

European Coordination for Accelerator Research and Development

PUBLICATION

EuCARD WP4 Accelerator Networks

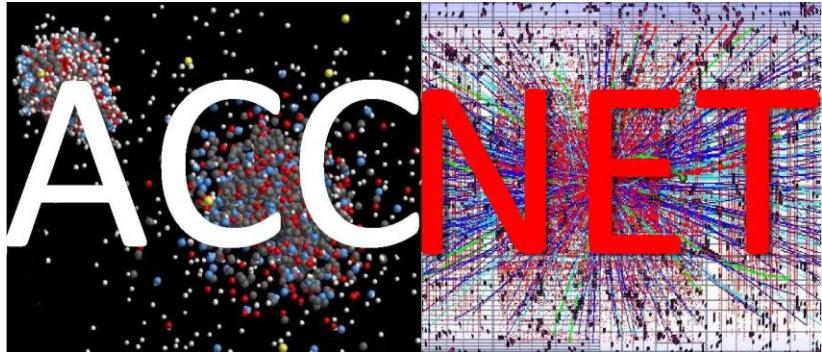

Zimmermann, F (CERN) *et al*

28 October 2010

The research leading to these results has received funding from the European Commission under the FP7 Research Infrastructures project EuCARD, grant agreement no. 227579.

This work is part of EuCARD Work Package 4: **AccNet: Accelerator Science Networks**.

The electronic version of this EuCARD Publication is available via the EuCARD web site
<<http://cern.ch/eucard>> or on the CERN Document Server at the following URL :
<<http://cdsweb.cern.ch/record/1302996>>

EuCARD WP4 - Accelerator Networks

coordinated by

Ralph Assmann, Jean-Marie De Conto, Mariusz Grecki,
Jens Osterhoff, Walter Scandale, Peter Spiller, Ezio
Todesco, Wolfgang Weingarten, and Frank Zimmermann

6th EuCARD Steering Committee Meeting
Malta, 12 October 2010

outline

- WP structure & changes
- workshops
- publications & talks
- achievements
- milestones
- deliverables
- issues
- use of resources

ACCNET

Accelerator Science Networks

Coordination & Management

coordinated by

Walter Scandale, IN2P3 ; Peter Spiller, GSI ;

Frank Zimmermann, CERN

April 2010 changes:
Alessandro Variola
resigns; Walter
Scandale changes
affiliation to IN2P3-
CNRS, new coordinator
Peter Spiller joins

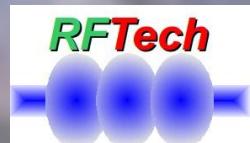

EUROLUMI

*accelerators & colliders
performance*

coordinated by

Frank Zimmermann, CERN
Ezio Todesco, CERN

RFTECH

sc & nc rf technologies

coordinated by

Jean-Marie de Conto, UJF
Mariusz Grecki, DESY
Wolfgang Weingarten, CERN

Accelerator Science Networks

PWAN - Plasma Wakefield Acceleration Netw.

coordinated by

Ralph Assmann, CERN ;

Jens Osterhoff, DESY

MAN? – Medical Accelerator Network

coordinated by

Jean-Pierre Koutchouk, CERN

AccNet Coordinators

EuroLumi

11.-12.03.2010 Workshop on Proton Driven Plasma Wake Field Acceleration at CERN

- plan, layout, simulations for first demonstration experiment w. SPS or PS proton beam

Channeling conference in Ferrara, October 2010; co-sponsored

AccNet EuroLumi First Workshop on a Higher-Energy LHC (HE-LHC'10), Malta, October 2010

- 20-T magnets
- beam dynamics (synchrotron radiation, beam-beam, IBS)
- injector upgrade

Crystal Collimation workshop, CERN, 25-26 October 2010

- results and plans of UA9; SPS crystal collimation experiments

4th AccNet-EuroLumi Workshop on LHC Crab Cavities, LHC-CC10, CERN, December 2010

- strategy for LHC crab cavities, cavity designs
- crab-cavity test in the SPS, LHC machine protection

RFTech

MIXDES 2010 (MIXed DESign of integrated circuits and systems) conference in Wroclaw (Poland), June 2010; co-sponsored

- “xTCA” part organized by Dr Makowski (Lodz University) and by Dr Simrock (ITER)
- development of instrumentation applied in High Energy Physics. Aims: high reliability, availability and serviceability. Several standards (MTCA, ATCA or AMC) under development, using high-speed serial interfaces. xTCA objective: simplify application of MTCA and ATCA hardware in high energy physics applications.

French “Grand Emprunt”: Thanks to RFTech and after fruitful exchanges with CERN, proposals for EQUIPEX label (“EQuipement d’EXcellence”) and LABEX label (“LABoratoire d’EXcellence”) on crab-cavity development. The submission of the EQUIPEX done in September. LABEX document is under preparation (to be completed by end of October).

