Intel employees donate over €68,000 to Cycle Against Suicide and Ronald McDonald House Charities

(<https://newsroom.intel.ie/news-releases/intel-employees-donate-over-e68000-to-cycle-against-suicide-and-ronald-mcdonald-house-charities/>)

Leading women in tech are honoured at Intel Women's Achievement Awards

The Intel Women's Achievement Awards are being celebrated to coincide with [International Women in Engineering Day](http://www.inwed.org.uk/) (<http://www.inwed.org.uk/>), which is marked each year on June 23rd. The day is part of an international awareness campaign to raise the profile of women in engineering and focus attention on the amazing career opportunities available to women and girls in this exciting industry.

Engineers play a vital role in the Intel workforce, operating at the heart of our cutting edge manufacturing and design activities around the world, and we are proud to celebrate our many female engineers on International Women in Engineering Day.

For the past number of years Intel Ireland has recognised and acknowledged outstanding women at Intel through the presentation of the Women's Achievement Awards.

(<https://newsroom.intel.ie/wp-content/uploads/sites/26/2021/06/Collage-2-2021.jpg>)

17 women were recognised in the 2020 / 2021 Intel Women's Achievement awards

The presentation of the 2020 Intel Women's Achievement awards were unfortunately delayed due to the COVID pandemic, but, we recently had the opportunity to celebrate last year's winners along with the 2021 recipients, with a total of 17 women being recognised.

Women's Achievement awards are as follows;

leadership in her role as a Planar Process Engineer, working on projects across the Intel Virtual Factory and driving

ology

effect Metrology team at Intel where she has worked for 4 years. Laura is a key contributor to the team and was a unique tracer report for her area of production.

prise (FCE)

Sarah, who recently completed a Master's Degree in Industrial Engineering, is a key install expert who consistently displays strong role model behaviours in collaboration with her peers across the globe.

Lorraine Powell – Corporate Quality Network (CQN)

During 2019 Lorraine took responsibility for developing the data analysis solution for Intel's Customer Field Failure Rate (FFR) program which provided a strong feedback loop to drive her team's decision making process.

Patrizia Odierna – Manufacturing and Product Engineering (MPE)

Patrizia is the product owner for a team working on a key aspect of one of Intel's latest processor technologies, coordinating activities to ensure that the technology content is robust and ready for customer milestones. Patrizia also gives generously of her time to encourage the next generations to the field of STEM, leading the MPE Women in Technology scholarship program since 2016.

Kate Mulhall – Intel Shannon

Kate executed a Cloud Native strategy that enabled consumption of Intel's Xeon and Accelerator capabilities by our Telecommunications customers and ecosystem partners in a Containerized environment.

Morven Duffy – Fab 24, Metals

With over 20 years of experience, Morven drives the improvement roadmap for her toolset. A recognised expert within the Intel Virtual Factory, she solves problems with long-term fixes and also supports the training of all new engineers on the essential systems.

Denise Charles – Fab 24, Defect Metrology

Since joining Intel 10 years ago, Denise has become a senior technical leader in Defect Metrology. She uses her expertise to solve multiple challenging technical problems, increasing defect detection and improving product yield.

Riona Lynch – Fab Construction Enterprise (FCE)

In addition to her core work as a Senior FCE Project Manager with responsibility for ongoing construction projects, Riona has used her expertise and strong leadership skills to develop a Construction Internship and Women in Construction (WIC) Scholarship program.

Jacintha Cornally – GSC / Ireland Fab Materials

Jacintha has led the Ireland Fab Materials' quality strategy for 4 years, driving gains in quality systems, processes and culture. Jacintha also leads the Global Fab Materials Quality Strategy team.

Ciara Power – Intel Shannon

Ciara recently joined Intel and is already a respected contributor and member of the team. She delivered a very complex feature into the software stack on which she was working, collaborating with engineers within and outside Intel.

Amy Fitton – Programmable Solutions Group, Cork

Amy is the Programmable Solutions Group Worldwide Customer Operations person for one of Intel's key customers. She role model's alignment to our cultural attributes and is an advocate for 'One Intel'.

Joanne Rousseau – Fab 24, Diffusion

Joanne was the lead Diffusion IQ Engineer for the capacity expansion project of Intel's Fab 10, executing flawlessly to deliver the project on schedule. Joanne supports the Intel STEM program by delivering talks to second level students, sharing with them her own experiences and path to engineering.

Jennifer McKenna – Fab 24, Silicon Research

Jennifer is a Researcher-in-Residence at DCU, working on a research project relating to Block Co-Polymer selective materials deposition. In addition to her research work, Jennifer plays a key role in promoting STEM education and careers within the Connecting Women in Technology (CWIT) organisation.

Marina Lucey – Environmental Health and Safety

Marina is a key safety leader and influencer, demonstrating outstanding support for the Fab, driving multiple safety initiatives, ensuring the delivery of material and activities to drive continuous improvements and implementing metrics to measure progress.

Sarah Frawley – Movidius

Sarah is manager of the Movidius VPU IP Design Automation team. Sarah also supports multiple functional areas including Architecture, RTL Design, Validation, Design for Team, Emulation, Physical layout design, Pre silicon software and Tools.

Aimee Morrissey – Programmable Solutions Group, Cork

Aimee leads the Programmable Solutions Group (PSG) Sales Finance team – a group of analysts around the globe responsible for managing customer deals, forecasts and driving revenue growth.

About Intel

Intel (Nasdaq: INTC) is an industry leader, creating world-changing technology that enables global progress and enriches lives. Inspired by Moore's Law, we continuously work to advance the design and manufacturing of semiconductors to help address our customers' greatest challenges. By embedding intelligence in the cloud, network, edge and every kind of computing device, we unleash the potential of data to transform business and society for the better. To learn more about Intel's innovations, go to newsroom.intel.com (<https://newsroom.intel.com>) and [intel.com](https://www.intel.com) (<https://www.intel.com>).
