proficiencies as described by the National Athletic Trainers' Association Education Council. May be repeated up to 3 credits. Consent of Instructor required.

Learning Outcomes

1. Demonstrate increased knowledge within the designated topic areas identified for the semester. Demonstrate increased skill in teaching or academic preparation techniques as identified for the semester.

SPMD 5030. Graduate Athletic Training II**3 Credits (3)**

Advanced clinical experiences and education in athletic training. Assessment of Athletic Training Program clinical proficiencies as described by the National Athletic Trainers' Association Education Council. May be repeated up to 3 credits. Consent of Instructor required.

Learning Outcomes

1. Demonstrate increased knowledge within the designated topic areas identified for the semester. Demonstrate increased skill in teaching or academic preparation techniques as identified for the semester.

SPMD 5050. Clinical Education I**3 Credits (3)**

Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice. Consent of Instructor required.

Learning Outcomes

1. Demonstrate basic evaluation, taping, bracing and emergency care skills. Select and properly fit protective equipment for a variety of injury and sport scenarios. Demonstrate proper equipment removal for emergency care of the injured athlete. Perform a pre-participation examination including physical evaluation, documentation and referral if needed.

SPMD 5120. Lower Extremity Injury Evaluation + Lab**4 Credits (4)**

This course provides a comprehensive approach to the pathomechanics, clinical examination, diagnosis, role of clinical outcome measures and appropriate medical referral and treatment of orthopedic injuries and other conditions to the lower extremity. Consent of Instructor required.

Learning Outcomes

1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the lower extremity. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries. Determine and apply therapeutic interventions designed to maximize the patient's participation and health-related quality of life. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries.

SPMD 5150. Clinical Education II**3 Credits (3)**

Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.

Prerequisite(s): SPMD 5050.

Learning Outcomes

1. Students will become effective practitioners in the field of Athletic Training and Sports Medicine by utilizing critical thinking strategies based in evidence based practice theories combined with pedagogical knowledge of the concepts in Athletic Training. Students will utilize their clinical experience and knowledge of injury evaluation to enhance their athletic training skills working with an athletic population under the supervision of a preceptor.

SPMD 5180. Therapeutic Interventions I**4 Credits (3+1P)**

Study of physical rehabilitation theory and techniques used as therapeutic intervention for orthopedic injuries and conditions.

Learning Outcomes

1. Demonstrate appropriate application techniques for therapeutic modalities to include thermal, electrical, ultrasound and mechanical therapeutic modalities. Demonstrate proper clinical assessment techniques to establish treatment and rehabilitation plans for a variety of orthopedic injuries and conditions including proper documentation procedures. Demonstrate knowledge of the physiological and pathological processes of trauma, wound healing and tissue repair and their role/implications within the therapeutic intervention process.

SPMD 5205. Evidence Based Practice**2 Credits (2)**

This course investigates the concepts of evidence based practice as it relates to musculoskeletal assessment, diagnosis and therapeutic interventions with a primary focus on clinician- and patient-oriented outcome measures and appropriate referral decisions. Students will explore primary literature focused on clinical questions related to a comprehensive approach to injury evaluation.

Learning Outcomes

1. Define evidence-based practice as it relates to athletic training clinical practice. Explain the role of evidence in the clinical decision-making process. Describe and differentiate the types of quantitative and qualitative research, research components, and levels of research evidence. Describe a systematic approach (eg, five step approach) to create and answer a clinical question through review and application of existing research. Develop a relevant clinical question using a pre-defined question format (eg, PICO= Patients, Intervention, Comparison, Outcomes; PIO = Patients, Intervention, Outcomes).

SPMD 5220. Upper Extremity Injury Evaluation + Lab**4 Credits (3+1P)**

This course provides a comprehensive approach to the pathomechanics, clinical examination, diagnosis, role of clinical outcome measures and appropriate medical referral and treatment of orthopedic injuries and other conditions to the upper extremity. Consent of Instructor required.

Learning Outcomes

1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the upper extremity
Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries. Determine a therapeutic intervention designed to maximize the patient's participation and health-related quality of life. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries and optimize their patient's overall health and quality of life.

SPMD 5250. Clinical Education III**3 Credits (3)**

Integration of clinical competencies during an immersive, supervised, field based experience in athletic training to link theory into practice.

Prerequisite(s): SPMD 5150.

Learning Outcomes

1. Students will be proficient in the day to day operations of an athletic training room. This immersive experience will prepare students for future employment as a full-time athletic trainers. Students will demonstrate skills in all aspects of athletic training including patient-centered care, clinical examination, diagnosis and intervention, prevention, health promotion and wellness and healthcare administration.

SPMD 5280. Therapeutic Interventions II**4 Credits (3+1P)**

A detailed study of the physiological effects, indications, contraindication, dosage, and maintenance of modern therapeutic devices related to the treatment and rehabilitation of orthopedic injuries and conditions.

Prerequisite(s): SPMD 5180.

Learning Outcomes

1. Demonstrate proper clinical assessment techniques to establish treatment and rehabilitation plans for a variety of orthopedic injuries and conditions including proper documentation procedures. Demonstrate knowledge of the physiological and pathological processes of trauma, wound healing and tissue repair and their role/implications within the therapeutic intervention process. Design treatment plans based upon sound clinical assessment and appropriate selection of modalities that address the physiological and psychological needs of the patient. Demonstrate competence with the collection and analysis of baseline and post-treatment data to evaluate and interpret treatment outcomes based upon principles of evidence-based practice. Demonstrate competence with the application of a wide variety of modalities including patient preparation, modality application and modification based upon clinical findings using principles of evidence based practice.

SPMD 5310. Inferential Statistics in Sports and Exercise Science**3 Credits (3)**

This course serves to provide an introduction to statistical analyses. The conceptual framework of the course will allow for the application of a variety of statistical concepts in order to better understand the nature of data associated with scientific literature publications. Consent of Instructor

Learning Outcomes

1. Upon successful completion of this course the student will be able to competently assess exercise data using a variety of techniques that include measures of central tendency, variability, distributional assessments, correlation, regression, and mean testing (t-test and ANOVA).

SPMD 5350. Principles of Strength and Conditioning**3 Credits (3)**

Application of research, theory, and methods of high-intensity, resistance training. Performance-specific topics include management, nutrition, exercise prescription, periodization, lifting techniques, testing, and evaluation. Course will emphasize standards set forth by the National Strength and Conditioning Association preparing students interested in sitting for the NSCA certification examinations. Consent of Instructor

Learning Outcomes

1. Understanding of general physiology and its responses to acute and chronic exercise Understanding of cardiovascular effects of exercise, training and sport Understanding of strength training affects on special populations such as youth, women and the elderly Understanding of musculoskeletal changes from exercise, training and sport Practicality and application of power and strength training Comprehension of training programs and how they pertain to different training aspects Demonstrate principles of plyometrics and training Understand and demonstrate principles of periodization

SPMD 5410. Biomechanics**3 Credits (3)**

The application biomechanical analysis of human movement as it relates to human performance through the use of anatomical, mechanical and electrical concepts. Consent of Instructor

Learning Outcomes

1. The student will be able to competently assess physical anatomy, analyze linear and angular forces, examine gait, understand the relationships between kinetics and kinematics, understand how muscle and bone architecture impact human movement, and be familiar with the utilization of various data collection methods used in evaluating and improving human movement.

SPMD 5450. Exercise for Special Populations**3 Credits (3)**

Fundamentals of kinesiology adapted for adults with various diseases and disabilities. Focus will be on the application of exercise assessment and prescription for selected conditions. Consent of Instructor

Learning Outcomes

1. To develop an understanding of the pathophysiology of various cardiovascular, pulmonary, metabolic, skeletal muscle, orthopedic, and mental diseases. To provide a medical perspective in the treatment and management of individuals with these conditions in which exercise therapy may be beneficial. To provide a sound understanding of exercise testing and prescription for a variety of chronic disease states. To be able to assess, interpret, and evaluate case studies of diseased individuals and to develop comprehensive rehabilitation programs based on this information. To develop the ability to articulate / present information of various diseases / conditions in a professional manner both formally and in a one on one setting.

SPMD 5510. Psychology of Sport**3 Credits (3)**

Development of coaching techniques to enhance sport performance based on understanding and use of psychological principles. Consent of Instructor

Learning Outcomes

1. Identify psychological characteristics associated with peak performance Describe and explain factors practitioners should consider when diagnosing, designing, and implementing a mental training intervention. Recognize and define the psychological constructs of—for example but not limited to—concentration, confidence, motivation, stress/anxiety, and arousal. Understand how personality attributes and the environment affect human performance and injury rehabilitation.

SPMD 5550. Skill Acquisition and Performance**3 Credits (3)**

Behavioral and physiological examination factors that influence the acquisition and performance of motor skills. Consent of Instructor

Learning Outcomes

1. Describe and explain the principles and processes underlying skilled performance Know the factors to consider when diagnosing, designing, and assessing learning experiences Understand the elements of an effective instructional plan for skill acquisition

SPMD 5575. Advanced Motor Development**3 Credits (3)**

Advanced coverage of motor development topics including: Theoretical perspectives of motor development; the sequential, age-related, continuous process of physical growth and maturation; changes in movement behavior from infancy to older adulthood; external influences on development of motor skills; research approaches in motor development. Consent of Instructor

Learning Outcomes

1. Describe the historical progression of motor development within the broader field of kinesiology Explain the various theories and foundational concepts of motor development Understand and apply the processes (social, cognitive, perceptual) involved in motor skill development throughout the lifespan (infancy, childhood, adolescence, adulthood) Identify procedures and methodologies used to assess various aspects of motor development Interpret the supporting literature and research related to the fundamental principles of motor development Apply and transfer the knowledge gained to develop a research proposal to enhance understanding of a motor development topic of interest

SPMD 6005. Athletic Training Research I**2 Credits (2)**

Instruction and development of research skills through the study of published reports and readings in athletic training and related fields. Consent of Instructor required.

Learning Outcomes

1. Describe a systematic approach (eg, five step approach) to create and answer a clinical question through review and application of existing research. Develop skill in utilizing multiple scales for critical appraisal of literature and research studies. Develop a relevant clinical question utilizing a predefined question format and conduct a literature review on the subject. Describe multiple forms of research, research and literature resources and the differences between narrative reviews, systematic reviews and meta analyses. Describe and apply concepts of diagnostic accuracy and clinical prediction rules as they pertain to patient centered care and evidence based practice.

