20. Trump Dictator

In a recent interview, Donald Trump said that if reelected, he would be a "dictator" on "Day One" of his second term because "we're closing the border, and we're drilling, drilling, drilling" — but "after that, I'm not a dictator." Do you approve or disapprove of Trump's plan, as he describes it, to be a dictator on Day One but not after?

26. Trump Absolute Immunity

Trump's lawyers have argued that the federal charges against him for trying to overturn the 2020 election should be dismissed because he has "absolute immunity" from federal prosecution for crimes committed while in office. Do you agree or disagree that all former presidents are immune from federal prosecution for crimes committed while in office?

52. Should Texas Abortion Have Been Allowed

Texas now bans abortions after six weeks except when the mother's health is seriously threatened. Recently, a mother of two who was 20 weeks pregnant left Texas to have an abortion after the state courts ruled she could not have an abortion there even though her fetus had a fatal condition and her doctor said she could risk her future fertility if she carried the pregnancy to term. Do you think the woman in Texas should or should not have been allowed to receive an abortion in the state?

Sample 1,533 U.S. Adults
 Conducted December 14 – 18, 2023
 Margin of Error ±2.8%

Polling Methodology and Margin of Error Calculation

The Yahoo! News survey was conducted by YouGov using a nationally representative sample of 1,533 U.S. adults interviewed online between December 14 – 18, 2023.

The sample was weighted according to gender, age, race, education, 2020 election turnout and Presidential vote, baseline party identification, and current voter registration status. Demographic weighting targets come from the 2019 American Community Survey. Baseline party identification is the respondent’s most recent answer given prior to November 1, 2022, and is weighted to the estimated distribution at that time (33% Democratic, 27% Republican). Respondents were selected from YouGov’s opt-in panel to be representative of all U.S. adults. The weights range from 0.2 to 3.8, with a mean of 1 and a standard deviation of 0.5.

The *margin of error* (a 95% confidence interval) for a sample percentage p based upon the entire sample is approximately 2.8%. It is calculated using the formula

$$\hat{p} \pm 100 \times \sqrt{\frac{1 + CV^2}{n}}$$

where CV is the coefficient of variation of the sample weights and n is the sample size used to compute the proportion. This is a measure of sampling error (the average of all estimates obtained using the same sample selection and weighting procedures repeatedly). The sample estimate should differ from its expected value by less than margin of error in 95 percent of all samples. It does not reflect non-sampling errors, including potential selection bias in panel participation or in response to a particular survey.
