Advanced View Arduino Projects List

List of Projects using arduino with advance view:

1. **Diy Xbox wireless controller adapter for Pc** This instructable will go over the steps to connect a RF module from an RROD xbox to your computer so you a wireless controller with your computer. ******DISCLAIMER******* DONT TRY THIS IF YOU DONT HAVE ANY EXPERIENCE WITH ELECTRONICS/SOLDER COMPUTERS IM NOT...... Listed under: How To – DIY – Projects, Internet – Ethernet – LAN Projects

2. **Make a digital "meow" from analog clock using arduino** Is your analog clock just not doing enough stuff? Want to do digital things with an analog clock? T tutorial will show you how to make a Kit Cat Clock play a "meow" sound clip, at precise time intervals, using the Atmega 328P-PU via the...... Listed under Timer Projects, Home Automation Projects

3. **DIY Telepresence Documentation** This is the documentation page for the Spring 2012 DIY Telepresence project. Here you will find schematics, software, guides for the robot. The goal of the project was to design a low-cost, easy to build telepresence robot. Some of the features include: Segway based...... L under: Robotics – Automation Projects

4. **Total Recall- Arduino Simon Says on steroids** Total Recall is a Simon based game for the Arduino. Your basic Arduino Simon Game consists of 4 buttons, 4 an Arduino, some code and maybe a speaker and sound effects. Total Recall takes things a step further by adding an LCD display and...... Listed under: G Entertainment Projects, Projects

5. **Voice Activated LED Lighting with Arduino** This project is an extension to the Speech Recognition with Arduino by leandro4b (http://www.instructables.com/id/Speech-Recognition...). However, instead of using 3 separate colored LEDs, I used a multicolor 4-channel RGBW LED En had the opportunity of working at LED Engin last summer, which is why I...... Listed under: LED Projects

6. **The Wondrous Weather Cube** We created an Internet-enabled companion cube for your computer, which displays different kinds of information by glow or green. Depending on its orientation, and which labeled face is oriented upwards, our companion cube displays either stock readings of the NASDAQ o outside temperature...... Listed under: Home Automation Projects

7. **Laser Pointer Switch using arduino** This instructable will detail how to make a switch that uses an arduino to sample light. When the light sample reaches a threshold it w trigger a relay that can be used to turn on/off a small appliance (light, radio, fan, etc...) The parts for...... Listed under: Home Automation Projects, Interfacing(USB – RS232 ISP) Projects

8. **FabECG: a simple electrocardiogram board** Technologies for rudimentary physiological sensing are getting cheaper and easier to implement. Consider, f instance, these non-contact sensors from UCSD which can be used to take an EEG through hair or an ECG through a T-shirt! One can even make a simple oscilloscope to digitize,...... Listed under: Medical – Health based Projects

9. **Arduino controlled Rotary Stewart Platform** This instructable is about building a Rotary Stewart Platform. It allows to position its moving platform in six o of freedom. This specific platform is designed to be able to position a DSLR or any other digital camera. This version of Stewart Platform uses instead..... under: Video – Camera – Imaging Projects

10. **DC motors Relays** Let's get the math over right off the bat. There are a LOT of attempts to describe how Ohm's Law works, each one nerdier than the las one I like. Warning: SFWBN (safe for work but nerdy). V = voltage measured in volts -...... Listed under: Motor Projects

⬆

11. **ATtiny85 POV Display using arduino** The first time I saw a POV (Persistence Of Vision) display was on a show called FAQ on TV. The POV display consisted oscillating shaft with 6 LED's mounted on the end of the shaft. Since then I have always wanted to make...... Listed under: LED Projects
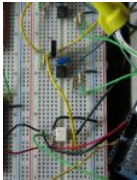

/
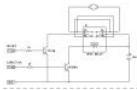

12.

making art interactive Unfortunately, due to my need to reclaim my arduino and breadboards, we don't have photographic documentation of our circuit. However, the structure of it was rather self-evident. Although we arranged the circuit in a such a way that we could program other functions, but we...... under: Interfacing(USB – RS232 – I2c -ISP) Projects, Phone Projects

13.

Control Keyboard & Mouse Android app via Arduino This instructable will show you how to control your computer's keyboard and mouse with an Andro via bluetooth to an Arduino BACKGROUND Ever wanted to control your computer's mouse/keyboard functionality without having to actually sit in front o do all the time....... Listed under: Arduino Android, Internet – Ethernet – LAN Projects, Projects

14.

Augmented Water using arduino The Augmented Water device helps you save water by turning red after one Liter. The device, built by @tamberg during water hackathon, is made from an Arduino, a flow sensor and coloured LED pixels. Video https://www.flickr.com/photos/tamberg/14346321456/ (thanks case you want to build...... Listed under: Home Automation Projects

15.

Blind Maze Navigation using 2-DOF Haptic Joystick The domain of haptics has immense potential as a technology to assist visually-impaired individuals their navigation of the physical world. In this project, we sought to develop a 2-DOF haptic joystick to provide force-feedback to a user as she attempts t navigate a maze...... Listed under: Game – Entertainment Projects

16.

Temperature Displayed on 4 Digit 7 segment using Arduino In this project I'll display the temperature in a 4 digit 7 segment display (common anode). Th you can find so actually the temperature changes pretty easily which makes the display to show always different temperatures. But the idea is to...... List under: Projects, Temperature Measurement Projects

17.

A compact, Arduino altimeter for RC Planes Please vote for this Instructable if you think it deserves it! Thanks! The Ultimate Altimeter is a super-compact Arduino controlled altimeter capable of measuring the altitude with an accuracy of 0.3 meters, and saving the highest and lowest values it has measured powered...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

18.

Wiring Harness for the LCD Panel Assembly of the Female Connector Block The wiring harness has a male and female end. The gender of electrical and mechanical parts is described on this Wikipedia page. The header pins that are soldered into the circuit board for the LCD panel are plugged into...... List under: LCD Projects

19.

Android Accessories Made Easy With Arduino The Android Open Accessory Protocol makes it possible for you to create custom Arduino-based accessori your Android phone or tablet. Attend this session to learn how to get started, the hardware & software required and how Handbag makes developm easier. Content will be useful...... Listed under: Arduino Android, Internet – Ethernet – LAN Projects, Projects

20.

Huge Arduino Animatronic LED Eyeball using arduino I'm currently in the process of making a Halloween contraption that has a few components that ar documenting. The Huge Arduino Animatronic LED Eyeball is one of them. Background Most animatronic eyeball projects that I found were more or less They were usually...... Listed under: LED Projects

21.

Brain-Computer Interface Introduction Our goal was to build a brain-computer interface using an AVR microcontroller. We decided that the least invasive measuring brain waves would be using electroencephalography (EEG) to record microvolt-range potential differences across locations on the user's scal order to accomplish this,...... Listed under: Medical – Health based Projects

22.

Happy Androids with Arduino Video instructions Arduino + Android Normally smartphone events are tightly coupled to your phone device itself. When y phone is ringing, your phone speaker plays a ringtone. When you get a new text message, your phone displays it on its screen. Wouldn't it be thrilling to Listed under: Arduino Android, Internet – Ethernet – LAN Projects, Projects

23.

Hack an old iPod using an Android and an Arduino This tutorial shows you how to use an Arduino to turn that old dusty music player into a Bluetooth co docking station. Even if it has a cracked screen or a dead battery it can still be used. The following instructions will show you how...... Listed under: Ardui Android

24. Finalized Prototype Shown below is the finalized prototype. The purpose of the prototype was to demonstrate the feasibility of a small, highly maneuverable search and r robot. As such, the completed prototype was successful. Capabilities include a ground speed of 10 inches per second, battery life of...... Listed under: Development Boards
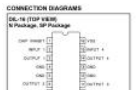

Projects

25. Line Following Robot using arduino This is a Line Following Robot. It follows a black line that is drawn. It is able to detect the black line through one phot... and one analog light sensor. There is an LED in between the two sensors that gives off red light when...... Listed under: Robotics – Automation Projects

26. AC Dimmer Circuit Overview Simple AC Dimmer circuit for incandescent bulbs. 128 levels of brightness. Parts are relatively cheap! How it Works This is a Chopping Circuit. The dim level sets where the AC waveform gets chopped on. More of the cycle makes the bulb brighter, less...... Listed under: Developm Board – Kits Projects

27. Traffic Signal Wiring with Arduino Controller I always wanted an old traffic signal and finally got one recently. However, it was very simply wired so that a lights were fixed on. What fun is that? I also wanted to try out an Arduino controller and thought this would be a...... Listed under: Interfacing(USB – RS2 -ISP) Projects, Other Projects, Projects

28. Make a High-Altitude Balloon Tracker (Arduino) One of the coolest projects I have done so-far with my kids is a "near-space" balloon. That's not quite into itself (100Km+) but so high that the sky looks black and you can start to see the curvature of the earth below you. The...... Listed under: Other Projects

29. Zigbee Wireless Relay Control and Power Monitoring System Introduction We designed a system for wirelessly controlling relays and monitoring current used for a home load simulation. By wirelessly turning relays on and off by sending commands from a PC to a microcontroller we can change the total l (current) to our...... Listed under: Metering – Instrument Projects

30. Balancing Instructable Robot using arduino In this Instructable I wanted to show to you how to make a self balancing robot. What makes it unique is that exterior is made to look like the Instructables Robot. Internally it works in the principle of PID, it is a very popular...... Listed under: Robotics – Automatio Projects

31. Bidirectional motor control One of the simplest ways to get a motor to turn in both directions is by using a double-pole, double-throw (DPDT) relay. Alon the relay, this hookup requires two transistors and two Stamp pins, one for on/off control and the other for direction control....... Listed under: Motor Pro

32. Fab Lab Barcelona SuperNode [assigment] Add an output device to a microcontroller board and program it to do something. Class syllabus:: http://academy.cba.mit.edu/classes/output_devices/index.html [what i learned /am learning] _ Relearned Arduino installation. _ Work with DC motors ar Bridge IC with Arduino; and its general concepts. _ About the various...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

33. LED Matrix Bike Safety Backpack using arduino Biking around cars can be a frightening thing, and staying visible at night is crucial for your safety. This tu to make a custom LED Matrix Backpack that is much larger and brighter than traditional rear bike lights. Parts You'll Need:...... Listed under: LED Projects

34. An FTIR Touchscreen Device The DJ Touch is a portable turntable touchscreen and interactive LED display. Our end goal was to produce a low cost touch device, and demonstrate its application in a common consumer application. Out of an interest in electronic music, and with the knowledge of deejaying' Listed under: Sensor – Transducer – Detector Projects

35. Arduino Scouting Robot Summer Project: Arduino Scouting Robot [video id="P6PVLhjQ5FY" type="youtube"] Arduino Scouting Robot Part 1 * 12,9,5 volt supply recharge it with a 12-volt charger keep power switch on to charge * 2 DC motors operate at 7.2V with a maximum current draw of 3 amps...... List under: Projects, Robotics – Automation Projects

36. Rubik's Cube Solver using arduino This robot that can solve a Rubik's cube using Arduino. I learned how to solve a Rubiks cube last year, and I was also ir Arduino, so eventually I ended up with an idea to make my own Rubik's cube solver. Like many people searching...... Listed under: Robotics – Automation Projects

37. Connecting an IR Sensor Schematic Since the IR Sensor uses a light sensor, the schematic is very similar to that of the light sensor. The only difference is the addition of a and that the IR detector requires connection to 5V and ground. Breadboard Setup To setup...... Listed under: Sensor – Transducer – Detector Projects
38. Learn how to use 7-Segment LED Display using Arduino 7-Segment LED Display is a very useful component, but also a very confusing and difficult piece for beginners. It won't be difficult once you get it working for the first time. This is what you will get at the end of the tutorial (part...... Listed under: LED Projects

39. Bass Master 3000 Carnival Game using arduino The Bass Master 3000 is a game that I built for a work carnival along with a small and very talented team workers. I've seen this type of game on the net, but I wanted to kick it up a notch with some Arduino...... Listed under: Game – Entertainment Projects

40. L293 Motor Driver and H-Bridges The most common method to drive DC motors in two directions under control of a computer is with an H-bridge motor H-bridges can be built from scratch with bi-polar junction transistors (BJT) or with field effect transistors (FET), or can be purchased as an...... Listed unde Projects

41. How to connect a servo to the Arduino Servo Cable The continuous rotation servos that come with the BOE Shield-Bot have a 3-wire cable for connecting it to the power a controller. The black wire is the ground, the red wire is the power (positive) and the white wire (sometimes yellow, depending on...... Listed under: Motor Projects

42. Conversational Gloves using arduino This is what came out of my attempt at combining some of my favorite tools and themes...Grasshopper, 3D printin kinetic motion, and linguistics. I put these gloves on my friends, asked them to tell me a story, and used Grasshopper to record the data from...... Listed u Radio Projects

43. Pneumatic Inverted Pendulum Construction Mechanical structure Compressed air comes from air compressor and goes in the proportional valve. Comi from the proportional valve, there are two branches of air flow (one is compressor air, the other one is exhausted air) which connect to the air cylinder (pneumatic...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

44. Make your own TV ambilight using Arduino This is a very easy project. Here is the result I won't go into too much detail how each part works, because I h written some information on my blog. But you should be able to make it work with the information given on this...... Listed under: LED Projects

45. Step Sequencer Drum Machine Overview [top] As avid audiophiles, we wanted to apply our newly acquired knowledge of microcontrollers to build a fun consumer electronic device. Our project is a step sequencer drum machine. The user is able to program a 16-step percussion pattern using one of a wid Listed under: Sound – Audio Projects

46. Build your own 4x4x4 RGB LED Cube using arduino LED Cubes are awesome. The first one I created was a 8x8x8 blue led cube. It still works like a charm being able to display every colour in the spectrum is much more spectacular. Let's start with a small and simple 4x4x4 RGB LED...... Listed under: LED Pro

47. Programming an ATTiny13A using Arduino & servo interpreter So there I was, browsing eBay, looking for some cheap deals on Atmel chips when i came pair of ATTiny13 chips for £2.50. I just had to have them! After all, how hard can it be? I needed a small chip to read...... Listed under: Arduino Programm Projects, Interfacing(USB – RS232 – I2c -ISP) Projects, Motor Projects, Projects

48. Retablillo de las Maravillas v1.0 4./ Interactivity & electronics 4.1/ Switches / characters 4.2/ Screen / interface 4.3/ Motor controller 4.4/ I/O controller & i [4./ electronics] [4.1/ switches / characters] The characters on top of the moving platform function, as interfaces, actually as on-off switches. While stand its...... Listed under: Robotics – Automation Projects

49. How to control a Servo using Arduino In this one, servo is programmed to be controlled by two buttons, one turns servo to the left and the other one tu the right. When the servo is turning, corresponding LED will be switched on to indicate the operation. Result: Because Arduino...... Listed under: Motor P Projects
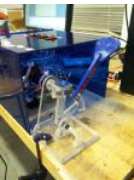

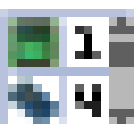

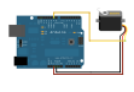

50. Desktop Fist Bumper using arudino This simple device sits on your desk at work, ready to give you fist bumps throughout the day as you need them. A 3 printed "fist" is moved by a servo attached to a rack and pinion mechanism. An ultrasonic range finder detects when you...... Listed under: Battery Proje

↑
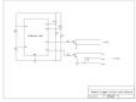

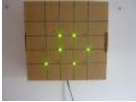

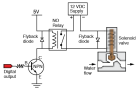

51. Arduino Basic Wifi Project using ESP8266 wifi module Overview ESP8266 is a highly integrated chip designed for the needs of a new connected world. It offers a complete self-contained Wi-Fi networking solution, allowing it to either host the application or to offload all Wi-Fi networking functions from another application processor. / ESP82
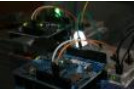

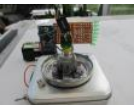

Listed under: Internet – Ethernet – LAN Projects

52. $1.50 Arduino TV Annoyer Hey Arduino fans! Here is an 'ible for making a device that turns TVs on when you want them off, and off then you want them something inconspicuous, it would make a great April Fools joke or gag gift....... Listed under: Home Automation Projects, Projects

53. Katrina And Maya bOunce is a haptics-based learning game system that teaches the concepts behind wave dynamics, and in particular, resonance. The device (an adaptation of the Haptic Paddle) allows a user to "bounce" a ball in a virtual environment. By feeling the haptic force feedback from...... Listed Robotics – Automation Projects

54. Stereo Audio with an Arduino Recently I've been posting a lot of projects that use an 8 bit resistor ladder digital to analog converter(DAC) and an Arduino make sound. (see the Arduino vocal effects box, the Arduino drum sampler, and my audio output tutorial). The technique I've been using to make these is...... Listed under: Projects, Sound – Audio Projects

55. Arduino All-In-One Remote Now you can have all the remotes of your house in a device that fits in your hand with Arduino, never fight for who has the T remote again! To make it you will need: Arduino (I used a cheap copy of the arduino UNO)....... Listed under: Robotics – Automation Projects

56. Just Veggin with an Arduino Beetbox Bring Touch Control to the Arduino. Use interesting touch sensors like Carrots or Beets to make a "Beetbox". In this instructable you will learn: * How to use the Cap Sense library to make Arduino responsive to touch * How adding a Wave Shield (and...... Listed under: P Sensor – Transducer – Detector Projects

57. MOTOR SWITCH LED Here is how to connect a motor, a swtich and an LED to your Arduino and how to do some checking to make sure that everything w The strategy is to get the circuit going in stages, testing each part as you go. Once everything...... Listed under: LED Projects, Motor Projects

58. Arduino Controlled Lighthouse Overview: I've often thought that a lighthouse would make a great project for an Arduino, and so I decided to give it a try one of the local lighthouses here in Erie, Pennsylvania as inspiration. I chose the North Pierhead Lighthouse that guards the...... Listed under: LED Projec

59. LittleGoal: World Cup Match Notifier using Arduino [This Instructable was made at the Taipei Hackerspace littleBits Instructables Build Night.] Can't wat World Cup football games, but want to know when important game events (ie. goals) happen? Then littleGoal is for you! The littleGoal setup will monitor game's progress,...... Listed under: Game – Entertainment Projects

60. Pololu Dual MC33926 Motor Driver Shield for Arduino This shield makes it easy to control two brushed DC motors with your Arduino or Arduino-compat board. Its dual MC33926 motor drivers operate from 5 to 28 V and can deliver a continuous 3 A per motor. These great drivers also offer current-sense feedback and accept ultrasonic...... Listed under: Motor Projects

61. Stepper Motors Stepper motors are not smooth - they move in "steps". Different motors have a different number of steps to make one complete rotation. You use softwa step the motor forward or backward at different speeds. There are two kinds of stepper motor bipolar and...... Listed under: Motor Projects

62. DIY FPV RC Tank V2 [2km RANGE upgrade!] using Arduino Lets build An FPV tank that could be controlled within 2 kilometers! With the help of my best fr ASCAS I was able to borrow his old parts for this updated version. Ok So Roverbot version 2 is a highly educational Arduino based ATV-drone. It's...... List under: Game – Entertainment Projects

