First on the budget. It is very clear that substantial cuts to the defense budget are on their way. We've already made cuts in our authorization bill. There's already cuts that we're working on for a possible modification of that bill so that the committee could consider a committee modernization before the bill comes to the floor.

The recent legislation on the debt ceiling calls for \$400 billion of reductions in security spending. That's a slightly larger item than just defense spending, but it's mainly defense spending. It's \$400 billion in reductions in security spending over 10 years, and if the joint committee which has been appointed cannot reach agreement and if a sequester is triggered, then there could be additional cuts approaching \$600 billion over 10 years.

The joint committee has requested this committee and other standing committees for input. They need our input by mid-October, recommendations to them for reductions. It is a critically important review by them and by us. Now, we're going to need the Department to give us recommendations, data, detail, before we consider our input that we would recommend to that new committee.

My first question is, will you, immediately upon confirmation, work to ensure that this committee gets the views of the Department on two things: one, steps that you recommend that we recommend to achieve reductions and to help avoid sequestration; and two, your views on the consequences of sequestration if it occurred?

Dr. CARTER. I do. Secretary Panetta's made it quite clear that this is a circumstance that's unprecedented and we can't get through it and do the right thing unless we are in close consultation with Congress, and that means that the way we would normally do budget business we're going to have to change this year. I certainly pledge to you, if confirmed, that close consultation. But the important thing is Secretary Panetta has made that quite clear.

Chairman LEVIN. Consultation is important, but we also need recommendations. What we will need from you, I would say probably immediately upon confirmation, is a timetable for when you will be giving us the Department's recommendations for reductions to meet the legislation which has been adopted. Will you give us that timetable promptly upon confirmation?

Dr. CARTER. If confirmed, absolutely, Mr. Chairman.

Chairman LEVIN. Now, do you believe that we also as part of that need to reexamine military personnel costs, including health care, compensation, retirement benefits, the things which we obviously are reluctant to impact, nonetheless we have to at least look at for possibilities? Do you agree with that?

Dr. CARTER. I do. Secretary Panetta has used the phrase "everything on the table". However, that is subject to one proviso and that is that, as he puts it, he doesn't want us to do anything that breaks faith with those who are serving or have served and therefore have an understanding about those matters that you just named. He doesn't want us to break faith with those understandings. But subject to that limitation, compensation, like acquisition, like operations and maintenance, like everything else, he says has to be on the table, given the magnitude of the task in front of us.

Chairman LEVIN. That's a limitation which I think every member of this committee would share.

Given the budget pressures under which the Department's going to be operating, one of the things that some of us believe we have to do is to take a look at the stationing and restationing of and the location of our military forces overseas, where we have a large number of bases, and to consider both relocation and the restationing possibly of some of those military forces from overseas back to the United States. Is that on the table?

Dr. CARTER. On the table.

Chairman LEVIN. One of the areas where a number of us have focused, particularly Senator Webb, who along with Senator McCain and I have proposed changes to basing plans on Okinawa and Guam, and also urged a review of the plans that we have in Korea relative to stationing of forces and our normalization. Is that all on the table?

Dr. CARTER. On the table.

Chairman LEVIN. By the way, the Government Accountability Office reviewed that Okinawa-Guam issue and concluded that the total cost of the Okinawa-Guam realignment would be over \$27 billion and that the Guam buildup alone would cost more than \$17 billion, with the U.S. share being \$11 billion, which is much more than originally projected, and in our current fiscal environment I believe that we simply cannot continue with such massive restructuring and surely we can't do that until we have reliable cost and schedule data.

We may not be able to get that data in time for this review, but we're going to have to do the best that we can, and I'm glad to know that you are going to be working with us.

Now, that also would include, I hope, stationing forces in Europe and their location. Is that included?

Dr. CARTER. Yes, it is.

Chairman LEVIN. Okay.

On acquisition issues: We have these huge cost overruns and, while there's been some efforts, and we applaud the efforts which have been made, to try to bring them under control, and we have our Acquisition Reform Act now which is in place, which hopefully is going to avoid these kind of cost overruns in the future, nonetheless we must act. One of the things that we have to do is take a look at the JSF program. I'm wondering whether you believe that, for example, it is important that program look at the possibility of competing subsystems on the JSF or to compete logistics support to help reduce this year's estimate that the life cycle costs of the JSF are going to exceed \$1 trillion. Are you willing to look at all that?

Dr. CARTER. I am, Mr. Chairman, absolutely.

Chairman LEVIN. Please just expand on that.

Dr. CARTER. You mentioned the sustainment costs of the JSF. Senator McCain was referencing the production cost of the JSF. The JSF isn't alone among our programs and activities which have exhibited, as Senator McCain said, intolerable cost growth. We are working on both the production and the sustainment part of JSF and others.

On the sustainment part in particular, Admiral Venlet and I are just beginning work on that this fall. That's a project that the program office hadn't really taken on before, managing that very large sustainment cost. I've seen the estimates for the costs of sustainment for JSF and they're unacceptably high. At the same time, we have not begun to manage them yet, and when we do so I'm expecting that they will come down.

But in all of these matters, on all of our programs, we have a lot of work to do. WSARA was a fundamental foundation for us. We have tried to implement it in each and every one of our programs. But as I indicated to Senator McCain, we have more to do and there are some new chapters I think we need to open in our acquisition efforts to get even better.

Chairman LEVIN. Senator McCain.

Senator MCCAIN. Thank you, Mr. Chairman.

Mr. Secretary, if deficit reduction negotiations fail, triggering sequestration, Secretary Panetta has said that bigger defense cuts would have a "devastating effect on the Nation's security". Do you agree with Secretary Panetta?

Dr. CARTER. I absolutely do.

Senator MCCAIN. It would be devastating?

Dr. CARTER. Devastating, and I say "devastating" not lightly, but in light of two things. One is the scale. Chairman Levin already alluded to the scale, \$600-ish billion on top of what we're facing already, which would take us to a total reduction over the next 10 years of in the neighborhood of \$1 trillion. Just the scale of it alone would lead us to have to consider truly draconian things—abandoning major weapons systems, furloughing civilian employees, and abruptly curtailing training because we couldn't pay for fuel, and so forth. That's the scale.

The other thing about the sequester provision is that it's arbitrary. It's across the board, meaning it deprives us of the opportunity for choice, strategic choice. It puts a haircut across everything. You get yourself in a circumstance where, for example, you can't execute. You can't buy three-quarters of an aircraft carrier or three-quarters of a building.

Both in the size and in the nature of the sequester, I think that word applies.

Senator MCCAIN. Thank you. I hope that all of our members and the American people pay attention to what you and Secretary Panetta are saying.

I want to be a little more specific. In your answer to Chairman Levin's statement, you said, do I understand you correctly, you will be sending us recommendations as to what reductions need to be made to comply with the \$20 billion reduction in authorization that is going to be appropriated? Is that correct, you will be sending us recommendations?

Dr. CARTER. That is. I think the shape they'll be in as they come across is not their final recommendations, but the options that we're considering. Decisions haven't been made. The comprehensive review is surfacing those options, so I would say even before decisions are being made—

Senator MCCAIN. Are you going to send us the recommendations?

Dr. CARTER. Absolutely.

Senator MCCAIN. Now, are you going to be sending us a comprehensive strategic review before we act, in other words before the end of this year?

Dr. CARTER. Yes, the comprehensive review will provide those recommendations before the end of the year.

Senator MCCAIN. Will we receive them before 2013?

Dr. CARTER. Yes.

Senator MCCAIN. Thank you.

Do you agree there's a systemic cultural problem in how the Department does its acquisition business?

Dr. CARTER. I do.

Senator MCCAIN. What is your assessment of the enduring security needs of Iraq and of U.S. national security interests there?

Dr. CARTER. We have spent a lot of time, blood, and treasure in Iraq and have gotten ourselves to a point now where in my judgment we have created a future of stability for Iraq, and I think we all want to act at this juncture to make sure that's preserved. As we reach the end of the year and look forward to what happens after the end of the year, preserving those gains is the objective.

Senator MCCAIN. Have you formed your own opinion of the number of U.S. troops that would be needed and how to ensure their security?

Dr. CARTER. I have not. That is not one of my current responsibilities.

Senator MCCAIN. Do you know whether any military officer recommended to the President that troops be withdrawn from Afghanistan at the size and pace his plan dictates?

Dr. CARTER. I do not, no.

Senator MCCAIN. Your view of that decision you have not formed yet?

Dr. CARTER. No. If your reference is to the 3,000 number that's been in the press, that's not a number that I can validate at all. No decision has been made. No decision could have been made because, as I understand it, we're in discussions with the Iraqis about the mission and what goes forward.

Senator MCCAIN. This is probably not the subject of this hearing, but no one has denied that number, Dr. Carter. It's been published in the press and the media and no one in the Pentagon has said: No, that's not the number.

Dr. CARTER. I'm not familiar with the number.

Senator MCCAIN. On the JSF program, over the last year and a half you restructured the program twice by adding \$7.4 billion and 33 months to the development part of the program. If by the end of the year and under a fixed-price contract the program is not on track, what should we do?

Dr. CARTER. We have put in place a progressive step and we're going to continue to do that.

Senator MCCAIN. But let's assume that they do not reach the fixed-price contract and the program is not on track.

Dr. CARTER. The contract is very clear about the penalty paid. We do not bear the cost this time, unlike the cost overruns you referred to earlier. Because we have a fixed-price contract, the Government's liability is not open-ended, as it was in the past. If it overruns past the ceiling price on this fixed-price incentive firm

(FPIF) contract, that's entirely on those performing the work and the taxpayer does not share in that liability.

Senator MCCAIN. I'd like to believe that, but that hasn't happened yet and the program has been in the making for, what, 10 years now? How much has it cost, \$56 billion? We have 18 airplanes.

Dr. CARTER. I'm sorry, I thought you were referring to the low rate production contract—it's total value is about \$56 billion, yes.

Senator MCCAIN. Have you seen the report that says that "The study paints a bleak picture of billions sunk into incomplete Army programs. Cancelled programs have eaten up between \$3.3 billion and \$3.8 billion since 2004. Numbers represent an average of 35 percent to 45 percent of the Army's annual budget for development, testing, and engineering." Are you familiar with that?

Dr. CARTER. I am, and it's unbelievable and as far as I can see, true. There were so many programs that were begun with optimistic assumptions or with an extravagant expectation. Then they get halfway built, it's like a bridge to nowhere, you can't complete them. This is something that you had in your WSARA. Now as we start new starts—and we do have some new starts even in this budget climate, for example the *Ohio*-class submarine—we're not going to let them start until and unless we see affordability and a target for affordability set early in the program, so that we don't have these bridges to nowhere.

Senator MCCAIN. Mr. Secretary, I hope that's the case. We continue to be reassured that things are changing and somehow they don't.

Finally, are you confident that we can have DOD fully auditable by 2017? That's another moving target that we have been watching for many years.

Dr. CARTER. It's not moving any longer, as near as I can tell. Secretary Panetta made it clear that 2017, he means it. In fact, he said sooner if possible.

Senator MCCAIN. I thank you.

I thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator McCain.

Senator Reed.

Senator REED. Thank you, Mr. Chairman.

First let me welcome Dr. Carter, who I've had the privilege of knowing and working with for many years. I can't think of anyone who is better prepared, not just intellectually and academically, but through the last several years of experience of dealing with these challenges we're talking about. I welcome your nomination and look forward to your confirmation.

I also want to recognize your family and thank them for all they've done to allow you to serve the Nation.

Let me say, I associate myself with the remarks of Senator McCain. I don't think I've heard it as insightfully or thoughtfully put in terms of the cultural challenges facing the Department, the issue specifically of the revolving door, of auditing issues, and the, frankly, poor performance over the last, not several years, but many years of acquisition and procurement programs.

I think one of the issues is that, looking back now over 4 decades or so of involvement with the military, sometimes it's a contractor-

driven environment, no longer strategic, even budgetary, and certainly not sort of uniformed military advice, but a contractor-driven environment. That's something you're going to have to face.

But let me focus on two issues. One was raised by Senator McCain. It's the auditing. In order to fully audit DOD, you need auditors. We've had this discussion before. One of the reasons that literally we have seen millions and millions of dollars disappear in places like Afghanistan and Iraq is that you have not been able to put on the ground adequate number of auditors; is that correct?

Dr. CARTER. That is correct.

Senator REED. What are we doing to fix that?

Dr. CARTER. Trying to put more on the ground, that's just one of the things we're trying to do. We are increasing the number of investigators so that the investigations and prosecution of transgressions is strengthened. General David Petraeus when he was commander over there established a number of task forces to do that, that have made a lot of progress and that we support.

Of course, you don't want to get to the point where you're investigating and prosecuting. You want to prevent in the first place. That is, you don't want to have the conditions where it's even possible to defraud us on a contract. That means having contracting officers, contracting officer representatives, construction engineers, all the things associated with the programs that we're contracting for in Afghanistan and Iraq, in adequate numbers and with adequate skills.

It means having commanders who are contractor-aware and proficient and know how to do this in their area of responsibility. In this and all of these areas, we have to improve our performance in contingency contracting. I fully recognize that.

The Commission on Wartime Contracting has made a number of recommendations, the great bulk of which I agree with and we are actually implementing. But we have a ways to go.

Senator REED. In that context, I think this is one of those areas, too, which is the first to be thrown overboard when the budget gets done in terms of auditors, professional auditors, career personnel. I think we've learned to our disappointment that contracting out some of these procedures doesn't help, either. You are challenged to rebuild, essentially, a professional DOD auditor corps and Service-connected auditor corps. Is that going to be one of your commitments?

Dr. CARTER. It is, absolutely, and it actually began in this committee before I took office. It affects the acquisition workforce as a whole. We need to have within the Government the expertise and the controls. That is not something that we can outsource. That is something that we need to have within the walls of government, and that's why we've been working so hard to increase the strength of the overall acquisition workforce, which includes the auditing workforce.

It's not just a numbers thing. It's skills, it's giving them opportunities for professional development, adequate training, and accreditation. All of that we are doing.

Senator REED. Let me also raise an issue that Senator McCain raised, which I concur in, and that is this revolving door phenomenon. We've had discussions about this also. My sense is that's

obviously a challenge to you and Secretary Panetta, but I think it also has to begin or it has to be substantially embraced by the professional uniformed officers and noncommissioned officers in terms of their expectations of what they will do when they leave and the expectations of their relationship to the Department after they leave.

I would urge you—I've done this privately to General Dempsey—to begin thinking very seriously about, is there, not a law, but a code or a reevaluation of the ethical dimensions of service after retirement in relation to DOD, because unless you have that you won't have the best guide or the buy-in by those people who are affected by this.

Do you have any thoughts on that?

Dr. CARTER. Just that I share the thought. I think Senator McCain began it. I will say this. I travel all around the country to the places where the real work is done. These are our systems command, our logistics centers, and so forth, where the folks actually do the work of contracting and program management, this tremendous workforce, mixed military and civilian.

They know what the right thing to do is. The overwhelming majority of them know what the right thing to do is. They hear what I'm saying and they know what the right thing to do is. It is a huge source of support to them in doing the right thing when they hear from you, from you here, that you are behind us and the leadership in the Pentagon in supporting them. They're supposed to be acting in the warfighters' and the taxpayers' interest and we just need to stand behind them, give them the tools to do the right thing and then support them.

It's great for me. I go out all the time, I talk to them, and they say: I appreciate what you're saying because it sounds like if I make a hard decision and drive a hard bargain on behalf of the taxpayer and the warfighter you'll stand behind me. I will, but that's only half the action. It's important that they know that Congress stands behind them, too.

I just wanted to say I appreciate the support. I understand the frustration that you feel over the performance of the acquisition system, but I don't mind the pressure because it's right and it sends the right signal to our people.

Senator REED. Let me just add a quick postscript. I can't think collectively of a more ethical group of people than professional military officers and noncommissioned officers who served the Nation and retired. But the context has changed over the last several decades, and I think you're right, we do have to send a message about obligations to the taxpayers, to the service men and women who continue to serve. Again, I think what we do and what you do is going to be critical. But without enlisting the senior retired and the currently senior members of the military in this thoughtful discussion, we won't be as successful as we must.

My time has expired, but again, Dr. Carter, for your remarkable service to the Nation let me thank you and wish you well.

Dr. CARTER. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Reed.

Senator Inhofe.

Senator INHOFE. Thank you, Mr. Chairman.

Thank you, Dr. Carter, for being responsive and coming by and talking to us, not just in preparation for this particular position, but in years in the past. I appreciate that very much.

I have six things real quickly, two of which will be something for the record I'd like to get back from you, but they're more specific than some of the general things that were talked about by the other questioners on this panel. One would be—and I have to go back historically and look at this—one of the deficiencies that we have had for a long period of time has been in our Non-Line-of-Sight (NLOS) Cannon.

I can remember back when I was in the House Armed Services Committee many years ago and we talked about that. Then along came the Crusader. We developed that over a period of time and it was—I hate to say this as a Republican about a Republican President, but it was President Bush in 2002 with just no warning at all, at least to me, terminated that program.

General Shinseki came along and started working on a Future Combat System (FCS) that would go farther than just an NLOS Cannon. But nonetheless, we're still operating, it had been up until recently, where there are five countries, including South Africa, that have a better NLOS cannon than we do. This isn't what the American people expect.

On this particular program, I disagreed with all those. However, the Paladin Integrated Management (PIM) program now that you and I talked about, is now the Army's lead fire support modernization effort and I think it's moving along well now. But judging from the past when we had our programs, the Crusader, the FCS, all moving along fine, all of a sudden something happened.

I'd just like to have you make any comments that you might have concerning this program, seeing it through, and its significance?

Dr. CARTER. It certainly is significant, Senator, and I'm personally involved in the acquisition strategy for Paladin, PIM. I'm very familiar with it. We're crafting that acquisition strategy now. The Army acquisition executive has that ball. She's doing a really good job of it and I think it's a well managed activity.

Senator INHOFE. All right. Several of us up here have talked about the F-35. It's one that certainly is a great concern. The Pentagon recently sent a report to Congress on the Chinese military warning. I'm quoting now. It said: "China's military has benefited from robust investment in modern hardware and technology. Many modern systems have reached maturity and others will become operational in the next few years."

One of those investments that they have been talking about is their new J-20 stealth fighter. You say the same thing about Russia with its fifth generation fighter, the T-50. The F-35 being our only fifth generation fighter, I am more concerned now about it than I was before, back when the termination of the F-22 came along.

But I understand the missions of both of them and what can be done with the F-35. When you stop and think about the need, as I recall when this program first came it was 2001, they were anticipating 2,852 copies. That's what they talked about at that time. Now, since that time reports such as the two that I just mentioned

from Russia and China have—to me, if our amount, the number that we should have had was 2,800 back in 2001, it would be actually more now.

You are now looking at 2,443 of the F-35s that would be required by our Air Force, Navy, and Marine Corps. I've often wondered why it's fewer now, in the absence of the F-22 and with the developments that are taking place in Russia and China. Do you feel that number is adequate? I know that you're involved in that, but also I know that you might have a different opinion.

Dr. CARTER. No, that is the joint requirement right now, 2,443 for the U.S. force, and then of course there are additional F-35s that are going to be built for the partner nations. I did do a Nunn-McCurdy certification this past summer, as required by law, of the F-35 program, and in the course of that our independent cost analysis and program evaluation shop did an assessment of the need for the JSF, because as part of certifying a program that is in Nunn-McCurdy breach, as JSF is, I have to ascertain whether there are alternatives that could replace it.

We did not find alternatives to the JSF, no other alternative that met the joint requirement that exists, “joint” meaning there's an Air Force variant, a Navy variant, and a Marine Corps variant.

Senator INHOFE. Why don't you give me some detail for the record, concentrating on the figure that was used in 2001, the developments in Russia and China, and then that reduced figure today, just for the record.

Dr. CARTER. Will do.

[The information referred to follows:]

Based on the current and projected threats, I believe it is critical that we transition to a fifth generation capability across the U.S. Services while maintaining sufficient legacy inventory capacity to prevail in current and near-term conflicts. The Joint Strike Fighter's (JSF) unprecedented combination of stealth, sensing, and firepower will give our force the crucial edge it needs against advanced threats. The current U.S. joint Service requirement of 2,443 F-35s (plus F-35s for partner nations) remains in force based on the existing strategy, force structure, and available resources.

In 2001, the planned JSF procurement strategy for the Department was 2,866 aircraft (1,763 U.S. Air Force and 1,089 Department of the Navy). In 2002, the Department of the Navy reduced their planned procurement to 680 JSF with the incorporation of the Tactical Aircraft Integration (TAI) Plan. TAI more fully integrates the Navy and Marine Corps forces by having Marine Corps TACAIR squadrons deploy with Carrier Air Wings and Navy squadrons deploy with Marine Aircraft Wings. TAI efficiencies allow the Department of the Navy to operate a smaller total of strike fighters and therefore will enable a reduced JSF procurement plan.

Senator INHOFE. Now, you were in my office. You gave me this cute little thing here to carry around and I have looked at it. No one understands it. I don't understand it. I don't think you understand it. But it is very complicated.

What I've done is blow this up for my colleagues up here. Let me tell them what we're talking about here. This is the “Federal Acquisition Rule”. This is how we do business. I look at this and I feel a little bit like Kit Bond [former Senator Christopher Bond, R-MO], although he's not here in the Senate with us any more, but he used to carry these around.

When you look at the complications that are there—and Senator McCain referred to this also—there are 1,680 policy documents and 91 laws affecting Federal Acquisition Regulations (FARs). Here

they are right here. Now, we know it can be done faster. We've made exceptions. We have developed alternative procedures and working groups and organizations, such as the Joint Improvised Explosive Device Defeat Organization (JIEDDO), as I mentioned to you. That's the IED technology that's coming along. I'm very proud of Lieutenant General Mike Barbero, who brought his team in and looked at what we can do. I just sat there and I thought, this is something that's happening today; we're responding; we can come up with something and have it in the field almost in a week.

If that's possible, I get the impression that, as complicated as this is, the FAR Council is made up of the Administrator of the Federal Procurement Policy Office, Secretary of Defense, Administrator of National Aeronautics and Space Administration, and Administrator of the General Services Administration. I think they're just too busy to get into this thing and get their hands dirty and fix it.

Do you have any alternatives to overcome this process if we're not able to do it by getting those four entities in one room until it's done?

Dr. CARTER. First of all, for those who haven't had the joy of contemplating that chart, that shows the budgeting process, the acquisition process, and the requirements process in one big chart, and I was in an earlier conversation joking with a Senator that anybody who could master all of that probably would get pretty frustrated with how ponderous is.

Mike Barbero, the really superb Director of JIEDDO, with whom I work every day, does things differently, and we can do things differently. I said in my opening statement that I have two priorities now. One is supporting the warfighter in the here and now and the other is managing all our programs and activities. When we do things like MRAP or JIEDDO, we can't follow that because the battlefield changes too quickly and we can't wait.

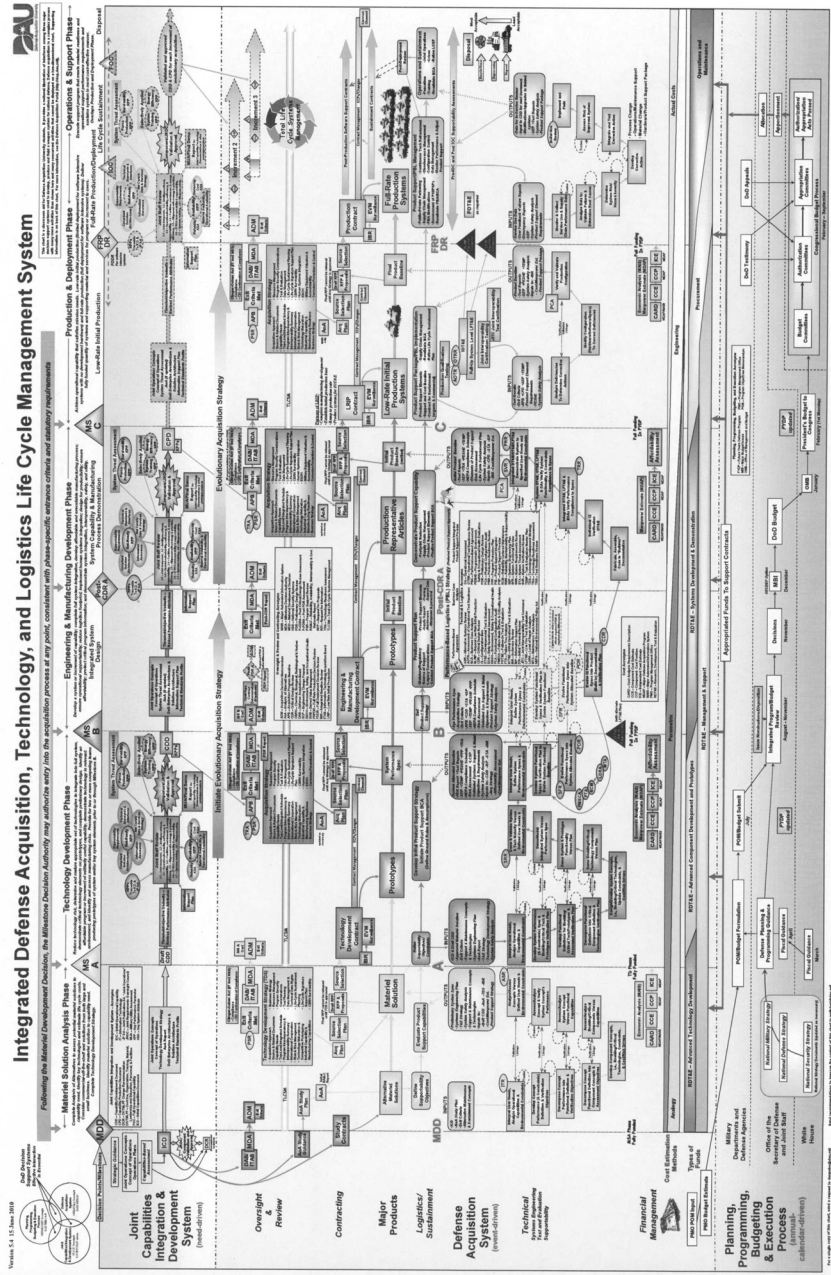

Senator INHOFE. Exactly.

Dr. CARTER. Also, in response to Senator McCain, who was saying, can't we turn yet more pages and do things differently, one of the things I think we have ahead of us now is to try to take the experience of the wars and apply that to our usual FAR-driven acquisition system and see if we can't take some of the lessons of what I call the fast lane and apply them to the FAR and review the FAR.

Senator INHOFE. Okay, that's good. It has worked, and I ask unanimous consent that this be made a part of the record at this point in the record.

Chairman LEVIN. It will be made part of the record.

[The information referred to follows:]

Senator INHOFE. I know my time has expired, and I was going to get into the Army Ground Vehicle. Almost everything that I've said about the NLOS Cannon would apply to that, too. In 2009, General Thompson said the Army has to modernize those 16,000 fighting vehicles for the future or we are going to put soldiers in harm's way. That was 2009.

[The information referred to follows:]

The Army has a comprehensive Combat Vehicle Modernization (CVM) strategy that addresses key capability shortfalls for the entire combat vehicle fleet (Abrams tank, Bradley Fighting Vehicle, Stryker, and M113 family). The strategy is based on three parallel and complementary efforts: transform, replace, and improve. The highest priority effort is transforming the capability of the Heavy Brigade Combat Team by acquiring the Ground Combat Vehicle Infantry Fighting Vehicle. The second priority is replacing the M113 Family of Vehicles with an Armored-Multi Purpose Vehicle (AMPV). Lastly, the Army will improve the Abrams tank, Bradley Cavalry, Fire Support, Engineer Vehicles, and the Stryker to increase protection, ensure required mobility, and allow integration of the emerging network. This strategy ensures the Army's entire fleet of combat vehicles will be able to operate side-by-side across formations with common situational awareness and required levels of protection, mobility, and lethality.

The Ground Combat Vehicle (GCV) is funded in the President's budget for fiscal year 2012 (PB12) and the funding extends throughout the Future Years Defense Program (FYDP). In addition to the GCV, the Army's CVM strategy has several other components, to include upgrading Abrams tanks and non-infantry fighting vehicle (IFV) Bradleys. Upon congressional approval of a new start, the Army intends to initiate the AMPV program. The AMPV will replace the M113 Family of Vehicles (FOV) with a platform that is more survivable, mobile, and can accomplish missions across the full spectrum of conflict.

The Army's PB12 request includes RDT&E funding for all three CVM components. Procurement funding for the AMPV is planned to start in fiscal year 2014 with the first unit equipped planned for fiscal year 2017.

Abrams and non-IFV Bradley upgrades are also funded in PB12 and the funding extends throughout the FYDP.

The Army believes that collectively, all components of the CVM Strategy are within the Army's projected funding resources.

Senator INHOFE. For the record, I'd like to have you address that, as well as, in Afghanistan I know our Oklahoma 45th, we've lost now 10 people already, and one I've been very, very close to is Specialist Chris Horton. I look at these results coming in and I look at the question of reducing our numbers and how we're going about it. I'd like for the record to have you evaluate that for both Iraq and Afghanistan.

Thank you, Mr. Chairman.

[The information referred to follows:]

Iraq:

We continue to abide by the 2008 U.S.-Iraq Security Agreement, which requires pulling out all U.S. forces by the end of the year. This would fulfill the drawdown that the President began with his Iraq strategy announcement in February 2009, which included an end to the combat mission in August 2010, and a responsible drawdown of all U.S. forces by the end of this year. Since that announcement, more than 100,000 U.S. forces have departed Iraq. The U.S. forces that remain have shifted into an advisory capacity, and Iraqis have fully taken the lead on security, and have been successful in keeping violence levels low. Over the next 2 months, the remainder of U.S. forces will depart Iraq unless the United States and Iraq negotiate a follow-on presence.

Afghanistan:

The International Security Assistance Force, U.S. Forces-Afghanistan, and U.S. Central Command are looking at ways to optimize our headquarters forces structure and thin the lines in areas that have transitioned to Afghan security forces lead, while ensuring that U.S. and coalition forces maintain the capabilities they need. The plans for the first phase of the drawdown will be briefed to the President in

mid-October. The details of the U.S. surge recovery are classified, and will be presented in the October version of the congressional boots-on-the-ground report.

Chairman LEVIN. Thank you, Senator Inhofe.

Senator Blumenthal.

Senator BLUMENTHAL. Thank you, Mr. Chairman, and thank you, Dr. Carter. Sorry that you're going to have to strain your neck looking over in this direction. I want to thank you for being here, your extraordinary service to our Nation over many years, your teaching at Harvard and other institutions, and helping to develop a new cadre of public servants. Thank you also to your family for their support over those many years.

You and I talked briefly about the Joint Strike Fighter and about the two submarine-building programs, both very important to our national security, and I'm gratified that you will continue to support those two programs, as we discussed, and thank you for that support.

We talked as well a little bit about the IED roadside bomb problem, which is so heinous and pernicious a cause of injury and death to our troops, in fact, I think it's responsible for more than 85 percent of all our casualties, deaths, and wounds to our warfighters abroad. I wonder if you could reaffirm for me your commitment, which you stated so eloquently in our meeting, to continuing and enhancing the effort to provide better body armor and better protection to our troops who are fighting right now.

Dr. CARTER. I absolutely do. It's what I wake up to every morning. Secretary Gates gave me the responsibility for the counter-IED fight 2½ years ago and then expanded that to all of our fast lane activities, and it's job one.

Senator BLUMENTHAL. Thank you.

I recently visited both Afghanistan and Pakistan in a trip led by Senator Casey, also joined by Senator Whitehouse and Senator Bennett. We spoke with a number of the leaders of Pakistan, the highest ranking leaders, including Army Chief of Staff Kayani, the Prime Minister, and the President. They have a plan. It still needs to be judged in whether in fact it's implemented, let alone implemented effectively.

But if resources are necessary to help to stop and stem the flow of fertilizer and the substances used by terrorists to make those roadside bombs, would you consider using some of the \$800 million now going to the task force for that purpose?

Dr. CARTER. I would. Just let me say that I appreciate that you have keyed in on this as an important part of the IED fight. The calcium ammonium nitrate that originates in Pakistan and then shows up as homemade explosives in Pakistan, other chemicals—potassium chlorate, which is a favorite of the enemy in the east, as the home-made explosive is a favorite of the enemy in the south—we have to attack this IED problem in every single possible way we can, and you can't just wait for it to come and get you. You have to go back into the supply chain.

Part of that supply chain traces back into Pakistan. We need to get back and get at that. I know that we've been working with Pakistan to that effect, but really just in a preliminary way, and a lot more needs to be done.

Senator BLUMENTHAL. I would like to pledge to you—I know that many of my colleagues would join me in this commitment to persuading, cajoling, whatever we can do to put pressure, very simply, very bluntly, on the Pakistanis to face their responsibility, not only to their allies, but to their own people, who are often the victims of the devastating effects of these roadside bombs and suicide bombs made with those materials.

I understand also that you are very much on top of the program to provide better body armor, and other protection to our warfighters from these roadside bombs, and that the growing protective armament, as well as the so-called biker shorts, are likely to be fully delivered by next month or within that time period; is that correct?

Dr. CARTER. That's correct. We are procuring large quantities of ballistic underwear, several different variants of it that offer differing levels of protection, both male and female. Obviously, this is a critically important effort, so we're sparing no effort in that regard. We have a number of suppliers to make sure that we're not dependent upon any single supplier who might have a production interruption or something like that and people wouldn't get to have the protection.

We want to, within limits, provide folks with some choice, so we'd like to make several different variants, because it's obviously an issue of personal sensitivity. But, like all our armor issues, with vehicles, body armor, and so forth, there's nothing more important than this. We're all over it.

Senator BLUMENTHAL. I'm hopeful that we'll continue the effort—I know of your very distinguished scientific background in areas of physics and so forth, as well as in public policy—to develop even more effective protective devices for our troops there.

Dr. CARTER. We are, absolutely.

Senator BLUMENTHAL. One last area before my time expires. While many of these horrific wounds are visible in loss of limb and other kinds of very destructive internal wounds, some of them are invisible—the post-traumatic stress and chronic brain injury. I wonder what efforts you envision—I know there are a lot of ongoing efforts—to address these kinds of invisible wounds that are often undiagnosed and therefore completely untreated?

Dr. CARTER. We look back in history and one of the good things that will come out of what is otherwise not a good thing—that is, a decade of war—will be the progress we have made in recognizing the unseen injuries of war, and not only recognizing them, but treating them.

I'll just make one comment. If you go up, as I'm sure many of you had, up to Bethesda to the Intrepid Center there, that particular Intrepid Center focuses on post-traumatic stress and traumatic brain injury in the same way that the one in San Antonio, for example, focuses on amputation and prosthesis. It's just amazing what is being done to bring together the—I probably won't use the right words here; I'm not a medical doctor—the psychological and social aspects of the treatment with the neurophysiological. That you can now see as people reexperience an injury, they can track the pathways, neuronal pathways. It's just truly remarkable.

That's something we bring to our warfighters and that they deserve, certainly in my heart. But it's something that's going to be good for society as a whole going forward. As I said, it's one of the few good things you can say about what is otherwise a shame, to have been at war for a decade.

Senator BLUMENTHAL. Thank you very much for those responses to my questions, and I just want to say in closing that there are other areas that I would have explored if I had more time, such as cyber security. I know others on the panel may mention those areas, but I would like very much to follow up with you on the IED and roadside bomb issue, as well as cyber security, and say in closing that I agree very much with the comments made by Senators Reed and McCain and very much welcome your receptivity to those areas as well.

Thank you very much. I don't want to give you bad luck by congratulating you in advance, but I look forward to working with you once you're confirmed. Thank you.

Dr. CARTER. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Blumenthal.

Senator SESSIONS.

Senator SESSIONS. Thank you, Mr. Chairman.

Congratulations, Dr. Carter, on this important nomination. I've observed your work over the years. I think you are capable and would make a fine Deputy Secretary. Based on what I know today, I intend to support your nomination.

You are taking the lead in a very important time. You've had questions about spending. As the ranking member of the Budget Committee, I know just how dangerous our debt situation is. We are going to be working with you.

I'll ask you one thing: Will you speak up and point out dangers and risks that might be incurred by certain reductions in spending that may be proposed? In other words, we need the best advice we can get from the Defense Department, and some things may sound good to us in Congress, but in reality, as the professional, it could be dangerous.

Are you willing to defend the legitimate programs and policies that are necessary for a healthy Defense Department?

Dr. CARTER. Absolutely, and I will, Senator, absolutely.

Senator SESSIONS. I believe Senator Levin asked you about deployments in Europe. It's just a matter that's come up again recently. I am of the belief it's difficult to justify 40,000 troops in Europe at this point in time. For our economy it's better for those troops to be in the United States spending their wealth and creating tax growth for the local communities and jobs.

Will you examine our force levels in areas like Europe and maintain the levels we need, but not maintain them at higher amounts than necessary?

Dr. CARTER. Absolutely. Secretary Panetta says everything's on the table.

Senator SESSIONS. That's important to me.

As you go about looking to defend the reasonable defense budget, we ought to ask ourselves how much the base budget has been increased over the last several years. It's about 2 percent, is that cor-

rect? Do you have the numbers offhand, about how much increase DOD has had over the last 2, 3, 4 years?

Dr. CARTER. It's a few percent in real terms, yes, has been the pattern over the decade or so.

Senator SESSIONS. That was proposed in the President's budget, I believe, a little less than around 2 percent over a decade for each year's growth.

Dr. CARTER. Correct.

Senator SESSIONS. We need to ask ourselves a few things. All of us want to contain spending, but I would point out—and maybe you could use this when you defend DOD—the non-defense discretionary spending in the last 2 years has gone up 24 percent, not 4 percent like the Defense Department.

As we talk about the Defense Department, I'm talking about the base budget, not the overseas contingency operations, which is the war cost. That's projected to drop from \$158 billion this fiscal year to \$118 billion, I believe, next fiscal year; is that right?

Dr. CARTER. Correct.

Senator SESSIONS. Then have another drop, perhaps even larger, the next year.

Dr. CARTER. Correct.

Senator SESSIONS. But the base defense budget that we rely on to defend America has to be examined and not unnecessarily weakened, in my opinion.

In fact, the stimulus package of a couple of years ago alone spent more money than the entire cost of the Iraq war, almost \$850 billion. It's more than that. We look at the new proposal for a stimulus package, \$450 billion; that would provide a nice increase for the Defense Department over the next number of years. It's a lot of money.

I guess what I say is if we set priorities for America, don't you think we need to know that the war costs are coming down significantly, but we need to focus on how much you can bring down the base defense budget, and there is a difference between the two?

Dr. CARTER. That's true. To your larger point, Secretary Panetta has said that we can't deal with the deficit situation solely by looking at discretionary spending, period. Certainly as we look at things in the defense budget, as I noted earlier, for the Budget Control Act target that we're given we're facing and will share with you some very difficult choices, all these things that we've been saying that are now on the table that haven't been on the table for a decade. That's going to be hard enough. When you get to the levels of the sequester and the manner of the sequester, it's just devastating.

Senator SESSIONS. Thank you for saying that. I believe it's the responsibility of Congress to reduce spending. We're going to have to do that. But we need not to see the Defense Department as an easy place to take our savings. We have to have it smartly done and throughout our Government.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Sessions.

Senator Begich.

Senator BEGICH. Thank you very much, Mr. Chairman.

Dr. Carter, thank you for coming to see me a few days ago. I appreciate the opportunity to have a conversation with you. I want to just make sure of a couple things. With all due respect to my colleague from Alabama, actually, the 40,000 troops in Europe, we are on the same page here. We want to see some reassessment, not only in Europe, but around the globe, of where we have our resources and so forth.

I want to make sure we put all the numbers on the table. \$800 billion or so in Iraq, \$400 plus billion in Afghanistan, but the real cost comes later, not in your Department, but in the Veterans Affairs, which will be in the trillions. The numbers, what I hear is \$3, \$4, \$5 trillion over time, money that we will have to pay for these brave soldiers who served our country and have now needs and services through the Veterans Administration.

The real cost of the war is in the trillions, not in the billions, in the trillions. We're here in the Armed Services Committee, but when I walk down the hall going to another meeting, which will be the Veterans Affairs Committee, we'll have this discussion and then we will blame the Defense Department for \$800 billion. I want to make sure as people watch this, it's the big number here.

I agree with my colleague—there are no easy places in the Defense Department. There's no easy places in the overall budget. We sit on the Budget Committee together and we are struggling, I would say, on a lot of fronts of how to resolve this. We have some tough calls.

I hope as we sit down and work on the defense budget—I think you're going to find, as we've talked on the Medium Extended Air Defense System (MEADS) issue, on this European issue, there's a lot of opportunity, I think, for us to have good conversation about how to manage the Defense Department budget. But we have to not keep it in isolation of the other pieces to the equation, because when we go to war there are multiple components, because once we leave at some point Afghanistan, whatever remains in Iraq, State Department's going to be spending who knows what, because in Afghanistan they can't support their military. They have no capacity monetarily. Is that a fair statement? They can't write a check and pay for the defense that we're trying to build for them; is that fair?

Dr. CARTER. That is correct. At the moment we are bearing the lion's share of the cost for the Afghan National Security Forces as they are built up.

Senator BEGICH. You define the lion's share, probably—I don't know what the percentage is—80 percent?

Dr. CARTER. That's about right, because the other partners are paying a share of it as well.

Senator BEGICH. They're light on their commitments, that's my view, and that's a personal view. I just think we spend a lot in helping all these countries and some of these others need to lean up a little bit more.

But let me leave that off to the side. First a couple quick questions. Law of the Sea Convention. Do you support that we need to be a signatory to the Law of the Sea Convention in order to put our place on the map?

Dr. CARTER. I do.

Senator BEGICH. We talked about the Ground-Based Midcourse Defense System (GMD) and the importance of it. If confirmed, will you support the 2010 ballistic missile defense review, which established the GMD as a priority and ensures the program is resourced appropriately?

Dr. CARTER. Yes.

Senator BEGICH. I think it's important from the national and international perspective, but also I'm biased—it's located in Alaska and we need to make sure the resources are there to keep it moving forward.

What is your understanding of the Failure Review Board's conclusions and recommendations on the GMD at this point? I know there's been some current reviews.

Dr. CARTER. The Failure Review Board did take up the matter, I think it has a pretty good idea of both what happened and what the path to rectification is for that flight test failure.

Senator BEGICH. I know we're in the first stage of this. You're always going to have failures at a higher percentage in the first stages of testing on anything, because you're trying to test it to determine how it works and you're going to have some failure. As you move the testing forward, you get a higher level of accuracy and competency. Is that fair?

Dr. CARTER. It is. In missile defense, it's particularly important because of the nature of the mission. It's the defense of the country against long-range missiles. You want to make sure things work the way they're supposed to. I work very hard with General O'Reilly, who runs the Missile Defense Agency and works for me on missile defense, on the test program to make sure we have tests that are realistic, that they're numerous enough, by the way that they're affordable enough, because testing's very expensive also, so that when we say the system performs at a given level we have some basis for saying that.

Senator BEGICH. Very good. It's fair to say that—and this is my simplistic way to look at it—when we did the first kind of testing, it was hitting the missiles on the side; now we're testing it straight on. The missiles on the side had low accuracy at the beginning, but now they're very accurate in the sense of their capacity.

Dr. CARTER. Right.

Senator BEGICH. Through testing and development over time; is that fair?

Dr. CARTER. It is. We changed the kinematics and geometry of the end game to make that more and more stressing.

Senator BEGICH. Now we're trying to shoot head-on and that takes a little more accuracy and more testing. As we move forward we'll improve on that. Is that fair?

Dr. CARTER. That's right.

Senator BEGICH. On energy security—there's a good story—I can't remember which newscast had it yesterday—in regards to our dependency on foreign oil and where we're engaged, especially in the Middle East, in defense activity. My argument is the issue of a national energy plan is not—I know a lot of people want to argue and debate over clean energy issues, cap and trade and all that. My issue is national security and economic security.

Do you see the issue of energy from the Defense Department's perspective as an important piece of the equation, trying to figure out how to become more energy efficient? Because I know I think defense runs about \$2 billion over budget because the price of fuel has gone up. But also, a lot of our casualties and fatalities are about moving fuel to the front line and defending that. Is that a priority, or where would you rank that as a priority?

Dr. CARTER. It has to be a priority, for all the three reasons you described. It costs money. It costs lives in a war if you are, for example, trucking fuel around. You put lives at risk to do that. Of course, it's a national necessity to strengthen our energy security. For all those reasons, it's a big deal for DOD.

I will say that we established a post—and this was an initiative that originated in Congress—a Director of Operational Energy at the Assistant Secretary of Defense level. She reports to me. She's superb. She has made a big difference just in the short time she's been in office. She's looking at operational energy, which is the fuel efficiency of vehicles, the insulation of buildings in the field, and things like that.

We also are the largest real property owner in the world, as has been mentioned earlier, and therefore our installations and our buildings and their energy security are a big deal for us also. In all these ways it has to be a priority for the Department.

Senator BEGICH. Great. I appreciate the new staffing that you have in this area, because I think you're right on, that DOD has a huge role here, not only during times of war, but also, as you said, you're a large consumer of energy and how you can tweak that can make a big deal on the consumption.

We briefly talked in our meeting, and I know you're working on it, and that's an updated commentary regarding the report on rare earth minerals. We'll look forward to seeing that.

Last, because my time is up, is at some point, and maybe it can be down the road—I know we'll have some more discussions in regards to this, and that's on Afghanistan and Pakistan and your assessment. I've heard some already, but I know we'll have some more discussion, so I'll just leave that and I may send you some additional questions on that. Is that okay?

Dr. CARTER. I look forward to answering them, sir.

Senator BEGICH. Congratulations. Thank you very much for spending the time with me a few days ago.

Dr. CARTER. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Begich.

Senator Ayotte.

Senator AYOTTE. Thank you, Mr. Chairman.

Thank you very much, Dr. Carter, for your prior service. You're very well qualified to take over this position.

On Sunday we all remembered September 11, the 10-year anniversary of a horrible day in our Nation's history. Do you believe it's an accident that we haven't had another major incident on our soil, and would you agree with what former Secretary Gates said, which is that the ultimate guarantee against the success of aggressors, dictators, and terrorists in the 21st century, as in the 20th, is hard power, the size, strength, and global reach of the U.S. military?

Dr. CARTER. It's no accident, and I absolutely agree with what Secretary Gates said.

Senator AYOTTE. To echo what some of my colleagues have already said to you, if we fail to have the political courage in Congress to make the difficult decisions and look at the entire breadth of Federal spending, including reforming our entitlement programs, allowing the Defense Department sequestration to occur, do you think this will make us less safe as we look forward?

Dr. CARTER. Absolutely. When we say disastrous, that's exactly the disaster we mean.

Senator AYOTTE. I appreciate that. I do not believe that we should subjugate our national security for our failure to have political courage here in Washington and to address the fundamental drivers of our spending.

I wanted to ask you about what Senator McCain asked you about with respect to Iraq. Have you spoken to Secretary Panetta at all about troop levels in Iraq?

Dr. CARTER. I have not, I mean except casually, because in my current responsibilities that is not a subject that I have responsibility for. The piece of it that I work on is the implementation. When decisions are made about that, I will be involved in the implementation of it, the logistics associated with whatever is decided.

Senator AYOTTE. Dr. Carter, as I understand your position you will be Secretary Panetta's right-hand man; is that right?

Dr. CARTER. If confirmed as deputy, yes.

Senator AYOTTE. If confirmed. In that capacity, you will be making recommendations to him based on your best assessment of what should be done on all major areas in DOD?

Dr. CARTER. Yes, absolutely.

Senator AYOTTE. I would ask you, with respect to the troop levels in Iraq, to make a pledge to this committee that you will give very serious and due weight and consideration to what our commanders in the military are saying on troop levels that we need to make sure that our troops are protected, that we do not undermine the hard-fought security we've gotten through Iraq, with many who have sacrificed for that security, based on political considerations? Will you make that assurance to this committee?

Dr. CARTER. Absolutely.

Senator AYOTTE. Because I'm very deeply concerned with what I heard about the 3,000 level of troops, just for the security of those who will remain, for our assets, for securing our embassy in Baghdad, when you look at what happened the other day in Afghanistan to our embassy. These are all missions that these troops will be tasked with. I appreciate that, and I remain concerned from what we're hearing in the press and I hope that it's not true.

I appreciate your spending time in my office to meet with me prior to this hearing. One of the issues that you and I talked about and also you've been asked about today is acquisition costs and how we go about acquisition in DOD. My view, which I think I shared with you in my office, but I'll share again, is that from the limited time that I've spent on the Armed Services Committee that I think a third year law student could negotiate better terms for

the United States of America than we have been negotiating at the DOD on behalf of the taxpayers of this country.

What can we do to make sure that we are negotiating better terms for our country, better results, particularly when we're going to be asking you to have to implement these cuts, which will be very difficult?

Dr. CARTER. I remember that conversation. I appreciate the opportunity to have met with you. I remember that phrase as well. There's so much we can do to do better. I think the place I'd start, Senator, is with the people—we were talking about this earlier—our acquisition workforce, uniformed and civilian, who does this kind of work. I really meant it when I said it earlier: When we back them and we say, we expect you to negotiate a better deal than a third year law student could negotiate, they want to hear that. They want to do the right thing. They want to be backed up by us, and they know that the power of the purse resides ultimately in Congress. When they hear you asking for the same thing, it helps us.

I said there are some new pages I think we need to turn in the acquisition picture, and I'll just mention a few of them. One is to try to create on a lasting basis a fast lane, learn the lessons of Afghanistan and Iraq for acquisition.

Another one is in acquisition of services. You and I talked about this. We spend a lot for services, not just planes, ships, and tanks, but services as well. We are looking at the requirements system, which is what do you ask for in the first place and is that reasonable, is there feedback between the acquisition system and the requirements system.

In all of these ways, I think—and this is something that Senator McCain was asking about—we need to keep turning the page here. There's a lot more we can do.

Senator AYOTTE. How can we ensure that we only reserve cost-plus contracts for the limited situations where they're warranted?

Dr. CARTER. That's my direction to our contracting people and they have to have a reason for deviating from that expectation. There are reasonable reasons for deviating from that, but we have gotten into a habit of doing way too many things on a cost-plus basis that it wasn't necessary to do on that basis.

Senator AYOTTE. How do we end the end-of-the-year spendfest? Because we have all heard, end of the fiscal year, people buying things we don't need just because they want to make sure that they spend all the money we have. I'm interested in creating incentives, whether it's through legislation here, I'd like you to create incentives, to make sure that does not continue, because with limited dollars we just can't continue to buy things we don't need.

Dr. CARTER. I agree with you 100 percent, and it is really about incentives, creating the right incentives, so the incentive is not to spend it all by the end of September.

Senator AYOTTE. Do you have any ideas about what incentives you think would be effective?

Dr. CARTER. Yes, there are a number of things. First and foremost—and I had this discussion directly with our program managers and program executive officers, and I say: You will be judged by the value you deliver to the taxpayer, not by the size of the

budget you're able to secure through the budget process. We will consider you a good program manager and not a failed program manager if you're returning budget to the Treasury at the end of the year.

The other thing you have to do is say to the manager of a portfolio of programs, say a program executive officer: If you manage to be efficient in one area of your spending and you're having troubles in another, we'll give you a break where you're having trouble and you can reallocate some of that funding to where it would make another program more efficient, or if you save money in this way we'll help you buy more of something else, buy more capability.

You have to make people understand that by saving money in one area they can serve their Service better, fix a broken program, and so in that sense they're sharing in the proceeds of good management.

Senator AYOTTE. Thank you, Dr. Carter. I look forward to working with you on these issues and I know many others who serve on the committee as well, so we can improve this process.

My time is up, but I also wanted to mention the Commission on Wartime Contracting: half of our money is going to insurgents. Senator Brown and I have a piece of legislation I hope you'll support, to cut off funding as soon as possible when our money goes into enemy hands.

Thank you so much for testifying today and we very much appreciate your service.

Dr. CARTER. Thank you, Senator.

Senator MCCASKILL [presiding]. Dr. Carter, I'm sitting in briefly for the chairman while he's away, and I love it that Senator Ayotte ended with the Commission on Wartime Contracting. You are well aware from many conversations we've had over the last 4½ years how high up on the priority list this has been for my term on this committee.

Have you had a chance to read the report from the Commission on Wartime Contracting yet?

Dr. CARTER. I have, and I've talked to the commissioners on a number of occasions about the report. My general impression is it's extremely well done. We've been working with them side by side. I think we were trying to work off the same list of recommendations that they have. It points to a problem that is a very serious one, and I thought it was a good piece of work, with great benefits to us, insights that we could use.

Senator MCCASKILL. Is there anything in the report that you disagree with? Is there anything that you took issue with?

Dr. CARTER. There are a few of the recommendations—we haven't finished assessing this final report, which contains so-called strategic recommendations, which are more general. We haven't really had a chance to assess them. In fact, I testified before the commission with respect to their two interim reports.

Senator MCCASKILL. Right.

Dr. CARTER. I forget what the numbers are, but they had in the neighborhood of 70 to 80 specific recommendations, and I think we adopted somewhere, I want to say, between 60—I'll get you the specific numbers and the details at any level you want. But almost

all of their recommendations made a lot of sense and were things that we either were doing or should have been doing.

[The information referred to follows:]

This report included 15 strategic recommendations, of which 11 were Department of Defense (DOD)-specific recommendations and 4 were directed at Congress. As for the 11 DOD-specific recommendations, we embrace all of them in principle and are already in the process of implementing some of them.

Senator MCCASKILL. I will look forward to any, particularly any issues that you don't completely agree with, because I think it's important that we figure out whether we all are on the same page going forward with the commission's work. This is going to be a subject of a hearing in the full Committee of Homeland Security and Governmental Affairs next week, and then the Readiness and Management Support Subcommittee of this committee, we're going to do some work on it, too, and perhaps the Contracting Subcommittee of the Homeland Security and Governmental Affairs Committee also.

There's going to be several follow-up opportunities to work on these recommendations over the coming weeks. I would really like to know if there's anything there that you are not completely comfortable with, because if there is I think we have to sort that out at the beginning, because my job now is to hold you accountable to make this work of this Contracting Commission be real to our military.

I think that we have two problems on contracting. One is contracting within the big Pentagon picture and the other is contingency contracting. They have different sets of problems. Now, many of them are kissing cousins, but they are different sets of problems.

The biggest problem with the contingency contracting is an overreliance on contractors in order to meet the mission and the supremacy of the mission in terms of shortcutting good contracting practices and a culture that is all about that. The view: I want what I want when I need it in theater; I don't want to listen to any acquisition personnel tell me I can't have it.

It is anecdotal, but it is true that one of the major generals over contracting in Kuwait when I visited there—and a member of your staff was with us—actually said to me: I wanted three kinds of ice cream in the mess hall yesterday and I didn't care what it cost.

Now, that is obviously problematic. We all want our soldiers in theater to get ice cream. We want them to get a variety of kinds of ice cream. But we have to care what it costs. It's that culture that I think your leadership at the very top is going to be absolutely essential on. I wanted to make sure we find out if there is any place that we disagree.

