EUROPEAN ORGANIZATION FOR NUCLEAR RESEARCH

INTERSECTING STORAGE RINGS COMMITTEE

Eighty-ninth Meeting

Wednesday, 21st May, 1980

A G E N D A

OPEN SESSION: at 09.30 in the CERN Council Chamber

1. Information from the Research Director General, L. Van Hove.
2. Status Report from Experiment R 807, Study of Large Transverse Momentum Phenomena with the Open Axial Field Magnet.
3. Presentation of Proposal P 105, Study of lns Physics in $\bar{p}p$ Interactions with the SFM, W.T. Meyer.
4. Presentation of Proposal P 106, A Search for η_c Pseudoscalar Charmed Meson and Charmonium Spectroscopy, R. Cester.

This proposal is based on an unconventional use of the ISR: one low energy antiproton beam (3.5 to 7 GeV) and an internal gas-jet target. The physics which would be made possible by such a development and the inevitable interference with conventional ISR $\bar{p}p$ physics will be discussed.

.../..

CLOSED SESSION: at 14.30 in the 6th floor conference room of the Administration Building

1. Approval of the Minutes of the last meeting, CERN/ISRC/80-11.
2. Status report from the ISR Coordinator.
3. Status report of Experiment R 807 presented in the Open Session (Spokesman invited).
4. Discussion of Proposal P 105 presented in the Open Session, CERN/ISRC/80-13/P 105.
5. Discussion of Proposal P 106 presented in the Open Session, CERN/ISRC/80-14/P 106.
6. Methods of selection of experiments on CERN Accelerators, CERN/SPC/458/Rev.
7. Recently received documents:
 - Memorandum, Status of Experiment R 210 and Request for Installation of Electronic Equipment in the I2 Counting Room from June 1980, from the CERN-MIT-Napoli-Pisa-Stonybrook Collaboration, CERN/ISRC/80-12.
 - Memorandum, Physics with pp Collisions in Experiment R 608, from P. Schlein, Spokesman R 608, CERN/ISRC/80-17.
8. Other business.

K.M. Potter