Next RFTech workshop will be held at PSI Villigen (Switzerland) on 2-3 December.

- preliminary scientific program focuses on RF cavity and coupler design (crab cavity design, SC/NC cavity development, power couplers), Superconducting RF (RF control, piezo control of detuning, infrastructures), Low-level and high-power RF systems (new electronics for LLRF, klystrons, solid state amplifiers), costing tools and reliability

PWAN – *Plasma Wakefield Acceleration*

Coordinator Ralph Assmann, deputy Jens Osterhoff

web site established 29.09.2010:

<https://espace.cern.ch/pwfa-network>

Scientific Steering Board, Network Coordination

generation and acceleration of GeV-class e-/e+ beams

- 1) **comparison of different methods** to drive plasma wakefields
- 2) **description of required R&D** for verifying various technologies
- 3) **roadmap towards a possible PWFA test facility with first test applications** (medical, synchrotron, ultra-fast science).
- 4) **roadmap towards high energy physics applications**
- 5) **coordination of European expertise** towards test facilities

MAN? – *Medical Accelerators*

triggered by discussions with U. Amaldi and by AccNet co-sponsored *Physics for Health* conference

status (October 2010)

“For the network on medical accelerators, a description of the goals and deliverables was prepared and is in discussion with the coordinator of the EU-sponsored medical network to ensure complementarity and avoidance of duplications.”

Jean-Pierre Koutchouk

News

Jun 28th, 2010: MIXDES 2010 Organising Committee would like to thank all the participants for attending the conference. In a few days the photos taken during the Conference will be available in [Photo gallery](#). The participants' photos taken during the conference are welcome to be published on the conference website.

The Conference

The MIXDES conference series started in Debe near Warsaw in 1994 and has been organized yearly in different Polish cities. This year we would like to continue the tradition of inviting you to the most attractive places in Poland and the will take place in Gliwice.
The aim of the MIXDES conference is to provide an annual Central-European forum for the presentation and discussion of recent advances in design, modeling, simulation, testing and manufacturing in various areas such as micro- and nanoelectronics, semiconductors, sensors, actuators and power devices.

The MIXDES conference papers are indexed in Thomson Reuters [Conference Proceedings Citation Index](#) and available in [IEEE Xplore](#) since MIXDES 2005.

The topics of the MIXDES 2011 Conference include:

1. Design of Integrated Circuits and Microsystems

Design methodologies. Digital and analog synthesis. Hardware-software codesign. Reconfigurable hardware. Hardware description languages. Intellectual property-based design. Design reuse.

2. Thermal Issues in Microelectronics

Thermal and electro-thermal modelling, simulation methods and tools. Thermal mapping. Thermal protection circuits.

3. Analysis and Modelling of ICs and Microsystems

Simulation methods and algorithms. Behavioural modelling with VHDL-AMS and other advanced modelling languages. Microsystems modelling. Model reduction. Parameter identification.

4. Microelectronics Technology and Packaging

New microelectronic technologies. Packaging. Sensors and actuators.

5. Testing and Reliability

Design for testability and manufacturability. Measurement instruments and techniques.

6. Power Electronics

Design, manufacturing, and simulation of power semiconductor devices. Hybrid and monolithic Smart Power circuits. Power integration.

7. Signal Processing

Digital and analogue filters, telecommunication circuits. Neural networks. Artificial intelligence. Fuzzy logic. Low voltage and low power solutions.

8. Embedded Systems

Design, verification and applications.

9. Medical Applications

Medical and biotechnology applications. Thermography in medicine.

10. Student Projects

AccNet-CINVESTAV collaboration: electron cloud (H. Maury)