SPMD 6010. Organization and Administration in Athletic Training**2 Credits (2)**

Organization and administration of athletic training services including management, leadership, financial, human resources, facility, information technology and risk management.

Learning Outcomes

1. Students will employ values consistent with the NATA code of ethics for all health care administration actions. Demonstrate knowledge of legal, ethical and risk management concepts in athletic training and health care administration. Demonstrate mastery of a variety of health care management concepts. Demonstrate comprehension of fiscal management strategies, resource management and facility design as it relates to athletic training.

SPMD 6020. Evaluation of the Head, Neck, Spine and Torso**3 Credits (3)**

This course provides a comprehensive approach to the pathomechanics, clinical examination, diagnosis, role of clinical outcome measures and appropriate medical referral and treatment of orthopedic injuries and other conditions to the head, neck and spine.

Prerequisite(s): SPMD 5220.

Learning Outcomes

1. Demonstrate knowledge and ability to apply current best practices in acute care, diagnosis and treatment of injuries involving the head, neck, spine and torso. Demonstrate strong clinical examination skills in order to accurately diagnose and effectively treat the patient. Demonstrate the knowledge and skills necessary to evaluate and provide immediate management of acute injuries and illnesses. Determine a therapeutic intervention designed to maximize the patient's participation and health-related quality of life. Develop and implement strategies and programs to prevent the incidence and/or severity of injuries and optimize their patients' overall health and quality of life.

SPMD 6050. Clinical Education IV**3 Credits (3)**

Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.

Prerequisite(s): SPMD 5150.

Learning Outcomes

1. Students will become effective practitioners in the field of Athletic Training and Sports Medicine by utilizing critical thinking strategies based in evidence based practice theories combined with pedagogical knowledge of the concepts in Athletic Training. Students will utilize their clinical experience and knowledge of injury evaluation to enhance their athletic training skills working with an athletic population under the supervision of a preceptor.

SPMD 6110. Professional Preparation**3 Credits (3)**

Knowledge and skills for successful pursuit of athletic training credentials, employment and continuing professional competency; emphasis on current topics and issues contributing to the professional preparation of athletic training. Student must be enrolled in their final semester of the MSAT program to enroll in this course.

Learning Outcomes

1. Students will create a profile with the Board of Certification (BOC) in preparation for their BOC Examination. Students will analyze their individual strengths and weaknesses through practice examinations in order to prepare for a successful challenge of the BOC Examination. Students will demonstrate knowledge of basic human resources policies and procedures and the hiring process for athletic trainers. Students will self-assess professional competence and create professional development plans according to personal and professional goals and requirements.

SPMD 6150. Clinical Education V**3 Credits (3)**

Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.

Prerequisite(s): SPMD 6050.

Learning Outcomes

1. Students will become effective practitioners in the field of Athletic Training and Sports Medicine by utilizing critical thinking strategies based in evidence based practice theories combined with pedagogical knowledge of the concepts in Athletic Training. Students will utilize their clinical experience and knowledge of injury evaluation to enhance their athletic training skills working with an athletic population under the supervision of a preceptor. Students will demonstrate professional behaviors congruent with the ethical standards of the profession of athletic training. Students will develop, implement, and revise policies that pertain to prevention, preparedness, and response to medical emergencies and other critical incidents.

SPMD 6280. General Medical Conditions & Therapeutic Medications**3 Credits (3)**

Pathophysiology, assessment, and appropriate intervention and referral for general medical conditions and disabilities; common diagnostic tests and imaging assessment tools; commonly used therapeutic medications.

Prerequisite(s): SPMD 5280.

Learning Outcomes

1. Recognition of general medical conditions including emergent physical and psychological conditions for intervention, referral or return to play criteria as appropriate. Demonstrate proper clinical examination techniques for the assessment of general medical conditions including signs and symptoms of catastrophic and emergent conditions. Demonstrate knowledge of common therapeutic medications and the general medical conditions they treat within the fields of athletic training and sports medicine. Demonstrate knowledge of the principles of pharmacology, including pharmacokinetics and pharmacodynamics, as they relate to the fields of athletic training and sports medicine. Demonstrate knowledge of federal, state and local laws, regulations and procedures for proper storage, disposal, transportation, dispensing and documentation dealing with prescription and non-prescription medications.

SPMD 6310. The Social Construction of the Body**3 Credits (3)**

This course will explore how people's health and physical activity experiences and choices are often shaped by cultural narratives and expectations of the male and female body. Designed for graduate students in allied health and physical activity professions

SPMD 6350. Advanced Exercise Physiology**3 Credits (3)**

Detailed study of the integrated response of neuromuscular, cardiovascular and respiratory systems to acute and chronic exercise, nutrition and environmental conditions with a strong emphasis on laboratory experience. Consent of Instructor

Learning Outcomes

1. Fundamental concepts about nutrition and its application to human performance Advanced understanding of nutrition and its association with human bioenergetics Human bioenergetics and its responsibility for performance enhancement and outcomes Energy transfer and expenditure under various physical and environmental conditions Pulmonary and cardiovascular responses to exercise Cardiovascular and cellular adaptations to altitude

SPMD 6410. Cardiovascular Physiology**3 Credits (3)**

This graduate level course provides an in-depth study of cardiovascular structure and function. The course assumes that students have a strong background in human physiology. Topics include, but are not limited to: cellular structure of the heart and vascular system; cardiac function, including electrophysiology of the heart; vascular function; neurohumoral control of the heart and circulation, organ blood flow, exchange function of the microcirculation; the impact of common cardiovascular diseases on cardiovascular structure and function, and cardiovascular adaptations to chronic exercise. Consent of Instructor

Learning Outcomes

1. The student will demonstrate a comprehensive knowledge cardiovascular structure and function The student will be able to relate common cardiovascular pathophysiology to cardiovascular functional impairments and physical functional limitations. The student will be able to discuss chronic exercise training adaptations on the cardiovascular system and their value as a treatment strategy for cardiovascular diseases.

SPMD 6450. Skeletal Muscle: Structure and Function**3 Credits (3)**

Basic muscle morphology and physiology with molecular and cellular adaptations in skeletal muscle as consequences to varying exercise regimens. Consent of Instructor

Learning Outcomes

1. To gain knowledge of the structure and function of skeletal muscle To gain knowledge related to the skeletal muscle in reference to cellular and molecular responses and adaptations to exercise To understand laboratory procedures used to study muscle metabolism To develop ability to scientifically critique published papers and present them in a professional manner

SPMD 6510. Designing Resistance Training Program**3 Credits (3)**

Detailed study of the physiological concepts associated with designing resistance-training programs for children, women, seniors, athletic performance and rehabilitation. Consent of Instructor

Learning Outcomes

1. Fundamental components associated with resistance training and exercise prescription Compare and contrast isometric, dynamic, variable, isokinetic, eccentric, concentric resistance training Design programs guided by a needs analysis Demonstrate appropriate techniques and implement systems for training Study physiological adaptations of resistance training for women, children, seniors, athletics and rehabilitation Understand anatomical and physiological changes associated with detraining Integrate components and concepts of resistance training for program design (periodization) Explore alternative training programs

SPMD 6710. Project**1-12 Credits (1-12)**

Selected projects for doctoral students. May be repeated up to 12 credits. Consent of Instructor required.

SPMD 6750. Kinesiology Research**1-3 Credits (1-3)**

Research to be conducted under the direction of a Kinesiology faculty member May be repeated up to 15 credits. Consent of Instructor required.

SPMD 6996. Special Topics**1-3 Credits (1-3)**

Offered under various subtitles that indicate the subject matter. May be repeated for a maximum of 3 credits per semester and a total of 9 credits overall. May be repeated up to 9 credits. Consent of Instructor required.

SPMD 6999. Capstone Project I**3 Credits (3)**

Students will prepare an individualized capstone project

Prerequisite(s): SPMD 5205.

SPMD 7000. Doctoral Dissertation**1-18 Credits (1-18)**

Doctoral Dissertation hours to be conducted under the direction of a Kinesiology Faculty. May be repeated up to 18 credits. Thesis/Dissertation Grading.

STAT-STATISTICS

STAT 371. Statistics for Engineers and Scientists I**3 Credits (3)**

Modern probability and statistics with applications to the engineering sciences.

Prerequisite(s): C- or better in MATH 1521G or MATH 1521H.

STAT 400. Undergraduate Research**1-3 Credits**

Arrangements must be made with supervising professor before registration. May be repeated for a maximum of 6 credits.

STAT 470. Probability: Theory and Applications**3 Credits (3)**

Basic probability distributions including binomial, normal; random variables, expectation; laws of large numbers; central limit theorem.

Prerequisite(s): C- or better in MATH 2530G and C- or better in at least one-300 level Math course.

STAT 480. Statistics: Theory and Applications**3 Credits (3)**

Point and interval estimation; sufficiency; hypothesis testing; regression; analysis of variance; chi-square tests.

Prerequisite(s): C- or better in STAT 470.

STAT 515. Probability: Theory and Applications**3 Credits (3)**

Same as STAT 470 with additional work for graduate students.

STAT 525. Statistics: Theory and Applications**3 Credits (3)**

Same as STAT 480 with additional work for graduate students.

STAT 535. Elementary Stochastic Processes**3 Credits (3)**

Markov chains, Poisson processes, Brownian motion, branching processes, and queuing processes, with applications to the physical, biological, and social sciences.

Prerequisite: STAT 515 or consent of instructor.

STAT 540. Directed Reading**1-6 Credits**

May be repeated for a maximum of 6 credits. Graded S/U.

Prerequisite: consent of instructor and graduate committee.

STAT 562. Foundations of Probability**3 Credits (3)**

Probability spaces, expectation and conditional expectation, limit theorems and laws of large numbers.

Prerequisite: MATH 593.

STAT 563. Advanced Topics in Stochastic Processes**3 Credits (3)**

Markov processes, martingales, Brownian motion, the Ito calculus, stochastic differential equations.

Prerequisite(s): STAT 562.

STAT 571. Continuous Multivariate Analysis**3 Credits (3)**

Theory and applications of the multivariate normal distribution. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): STAT 525, or consent of instructor.

STAT 572. Linear Models**3 Credits (3)**

Core topics include distribution of quadratic forms, theory of regression, analysis of variance and covariance in linear models. Advanced topics chosen from random and mixed linear models, generalized linear, growth curve, and nonlinear models, quartile and copula regression. May be repeated up to 6 credits.

