

CERN/TC/GEN 63-1
21.3.1963

Harry Bingham will give an informal talk next Monday (25th March) at 11 a.m. in the T.C. Conference Room. He will report on results he saw or heard about during his recent visit to the U.S.A.

We hope this will be the first of a regular series of meetings at which members of the division will present status reports on their experiments and confront their views on the trend of physics in general and in the division in particular. Please come prepared with ideas and suggestions about future meetings.

R. Armenteros