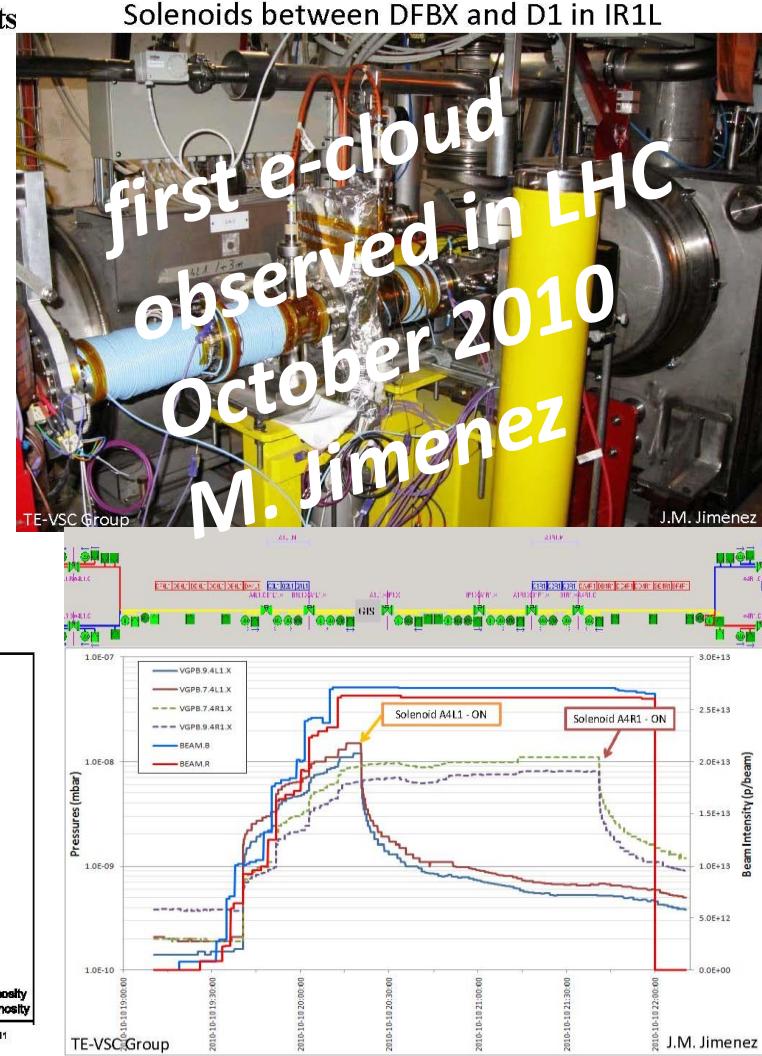

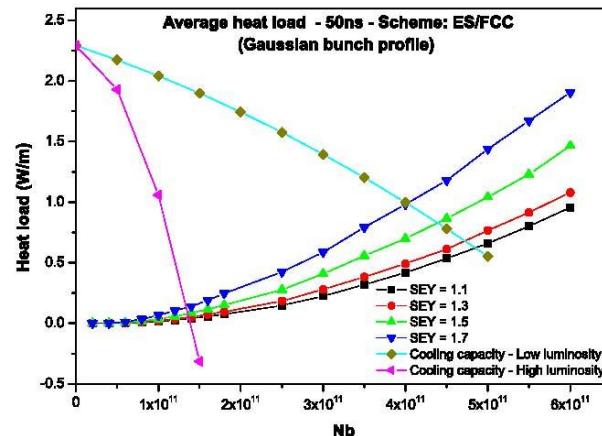

Simulations of Electron-Cloud Heat Load for the Cold Arcs of the LHC and Its High-Luminosity Upgrade Scenarios

Humberto Maury Cuna and Jesus Guillermo Contreras Nuño

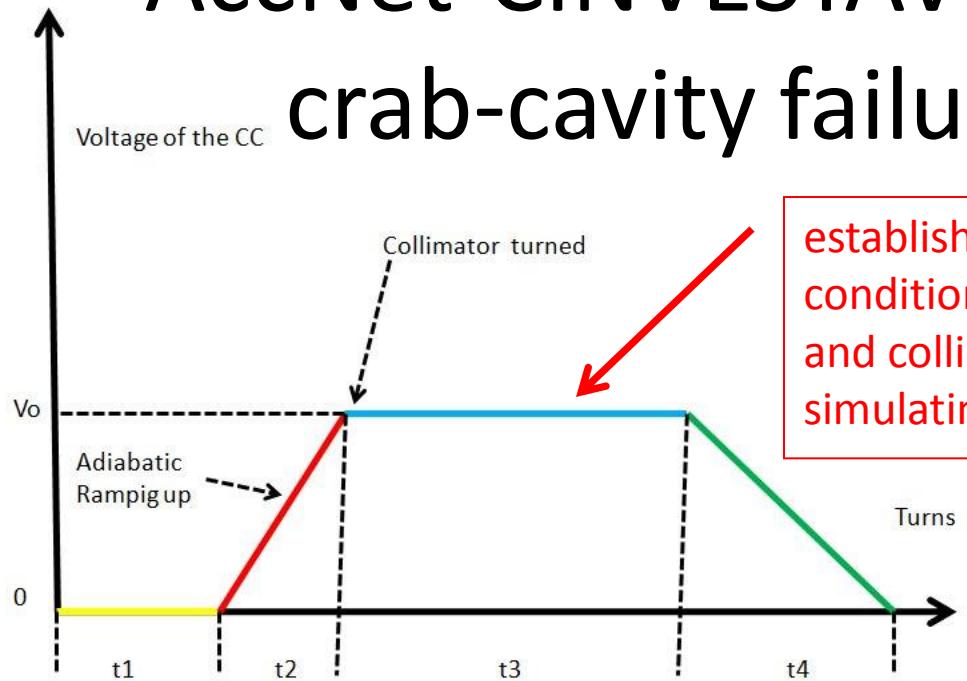

*Departamento de Física Aplicada, CINVESTAV-IPN,
Unidad Mérida, A.P. 73 Cordemex, 97310 Mérida, Yucatán, México*

paper in preparation
 Frank Zimmermann
CERN, BE Department, 1211 Genève 23, Switzerland
 (Dated: September 15, 2010)