Prerequisite(s): STAT 571.

STAT 581. Advanced Theory of Statistics I**3 Credits (3)**

Testing hypotheses, probability and sufficiency, uniformly most powerful tests, unbiasedness, invariance, and minimax principle.

Prerequisite: STAT 525 or consent of instructor.

STAT 582. Advanced Theory of Statistics II**3 Credits (3)**

Estimation of parameters; unbiased estimators; equivariance; Bayes properties; large sample theory and optimality.

Prerequisite: STAT 581 or consent of instructor.

STAT 598. Special Research Problems**1-3 Credits**

Individual investigations or consulting programs. Maximum of 3 credits.

SUR-SURVEYING

SUR 143. Civil/Survey Drafting I**3 Credits (2+2P)**

Introduction to drafting in the field of Civil Engineering. Drawings, projects, and terminologies related to topographic mapping, contour drawings, plan, and profiles as street/highway layout.

Prerequisite: DRFT 109.

Learning Outcomes

1. Students will develop a basic knowledge of AutoCad Civil 3D software as they relate to the civil drafting process. Students will become familiar with a basic understanding of computers, drafting and trigonometry is required. Use of long-term projects will be utilized to simulate real-world work environments to aid the understanding and applying vocabulary on surveying drafting plans An ability to apply current knowledge and adapt to emerging applications of mathematics, science, engineering and technology

SUR 222. Introduction to Geomatics**3 Credits (2+3P)**

Theory and practice of geomatics as applied to plane surveying in the areas of linear measurements, angle measurements, area determination, differential and trigonometric leveling, and topographic mapping. Crosslisted with: DRFT 222.

Prerequisite: MATH 1250G or MATH 1430G.

Learning Outcomes

1. Various

SUR 285. Precise Digital Mapping**3 Credits (3)**

Photogrammetric Mapping Principles, digital sensor including optical cameras, terrestrial, surveying control, IMU & GPS integration, stereo photography, analytical triangulation, orthorectification, precision and accuracy of measurement systems, sUAS (Small Unmanned Aerial Vehicles) applications to geospatial data collection and practical applications project flight/pre planning, sensor platform, FAA regulations and restrictions, introduction to laser scanning systems. Restricted to Las Cruces campus only.

SUR 292. Legal Principles and Boundary Law I**3 Credits (3)**

Fundamentals of real property law; principles of land description; survey evidence and procedure in boundary determination, order of importance of conflicting elements; and liability, ethical and professional principles in boundary surveying; contemporary issues in boundary determination.

Learning Outcomes

1. Understand how the USPLSS was developed and used Be able to locate and identify USPLSS survey monuments Be able to apply single and double proportion methods Be able to subdivide USPLSS sections Be able to read, write and interpret USPLSS legal descriptions

SUR 312. Public Land Survey System Boundaries**3 Credits (3)**

Fundamentals of the U.S. Public Land Survey System; rules for the survey of the public lands, field surveys; the rectangular system, corners, monuments, evidence; dependent and independent resurveys, corner restoration; plats and field notes, patents.

Learning Outcomes

1. Demonstrate an understanding of surveying boundary laws Describe procedures for locating real property boundaries Read, interpret and write legal descriptions of real property Perform legal research of case and statutory law Communicate research findings through written and oral presentation

SUR 328. Construction Surveying & Automation Technologies**3 Credits (2+3P)**

Construction Surveying Principles: conventional and machine controlled. Layout alignments, grades, various infrastructure, buildings. Understand error identification, common quality control checks and blunder identification. Alignments and station/off set, types of construction layout of infrastructure: roads, bridges, utilities (including subsurface), buildings, industrial; reading and interpreting construction plans, data management, horizontal, vertical and spiral curves, slope staking, machine control basics, applications and data managements. Use of electronic files and liability issues. Layout alignments, grades, various infrastructure, buildings. Ability to understand data integration in automated machine control, work flow processes.

Prerequisite: (SUR 222 or DRFT 222) and (MATH 1511G or MATH 1430G or MATH 1435).

Learning Outcomes

1. Various

SUR 330. Computer Applications of Surveying**3 Credits (2+3P)**

Advanced application of concepts and tools used in the manipulation of geospatial data in a computer environment. Topics include the use of surveying-specific software applications for problem solving, analysis and generation of spatial data products. Advanced programming skills in a high level language are presented and applied.

Prerequisite: DRFT 109 AND SUR 222, and (MATH 1511G or MATH 1430G or MATH 1435) and (E T 262 or ENGR 140).

Learning Outcomes

1. Various

SUR 351. Spatial Data Adjustment I**3 Credits (3)**

Theory of random error in observations/measurements. Use of statistics in spatial data analysis, statistical testing, advanced data structures. Emphasis on computer based problem solving and programming to solve spatial data problems.

Prerequisite: (SUR 222 or DRFT 222) and (MATH 1511G or MATH 1435 or MATH 1430G) and (A ST 311G or MATH 1350G).

Learning Outcomes

1. Various

SUR 361. Geodesy/Geodetic Control Surveying**3 Credits (3)**

Horizontal and vertical control network design and consideration. Understand ellipsoid, geoid, horizontal and vertical datum, coordinates, precise leveling, astronomic, establishment of state plane zones, understanding reporting. Transform data between geodetic Latitude/Longitude, state plane, ground data, perform geodetic computations, ability to design GPS networks utilizing CORS stations, network adjustments. Perform a control survey, process data, adjust network, and prepare control report with Meta-data.

Prerequisite: (SUR 222 or DRFT 222) and (MATH 1511G or MATH 1435 or MATH 1430G).

Learning Outcomes

1. Various

SUR 370. Control Surveying**3 Credits (2+3P)**

Design and use of survey control networks. Includes Horizontal, Vertical and 3D networks. Use of standards in control surveying. History of control surveying.

Prerequisite: SUR 222 and (MATH 1511G or MATH 1430G or MATH 1435).

Learning Outcomes

1. Various

SUR 401. Ethics and Professionalism in Surveying and Mapping**3 Credits (3)**

Ethics as applied to the surveying profession. Includes case studies and problems.

Prerequisite: .

Learning Outcomes

1. An ability to communicate effectively with a range of audiences. An ability to understand ethical and professional responsibilities and the impact of technical and/or scientific solutions in global, economic, environmental, and societal contexts.

SUR 412. Advanced Topics in Boundary Surveying**3 Credits (2+3P)**

Advanced land boundary topics including water boundaries, mineral claims, Spanish and Mexican land grants, state and national boundaries.

Prerequisite: SUR 312.

SUR 450. Senior Project**3 Credits (3)**

Research project prepared by student. Includes class presentation. Students will learn how to research after the end of their formal education. Students must be in Senior Standing to enroll.

Learning Outcomes

1. An ability to identify, formulate, and solve broadly defined technical or scientific problems by applying knowledge of mathematics and science and/or technical topics to areas relevant to the discipline. An ability to formulate or design a system, process, procedure or program to meet desired needs. An ability to develop and conduct experiments or test hypotheses, analyze and interpret data and use scientific judgment to draw conclusions. An ability to communicate effectively with a range of audiences.

SUR 451. Spatial Data Adjustment II**3 Credits (3)**

Rigorous analysis of the theory of observations as applied to spatial data, application of least squares adjustments, ability to perform statistical analysis to determine accuracy of final product, constrained/free geospatial data integration, error ellipses, and pre-analysis of spatial data acquisition procedures.

Prerequisite: SUR 351.

Learning Outcomes

1. Understand the theory of least squares as applied to survey measurements Understand the relevance of weighting survey observations Be able to adjust vertical, horizontal and 3D networks by least squares Be able to transform coordinates between similar coordinate systems Be able to analyze survey errors and detect survey blunders

SUR 452. Spatial Data Integration and Analysis**3 Credits (3)**

Surveying practice under the direction of a licensed, professional land surveyor requiring an approved number of hours. Planned work between the student and the surveyor should be designed to be part of a project that integrates spatial data. An individualized syllabus should be developed collaboratively with the industrial partner and approved by the geomatics faculty. The final deliverable must be certified by the licensed professional land surveyor. A written report by the student is required. Credit is given to past work experience in cases where students can demonstrate that requirements for the practicum are met and should be approved by geomatics faculty.

Learning Outcomes

1. An ability to develop and conduct experiments or test hypotheses, analyze and interpret data and use scientific judgment to draw conclusions. An ability to communicate effectively with a range of audiences. An ability to understand ethical and professional responsibilities and the impact of technical and/or scientific solutions in global, economic, environmental, and
2. societal contexts. An ability to function effectively on teams that establish goals, plan tasks, meet deadlines, and analyze risk and uncertainty.

SUR 461. GNSS Positioning**3 Credits (2+3P)**

Logistics of GNSS data collection, the GPS signal, codes and biases, error sources, differences between relative and autonomous GNSS positioning, code phase carrier phase, DGPS static and RTK surveys. Geodetic and GPS standards and specifications GNSS data processing, network adjustments, and evaluation of spatial data accuracy practical applications of GNSS May be repeated up to 3 credits.

Prerequisite(s): SUR 361.

SUR 464. Legal Principles and Boundary Law II**3 Credits (3)**

ALTA Surveys and Standards, boundary evidence, order of evidence, Subdivision and Platting Law, Mexican and Spanish land grants, water boundaries, sequential and simultaneous conveyances. Consent of Instructor required.

Prerequisite(s): SUR 312.

SUR 485. Emerging Techniques in Geospatial Technologies**3 Credits (3)**

Hydrographic, Altimetry, Space borne Imaging Systems, Mobile Mapping Systems, Mining and Agriculture Surveying Principles, Ranging technologies and applications such as LiDAR, SAR, and Bathymetry. Principles of terrestrial & airborne laser scanning, point cloud data management & extraction, scan registration and processing, and advanced ranging data acquisition systems. Consent of Instructor required.

Prerequisite(s): Senior standing.

Learning Outcomes

1. Outline the different techniques in mapping seabed. Describe the procedure of LIDAR mapping. Outline the remote sensing technologies used in mapping. Recognize the UAV mapping technologies. Produce surveying products from new technologies in geomatics.