The other big issue about contingency contracting is sustainability. I am very uncomfortable with the analysis that's going on in theater about sustainability of the money we're spending. I'm even more concerned that, for the first time, we have now morphed the Commander's Emergency Response Program (CERP). CERP began as something that was supposed to be for the on-the-ground commanders to be able to use to win hearts and minds in small projects. We now have an Afghanistan Infrastructure Fund in the DOD budget for the first time.

We are actually going beyond what CERP was ever intended to be and we're building infrastructure in DOD. I'm not aware that we ever had a policy debate about whether that was a good idea or not. I would love to know why we think that's a good idea, and is this just going to be in contingencies or are we going to start taking this responsibility away from the State Department and U.S. Agency for International Development? I would love your follow-up thoughts on that.

Also, Dr. Carter, about this Iraq Infrastructure Fund, it's \$400 million. That's not a huge amount of money now, but neither was CERP when we started. Neither was CERP, and it obviously has grown significantly.

Can you illuminate for me why they felt that they had a need to create an infrastructure fund in addition to the CERP funds that were being used for projects, road-building and community redevelopment?

Dr. CARTER. I would be pleased to, Senator. I'd like to get back to you on that particular issue in some detail because it's partly a policy issue as well.

Senator MCCASKILL. Okay.

[The information referred to follows:]

As there is no Iraq Infrastructure Fund, the question appears to be focused on the Afghanistan Infrastructure Fund (AIF). In fiscal year 2011, Secretary Gates and Secretary Clinton requested that \$400 million be appropriated to the Department of Defense (DOD) for the AIF to execute critical infrastructure projects in support of the counterinsurgency strategy in Afghanistan. The AIF is designed to bridge the resources and capabilities and serve the missions of both departments in supporting projects critical to counterinsurgency objectives and economic development such as electricity projects in Kandahar. The AIF projects are developed jointly with the Department of State.

With regard to the question of an overlap with the Commander's Emergency Response Program (CERP) mission, the CERP is a DOD program to enable military commanders to respond to urgent, small scale, humanitarian relief and reconstruction requirements within their areas of responsibility. The DOD reduced the fiscal year 2011 CERP request by \$400 million to resource the AIF.

Dr. CARTER. If I could just comment on your general point, you're absolutely right, contingency contracting and all the rest of the contracting we've been talking about, JSF and so forth, present a different set of challenges. You have it in a nutshell that it's war, so people want to move quickly, and very understandably.

What we need to do is not make it a choice between appropriate controls and contracting discipline and responsiveness to the warfighter. That's where I think the Commission on Wartime Contracting said we've fallen down over the last decade. We're getting better. We're trying to get better.

With respect to the commission, I absolutely will get back to you on it on anything we disagree with. I know they have some numbers in there that we're trying to look at. I can't validate their numbers, but I can validate the overall accuracy of the report in the sense that any level of waste, fraud, and abuse is unacceptable, and all of the recommendations they've made, as I said, we're working off the same list.

Senator MCCASKILL. We built a \$300 million power plant in Kabul that is not fully operational and it's too expensive for them to use. If anybody tries to tell me there was a sustainability analysis done before we spent \$300 million, I'd like to know who takes

ownership of that, because I find it incredibly hard to believe that anybody looked at the long-term sustainability of a high tech, dual fuel power plant that's too expensive and, frankly, beyond the capability of the Afghan people to actually use it in a way that it was intended.

That's a lot of money, and that's just one example, and unfortunately I could list too many. I would like you to address the sustainability analysis. I would like to see that in war colleges throughout the training of our amazing leaders in our military we begin to embrace contracting as part of that training, because we are never going to be able to get away from contingency contracting. The sooner these leaders know that's very important, the better.

Let me very briefly, because I'm out of time. If you're going to contrast two acquisition programs, we have the poster child of bad with the JSF and the poster child of good with the Super Hornet. Now, factually that's great for me because I happen to care a lot about the Super Hornet in some of this, obviously. It would be obvious to point out that some of this is parochial.

But there's no better example, we've never had a program more out of control, more over cost, than the JSF. Meanwhile, the Super Hornet has always delivered, on time, and now we're down to a cost of \$52.7 million fly-away, and today's estimate on the JSF is \$113 million, so half the cost.

I just have one simple question: Given the Navy has publicly stated that the Super Hornet can undertake virtually any combat mission, is it your opinion that the Super Hornet remains a viable alternative based on the Navy's tactical needs?

Dr. CARTER. You're right that the performance of the Super Hornet program is commendable. Obviously, we're trying to manage in a direction so that JSF will one day replicate that kind of performance. I said in the Nunn-McCurdy certification this summer that no alternative meets the joint requirement as it is now spelled out for a fifth generation fighter but the JSF.

Finally, we have in the last couple of years procured additional Super Hornets as we have been forced to delay the onset of production ramp-up for the JSF.

Senator McCASKILL. I have some more specific questions about the Super Hornet versus the JSF and I will get those for the record for you.

Thank you very much, Dr. Carter. My time has expired.

Chairman LEVIN [presiding]. Thank you very much, Senator McCaskill.

Senator Graham.

Senator GRAHAM. I'd like to associate myself with Senator McCaskill's comments about the Super Hornet. I have some questions for you, too. I think it is a viable airplane at a good price and we ought to make sure we have an adequate inventory until we get the JSF in a better situation.

Let's see if I can summarize your testimony when it comes to defense spending. Is your understanding and your belief and that of Secretary Panetta that if Congress were to follow through with the \$400 billion cuts that are being asked by the administration, President Obama, to the defense budget and we took \$600 billion more

if the super committee fails to do their job, a trillion dollars, it would be devastating to the Defense Department? Is that correct?

Dr. CARTER. That's correct.

Senator GRAHAM. We would take the finest military in the history of mankind and gut it, is that right?

Dr. CARTER. Yes. The word Secretary Panetta uses is—

Senator GRAHAM. Do you have any idea why we would do that in Congress? What were we thinking? I don't know. I'm asking you because I can't think of a good reason to do that. Is the world that safe?

Dr. CARTER. The world's not that safe. We still are looking in our defense strategy to be ready for this very wide range of threats and contingencies that the world presents to us. We don't see that ending at any time in the future. We don't see anyone else in the world being able to assume the leadership role that the United States has. We never ever again want to have a hollow military.

Senator GRAHAM. We're on the path to do all those things if we follow through with this potential proposal?

Dr. CARTER. I think that's what Secretary Panetta means when he used the word "disastrous".

Senator GRAHAM. I think it's just completely brain-dead for us even to consider this, and we're not going to let it happen. You just tell the men and women in uniform we're going to wake up and get some good common sense here pretty soon.

Iraq. Does it matter how it ends in Iraq in terms of our national security interest?

Dr. CARTER. Absolutely.

Senator GRAHAM. On a scale of 1 to 10, how important is it for Iraq to end well, become stable, and not be a satellite state of Iran?

Dr. CARTER. It's a 10, after all we've put into it.

Senator GRAHAM. If it's a 10—and I couldn't agree with you more—we ought to be looking at resourcing it as a 10. Do you agree with that?

Dr. CARTER. The decisions haven't been made about resourcing—

Senator GRAHAM. Do you agree with the concept that if it's a 10 we ought to resource it consistently?

Dr. CARTER. Absolutely.

Senator GRAHAM. Let's talk about Afghanistan. Does it matter how that ends?

Dr. CARTER. It does.

Senator GRAHAM. It does. It matters a lot, because that's the place where the attacks of September 11 were planned; is that correct?

Dr. CARTER. Absolutely.

Senator GRAHAM. What would happen after all of these years and all the blood and treasure and mistakes we made, if the Taliban were somehow able to come back? What would it mean to our national security interests down the road?

Dr. CARTER. It would be very serious.

Senator GRAHAM. Do you believe we can prevent that?

Dr. CARTER. I do.

Senator GRAHAM. I think we have a plan to prevent it. The only thing I worry about is that we're going to be penny wise and pound foolish.

I know you very well, and I know that you and Secretary Panetta are going to give us the unvarnished truth. As we transition to Afghan control, please realize, to the committee and those who are listening, that how it ends does matter.

The strategic partnership agreement that's being negotiated with the Afghan Government, are you familiar with the concept?

Dr. CARTER. I am.

Senator GRAHAM. Do you support the idea that post-2014 we would have an enduring relationship with the Afghan Government and people?

Dr. CARTER. Yes, I do.

Senator GRAHAM. It is in our national security interest to have a political relationship with the Afghan Government and people; do you agree with that?

Dr. CARTER. Sure.

Senator GRAHAM. Do you agree that it would be in our national security interest to have an economic relationship with the Afghan people?

Dr. CARTER. Yes.

Senator GRAHAM. Do you agree it's in our national security interest to have a military relationship with the Afghan Government, security forces, and people post-2014?

Dr. CARTER. I do.

Senator GRAHAM. Do you agree with me that training of the Afghan army will be a need that goes past 2014?

Dr. CARTER. I will.

Senator GRAHAM. Do you agree with me that General Caldwell is one of the unsung heroes of this war by creating a training regime that is more efficient and more productive?

Dr. CARTER. Double yes.

Senator GRAHAM. Do you agree with me that the counterterrorism component that exists today will be needed past 2014 to make sure al Qaeda and Taliban do not regenerate?

Dr. CARTER. Yes.

Senator GRAHAM. Do you agree with me that the Afghan Government has virtually no air force and they will need some air capability?

Dr. CARTER. Yes, and that's part of—

Senator GRAHAM. Do you agree with me that the intelligence-gathering capability of the United States is second to none?

Dr. CARTER. Yes.

Senator GRAHAM. That the Afghan Government and the Afghan security forces would benefit from that assistance?

Dr. CARTER. Yes.

Senator GRAHAM. Do you agree with me that we need to embed some American soldiers in the future to make sure the Afghan army develops in a mature professional fashion?

Dr. CARTER. If Afghanistan agrees to that, of course.

Senator GRAHAM. All of this is contingent on them asking.

Dr. CARTER. You bet.

Senator GRAHAM. Do you agree with me it would be in our national security interest to leave behind a military footprint that would have American air power available to the Afghan security forces and counterterrorism units to suppress the Taliban as far as the eye could see?

Dr. CARTER. I think that's desirable, but of course we haven't begun to address the issue—

Senator GRAHAM. But if the Afghan people through their government would ask, it would be in our national security interest to say yes?

Dr. CARTER. It would.

Senator GRAHAM. Would you agree with me that if we had such an enduring relationship, it would be a signal to Iran that needs to be sent?

Dr. CARTER. Yes.

Senator GRAHAM. Do you agree with me that the Iranians are trying to develop a nuclear program, not for peaceful purposes?

Dr. CARTER. That's my understanding, yes.

Senator GRAHAM. Do you agree with me that it would change the world as we know it if they were successful?

Dr. CARTER. It's very undesirable to let Iran go nuclear.

Senator GRAHAM. Do you believe that we're on a collision course with Pakistan?

Dr. CARTER. I can't say that. We work very closely with Pakistan in some areas. Obviously, there is great frustration in some other areas on both sides.

Senator GRAHAM. Would you agree that the relationship is in a new phase, very problematic?

Dr. CARTER. It is certainly problematic.

Senator GRAHAM. Do you agree that a lot of the IEDs coming into Afghanistan are made from products in Pakistan?

Dr. CARTER. They are.

Senator GRAHAM. Do you agree that it is now time for the Pakistani Government to step up and make a decision as to who they are and what they want to be?

Dr. CARTER. Certainly as regards terrorism and as regards weapons crossing the border from Pakistan to Afghanistan, we need their help. I mentioned that earlier with respect to ammonium nitrate, but it's across the board. They need to step up.

Senator GRAHAM. Would it be in our national security interest to open up transportation routes in the north to get supplies and equipment into Afghanistan without having to send everything through Pakistan?

Dr. CARTER. It is and we are.

Senator GRAHAM. The Uzbekistan Government, I met with them. They're willing to expand the relationship with the United States. Do you think that is in our national security interest to do so?

Dr. CARTER. It is. They have been part of that northern resupply system and—

Senator GRAHAM. It's my understanding that the administration is negotiating with the Uzbekistan Government to dramatically expand that supply capability and that we would need some waivers from this committee to support the Uzbekistan security forces. Sec-

retary Panetta has written me a letter suggesting he supports that. Would you support that?

Dr. CARTER. Certainly if Secretary Panetta supports it, I would. I understand enough about the northern distribution network to understand its importance.

Senator GRAHAM. This is a critical area for us regarding Afghanistan. I want to let the committee know, Mr. Chairman, that we're on the verge of a major breakthrough in terms of northern supply and the committee will need to come up with a consensus about how we can help the Uzbekistan Government. Some waivers would be necessary to sell them equipment, monitoring their human rights problems in the past.

I think you're an ideal candidate for this job. Most of the defense budget is personnel costs. When you want to reform retirement, count me in. I want to do it in a humane, generous way, but it needs to change. When you want to adjust TRICARE premiums for people like myself who is going to be a retired colonel one day, count me in, because even though you serve and you sacrifice you still have, I think, the ability to serve in retirement. We're not going to ask more of the retired force than they can give, but change has to come.

I think you're an ideal choice to be Deputy Secretary of Defense and I look forward to supporting you.

Dr. CARTER. Thank you, Senator.

Senator CORNYN. Mr. Chairman, may I make a brief UC request?

Chairman LEVIN. You certainly can. Before you do that, I want to just say—this retirement announcement as a colonel, this precludes the possibility, which is there apparently, of you being promoted to a general.

Senator GRAHAM. We have enough challenges in the world. [Laughter.]

Chairman LEVIN. Senator Cornyn.

Senator CORNYN. I'm grateful, Mr. Chairman. I want to say to Dr. Carter how much I appreciated him visiting with me. I support his nomination.

I'd like to make a unanimous consent request that two letters that I have written to him and two letters he's written back to me relating to the JSF be made part of the record.

Chairman LEVIN. They will be made part of the record.

[The information referred to follows:]

1045

United States Senate

WASHINGTON, DC 20510

August 1, 2011

The Honorable Ashton B. Carter
Under Secretary of Defense
3010 Defense Pentagon
Washington, DC 20301-3010

Dear Dr. Carter,

As strong supporters of the F-35 Joint Strike Fighter (JSF) program, we write to express concern regarding reports that the latest official cost estimate suggests that operating and support costs for the program could total more than \$1 trillion over 50 years.

The JSF represents the backbone of the Department of Defense's fighter recapitalization efforts and will serve as the cornerstone of future U.S. tactical airpower. The JSF program is intended to enable the United States to produce fifth-generation strike fighters to support our national defense and help ensure air superiority for decades to come.

We are concerned that the Department's F-35 operating and support cost models make overly conservative assumptions using cost factors and maintenance procedures from legacy aircraft systems, rather than actual cost data. It appears this has led to uninformed speculation in recent press articles that may significantly overstate costs for the entire F-35 program. Likewise, this leads us to believe that the F-35 operating and support cost estimates presented to Congress along with the submission of the April 15th Selected Acquisition Report may not be of sufficient quality and fidelity to enable Congress to make informed budget decisions.

As you noted in recent testimony before the Senate Armed Services Committee concerning the JSF operating and support cost estimates: "...you shouldn't believe them because we haven't really begun to manage them yet. They are parametric forecasts." It is imperative that JSF program performance and cost be portrayed to Congress and the program's international partners as accurately as possible. Releasing an official operating and support cost estimate that lacks analytical rigor has raised undue alarm, despite the fact that the JSF program's technical performance and cost trends indicate the program is making considerable progress.

We appreciate your work on the Technical Baseline Review, which placed the JSF program on a sound footing going forward. However, in order to guarantee the continued success of this program, it is imperative that this effort be followed with solid analysis of JSF life cycle costs, so both the Department and Congress can make well-informed decisions about the program in the future. These decisions will require sound analysis of analytical methodologies that accurately reflects actual program costs, is consistent with the scope and definition of operating and support costs on other major DoD acquisition systems, and fully incorporates the benefit of next-generation logistical approaches that will be utilized to maintain the JSF over its life cycle.

The Honorable Ashton B. Carter
August 1, 2011
Page 2

In addition, please inform us as to when the Department's sustainment strategy for the JSF fleet will be completed, when that will be shared with Congress, and whether the FY13 DoD budget and the accompanying FYDP will reflect its requirements. We look forward to your prompt response to these concerns.

Sincerely,

JOHN CORNYN

ACQUISITION,
TECHNOLOGY
AND LOGISTICS

THE UNDER SECRETARY OF DEFENSE
3010 DEFENSE PENTAGON
WASHINGTON, DC 20301-3010

SEP - 6 2011

The Honorable John Cornyn
United States Senate
Washington, DC 20510

Dear Senator Cornyn:

Thank you for your August 1 letter concerning cost estimates for the F-35 Joint Strike Fighter (JSF). Your support of the F-35 program is valued, and your concern over the fidelity of the estimate for Operating and Support (O&S) costs is well founded and shared by the Department. This estimate represents a projection based on an extensive set of assumptions and on historical data drawn from previous aircraft programs adjusted to reflect the F-35's configuration and support structure. While it is currently our only assessment of O&S costs, it does not yet reflect the application of any management discipline to these costs or realism to the assumptions made in the models, something the Department is committed to doing.

Nor have these estimates yet been informed by actual JSF data. Estimates at this point in a program are – by their nature – imprecise and need be informed and continually adjusted by actual system performance. For the F-35, that process will begin when the Services start operating the first production aircraft later this year. In the near term, the JSF team will continue to analyze the detailed basing, manpower requirements, and reliability forecasts that form the foundation of the O&S estimate to identify the most efficient and effective support solutions. While the F-35 is designed to achieve efficiencies through commonality, shared support, and state-of-the-art maintenance, logistics, and supply chain systems, we will need to exercise the system before we can make accurate assessments of the those benefits. I strongly believe we can reduce the costs that will be required to operate and support the F-35, but it will take time to accrue the data required to more accurately inform the estimates. This data will also inform a careful review of the O&S cost drivers for F-35.

We are undertaking a number of initiatives to inform sustainment decisions to better control the lifetime O&S costs for the F-35 fleet. The JPO is: baselining requirements with the Services and leveraging increased efficiency opportunities provided by the F-35; developing an Affordability Management Plan (AMP) that is focused on reducing the costs of support products (e.g., support equipment, spare parts, and training devices); and addressing reliability and maintainability. For example, the F-35 JPO is performing a deep dive on key depot-level repairables and consumables – which account for approximately 30 percent of the projected O&S costs – to identify candidates for targeted reliability improvements and both unit and life cycle cost reductions.

The JPO is conducting a Business Case Analysis (BCA) that will evaluate both the current sustainment strategy and potential options to determine the best value, long-term support solution for the program – the first phase of which is scheduled for completion in December 2011. This effort will evaluate options for supply chain management, sustaining engineering, field operations support, and fleet management. Additionally, the JPO is conducting a series of

design reviews on sustainment elements (e.g., the supply chain) throughout 2011 and 2012 to verify the technical design and identify whether there are any opportunities for redesign that could reduce costs. As we mature all of these cost-reduction initiatives from the AMP, BCA and design reviews, the results will be incorporated into the F-35 life cycle cost estimate and ultimately realized by the Services and international partners.

I will ensure Congress has full visibility into all of these efforts. The BCA will not be completed in time for the requirements to be reflected in the FY 2013 budget request; however, we are using real-time analysis as much as possible to inform our budget planning.

Again, thank you for your continued support of this important program and the Department of Defense. I will continue to work with Congress to provide transparency and visibility into the F-35 program to ensure we achieve our shared goal of providing the taxpayers with the right 5th-generation strike fighter capability at the least cost. A similar letter has been sent to the other signatories of your letter.

Sincerely,

A handwritten signature in black ink, appearing to read "Ashton B. Carter". The signature is fluid and cursive, with the first name being the most prominent.

Ashton B. Carter

JOHN CORNYN
TEXAS

United States Senate

WASHINGTON, DC 20510-4305

August 24, 2011

The Honorable Ashton B. Carter
Under Secretary of Defense for Acquisition, Technology and Logistics
3010 Defense Pentagon
Washington, DC 20301-3010

Dear Dr. Carter,

As the Senate prepares to consider your nomination to serve as the next Deputy Secretary of Defense, I write to express disappointment with your apparent lack of commitment to the success of the largest DoD major defense acquisition program in our nation's history, the F-35 Lightning II. This program is the centerpiece of our strategy to retain air dominance for decades to come, and it is critical to our long-term national security. If confirmed by the Senate to serve in this important role, your personal commitment to making F-35 succeed will be essential. Simply put, there is no acceptable alternative to the F-35 program, and it must be placed on a path to success.

As you know, the three variants of the F-35 will replace our military's aging fleets of AV-8s, A-10s, F-16s, and F-18s. In your written testimony before the Senate Armed Services Committee in May of this year, you correctly stated that "the F-35 will form the backbone of U.S. air combat superiority for generations to come." This 5th-generation stealth aircraft, with its multi-role precision attack capability, represents a tremendous leap in capabilities, as compared to the legacy aircraft it will replace. However, the U.S. is not alone in pursuing this level of capability, as both Russia and China have made substantial progress in developing their own 5th-generation tactical aircraft. If we fail to field the F-35 in adequate numbers, our nation will run the risk of losing its status as the preeminent air power in the coming years.

I am concerned that the DoD's failure to sufficiently defend and advocate for the F-35 program has enabled and even invited unwarranted criticisms from many corners, including calls for partial or complete cancellation of the program. It is my hope that, as Deputy Secretary of Defense, you would be a champion of the F-35 program, using your voice to remind Congress that this weapon system is one our nation cannot do without. I strongly encourage you to step up your defense of this key program.

I look forward to discussing this issue with you before your Senate confirmation, and I would appreciate your written answers to the following questions:

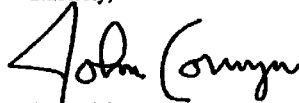

1. Why is it imperative for the United States to successfully field the F-35 for the Air Force, Marine Corps, and Navy, as envisioned in the latest Future Years Defense Program?

The Honorable Ashton B. Carter
August 24, 2011
Page 2

2. In the FY12 budget request, the Department cut approximately \$12 billion from the F-35 production budget and returned just \$4.6 billion back into the development budget. The Department then spent a significant portion of the remaining \$8 billion on 4th-generation F/A-18E/F aircraft. Continuing to procure less capable 4th-generation aircraft is a questionable strategy given that our adversaries are already developing their own 5th-generation aircraft, and cutting F-35 production funding in order to fund these 4th-generation aircraft makes little sense. Can you assure me that this will not occur again in the future?
3. After the Department moved a net \$8 billion out of the F-35 program, it then submitted a reprogramming request to cover early production cost growth and concurrency costs. Can you assure me that you will budget for sufficient funding to cover known costs in the future?
4. As you testified in May, while procurement has been held flat in FY10 – FY12, your intent is to support a 1.5X “ramp rate” going forward. Will this Administration begin to ramp up in FY13 at 1.5X per year, or will the Department continue to use the F-35 program as a bill-payer for other programs, undermining affordability and driving up costs to both the U.S. Government and our F-35 international partners?
5. This program is critical to the national security of our eight F-35 international partners and for the successful execution of future coalition operations. As such, will you commit to a more proactive dialogue with the international partners on this program in the future?

Thank you for your service to our nation, and for your prompt reply to this request.

Sincerely,

JOHN CORNYN
United States Senator

ACQUISITION,
TECHNOLOGY
AND LOGISTICS

THE UNDER SECRETARY OF DEFENSE
3010 DEFENSE PENTAGON
WASHINGTON, DC 20301-3010

SEP - 1 2011

The Honorable John Cornyn
United States Senate
Washington, DC 20510

Dear Senator Cornyn:

Thank you for your August 24 letter concerning the F-35 Lightning II Joint Strike Fighter program. I assure you that the Department is committed to the success of the F-35 program and it has received steadfast attention and support during my tenure as the Under Secretary of Defense for Acquisition, Technology and Logistics. The Department will continue to focus on delivering this important capability for the warfighter.

On June 1, 2010, I certified to Congress that the F-35 program is essential to national security and that there are no alternatives to the F-35 program that would provide acceptable capability to meet the joint military requirement at less cost. That certification, following a thorough Nunn-McCurdy review, highlighted the continued need for the F-35 program and the need to control program costs in production and in sustainment. Since then, the Department has continued to focus its efforts on controlling the costs associated with the F-35. The success of the F-35 is absolutely dependent on its affordability for the U.S. Services, as well as the eight international partners. I have maintained close communication with our industry partners and international partners on our efforts to manage those costs as we transition from development to production and into long-term sustainment. I appreciate the opportunity to provide responses to your specific questions:

1. Why is it imperative for the United States to successfully field the F-35 for the Air Force, Marine Corps, and Navy, as envisioned in the latest Future Years Defense Program?

During the Nunn-McCurdy review we examined the importance of the F-35 to national security. The review assessed the F-35 against current legacy aircraft operated by the Services, as well as upgrades to those weapons systems, for their potential to fulfill the Department's future operational needs. The analysis compared the options on the basis of survivability, basing, lethality, and networking and determined that there are no alternatives to the F-35 that provide acceptable capability to meet the joint military requirement at less cost. This analysis depends critically on the ability of the Department to deliver the F-35 at an affordable cost. My focus is on managing that cost and making decisions now that will ensure affordability in the future.

2. In the FY12 budget request, the Department cut approximately \$12 billion from the F-35 production budget and returned just \$4.6 billion back into the development budget. The Department then spent a significant portion of the remaining \$8 billion on 4th-generation F/A-18E/F aircraft. Continuing to procure less capable 4th-generation

aircraft is a questionable strategy given that our adversaries are already developing their own 5th-generation aircraft, and cutting F-35 production funding in order to fund these 4th-generation aircraft makes little sense. Can you assure me that this will not occur again in the future?

Secretary Panetta has emphasized that in meeting the Department's budget challenges, every program and activity must be on the table. In reviewing the upcoming President's budget for FY13, the Department is giving programs particularly close scrutiny as a result of the reductions in budget authority for security spending included in the Budget Control Act of 2011. That said, the F-35 program changes in the FY12 budget request were driven by managerial, rather than budget, concerns. The F-35 program was undergoing a restructuring as a consequence of the Nunn-McCurdy review and the subsequent Technical Baseline Review. As a result of these reviews, the Department determined that additional time and money (\$4.6 billion) were required to complete the development and test phase of the program. Given this decision, it was important to revise the production profile (moving some production money to later years) to reduce the risks associated with concurrency, as well as to allow the manufacturing processes at Lockheed Martin to mature. The Manufacturing Review Team (MRT) assessed that a 1.5X production ramp was an optimal balance between production efficiency and concurrency risk for the F-35 program and the Department built its plans around that production goal, which also includes the planned international partner procurements. The decision to procure F/A-18E/Fs for the Department of the Navy was an acknowledgement that the delay in F-35C procurement would slow down the rate at which Department of the Navy F-35s would reach the fleet. The Department of the Navy assesses that its strike fighter shortfall will peak in the 2015-2020 timeframe. The procurement of additional F/A-18E/F aircraft will help to mitigate that shortfall while we continue to ramp up F-35 procurement. The Department's commitment to the F-35 is solid, and we are committed to production rates that minimize program cost, but it is impossible to absolutely guarantee at any point in the program that fact-of-life discovery in the development program, the need to balance increasing production rates against concurrency costs in the interest of lower total program cost, and overall affordability constraints will not affect future production rate decisions.

3. After the Department moved a net \$8 billion out of the F-35 program, it then submitted a reprogramming request to cover early production cost growth and concurrency costs. Can you assure me that you will budget for sufficient funding to cover known costs in the future?

The reprogramming request was necessary to cover unexpected cost growth on the first 3 Low Rate Initial Production (LRIP) 1-3 contracts. These contracts were negotiated in 2007, 2008, and 2009 and are cost-type contracts in which the government undertook to reimburse cost overruns. I assure you that we are aggressively managing future F-35 contracts to prevent overruns. We are continuing with the fixed-price type of contract initiated in LRIP 4 last year and applying realistic Should-Cost analysis in preparation for the negotiation of the LRIP 5 contract. This will provide a maximum limit on the Department's liability for future cost growth, increase the contractors' incentives to control costs, and ensure that LRIP 5 negotiations result in a price that is fair and reasonable to the taxpayers. Even with solid Should-Cost analysis, there will be a need for modifications to LRIP aircraft, as testing continues and test results are analyzed. These modification costs for the early LRIP lots are proving larger than

originally estimated, increasing concurrency risk, as already noted. The Department is budgeting for those future modification costs that are now estimated; however, the full extent of modification costs cannot be known with certainty until the testing program concludes.

4. As you testified in May, while procurement has been held flat in FY10-FY12, your intent is to support a 1.5X “ramp rate” going forward. Will this Administration begin to ramp up in FY13 at 1.5X per year, or will the Department continue to use the F-35 program as a bill-payer for other programs, undermining affordability and driving up costs to both the U.S. Government and our F-35 international partners?

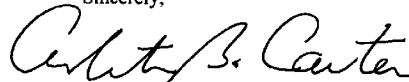

As noted in the response to question 2, the 1.5X ramp rate was based on our best understanding at the time of the appropriate balance between concurrency risk and production efficiency. I am opposed to changes in the F-35 production profile that are inefficient from a cost perspective. That includes ramping up too fast, as well as too slow. The Department will continue to assess that balance as the F-35 program progresses with testing and low rate initial production. The F-35 is a very high Department priority and the production rate will not be reduced solely to pay other bills in the budget.

5. This program is critical to the national security of our eight F-35 international partners and for the successful execution of future coalition operations. As such, will you commit to a more proactive dialogue with the international partners on this program in the future?

The F-35 is the largest cooperative program in the Department and it can only succeed if the three U.S. Services, the Department, and our eight international partners are informed, aware, and included in the developments and decisions that affect all collectively. I have made it my practice to consult promptly by phone and message with my counterpart National Armaments Directors of the JSF partner countries whenever a significant managerial decision involving JSF is made. Additionally, I annually host the F-35 Chief Executive Officer (CEO) conference where F-35 partners are briefed on and discuss the status of the program. Each of the partner nations, like the United States, has a strong requirement for the JSF’s capabilities but faces budget challenges that make affordability paramount. I can assure you that the Department will continue to be proactive, transparent, and candid with our eight international partners so that they can have confidence that we are giving the program our highest managerial attention.

The Department’s support for the F-35 program is strong. The F-35 will be the backbone of the future tactical aircraft inventory for the Air Force, Navy, and Marine Corps, as well as our international partners. We are committed to ensuring that decisions concerning the F-35 are made for the correct reasons and with a commitment toward overall F-35 program success. I look forward to continuing to discuss these important issues with you in the future as the program progresses. Your support of the Department and the F-35 program is appreciated.

Sincerely,

Ashton B. Carter

Senator CORNYN. I'm grateful to you. I have a conflicting appointment, so I won't be able to stay. But thank you for that.

Chairman LEVIN. Thank you, Senator Cornyn.

Senator Hagan.

Senator HAGAN. Thank you, Mr. Chairman.

Dr. Carter, thanks for taking the time to come visit with me recently. I appreciated our discussion. In that discussion, as we discussed, you know that I am a strong supporter of the F-35B. It does provide the Marine Corps with the capability to launch from the large-deck amphibious ships, refuel in forward operating sites. As the Commandant of the Marine Corps, General Amos, has said, if we lose the F-35B there is no plan B for fixed wing aircraft on large-deck amphibious ships, and this would drastically cut our Nation's capability to project power in remote environments.

Recently, when the F-15 airplane crashed in Benghazi, Libya, the AV-8B fighter jets conducted a tactical recovery of aircraft and personnel mission in Libya. The rescue forces took off from two amphibious assault ships in the Mediterranean. When the aircraft went down, there were no aircraft carriers in the area.

I want to work with you to get the F-35B off probation and resolve the engineering issues inside the weight limits and financial boundaries. The term "probation" has a negative connotation. My question is, what kind of effect does the F-35B being on probation have on the Marine Corps's ability to transition to a fifth generation fighter? Does it affect the industrial base by putting suppliers on notice and increasing production costs?

Dr. CARTER. The F-35B is everything you said. Namely, there is a firm requirement for it; the attractiveness of the short takeoff and vertical landing (STOVL) variant of the F-35 is the ability to take off from the smaller decked amphib ships; and General Amos has indicated that's a capability that he very much wants to have. That's why Secretary Gates, who originated the fact of and also the term "probation" for F-35, the instructions he gave us were to be success-oriented, and as the managers of the program we are. That is, we are trying to work through the engineering issues from which the concept of probation arose.

Just to recap them briefly, it's a complicated variant because of its short takeoff and vertical landing nature, and therefore does present some engineering issues that the other variants don't. Those surfaced in flight tests and we know what they are and we're working through the engineering fixes to them. We can't rule out that additional ones will arise in flight tests. You can never say that. But we know what they are and we have a schedule for resolving them.

What Secretary Gates said at the time was: Resolve those issues and then we'll look at the cost impact and the weight impact associated with those engineering fixes and decide where we go with STOVL from that point. My focus has been on resolving those issues. That's where Admiral Venlet's focus is. We are success-oriented. We will work through those engineering issues and get to that point.

Senator HAGAN. The F-35B I understand has performed very well in operational testing so far this year, and I think there's quite a few number of tests taking place next month. If the variant per-

forms successfully during these sea trials next month, would you consider lifting the program from probation?

Dr. CARTER. General Amos and I talk about this all the time—probation is—I'll borrow a phrase from elsewhere—conditions-based. In other words, we told Secretary Gates that it would take us around 2 years to work through the engineering issues to which I referred, and we're on schedule to do that within those 2 years. If we resolve them within the 2 years, then we have done what he said probation was supposed to do.

There's nothing magic about 2 years. There is something magic about resolving the issues.

Senator HAGAN. I agree with that. But if they get resolved—I think it's been a year now. If they get resolved, I think it would be important to the industrial base to be sure that probation would be removed as quickly as those issues are taken care of.

I wanted to talk about the science and technical talent. DOD and the defense industry are facing challenges seeking new graduates with advanced degrees in scientific and technical fields to help develop complex military systems. Some of these challenges include Federal hiring and/or pay freezes, budgetary pressures leading to declining numbers of new defense programs, recruiting issues stemming from graduates being more interested in the commercial sectors related to information technology and energy versus the traditional defense industrial sector, such as aerospace or naval shipbuilding.

What is the Department doing to ensure that it as well as the defense industrial base is able to have access to future scientific and technical talent, and what is the Department doing to recruit and retain the best and the brightest scientists and engineers, and how do you measure the effectiveness of these efforts? I just think it's critically important that we focus on this at DOD as well as, obviously, in our education system with science, technology, engineering, and math curriculum that is so critically important in our country today.

Dr. CARTER. It's critically important. Next to and after the superb nature of the men and women we have in uniform, the thing that makes our military the greatest in the world is the technology within it. There is a challenge associated with the globalization of the technology base for defense. It's no longer the case that all new technologies emerge in this country or in association with the defense technology base.

We need to reach out and gather those ideas and those people who might otherwise end up not in defense and attract them into defense. We're doing a lot to strengthen the science and technology workforce.

I think another point I'd make is that as we go into the budget situation that we're facing, we've talked about difficult choices; one of the difficult choices is between the present and the future, how much you invest in the present and how much you invest in the future. I think one of the things that we're going to need to do is make sure that we protect those investments in science and technology that will allow us 10 years from now, 20 years from now, to have the skill base and the new ideas that will constitute the

military of the future and make sure that we don't mortgage the future.

That's the kind of balancing that we're trying to do in the comprehensive review, present versus future, even as we're trying to balance different kinds of threats. It's a very big effort within the acquisition, technology, and logistics department.

Senator HAGAN. You said that you're doing quite a bit in this area, especially from recruiting. Can you give me any concrete examples?

Dr. CARTER. Yes. Let's see. I'll take the Defense Advanced Research Projects Agency (DARPA) for example. We've made a lot of progress there in the last few years, and I credit the current director for doing that, in making it more attractive for people who are first-rate technical people to come in, spend some time in DARPA, make their contributions, get the feel of the excitement and the commitment of national defense as a place to apply their scientific talents. We've made a lot of progress there, but all of our technical managers are doing that.

Senator HAGAN. Thank you. I've worked quite closely with Dr. Duke and I think she is definitely doing a very good job at that example.

Dr. Carter, thank you and thank you for your family, for your participation in I know what's going to be a nominee that will be confirmed very swiftly. Thank you for doing this.

Dr. CARTER. Thank you, Senator.

Senator HAGAN. Thank you.

Chairman LEVIN. Thank you, Senator Hagan.

Senator Brown.

Senator BROWN. Thank you, Mr. Chairman.

Thank you also for taking time to come and visit with me. I appreciate it. I know we briefly talked about your thoughts about the Department's willingness to invest in the Reserve component, Guard and Reserve, to see how we can maximize those valuable dollars and maybe shift some of the responsibilities in training and resources to the Guard and Reserves. What's your position on that?

Dr. CARTER. The Guard and Reserves, we couldn't have done what we've done over the last 10 years without the contribution of the Guard and Reserves. I know that they've been asked to do things that were not foreseen at the time that many of them joined the Guard and Reserves. You can go, and I do, to theater and visit a unit and you can't tell whether that's an Active Duty unit or a Guard or Reserve unit. They're a critical part of the total force and their continuing vitality, like everything else that we're trying to protect, is an important part of this comprehensive review we're conducting.

Senator BROWN. I know you have some real economic and financial challenges, obviously, with the dollars that are so valuable. I'd like to just follow up with Senator McCain and Senator Levin's comments regarding the cost growth and delays on the JSF program, which are not limited to the airframe only. They also relate to the engine, which has increased from \$385 million to \$2.3 billion. That's nearly a 500 percent increase.

Yet DOD continues to say it's happy with the engine it has. I'm wondering, do you remain pleased with the cost, development, testing, and performance of the F-135 engine?

Dr. CARTER. I monitor the F-135 engine closely. No, I can't say I'm completely satisfied with that. I'm not completely satisfied with any part of the F-35 that's showing cost growth and the F-135 engine has. I will say that, like with everything else on the JSF, we are working very hard to manage to a better result, and those performing the work on the engine, like those performing the work on the airframe, are joining us in trying to restore affordability.

Senator BROWN. I noted in your testimony that you indicated that competing subsystems and support would be put on the table. Does that include the self-funding proposal being put forth on the engines?

Dr. CARTER. With regard to the self-funding proposal by General Electric (GE) and Rolls-Royce for the F-136 engine, I understand that a meeting was scheduled between GE and the Deputy Secretary of Defense, Deputy Secretary Lynn, and also the Air Force acquisition executive, to get more insight into that concept. Those meetings haven't occurred or haven't been scheduled.

But if I'm confirmed as Deputy Secretary, I'd be happy to have those meetings and to learn more about the so-called "self-funding" proposal. I do have to say I have real concerns about that proposal on the basis of what I've heard so far. But again, if confirmed, if that meeting hasn't been held by the time that Secretary Lynn would leave, I'd be happy to have that meeting, because any time one of our industry partners has an idea on affordability I'm very open to ideas on affordability and would be willing to listen to that.

Senator BROWN. I noted in some of the letters I received from other Senators to you and in our conversation, you indicated that you would keep an open mind and you would meet with that leadership team to discuss all options. Is that still your position?

Dr. CARTER. It is. By the way, I have to meet with them on other things that they do for us also. GE does a lot for us—a number of different engine types, sustainment, research and development (R&D). We value their contribution to the military aircraft engine business.

Senator BROWN. If confirmed, will you have the authority to permit the self-funding to go forward, and obviously as a result will they be allowed to have access so they can in fact move forward with it?

Dr. CARTER. Until I know more about it, I don't know what authorities would be required and whether they would require additional legislative authority.

Senator BROWN. I had the honor of being able to go over to Afghanistan on duty and serve for a short time. The most talked-about issue was the proposed cut in military pensions among current servicemembers. Could you talk about that a little bit and say what your position is, not only for the people that are presently serving and have already done their 20 years and are eligible, but as to how it affects Active, Guard, and reservists?

Dr. CARTER. I think two critical things on that that Secretary Panetta's made clear. One thing is that, like everything else, compensation and benefits has to be on the table, but—this is the only

“but” he’s made to that general guidance to us—don’t break faith with the force. That would mean that significant, abrupt changes that would affect the understanding and the bond or deal made between service people and us when they entered service, that is not somewhere he wants to go. He has taken that off the table. He calls it “breaking faith”.

Senator BROWN. It’s interesting you say that, because before people knew I was a Senator, I was just there as a lieutenant colonel and we were just talking as soldiers, and without even blinking, sir, Mr. Chairman, that was the talk in every breakfast, lunch, and dinner that I sat down with the troops. Then when they found out I was a Senator, it was groups of people coming up and saying: What are you guys trying to do? I’m like, I’m not trying to do anything; I’ll speak to the Secretary and, obviously, you, because I agree with you, there is a real dependency on them doing their job and them depending on getting their fair share once they’ve done their job and having that commitment honored. I appreciate that.

One final question. I’m trying to figure out the numbers a little bit. On the MEADS program, the development of this program is governed by the international memorandum which everybody has been talking about for months and months. It specifies a maximum national commitment limit of \$2.3 billion. Our appropriated funds from fiscal year 2004 to fiscal year 2011, however, total \$2.98 billion, and that number exceeds the MEADS maximum national commitment limit of \$2.3 billion.

Can you help me understand the numbers, what the difference is?

Dr. CARTER. I will have to get back to you on those specific numbers.

[The information referred to follows:]

Refer to the table below and the detailed descriptions for each column that follows.

Total Medium Extended Air Defense System (MEADS) Program Funds by Year (CYS)				
	Total Appropriation	Funding Provided to NAMEADSMA	U.S MEADS National Program Office	MSE Missile Development
2004*	236,800,000	95,450,000	31,450,000	109,900,000
2005	251,300,000	136,000,000	28,000,000	87,300,000
2006	274,400,000	122,902,000	70,098,000	81,400,000
2007	322,900,000	145,994,000	65,006,000	111,900,000
2008	369,500,000	303,359,000	12,641,000	53,500,000
2009	454,700,000	395,740,000	27,960,000	31,000,000
2010	566,200,000	427,501,000	73,599,000	65,100,000
2011	467,100,000	402,800,000	64,300,000	
Total	2,942,900,000	2,029,746,000	373,054,000	540,100,000
2012	406,605,000	350,000,000	56,605,000	
2013	396,612,000	338,000,000	58,612,000	
Total	3,746,117,000	2,717,746,000	488,271,000	540,100,000

* 2004 – \$40.95 million allocated to RRE Bridging Contract

Column #1 reflects the U.S. Research, Development, Test and Evaluation Program Element 0604869A line for the “Patriot-MEADS Combined Aggregate Program.”

Column #2 reflects U.S.-provided funding to the NATO MEADS Management Agency (NAMEADSMA) for the tri-national MEADS program per the Design and Development (D&D) Memorandum of Understanding (MOU). This includes the U.S. D&D MOU ceiling amount of \$2.3 billion (FY 2004) (or \$2.67 billion (CY dollars)) plus the \$40.95 million of MEADS D&D funding allocated in 2004 to fund the MEADS Risk Reduction Effort (RRE) Bridging Contract prior to D&D MOU signature.

The remaining two columns reflect U.S.-only efforts in support of the tri-national MEADS program and the U.S. PAC-3 Missile Segment Enhancement (MSE) missile development. The MSE program was initiated by the Army to upgrade and replace the PAC-3 missile and was later

selected as the MEADS missile by the partners. Neither of the funding in these columns is part of the formal MOU ceiling amount provided to the tri-national consortium.

Column #3 reflects U.S support to MEADS efforts managed by the U.S. Army’s MEADS National Program Office (NPO). This includes U.S.-only compliance efforts to meet U.S. export and security policy (e.g., U.S.-only radar exciter and U.S. simulation work) as well as any other U.S-unique MEADS requirements.

Column #4 reflects separate U.S. PAC-3 MSE missile development work that was funded under the Patriot-MEADS Combined Aggregate Program line until FY 2011, when MSE funding was shifted to its own Program Element line.

Senator BROWN. That’s fine.

Dr. CARTER. Because I’m not familiar with those specific numbers. But I will say some that I am familiar with that may be helpful. The memorandum of understanding, which is the extant international agreement that you referred to, would under our proposal which is before you take about another \$800 million to complete the proof of concept part of that program.

Senator BROWN. Yes, to get out of the deal, basically, we have to pay \$800 million.

Dr. CARTER. The alternative would be to terminate, which costs a comparable amount. Given those alternatives, we have asked for the funding to complete the proof of concept.

Senator BROWN. Maybe we can follow up, Mr. Chairman, with a question for the record which we'll submit to you, and just see where that discrepancy is. Maybe we don't have the right numbers. I just want to make sure I understand it.

Thank you for your time and good luck.

Dr. CARTER. Thank you.

Chairman LEVIN. Thank you, Senator Brown.

Just a few additional quick questions from me. On cyber security, there was a commitment by General Alexander when he was confirmed to command the newly created Cyber Command that there would be a major effort to address a whole host of cyber security issues, and it was under way or to be completed by the end of calendar year 2010. The National Defense Authorization Act for Fiscal Year 2011, already law, required a report from the Secretary by March of this year. We don't have the report that we're owed on cyber security issues. Are you aware of that and will you commit to get us that report promptly?

Dr. CARTER. Mr. Chairman, I'm not aware of the status of that report, but I certainly commit to you that, if confirmed, I'll make sure it's completed.

Chairman LEVIN. Promptly?

Dr. CARTER. Promptly.

Chairman LEVIN. Do you support the President's decision to withdraw 30,000 U.S. surge forces from Afghanistan by next summer?

Dr. CARTER. I do.

Chairman LEVIN. How important is it to the success of the counterinsurgency campaign in Afghanistan that we maintain the process of transitioning responsibility to the Afghan Security Forces for their own security?

Dr. CARTER. Very important.

Chairman LEVIN. Do you also agree it's essential for the Afghan Government to provide services for their people in order for the mission to prevent Taliban reconrol of Afghanistan to succeed?

Dr. CARTER. Yes.

Chairman LEVIN. Do you agree that it's in the security interest of the Afghans that their government end corruption?

Dr. CARTER. Yes.

Chairman LEVIN. Do you agree that the reconciliation or the reintegration of lower level Taliban be continued and that it is an important part of success of the mission?

Dr. CARTER. Yes.

Chairman LEVIN. Now, relative to Pakistan, do you agree that it's important that Pakistan address the Haqqani Network's use of their soil as a safe haven to attack us?

Dr. CARTER. Yes.

Chairman LEVIN. Relative to Iraq, General Odierno said yesterday or the day before that we must avoid the appearance of leaving a large occupation force in Iraq. Do you agree with General Odierno?

Dr. CARTER. I do.

Chairman LEVIN. Secretary Carter, to you, your family, your wife, your two children who are here—I don't think they probably learned anything new because they know you very well. They know

your competence, they know your steadiness, and we've learned that, too, over the years, all of us on this committee. We look forward to a prompt confirmation, and we will stand adjourned.

[Whereupon, at 11:52 a.m., the committee adjourned.]

[Prepared questions submitted to Ashton B. Carter by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. I do not see a need for modification of any Goldwater-Nichols Act provisions at this time. The Act has served the Department and our Nation well, fostering a spirit of jointness that has enhanced the Department's capabilities to respond when called, such as in Operation Enduring Freedom. If confirmed, I will continue to consider this issue and will make proposals for modifications if and when required.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. N/A.

RELATIONSHIPS

Question. What is your understanding of the relationship between the Deputy Secretary of Defense and each of the following?

The Secretary of Defense.

Answer. The Deputy Secretary performs duties as assigned by the Secretary and must be able to perform the Secretary's duties when the Secretary is absent. The Secretary and the Deputy work closely together to develop defense strategy and policy. The Deputy Secretary serves as the Department's Chief Operating Officer (COO) and focuses primarily on the daily activities of the Department, including financial management, acquisition, and personnel policy matters (both civilian and military) and on the implementation of policy and strategy decisions.

Question. The Under Secretaries of Defense.

Answer. The Deputy Secretary oversees and ensures the coordination of the activities of the Under Secretaries. The Deputy Secretary ensures that the Secretary's direction and guidance is implemented promptly and properly by the Under Secretaries. The Deputy Secretary elevates to the Secretary issues raised by the Under Secretaries that require the Secretary's personal attention.

Question. The Deputy Chief Management Officer (CMO) of the Department of Defense (DOD).

Answer. The DCMO reports directly to the Deputy Secretary, and there must be a close working relationship between the two. The DCMO monitors and reports on the progress of the Department toward achieving management goals, keeps the Deputy Secretary informed, and proposes solutions to significant issues to the Deputy Secretary.

Question. The Assistant Secretaries of Defense.

Answer. For Assistant Secretaries who report directly to the Secretary, the Deputy Secretary's relationship with them would be similar to the Deputy Secretary's relationship with the Under Secretaries. For Assistant Secretaries who report directly to Under Secretaries, the Deputy Secretary works with them through the appropriate Under Secretary.

Question. The Chairman and Vice Chairman of the Joint Chiefs of Staff.

Answer. The Deputy Secretary works closely with the Chairman and Vice Chairman of the Joint Chiefs of Staff. The Deputy Secretary has an especially close working relationship with the Vice Chairman on requirements, programming, budgeting, and departmental management matters.

Question. The Secretaries of the Military Departments.

Answer. The Deputy Secretary works closely with the Secretaries of the Military Departments to ensure that the Secretary of Defense's policies are implemented fully and effectively in a timely manner.

Question. The CMOs of the Military Departments.

Answer. The Deputy Secretary works with the CMOs of the Military Departments in close coordination with the Deputy CMO. The CMOs of the Military Departments play an important role in ensuring that the Department carries out its strategic plan and attains its management goals.

Question. The Service Acquisition Executives.

Answer. The Deputy Secretary plays an important role in establishing acquisition policy for the Department, and interacts with the Service Acquisition Executives primarily through the Under Secretary of Defense for Acquisition, Technology, and Logistics.

Question. The Chiefs of Staff of the Military Services.

Answer. The Deputy Secretary works closely with the Service Chiefs, as appropriate, in ensuring the Services have the resources they need to accomplish assigned missions and implement the Secretary's policy effectively and efficiently. The Deputy Secretary normally works with the Service Chiefs, in their role as Service Chiefs, through the Secretaries of the Military Departments. The Deputy Secretary normally works with the Service Chiefs, in their role as members of the Joint Chiefs of Staff, through the Chairman and the Vice Chairman.

Question. The Director of National Intelligence.

Answer. The Deputy Secretary works closely with the Director of National Intelligence on matters of mutual interest to the Department and the Intelligence Community, for example, the relationship between the Military Intelligence Program and the National Intelligence Program.

Question. The Inspector General of DOD.

Answer. The Inspector General performs a vital function for DOD, and the Deputy Secretary receives advice from the Inspector General on significant issues. The Deputy Secretary ensures that the Inspector General is able to perform his functions in an independent manner.

Question. The General Counsel of DOD.

Answer. The Deputy Secretary relies on the General Counsel for legal advice on all issues that come before him. The Deputy Secretary must be able to rely on the candid advice of the General Counsel.

Question. The Chief of the National Guard Bureau.

Answer. The Deputy Secretary works with the Chief of the National Guard Bureau on matters related to the National Guard and in coordinating issues related to the National Guard with the States. The Deputy Secretary may receive advice from the Chief of the National Guard Bureau on any matter related to the National Guard.

Question. The Judge Advocates General of the Services.

Answer. The Judge Advocates General have important roles in their respective Military Departments, providing legal advice to the senior leaders of the Military Departments, overseeing the military justice system, and leading their respective teams of military and civilian lawyers. The Deputy Secretary works with the Judge Advocates General primarily through the General Counsel of DOD.

DUTIES OF THE DEPUTY SECRETARY OF DEFENSE

Question. Section 132 of title 10, U.S.C., provides that the duties of the Deputy Secretary of Defense are to be prescribed by the Secretary of Defense.

Assuming that you are confirmed, what duties do you expect the Secretary to prescribe for you?

Answer. The primary duty of the Deputy Secretary of Defense is to assist the Secretary as needed. If confirmed, my expectation is that the Secretary will ask me to serve as his alter ego when necessary; to assist him in organizing the decision-making process within the Office of the Secretary of Defense (OSD); to carry out the statutory duties of CMO of DOD; and to carry out other duties as assigned.

Question. What background and expertise do you possess that you believe qualify you to perform these duties?

Answer. My background includes service in a number of previous civilian positions in DOD, culminating in my current service as Under Secretary of Defense for Acquisition, Technology, and Logistics. During this service, I have had the opportunity to serve under four Secretaries of Defense, working most closely with William J. Perry and Robert M. Gates, and to work closely with four Deputy Secretaries of Defense: William J. Perry, John P. White, John J. Hamre, and William J. Lynn III. In addition to my service within DOD, I have served as a member of the Defense

Science Board, the Defense Policy Board, and Secretary of State Condoleezza Rice's International Security Advisory Board. I have also served as chair of the International and Global Affairs faculty at Harvard's Kennedy School of Government and Co-Director of the Preventive Defense Project, a research collaboration of Harvard and Stanford Universities. If confirmed, I would bring to this position substantial experience with the Department in each of the last 3 decades; current detailed knowledge of the Department's operations; experience with managing major policy initiatives; experience with managing one of the Department's largest organizations and several large defense agencies; a solid understanding of many of the major technological issues confronting the Department; and experience tackling some of the Department's most persistent management problems.

Question. Do you believe there are actions you need to take to enhance your ability to perform the duties of the Deputy Secretary of Defense?

Answer. If confirmed, there would be many actions I would need to take to best perform the duties of Deputy Secretary. First and foremost among these would be to build a strong working relationship with Secretary Panetta as his Deputy. Likewise, I would need to build on my existing relationships with the Joint Staff, the combatant commanders, the Secretaries of the Military Departments and their military leadership, and the OSD staff to enlist their knowledge and assistance in helping me carry out the duties of Deputy Secretary. I would work closely with Deputy Secretary Lynn to ensure a smooth transition and seamless hand off of his major initiatives to ensure they are continued within the Department. Of critical importance initially would be to learn in greater detail the significant budget issues pending in the Department where my position as Under Secretary has not required deep involvement.

Question. What changes to section 132, if any, would you recommend?

Answer. At this time, I believe the statutory authorities for the position of Deputy Secretary of Defense are appropriate. If confirmed, I would be sure to inform Congress if I determined that any change in the statute were necessary to effectively perform the duties of this office.

Question. Section 132 was amended by section 904 of the National Defense Authorization Act (NDAA) for Fiscal Year 2008, to provide that the Deputy Secretary serves as the CMO of DOD. The Deputy Secretary is to be assisted in this capacity by a Deputy CMO.

What is your understanding of the duties and responsibilities of the Deputy Secretary in his capacity as CMO of DOD?

Answer. My understanding is that the primary duty of the CMO is to provide leadership and to ensure accountability for the business operations of DOD. These operations involve all of the Department's components and cut across the responsibilities of the Under Secretaries of Defense, so they require leadership and accountability at a high level. The CMO's role is to lead, oversee, and support, rather than supplant, the roles of the Secretaries of the Military Departments and agency heads in managing their business operations.

The CMO also provides leadership to the CMOs of the Military Departments and is responsible for the development of the Strategic Management Plan for DOD. The Deputy Secretary chairs the Defense Business Systems Management Committee, a responsibility consistent with the CMO role.

Question. What background and expertise do you possess that you believe qualify you to perform these duties and responsibilities?