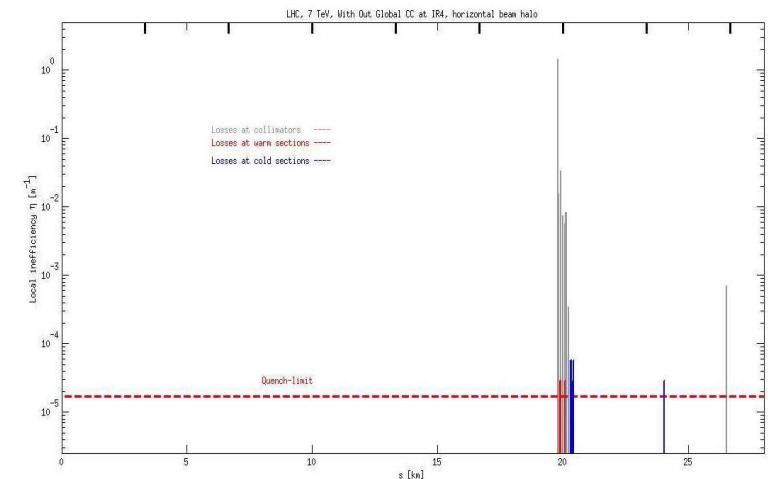

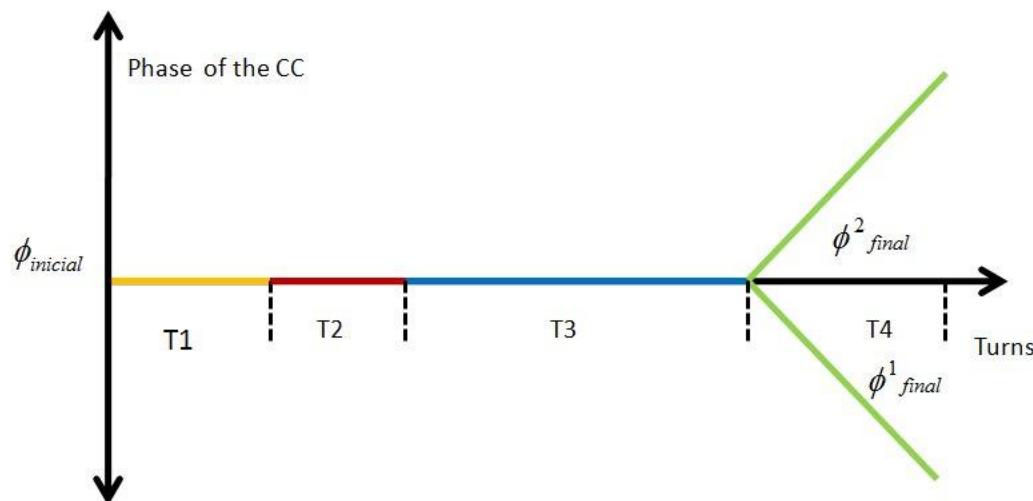

The heat load generated by an electron cloud in the cold arcs of the Large Hadron Collider (LHC) is a concern for operation near and beyond nominal beam current. We report the results of simulation studies, with updated secondary-emission models, which examine the severity of the electron heat load over a range of possible operation parameters, both for the nominal LHC and for various luminosity-upgrade scenarios, such as the so-called full crab crossing and early separation schemes, the large Piwinski angle scheme and a variant of the latter, providing compatibility with the (upgraded) LHCb experiment. The variable parameters considered are the maximum secondary emission yield, the number of particles per bunch, and the spacing between bunches. In addition, the dependence of the heat load on the bunch length and on the longitudinal bunch profile is investigated.

AccNet-CINVESTAV collaboration: crab-cavity failures (B. Yee)

establish “steady-state” conditions with crab cavity and collimator before simulating a crab-cavity failure

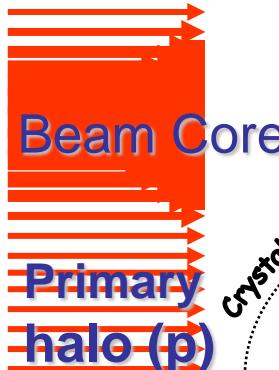

Local loss map for nominal LHC (top energy, $\beta^*(\text{IP5}) = 0.55$) with one GCC and horizontal beam halo, when the phase of the CC is changed by 50° in 1 turn.