SURG-SURGICAL TECHNOLOGY

SURG 120. Surgical Technology Clinical I**2-4 Credits (6P)**

This is a health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. This course is designed to prepare the student to enter the surgical environment. This course provides an introduction to the operating room, observation of surgical procedures, direct participation in the preoperative (pre-op, intra-op, post-op) preparation of individual cases and professional roles and responsibilities of individual members of the surgical team. Direct supervision is provided by the clinical professional. May be repeated up to 4 credits. Students must be admitted into Surgical Technology Program to enroll in this course.

Prerequisite(s): BIOL 2310, BIOL 2210, BIOL 2225, NURS 150.

Corequisite(s): SURG 140, SURG 145.

SURG 140. Introduction to Surgical Technology**4 Credits (4)**

This is an orientation to surgical technology theory, surgical pharmacology and anesthesia, technology sciences and patient care concepts and is designed to prepare the student to enter the surgical environment with entry-level knowledge necessary to understand patient responses to disease, illness, hospitalization, surgical procedures, commonly used pharmacological and anesthetic agents, and legal, moral, and ethical issues that could be encountered in the surgical environment. Restricted to Community Colleges campuses only.

Prerequisite(s): Admission to Surgical Technology Program; BIOL 2310, BIOL 2225, & NURS 150.

SURG 145. Fundamentals of Perioperative Concepts & Techniques**4-5 Credits (3+3P)**

This is an in-depth coverage of perioperative concepts such as aseptic/sterile principles and practice, infectious processes, wound healing and creation and maintenance of the sterile field. This course is designed to prepare the student to enter the surgical environment with entry-level knowledge of aseptic technique principles and practices, the creation and maintenance of the sterile field including equipment, supplies and instrumentation, and basic case preparation and procedures. An introduction to diseases and disease processes that may be displayed by the surgical patient and the patient's bodily responses to disease are also included. May be repeated up to 5 credits.

Prerequisite(s): Admission to Surgical Technology Program, BIOL 2310, BIOL 2210, BIOL 2225, & NURS 150.

SURG 150. Surgical Procedures I**4-5 Credits (3-5+3P)**

This course is an introduction to surgical procedures and its related pathologies. Emphasis on surgical procedures related to general, obstetrics/gynecology, genitourinary, otorhinolaryngology and orthopedic surgical specialties incorporating instruments, equipment. It is designed to prepare the student to function actively in the surgical environment with entry-level knowledge of surgical procedures. This course expands the basic foundation principles and combines the study of common surgical procedures to include anatomy, physiology and pathophysiology. Specific patient care concepts, medications, instrumentation, equipment, supplies and complication related to selected surgical procedures will be discussed. Admission to Surgical Technology Program necessary to enroll in the course.

Prerequisite(s): SURG 140, SURG 145, and SURG 120.

SURG 155. Pharmacology for the Surgical Technology**2 Credits (2)**

This is an orientation to surgical pharmacology and anesthesia and is designed to prepare the student to enter the surgical environment with knowledge necessary to categorize the classification of drugs, calculate drug dosages and identify the therapeutic use, routes of administration, indications, contraindications and adverse effects of pharmacologic agents used in the perioperative setting. This course is the foundation for the acquisition of program specific competencies as identified by the AST Core Curriculum. Restricted to Carlsbad campus only.

SURG 160. Surgical Procedures II**6 Credits (6)**

This is an introduction to surgical procedures and related pathologies. Emphasis on surgical procedures related to thoracic, peripheral vascular, plastic/reconstructive, ophthalmology, cardiac and neurological surgical specialties incorporating instruments. The course is designed to prepare the student to continue to function actively in the surgical environment with entry-level knowledge of more complex surgical procedures. This course expands the basic foundation principles and combines the study of complex surgical procedures to include anatomy, physiology, and pathophysiology. Specific patient care concepts, medications, instrumentation, equipment, supplies, and complications related to specific surgical procedures will be discussed. Realities of clinical practice and concepts of death and dying will also be discussed. Admission to Surgical Technology Program necessary to enroll in the course.

Prerequisite(s): SURG 150, SURG 260.

SURG 230. Professional Readiness**2 Credits (2)**

This course transitions the student into professional readiness for employment, professional readiness for attaining certification and professional readiness for maintaining certification status. Admission to Surgical Technology Program necessary to enroll in the course.

Prerequisite(s): SURG 140, SURG 145, SURG 120, SURG 150, SURG 260.

Corequisite(s): SURG 160, SURG 265.

SURG 260. Surgical Technology Clinical II**4 Credits (12P)**

This is a health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. This course is designed to provide the student the opportunity to function actively in the role as a surgical technologist and health care team member in a clinical setting under the direct supervision of faculty and health care staff. Applications of basic principles and practices combined with a supervised clinical experience participating in common surgical procedures is the focus. Admission to Surgical Technology Program necessary to enroll in the course. Restricted to Community Colleges campuses only.

Prerequisite(s): SURG 120, SURG 140, & SURG 145.

SURG 265. Surgical Technology Clinical III**4 Credits (9P)**

This is a health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. This course is designed to provide the student the opportunity to function actively in the role of a surgical technologist and health care team member in a clinical setting under the direct supervision of faculty and health care staff. Refinement and application of basic principles and practices combined with entry-level employment competency expectations is the focus. Preparation for the National Certification Examination for Surgical Technologists is also included. Admission to Surgical Technology Program necessary to enroll in the course.

Prerequisite(s): SURG 260.

TCEN-ENVIRONMENTAL/ENERGY TECH

TCEN 101. Energy for the Next Generation**3 Credits (2+2P)**

This course will survey a broad range of sources of energy, types of energy, energy storage, and the forms of energy. Students will be exposed to theory in the classroom, laboratory exercises, and field trips to provide them with a solid foundation for all subsequent energy related environmental courses.

Crosslisted with: OETS 101.

Prerequisite(s)/Corequisite(s): OETS 118 or MATH 1215. Restricted to: Community Colleges only.

TCEN 105. Building Analyst I**3 Credits (2+2P)**

This course is designed to provide the foundational knowledge and expertise necessary for the energy auditor and home performance contractor.

Crosslisted with: OETS 105. Restricted to: Community Colleges only.

TCEN 106. Building Analyst II**3 Credits (2+2P)**

Designed to prepare the student for the BPI Building Analyst Certification. This course will walk the student through the hands-on process of conducting visual building inspections, diagnostic testing, identifying improvement opportunities, documenting a home's performance and preparing a scope of work.

Crosslisted with: OETS106.

Prerequisite(s)/Corequisite(s): TCEN 105 or OETS 105. Restricted to: Community Colleges only.

TCEN 110. Photovoltaic Application**4 Credits (3+2P)**

This course will provide an introduction to Photovoltaic (PV) installation. The course will provide instruction on site selection, prep, installation, and maintenance for photovoltaic applications. Students that complete the course and have the opportunity to take the entry level exam with the North American Board of Certified Energy Practitioners (NABCEP) en route to becoming Certified Installers. Crosslisted with: OETS110.

Prerequisite(s)/Corequisite(s): TCEN 101 or OETS 101. Restricted to: Community Colleges only.

TCEN 111. Basic Electrical Principles I, DC Circuits**4 Credits (3+2P)**

Course begins with the basics of electricity and DC circuits. Includes categorization of material properties within conductors, semiconductors, and insulators. Gradual progression tackles more complex topics like DC circuit analysis of series and parallel circuits, including Kirchhoff's laws, Thevenin's & Norton's theorems, and superposition. Finally DC combination circuits, magnetism and electromagnetism, generators and motors are covered. Emphasis on safety throughout. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): OETS 104 or MATH 1215. Restricted to Community Colleges campuses only.

TCEN 112. PV Power Generation Design Fundamentals**3 Credits (2+2P)**

A study of photo voltaic design basics, photo voltaic (PV) Cells, modules, and system components; electrical circuits; grid-tied/grid-interactive PV system design and sizing for use on homes; solar electric products and applications; and understanding energy conversion from sunlight to electricity, and working with solar conversion equipment. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): TCEN 111 and (OETS 104 or MATH 1215). Restricted to Community Colleges campuses only.

TCEN 113. OSHA 10 Hour Construction Hazard Identifications**1 Credit**

Intended for entry-level participants to provide instruction on a variety of construction safety and health standards. Topics include Introduction to OSHA, Electrical, Ladder, Excavation, Scaffold, and Forklift Hazards, Fall Protection, Materials Handling, Personnel Protective Equipment and Confined Space Entry Hazards. Meets OSHA 10-Hour Requirements.

TCEN 115. Wind Power Generation Design Fundamentals**3 Credits (2+2P)**

Course covers wind turbine module descriptions and functions and wind system installation, operation, and troubleshooting. Additional topics include wind energy harvesting and the conversion process from the generator system to electricity. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): TCEN 111 and (OETS 104 or MATH 1215). Restricted to Community Colleges campuses only.

TCEN 121. Basic Electrical Principles II, AC Circuits**4 Credits (3+2P)**

Course begins with an overview of the primary components of AC circuits, such as resistors, inductors, rectifiers, transformers and capacitors, and then gradually introduces new, more complicated topics like applying AC principles in power generation and generators, motors, parallel and combination circuits, troubleshooting and evaluation of circuit conditions. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): TCEN 111 and (OETS 104 or MATH 1215). Restricted to Community Colleges campuses only.

TCEN 156. Building Envelope**3 Credits (2+2P)**

Designed to prepare the student for the BPI Building Envelope Certification. This course will provide the principles behind building performance testing and the purpose of completing a comprehensive energy audit. Through lecture and subsequent field training, the student will learn how to use building diagnostics to develop a prescriptive plan for enhancing comfort, health & safety, building durability, and energy savings. The student will learn how to outline the follow-up process required after completion of the retrofit. Crosslisted with: OETS156. Restricted to: Community Colleges only.

Prerequisite(s): TCEN 106 or OETS 106.

TCEN 205. NEC for Alternative Energy**4 Credits (2+4P)**

This hands-on course will cover the National Electrical Code specifics concerning photovoltaic installation. Also code compliant wiring of basic electrical systems will be covered. Existing installations will be visited and studied. Restricted to: Community Colleges only.

Prerequisite(s): TCEN 101 and ELT 105.

TCEN 220. Cooperative Experience**1-3 Credits (1-3)**

Supervised cooperative work program. Student is employed in an approved occupation and supervised and rated by the employer and instructor. May be repeated up to 6 credits. Consent of Instructor required.

