ARM Webinars for APAC

We present a series of webinars - at a time friendly to Asia-Pacific time zones. Whether you are new to ARM or have used the software for years, there is something for everyone to learn!

Data Calculations in ARM   Wed. Nov 6 at 11 am AWST (+8 UTC)

Summarize recorded data with transformations and ARM Action Codes. User formulas, control corrections, subsample calculations, and rating scales are all discussed and demonstrated.

Generating ARM Reports   Wed. Nov 13 at 11 am AWST (+8 UTC)

We cover general reporting topics, including available reports, report sets, print preview, and print options.

AOV Analysis and Report FAQs   Wed. Nov 20 at 11 am AWST (+8 UTC)

We discuss the AOV analysis and demonstrate the features and options of the AOV report in ARM, covering the common questions that users typically ask about the report.

New Statistical Features in ARM   Wed. Nov 27 at 11 am AWST (+8 UTC)

We introduce two new statistical features added in recent versions of ARM: Planned Comparisons and Equivalence Testing.