UA9 crystal-collimation result in 2010 (w. Scandale)

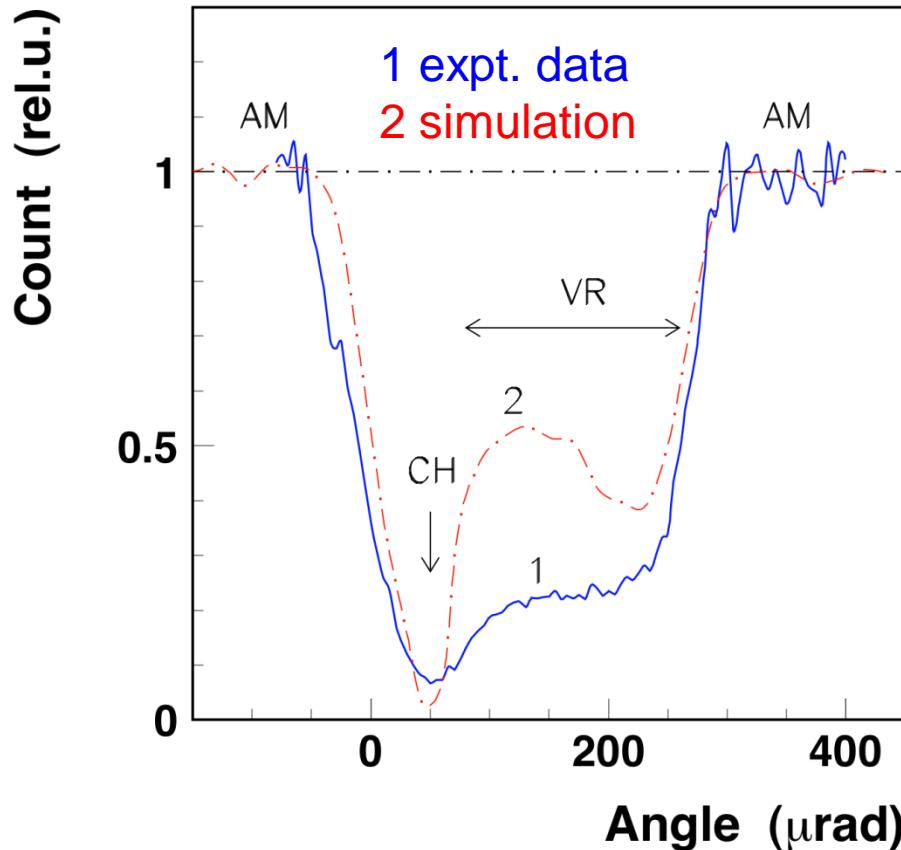

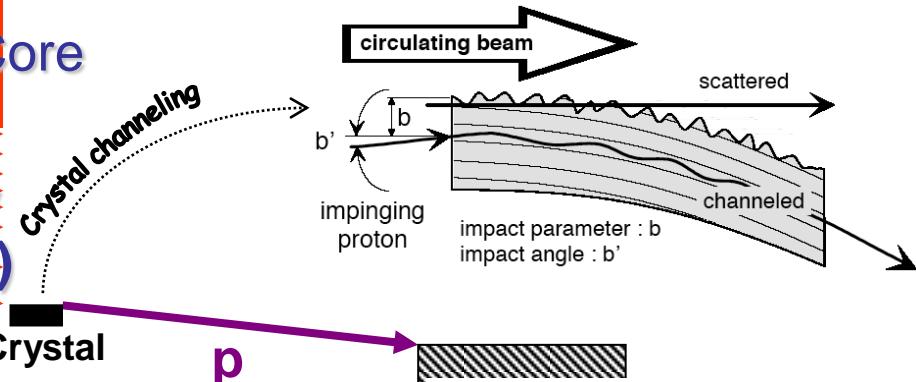

Angular scan of crystal 3

Crystal

- ◆ with a small residual torsion
- ◆ mounted on the IHEP high quality goniometer