Prerequisite(s)/Corequisite(s): MAT 235. Prerequisite(s): TCEN 180. Restricted to: TCEN majors. Graded: S/U Grading (S/U, Audit). Restricted to: Community Colleges only.

TCEN 221. Roofing Materials and Methods**3 Credits (2+2P)**

Covers application techniques and estimation of asphalt and wood roofing products and accessories including gutters and flashing. Presents roof penetration, roof loading issues, and energy system installation requirements for mounting photo voltaic or solar thermal systems.

Prerequisite(s): TCEN 112.

TCEN 222. Photo Voltaic Grid Tie Installation**4 Credits (3+2P)**

This is a more advanced course culminating in a PV system-to-grid connection. This course includes gathering site specific data, design, wire type and sizing specific to project, installation of all solar modules and balance of system (BOS) components, and grounding and bonding of system components, all in accordance with the latest NEC. Upon project design approval a system will be commissioned for the grid. Decommissioning will commence after measurements and troubleshooting as directed by the instructor. May be repeated up to 4 credits.

Prerequisite(s)/Corequisite(s): TCEN 121 and TCEN 223. **Prerequisite(s):** TCEN 111 and TCEN 112. Restricted to Community Colleges campuses only.

TCEN 223. National Electric Code Principles in Relation to Photo Voltaic**2 Credits (2+1P)**

Focuses on all sections of the National Electrical Code and local code requirements applicable to photo voltaic electrical installation. A partial list of areas covered is chapters one through four and section 690, "Solar Photovoltaic Systems" of the National Electrical Code.

Prerequisite: TCEN 112.

Prerequisite/Corequisite: TCEN 222.

Learning Outcomes

1. Identify the requirements for safe and practical solar PV installations. Accurately reference, read, and interpret NEC code as it relates to PV installations (Code 690). Present a compelling case of when the PV electricity market will reach "grid-parity."

TCEN 224. Field Experience**1-3 Credits (1-3)**

Student will collaborate with instructor in proposing, defining, implementing, and analyzing outcomes of a project in the Environmental and Energy fields of study. May be repeated up to 6 credits. Consent of Instructor required. Restricted to: TCEN majors. Restricted to: Community Colleges only.

TCEN 241. Solar Thermal SHW Principles/Installation and Maintenance**3 Credits (2+2P)**

Course presents the theory, installation, operation, and maintenance of solar hot water (SHW) systems. Topics include the types of systems to choose, the costs associated with SHW installation and operation, system sizing requirements, batteries and battery chemistry. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): OETS 104 or MATH 1215.

TCEN 246. Building Weatherization & Auditor Fundamentals**3 Credits (3)**

Course provides information on how to locate air leaks and identify heat losses or gains through specific testing. Students will learn how to inspect and evaluate building envelopes, mechanical systems, and ventilation systems to determine the safety and energy consumption for each system. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): TCEN 113 and OETS 104.

Corequisite(s): TCEN 221.

TCEN 251. Advanced Photo Voltaic On/Off Grid Installation**3 Credits (2+2P)**

Photo Voltaic advanced topics to include panel racking and installation, battery storage, charge controllers, mechanical integration of arrays on buildings, and key elements involved in choosing a mounting system. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): TCEN 222. Restricted to Community Colleges campuses only.

TCEN 252. NABCEP Entry-Level Exam Review**2 Credits (2)**

Course presents knowledge, key terms, and concepts of photovoltaic systems and solar hot water systems as related to the NABCEP Entry-level exam. This exam is for those wanting to enter the workforce in either solar thermal or solar PV. Scheduling and taking the exam is the responsibility of the student. Consent of Instructor required. Restricted to Community Colleges campuses

Prerequisite(s): TCEN 222.

Learning Outcomes

1. Analyze photovoltaic markets and application trends
2. Complete practice questions for the NABCEP PV Associate Exam
3. Develop a practice of safe work environment as it relates to the installation and maintenance of photovoltaic systems according to OSHA standards
4. Apply electrical concepts to the operation and maintenance of photovoltaic systems and related equipment
5. Apply solar energy fundamentals, i.e. photovoltaic module essentials, system components, system sizing principles, system electrical design, system mechanical design, performance analysis, maintenance, and troubleshooting
6. Pass the NABCEP PV Associate exam with at least 70 percentile.

TCEN 253. Renewable Energy System Troubleshooting and Maintenance**3 Credits (2+2P)**

Covers wind, solar and solar thermal system troubleshooting and maintenance topics to include equipment, electrical, and installation problem areas. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): TCEN 251. Prerequisite(s): TCEN 222. Restricted to Community Colleges campuses only.

TCEN 254. Renewable Energy Internship**2 Credits (2)**

Student will receive industry-related renewable energy experiences at an approved industry location. Typical areas of hands-on practices will be installing solar PV, solar hot-water systems, or wind energy systems. May be repeated up to 6 credits. Consent of Instructor required. Restricted to Community Colleges campuses only.

Prerequisite(s): TCEN 112 and 113 and 222.

THEA-THEATER

THEA 1110G. Introduction to Theatre**3 Credits (3)**

This course provides an introduction to the study of theatre. Students will examine various components that comprise theatre, such as acting, directing, playwriting, dramaturgy, scenic and costume design, stagecraft, spectatorship, history, theory, and criticism.

Learning Outcomes

1. Define and discuss basic theater terms and concepts.
2. Discuss the fundamental elements of theatre, and the ways in which theatre differs from other art forms.
3. Analyze and critique the elements of a live theatrical production.
4. Identify and describe the roles of various theatre artists including actors, directors, playwrights, dramaturges, and designers.

THEA 1210G. Acting for Non-Majors**3 Credits (3)**

This class gives non-majors experience in the depth and craft of the actor's art. Students will learn various terms, techniques, and practices of acting and will demonstrate their understanding in class. Through exercises and improvisations, partnered scenes, and group work, students will be better able to appreciate the work of others as they learn techniques of performing. May be repeated up to 3 credits.

Learning Outcomes

1. Develop fundamental physical, vocal, analytical, and imaginative skills for acting for the stage.
2. Apply fundamental techniques of voice and movement for the stage.
3. Apply principles of play text analysis to understand story, character, and meaning.
4. Gain a better understanding of an actor's approach to goals, tactics, and obstacles.
5. Engage in character creation and development while preparing and performing monologues and scenes.
6. Learn a common vocabulary to help discuss the process of acting.
7. Employ collaborative methods of work with a partner and in groups.
8. Observe and evaluate acting skills of other actors.
9. Increase verbal and physical communication skills which are applicable in any field.
10. 1Develop personal and social responsibility via group work, research and self-reflection.
11. 1Increase confidence and self-esteem via continuous presentations with supportive feedback.

THEA 1221. Beginning Acting**3 Credits (3)**

Basic understanding of self-expression through a variety of physical exercises, improvisation, and character study, culminating in scene or monologue work. Restricted to: THTR majors.

Learning Outcomes

1. Apply a common vocabulary that serves as a foundation in acting for the theatre major and minor
2. Communicate effectively in front of an audience, applying learned concepts while exercising freedom and control of voice, body, and imagination
3. Analyze the written character and live performance
4. Provide objective feedback to your classmate's work as well as your own, that supports a greater understanding of our craft while building trust within the collaborative ensemble

THEA 1222. Stage Movement**3 Credits (3)**

Physical techniques for the actor to develop kinesthetic awareness and skills in characterization, archetypes, and stage combat. Restricted to: THTR majors.

Learning Outcomes

1. To provide fundamental training in a variety of movement techniques which can be applied to both theatrical performance and physical communication in everyday life.
2. Observation and critical skills will be advanced through class participation and outside assignments
3. Class exercises are aimed at guiding participants to uncover their own creative expression, while working with efficient, healthy body alignment

THEA 1223. The Art of Theatre**3 Credits (3)**

This course introduces the variety and scope of theatre professions, the value and goals of the theatre major and an analysis of the art form from script to stage. Restricted to: Required for THTR majors majors.

Learning Outcomes

1. An overview of the history of theatre in the Western world
2. A general understanding of the artistic roles and functions within the theatre industry (including within NMSU Theatre as a model)
3. A strong preparation for independent in-depth script analysis and theatre critique

THEA 1310. Introduction to Costuming**3 Credits (3)**

This course introduces students to basic skills generally used in creating costumes for theatre. During the semester students will be introduced to the costume shop, equipment, supplies, and processes. They will learn the process of sewing a garment and running a stage production.

Prerequisite(s)/Corequisite(s): THEA 1310L. Restricted to: THTR majors.

Learning Outcomes

1. Demonstrate basic hand and machine sewing skills.
2. Use basic costume craft tools and techniques.
3. Analyze fabric selection for the stage.
4. Draft and use patterns.
5. Take body measurements for patterning and construct a costume from those measurements.
6. Combine interpersonal communication skills with costume construction skills.
7. Analyze a script for costume design purposes.
8. Build a garment.

THEA 1310L. Costume Craft Lab**1 Credit (1)**

Class members will assist in construction for productions in a studio environment.

Prerequisite(s)/Corequisite(s): THEA 1310.

Learning Outcomes

1. This laboratory class compliments THEA 1310: Costume Crafts.
2. It gives the student an opportunity to put into practice the skills learned in THEA 1310 as well as be introduced to and participate in the day-to-day operations of the Costume Shop.

THEA 1415. Running Crew I**2 Credits (1+2P)**

Students learn about backstage and front of house production positions and work on a technical aspect of a product in a rehearsal and performance environment.

Learning Outcomes

1. Students will learn one, or more, of the basic technical elements of theatrical crew work.

THEA 2221. Intermediate Acting: Scene Study and Monologues**3 Credits (3)**

Monologues and scene work, using character and script analysis. Prerequisite(s):

Prerequisite(s): THEA 1221 or THEA 1210 with C- or above.

Learning Outcomes

1. Students will gain further insight into the craft of acting and the techniques and skills required to present a successful stage performance.
2. Via the presentation of varied scenes and monologues, students will be exposed to a variety of theatrical literature.
3. Via research, students will gain knowledge of successful actors, acting techniques, and career advice.

