In our proposal we inadvertently neglected to supply some of the information requested by the committee in the letter of 20th February.

Our spokesman is J. Steinberger.

The present plan for contributions of the four laboratories are:

- (1) Saclay : Drift chambers and associated electronics
- (2) Dortmund : Part of hadron shower detector and its electronics
- (3) Heidelberg : Part of hadron shower detector and its electronics, on-line computer
- (4) CERN : Iron core magnets, part of hadron shower detector and its electronics, installation

We expect the group to be composed eventually of ~ 30 persons: Saclay ~ 12, Heidelberg ~ 7, Dortmund ~ 5 and CERN ~ 6.