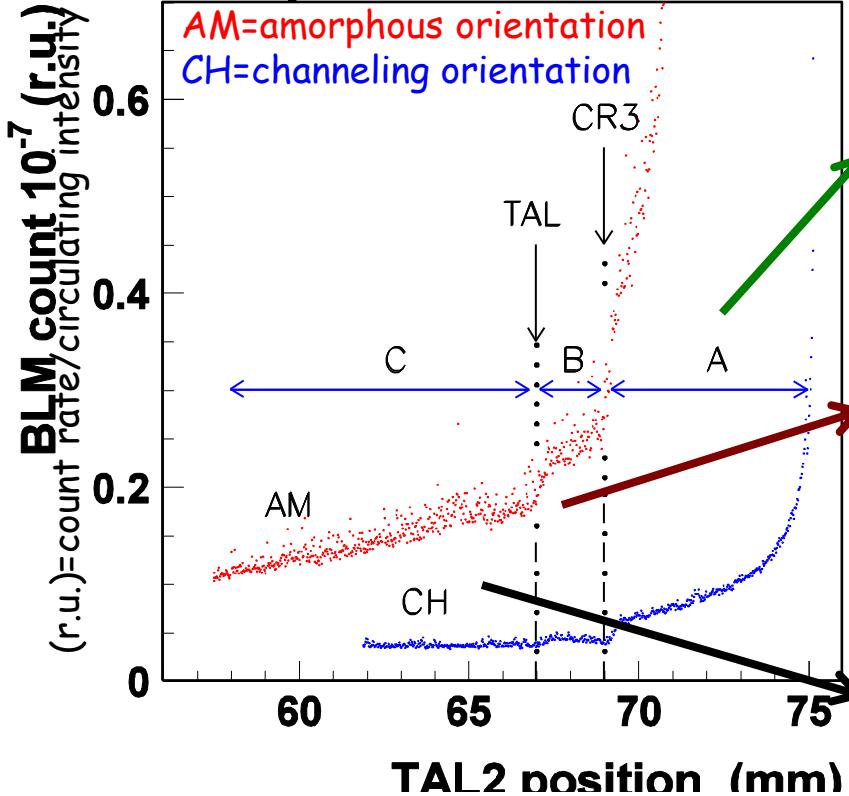

E. Tsyganov & A. Taratin (1991)

- ◆ Loss reduction in channeling mode ($\times 16$)
 - ◆ larger than in MonteCarlo simulation ($\times 33$)
 - ◆ larger than in crystal 1 ($\times 5$)
- ◆ Small variations of the deflection angle in different scans [better control of the alignment errors]

UA9 crystal-collimation result in 2010 (W. Scandale)

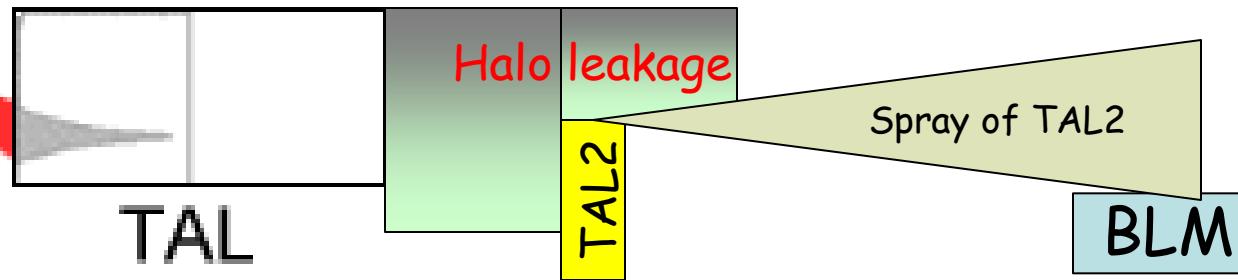

Collimation leakage in dispersive area

- ◆ A) tail of the circulating beam
 - fast depletion in channeling mode
 - linear descent of the population in amorphous orientation (or with the tungsten scatterer)
- ◆ B) multiple Coulomb scattering area
 - fast depletion by high probability of prompt channeling at the first crystal hit
 - slow depletion due to multi-turn hits of the amorphous primary (very slow extraction)
- ◆ C) shadow of the absorber
 - low population due to low probability of nuclear interaction in channeling mode
 - off-momentum halo due to diffractive hits with the amorphous primary and TAL

Beam

BC

AccNet milestones

M.4.1.1

- Second **general AccNet Steering meeting**, RAL, UK, 13 April 2010

M4.2.1:

- many **topical mini-workshops** have been organized and supported
- **first major EuroLumi workshop is HE-LHC'10 in Oct. 2010**
- another EuroLumi workshop is **LHC-CC10 in Dec. 2010**

M4.3.1:

- Annual **RFTECH workshop was held at DESY, 29 March 2010**
- **Next RFTech workshop at PSI, 2-3 December 2010**

2nd general AccNet Steering meeting, RAL, 13 April 2010

first major EuroLumi workshop:

**HE-LHC'10
in Oct. 2010**

**55
participants**

EuCARD-AccNet mini-workshop on a higher-energy LHC "HE-LHC'10" - 14-16 October '10

Scope:

This mini-workshop will take a first look at a higher-energy LHC (HE-LHC) with about 16.5 TeV beam energy and 20-T dipole magnets, in particular at parameters, luminosity optimization, operation mode, beam dynamics, injector, magnets (for arcs, insertions and injector), cryogenics, collimation, and vacuum system.