THEA 2222. Intermediate Acting for Non-Majors**3 Credits (3)**

A continuation of THEA 1210 with an emphasis on monologues, scenes and characterization. Prerequisite(s): THEA 1210

Learning Outcomes

1. Apply fundamental techniques of voice and movement for the stage.
2. Analyze a dramatic text and interpret a character and develop the skills necessary to score a script for character development.
3. Perform specific choices to create and perform goal-driven characters.
4. Demonstrate various physical and mental relaxation techniques.
5. Identify internal and external techniques to increase actor's emotional range.
6. Demonstrate sensory exercises and apply this technique to scene work.
7. Articulate and implement key terminology of modern acting techniques.
8. Develop and articulate a basic personal artistic process.
9. Demonstrate the ability to work cooperatively on a creative/interpretative project.
10. 1 Begin to develop professionalism and development of a critical eye through practice giving and receiving peer feedback, adherence to deadlines, memorization, flexibility and coachability.

THEA 2310. Stagecraft**3 Credits (3)**

Student will explore basic skills for scenic designers and techniques of set construction for the stage, including building scenery, rigging, painting and properties.

Prerequisite(s)/Corequisite(s): THEA 2310L.

Learning Outcomes

1. Demonstrate a range of technical skills, which will qualify them to assist in the basic technical
2. production of a play.
3. Demonstrate and apply how to safely and competently use hand tools, power tools, electrical, and electronic stage equipment.
4. Analyze the technical aspects of a play in performance.
5. Read and construct scenery from ground plans, elevations, and drawings.
6. Analyze a script from the perspective of a designer, artistic, and/ or technical director.

THEA 2310L. Stagecraft Laboratory**1 Credit (1)**

Class members will assist with construction for productions in a studio environment.

Prerequisite(s)/Corequisite(s): THEA 2310.

Learning Outcomes

1. History of scenic design and the development of present day stage design.
2. How to create and interpret basic scenic ground plans, elevations, and detail drawings.
3. To construct basic scenic structures to include flats and platforms.
4. Various techniques of scenic painting and decorating.
5. The installations of theatre lighting instruments and sound equipment.

THEA 2340. Introduction to Design**3 Credits (3)**

Introduction into our visual world via the language of designers, focusing on collaboration, creative thinking and presentation skills. The varied design professions in theatre and the performing arts will be explored. Restricted to: Required of all THTR Majors.

Learning Outcomes

1. Apply design vocabulary and descriptions when speaking about design.
2. Identify design tools and make choices about where to use them.
3. Apply the foundation information in understanding how design tools work.
4. Apply correct terminology in assessing design and script analysis.
5. Read and understand some of the design documents commonly used in the industry.

THEA 2415. Running Crew II**1 Credit (1)**

Students learn about backstage and front of house production positions and work on a technical aspect of a product in a rehearsal and performance environment.

Learning Outcomes

1. To provide students with "hands on" experience participating in being a member of a running crew on a theatrical production.
2. Students will learn one, or more, of the basic technical elements of theatrical crew work.

THEA 2421. Vocal Production for the Actor**3 Credits (3)**

Exploration and development of the actor's vocal instrument, including relaxation, projection, diction and articulation. May be repeated up to 3 credits. Restricted to: THTR majors.

THEA 2993. Theatre Workshop I**0.5 Credits (.5)**

Required for all freshman and sophomore theatre majors, this course coordinates all processes within Theatre Arts, providing a forum for discussion and feedback. May be repeated up to 4 credits. Restricted to Las Cruces campus only.

Learning Outcomes

1. This lab course is designed to create community via group meetings with your peers while providing a platform for our guest artists to present information regarding our profession.
2. As time allows, group discussions and sharing will further the sense of community and collaboration with your peers.
3. This forum also provides an opportunity to discuss and provide feedback for each production in the ASTC season.

THEA 2996. Theatre Topics**1-3 Credits (1-3)**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.

Learning Outcomes

1. Varies

THEA 300. Theatre Workshop II**0.5 Credits (.5)**

Required for all junior and senior theatre majors, this course coordinates all processes within Theatre Arts, providing a forum for discussion and feedback. May be repeated up to 4 credits. Restricted to Las Cruces campus only.

THEA 303. Theatre History I**3 Credits (3)**

History of theatre and drama from ancient Greece to the English Renaissance.

THEA 304. Theatre History II**3 Credits (3)**

History of theatre and drama from the Restoration to the 20th century. May be repeated up to 3 credits.

THEA 305. Advanced Vocal Production**3 Credits (.3)**

Advanced exploration and development of the actor's vocal instrument. May be repeated up to 3 credits.

Prerequisite(s): THEA 2421.

THEA 306. Script Analysis**3 Credits (3)**

This class is designed to give you tools and specific processes to help you read and break down a text, so that you can make it come alive for audiences in the varied genres of theatre, film and animation.

Learning Outcomes

1. Determine the dramatic structure of a script Write an analysis of a script for production Verbally communicate an analysis of a script for production Analyze a script from a specific perspective such as actor, director, designer, animator, etc.

THEA 307V. Society in Style: Fashion, History and Culture**3 Credits (3)**

History of clothing for theatrical purposes, origins and evolution of period clothing in relation to social, political, and aesthetic factors of different periods.

THEA 308. Creative Writing: Playwriting**3 Credits (3)**

Technique of one-act playwriting, and analysis of dramatic structure. Crosslisted with: ENGL 308

Prerequisite(s): ENGL 1110G.

THEA 310. Styles in Acting**3 Credits (3)**

Analysis of differing styles of acting through scene work representing various time periods and genres. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): THEA 1221 or THEA 1210 with a C- or better.

THEA 311. Acting for Film and Television**3 Credits (3)**

Specific techniques of acting for the camera are explored via hands-on experiential learning and an introduction to the business of the TV/Film industry

Prerequisite(s): THEA 1221 or THEA 1210 or permission of instructor.

THEA 312. Acting Shakespeare**3 Credits (3)**

Acting Shakespeare's tragedies and comedies, including text work, scansion, movement, scene work, and monologues. May be repeated up to 3 credits. Consent of Instructor required.

Prerequisite(s): THEA 1221 or THEA 1210 with a C- or better.

THEA 313. Improvisation**3 Credits (3)**

Long and/or short form improvisation techniques in addition to a variety of exercises exploring terminology, character work and the elements of comedy.

Prerequisite(s): THEA 1210 or THEA 1221.

THEA 317. Musical Theatre**3 Credits (3)**

Acting class focused on developing and refining skills necessary for performing in musicals. May be repeated up to 9 credits.

Prerequisite(s): THEA 1221 or THEA 1210 with a C- or better.

THEA 321V. Modern European Drama**3 Credits (3)**

Masterworks of European drama from the 19th century to the present. Crosslisted with: ENGL 321V.

THEA 322. Dramatic Character**3 Credits (3)**

How characters have been created for the stage from the beginning of theatrical performances in ancient Greece to the present day. Exploring characterization related to dramatic structure, style, and genre, and how dramatic characters differ from those in literary fiction. May be repeated up to 3 credits. Crosslisted with: ENGL 322.

THEA 323. American Drama**3 Credits (3)**

Masterworks of American drama from the 20th century to the present. Crosslisted with: ENGL 323.

THEA 324. Singing for Musical Theatre**3 Credits (3)**

Students will gain an understanding of stronger vocal health, aural skills, and rehearsal practice strategies as they work on musical theatre singing techniques and performances including solos, duets and small groups, and a final public showcase.

Learning Outcomes

1. The ability to practice strong vocal habits in order to independently maintain vocal health. Identify and utilize proper vocal warm-up techniques. Display an improved level of music reading and aural awareness. Analyze and break down a piece of theatrical music into components for focused learning. Perform pieces of music theatre both individually and in a group with increased ease

THEA 329. Studies in Drama

3 Credits (3)

Subtitles vary. Study of a group of related works of drama, theory, or theatre practice. Crosslisted with: ENGL 329 and FDMA 329.

THEA 330. Special Topics: Variable

3 Credits (3)

Specific subjects to be announced in the Schedule of Classes.

Learning Outcomes

1. To gain knowledge and/or skill in a specialty area of theatre

THEA 334. Introduction to Stage Makeup

3 Credits (3)

Basic principles of stage makeup: straight, character, and specialty. Includes study of various products, methods of application, and the effects of lighting on makeup.

THEA 337. Independent Study

1-3 Credits

Students propose and design their own course not covered through regular course offerings under the guidance of faculty. May be repeated up to 6 credits. Consent of Instructor required.

THEA 341. Scene Painting

3 Credits (3)

Use of historical painting techniques in a project-driven classroom. Projects include 2-D and 3-D work, color mixing and theory, painting scenery, and the use of paint for effects.

Prerequisite(s): THEA 2310.

THEA 343. Costume Patterning

3 Credits (3)

Basic techniques in the production of flat patterns for modern and period silhouettes including some draping techniques. Consent of Instructor required.

THEA 345. Costume Practicum

1 Credit (1)

A practical course intended to provide students additional experience and greater responsibility within the workings of the Costume Shop. May be repeated up to 1 credits.

Prerequisite(s): THEA 1310.

THEA 346. Scenic Practicum

1 Credit (1)

A practical course intended to provide students additional experience and greater responsibility within the workings of the Scene Shop. May be repeated up to 2 credits. Graded: S/U Grading (S/U, Audit).

Prerequisite(s): THEA 2310.

THEA 347. Lighting Practicum

1 Credit (1)

A practical course intended to provide students hands-on experience executing theatrical lighting.

THEA 348. Running Crew III

1 Credit (1)

Students will work on a technical aspect of a production in a rehearsal and performance environment.

Prerequisite(s): THEA 1415.

THEA 349. Running Crew IV

1 Credit

Students will work on a technical aspect of a production in a rehearsal and performance environment.

Prerequisite(s): THEA 1415.

THEA 352. Costume Design

3 Credits (3)

Basic principles of costume design, including script analysis, principles of design, drawing and painting.

THEA 353. Scene Design

3 Credits (3)

Design for the performing arts. Basic design skills and projects to exercise those skills, history of design in the theatre and the designer's role in the production process. Final project includes a finished scene design.

Prerequisite: THEA 2310 or consent of instructor.

THEA 354. Sound Design

3 Credits (3)

Hands-on training in theatrical sound design and implementation.

THEA 355. Lighting Design**3 Credits (3)**

Basic aspects of theatre lighting, including electricity, color theory, history, and types of lighting instruments.

THEA 356. Theatre Production**1-3 Credits**

Participation in the production of theatrical performances by stage managing, acting, designing, dramaturgy, or directing. May be repeated for a maximum of 6 credits. Graded S/U.