63. Sweep Sweeps the shaft of a RC servo motor back and forth across 180 degrees. This example makes use of the Arduino servo library. Hardware Require Arduino Board (1) Servo Motor hook-up wire Circuit Servo motors have three wires: power, ground, and signal. The power wire...... Listed under: How To Projects, Motor Projects

64. DIY GPS Tracked Bike Lock using Arduino Having just purchased a half decent bicycle, and living in a city with a bike theft rate almost as high as New Yor wanted to have some peace of mind that if a thief with an angle grinder were to cut through my U-lock...... Listed under: Car Projects, GPS B sed Project Security – Safety Projects

65. Critter Twitter Trap using Arduino Havahart traps are really nice if you have pests to rid your home of but you don't feel the need to do this through mea killing the animal. The problem we are faced with is constant monitoring of the trap. If you forget to...... Listed under: Internet – Ethernet – LAN Projects

66. Capture the image of a falling object using Arduino The aim of this project is to create a setup to capture the image of a falling object or any object in mc a precise time using a DSLR and Arduino microcontroller. It can be done in many different ways, but the method I...... Listed under: Video – Camera – Ima Projects

67. LED Binary Clock using an Arduino A Binary Clock! I was recently looking at some binary clocks and I felt like Why not? I have everything to make one anc have a clock in my room. So I decided to build one and here it is. Hope you Like...... Listed under: Clock – Timer Projects, Projects

68. Wiring of the Solenoid Valves Overview of Wiring for the Salinity Sensor Other pages describing fish tank wiring: Connect electrical power to the pump ar breadboard Connect the salinity sensor to the breadboard and Arduino Connect the solenoids to the cascade control circuit (this page) Return to the ma Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

69. Cheap wireless transmission between two Arduinos with Infrared Hi all, For a project, I was looking for a cheap solution to send data from an Arduino to other one. The serial port was already taken, and my transmission (unidirectional) needed to be wireless. My researches has brought me to discover the kinds...... Listed under: Internet – Ethernet – LAN Projects

70. Bug-Catching Spider in Web using Arduino Part 2 This project is a collaboration between idesigner4 and bhasudha(me), students in the Fall 2012 course That Think (CSCI 7000) at The University of Colorado - Boulder. The story of our bug-catching spider automaton goes like this: A giant evil spider resides big...... Listed under: Internet – Ethernet – LAN Projects, Projects, Security – Safety Projects

71. Hack a TowerPro Micro Servo to Spin 360 / Continuous Rotation Hey guys! Since I've got my servos, I've had two that I set aside for hacking. So, coming t help, I was sorely disappointed when I couldn't seem to find any instructables on how to mod a micro servo. After viewing...... Listed under: Motor Projec

72. Arduino R/C Lawnmower What this is: This instructable will show you how to make your Arduino into an R/C interface that you can use for just about any requiring remote control. I will also show you how I built an R/C lawnmower using my Arduino, a cheap R/C transmitter and...... Listed under: Home Auto Projects, Projects

73. RGB LED Tutorial (using an Arduino) (RGBL) using arduino LEDs are great. But with any project there comes a point where flashing is simply not enough. these cases an RGB (Red, Green, BLue) LED is the answer. With an RGB LED you'll be able to produce any colour glow your heart desires. At...... Listed un LED Projects

74. Darkness Map Data Collection Device The Darkness Map encompasses both data collection and visualization of nighttime light levels. You can add to the by downloading the app for iPhone or Android, but you can also contribute data by creating your own data collection device. This tutorial will cover how Listed under: Sensor – Transducer – Detector Projects

75. Arduino-based line follower robot using Pololu QTR-8RC line sensor UPDATE FEB 2012: This guide is featured on Adafruit's blog http://www.adafruit.com/blog/2012/02/14/arduino-based-line-follower-robot/ This is Faz3a II, my first line-following robot, which I also hope to use for m solving. I used the Arduino Uno, Adafruit motor shield, Pololu's QTR-8RC line sensors and motors. You can build a...... Listed under: Projects, Robotics – Automation Projects, Sensor – Transducer – Detector Projects

76. RGB LED Rainbow Fader using an Arduino Introducing the RainBoard: A simple RGB LED Rainbow fader using Arduino Uno and a few simple compon Believe it or not, we will control 45-channels of RGB LEDs at 32 brightness levels using only 3 digital pins from the Arduino! How is this possible...... Listec Game – Entertainment Projects, Home Automation Projects, Projects

77. Window Painting Robot (arduino, processing, accelerometer) The idea for this project came from one of my favorite 'ibles: the polargraph. I loved the dra style and thought how cool would it be to do this on the side of a building? Unfortunately the challenges to setting up such a large polargraph...... Listed Home Automation Projects, Robotics – Automation Projects

78. Kaleiduino: A Battery Powered Arduino LED Kaleidoscope Hello everyone, and welcome to my Instructable! This instructable will show you how I made th ever DIY Arduino controlled "LED Kaleidoscope"! What is an LED kaleidoscope? Well, our traditional kaleidoscopes used 3 mirrors joined as a triangle wit like sequins and stolen...... Listed under: Battery Projects, LED Projects

79. Using The PCF8575 i2c i/o Expander To Read Inputs With Arduino This Instructable will show you just how easy it is to add extra inputs to your Arduino. V use this technique to add hundreds of extra inputs to your Arduino with only two wires by using a fancy communication protocol called i2c (eye-squared Step...... Listed under: Sensor – Transducer – Detector Projects

/

80. Robotic Spider V8 I needed a project that would use all my servos, so I decided to make the do-nothing, worthless spider. If you have fischertechnik and to waste, this is the project for you! Really, this flopping spider makes for a great learning project. The main...... Listed under: Robotics – Automation Proj

81. Laser Cut Sphere-O-Bot using Arduino The Sphere-O-Bot is a simple 2 axis CNC machine that can draw on most spherical surfaces. You can use it to dec eggs.This design is based on the 3D printable Sphere-O-Bot. By building your Sphere-O-Bot using a laser cutter, you can...... Listed under: Robotics – Aut Projects

82. Arduino controls cheap RC car transmitter OBJECTIVE Cheap Chinese RC toy cars can be had for about 5 Euros in the local market. The wireless brains be the majority of these cheap RC toys is a pair of very cheap ICs the TX2 and the RX2. Yup, that's what they are called. So this...... Listed under: Car Projects Projects, Radio Projects

83. Arduino Ping Ultrasonic Range Finder Code The Ping))) is an ultrasonic range finder from Parallax. It detects the distance of the closest object in front of sensor (from 2 cm up to 3m). It works by sending out a burst of ultrasound and listening for the echo when it bounces...... Listed under: Projects, Sensor Transducer – Detector Projects

84. Internet Devices for Home Automation This instructable shows the principles involved in making devices to control home automation over the internet. going to construct a device (or several of them), that talk to each other over the internet to control lights, motors for curtains/blinds, power sockets etc. I contrast...... Listed under: Home Automation Projects, Interfacing(USB – RS232 – I2c -ISP) Projects

85. Arduino based Bi-color LED Matrix Audio Spectrum Visualizer After we came up with the Bi-color LED Matrix Driver Module kit, we have been looking ard interesting projects to work with it. You may be interested in some of the projects we have put up at instructables using this LED Matrix kit. Instructable. Listed under: LED Projects, Sound – Audio Projects

86. Breathalyzer using an Arduino What is a breathalyzer you may ask? It is a device for estimating blood alcohol content (BAC) from a breath sample.In sim terms it is a device to test weather a person is drunk or not. As the title suggests it runs on the arduino.Our breathalyzer...... Listed under: Medical – Hea based Projects, Projects

87. Magic Light Capacitance Sensor using an Arduino This was my very first arduino project. Its great for beginners. Fade the color or the lights my moving y hands near it. It fades from a pretty purple blue to a firey red-orange. Its was SUPER easy to build, not to hard to write...... Listed under: LED Projects, Pr Sensor – Transducer – Detector Projects

88. LED Flipbookit: full color and brightness control with an Arduino Step 1: Gather the materials Materials: - addressable RGB LED strip : I used a new variet three conductor WS2811 strips. - an Arduino : I used a Arduino Leonardo. Any 5vdc Arduino should be adequate. - 4 AA batteries and a battery holder.... under: LED Projects

89. Infinity Mirror Clock using Arduino Ever since my addressable RGB LED strips (WS2812B) came from Aliexpress, I've been fascinated with LED projects. Fo up on my success with my Charlieplexed LED clock, I wanted to create something with more Jazz.. While browsing google images, I came across an instru for...... Listed under: Clock – Timer Projects

90. How to Make a PIP-Boy using an Arduino So what exactly is a PIP-Boy, you ask? For those unfamiliar, a PIP-Boy is a device used by the protagonist in the popular Fallout s video games for navigation, radiation detection, data storage/playback, and inventory management. Being a major fan of the franchise, I...... Listed under: Game – Enterta Projects, Projects

91. Experimenters Guide for Arduino as Performed at OIT Resources Adafruit ARDX - v1.3 Experimentation Kit for Arduino Experimenters Guide for Arduino Bread Board Layouts (PDF) Arduino Tutorial Bundle (Instructable) This Arduino Tutorial is going to be very similar to the Arduino Tutorial Bundle Instruct because we are working on this in...... Listed under: Other Projects, Projects

92. ZAPpelin, or how to train your blimp with an Arduino and IR remote Is it flying seal? A flapping alien? No it's a ZAPpelin, an Arduino controlled indoor blir setup to learn in the signals from an IR remote to command it. This project came to life at the third Arduino Jam Februari 15th to17th 2013, at Timelab,... Listed under: Game – Entertainment Projects, Radio Projects

93. Digital Zoetrope using Arduino A zoetrope is a mechanical device that animates a series of pictures by spinning them fast enough that the images appea[r] merge together and move, My digital zoetrope works on a similar principal, by flashing the LEDs while they are spinning it is possible...... Listed under: Vi[deo] Camera – Imaging Projects

94. The machine of answers Should you ask your boss for a raise? Call that cute guy you met at a party? Sell your stock? Wouldn't it be nice to have a handy method of handling some of life's more pressing dilemmas? This machine give you the answer to all...... Listed under: How To – DIY – Projects

95. ABC 123 Toddler Trainer using Arduino Here is a kid tested and teacher approved trainer for the kids in your family and / or extended family that are lea[rning] their ABCs and their 123s. It was kid tested on my granddaughter, who really loves it, and was approved by my wife,...... Listed under: Home Automation

96. Aergia: Android controlled TV Remote(with Speech Recognition) using Arduino Have you ever faced this situation while sitting on your favorite spot on th[e] or recliner, comfortably watching your favorite TV program? You're snugly tucked under the blanket, the air conditioning is pleasantly cool, the sun outsi[de] shining it's delicate warm golden rays...... Listed under: Arduino Android

97. The Arduino AA Undershield I recently bought an Arduino Diecimila board. It's awesome and the applications, you can use it for or with is almost unlimit[ed] However there's a problem when you want to use it in portable applications. You can use the Liquidware lithium backpack, which is a...... Listed under: Development Board – Kits Projects, Projects

98. Bluetooth RGB Shelf Lighting using Arduino Being the giant fan of LED's that I am i'm always trying to come up with new ways I can put them throughout my house. Today going to show you how to create a simple, yet extremely eye catching, RGB Bluetooth controlled Shelf lighting...... Listed under: Home Automation Projects, LED Projects

99. L.O.G. $10 Arduino There are probably thousands of articles on making an Arduino. So who needs another Arduino? Well, this Lazy Old Geek(L.O.G.) nee[ds] Here's the features I would like: Features: Low cost More permanent than a breadboard Not a custom PCB More prototyping area than a...... Listed unde[r] Arduino Programmer Projects, Projects

100. Love Gauge I'm working together with my wife. But sometimes one of us has an external appointment. So, if one of us is thinking about the other, we wa[nt] show it together. For this, I have made an Love Gauge for us. It stands on our...... Listed under: Other Projects

101. Arduino Powered Autonomous Vehicle A few months back I started playing around with Arduino micro controllers as a learning exercise (and for fun); th[is] project is the culmination of that. The goal of the project was to create a vehicle that can autonomously navigate through a series of waypoints...... Listed Car Projects

102. Emotidora: Hats with Emotions using Arduino This project, Emotidora, will help a user express his/her emotions about events in day-to-day life. Weve all situations where something very exciting or unfortunate has happened to us and we want to share it with other people. This usually involves the expres[sion] of...... Listed under: Game – Entertainment Projects, Home Automation Projects, Projects

103. Traffic Signal / Stop Light Wiring with Arduino Controller I always wanted an old traffic signal and finally got one recently. However, it was very simply wi[red] that all the lights were fixed on. What fun is that? I also wanted to try out an Arduino controller and thought this would be a...... Listed under: Other Pro[jects]

104. WAVEbuoy using Arduino The WAVEbuoy is a arduino lamp connected to the internet that displays the current wave height of any of the National Data B[uoy] Centre's wave buoys. This lamp is currently connected to the Sevenstones Lightship buoy that gives an indication of swell approaching Cornwall in...... Lis[ted] under: Home Automation Projects

189. LED Head Arduino TED LED HEAD TED meet the world. I have always been interested in a bare-bones Arduino but never really saw the point if it was not practically useful, This is my entry into Little Bits contest, I tried to stay true to the " little bits"...... Listed under: Game – Entertainment Projects

190. Arduino Esplora Remote This example is designed to be used with a Processing sketch. Processing is an open source programming environment. The application on the computer reads the sensors on the Esplora board and controls the buzzer and the RGB LED through a graphical interface The image Listed under: Projects, Radio Projects

/

191. Access control with Arduino plus Keypad 4×4 plus Servo Hi guys, I bring a new instructable for arduino, the control access with password, 4x4 keypad an servo. We will use the Password and Keypad librarie for arduino, besides using the servo library, but this project can also be modified by changing the se Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, Motor Projects, Projects

192. Animatronic Eyes and Wii Nunchuck Part 2 using Arduino After I built the animatronic eyes in PART 1, I wanted to complete the face with a voice and pos moving eyebrows. If you look back at my PART 1, you'll see that for the base I used a model from Thingiverse. Once you have...... Listed under: Game – Entertainment Projects

193. iPod Information Screen using Arduino My girlfriend, a music buff, asked me to come up with a better way for her to look at the track information of the song playing on her iPod touch while she was using it in the car. Those of you that have or...... Listed under: Phone Projects, Projects

194. Autonomous Race Car using Arduino Build this autonomous driving robot car based on a old RC toy car. I removed the radio control board from the car replaced it with a brain in the form of an Arduino UNO board (plus a motor driver board) and gave it an...... Listed under: Car Projects

195. Arduino powered GLCD (Graphic LCD) Displays are always nice. So far I've just been demonstrating how to use 7-segmented displays to display numbers very few resources. But what if you want to display text? Or pictures? Or both? Well in order to do that, you're going to need a...... Listed under: LCD Proje

196. ATTiny powered Arduino Projects Arduino is a great platform. No question. But what if I told you that you could take your entire board and compact it in package. And I mean really small. The chip in the picture is an ATTiny84, and that is the big version....... Listed under: Interfacing(USB – RS232 – I2c -ISP) P Projects

197. Irrigation logic controller/project log using Arduino Hello, I am going to explain my project in just a minute, but first I wanted to explain how I became inv this project. I like to save money were I can, so it is not hard to understand why I carpool to work....... Listed under: Home Automation Projects

198. Keyless Entry / Arduino Keyless Entry System Enter the correct code into the keypad and the servo will unlock the door. Enter the incorrect code and Sor stay out. There was a couple of stipulations i wanted in my Keyless Entry system: Helper Light. A light that would...... Listed under: Calculator Projects

199. An Arduino real time clock shield Today we are going to make a real time clock Arduino shield. Doing so will give you a simple way of adding ... real time capability to your projects such as time, date, alarms and so on. We will use the inexpensive Maxim DS1307 real-time...... Listed under: Clock – Timer Pro Projects

200. Qtechknow Robot Obstacle Course using Arduino Have you ever thought of controlling your FuzzBot wirelessly? Do you want to make a real - life video g Do you want to learn about the tech behind NFC and RFID? - the Qtechknow Robot Obstacle Course How - To Guide is for you!...... Listed under: Robotics Automation Projects

201. Twitter Physical Client In this project I'm building a physical Twitter client using Arduino and a flag, basically an arduino powered retweet indicator, when any of my tweets is retweeted some physical action will happen to notify me of that. You'll need: 1. Flag. 2. Arduino. 3. Laptop...... Listed under: Internet - Ethernet – LAN Projects

202. Simple RFID access system using Arduino In this tutorial you can make an RFID access system. It's very simple and can be used with a wide variety of en Updated 18/03/2013 The purpose of this project is to prototype a basic RFID access system. Although it is not that complicated, this...... Listed under: Pro RFID - NFC projects, Security – Safety Projects

203. Clock Four – Scrolling text clock using Arduino Introduction Time for another instalment in my highly-irregular series of irregular clock projects. In this we have "Clock Fou scrolling text clock. After examining some Freetronics Dot Matrix Displays in the stock, it occurred to me that it would be neat to display...... Listed under: Clock – Timer Pr Projects

⬆

/

204. The Pill Reminder using Arduino Back in January 2014 I was at a meetup of Baby Boomer Makers at TechShop in San Carlos, California. We were going around the table, each taking a turn to talk about projects we'd like to do. Bob spoke up to describe a problem his...... Listed under: How To – DIY – Projects

205. Bear With Me This instructable teaches how to make our Bear With Me system, a prototype that allows two users to tangibly send and receive hugs (as well as motion) in near real-time. The bears will be able to send tweets when physically hugged. Their hearts will glow...... Listed under: Game – Entertainment

206. Using switch to control Piezo speaker with Arduino In this project, we will learn how to use a speaker (peizo sounder) and use switch button to change the sound. Sorry about this one, you might find it a bit difficult to digest at first, and I didn't realise it's actually...... Listed under: Projects, Sound – Audio Projects

207. DIY Arduino FM Radio Shield I've been visiting local convenience store (Dollarama, here in Montreal, Canada) and notice nice looking FM Radio, just for $3. Why not to try to interface it to my lovely Arduino? Idea looks quite challenging, the same time what is the point in interfacing...... Listed under: How To – DIY Projects, Projects, Radio Projects

208. Word Clock in German using Arduino While in Germany last year, I saw a world clock in a store similar to this one in a store that was priced at 900€. I read several instructables online on how to create a World Clock so I decided to give it a shot....... Listed under: Clock – Timer Projects, Home Automation Proj

209. How to set up a Public Window Public Window (http://www.publicwindow.net) is an open source project which allows artists to display their creations in a window and have people from all around the world interact with it. This is a step-by-step guide on how to set up a Public Window of your own. A...... Listed under: Home Automation Projects, Video – Camera – Imaging Projects

210. Sonar For The Blind using Arduino This is a project I'm calling Tacit. No, I didn't bother making an awkward backronym for it, it just seemed like an appropriate name that's a lot shorter (though less descriptive) than "Hand-Mounted Haptic Feedback Sonar Obstacle Avoidance Asstance Device". It measures the distance to things and translates that into pressure...... Listed under: Medical – Health based Projects, Projects