Answer. As Under Secretary, I have been deeply involved in the Department's operations over the last 2 years. As Defense Acquisition Executive and Defense Logistics Executive, I have fulfilled leadership roles similar in nature to the CMO role. This experience has provided me with the background and expertise to serve as CMO.

Question. Do you believe that the CMO and DCMO have the resources and authority needed to carry out the business transformation of DOD?

Answer. At this time, I believe that these positions have all of the authority needed to carry out business transformation. I am not currently in a position to determine if the CMO and DCMO have the appropriate resources to carry out these roles, although I have no reason to believe that they do not. If confirmed, I will examine the resources available to the CMO and DCMO to determine if they fully address the need.

Question. What role do you believe the DCMO of DOD should play in the planning, development, and implementation of specific business systems by the Military Departments?

Answer. As with the CMO, the role of the DCMO is to support and oversee rather than to supplant the responsibilities of the Secretaries of the Military Departments and other agency heads in acquiring specific business systems. The DCMO has spe-

cific responsibilities for many of our Major Automated Information System acquisitions as Milestone Decision Authority and broad responsibility for defense business systems as the Vice Chair of the Defense Business Systems Management Committee. The DCMO ensures that the acquisition of business systems is consistent with principles of sound business investment, has applied appropriate business process reengineering efforts, and is compliant with the Department's business enterprise architecture.

Question. Do you believe that the DCMO should have clearly defined decision-making authorities, or should the DCMO serve exclusively as an advisor to the Deputy Secretary in his capacity as CMO?

Answer. I believe that the DCMO should have duties as assigned by the CMO and the Secretary of Defense. These duties may include decisionmaking authority where the CMO or the Secretary determines appropriate.

Question. What changes, if any, would you recommend to the statutory provisions establishing the positions of CMO and DCMO?

Answer. At this time, I believe the statutory authorities for the positions of the CMO and the Deputy CMO are appropriate. If confirmed, I would be sure to inform Congress if I determined that any change in the statute were necessary to effectively perform the duties of this office.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the next Deputy Secretary of Defense?

If confirmed, what plans do you have for addressing these challenges?

Answer. The main tasks of the Deputy Secretary of Defense are to be fully prepared to act and speak in the Secretary's stead at all times; to shape an orderly deliberative process for the Secretary, so that he can make decisions and advise the President based on careful consideration of accurate management information and a full range of options; and to manage the budget process and other Department-wide matters, reserving decisions of greatest consequence for the Secretary.

I have had the opportunity to discuss these matters with Secretary Panetta, with other members of the Obama administration, with the Chairman and Vice Chairman of the Joint Chiefs of Staff, with the Service Secretaries and Chiefs, with combatant commanders, and with other leaders in OSD. I have also had the benefit of the advice of many Members of Congress, including members of this committee. Finally, it has been my privilege to know personally a number of former Deputy Secretaries of Defense throughout my career and I have worked, in one way or another, for almost every Secretary of Defense since Caspar Weinberger. Last, as Under Secretary of Defense for Acquisition, Technology, and Logistics, I have responsibility for a number of the matters that fall under the Deputy, and I look forward, if confirmed, to working with this committee to acquaint myself with the additional responsibilities that fall under the Deputy.

PRIORITIES

Question. What broad priorities would you establish, if confirmed, with respect to issues which must be addressed by DOD?

Answer. The top priority of the Deputy Secretary of Defense, like that of the Secretary, is to ensure the security of the American people.

Key challenges facing the Department at this time include: prevailing in the current conflicts in Iraq and Afghanistan and in the fight against al Qaeda; keeping weapons of mass destruction out of the hands of terrorists and rogue nations; preparing to counter future threats and military technologies; preserving the finest fighting force in the world and taking care of servicemembers and their families; and continuing the process of reform which will be crucial in this time of constrained budgets.

NATIONAL SECURITY BUDGET REDUCTIONS

Question. The President has called for \$400 billion in reductions to national security spending over a 10-year period starting in 2013, and has asked the Secretary of Defense to lead a review to provide recommendations on where to make those cuts.

What is your understanding of the current status of that review?

Answer. It is my understanding that the review is ongoing and will be completed as part of the fiscal year 2013–2017 program and budget review.

Question. What role do you expect to play, if confirmed, in guiding the review and in determining what cuts should be made to the defense budget?

Answer. If confirmed, I would expect to play a significant role in the Department's program and budget review, including serving as chairman of the Deputy's Advisory Working Group which provides the Secretary informed views of major budget issues.

Question. The recent agreement on the debt ceiling calls for reductions in defense spending that could range from \$350 billion in the first phase, to as much as \$900 billion, if the joint committee is unable to reach agreement and a sequester is required.

Do you believe that a national security spending reduction of this magnitude can be accomplished without significant adverse impact on our national security?

Answer. I believe the Department can build a balanced defense program that also achieves the national security reductions enacted as part of the Budget Control Act of 2011. These reductions are in line with what the Department was anticipating at a time of considerable fiscal challenge. However, making these reductions will require difficult choices by the Department and Congress. Any further reductions that may result from a failure of the joint committee to reach agreement will undermine our ability to meet our national security objectives. The risk of hollowing out the force and weakening our ability to respond to threats around the globe will go up significantly. It is imperative that the joint committee be successful.

Question. If confirmed, how will you prioritize the objectives of: making needed investments in the future force, addressing pressing requirements for completing the mission in Iraq and Afghanistan, resetting of the force, meeting ongoing operational commitments across the globe, and achieving the level of savings proposed by the President?

Answer. The art of budgeting is about setting priorities. Winning today's wars, investing in force modernization, resetting the force, and meeting our operational commitments are all priorities that must be addressed. In addition, Secretary Panetta has been clear that we must ensure that we are able to keep weapons of mass destruction out of the hands of terrorist and rogue nations and that we always support our servicemembers and their families. In addressing these priorities in the budget, it is important that we build a balanced defense program that meets the demands of today, but also prepares us to meet the inevitable challenges of tomorrow. That balance requires a careful assessment of the contribution each program makes toward those ends. Difficult choices will have to be made and, if confirmed, I look forward to contributing to that effort.

EFFICIENCIES INITIATIVE

Question. Last year, then-Secretary Gates announced an efficiencies initiative designed to reform the business operations of the Pentagon and root out duplication, waste, and excess spending. The Secretary identified \$78 billion of defense-wide cuts over the Future Years Defense Program; the Military Departments identified an additional \$100 billion of reductions, which they were permitted to reinvest in other areas.

What is your view of the process by which DOD identified the \$178 billion in reductions called for in the efficiencies initiative?

Answer. I believe that Secretary Gates acted with great foresight in establishing last year's efficiencies initiative. He clearly foresaw the fiscal and economic challenges our Nation is now confronting. As a result, the Department had a strong head start in identifying areas in its budget to target for efficiency. The process used by Secretary Gates, however, was designed to support his goal of largely redirecting, rather than reducing, defense spending. As a result, the processes that were used to identify the \$178 billion in reductions may not be the best model for identifying the savings needed to meet the Department's current budget limitations. That said, the overall intent of Secretary Gates's initiative remains highly relevant, especially the Better Buying Power initiative, which we expect to continue to generate efficiencies in the Department's operations for years to come.

Question. Do you believe that these reductions are achievable and have been appropriately distributed through the Department?

Answer. I believe that the level of reductions projected by last year's efficiencies initiative are achievable and have been distributed appropriately throughout the Department. There will inevitably be a few efficiency items that produce lower savings than anticipated, thereby requiring the Services to make adjustments to meet their targets. However, it is my understanding that the Department, on the whole, is making good progress towards achieving the necessary reductions.

Question. What role do you expect to play, if confirmed, in ensuring that the expected savings are achieved?

Answer. If confirmed, I expect that I would oversee the Department's efforts to ensure that expected savings from the efficiencies initiative are realized.

Question. What is your view of the decision to disestablish U.S. Joint Forces Command, the Business Transformation Agency, and the Assistant Secretary of Defense for Networks and Information Integration?

Answer. I believe the disestablishment of these organizations has been executed with minimal disruption to the Department's operations and with satisfactory distribution of their enduring functions.

Question. Do you believe that the Department can achieve significant additional savings through the elimination of duplication, waste, and excess spending?

Answer. Yes. Over the last 10 years, the Department has been engaged in two wars and a range of other contingencies and has experienced growth in its base budget at a rate faster than inflation. These circumstances fostered a tendency to defer some difficult decisions because management attention was consumed by the wars and funding was not so tight that these decisions were unavoidable. In the current fiscal environment, we can no longer afford to defer these difficult choices. I believe, however, that meeting the budget limits established in the recent Budget Control Act of 2011 will require us to cut significantly more than just duplication, waste, and excess spending.

Question. What role do you expect to play, if confirmed, in identifying such potential savings?

Answer. If confirmed, I would expect to play a central leadership role in identifying potential savings in the Department's budget.

MANAGEMENT ISSUES

Question. If confirmed, what key management performance goals would you want to accomplish, and what standards or metrics would you use to judge whether you have accomplished them?

Answer. If confirmed, my key management goals will be those that have been identified in the fiscal year 2012 and fiscal year 2013 Strategic Management Plan. These seven key goals are:

- Strengthen and right-size the DOD Total Workforce mix (military, civilian, and contracted support) to accomplish the DOD mission and sustain superior performance in a time of constrained resources.
- Strengthen DOD Financial Management to respond to warfighter needs and sustain public confidence through auditable financial statements.
- Build agile and secure information technology capabilities to enhance combat power and decisionmaking while optimizing value.
- Increase the buying power of the DOD acquisition system and processes spanning requirements determination, development, procurement, and support to ensure that the force structure is modernized, recapitalized, and sustained within available resources.
- Increase operational and installation energy efficiency to lower risks to our warfighters, reduce costs, and improve energy security.
- Reengineer/use end-to-end business support processes to reduce transaction times, drive down costs, and improve service.
- Create agile business operations that plan for, support, and sustain contingency missions.

These goals are aligned with and support the Department's overarching strategy as articulated in the Quadrennial Defense Review (QDR). Each goal is supported by sets of key initiatives and performance measures which serve as our management standards and metrics. The Department closely monitors these performance measures to assess whether we are achieving our goals.

Question. GAO recently reported that "the DOD systems environment that supports [its] business functions is overly complex and error prone, and is characterized by: (1) little standardization across the department, (2) multiple systems performing the same tasks, (3) the same data stored in multiple systems, and (4) the need for data to be entered manually into multiple systems. According to the department's systems inventory, this environment is composed of 2,258 business systems and includes 335 financial management, 709 human resource management, 645 logistics, 243 real property and installation, and 281 weapon acquisition management systems."

Would you agree that the Department will not be able to put its financial house in order until it effectively addresses this problem?

Answer. It is extremely important for the Department to rationalize its defense business system environment and ensure that its suite of systems is tightly integrated. However, while we must ensure that the Department's feeder systems, in all of its business areas, properly capture and report financial information, greater integration of our business systems environment alone will not correct the long-

standing weaknesses in our business and financial operations. We must also continue to implement an integrated business strategy and pursue process improvement to enable interoperable business solutions and financial auditability.

Question. Section 2222 of title 10, U.S.C., requires that the Secretary of Defense develop a comprehensive business enterprise architecture and transition plan to guide the development of its business systems and processes.

Do you believe that a comprehensive, integrated, enterprise-wide architecture and transition plan is essential to the successful transformation of DOD's business systems?

Answer. Yes.

Question. What steps would you take, if confirmed, to ensure that DOD's enterprise architecture and transition plan meet the requirements of section 2222?

Answer. If confirmed, I would continue the ongoing efforts to define, capture and enforce the business processes, data standards and business rules in the Business Enterprise Architecture (BEA) from an end-to-end perspective and hold the Under Secretaries of Defense and the Military Departments accountable for those functional portions of the BEA for which they are responsible.

Question. What are your views on the importance and role of timely and accurate financial and business information in managing operations and holding managers accountable?

Answer. Timely and accurate financial and business information (aka business intelligence) is the operational intelligence we use to inform the management of our business operations. It provides assurance that we are effectively and efficiently using our limited resources, while ensuring good stewardship of the taxpayers' money.

Question. What role do you envision playing, if confirmed, in managing or providing oversight over the improvement of the financial and business information available to DOD managers?

Answer. If confirmed, I would take my role as CMO/COO and chair of the Defense Business Systems Management Committee seriously. In these roles, I will hold those responsible for managing our business operations accountable for meeting the objectives identified in the Department's Strategic Management Plan that are directly linked to improving financial and business information.

Question. The Department has chosen to implement the requirement for an enterprise architecture and transition plan through a "federated" approach in which the Business Transformation Agency has developed the top level architecture while leaving it to the Military Departments to fill in most of the detail. GAO recently reported that none of the three Military Departments has yet fully developed a well-defined business enterprise architecture and transition plan to guide and constrain business transformation initiatives.

If confirmed, what steps would you take to ensure that the Secretaries and CMOs of the business enterprise architecture and transition plans of the Military Departments meet the requirements of section 2222 and provide a sound roadmap for business transformation initiatives?

Answer. If confirmed, I would intend to hold the Secretaries and CMOs accountable for delivering integrated business solutions defined in the federated business enterprise architecture and affiliated transition plans.

Question. What additional steps, if any, do you believe are needed to ensure that business system investments are defined and implemented in accordance with the Department's business enterprise architecture?

Answer. If confirmed, I would assess the investment review process currently in place to review and certify business system investments and implement improved policies and procedures as necessary. My focus would be to ensure that we review our investments from a holistic, end-to-end perspective.

Question. What additional steps, if any, do you believe are needed to ensure that supporting architectures for component organizations are further developed and aligned with the corporate architecture to provide a truly federated business enterprise architecture?

Answer. If confirmed, I will assess the plans of the Service Secretaries and CMOs of the Military Departments for aligning their enterprise architectures with the Department's overall business enterprise architecture approach.

AUDIT READINESS

Question. Secretary Panetta has stated: "While we have reasonable controls over much of our budgetary information, it is unacceptable to me that DOD cannot produce a financial statement that passes all financial audit standards. That will

change. I have directed that this requirement be put in place as soon as possible. America deserves nothing less.”

What is your understanding of the efforts and progress that have been made in DOD since 1999 toward the goal of being able to produce a clean audit?

Answer. While I am not familiar with the details or history of DOD accounting systems, I understand that DOD financial processes were established and ingrained in legacy systems long ago. These processes and systems were designed for budgetary accounting—not for the accounting standards called for in the Chief Financial Officers (CFO) Act. I also understand that there has been limited progress made towards auditability until recently. Our CFO has established a set of priorities and a roadmap for making progress. It focuses on the budgetary information that we use to manage the Department and ensures we can account for the material we need to support our mission.

Question. Do you believe that these efforts will result in a clean audit opinion by the end of fiscal year 2017, as required by statute, or are additional steps needed?

Answer. Yes. 2017 is an ambitious goal but, as Secretary Panetta has indicated, the Department is committed to it. In addition, Secretary Panetta has directed a review of audit efforts to ensure that our focus is on completing the project as soon as possible.

Question. Do you believe that the Department can achieve a clean audit opinion through better accounting and auditing, or is the systematic improvement of the Department’s business systems and processes a prerequisite?

Answer. From my discussions with Under Secretary of Defense (Comptroller)/CFO Hale, systematic improvement of the Department’s business systems and processes is necessary to achieve a clean audit opinion.

Question. When do you believe the Department can achieve a clean audit?

Answer. The Department is working to have auditable financial statements by 2017. Secretary Panetta’s review of audit efforts will inform that goal.

Question. The Department’s Financial Improvement and Audit Readiness (FIAR) plan is organized into five waves that focus on audit readiness of the Statement of Budgetary Resources (SBR) (waves 1 and 2), the existence and completeness of assets (wave 3), and a full financial statement audit (waves 4 and 5).

If confirmed, what steps, if any, would you take to ensure the development and implementation of specific detailed plans for achieving a full audit through waves 4 and 5?

Answer. I understand that while the longer-term goal involves planning for and executing the final two “waves”, the Department remains focused on near-term milestones. Senior leadership within the military components is committed to, and is accountable for, accomplishing these interim goals. As directed in the NDAA for Fiscal Year 2011, the Department has developed a strategy for producing fully auditable financial statements. If confirmed, I would work with our CFO to prepare implementation plans that will lay out exactly how we will do this.

Question. What is your understanding of the roles and responsibilities of the military-department CMOs in implementing the FIAR plan through their individual financial improvement plans (FIPs)?

Answer. The oversight role of the CMOs was established in the NDAA for Fiscal Year 2008. Since then, the Department has developed more detailed responsibilities for the CMOs regarding their financial improvement role and responsibilities. Specifically, the Military Department CMOs:

- Coordinate and marshal resources from across the Department in support of Under Secretary of Defense (Comptroller)/CFO financial improvement goals, objectives and priorities.
- Carry out budget, finance, accounting and human resource operations in a manner consistent with the comprehensive business transformation plan.
- Eliminate or reduce financial management systems that are inconsistent with the business systems architecture and transition plan.
- Ensure that the functional communities recognize their role in achieving audit readiness, since most financial transactions originate from business events in the functional community’s business operations.
- Provide the unifying support needed to ensure that business system modernization efforts are fully linked with Component financial improvement activities.

Question. What steps, if any, do you believe are needed to clarify those roles and responsibilities?

Answer. I believe the currently defined roles are sufficiently clear, but, if confirmed, I would continue to monitor and make adjustments as needed.

Question. Do you believe that performance measurement and monitoring mechanisms need to be improved?

Answer. The Department has established a robust governance structure to oversee progress towards FIAR goals. If confirmed, I would plan to review our performance measures to see if any improvements are necessary to enable us to meet these goals.

Question. If confirmed, what steps would you take to sustain the commitment of the Department's top leadership to the long-term goal of transforming the Department's financial management?

Answer. Secretary Panetta has emphasized the importance of making the Department auditable. Our CFO has developed a plan for achieving audit readiness. If confirmed, I would intend to work closely with them and other leaders in the Department to transform the Department's financial management processes.

Question. Do you think that having the Deputy Secretary of Defense "dual-hatted" as the CMO is consistent with the prioritization and sustained day-to-day focus needed for the success of the Department's financial improvement efforts?

Answer. Yes. Overall accountability rests with the Deputy Secretary in his CMO role. However, day-to-day responsibility falls to the CFO, the Deputy CMO, and the CMOs of the Military Departments, as well as line management throughout the DOD business enterprise.

BUSINESS TRANSFORMATION

Question. Since 2005, the General Accountability Office (GAO) has designated DOD's approach to business transformation as "high risk" due to its vulnerability to waste, fraud, abuse, and mismanagement. However, GAO has recently found that the Department's senior leadership has shown commitment to transforming business system operations and has made progress in establishing management oversight and developing a strategic plan to guide transformation efforts. Nonetheless, in GAO's view, the Department needs to take additional action to further define management roles and responsibilities and to strengthen strategic planning.

Do you believe that the Department needs to more clearly define roles and responsibilities, as well as relationships among key positions and governance entities, for integrating the Secretary of Defense's efficiency initiative with ongoing reform efforts; overseeing its implementation and otherwise institutionalizing the effort in the long term?

Answer. I do not believe additional steps are necessary at this time, but, if confirmed, I would continue to monitor the situation closely and take corrective action where necessary. The tools that Congress has provided the Department over the past 6 years, including the establishment of a clear business system investment review process in the NDAA for Fiscal Year 2005, the creation of the CMO construct in the NDAA for Fiscal Year 2008, and specific strategic planning requirements in the Government Performance and Results (GPRA) Modernization Act of 2010, have created a strong framework for our business transformation efforts.

Question. If so, what steps do you believe the Department should take to achieve this objective?

Answer. I do not believe that additional steps are necessary at this time, but, if confirmed, I would continue to closely monitor the situation and take corrective action where necessary.

Question. If confirmed, what steps, if any, would you take to further refine strategic goals, performance measures and other elements of the Department's strategic management plan?

Answer. The Department's current strategic planning process is quite robust and has continued to improve with regard to planning for defense business operations since the introduction of the Strategic Management Plan (SMP) in the NDAA for Fiscal Year 2008. In my current role as Under Secretary of Defense for Acquisition, Technology, and Logistics, I have been involved in the latest planning efforts for the fiscal year 2012 and fiscal year 2013 SMP and believe that it faithfully aligns the Department's business goals with the Department's overall strategic goals. It also establishes a set of key initiatives and performance measures that will allow the Department's senior leaders the opportunity to track performance throughout the year and take corrective action where necessary. If confirmed, I would look to incorporate additional improvements and lessons learned from each iteration of this process.

Question. If confirmed, what steps, if any, would you take to more clearly define the Department's strategic planning process, including mechanisms to guide and synchronize efforts to develop strategic plans; monitor the implementation of reform initiatives; and report progress, on a periodic basis, towards achieving established goals?

Answer. The Department's current strategic planning process is effective. However, if confirmed, I would work to better align the timing of our business operations planning cycle with that of our overall strategic planning and budgeting activities. The Planning, Programming, Budgeting, and Execution (PPBE) process produces the following fiscal year's President's budget (PB) submission in February. The SMP articulates the Department's business priorities and is due in July. My goal would be to make the SMP timeline a more deliberate process aligning to the PPBE cycle.

Question. Do you believe that the Deputy CMO should have control over funds for the components' business systems programs to ensure that the components follow guidance from OSD on the Department's business transformation efforts?

Answer. I believe that it is important to allow the components to maintain control over their budgeting process, while simultaneously maintaining an enterprise perspective on our business system investments. The Department's current investment review process, established by Congress in the NDAA for Fiscal Year 2005, effectively allows OSD, including the Deputy CMO, in the role of vice chair of the Defense Business Systems Management Committee, to ensure that component investments are aligned with the enterprise strategy as laid out in the Business Enterprise Architecture.

ACQUISITION OF BUSINESS SYSTEMS

Question. Most of the Department's business transformation programs are substantially over budget and behind schedule. Last year, at the request of the Armed Services Committee, GAO reviewed DOD's 9 largest Enterprise Resource Programs (ERPs), which are intended to replace more than 500 outdated business systems, and reported that 6 of the 9 had experienced schedule delays ranging from 2 to 12 years and incurred cost increases ranging from \$530 million to \$2.4 billion. GAO reported that DOD has failed to follow good management practices for developing schedules and cost estimates for many of these programs.

If confirmed, how would you work with the Deputy CMO, the CMOs of the Military Departments, and the Under Secretaries of Defense to address these problems?

Answer. It is my understanding that the Department concurred with the recommendations in the GAO report and that the Services have taken steps to implement them. If confirmed, I would intend to continue to work directly with the Deputy CMO, the CMOs of the Military Departments, the Under Secretaries of Defense, and the DOD Chief Information Officer to implement better management practices and internal lessons learned. Each of these officials has an important role to play in addressing the planning, implementation, and change management challenges that historically have hamstrung the Department's ability to deliver programs such as ERPs in accordance with established cost and schedule baselines.

Question. DOD must implement a full range of business systems modernization management controls to ensure that its business system investments are the right solutions for addressing its business needs; that these investments are being managed to produce expected capabilities efficiently and cost-effectively; and that, ultimately, its business stakeholders are satisfied.

What additional steps, if any, do you believe are needed to ensure that both the corporate and component investment management processes are appropriately defined and institutionalized?

Answer. If confirmed, I would assess the investment review process the Department is using to review and certify business system investments and implement improved policies and procedures as necessary. The Department is currently implementing a Business Capability Lifecycle approach to acquiring business systems that emphasizes the use of well defined and relatively short increments of capability. Many of the Department's problems with business systems have stemmed from overly ambitious programs with severely underestimated budgets and schedules. The Business Capability Lifecycle approach is intended to constrain requirements and discipline programs to deliver testable and fieldable increments. I believe that adopting these practices will improve the results the Department achieves with its business systems investments.

Question. What additional steps, if any, do you believe are needed to ensure that business system investments are managed with the kind of acquisition management rigor and discipline that is embodied in relevant guidance and best practices, so that each investment will deliver expected benefits and capabilities on time and within budget?

Answer. If confirmed, I would continue to implement the principles and initiatives outlined in the report to Congress, "A New Approach for Delivering Information Technology Capabilities in DOD," which was signed by Deputy Secretary Lynn, and which provides an update on the Department's progress toward developing a new

acquisition process for information capabilities. The Department has already begun this process through the implementation of the Business Capability Lifecycle, an alternative acquisition approach for defense business systems, pursuant to guidance I issued in my current role as Under Secretary on November 15, 2010. If confirmed, I would ensure that this alternative acquisition approach is followed and that the Department does not revert to the old way of doing business out of habit or inertia.

Question. Do you believe that unique challenges to acquiring services related to information technology (IT) systems may require an acquisition strategy or approach different from those used for acquiring property or services unrelated to IT systems?

Answer. Yes, I believe that there are unique challenges to acquiring services related to IT systems and we must tailor our acquisition strategies to meet these unique circumstances. In fact, the Department has already begun to adapt to the unique challenges of IT acquisition through the implementation of the Business Capability Lifecycle, an alternative acquisition approach for defense business systems.

Question. What additional steps, if any, do you believe are needed to ensure that requirements management, systems testing, and data quality are improved and to help resolve other problems that have continued to hinder the Department's efforts to implement its automated systems on schedule, within cost and with the intended capabilities?

Answer. The issuance of the report to Congress, "A New Approach for Delivering Information Technology Capabilities in the Department of Defense," and the November 15, 2010 directive requiring the use of the Business Capability Lifecycle are important initial steps, however, more work remains to be done. The Department is in the process of revising its acquisition process governing directives to incorporate this approach, but implementation has already begun on a case-by-case basis. If confirmed, I will actively pursue the implementation of these initiatives.

DEFENSE ACQUISITION REFORM

Question. Two years ago, Congress enacted the Weapon Systems Acquisition Reform Act of 2009 (WSARA), without a dissenting vote in either House. WSARA is designed to ensure that new defense acquisition programs start on a sound footing, to avoid the high cost of fixing problems late in the acquisition process.

What are your views regarding WSARA and the need for improvements in the Defense acquisition process?

Answer. When I initially took office as Under Secretary of Defense for Acquisition, Technology, and Logistics, I received a mandate from Secretary Gates to improve the defense acquisition system, including weapon systems acquisition, and particularly acquisition in response to urgent operational needs. Shortly thereafter, the administration supported, and Congress passed, the WSARA. I continue to support the improvements in the areas of defense acquisition organization and policy that are addressed in the WSARA. A number of the memos issued under the Department's Better Buying Power (BBP) initiative directly address WSARA mandates, ensuring that the act's requirements are reflected not only in acquisition policy, but also in our acquisition practice. This is particularly true in the case of the Department's mandate that affordability be treated as a requirement at major acquisition milestones, supporting the act's requirements that DOD examine trade-offs between cost, schedule, and performance, and in the Department's emphasis on promoting competition. If confirmed, I would continue the effort to improve the defense acquisition system consistent with the direction provided in WSARA. I would also continue to enforce the Better Buying Power guidance, based on WSARA, to target affordability and control cost growth, incentivize productivity and innovation in industry, promote real competition, improve tradecraft in services acquisition, and reduce non-productive processes and bureaucracy.

Question. If confirmed, how would you improve all three aspects of the acquisition process—requirements, acquisition, and budgeting?

Answer. My experience as Under Secretary has deepened my belief that the acquisition process must be closely coordinated with the requirements and budget processes in order for the defense acquisition system to function properly. I believe that in the last 2 years the Department has improved in this area, but it remains an ongoing challenge. The Department has made the most significant improvement in the area of rapid acquisition through the use of coordinating entities such as the Senior Integration Group (SIG), previously known as the Counter-Improvised Explosive Device SIG (C-SIG), which regularly brings together the leadership of the three processes with theater commanders to coordinate action on fulfilling urgent wartime needs. In July of this year, the Department broadened the responsibilities of the SIG to cover all urgent warfighter requirements.

Prospectively, I believe it is necessary to create a closer alignment of the acquisition, requirements, and budget processes across the Department by expanding the type of cooperation and coordination we have instituted for urgent needs. If confirmed, I would make doing so a priority.

Question. If confirmed, how would you improve acquisition accountability?

Answer. The Goldwater-Nichols Act established a chain of authority for the acquisition process that provides for clear accountability in a chain beginning with the Defense Acquisition Executive and extending through the Component Acquisition Executives to the program Executive Officers and Program Managers. I emphasized this chain of responsibility as Under Secretary and, if confirmed, would continue to do so as Deputy Secretary. Additionally, the acquisition process must be operated in close coordination with the requirements process and the budget process, and this requires active participation by DOD's senior leadership to ensure all three processes are properly coordinated and held accountable. If confirmed, I am committed to ensuring accountability in all aspects of acquisition during my tenure.

As Under Secretary, I have also worked to reward productivity, and innovation in the defense industry by ensuring that the terms and conditions of our contracts fundamentally align contractors' incentives with the Department's interest so that our industry partners are accountable for performance not just to the Department but to their shareholders.

Question. Do you believe that the current investment budget for major systems is affordable given increasing historic cost growth in major systems, costs of current operations, and asset recapitalization?

Answer. Since becoming Under Secretary of Defense for Acquisition, Technology, and Logistics, I have expressed my belief that the unacceptable cost growth in far too many individual programs, combined with a habit of mind born from an unrealistic belief that the defense budget would keep growing, had to be reversed in order to avoid an affordability crisis in defense acquisition. With the recent passage of the Budget Control Act of 2011, the Department will need to redouble its efforts to control cost growth in investment and reexamine all areas of the budget for affordability in the context of the caps put in place on discretionary spending. If confirmed, I would assist the Secretary in leading and managing the Department's review of all areas of the budget, including investment.

Question. If confirmed, how do you plan to address this issue and guard against the potential impact of weapon systems cost growth?

Answer. If confirmed, I would continue to implement all aspects of WSARA and the Better Buying Power Initiative to reverse unacceptable cost growth in our programs and activities.

Question. Do you believe that the Department has adequately addressed its shortfalls in systems engineering and developmental testing capabilities, or does more remain to be done in these areas?

Answer. The Department has recognized and Congress has reinforced, with the WSARA, the need to reinvigorate and grow our capacity and capability in systems engineering and developmental testing and evaluation. I recognize the criticality of good systems engineering and strong developmental testing and evaluation to acquisition program success.

The Department has appointed strong technical leaders as Deputy Assistant Secretaries of Defense for Systems Engineering (DASD(SE)) and Developmental Test & Evaluation (DASD(DT&E)), implemented new and updated Department acquisition policy and guidance, grown and educated its technical workforce, and increased program engagement with our Major Defense Acquisition Programs in supporting effective systems engineering and developmental test and evaluation activities.

I believe that the resources and attention applied to these areas have been appropriate and I have supported the revitalization in these areas over the last 2 years, but I do not believe this work is done. If confirmed, I would work with the Secretary and Congress to ensure, within budget constraints, that we sustain the Department's commitment to grow a skilled acquisition workforce that provides the technical capabilities needed to deliver effective solutions to the warfighter on schedule and under budget.

Question. Do you believe that additional steps are needed to ensure that WSARA principles are implemented on current major programs like the Joint Strike Fighter (JSF) program?

Answer. WSARA principles have been widely implemented in the Department, but more can be done to implement them and extend them to non-Major Defense Acquisition Programs (MDAPs). The WSARA directly led to refined Department guidance and complementary policy initiatives that are positively affecting the JSF program, as well as the other MDAPs. Subsequent to passage of WSARA, the JSF program was the subject of numerous reviews, culminating in a Nunn-McCurdy crit-

ical cost breach certification review that was guided by the acquisition reform principles outlined in WSARA. The review incorporated the inputs of the WSARA-formed Office of the Director, Cost Assessment and Program Evaluation (CAPE), and also included the participation and assessments of the Office of Performance Assessment and Root Cause Analysis (PARCA), and the Offices of the Director, Systems Engineering and Developmental Test and Evaluation. These organizational changes were instrumental in the completion of the thorough review and restructuring of the JSF program that resulted in the Nunn-McCurdy certification on June 2, 2010. The WSARA has also contributed to a renewed emphasis on sound systems engineering principles, realistic cost and schedule estimating, a re-energized focus on integrated test and evaluation, and implementation of tighter cost control measures across the MDAPs, to include JSF. Implementation of the Department's Better Buying Power guidance, reflecting WSARA principles, has also resulted in an increased emphasis on affordability and the incorporation of should-cost target goals for JSF and other MDAPs.

ROLE OF SERVICE CHIEFS IN THE ACQUISITION PROCESS

Question. Some have suggested that the Service Chiefs should be given a different or expanded role in the acquisition of major systems. Others have expressed concern that such a change would reverse efforts in the Goldwater-Nichols legislation to reduce the layers between the Under Secretary and the program managers, and ensure that there was a dynamic tension between those who defined requirements (Service Chiefs) and those who filled the requirements (Service Acquisition Executives).

What do you believe is the appropriate role for Service Chiefs in the acquisition of major systems?

Answer. Goldwater-Nichols establishes a clear chain of authority for the acquisition process and I believe this chain of authority—program manager, program executive officer, component acquisition executive, defense acquisition executive—is appropriate for acquisition decisions. The acquisition process does not exist in isolation, however, and Service Chiefs play a major role as a result of their deep involvement in the budget and requirements processes, and because they fund, manage, and train the acquisition workforce of their respective Services. The acquisition process functions properly only when the Service Chiefs, acting through their chain of command, are actively involved.

CONTRACTING FOR SERVICES

Question. Over the last decade, DOD's spending on contract services has more than doubled. As a result, the Department now spends more for the purchase of services than it does for products (including major weapon systems). You testified last year that "the low-hanging fruit really is [in contract services]. There's a lot of money. There has been a very, very high rate of growth over the last decade, in Services. They have grown faster than everything else. . . . So, there's a lot we can do. I think great savings can be had there, across the Services' spending. It's essential that we look there, because that's half the money."

Do you believe that the cuts made to contract services pursuant to the efficiencies initiative fully addressed the issues of waste and inefficiency in this area, or are further reductions possible?

Answer. I believe the reductions the Department has made to date, primarily in the area of service support contracts performing staff augmentation functions, are a good start but are insufficient. Further reductions are possible. One of the major focus areas of the Better Buying Power Initiative the Department has instituted is to improve the Department's tradecraft in services acquisition.

Question. What additional steps would you take, if confirmed, to control the Department's spending on contract services?

Answer. Under the Better Buying Power initiative, the Department is working to have a cohesive and integrated strategy for services acquisition. The steps already taken include appointment of senior managers for acquisition of services in each Military Department, adoption of a standard taxonomy for services and identifying best practices, and revised contracting policies to increase the use of competition. Additional steps that can be taken include improved benchmarking against commercial experience and employment of stronger incentives for efficient performance. If confirmed, I would continue to ensure that the Department focuses on those areas where we know improvements can be made so that we are not spending too much on contracted services.

CONTRACTOR PERFORMANCE OF CRITICAL GOVERNMENTAL FUNCTIONS

Question. Over the last decade, the Department has become progressively more reliant upon contractors to perform functions that were once performed exclusively by government employees. As a result, contractors now play an integral role in areas as diverse as the management and oversight of weapons programs, the development of personnel policies, and the collection and analysis of intelligence. In many cases, contractor employees work in the same offices, serve on the same projects and task forces, and perform many of the same functions as DOD employees.

In your view, is DOD still too reliant on contractors to support the basic functions of the Department?

Answer. The appropriate balance between organic government performance and reliance on contractors is something that must be assessed function by function. Many functions are appropriate for contractor support; however, some functions, such as program management, are more appropriately performed by Government personnel. Some functions are inherently governmental and should not be performed by contractors.

As Under Secretary of Defense for Acquisition, Technology, and Logistics, I worked to adjust this balance in the acquisition workforce, which had become overly reliant on contractors in a number of areas. As a result, and with the committee's assistance, the Department has significantly strengthened the civilian and military components of the acquisition workforce. At the same time, I communicated to our entire organization that contractors are an important component of the Department's Total Force. If confirmed, I would assess the issue of appropriate use of contractors across the Department to determine whether and where else DOD's reliance on contractors has become excessive.

Question. What additional steps, if any, do you believe are needed to reduce the Department's reliance on contractors to perform critical functions?

Answer. I understand there are functions that are so critical to the Department's activities that some portion of the function must be performed organically for the Department to have sufficient internal capability to continue to be able to perform and control its operations. Critical functions must be assessed on a case-by-case basis because the level of internal capability required is dependent on the function in question. In my role as Under Secretary, I have sought to ensure that the Department retains sufficient organic capability for critical acquisition and logistics functions. At this time I believe the Department has identified and eliminated most, if not all, over-reliance on contractors for critical functions. Over the next few years, however, I believe the Department needs to be watchful to ensure that this trend is not reversed. As budgets decline and as the organic workforce is reduced, there is a risk that reliance on contractors may increase, particularly in response to new contingencies. As the Department reduces its overseas deployments, it must identify and retain critical capabilities that have been built up over the past decade, at least at the level required to rapidly redeploy those capabilities in response to changing needs. Contingency contracting is an example of the type of expertise that must be institutionalized and retained. If confirmed, I would continue to work to address any shortfalls in the Department's ability to perform critical functions using organic resources.

Question. Do you believe that the current extensive use of personal services contracts is in the best interest of DOD?

Answer. I support the statutory framework that Congress has constructed governing the use of personal services contracts. I believe the Department should adhere to this framework. If confirmed, I would ensure that personal services contracts are not used inappropriately.

Question. U.S. military operations in Iraq have relied on contractor support to a greater degree than any previous U.S. military operations. According to widely published reports, the number of U.S. contractor employees in Iraq and Afghanistan has roughly equaled the number of U.S. military deployed in those countries.

Do you believe that DOD has become too dependent on contractor support for military operations?

Answer. Contractors are a necessary part of the Total Force. They provide the Department with the ability to obtain a mix of unique skill sets and knowledge that may not be available in our organic force structure and permit us to concentrate our organic resources on those areas that are inherently governmental. Contractors provide a broad range of supplies, services, and critical logistics support in many capability areas, while reducing military footprint and increasing the availability and readiness of resources. Based on our experience in Iraq and Afghanistan, I believe we should continue to improve and evolve our strategy regarding the use and management of contractors. At this time, I do not believe the Department is too de-

pendent on contractors for support of operations; however, this is an area that will require continuous scrutiny, particularly as budgets and organic capabilities are reduced. If confirmed, I would ensure that this scrutiny is provided.

Question. What risks do you see in the Department's reliance on such contractor support? What steps do you believe the Department should take to mitigate such risk?

Answer. Reliance on contractor support can lead to operational problems if contractors fail to perform. Experience has shown that a number of other problems can arise, including a potential for increased waste, fraud, and abuse; problems that arise from contractor interaction with local communities; and issues with the use of force.

In my role as Under Secretary of Defense for Acquisition, Technology, and Logistics, I have worked to ensure that these risks are mitigated. The study conducted by the Chairman of the Joint Chiefs regarding reliance on contracted support in contingency operations and the assessments being conducted by the Military Departments and agencies are key components in this effort. It is also critical to ensure adequate and appropriate planning for contractor support. The Department is integrating contractor support estimates into existing planning systems, and also ensuring that Operational Contract Support requirements are considered in force planning scenario development and joint force assessments. If confirmed, I would continue to monitor these initiatives closely.

Question. Do you believe the Department is appropriately organized and staffed to effectively manage contractors on the battlefield?

Answer. Not yet, but there has been improvement and more is underway. At the start of our conflicts in Iraq and Afghanistan, the Department was not properly organized and staffed to manage contractors in the ongoing contingency operations effectively, but a number of corrective actions have been taken over the last several years. If confirmed, I would continue to oversee ongoing efforts to ensure DOD institutionalizes its contingency contracting capabilities and applies lessons learned from our experiences in Iraq and Afghanistan to future conflicts.

Question. What steps, if any, do you believe the Department should take to improve its management of contractors on the battlefield?

Answer. The Department needs to further ensure that training and contingency plans account realistically for the role of contractors on the modern battlefield; that adequate numbers of contracting officers, contracting officer representatives, and other skilled personnel are available to manage contractors; that there is transparency into contractor and subcontractor performance; that waste, fraud, and abuse, and corruption are prevented and vigorously punished; that DOD coordinates with civil agencies effectively; and that other measures identified by the Department are taken. Many of these actions are the same as those recommended by the Commission on Wartime Contracting.

PRIVATE SECURITY CONTRACTORS

Question. Do you believe DOD and other Federal agencies should rely upon contractors to perform security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations?

Answer. Without a substantial increase in the force structure committed to contingency operations, the use of contractors for some security functions in contingencies is a necessity. However, these security contractors must be properly regulated and supervised, and their roles must be carefully limited and defined. Contractors cannot engage in combat operations. Their use of force is limited to self-defense, the defense of others against violence, and the protection of critical property. Under these circumstances, I believe that the limited use of security contractors in contingency operations is acceptable. It would be inappropriate for me to comment on their use by other departments and agencies. If confirmed, I would ensure that the Department continues its efforts to implement and enforce appropriate limitations on private security contractors.

Question. In your view, has the United States' reliance upon private security contractors to perform such functions risked undermining our defense and foreign policy objectives in Iraq and Afghanistan?

Answer. The use of force by contractors or military personnel could, if misapplied, undermine our policy objectives. Private security providers are a necessity in Iraq and Afghanistan and will likely continue to be so in future contingency operations. DOD has established policies and procedures to manage contractors effectively to prevent unnecessary violence that would be detrimental to our policy objectives and to address incidents where violence may occur. As Under Secretary of Defense for

Acquisition, Technology and Logistics, I recently approved a revised instruction, DODI 3020.50, "Private Security Contractors (PSCs) Operating in Contingency Operations, Humanitarian or Peace Operations, or Other Military Operations or Exercises," which, as the title notes, expanded our oversight of such contractors from those operating in contingency areas to essentially all overseas operations. This is an area that requires constant attention.

Question. What steps would you take, if confirmed, to ensure that any private security contractors who may continue to operate in an area of combat operations act in a responsible manner, consistent with U.S. defense and foreign policy objectives?

Answer. If confirmed, I would continue to support the efforts already begun in this regard within the Office of the Under Secretary of Defense for Acquisition, Technology, and Logistics, in the Military Services, and in the combatant commands. These efforts include development of Department-level policy, coordinating this policy with the Departments of State and Justice and other Government agencies, and engaging the international community to provide a common framework for the proper roles and oversight of private security contractors and the enforcement of those policies during overseas operations by the appropriate authorities. The administration recently published rules that will apply to private security contractors working for all Federal agencies operating in overseas operations, consistent with DODI 3020.50.

Additionally, I believe that work remains to be done to ensure that DOD instructions and combatant commander guidance and orders remain current, clear, and aligned with, with U.S. defense and foreign policy objectives. Collaboration among DOD, the Department of State, and other Governmental agencies must continue to ensure consistent policy is developed across the Federal Government and with potential coalition partners and host nations to promote a common interagency and international understanding of responsible use and oversight of private security services and binding enforceable standards for private security contractors operating in areas of combat operations.

Question. Do you support the extension of the Military Extraterritorial Jurisdiction Act to private security contractors of all Federal agencies?

Answer. I support steps to ensure that there is accountability for the actions of all contractors performing work for the U.S. Government in an area of combat operations. If confirmed, I would consult with DOD's interagency partners concerning appropriate mechanisms to ensure such accountability.

Question. What is your view of the appropriate application of the Uniform Code of Military Justice to employees of private security contractors operating in an area of combat operations?

Answer. There must be an assurance of accountability for the actions of all contractors deployed to an area of combat operations. In most cases, the best option for handling cases involving contractors will be in the civil legal system. It is my understanding that in cases where there is no jurisdiction under an effective civil legal system justice is one tool to consider for ensuring accountability.

Question. What is your view of the recently signed International Code of Conduct for Private Security Service Providers?

Answer. I believe that the endorsement of the International Code of Conduct for Private Security Service providers was an important step for improving the performance of security functions by all private security contractors, not just those under contract to DOD or the U.S. Government. Codes of conduct, however, are aspirational and difficult to enforce. To make the Code effective, there needs to be auditable and measurable standards that exist separately from, and give teeth to, the principles of the Code: standards that are enforceable under contract law. Currently, the Department is sponsoring the development of business and operational standards for private security companies, and those which can be written into all Defense contracts for security functions. These standards are based on the principles described in the International Code of Conduct, along with the Montreux Document, and the regulations recently published in the Federal Register regarding private security functions.

IRAQ LESSONS LEARNED

Question. What do you believe are the major lessons learned from the Iraq invasion, the effort to stabilize the country following that invasion, and the transition of security responsibility to the Government of Iraq?

Answer. One of the most important lessons is that 21st century conflict will occur along the entire spectrum of conflict. DOD cannot be prepared only for combat, but also must be prepared to assist in addressing the social, political, and economic factors that can fuel a conflict. The U.S. military must plan and train with its civilian

counterparts and be prepared to operate effectively in all phases of conflict. Indeed, the need for greater capabilities and capacity in civilian agencies has been a recurring lesson for the entire U.S. Government.

Question. What is your understanding and assessment, if any, of the Department's adaptations or changes in policy, programs, force structure, or operational concepts based upon these lessons learned?

Answer. Lessons learned from Iraq have led to wide-ranging changes in all of the areas listed above. For example, U.S. counterinsurgency doctrine has been completely revised, culminating in the publication of Counterinsurgency Field Manual 3-24. Force structure changes include the development of Advise and Assist Brigades. DOD has demonstrated the ability to learn and adapt across Doctrine, Organization, Training, Materiel, Leadership and Education, Personnel, Facilities, and Policy.

Question. If confirmed, what additional changes, if any, would you propose making to policy, programs, force structure, or operating concepts based on the lessons of combat and stability operations in Iraq?

Answer. I understand that many of the lessons from Iraq are in the process of being integrated into DOD policy and doctrine, and are contributing to the progress being made in Afghanistan. If confirmed, I would ensure that the integration of lessons learned from Iraq into policy and doctrine are carried through to completion.

LEAD AGENCY TRANSITION IN IRAQ

Question. Responsibility and authority for lead U.S. agency in Iraq is scheduled this year to transition from DOD to Department of State (DOS). By October 2011, the Department of State is supposed to achieve an initial operating capability as lead agency and achieve full operating capability by December.

What is your understanding and assessment, if any, of the planning and progress on executing this transition from DOD to DOS? In your view, what are the sources of greatest risk, if any, to the current plan and successful implementation of this transition?

Answer. DOD, DOS, and other agencies and departments have undertaken unprecedented levels of coordination and planning for the transition in Iraq. As USD(AT&L), my office has had some role in the logistics and contracting aspects of the transition plan, and my observation is that DOD has an excellent working relationship with DOS, and the two departments are working together at all levels to achieve a successful transition. As one would expect with a transition of this scope and complexity, challenges exist, and DOD is doing everything it can to help set up DOS for success. The greatest source of risk would be failure to provide the State Department with adequate funding in fiscal year 2012 in order to implement a successful transition of the U.S. mission from DOD to State.

Question. If confirmed, what changes, if any, would you propose to the current plan or actions for implementation of the transition?

Answer. If confirmed, I would carefully monitor the transition with other senior Defense leaders and make any necessary recommendations to the Secretary of Defense.

STABILITY AND SUPPORT OPERATIONS

Question. The U.S. experience in Iraq and Afghanistan has underscored the importance of planning and training to prepare for the conduct and support of stability and support operations in post-conflict situations.

In your view, what is the appropriate allocation of roles and responsibilities, if any, between DOD and other departments and agencies of the Federal Government in the planning and conduct of stability operations?

Answer. Ideally, DOD would provide support to civilian agencies such as the Department of State, U.S. Agency for International Development, and the Department of Justice in the planning and conduct of stability operations. But, when directed, DOD has led stability operations activities to establish civil security and control and to restore essential services, repair and protect critical infrastructure, deliver humanitarian assistance, and then has transitioned lead responsibility to other U.S. Government agencies, foreign governments' security forces, and international governmental organizations and nongovernmental organizations. If confirmed, I would ensure that DOD operates within U.S. Government and international structures for managing civil-military operations, and would seek to enable the deployment and use of civilian capabilities and resources, as directed and as appropriate.

Question. In developing the capabilities necessary for stability operations, what adjustments, if any, should be made to prepare U.S. Armed Forces to conduct stability operations without detracting from its ability to perform combat missions?

Answer. Stability operations are a core mission that DOD must be ready to carry out with proficiency equivalent to high-intensity combat operations. Although this represents a cultural shift for DOD, we understand that all of our Military Departments must adequately train, organize, and equip forces to conduct such missions. If confirmed, I would work with the Secretary, the Chairman, and leadership of the Military Departments to ensure that DOD is preparing U.S. forces for stability operations.

Question. Do you believe that the U.S. Government needs to establish new procedures to manage stability operations? If so, why?

Answer. I think we need to strengthen the U.S. Government's collective ability to plan together and be more collaborative in designing stabilization and reconstruction activities. The Department is working with interagency partners to identify areas where we can improve planning efforts.

DRAWDOWN IN IRAQ

Question. Do you support the current plan for the drawdown of U.S. forces from Iraq consistent with the U.S.-Iraq Security Agreement of 2008 signed by President Bush and Prime Minister Maliki?

Answer. As the President has stated, we intend to fulfill our obligations under the 2008 U.S.-Iraq Security Agreement, which requires all U.S. forces to withdraw by the end of the year. I would also note, however, that it is possible that the United States and Iraq could agree on follow-on arrangements that could include continued presence of U.S. forces in Iraq after 2011. I support this plan.

Question. If the Government of Iraq were to ask for the continued presence in Iraq of U.S. forces beyond the end of 2011, would you support the deployment or retention of additional troops in Iraq beyond the current deadline for U.S. troop withdrawal?

Answer. On August 2, Iraqi bloc leaders stated that they have agreed to mandate the Iraqi Government start talks with the United States. Talks are focused on training assistance under the Strategic Framework Agreement, given the Iraqi Security Forces' requirement for further development. I agree that we should talk to them about their request.

U.S.-IRAQ STRATEGIC RELATIONSHIP

Question. In your view, what will be the nature of the U.S.-Iraq strategic relationship after December 31, 2011?

Answer. The United States is committed to a long-term partnership with Iraq, as outlined in the November 2008 Strategic Framework Agreement, which describes a security relationship that addresses Iraqi needs and advances U.S. interests.

Question. What do you see as the greatest challenges for that relationship over the coming years?

Answer. Our greatest challenge is to ensure continued U.S. engagement and support for Iraq in an austere budget environment. The United States is at a critical point in its relationship with Iraq as U.S. forces draw down and the State Department becomes the lead U.S. Agency for the mission. Recent turmoil in the broader Middle East highlights the importance of active U.S. engagement and maintaining strategic partnerships with regional partners based on mutual interests and mutual respect.

AFGHANISTAN COUNTERINSURGENCY STRATEGY

Question. Do you support the counterinsurgency strategy for Afghanistan? In your view, is that the right strategy?

Answer. Yes, I support the strategy that the President has set forth, and I believe it is the right strategy. A focused counterinsurgency campaign will allow us to help the Afghans build security forces and government capacity capable of providing the security and basic services necessary to achieve a peaceful, stable Afghanistan that does not again become a safe haven for terrorists.

Question. If confirmed, are there changes you would recommend to the U.S. strategy in Afghanistan? For example, would you support an increase in counterterrorism action in Afghanistan?

Answer. I believe the U.S. strategy in Afghanistan is sound. The administration tracks metrics on progress toward its objectives in Afghanistan throughout the year, and the Department is constantly assessing and adjusting its implementation of the overall strategy. Counterterrorism is a significant part of the counterinsurgency strategy, and managing the balance of all aspects of the strategy is an ongoing process.

Question. What is your assessment of the progress of the counterinsurgency campaign in Afghanistan?

Answer. Important gains have been made over the past 24 months, establishing security and the authority of the Afghan Government in former Taliban strongholds, particularly in Helmand and Kandahar where we focused our surge forces, as well as building the capacity of the Afghan National Security Forces. The momentum has shifted to the Afghan Government supported by Coalition forces, and the transition process has begun with the Afghan Government assuming lead security responsibilities in several areas of the country this summer. This progress is, however, fragile and reversible.

TRANSITION OF SECURITY RESPONSIBILITY IN AFGHANISTAN AND U.S. TROOP REDUCTIONS

Question. On June 22, President Obama announced his decision to draw down 10,000 U.S. troops from Afghanistan by the end of the year and to withdraw the remaining 23,000 "surge" force by next summer, for a total drawdown of 33,000.

Do you support the President's decision to begin reducing U.S. forces in July 2011? Why or why not?

Answer. Yes. I support a responsible conditions-based drawdown as called for by the President. I believe we have made the progress necessary to allow us to begin to bring home U.S. surge forces. As USD(AT&L), I have worked through my co-chairmanship of the Senior Integration Group (SIG) to ensure that the forces in Afghanistan grow in overall capability even as the U.S. troop presence begins to decrease.

Question. Do you support the President's decision regarding the size and pace of reductions in U.S. forces? Why or why not?

Answer. Yes. I believe we have made the progress necessary to allow us to begin to bring home U.S. surge forces.

Question. At the NATO Summit in Lisbon, the participants in the International Security Assistance Force endorsed President Karzai's goal of the Afghanistan National Security Forces having the primary responsibility for providing security throughout Afghanistan by 2014. Last month, transition of lead responsibility for security from ISAF forces to Afghan security forces began in seven areas around Afghanistan.

Do you support the goal of transitioning security responsibility to the Afghan security forces by 2014?

Answer. Yes. The transition of security-lead to the ANSF in the first tranche of provinces and municipalities has progressed smoothly and without any significant uptick in violence in those areas. Our transition strategy, as stated at the November 2010 NATO Lisbon Conference, is to complete security transition nation-wide by the end of 2014. Transition remains conditions-based. The ISAF Commander and NATO Senior Civilian Representative are working together to refine the transition process to take into account the gradual drawdown of Coalition forces, declining funding, and the need to focus enablers and resources in contested areas as we move forward with transition.

Question. How important is it to the civil-military campaign in Afghanistan that the initial round of transitioning security responsibility to the Afghan security forces begins this summer and be completed by the end of the year?

Answer. Successful transition depends upon sufficient development and capable governance to underpin security gains. The timetable is and should be conditions-based.

AFGHANISTAN NATIONAL SECURITY FORCES

Question. What is your assessment of the progress in developing professional and effective Afghanistan National Security Forces (ANSF)?

Answer. In partnership with U.S. and NATO forces, the ANSF have made enormous progress in size and quality over the past 2 years and remain ahead of schedule for their growth targets this year. In addition, both the Afghan National Army (ANA) and Afghan National Police (ANP) have made significant gains in effectiveness and professionalism. The establishment of the Afghan Local Police (ALP) program has also fostered greater local capability to resist insurgents. However, real challenges remain, for example, in stemming attrition rates.

Question. Do you support the proposed increase in the size of the ANSF to the level of 352,000 personnel by 2012?

Answer. Military commanders who are the closest to the issue have conducted detailed analyses of ANSF personnel and capabilities requirements and have concluded that right now, a level of 352,000 personnel appears to be the right force size,

although the balance of forces between the Army and Police may change over time. President Obama and NATO have endorsed that growth to 352,000 personnel, and I support those decisions.

Question. What do you see as the main challenges to building the capacity of the ANSF and, if confirmed, what recommendations, if any, would you make for addressing those challenges?