Composition of the programme committee:

Oliver Bruning (CERN), Antoine Dael (CEA), Gijs de Rijk (CERN), Steve Gourlay (BNL), Jean-Pierre Koutchouk (CERN), Steve Myers (CERN, **Chair**), Eric Prebys (FNAL & US-LARP), Peter Spiller (GSI), Lucio Rossi (CERN), Nicholas Sammut (U Malta), Walter Scandale (IN2P3), Vladimir Shiltsev (FNAL), Ezio Todesco (CERN), Akira Yamamoto (KEK), Frank Zimmermann (CERN).

General goals:

- Investigate critical questions for HE-LHC and propose solutions or follow-up
- Document the HE-LHC concepts for future reference
- initiate collaborative work around HELHC challenges amongst CERN, EuCARD partners, US, and KEK
- Generate and/or identify synergies with FAIR and past VLHC studies

Workshop secretariat & travel organization: Merethe Morer-Olafsen

Written **proceedings** edited by Ezio Todesco and Frank Zimmermann, contributions by 31. December 2010

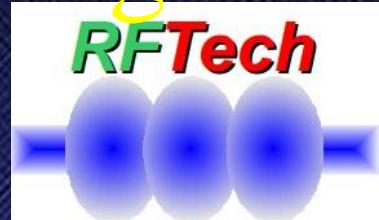

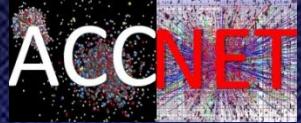

Place and date:

Malta, Villa Bighi, Headquarters of the Malta Council for Science and Technology, 14-16 October 2010

First Annual RFTech Meeting

DESY, 29 March 2010

<https://indico.desy.de/conferenceDisplay.py?confId=2831>

17 participants (DESY, CERN, TUD, UROS, ASTeC, LPSC, UJF, ESS, U London, TUL, UG, SINS) organized by M. Grecki, J.-M. De Conto, W. Weingarten & DESY

Spiral-2 couplers, SPL simulations & measurements,
FLASH full beam loading, LHC LLRF, xTCA, high
reliability digital system, HIE ISOLDE cavity & test
cryostat, TUD SRF test stand, LHC crab cavities, RF
costing tools, SRF test & R&D infrastructure

AccNet deliverables

Deliverables of tasks	Description/title	Nature	Delivery month	Status
4.1.1	Continually updated AccNet web site	O	M2	DONE, OK
4.1.2	AccNet Strategy for future proton & electron facilities in Europe	R	M48	on track
4.2.1	Continually updated EuroLumi web site	O	M2	DONE, OK
4.2.2	EuroLumi Strategy and issues for LHC IR, LHC injector and beam-parameter upgrade path(s), with comment on longer-term prospects, and for FAIR	R	M48	on track
4.3.1	Continually updated RFTECH web site	O	M2	DONE, OK
4.3.2	strategy/result for SRF test infrastructures	R	M24	on track?
4.3.3	RFTECH strategy/result for cavity design, LLRF & HPRF systems and design integration, and costing tools	R	M48	on track

AccNet issues - 1

- *inclusion of AccNet papers & talks in EuCARD database* (secretarial support!?, access rights, duplication, simplicity) automatic email approval? (never!), 17 entries??, WP4 in CDS

- 1. **First Beam Spectra of SC Third Harmonic Cavity at FLASH / Zhang_P** (The University of Manchester; The Cockcroft Institute of Accelerator Science and Technology; DESY) ; **Baboi_N** (DESY) ; **Elisgen_T** (Universität Rostock) ; **Glock_HW** (Universität Rostock) ; **Jones_R M** (The University of Manchester; The Cockcroft Institute of Accelerator Science and Technology) ; **Lorbeek_B** (DESY) ; **Rienens_U V** (Universität Rostock) ; **Shinton_I R R** (The University of Manchester; The Cockcroft Institute of Accelerator Science and Technology)
WP: 10: SC RF technology for higher intensity proton accelerators and higher energy electron linacs
Task: 10.5: HOM Distribution

Third harmonic superconducting cavities have been designed and fabricated by FNAL to minimise the energy spread along bunches in the ELSA facility at DESY [1].

EuCARD-CON-2010-026 - 2010

- 2. A sensitivity analysis for the stabilization of the CLIC main beam quadrupoles /
Janssens_S (CERN) ; Collette_C (CERN) ; Artoos_K (CERN) ; Fernandez_Carmona_P (CERN) ;
Hauviller_C (CERN)
WP: 9: Technology for normal conducting higher energy linear accelerators
Task: 9.3: Linac & FF Stabilization

In particle colliders (like the LHC), particles are highly accelerated in a circular beam pipe before the collision. [...]

EyCARD-CON-2010-025 - 2010.

[Detailed record](#) - [Similar records](#)

- 3. **CLIC quadrupole stabilization and nano-positioning** / Collette, C (CERN) ; Janssens, S (CERN) ; Artoos, K (CERN) ; Fernandez Carmona, P (CERN) ; Guinchard, M (CERN) ; Hauviller, C (CERN)

many WP4 documents which WP coordinator was/is not aware of, and which have not been listed on WP4 web site

approval & qualification?