211. Backpack Anti-Theft Alarm using Arduino If you're a student, like me, then you have heard of all the theft that occurs on campuses today. I can't even leave backpack alone for five minutes without worrying about it getting stolen. To ease my mind and to help fellow students, I've...... Listed under: Home Automation Projects, Security – Safety Projects

212. Arduino Breadboard Shield Are you tired of having a hard time trying up a circuit on a breadboard because your arduino takes up a lot of space? This should be a solution to your problem! The Arduino breadboard shield is again, an accessory for your arduino board...... Listed under: Development Board – Kits

213. Arduino Serial Communication Code Arduino can send output through serial communication to your computer over USB. The output can be anything such as status, text, reading, value, number etc. You can view the status output by clicking Serial Monitor button at Arduino Environment software. Instruction; 1) Connect your...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, Projects

214. Connect several digital inputs to one analog input using Arduino I often run out of digital pins on my Arduino. Anything as complicated as, say, a video game controller, was near impossible with the amount of pins I had available. Multiplexing buttons works, but it requires lots of connections and soldering. So together...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, Projects

215. RC tank with a moving FPV camera using Arduino In this instructable I show you how to build remote control tank with FPV camera. At the beginning I bu RC tank without FPV camera but when I was driving it in the house I have not seen where it is. So I came...... Listed under: Video – Camera – Imaging Proj

216. Arduino home energy monitor shield Although products are becoming more and more available for monitoring your home power usage, I'm one of thos who can't leave well enough alone and who would rather shell out $100 and hours of my time in order to save $20 and learn something...... Listed under: Metering – Instrument Projects, Projects

217. Quiz Game Controller using "Lights and Sounds Buzzers" and Arduino Jeopardy style quiz games are favorites for creating excitement and educational instruction at the same time. Teachers, summer camp counselors, and even industry educators find this type of game to help generate interest and involvement from the participants. The idea behind the game is simple,...... Listed under: Game – Entertainment Projects, LED Projects, Projects, Sound – Projects

218. Arduino Phone Book Ever wanted to have a Phone Book, controlled using a microcontroller, which is very easy to use, and you can use it while talking or and is saving data on SD Card? then this instructable is for you. In this instructable you will learn...... Listed under: Phone Projects

219. Soundgraffiti with arduino mega So we haven been working on the new soundgraffiti board. This is an installation wich creates sounds using sprayed wa connection is made with water. We used copper plates as our sensor. the plates had a cutout line in the middle of 0,1 mm....... Listed under: Sound – Aud Projects

220. Arduino: Electrical Engineering Basics   In this week's arduino tutorial, we take a bit of a detour and focus on some key elements of electrical engineering that we'll be using in future episodes. [box type="note" color=" #202020 " bg="#ffbb00 " font="verdana" fontsize="14" radius="20 " border="#000" float= head="Attributes"]Thanks to...... Listed under: Other Projects, Projects
221. Temperature Sensor for Shower using Arduino With this device you diminish the use of water in your house or work. Instead of waiting to see vapor in th shower to get in, this device help you to know when the water its at the temperature you want and you can instantly...... Listed under: Home Automatior Projects, Projects, Temperature Measurement Projects

222. Fifty Dollar Box Bot The objective is to construct a programmable hobby bot that is affordable and simple to make. The parts will be purchased from pla as Wal-Mart, Radio-Shack, any Hobby Store, or online store that is accessible to the public. The price range is 50 dollars...... Listed under: Robotics – Auto Projects

223. Motion Controlled Ultrasonic Lamp using Arduino Recently I've been learning about Ultrasonic waves and how to harness their power. It's simple enoug make some type of sonar device, but I wanted to take at a step cooler and see if I could use Ultrasonic waves to not only detect movement,...... Listed un Home Automation Projects, Sensor – Transducer – Detector Projects

224. Arduino Interrupts and Debouncing Interrupts are an extremely useful, yet often feared element of microprocessors. Interrupts allow you to run a progr while still being able to react to asynchronous input from the outside world. [box type="note" color=" #202020 " bg="#ffbb00 " font="verdana" fontsize= radius="20 " border="#000" float="right" head="Attributes"]Thanks to...... Listed under: Other Projects, Projects

225. Chat Server using Arduino A simple server that distributes any incoming messages to all connected clients. To use, open a terminal window, telnet to you devices IP address, and type away. Any incoming text will be sent to all connected clients (including the one typing). Additionally, you will be...... Listed un Internet – Ethernet – LAN Projects, Projects

226. Monkey Automatons! This instructable will guide you through the process of building a set of automaton monkeys in the style of "Hear No Evil, See No E Speak No Evil." Our design ends with two monkeys reacting at the push of a button located in the Speak...... Listed under: Game – Entertainment Project

227. SOLAR POWERED ARDUINO WEATHER STATION In country like India most of the people are dependent on agriculture.For effective planning in agricultur weather forecast is of utmost importance.So farmers are always interested in the Weather Forecasts.As farmers stay in remote areas, they have to wait f news updates in tv,...... Listed under: Solar energy projects

228. Arduino Controlled Motion Sensor In this Instructable, I'll be explaining how to build a motion activated alarm! It uses an Arduino microcontroller, a PIR (infrared) sensor, and a type of alarm. You can use an LED indicator, a buzzer, or a piezo. That's the easy part. I will...... Listed under: Projects, Sensor – Transducer – Detector Projects
229. MaKey MaKey Shield for Arduino MaKey Makey is a project created by Eric Rosenbaum und Jay Silver. It's an Arduino based keyboard. A very special keyb because you can use apples, bananas or Play Doh as keyboard keys. Sounds strange, but it works very well. How it works: The trick is...... Listed under: Development Board – Kits Projects, Projects

230. Classic Joystick to USB Adaptor using Arduino If you grew up in the early 1980's and were into video games, you probably had an Atari 2600, ColecoVisior similar game console. The controllers or joysticks for each of these systems had a distinct feel that is different from today's game consoles or...... Listed u Interfacing(USB – RS232 – I2c -ISP) Projects

231. LEGO T-Intersection LED Traffic Light using Arduino Video not playing? See it on YouTube: http://www.youtube.com/watch?v=q0tiiWwC6Zo Background E Christmas we set up a large LEGO train layout in a section of the living room. This year, I ended up winning an eBay auction for a number of older-mode road plates, one of...... Listed under: Car Projects, Game – Entertainment Projects, LED Projects, Projects

232. Six wheeled All Terrain Vehicle (6WD) using Arduino Hello, In this post we"ll be making a Six wheel drive all terrain vehicle (ATV). These are rare and henc expensive robots (at least in India). I made this ATV as my summer project. Dagu manufactures a similar 6WD chassis but its way too expensive...... Listed Robotics – Automation Projects

233. The CoaTracker Has this ever happened to you? You wake up in the morning and realize that you're terribly late for work/class/your weekly pedicure/whatever. You throw shirt and flip flops, sprint around your warm, heated house grabbing your belongings, and race out the door...where you...... Listed under: Sensor – Transduc – Detecto Projects

234. Model Police Car using an Arduino We wanted to build a model police car with working lights and sirens. Then we decided to add a motor and instead of switch to turn everything and off we used a photodiode. For our car the photodiode signal is a simple on off...... Listed under: Game – Entertainment Pro Projects

235. Open a box with the flick of a switch! Have you ever given something to someone and wished that the box you gave it in opened automatically? No? Wel have I (well, maybe) :D. However if you have, this is the guide for you! With just a flick of a switch the box...... Listed under: Robotics – Automation Project

236. How to turn inkjet printer to print on Coffee using Arduino The aim of this project is to make latte printer, I used 1 printers and 1 scanner , it prints one l time, all what I have done is hacking the sensors of the printer and I used Arduino Uno to send different values...... Listed under: Game – Entertainment Home Automation Projects

237. Arduino + fischertechnik TX-C – Connecting I2C True Colour Sensor Colour reading is a real issue for industrial models. I've been working on it for more t months now, since December 2009. After many months of hard work, • starting with the standard colour reader (season 1) with features a red LED, •...... under: Projects, Sensor – Transducer – Detector Projects

238. The 4x4x4 LED cube using an Arduino In this instructable I will show you how to make a 4x4x4 LED cube that will be controlled by an Arduino Demulionc yes you might say" that Arduino has only 14 I/O pins well also the 6 analog pins can be used as pins...... Listed under: LED Projects, Projects

239. Froggy World 3 The Seesaw Froggy put on a little eye makeup before heading out for the new ride, "The Seesaw." The Seesaw is the third ride in the amusement park for adventurous plastic frogs. This ride received Froggy from "The Boot" and slides him over to a waiting rail...... Listed under: Game – Entertainment Projects

240. Arduino DIY SD Card Logging Shield Ready-made SD card logging shields for the Arduino typically cost in the range of $15 - $25. This is quite reasonable, might save a couple of bucks if we make our own. Not to mention all the fun in building it. Forget about...... Listed under: Other Projects, Projects

241. Virtual USB Keyboard Using Arduino Communicating with a host computer can allow a simple Arduino-based system to gain access to a wide variety of c and information. Most people link an Arduino to a host using serial communications across a USB connection with custom code running on the host to.. Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, Projects

242. Smart Homer Web-enabled TV remote using Arduino Smart Homer, a Web-enabled TV remote puppet Smart Homer is a Web-enabled puppet that turns your TV when Simpsons is on. As Homer is too lazy to browse the Web himself, a script in the cloud checks the online TV program for him. If...... Listed ur Home Automation Projects, Internet – Ethernet – LAN Projects
243. The Musical FootBall This project is to construct a musical football. The reason for my project is that I was inspired by a little kid with austim who love sp music. So what better way to have fun then have a ball that you can play with...... Listed under: Game – Entertainment Projects

244. Simple Arduino L.E.D Police Lights This was one of the first programs i wrote for the arduino after having it a few days ☺ we will be making l.e.d police l with minimal materials Step 1: You will need. You will need Arduino (or suitable clone) Breadboard 2x 240ohm resistors...... Listed under: Car Projects, LE Projects, Projects

245. Lightning Shutter Trigger for a Camera using Arduino I knew there were devices that could trigger a camera to fire during a lightning strike, but their circ were more complicated than I wanted to make. I'm a software guy not a hardware guy so I decided to use an Arduino and that allowed me to write a...... under: Projects, Video – Camera – Imaging Projects
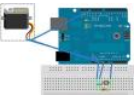

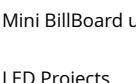

246. Dr Blinkenlights... (or how I learned to afford the BlinkM) I love the idea of the BlinkM (individually addressed RGB leds controlled with 2 pins), but not so the price (nearly 15 quid each!). Luckily, the hardware is open source and somebody has brought out an alternative firmware (although if you know whe Listed under: LED Projects

247. Arduino wall avoiding robot This instructable assumes very little with respect to prior knowledge. If there are any areas you feel could be improved or cla please feel free to message or comment and I will update. Here are all the details you need to produce a simple wall...... 248. Power Quality Meter (PQ Monitor) using Arduino Arduino UNO project, Power Quality Meter, someone would call it's PQ Monitor or PQ Analyzer. I had a published one blog devoted RMS voltage measurements on full band 20 – 20 000 Hz audio signals. (Following my own style, I'd refer to already publis Listed under: Metering – Instrument Projects, Projects

249. Audio VU meter with Extra wide Dynamic Range 69 dB using Arduino O'K, after having some fun with stereo version of the VU meter I described in my p blog-post, now it's time to do a serious stuff. Studio grade VU meter !!! 24 steps, equally spaced every 3 dB, covering Extra wide Dynamic Range from -63 to…… Listed under: Metering – Instrument Projects, Projects, Sound – Audio Projects

250. Light Suit Why build a light suit? Probably because I've watched tron a few too many times (the 1984 version of course). I'd just discovered arduino and w excited, I'd made LED's flash and buzzers sound but now I wanted to make something new and interesting,…… Listed under: LED Projects

251. Dot Matrix Printer from a CD/DVD Reader with Arduino Hey! Some time ago while going through the pages here in Instructables, something catch my att a printer made of a CD reader, and i was amazed. I thought: "This is incredible, I have to make one!" I know that these kind of projects don't…… Listed ur CNC Machines Projects, Video – Camera – Imaging Projects

252. Arduino powered hangman giftbox/lockbox A medium sized box that requires the user to succeed in a game of hang man in order to gain access to the contents of the b Great gift Idea!!! my Arduino sketch will be included in this instructible sorry for the poor quality pictures!…… Listed under: Game – Entertainment Projects

253. Measure RPM – Optical Tachometer using Arduino This Instructable will show you how to make a Portable Digital Optical Tachometer using an Arduino U This project is inspired from This instructable and is an enhanced version of it with an LCD display and a modified code. Instead of a slotted sensor ,…… under: Metering – Instrument Projects

254. How to build an Arduino WiFi 4×4 with Android Controller RC cars can be WiFi Cars…? RC cars are cool, but cheap RC cars have limited range and can on controlled with the particular controller that was included with the car. I purchased a RC jeep, complete with 4 wheel drive, flexible suspension, and…… L under: Arduino Android, Internet – Ethernet – LAN Projects, Projects

255. Autonomous Control of RC Car Using Arduino This instructable shows how to modify an inexpensive RC car so it can be controlled by an on-board microcontroller. You can program the controller to make the car do any number of driving patterns and stunts. Once you have the car being controlled the…… Listed under: Car Projects, Game – Entertainment Projects, Projects

256. How to make a robotic dart shooting sentry Tools: Hot Glue Gun Laptop with Arduino software 22 awg hookup wire (black, red, yellow) wire strippers usb drill 1/16th drillbit exacto knife Parts: 2 tongue depressors 1 clothespin 1 rubber-band 1 dart 1 cup (paper or plastic) 1 arduino 1 breadboard 1 led 1 mo button…… Listed under: Robotics – Automation Projects

257. Controlling Hand Drill with Roboduino using Arduino This will explain how we re-purposed a hand drill to re-spool solder using a roboduino (arduino compatible), two servos, and a DIY encoder. While one could use TRIACs to play with the AC power going into the drill, just using a servo to control the throttle…… Listed under: Motor Projects, Projects

258. Adding CV inputs to the Auduino granular synth When I first got into the Arduino I went looking for audio projects. One of the first things I built was Toba Auduino granular synth. I was so impressed I built a permanent unit in a heavy duty enclosure and incorporated it into my occasional…… Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

259. GoFly – paragliding/hangliding/gliding altimeter-variometer from Your car navigation using Arduino GoFly is a project based on PNA (car navigation devic Windows CE), LK8000 tactical fligh computer software and variometer (altimeter) external input based on Arduino board and pressure sensor. Why? -You build this for about 150$, -Your ordinary PNA (Personal Navigation Assistant) changes…… Listed under: Car Projects, Metering – Instrument Projects, Pro

260. Quick and Easy Arduino Nightlight Honestly, how many people have been in this scenario (leave a yes or no in the comments) : It is 2:30 in the morning a wake up with a need to do something whatever that may be (bathroom, forgotten homework assignment, project due in…… Listed under: LED Projects

261. Using an Arduino to Control an Infrared Helicopter In this Instructable we will explain how infrared signals are used by a remote to control a toy or devic show how a simple circuit can be added to an Arduino to operate the same device through free, Open Source software. This document is part of…… Liste under: Game – Entertainment Projects, Internet – Ethernet – LAN Projects, Projects

262. USA Flag made with diffused LED using Arduino USA flag constructed using a total of 2,301 diffused red, white and blue LEDs completed with Arduino sk animations, I hope this instructions helps anyone who wants to try this out. This flag can be displayed during the 4th of July, memorial day or during……

263. Arduino Skateboard Speedometer Using an Arduino, it is easy to make a speedometer/tachometer for virtually any man-powered vehicle. I made one fo skateboard that used a small magnet to count revolutions and utilized an LCD display screen. This Instructable will show you how you can do the...... Lis under: Game – Entertainment Projects, Metering – Instrument Projects, Projects

264. Automate Your Garage Opening Times 1. Background My 1st project with Apduino Online was about to solve a simple problem, close the garage door af sunset, when it has been left open. We have a garage in the basement, which is used not only for car parking, but gardening tools...... Listed under: Hom Automation Projects

265. How to control arduino board using an android phone and a bluetooth module In this tutorial you'll learn how to use a bluetooth module and MIT's app inventor to create a wireless serial link between an android phone and an arduino board. Here is a short video showing an example app I created. I'll des how to do...... Listed under: Arduino Android, Internet – Ethernet – LAN Projects, Projects

266. Quantifying Access to your Mind using Arduino So, I manage a creative technology lab at California College of the Arts. It's essentially an educational hackerspace for art and design students. Pretty awesome, right? After graduating from the University of Minnesota with a degree in mechanical enginee was desperately trying to find...... Listed under: How To – DIY – Projects

267. Control Servo with Light using Arduino Hello! In this Instructable i will teach you how to control a servo using a Photocell. This is very simple and good fo beginners. Step 1: Materials 1 x Photocell 1 x 10k Resistor 1 x Arduino 1x Breadboard 1x Servo and some jumpers Step...... Listed under: Motor Projects,

268. Arduino Wireless Animatronic Hand BTW!!!!! This instructable is awsomeeeeeeeThis is a very simple but at the same time a very hard project depending o skill level. Lets get to building! What this is, is a wireless animatronic hand that doesn't need a computer to operate. The user wears...... Listed under: Pro Sensor – Transducer – Detector Projects

269. Binary/ Analog Clock I was inspired by the digital/ analog clock to make my own special clock as my second instructable. I browsed the internet and foun servo clocks are rare and binary are common. So i decided to combine the two and this is what I...... Listed under: Clock – Timer Projects

270. Control anything remotely with Infrared signals using Arduino Who would have thought that just about every Arduino attachment can be controlled in so way with a TV remote? Now its time to find out how. Arduino.skp141 KB Step 1: Setup and Materials The setup for this is quite basic. The real challenge i Listed under: Projects, Radio Projects

271. How to make an Arduino from scratch Frugal Engineering is the best way forward for science. If you're interested in making some arduino's from scratch come to the right place. You can see a video tutorial of this instructable : here It will supplement any loopholes or doubts you may...... Listed under: How DIY – Projects

272. Arduino Bluetooth Serial Connections This is an introduction on how to setup, make a basic connection, and send data to and from an Arduino using Blu Bluetooth is great for transmitting data over medium distances and what's more, Arduino just treats it like a serial data connection. This means...... Liste Other Projects, Projects

273. To blink LED from mobile phone or iPod or another computer via WiFi Hello Everyone, I like this site too much, the site really played very important role awakening my enthusiasm and creativity. This is my first project and its really for the first timers project. I got this project from Instructible site , modified access...... Listed under: LED Projects

274. RGB LED Strip Circuit with Arduino This Instructable covers the assembly of a circuit capable of PWM-ing (pulse width modulating) a high-power RGB LED and programming an Arduino to cycle through a range of colors. In this context, "high power" is 9-12 volts. I will discuss how to mount a...... Listed under Projects

275. Arduino – Control LEDs with a Remote Control Step 1: IR library First you need to go to this page and download the IR library. You just need to follow the me file to install. I think that any IR remote control can do this, I'll be using a Philips Universal one....... Listed under: LED Projects