Answer. Some of the main challenges to building the capacity of the ANSF include poor literacy rates and low education levels in the Afghan population, which constrain the development of more advanced ANSF capabilities such as logistics, aviation, medical, and communications. These capabilities will be necessary for an increasingly self-sufficient ANSF to ensure Afghanistan does not again become a safe haven for terrorists. NATO Training Mission-Afghanistan has put considerable attention on, and resources toward, the literacy problem. Another key challenge is the development of strong and capable leaders, which takes time and experience to cultivate. If confirmed, I would work with military and civilian leaders and international partners to explore ways to bolster ANSF capacity.

Question. If confirmed, what recommendations, if any, would you have to address challenges relating to the sustainment of the ANSF over the long-term?

Answer. We need to challenge our planning assumptions continually to ensure the Afghans are developing a security force that is sustainable, in terms of size, capabilities, and cost. We need to continue to resist providing certain advanced aviation and armor capabilities that do not appear to be necessary for Afghan security and are likely to be unsustainable over the long term. Currently, the United States provides the bulk of funding for the Afghan National Security Forces. We need to continue to urge other countries to increase the amounts they contribute. For example, former Secretary of Defense Gates challenged NATO Allies and partners to contribute a combined one billion euros annually to the NATO Afghan National Army Trust Fund.

AFGHAN GOVERNANCE AND DEVELOPMENT

Question. While improving security for the Afghan people is a key component of our counterinsurgency strategy in Afghanistan, the success of that strategy also depends on improving the Government of Afghanistan's capacity to provide governance, better services and economic development. Significant concerns remain over the performance of the Government of Afghanistan in meeting the needs of the Afghan people and fighting corruption.

What do you see as the role for DOD in building the capacity of the Government of Afghanistan to deliver services, provide better governance, improve economic development and fight corruption in Afghanistan?

Answer. Improving governance and economic development is crucial to our strategy in Afghanistan. Although the Department of State (DOS) and the U.S. Agency for International Development (USAID) are the lead agencies within the U.S. Government on governance and development initiatives in Afghanistan, DOD contributes to this effort and cooperates closely with DOS and USAID. Coordinating DOD stabilization projects with civilian reconstruction and development efforts ensures that the military and civilian activities work together to support longer-term development objectives, as well as near-term stabilization.

U.S. STRATEGIC RELATIONSHIP WITH PAKISTAN

Question. What in your view are the key U.S. strategic interests with regard to Pakistan?

Answer. Our relationship with Pakistan is not always easy, but it is vital to our national security and to our regional interests. The core national security goal remains to disrupt, dismantle, and defeat al Qaeda and its affiliates to ensure that they do not have safe havens in Afghanistan and Pakistan and to eliminate their capacity to threaten the United States, our Allies, and interests abroad. Al Qaeda and other extremists continue to use safe havens in Pakistan to plot and prepare attacks against the United States and our allies and partners, and it is essential to continue working with Pakistan to eliminate these safe havens.

The fact that Pakistan is a nuclear state that faces internal threats from extremist organizations adds to the urgency of these requirements. Furthermore, U.S. economic interests in South Asia require stability in the region. Preventing, if possible, a potential Pakistan-India conflict is another important strategic interest. For these reasons, it is in the United States' interest for Pakistan to have a strong, civilian-led government and an open society, to live in peace and security with its neighbors, and to ensure its nuclear assets remain secure, in accordance with international

standards. If confirmed, I look forward to working with Congress as we pursue these strategic interests with Pakistan.

Question. What in your view are the key lessons from the operation to kill Osama bin Laden for the U.S.-Pakistan relationship?

Answer. The key lesson from the raid is that the U.S. must act when U.S. vital national interests are at stake, including unilaterally, if other options present too much risk to mission success. A second lesson is that the Pakistan sanctuary for al Qaeda, Afghan insurgents, and other terrorist groups remains a threat to U.S. vital national interests that must be eliminated. A third lesson is that the United States must remain engaged in Pakistan to secure its vital interests, and that Pakistan needs the United States as much as the United States needs Pakistan.

Question. If confirmed, what changes, if any, would you recommend for U.S. relations with Pakistan, particularly in terms of military-to-military relations?

Answer. Our military-to-military relationship with Pakistan, like our overall relationship, has experienced good and bad periods. If confirmed, I would continue to support DOD's efforts, in coordination with our interagency partners, to improve our counterterrorism cooperation and develop a constructive and mutually beneficial relationship with Pakistan, aimed at advancing shared national security objectives.

U.S. ASSISTANCE TO PAKISTAN

Question. Since 2001, the United States has provided significant military assistance to Pakistan, including foreign military financing and training and equipment through the Pakistan Counterinsurgency Fund to build the capacity of the Pakistan Army and Frontier Scouts to conduct counterinsurgency operations. In addition, the United States has provided significant funds to reimburse Pakistan for the costs associated with military operations conducted by Pakistan along the Afghanistan-Pakistan border and other support provided in connection with Operation Enduring Freedom.

How effective, in your view, has this assistance been in improving Pakistan's efforts and commitment to counter terrorists in Pakistan?

Answer. Security-related assistance, Coalition Support Fund reimbursements, and cross-border coordination with ISAF and Afghan forces have helped enable Pakistan's counterinsurgency campaign. Since 2009, Pakistan has undertaken counterinsurgency operations against extremist organizations in its northwest areas, including in Swat, South Waziristan, Mohmand, and Bajaur, with varying levels of success. If confirmed, I would work with Congress to ensure that the support we provide is yielding the results we seek.

Question. What conditions or factors should the Department take into consideration in determining whether additional U.S. military assistance should be provided to Pakistan in the future?

Answer. The current "train-advise-equip" programs with the Pakistan military and paramilitary forces have been an important component in pursuing the near-term objective of eliminating terrorist sanctuaries and disrupting the al Qaeda network. It is vital, however, that Pakistan live up to its responsibilities, including to cooperate more fully in counterterrorism matters, to expand its counterinsurgency campaign, and to cease providing sanctuary to Afghan Taliban and other militant groups perceived to be beneficial to the Pakistani state. Future requests for security-related assistance will be informed by Pakistan's steps in these areas. Additionally, all U.S. security-related assistance will continue to be provided to Pakistan in accordance with the Leahy vetting requirements.

OSAMA BIN LADEN AND AL QAEDA

Question. In your view, will the death of Osama bin Laden have a significant impact on the conflict against al Qaeda and if so, how?

Answer. The death of Osama bin Laden is a significant blow to al Qaeda and brings us closer to that organization's strategic defeat. However, al Qaeda remains a potent, dangerous, and adaptable foe. Even as the core al Qaeda organization is weakened, decentralized affiliates and adherents pose a continuing threat to the United States.

Question. What is your assessment of the threat posed by al Qaeda affiliates to the U.S. Homeland, U.S. interests overseas, and western interests more broadly? Which affiliates are of most concern?

Answer. Al Qaeda and its affiliates and adherents are diverse, dispersed, and decentralized. They are present in the Arabian Peninsula, North and East Africa, South Asia, and elsewhere around the globe, including within the United States. Their intent and ability to attack the United States varies by group, but striking the Homeland is a common theme in their propaganda and planning. Al Qaeda in

the Arabian Peninsula has already demonstrated both the intent and the capability to conduct attacks against the United States. Also, despite the death of bin Laden, core al Qaeda and its affiliates and adherents in the Afghanistan-Pakistan region remain a persistent and serious threat.

SOMALIA

Question. Somalia is a collapsed state with a weak government unable to project either power or stability or to provide services to its people in the midst of a humanitarian crisis. Somalia is also a training and operations hub for: al Shabab and other violent extremists; pirates operating in the Indian Ocean and Arabian Peninsula; illicit traffickers of weapons, humans, and drugs; and remnants of the al Qaeda East Africa cell that was responsible for the destruction of our embassies in Dar es Salaam and Nairobi in August of 1998.

What is your assessment of the threat posed by al Shabab to the U.S. and Western interests in the Horn of Africa and to the U.S. Homeland?

Answer. The threat from al Shabab to the U.S. and Western interests in the Horn of Africa and to the U.S. Homeland is significant. Al Shabab leaders, who have claimed affiliation with al Qaeda since 2007, are developing ties with al Qaeda in the Arabian Peninsula, and are showing an increasing desire to stage international terrorist attacks in addition to their acts of violence inside Somalia. Al Shabab employs several hundred foreign fighters and regularly tries to recruit fighters from Somali diaspora communities in the United States and Europe. Al Shabab continues to repress the Somali people—it is not a coincidence that the areas in Somalia where the UN has declared famine conditions to exist are areas under al Shabab's control.

Further, Somalia's lack of governance and sparse population could make it appealing as a safe haven for al Qaeda. As al Qaeda undergoes leadership changes and regroups from counterterrorism operations in Pakistan, we need to ensure that it does not relocate its center of operations to Somalia.

Question. Given your knowledge of the role of the various U.S. Government departments and agencies in the Horn of Africa, what changes, if any, would you make to DOD's current role in the Horn of Africa?

Answer. I understand DOD's primary mission in the Horn of Africa is to build partner-nation capacity in order to promote regional security and stability, prevent conflict, and protect U.S. interests. I believe this mission is appropriate. I am informed U.S. Africa Command is undertaking a review of East Africa to determine how our military efforts in the region work in concert with our interagency partners to achieve our collective regional goals and counter al Qaeda's linkages to elements of al Shabab. DOD's ultimate goal should be a fully integrated strategy under which security assistance, capacity building, operational collaboration with regional partners, and counter-terrorism actions are synchronized to provide the regional security and stability that is in the interest of both the United States and our regional partners.

If confirmed, I would work to ensure our strategy is developed as part of a coordinated U.S. national security policy towards the Horn of Africa, and to determine how DOD can and should best support this policy.

YEMEN AND AL QAEDA IN THE ARABIAN PENINSULA

Question. A number of senior U.S. officials have indicated that the most significant threat to the U.S. Homeland currently emanates from Yemen.

What is your assessment of the current U.S. strategy in Yemen?

Answer. I understand the United States is disappointed by President Saleh's continued refusal to transfer power. U.S. leaders continue to urge him to do so immediately, and to ensure that the legitimate will of the Yemeni people is respected. The United States continues to work with European and Gulf Cooperation Council partners to facilitate a peaceful and orderly transition of power.

The ongoing unrest has weakened an already fragile economy and allowed al Qaeda in the Arabian Peninsula (AQAP) to expand its influence. Despite this, U.S. goals in Yemen remain the same: to help Yemen deny AQAP a safe haven and operational platform and to ensure Yemen is stable, unified, and economically viable.

AQAP has attempted two dramatic attacks on the United States since December 2009, and has expressed intent to try again. AQAP attack planning demonstrates sophisticated and innovative techniques, such as concealed explosive devices and printer cartridge bombs. AQAP is also increasingly attempting to recruit and radicalize would-be terrorists in the West through its extensive media outreach, increasing the threat of lone-wolf terrorists inspired by AQAP.

The administration has just released a comprehensive National Strategy for Counterterrorism that calls for a collaborative U.S.-Yemeni effort to disrupt, dismantle, and defeat AQAP. If confirmed, I would seek to ensure that DOD plays a constructive and appropriate role in carrying out this strategy.

Question. Given the ongoing political upheaval and splintering of the military in Yemen, what are your views on the United States continuing to provide security assistance—most significantly DOD section 1206 funding—to Yemeni counterterrorism forces?

Answer. As with every country, we are regularly evaluating U.S. assistance and counterterrorism cooperation to ensure that the assistance to be provided is appropriate and effective. The Republic of Yemen Government is a critical partner in the war against al Qaeda, and the Department must be particularly mindful of the continued and growing threat to the United States from AQAP. Given the challenges unfolding in Yemen, the United States will need to continually re-evaluate the partnership.

CHINA

Question. Much has been made about the economic and military growth in China and what that growth might mean in terms of regional and global security.

From your perspective, what effect is China's expanding economy and growing military having on the region at-large and how is that growth influencing the U.S. security posture in Asia and the Pacific?

Answer. In terms of regional security, China's economic growth has increased China's international profile and influence, and has enabled China's leaders to embark upon and sustain a comprehensive transformation of its military forces. The pace and scale of China's military modernization, coupled with the lack of transparency, raises many questions, both within the United States and the region as a whole, about China's future.

From my perspective, DOD has a special responsibility to monitor China's military and to deter conflict. Through a robust forward presence, prudent capability developments, and sustained action to strengthen alliances and partnerships, DOD can support our national interest in promoting a peaceful, stable, and prosperous Asia-Pacific region.

Question. What do you believe are the objectives of China's military modernization program?

Answer. China appears to be building the capability to fight and win short duration, high-intensity conflicts along its periphery. Its near-term focus appears to be on preparing for potential contingencies involving Taiwan, including possible U.S. military intervention. Its modernization efforts emphasize anti-access and area denial capabilities. China is also devoting increasing attention and resources to conducting operations beyond Taiwan and China's immediate periphery. Beijing's growing focus on military missions other than war includes humanitarian assistance, non-combat evacuation operations, and counter-piracy support. Lastly, China is strengthening its nuclear deterrent and enhancing its strategic strike capabilities through modernization of its nuclear forces, and improving other strategic capabilities such as space and counter-space operations and computer network operations.

Question. How do you believe the United States should respond to China's military modernization program?

Answer. The United States has been and should remain the pivotal military power in the Asia-Pacific region. Our response to China's military modernization should be flexible and supported by the continued transformation of our force posture in the Asia-Pacific region, the maintenance of our global presence and access, the modernization of our own capabilities in such areas as anti-access and area denial, and the strengthening of our Alliances and partnerships.

Question. U.S.-China military-to-military dialogue has been strained over the past several years and efforts to establish and maintain mutually beneficial military relations has been hampered by China's propensity for postponing or canceling military engagements in an apparent effort to influence U.S. actions. Since the beginning of 2011, there have been a number of senior-level meetings between U.S. and Chinese military officials, including visits to China by Secretary Gates and Admiral Mullen, and a visit to United States by the People's Liberation Army Chief of Staff, General Chen. By most accounts, gains from these meetings have been modest at best, but they do represent an encouraging step towards perhaps a more mutually beneficial understanding between the militaries of our countries.

What is your assessment of the current state of U.S.-China military-to-military relations and what would be your intention, if confirmed, regarding these relations?

Answer. I have long supported a continuous dialogue between the armed forces of the United States and China to expand practical cooperation where our national interests converge and to discuss candidly those areas where we have disagreement. Such dialogue can be especially important during periods of friction and turbulence.

I believe we should continue to use military engagement with China as one of several means to demonstrate U.S. commitment to the security of the Asia-Pacific region, to encourage China to play a constructive role in the region, and to press China to partner with the United States and our Asian allies and partners in addressing common security challenges.

Question. What is your view of the relative importance of sustained military-to-military relations with China?

Answer. President Obama and President Hu have expressed that a healthy, stable, reliable, and continuous military-to-military relationship is an essential part of their shared vision for a positive, cooperative, and comprehensive U.S.-China relationship. I fully agree with that assertion.

Question. Do you believe that we should make any changes in the quality or quantity of our military relations with China? If so, what changes and why?

Answer. I believe that military exchanges with China can be valuable, but can only truly work if China is willing to reciprocate with transparent and substantive discussions. If confirmed, I would look for ways to deepen and enhance our military-to-military relationship with China, and to encourage China to act responsibly both regionally and globally.

NORTH KOREA

Question. North Korea represents one of the greatest near-term threats to regional security and stability. This seriousness of the threat is seen by North Korea's continued pursuit of a nuclear capability and ballistic missile program, and particularly, over the past year, by North Korea's unprovoked and deadly attacks against South Korea—specifically the attack on the Republic of Korea navy ship Cheonan in March 2010 and the artillery attack on South Korea's Yeonpyeong Island in November 2010.

What is your assessment of the current security situation on the Korean peninsula?

Answer. North Korea's large conventional military, proliferation activities, and pursuit of asymmetric advantages through its ballistic missile and weapons of mass destruction (WMD) programs, including uranium enrichment, present a serious threat to the United States, our allies in the region, and to the international community. The two North Korean attacks against South Korea last year provide a sober reminder that Pyongyang is willing to utilize its capabilities to undertake provocative actions. If confirmed, I would intend to monitor the security situation on the Korean Peninsula closely; work for the continued transformation of our alliances and partnerships in the region; and maintain the military capabilities necessary to protect our interests, defend our allies, and deter North Korea from acts of aggression and intimidation.

Question. What is your assessment of the threat posed to the United States and its allies by North Korea's ballistic missile and WMD capabilities and the export of those capabilities?

Answer. North Korea's missile and WMD programs pose a direct and serious threat to our regional allies and partners and have the potential to become a direct threat to U.S. territory. The United States must continue to monitor carefully North Korea's WMD and missile development programs and related proliferation activities. If confirmed, I would ensure that DOD continues to work closely with other parts of the U.S. Government to address these and other emerging threats, reduce our vulnerabilities and those of our allies and partners, and work cooperatively with our allies to ensure our contingency planning remains adaptive and responsive.

Question. In your view are there additional steps that DOD could take to ensure that North Korea does not proliferate missile and weapons technology to Syria, Iran, and others?

Answer. I understand that DOD, with its interagency partners, has taken several steps to prevent North Korea's proliferation of weapons-related technology, including working to advance international nonproliferation norms and cooperating with partner nations to inspect and interdict vessels and aircraft suspected of carrying illicit cargo. If confirmed, I would continue to work to strengthen international consensus against proliferation, invest in capacity-building programs with partner nations, and increase WMD-related information sharing with international partners.

LAW OF THE SEA CONVENTION

Question. The United Nations Convention on the Law of the Sea is pending consideration in the U.S. Senate.

What is your view on whether or not the United States should join the Law of the Sea convention?

Answer. I support U.S. accession to the Law of the Sea Convention.

Question. How would being a party to the Law of the Sea convention help or hinder the United States' security posture in the Asia-Pacific region?

Answer. Being a party to the Law of the Sea Convention would not hinder the U.S. security posture in the Asia-Pacific region. In fact, it would enhance our leadership and ability to influence future developments in the law of the sea, strengthen our position in bilateral discussions with the People's Republic of China, and improve our position in a large number of Asia-focused multilateral venues. As former Deputy Secretary of Defense Gordon England testified before the Senate Foreign Relations Committee in September 2007, "The legal framework that the Convention establishes is essential to the mission of DOD, and the Department of Homeland Security concurs that it is also essential for their mission. For that reason, Secretary Gates, the Joint Chiefs of Staff, the Military Department Secretaries, all of the combatant commanders, and the Commandant of the Coast Guard join me in asking the Senate to give its swift approval for U.S. Accession to the Law of the Sea Convention and ratification of the 1994 Agreement."

DEPARTMENT OF DEFENSE COUNTERNARCOTICS

Question. On an annual basis, DOD's counternarcotics (CN) program expends approximately \$1.5 billion to support the Department's CN operations, building the capacity of certain foreign governments around the globe, and analyzing intelligence on CN-related matters. In a recent Government Accountability Office (GAO) report, GAO found that DOD "does not have an effective performance measurement system to track the progress of its counternarcotics activities." This is the second such finding relating to DOD CN in the last decade.

What is your assessment of the DOD CN program?

Answer. I understand that the Department's counternarcotics activities are intended to perform important roles, including detection and monitoring of drug trafficking bound for the United States, counternarcotics support to law enforcement agencies, drug demand reduction for the armed services, and critical support for combatant commanders' efforts to confront drug trafficking and other forms of transnational organized crime that support terrorists, insurgents, and other criminal groups. If confirmed, I would assess the Department's progress against these goals.

Question. In your view, should DOD continue to play a role in attempting to stem the flow of illegal narcotics?

Answer. Yes. In support of the National Drug Control Strategy, DOD plays an important, statutory role as the lead agency for the detection and monitoring of drug trafficking bound for the United States. Additionally, as outlined in the President's Strategy to Combat Transnational Organized Crime released in July 2011, drug trafficking and other forms of organized crime pose a national security threat to the United States. The enemies we face on the battlefield today are increasingly financed through non-traditional means, including through drug trafficking and other forms of organized crime. Just as the Department has long been focused on how traditional, state-funded adversaries are supported, we must use all of the tools at our disposal to attack the sources of revenue that support the asymmetrical threat we face today and are likely to face for the foreseeable future. Transnational organized crime contributes to global instability by undermining legitimate government institutions, fostering corruption, and distorting legitimate economic activity. The Department's efforts to build the counternarcotics capabilities of partner nation security forces serve to prevent and deter broader conflicts that could require a much more costly military intervention in the future.

Question. In your view, should DOD continue to fund the National Guard Counterdrug Program for Youth Intervention and local law enforcement education programs that may be duplicative of the efforts of other agencies, using CN funds?

Answer. I am aware of the purposes of this program, and, if confirmed, will assess its level of funding.

ENGAGEMENT POLICY

Question. One of the central pillars of our recent national security strategy has been military engagement as a means of building relationships around the world.

Military-to-military contacts, Joint Combined Exchange Training exercises, combatant commander (COCOM) exercises, humanitarian demining operations, and other engagement activities have been used to achieve this goal.

Do you believe that these activities contribute positively to U.S. national security?

Answer. Yes, DOD's engagement activities encourage and enable partner nations to provide political support, to give us access to territory and resources, to secure and govern their territory more effectively, and to contribute to regional and global security. Partner support reduces our risk around the world and enables U.S. deterrence and, when necessary, military actions. Further, enabling our foreign partners to provide for their own security and contribute to multilateral security efforts is an investment that pays immediate and long-term dividends by reducing the need for costlier U.S. interventions in response to turmoil in regions critical to U.S. interests. I believe that taken on the whole, these engagement activities are a cost-effective way to strengthen our national security posture by building lasting relationships and alliances with partner nations.

Question. If confirmed, would you support continued engagement activities of the U.S. military?

Answer. Yes, I believe that maintaining cooperative security relationships with foreign militaries will be imperative for DOD in the foreseeable future.

Question. What improvements, if any, would you suggest to the COCOM or inter-agency process for undertaking these activities?

Answer. As with stability operations and security sector assistance, DOD's investment in international engagement is most effective when coordinated with U.S. Government civilian counterparts with adequate capacity. If confirmed, I would ensure the Department works closely with other agencies to ensure that the U.S. military plans and trains with our interagency civilian counterparts, that we are jointly prepared to engage with partner nations to prevent conflicts and, if prevention fails, to respond effectively in all phases of conflict.

BUILDING PARTNER CAPACITY

Question. In the past few years, Congress has provided DOD a number of temporary authorities to provide security assistance to partner nations, including the global train and equip authority ("Section 1206").

In your view, what should be our strategic objectives in building the capacities of partner nations?

Answer. Our primary objective in building the capacity of foreign partners should continue to be to help them develop effective and legitimate security institutions that can provide for their countries' internal security, and contribute to regional and multilateral responses to threats and instability. This, in turn, mitigates the burden on U.S. forces responding to security threats outside the United States and promotes interoperability between our forces.

SPECIAL OPERATIONS FORCES

Question. The previous two Quadrennial Defense Reviews have mandated significant growth in our Special Operations Forces and enablers that directly support their operations.

Do you believe that we should further increase the number of special operations personnel? If so, why, and by how much?

Answer. U.S. Special Operations Command's (SOCOM) current throughput is programmed to meet the growth mandated by the last two QDRs. This planned special operations personnel growth, at the rate of 3 to 5 percent per year, includes Navy SEAL, Army Special Forces and Special Operations Aviation, and combat and combat support personnel. Until that programmed growth is complete, I do not believe it is prudent to consider additional growth to the Special Operations Forces (SOF) community.

Question. In your view, how can the size of SOF be increased, while also maintaining the rigorous recruiting and training standards for special operators?

Answer. SOF cannot be mass produced. As Admiral McRaven has pointed out, Special Operations growth should stay between 3 to 5 percent per year in order to ensure quality of the manpower being produced. This is the pace SOCOM has sustained over the past several years and is on track to sustain over the next several years. However, as the security landscape has changed, the demands for indirect kinds of missions have begun to exceed the ability of the Special Operations community alone to meet. As a partial remedy to this situation, the 2010 QDR recommended expanding general purpose forces' capacities and capabilities to execute some missions that used to fall exclusively to SOF. I support this recommendation.

Question. In recent years, SOF have taken on an expanded role in a number of areas important to countering violent extremist organizations, including those related to information and military intelligence operations. Some have advocated significant changes to SOCOM title 10 missions to make them better reflect the activities Special Operations Forces are carrying out around the world.

What current missions, if any, do you believe can and should be divested by SOCOM, and why?

Answer. The Department uses a range of processes, such as the Unified Command Plan, to review the mission sets and responsibilities it assigns to SOCOM on an ongoing basis. Additionally, the language in section 167 of title 10, U.S.C., includes "such other activities as may be specified by the President or the Secretary of Defense," which provides the President and the Secretary of Defense the flexibility needed to meet changing circumstances. At this time, I would not advocate significant changes to SOCOM's title 10 missions, though, if confirmed, I would review these responsibilities.

Question. Are there any additional missions that you believe SOCOM should assume, and, if so, what are they and why do you advocate adding them?

Answer. At this time, I would not advocate significant changes to SOCOM's title 10 missions.

Question. What can be done to ensure that indirect special operations missions with medium- and long-term impact, such as unconventional warfare and foreign internal defense, receive as much emphasis as direct action, and that they receive appropriate funding?

Answer. The activities of Special Operations Forces are significantly varied, from strikes and counterterrorist raids to working by, with, and through local partners, whether that be in the form of training and advising foreign counterparts or providing support to civilian authorities abroad. I believe that each of these missions is an essential component of the Department's national security responsibilities and highly valued within the Special Operations community. If confirmed, I would seek to ensure that investments are made in an appropriately balanced way.

RUSSIA

Question. What are the areas of engagement with Russia that are most beneficial from a DOD perspective? How would you recommend carrying out such engagement?

Answer. I understand that the Department has a robust engagement plan with the Russian Armed Forces through two working groups under the Bilateral Presidential Commission: (1) the Defense Relations Working Group (co-chaired by the Secretary of Defense and the Russian Minister of Defense) and (2) the Military Cooperation Working Group (co-chaired by the Chairman of the Joint Chiefs of Staff and the Russian Chief of the General Staff). The Defense Relations Working Group focuses on high-level policy issues, such as missile defense cooperation, defense technology cooperation, security issues, and defense reform. The Military Cooperation Working Group focuses on military-to-military cooperation, including counter-terrorism, Afghanistan-Pakistan, crisis response and counter-piracy. Services Chiefs and combatant commanders (particularly U.S. European, Pacific, and Northern Commands) also take part in military-to-military engagement activities contained in a mutually agreed upon annual work plan. Combined, these efforts strive to increase transparency and maintain direct and frank lines of communication, and I support their continuation and strengthening.

Question. As Russia and the United States implement the New START treaty, do you believe that it will be possible to begin a discussion on tactical nuclear weapons, and are there any conditions that you believe should be precedent to such discussions?

Answer. As stated in the Nuclear Posture Review, the United States intends to pursue further reductions in strategic and nonstrategic nuclear weapons with Russia, including both deployed and non-deployed nuclear weapons. Because of the verification challenges associated with limiting non-strategic and non-deployed weapons, I believe that a discussion of potential cooperation measures would be useful as an early component of discussions on reductions and strengthened security measures.

DOD'S COOPERATIVE THREAT REDUCTION PROGRAM

Question. The Cooperative Threat Reduction (CTR) program was historically focused primarily on eliminating Cold War era weapons of mass destruction (WMD) in the states of the former Soviet Union. The emphasis of the program is beginning

to shift away from Russia and to new threats, such as biological weapons surveillance mechanisms in Africa and elsewhere.

In your view, what still needs to be done to reduce the proliferation threat from the residual Cold War stockpiles of WMD weapons and materials in the former Soviet Union?

Answer. I have been involved in the Nunn-Lugar program from its inception and continue to participate in its management as USD(AT&L). I believe the countries of the former Soviet Union have made significant progress to reduce the threats associated with the extensive Soviet WMD programs, facilities, and stockpiles in their territories. In many cases this was accomplished with the support and assistance of DOD's Nunn-Lugar CTR program. The threat posed by WMD terrorism underscores the need for continued attention to residual Cold War stockpiles of WMD and materials. Where and when host governments are unable to mitigate this threat on their own, CTR and other U.S. programs should work with these nations to reduce these threats through the dismantlement of WMD and associated infrastructure and the consolidation and securing of WMD and related technology.

Question. Are Russia and the former Soviet Union countries now making a significant contribution to efforts to reduce the proliferation threats they inherited?

Answer. It is my understanding that, through direct national funding as well as collaboration with U.S. agencies and other international partners, Russia and other states of the former Soviet Union (FSU) are making significant contributions to reduce proliferation threats they inherited and to address new ones.

The Nunn-Lugar CTR program continues to be DOD's principal vehicle to support these activities. FSU countries are partnering with CTR and other U.S. programs to reduce a variety of Soviet-era WMD threats within their borders and the region. As a specific example, we continue a strong partnership with the Government of Kazakhstan to destroy, secure, and consolidate dangerous pathogens and improve Central Asia's capacity to prevent and respond to a bioterrorism attack.

Question. What do you see as the key remaining objectives of the CTR program in Russia?

Answer. I view the key remaining objectives of CTR in Russia to be the prevention of proliferation and WMD terrorism through dismantlement of WMD and associated infrastructure; consolidation and security of WMD and related technology; transition of sustainment responsibilities for U.S.-provided security upgrades to the Russian Ministry of Defense; increased transparency; and support to bilateral defense and military cooperation, with the goal of reducing WMD threats.

Question. Do you think the CTR program is well coordinated among the U.S. Government agencies that engage in threat reduction efforts, including DOD, the Department of Energy, and the State Department?

Answer. From my current position, I appreciate that DOD's CTR mission is executed with strong White House leadership, essential support from the Department of State, and in close cooperation with the Department of Energy and other inter-agency partners. Robust collaboration across U.S. agencies and interagency coordination is a hallmark of the program and key to its effectiveness. If confirmed, I would continue efforts to maximize coordination and cooperation with our inter-agency and international partners.

Question. As the CTR program expands to geographic regions beyond the states of the former Soviet Union, in your view what proliferation and threat reduction goals should DOD establish?

Answer. In my current position with responsibility for the Defense Threat Reduction Agency, I have made it a priority to expand the geographic reach of the CTR program beyond the former Soviet Union. WMD threats are global, and DOD has substantial experience in building partner capacity to address WMD threats worldwide. The President has highlighted the threats posed by nuclear and biological terrorism as key proliferation concerns requiring international attention. In line with these priorities, DOD's goals for the program are: (1) reducing and eliminating nuclear weapons threats; (2) improving the security and accounting of nuclear weapons and weapons-usable fissile material; (3) detecting, eliminating, and preventing the proliferation of chemical weapons and biological materials; and (4) encouraging development of capabilities to reduce proliferation threats among key partners and regions.

PROMPT GLOBAL STRIKE

Question. The 2010 Quadrennial Defense Review concluded that the United States will continue to experiment with prompt global strike prototypes. There has been no decision to field a prompt global strike capability as the effort is early in the

technology and testing phase. One test failed and the second test will occur in August.

In your view, is there a role for a conventional prompt global strike capability in addressing the key threats to U.S. national security in the near future?

Answer. The Department continues to investigate options for this unique capability. It is envisioned that a conventional prompt global strike (CPGS) capability could be useful in certain scenarios involving regional adversaries considering an attack using weapons of mass destruction or against high priority non-state adversaries. It may also serve a unique role in situations where a fleeting, serious threat was located in a region not readily accessible by other means.

Question. What approach to implementation of this capability would you expect to pursue if confirmed?

Answer. DOD is developing and testing technologies relevant to both land-based and sea-based CPGS concepts. It would be premature to make any decisions regarding a future acquisition strategy or development concept for this technology until this concept assessment has been completed.

Question. In your view what, if any, improvements in intelligence capabilities would be needed to support a prompt global strike capability?

Answer. As with other weapon systems, effective employment of CPGS weapons would depend on the availability of timely and accurate intelligence on the nature, location, and disposition of a potential target. Given the precision and promptness inherent in the CPGS concept, the intelligence requirements for this system would be especially demanding.

NUCLEAR WEAPONS AND STOCKPILE STEWARDSHIP

Question. Congress established the Stockpile Stewardship Program with the aim of creating the computational capabilities and experimental tools needed to allow for the continued certification of the nuclear weapons stockpile as safe, secure, and reliable without the need for nuclear weapons testing. The Secretaries of Defense and Energy are statutorily required to certify annually to Congress the continued safety, security, and reliability of the nuclear weapons stockpile.

As the stockpile continues to age, and as the Chairman of the Nuclear Weapons Council, what do you view as the greatest challenges with respect to assuring the safety, reliability, and security of the stockpile?

Answer. The most recent certification of the stockpile, completed in April 2011, indicates the stockpile is safe, secure, and reliable. The greatest challenge, as reflected in the comments of the national security laboratory directors, concerns the long-term sustainment and viability of the stockpile and the supporting infrastructure. As the weapons complex and nuclear stockpile continue to age, efforts to sustain them are becoming more costly and technically difficult. Since the 2010 Nuclear Posture Review, substantial financial and political commitments have been made to address age-related issues in the nuclear weapons complex. If confirmed, I will continue to work with Congress and the Department of Energy on this effort to maintain the skills, capabilities, and infrastructure needed to ensure the safety, reliability, and security of our nuclear stockpile in a constrained budget environment.

Question. If the technical conclusions and data from the Stockpile Stewardship Program could no longer confidently support the annual certification of the stockpile as safe, secure, and reliable, would you recommend the resumption of underground nuclear testing?

Answer. If the Department of Energy/National Nuclear Security Administration (DOE/NNSA) Stockpile Stewardship Program remains adequately funded to maintain critical technical and manufacturing capabilities, I believe it is likely to continue to be effective. My recommendation on what steps to take in the event that the stockpile could not be certified as safe, secure, and reliable would depend upon the causes of the problems in the stockpile, and what technical steps would be needed to address them.

Question. As the current Chairman of the Nuclear Weapons Council, what are the most significant issues facing the Council?

Answer. The continued safety, security, and reliability of our nuclear stockpile is the most significant challenge facing the Council, and it is important to meet this challenge in a cost-effective manner. It is essential that the United States continue to invest in critical technical and manufacturing capabilities and infrastructure. If confirmed, I will make this a priority and continue the strong partnership between the Departments of Defense and Energy that is essential to maintaining the U.S. nuclear deterrent.

Question. Do you agree that the full funding of the President's plan for modernizing the nuclear weapons complex, commonly referred to as the 1251 report, is a critical national security priority?

Answer. If confirmed, I would continue to work to ensure a safe, secure, and effective nuclear deterrent and to advocate for the required funding. Maintaining a safe, secure, and reliable nuclear stockpile is a critical national security priority, and the section 1251 report represents the administration's current best estimate of required funding. At the same time, like DOD delivery system sustainment and modernization efforts, NNSA nuclear weapons complex modernization must be undertaken in a cost-effective manner. DOD has already taken steps to reduce the estimated cost of the *Ohio*-class replacement ballistic missile submarine and new Long-Range Strike Family of Systems.

Question. Can DOD afford the plan set out in the report?

Answer. Given the potentially significant future budget reductions we are facing, DOD is examining all programs for affordability and national security requirements, including our plans for modernization of the nuclear enterprise. If confirmed, I will continue to work with Congress to ensure that our most critical national security investments, including those in the nuclear enterprise, are balanced with the realities of the current fiscal environment.

Prior to completing this modernization effort, do you believe it would be prudent to consider reductions below New START treaty limits for the deployed stockpile of nuclear weapons?

I support the Obama administration's agenda for reducing global nuclear dangers and pursuing the goal of a world without nuclear weapons, as outlined in the 2010 Nuclear Posture Review. I also support the NPR's conclusion: "The United States will retain the smallest possible nuclear stockpile consistent with our need to deter adversaries, reassure our allies, and hedge against technical or geopolitical surprise." Reductions below the New START treaty limits must only be considered in the context of the geopolitical environment and the status of our nuclear stockpile and the enterprise modernization effort.

TACTICAL FIGHTER PROGRAMS

Question. Perhaps the largest modernization effort that we will face over the next several years is the set of programs to modernize our tactical aviation forces with fifth generation tactical aircraft equipped with stealth technology, to include the JSF.

Based on current and projected threats, what are your views on the requirements for and timing of these programs?

Answer. Based on current and projected threats, I believe it is critical that we transition to a 5th generation capability across the Services while maintaining sufficient legacy inventory capacity to prevail in current and near-term conflicts. Over the next 10 years, the Department's 5th generation capability will grow from a relatively small percentage to approximately one third of the TACAIR force structure. In the 20 years that follow, JSF will become the mainstay of the force. We need JSF to deal with advanced fighters and surface-to-air missiles worldwide, especially in the stressing electronic warfare environments of the future. Additionally, the F-22A modernization program will provide improved capability to ensure the United States is unmatched in both fighter and ground attack capability as JSF begins operational employment. To ensure we have sufficient capacity of fighter attack aircraft during the transition period, the Department has continued the production of the F/A-18E/F, extended the service life of the Department of Navy's older F/A-18s, and invested in affordable F-15, F-16, and A-10 sustainment and modernization efforts.

Question. What is your view on the affordability of these programs?

Answer. I believe affordability is critical to these programs, as well as all of our acquisition programs and services. As Under Secretary, I have instituted a number of strategic initiatives designed to target affordability and control cost growth. Examples include establishing an affordability target at Milestone (MS) A for both production and sustainment costs and the requirement to report on systems engineering trades showing how key design features affect the target cost at MS B. Additionally, I believe the establishment of "Should Cost" targets will provide us with a continuous focus on reducing program cost during planning and execution, especially in preparation for contract negotiations. In looking at the affordability of the current TACAIR modernization programs, I believe we can do better at controlling costs, but I also believe that these programs are affordable if managed properly. The JSF program has a track record of cost growth that must be reversed. Last year I directed a bottom up technical review of the development and test program to provide us the

best assessment of the time and costs required to complete the development phase. We are aggressively managing the early production contracts to ensure the Government achieves best value in procurement. Finally, the estimate for life-cycle program costs is very concerning to me and the Department is taking a very detailed look at all aspects of JSF operations, support, and sustainment to identify best value solutions to control the lifetime operating and support costs for the JSF fleet.

Question. Even if all of the current aircraft modernization programs execute as planned, the average age of the tactical, strategic, and tanker fleet will increase. Aging aircraft require ever-increasing maintenance, but even with these increasing maintenance costs, readiness levels continue to decline.

Can both the maintenance of the legacy force and the modernization efforts be affordable at anywhere near the expected budget levels?

Answer. Based on expected budget levels, I believe there will have to be some tradeoffs. Balancing the costs of maintaining an aging aircraft fleet with recapitalizing and modernizing that fleet is one of the most difficult problems the Department will deal with over the next few years. The austere fiscal environment we currently face, and the projected future budget levels we anticipate, make the problem challenging. As part of addressing increasing maintenance costs and declining readiness levels, we must improve how we currently do business. I believe we can do that by working with our industry partners to achieve more efficient and cost-effective supply chain and logistics management. We are also taking Service best value processes and mandating establishment across DOD, such as the Navy's predecessor plan to the Department's Superior Supplier Incentive Program (SSIP) and the Air Force's initiatives to improve the management of services contracts. I believe that an affordable JSF is absolutely vital if the Department is going to be able to meet the capability and force structure requirements that the combatant commanders, Services, and warfighters need.

Question. Some critics believe that there is still too much service parochial duplication in procuring new systems.

Do you agree with these critics?

Answer. In part, I do. I would offer that the Department is improving in this area but can certainly do better. Procuring systems that duplicate or overlap Service requirements is inefficient and does not provide the best value for defense spending.

Question. What steps have you taken as Under Secretary to reduce such duplication?

Answer. I have taken a number of steps to reduce duplication. Conducting comprehensive cross-Service warfighting portfolio reviews is part of the Better Buying Power initiative. Additionally, I meet regularly with the Service Acquisition Executives (SAE), both individually and collectively. These meetings help ensure that the SAEs are kept up to date on policy, guidance decisions, and direction, and they allow me to gain insight into service-specific acquisition issues and direction. Open and direct communication with the SAEs has helped in identifying common capability requirements prior to Materiel Development Decision milestones. As a participant in the Department's budget process, I have worked with the Deputy Secretary, the Services, and others to eliminate duplication.

Question. What additional steps, if any, do you believe the Department should take in the future?

Answer. Last year, Secretary Gates directed the Department to pursue a wide-ranging efficiencies initiative. This effort extends well beyond removing inefficiencies associated with duplication. Working with the senior leadership across the Department's acquisition community, I drafted guidance focused on obtaining greater efficiency and productivity in defense spending. The guidance covered five focus areas: (1) Target affordability and control cost growth; (2) Incentivize productivity and innovation in industry; (3) Promote real competition; (4) Improve tradecraft in services acquisition; and (5) Reduce non-productive processes and bureaucracy. In November of last year, I issued direction designed to achieve specific action in those initiative areas. Since that time I have worked continuously to follow through on the implementation of these initiatives, to adjust them as necessary, and to identify other opportunities. I believe this is a start; however, there are many additional steps that the Department must take in the future to improve the way we do business and deliver better value to the taxpayer and warfighter. Improving how the Department does business is a continuous process. If confirmed, I would intend to focus on these areas and look for ways to expand sound business practices more broadly across the Department.

UNMANNED SYSTEMS

Question. Congress has established a goal that by 2015, one-third of the aircraft in the operational deep strike force aircraft fleet and one-third of operational ground combat vehicles will be unmanned.

Do you support this goal?

Answer. I support the goal of fielding unmanned systems with greater capability; however, resources should be focused on warfighter capability needs and systems that are within technological reach. The Department's January 2001 congressional report stated that the 2015 goal would be largely driven by the pace of the technology and that the timelines at the time did not fully support the goal. The Military Departments' acquisition strategies did, however, reflect an aggressive pace for the fielding of these systems, should the technologies prove viable.

Today, unmanned systems are providing tactical and soldier focused capabilities critical to winning the current overseas contingency operations in Afghanistan and Iraq. The capabilities needed for these conflicts (intelligence, surveillance, and reconnaissance; armed reconnaissance; Improvised Explosive Device (IED) detection/disposal), however, are not the same as the unmanned capabilities envisioned at the time the goal was established. The Department should continue to pursue the needed technology and consider unmanned systems on a case-by-case basis implementing them when it makes sense from a capability, technological, and affordability perspective.

Question. What is your assessment of DOD's ability to achieve this goal?

Answer. Because of technological challenges, an Unmanned Aircraft System (UAS) providing an "operational deep strike" capability will not be fielded by 2015. However, the Air Force and Army are both operating armed UASs (MQ-9 Reaper, MQ-1B Predator, and MQ-1C Gray Eagle) in current overseas contingency operations. These aircraft are providing critical intelligence, surveillance, reconnaissance, and strike capabilities to combatant commanders. At this time, because of current operations, the Services are focused on higher priority missions than deep strike. The Navy has entered the materiel development phase of an unmanned carrier launched surveillance and strike capability, but with the goal of fielding a UAS with limited strike capability by 2018.

For unmanned ground combat vehicles the Department is more than 4 years away from a fielded capability that approaches the mobility, perception, and intelligence comparable to a trained squad of soldiers aboard a Stryker or Bradley combat vehicle or an Abrams tank crew. More limited capabilities are feasible, but may not be affordable within projected budgets. The Department is actively working on unmanned requirements to detect, mark, and report IEDs.

Question. What steps do you believe the Department should take to achieve this goal?

Answer. The Department should continue robust, focused research and development efforts related to UAS and ground robotics technology. This is vital to realizing increased unmanned capabilities that are properly aligned with evolving warfighter needs, at affordable cost.

SHIPBUILDING BUDGET

Question. With about half of the Navy's construction and development dollars being needed to build nuclear submarines, the Navy's commitment to building new submarines could crowd out funding needed to modernize the surface fleet. With regard to the ballistic missile submarine replacement program—a 12 submarine \$60 billion acquisition program—Admiral Roughead, has stated that, "[SSBN-X] is a strategic national asset and should not necessarily be funded in the shipbuilding account."

In your view, will the level of funding in the shipbuilding budget and certain high-cost programs force the Department to make requirement decisions in a constrained budget environment that may not be in the best interest for our national security?

What steps, if any, do you believe the Department should take to address this concern and ensure adequate funding for the ballistic missile submarine replacement program?

Do you believe that certain high cost "national assets" should be funded outside the Services' budgets where they do not have to compete with other critical weapon systems modernization needs of the Services?

Answer. DOD remains committed to sustaining the force structure required to maintain our Nation's security, and recapitalization of the Nation's sea-based strategic deterrent is critical to this mission. While the *Ohio* Replacement program presents certain resource challenges for the Department, we are aggressively acting now, during the design phase, to drive down costs while meeting the core military

requirements for a survivable nuclear deterrent. These efforts, coupled with many other significant cost-saving initiatives throughout the Department, are critical to meeting our broad national security needs within the Department's budget. The Department considers all funding priorities together and must frequently make judgments that cross budget account lines.

INFORMATION ASSURANCE

Question. Protection of military networks, information, and communications is critical to DOD operations. The Department has not yet provided Congress with a comprehensive legislative proposal that would enable the Department to implement the President's guidance on dealing with current and future cyber threats.

What is your assessment of the cyber security posture of the Department's critical information systems?

Answer. DOD is developing a solid foundation for securing critical information systems. Due to the advanced persistent threat, DOD's critical information systems, like other critical financial, energy, and transportation information systems, are at risk of having their vulnerabilities exploited by a sophisticated adversary. To address this threat and mitigate these vulnerabilities DOD has implemented and continues to improve a capability for protecting and defending its networks. Among other actions, the recent establishment of U.S. Cyber Command has brought increased operational focus to these tasks.

Prospectively, an enormous amount of work will be required to keep pace with technology and capabilities, and to stay ahead of system vulnerabilities that put our information and communications technology systems at risk. If confirmed, I will continue the efforts to secure DOD's information and communications technology, address cyber challenges, and ensure DOD can defend against network adversaries.

Question. What Department-wide policies or guidance do you believe are necessary to address information and cyber security challenges for current and future systems?

Answer. The administration is currently working with Congress to develop new cyber legislation, and the Department is an active participant in these ongoing discussions. Additionally, the Department is currently developing policy and guidance in a number of cyber security areas. For example, the Department is developing policy for a strengthened insider threat program and is working with other Federal agencies on policy and practices that will strengthen the security of classified information sharing while still providing the information to those who need it when they need it. The Department has also recently published revised policy on the use of DOD Public Key Infrastructure for user authentication, digital signatures, and encryption, and is also currently developing cyber security policy in such areas as supply chain risk management, protection of DOD information held by the defense industrial base, and continuous monitoring of DOD information systems. The Department is also in the process of consolidating its network infrastructure in order to better enable protection of those networks. If confirmed, I will assess this issue further, and if I determine that additional legislative changes are needed, I will work with the administration to provide those recommendations to Congress.

CYBER SECURITY

Question. Deputy Secretary Lynn has been heavily involved in developing the DOD cyber strategy.

If confirmed will you also play a major role in DOD cyber issues?

Answer. If confirmed as the Deputy Secretary of Defense, I would devote significant attention to cybersecurity and more broadly to continuing to strengthen the Department's ability to operate effectively in cyberspace. If confirmed, I would work closely with the Secretary of Defense and others in DOD to build on recent progress and continue to improve the Department's and the Nation's cyber security.

TEST AND EVALUATION (T&E)

Question. What is your assessment of the appropriate balance between the desire to reduce acquisition cycle times and the need to perform adequate testing?

Answer. I believe that cycle time is best reduced by ensuring reasonable requirements are set, by being willing to trade away requirements that prove to be excessive, and by controlling requirements creep so that development time can be constrained. I support rigorous developmental and independent operational test and evaluation to provide accurate and objective information on the capabilities and limitations of defense systems to both acquisition executives and warfighters and to ensure contractors deliver products that meet requirements. When systems are urgently needed in the field, the imperative for accurate and objective testing is still

just as important but should be addressed through efforts to expedite the test and evaluation process, with some acceptance of risk. This has been accomplished successfully for such urgent efforts as the Mine Resistant Ambush Protected vehicle program. In those urgent cases some risk could be taken, but safety and basic performance had to be verified prior to fielding. Testing is needed to validate system performance and I believe it is a necessary part of the acquisition process. That said, there may be opportunities to achieve this goal through more efficient processes than those currently in practice.

Question. Under what circumstances, if any, do you believe we should procure weapon systems and equipment that has not been demonstrated through test and evaluation to be operationally effective, suitable, and survivable?

Answer. Systems should demonstrate their effectiveness, suitability and survivability through operational testing prior to a full rate production decision. In specific cases, based on the nature and seriousness of the deficiencies found in testing, it may be acceptable to continue production while the deficiencies are corrected. In a limited number of urgent circumstances it might also be necessary to field a system prior to operational testing in order to address an urgent gap in a critical capability. But even in such cases, operational evaluation should still be conducted at the earliest opportunity to assess the system's capabilities and limitations and identify any deficiencies that might need to be corrected.

Question. Congress established the position of Director of Operational Test and Evaluation to serve as an independent voice on matters relating to operational testing of weapons systems. As established, the Director has a unique and direct relationship with Congress which allows him to preserve his independence.

Do you support the Director of Operational Test and Evaluation's ability to speak freely and independently with Congress?

Answer. Yes.

FUNDING FOR SCIENCE AND TECHNOLOGY INVESTMENTS

Question. In the past, the Quadrennial Defense Review and the Department's leaders have endorsed the statutory goal of investing 3 percent of the Department's budget into science and technology programs.

Do you support that investment goal?

Answer. As a scientist and in my current position, I fully recognize the critical importance of a robust science and technology (S&T) program that can develop and deliver near-term capabilities and maintain long term options for the Department. At this point in the consideration of the Department's future budget situation, however, every part of the budget must be considered "on the table".

Question. How will you assess whether the science and technology investment portfolio is adequate to meet the current and future needs of the Department?

Answer. If confirmed, I would work with the Secretary, the Chairman of the Joint Chiefs, the Services and others to establish guidelines for investment priorities. Based on these priorities, I would work through the Under Secretary of Defense for Acquisition, Technology, and Logistics to assess the adequacy of the current program and recommend changes in the future program to address the Department's priorities.

SPACE

Question. In your current position you have been the milestone decision authority for major space acquisition programs.

Do you believe that this authority should be retained by your successor? Why or why not?

Answer. For the foreseeable future, I believe that the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)) should retain milestone decision authority (MDA) for major space acquisitions. Independent acquisition oversight is a statutory requirement for Major Defense Acquisition Programs (MDAPs) and major space programs should be overseen by the USD(AT&L) in his capacity as the Defense Acquisition Executive, consistent with all other MDAPs in other domains, including air, sea, and ground. Most of our national security space programs, including those executed by the Air Force and Navy under title 10 authorities and those executed by the National Reconnaissance Office (NRO) under title 50 authorities, entail very substantial resource commitments and substantial development and acquisition risks. As a result of the hard work of the Service Acquisition Executives, the Director of the NRO, their staffs and the staffs of OSD and Office of the Director of National Intelligence, we are recovering from more than a decade of very serious space acquisition shortcomings. While that progress continues, we still confront serious challenges in space acquisition, which will become even greater in a constrained

resource and budget environment. Therefore, I believe the USD(AT&L) should continue to be the MDA for major space acquisition programs, while working with the Service Acquisition Executives, the DNRO, and the ODNI to consider MDA delegation on a case-by-case basis at appropriate milestone decision points.

BALLISTIC MISSILE DEFENSE

Question. In September 2009, President Obama announced that he had accepted the unanimous recommendation of the Secretary of Defense and the Joint Chiefs of Staff to pursue a Phased Adaptive Approach (PAA) to missile defense in Europe. This approach is intended to defend all of Europe against existing and emerging threats from Iranian missiles, starting this year and increasing in capability with each of its four phases. Phase 4 of the European PAA is intended to provide a capability to defend against long-range missiles that could reach the United States, thus augmenting the existing homeland missile defense capability.

Do you support the Phased Adaptive Approach to Missile Defense in Europe and, if confirmed, will you implement it?

Answer. I support the European Phased Adaptive Approach (EPAA) and, if confirmed, I would continue to advance the substantial U.S. efforts already underway to implement all four phases of the EPAA, as I have done as USD(AT&L) and as chair of the Missile Defense Executive Board.

Question. In February 2010, the Defense Department issued its report on the first-ever comprehensive review of U.S. ballistic missile defense policy and strategy, the Ballistic Missile Defense Review (BMDR), as required by Congress. The BMDR established a number of policy priorities, including establishing defense against near-term regional missile threats as a top priority of missile defense plans, programs and capabilities. It also stated the policy of sustaining and enhancing the ability of the Ground-Based Midcourse Defense (GMD) system to defend the Homeland against attack by a small number of long-range missiles by countries such as North Korea and Iran, and of hedging against future uncertainties.

Do you support the policies, strategies, and priorities set forth in the Ballistic Missile Defense Review and, if confirmed, will you implement them?

Answer. Yes, I support the conclusions of the 2010 BMDR and, if confirmed, would support continuing U.S. efforts already underway to implement the BMDR, as I have done as USD(AT&L).

Question. Do you agree that our missile defense must be fiscally sustainable?

Answer. Yes, I support the U.S. commitment, described in the 2010 BMDR, to deploying capabilities that have been proven through extensive testing and assessment and that are affordable over the long term.

Question. The two most recent flight tests of the GMD system failed to intercept their targets. The Director of the Missile Defense Agency (MDA) has formed a Failure Review Board to determine the root cause of the most recent failure and will devise a plan to correct it, including two flight tests to confirm the correction. Until the second flight test confirms the correction, probably sometime in late 2012, the Director of MDA has suspended production of the Exo-atmospheric Kill Vehicles (EKVs) of the type that failed last year's flight tests, in order to ensure that those EKVs do not contain a flaw that would need to be corrected later.

Do you agree that it is prudent to verify that the flight test failure problem has been corrected before continuing production of the EKVs, and before building more Ground-Based Interceptors (GBIs) or deciding how many additional GBIs may be needed in the future?

Answer. Verifying and correcting any problems with the EKVs prior to continuing production is prudent and supports the policy priority to "fly before you buy" in order to improve reliability, confidence, and cost control.

Question. Do you believe that such verification should include a successful intercept flight test?

Answer. A non-intercept test will provide a more rigorous evaluation of the kill vehicle flight envelope than could be achieved in an operational scenario flight test. A successful non-intercept flight test will sufficiently reduce risk to restart production of the EKV, in particular for long-lead items and items common to both EKV designs. Certification of the Capability Enhancement II (CE II) EKV will remain dependent on a successful intercept.

Question. Do you support the continued modernization and sustainment of the GMD system?

Answer. Yes. The United States is currently provided protection against the threat of ICBM attack from states like North Korea and Iran. It is important that we maintain this advantageous position by continuing to improve the GMD system.

Question. The United States and NATO are seeking options to cooperate with Russia on missile defense. President Obama has announced that such cooperation would not limit U.S. or NATO missile defense capabilities.

Do you agree that such cooperation could enhance the security of the United States, NATO, and Russia against common missile threats from nations such as Iran?

Answer. Yes, cooperation with Russia could strengthen the effectiveness of U.S. and NATO missile defenses, as well as those of the Russian Federation. Effective ballistic missile defenses devalue Iran's ballistic missile arsenal by reducing its confidence that an attack would be successful.

