

Umoñhoñ Nation Public Schools students work together to construct a tower as part of their journey to the Leadership Summit. This 4-H program focuses on developing their personal leadership skills.

“Leadership Summit: Hike Your Leadership Trail” is a one-of-a-kind 4-H school enrichment program that was designed to help middle school youth develop and advance in their leadership skills. It takes them on a hiking-themed journey to leadership success and helps prepare them to take the right trail in life and become tomorrow’s leaders and role models. When evaluated to describe specific changes they will make because of participating in this program, one student wrote, “I’ll change the way I communicate with fellow peers by inspiring them to do more and be more encouraging.”