276. 'Knock Back' – A Knock Echoing Arduino This is a simple Arduino sketch that was originally designed to experiment with arrays and the built-in timing functionality. I based it on the tutorial sample code http://www.arduino.cc/en/Tutorial/Knock The system consists of a piezo sensor connected to an ana that listens for a knock from...... Listed under: Sensor – Transducer – Detector Projects

277. How to Build a Robotic Hand with Haptic Feedback using Arduino For science fair this year, I felt like building something instead of doing an experiment. needed to do was look around Instructables for a project idea. I was inspired by njkl44's robotic hand since it reminds me so much of stuff out of...... List under: Projects, Robotics – Automation Projects

/

278. Arduino Tutorial: Capacitive Touch Sensors Hello everyone! This instructable is a tutorial that will guide you on using the Capacitive touch sensors with A A Capacitive sensor is a kind of touch sensor, that requires little or no force to activate. In this Instructable about capacitive touch sensing, I'll show...... Li under: Sensor – Transducer – Detector Projects

279. Make Wired Robotic Arm Edge to "Wireless" with DIY Arduino and XBee UPDATE: Added Schematic, Top Layer PCB, Bottom Layer PCB, and both Top, Bott images When I finished the "RevIO" - an Arduino Clone that has the different way of exposing pins usage. I decided to go further to the next project. To t my...... Listed under: Projects, Robotics – Automation Projects

280. 7-Key Slider/Wheel Tutorial with Synthesizer This is a tutorial for using the 7-Key Slider/Wheel Breakout from Rachel's Electronics. I'll show you how to so the header pins for maximum usability. Rachel's has the QT1106 datasheet on their site, and a great arduino library for this breakout. The kit from...... Lis under: Sensor – Transducer – Detector Projects, Tutorials

281. Arduino Watch with Nokia 3110 screen My goal for this project is to make a watch with selectable dials, stopwatch and millidays. This idea started with a fools prank about metric-time. (http://www.youtube.com/watch?v=K35xG1buyFA) First I wanted to make a metric clock but soon this idea evolved from a watch into...... Listed under: Clock – Timer Projects, Phone Projects, Projects

282. Uber Home Automation w/ Arduino & Pi A few years ago, I became a dog owner for the first time. I didn't like leaving Cody in the kennel alone all day. I h webcam on him, but I couldn't watch it all day long. What if he was in some kind...... Listed under: Home Automation Projects

283. Come Home! Connecting Distant Spaces EASILY over Web using Arduino Can you believe that we live in an age where you can touch an object (any objec and a light will turn on in your loved-one's space - even if they live in a different city, state, or...... Listed under: Home Automation Projects, Internet – Eth LAN Projects

284. Simple 2-way motor control for the arduino When I say simple, I don't mean use a speed control. But control the motor directly without any external circ Here's how: How this came about: I recently was working on an instructable about charlieplexing with an arduino. And I was wondering if the same princ Listed under: Motor Projects, Projects

285. Assembling the 8×8 LED Board Kit These are step by step instructions for assembling the 8x8 LED Board kit from moderndevice.com. I had never played LED displays before using this kit. I suggest reading through all the assembly steps BEFORE starting to solder because assembly order DOES matter with Listed under: LED Projects

286. CatGenie: A smart, resettable SaniSolution cartridge The project This project follows on from the excellent work by ScotSEA and his Arduino reset progra http://www.instructables.com/id/CatGenie-Resetting-a-SaniSolution-Cartridge/). I had never taken my Catgenie apart as Scott did, but had built a small board instead. I had previous updated Scott's program to...... Listed under: Security – Safety Projects

287. My Ninth Project: Robot Arm with Joystick Shield using Arduino Although it is great controlling the robot arm with computer or mobile phone, I think usir joystick is also cool, so I've bought a joystick shield and make a new project. This joystick shield is compatible with Arduino. It also support Nokia 5110 LC module,...... Listed under: Robotics – Automation Projects

288. Beat Sync using an Arduino Beat Sync is a single frequency audio spectrum volume meter. It can isolate around a certain frequency (I choose the bass) display it on a creative 8 segment LED bar graph. This is meant to be quite simple, yet allowing room for...... Listed under: Projects, Sound – Audio Proje

289. Laser Tag Stuffed Animals Ever feel like there aren't enough toys at the intersection of cuddly and terrifying? Wish your stuffed animals could double as weapons? Then I've got the toy for you. These Laser Tag Stuffed Animals easily transform from being a cuddly night light to the world's...... Listed under: Projects

290. Arduino and L293D Robot (Part 1) Here is part 1 of the Arduino and L293D Robot.This is part of a series of instructables leading to a Line follower Robo a basic Robot made by controlling two motors via the L293D chip through an Arduino Board. I have done this project in...... Listed under: Projects, Robot Automation Projects

291. Mini BillBoard using Arduino Designing a Mini BillBoard using LED Lights(different colors) , Arduino and Bread Board. Thought of creating a mini billboard, that could disp name ("Josh") . This is for one of the build nights (required us to use LED lights). This billboard would blink in...... Listed under: Game – Entertainment Pro LED Projects

292. D-Led Shield v1.0 (for monitoring) Good day fellow enthusiast! Here is one of my latest and simplest shield designs for an arduino board. The thing here sometimes we have a hard time checking out which I/O pins are LOW or HIGH, especially when we are dealing with LED, motors,...... Listed under: LED Pr

293. How to Make Musical Floppy Drives using an Arduino My brother posted a video about this on facebook almost a year ago. Some old floppy drives playi Bach's masterpiece Toccata & Fugue and it got me really interested. So I read about it when the author posted a how-to on his blog and did a couple of tweaking...... Listed under: Game – Entertainment Projects, Projects, Sound – Audio Projects

294. Pimp My Zoomobil using Arduino I recently put together the Playmobil Zoomobil for my kids. As I was busy snapping all the pieces together, I became more convinced that this cart had been made to have lights. It's hard for me to believe the original product designers at...... Listed under: Game – Enterta Projects

295. Using a Dot Matrix LED with an Arduino and Shift Register The Siemens DLO7135 Dot matrix LED is one amazing piece of optoelectronics. It's billed as a Matrix Intelligent Display (r) with Memory/Decoder/Driver. Along with that memory, it's got a 96-character ASCII display set with upper and lower case characters, a built-in character generator...... Listed under: LED Projects, Projects

296. SYNTHDUINO The synthduino is a fun arduino project to do and as a beginner it is a great way to learn new things about arduino's many features. With using household items to build the synthduino you will be satisfied with the finishing project and feel...... Listed under: Game – Entertainment Projects

297. Arduino Controlled ATX Power Supply Can a microcontroller control its own power? Well nearly! An ATX power supply, either new or from an old PC, is a way to power Arduino and other microcontroller projects. That is covered in several 'ibles such as this one. However, because of some...... Listed under Projects, Projects

298. Reading Digital Callipers with an Arduino How to use an Arduino to read the signal from a set of digital callipers and send the reading over USB. Why? Th be useful for accurate position sensing in home made / hacked computer aided manufacture systems. Adds USB functionality to your callipers....... Listed Interfacing(USB – RS232 – I2c -ISP) Projects, Projects

299. Personalised Word Clock using Arduino Build a unique personalised gift that's cool and reflects the character of the recipient. What's different about this Clock is that it is small enough to sit on a bedside desk, displays the recipients name and has personalised messages that appear at different times...... L under: Clock – Timer Projects

300. Arduino String Instrument Sure you can use LDR's, potentiometers and buttons to generate sounds, but what about strings? When I began thinking abo Arduino string instrument, I realized what I wanted to create was a soft potentiometer. I found my inspiration from Hannah Perner-Wilson's Fabric Potentiometer http://www.kobakant.at/DIY/?p=543. Step...... Listed under: Metering – Instrument Projects

301. Autonomous Paintball Sentry Gun using Arduino Make your own, custom AUTONOMOUS SENTRY GUN! A Microcontroller Contest Finalist and Runner U instructable is out-of-date. For the most recent version of the tutorial, see the website . Cheers! This sentry gun autonomously tracks, aims, and shoots a targets, using: -An airsoft or...... Listed under: Arduino Programmer Projects, Projects

302. BUGBot – Light Follower Robot using Arduino The figures above shows the basic idea of any robot, where we have some inputs and output devices conn the brain and some outputs controlled by the brain. In our case we will have the Arduino like the brain. The central Brain, controls all...... Listed under: Pr Robotics – Automation Projects

303. The "all in one box" aquarium feeder using Arduino Step 1: Things you will need the images show you what you need. you will also need (but is not show picture soldering iron shrink tubes lighter 5 volt power supply usb cable (to program you're arduino) info on the foamed pvc sheet...... Listed under: Ho Automation Projects

304. Dirt cheap Arduino LED light bar This instructable was designed for beginners in mind, but advanced users can easily adapt it to fit their needs and want only uses a few common components, so you shouldn't have much trouble putting this together. It's a good waste of 5 minutes with...... Listed under: LE Projects, Projects

305. Intelligent Solar Garden Light using an Arduino- Part 1 I bought a solar powered garden light. The solar panel charges the batteries and when it gets dar lights (3x LEDs) turn on until it either gets lights again or the batteries run out. It has a small amount of intelligence (turns on when...... Listed under: Batt Projects, Home Automation Projects, Projects

306. Kickstarter Backer Alert with Stats Scroller, using Arduino Yun The Arduino Yún is a curious addition to the Arduino family. There is a fairly widespread community surrounding the Arduino concept, platform and software. There's another popular community dedicated to hacking and improving inexpens wireless routers, which often run Linux. The Yún combines the two...It's...... Listed under: Car Projects

/
307. Interactive Stereoscopic Installations: visual rupture with the Diplopiascope What is it? This is an ongoing project that i've been working on to see the pot of interactive stereoscopic installations in examining the perceptual process. I use a setup that i've called a Diplopiascope to investigate this. The Diplopi has gone through a few...... Listed under: Video – Camera – Imaging Projects

308. Make a 24X6 LED matrix using an Arduino After making a 8X10 matrix a lot of people asked me about expanding the matrix to some thing bigger, and sc wanted to write stuff to the matrix via a PC, so one day I looked at a pile of LEDs that I had leftover...... Listed under: LED Projects, Projects

309. 8×8 LED Matrix Animations using an Arduino For a party we were about to have I wanted a cool light display to use with my new Xmas present - an Ardu Uno. Having looked at the LED matrix's here I wanted a bigger one that I could hang on the balcony. I also wanted...... Listed under: LED Projects, Project

310. Arduino-Based Blue Box (Phone Phreaking) History and Story In the 1950s, 1960s, 1970s, 1980s and even up into the 1990s phone phreaking was an am cool way to explore an unknown world of phone switching networks. To "phreak" a telephone switch, can be done by using frequencies, or tones to...... L under: Phone Projects

311. Serial Servo Controller with Arduino I'm going to show you how to use your Arduino to control up to 12 servos at once with minimal jitter. Using a simple serial interface control the position of up to 12 servo channels. Up to 10 snapshot positions can be saved...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, I Projects, Projects

312. LED Watch using an Arduino This instructable will show you how to make your own arduino based watch that tells time using a matrix of LEDs. This is my instructable, so if something is unclear leave me a comment or send a message! I was inspired by all the...... Listed under: Clock – Timer Projects, LED Pro Projects

313. DIY a Spelling Game with an Interactive Robot using Arduino Did you hear before about Social Robot? Did you you see the Pepper Robot or Jibo robot? T kinds of robots that can hear you, understand you and make a social contact with you via sound, facial expressions and body gestures. Social robots hav various...... Listed under: How To – DIY – Projects, Robotics – Automation Projects

314. DinoCalc Version 1.0 (Arduino Pro Mini Protoboard Version) Latest Release: http://code.google.com/p/dinocalc/ Development: https://github.com/WeaselJones/DinoCalc This is a calculator without a LCD that tells you if your math answer is right or wrong, without giving you the a This instructable will show you how to make this simple math checking...... Listed under: Calculator Projects

315. MP3 Interface for Arduino I have added a follow-on to this Instructable: http://www.instructables.com/id/Cheap-and-Easy-MP3-Shield-for-Arduino/ The f on shows you how to design, etch and build a PCB shield to connect the MP3 to the Arduino. Replaces the analog switches with a 74HC244. SIngle layer with large surface mount component design. Only...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, Projects, Sound – Audio Projects

316. Ethernet Switching – with Arduino Aim: Switch relays from the ethernet or the internet, using your mobile, tablet or computer with a nice graphical user interface. Update V4.06 Please read the below steps to Step 2 if you are viewing this article for the first time. Please go to step...... Listed under: Internet Ethernet – LAN Projects
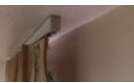

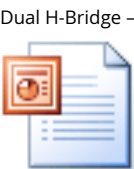

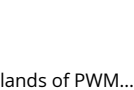

317. Virtual Etch A Sketch The Etch A Sketch: famous, creative, and unique. Unfortunately I have no clue where the one from my childhood is, so I decided to my own virtual one! Check it out (and my awful drawing skills) below. This Etch A Sketch is quite like...... Listed under: Game – Entertainment Projects
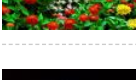

318. ATtiny programmer using Arduino ISP Thanks to: http://jeonlab.wordpress.com/ For relatively small (less number of pins than ATmega328) projects, ATtin series, ATtiny45 or Attiny85 are good choice in terms of its physical size (8-DIP or 8-SOIC) and low power consumption. There are many ways to program of the popular...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, Projects

319. TurtleDuino Object Avoidance Robot using Arduino Hello, in this instructable I'll be showing you step by step how to build the TurtleDuino, an object avo robot, with an Arduino UNO microcontroller on board. I designed the TurtleDuino using material from the hardware store (Home Depot) and all the ele from sparkfun.com...... Listed under: Projects, Robotics – Automation Projects

/

320. Home Automation: Drapes using Arduino Hate having to manually open and close your drapes? Hate getting back from work/school and your room is dreary? Do you want curtains that open and close themselves? Then you need Dr. Drape! Dr. Drape is an easy DIY project using an Arduino…… Listed under: Home Automation Projects

321. Convert a toy piano to work as a midi device and use it with Synthesia Goal of this project: Convert a cheap toy piano to work as a midi device and use it with Synthesia (http://www.synthesiagame.com/) Other programs that use midi inputs can also be used. Approach: The pushbuttons of the piano are used to simple pull-down circuit…… Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, Sound – Audio Projects

322. Tankbot – Internet Controlled Tank Robot using Arduino Do you remember a game called Tank Wars? This is an attempt to make a physical version of that classic arcade game. You, the player drive an Arduino powered tank and fire a laser at a target. This project uses an Arduino to control a tank…… Listed under: Internet – Ethernet – LAN Projects, Projects, Robotics – Automation Projects

323. Guitar Tuner for the Blind (using an Arduino) How to modify a guitar tuner so it can be used by a blind person This build uses an Arduino Pro mini microcontroller, (all code is provided). This project was undertaken for the charity Remap, which provides custom-made equipment for people with disa Summary Begin with…… Listed under: Sound – Audio Projects

324. An FM Stereo Broadcaster PLL using Arduino I have two good AM transmitters - one I'd built using a single 6888 Tube plus an old KnightKit Broadcaster t refurbished, as well as a high-quality solid state transmitter from SSTRAN that I use to play music over the several antique AM radios I've repaired…… Lis under: Projects, Radio Projects

325. AC Arduino dimming circuit THANKS TO CONCERNED VIEWERS, I HAVE LEARNED THAT THIS IS NOT SAFE AND SHOULD NOT BE REPLICATED. SO PLEASE D TRY THIS ☺ THANKS TO EVERYONE WHO COMMENTED, I LEARNED A LOT I am not an engineer, just an experimenter and hacker and prototyper etc,…… under: Home Automation Projects, Projects

326. Tiny Altoid Tin Robot With Personality I love robots. Normally the ones I build are quite large and wouldn't fit in your pocket, but for a change of pace I d would try something small and fun! This robot is exactly that, and in fact fits inside of an altoids…… Listed under: Robotics – Automation Projects

327. 5×5 LED Cube using Arduino Uno This is a step by step explanation of how to build a 5x5 LED cube using an arduino. I did this project for my undergrad electronics class and it took me about 2 weeks to complete. Note: Apparently, some of the links for the supplies…… Listed under: LED Projects, Projects

328. Self-Watering Plant using an Arduino Plants liven up any space by adding a sense of airiness and life. That is - of course - when you don't forget to water and they shrivel up and die. I am very bad at remembering to water plants. That is why I…… Listed under: Home Automation Projects, Projects

329. Froggy World 5 The Coffee Gripper In Froggy World, the amusement park for adventurous plastic frogs, it became necessary to to move the frog from a t back to the catapult. Because I couldn't know whether the frog would be upright or sideways--and in what orientation--the gripper was a challenge……. under: Home Automation Projects

330. Dual H-Bridge – Arduino L298 Breakout Board This is my homemade Dual H-Bridge using the IC L298N. For control DC motors or step Motors ao other purposes just like need. Breakout L298N.ppt1 MB Step 1: Hardware and Materials This is the basic schematic. It works perfectly. A more advanced schematic and…… Listed Arduino Android

331. Interfacing a Digital Micrometer to a Microcontroller We had a project that required connection to a digital micrometer with a data output jack. The idea connect a microcontroller to the micrometer, to read the measurements and make decisions based on the readings. The micrometers that we used are by…… Listed under: Metering – Instrument Projects

332. Bubble Wall | Interactive, Inflatable Panel Bubble Wall | Breathing Wall Panel System Interactive, Inflatable, Playable Wall Brief Project Description This w artistic piece installed for a digital fabrication show at the University of South Florida School of Architecture and Community Design. While this brief is sp this panel,…… Listed under: Game – Entertainment Projects, LED Projects

333. Big Spectrum Analyzer with Arduino Let's put together a pixel strip with an HL1606, an Arduino UNO and the Spectrum Shield to build a seven bands "la Spectrum Analyzer of simple construction. The Strip used uses the HL1606 controller to allow direct management of each of the LEDs. The chip…… Liste Game – Entertainment Projects, Home Automation Projects, Projects

334. Wii Nunchuk Controlled Model Train using Arduino Using an Arduino microcontroller, an Adafruit motor shield, and a Wii Nunchuk, you can create a intu programmable, model train controller to run your layout. Amaze your friends. Entertain your kids. Not quite DC, not quite DCC. You're headed for the lands of PWM…… Listed under: Game – Entertainment Projects, Projects

335. A Facebook-Connected, Arduino-Powered Music Party Music party is a new way to listen to music with others. By tapping an RFID/NFC device that is syn... Facebook account on an Arduino RFID reader shield and sending that unique ID to Music Party server using the Arduino WiFly shield, we...... Listed unde... 336. DIY Arduino Board Water Meter Working with the interaction design team, a bunch of us at Teague have been tinkering with measuring water, analyzing data in realtime to affect behaviors, and storing it to see patterns over time. At the heart of the exploration was a need to cheaply measure water...... Lis... under: How To – DIY – Projects, Metering – Instrument Projects, Projects

337. Arduino LCD Metronome Connecting the LCD The first step is to wire up the LCD. The HD44780 has 16 pins: Pin 1 - Vss Pin 2 - Vdd Pin 3 - Vo Pin 4 - RS Pi... R/W Pin 6 - E Pin 7 - DB0...... Listed under: LED Projects