Question. Do you agree that, irrespective of Russian objections, the United States is committed to the continued development and deployment of U.S. missile defense systems, including qualitative and quantitative improvements to such systems?

Answer. Yes.

READINESS FUNDING

Question. After almost a decade of combat operations, each of the military services faces a rising bill for maintenance and repair. The Army has stated that reset funding will be needed for at least 2 to 3 years beyond the end of overseas contingency operations. The Marine Corps leadership has acknowledged that a \$10 billion bill awaits at the end of combat operations, but has requested only \$250 million for reset this year. The Navy has identified a 1-year backlog of deferred ship and aircraft depot maintenance. The Air Force has requested funding for only 84 percent of needed aircraft repairs this year.

What level of priority do you place on reset and reconstitution funding for the Military Services?

Answer. I place a very high priority on reset and reconstitution funding for the Military Services. The current requests reflect the difficult challenge of balancing investments in deployed readiness, which is a top priority to support troops in the field, with investments in non-deployed readiness such as reset and reconstitution. It is imperative that Overseas Contingency Operations (OCO) funding for reset and reconstitution continue to be enacted for 2 to 3 years after a drawdown of forces to fully reset the forces.

Question. What steps would you take, if confirmed, to address maintenance backlogs and ensure that the Military Departments request adequate funding for reset, reconstitution, and other maintenance requirements?

Answer. I will work to ensure that the Department properly considers and balances maintenance and reset requirements with fiscal realities and future risk during Program and Budget development.

PROTECTION OF U.S. FORCES AGAINST INTERNAL THREATS

Question. On November 5, 2009, a gunman opened fire at the Soldier Readiness Center at Fort Hood, TX, killing 13 people and wounding or injuring 43 others. A DOD review of the attack released in January 2010 concluded that the Department was poorly prepared to defend against internal threats, including radicalization among military personnel.

What is your assessment of the lessons learned from the tragedy at Fort Hood?

Answer. I understand that the Fort Hood review released by DOD in August 2010 included 79 recommendations on how to improve personnel policies, force protection, emergency response and mass casualty preparedness, and support to DOD healthcare providers. DOD has completed implementation of half of these recommendations.

If confirmed, I would work to ensure that all the lessons learned and recommendations for improvement continue to be implemented and would work closely with Members of Congress to ensure that DOD is prepared to defend against internal threats, including radicalization among DOD's military and civilian personnel.

Question. If confirmed, what strategies would you advocate to prevent and mitigate such threats in the future?

Answer. The findings and recommendations of the Fort Hood Review are the foundation of the Department's current strategy. Leadership, clear guidance, and accountability are key. If confirmed, I would review this strategy and how it has been implemented, seek the advice of DOD's civilian and military leadership, and consult with Congress to ensure that the Department implements the most effective policies to prevent and mitigate such threats in the future.

RELIGIOUS GUIDELINES

Question. The Independent Review Related to the Tragedy at Fort Hood observed that “DOD policy regarding religious accommodation lacks the clarity necessary to help commanders distinguish appropriate religious practices from those that might indicate a potential for violence or self-radicalization.” Recommendation 2.7 of the Final Recommendations urged the Department to update policy to clarify guidelines for religious accommodation and Recommendation 2.8 urged the Department to task the Defense Science Board to “undertake a multi-disciplinary study to identify behavioral indicators of violence and self-radicalization . . .”

What is your view of these recommendations?

Answer. The Fort Hood Follow-on Review prepared an implementation plan in response to both of these recommendations. If confirmed, I would review that report and the progress that has been made to ensure DOD policies, programs, and procedures appropriately accommodate the free exercise of religion.

Question. Has DOD updated its policy to clarify guidelines for religious accommodation? If so, what is the revised policy?

Answer. It is my understanding that DOD is updating its policy to clarify guidelines for religious accommodation. If confirmed, I would review the proposed update to ensure accommodation of servicemembers whenever possible without compromising accomplishment of mission, unit cohesion, and personnel safety.

Question. What is your understanding of current policies and programs of DOD regarding religious practices in the military?

Answer. The military places a high value on the rights of servicemembers to observe their respective religious faiths and this is reflected in our policies and programs.

Question. In your view, do these policies appropriately accommodate the free exercise of religion and other beliefs without impinging on those who have different beliefs, including no religious belief?

Answer. I understand each religious ministry professional has committed to functioning in a pluralistic environment and to supporting, both directly and indirectly, the free exercise of religion by all members of the Military Services, their family members, and other persons authorized to be served by the military chaplaincies. If confirmed, I will review the relevant policies, seek the advice of the military leadership, and consult with Congress to ensure that the Department appropriately accommodates the free exercise of religion.

Question. In your view, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain’s ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. Current policy appears to strike the proper balance by allowing chaplains to voluntarily participate, or not participate, in settings which conflict with their faith traditions, while also ensuring chaplains performing in an interfaith setting, such as an official dinner or interfaith memorial service, are mindful of the requirement for inclusiveness. If confirmed, I would monitor these policies and practices.

Question. If confirmed, will you work to ensure that a scientific fact-based approach to understanding radicalization will drive the Department’s relevant policies on this topic?

Answer. DOD has commissioned a Defense Science Board study on violent radicalization and plans to commission two additional clinical studies to identify any potential indicators of violent behavior in military personnel. The results of these studies will inform DOD’s policies and programs on radicalization. If confirmed, I intend to ensure that DOD continues to rely on a scientific, fact-based approach to countering radicalization and protecting our force.

Question. Current policy in the Department gives discretion to military leaders to decide whether requests to waive uniform and appearance standards should be granted based on religious beliefs. The Department has submitted a legislative proposal that would clearly exempt the armed services from the requirements of the Religious Freedom Restoration Act (RFRA).

In your view, do DOD policies appropriately accommodate religious practices that require adherents to wear particular articles of faith?

Answer. An important and delicate balance must be struck between accommodating religious practices that require adherents to wear particular articles of faith and maintaining the military’s uniform grooming and appearance standards. If confirmed, I will work with the leaders of the Military Services to achieve an appropriate balance between granting religious accommodations and maintaining the military’s uniform grooming and appearance standards.

Question. Do you believe that the Armed Forces should be exempted from RFRA? If so, why?

Answer. The Armed Forces have long relied on uniformity of dress and appearance to create a common identity, provide visual reminders of shared experiences, reinforce a sense of tradition, and foster pride. These factors are understood by the military, and historically by the courts, as critical to development of cohesion and esprit de corps, and thus to mission accomplishment. In section 774 of title 10 of the U.S. Code, Congress established a standard that balances religious imperatives with the military's dress and appearance requirements.

I understand the RFRA establishes a "very high" standard for the executive branch, including the military, to use when denying any request for religious accommodation, which is why the Services have asked for an exemption.

At this time, I do not have an informed view about the specific legislative proposal but if confirmed, I would consider this issue carefully.

MUSLIMS IN THE U.S. MILITARY

Question. Are you concerned that the attack at Fort Hood could lead to harassment or even violence against Muslims in the military?

Answer. The attack at Fort Hood was a tragedy for all involved. It is possible that the attack could spur retaliation in the form of harassment and violence; it is therefore important that military leaders and supervisors take precautions to prevent such occurrences and maintain good order and discipline in the force. No form of harassment can be tolerated.

Question. If confirmed, what strategies would you advocate to address the potential for harassment or violence against Muslims in the U.S. military?

Answer. If confirmed, I would continue to advocate for open communications in the workplace, decisive action by our military leaders and supervisors, and command emphasis on the military standard for maintaining good order and discipline. If confirmed, I would also review the effectiveness of these feedback systems and take measures to improve them, as appropriate.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. The Department has in recent years developed comprehensive policies and procedures to improve the prevention of and response to incidents of sexual assault, including providing appropriate resources and care for victims of sexual assault. However, incidents of sexual misconduct involving military personnel in combat areas of operation and at home stations are still being reported.

Do you consider the current sexual assault policies and procedures, particularly those on confidential or restricted reporting, to be effective?

Answer. Sexual assault has no place in DOD. The Department's zero tolerance policy on sexual assault is the right policy. The Chairman of the Joint Chiefs of Staff, the Service Secretaries, and the Service Chiefs, are continuously and directly engaged in emphasizing the importance of responding to sexual assault. It is my understanding that according to experts, sexual assaults in both civilian and military society are underreported—meaning that the number of sexual assaults estimated by anonymous surveys vastly outnumbers reports to police. In 2005, the Department put in place new policies to prevent sexual assault and increase the number of reports received by DOD authorities. I understand these new policies have had positive results. However, there is still work to do to integrate and continue to improve our efforts across DOD and the Services. If confirmed, I will ensure that DOD continues to be committed to addressing sexual assault in this comprehensive manner.

Question. What problems, if any, are you aware of in the manner in which the restricted reporting procedure has been put into operation?

Answer. I am not aware of any specific problems in the implementation of the restricted reporting option. It is my understanding that restricted reporting allows victims who wish to remain anonymous to come forward and obtain the support they need following an assault without being identified. I believe that the most important results of this reporting procedure should be that victims are coming forward so they can receive the care and support they need. I understand that the number of victims choosing a restricted report has increased by about 7 percent each year since 2007, and in fiscal year 2010, restricted reports accounted for about a quarter of all sexual assault reports made to the Department. Experts believe these are victims who would never have come forward had there not been a confidential reporting option. If confirmed, I would review DOD's program to gain a clear picture of progress and areas for future improvement in sexual assault reporting procedures.

Question. What is your view of the steps the Services have taken to prevent and respond to sexual assaults in combat zones, including assaults against contractor personnel?

Answer. Sexual assault against anyone is unacceptable in any location. I do not have enough information to make a comprehensive assessment at this time, but it is my understanding that if any of our deployed servicemembers, civilians, or contractors is assaulted, he or she will receive appropriate and responsive support and care.

I understand DOD policy mandates a 24-7 response to sexual assault, regardless of location. In addition, I understand that DOD personnel travelling to combat zones receive pre-deployment training on prevention and response procedures in country. Furthermore, it is my understanding that the Department takes action against individuals who perpetrate sexual assault whenever it has the jurisdiction and sufficient evidence to do so. If confirmed, I would ensure that DOD continues to address sexual assault comprehensively across the Services in all locations. There must be no tolerance in DOD for sexual assault in any location, including any of our personnel or others who serve with our personnel while deployed in a combat zone.

Question. What is your view of the adequacy of the training and resources the Services have in place to investigate and respond to allegations of sexual assault?

Answer. DOD is committed to addressing sexual assault in a comprehensive, integrated and uniform manner. As stated above, all of the Services have been directed to establish guidelines for a 24-hour, 7 days-a-week sexual assault response capability for all locations, including deployed areas. I also understand that the Services recently invested \$1.8 million to improve prosecutor training and resourcing, and that the three military criminal investigative organizations have committed to adding over 100 specially trained agents, dedicated to sexual assault investigations. While I cannot make a specific assessment at this time, if I am confirmed, I would make it a priority to evaluate the adequacy and efficacy of training and resources allocated to the Services for sexual assault investigation.

Question. What is your view of the willingness and ability of the Services to hold assailants accountable for their acts?

Answer. DOD's policies emphasize the commander's role in effective response to sexual assault. DOD has taken action to provide training for commanders and to ensure adequate training and resources for prosecutors and investigators. I have been told that DOD policy requires commanders to forward all unrestricted reports to criminal investigators. I also understand that DOD's policies seek to build the victim's confidence, so that the victim feels able to come forward with an unrestricted report and to assist in the investigation, which is essential to achieving the goal of accountability. If confirmed, I will ensure that accountability, supported by a foundation of victim care, remains an important focus of DOD's sexual assault prevention and response efforts.

Question. If confirmed, what actions will you take to ensure senior level direction and oversight of efforts to prevent and respond to sexual assaults?

Answer. I believe that sexual assault has no place in the Armed Forces. Recently, the Department has assigned a General Officer with operational experience as the Director of the Sexual Assault Prevention and Response Program office. If confirmed, I would ensure that sexual assault prevention and response continues to be a priority for the Department, and would work closely with the Secretaries of the Military Departments and the Chiefs of the Military Services to ensure that DOD maintains senior leadership focus on this issue.

MOBILIZATION AND DEMOBILIZATION OF NATIONAL GUARD AND RESERVES

Question. In support of the current ongoing conflicts, the National Guard and Reserves have experienced their largest and most sustained employment since World War II. Numerous problems have arisen over time in the planning and procedures for mobilization and demobilization, e.g., inadequate health screening and medical response to service-connected injuries or illnesses, antiquated pay systems, limited transition assistance programs upon demobilization, and inefficient policies regarding members of the Individual Ready Reserve. Reserve Force management policies and systems have been characterized in the past as "inefficient and rigid" and readiness levels have been adversely affected by equipment shortages, cross-leveling, and reset policies.

What is your assessment of advances made in improving Reserve component mobilization and demobilization procedures, and in what areas do problems remain?

Answer. I understand that many changes have been made to policies governing the utilization of the Reserve components, including: (1) providing for a minimum notification period of 180 days prior to mobilization; (2) establishing a dwell ratio

goal of no more than 1 year mobilized for every 5 years not mobilized; and (3) limiting the involuntary activation of Guard members and reservists to 1 year.

These changes have improved effectiveness and morale by providing a predictable cycle of Active Duty and alert notification well in advance of activation, benefitting families, employers, servicemembers.

A key problem is the lack of an integrated pay and personnel system to support Guard and Reserve personnel as they transition between various duty statuses. This is compounded by the fact that there remains over 30 different duty statuses for Guard and Reserve personnel. This diversity of duty statuses is cumbersome and results in mobilization and demobilization delays.

Question. What do you consider to be the most significant enduring changes to the enabling of an operational Reserve aimed at ensuring Reserve component readiness for future mobilization requirements?

Answer. I believe the most significant change to the Operational Reserve is its acceptance and inclusion as a full partner in the Total Force. The use of the Guard and Reserve over the past 10 years has proven their exceptional value to the Nation. Their equipping, modernization, and readiness are essentially managed in the same manner as the Active component. They are ready, capable, and expect to be used on a predictable and regular basis.

Going forward, the Department must maintain Reserve component readiness, set expectations with members, families and employers, and seek ways to use the Guard and Reserve to the best advantage of the Nation. Budgeting for the Operational Reserve is critical. There must be a funding stream in the baseline budget that is carried through the future years to ensure the Reserve components remain trained, ready, and available to meet ongoing and emerging operational requirements. I believe the future environment will demand we use all components of the Total Force—Active, Guard, Reserve, DOD civilians, and contractors in the most efficient and effective manner possible.

Question. Do you see a need to modify current statutory authorities for the mobilization of members of the National Guard and Reserves or to further enhance their ability to perform various national security missions?

Answer. I believe the Department needs to be able to access the Reserve components on a predictable and regular basis. Current mobilization authorities have served us well but do not account for the continued use of the Guard and Reserve as full partners in the Total Force. I support current proposals before Congress to expand section 12304 of title 10 to increase authorities to fully use the Reserve components as a rotational, operational force to augment the Active component forces. These proposals will enhance their ability to execute planned missions in support of the President's national security strategy.

MEDICAL AND DENTAL READINESS OF THE RESERVES

Question. Medical and dental readiness of Reserve component personnel has been an issue of significant concern to the committee, and shortfalls that have been identified have indicated a need for improved policy oversight and accountability.

If confirmed, how would you seek to clarify and coordinate reporting on the medical and dental readiness of the Reserves?

Answer. In order to fully assess the capability of the Reserve components, it is critical to measure and report medical and dental readiness in a standardized manner. It is my understanding that over the past several years, small, but steady improvements have been made across the Services, but there is more work to do in confirming the medical and dental readiness of the entire Reserve Force.

Medical and dental readiness is tracked through standardized calculations each quarter. Currently, the medical readiness achievement goal is 75 percent and DOD is at 63 percent. The dental readiness achievement goal is 85 percent, and DOD has met that goal.

While some progress has been achieved, the medical and dental readiness of the Reserve components must remain a priority.

Question. How would you improve upon the Department's ability to maintain a healthy and fit Reserve component?

Answer. It is my understanding that DOD continues to pursue new and improved opportunities to provide flexible options for the Guard and Reserve to improve their overall readiness. Producing and maintaining a healthy and fit Reserve component requires more than access to health care—it also requires command emphasis and individual accountability.

Recently, the Army Reserve approved and funded two medical/dental readiness days per soldier starting in fiscal year 2010.

Resiliency is a key aspect of Yellow Ribbon Reintegration events. At pre-, during-, and post-deployment events, Guard and Reserve members and families are given tools to help build resiliency and coping skills. These tools encourage open dialogue with families and encourage members to maintain mental and physical fitness during deployment cycles.

If confirmed, I would advance health and safety promotion and injury/illness prevention policy initiatives to address readiness requirements developed from evidence-based research.

DWELL TIME

Question. While dwell time is improving as our forces draw down in Iraq, many active duty military members are still not experiencing the dwell time goal of 2 years at home for every year deployed.

In your view, when will the Active component dwell time goal be met?

Answer. The Active component of the Navy, Air Force and Marine Corps, on average, are already meeting or exceeding the Department's dwell time goal of 1:2. I understand that the Army is now averaging better than a 1:1 dwell ratio, with some combat elements meeting the goal of 1:2. As we execute our drawdown plans for Afghanistan, these dwell times will continue to improve. Recently, the Army has shortened deployments for their Active component units to 9 months. These shorter deployments will reduce the stress on soldiers and their families. It is estimated that Army units will meet dwell time goals within the next 2 years as the drawdown progress.

Question. When will dwell time objectives be met for the Reserve components?

Answer. The goal for the Guard and Reserve is 1 year of Active Duty for every 5 years at home (1:5). The goal for the Active Forces is 1:2. My understanding is that the Reserve components being mobilized are currently running closer to the active goal. Active and Reserve component dwell and current rotation models are linked and can only improve together.

ACTIVE-DUTY END STRENGTH

Question. Secretary Gates announced this year that the Army would reduce its end strength by 22,000 through fiscal year 2013, including 7,400 in fiscal year 2012. This end strength was part of the temporary increase authorized in 2009 and was intended to enable the Army to cease relying on "stoploss" and to make up for a growing population of non-deployable soldiers. Beginning in fiscal year 2015, depending on conditions on the ground, the Army and Marine Corps plan to reduce their permanent end strength and force structure by 27,000 soldiers and at least 15,000 marines, respectively.

Do you agree with this Active Duty end strength reduction plan, especially given the fact that the population of non-deployables is growing?

Answer. I am familiar with the Army's and Marine Corps' projected personnel reductions, and if confirmed, I would review their respective plans to make these reductions. Based on what we know today, and the assumptions that have been made, I believe that the troop reductions previously announced by Secretary Gates represent a prudent balance between meeting operational mission requirements and ensuring the funds are available for recapitalization. Both are critical to future readiness.

Question. What is your view of how these planned end strength reductions will affect dwell time ratios?

Answer. The Army and Marine Corps personnel strength reductions, starting in fiscal year 2012 for the Army, are based on the assumption of a future draw-down in Afghanistan. These are significant reductions, but if the Afghanistan force draw-down stays on track, the dwell ratio goal of 1:2 for Active personnel should be achieved.

Question. What effect would inability to meet dwell time objectives have on your decision to implement the planned end strength reductions?

Answer. If confirmed, I would take into consideration our ability to meet strategic mission objectives and dwell time objectives prior to implementing the planned Army and Marine Corps strength reductions.

Question. In your view, can the Army accelerate to 2012 more of its planned reduction in its temporary over-strength without an adverse impact on national security?

Answer. The Army is developing force reduction plans that consider ongoing and projected future operational requirements. Given our current commitments around the globe and dwell time ratios, accelerating reductions may not be prudent at this time. The Department is committed to working closely with the Army to ensure they

achieve the appropriate personnel strength level and also retain the ability to meet national security objectives.

Question. What would be the effect on dwell time of accelerating the Army's force reduction plan?

Answer. The effect on dwell time would depend on the Army's deployment requirements coupled with the pace of its troop reductions. I would anticipate the Army might not be able to fully achieve the dwell ratio goal of 1:2 during the draw-down phase.

Question. What are the assumptions regarding "conditions on the ground" that will allow for the planned reductions beginning in 2015 to occur on time?

Answer. We must balance our national security requirements and continue to have a ready, flexible, and capable force. The reductions in end strength for the Army and Marine Corps beginning in 2015 should be predicated on the assumption that we have a much smaller presence in Afghanistan at the end of 2014 than we do today. I also would consider our progress towards the established security objectives and I would solicit the advice of DOD's senior military and civilian leaders prior to making any recommendations to the Secretary.

Question. The Services have requested congressional authorization of force management tools to avoid exceeding end strength limits and save money.

In your view, what tools do the Department and Services need to get down to authorized strengths in the future, and which of these require congressional authorization?

Answer. Several authorities used during previous force reductions have either expired or will be expiring soon, to include Enhanced Selective Early Retirement Boards, Reduction in Force, and Voluntary Separation Pay. The Department is seeking to renew or extend these authorities, and in some cases is requesting new legislation, in order to properly size and shape the force. The Department's policy is to make maximum use of voluntary authorities. Further, a balanced approach must be used to ensure to the greatest extent possible that those servicemembers who leave do not possess skills needed over the short term.

RECRUITING STANDARDS

Question. Recruiting highly qualified individuals for military service during wartime in a cost-constrained environment presents unique challenges. The Army has been criticized in past years for relaxing enlistment standards in tough recruiting environments with respect to factors such as age, intelligence, weight and physical fitness standards, citizenship status, tattoos, and past criminal misconduct. On the other hand, as the Deputy Chief of Staff of the Army, G-1, recently testified, less than 25 percent of all 17-24 year olds are eligible to enlist, primarily due to physical and educational requirements.

What is your assessment of the adequacy of current standards regarding qualifications for enlistment in the Armed Forces?

Answer. The current enlistment qualification standards are well-defined and have stood the test of time. They are driven by the need to provide the Services with men and women who are prepared to adapt to the rigors of military life and meet performance requirements. To that end, the Services carefully screen applicants, who come from all walks of life. The Department has two key indicators of recruit quality: (1) traditional high school diploma graduates; and (2) above average scores on the enlistment aptitude screen (the Armed Services Vocational Aptitude Battery or ASVAB). The traditional high school diploma is the best single predictor of attrition, while the ASVAB is a robust predictor of training and job performance.

Since it is more costly to recruit such "high quality" recruits, the Department has used a cost-performance tradeoff model, developed under the auspices of the National Academy of Sciences, to set recruiting and enlistment goals. The recruit quality enlistment goals are 90 percent traditional high school diploma graduates and 60 percent scoring above average on the Armed Forces Qualification Test (AFQT), the math and verbal components of the ASVAB.

When recruitment is not difficult, when the supply exceeds demand, as in the current environment, Services tend to recruit above the goals. When recruitment is more challenging, Services adjust and will recruit closer to the goals. During some particularly difficult periods, such as 2005, the Army developed special programs to reduce the attrition risk related to the enlistment of more individuals who did not possess traditional high school diplomas.

Question. In your view, is there any way to increase the pool of eligible enlistees without sacrificing quality?

Answer. Yes, I believe there are ways to increase the pool of eligible enlistees without sacrificing quality. The Services continually review medical standards, for

example, to ensure they are relevant and in the best interest of the military, as well as the individual. For example, the Assessment of Recruit Motivation and Strength (ARMS) Study provided evidence that recruits who are over body fat standards but could pass certain tailored physical tests would have attrition rates similar to weight qualified recruits. Since implementation of the ARMS program, close to 12,000 soldiers have entered the Army with an ARMS waiver across the three components. The Services are also constantly exploring ways to improve other screening tools – especially with respect to our ability to predict attrition. Recent findings suggest the Services may be able to augment their screening procedures by incorporating other measures, such as personality, to identify applicants who are likely to adapt well to the military. If confirmed, I would work with the Services to continually find new and better ways to recruit and screen applicants.

Question. In your view, are there any enlistment requirements or standards that are overly restrictive or which do not directly correlate to successful military service?

Answer. I am not aware that the Department's military enlistment standards are overly restrictive. The Services employ fitness, adaptability, and aptitude standards that correlate to the physical, disciplined, regulated lifestyle and cognitive demands needed to succeed in the Armed Forces.

Question. Do you believe that current policies defining three tiers of high school diploma credentials, aimed at minimizing attrition during the initial enlistment term, should be retained?

Answer. My understanding is the Services track the attrition rates of military recruits by a variety of credential types, and traditional high school diploma graduates have lower rates of attrition than any other type of credential holder for the first term (3 years) of service. While the 36-month attrition rate for traditional high school diploma graduates is 28 percent, the attrition rates for other types of credential holders ranges from 38–45 percent. That is a meaningful difference, because it costs the Services approximately \$45,000 to replace each individual who fails to successfully complete his/her term of service. Given the track record of the current policy, I believe it should be retained and augmented as needed to improve the accuracy of our ability to predict the attrition risk of individual recruits.

WOMEN IN THE MILITARY

Question. The Navy has opened service on submarines to women, the Marine Corps recently expanded service opportunities for women in intelligence specialties, and the Army is reviewing its assignment policy for female soldiers. The issue of the appropriate role of women in the Armed Forces remains a matter of interest to Congress and the American public.

Do you believe additional specialties should be opened up for service by women?

Answer. As the nature of the combat environment has evolved, the roles of women in the military have expanded, and will continue to do so. It is my understanding that the Department believes it has sufficient flexibility under current law to make appropriate assignment policy for women. The Department will continue to monitor combat needs, and if the Services recommend expanding combat roles for women, the Department will notify Congress accordingly as required by statute (10 U.S.C. § 652 and/or § 6035). Any decision regarding opening additional specialties for service by women should be based on our obligation to maintain a high state of mission readiness of our All-Volunteer Force.

Question. Do you believe any changes are needed in the assignment policies regarding women in the Armed Forces?

Answer. The USD(P&R) is conducting a Women in Services Restrictions review of the direct ground combat assignment policy in coordination with the Military Departments and the Joint Staff. This report on review findings will be provided to congressional defense committees by October 2011. If confirmed, I would examine proposed policy changes as a result of this review and work with Congress to implement them.

RISING COSTS OF MEDICAL CARE

Question. In testimony presented to Congress in February 2009, the Assistant Director of the Congressional Budget Office asserted that “medical funding accounts for more than one-third of the growth projected for operations and support funding between 2009 and 2026.” In April 2009, then-Secretary of Defense Gates told an audience at Maxwell Air Force Base that “health care is eating the Department alive.” The administration has proposed health care efficiencies to save nearly \$8.0 billion through 2016.

Do you agree with the proposed health care efficiencies?

Answer. Yes, I believe the proposed efficiencies are modest, sensible efforts to control the Department's health care costs while ensuring superior levels of care are maintained.

Question. What reforms in infrastructure, benefits, or benefit management, if any, do you think should be examined in order to control the costs of military health care?

Answer. While the reform proposals included in the fiscal year 2012 President's budget are a significant first step, I think it is important, especially in view of the fiscal challenges we face, that we continue to find additional opportunities to control the costs of health care. At the same time, we must preserve our ability to provide the best health care possible to our servicemembers and their families, and especially to our wounded warriors.

Question. What is your assessment of the long-term impact of rising medical costs on future DOD plans?

Answer. I understand that even with the estimated savings from the health care efficiencies proposed in the fiscal year 2012 budget, the cost of the Military Health System continues to increase as a percentage of the DOD budget and will exceed 10 percent of the budget in just a few years. In this fiscal environment, we must make smart choices that permit us to maintain a balance between personnel benefits and funding for equipment and readiness. If confirmed, I would ensure that DOD provides quality care, and it does so in a way that provides the best value for our servicemembers and their families, as well as the American taxpayer.

Question. If confirmed, what actions would you initiate or recommend to mitigate the effect of such costs on the DOD top-line?

Answer. While I am not in a position to recommend actions at this time, if confirmed, I would work closely with the senior military and departmental leadership and the health care community to examine every opportunity to manage cost growth while ensuring that military beneficiaries are provided the highest quality care possible.

PERSONNEL AND ENTITLEMENT COSTS

Question. In addition to health care costs, personnel and related entitlement spending continue to grow and comprise an ever increasing portion of the DOD budget. If personnel costs are not curtailed, the Nation may find itself with a military that is both too small and insufficiently equipped. Both former Secretary Gates and Secretary Panetta have called for a comprehensive review of military compensation and the retirement benefit.

How might the retirement benefit, including the provision of health care to retirees, be modernized to reflect the needs of a new generation of recruits, ensure greater equity between those who serve a career and those who don't, while easing the long-term cost to the Government?

Answer. We must maintain a strong, vibrant military force structure that will serve us well into the future while also looking at prudent ways to control personnel and entitlement spending. If confirmed, I would look forward to reviewing proposals that seek to balance these objectives.

Question. What changes should be made to the military compensation system, including the one-size-fits-all approach to basic pay, separate allowances for housing and subsistence, and the tax treatment of various compensation components, to ensure that the compensation package is fair, economical, and sufficient to field a high quality All-Volunteer Force?

Answer. I believe we need a military compensation system that continues to attract and support the highest quality personnel to sustain the All-Volunteer Force while also containing costs. I share Secretary Panetta's view that it is appropriate to conduct a comprehensive review of the military's pay and benefits structure to determine where costs can be contained, while ensuring that we are able to attract and support our men and women in uniform and their families in a wide variety of situations.

DEPENDENT CARE AND FLEXIBLE SPENDING ACCOUNTS

Question. The 10th QRMC recommended providing dependent care and flexible spending benefits to active-duty servicemembers. Providing these benefits would seem consistent with the initiatives of First Lady Michelle Obama and Dr. Jill Biden on behalf of military families. It would appear that no new legislative authority is needed for the Department to provide these benefits to servicemembers and their families.

If confirmed, would you extend these benefits to the Active Duty servicemembers and their families?

Answer. I support the goals provided for in Dependent Care and Flexible Spending Accounts. I believe that we need to continue to provide a total compensation package to recruit and retain the military servicemembers the Department needs to achieve its worldwide missions while at the same time taking care of military families. If confirmed, I would review how Dependent Care and Flexible Spending Accounts could be integrated into the military's total compensation package while recognizing the difficulties of the current fiscal environment.

SYSTEMS AND SUPPORT FOR WOUNDED WARRIORS

Question. Servicemembers who are wounded or injured performing duties in Operations Enduring Freedom, Iraqi Freedom, and New Dawn deserve the highest priority from their Service for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from active duty if required, and continuing support beyond retirement or discharge. Yet, as the revelations at Walter Reed Army Medical Center (WRAMC) in 2007 illustrated, the Services were not prepared to meet the needs of significant numbers of returning wounded servicemembers. Despite the enactment of legislation and renewed emphasis, many challenges remain, including a growing population of soldiers awaiting disability evaluation.

What is your assessment of the progress made to date by DOD and the Services to improve the care, management, and transition of seriously ill and injured servicemembers and their families?

Answer. The Walter Reed revelations were a sobering moment for both Departments. The progress, focus, and improvements in this area have been substantial since 2007. In the 2½ years that I have been visiting wounded warriors and their families, I have seen advances in the knowledge and understanding of the prevention and treatment of wounds and their effects on individuals and families. But I believe there is more to learn, and more to be done. If confirmed, this would be a continuing priority of mine.

Question. What are the strengths upon which continued progress should be based?

Answer. The high priority the Department has placed on caring for our wounded warriors and their families is one such strength. The sustained focus and assessment of the needs of the wounded, ill, and injured servicemembers in areas such as traumatic brain injuries, stress, and amputation allows the Department to continue its progress in caring for these members.

It is also important that the Department take a collaborative approach to caring for our wounded warriors with the Department of Veterans Affairs, the Department of Labor, the Office of Personnel Management, and other stakeholders to ensure that the needs of servicemembers and their families are met across the Federal Government.

Question. What are the weaknesses that need to be corrected?

Answer. The Department should continue to identify opportunities for capturing best practices and implementing improvements by using a proactive assessment and evaluation process that corrects weaknesses in a cost-efficient and timely manner. Additionally, the Department needs to be proactive in identifying post-traumatic stress in our Reserve components who, following redeployment, return home and are removed from a military environment and chain-of-command.

There are also opportunities to try new programs in the areas of employment, credentialing, licensing, and education and training for our wounded that can be explored.

Lastly, a frequent complaint of our servicemembers is that services are simply not delivered in a timely manner. Our application of any program, whether aimed at transition services or care, needs to be timely in order to be effective.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase support for wounded servicemembers and their families, and to monitor their progress in returning to duty or to civilian life?

Answer. The Department needs to regularly evaluate and ensure that current programs and policies are current, helpful, and productive. Outcome assessments need to be conducted with adjustments made, as needed, to ensure necessary resources are in place to properly take care of our recovering wounded, ill, and injured servicemembers and their families.

We must also continue to approach this from an interagency perspective. There are many agencies that want to contribute and help. The Department must ensure resources are fielded in a harmonious and productive manner.

In addition, in August 2011, the President directed DOD and the Department of Veterans Affairs (VA) to develop reforms to ensure that every servicemember re-

ceives the training, credentials, and education they need to transition to the civilian workforce or to pursue higher education.

This DOD and VA-led task force will be an important part of our ongoing efforts to better assist our servicemembers as they return to civilian life.

Question. Studies conducted as a result of the revelations at WRAMC pointed to the need to reform the disability evaluation system (DES). A DES pilot program and an Integrated DES program have been established to improve processing of servicemembers.

What is your assessment of the need to further streamline and improve the Integrated DES?

Answer. The revised and improved Integrated Disability Evaluation System (IDES) developed by DOD and VA is an improvement over the legacy system. It is fairer and faster than the system it replaced. It has also eliminated the gap in pay and benefits that always happened under the old system that was executed by the two Departments. The chief problem with the IDES is that it takes too long.

Question. If confirmed, how will you address any need for change, particularly the Army's growing population of non-deployable soldiers and their need for expedited disability evaluation?

Answer. If confirmed, I would assist the Secretary in executing the fielding of the IDES and in concurrently fielding enhancements to IDES. These enhancements would ensure that timeliness is improved and best practices shared. In any area where it is determined that legislative action could help improve this process, I would follow up with Congress.

SUICIDE PREVENTION AND MENTAL HEALTH RESOURCES

Question. The numbers of suicides in each of the Services has increased in recent years. The Army released a report in June 2010 that analyzed the causes of its growing suicide rate and examined disturbing trends in drug use, disciplinary offenses, and high risk behaviors. In addition, studies conducted by the Army of soldiers and marines in theater are showing declines in individual morale and increases in mental health strain, especially among those who have experienced multiple deployments.

In your view, what role should DOD play in shaping policies to help prevent suicides both in garrison and in theater and to increase the resiliency of all servicemembers and their families, including members of the Reserve components?

Answer. Every suicide among members of the Armed Forces is tragic and the Department has a responsibility to address the factors that contribute to suicidal behavior among our military men and women, whether they are deployed, at a military installation, or in their home communities. All of the Services have established robust suicide prevention programs, and senior leaders across the Department are engaged to address this very important issue. In addition to identifying and reducing risk factors primarily through prevention, we have undertaken multiple initiatives to increase protective factors. The Services have made significant efforts to build resilience among our servicemembers to enhance the key protective factors that enhance performance and increase the overall readiness of the force. I understand that the Final Report of the Department of Defense Task Force on the Prevention of Suicide by Members of the Armed Forces is being used as a vehicle to review all Departmental policies and procedures related to suicide prevention. The Department's Implementation Plan based on these recommendations is undergoing final review and will be delivered to Congress soon. If confirmed, I would ensure that the Department stays focused on this very important issue and continues to improve suicide prevention policies and processes.

Question. What is your understanding of the action that OSD and the Army are taking in response to the June 2010 Army report, and the data in Chapter 3 ("The Lost Art of Leadership in Garrison") in particular?

Answer. I am fully aware that sustaining a force steadily engaged in combat for over a decade has unexpected challenges. Unfortunately, some of those challenges include a rise in "high risk" behaviors and suicides. The Army's Health Promotion and Risk Reduction Task Force was created to identify program and policy changes needed to respond to issues identified in this and other related reports. I understand that the Task Force is in the process of implementing 417 actionable tasks to rapidly improve Army health promotion, risk reduction and protection policies, programs and processes and is making significant progress. If confirmed, I would work to ensure that the Department brings these tasks to completion and that the Services share lessons learned to jointly address these risk factors.

Question. If confirmed, what actions will you take to ensure that sufficient mental health resources are available to servicemembers in theater, and to the servicemembers and their families upon return to home station?

Answer. Ensuring that our servicemembers and their families have sufficient access to the behavioral health resources that they need is critical to the wellness of our total force. The Department has been working to determine workforce requirements for behavioral health professionals, and how best to utilize all of the medical, educational, and counseling resources available. I understand that there has been significant progress in this area, but there is still room for improvement. If confirmed, I would monitor how well we are meeting these goals by assessing current utilization rates and further determining ways in which we can leverage more resources for our servicemembers and their families.

MILITARY QUALITY OF LIFE

Question. In January 2009, the Department published its second Quadrennial Quality of Life Review, which focused on the importance of key quality of life factors for military families, such as family support, child care, education, health care, and morale, welfare, and recreation services.

How do you perceive the relationship between military recruitment and retention and quality of life improvements and your own top priorities for the Armed Forces?

Answer. I know that quality of life factors, such as the ones mentioned above, contribute significantly to recruiting and retention. Surveys and studies have shown that a servicemember's satisfaction with various aspects of military life, as well as the family's experience and support for staying in the military, have a strong influence on the member's decision to reenlist. One good example that influences retention is the Department's military child development program. This program provides quality, affordable child care for over 200,000 children every day, permitting servicemembers and their working spouses to be more committed and successful in their respective careers. The degree of success in meeting those needs can have a strong influence on servicemembers' decisions to continue their military careers. If confirmed, I would monitor how effectively DOD programs, in conjunction with community efforts, not only meet the needs of servicemembers and their families but also contribute to the readiness of the Total Force. Taking care of servicemembers and their families is one of the Department's top priorities.

Question. If confirmed, what further enhancements to military quality of life would you consider a priority, and how do you envision working with the Services, combatant commanders, family advocacy groups, and Congress to achieve them?

Answer. DOD is undertaking a number of initiatives to improve the well-being of the Total Force. These initiatives include expanding child care services, modernizing the DOD schools, improving the DOD Tuition Assistance program, new spouse education and career opportunities, and expanding counseling support for geographically-dispersed military members and their families. If confirmed, I would look forward to working with the DOD components, advocacy groups and Congress to close gaps and reduce overlaps in programs and ensure effective communications with families to ensure that they know how to access available support programs and services when they need it.

FAMILY SUPPORT

Question. Military members and their families in both the Active and Reserve components have made, and continue to make, tremendous sacrifices in support of operational deployments. Senior military leaders have warned of growing concerns among military families as a result of the stress of frequent deployments and the long separations that go with them.

What do you consider to be the most important family readiness issues for servicemembers and their families?

Answer. If confirmed, I would ensure family readiness remains one of the Department's top priorities. The Chairman of the Joint Chiefs of Staff and the Presidential Study Directive Nine identified access to health care (to include psychological health), military spouse career assistance, child care services, and servicemember and family education needs as the Department's highest priority family support initiatives. I concur and, if confirmed, will work diligently to ensure these areas remain at the forefront of the Department's efforts to support families.

Question. If confirmed, how would you ensure that family readiness needs are addressed and adequately resourced?

Answer. I believe that family readiness is correlated with family resilience. It is the Department's responsibility to ensure that families are well prepared to meet the challenges that come with deployment and service. Through focusing on the psy-

chological, social, financial and educational well-being of military families, DOD can continue to build family resilience. A recent DOD survey of active duty spouses shows that families overall are coping well, but certain families are more vulnerable—especially our enlisted families and those who have recently deployed. Since 2006, active duty spouses have reported higher levels of stress in every DOD-wide survey. On the other hand, the number of spouses satisfied with military life has increased since 2006. I understand that programs like MilitaryOne Source and the Yellow Ribbon Reintegration Program have made great strides in improving access to resources for families. However, the Department can do more, and if confirmed I will seek continued improvements in this critical area.

Question. How would you address these family readiness needs in light of global rebasing, BRAC, deployments, and future reductions in end strength?

Answer. In order to appropriately address the needs of our families in today's dynamic environment, it is critical for DOD to build community partnerships with Federal agencies, State and local governments, businesses, and nonprofit organizations, all of which are key stakeholders in meeting the needs of our military families as they continue to serve or transition to civilian life.

Global rebasing, BRAC, deployments, and changes to end strength all alter the context of a servicemember's family life and thus the needs of family readiness. The Department's efforts to ensure family readiness must constantly adapt to these changing conditions.

Question. If confirmed, how would you ensure support to Reserve component families related to mobilization, deployment, and family readiness, as well as to Active Duty families who do not reside near a military installation?

Answer. DOD has a duty to ensure that every family has access to quality resources, regardless of location. An appropriate network of support for our geographically dispersed families must be underwritten by a coordinated, community-based network of care, encompassing DOD, the Department of Veterans Affairs, State, local, non-profit and private providers. It is my understanding that DOD's Yellow Ribbon Program has been successful in establishing the required networks, and if confirmed, I would assess the program to ensure that it remains capable of addressing the support requirements of our Guard, and Reserve servicemembers and their families, wherever they serve. In addition, I understand that the Joint Family Support Assistance Program (JFSAP) has significantly expanded outreach services for military members and their families who are geographically isolated from installation services.

Question. If confirmed, what additional steps will you take to enhance family support?

Answer. If confirmed, I would ensure that the Department continues to adapt and evolve our resources and programs to meet the needs of all servicemembers and their families. For example, we should appreciate the fact that we have a very young force, and the information, the resources, and the support we provide must be delivered in a manner they feel comfortable receiving; otherwise, the information may go unheeded and the resources and support may go unused. This means using technology, social media, and other innovative means. Additionally, there can be a wealth of helpful resources and support resident just outside our gates and residing in our communities. Partnerships with communities and community programs can therefore significantly enhance the Department's efforts to meet the needs of our families. Finally, we must continue to build on the great successes in family support that we have made since the start of combat operations nearly 10 years ago.

Question. In your view, are the recent increases in military family support (which have risen to \$8.3 billion in the fiscal year 2012 President's budget) sustainable in future years?

Answer. I believe family programs are sustainable in future years. Clearly it will be necessary to review family support programs with respect to efficiencies just as every other program in DOD will be reviewed, however, the focus should not merely be on improved efficiencies. We will need to provide the right programs—the ones that are targeted to the needs of our contemporary servicemembers and their families and that are shown to be effective in meeting those needs.

DEPARTMENT OF DEFENSE AND DEPARTMENT OF VETERANS AFFAIRS COLLABORATION

Question. Then-Secretary of Defense Gates and Secretary of Veterans Affairs Shinseki pledged to improve and increase collaboration between the respective departments to support military servicemembers as they transition to veteran status, in areas of health and mental health care, disability evaluation, and compensation.

If confirmed, what role would you expect to play in ensuring that DOD and the Department of Veterans Affairs achieve the administration's objectives in DOD and VA collaboration?

Answer. I understand significant improvements have been made in DOD-VA collaboration in the last few years. Secretary Panetta has made it clear that he intends to continue the efforts of Secretary Gates and Shinseki and seek to accelerate current timelines. If confirmed, I will ensure that DOD continues to work closely with VA to support servicemembers and their families in all facets of making a seamless transition to veteran status.

GOLDWATER-NICHOLS FOR THE INTERAGENCY

Question. The successful integration of joint capabilities within the Armed Forces under the Goldwater-Nichols Act has been held up as a potential model for integration of military and civilian agencies with related missions. A "Goldwater Nichols Act for the Interagency" is considered necessary by some to force changes in organization, training, policies, and procedures in order to achieve unity of effort and enhance cooperation between military and civilian departments. Presidential Executive Order (E.O.) 13434 (National Security Professional Development) and DOD's Civilian National Security Professional Development Program reflect the intent to improve performance in this regard.

What is your understanding of the concept of "Goldwater Nichols for the Interagency"? What are your views on the merits of mandating a Goldwater Nichols Act for the Federal Government designed to achieve the goals set forth in E.O. 13434? How would you evaluate the progress of DOD and the interagency in achieving the goals of E.O. 13434?

Answer. I understand that this concept originates from two facts. The first fact is that virtually every security problem in the modern world requires a joint mix of the skills and authorities that are resident in the military; the diplomatic corps; the development, intelligence, and law enforcement communities; and other Federal agencies. The second fact is that the Goldwater-Nichols Act enabled us to combine the efforts of the separate armed forces that constitute today's joint force. I believe this is a sound, indeed vitally important, concept. If confirmed, I would seek to move this concept forward, whether in law or by other mechanisms.

If confirmed, I intend to reiterate the important role each interagency partner plays in supporting our Nation's security. We should also continue to adapt the education and training of our national security professionals to equip them to meet modern challenges. Developing future national security leaders who understand whole-of-government operations and thinking will remain an important priority.

HUMAN CAPITAL PLANNING

Question. Section 115b of title 10, U.S.C., requires the Secretary of Defense to develop and annually update a strategic human capital plan that specifically identifies gaps in the Department's civilian workforce and strategies for addressing those gaps. DOD has not yet produced a strategic human capital plan that meets the requirements of these provisions.

Would you agree that a strategic human capital plan that identifies gaps in the workforce and strategies for addressing those gaps is a key step toward ensuring that the Department has the skills and capabilities needed to meet future challenges?

Answer. Yes. A strategic workforce plan is essential to ensure a capable and mission ready civilian workforce. I understand that the Department has committed to a revised plan which meets congressional direction, by the end of fiscal year 2015. Interim updates will be provided. The revised strategic human capital plan will clearly link the missions of the Department to the size, mix and skill sets of military, civilian and contractor employees. If confirmed, I will review this plan for adequacy before it is submitted.

Question. Do you see the need for any changes in the requirements of section 115b regarding the requirement for a strategic human capital plan?

Answer. Yes, it would be helpful to the Department to report biennially on the status of the DOD strategic workforce plan. A biennial report will allow time to mature the Department's strategic human capital processes, close identified workforce gaps, and implement strategies for recruitment and retention of the knowledge, skills, and abilities required to accomplish the mission.

Question. If confirmed, will you ensure that DOD fully complies with these requirements?

Answer. Yes.

ALL-VOLUNTEER FORCE

Question. The All-Volunteer Force came into existence almost 40 years ago and, since its inception, volunteer soldiers, sailors, airmen, and marines have helped to win the Cold War, defeat aggression during the Persian Gulf War, keep peace in the former Yugoslavia, combat terrorism in Iraq and Afghanistan, and defend freedom around the world.

Are you committed to the All-Volunteer Force?

Answer. Yes, I am committed to preserving the All-Volunteer Force. The All-Volunteer Force has not only met, but surpassed, the visions and expectations of its founders, and provided this nation with the highest quality, most capable force in its history at a lower cost than a conscripted force. The All-Volunteer Force has proved its viability and resilience through over a decade of prolonged warfighting.

Question. Under what conditions, if any, would you support reinitiation of the draft?

Answer. I can think of no likely situation where I would support resumption of the draft. The All-Volunteer Force has surpassed all expectations of its founders. Today's force is unique because each person wearing the uniform today either entered or chose to remain in the military during this period of prolonged conflict. The All-Volunteer Force today is highly educated, of high aptitude, disciplined, physically fit, and representative of America. Today's recruits are the highest quality we have seen in the past 20 years.

Question. What factors do you consider most significant to the success of the All-Volunteer Force?

Answer. The success of the All-Volunteer Force is built upon three cornerstones: (1) recruiting a quality force; (2) appropriately compensating that force; and (3) providing force management policies that retain the right kinds of people in the right skills.

Question. Do you share the concerns expressed by Admiral Mullen that there is a growing disconnect between the military and U.S. civilian society and, if so, how would you address this problem?

Answer. Yes, because we want our military to be representative of the society which it defends. This is an inherent challenge when the Services only take in less than 1 percent of the youth population each year. The Department's civilian and military leadership, and the Nation's leadership as a whole, needs to work to prevent such a disconnect.

DETAINEE TREATMENT POLICY

Question. Do you support the policy set forth in the July 7, 2006, memorandum issued by the Deputy Secretary of Defense stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. Yes.

Question. If confirmed, will you ensure that all DOD policies promulgated and plans implemented related to intelligence interrogations, detainee debriefings, and tactical questioning comply with the Common Article 3 of the Geneva Conventions and the Army Field Manual on Interrogations?

Answer. Yes.

Question. Do you share the view that standards for detainee treatment must be based on the principle of reciprocity, that is, that we must always keep in mind the risk that the manner in which we treat our own detainees may have a direct impact on the manner in which U.S. soldiers, sailors, airmen, or marines are treated, should they be captured in future conflicts?

Answer. Yes, I believe that DOD's leadership should always be mindful of multiple considerations when developing standards for detainee treatment, including that the manner in which we treat our own detainees may have a direct impact on the manner in which U.S. soldiers, sailors, airmen, or marines are treated, should they be captured in future conflicts.

Question. Do you believe that DOD has the authorities it needs to detain and try individuals captured in the course of the current conflict, where it is appropriate to do so?

Answer. It is my understanding DOD has the authorities it needs to capture, detain, and prosecute by military commission supporters and members of al Qaeda, the Taliban, and associated forces.

It is my understanding over the course of nearly a decade of policy development and litigation, the 2001 AUMF has provided the executive branch with the legal basis for using necessary and appropriate force, including detention, against al Qaeda, the Taliban, and associated forces. The United States has relentlessly and effectively pursued the enemy under this existing authority, and has successfully defended its authority to detain in the Federal courts. DOD is utilizing its existing authority under the Military Commissions Act of 2009 to prosecute certain of these detainees.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Deputy Secretary of Defense?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR DANIEL K. AKAKA

U.S. INSTITUTE OF PEACE

1. Senator AKAKA. Dr. Carter, in November 2007, Secretary of Defense Robert M. Gates delivered a speech at Kansas State University during which he expressed his thoughts that the Department of Defense (DOD) needed to enhance its ability to conduct soft power. He stated, "In short, based on my experience serving seven Presidents, as former Director of the Central Intelligence Agency and now as Secretary of Defense, I am here to make the case for strengthening our capacity to use 'soft' power and for better integrating it with 'hard' power."

While I firmly believe that a strong and capable military must be available if the situation requires, I also feel that a responsive soft power capability is essential to our strategy. Do you agree with Secretary Gates' assessment and do you believe that organizations such as the U.S. Institute of Peace (USIP) can contribute?

Dr. CARTER. Yes, I agree that the United States must strengthen its capacity to use "soft power", and I believe that organizations like the USIP contribute significantly to our collective efforts to manage conflict worldwide, particularly in Iraq and Afghanistan.

In Afghanistan, the USIP is currently addressing the challenge of ensuring long-term peace and stability by contributing to the achievement of four interrelated goals: strengthening peaceful reconciliation and capacity to mitigate conflict; enhancing the rule of law; improving cooperation for peace, security, and economic development; and increasing understanding and effectiveness of operations in Afghanistan. Most notably, the USIP developed and continues to refine the curriculum for the Ministry of Defense Advisors program, which provides critical U.S. civilian expertise for U.S. efforts in Afghanistan.

In Iraq, USIP synchronized the training of Iraqi facilitators, enhancing field coordination with military units and the Department of State (DOS)-led embedded Provincial Reconstruction Teams. In the Mahmoudiya region of Iraq specifically, these contributions helped tribal and local government leaders forge an agreement

that led to a substantial decrease in violence there. This agreement was viewed by local leaders and military officials as a “turning point” toward peace and stability in one of Iraq’s most violent regions.

Long-term success in Iraq and Afghanistan, as well as overall U.S. efforts to prevent conflict and strengthen peace-building globally, depend in large part on a holistic approach to foreign engagement and assistance, with responsibilities shared across U.S. Government agencies and organizations. In order to fulfill these responsibilities, DOD’s civilian counterparts throughout the government require robust capabilities and resources if we are to succeed against the wide range of threats facing the Nation.

FINANCIAL MANAGEMENT

2. Senator AKAKA. Dr. Carter, the National Defense Authorization Act for Fiscal Year 2010 requires DOD to provide auditable financial statements by 2017. In your responses to the committee’s advance policy questions, you list as one of your management performance goals, “To strengthen DOD Financial Management to respond to warfighter needs and sustain public confidence through auditable financial statements.” After many years of sustained efforts to make this a reality, what are the biggest challenges remaining and how are they being addressed?

Dr. CARTER. DOD’s legacy financial processes and systems were established many years ago and designed to ensure budgetary accountability—not meet the proprietary or commercial accounting standards called for in the CFO Act, which are necessary to achieve auditability. To meet these standards, there is a substantial amount of work to be done. Some of the most significant impediments include:

- DOD business and financial management systems are not fully integrated and do not always collect data at the necessary transaction level.
- Reliable end-to-end processes and internal controls have not fully been defined to support financial reporting.
- DOD lacks sufficient operational and financial personnel experienced in financial audits.

Meeting these challenges and improving our business processes have more attention in the Department than ever before. DOD is addressing them by changing the way it does business. To realize success, DOD is using a streamlined approach, implemented in August 2009, which focuses on improving and auditing budgetary and mission-critical asset information that informs key management decisions. Improving the quality of this information will enable commanders and other leaders to better meet mission needs with available resources. I believe this alignment of operational and financial objectives is the most effective incentive to improve financial management.

MILITARY LEADERSHIP DIVERSITY COMMISSION

3. Senator AKAKA. Dr. Carter, section 596 of the National Defense Authorization Act for Fiscal Year 2009, directed the creation of the Military Leadership Diversity Commission (MLDC). The MLDC was given the task of evaluating policies to advance minority members of the Armed Forces. After 18 months of research, one of the primary findings reported by the Commission noted that the Armed Forces have not yet found a way to continuously develop senior leaders who are as diverse as the population of our country. What are your thoughts on diversity in the leadership ranks within the civilian and uniformed members of DOD?

Dr. CARTER. DOD looks at diversity as a strategic imperative that impacts readiness and mission accomplishment. As Secretary Panetta has said, “If we all look the same, our mission will suffer. If we all think the same, failure is certain.” The Department’s leadership is committed to building a Total Force that attracts, recruits, develops, mentors and retains a diverse workforce now, and well into the 21st century. Further, we will communicate this priority clearly and hold leadership accountable for advancing minority members of the Armed Forces. Because changes in the composition of military leadership will be gradual, our commitment to this effort must be enduring.

4. Senator AKAKA. Dr. Carter, if confirmed, what steps would you recommend to develop senior leaders who are as diverse as our country?

Dr. CARTER. To develop a cadre of diverse senior leaders, the Department, in part, must take the following steps:

- (1) Sustain engagement with affinity groups to attract talent.

- (2) Mentor and provide access to key professional assignments to promising junior minority members of our Armed Forces so that they can attain the necessary skills and qualifications to ascend to senior leadership positions over time.
- (3) Work closely with the Office of Personnel Management as it develops an overarching Diversity and Inclusion Strategic Plan for the Federal Government and incorporates the tenants of the President's Executive Order on Diversity in the diversity strategies DOD develops and employs.

