

Agriculture workers experience one of the highest fatality rates. In 2014, 12,000 youth were injured on farms. Progressive Ag Safety provides educational events, reducing the number of accidents.

Hay Springs, Gordon, and Rushville Kindergarten and 1st grade students participated in Progressive Agriculture Safety Day. With the help of around 20 volunteers, 115 youth members learned about bike safety, road safety, fire safety, water safety, sun safety, ATV safety, and PTO safety. One student, Brynn, gave an entire lesson on wearing a bike helmet using an egg as an example to her family that night after the event.

### Programs At-A-Glance

- Inventure Day with Gordon-Rushville 7th graders created their own product idea. 84% agreed they learned skills to help them be successful in starting their own business.
- Connecting the Dots: 9th and 10th grade students explore different college and career options. One student said thank you for expanding my mind on opportunities for my future.