338. Garduino-Automated Gardening System using Arduino This instructable is a guide for setting up an automated gardening system using an arduino and c... cheap electronic parts. It allows sustainable gardening by using sensors to determine soil moisture, as well as a webscraper to determine future weathe... uses this information to save water by only...... Listed under: Home Automation Projects, Projects

339. Self-Contained 7x7x7 LED Cube LED cubes are true 3D displays that work by lighting up points in a 3D lattice of LEDs. On the 3D display you can produce... truly mesmerizing animations. This Instructable will walk you through creating an LED cube for yourself that is completely self-contained and powered.. Listed under: LED Projects

340. Burning the Bootloader on ATMega328 using Arduino UNO as ISP I had one remote controlled project that needed an Arduino running 24/7 but I didn't v... Arduino UNO, so I decided to buy some pieces and created my own Arduino. The most important part was buying the microcontroller. These were my.... under: Interfacing(USB – RS232 – I2c -ISP) Projects, Projects

341. How To Make A Board Game Using Arduino In this Instructable, we'll teach you how to create your own "Would you rather... " board game using conduct... paint, an Arduino microcontroller, and some electronics components. Players take turns moving along the game path as directed by an electronic dice ro... Along the way,...... Listed under: Game – Entertainment Projects, Projects

342. FuzzBot The FuzzBot is an awesome, fast, fully autonomous small Arduino robot that everyone loves!!! It uses the compact Pololu ZumoBot Chassis kit f... great drive system, and uses a Parallax Ping sensor to sense proximity, to make the FuzzBot fully autonomous. I like to...... Listed under: Robotics – Auto... Projects

343. Arduino camera Lens Controller My Lumix GH2 Micro Four Thirds camera not only shoots fantastic high definition videos, but with inexpensive adapters... can use it with older manual lenses that are cheap and often very high quality. I shoot a lot of performance videos for my daughter's dance studio, and I... Listed under: Projects, Video – Camera – Imaging Projects

344. Capacitive touch Mood light using Arduino This instructable is a quick write-up of my experience creating a multifunctional moodlight. Some basic know... electronic circuits is expected. The project has not yet finished, some adding functionality and tweaking has to be done but it is already functional. If you... are...... Listed under: Game – Entertainment Projects, Home Automation Projects, LED Projects, Projects

345. Arduino-plex 2.0: Modular Plexiglas Arduino Work Surface Last year I needed a board that I could stick my breadboards to, that would also securely hold... Arduino. I used some Plexiglas I picked up at Skycraft in Orlando and I glued everything together with Crazy Glue. This worked well, but it didn't...... Listed... Development Board – Kits Projects

346. The morse code generator by a PS\2 keyboard using Arduino Hi, all! Today I' m trying to explain you my last project: "The morse code generator by a PS\ keyboard" I' ve used an PS/2 keyboard to send input to my Arduino board (like described in here) and transform it in morse code that activate...... Listed Arduino Programmer Projects, Projects

347. Nokia LCD & Sensors using an Arduino Arduino: Nokia LCD & Sensors PROBLEM: Making my Arduino, a Temperature-Relative Humidity sensor and a Nokia3310LCD screen work together. Now, I'm a Lazy Old Geek, so what I wanted was an Arduino kit that would take shields. This Freeduino was the che... that I could...... Listed under: LCD Projects, Phone Projects, Projects, Sensor – Transducer – Detector Projects

348. Program an ATtiny with Arduino Follows are directions for programming the ATtiny microcontrollers using the Arduino IDE. In plain English, this is how to program 8-pin Atmel chips as you would normally an Arduino. This is cool because the ATtiny is tiny, and - well - this allows you to...... Listed under: Ardu...

Programmer Projects

349. Stupid Simple Arduino LF RFID Tag Spoofer RFID tags are all over the place. They're used in building access control systems, passports, inventory tracking . . . This instru will show how you can use an Arduino and a few simple components (wire coil, transistor, capacitor, resistor) to make a device...... Listed under: Projects, RFID - NFC proje
350. Ultrasonic Tape Measure using Arduino Have you ever wanted an ultrasonic tape measure, like this Stanley? (See picture). Well, I have but then I am a La Geek. I don't really need one but I thought I'd try to make one. And naturally, I thought of an Arduino. August...... Listed under: Metering – Instrument Pro Projects

351. Interface Arduino to MySQL using Python Here's a brief tutorial that should get you up and running interfacing your Adruino with a MySQL database. Fo sake of this tutorial, I am assuming you know how to set up and use MySQL. This tutorial does not require much Python experience, but...... Listed under Interfacing(USB – RS232 – I2c -ISP) Projects, Internet – Ethernet – LAN Projects

352. LDR Robot using an Arduino LDR Robot with IR and a Servo The LDR/IR Robot is designed to seek out light and avoid obstacles. The robot uses the Light Dependent Resistor to seek out light and the Infrared Sensor to detect and avoid objects in its path. The following are...... Listed under: Projects, Robotic Automation Projects

353. Jeopardy Ring-in Buttons with Built-in Rules using Arduino There are several good Jeopardy/Game Show lockout buttons/buzzers, but none incorporate t timing rules of Jeopardy. I am learning about the Arduino and I thought that this would be a great project to practice with. The rules include a question r period with no timeout...... Basically I wanted to animate a skull when I spoke. Added bonus, now the skull puppet would also have a scary…… Listed und Projects, Sound – Audio Projects

475. DIY Arduino Remote Control and Lego RC Vehicle!! UPDATE (8/29/13): Thank you readers for your enthusiasm and kind remarks regarding this project! It been a tremendous journey since I started this project back in March, but I am very glad with the resulting product and the excitement with which it has received…… Listed under: How To – DIY – Projects, Robotics – Automation Projects, Sensor – Transducer – Detector Projects

476. 3-dimensional Star Cluster using an Arduino This instructable will guide you through the process of making your very own star-cluster from LEDs and ac made this piece for my electronics final project at college and had access to a machine shop. This instructable assumes that you have access to similar… under: Home Automation Projects, LED Projects, Projects

477. Matrix sound machine: Generative music with a particle system using Arduino This project is a part of experiments done while doing an artist in residen Instructables. You can see the other projects here. Creating emergent patterns that can be converted into sounds fascinates me. So this is my first exper in building an arduino platform for…… Listed under: Projects, Sound – Audio Projects

478. Lite Brite LED clock using an Arduino Lite Brite pegs look like LED's don't they? That's what I though the other day after working on an LED cube for a few I happened to see my daughter's Lite Brite sitting there, and I looked at the pile of LED's on my…… Listed under: Clock – Timer Projects, LED Projects, Pro

479. DIY 3D Controller using an Arduino Make a 3D interface using an six resistors, aluminum foil, and an Arduino. Take that, Wii. Update: a much more thoro explanation of this project is available from Make Magazine. It might be easier to follow their instructions, and I think their code is more…… Listed under To – DIY – Projects, Projects

480. Analog Fabric Joypad using an Arduino How to make an "analog" input device from fabric and a few other necessary materials. "Analog" in parenthesis because, although made up of 4 analog inputs, the only analog transition between the directions (up, right, down and left) comes from the buffering material…… Listed under: Game – Entertainment Projects, Projects

481. "12 Thumbs" R/C LEGO Dragster Impressed by these two LEGO® Dragster sets, a 250 pieces LEGO®TECHNIC Dragster 8847 (released in 1983) and a 391 Top Fuel Racing 5533 (released in 1999). These two Dragsters inspired me to build my own LEGO® dragster, the "12 Thumbs". The name "12 Thumbs" ca after I…… Listed under: Other Projects

482. An Arduino Powered (Scale) Speed Trap After a break of around two decades I've recently started building a model railway. One of the issues I've faced is to work out how fast I should be running the trains so that their speed reflects reality given the scale at which they…… Listed under: Metering – Instrume Projects, Projects

483. Strandbot – a solar & arduino powered R/C motorized Strandbeest The Strandbot is a DIY upgrade for the Strandbeest originally designed by Theo Janse Strandbeests are amazing mechanical creatures that are able to move on their own using just a little bit of wind power. Unfortunately my tiny apartme short on wind, so I…… Listed under: Motor Projects, Robotics – Automation Projects

484. Make your own programmable thermostat for $66 with Arduino This project will show you how you can create your own programmable thermostat with temperature probe, an LED readout and ability to remote control outlets. The core of this project is actually a driver for a 4 digit seven segment display. are lots uses for…… Listed under: Projects, Temperature Measurement Projects

485. Online Thermometer using Arduino One of the projects in Practical Arduino is the "Online Thermometer", which combines an Ethernet shield with a nur DS18B20 1-wire temperature sensors to allow you to read multiple temperatures and make the values accessible using a web browser. In that project I chose…… Listed under: Temperature Measurement Projects

486. Self-balancing skateboard/segw*y project Arduino Shield General purpose Arduino shield for self-balancing machines. Why did I make it? I previously made an Instructab 2010 on how to build a self-balancing skateboard. http://www.instructables.com/id/Easy-build-self-balancing-skateboardrobotsegway-/ There are >500 comments on this many express confusion setting up the balance sensors, software and electronics……. Listed under: Development Board – Kits Projects

487. How to control LED's with Processing and Arduino The other day I was confronted with an interesting problem, I needed to control a series of lights from interaction on a computer screen and it had to be as inexpensive as possible. I instantly thought of an Arduino. It had everything that I needed,...... Listed under: LED Projects, Projects

488. Arduino Waveform Generator Shield Waveform generators (also called function generators) are useful for testing and debugging circuits. They can be us test the frequency response of electronic components like op amps and sensors or to characterize and troubleshoot audio effects boxes and pedals. Thi waveform generator shield is...... Listed under: Projects, Radio Projects

489. DIY Flex sensor using Sugru and graphite powder (Resistencia flexible usando Sugru y polvo de grafito) Este es el primero de 5 instructables que surgiero Instructables & Sugru build night (and day en nuestro caso) que hicimos en el Laboratorio de Juguete, el 20 de julio del 2013: una Resistencia Flexible o Sensor hecha con Sugru y polvo de grafito:...... Listed under: How To – DIY – Projects, Sensor – Transducer – Detector Projects

490. Arduino Audio DAC Options DAC is short for Digital to Analog Converter. In this article we play around the code Michael Smith created for a PWM based DAC. I modified h so that other DAC options could be tried. I compare the 8-Bit PWM DAC with the R2R...... Listed under: Projects, Sound – Audio Projects
491. Laser Shooting Game This laser game is a simple project that utilizes an Arduino mini. All target boards have an Arduino, sensors, and servo control port Shooting the target center triggers the servo and the board falls flat. Step 1:What you need [box color="#985D00" bg="#FFF8CB" font="verdana" fontsize "...... Listed under: Game – Entertainment Projects

492. Clock Two – Single digit clock using Arduino Time for another instalment in my irregular series of clock projects. (Or should that be "Time for another ins in the series of irregular clock projects"?) In contrast with the extreme "blinkiness" of Clock One, in this article we describe how to build this single-digit...... under: Clock – Timer Projects, Projects

493. Your Image on an Arduino! – TFT LCD Screen Guide Have you ever heard of TFT LCD screens? They are great ways to display information from your Ardu display pictures. The Arduino team just released an official TFT LCD screen with their new Robot at Maker Faire 2013. It's very easy to get started...... Lis under: Video – Camera – Imaging Projects

494. Multiplexing 7 Segment displays with Arduino and Shift Registers In this instructable, I will be teaching the basics of multiplexing 7 segment displays usir Arduino and a couple of shift registers. This project is well suited for displaying numerical information or if you want to control a bunch of LEDs. For beg like me,...... Listed under: Calculator Projects, LCD Projects

495. DIY 3D Laser Scanner Using Arduino Maker Alessandro Grossi sent us this great DIY build for a 3D scanner built using a laser, a DSLR, and an Arduino co Allesandro is a Mechanical Engineer, holding a Ph.D. in product design. His day job involves helping designers and manufacturing firms develop and...... under: How To – DIY – Projects, Projects

496. IPod Information Screen Rev. 2 I'm not usually one to revisit a project after I've finished it, but I made an exception because the problems with the origin design were making this device unpleasant to use. For those of you just now viewing this project, it is the second iteration...... Listed under: LCD Projects

497. An Arduino RSS Feed Display This Arduino project will display RSS feed headlines on an LCD via an Arduino and a USB cable. It works quite well, and lets keep up with the world news while you're sitting at your desk. Many of the values in the code can...... Listed under: Internet – Ethernet – LAN Projects, LC Projects, Projects

498. Arduino Powerd, RGB + White LED, Bluetooth controllable, Floor lamp A couple of mounts ago i order a 1M long WS2801 RGB led strip, just for fun. I took me a while to ge strip working with my Arduino. The next step was to figure out what to do with the strip. after some...... Listed under: LED Projects

499. Rainbow Jar – RGB Pixel Strip Controlled via Arduino Our most popular item on our display at Maker Faires is always the Rainbow Jar. One customer has replicated it so we thought we'd share how we made it so you can make your own! https://vine.co/v/hqxpVgdFQ9z (tried embedding this vine but it brea instructables!) Step…… Listed under: LED Projects

500. ARDUINO with XBEE- WIRELESS SETUP DEMO This video describes how to configure two Series 1 XBEEs using Arduino UNO board.The ways of m way communication is also tested on Wireless mode. Overview The Xbee shield allows an Arduino board to communicate wirelessly using Zigbee based on the Xbee module…… Listed under: Development Board – Kits Projects, Projects

501. Super Simple Arduino Powered Roomba Scheduler Like most people I was skeptical about getting a robotic vacuum cleaner, so as a trial run I thought I v buy the now obsolete iRobot Roomba 530 which was heavily discounted (they're still available in Australia, showing how behind the times we are). Of…… under: Robotics – Automation Projects

502. Arduino String Case Change Functions Code The String case change functions allow you to change the case of a String. They work just as their names im toUpperCase() changes the whole string to upper case characters, and toLowerCase() changes the whole String to lower case characters. Only the chara to…… Listed under: Development Board – Kits Projects, Projects

503. Blink LED using Arduino This example shows the simplest thing you can do with an Arduino to see physical output: it blinks an LED. Circuit To build the c attach a 220-ohm resistor to pin 13. Then attach the long leg of an LED (the positive leg, called the…… Listed under: LED Projects, Projects

504. Yogy – The Arduino Powered Robot Made For Kids In this Instructable I will show you how to make a cute and kid friendly Obstacle Avoiding Robot I like t Yogy. Yogy gets his name from the Yoghurt tub body he is made from. I am a sucker for seeing the best in…… Listed under: Robotics – Automation Proje

505. How to control 8 leds using Arduino UNO hey guys this is my first arduino project plz comment how u feel. Step 1: Things u need As this is easy project for beginner's so are also simple Parts: 1- Arduino uno or any other board will work 1-Beardboard 9- jumper wires or…… Listed under: LED Projects, Projects

506. Analog Write with 12 LEDs on an Arduino Mega This example fades 12 LEDs up and the down, one by one, on an Arduino Mega board. Circuit image dev using Fritzing. For more circuit examples, see the Fritzing project page Connect the longer, positive legs of (anodes) 12 LEDs to digital pins 2-13 through 2 current limiting resistors. Connect…… Listed under: LED Projects, Projects

507. Digital/Analog Clock – Arduino + PaperCraft In this instructable we will be recreating a clock inspired by Alvin Aronson's original design. When I first saw t clock I was very impressed by how clean an elegant the design was I immediately wanted to recreate this effect. I hope some of you feel…… Listed under Timer Projects

508. Arduino Hello World Blink Code This is a basic example how arduino works. In this arduino projects you'll see how arduino control LED on for 1 second a for 1 second repeatedly. Instruction; 1) Connect cathode lead of LED (shorter lead) to ground pin and anode lead of LED…… Listed under: LED Projects, P

**509.** Autonomous Autonavigation Robot using Arduino This is a step by step guide to build an autonomous navigation robot. We use the Arduino microcontr control this robot. We have two different programs for this robot. The first enables the robot to drive around and avoid anything that gets in its…… Liste Projects, Robotics – Automation Projects
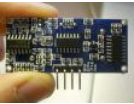

510. AAA Robot (Autonomous Analog Arduino) The AAA Robot is a perfect robot for beginners. It is versatile, easy to build, and discusses many of the topics roboticists need to learn, including but no limited to transistor switches, motor driving nad analog sensors. This Instructable includes step-by-step instru on how to…… Listed under: Robotics – Automation Projects

511. An Arduino Thermometer with Digital Display This is a project for Arduino to make a Thermometer with Digital Display, aimed at beginners. Arduino measures the voltage on a TMP36 Temperature sensor, converts the Voltage to Degrees Celcius and Displays the value on an LOL shield display. Objectives: * Learn to...... Listed under: LED Projects, Temperature Measurement Projects

512. Cell phone text using an Arduino Arduino text'in. Key Features: 24 relays controlled by 4 I/O lines! Cell phone text using your Arduino. This project hacks a phone to text using normally open relays. After investigating cellular modules on the internet I decided it looks not only rather pricy, but...... Listed under: Projects, Projects

513. Thermal Camera Have you ever had the desire to see what can not be seen? I never had the ability to see in thermal infrared, and it is rather cool to be able to see in the thermal infrared part of the electromagnetic spectrum. Unfortunately, most thermal...... Listed under: Temperature Measurement Projects, Video – Camera – Imaging Projects

514. Arduino FM radio receiver shield This Instructable will show you how to build your own FM radio receiver shield to be used with an Arduino board. The radio chip we are going to be using is the AR1010 on a breakoutboard found at Sparkfun or Electrokit and there will be code to get...... Listed under: Projects, Radio Projects

515. ArrDrownHo! – Easily convert AVR to Arduino Cap'n ArrDrownHo! is the lovechild of Ardweeny and Boarduino and he's here to commandeer your AVR ship. ArrDrownHo! inherits pros of both and cons of neither. Pick up an AVR chip and start prototyping instantly on a breadboard! Want to replace that costly chip in your project with a...... Listed under: Development Board – Kits Projects

516. Kaosduino: Create your own kaosillitaor using Arduino This project is a part of experiments done while doing an artist in residence at Instructables. You can see the other projects here. Inspired by Korgs Kaossilator I took it upon myself to build an opensource version of it. This way people can design new ways...... Listed under: Projects, Sound – Audio Projects

517. The Point Shooter Cyborg Mouse Control cyborg technology and revolutionize your PowerPoint presentations - build a wearable mouse! So you converted video glasses to a heads-up display glass. You built a wearable Raspberry Pi, pcDuino, or BeagleBone Black. Now, how do you control your cybernetic augmentations? You make a...... Listed under: Robotics – Automation Projects

518. Arduino Esplora Pong Want to play Pong on your computer with your Esplora? This example shows you how. This example is designed to be used with a Processing sketch. Processing is an open source programming environment. The Esplora reads the slider and buttons and sends data to the...... Listed under: Game – Entertainment Projects, Projects

519. Single button combination lock using Arduino Time for something different - a single button combination lock. Allow me to explain... Updated 18/03/201... Normally a combination lock would require the entry of a series of unique numbers in order to unlock something or start an action. For example: A more contemporary type...... Listed under: Projects, Security – Safety Projects