QUESTIONS SUBMITTED BY SENATOR CLAIRE MCCASKILL

F/A-18 SUPER HORNET

5. Senator MCCASKILL. Dr. Carter, some critics of the F/A-18 Super Hornet are incorrectly insisting that the Navy's most advanced high-performance strike fighter will not be capable of overcoming future threats. According to the experts, and that of our troops overseas, nothing could be further from the truth. In fact, the Navy has publicly stated that the Super Hornet can "outperform any top-line fighter aircraft of today and tomorrow due to its balanced approach to aircraft survivability, blending low observable technology with state-of-the-art defensive electronic countermeasures, reduced areas of vulnerability, and high precision technology air-to-air and air-to-ground weapons." The missions the Super Hornet can undertake are virtually any combat mission, including scenarios for first-day-of-the-war strike and every-day-of-the-war dominance. In Afghanistan, the Super Hornet is conducting a majority of the sorties that provide ground cover for our men and women in combat.

The Super Hornet is also the Navy's model procurement program. Since 2007, all Super Hornets have been delivered on or ahead of schedule and below estimated program cost. The congressionally-approved third Multi-Year Procurement (MYP) contract for F/A-18E/F aircraft will save an estimated \$818 million over single-year contracts, and the \$52.7 million fly-away cost per aircraft and low sustainment costs make the Super Hornet the best value for money of any strike fighter in the U.S. inventory.

Considering how well the F/A-18 program has delivered advanced capability and the potential of the Super Hornet, along with the high return the U.S. taxpayer has received for the funds invested in the F/A-18 program, do you think it's prudent to take funds away from the program to invest in other tenuous tactical aviation programs, as some of my colleagues have recently advocated?

Dr. CARTER. All Naval Aviation programs are feeling the impact of the current fiscal environment. Direction from Congress and the President indicates DOD's and Navy's Total Obligation Authority will decrease over the Future Years Defense Program (FYDP). The Navy's aviation investment provides the capability needed to meet current and projected national security objectives, while prudently balancing security risks against these fiscal realities. The Super Hornet program is not specifically being targeted to divert funds to another program; rather, the Department's goal is to allocate resources to meet the most pressing fleet requirements, balancing warfighting risks with available resources.

The savings stated on the MYP III should be approximately \$615 million.

6. Senator MCCASKILL. Dr. Carter, could DOD benefit from shifting some research and development (R&D) funds to further the development of the Super Hornet to increase its already impressive capabilities and make it an even more viable complement to other aircraft under development that are suffering from cost overruns and development delays?

Dr. CARTER. In keeping with the Department's desire to provide a flexible and balanced force, DOD's aviation investment plan provides the diverse mix of aircraft needed to carry out DOD missions. The F-35C is being procured as a complement to the F/A-18E/F, and as such has complementary rather than competing or redundant capabilities. Continued investment in both programs is required to meet warfighting needs. The Department continues to pursue a TACAIR investment strategy that provides an ideal balance of versatility, lethality, survivability, and capacity.

7. Senator MCCASKILL. Dr. Carter, in your testimony before this committee in May, you were asked about the alternatives to the procurement of the Joint Strike Fighter (JSF) program. In your response, you stated that the tactical aviation requirements of individual Military Services differ from each other. Specifically, that the Navy has a current alternative to the F-35C variant in the F/A-18 E/F Block II Super Hornet. Because this alternative exists, the Secretary of Defense budgeted

for 41 additional Super Hornets as the F-35C has slipped in its delivery schedule to the Navy. Given that the Navy has publicly stated that the Super Hornet can undertake virtually any combat mission, is it your opinion that the Super Hornet remains a viable alternative based on the Navy's tactical aviation needs?

Dr. CARTER. F-35C and F/A-18E/F capabilities are complementary, with an ideal balance of versatility, lethality, survivability, and capacity that will pace the threat through 2025. A mix of the two aircraft in future carrier air wings represents an affordable, timely solution to the strike-fighter shortfall and provides conventional conflict analysis, validated combat capability, and capacity to support foreseen carrier strike group mission requirements. Continued investment in both programs is required to meet warfighting needs.

8. Senator MCCASKILL. Dr. Carter, at the end of the acquisition run for the F/A-18, this country will have only one strike fighter aircraft manufacturer. From a competition standpoint, is this of concern to DOD?

Dr. CARTER. The combination of buying more F/A-18E/F, developing the F-35, and modernizing the F-22A provides strike fighter capability for the Departments of Navy and Air Force for the next 30-plus years. Additionally, some legacy strike fighter aircraft have service-life extensions that allow those aircraft to fly into the 2030s. By that time, the Department projects that it will begin recapitalizing the fifth generation force. Industry has already begun examining applicable materiel concepts and related technology for a sixth generation aircraft and the Department believes the military aircraft industrial base will be well positioned to provide competitive alternatives at that time.

QUESTIONS SUBMITTED BY SENATOR KAY R. HAGAN

SCIENTIFIC AND TECHNICAL TALENT

9. Senator HAGAN. Dr. Carter, during your confirmation hearing, I asked you: "What is DOD doing to recruit and retain the best and brightest scientists and engineers? How do you measure the effectiveness of these efforts?"

In response to being asked to provide specific examples, you mentioned Defense Advanced Research Projects Agency. What other examples can you provide? Also, how do you measure the effectiveness of these efforts?

Dr. CARTER. The scientists and engineers at DOD Laboratories serve as the foundation of the Department's technical base. DOD uses several approaches to recruit and retain the brightest scientists and engineers. One approach to maintain an effective cadre of talent is through application of the Science and Technology Reinvention Laboratory (STRL) program, also known as Demonstration or Demo Laboratories program. Directors at an STRL have considerable latitude within their existing demo project plans and current regulations in establishing personnel policies tailored to meet their specific needs for recruiting and retaining the necessary scientific and engineering talent to meet program requirements. Under STRL, Lab directors can use such approaches as pay for performance systems that reward the highest performers; education programs to train the workforce; and various hiring flexibilities with the most promising being a direct hire authority for candidates with advanced degrees. This direct hire authority allows laboratory leadership the ability to quickly hire promising new graduates and experienced scientists and engineers.

Eight of the 15 STRL demo projects are in operation between 9 and 14 years with the success of their demo interventions last evaluated through a pulse survey conducted in 2005. Under Secretary of Defense (Personnel and Readiness) staff members are working with demo laboratory representatives on an evaluation of current initiatives as well as the need for additional flexibilities that may arise. The data collected and the analysis will be used to refresh current initiatives and develop new ones as appropriate to further enhance the personnel demo projects' positive impact on assisting the STRLs to recruit and retain the talent needed to accomplish their missions.

In addition to the STRL demo program, another key element of the Labs' ability to maintain a skilled workforce is section 219 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009. This section provides authority for a laboratory director to use up to 3 percent of all available funds for establishment of high risk technology programs, education, and training of the workforce; transition of new technology to acquisition programs; and infrastructure improvements. One of the highlights of this program is found at the Naval Research Laboratory (NRL). The Director established the Karle Fellowships (named in honor of two of

NRL's most prolific scientists) enabling the lab to recruit up to 50 exceptional university graduates per year and place them in technology development programs for 2 years at no cost to existing programs with minimal administrative burden. Upon transitioning to Navy programs, they are highly productive and well versed on Service technology needs.

To measure effectiveness, DOD collects laboratory demographic data every 2 years, which allows it to analyze the skills, diversity, and experience levels of the technical workforce. Concurrent with collection of laboratory demographics, DOD maintains a high level of communication with the Military Departments and the labs on the technical viability of their workforce. As of the end of fiscal year 2011, there were no significant gaps in the ability of the Military Departments to provide technical support for their programs or deployed forces.

DEVELOPMENTAL AND OPERATIONAL TEST AND EVALUATION

10. Senator HAGAN. Dr. Carter, both the developmental and operational test and evaluation communities play a vital role in ensuring that weapons systems that are fielded ultimately deliver capabilities to the warfighters as promised.

Developmental Test and Evaluation (DT&E) discovers problems early on in the developmental phase when it is significantly cheaper to fix them than later on, and Operational Test and Evaluation (OT&E) confirms the operational effectiveness and suitability of the weapons systems in combat use. Unfortunately, the majority of problems that OT&E is discovering with weapons systems should have been detected and fixed during the DT&E phase.

What will you do to ensure that such developmental problems are addressed earlier in the lifetime of a weapons program and hence, decrease costs and accelerate fielding?

Dr. CARTER. Section 102 of Weapon Systems Acquisition Reform Act of 2009 enacted 10 U.S.C. 139d (now 10 U.S.C. 139b) establishes the position of Deputy Assistant Secretary of Defense for Developmental Test and Evaluation with well-defined responsibilities. This office is committed to early and continuous engagement with the major defense acquisition programs. This engagement includes providing guidance for test planning and resourcing, assessing progress-to-plan throughout the acquisition cycle, helping programs to adjust to inevitable problems during development, and informing decisionmakers about residual risk prior to OT&E (e.g., via Assessments of Operational Test Readiness). Measurable DT&E performance criteria that address a sound planning framework and objective measures of system maturity are developed to provide early indicators for decision makers. In addition, efforts are ongoing to strengthen the DT&E workforce through more robust education and certification requirements and assessment of workforce balance across the components. This will make best use of the available personnel resources to best influence effective DT&E programs, and minimize late and costly discovery of deficiencies.

QUESTIONS SUBMITTED BY SENATOR MARK BEGICH

AFGHANISTAN

11. Senator BEGICH. Dr. Carter, I support eliminating the threat to U.S. national security in Afghanistan and Pakistan by defeating al Qaeda and preventing those countries from being safe havens again. However, like many of my colleagues, after a decade in the country I am concerned about an indefinite U.S. presence. At the end of the year, approximately 9,000 Alaska troops will be in the country. I believe we need a thorough threat assessment and to concisely define a realistic and achievable end-state. What is your assessment of our current strategy in Afghanistan and Pakistan?

Dr. CARTER. We are seeing clear progress in our strategy, particularly in our core goal of disrupting, dismantling, and ultimately defeating al Qaeda. There has been steady progress in the development of the Afghan National Security Forces, and there was a clear decline in violence in 2011, compared to the previous year. I see the greatest risks to our goals and strategy stemming from safe havens in Pakistan, and from inadequate progress in developing more inclusive, capable, and legitimate Afghan governance.

Successful U.S. operations in Afghanistan and our efforts in the larger region are making the United States safer. In Afghanistan, we are helping the Afghan people stand on their own so that Afghanistan can become a responsible, stable partner with others in the region, and, ultimately, a productive member of the international

community. The Department is also cooperating closely with Pakistan to put unprecedented pressure on al Qaeda. As a result, the United States is moving toward achieving the core goal of ultimately defeating al Qaeda.

As part of this greater effort, DOD is also engaging its partners in Central Asia to ensure uninterrupted support to our ongoing operations. We are helping to build regional, partner-nation security capacity to achieve greater stability in the region, which is vital to U.S. national security.

12. Senator BEGICH. Dr. Carter, what is your assessment of the threat to U.S. national security in the region?

Dr. CARTER. Security and stability in the region—and our success in this war—are vital to U.S. national security. Instability, extremism, and transnational terrorism in this region are among the many challenges that threaten our security, as well as the security of Afghanistan, Pakistan, India, and other countries. The attacks of September 11, 2001, emanated from Afghanistan and point to the direct link between developments in this region and the security of the United States.

13. Senator BEGICH. Dr. Carter, how do you view the United States' long-term commitment—financially, reconstruction-wise, and security-wise?

Dr. CARTER. The United States and the international community have sacrificed an extraordinary amount—in lives and resources—to ensure Afghanistan never again provides a safe haven from which al Qaeda and its affiliates can attack us. Working with our coalition and Afghan partners, the Department remains committed to that goal. Ultimately, the Afghans must be responsible for taking the lead for security in their country, and the transition process through 2014 to achieve this objective is under way.

To realize lasting security and stability, President Obama and President Karzai agreed that the United States and Afghanistan should have an enduring strategic partnership beyond 2014. Negotiations on that partnership framework are progressing. Likewise, NATO and the international community also made clear that their commitments to Afghanistan are enduring and will continue beyond the completion of the transition to Afghan security responsibility.

Afghanistan will require international assistance for many years to come; this is the reality of more than 30 years of war that shattered many of the basic institutions of Afghan society. Our assistance, however, must be focused on helping the Afghans take full responsibility for their own future. We need to ensure that, as a nation, Afghanistan continues to develop the capacity and the resources it needs to reduce reliance on international aid.

14. Senator BEGICH. Dr. Carter, what is your assessment of President Karzai as a partner?

Dr. CARTER. U.S. policy toward Afghanistan is not contingent on a single leader. Rather, our commitment is to the people of Afghanistan, based on the core interests that we share. President Karzai is the democratically elected leader of Afghanistan, and the Department is committed to working with him to achieve our shared objectives.

President Karzai faces a difficult situation in Afghanistan. He is fighting an insurgency with the assistance of more than 140,000 foreign forces. The burden of this war on the Afghan people is great, and they have been traumatized by some 30 years of war. Inevitably, there are times of tension or disagreement, and just as President Karzai needs to listen to our concerns, we also need to listen carefully to his. President Karzai has sometimes aired these concerns in ways we find unhelpful, but he ultimately appreciates what the United States is doing and the sacrifices made by our forces.

15. Senator BEGICH. Dr. Carter, what do you see as the role for DOD in building the capacity of the Government of Afghanistan to deliver services, provide better governance, improve economic development, and fight corruption in Afghanistan?

Dr. CARTER. DOD's primary role in Afghan Government capacity-building is to support the Ministry of Defense and Ministry of Interior, and their ability to provide security for the Afghan people. The NATO Training Mission-Afghanistan made significant progress in growing the size and capabilities of the Afghan National Security Forces (ANSF). This progress is enabling the transition of lead security responsibility to the ANSF throughout Afghanistan by the end of 2014.

The DOS and U.S. Agency for International Development (USAID) have the lead for broader U.S. governance and development efforts in Afghanistan. That said, DOD stabilization activities also contribute to this effort in important ways. The Commander's Emergency Response Program (CERP) allows U.S. military com-

manders to carry out small-scale projects that meet urgent humanitarian relief or urgent reconstruction requirements within their areas of responsibility. Village stability operations led by our Special Operations Forces provide security and build linkages between villages and district and provincial authorities that help the Afghan Government deliver important services. The Task Force for Business and Stability Operations (TFBSO) develops near-term tactical and strategic programs that create economic opportunities in Afghanistan in support of U.S. military commanders' campaign objectives. TFBSO's national-level activities, such as its assistance to the Ministry of Mines, complement the governance and development efforts of U.S. civilian agencies by attracting U.S. and foreign investors and helping set the conditions for long-term economic development as security improves. Finally, the Afghan Infrastructure Fund, bridges the stabilization efforts of DOD with the development efforts of USAID by allowing coordinated planning and funding of programs that have both near-term stabilization benefits and meet longer-term economic development needs.

To understand the corruption problem more fully and to address it, the Commander, U.S. Forces Afghanistan formed Task Force Shafafiyat ("Transparency"), which is coordinating the development of anti-corruption strategies and working to ensure that DOD contracts do not foster or enable corruption. These efforts improved the Department's ability to know both contractors and subcontractors, and to track money flows. They have also led to the adoption of new procedures that reduce the chances American resources would inadvertently strengthen criminal networks or insurgent groups.

16. Senator BEGICH. Dr. Carter, do you have concerns with the Afghan Government's ability to sustain our efforts—like funding their own security forces? What more can we be doing?

Dr. CARTER. The cost of sustaining the ANSFs will continue to outpace the Government of Afghanistan's near-term resourcing abilities. The ANSF will require continued international assistance until new Afghan national sources of revenue can be brought on-line.

To that end, DOD is currently looking at how to reduce the remaining ANSF development and long-run sustainment costs. This effort includes looking into potential force structure changes in a post-counterinsurgency environment, as well as avoiding redundancies and the specific capability standards required for the Afghans. As the Department transitions areas to Afghan lead for security, DOD emphasized to its allies and partners the importance of maintaining their overall financial commitment to security in Afghanistan. In addition, DOD allies and partners continue to make contributions to ANSF sustainability through multi-donor trust funds, such as the Law and Order Trust Fund for Afghanistan. DOD also implemented programs through its Task Force for Business Stability Operations to connect outside investors to potential Afghan producers, and to help Afghanistan build the capacity to develop its mineral and other natural resources in environmentally sound and sustainable ways.

The Department also continues to participate in a concerted interagency effort to develop an overall economic strategy for improving Afghanistan's economic sustainability, economic development, revenue generation, and budget execution. Over time, such efforts will help enable the Afghans to take on increasing responsibility for their own security forces, with decreasing reliance on donor support.

17. Senator BEGICH. Dr. Carter, if confirmed, will you support the drawdown in July?

Dr. CARTER. I support President Obama's decision to begin the deliberate, responsible drawdown of 10,000 U.S. surge forces from Afghanistan over the course of this year, with a further drawdown of the remaining 23,000 surge forces by the end of summer 2012.

At the end of summer 2012—when the U.S. surge forces have departed—there will actually be more Afghan and coalition forces in the fight than there are today because we will have added another 55,400 members to the ANSF, not including the Afghan Local Police.

Additionally, over the coming year, we will continue to develop more capable ANSF. A well-trained, operationally effective ANSF will allow the Afghans to assume more responsibility as we redeploy the U.S. surge forces. As a result, ISAF and the ANSF will be able to maintain a necessary level of combat operations against anti-coalition forces while completing the successful transition of lead security responsibility to the Afghans by the end of 2014.

18. Senator BEGICH. Dr. Carter, what is your assessment of the progress in developing a professional and effective ANSF?

Dr. CARTER. The Afghans, in partnership with the North Atlantic Treaty Organization (NATO) and the International Security Assistance Force (ISAF), made tremendous progress toward developing a professional ANSF that is both capable of sustaining a properly trained and equipped force over the long term and preventing the return of al Qaeda and its terrorist affiliates to Afghanistan.

This progress is due, in large part, to the unifying efforts of NATO Training Mission-Afghanistan (NTM-A). Since November 2009, NTM-A consolidated all training efforts under one command, and established iterative, professional, and standards-based training across the ANSF—none of which existed before.

As the Afghan Ministries of Defense and Interior are consistently meeting their recruitment goals, NTM-A focused intensely on improving the quality of the force, especially in areas of literacy, leadership, and operational performance. In 2009, only 4,000 soldiers possessed some degree of literacy. Today, NTM-A estimates that the ANSF will achieve 50 percent overall literacy rates at the third-grade level in 2012, with more than 70,000 police and 55,000 soldiers having received some level of literacy training. Only 14 percent of the Afghan recruiting age population (males aged 18–40 years old) and just 20 percent of ANSF recruits are literate, so achieving a 50 percent literacy rate in the ANSF will not only increase the ANSF's operational effectiveness, but it will also contribute to Afghanistan's overall economic development in the longer-term.

The Department is also focused on improving the quality and quantity of leaders in order to accelerate the ANSF's development. Although the ANSF is challenged by leadership shortfalls, as a result of a range of training and mentoring programs over the last 2 years, the ANSF noncommissioned officer and officer corps grew by more than 20,000 leaders, significantly reducing the leadership shortfall. Through a strong partnership program with Coalition forces, the ANSF's operational performance in the field has also greatly accelerated. In January 2011, there were 124 Afghan battalions and headquarters elements rated as "effective with coalition assistance" or better. As of August, 147 units had achieved that standard (out of 184 units assessed).

The result of these efforts—consolidated training and an intense focus on literacy, leadership, and operational performance—is that the ANSF made significant progress on the battlefield and began successfully taking the lead responsibility for security in areas of the country that entered transition. By the end of 2014, this increasingly capable ANSF will have the lead security responsibility throughout the country.

19. Senator BEGICH. Dr. Carter, if confirmed, will you make it a goal to transfer the security mission to the Afghans sooner than 2014?

Dr. CARTER. I think the current goal of completing transition by the end of 2014, as proposed by President Karzai and confirmed by our allies and partners at the November 2010 North Atlantic Treaty Organization (NATO) summit in Lisbon, remains a feasible and appropriate target. However, the Department will carefully monitor progress toward this goal, taking into consideration "on-the-ground" conditions.

20. Senator BEGICH. Dr. Carter, if confirmed, what changes, if any, would you recommend for U.S. relations with Pakistan, particularly in terms of military-to-military relations?

Dr. CARTER. Our military-to-military relationship with Pakistan, like our overall relationship, experiences high and low points, and is challenged by a lack of trust on both sides. I will continue to support DOD's efforts, in coordination with our interagency partners, to improve our counterterrorism cooperation and develop a constructive and mutually beneficial relationship with Pakistan that is aimed at advancing shared national security objectives.

SPACE LAUNCH PROCUREMENT

21. Senator BEGICH. Dr. Carter, according to publicly disclosed reports, the U.S. Air Force Evolved Expendable Launch Vehicle (EELV) program costs are set to increase by nearly 50 percent over the next 5 years. What are the reasons for these costs increases?

Dr. CARTER. The EELV program projects incurring a cost increase on EELV of approximately 40 percent over the next 5 years. There are multiple reasons why the EELV costs increased. These include unrealistically low 1998 competitive prices for

the initial EELV orders due to the anticipated commercial launch market failing to materialize and the rising costs in launch vehicle production due to low order quantities causing suppliers to restart and recertify production lines. With the cancellation of the National Aeronautics and Space Administration (NASA) Shuttle and Constellation programs, overhead costs for EELV, especially on propulsion providers, have increased, and are being borne almost exclusively by DOD. The recently approved acquisition strategy is designed to target these causes and drive increased cost stability into the program.

22. Senator BEGICH. Dr. Carter, what insights does DOD have into its current vendor's cost and pricing structures?

Dr. CARTER. DOD certified cost and pricing data or acceptable equivalent data for our existing contracts. We intend to continue this practice on future contracts. In addition, we recently gained a great deal of cost insight into the EELV main and upper stage engines, which are two major cost drivers for the program. The Air Force Program Executive Officer for Space Launch (AFPEO/SL) commissioned two separate Independent Cost Estimates (ICE), the results of which have been provided to program stakeholders. In September 2011, the Air Force Cost Analysis Agency (AFCAA) completed an ICE for the RS-68 Delta main engine, which is manufactured by Pratt & Whitney Rocketdyne (PWR). The ICE was a data driven estimate based on historical data from an earlier purchase, other PWR programs and recent subcontractor quotes. The study gathered data on labor, material, profit, overhead, and general and administrative costs. Also in September 2011, the National Reconnaissance Office's (NRO) Cost Analysis Improvement Group (CAIG) completed an ICE for the RL10 upper stage engine, for both Delta and Atlas configurations, which is also manufactured by PWR. The study used historical data from fiscal year 2006-2010 for previous purchases of RL10 engines, as well as a bill of material from the PWR proposal. The data provided by AFCAA and the CAIG will be used in conjunction with existing certified cost and pricing data to assist in negotiations for the upcoming EELV procurements, including the fiscal year 2012 and fiscal year 2013-2017 buys.

23. Senator BEGICH. Dr. Carter, what actions has the Air Force or DOD taken to control costs?

Dr. CARTER. In June 2011, the EELV program signed an EELV Launch Capability (ELC) bridge contract, changing the contract type from an Award Fee type contract to an Incentive Fee construct incentivizing cost reductions while maintaining mission success. The recently approved EELV acquisition strategy supports a minimum production rate by implementing a more economical multi-core approach to procuring launch vehicles. The new acquisition is scheduled to be awarded by the fall 2012. Key elements of the strategy are a buy of sufficient size to ensure economic order quantity prices and a steady launch vehicle production rate. This strategy also includes a "new entrant" approach to allow for near-term on-ramp opportunities and future full and open competition with certified launch providers. The Air Force also recently completed a Should Cost Review of the EELV program. The Air Force incorporated the Should Cost Review recommendations in negotiations with the prime contractor on the ELC bridge contract, upcoming mission contracts and will use the Should Cost Review during negotiations for the fiscal year 2013-2017 acquisition. Additionally, the results of two recently completed Independent Costs Estimates (ICE) on the RS-68 main engine and RL-10 upper stage engine will be incorporated into negotiations for future contracts.

24. Senator BEGICH. Dr. Carter, the Government Accountability Office (GAO) has reported that "the Office of the Secretary of Defense's (OSD) decision to advance the EELV program from the development and production phases, which began in 1998, to the sustainment phase will significantly reduce EELV's reporting requirements to OSD, such as program cost and status information, limiting its own ability to oversee the program." Given the lack of insight into the program, what specific actions has the Air Force or DOD taken to better understand EELV's costs?

Dr. CARTER. The Air Force took a number of steps to better understand the program costs. A Should Cost Review was completed in June 2010. In March 2011, a Blue Ribbon Panel was led by the SAF/AQ and the Program Executive Officer (PEO). In June 2011, the program changed the construct of the ELC contract to cost plus incentive fee and implemented activity based charging codes used by the prime contractor to gain better understanding of costs. The program continues to provide cost reporting at the prime and subcontractor level to the Defense Cost and Resource Center at OSD, as required by regulation. In addition to requiring ULA to submit certified cost and pricing data prior to negotiations, the Air Force program

team will also conduct a complete evaluation of ULA costs and any supporting data for approximately \$280 million of inventory items purchased by Boeing for the initial EELV contract in 1998. The evaluation will look at incurred costs, quotes, purchase orders, invoices, and will compare prices to similar items manufactured on the open market. The Contracting Officer will use this data to determine whether the material costs submitted by ULA are supported and reasonable. The Defense Contract Management Agency approved ULA's purchasing system in September 2011, and the Defense Contract Audit Agency is finalizing its cost accounting system audit. If the auditors find deficiencies, AFPEO/SL will require the Contracting Officer to withhold a certain percentage of all progress payments in accordance with the Defense Federal Acquisition Regulation Supplement until the system achieves compliance. This should motivate ULA to make any other necessary changes to its business systems and accounting practices.

25. Senator BEGICH. Dr. Carter, as Deputy Secretary of Defense, would you require additional cost reporting, such as a reporting required in the Selected Acquisition Report (SAR) as provided in title 10 U.S.C. 2432, of which the EELV program is currently not subject?

Dr. CARTER. Section 838 of the Conference Agreement on the fiscal year 2012 Defense Authorization Bill, which originated as amendment 1071 by Senator McCain, led the Department to further understand and appreciate the importance of providing EELV program cost, schedule and performance information to the congressional defense committees and OSD for oversight. OSD and the Air Force are working together to implement the right level of acquisition reporting. Of particular interest is a shared concern toward limiting the influence of factors outside the program's control that can drive unit cost such as satellite constellation sustainment, satellite production schedules, and launch range constraints.

26. Senator BEGICH. Dr. Carter, currently the EELV program is divided into two separate contracts: a cost-plus Launch Capability (ELC) contract that annually funds all fixed costs for United Launch Alliance (ULA); and a Launch Services (ELS) contract through which the Air Force purchases individual launches for its payloads. Combining costs associated for each contract, what is the average cost for a launch on an Atlas V?

Dr. CARTER. There is no average price for an Atlas V launch or launch vehicle. The cost-plus Launch Capability effort provides the minimum launch capability required to meet a launch rate of eight missions per year. There are 10 variants in the Atlas V launch vehicle family, and each one has a different cost. Additionally, every National Security Space mission is a different price, depending on the amount of mission-specific integration required, launch location, and number of the same/similar payloads previously flown.

27. Senator BEGICH. Dr. Carter, what is the average cost of a launch on a Delta V and a Delta V Heavy?

Dr. CARTER. There is no average price for a Delta IV launch or launch vehicle. There are five variants in the Delta IV launch vehicle family and each one has a different cost. Additionally, every National Security Space mission is a different price depending on mission integration costs, payload faring and launch location, and number of the same payloads previously flown.

28. Senator BEGICH. Dr. Carter, what are the total costs of a 40 core block buy?

Dr. CARTER. The Air Force has not yet determined the actual size of the proposed lot buy of EELV booster cores. The recently approved acquisition strategy entails an examination of an economic order quantity of EELV booster cores using 40 cores (8 cores per year over 5 years) as our budget baseline. However, as part of the acquisition strategy, the Air Force will request the current EELV provider, United Launch Alliance, propose firm-fixed prices against a range of 6–10 booster cores per year over contract periods ranging from 3 to 5 years, thus allowing the program to balance the launch vehicle production rate and length of commitment decision among price, operational requirements, budget realities, and potential for new entrant competition.

29. Senator BEGICH. Dr. Carter, I understand the Air Force is moving forward with a planned acquisition to purchase 40 rocket booster cores from its current provider over the next 5 years (fiscal year 2013 to fiscal year 2018), at a guaranteed annual rate of eight cores per year. What is the basis of this acquisition strategy?

Dr. CARTER. In late 2009, cost increases in the EELV program prompted the Commander of Air Force Space Command and the Director of the NRO to begin looking

at alternative business models. The practice of ordering launch vehicles in small quantities was inefficient and did not provide a predictable production rhythm sufficient to control costs. They commissioned an external study, the Broad Area Review (BAR-X), conducted by the Institute for Defense Analyses, and an internal Tiger Team study as well. The BAR-X looked at the entire spectrum of space launch to include infrastructure, while the Tiger Team focused on the EELV contracting approach. The BAR-X, Tiger Team, and Air Force Program Executive Officer for Space Launch (AFPEO/SL) all recommended an annual minimum production rate of launch vehicle cores plus associated upper stage engines, payload fairings, and solid rockets for multiple years as a baseline.

The acquisition strategy allows the Air Force to make an informed decision on quantity and contract length based on the accumulation of sufficient pricing information and incorporates the findings of the studies as well as the GAO report. The request for proposal will require the contractor to provide prices for a range of quantities from 6 to 10 cores over a contract period of 3 to 5 years. Specific decisions about unit quantities and contract duration will not be made until summer 2012, allowing the Air Force time to balance contractual commitments with operational requirements, budget, cost reductions and the potential for competition. To facilitate our assessment of potential new entrants, we are taking specific steps to enable competition, including the release—with our partners at NASA and the NRO—of the Joint Strategy for New Entrant Certification.

30. Senator BEGICH. Dr. Carter, when will the Air Force finalize the contract or issue the request for proposal (RFP) for this block buy?

Dr. CARTER. I anticipate a formal RFP release in the first quarter of 2012 with a decision about quantity and duration during the summer of 2012 and contract award by the fall of 2012.

31. Senator BEGICH. Dr. Carter, what, if any, are the estimated cost savings associated with a 40 core block buy? Has the Air Force or an independent examiner looked at the costs savings of a 40 core block buy versus a smaller block purchase, such as annual block buys of 8 cores; a 2-year block buy of 16 cores, etc.?

Dr. CARTER. The Air Force will not know the total cost for the upcoming EELV lot buy until the new contract is negotiated. But as the question suggests, the Air Force is looking at a range of options for the size and length of a lot buy. The Air Force/NRO Tiger Team, Broad Area Review (BAR-X) and Air Force Program Executive Officer for Space Launch (AFPEO/SL) all recommended an annual minimum production rate of launch vehicle cores plus associated upper stage engines, payload fairings, and solid rockets for multiple years as a baseline. The implementation of this new strategy is intended to reduce costs for National Security Space (NSS) launches and stabilize the U.S. Launch industrial base. The Air Force will request that the prime contractor propose various rate-over-time combinations to inform the Air Force's final decision, and provide maximum flexibility to best meet NSS requirements and budgets. I am confident that a multi-core buy strategy will generate significant savings versus the current practice of buying individual missions. In addition to savings on the service portion of the contract, there are savings to be generated in the administrative area as well. The RFP will require ULA to submit one combined ELC and ELS proposal, with separate Contract Line Items (CLINs) for launch service and capability, which should significantly reduce the cost of proposal preparation and negotiations that were prevalent in past EELV acquisitions. This construct will also save both time and money by taking advantage of economic order quantity purchasing, as well as a single proposal preparation and negotiation. With this proposal, the Air Force will understand the specifics of different sizes of buys, and therefore, make a fully informed decision in the best interest of the taxpayer and DOD.

32. Senator BEGICH. Dr. Carter, what is the basis for the planned acquisition of 40 cores over 5 years, specifically?

Dr. CARTER. The Air Force did not decide on a firm quantity purchase of 40 cores over 5 years; the Air Force acquisition strategy allows the Air Force to make an informed decision on quantity and contract length based on the accumulation of sufficient pricing information, and incorporates the findings of the Broad Area Review (BAR-X) and Tiger Team studies as well as the GAO report. The request for proposal will require the contractor to provide prices for a range of quantities from 6 to 10 cores over a contract period of 3 to 5 years. Specific decisions about unit quantities and contract duration will not be made until summer 2012, allowing the Air Force time to balance contractual commitments with operational requirements, budget, cost reductions and the potential for competition. To facilitate the assess-

ment of potential new entrants, the Air Force is taking specific steps to enable competition, including the release—with partners at NASA and the NRO—of the Joint Strategy for New Entrant Certification.

However, it is important to recognize the benefits of pursuing a multi-core buy, versus purchasing individual launch missions, as was done in the past. The Air Force/NRO Tiger Team, BAR-X and AFPEO/SL all recommended an annual minimum production rate of launch vehicle cores plus associated upper stage engines, payload fairings, and solid rockets for multiple years as a baseline. The implementation of this new strategy is intended to reduce costs for National Security Space launches and stabilize the U.S. Launch industrial base.

In addition, the acquisition strategy was designed to support the planned launch manifest. For example, 46 launches (some use as many as 3 cores per launch) are planned from fiscal year 2013–2017, with an additional 16 launches in fiscal years 2018–2019. Most of these launches will be reflights for programs that have already launched satellites to support their respective missions. Therefore, future satellites are using identical designs as their predecessors. This greatly reduces the chance of production delays and increases the likelihood these satellites will launch on schedule. Additionally, the Atlas “white tail” concept (a common booster core for Atlas rockets) and the Delta Fleet Standardization increase flexibility in booster assignment, which reduces launch delays.

33. Senator BEGICH. Dr. Carter, currently the Air Force has 41 rocket booster cores purchased from its current vendor for 39 missions that have not yet launched. Ten of these cores were purchased in 1998 under Buy 1. To a significant extent, this excess inventory is associated with launch schedule slippage associated with satellite manufacturing and integration delays. Should the Air Force and NRO launch schedules slip in the next 5 years in the context of a 40 core block buy from a single incumbent vendor, how will new entrants be able to compete for launches?

Dr. CARTER. The majority of satellite slips seen in the past 10 years were in the development process. Based on recent experience, I anticipate a much more stable flow of satellite launches in this timeframe as these programs have transitioned to production. For example, fiscal year 2010 and fiscal year 2011 had seven and nine launches, respectively, with a 100 percent launch rate.

In addition, there are more launch requirements during fiscal year 2013–2017 than the up-to-40 cores budgeted in the buy (approximately 55). These additional cores may be available for competition with new entrants to the program should any become a certified EELV provider. The Air Force is committed to competition on the EELV program and is taking steps to facilitate new entrant certification.

The New Entrant Certification Strategy was signed by the Air Force, the NRO, and NASA, and was released in October 2011. The document defines the coordinated certification strategy for commercial new entrant launch vehicles. Also, the U.S. Air Force Launch Services New Entrant Certification Guide was signed and released in November 2011. The Guide provides a risk-based approach that the Air Force will use to certify the capability of potential New Entrant launch companies to provide launch services for EELV missions. The Guide lists a set of criteria that any New Entrant must meet in order to launch a high-value operational satellite. The Guide provides the standard or specifications the contractor must meet, the documents or data the contractor must provide and the evaluation process the Air Force will employ in assessing the criteria. These are important steps toward introducing competition into the EELV program. In addition, the Air Force will identify specific launch opportunities reserved for potential new entrants.

34. Senator BEGICH. Dr. Carter, the historical average launches under the EELV program is three flights per year over the last 9 years. Yet, the Air Force is expecting a launch demand of 13 to 14 launches in fiscal year 2013 alone. Has DOD assessed the cost impacts of a 40 core block buy in the context of well-documented and empirical schedule delays associated with payloads?

Dr. CARTER. The reason for the relatively low number of launches in the past is primarily due to slips within the satellite programs. The majority of satellite schedule slips seen in the past 10 years have been because they were still in the development process. However, as these satellites programs are transitioning into production, we expect a steadier, more dependable launch rate. For example, fiscal year 2010 and fiscal year 2011 had seven and nine launches scheduled, respectively, with a 100 percent launch rate. We expect this more stable flow of satellites to continue.

To that end, 46 launches are planned from fiscal year 2013–2017 with an additional 16 launches in fiscal year 2018–2019. Most of these launches will be reflights for programs that have already launched satellites to support their respective missions. Therefore, future satellites are using identical designs as their predecessors.

This greatly reduces the chance of production delays and increases the likelihood these satellites will launch on schedule. Additionally, the Atlas “white tail” concept (a common booster core for Atlas rockets) and the Delta Fleet Standardization increase flexibility in booster assignment, which reduces launch delays.

In addition, based on the current manifest, there are more launch requirements in the timeframe of the first buy (fiscal year 2013–2017), with approximately 55 cores required in this timeframe. Therefore, I see little risk of oversupply on the 40 core buy, should the Air Force pursue this course of action.

35. Senator BEGICH. Dr. Carter, I understand that DOD is currently finalizing its New Entrant certification requirements for the EELV program. What actions is DOD taking to ensure that New Entrant requirements will be equitable and reasonable to allow for full and open competition under the EELV program?

Dr. CARTER. The Air Force developed a strategy that maintains the current level of mission success while reducing costs; providing opportunities for potential new entrants is an important part of that strategy. To that end, the Air Force worked in close cooperation with NASA and NRO to finalize criteria by which potential new entrants can qualify for EELV-class National Security Space launches. These criteria are equitable and reflect our commitment to competition for qualified new entrants and our obligation to thoroughly examine the performance of competitors. The New Entrant Certification Strategy has been signed by the Air Force, the NRO and NASA, and was released in October 2011. The document defines the coordinated certification strategy for commercial new entrant launch vehicles. Also, the U.S. Air Force Launch Services New Entrant Certification Guide has been signed and was released in November 2011. The Guide provides a risk-based approach that the Air Force will use to certify the capability of potential New Entrant launch companies to provide launch services for EELV missions. The Guide lists a set of criteria that any New Entrant must meet in order to launch a high-value operational satellite. The Guide provides the standard or specifications the contractor must meet, the documents or data the contractor must provide and the evaluation process the Air Force will employ in assessing the criteria. These are important steps toward introducing competition into the EELV program. Additionally, SMC held an industry day on 1 December 2011, which provided the EELV criteria to interested potential space launch providers. The feedback was very positive. I believe this new process will provide a level playing field for any certified new/entrant to fairly compete for EELV missions. In addition, the Air Force will identify specific launch opportunities Reserved for potential new entrants.

QUESTIONS SUBMITTED BY SENATOR JEANNE SHAHEEN

ENERGY EFFICIENCY

36. Senator SHAHEEN. Dr. Carter, there is no better opportunity for DOD to simultaneously satisfy the demands of the current economic climate and advance its strategic objectives than by improving energy efficiency in our military operations. I am pleased to see the advances each of the Services are making toward improving their respective efficiency standards. How will you evaluate if the Services are effectively sharing technologies and lessons learned to maximize investment?

Dr. CARTER. In the current fiscal and strategic environment, the Department is preparing to do more without more. Energy is a key part of this solution. By operating more efficiently and incorporating energy and sustainment considerations into our plans and operations, we expect to gain capability without increasing costs.

The Honorable Sharon Burke, Assistant Secretary of Defense for Operational Energy Plans and Programs (ASD/OEPP), leads the Department’s efforts to ensure energy security for military operations by providing overall policy and guidance pursuant to the Operational Energy Strategy, released this June. In addition, the ASD/OEPP reviews the budgets of each of the Components to certify if the Department’s budget is adequate to implement the Strategy. This certification process allows her to take a comprehensive look across all the Department’s energy investments. The ASD/OEPP completed her first certification for fiscal year 2012 earlier this year and found the process very useful to coordinate technology choices and lessons learned across the Department.

Both the Operational Energy Strategy and fiscal year 2012 Budget Certification are available online (<http://energy.defense.gov>).

In addition, the Department is finalizing our Implementation Plan to support the Strategy, which will promote close coordination across the Department to identify

and share best practices across the full range of activities that affect operational energy.

37. Senator SHAHEEN. Dr. Carter, energy efficiency technologies often require significant upfront investment in order to achieve long-term savings. How will you make the case that these investments are needed given the difficult budget environment and long-term nature of efficiency savings?

Dr. CARTER. It is often difficult for planners and decision makers to make significant investments upfront to save money in the long term, but these sorts of decisions are becoming increasingly important in today's budgetary environment. As the Department considers how it responds to a more constrained budget environment we must take life-cycle cost savings into account, like those that result from improvements in energy efficiency. Investments in a more energy efficient force do more than save money in the long term; they make us a more capable and effective force. I would also note that there are opportunities for near-term energy efficiency improvements that will pay back within the Department's 5-year budget planning horizon.

A more energy-efficient force will make it easier to sustain and operate at the forward edge of the battlefield or in remote regions and reduce the risks to our logistics train. Greater energy efficiency means fewer resupply convoys, greater tactical stealth, longer strike ranges for aircraft, longer time on station for sensors and platforms, and greater operational agility. The Department will push forward with energy efficiency improvements on this operational basis with the consequent financial benefits.

The Department is also pursuing energy efficiency opportunities at our fixed installations, often by leveraging private sector partnerships and financing.

ACTIVE AND RESERVE READINESS

38. Senator SHAHEEN. Dr. Carter, during past difficult fiscal environments, whenever a choice seemed necessary between maintaining Active or Reserve component capability, that choice invariably seemed to be weighted towards the Active component. Given the investment in and growing reliance on the National Guard and Reserves over the last 10 years, do you agree that there is an inherent risk in potentially allowing our Reserve Forces to return to their pre-September 11 readiness?

Dr. CARTER. Yes, I agree that there is an inherent risk in potentially allowing the Reserve component to return to pre-September 11 readiness levels. The Department invested heavily in the Guard and Reserve over the past 10 years in order to prevail in today's wars—meeting the operational demands, while relieving stress on the active Component and bringing their unique skills and experience to the fight. Given this period of fiscal restraint, DOD must make tough decisions and determine acceptable levels of risks in all programs. I will strive to make the most efficient use of the Total Force. I appreciate the value provided by the Reserve components and believe continuing to support their readiness at an appropriate level is an important part in meeting that end.

39. Senator SHAHEEN. Dr. Carter, what steps would you take to prevent this from happening?

Dr. CARTER. At this time, I do not have any specific recommendations, but I understand that the Department will continue to rely on periodic contributions of the Reserve components as an integral part of the Total Force to meet operational demands. This utilization of the Reserve components in operational missions helps to maintain their continued high readiness levels. Additionally, as Overseas Contingency Operations (OCO) funding levels wind down, I believe it is important for the Services to ensure the appropriate levels of readiness for their active and Reserve components are funded in base budgets. Given the fiscal constraints and uncertain security environment, I recognize the need for an efficient Total Force. Additionally, I understand the importance of maintaining appropriate readiness levels for the Reserve components in order to realize the value they provide in delivering capability and maintaining capacity.

RECRUITING SCIENTISTS AND ENGINEERS

40. Senator SHAHEEN. Dr. Carter, DOD and the traditional defense industry are facing challenges seeking new graduates with advanced degrees in scientific and technical fields to help develop complex military systems. What is DOD doing to recruit and retain the best and brightest scientists and engineers?

Dr. CARTER. Each of the DOD Science and Technology Reinvention Laboratories (STRL) labs has the authority to directly hire scientists and engineers with advanced degrees outside of the established Office of Personnel Management (OPM) regulations. This allows Demonstration laboratory directors to quickly make tentative job offers to university graduates and experienced candidates and bring them on-board in only a fraction of the time required for conventional government employment hiring. This process makes DOD labs more competitive with industry and academia for the best and brightest talent. In addition, STRL labs all have pay banding systems that enable a director to offer higher starting salaries than non-STRL labs or other government organizations. While DOD labs may not offer starting salaries as high as many employers in the private sector, the type of work offered is often more attractive to graduates than the higher salaries in industry. Facile hiring procedures might be the deciding factor in a candidate's employment selection decision.

Once on-board a Defense Lab, authorities such as those offered by STRL demonstration projects of Section 219 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 allow a director to better reward high performers and provide training and education opportunities to the workforce. Laboratory demographic data reveal that the organic workforce is overall more highly educated than the general workforce of DOD and the Nation.

41. Senator SHAHEEN. Dr. Carter, in your view, are those efforts effective?

Dr. CARTER. Yes, the efforts of the Department for recruiting scientists and engineers (S&E) are effective. We collect and analyze laboratory demographic data that shows our organic workforce to be overall more highly educated than the general workforce of DOD and the Nation. OSD works closely with the Military Departments to ensure the laboratory workforce has the necessary skills and talents to meet the needs of the Department and deployed forces. Authorities given to laboratory directors via the STRL (STRL, also known as Demonstration or Demo Lab) Program and section 219 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 provides them with flexibilities to recruit and rapidly hire promising university graduates, reward top performers, and provide them with exciting and meaningful work as well as training to maintain their skills. As of the end of fiscal year 2011, there were no identified gaps in DOD's organic laboratory workforce. If any shortfalls are identified in the future, we are prepared to make the necessary investments in training and education programs to strengthen the technical workforce.

42. Senator SHAHEEN. Dr. Carter, how do you measure the effectiveness of these efforts?

Dr. CARTER. The Assistant Secretary of Defense for Research and Engineering (ASD(R&E)) Defense Laboratories Office collects and analyzes laboratory demographic data every 2 years. This information includes skills, diversity, education levels, years of experience and age distribution of scientists and engineers at all DOD in-house laboratories. ASD(R&E) provides this data to the Military Departments and maintains high levels of communication with them on their programs and the status of the laboratory workforce in meeting the technical demands of these programs. As of the end of fiscal year 2011, there were no reported gaps in the skills of the in-house workforce. If shortfalls are identified, ASD(R&E) is prepared to reallocate Science, Technology, Engineering, and Mathematics (STEM) program funds in education and training programs for DOD's current organic workforce.

Implementation of available authorities such as section 219 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 is closely monitored to ensure the Military Departments have the ability to execute training and education programs for their workforce. Currently, the office of the Under Secretary of Defense for Personnel and Readiness (OUSD(P&R)) is working with demo laboratory representatives on an evaluation of STRL (STRL, also known as Demonstration or Demo Laboratory) Program initiatives as well as the need for additional flexibilities that may have arisen since the conduct of the last DOD evaluation in 2005. The data collected and the analysis will be used to refresh current initiatives and develop new ones as appropriate to enhance further the personnel demo projects' positive impact on recruitment and retention of scientists and engineers. ASD(R&E) supports USD(P&R) and Deputy Assistant Secretary of Defense (Civilian Personnel Policy) in the review, refresh, development and implementation of STRL program authorities such as direct hire for candidates with advanced degrees and pay-for-performance systems that both maintain and strengthen the technical workforce of the labs.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

ACQUISITION REFORM

43. Senator MCCAIN. Dr. Carter, in my view, one of the lessons of the JSF program and other problematic weapons systems procurement programs has been the following: DOD tends to start developing weapon systems even though its critical technologies are immature; it begins testing before the systems' designs are demonstrated as stable; and it then ramps up production before testing has shown that these designs meet requirements and are producible. This often leads to higher costs, lengthy development times, and late deliveries to the warfighter. In other words, there tends to be too much concurrency allowing development and procurement to go forward simultaneously. Do you agree with my appraisal that this is what happened in the JSF program?

Dr. CARTER. I agree that the Department must carefully monitor the level of concurrency on the JSF program and other programs. The decision to accept a level of concurrency on the JSF program was made consciously, based on lessons learned from past programs, and the requirement to modernize and recapitalize DOD strike fighter forces. In accepting a concurrent program, the Department planned to replace aging, less capable legacy fighters with a fifth generation strike fighter sooner than what was possible without concurrency. However, development of the three variants of the JSF has taken longer than originally planned, and the aircraft costs have risen and need to be addressed. The Department made procurement and programmatic decisions to mitigate the risks due to concurrency and will continue to review the program with this in mind.

44. Senator MCCAIN. Dr. Carter, what, if anything, can be done to make sure that DOD doesn't start big weapons procurement programs with too much concurrency between development and production in the future?

Dr. CARTER. Starting programs with too much concurrency between development and production is counter to the spirit of the reforms that the Department has undertaken. Concurrency risks are evaluated on a case by case basis, and the Department does not plan to approve of concurrency in our acquisitions without well thought out strategies to balance risk appropriately. It is also important for us to reevaluate concurrency as programs progress to ensure that concurrency risk does not increase unacceptably when schedules are adjusted to reflect discovery in testing.

45. Senator MCCAIN. Dr. Carter, in what other areas could, in your view, DOD improve how it buys major systems?

Dr. CARTER. The Better Buying Power Initiative includes several critical initiatives where the Department can improve the way we procure our major systems. The most important of these for buying major weapon systems is targeting affordability, controlling cost growth, and promoting real competition. Fully implementing these reforms for every program will lead to improvements now, and also to economies of scale as we successfully apply the same reforms to future programs.

The Better Buying Power Initiative includes many important reforms, but it is inevitably not the Department's final word on acquisition improvement. I will continue to work with the acquisition community and Congress, as appropriate, to improve the way we buy our major systems.

46. Senator MCCAIN. Dr. Carter, setting aside those areas squarely addressed under the Weapon Systems Acquisition Reform Act (WSARA) of 2009, what remain the most significant impediments to the ability of DOD to effectively procure major systems?

Dr. CARTER. I don't believe the Department has significant impediments to effectively procure major systems that are not addressed in WSARA. I have found many examples of very effective use of existing techniques already present in DOD toolkits. In the Better Buying Power (BBP) initiative, for example, there is nothing really new. BBP places an emphasis on thinking very carefully about what the Department is trying to achieve and more effectively employing existing practices to increase productivity, constantly manage costs, and incentivize efficiency.

47. Senator MCCAIN. Dr. Carter, in your view, what is the next page of reforming how DOD procures goods and services generally? Please be as specific as possible.

Dr. CARTER. I would continue the effort to improve the defense acquisition system consistent with the direction provided in the WSARA of 2009. However, while WSARA principles have been widely implemented in the Department, more can be

done to further them. Furthermore, the BBP initiative recognizes that the Department's practices for buying services are much less mature than our practices for buying weapons systems. The BBP initiative articulates several ways to improve tradecraft in services acquisition, which forms the next chapter for improving how the Department buys services. To assist with this, each of the Military Services has appointed a senior manager for the acquisition of services at the general officer/flag/senior executive service level. These service managers are responsible for governance in planning, execution, strategic sourcing, and management of service contracts.

Another critical area for improvement is the requirements process. ADM Winnefeld is currently taking steps to reform the Joint Capabilities Integration and Development System (JCIDS) process to ensure it actually makes tradeoffs between cost and performance. The Department is also working to implement a process for determining requirements for services. Lastly, I continue to focus on rapid acquisition, both in institutionalizing the processes developing for satisfying Joint Urgent Operational Needs (JUONS) and making the entire acquisition system more responsive to the Warfighter.

48. Senator MCCAIN. Dr. Carter, what aspects of the JCIDS are most in need of reform?

Dr. CARTER. The JCIDS process most in need of reform is to produce clearly articulated Military needs in their operational context, informed by rigorous analysis of possible alternatives as to potential cost, schedule and performance. A clear understanding of total force capability needs and a proposed solution's fit and priority in its portfolio's architecture must be effectively communicated to the Acquisition Enterprise to enable transformation into design and manufacture of appropriately resourced systems and components. The JCIDS process formulates warfighter needs from a joint perspective, but key inputs lag acquisition activities. Specifically, JCIDS assessment must produce and then facilitate better synchronization of operational factors such as desired performance parameters developed through Materiel Solution Analysis (Analyses of Alternatives and others) in preparation for Technology Development—Milestone A, and refined Key Performance Parameters for Engineering and Manufacturing Development—Milestone B. It is also critical that the JCIDS process allow for realistic tradeoffs between cost and performance.

49. Senator MCCAIN. Dr. Carter, if confirmed, will you vet the Vice Chairman of the Joint Chiefs of Staff's initiative to reform JCIDS that I understand will be issued late this year (or early next year)? If so, would you provide your professional views on its likely efficacy?

Dr. CARTER. AT&L has been actively engaged in the Joint Staff Joint Capabilities Development Process Review (JCD PR) since the summer of 2010, and has assisted in formulation of revisions and refinements to the process that will be promulgated in November or December of this year.

The JCD PR focused on adjusting Joint Requirements Oversight Council support structures and advisory processes to fulfill the Council's goal to shape the future Joint Force. These include early analysis of desired warfighter performance parameters in terms of affordability, risk calculation of tradespace, and prioritization across portfolios; and as Technology Development and Engineering and Manufacturing further refine those parameters, continuous monitoring of a program's achievement of quantified cost, schedule and performance. The concurrent, ongoing reforms of Defense Acquisition System processes to synchronize with JCIDS and incorporate rapid fielding of urgently required capabilities, and continuous coordination with Planning Programming Budgeting and Execution, will be necessary for all three processes to succeed as the Department evolves toward a new Joint Force in the current fiscal environment.

50. Senator MCCAIN. Dr. Carter, what aspects of the resource allocation process, as it relates to DOD's procurement of goods and services, is most in need of reform?

Dr. CARTER. Over the last 2 years, the Department has greatly improved in the area of addressing urgent needs; however, I believe it is necessary to create a closer alignment of the acquisition, requirements, and budget processes across the Department to continue those improvements. In the same way that the Senior Integration Group broadened its purview to cover all urgent warfighter requirements, there are other means by which the Department can expand the type of cooperation and coordination we have instituted for urgent needs, and I plan to make that a priority.

51. Senator MCCAIN. Dr. Carter, what aspects of how DOD contracts for services not addressed in your Better Buying Power Initiative remain in need of reform?

Dr. CARTER. One area that was not expressly addressed in my September 14, 2010, "Better Buying Power" memorandum last year, but remains ripe for reform in order to improve DOD's ability to acquire services effectively, is to enhance and develop the capability of the people who manage service contracts. With the Better Buying Power initiative, we have taken the key first step by putting in place senior managers at the general officer/senior executive service level in each of the DOD components as the responsible agents to oversee the full range of activity associated with the management of service contracts. In order to carry out their responsibilities, these senior managers will need people who have the training and experience necessary to execute the unique aspects of a given service acquisition. As noted by the Defense Science Board Task Force on Improvements in Services Contracting and documented in its report of March 2011, a significant number of functional personnel who are now managing service programs in the Department are not considered members of the acquisition workforce and as such have not received formal training as is mandated for DOD weapon system acquisition program managers under the Defense Acquisition Workforce Improvement Act. We can improve by extending our focus to that community of people. To that end, we have established a Functional Integrated Process Team for Services. The Director of Defense Procurement and Acquisition Policy will work with the President of the Defense Acquisition University to develop training modules, tools, and other innovative solutions targeted to prepare this cadre of people who are generating requirements and managing a wide range of mission capabilities that are fulfilled through service contracts.

52. Senator MCCAIN. Dr. Carter, are there any elements of your Better Buying Power Initiative that you believe could benefit from codification in law? If so, please explain.

Dr. CARTER. No, not at this time. The Better Buying Power initiative is aimed at improving our effectiveness of execution and improving our use of existing tools. Also, the Under Secretary of Defense for Acquisition, Technology, and Logistics has sufficient authority as the Defense Acquisition Executive to enforce these changes.