THEA 357. Computer Scenographics**3 Credits (3)**

Project-oriented course teaching basic computer modeling skills. Projects focus on the creation of communication tools designers use in the theatrical process. Students will develop portfolios of completed projects. Consent of instructor required.

Prerequisite(s): THEA 352, THEA 353, or THEA 355.

THEA 360. Creative Drama**3 Credits (2+2P)**

Methods of developing original dramatizations. Emphasis on curriculum problems and teaching techniques in elementary and secondary schools.

THEA 366. Summer Theatre**1-3 Credits**

Experience in professional or academic summer theatre. May be repeated for a maximum of 3 credits. Graded: S/U. Restricted to THTR majors.

Prerequisite(s): Consent of department head.

THEA 384. Stage Management**3 Credits (3)**

Study of stage management techniques and their application to play production. A working knowledge of union rules, and the procedure to facilitate these through proper communication skills.

THEA 395. Directing I**3 Credits (3)**

Study and application of basic stage directing techniques.

Prerequisite(s): THEA 1210 or THEA 1221.

THEA 408. Shakespeare I**3 Credits (3)**

Study in Shakespeare's early poems and plays. Repeatable for up to six credits under different subtitles.

Learning Outcomes

1. Analyze Shakespeare's poetry using the methods of close reading Demonstrate ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays; Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material; Work effectively in small groups to interpret a scene through performance

THEA 409. Shakespeare II**3 Credits (3)**

Study in Shakespeare's later plays. ENGL 408 is not a prerequisite. Repeatable for up to six credits under different subtitles. Crosslisted with ENGL 409.

Learning Outcomes

1. Analyze Shakespeare's poetry using the methods of close reading; Demonstrate ability to read and develop persuasive literary-critical interpretations of Shakespeare's poems and plays; Demonstrate skill in working with relevant secondary resources and research tools including the MLA bibliography to write a research paper on a topic related to our course material; Work effectively in small groups to interpret a scene through performance.

THEA 410. Advanced Acting: Contemporary Methods**3 Credits (3)**

Acting techniques will be explored focusing on current trends in the profession, from Stanislavski, to Hagen to Meisner. May be repeated up to 3 credits. Consent of Instructor required. Restricted to: THTR majors.

Prerequisite(s): THEA 1210 or THEA 1221.

THEA 414. Collaborative Theatre-Making**3 Credits (3)**

This course introduces students to the techniques, skills and practice of the collaborative creation of new theatrical material.

Prerequisite(s): THEA 1221.

THEA 417. Musical Theatre II**3 Credits (3)**

A continuation of THEA 317, allowing for more advanced musical theatre techniques.

Prerequisite(s): THEA 317.

THEA 430. Special Topics**1-3 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 9 credits.

THEA 435. Directed Reading**1-3 Credits**

Directed individualized studies. May be repeated for a maximum of 3 credits.

THEA 439. Senior Seminar**3 Credits (3)**

Course preparing students for professions in and related to the theatre. Restricted to: THTR majors.

THEA 440. Senior Seminar Practicum**1 Credit (1)**

Capstone course preparing students to apply knowledge of theatre arts toward advanced training or career objectives in the discipline. Consent of instructor required.

Prerequisite(s)/Corequisite(s): THEA 439. Restricted to THTR majors.

THEA 450. The Michael Chekhov Acting Intensive**3 Credits (3)**

An intensive overview of the performance techniques attributed to Michael Chekhov, applied to theatrical scenes and presentations. May be repeated up to 6 credits. Consent of Instructor required.

THEA 535. Directed Study**1-3 Credits (1-3)**

For the highly motivated student. Independent projects and individual guidance. Graduate standing and consent of instructor required. May be repeated up to 6 credits.

TOX-TOXICOLOGY

TOX 361. Basic Toxicology**3 Credits (3)**

Introduction to the principles of toxicology, discussion of toxic agents, environmental problems, testing procedures, and regulations. Prior course work in biology and chemistry recommended. Crosslisted with: ENVS 361 and TOX 461.

Prerequisite(s): CHEM 1120G or CHEM 1225 or CHEM 1226G and BIOL 2610G or BIOL 2110G.

TOX 461. Toxicology I**3 Credits (3)**

Introduction to principles of toxicology. Crosslisted with: TOX 361.

Prerequisite(s): (CHEM 1226 or CHEM 1225G) and (BIOL 2610G or BIOL 2110G).

TOX 598. Special Research Programs**1-3 Credits**

Individual investigations, either analytical or experimental. Graded S/U.

UNIV-UNIVERSITY STUDIES

UNIV 300. Preparing for the Graduate Record Examination**1 Credit (1)**

Preparation for taking the Graduate Record Examination including review, test taking strategies and practice for the verbal, quantitative and analytical sections. Graded S/U.

UNIV 350. Peer Education**3 Credits (3)**

Overview of college student development theory and its application to college student learning and peer education. Supervised experience as a peer educator with training in structured group facilitation.

Prerequisite: consent of instructor.

UNIV 361. NMSU Gospel Choir**1 Credit (1)**

Students will gain performance experience and exposure to urban contemporary gospel music. Open to all majors. May be taken for unlimited credit.

UNIV 395. Independent Study**1-3 Credits**

Individualized projects related to the field of learning assistance. May be repeated for a maximum of 3 credits.

UNIV 495. Independent Study**1-3 Credits (1-3)**

Individualized projects related to the field of learning assistance. Taught with UNIV 395.

WATR-WATER UTILITIES

WATR 120. Introduction to Water Systems**3 Credits (3)**

Introduction to and theory of groundwater sources, production, treatment, and distribution.

WATR 130. Wastewater Collection and Basic Treatment Systems**3 Credits (3)**

Introduction to wastewater characteristics, collection, and basic treatment operations.

WATR 140. Applied Water and Wastewater Math I**3 Credits (3)**

Introduction to basic water and wastewater mathematics, flows through distribution networks and collection systems, and fundamentals of flow measurement.

Prerequisite: CCDM 114 N or equivalent.

WATR 160. Systems Maintenance**4 Credits (2+4P)**

Basic tools, equipment, maintenance schedules, chlorinator trouble-shooting, and chlorine safety. Hands-on training with valves, pumps, meters and chlorination equipment.

WATR 175. Programmable Logic Controllers**2 Credits (2)**

This course will introduce students to electrical safety, theory, and the function, operations, programming and troubleshooting of the PLC controlling common electrical components utilized in control circuits associated with the water and wastewater industry. Restricted to: Community Colleges only.

WATR 180. Water Chemistry**3 Credits (3)**

Basic chemistry with applications to water and wastewater analysis.

Prerequisite: CCDM 114 N or consent of instructor.

WATR 182. Water Chemistry Analysis**1 Credit (3P)**

Beginning water and wastewater laboratory analysis including gravimetric, volumetric, and quality control techniques.

Prerequisite: CCDM 114 N or equivalent or consent of instructor.

WATR 190. Water and Wastewater Microbiology**3 Credits (3)**

Overview of microorganisms associated with water and wastewater. Growth and reproduction, energy production, and methods of counting.

Prerequisite: WATR 130, WATR 180, or consent of instructor.

WATR 192. Water and Wastewater Microbiological Analysis**1 Credit (3P)**

Introduction to water and wastewater treatment operational tests such as BODs, solids testing, activated sludge control tests, use of microscope, and bacteriological techniques.

Prerequisites: WATR 130 and WATR 182, or consent of instructor.

WATR 200. Internship**3-5 Credits**

On-the-job training/work experience with municipalities or industries, working in water or wastewater treatment plants, high purity water plants, industrial waste plants, distribution systems, or wastewater collection systems. May be repeated up to 5 credits. Consent of Instructor required. Restricted to: Water Technology majors. Graded: S/U Grading (S/U, Audit). Restricted to Community Colleges campuses only.

WATR 220. Water Treatment Systems**3 Credits (3)**

Theory of water systems operation including surface water treatment, fluoridation, sodium zeolite softening, corrosion control, iron removal, various filtration methods, and overview of SDWA.

Prerequisites: WATR 180 and WATR 182 or consent of instructor.

WATR 222. Water Systems Operation**1 Credit (3P)**

Operations of various water treatment systems including surface water treatment, sodium zeolite softeners, and various filtration methods.

Prerequisite: WATR 220 or consent of instructor.

WATR 230. Advanced Wastewater Treatment**4 Credits (4)**

Calculations and operations involved in wastewater and water reclamation plants.

Prerequisites: WATR 140, WATR 190, and WATR 192, or consent of instructor.

WATR 232. Wastewater Systems Operations**1 Credit (3P)**

Operation of pretreatment, primary, and biological treatment units.

Prerequisite: WATR 230 or consent of instructor.

WATR 240. Advanced Water and Wastewater Math II**3 Credits (2+2P)**

Advanced water and wastewater mathematics. Flow measurement. Systems head and pump curves.

Prerequisites: WATR 140.

WATR 250. Municipal Systems Management**4 Credits (4)**

Management of water utility systems including laws, finance, records, and safety.

Prerequisites: WATR 120, WATR 130.

WATR 270. Special Topics**1-4 Credits**

Specific subjects to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

WATR 275. Certification Review**3 Credits (3)**

Review of water and wastewater plant operations and laws in preparation for state certification exams. May be repeated up to 3 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): WATR 120, WATR 130, WATR 140, WATR 160.

WATR 285. High Purity Water Treatment Systems**3 Credits (3)**

Principles of high purity water production including microfiltration, ultra-filtration, reverse osmosis, and deionization.

Prerequisite: WATR 220.

WATR 287. Advanced Water Chemistry Analysis**3 Credits (6P)**

Sampling techniques, analysis, and evaluation of potable water contaminants using gravimetric, volumetric, spectrophotometric, and other instrumentation methods. May be repeated up to 3 credits.

Prerequisite(s)/Corequisite(s): WATR 285. Restricted to Community Colleges campuses only.

WATR 290. Advanced Wastewater Microbiology and Chemistry**3 Credits (3)**

Covers NPDES permits and DMR calculations and reporting; 503 sludge regs, including pathogen and vector attraction reduction and pollutants; wetlands, composting, and wastewater treatment ponds microbiology; activated sludge bulking and foaming microbiology and treatment; and use of selector to remove nutrients and prevent the growth of filamentous bacteria.

Prerequisite: WATR 190, WATR 192.