520. The Knock Box: Build a Knock-Sensitive Power Strip The Knock Box is a power strip with superpowers - it turns on your lamp whenever you knock on your nightstand. You get two outlets, individually controlled by knock-knock-knocking on a nearby hard surface. It's great for hitting the lights when it's pitch dark, or if an...... Listed under: Development Board – Kits Projects

521. Quasi real-time oscilloscope using Arduino Recently I was reviewing one of my oldest project, and decided to "refresh" previous design by taking full advantage of the new arduino Leonardo board. Based on AtMega32U4, which include PGA (programmable gain amplifier), oscilloscope's analog front end doesn't need external OPA this time, end...... Listed under: Metering – Instrument Projects, Projects

522. Arduino LED Bar Graph Code The bar graph - a series of LEDs in a line, such as you see on an audio display - is a common hardware display for analog se... It's made up of a series of LEDs in a row, an analog input like a potentiometer,...... Listed under: LED Projects, Projects

523. The Raspberry Pi – Arduino Connection The Pi is a fine little computer board, though not nearly as good as the Arduino when it comes to I/O capabilities. The beautifully-engineered Gertboard is a plug-in add-on that neatly overcomes this deficiency by giving the Pi access to an ATMega328, but it's a very...... Listed under: Development Board – Kits Projects

524. High Heel Massage using an Arduino My project is to make a heel (shoe) that senses when your foot is tired and then eases the pain. I will have a force se... measure how much pressure is on your foot for 3 minutes. If the pressure is at a certain measure...... Listed under: Home Automation Projects, Projects, – Transducer – Detector Projects

525. How to use a Piezo element to detect vibration using Arduino This tutorial shows you how to use a Piezo element to detect vibration, in this case, a knock other solid surface. A piezo is an electronic device that generates a voltage when it's physically deformed by a vibration, sound wave,...... Listed under: Pr Sensor – Transducer – Detector Projects

526. Paper Man: a machine created by Arduino and NFC Paper Man is a machine comprised of Arduino, NFC Shield, thermal printer and a papercraft shell—I Man. Thanks to the NFC Shield, you can directly sent messages from your mobile to the paper man, and the paper man will spit it out by printing with.... under: CNC Machines Projects, Home Automation Projects

527. Sending and Receiving String via UDP using Arduino In this example, you will use your Ethernet Shield and your Arduino to send and receive text strings UDP protocol (Universal Datagram Packet). You'll need another device to send to and from. The Processing sketch included at the end of the code will..... under: Internet – Ethernet – LAN Projects, Projects

528. Mr. Indecision – a small felt version of yourself that turns its head and looks at you using Arduino This is a tutorial on how to use 123D Catch to get a 3D your whole body. Once you have the scan or "catch" the tutorial will take you through a technique to clean it up and manipulate it ready for 123D Make.. Listed under: Game – Entertainment Projects, Projects, Sensor – Transducer – Detector Projects

529. Arduino Beginner and Basic Electronics Kit Primer I learned that one of my nieces had an interest in programming. She was working with robotics at hig and has a summer internship where they had Arduinos. I think she was able to borrow an Arduino to experiment with at home but every...... Listed und Development Board – Kits Projects

530. Scintillino – an Arduino-based quick&dirty scintillation counter Have you ever wondered about the radiation levels around you? Well today you can build very own detector that measures ionizing radiation and displays data in real-time on an LCD (and also your computer if you want). The visual design, as below, is...... Listed under: Calculator Projects

531. Arduino Quadruped Robot Stalker Arduino Quadruped Robot - Stalker I am going to build an Arduino Quadruped Robot. As usual, I will share my source and show as many pictures as possible, to help those of you who are also building Quadruped robots. The way I do things might not...... Listed under: Pr Robotics – Automation Projects

532. Dimmer using an Arduino This example shows how to send data from a personal computer to an Arduino board to control the brightness of an LED. The sent in individual bytes, each of which ranges in value from 0 to 255. Arduino reads these bytes and uses...... Listed under: LED Projects, Projects

533. Mystery Beeping Prank The Mystery Beeping Prank is a device hidden in a hollowed out book that beeps intermittently at different frequencies. I made t because I am surrounded by a lot of incredibly creative people who have a penchant for pranking one another, and this seemed like...... Listed under: Ga Entertainment Projects, Sound – Audio Projects

534. Arduino Controlled Catapult I recently had the idea to create a catapult, But not just any kind of catapult, an electronic catapult! I wanted something I could just sit it dow some buttons and watch it do its thing without being to big. This is what I...... Listed under: Other Projects, Projects

535. How to Make a Tactile Feedback Compass Belt Have you ever wondered how migratory birds manage to have such an amazing sense of direction despit so generally clueless? They can sense the Earth's magnetic field with what is basically a compass built into their body. Wouldn't it be cool to feel what...... under: Metering – Instrument Projects, Sensor – Transducer – Detector Projects

536. Arduino Liquid Crystal Displays I had initially planned to do an LCD tutorial a little further down the line, but there was very high demand for it, and I alre a circuit assembled for testing the new LCD that element14 sent me to evaluate. So, this seemed like...... Listed under: LCD Projects, Projects

537. Interfacing Electronic Circuits to Arduinos Interfacing Electronic Circuits to Arduino In this instructable I use an example of interfacing an Arduino to an A 429 transceiver in order to demonstrate the general process of interfacing an Arduino to electronic circuits so you can use these techniques on your owr designs....... 538. Analog Clock And Temperature sensor On An Oscilloscope using Arduino Scopeclock is an easy to use hardware to make your X-Y capable analog oscillo more useful .Using this simple to use hardware you can convert your analog oscilloscope into a scope clock.This project was me and my friend kshitij gu CEDT nsit under the...... Listed under: Clock – Timer Projects, Projects, Sensor – Transducer – Detector Projects, Temperature Measurement Projects
539. How to make A light-up distance sensor In this instructable, I will show you how to make a sensor that will light up more lights the closer you are to it. St Placing The Electronics This step will show you where and how to place the electronics on the breadboard Materials:...... Listed under: Sensor – Transduc Detector Projects

540. Home Automation (or Robot Butler called Geoffrey) – iPhone controlled, arduino based Being able to control everything from your pocket has long been dream shared by many. Previously we've had universal remotes that can both control our TVs and radios, then we had wireless wall sockets. Both great t but how likely is it that you're...... Listed under: Home Automation Projects, Phone Projects, Robotics – Automation Projects

541. Save data of temperature and humidity on MySQL with Arduino Uno and Wifly Hello guys, i make this instructable for the people that liked the electroni the botanic, with this you have the data about the temperatura and the humidity of your orchard and register this in a data base MySQL. For this proyec need some...... Listed under: Home Automation Projects, Internet – Ethernet – LAN Projects, Projects, Temperature Measurement Projects

542. Arduino String Addition Operator Code You can add Strings together in a variety of ways. This is called concatenation and it results in the original String longer by the length of the String or character array with which you concatenate it. The + operator allows you to combine a...... Listed under: How To – D Projects, Projects

543. Gut Check a Tweeting and Facebooking Fridge using Arduino I have a problem, I'm trying to lose weight but I love snacking late at night. And no one know even do it. That being one of my biggest hurdles, I figured why not include all my social media friends and followers in...... Listed under: Home Automatic Projects, Internet – Ethernet – LAN Projects, Projects

544. Arduino led pendulum Step 2: Putting up the wires Strip both ends of wires -insert one end of each wire into sockets numbered -Gnd(black wire in my case)-this will be th common ground connection - 13 (green wire in my case) - 12 (yellow wire in my case) -...... Listed under: LED Projects, Projects

545. Adafruit Flora NeoPixel LED Ring Headphone mod Wearable Arduino mod for your headphones. Non-invasive procedure for headphones that don't hav inside the drivers or you don't want to hack apart your high end cans. Adafruit just put out a tutorial for adding pattern blinking LED lights to headphone instructable takes it...... Listed under: Sound – Audio Projects

546. Candy Tossin Coffin using an Arduino When you flip a switch, the coffin lid opens and a smiling red eyed ghost arises. The ghost flings some candy, push switch back and returns to rest. Then, the coffin lid closes. Step 1: Major parts include: 4.5 rpm motor #155821 Jameco.com 1.8...... Listed under: Game Entertainment Projects, LED Projects, Projects

547. Arduino Controlled Solar Fountain A fountain can make a nice decorative fixture for your garden. But it isn't always easy to run a power cord out to wher want it. So I decided to run it on solar power. The system is controlled by an Arduino. This allows...... Listed under: Solar energy projects

548. Arduino Photocell Theremin Synth (glitchamin) You know theremins, right? Those cool-looking boxes with antennae that produce noise without being to They are played by the likes of Jimmy Page of Led Zeppelin, and present in the soundtracks of countless films. Well, with this instructable, I will show you to...... Listed under: Solar energy projects

549. Teclado MIDI Super Simple – Super Simple MIDI Keyboard Este tutorial te lleva paso a paso por la construcción de un teclado MIDI de una octava, progra via arduino gracias a su conector de 6 pines. Vas a necesitar: Componentes: 1 Atmega328p con el bootloader de Arduino 1 Zócalo de 28 patas 1 Cristal...... Listed under: Sound – Audio Projects

550. AIR Project using an Arduino CODE: download final project code: Arduino Code download additional wiring_analog.c code: Wiring Code download proces code: Processing Code download C code: C CODE FILE EXPLANATION: The final project code is the final arduino code for the project. The wiring_analog.c should ONLY be used for...... Listed under: GPS Based Projects, Projects

551. Arduino-Pneumatic Flight Simulator Hello, my name is Dominick Lee. I am a senior in high school who is also a programmer and inventor. I created the "LifeBeam Flight Simulator" (name of my project) because I wanted to challenge myself and utilize my software and hardware skills. I was...... Listed unde Game – Entertainment Projects, Robotics – Automation Projects

552. Arduino PIR motion water gun first what youll notice my grammer isnt the best ☺ ok what youll need: 1 transister/mosfet that can handle the current f water gun motor, this is the one i used - http://www.sparkfun.com/products/10213   -   then a diode, i used this one
- http://www.sparkfun.com/products/8589   - then a 10k ohm resistor,...... Listed under: Game – Entertainment Projects, Projects

553. Pee to Check-In to Foursquare – Mark Your Territory using Arduino In case you are unfamiliar with the most amazing new way to physically "check in" to foursquare here video that will explain it all. Mark Your Territory is a fully open-source system but because it interacts with the physical world as well as...... Listed under: Projects, Sensor

Transducer – Detector Projects

554. Mini invisible MIDI Harp English: This is a simple and easy to make MIDI harp, it runs on an Arduino UNO and uses infrared sensors as strings. It commu... with every recording software that has MIDI. Its really fun to play with and also very cheap, so enjoy!! Español:...... Listed under: Sound – Audio Projects

555. Arduino Electromagnetic Field Detector A while back I saw an EMF (Electromagnetic Field) Detector at makezine.com that used a led bargraph. I decided modify it to use a 7-Segment LED Display! Here's my project. Sorry I don't have any pictures of it in use. Hopefully I can post...... Listed under: Projects, Se Transducer – Detector Projects

556. Arduino Time-Lapse Controller This project originally started out with a few simple parts thrown together to create a very simple time-lapse controller fo DSLR camera. After I was happy with the initial prototype, I wanted to make a final version which the programming of the "lapse time"...... Listed under: V Camera – Imaging Projects

557. Self Balancing Unicycle Following the popularity of our self balancing scooter and the SciChair we decided to try something a little edgier, the Self Balanc Unicycle. This project reuses a lot of stuff from our previous projects, using an arduino as the brains behind the scenes. Step 1:...... Listed under: Game – Entertainment Projects, Motor Projects

558. My Arduino Ping Display Robot Goals Hello all. I hope to please share a little robot that I have just finished building. There are many Ping Boat, perhaps v tutorials and display less so without pretension, will illustrate what I could do. I gave myself the goal of realizing...... Listed under: LCD Projects, Projects, Robotics – Automation Projects

559. A Gentle Introduction to Arduino for Scratch Users There are lots of people who are very comfortable with the Scratch programming environment but w try something with Arduino to Blink Lights, Sense Buttons, Run Servos or whatever. They may find the C programming environment in Arduino IDE - Sket too...... Listed under: Other Projects

560. Arduino-controlled RGB LED Infinity Mirror Update 11/22/2013: Thanks to everyone who voted for this project in theMicrocontroller Contest! It was one first-prize winners. Update 9/17/2013: Thanks to everyone who voted for this project in the Arduino contest (I was one of ten "second prize" winners)! If y want to try...... Listed under: LED Projects

561. Visual Network Threat Level Indicator v2 using Arduino By popular request this is a new wireless version of the Visual Network Threat Level Indicator. Th a Roving Networks WiFly RN-XV Module to do 802.11 WiFi along with an Arduino to display the threat level on your network. Network monitoring is very important in todays...... Listed under: Internet – Ethernet – LAN Projects, Projects

562. A cardboard televisor (with arduino and LEDs) Recently I saw a documentary about the history of the television. And to my surprise they showed that th television before the well known CRT televisions. Those mechanical televisions or televisors were pretty smart and simple. A CRT is simply an electron be that...... Listed under: LED Projects

563. Arduino Target Practice A quick demo video for your pleasure. This is an instructable for a target practice system for airsoft and nerf weapons. The syste been designed to test a shooter's reaction times and accuracy. Sam and I have been meaning to do this project for a...... Listed under: Game – Entertainm Projects, Projects

564. Make your own Custom Electronic Widgets, like my Arduino LED Day/Night Widget This is just a brief run down on how easy it has become to make your circuits complete with your own PCB's. Have you ever wanted to make something custom that suits your needs? Of course you have!! For me it really sta when...... Listed under: LED Projects

565. Virtual Color Mixer using Arduino This example demonstrates how to send multiple values from the Arduino board to the computer. The readings from t potentiometers are used to set the red, green, and blue components of the background color of a Processing sketch or Max/MSP patch. Software Requir Processing or Max/MSP...... Listed under: How To – DIY – Projects, Projects

566. Arduino Keyboard Message Code When the button is pressed in this example, a text string is sent to the computer as keyboard input. The string reports number of times the button has been pressed. Once you have the Leonardo programmed and wired up, open up your favourite text...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, Projects

/

567. Visual Computer Stress Meter using an Arduino Have you ever wanted to, without going out of your way to clock your processor, see how much stress your computer is under? With this project you will have a simple bar graph that constantly shows how much stress your computer is under. If the...... Listed under Metering – Instrument Projects, Projects, RTOS – OS Projects

568. Bluetooth Weather Lamp This was a 2 hour project I whipped up in order to learn how to use a new Bluetooth LE 4.0 module I picked up at redbearlab.com called a BLE Mini. I've since thought of several much simpler ways (and more dependable) to accomplish the...... Listed under: Interfacing(USB – RS232 – Project Ideas, LED Projects

569. DIY Arduino Unit Converter: How to use LCD Step 1: Ingredients: Electronics Arduino Breadboard LCD* 2x 50k pots 150 ohm resistor Jumper wires, and them! If you do not want to use a LCD then you will have to use serial monitor. Wherever you see lcd.print just change it to Serial.print....... Listed under: – DIY – Projects, LCD Projects

570. CHR's 8X8X8 LED Cube – Revisited with improvements! SEE STEP 11 for uploadable code for this cube. This instructable has mutated over the past few m and you'll see a bunch of end results before we get into how to make the cube, and the improvements that have been made over the original...... Listed LED Projects

571. Arduino 4 led madness In this instructables you will learn how to wire 4 LED'S and make them flash 10 times. This is a great Starter project!! what you will need... 1: arduin using an Duemilanove) 1: breadboard 4: LED's 10-15: jumper wires 3: resistors Step 1:...... Listed under: LED Projects

572. Fading using an Arduino Demonstrates the use of analog output (Pulse Width Modulation (PWM)) to fade an LED. PWM is a technique for getting an ana behavior from a digital output by switching it off and on very fast. Circuit An LED connected to digital output pin 9 through...... Listed under: LED Projects Projects, PWM Projects

573. Arduino Guitar Tuner Build your own electric guitar tuner using the Arduino! I decided to make this because I wanted to experiment with audio input an frequency detection. I used Amanda Ghassaei's method for Arduino Frequency Detection in order to get frequency readings using the Arduino. I used LE that...... Listed under: Sound – Audio Projects

574. Pressure Activated Light-Up Umbrella using an Arduino Once upon a time, 2 girls greatly enjoyed walking in the rain with umbrellas. They decided the enjoyment of this experience could be maximized by building their own pressure-activated web of LEDs to install under their umbrella. Thus, with the he Arduino, some...... Listed under: Home Automation Projects, Projects

575. TankWars: A Physical Video Game using Arduino This instructable will show the game TankWars, a web based game played on an iPad that drives a real tank to fire lasers at a robot. When you hit the robot target, the game is updated. The tank and the target are Arduino's equipped...... Listed under: Game Entertainment Projects, Projects, Robotics – Automation Projects

576. ATtiny programming with Arduino After this Instructable you should be able to program an A Ttiny85/45 with an arduino. It may sound complex but it re isn't. After doing some research I could not find to much info on how this could be done. I however did find http://www.instructables.com/id/Program-ar with-Arduino/. This Instructable...... Listed under: Arduino Programmer Projects

577. Electronic Dartboard or How I Learned to Stop Worrying and Love ECE 476 Introduction Ever dream of having a darts game scored automatically without those annoying plastic darts? We decided it was a dream most of us has had at some point, and so decided to implement an automatic scoring system t "real" cork dartboard. As...... Listed under: Game – Entertainment Projects

578. Arduino 7-Segment Thermometer Using a dual 7-segment display, a DS18B20 temperature sensor and a couple of shift registers I figured that I could bu digital thermometer. Step 1: Temperature Sensor The sensor I'm using is the DS18B20, it's a 3pin sensor that just requires a single input...... Listed under Projects, Temperature Measurement Projects

579. Arduino String Comparison Operators Code The String comparison operators, ==, !=,>, < ,>=, <= , and the functionsequals() and equalsIgoreCase() allow you to make alph comparisons between Strings. They're useful for sorting and alphabetizing, among other things. The operator == and the function equals() perform identically. It's just a matter...... Listed under: How To – DIY – Projects, Projects

580. USB Freeform using an Arduino This is a project in attempting to improve it predecessor "Freeform Arduino" by putting it in an enclosure and having it s similar purposes as "Palm Arduino Kit" and "Palm Arduino II" which I can carry it in my pocket and be available to...... Listed under: Interfacing(USB – RS2 -ISP) Projects, Projects
581. Arduino Board Sound Alarm I've just completed my second Arduino project, a sound level detector which sets off an "alarm" when there's the sound leve high for too long. I built it for use in a school that wants to provide visual feedback to students when they...... Listed under: Projects, Security – Safety Pro

582. Flicker up to 6 LEDs with Arduino Hi there. Christmas is coming closer, and I was wondering if I could put some candles in my room to get in the "christm mood". But after a friends house burned down of christmas tree candles, I don't want to burn real candles into my...... Listed under: LED Projects, Projec