DEFENSE FINANCIAL TRANSFORMATION

53. Senator MCCAIN. Dr. Carter, for only the second time, the position of Deputy Secretary is dual-hatted with DOD's Chief Management Officer (CMO). As CMO, you would be responsible for DOD's financial management efforts, including getting it fully auditable by 2017, as required under law. Why do you think you are particularly well-suited and sufficiently qualified to making sure that DOD achieves this important objective?

Dr. CARTER. I have served in various positions with DOD, most recently as the Under Secretary of Defense for Acquisition, Logistics, and Technology. I led the Department's efforts to accelerate the fulfillment of urgent operational needs; increase the Department's buying power; and strengthen the Nation's defenses against weapons of mass destruction and other emerging threats. I also led this Department in preparing for new strategic and fiscal realities, shaping key major acquisition decisions. I additionally worked to ensure DOD provides rapid and responsive support to the warfighter, and to transform the way this Department does business and acquires weapons systems. Finally, I worked to ensure that the weapons the U.S. military buys are more effective and more affordable. I intend to leverage this experience to oversee our audit readiness efforts, while relying on the Chief Financial Officer and Deputy CMO for day-to-day execution.

I believe the current streamlined approach to achieving auditability, which focuses on improving and auditing the information most used to manage, is consistent with these efforts. Improving the information used to manage—budgetary and mission critical asset information—allows commanders and other leaders to better meet mission needs with the available resources. This alignment of operational and financial objectives is the most effective incentive to improve financial management. I look forward to working with Secretary Panetta in driving solutions to the strategic management challenges facing DOD.

54. Senator MCCAIN. Dr. Carter, what, in your view, are the most significant impediments to DOD becoming auditable?

Dr. CARTER. DOD's legacy financial processes and systems were established many years ago and designed to ensure budgetary accountability—not meet the proprietary or commercial accounting standards called for in the CFO Act, which are nec-

essary to achieve auditability. To meet these standards, there is a substantial amount of work to be done. Some of the most significant impediments include:

- DOD business and financial management systems are not fully integrated and do not always collect data at the necessary transaction level.
- Reliable end-to-end processes and internal controls have not fully been defined to support financial reporting.
- DOD lacks sufficient operational and financial personnel experienced in financial audits.

55. Senator McCAIN. Dr. Carter, if confirmed as DOD's CMO, how would you address these impediments?

Dr. CARTER. Meeting these challenges and improving our business processes have more attention in the Department than ever before. DOD will address them by changing the way it does business. To realize success, DOD is using a streamlined approach, implemented in August 2009, which focuses on improving and auditing the information most used to manage. Improving the information used to manage—budgetary and mission critical asset information—allows commanders and other leaders to better meet mission needs with available resources. I believe this alignment of operational and financial objectives is the most effective incentive to improve financial management.

The Department is committed to achieving auditability goals and has taken significant steps to ensure the goals are achieved by September 30, 2017, as directed by Congress. There is still a great deal of work required to further improve our financial and business processes in order to meet this goal. I believe the Department can succeed because it has a well-defined plan with specific short-term and interim-term milestones, combined with a long-term roadmap. DOD also provided resources for the effort (approximately \$300 million per year), and a clear governance process. Overall accountability rests with me as the Deputy Secretary of Defense and CMO. However, day-to-day responsibility falls to the Chief Financial Officer (CFO) and DCMO and their staffs, as well as line management throughout the DOD business enterprise. To meet audit challenges, we have developed an effective partnership between the CFO and DCMO communities that will help with implementation. The DCMO and the Military Department CMOs play an integral role in the governance processes, including overseeing the implementation of new systems and the processes they enable. Senior leadership within the military components are committed to, and accountable for, accomplishing these interim goals.

56. Senator McCAIN. Dr. Carter, in connection with his confirmation hearing, Secretary Panetta said getting DOD auditable is a “top priority” and that he would see about accelerating the timetable to getting DOD auditable. Do you share Secretary Panetta's views?

Dr. CARTER. I share Secretary Panetta's desire to increase our efforts to implement the required changes and accelerate our progress in this area.

57. Senator McCAIN. Dr. Carter, how would you improve or accelerate DOD's plan to become auditable?

Dr. CARTER. The Department is dedicated to having fully auditable financial statements by 2017, the deadline established by Congress. On behalf of the Secretary of Defense, the Under Secretary of Defense (Comptroller)/Chief Financial Officer (USD(C)/CFO) is reviewing DOD/Component Financial Improvement and Audit Readiness plans with appropriate DOD leaders to determine what improvements can be made to speed progress. Upon completion of this review, the Secretary will issue formal direction to the Service Secretaries and other leaders on additional actions they must take to ensure sufficient and qualified resources are devoted to achieving this priority in alignment with the Department's strategy and methodology.

58. Senator McCAIN. Dr. Carter, as CMO, you would also be responsible for ensuring that DOD fundamentally transforms how it does business—modernizes its business systems and restructures its processes. For years, GAO has identified these aspects of how DOD does business as exposing defense dollars to the risk of being waste, stolen, or otherwise abused. Why, based on your background and experience, do you think you are particularly well-suited and sufficiently qualified to address how DOD does business and how, if confirmed, would you address challenges in this area?

Dr. CARTER. As Under Secretary of Defense (Acquisition, Technology, and Logistics), I was deeply involved in the Department's operations over the last 2 years. As Defense Acquisition Executive and Defense Logistics Executive, I have fulfilled

leadership roles similar in nature to the CMO. This experience, and particularly my experience in establishing the Better Buying Power initiative across the acquisition activities of the Department, makes me well suited and qualified to address how DOD does business. I look forward to overseeing the Department's responses to both the broad and specific challenges that come with operating such a large, complex and vitally important resource for the Nation. I would address the challenges of modernization of our business systems and processes with the attention and thoroughness appropriate to such a costly and complex undertaking, ensuring that our senior leaders are all carrying out their roles in creating an integrated, effective, and agile business environment, while remaining good stewards of the taxpayers' dollars.

59. Senator MCCAIN. Dr. Carter, do you think that there is merit to separating the CMO function from the position of Deputy Secretary of Defense? Please explain your answer.

Dr. CARTER. I believe the current joining of functions of the CMO and Deputy Secretary of Defense is appropriate. I would inform Congress if I determined that a separation of these duties was merited.

ALTERNATIVE ENGINE FOR THE JOINT STRIKE FIGHTER

60. Senator MCCAIN. Dr. Carter, you have steadfastly supported a single-engine for the JSF, citing the significant upfront cost of a dual-source strategy and numerous analyses showing that, under the best of circumstances, there may never be a payback for carrying two engine suppliers. Given the enormity of possible spending cuts DOD is facing and the possibility that overall production numbers of the F-35 might be reduced, what is your assessment of the business case for two engine sources today?

Dr. CARTER. My position as well as the Department's position on the business case for the alternate engine remains unchanged: the costs to pursue a second engine are significant and immediate, while the benefits are speculative and would not be realized until many years later. As you allude to, the fiscal situation facing the Department amplified our concerns with the second engine program. The Department anticipates that many difficult situations will have to be made on major weapon systems, including the JSF program at large. DOD simply cannot afford to continue the second engine development activities with the many higher military priorities and the stringent budgets it faces.

61. Senator MCCAIN. Dr. Carter, how does the offer from the industry team producing the engine to cover the remaining costs of development impact your opinion?

Dr. CARTER. The industry team has not made an offer to the Department to cover the remaining costs of the development program. There was discussion of a "proposal" from them to self-fund the second engine development activities for some limited period. The details of this "proposal" are sketchy at best. On April 25, 2011, the Department initiated the contract termination process and all qualification activities for the second engine ceased. DOD can reasonably project that any effort to continue the engine effort in isolation from the Government is likely to require extensive integration and validation efforts at a later time. These activities would require both time and resources which would ultimately be paid by the Government.

62. Senator MCCAIN. Dr. Carter, based on what you currently know about it, why isn't this self-financing offer something we should embrace?

Dr. CARTER. The Department did not receive a proposal to self-finance the development of the alternative engine. In the absence of a proposal, it is difficult to determine whether such an idea would be in the best interests of the Department. The Department anticipates that the government would bear costs even under a self-funding proposal. For example, if the contractor self-financed the effort in isolation from the government, there would likely be a significant cost to the Government to re-integrate the second engine at a later time. The contractor may also require access to government test assets and facilities and this would also come at a cost to the Government. In addition, the contractor could pass the self-funding costs back to the Government via increased overhead rates and production prices. Careful scrutiny of a submitted detailed proposal would be required before DOD could objectively assess whether a self-financing "offer" would be something it should embrace.

63. Senator MCCAIN. Dr. Carter, outgoing Deputy Secretary Lynn recently disagreed with the suggestion of a number of my colleagues that DOD should preserve

all the equipment associated with development of the alternate engine so that the contractors could self-fund development. Do you share Secretary Lynn's position? Please explain.

Dr. CARTER. I do share Deputy Secretary Lynn's position that equipment purchased by DOD should be preserved as deemed necessary for use by DOD. A significant amount of the government equipment acquired under the F136 contract does, in fact, possess utility and value to the Department. For example, the F136 ground test engines have potential value to other DOD engine science and technology programs, such as the Adaptive Versatile Engine Technology program, and requests for F136 hardware have already been received from DOD research labs. Additionally, common hardware procured under the F135 contract and provided to the F136 development program, is also useful to the F135 program. Examples include the use of exhaust modules as development and flight test spares, and the use of the lift system controls hardware in software bench testing. The lift system common hardware (lift fan, driveshaft, exhaust module, and roll posts) can also be used by the F135 program. Preservation of any other equipment not found useful would come at additional expense to the Government, something the Department is not prepared to do.

U.S. FORCE REALIGNMENTS IN THE PACIFIC REGION

64. Senator MCCAIN. Dr. Carter, we were recently briefed that the current cost estimate for the U.S. share of expenses of the planned relocation of 8,700 U.S. marines from Okinawa to Guam, is now over \$17 billion. That's \$10 billion more than we estimated when we reaffirmed the agreement with the Government of Japan in 2009. I expect that the U.S. cost for construction of facilities will only rise as we include land acquisitions and improvements to the infrastructure of Guam. While I understand and support the need to maintain U.S. forces in the western Pacific, at what point does the movement of marines and their families to Guam become cost prohibitive?

Dr. CARTER. Our military forces in Japan are a central feature of our Asia-Pacific strategy, and the geostrategic location of Okinawa in East Asia is a critical component of this strategy. In order to ensure our continued use of facilities in Okinawa, we must not only address the impact of the U.S. Marine Corps Air Station Futenma on the surrounding communities, but we must also seek to reduce our overall footprint. The 2006 Realignment Roadmap attempts to accomplish these goals.

In the context of reducing the U.S. presence on Okinawa, and consistent with our renewed emphasis on the global importance of the Asia-Pacific region, we seek a more geographically distributed, operationally resilient, and politically sustainable presence in the region. Guam must be part of that solution. As the westernmost reach of U.S. sovereign territory, Guam provides unconstrained access and operational flexibility for our forces. The Department is committed to establishing an operational U.S. Marine Corps presence on Guam.

In response to numerous comments from Members of Congress, local political leaders, and citizens groups, the Department is carefully re-examining its options for Guam and is focused on developing an efficient, cost-effective laydown and master plan. I recognize the fiscal constraints we face in developing and implementing a force posture consistent with our strategy.

65. Senator MCCAIN. Dr. Carter, in your opinion, given the direction to reduce defense spending, is DOD studying less costly alternatives that would achieve the same strategic benefits?

Dr. CARTER. In response to numerous comments from Members of Congress, local political leaders, and citizens groups, the Department is carefully reexamining our options for Guam and are focused on developing an efficient, cost-effective laydown and master plan. I recognize the fiscal constraints we face in developing and implementing a force posture consistent with our strategy for the region.

66. Senator MCCAIN. Dr. Carter, what is your assessment of the status of the relocation of Marine Corps Air Station Futenma to Camp Schwab on Okinawa, a Japanese funded initiative which is supposed to be contingent on the move of marines from Okinawa to Guam?

Dr. CARTER. The Department conveyed to the Government of Japan the urgency of taking the necessary steps to get construction on the airfield underway, starting with the approval of the landfill permit. In my judgment, the Japanese remain committed to the Realignment Roadmap.

At the “2+2” meeting in June of this year, Secretary of Defense Gates and Secretary of State Clinton endorsed a plan for the configuration of the runway, while acknowledging that the FRF would not be completed by the Realignment Roadmap target date of 2014.

Construction on the ground at Camp Schwab, which will enable the airfield construction to move forward more rapidly, has been underway for the past few years.

67. Senator McCAIN. Dr. Carter, when do you believe we will see tangible progress on the relocation of Futenma?

Dr. CARTER. “Tangible progress” on the Futenma Replacement Facility (FRF) should be understood within the context of the complete language in the Roadmap concerning the linkage between actions on Okinawa and Guam: “the III MEF relocation from Okinawa to Guam is dependent on: (1) tangible progress toward completion of the FRF and (2) Japan’s financial contributions to fund development of required facilities and infrastructure on Guam.”

In testimony before the House Armed Services Committee on February 15, 2011, Secretary of Defense Gates reiterated this formula, and further indicated his expectation that a decision on runway configuration would allow us to continue implementing the agreement. At the “2+2” meeting on June 21, 2011, Secretary of Defense Gates and Secretary of State Clinton endorsed a plan for the configuration of the runway, while acknowledging that the FRF would not be completed by the Realignment Roadmap target date of 2014.

Tangible progress should not be thought of as single, specific event, but rather as a series of steps of roughly parallel Japanese and U.S. actions. Our understanding with the Government of Japan is that as progress on the FRF is achieved, the United States will take associated steps to move forward on Guam. I would see examples of noteworthy progress on the FRF being the decision on the runway configuration, approval of the environmental impact assessment, issuance of the landfill permit, construction of the seawall, and progress on the landfill itself.

68. Senator McCAIN. Dr. Carter, DOD recently awarded construction projects on Guam using funds provided by the Government of Japan, despite the lack of tangible progress on Futenma and despite concerns formally raised by this committee on the lack of a plan and cost estimate for the marines on Guam. Can you explain why the construction contract was awarded at this time in light of congressional concerns and unanswered questions?

Dr. CARTER. I appreciate the committee’s concern regarding the Guam military realignment. In determining whether to award the Japanese-funded utilities and site improvements project, the Department seriously considered these concerns, as well as the interests of our partners in Japan and Guam, and the actions taken by the House. DOD deferred award of both the Apra Harbor Medical Clinic project and the option for utilities and site improvements at Finegayan. However, we elected to move forward with the utilities and site improvement work at Apra Harbor and Andersen Air Force Base (AFB), funded with Japanese fiscal year 2009 cash contributions, as these projects directly support previously awarded Military Construction (MILCON) projects and will be operationally beneficial. Congressional notification was completed in October 2010, and your staff was briefed at that time.

The Government of Japan supported the decision to award the contract. With this first award of a Japanese-funded project, the United States is demonstrating its commitment to the Realignment Roadmap in accordance with the joint statement at the time of the June 2011 “2+2” meeting.

Tangible progress on the Futenma Replacement Facility (FRF) should not be viewed as a single, specific event, but rather as a series of steps of roughly parallel Japanese and U.S. actions, as spelled out in our bilateral understandings on realignment. As the Government of Japan makes progress on the FRF, DOD will take associated steps to move forward on Guam.

An essential point regarding the relationship between the Okinawa and Guam initiatives is that preparation on Guam will need to begin in advance of actual construction on the ground for the replacement facility at Camp Schwab. This will ensure that when Japan makes satisfactory progress on the FRF, suitable facilities will be available on Guam allowing the phased relocation of marines from Okinawa, sequenced in such a way as to maintain unit cohesion and operational readiness. The movement of marines to Guam, consistent with the agreement, depends on tangible progress towards the completion of the FRF at Camp Schwab.

69. Senator McCAIN. Dr. Carter, if you are confirmed as Deputy Secretary of Defense, how would you approach this issue?

Dr. CARTER. I will continue to consult closely with all relevant committees of Congress, allies, and partners in implementing the necessary force posture adjustments, consistent with the Department's regional strategy.

MILITARY PAY REFORM

70. Senator MCCAIN. Dr. Carter, the Joint Select Committee on Deficit Reduction (JSCDR) has to make some decisions in the weeks ahead about future defense costs. The current 20-year military retirement system has come under scrutiny, particularly as the JSCDR begins its work and the requirement for deep cuts in defense costs looms. What is your sense of DOD's current position regarding retention of the current 20-year retirement system?

Dr. CARTER. The 20-year retirement system has been a part of the military compensation and culture for decades; the entire force profile and promotion system is built around that structure. Revising or eliminating such a system must be approached deliberately and with a great amount of circumspection. The Department's leadership must be confident that any change in retirement will not have a significantly deleterious effect on the force or on individuals in the force, but will be supportive of recruitment and retention and will fairly compensate our servicemembers.

71. Senator MCCAIN. Dr. Carter, do you see the need for change? Please explain.

Dr. CARTER. Overall, I see the need for a close review and analysis of the military retirement package. The review must consider the impact on recruiting and retention, the welfare of individual members, and judicious use of taxpayer dollars and the defense budget. Whether that review and analysis will support the case for change is undetermined at this point.

72. Senator MCCAIN. Dr. Carter, what would DOD's response be to a call for a recommendation regarding maintaining the current system or relying on a new system?

Dr. CARTER. As far as recommendations, the Department already had several such calls, from various sources, for both preservation and reformation of the military retirement system. At this point, DOD's response is that the impact on military accessions and retention and other impacts on the force structure must be carefully assessed. While the military retirement system, as with all other compensation and benefits, is a fair subject of review for effectiveness and efficiency, no changes to the current retirement system have been recommended or approved by the Department, and no changes will be made precipitously or without careful consideration of potential consequences for both the current and future force.

73. Senator MCCAIN. Dr. Carter, if confirmed, what would be your answer to a question from a currently serving military member about the future of the 20-year retirement system?

Dr. CARTER. The Department's leadership is extremely sensitive to ensure we do not break faith with our currently serving members, especially those who demonstrated an inclination to a full military career by serving past their initial obligation period. Any proposed change or changes to the current system will be evaluated carefully and consideration of those obligations will be of the highest priority.

QUESTIONS SUBMITTED BY SENATOR JAMES M. INHOFE

CIVILIAN HIRING FREEZE

74. Senator INHOFE. Dr. Carter, many small units in my State are being negatively affected by the civilian hiring freeze. They are not able to replace important positions in maintenance on our flight lines and depots, flight training, and other specialties. These cuts affect each unit's ability to accomplish their mission. In the last 5 years, blue collar and technical positions have flatlined. However, white collar professional and administrative positions have grown by 19 percent. This statistic may be an indicator of an increasingly top-heavy corps of DOD civilians, but reflects that at the worker-level, our DOD professionals continue to do more with less. What is the way forward for the civilian hiring freeze?

Dr. CARTER. As part of the Department's efficiency initiative, Secretary Gates directed DOD organizations to hold to fiscal year 2010 civilian funding levels, with some exceptions, for the next 3 years. This should not be perceived as a civilian hiring freeze but rather the Department's commitment to challenge workload requirements and more appropriately size its workforce to meet the most pressing and crit-

ical priorities. In particular, Secretary Gates' efforts focused on reducing administrative functions associated with headquarters staff while realigning resources to warfighting capability, force structure recapitalization, and unit readiness. Secretary Panetta and I are committed to ensuring that the Department possesses everything it needs to protect national security at a time of considerable fiscal challenge in our country. To do so, spending choices must be based on sound strategy and policy. While some DOD organizations may be implementing short-term hiring freezes, sometimes referred to as strategic pauses, there is no Department-wide hiring freeze or constraint on any specific aspect of the workforce. These strategic pauses give Commanders and managers an opportunity to assess their organizational structure, identify their most pressing and critical areas, and minimize the potential adverse impact on our dedicated civil service workforce. Mission capability and unit readiness are a key element of these assessments.

75. Senator INHOFE. Dr. Carter, how will you ensure that DOD operations are not affected by the reductions in DOD civilians?

Dr. CARTER. Reductions in the Department's civilian workforce are being considered strategically and holistically (along with military end-strength, contracted services, and overall force structure). Any such reductions will be made in a manner that mitigates risk and minimizes impact on overall DOD operations, mission capability, operational readiness, and warfighter/family support. However, as Secretary Panetta and the Department's leadership have repeatedly stated, any further budget reductions beyond those in the current agreements, or constraints on hiring or retention of the Department's civilian workforce, would have an extremely adverse impact on our military's readiness and ability to execute the Nation's defense.

COMMITTEE ON FEDERAL ACQUISITION RULE REFORM

76. Senator INHOFE. Dr. Carter, despite well-founded attempts to improve our Federal Acquisition Rules (FARs) they remain complicated and outdated, leading to increased procurement times and costs. There are 1,680 policy documents and 91 laws affecting the FARs. There were 30 new documents added in 2011 alone. DOD has developed alternative procedures, working groups, and organizations, such as Joint Improvised Explosive Device Defeat Organization (JIEDDO), that essentially bypass the current FARs, in order to rapidly field new weapons systems.

The General Services Administration (GSA), NASA, DOD, and Office of Management and Budget (OMB) met in February to develop "bold, new ways to improve the product quality and timeliness of the FAR process ... [and call] for a tune-up of the FARs." FARs need more than a tune-up. The FAR Counsel, made up of the Administrator for Federal Procurement Policy, the Secretary of Defense, the Administrator of National Aeronautics and Space, and the Administrator of General Services, are too busy to focus on rewriting and overhauling FARs. Do you believe the FARs have played a role in increasing the procurement costs and timelines of our weapon systems?

Dr. CARTER. On the whole, I do not believe that the Federal Acquisition Regulation (FAR) increases procurement costs and timelines of our weapon systems. I also note that we continuously update the FAR to reflect current statutes, executive orders, and acquisition policies. DOD supplements the FAR in the Defense FAR Supplement (DFARS) to reflect Department-unique laws and policies, and continuously updates the DFARS to ensure currency. The FAR and DFARS are codified in the Code of Federal Regulations, and revisions/updates to the FAR and DFARS are processed in accordance with the requirements of the Office of Federal Procurement Policy Act. These requirements include public comment periods that allow for all interested parties to provide comments and recommendations.

As part of our Better Buying Power Initiative, we are looking very carefully at all processes and regulations that govern the operation of the acquisition system. My intent is to eliminate all that fail to add value and, consequently, to avoid the cost and unnecessary administrative burden they impose on our acquisitions.

Separately, as a matter of clarification, the Joint Improvised Explosive Device Defeat Organization (JIEDDO) does not bypass the FAR. The JIEDDO leads, advocates, and coordinates all DOD actions in support of the combatant commanders' and their respective Joint Task Forces' efforts to defeat improvised explosive devices (IED) as weapons of strategic influence. It leverages the experience and expertise of warfighters across the Military Services, enhances network attack focus, increases procurement of device-defeat tools, and builds a robust set of IED-specific force training operations. However, it does not use procurement processes outside the FAR and DFARS.

Finally, the Department established the Joint Rapid Acquisition Cell (JRAC) to facilitate an expeditious response to validated urgent Warfighter needs. The JRAC provides help in pushing urgent requirements through processes that are optimized for speed but compliant with the FAR and DFARS.

77. Senator INHOFE. Dr. Carter, what do you think of setting up a 1-year commission to overhaul and rewrite FARs, a commission with members selected by Congress and organizations on the FAR Counsel responsible to reporting back to Congress their recommendations on streamlining and simplifying the FARs while ensuring proper oversight?

Dr. CARTER. I do not believe that we need such a commission. We continuously update the FAR and the DOD FAR Supplement (DFARS) to ensure implementation of current statutes, executive orders, and acquisition policies, as well as the deletion of obsolete text. As the Department takes these actions, one of the principles is to simplify and streamline the text to the maximum extent possible.

The FAR does not increase the lead times or costs of procurements. The existing process ensures the currency of the FAR and DFARS, and a 1-year commission to overhaul and rewrite the FAR is not necessary and not an effective use of resources.

PALADIN

78. Senator INHOFE. Dr. Carter, I disagreed with the decision to terminate the Future Combat Systems (FCS) because our Army is in desperate need of modernization and our soldiers deserve better than 50-year-old combat vehicles with 7 layers of new paint. The Paladin Integrated Management (PIM) is now the Army's lead fire support modernization effort in the wake of non-line-of-sight cannon (NLOS-C) cancellation. PIM will enhance the operational capability of the 46-year-old Paladin until we are able to acquire the next generation self-propelled howitzer. PIM is currently funded and I continue to work with the Army to accelerate fielding. Can you explain the significance of the PIM program and the importance of this program moving forward?

Dr. CARTER. The PIM program consists of a process that rebuilds vehicle platforms to original factory standards and applies modifications to deliver "like new" platforms, while incorporating improved subsystems and components to address obsolescence and supportability issues. The objectives are to ensure supportability/maintainability/interoperability by leveraging Heavy Brigade Combat Team (HBCT) fleet commonality for key components (engine, transmission, final drives, and suspension); replacing obsolete components; reducing logistics footprints; reducing operations and support costs; maintaining performance; leveraging Bradley common components; addressing crew survivability issues; and performing technology insertion.

PIM will address increased force protection and survivability requirements. The PIM also fills existing capability gaps in the self-propelled artillery portfolio brought about by an aging fleet and the termination of prior modernization efforts. PIM provides growth potential in Space, Weight and Power (SWaP) and capacity for network expansion to accommodate future howitzer related needs, such as force protection packages. The Department is scheduled to award a Comprehensive Contract Modification by the end of 2011 and maintain Milestone C in June 2013.

F-35

79. Senator INHOFE. Dr. Carter, DOD recently sent a report to Congress on the Chinese military, warning that: "... China's military has benefited from robust investment in modern hardware and technology. Many modern systems have reached maturity and others will become operational in the next few years." One of those investments includes their new J-20 stealth fighter, which is actively undergoing testing. Russia is also unveiling its fifth generation fighter jet—the T-50—and is preparing to present it to the world market.

What impact does the development and potential export of Chinese and Russian fifth generation fighters, proliferation the new surface-to-air missile systems, and improvements in missiles and sensor technology have on our legacy aircraft?

Dr. CARTER. Modern fighter aircraft, surface to air missiles, and sensors constitute a part of the growing threat posed to U.S. military forces by a wide array of systems. Our most capable adversaries are also deploying ballistic and cruise missiles, modern surface ships and submarines, mines, anti-satellite weapons, cyber threats, electronic warfare systems, and other weapons that enable anti-access and area denial (A2/AD) strategies.

DOD is assessing these threats and instituted a number of initiatives to counter them. These run the gamut from developing new platforms (e.g., the F-35 and a new penetrating bomber), to fielding improved weapons and munitions (e.g., an extended range air-to surface standoff munition and a beyond-visual-range infrared air-to-air missile), to advanced electronic countermeasures, to new concepts for integrating and employing joint forces.

In this dynamic threat environment, legacy aircraft operate at higher risk compared to fifth-generation aircraft but can conduct a range of necessary missions given adequate investments in upgraded avionics, sensors, and weapons. Within the context of these and other developments, U.S. forces will continue to operate a mixed fleet of mutually supporting fifth generation and legacy aircraft, investing in a more modern force over time.

80. Senator INHOFE. Dr. Carter, is 2,443 the validated number of F-35s required by our Air Force, Navy, and Marine Corps? If so, is DOD committed to fielding the required fleet of 2,443 F-35s for all three Services and delivering the airplane to our international partners and allies as quickly and affordably as possible?

Dr. CARTER. The current program of record is 2,443 F-35s for the three U.S. Military Services. The Department is committed to fielding the F-35 as efficiently and affordably as possible to meet the Services and DOD requirements. Our international partners determine their own requirements, based on how many F-35 aircraft they need and when they need to purchase those aircraft. The partners negotiate directly with the contractor based on their requirements timeline.

TACTICAL DOMINANCE

81. Senator INHOFE. Dr. Carter, as a proportion of total combat deaths, infantry has increased from 71 percent in World War II to 81 percent in wars fought since. Our acquisition system is optimized for procuring large systems instead of extending our tactical dominance to the tactical edge. We need to meet the challenge, however, to make our small units tactically dominant. I echo General Dempsey's call to make the infantry squad more lethal. He said, "We don't want to send a soldier into harm's way who doesn't overmatch his enemies." I am concerned that we may lose budget-share for our organizations that support the individual rifleman—a large portion of the program executive office (PEO) soldier budget comes from overseas contingency operations (OCO) which is dwindling even though we are still heavily engaged in Afghanistan. Is DOD looking at warfare from the ground up?

Dr. CARTER. Despite anticipated changes in overseas contingency operations and fiscal challenges, the Department is committed to providing small units with the equipment and training needed to maintain tactical dominance. Although our warfighters are better trained, led, and equipped, and more capable than ever, the Department must continuously evolve to maintain dominance over changing enemies and threats.

82. Senator INHOFE. Dr. Carter, what are some of the ways DOD is working to improve and lighten the load on our ground forces?

Dr. CARTER. The Department intends to continue pursuit of lighter body armor; lighter and more capable individual and crew-served weapons; and smaller, lighter, and more efficient batteries in order to reduce the burden on our ground forces.

83. Senator INHOFE. Dr. Carter, how will you ensure our acquisition system can better equip our soldiers and marines at the tactical edge?

Dr. CARTER. It is important for the Department to continue using all available acquisition means to lighten the rifleman's load and increase survivability and lethality. In addition to employing a deliberate acquisition approach to mature new technologies and integrate them into military equipment, the Department is responding to urgent warfighting needs by fielding mature capabilities as rapidly as possible, using all available rapid acquisition authorities, and working to better formalize and enhance the rapid acquisition process.

ARMY VEHICLE MODERNIZATION

84. Senator INHOFE. Dr. Carter, the Army procured its current fleet of combat vehicles 30 to 60 years ago and they are aging at an increasingly rapid rate. General Casey and General Chiarelli have stated they are burning up equipment as soon as they can procure it. Yet, Army procurement funding decreased \$31 billion from fiscal year 2008 to fiscal year 2010. In a June 16, 2009, Senate Armed Services

Committee Airland Subcommittee hearing, LTG Thompson (Army Chief Acquisition Officer) said, "The Army has tried 5 times in the past 20 years to modernize its fighting vehicles . . . [I]t has kept its tanks and Bradleys operationally relevant [but] at some point in time the Army has to modernize those 16,000 fighting vehicles for the future or we are going to put soldiers in harm's way." The Army is moving forward with plans on the next combat ground vehicle but the only vehicle being discussed is the infantry vehicle. What is the overall plan for Army vehicle modernization?

Dr. CARTER. The Army has a comprehensive Combat Vehicle Modernization strategy that addresses key capability shortfalls for the entire combat vehicle fleet (Abrams tank, Bradley Fighting Vehicle, Stryker, and M113 family). The strategy is based on three parallel and complementary efforts: transform, replace, and improve. The highest priority effort is transforming the capability of the Heavy Brigade Combat Team by acquiring the Ground Combat Vehicle Infantry Fighting Vehicle. The second priority is replacing the M113 Family of Vehicles with an Armored-Multi Purpose Vehicle (AMPV). Lastly, the Army will improve the Abrams tank, Bradley Cavalry, Fire Support, and Engineer Vehicles, and the Stryker to increase protection, ensure required mobility, and allow integration of the emerging network. This strategy ensures the Army's entire fleet of combat vehicles will be able to operate side-by-side across formations with common situational awareness and required levels of protection, mobility, and lethality.

85. Senator INHOFE. Dr. Carter, what vehicles will be included as part of the Army's next combat ground vehicle?

Dr. CARTER. The Army is pursuing an incremental approach to procuring new Ground Combat Vehicle capabilities. The Army will first replace the Bradley Infantry Fighting Vehicle with a new Ground Combat Vehicle (GCV). The GCV acquisition strategy implements innovative measures designed to keep the program on schedule and on budget, to include fixed-price incentive fee contracts in the 2-year Technology Development phase, an increased emphasis on mature technologies and reliance on competition throughout the program as an incentive. First, contractors will work collaboratively with the Army to develop competitive, best-value engineering designs to meet critical Army needs. Concurrently, the Army will initiate a dynamic update to its GCV Infantry Fighting Vehicle analysis of alternatives and conduct separate technical and operational assessments of existing non-developmental vehicles. Results from this assessment, along with contractors design efforts, will inform GCV requirements to support the next program milestone and facilitate a full and open competition for the next phase of the GCV program. Further increments of the vehicle are anticipated in the future, as additional capabilities are required.

In terms of the overall combat vehicle portfolio, the Army is also examining potential solutions for the Armored Multi-Platform Vehicle to replace the M113. The Army will conduct analysis to determine whether modified platforms already in the inventory or non-developmental vehicles provide the best capability.

86. Senator INHOFE. Dr. Carter, will we be procuring one type of vehicle at time or multiple platforms?

Dr. CARTER. To ensure interoperability of the Army's mounted force, the Department will invest in multiple platforms simultaneously, through a combination of new procurement and vehicle upgrade programs.

87. Senator INHOFE. Dr. Carter, when do you expect increased budgets for procuring these vehicles?

Dr. CARTER. The Ground Combat Vehicle (GCV) is funded in PB12 and the funding extends throughout the FYDP. In addition to the GCV, the Army's Combat Vehicle Modernization (CVM) strategy has several other components, to include upgrading Abrams tanks and non-IFV Bradleys. Upon congressional approval of a new start, the Army intends to initiate the Armored Multi-Purpose Vehicle (AMPV) program. The AMPV will replace the M113 Family of Vehicles (FOV) with a platform that is more survivable and mobile and can accomplish missions across the full spectrum of conflict.

The Army's PB12 request includes RDT&E funding for all three CVM components. Procurement funding for the AMPV is planned to start in fiscal year 2014 with the first unit equipped planned for fiscal year 2017. Abrams and non-IFV Bradley upgrades are also funded in PB12 and the funding extends throughout the FYDP.

The Army believes that collectively, all components of the Combat Vehicle Modernization Strategy are within the Army's projected funding resources.

IRAQ

88. Senator INHOFE. Dr. Carter, there are approximately 46,000 U.S. troops in Iraq. Iraqi Prime Minister Maliki and other Iraqi leaders have indicated they would like a U.S. presence beyond 2011 focused on training their forces, intelligence, and protecting their air space and borders. Massoud Barzani, President of Iraqi Kurdistan, said if American troops leave, the sectarian violence that plagued Iraq after U.S.-led operations began might erupt anew and called on the Iraqi Government to sign an agreement with the Americans to keep forces in the country.

The Obama administration is finalizing several options that could leave as little as 3,000 to 4,000 U.S. forces in Iraq beyond that date, but no decision has been made by Iraq or the United States. This number is significantly lower than the 14,000 to 18,000 recently presented by General Lloyd Austin, Commanding General, U.S. Forces-Iraq. I believe leaving 3,000–4,000 U.S. forces in Iraq increases the risk to those forces and jeopardizes the successes achieved made by the Iraqi people and the coalition of nations who help liberate them. What is the U.S. Government's strategic plan in Iraq and how does a U.S. force presence contribute to that strategy?

Dr. CARTER. Strategically, a long-term partnership with the Iraqi Government and people is in the United States' interest, and a relationship with the Iraqi Security Forces (ISF) will be an important part of that partnership. The Department is currently in negotiations with the Iraqi Government about the nature of that relationship. The negotiations to date focused on possible mission sets to support the ISF in areas that Iraqi commanders have identified as shortfalls, such as: logistics, air and maritime security training, combined arms training for Iraq's external defense, and intelligence fusion for Iraqi counterterrorism operations.

Iraq no longer needs large numbers of U.S. forces to maintain internal stability, and the commanders in the field assess that the ISF can handle counter-insurgency operations. The ISF has the lead for security, and levels of violence remain dramatically reduced from where they were in 2006 and 2007.

At this point, no decisions have been made about any force levels in Iraq after 2011. The United States will continue to adhere to the 2008 U.S.-Iraq Security Agreement.

89. Senator INHOFE. Dr. Carter, how does a U.S. force presence in Iraq impact the security of the region?

Dr. CARTER. Given Iraq's importance and strategic location, it is profoundly in the U.S. national interest that Iraq emerge as a strategic partner to the United States; sovereign, stable and self-reliant; and a positive force for moderation and stability.

We seek to achieve that end in part through the development of a continuing security partnership similar to those the United States has with other countries in the region. Such a partnership, which would center around a training mission, would be defined based on Iraqi desires, available U.S. and Iraqi resources, and competing global requirements. Training the Iraqi Security Forces would increase Iraq's capacity for both internal and external defense, and would build toward our shared objective of a strong strategic partnership that contributes to regional security.

That said, no final decisions have been made—nor have we reached an agreement with the Government of Iraq—about a post-2011 U.S. presence in Iraq.

90. Senator INHOFE. Dr. Carter, what are the courses of action currently being looked at in Iraq, what are the risks associated with different courses with regard to troop levels, and what missions can be accomplished with those force levels?

Dr. CARTER. We are currently in negotiations with the Iraqi Government about the nature and scope of a potential future relationship. Any future security relationship would be fundamentally different from the one that we have had since 2003. The United States wants a normal, productive relationship with Iraq going forward—a partnership like we have with other countries in the region and around the world.

For some time, the Department had had informal consultations with our Iraqi partners, including senior Iraqi Security Forces (ISF) officials, regarding ISF gaps and areas in which the ISF might request training post-2011. These areas include combined arms training, necessary for Iraq's external defense; intelligence fusion (essential for a counterterrorism capability); air and maritime security training; and logistics.

The negotiations to date have focused on the possible mission sets to support the ISF in these and other areas. Any post-2011 U.S. forces presence upon which the United States and Iraq might ultimately agree would flow from the requirements to support training and related mission sets.

Again, we have made no final decisions—nor reached any agreement with the Iraqis—about a post-2011 U.S. forces presence in Iraq.

AFGHANISTAN

91. Senator INHOFE. Dr. Carter, Afghanistan remains as one of the epicenters of violent extremism. Progress has been made but it is fragile and reversible. The deadlines of July 2011, summer of 2012, and December 2014 continue to have a devastating effect on operations and has sent the wrong message to our coalition partners, the people of Afghanistan, and the Taliban. Enemy activity in Afghanistan historically intensifies during the summer and this summer prove no different as evidenced by the bombing in Wardak Province on Sunday and the attacks in Kabul today. However, the Obama administration began drawing down U.S. forces beginning this July when almost 1,000 soldiers from the 45th Infantry Brigade Combat Team from Oklahoma were rerouted at the 11th hour to Kuwait. This strategy of not replacing units as they rotate out of Afghanistan is disruptive and increases risk.

August was the deadliest month for U.S. forces since the war in Afghanistan began in 2001 with a total of 66 killed, 30 in a Chinook helicopter crash on August 6. Since July 29, 2011, Oklahoma soldiers have been killed in Afghanistan—they are doing a great job, are well-trained, but they are fighting it out every day executing the mission we have given them. President Obama has ordered the withdrawal of 10,000 U.S. forces this year and another 23,000 by the summer of 2012, leaving about 68,000 forces on the ground. What rationale drove the drawdown at the height of the fighting season?

Dr. CARTER. The “surge” of forces ordered by President Obama in 2009 was never intended to be open-ended, and has always been connected to the beginning of the transition process, which began in 2011. Campaign progress allowed the Department to begin recovering “surge forces,” marking an important milestone toward the completion of the transition of lead security responsibility to the ANSFs by the end of 2014. Further, decisions over the pace and timing of the drawdown, within the designated milestones, were delegated to Commander, U.S. Forces Afghanistan/International Security Assistance Force (USFOR-A/ISAF). DOD is carefully monitoring campaign progress, and will ensure that decisions about force strength support the strategy.

92. Senator INHOFE. Dr. Carter, Ambassador Crocker said earlier this month that the United States must demonstrate strategic presence to win this long war in Afghanistan. Do you believe setting withdrawal dates of July 2012 and December 2014 demonstrates strategic patience and shows U.S. long-term commitment?

Dr. CARTER. The beginning of the recovery of the surge forces and the plan for completing transition of lead responsibility for security throughout the country to Afghan forces by the end of 2014, combined with the strategic partnership the United States is negotiating with the Afghan Government, show strategic patience and long-term commitment. These dates are achievable and consistent with the Afghans’ own desire and efforts to increase their responsibility and leadership for the security of their country.

93. Senator INHOFE. Dr. Carter, do you believe that a stable Afghanistan will help prevent future attacks like that of September 11, 2001, on this country?

Dr. CARTER. Yes. President Obama’s strategy—as laid out in his West Point address on December 1, 2009—focuses on our core goal, which is to disrupt, dismantle, and defeat al Qaeda and to prevent its capacity to threaten the United States and our allies and partners in the future.

To accomplish this, the Department is pursuing three objectives that will secure and stabilize the country: deny al Qaeda a safe haven, reverse the Taliban’s momentum, and strengthen the capacity of Afghanistan’s security forces and government so that they can take lead responsibility for Afghanistan’s future.

DOD made substantial progress on these objectives and have exceeded our expectations on the core goal of defeating al Qaeda, killing 20 of its top 30 leaders, including Osama bin Laden. The United States and its allies have broken the Taliban’s momentum in their heartland in Kandahar and Helmand. We have also trained more than 100,000 new ANSF personnel, who are now in the lead for security responsibilities in seven areas of the country, with more to follow this fall.

This undeniable progress is important to American security because it helps foster an Afghanistan that is stable and secure—a country in which extremists will not find

a safe haven or a platform for launching attacks on the United States and our allies and partners.

WEAPONS BOYCOTTS

94. Senator INHOFE. Dr. Carter, European activists, including European parliamentarians, are pressuring European banks and funds to divest themselves of millions of dollars in investments in U.S. companies that produce landmines, cluster munitions, and nuclear weapons. Such actions harm the U.S. defense industrial base and also impede the military strategy of our Armed Forces and allies. The efforts of these groups are occurring outside the legitimate international dialogue about these important weapons systems, the United Nations' (UN) Convention on Cluster Weapons.

In fact, efforts by international activists to disrupt U.S. munitions industries are misguided. Modern cluster munitions like the CBU-97 are more properly termed sensor fused weapons because they use sensors to increase their lethality against legitimate targets while protecting civilians against unexploded munitions and indiscriminate effects.

Moreover, as DOS says, sensor-fused weapons, cluster munitions, and nuclear weapons are important tools in the U.S. national defense strategy that ensures our freedom and protects the lives of our soldiers. "Their elimination from U.S. stockpiles would put the lives of its soldiers and those of its coalition partners at risk," DOS writes.

There have been proposals to register and sanction foreign entities that seek to disrupt the U.S. defense industry. Such foreign entities, private and public, hold important defense suppliers at risk and endanger the U.S. defense industrial base, an important part of our Nation's military power. Do these foreign boycotts pose a material risk to our national defense?

Dr. CARTER. Given the interdependence of global commerce, I share the concern that national security and economic security face new risks. Foreign laws, policies, and international agreements, to which the United States is not a party, may impact our industrial base and thus affect our national defense.

95. Senator INHOFE. Dr. Carter, what actions is DOD taking to ensure that we are able to continue to be able to use these legitimate weapons systems?

Dr. CARTER. The Department established a policy in 2008 that restricts use of cluster munitions after 2018 to those that have a submunition failure rate of not more than 1 percent, thereby preserving the ability to employ an important military capability while addressing humanitarian concerns associated with cluster munition use. The Department continues to support negotiations within the United Nations Convention on Certain Conventional Weapons framework on a cluster munitions protocol that will protect U.S. national security interests.

96. Senator INHOFE. Dr. Carter, does DOD currently have the authorities necessary to protect our defense industrial base from weapons boycotts?

Dr. CARTER. The influence of activists and foreign governments on the U.S. defense industrial base is a complex dynamic. Protecting the U.S. defense industrial base and national security interests will require the Department to collaborate effectively with other executive branch agencies and Congress. We continue to work to understand and communicate the risks to the industrial base and work closely with other nations to preserve domestic industrial capabilities.

TRAUMATIC BRAIN INJURY

97. Senator INHOFE. Dr. Carter, traumatic brain injury (TBI) continues to be one of the most prevalent wounds from operations in Iraq and Afghanistan. The ability to diagnose and treat TBI continues to be problematic despite the priority Congress and the Army have given to it. I remain concerned that we are not adequately screening our soldiers when they return. Once diagnosed with TBI, we need to be able to treat our wounded warriors and ensure that treatment is continued as long as needed to include transition to the Department of Veterans Affairs (VA) care. Various alternative treatments for TBI may have promise and are used in the private sector but few of these treatments have been approved for use on Army soldiers. In a report by National Public Radio, General Chiarelli expressed frustration about the pace of the vetting of these treatments. What frictions are delaying the vetting of alternative treatments?

Dr. CARTER. DOD has enacted TBI screening programs by establishing policies that mandate a medical evaluation after a servicemember is exposed to a potentially concussive event and post-deployment health assessments. Alternative treatment studies must be developed in accordance with the highest standards of scientific research and analysis. Each discovery leads to new questions or problems to be solved such as co-occurrence with disorders such as post-traumatic stress disorder. Well-considered research designs paired with streamlined research policies allow military supported research to answer critical questions and make valuable contributions to the health and welfare of our servicemembers and to the country. DOD is looked to as the leader in neurotrauma research, and the DOD neurotrauma portfolio complements similar areas of research funded through the National Institutes of Health and Department of Veterans Affairs. As the many investments in TBI and psychological health research begin to come to fruition, the collective understanding of these health concerns will improve, leading to more effective screening techniques and treatment strategies.

98. Senator INHOFE. Dr. Carter, what can we do to speed up the process of the vetting better ways of diagnosing and treating TBI?

Dr. CARTER. To address this process of vetting better ways of diagnosis and treatment, we have put into place a method for a comprehensive review of a large portfolio of over 400 studies on TBI. DOD used a series of In Process Reviews (IPRs) to examine individual studies in specific subsections of the portfolio. In these IPRs, individual researchers are invited to present their ongoing work to panels of individuals from DOD, the Department of Veterans Affairs (VA), and the National Institutes of Health (NIH). This presents opportunities for the government to share information across agencies, to mitigate any potential redundancies, to leverage overlaps, and to remain informed of study progress and/or delays. As some of these individuals are clinicians, the IPRs help facilitate rapid translation of emerging research data into improved clinical care. The IPR process also presents investigators with opportunities to ask questions of the government, to share data or lessons learned, and to identify collaborators. For example, just this year, DOD reviewed the current status on studies that address neuroimaging, non-invasive diagnostics in mild TBI, blast brain research and biomarker findings, cognitive rehabilitation and biomechanics after injury. This review process allows the Department to quickly assess what strategies work and just as important, what strategies do not work. The size of the entire DOD research portfolio on TBI cannot be overstated. The process for vetting research findings to identify and field safe and effective clinical care has proven to be the most efficient methodology to date.

To further speed up the process of vetting better ways of diagnosing and treating TBI, researchers need access to emerging data from studies. To help facilitate direct comparison among studies, the U.S. Army Medical Research and Materiel Command and NIH are developing a Federal Interagency Traumatic Brain Injury Research (FITBIR) database to store, integrate and share datasets from numerous small and large studies so that researchers can collaborate on future research. The FITBIR database will allow for comparison across research studies based on a common set of data elements, thereby advancing our understanding of research outcomes more quickly, and lead to more rapid validation and adoption of best practices, to include effective diagnostic modalities and treatment alternatives.¹

99. Senator INHOFE. Dr. Carter, what types of equipment solutions are being developed, procured, and fielded to help prevent, measure, and identify TBI?

Dr. CARTER. DOD TBI research portfolio is comprised of more than 400 studies investigating numerous questions across the full spectrum of TBI prevention, screening, diagnosis, treatment, and recovery. Some of these studies have led to the development or refinement of new blast wave sensors and accelerometers. Different versions of sensors are currently being fielded with deploying units as part of new helmet designs. Characterizing the effects of blast waves with different parameters on the human body is a very complicated endeavor, and is a high priority in many areas of the DOD research portfolio, not just in the TBI portion. A wide variety of approaches are being taken simultaneously to address these questions, including computational modeling, improved animal models, advanced physics, and even unprecedented integration of operational and field epidemiologic data.

Other areas of major investment include of non-invasive, field deployable mild TBI (mTBI) diagnostics, and neuroimaging. Currently, mTBI, by definition, is not

¹ Thurmond, V. A., Hicks, R., Gleason, T., Miller, A. C., Szufflita, N., Orman, J., et al. (2010). Advancing integrated research in psychological health and traumatic brain injury: common data elements. *Arch Phys Med Rehabil*, 91(11), 1633–1636.

visible using conventional imaging technologies, but data from ongoing studies is beginning to reveal improved ways of identifying, measuring, and describing specific brain changes associated with TBI. Research which includes Diffusion Tensor Imaging (DTI), a neuroimaging modality, is starting to show promising—but still very early—results for detecting mTBI. In addition, other technological advancements are being fielded to include EYE-TRAC (Eye-Tracking Rapid Attention Computation) that may help to evaluate attention and concentration problems after mTBI. Quantitative EEG (Electroencephalography) is also being fielded as an objective diagnostic device that may help identify mild TBI on the battlefield.

SALE OF MI-17S TO IRAQ AND AFGHANISTAN

100. Senator INHOFE. Dr. Carter, DOD is spending billions to rebuild the helicopter fleets of Iraq and Afghanistan, by using Russian helicopters. The rationale is that Iraq and Afghan pilots, along with maintainers are used to operating Russian hardware. This ignores the fact that we are not equipping the same personnel that flew and maintained the old aircraft. We are training new pilots starting in small training aircraft. The program misses an opportunity to build ongoing relationships with these two countries. Iraq and Afghanistan will have to deal with Russia, not the United States, to supply and fix their aircraft for decades to come. We are also missing an opportunity to spend tax dollars at home. The money to buy the Russian helicopters is spent at the Russian defense export agency, and the money to refurbish and fix the Russian helicopters is paid to Russia-certified Russian airframe and propulsion mechanics. What is the rationale that DOD is using to justify buying Russian-made and maintained helicopters for our Iraq and Afghan allies?

Dr. CARTER. The United States provides assistance to our partner nations as a critical enabler in building an enduring capability for them to operate and maintain rotary wing fleets for both the ongoing war on terrorism and to enhance their internal security. To develop capabilities that they can sustain without continued U.S. assistance, some partners require low-cost, low-maintenance platforms.

As stated in the question, the rationale to provide and support Mi-17s involve pilot and maintenance personnel familiarity, as well as complementing prior inventories of these aircraft models; cultural suitability; and the partner nation's preferences. Decisions were guided by the commanders on scene. Past procurements focused on the Mi-17 to leverage existing experience and because the aircraft provides critical capabilities not easily replaced by other platforms. The Mi-17 is a multi-purpose aircraft that spans the medium- and heavy-lift categories, and can carry out attack and transport roles simultaneously. Simply stated, it is a low-tech platform that can lift a large payload.

The Afghans have been using the Mi-17/Mi-8 series helicopters since the early 1980s due to its ability to operate at high-altitudes and in high temperatures with heavy loads. When the United States began rebuilding the Afghan Air Force (AAF), there were at least six Mi-17/Mi-8 aircraft being operated by the Afghans. The Commander of U.S. Central Command (CENTCOM) decided to continue to support the Mi-17 due to: its proven operational capabilities in the extreme environments of Afghanistan; its relatively low cost; and the fact that the maintenance system for the Mi-17 is easier for the AAF members to operate—an important factor due to the limitations of the education system in Afghanistan. The Afghans have since been introduced to western helicopters in the form of the MD-530 which is a very basic, light training helicopter that will be used for their initial entry rotary wing training.

The initial Iraqi Air Force procurement of 18 Mi-17s, one of the first procurement decisions made by the fledgling Iraq Ministry of Defense (MoD), was undertaken without assistance from U.S. advisors and proved problematic. The decision to fill out the Iraqi fleet with 22 additional Mi-17s was made by the Government of Iraq (GoI) and supported by the Multi-National Security Transition Command—Iraq (MNSTC-I) to meet Iraq's priorities. The latter MoD contract was processed through the Foreign Military Sales (FMS) program which is a more robust and transparent approach for building Iraq's security forces. Iraq has not indicated any intent to procure additional Mi-17s.

As the Iraq security forces and their sustaining institutions have grown more comfortable with U.S. equipment and the FMS program, the GoI has expressed increasing interest in U.S. helicopters. The Iraqi MoD has already purchased 24 Bell helicopters, and has shown interest in purchasing additional U.S.-made helicopters when funding is available. Also, the Department recently notified Congress of our intent to sell six observation and 10–12 utility helicopters to the Iraqi police forces. We will continue to work with Iraq using the FMS system.

101. Senator INHOFE. Dr. Carter, what opportunities were U.S. companies given to compete their helicopters for this purpose or to compete for the procurement and maintenance of the Russian helicopters?

Dr. CARTER. Russian helicopters, such as the Mi-17, have been procured four times; competitive details are summarized as follows:

In December 2007, the Army Program Executive Office for Simulation, Training, and Instrumentation purchased 22 Mi-17 aircraft for an Iraq FMS case. The contract was awarded sole source to ARINC, a U.S.-based firm, on the basis of unusual and compelling urgency. The Justification and Approval was approved by the Army Acquisition Executive.

In 2008, the U.S. Navy Counter-Narcoterrorism Technology Program Office (CNTPO) purchased 10 Mi-17 aircraft, through the Strategic Missile Defense Command (SMDC), in support of an Afghan requirement. The competitively awarded, Indefinite Delivery/ Indefinite Quantity, Multiple Award Task Order Contract has five U.S. prime contractors: ARINC, Raytheon, Northrup Grumman, Lockheed Martin, and U.S. Training Center; ARINC was competitively selected for this order.

In 2009, the Naval Air Systems Command awarded a competitive contract to a U.S. company, DTI, for four civilian Mi-17 aircraft in support of an Afghan requirement.

In May 2011, the Army Nonstandard Rotary Wing Program Office awarded a sole source contract, through the U.S. Army Aviation and Missile Command (AMCOM), for 21 Mi-17 aircraft in support of an Afghan requirement to Rosoboronexport (ROE), the Russian Federation's approved military export agency. The Secretary of the Army approved a Public Interest Determination and Findings that ROE is the only lawful source under Russian export control laws for the acquisition of military end-use Mi-17 aircraft. Diplomatic exchanges had previously confirmed the Russian assertions, first raised in November 2010, when the Russian Federation Ministry of Foreign Affairs informed the U.S. Ambassador to Russia that aircraft to be procured for the Afghanistan Ministry of Defense were considered Military End Use and, as such, Russian law required they be procured as military items through ROE. Prior to May 2010, DOS sanctions imposed on ROE precluded such a contract. Future procurement of Russian aircraft for military end-use purposes is expected to be subject to the same constraint.

Sustainment and overhaul contracts should continue to provide competitive opportunities for U.S. companies in the future. Many of these aircraft, especially the civilian variants, are widely supported through both foreign and domestic commercial providers. At present, the U.S. Army, in its role as the designated, single Non-Standard Rotary Wing Program Office, is leveraging existing support contracts, which include the CNTPO SMDC IDIQ and an AMCOM Logistics Support Facility (LSF) contract. Both were competitively awarded contracts. As previously stated, the CNTPO SMDC IDIQ was awarded to five prime contractors (ARINC, Raytheon, Northrup Grumman, Lockheed Martin, and USTC), all of which are U.S. based firms. The LSF prime contractor is Science and Engineering Services, Incorporated (SESI), also a U.S. based firm.