WATR 292. Advanced Wastewater Analysis**3 Credits (6P)**

Covers sampling techniques, analysis, and evaluation of wastewater contaminants using gravimetric, volumetric, spectrophotometric, and other instrumentation methods.

Prerequisite: WATR 190 and WATR 192.

WELD-WELDING TECHNOLOGY

WELD 100. Structural Welding I**6 Credits (3+6P)**

Development of basic skills in SMAW, OFC, and OFW in accordance with the AWS entry-level welder program.

WELD 102. Welding Fundamentals**3 Credits (2+2P)**

Survey of welding and cutting processes for nonmajors. Classroom instruction and laboratory work with OFC/OFW, SMAW, GMAW, FCAW, and plasma arc cutting.

WELD 105. Introduction to Welding**3 Credits (3)**

Welding practices, procedures, and terminology. Welding safety, equipment types, electrode types in usage, joint design and testing procedures.

WELD 110. Blueprint Reading (Welding)**3 Credits (3)**

Interpretation of prints related to welding. Emphasis on AWS standard symbols for welding, brazing, and nondestructive examination.

WELD 115. Structural Welding II**6 Credits (3+6P)**

Continuation of WELD 100. Emphasis on AWS entry and advanced level welder skills with SMAW, including all-position welding with mild and stainless steel electrodes. Plasma arc and air-carbon arc cutting, metallurgy, heat treatment, and weld defects.

Prerequisite: WELD 100.

WELD 120. Basic Metallurgy**3 Credits (3)**

Properties of ferrous and nonferrous materials. Service conditions and heat treatment of metals related to welding trade.

Prerequisites: WELD 100 or consent of instructor.

WELD 125. Introduction to Pipe Welding**3 Credits (2+2P)**

Pipe fit-up and welding techniques for pipe fitting and pipe weld joint using SMAW, GMAW, GTAW, and FCAW, 2G welding of pipe. Restricted to: Community Colleges only.

Prerequisite(s): WELD 100, WELD 130, and WELD 140, or consent of instructor.

WELD 126. Industrial Pipe Welding**3 Credits (3)**

Enhancement of WELD 125. Development of more advanced pipe welding skills.

Prerequisite(s): WELD 110, WELD 130 and WELD 140.

Corequisite(s): WELD 125.

WELD 130. Introduction to GMAW MIG)**3 Credits (2+2P)**

Development of basic skills with gas metal arc welding (MIG) in accordance with AWS entry-level welder objectives. Wire electrodes, shielding/purge gases, and modes of metal transfer.

WELD 140. Introduction to GTAW TIG)**3 Credits (2+2P)**

Development for basic skills with gas tungsten arc welding (TIG) in accordance with AWS entry/advanced welder objectives. Welding mild steel, tungsten electrode preparation, filler wire selection, and equipment set-up.

WELD 150. Pipe Welding II**3 Credits (2+2P)**

Continuation of WELD 125; with fillet and groove welded joints in a horizontal fixed and 45-degree fixed positions (5-F, 5-G, 6-F, 6-G).

Prerequisite: WELD 125.

WELD 151. Industrial Pipe Welding II**3 Credits (3)**

Enhancement of WELD 150. Development of more advanced pipe welding skills. Emphasis on industry driven test.

Prerequisite(s): WELD 125 and WELD 126.

Corequisite(s): WELD 150.

WELD 160. Introduction to SAW and FCAW**3 Credits (2+2P)**

Submerged arc and flux-cored arc welding. Demonstrations and practice with machine travel submerged arc welding (SAW), flux-cored arc welding (FCAW-G, FCAW-S) on mild steel plate and pipe. Restricted to: Community Colleges only.

WELD 170. Welded Fabrication**3 Credits (1+4P)**

Development of fabrication skills including basic layout, measuring, and utilization of various welding processes including out-of-position welding. Use of common shop tools.

Prerequisites: WELD 100, WELD 110, WELD 130, and OETS 104 or OETS 118.

WELD 180. GTAW II**3 Credits (2+2P)**

Continuation of WELD 140. Development of more advanced GTAW skills. Emphasis on pipe welding with mild steel, stainless steel, and aluminum.

Prerequisite: WELD 140 or consent of instructor.

WELD 190. Welded Art**3 Credits (1+4P)**

Students explore the possibilities of welded art in the form of sculpture, jewelry, furniture and as a framework to support other art media. Offered as an elective for students who wish to create art using welding. May be repeated up to 12 credits. Restricted to Community Colleges campuses only.

Prerequisite(s): WELD 102.

WELD 211. Welder Qualification**6 Credits (3+6P)**

Laboratory and classroom instruction on AWS and ASME Welder Performance Qualification Tests. All position plate and pipe techniques and tests for SMAW, GMAW, GTAW, FCAW, and SAW. Nondestructive and destructive examination methods. Basics of welding codes. Restricted to majors.

Prerequisites: OETS 104 or OETS 118; and WELD 100, WELD 110, WELD 120, WELD 130, WELD 140, WELD 160 and WELD 180 or consent of instructor.

WELD 221. Cooperative Experience I**1-6 Credits**

Supervised cooperative work program. Student is employed in an approved occupation and supervised and rated by the employer and instructor. Student will meet in a weekly class. Graded S/U. Restricted to majors.

Prerequisites: WELD 100 or WELD 101 and consent of instructor.

WELD 255. Special Problems in Welding Technology**1-6 Credits**

Individual studies in areas of welding technology. May be repeated for a maximum of 12 credits.

Prerequisite: consent of instructor.

WELD 295. Special Topics**1-4 Credits**

Topics to be announced in the Schedule of Classes. May be repeated for a maximum of 12 credits.

WSAM-WATER SCIENCE & MGT

WSAM 470. Environmental Impacts of Land Use and Contaminant Remediation**3 Credits (3)**

The course will cover the integrated assessment of soil erosion, contaminant transport in soil and water, and contaminant remediation from site scale to watershed scales. Understanding of the controlling factors for each type land use impact will be gained through the use of risk assessment, case studies, and computer modeling. Case studies will illustrate the processes under various environmental applications. This course will also cover the application of solute transport principles and methods for the remediation of contaminated soil and groundwater. It will also discuss the contaminated site characterization, monitoring, and remediation design. Discussions of innovative methodologies will be supported with case studies. May be repeated up to 3 credits. Crosslisted with: ENVS 470.

WSAM 550. Special Topics**1-4 Credits (1-4)**

Specific subjects to be announced in the Schedule of Classes. May be repeated up to 9 credits.

Learning Outcomes

1. Readings, discussions, and/or field and laboratory investigation of selected problems.

WSAM 551. Earth Data Retrieval**3 Credits (3)**

This course covers topics related to identifying sources, preprocessing, utilizing earth data that can be used to monitor some hydrological and water related variables, vegetation growth and related biophysical properties. The course focuses on developing students' skills on how to handle and analyze high-level large amounts of research data in different formats (i.e. .hdf). The course highlights the use of remote sensing and land surface models-based (NLDAS) earth observation datasets (e.g. NDVI, LST, Ta, and ET). The course uses some open-source tools including Python, API as well as MATLAB. Crosslisted with: RGSC 551.

WSAM 575. Climate Studies, Water and Society**3 Credits (3)**

The course provides a brief description of the Earth's climate system, an in-depth review and methodologies used to investigate climate change and variability, evidence of climate change on natural systems (water availability) vulnerability of human systems (e.g. agriculture) to climate change, and mitigation and adaptation strategies. Crosslisted with: RGSC 575.

WSAM 585. Land Cover Analysis for Natural Resources**3 Credits (3)**

This course is designed to help students understand, manipulate and extract Earth Observation (EO) data and to conduct land cover analysis related to natural resources including water and vegetation. The course provides and highlights means to identify and access EO data in different formats, extract meaningful information, and to help students developing critical thinking skills. The course introduces tools such as python and ArcGIS Pro to handle different data formats (e.g. hdf) efficiently; develop and present creative maps. The course provides basic information about how to conduct land use, land cover change analysis, mapping vegetation, water related variables and plant and animal distribution analysis. Crosslisted with: RGSC 585.

WSAM 589. Landscape Hydrology Modeling**3 Credits (3)**

Understand the landscape scale of hydrologic cycle and related hydrological processes. Quantitatively evaluate hydrological system components. Retrieve, visualize and model some of the physical processes using some of the available tools. Consent of Instructor required.

WSAM 590. System Dynamics**3 Credits (3)**

This course takes a system dynamics approach to the study of economics and natural resources management. We will examine some of the example theories such as Solow-Swan model and endogenous growth theories as well as the tragedy of the commons, using system dynamics tools to uncover the feedback and explicitly examine its impact on the dynamic behavior of the system. Through these examples, we will learn how to develop, validate, and use system dynamics models for policy design and analysis. Crosslisted with: RGSC 590.

Learning Outcomes

1. identify common generic structures and behavioral modes in socioeconomic and ecological systems,
2. define important feedback theories that explain the behavioral modes in socioeconomic and ecological systems, and
3. implement the system dynamics method to translate the feedback theories into dynamic simulation models.

WSAM 599. Masters Thesis**1-15 Credits (1-15)**

Thesis. May be repeated up to 88 credits. Consent of Instructor required. Restricted to: Water and Science Management majors. Thesis/Dissertation Grading.

WSAM 600. Doctoral Research**1-15 Credits (1-15)**

Assigned credit for research preformed. May be repeated up to 15 credits. Consent of Instructor required.

Learning Outcomes

1. Identify appropriate research methodologies.
2. Reflect on their own research, identifying lessons learned, strengths, and ways to improve.
3. Communicate confidently and constructively with faculty advisors.

WSAM 605. Arid Land Water Resources**3 Credits (2+2P)**

The course will cover various issues of relevance to water resources and water supply management within the Southwest US and other semiarid and arid regions. Discussions may include development and sustainability, climate change and drought, socioeconomic and cultural, and transboundary issues. May be repeated up to 3 credits. Crosslisted with: ENVS 605.

WSAM 610. Water and Sustainable Economic Development**3 Credits (3)**

For graduate students in the Water Science and Management or other research degree programs, use the water economics literature as a model for student research leading to an M.S. thesis or Ph.D. dissertation.

WSAM 700. Doctoral Dissertation**1-15 Credits (1-15)**

Dissertation for Water Sciences and Management Majors May be repeated up to 88 credits. Restricted to: Water Sciences and Management majors. Thesis/Dissertation Grading.