583. Displaying Images on 4D OLEDS using Arduino 4D Systems makes some really nice serial OLEDS. They aren't hard to use, but the documentation for the very scattered. This tutorial pulls together the various pieces i've found so that you can get up and running very quickly. Start by skimming through the... Listed under: Video – Camera – Imaging Projects

584. Program your Arduino with an Android device Hi, in this Instructable I want to show you, how you can program your Arduino with your Android device. It simple and cheap. Also it allows us to program our Arduino where ever we want, this is usefull for permanently installed Arduino boards,...... Listed unde Arduino Android, Electronics News Updates

585. Arduino stoplight web server At the place I work, we use xymon to monitor of our servers. All of the services monitored are important, but we wanted a separate indicator to simply show the overall health of the most critical systems. Furthermore, we came up with the following criteria:...... Listed under: I – Ethernet – LAN Projects, Projects

586. Power off from an Arduino Sketch using the Pololu Power Switch If you need an Arduino to shut off from within your Sketch, this is the solution. We will wiring the Pololu Pushbutton Power Switch, programming the Arduino to shut off the power, and making the unit "power on" only. The Pololu Pushbutto Power Switch...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

587. Wireless nunchuk controlled animatronic doll using Arduino This instructable will attempt to show you how to make an animatronic doll controlled by a nunchuk. This doll can only move its head though. I'm sure there are plenty of people out there who can take this and expand on it and make...... Listed Game – Entertainment Projects, Internet – Ethernet – LAN Projects, Projects

588. Digital Read Serial using Arduino This example shows you how to monitor the state of a switch by establishing serial communication between your Ardu your computer over USB. Hardware Required Arduino Board A momentary switch, button, or toggle switch 10k ohm resistor breadboard hook-up wire C image developed using Fritzing. For more...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, Projects

589. Arduino Esplora Joystick Mouse This sketch shows you how to read information from the Esplora's joystick and use it to control the movement of the cur your computer. You're making your Esplora into a mouse! This sketch will take over the mouse movement of your computer. If you...... Listed under: Gar Entertainment Projects, Projects

590. Hookup an LCD to an Arduino Adding an LCD display to Arduino projects can add real value but the cost of doing so can be significant. Not a financial co can pick up 16 (characters) x 2 (rows) LCD for as little as £3.50. The cost is the pin...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, LCD Proje Projects

591. The Tetris Pumpkin using an Arduino Who wants grinning faces and candles when you can have an interactive pumpkin this Halloween? Play your favori block-stacking game on an 8x16 grid carved into the face of the gourd, lit by LEDs and using the stem as a controller. This is a moderately.... Listed und Game – Entertainment Projects, Home Automation Projects, Projects

592. Switch Statement used with serial input using Arduino An if statement allows you to choose between two discrete options, TRUE or FALSE. When there a than two options, you can use multiple if statements, or you can use the switch statement. Switch allows you to choose between several discrete options tutorial shows you...... Listed under: How To – DIY – Projects, Projects

593. A laundry alarm for the hearing impaired and everyone else using Arduino This Arduino based project was designed to solve a recurring problem for my impaired wife. Our laundry room is located remotely from our living area. If our laundry has finished washing and is not removed in time, it can sour or get moldy. ...... Listed under: Home Automation Project Ideas, Projects, Security – Safety Projects

594. Android & Arduino Controlled Projector Screen This is my first time using Arduino, or any microcontroller. I'm glad it worked out so well but my wife may due to the stacks of microcontrollers that will being showing up on our doorstep soon for future projects. Any feedback or questions...... Listed under: A Android, Projects

595. Freeform Arduino As an artist, sometime I created an art pieces without planning ahead what I want to draw or paint, just want to add colors or lines on drawing or canvas, and never think of the outcome of the piece. Let's our own instinct and subconscious leading...... Listed under: LED Projects, Projects

596. L.O.G. sous vide So have you heard of sous vide? Well, this Lazy Old Geek (LOG) hasn't or hadn't. http://en.wikipedia.org/wiki/Sous-vide It's French. So it's like boil-in-a-bag only you don't boil it. The equipment can be rather expensive. http://www.sousvidesupreme.com/Shop_Online/SousVide_Supreme_Demi/Department.aspx?DeptID=3&&AdID=245&gclid=CN7PyM6uw7cCFWNp7Aodc I thought that was rather expensive for a...... Listed under: Home Automation Projects

597. Energy-Saving Light using an Arduino In the spirit of Earth Day, I have created a revolutionary new energy-saving lighting solution that is only ever on wh eyes are open. This is remarkably more efficient than normal lighting that remains on, even when your eyes are shut. Using my device, you...... Listed un Home Automation Projects, Projects

598. Make your own custom Arduino compatible I love Ardunio. I love the things that people make with them and I love to make my own. Last August I publis Instructable on how to make your own postage stamp sized Arduino compatible. This Instructable will show you how to to make a...... Listed under: How DIY – Projects, Projects

599. Arduino String Appending Operators Code Just as you can concatenate Strings with other data objects using the StringAdditionOperator, you can also us += operator and the cconcat() method to append things to Strings. The += operator and the concat() method work the same way, it's just a matter of...... under: Development Board – Kits Projects, Projects

600. Solar powered arduino on the back of a playing card Here's a six word tragedy: My arduino needs four AA batteries. Really? Isn't this 2012? Where's my jetpack?!! Here's a way to the future -- a way to make a solar panel, from scratch, that can power any arduino off of sunlight or even light...... Listed unde Battery Projects, Projects, Solar energy projects

601. How to Build an Arduino Voice Controlled TV Remote #include <EEPROM.h> #include <Wire.h> #include <SoftwareSerial.h> #include <LiquidCrystal.h> SoftwareSerial voice = SoftwareSerial(15, 16); LiquidCrystal lcd(5, 6, 7, 8, 9, 10); int pulses, A_SIG=0, B_SIG=1, menu=0, datacount, i, buttoncount=0; int co m, ready=0, even=0, fail, first_but=0, second_but=0; word Power[100]; word Remote[100]; //word Remote2[100]; word...... 629. Create an Internet Connected Pill Dispenser The P.I.L. Box - A Better Medication Reminder System Studies show the consequences of patients not taking medications according to doctor's orders can be serious, especially in older patients.With today's low cost micro-controllers and sensors (and the incent the Radio Shack / Instructables Micro…… Listed under: Internet – Ethernet – LAN Projects

630. Android talks to Arduino This project slightly modifies the Google Android sample app called "Bluetooth Chat" so you can type a message in the Android and that same message will appear on an LCD attached to an Arduino Uno. Functionality: Android talks to Arduino 1. Run the Android…… Listed under: Arduino Android, Interfacing(USB – RS232 – I2c -ISP) Projects, Internet – Ethernet – LAN Projects, Phone Projects, Projects

631. Create Interactive Electronic Instruments with MaxMSP This Instructable is part 3 in an Intro to MaxMSP series I've just finished teaching atWomen's Aud Mission in San Francisco. Part 1 is an introduction to MaxMSP and MIDI, part 2 is intermediate Max and Audio, and this Instructable is all about interfaci MaxMSP with hardware. I…… Listed under: Other Projects

632. Make another Arduino LCD shield In this tutorial we make an LCD shield for using 20 character by four row LCD modules with Arduino Uno. Updated 18/03/2013 In this article you can follow the process of making another LCD shield for the Arduino Uno or compatible boards. In the past (which explain Listed under: LCD Projects, Projects

633. RGB LED Skate Light I like to go skating every week but I noticed that the my skates weren't cool enough so I decided it was time for some lights! I install lights on my Dad's skates as a thank-you present for taking care of the pool for…… Listed under: LED Projects

634. Homemade Infrared Rangefinder (Similar to Sharp GP2D120) using Arduino Here is my instructable on how to construct a pretty simple (for some!) shor infrared rangefinder/range sensor. Infrared rangefinders are very useful in a number of projects. The majority of these come from obstacle detection (in or generally detecting distances! The one shown…… Listed under: Internet – Ethernet – LAN Projects, Metering – Instrument Projects, Projects, Sensor – Transducer – Detector Projects

635. Make your own Enigma Replica EDIT: This Instructable has won Second prize in the 2013 Radio Shack Microcontroller Contest. Thank You to all who vote is our very first Instructable and this step by step guide will show you how to build a fully functional electronic replica of the…… Listed under: Game – Entertainment Projects, LED Projects

636. MIDI Note Player using Arduino This tutorial shows how to play MIDI notes from an Arduino. MIDI, the Musical Instrument Digital Interface, is a useful pr for controlling synthesizers, sequencers, and other musical devices. MIDI devices are generally grouped in to two broad classes: controllers (i.e. devices t generate MIDI…… Listed under: Game – Entertainment Projects, Projects, Sound – Audio Projects
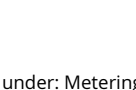

637. Serial Call and Response with ASCII-encoded output using Arduino This example demonstrates string-based communication from the Arduino board to the computer usi call-and-response (handshaking) method. The sketch sends an ASCII string on startup and repeats that until it gets a serial response from the computer. Then it sends th sensor values as ASCII-encoded…… Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, Projects

638. Trinity Assembly Hey dudes! Lets build the trinity synt! ! More information about the synth at: www.bastl-instruments.com Before you start: the board sc from both sides and the component goes always above its printed sign so it hides the sign! You should know that there are some…… Listed under: Other Projects

639. Serial Call and Response using Arduino This example demonstrates multi-byte communication from the Arduino board to the computer using a call-and-response (handshaking) method. This sketch sends an ASCII A (byte of value 65) on startup and repeats that until it gets a serial response from the comp Then it sends three…… Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, Projects

640. A Self-Contained Data Logging Anemometer I love collecting and analyzing data. I also love building electronic gadgets. A year ago when I discovered th Arduino products, I immediately thought, "I'd like to collect environmental data." It was a windy day in Portland, OR, so I decided to capture wind data…. under: Metering – Instrument Projects

641. Calibrating sensor input using Arduino This example demonstrates one techinque for calibrating sensor input. The Arduino takes sensor readings for five seconds during the startup, and tracks the highest and lowest values it gets. These sensor readings during the first five seconds of the sketch execution the minimum and...... Listed under: Projects, Sensor – Transducer – Detector Projects

642. *duino Keg Temp Monitor, or the Quest for the Perfect Pint I was looking for a project that combined my three favorite things - working in my shop, buil cool stuff for my bar and of course, drinking beer. After a couple of weeks in the old country drinking "the Guinness", I decided my I'd put a keg...... Liste Temperature Measurement Projects

643. Arduino Fingerprint Lock There is a short video for this Arduino fingerprint lock here: http://v.youku.com/v_show/id_XNjIxNzQyNzY4.html I live in a sma apartment in Shenzhen with my wife and baby, 5 months old. Sometimes, I need to go out, for example, to go downstairs to buy candy or diapers for m Listed under: Security – Safety Projects

644. Paper Electronics: Make Interactive, Musical Artwork with Conductive Ink using Arduino If you've ever wanted to bring a piece of paper to life, now is you chance. This instructable will take you through all the necessary steps to create an amazing interactive flyer or artwork. This event flyer is no ordinary pie print. It is printed using...... Listed under: Projects, Sound – Audio Projects

645. Arduino-based master clock for schools If your school, or kids school, or other location relies on a central master clock that is broken, you may have a us this device. New master clocks are available of course, but school budgets are under extreme pressures, and it really is a...... Listed under: Clock – Timer Projects, Projects

646. Rainbowduino Sign using Arduino The Rainbowduino is a variant of the Arduino and among other things is capable of driving an 8x8 RGB LED matrix. I h backyard re-model and was in need of an entrance sign. Step 1: Carving and Painting the Sign I had...... Listed under: LED Projects

647. Another Arduino Traffic light After working with the arduino and not knowing what the heck I'm doing I made Another simple traffic light. I looked aroun web to find one that looks about normal and came across none. They seemed too fast. So, I found and modded some...... Listed under: Car Projects, Pro

648. Electronic Music Box Powered by Arduino (sort of) Music is the most universal means of expression. Regardless cultural language or age the idea convey though music would not differ much. It is safe to say everyone loves music, one type or another. When one's favourite piece is played there is a overwhe desire...... Listed under: Sound – Audio Projects

649. Aqua Garduino Mini @hydroFishAqua82 Arduino Powered Micro Aquaponic System with Pi Camera and Twitter Feed We are creating an automated aqu system with mobile updates via Twitter. Sensors and motors will be controlled from an Arduino while the entire system, including mobile updates, will b orchestrated by a Raspberry...... Listed under: Home Automation Projects

650. Homemade arduino printer If you want to make your own high resolution printer (maybe not so high res), you are at the right place. This Instructable wi you how to do with two dead cd/dvd drive and a pen (pilot, whiteboard marker, whatever you have) at the...... Listed under: How To – DIY – Projects, Proj

651. My Arduino In Circuit Programmer This Lazy Old Geek is also an Arduino Geek. If you are an Arduino Geek, one of the common microcontrollers used by Arduinos is the Atmega328 chip. In order to use Arduino software, the Atmega must have bootloader software on it. Okay, so I bought...... Listed under: Programmer Projects, Projects

652. BLDC Motor Control with Arduino There is a lot of interest these days among hobbyists in controlling brushless DC (BLDC) motors, which have improved performance and better energy efficiency over traditional DC motors, but are more difficult to use. Many off-the-shelf products exist for this purpose. Fo example, there are...... Listed under: Motor Projects

653.   Beginner Programming of Arduino This video is from a meeting of the Kids and Technology Meetup group in Washington DC. The youth who show up to free meetings are eager to learn advanced uses of computers. The presenters were John Dukovich and Hugo Estrada.... Listed under: Arduino Programm Projects, Projects

654. Arduino Button Mouse Control Code Using the Mouse library, you can controls a computer's onscreen cursor with an Arduino Leonardo, Micro, or Due. This particular ex uses a five pushbuttons to move the onscreen cursor. Four of the buttons are directional (up, down, left, right) and one is for a...... 686. Arduino Hexapod Robot Arduino Hexapod Robot Design I will show you how to build an arduino hexapod robot, from building the body, to how to imple the algorithm. To learn about the implementation of the algorithm, read this first, if you are not sure what is IK, read...... Listed under: Projects, Robotics Automation Projects

687. Real-Time Arduino GPS Tracker with iPhone app [INTRO] This past semester, I decided to build a GPS receiver with an iPhone app that tracks it for my se project. Here is a step-by-step tutorial to show you how you can build your own. [OVERVIEW] Architecture of my Real-Time GPS Tracker project. I'll...... Lis under: Blog, GPS Based Projects, Phone Projects, Projects

688. Arduino GPS Tracking System This was easily the most time I've spent producing an Arduino Tutorial. I've been sporadically walking around NYC with this Arduino GPS for as I've tweaked the code and gotten it just right. If it wasn't obvious from the title, this tutorial will teach you...... Listed under: Featured, GPS Based Proje Projects

689. A arduino library for the MAX7221 and MAX7219 These two chips provide an easy way to control either an array of 64 Led's or up to eight digits made of segment displays with a minimum of electronic components. Besides the chip itself you will need only a single resistor and one or two...... Listed under: Projects, Projects

690. An amplifier for Arduino For my project, the Arduino output is not enough so digging on the net and asking to a friend some help, I managed to build an amplifier to feed my 3 computer fans. This circuit can be used as an amplifier to switch on and...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Proje Projects, Sound – Audio Projects

691. Arduino temperature controlled PC Fan Oscar Gonzalez gives us a simple tutorial for speed controlling a PC FAN and reading a LM35 temperature senso[r] an Arduino microcontroller. He covers the use of an optocoupler, PWM (Pulse Width Modulation) and reading analog voltages with the Arduino. He even[…] a…… Listed under: Projects, RTOS – OS Projects, Temperature Measurement Projects

692. Power (Energy) Meter using Arduino Part 1. Analog Front-End. Opto-Isolator. Looking at the Power Quality Analyzer display, I was wandering, if there is a[…] error in the measurement results, introduced by transformer. Overall THD picture doesn't change much, suspiciously drawing same chart in the mornin[g] the evening, when…… Listed under: Metering – Instrument Projects, Projects

693. Audio VU Meter using Arduino Biasing AC input using resistor divider and scaling up / down if necessary; Sampling fast and accurately using direct acces[s] Control Registers of ADC and Timer1; Subtract whatever was added at step #1 from result of Analog / Digital conversion and Square; Average /…… Listed[…] Metering – Instrument Projects, Projects, Sound – Audio Projects

694. True Analog Audio Volume Control using Arduino ow my Arduino can precisely measure audio input (VU meter), and obviously, next thing that comes t[o] right after measurements, is regulation or control. There are many different ways how to electronically adjust audio volume or level of AC signal. I'll nam[e] few:…… Listed under: Projects, Sound – Audio Projects

695. Sound Localization using Arduino Well, it's elementary simple in theory, how to do sound localization based on phase difference of signals, that received[…] spatially distant microphones. The Devil, as always, in details. I've not seen any such project created for arduino, and get curious if it's possible at…… List[ed] under: Projects, Sound – Audio Projects

696. Speech Synthesizer using Arduino Synthesized speech was for a long time the Holy Grail of computing, and back in the 1980s when a 4MHz CPU made your computer the[…] machine in the neighborhood it just wasn't practical for software to create intelligible speech. In those days the only…… Listed under: Sensor – Transducer – Detector Pro[…]

697. Spectrum Analyzer, Arduino project with FFT algorithm The basic idea was to create color organ / spectrum analyzer on arduino board, trying to minimiz[e] quantity of external components, like analog filters, LED display drivers, etc. Spend a lot of time in search on internet I was able to find only two !…… List[ed] under: Game – Entertainment Projects, Home Automation Projects, Projects

698. Arduino Sound Alarm I've just completed my second Arduino project, a sound level detector which sets off an "alarm" when there's the sound level is to h[igh] too long. I built it for use in a school that wants to provide visual feedback to students when they…… Listed under: Projects, Security – Safety Projects, S[ound –] Audio Projects

699. MEGAshield KIT for Arduino MEGA 2560 R3 and Arduino DUE ARDUINO MEGA 2560 REV3 The MEGA 2560 is designed for more complex projects. With 5[…] I/O pins, 16 analog inputs and a larger space for your sketch it is the recommended board for 3D printers and robotics projects. This gives your projects[…] of…… Listed under: Development Board – Kits Projects, Projects

700. How To Control A Stepper Motor With An Arduino Uno Overview Stepper motors fall somewhere in between a regular DC motor and a servo motor. The[y] the advantage that they can be positioned accurately, moved forward or backwards one 'step' at a time, but they can also rotate continuously. In this les[son] will…… Listed under: Motor Projects, Projects

701. Arduino controlled Bluetooth-bot This instructable will show you how to convert an old toy R/C car from the thrift-store ($1.50) into a bluetooth controll[ed] To make the conversion, you will need an Arduino (any type), an L298N dual 2-amp motor-controller (or similar), and a bluetooth serial adapter…… Liste[d] Projects, Robotics – Automation Projects

702. Arduino Battery As many of you may know, this Lazy Old Geek loves Arduinos. Many of my projects are portable and need a battery source: http://www.instructables.com/id/Arduino-Pedometer/ http://www.instructables.com/id/Arduino-Nokia-LCD-Sensors/ http://www.instructables.com/id/Ultrasonic-Tape-Measure/ All pricing was determined about early 2012. So, I've been using Adafruit 6 AA Battery holde[r] https://www.adafruit.com/products/248…… Listed under: Battery Projects, Projects

