Network FAQ	**Intel 300 to 600 Series**

Q: Which CNVi WiFi modules are compatible with my motherboard?

A: If you would like to install a CNVi WiFi Module, please refer to the following table for supported generation between chipset and WiFi module.

Intel Chipset	Supported CNVi System Interface Type
Intel 300 series/ **Intel Gemini Lake series**	M.2: CNVio
Intel 400 series	M.2: CNVio and CNVio2*
Intel 500 series	*Support up to Intel AX201, Intel AX211 is not supported
Intel 600 series	M.2: CNVio and CNVio2

Be note, each motherboard will have different supports WiFi type, please go to spec to check the support information before installing the WiFi module.

To check the "System Interface Type" of your WiFi module, please visit Intel® ARK for further information.

Example:

CNVio - Intel® Wireless-AC 9560

CNVio2 – Intel® Wi-Fi 6 AX201