13. **Electronic system of the RPC Muon Trigger in CMS experiment at LHC accelerator (Elektroniczny system trygера mionowego RPC w eksperymencie CMS akceleratora LHC)** / [Bialkowska, H](#) (Institute of Nuclear Problems, Swierk) ; [Bluj, M](#) (Institute of Nuclear Problems, Swierk) ; [Bunkowski, K](#) (Warsaw U.) ; [Czyrkowski, H](#) (Warsaw U.) ; [Cwiok, M](#) (Warsaw U.) ; [Dominik, W](#) (Warsaw U.) ; [Doroba, K](#) (Warsaw U.) ; [Fruboes, T](#) (Institute of Nuclear Problems, Swierk) ; [Gokiele, R](#) (Institute of Nuclear Problems, Swierk) ; [Gorski, M](#) (Institute of Nuclear Problems, Swierk) et al.
WP: 4: AccNet: Accelerator Science Networks
Task: 4.3: RFTech
- This paper presents implementation of distributed, multichannel electronic measurement system for RPC - based Muon Trigger in the CMS experiment at LHC [...]
EuCARD-PUB-2009-016. - 2009.
[Access to fulltext document](#)
[Detailed record](#) - [Similar records](#)
14. **Stanowisko testowe z miedzianą strukturą typu TESLA (Test stand with copper TESLA structure)** / [Glowka, J](#) (Warsaw University of Technology) ; [Macias, M](#) (Warsaw University of Technology) ; [Czuba, K](#) (Warsaw University of technology) ; [Pozniak, K](#) (Warsaw University of technology) ; [Romaniuk, Ryszard](#) (Warsaw U. of Tech.)
WP: 4: AccNet: Accelerator Science Networks
Task: 4.3: RFTech
- The paper presents preparation of a copper TESLA structure for the use in laboratory test stand. [...]
EuCARD-PUB-2009-015. - 2009.
[Access to fulltext document](#)
[Detailed record](#) - [Similar records](#)
15. **Development of laser technology in Poland** / [Gajda, J](#) (West Pomeranian University of Technology, Szczecin) ; [Romaniuk, Ryszard](#) (Warsaw U. of Tech.)
WP: 4: AccNet: Accelerator Science Networks
Task: 4.1: AccNet Coordination & Communication
- The paper presents chosen development threads of laser technology and associated branches of optoelectronics in this country [...]
EuCARD-PUB-2009-014. - 2009.
[Access to fulltext document](#)
[Detailed record](#) - [Similar records](#)
16. **Photonics and Web Engineering: WILGA 2009** / [Romaniuk, Ryszard](#) (Warsaw U. of Tech.)
WP: 4: AccNet: Accelerator Science Networks
Task: 4.1: AccNet Coordination & Communication
- The paper is a digest of work presented during a cyclic Ph.D [...]
EuCARD-PUB-2009-013. - 2009.

R. Calaga, [LHC Crab Cavities](#), AccNet Highlight Talk at First Annual EuCARD Meeting, RAL, UK, 14 April 2010

F. Zimmermann, [Report from EuCARD WP4 - Accelerator Networks](#), First Annual EuCARD Meeting, RAL, UK, 14 April 2010

AccNet issues – cont'd

- *inclusion of AccNet papers & talks in EuCARD database* (secretarial support!?, access rights, duplication, simplicity) automatic email approval? (never!), 17 entries??, WP4 in CDS
- *web site editorial access* for WP coordinator?! server changes have hindered updates
- *relation between AccNet and new HL-LHC project?*
- *support for AccNet web site* after the step-down of A. Variola and retirement of B. Mouton
- *launch of network on medical accelerators?*
- *budgets for PWAN and MAN*

use of resources

most/all AccNet mini-workshops have
moderate expenses (<10 kCHF)

collaborators cover part of the costs

management with a lot of enthusiasm
devotes extra time

AccNet success indicators

excellent attendance to AccNet workshops
from many European labs, universities, US laboratories,
Japan, international organizations

impact:

- on most relevant topics
- initiated crab-cavity program for LHC
- novel anti e-cloud coating techniques
- push for higher-energy LHC

high cost efficiency

exchange of 13 expert visitors

two theses, 6 conf. papers, 2 journal articles

AccNet conclusions

AccNet had an excellent start

EuroLumi gives input to LHC upgrade

Crab Cavity Advisory Board,
endorsement of LHC crab cavities,
task force preparing SPS crab-cavity tests,
“LPA” scenario, novel e-cloud mitigation techniques,
revisions of LHC upgrade plans, energy upgrade

RFTech organizes RF community

AccNet is breaking new grounds

medical accelerators
plasma acceleration, crystal collimation

Ambitious programme

Appendix