703. Data Logger Project using an Arduino This is a data logger I made for my class. I couldn't find any instructions that I could use to make the Arduino record light brightness and the temperature. Then display the temperature and the light value on the LCD then Save it to...... Listed under: Projects, Sensor – Transducer – Detector Projects, Temperature Measurement Projects

704. Arduino & Visual Basic 6 Light Controller This instructable is something like a tutorial for new VB users. It shows how to create a parser base VB6 program to interact with Arduino circuit. Basically, interaction is in the form of serial communication via the USB port. This is my practice after learning...... Listed under: Other Projects, Projects

705. Arduino LCD Twitter display a.k.a. the gratuitously complicated bidirectionally communicating Arduino-based scrolling Twitter display and notifier. ---- This project was mainly done as an excuse to learn how to use character LCD displays with my Arduino, and figure out how to make a bidirectional serial prot One major design...... Listed under: Internet – Ethernet – LAN Projects, LCD Projects, Projects

706. Arduino Touch Screen Room Control Hey everyone, I finally finished my touch panel for my bedroom wall and am here to show you how i made it. Unfortunately its not installed in my wall yet as I might be moving and don't want to make anymore holes in my walls,...... Listed under: Home Automatic Projects, Projects

707. Very Simple Arduino Electric Lock This is a instructable for a very simple Arduino controlled electric lock. The key idea here is to be very simple as this wa of a proof of concept prototype type of thing. The Arduino is used as a switch to control the lock...... Listed under: Projects, Security – Safety Projects

708. Simple Parking Sensor using Arduino My car has only parking sensor for the Reverse, so when I enter the Garage there is no way to know if I am close er the wall to allow the door to close or too close that I can hit the wall with...... Listed under: Car Projects, Projects, Sensor – Transducer – Detector Projects

709. Arduino Weather Station Part3, Rain So one of my last projects was adding a weather vane to my Arduino weather station. http://www.instructables.com/id/Arduino-Wind-Chill-Machine/ http://www.instructables.com/id/Arduino-Weather-Station-Part2/ This Lazy Old Geek deci add a rain gauge to it even though we don't get much rain in the high desert. Most digital rain gauges...... Listed under: Projects, Sensor – Transducer – D Projects

710. simpleTweet_01 python using Arduino Arduino Python Twitter (Windows) In this instructable we'll modify my simpleTweet_00 and rewrite the Processing with Python. You can expect an ignorant walkthrough by an illiterate noob, but maybe that's just what you're looking for. Before you begin: If you need h installing Python,...... Listed under: Development Board – Kits Projects, Projects

711. Arduino Home automation This is a relatively simple controller for controlling equipment in your home. At the moment I control my central heating, sec and lighting. By sending commands from my home computer. My homeeasy central heating controller hack. http://www.instructables.com/id/BampQ_homeeasy_home_automation_central_heating_c/ I am also able to login remotely from...... Listed under: Home Automation Projects, LED Projects, Projects

712. Arduino 4x4x4 LED Cube Overview: This instructable will cover the building process of an 4x4x4 LED Cube. I will be using an Arduino to control the LEDs. the Arduino (Freeduino) has a total of 20 pins (including the analog pins) we will not need to have any multiplexing...... Listed under: Game – Entertainme Projects, Home Automation Projects, LED Projects, Projects

713. Color Changing Night Light with ATtiny using Arduino I wanted to create something for my wife as a present and this is what I came up with. This is a dar activated color changing night light. It has a sensor that can tell when the room light is turned off. This then will...... Listed under: Game – Entertainment Projects, Home Automation Projects, LED Projects, Projects

714. LED Dot Matrix Display using an Arduino In this project, you shall again use two sets of shift registers. These will be connected to the rows and columns dot matrix display. You will then show a simple object, or sprite, on the display and animate it. The main aim of...... Listed under: LED Projects, Projects

715. Simple Relay Shield for Arduino Shield to control 6 relay, 6 digital input and 6 analog input with Arduino Duemilanove, Arduino UNO. The digital inputs a outputs are equipped with an LED that indicates the status. The circuit diagram is very simple: Step 1: Schematics and PCB In this...... Listed under: Deve Board – Kits Projects, Projects

716. Squirt – Arduino, motion activated water cannon Squirt is a motion activated water cannon using Arduino. This was designed for use in the garden but a winter we tested it in the bathroom. It works! True motion tracking is expensive and complicated so this system activates when the victim moves into..... under: Home Automation Projects, Motor Projects, Projects

717. Arduino Pedometer Problem: So my nutritionist (doesn't everyone have a nutritionist) suggested I should increase my exercise which primarily consists walking my dog. She even gave me a chart of activities and calories burned. Here's an example. http://www.nutristrategy.com/caloriesburned.htm Well, LAZY OLD GEEK, I decided...... Listed under: Metering – Instrument Projects, Projects

718. Arduino Mega Pinout Diagram Arduino Mega Introduction: The Arduino Mega is a microcontroller board based on the ATmega1280 (datasheet). It has 54 input/output pins (of which 14 can be used as PWM outputs), 16 analog inputs, 4 UARTs (hardware serial ports), a 16 MHz crystal oscillator, a USB...... Lis under: Featured, Pinouts

719. Traffic Lights Beginner Arduino Project This is a beginners project for the Arduino. I am using the Arduino Uno but should work with little or no modificat other arduino models. Setting up the hardware is very easy. This project is more of a training tool for learning how to program...... Listed under: Car Proj LED Projects, Projects

720. Arduino + Temperature + Humidity A simple temperature sensor using one LM35 Precision Temperature Sensor , Humidity Sensor and Arduino, so you can hookup on yo future projects. The circuit will send serial information about the temperature and humidity so you can use on your computer. I have taken data...... Listed under: Project Temperature Measurement Projects

721. Marble Disorder – a marble maze simulator with tilt switches using Arduino Marble Disorder is a borderline case of Marble Madness ☺ It simulates a m maze by sensing the box's orientation with 2 tilt switches. Stop the press: there's a new and more intuitive version that doesn't require the spin knob (Se video). I keep documenting the original...... Listed under: Game – Entertainment Projects, Projects

722. Turing Alarm for Arduino NOTE: This Instructable is currently incomplete. I will finish it before September 19. I started this project after seeing Nick John Turing Alarm clock. I found that the PIC chip he used was a little too advanced for me, so I decided to use the...... Listed under: Projects, Security – Safety Projects

723. Arduino Electronic Dice using random numbers This instructable will show you how to make an electronic dice with minimal experience using 7 LEDs, re jumper wires, and of course the arduino (or arduino clone). I wrote this instructable for anyone to easily follow along and learn more about the arduino. Questions...... Listed under: Development Board – Kits Projects, Projects

724. LED Hat Display with Pong using an Arduino A while ago, as my first microcontroller project, I made a Pong game on a 5x7 LED display, but then nothing of it. Recently I was given a hard hat as part of a uniform (for an engineering competition) and told to customize it,...... Listed under: Game – Entertainme Projects, LED Projects, Projects

725. Temperature Control For Kitchen Appliances using Arduino In this Instructable, I will step through controlling the temperature of most kitchen appliance example, I will use an old Westbend Poppery popcorn maker (aka. coffee roaster), but these same techniques will be applicable to most hot plates, coffe makers, and waffle irons....... Listed under: Home Automation Projects, Projects, Temperature Measurement Projects

726. Arduino Binary Alarm Clock This Instructable will show you how to build an binary alarm clock, with a touch sensor snooze button. This is my first instruc and my first real arduino project, I hope you like it! I bought an arduino a while back and I think it's…… Listed under: Clock – Timer Projects, Projects

727. Arduino RFID Door Lock ***Updated 8/9/2010*** I wanted to make an easy and secure way to enter my garage. RFID was the best way to unlock my do with my hands full I can unlock the door and push it open! I built a simple circuit with a…… Listed under: Home Automation Projects, Projects, RFID - NFC projects, Security – Safety Projects

728. Wireless Altoids Display using an Arduino This Instructable will show you how to modify an Altoids tin for a wireless 2x16 character display. Using an Altoids tin was inspir the need to have a small yet protective enclosure for a pair of Xbee modules recently bought from Sparkfun. I purchased the…… Listed under: LCD Projects, Projects

729. Fun Sun-tracking Arduino The Just-For-Fun Sun-tracker using the Arduino and two servos. This device, along the lines of the most useless toy, is n much for function as it is for fun. But as with many things, you can't spell function…… Listed under: Projects, Sensor – Transducer – Detector Projects

730. Reaction Time Tester using an Arduino A month ago I knew nothing about Arduino and now…..my first project! Looking back, this project combines allm the tutorials that I have read in this short period: blinking LED, push button, piezo and LCD display. A useful project for every beginner! I…… Listed under Timer Projects, Projects

731. Kid's Game to Arduino Enigma Machine The technology behind Enigma machines and the work done to crack them has influenced cryptography, cryptar and computer science in general. If you're unfamiliar with Enigma machines, it's a device that was developed near the end of World War I, then used ext by the…… Listed under: Game – Entertainment Projects, Projects

732. DIY Arduino or The DIY-Duino THIS ENTIRE TUTORIAL IS ALSO AVAILABLE ON MY WEBSITE AT http://www.theparsley.com/arduino/diy/ To quote the Ardu website: "Arduino is an open-source electronics prototyping platform based on flexible, easy-to-use hardware and software. It's intended for artists, desi hobbyists, and anyone interested in creating interactive objects or environments."…… Listed under: How To – DIY – Projects, Projects

733. Steering Wheel Drive R/C Car with Arduino IP Control Car was launched in 2001. I make the similar function car utilizing commercialized products. The cc of Car No.02 is to utilize commercialized products, and I am an amateur in electrical. So, do not blame me that the system is not sophisticated, i.e.…… Lis under: Car Projects, Projects, Robotics – Automation Projects

734. Make A Digital Clock From Scratch using arduino In some point in the life of every electronics hobbyist the need to make a clock is borned, in my case it v about a month after I soldered my first part on a board, but back then I didn't have the right tools, parts…… Listed under: Clock – Timer Projects, Project

735. Arduino Processing Audio Spectrum Analyzer In this Instructable I am going to show how to make a program in Processing that analyzes sound on your computer and sends data to an Arduino that controls an LED matrix to show the spectrum analysis. I will be explaining where to get materials,…… Listed LED Projects, Projects, Sound – Audio Projects

736. Plantduino Greenhouse using an Arduino This summer I wanted to combine my two loves of plant science and engineering. Thus I am constructing my very own greenhc my backyard. I am an undergrad, and as any former student knows, this means I move around constantly, and I am not…… Listed under: Home Automation Projects, Proj

737. Arduino Solar Tracker What is does: It searches for the brightest light source like the sun. Step 1: How it works How it works: I'd made a sensor of 4 LDRs sheets between them The withe stips are the LDRs When the stick on top is…… Listed under: Projects, Sensor – Transducer – Detector Projects

738. Tyco RC Arduino Robot Wanted to make your own robot but couldn't afford the fancy H-Bridge IC's or etch your own PCB? Want a quick and dirty metho making your own wheeled robot? Then you're in luck, but if you want to make your own wheeled robot AND...... Listed under: Projects, Robotics – Autom Projects

739. My Arduino WordClock The initial project, and certainly the one to which many were inspired is that of Doug Jackson. http://www.instructables.com/id/Th Word-Clock-Arduino-version/ also inspired by http://www.highonsolder.com/blog/2011/1/8/arduino-word-clock.html http://www.instructables.com/id/S word-clock/ Step 1: The Materials The list of materials for the board depends on how you plan to make the electronics, if you...... Listed under: Clock – Tir Projects, Projects

740. Chicken Light Timer using an Arduino The wife is into raising chickens and now that the daylight savings is getting near she wanted a way to keep the eg production in high gear. According to the material that she reads, chickens will maintain their egg laying production if they get...... Listed under: Clock – T Projects, CNC Machines Projects, Projects

741. Ultrasonic Range Finder with an ATtiny85 using an Arduino I'm here to show you how to use a HC-SR04 Ultrasonic Range Finder with an ATtiny85 as well programming the ATtiny85 using the wonderful shield that randofo created. List of materials: ATtiny85 Programming Library Arduino Uno HC-SR04 Ultra Range Finder and Library Jumper Wires Breadboard ATtiny85 Step 1: Program...... Listed under: Metering – Instrument Projects, Projects

742. Auto Leveling Laser Cross using Arduino So this Lazy Old Geek purchased a Laser Cross. I created a manual leveling Laser Cross to use for aligning stuff drill press: http://www.instructables.com/id/ManualLevelingLaserCross/ Well, being a Geek I decided to make an automated platform that adjusts autom with an Arduino. Well, the...... Listed under: Projects, Sensor – Transducer – Detector Projects

743. Arduino 2-axis servo solar tracker What is a solar tracker? A solar tracker can increase the efficiency of a solar panel by up to 100%! It does this by always keeping the panel perpendicular to the incoming rays of sunlight. here's an equation to prove this: P = AW sin...... Listed under: Sensor – Transducer – De Projects

744. Arduino True Random Number Generator This is just a fun project I have been working on in the last little while. If you like this instructable, consider voting for it in the A Challenge! Anyone who has experience with programming will have probably used random numbers in their code. These random...... Listed under: Calculator Projects, Pr

745. Bubble Alarm Clock Makes Waking Up Fun using Arduino Waking up to a buzzing alarm clock sucks. I'm one of those people who doesn't like to wake up the sun is out (or has been out for many hours). So what better way to make waking up fun than having a bubble party...... Listed under: Clock – Timer P Game – Entertainment Projects, Home Automation Projects, Projects

746. Uno The Arduino Robot Age: 13 Meet Uno the Arduino powered robot. Some functions include a blinking nose, moving antennas, rotating head, IR dista sensor, twin motor gear box and rotation counters. Uno is made with relatively easy to obtain parts. This project provides a good introduction to Ardui robot.skp475 KB Step 1: Materials Material and tools • Foam board...... Listed under: Projects, Robotics – Automation Projects

747. Arduino Based Auto Timer The Need: Last week around at work I had another usual un-usual problem to face with. Having to make lots of mechanisms components to work with-in seconds or fracs at times I kind-of knew this was always coming. And invariably so my poor mind...... Listed under: Clock – T Projects, Projects

748. Carduino- A simple Arduino robotics platform with its own library This is, as the title says, an Arduino-based robotics platform, with its own library. The "standard" model comes with two back motors, two omni-wheels in the front, and a distance sensor mounted on the front. It also has breadboard space for adding whatever...... Listed under: Projects, Robotics – Automation Projects

749. Building a semi Smart, DIY boat with Arduino and some other sensors I based this off of this really nice instructables.com post for building a water bottle boat, with som additions for obstacle avoidance and light guided control. I used Arduino as a microcontroller, an ultrasonic sensor in the front, a few simple switches on the side of the b

Listed under: Game – Entertainment Projects, Projects, Sensor – Transducer – Detector Projects

750. Remote controlled webcam using Arduino Web-enable your interactive sensors over desktop, smartphone and tablet devices. This tutorial describes in d how to use the free SensorMonkey service to remotely control a pan and tilt webcam attached to an Arduino using nothing more than a simple webpage webpage can be...... Listed under: Internet – Ethernet – LAN Projects, Projects, Video – Camera – Imaging Projects

751. Bike Speedometer using an Arduino Monitor your road speed using the Arduino. This project uses a magnetic switch (also called a reed switch) to measu speed of one of the bike's wheels. The Arduino calculates the mph, and send this information out to the LCD screen on the handlebars...... Listed under: Metering – Instrument Projects, Projects

752. Waveform Generator using an Arduino Waveform generators (also called function generators) are useful for testing and debugging circuits. I often use t frequency response of electronics components like op amp and sensors. This waveform generator is powered by an Arduino. It outputs four waveshap triangle, pulse,...... Listed under: Metering – Instrument Projects, Projects

753. LED Matrix with Game Controller using an Arduino This project was built for my introductory electronics class at the University of Waterloo in Canada. T my first introduction to electronics and therefore, my first project. Follow these steps to build a 16 x 16 LED array with a wall (different colored LED...... Li under: LED Projects, Projects

754. Sous-vide Arduino Shield *NOTE* THIS PROJECT IS DONE BY A GROUP OF STUDENTS FROM SINGAPORE POLYTECHNIC Sous-vide (/suËËviËd/; French f "under vacuum")[1] is a method of cooking food sealed in airtight plastic bags in a water bath for a long time—72 hours in some cases—at an accurately determined...... 755. Audio Output using an Arduino Generate sound or output analog voltages with an Arduino. This Instructable will show you how to set up a really basic d analog converter so you can start generating analog waves of all shapes and sizes from a few digital pins on an Arduino. ...... Listed under: Projects, Sour Audio Projects

756. Audio Input using an Arduino Board Send sound into your Arduino. This Instructable will show you how to prepare audio so that it can be sampled and processed by an Arduino to make sound responsive projects and audio effects. (This article is a companion to another Instructable I've written about building...... Listed under: Projects, Sound – Audio Projects

757. DIY Arduino Motor Shield Today, I'm going to show you how to make an Arduino motor shield (driver) at a low cost. It works splendidly, its posses almost characteristics of the original Arduino motor shield. It's almost considered as a clone. The original Arduino motor shield has the...... Listed under: How To Projects, Motor Projects, Projects

758. Arduino Board Step Sequencer I was wondering about on making a sequencer, a big 16 step sequencer was what I wanted to make. To it's full extension lots of features including single leds for each step, midi input and output, etc. Then I realised that I should start from a...... Listed under: How To – DIY – P Projects

759. Localizer with SIM908 module using Arduino The device is based on a GSM/GPRS module with included GPS. Its main function is to detect and communi own geographical position using, on the choice, the cellular phone reference system or the GPS. Its small dimensions are due to the use, for the...... 760. GSM GPS shield for Arduino Board Shield for Arduino designed and based on the module GSM/GPRS SIM900 or the GSM/GPRS & GPS module SIM908, to make calls, voic data connections via GPRS. HARDWARE INNOVATIONS This new version (old Arduino GSM shield) has several new hardware features, that allow maximum customization Listed under: GPS Based Projects, Phone Projects, Projects

761. Easy Bluetooth Enabled Door Lock With Arduino + Android Thanks to everyone who supported this project and voted for it in the Arduino Challenge! I w awarded second prize and hope to participate in more Arduino contests in the near future. This tutorial will explain a simple way to make a password pr bluetooth…… Listed under: Arduino Android, Internet – Ethernet – LAN Projects, Projects

762. Beginners guide to building Arduino robots with Bluetooth and Android In this tutorial we are going to go over building a Arduino robot that can be cont via bluetooth with an Android phone/tablet. This is a beginners guide that is going to briefly go over the process of wiring and programming your robot. list… The following is the list…… Listed under: Arduino Android

763. LINUSBot – Line Follower Robot using Arduino The operation of this Robot is quite simple. Infra-red sensors placed at the front of the chassis will monit our Robot is over a black line or when it is over a white background. In this project we will use the appropriate rounded chassis…… Listed under: Projects Robotics – Automation Projects
