

DECISIONS TAKEN AT THE MEETING HELD ON 17.5.72
CONCERNING TV STATIONS IN THE PSB INJECTION LINE

Present : C. Bovet, H. Haseroth, F. James, H. Koziol, G. Nassibian,
K.H. Reich, C. Rufer, T.R. Sherwood.

1. TI-TV 5

Action Temporarily this station will be installed horizontally (provided it
Arnaud operates in that position) in place of IU6. For the cable installation
Cheretakis point 2 should be kept in mind.

Haseroth As soon as possible (after 1 month of use on present thinking) it will
Robert be decided whether a TV station is wanted permanently in this position.

2. TV station just upstream of ISV

Rufer This station would mainly serve for a quick check on the correct working
on the upstream injection line elements by the MCR operators. A design
study will be made with the assumption that one wants to have a spare screen
and to modify the existing vacuum tube.

K.H. Reich