QUESTIONS SUBMITTED BY SENATOR SAXBY CHAMBLISS

F-35

102. Senator CHAMBLISS. Dr. Carter, I am concerned that DOD has redirected money originally planned for F-35 purchases to buy significantly less-capable fourth generation F-18s which are unable to operate in contested air space and each year can operate in fewer and fewer environments. This is especially the case given the accelerated Russian and Chinese J-20 and T-50 development, the alarming proliferation of the very latest sophisticated surface-to-air missiles (SAM), as well as rapid development of Chinese sensors and other advanced systems. Not only are we buying these aircraft but we're going to have to pay to operate and sustain them for well over a decade at further expense to taxpayers. If confirmed, will you commit to examining this expenditure of taxpayers' resources and report back to us regarding the extent to which you believe this is a wise way to spend DOD and taxpayers' dollars?

Dr. CARTER. In building the fiscal year 2013 President's budget, the Department is working hard to balance risk appropriately, avoiding over-expenditure in some areas so that we can attenuate key shortfalls elsewhere. For the fiscal year 2013-2017 timeframe, DOD must fund a tactical air forces portfolio that meets security

needs in terms of both capability and capacity in the face of significant budget pressures. The Department is also assessing to what extent it should extend the service life of DOD's legacy fleet of F/A-18A-Ds and F-16s to maintain appropriate inventory levels. The Department remains fully committed to the F-35 program and is actively managing JSF costs and schedule.

103. Senator CHAMBLISS. Dr. Carter, DOD has reduced the number of F-35 aircraft in the near-term budget plan by 246 over the last 2 years. There are rumors that DOD may reduce the planned numbers even further in next year's budget request. How can DOD continue to delay the procurement of fifth generation fighters while buying more fourth generation fighters when the threat is so clearly increasing and fourth generation F-18 fighters cannot survive when flying against the latest threat SAMs that are being fielded today?

Dr. CARTER. Based on the current and projected threats, I believe it is critical that the U.S. transitions to a fifth generation capability across the Services, while maintaining sufficient legacy inventory capacity to prevail in current and near-term conflicts. DOD needs JSF to deal with advanced fighters and surface-to-air missiles worldwide, especially in the stressing electronic warfare environments of the future. Additionally, the F-22A modernization program will provide improved fifth generation capability versus a high-end foe. To ensure the United States possesses sufficient capacity of fighter attack aircraft, the Department funded production of the F/A-18E/F through fiscal year 2014. While this aircraft is not stealthy like JSF and F-22, it has advanced sensing and is highly capable against many of the threats faced today and expected to face in the future.

104. Senator CHAMBLISS. Dr. Carter, last year you said you needed about \$5 billion over 4 years to pay for more F-35 flight test and development costs and justified a cutback in F-35 production aircraft to pay for it. But DOD actually cut over \$12 billion from the F-35 production program by reducing procurement and spent much of the money on fourth generation F-18s. I don't believe that shows much appreciation for the strategic need to retain our air dominance and follow through on our own Government's strategy to keep us ahead of China and Russia. Can you assure me that you will not cut fifth generation airplanes in the future to buy additional obsolete fourth generation airplanes?

Dr. CARTER. The Department is carefully assessing the best approach in balancing tactical air forces' capability and capacity, while managing JSF concurrency. JSF brings an unprecedented combination of advanced sensing, stealth, and firepower; that said, the program is still under development and in the past two budget submissions resulted in slowed production in order to properly fund development and allow manufacturing processes to mature. Also, in the fiscal year 2013 budget, as with the 2012 submission, the Department faces significant resourcing pressures. The decision to procure additional F/A-18E/F aircraft in the fiscal year 2012 budget was an acknowledgement of the need to maintain sufficient DON inventory; the FA-18E/F is not as advanced as the JSF, but it is fully mature and highly capable against many of the threats we faced today and expect to face in the future.

C-130 ADVANCED PROCUREMENT

105. Senator CHAMBLISS. Dr. Carter, DOD did not request advance procurement (AP) funding for C-130s in fiscal year 2012 as you have normally done. When I queried DOD on this back in the spring DOD indicated that the AP funding was unnecessary since AP funding had been obligated late over the last 2 years. I did some research into this and learned that the Air Force notified DOD during the fiscal year 2011 budget build process that they intentionally withheld previous year's AP funding for "negotiating leverage with the contractor" and were able to save money on a future lot of C-130s. However, the Air Force also told DOD that not having AP funding in fiscal year 2012 would create greater costs over the FYDP and result in later delivery of aircraft. In response to a request from this committee during mark-up, you recently sent the committee a letter on this issue. In response to the question, "would the addition of AP funding in fiscal year 2012 save resources over the FYDP," you responded that: "DOD now believes that the inclusion of AP in fiscal year 2012 may save \$54 million over the FYDP."

I appreciate your response and would just like to ask you, do you agree that, in the case of major acquisition programs where long lead items are needed to ensure the most efficient production process, that advanced procurement funding makes sense, assuming that the funding can be obligated in a timely manner?

Dr. CARTER. In most cases involving aircraft production under major defense acquisition programs, the use of advanced procurement funding to purchase long lead items makes sense.

GUARD CHIEF IN THE JOINT CHIEFS OF STAFF

106. Senator CHAMBLISS. Dr. Carter, there is talk of making the Chief of the National Guard a member of the Joint Chiefs of Staff. Do you think the Chief of the National Guard should be a permanent member of the Joint Chiefs of Staff?

Dr. CARTER. No. The Chief of the National Guard Bureau is now a 4-star general, attends Joint Chiefs of Staff meetings, and provides invaluable advice. Members of the Guard are members of the uniformed Services and adding its Chief to the Joint Chiefs of Staff would introduce inconsistencies among its members, while at the same time creating the impression that the National Guard is a separate military Service.

RESEARCH AND DEVELOPMENT FUNDING

107. Senator CHAMBLISS. Dr. Carter, continued investment in defense R&D is critical to ensuring our future technological superiority. Specifically, DOD's science and technology programs engage the Nation's universities and other research entities in basic and applied research on behalf of our national security. How do you plan to sustain support for these programs despite fiscal constraints?

Dr. CARTER. Secretary Panetta set the strategic direction for the Department in his October 13, 2011, testimony to the House Armed Services Committee when he said:

“Innovation is instrumental to the future of our joint force. We've expanded many of our—what we refer to in years past as low-density capabilities, and we've fielded many new technologies. We must continue to unleash innovation in the ranks and challenge ourselves to leverage these emergent capabilities in new and creative ways.”

Following this guidance, it is clear that the Department needs to continue to invest in the engine of innovation—basic and applied research on behalf of our national security. This investment is guided by the Assistant Secretary of Defense for Research and Engineering, and I will look to the Assistant Secretary to advocate for, and shape the Department's investment, in these critical capabilities.

108. Senator CHAMBLISS. Dr. Carter, are you still planning for 2 percent real growth for DOD basic research programs in the coming years?

Dr. CARTER. This level of investment in basic research remains a goal, however, with the current budgetary pressures facing DOD, we will have to carefully weigh this goal in the context of overall DOD priorities and needs. At the same time, I do affirm the role and importance of basic research in providing long term capabilities for the Department and Nation. I also can echo Secretary Panetta's comments at the October 13, 2011, hearing before the House Armed Services Committee, when he said:

“Innovation is instrumental to the future of our joint force. We've expanded many of our—what we refer to in years past as low-density capabilities, and we've fielded many new technologies. We must continue to unleash innovation in the ranks and challenge ourselves to leverage these emergent capabilities in new and creative ways.”

The Department's basic research investment, of which roughly 60 percent is accomplished through universities, is the bedrock of innovation for the Department. I believe it is important to maintain a healthy and vigorous investment in basic research and to maintain a clear link from the Department to the academic community. It is our investment in basic research that enables the connection.

109. Senator CHAMBLISS. Dr. Carter, fostering the next generation technical workforce for DOD and its industrial base is another key ingredient in our future security. Can you explain how DOD plans to enhance its science, technology, engineering, and mathematics programs in order to ensure that the Nation has a qualified national security workforce going forward?

Dr. CARTER. The Department conducts effective programs along the full Kindergarten-Workforce science, technology, engineering and mathematics (STEM) pathway to ensure that DOD and our Nation's industrial base are supplied with the technical workforce critical to preserving national security. Current and projected

DOD budget limitations offer few opportunities to enhance the scope of these programs, but proactive management will continue to enhance the impact that these programs can achieve through innovative STEM activities. The Assistant Secretary of Defense for Research and Engineering is delegated lead responsibility for DOD STEM efforts. Several specific examples of STEM efforts coordinated and supported by the ASD(R&E) are as follows:

1. DOD STEM Executive Board—Leadership for the Department’s STEM efforts is provided by the DOD STEM Executive Board, chaired by ASD(R&E). The STEM Executive Board aims to maximize the effectiveness of DOD STEM investments within budgetary limits. Technological solutions to national security at all levels and the pace of technological change require an adept military and civilian workforce. The Executive Board is: developing a taxonomy to describe the military and civilian STEM workforces; articulating necessary skill sets for a technically competent workforce; and aligning DOD investments and policies across the DOD components. Further, the Executive Board synchronizes the DOD’s future STEM workforce with the Department’s S&T priorities.
2. National Academies Study—A joint National Academy of Engineering (NAE)-National Research Council (NRC) study funded by ASD(R&E) is assessing the science, technology, engineering, and mathematics (STEM) workforce demands for the Department and strategies for meeting these demands. The work scope includes: reviewing current and projected STEM workforce demands relevant to DOD and defense industrial base needs; identifying emerging science and technology fields that will likely have significant impact on DOD and national needs; and assessing current limitations and options for overcoming impediments to meeting these needs. The results of this study will enable the Department to enhance its STEM efforts by shaping investments more closely to expected future needs.
3. National Defense Education Program (NDEP)—Directly builds the Department’s technical workforce and fosters STEM skill development:
 - a. The Science, Mathematics, and Research for Transformation (SMART) scholarship-for-service program selects highly-qualified undergraduate and graduate students pursuing any of 19 STEM disciplines important to DOD. Students are provided a stipend for tuition, fees, books, health insurance, and housing to support them in their studies and perform internships in the Department’s R&D facilities to develop key skill-sets for DOD employment. Students commit to a one-to-one service obligation and are eligible for up to 5 years of funding. Since 2006, there have been over 1,100 SMART U.S. student participants who have studied at over 250 colleges and universities. Nearly 400 have graduated with bachelor’s, master’s, or doctoral degrees and joined the DOD workforce.
 - b. The National Security Science and Engineering Faculty Fellowship (NSSEFF) program makes grants to leading researchers to work on important research questions of great value to DOD. Since 2009, 29 NSSEFF fellows at 20 research universities support more than 300 graduate and undergraduate students and postdoctoral scholars and reported 125 interactions with DOD laboratories and Services.
 - c. Systems Engineering (SE) Capstone Program and Joint Cooperative Unmanned Systems Initiative (JCUSI)-Project-based learning exposes engineering students to systems engineering for DOD. These initiatives build institutional capacity for systems engineering for DOD and defense industrial base. Students are mentored by DOD personnel to solve actual DOD systems engineering problems. Over 300 students at 14 universities and Service Academies completed SE Capstone projects in the 2010–2011 academic year. JCUSI exposes cadets and midshipmen to joint autonomous vehicle operating environments so they can be immediately productive in similar environments when deployed as officers after graduation. JCUSI involves 50 cadets and midshipmen from all three of the Service academies in a joint autonomous systems scenario integrating land, air, and surface sea autonomous vehicles.
 - d. K–12—DOD and its partners support and engage with elementary, middle school, and high school initiatives that inspire students to pursue STEM fields. National and local initiatives are designed to build STEM skills. Over 1,700 DOD scientists and engineers have engaged with more than 180,000 students and 8,000 teachers in 28 States. Since 2009, the Department has developed “Lab TV,” a series of Web-based video programs of cutting-edge DOD laboratory research used by educators. The top 6 Lab TV programs have posted over 350,000 views, and several programs have “gone viral” on the YouTube Lab TV Channel.

QUESTIONS SUBMITTED BY SENATOR ROGER F. WICKER

FOOD SERVICE DISTRIBUTION

110. Senator WICKER. Dr. Carter, the Continental U.S. Subsistence Prime Vendor Program was created to bring the efficiency of the domestic food service distribution industry to military food service. Through this program, distributors provide the military with the best products available in the marketplace at competitive prices in the most efficient manner possible.

I am concerned the Defense Logistics Agency's (DLA) proposed non-commercial contracting model threatens the success of the Subsistence Prime Vendor Program. By proposing contract terms inconsistent with current industry practices, DLA may be limiting competition, which could result in increased food costs for taxpayers and lower service levels for our military.

Can you provide a rationale for DLA's move toward a proposed non-commercial model?

Dr. CARTER. I can assure you the DLA is committed to using commercial terms and conditions to the most reasonable extent possible. Nonetheless, DLA was concerned that the Program, as structured, was vulnerable to price manipulation and fraud because of a lack of transparency. Over the past several years, DLA investigated options to address these vulnerabilities of the existing commercial model. DLA met with the foodservice industry, including the International Foodservice Distributors Association and individual companies, and, more recently, issued a request for information. Discussions focused on how to incorporate practices to increase transparency of the commercial business model, and DLA also sought input on a proposed pricing model.

Recent Program changes are meant to reduce the risk of overcharges to the Government. The changes do not alter the fact that this is a commercial acquisition with specific provisions added only to the extent necessary to protect the Government. Among other things, the changes will ensure that all rebates and discounts that prime vendors receive from manufacturers, no matter how those rebates and discounts are described or designated by the vendors, are returned to the Government.

The changes also afford the Government more oversight to prevent fraud by ensuring the Government has the right to review the original manufacturer's invoices to confirm the Government is charged the manufacturer's price. These changes are necessary to prevent the Government from paying more than is necessary for these products and to allow the Government to know for what it is paying.

The contracts will remain fixed-price with economic price adjustment, but the pricing definitions have been clarified. These changes will allow insight into the management of the program that previously did not exist. DLA's changes have been challenged in bid protests filed at the Government Accountability Office, and more recently, the Court of Federal Claims. In a decision dated October 12, 2011, the Court of Federal Claims determined that one provision DLA included in its CONUS subsistence prime vendor solicitations was not legally supportable, and DLA plans to remove that provision in accordance with the Court's finding.

DLA will continue to work with the food distribution industry to craft a prime vendor model that maximizes competition and the use of commercial practices while protecting the Government and taxpayers from potential fraud and overcharges

111. Senator WICKER. Dr. Carter, what additional oversight would such a model provide to ensure the prevention of waste, fraud, and abuse?

Dr. CARTER. The changes are necessary to prevent the Government from paying more than is necessary for these products and to allow the Government to know for what it is paying. The changes also afford the Government more oversight to prevent fraud by ensuring the Government has the right to review the original manufacturer's invoices to confirm the Government is charged the manufacturer's price.

The contracts will remain fixed-price with economic price adjustment, but the pricing definitions have been clarified. These changes will allow insight into the management of the program that previously did not exist. DLA will continue to work with the food distribution industry to craft a prime vendor model that maximizes competition and the use of commercial practices while protecting the Government and taxpayers from potential fraud and overcharges

MINE RESISTANT AMBUSH PROTECTED VEHICLES

112. Senator WICKER. Dr. Carter, we have spent over \$30 billion on the Mine Resistant Ambush Protected (MRAP) Vehicle fleet of vehicles. To what extent have we maximized the capability of this platform?

Dr. CARTER. Congress generously provided nearly \$50 billion in support of protecting America's most precious resources: soldiers, airmen, sailors, marines, and special operators. Currently, more than 27,000 MRAP vehicles maximized this capability in supporting unique Service missions and to an even greater extent to fighting unit requirements.

There are dozens of MRAP variants with common exceptional protection capabilities, but also unique customizations in support of specific mission roles. This includes MRAP ambulances, wrecker and recovery vehicles, troop transport, route clearance, command and control platforms, and Special Forces variants, to name a few. There are significant commonality and systems design attributes, and concurrent additional capability adaptations are ongoing.

Because of the significant payload capacity of many of the variants, commanders in theater have options, based on threat, to apply different armor protection kits. System engineers and industry design teams continue to develop solutions to keep the MRAP vehicle fleet the most protected in the entire theater. Also, in support of the off-road terrain throughout Afghanistan, independent suspensions have been integrated on virtually every vehicle in theater.

113. Senator WICKER. Dr. Carter, have you considered integrating additional capability into this very survivable platform?

Dr. CARTER. Throughout the entire execution of the Joint Mine Resistant Ambush Protected (MRAP) vehicle program, the teams operated with a sense of urgency on mission capabilities for the MRAP fleet. With the help of our very capable industry partners, DOD integrated dozens of capabilities and literally hundreds of configurations in response of the Warfighters' demand signal.

The most recent example is adding impressive under-body protection for the MRAP All-Terrain Vehicle (which is already highly survivable and effective off-road) with the Underbody Installation Kits (UIK). Because of the payload capacity of this configuration, the system engineers designed a significant upgrade that is being installed on the in-theater fleet rapidly.

Numerous adaptations of the MRAP vehicle have occurred to adapt the more general purpose troop carrier designs to ambulances, wrecker and recovery vehicles, and command and control platforms. Additionally, numerous variations of light weapons were integrated onto the roofs.

Finally, in addition to the all of the electronics and power integration for radio communications, counter-improvised explosive device capabilities (jammers), and displays, a significant portion of the fleet has evolved to have independent suspensions, creating a more capable, and more effective vehicle platform. The MRAP vehicles proved inherent capacity and versatility to integrate requirements; DOD will continue to exploit this capacity as the mission demands.

114. Senator WICKER. Dr. Carter, we have equipped the Afghan National Army (ANA) and Afghan National Police (ANP) with a substantial number of vehicles. What steps are we taking to ensure the Afghans can sustain this fleet going forward?

Dr. CARTER. The long-term future plan is for the ANSF to have an organic maintenance and supply capability. There are many efforts underway on many levels by International Security Assistance Force (ISAF), International Joint Command (IJC), and NATO Training Mission-Afghanistan (NTM-A), in conjunction with Afghan senior leaders as part of the ISAF campaign plan.

The reality in Afghanistan is that the logistics systems are very early in the process of being built. The ANA transitioned to organic maintenance at the organizational level in April 2011. Its equivalent of Direct Support-level maintenance is contracted by the Combined Joint Logistics Office (CJ4). Its General Support equivalent (at the national level in Kabul) has some organic capability, but not what can be called a robust industrial base.

For the ANP, CJ4 contracted maintenance for weapons and vehicles. NTM-A is conducting ongoing analysis on how to create an enduring ANP maintenance system. The ANP is likely a couple years behind the ANA. The ANA Air Force has NTM-A/Combined Security Transition Command-Afghanistan-provided contract logistics support (CLS), and transition to organic logistics support is a long-term effort.

The bottom line vision is to foster organic maintenance, however the reality today is that maintenance is largely CLS as DOD continues to develop ANSF logistics capacity.

PAKISTAN

115. Senator WICKER. Dr. Carter, recognizing that the Pakistan Counterinsurgency Capability Fund provides the Government of Pakistan with critical goods that are manufactured here in the United States, what is the status of DOD's certification of Pakistan's counterinsurgency efforts?

Dr. CARTER. The Pakistan Counterinsurgency Fund (PCF) is instrumental in the training, advising, and equipping of the Pakistan military and paramilitary forces so that they can pursue the near-term objective of eliminating terrorist sanctuaries and disrupting the al Qaeda network. The Department apprises Congress regularly of our assessment of Pakistan's counterinsurgency efforts through two primary means. First, the biannual report to Congress, Progress Toward Security and Stability in Pakistan, provides our overall assessment of Pakistan's counterinsurgency efforts. The next edition of that report is due by the end of October. Additionally, DOD must notify Congress prior to its use of PCF funds, and this is achieved by submitting a spending plan to Congress, which details how the Department intends to spend the PCF funds. The delay in appropriations for fiscal year 2011 for PCF—followed shortly thereafter by increased tensions in the relationship with Pakistan as a result of the raid that killed Osama bin Laden—have led to a delay in notification of the fiscal year 2011 PCF spending plan.

JOINT LIGHT TACTICAL VEHICLE

116. Senator WICKER. Dr. Carter, what is DOD's position regarding the Senate Appropriations Committee's termination of Joint Light Tactical Vehicle (JLTV)?

Dr. CARTER. The proposed termination will fail to resolve clearly identified capability gaps in U.S. Army and U.S. Marine Corps light tactical vehicle fleets. Those gaps cannot be cost effectively addressed by rebuilding the High Mobility Multipurpose Wheeled Vehicle (HMMWV) fleet and would result in the Services fielding a light vehicle that lacks protection for the crew and provides insufficient mobility, reduced fuel efficiency, decreased reliability, inadequate net-ready integrated C4I suite, and an inability to meet both current payload requirements and future combat loads. Following an extensive technology development phase, a comprehensive analysis of alternatives, and cost-informed trades throughout, the JLTV acquisition strategy planned is the most effective and affordable approach to deliver the required JLTV vehicle capability.

The Army and Marine Corps completely revised the JLTV Acquisition Strategy, finalized the essential requirements, and made the necessary cost informed trades to achieve an affordable program. The Improvised Explosive Device-threat environment and fiscal environment have changed significantly since approval of the original JLTV acquisition strategy in 2007. The Army and the Marine Corps have made the proper adjustments in response to the changing threat, fiscal environment and congressional concerns. The Technology Development phase was executed on schedule and within budget, accomplishing its intent to identify the capabilities that are achievable and affordable to control cost growth. Senior leadership for the Army and Marine Corps agreed on requirements and reduced the Engineering, Manufacturing and Development (EMD) phase by 15 months, which will significantly reduce the overall expense of EMD.

F-16 SERVICE LIFE EXTENSION PROGRAM

117. Senator WICKER. Dr. Carter, the Air Force fiscal year 2012 budget request contains money for an F-16 service life extension program (SLEP). Can you describe how SLEP money will be used between structural (e.g. full scale durability testing) and avionics modernization?

Dr. CARTER. The fiscal year 2012 President's Budget (PB) reflects the F-16 SLEP to include a structural program (Full-Scale Durability Test and Structures Engineering, Manufacturing and Development phase) as well as an avionics modernization effort that includes active electronically scanned array radar, center pedestal display, ALQ-213 electronic warfare suites, and integrated broadcast service. Total funding as reflected in fiscal year 2012 PB is \$24.767 million; \$12 million for avionics modernization and \$12.767 million for structures. The \$12 million associated with the F-16 SLEP avionics modernization program (now known as combat avi-

onics programmed extension suite) will be committed to initial development and risk reduction efforts.

118. Senator WICKER. Dr. Carter, is it premature to start the avionics acquisition activity prior to durability testing being completed and confirming viability of the F-16 fleet?

Dr. CARTER. The Department does not believe starting the avionics activity prior to completion of durability testing is premature. Based on studies by F-16 structural engineers and Lockheed Martin, I am confident that, with some modifications, the F-16 service life can be extended to at least 10,000 Equivalent Flight Hours (EFH) on the Block 40/50 aircraft. The full-scale durability testing will validate that study and determine the extent of the modifications required to bring these aircraft to 10,000 EFH (the goal is 12,000 EFH). Additionally, the fleet viability board recently completed their study of the Block 40/50 aircraft. This study concluded that although the weapon system cannot achieve 5th generation fighter capability, it is more affordable and can be made viable and relevant with respect to future force structure requirements. F-16 SLEP avionics modernization acquisition activity is programmed to start in fiscal year 2012 in order to meet the Air Combat Command's requirement for Initial Operational Capability (IOC) in fiscal year 2018.

FOREIGN MILITARY SALES TO THE REPUBLIC OF KOREA

119. Senator WICKER. Dr. Carter, how does the U.S. Air Force intend to support a Korean-led competition and selection for both avionics and active electronically scanned array (AESA) radar for their KF-16 fighter program?

Dr. CARTER. To date, the Department did not receive a Letter of Request (LOR) from the Government of Korea concerning their proposed F-16 avionics and AESA radar modernization program. Following receipt of an LOR, we will work with the Korean Government to formalize their requirements and provide a Letter of Offer and Acceptance (LOA) in accordance with the AESA acquisition radar strategy. Acquisition for FMS purchases is done in accordance with U.S. law and DOD regulations and procedures. The competitive procurement process is used to the maximum extent possible when procuring articles or services. Sole source procurement can be approved by the implementing DOD Service when the FMS purchaser requests it in writing and provides sufficient rationale. Due to the complex interaction between the aircraft avionics and the AESA radar, we anticipate that the procurement of the avionics will likely be combined with the AESA procurement.

120. Senator WICKER. Dr. Carter, how does a potential Taiwan F-16 Letter of Request for Letter of Acceptance affect U.S. Air Force plans?

Dr. CARTER. The Department received an updated Taiwan F-16 Letter of Request (LOR) for Letter of Offer and Acceptance (LOA) in September 2011 and subsequently provided congressional notification of intent to sell on 21 September 2011. The LOR does not include a request to sole source the active electronically-scanned array (AESA) radar. Therefore, the U.S. Air Force F-16 Program Executive Officer will select an acquisition strategy for Taiwan's F-16 modernization and potential U.S. Air Force modernization efforts that ensures full and open competition in accordance with U.S. law and regulations. U.S. Air Force modernization efforts are not hinged upon Taiwan's investments and are not necessarily affected by this sale.

QUESTIONS SUBMITTED BY SENATOR ROB PORTMAN

F-136 FIGHTER ENGINE TEAM SELF-FUNDING PROPOSAL

121. Senator PORTMAN. Dr. Carter, what authorities prohibit DOD from permitting the continued use of limited government equipment deemed essential to the F-136 Fighter Engine Team (FET) self-funding proposal?

Dr. CARTER. There are no authorities that prohibit the Department from permitting use of Government equipment deemed essential to the F136 self funding proposal. However, if the Department determines that certain equipment is useful to another program, it will use that equipment in the most optimal and cost-effective manner. Additionally, if continued use of Government equipment following the termination of a contract would incur additional costs to the Government, the Department would oppose that use.

122. Senator PORTMAN. Dr. Carter, what steps have you taken to better understand this self-funding proposal and identify processes or procedures within DOD that would need to be altered to facilitate such a proposal?

Dr. CARTER. As I testified, I am willing to meet with General Electric and learn more about the self-funding proposal. General Electric is a valued partner on many DOD programs, including aircraft engines, and anytime an industry partner has new ideas on affordability, the Department is interested in learning about these ideas.

CORROSION PREVENTION AND MITIGATION

123. Senator PORTMAN. Dr. Carter, given that Congress has consistently added funding to strengthen the corrosion prevention and mitigation efforts of DOD, and GAO has consistently encouraged DOD to fully fund this successful cost reduction program, what are your plans for addressing this in the fiscal year 2013 budget request?

Dr. CARTER. The DOD corrosion prevention and mitigation program is successful and is important for the long-term viability of our equipment and infrastructure. The Government Accountability Office cited the program for achieving significant cost avoidance by reducing the incidence and effects of material degradation on DOD weapon systems and infrastructure.

The Department is working diligently in preparing the fiscal year 2013 budget request. There are many requirements competing for constrained funding. As a part of this process, the corrosion prevention and mitigation program budget is being considered, along with other important programs. The final funding level will be determined over the next several months.

124. Senator PORTMAN. Dr. Carter, in light of DOD's F-22/F-35 corrosion evaluation, what steps are being taken with the KC-46A program to avoid repeating mistakes that result in significantly higher than expected long-term sustainment costs?

Dr. CARTER. The Department understands the critical importance of corrosion prevention and control (CPC) to maintain the airworthiness and control the long-term total ownership costs of the KC-46A. Specific steps the Department is taking in this regard include the following:

1. CPC is covered by our Weapon System Integrity Program (WSIP) approach. The WSIP is composed of four distinct integrity programs that address corrosion across the entire aircraft system, including structures, mechanical equipment and subsystems, avionics, and propulsion systems.
2. As a commercial derivative system, the KC-46A leverages the corrosion control processes established for commercial aircraft. Boeing is on contract to provide a KC-46A CPC Plan, which will be reviewed and approved by the Government.
3. Given the environmental concerns regarding the chromated coating systems that traditionally are used for corrosion protection for military systems, the Air Force has convened a KC-46 Outer Mold Line Coating System Independent Review Team to review options and make recommendations for corrosion coatings. The team includes technical experts from industry, the Air Force, the Navy, and the Corrosion Prevention Office in the Office of the Under Secretary of Defense for Acquisition, Technology and Logistics.
4. A Corrosion Prevention Advisory Board, comprised of representatives from engineering, manufacturing, quality assurance, and other areas involved in the design, engineering development, and production of the aircraft, provides ongoing oversight during the execution of the program.
5. The Department includes CPC in its ongoing oversight activities, including reviews by the Overarching Integrated Product Team.
6. The program office has ongoing dialogue with corrosion experts in the Navy's P-8 program office about a Boeing commercial derivative aircraft, which has a robust CPC program, given that aircraft's corrosive operating environment.

QUESTIONS SUBMITTED BY SENATOR KELLY A. AYOTTE

REDUCTION IN DEFENSE SPENDING

125. Senator AYOTTE. Dr. Carter, the President has called for \$400 billion in reductions to national security spending over a 10-year period starting in 2013. Secretary of Defense Leon Panetta and General Martin Dempsey acknowledge that a further reduction of defense spending would be detrimental to our national security. With your acquisitions background, what programs and capabilities must not be cut

if the Federal Government is to fulfill its constitutional responsibility of securing the common defense?

Dr. CARTER. I agree that there is a point beyond which additional cuts place national security at risk. However, Secretary Panetta has clearly stated that everything must be “on the table” when considering these potential reductions. Given the potentially significant future budget reductions we are facing, DOD is examining all programs for affordability and national security requirements.

AUDIT OF DEPARTMENT OF DEFENSE

126. Senator AYOTTE. Dr. Carter, as you are aware, DOD is one of the few agencies in the entire Federal Government that cannot pass an independent audit of its finances. DOD’s lack of audit readiness makes it difficult to implement efficiencies, achieve savings, and direct increasingly scarce defense dollars to higher priorities. In your response to the advance policy questions, you concede that, “. . . there has been limited progress made towards auditability until recently.” Why, in your view, is DOD not auditable today?

Dr. CARTER. DOD’s massive size and complexity make it hard to achieve full auditability. DOD financial processes were established and ingrained in systems long ago. These processes and systems were designed for budgetary accounting—not proprietary or commercial accounting called for in the CFO Act.

127. Senator AYOTTE. Dr. Carter, what are the most significant challenges to making DOD auditable by the 2017 statutory deadline?

Dr. CARTER. To meet standards in CFO Act, there is a substantial amount of work to be done. Some of the most significant impediments include:

- DOD has thousands of business and financial systems which support on-going operations. The process of modifying these systems is complex, time consuming, and costly.
- DOD business and financial management systems are not fully integrated and do not always collect data at the necessary transaction level.
- Reliable end-to-end processes and internal controls have not fully been defined to support financial reporting.
- DOD lacks sufficient operational and financial personnel experienced in financial audits.

128. Senator AYOTTE. Dr. Carter, what is your plan to overcome those obstacles?

Dr. CARTER. Meeting these challenges and improving our business processes have more attention in the Department than ever before. DOD will address them by changing the way it does business. To realize success, the Department is using a streamlined approach, implemented in August 2009, which focuses on improving and auditing the information used to manage the Department. Improving the information used to manage—budgetary and mission critical asset information—allows commanders and other leaders to better meet mission needs with their available resources. I believe this alignment of operational and financial objectives is the most effective incentive to improve financial management.

The Department is committed to achieving auditability goals and has taken significant steps to ensure the goals are achieved by September 30, 2017, as directed by Congress. There is still a great deal of work required to further improve financial and business processes in order to meet this goal. I believe DOD can succeed because it has a well defined plan with specific short-term and interim-term milestones and a long-term roadmap. The Department also provided resources for the effort (approximately \$300 million per year), and a clear governance process. Overall accountability rests with the Deputy Secretary of Defense and CMO; however, day-to-day responsibility falls to the Chief Financial Officer (CFO) and DCMO and their staffs, as well as line management throughout the DOD business enterprise. To meet audit challenges, we have developed an effective partnership between the CFO and DCMO communities that will help with implementation. The DCMO and the Military Department CMOs play an integral role in the governance processes, including overseeing the implementation of new systems and the processes they enable. Senior leaderships within the Military Departments are committed to, and accountable for accomplishing these interim goals.

129. Senator AYOTTE. Dr. Carter, what can Congress do to help?

Dr. CARTER. Continued attention and oversight from Congress encourages more attention and participation from the non-financial management community to sustain the current focus. Additionally, providing a timely appropriations bill without

the use of multiple continuing resolutions will help leaders devote more time to audit readiness.

JOINT STRIKE FIGHTER

130. Senator AYOTTE. Dr. Carter, the F-35 JSF will form the backbone of U.S. air combat superiority for generations to come. However, in order to guarantee the continued success of this program, it is imperative that this effort be followed with solid analyses of the JSF life cycle costs so both DOD and Congress can make well-informed decisions about the program in the future. Can you provide an update on what investments or changes have been made in the development and design of the F-35 to reduce operations and support costs over the life of the program?

Dr. CARTER. The JSF has been designed to improve maintainability and overall supportability over legacy platforms. As the aircraft design matures, the program office is actively managing systems to ensure they meet or exceed their reliability design specification, and identify opportunities for Life Cycle Cost (LCC) reductions. In cases where systems fall short of meeting their goal, or where significant LCC reduction opportunities are identified, the JSF Program Office is making the appropriate programmatic and system/component modifications to increase reliability, while reducing LCC. In addition, we are initiating a targeted affordability program to identify technical and programmatic changes that will reduce the operating cost of the system, which will be tracked through our affordability management plan, the draft of which will be available early next year. The program is also conducting a business case analysis on the sustainment strategy to identify if changes to the sustainment baseline are required to achieve the best value solution.

131. Senator AYOTTE. Dr. Carter, if the JSF program were canceled, what would be the operations and support costs for the legacy fleet that JSF is replacing? Please provide data that can be directly compared to the JSF. Please use the same time period for both.

Dr. CARTER. The JSF is scheduled to replace the AV-8B, F/A-18 A-D, and F-16 for the U.S. Military Services. A portion of the F/A-18A-D and F-16 fleet is already planned for service life extensions to meet force structure requirements. If the JSF were canceled, the Services would have to assess the possibility of even more aircraft having service life extended. For many of those aircraft with excessive flight hours, extending service life would not be an option, and they would have to be retired. It is possible that the development of other platforms would be required. The range of options that would need to be assessed in this unlikely scenario is unlimited and makes a direct comparison of data extremely difficult.

132. Senator AYOTTE. Dr. Carter, will operations and support costs for the F-35 be the same, more than, or less than the legacy aircraft it will replace?

Dr. CARTER. DOD's analysis is that the costs per aircraft to operate and sustain the JSF are less than the F-22, about the same as the F-15C/D, and more than the F-16 and F-18. Given the significant increase in capability, it is not unreasonable that JSF costs more to operate and sustain than some legacy aircraft.

IRAQ TROOP LEVELS

133. Senator AYOTTE. Dr. Carter, I am concerned about the December deadline in Iraq. Multiple senior military officials have expressed concerns regarding Iraq's ability to independently provide for their external defense and air sovereignty. Iraq will also require continued development in the areas of logistics, sustainment, intelligence, and training. It is important to bring our mission in Iraq to a successful conclusion. The Obama administration is considering keeping 3,000 troops in Iraq beyond the December deadline in order to achieve this objective. What have our commanders on the ground requested for troop levels?

Dr. CARTER. In 2008, the United States concluded a Security Agreement with Iraq, which established conditions for the temporary presence of our forces in the country and for their withdrawal by the end of 2011. The United States complied with the terms of that agreement, and will comply with the requirement to withdraw our forces by the end of 2011.

However, the Departments believe that an enduring security partnership with the Iraqi Government and people is in the best interest of the United States, and a continuing relationship with the Iraqi Security Forces (ISF) would be an important part of that partnership.

The United States is currently in negotiations with the Iraqi Government about the nature of that relationship. America wants a normal, productive relationship with Iraq going forward—a partnership like we have with other nations around the world.

Our negotiations with the Iraqis so far have focused on possible mission sets to support the ISF in areas where Iraq has identified shortfalls, such as logistics, air and maritime security training, combined arms training for Iraq's external defense, and intelligence fusion for Iraqi counterterrorism operations. Any post-2011 U.S. forces presence upon which the United States and Iraq might ultimately agree would flow from the requirements necessary to support training and related mission sets, including areas that the Iraqis identify as key to addressing their shortfalls.

Again, there are no final decisions—nor reached any agreement with the Iraqis—about a post-2011 U.S. forces presence in Iraq.

134. Senator AYOTTE. Dr. Carter, what have the Iraqis requested?

Dr. CARTER. On August 2, Iraqi President Talabani, upon the request of Prime Minister Maliki, held the third meeting of all major Iraqi political parties to discuss the nature and details of the U.S.-Iraq security partnership under the terms of the Strategic Framework Agreement, and how this would be affected by a potential U.S. presence in Iraq after December 31, 2011.

At the conclusion of that meeting, the parties' leadership authorized Iraqi Deputy Prime Minister Shaways to issue the following statement: "Participants have agreed to mandate the Iraqi Government to start talks with the American side. Talks are limited to training issues under the Strategic Framework Agreement due to Iraq's need for training. A relationship must be designed in all aspects to support the full sovereignty of Iraq. The political leaders will monitor the talks to consider any final agreement with the American side. These talks must be conducted with a spirit of cooperation."

Consistent with this Iraqi position, the United States began negotiations with Iraq on the nature of this potential U.S.-Iraq security relationship post-2011, including training of Iraqi Security Forces (ISF) and related missions. For some time, we have had informal consultations with our Iraqi partners, including senior ISF officials, regarding remaining ISF gaps and areas in which Iraq might request training post-2011. These areas include combined arms training, intelligence fusion, air and maritime security training, and logistics. Our negotiations to date have focused on the possible mission sets to support the ISF in these and other areas.

However, there are no final decisions, nor reached any agreement with the Iraqis, about a post-2011 U.S. forces presence in Iraq.

135. Senator AYOTTE. Dr. Carter, what, in your view, is the correct troop level?

Dr. CARTER. The post-2011 U.S. force presence and mission set, if any, will be addressed through U.S. negotiations with Iraqi leaders. Because discussions are ongoing, no final agreement with Iraq has been reached, no final decisions have been made, and the current operative plan remains that the United States will remove all of its forces by the end of 2011. However, if the United States were to have a post-2011 U.S. force presence, it would be at a much lower level than the current level of U.S. forces in Iraq.

Again, there are no final decisions, or any agreement reached with the Iraqis, about a post-2011 U.S. force presence in Iraq.

136. Senator AYOTTE. Dr. Carter, what missions will the remaining troops perform?

Dr. CARTER. We are currently in negotiations with the Iraqi Government about the nature and scope of a potential future relationship. Our discussions with the Iraqis are focused on the types of training the United States may provide after December 31, 2011, and we have made no final decisions—nor reached any agreement with the Iraqis—about the nature of a U.S. presence in Iraq post-2011. We want a normal, productive relationship with Iraq going forward, like we have with other countries in the region and around the world.

For some time, we have had informal consultations with our Iraqi partners, including senior Iraqi Security Forces (ISF) officials, regarding ISF gaps and areas in which the ISF might request training post-2011. These areas include combined arms, training necessary for Iraq's external defense; intelligence fusion to support counterterrorism efforts, air and maritime security training, and logistics.

Our negotiations to date have focused on the possible mission sets to support the ISF in these and other areas. Any post-2011 U.S. forces presence upon which the United States and Iraq might ultimately agree would flow from the requirements necessary to support training and related mission sets.

Again, there are no final decisions—nor reached any agreement with the Iraqis—about a post-2011 U.S. forces presence in Iraq.

RESERVE COMPONENT

137. Senator AYOTTE. Dr. Carter, our Nation must reduce Federal spending, and defense has a role. However, in the coming months and years, we must avoid defense cuts that endanger our military readiness and shortchange the Guard and Reserve. General Dempsey, Chairman of the Joint Chiefs of Staff, recently stated that the future fiscal environment will present significant challenges in preserving the readiness gains of the Reserve component. General Dempsey also stated that, “the Reserve component of our Armed Forces has transformed from an exclusively Strategic Reserve to one that also provides operational, full-spectrum capabilities to the Nation. Repeated combat deployments, as well as peacekeeping, humanitarian relief, and Homeland defense missions, have produced a Reserve component far more operationally capable and experienced than any time in our Nation’s history.” Do you believe it would not be in the Nation’s best interests to return the National Guard to strictly a Strategic Reserve?

Dr. CARTER. No, I do not believe that returning the National Guard to strictly a strategic Reserve is the correct solution or in the best interests of the Nation. I understand that the “force mix” of Strategic versus Operational Reserve component forces as well as the optimal AC/RC mix for certain capabilities are under review. I will ensure that the Department continues this vital work in order to ensure it can meet the demands of the National Military Strategy in a fiscally responsible manner.

138. Senator AYOTTE. Dr. Carter, how do you recommend we maintain the readiness of the Reserve component in a period of fiscal restraint?

Dr. CARTER. While I do not have specific recommendations at this time, I recognize that the consistent operational experience the Reserve components have gained over the last decade has significantly increased their readiness and confirmed that they are an integral part of the Total Force. It is my opinion that in order to reduce stress on the overall force, maintain an All-Volunteer Force, and leverage the skills and experience resident in the Guard and Reserve, their continued contribution in the future will be critical. These contributions—planned, periodic utilization of the Reserve component in missions for which they are best suited—often have the added benefit of maintaining their readiness. Additionally, it will be my goal to make the most efficient use of the Total Force. The Reserve component is an experienced and well-trained element of that force, providing value in many mission areas by maintaining capability and capacity at lesser cost.

PORTSMOUTH NAVAL SHIPYARD

139. Senator AYOTTE. Dr. Carter, the Portsmouth Naval Shipyard (PNSY) is an essential part of our Nation’s naval readiness. PNSY conducts nuclear submarine maintenance on the Los Angeles-class and *Virginia*-class submarines. In fact, PNSY is currently conducting the first-in-the-Navy *Virginia*-class maintenance availability on the USS *Virginia*. A recent GAO study found that DOD has a backlog of over \$3 billion and at PNSY alone totaling over \$500 million which impacts readiness, efficiency, and the health and safety of our sailors and workforce. If confirmed, do you commit to working to address this modernization backlog at this and other important shipyards?

Dr. CARTER. I am committed to investing in the Naval Shipyard infrastructure through Sustainment, Restoration and Modernization, and MILCON as part of a risk-balanced, fiscally constrained Navy infrastructure portfolio.

Shipyard projects are evaluated and prioritized with all other Navy infrastructure projects to best enable warfighting and Joint capabilities, minimize the decline of mission-essential and quality of life infrastructure, and optimize warfare enterprise outputs and quality of service.

Section 2476 of title 10, U.S. Code, requires that the Navy invest at least 6 percent of the average combined workload funded at all Navy depots for the preceding 5 years. The Navy spent 9.5 percent, 9.9 percent, and 15.6 percent of these funds on shipyard recapitalization in fiscal year 2008–fiscal year 2010, respectively, and is in the process of investing 11.1 percent in fiscal year 2011.

In fiscal year 2010, the Navy executed eight Operations and Maintenance (Sustainment and Restoration and Modernization) special projects at PNSY with a total value of \$40.9 million. In fiscal year 2011, the Navy planned additional special

projects, valued at \$17 million, to repair and enable certification of Dry Dock #1. In fiscal year 2012, the Navy plans to invest \$100.3 million in four energy special projects at PNSY.

PEASE AIR NATIONAL GUARD BASE

140. Senator AYOTTE. Dr. Carter, Pease Air National Guard Base in New Hampshire is a key base for Air Force refueling tankers. If DOD uses transparent and objective basing criteria for its KC-46A basing decisions, I am confident that Pease will continue to be a key strategic refueling base far into the future. Pease is the closest airbase to the operational and training refueling tracks, which will result in significant cost savings over the KC-46A's decades of service. The aerial refueling wing also has a unique Active Duty association that results in a very high aircraft utilization rate. The basing decision will be heavily scrutinized, so it is important that the process is objective and transparent. As Deputy Secretary of Defense, do you agree to work to ensure that the process for basing decisions for the KC-46A is objective and transparent?

Dr. CARTER. Yes. The Air Force is using its Strategic Basing Process to determine future locations for the KC-46A.

U.S. NAVAL SUPREMACY

141. Senator AYOTTE. Dr. Carter, the U.S. Navy has the fewest number of ships since America's entrance into World War I. Yet the Navy is being tasked with arguably more responsibilities than ever before. Our fleet is undoubtedly the finest ever put to the seas, but it is said that quantity has a quality all of its own. Security in Asia and around the world would increasingly rely on the U.S. maintaining naval supremacy. Since shipbuilding is one of the largest DOD expenditures, I worry that DOD will be tempted to cut our Nation's shipbuilding program. As a member of the Seapower Subcommittee, I would like to know, how important it is in your mind that the United States maintains naval supremacy?

Dr. CARTER. There is no question that this country relies upon continued naval supremacy, and I am firmly committed to maintaining it.

142. Senator AYOTTE. Dr. Carter, what ship-count is needed to accomplish naval supremacy?

Dr. CARTER. Ship count alone does not ultimately provide the proper mix of capabilities necessary to achieve naval supremacy across a wide range of possible contingencies. I believe procuring and maintaining the right mix of capabilities in our battle forces is what gives our Nation naval supremacy. The Department is committed to maintaining naval supremacy, but, as Secretary Panetta has stated, all areas of the budget are currently on the table in the budget review.

143. Senator AYOTTE. Dr. Carter, the Navy has called the 313-ship requirement a floor. In terms of ships in the Navy, based on strategy, rather than budget exercises, is there a floor you would not go below? If so, what is it?

Dr. CARTER. The number of ships, while important, is less important than having in the fleet the proper mix of those critical capabilities necessary to defeat adversaries. I believe the Department needs to strategically prioritize its battle force mix consistent with ensuring it is a ready and agile battle force that is in balance with the other armed forces needed to maintain American national security.

EFFICIENCIES

144. Senator AYOTTE. Dr. Carter, after a series of hearings Senator McCaskill and I conducted earlier this year on efficiencies and financial management with DOD, it is not apparent that DOD is placing sufficient emphasis on eliminating non-essential spending. In an unprecedented time of budget deficits and skyrocketing debt, we have repeatedly called for DOD to rein in wasteful or unnecessary spending across the board. Yet, DOD continues to notify us of new programs and new projects to fund with savings they have accumulated as opposed to returning those savings to American taxpayers. As an example, a recent decision by the Air Force illustrates the conflict we see between statements by the Secretary of Defense and the actions of the Military Departments to continue to fund requirements that are not absolutely essential to their core missions and operations.

In November 2010, we received a notification from the Air Force of their intent to transfer \$28 million from operations and maintenance accounts in order to con-

struct a student activities center at Fort Sam Houston, Texas, in support of a training mission consolidation directed by the 2005 Base Realignment and Closure (BRAC) round. This facility is intended to support community and recreational activities, student processing, commander's calls, and graduation activities. After extensive meetings and a visit by our staffs to Fort Sam Houston, this committee concluded that the \$589 million BRAC plan implemented by DOD for this decision was adequate, and that an additional construction project to build a student center funded through BRAC appropriations was not essential to the successful completion of the BRAC decision by September 15, 2011. In a letter to the Secretary of the Air Force dated April 15, 2011, we provided this position, which is consistent with our intent to take action when DOD spending may not be essential or efficient in these tough fiscal times.

On June 1, 2011, we received a reply from the Air Force that indicated their intent to carry out the project, despite our objections. We immediately wrote the Secretary of Defense asking for his personal review of this decision to determine whether it is consistent with the current efforts of DOD. While we are still awaiting an answer, we were notified last week that the Air Force has awarded the contract to construct the student center. This disregard for the spending concerns of this committee is unacceptable. Do you condone the decision by the Air Force?

Dr. CARTER. At time of the hearing, the Department had not yet completed its response to Congress. On October 4, 2011, the Deputy Under Secretary of Defense for Installations and Environment sent a letter to you and Senator McCaskill affirming the Air Force decision to build the student activity center. The Air Force's decision to spend \$28 million from available resources within the BRAC account is necessary and therefore, appropriate, because it supports the significantly increased population of enlisted medical trainees at this location. For example, the student activity center will provide space for student processing (averaging 400 students weekly) and an academic support forum large enough for commander's calls and graduation activities. This project provides our front-line medics needed functionality overlooked in the initial planning for this BRAC recommendation. As such, the student activity center is an example of how we used the flexibility of the BRAC account to make appropriate adjustments as we approached the end of the BRAC implementation period.

145. Senator AYOTTE. Dr. Carter, if confirmed, what would you do to ensure the members of congressional defense committees are adequately consulted about concerns formally raised to DOD before spending taxpayers' funds?

Dr. CARTER. I will make every effort to work with Congress to address your concerns.

146. Senator AYOTTE. Dr. Carter, if confirmed, is a recreation center the type of priority you will continue to support as a critical new spending item?

Dr. CARTER. In light of the current funding climate, the Department must ensure that the highest priority needs are met. I will be diligent in finding and eliminating wasteful spending. It is also important that the United States continues to take care of the troops and their families in order to sustain our high quality All-Volunteer Force.

147. Senator AYOTTE. Dr. Carter, what is DOD doing exactly to rein in unnecessary spending as we approach the end of the fiscal year?

Dr. CARTER. All echelons of the enterprise must be alert to any unnecessary, wasteful spending. There is a legal limitation to spending more than 20 percent of an appropriation in the last 2 months of a fiscal year. It must be noted that in recent years the Department faced persistent continuing resolutions and late enactment of supplemental appropriations which have the effect of delaying contractual actions until late in a fiscal year.

QUESTIONS SUBMITTED BY SENATOR LINDSEY GRAHAM

AIR FORCE CENTRAL COMMAND

148. Senator GRAHAM. Dr. Carter, is the U.S. Air Force Central Command (AFCENT) creating accompanied tours in the CENTCOM Area of Responsibility (AOR)? If so, how many families does the Air Force plan to move from AFCENT to the CENTCOM AOR?

Dr. CARTER. DODI 1315.18, Procedures for Military Personnel Assignments, and the Joint Travel Regulation (JTR), established Qatar as a 24-month accompanied

and 12-month unaccompanied tour. Four families are slated to move to Al Udeid, Qatar, in 2011 for a 24-month accompanied tour. The current plan is to increase the number of families by 12 per year for the next 5 years for a total of 60 families by the end of fiscal year 2015.

149. Senator GRAHAM. Dr. Carter, what is the timeframe for these moves?

Dr. CARTER. One family was in place July 2011, three more families will be in place fall 2011. The current plan is to increase the number of families by 12 per year for 5 years for a total of 60 families by the end of fiscal year 2015.

150. Senator GRAHAM. Dr. Carter, does AFCENT intend to eliminate or transfer any positions from Shaw AFB between now and October 2012? If so, what is the reasoning behind the elimination or transfer?

Dr. CARTER. To meet the OSD direction to target civilian manpower billets at fiscal year 2010 levels, the Air Force is conducting a comprehensive strategic review to increase efficiency, reduce overhead, and eliminate redundancy while preserving or growing in critical mission areas. As a result of this review, five AFCENT civilian billets will be eliminated at Shaw AFB. Reductions were due to efficiencies in reach-back support for Eskan Village (two billets) and reductions in staff support to AFCENT (three billets). The Air Force continues to develop enterprise-wide solutions to increase efficiency and remain within fiscal year 2012 civilian pay budget and therefore further reductions are possible. The Air Force will finish the review in mid-December and will notify Congress of the results in late January 2012.

151. Senator GRAHAM. Dr. Carter, are any such positions slated to be transferred to the CENTCOM AOR?

Dr. CARTER. There are currently no plans to transfer any positions affected by DOD's direction to limit each military Service's civilian end strength to levels in effect at the end of fiscal year 2010.

152. Senator GRAHAM. Dr. Carter, if the CENTCOM AOR is sufficiently stable to allow families to reside there does this signify that the AFCENT Commander's presence is no longer needed in the region? If so, do the Commander's ongoing obligations at Shaw AFB now require that he move back?

Dr. CARTER. The decision to initially move the Commander, U.S. Air Force Central (COMUSAFCENT) to reside in the CENTCOM AOR was made by the Chief of Staff of the Air Force (CSAF) based on the U.S.'s vital national interests in the region and the desire to continue building robust partnerships in this key area of the world. The decision to keep COMUSAFCENT assigned within the AOR will be driven by the current operating environment and relationships within the AOR. At some point in the future DOD could envision the Deputy COMUSAFCENT being assigned in the AOR with his or her family while the Commander resides at Shaw AFB. Ultimately, however, the CSAF will look at all the key factors in making the decision if or when to return the Commander's position back to Shaw.

153. Senator GRAHAM. Dr. Carter, if the AFCENT Commander moves his family to the AOR, does this change the promise by the Air Force to return the AFCENT Commander to Shaw AFB once hostilities cease in the CENTCOM AOR?

Dr. CARTER. The Chief of Staff of the Air Force's decision to keep COMUSAFCENT assigned within the AOR will be driven by the current operating environment and relationships within the AOR. Whether the COMUSAFCENT moves his family to the AOR will not affect that decision.

154. Senator GRAHAM. Dr. Carter, with privatized housing now beginning at Shaw AFB, will new housing be built for the AFCENT Commander, as is being done for the AFCENT Commander?

Dr. CARTER. Yes. The project provides for a new home for both the AFCENT and the Army Central Command commanders. Five general officer homes will be constructed at Shaw AFB, SC, as part of housing privatization. The Southern Group Housing Privatization project which includes Shaw AFB, SC; Charleston AFB, SC; Arnold AFB, TN; and Keesler AFB, MS, was awarded to Forest City Southern Group, LLC on 30 September 2011. The project owner started management operations the same day and has received authorization to commence construction from the Air Force.

155. Senator GRAHAM. Dr. Carter, unlike Naval Central Command (NAVCENT) Headquarters (HQ) the current AFCENT HQ location in the AOR is not controlled by the United States. Will the lack of U.S. control impact the security, support, or

quality of life structure for family members who will be without access to a U.S. base?

Dr. CARTER. The safety of our Air Force members and their families is our number one priority. A prerequisite to Commander, CENTCOM, approval of the AFCENT plan was assurance that our families would be able to enjoy similar levels of safety and security afforded to ARCENT families by living in the same housing communities managed under DOS Housing Pool that satisfy CENTCOM force protection requirements. According to the DOS (<http://travel.state.gov/travel/cis—pa—tw/cis/cis—1003.html#crime>), violence in Qatar is “rare” and a “large police presence is deployed throughout the country”. Reports of petty theft, credit card theft, and theft of unsecured items (e.g., cash, jewelry, electronics, etc.) in hotel rooms or other unattended public places are also noted, however, these crimes are not uncommon in the U.S. and awareness and vigilance are recommended.

Owing to the availability, proximity, and quality of resources afforded to Air Force family members within the greater Doha region, we don’t believe limited access or lack of robust, traditional family support resources at Al Udeid will degrade quality of life for servicemembers or their dependents while living in Doha, Qatar. The AFCENT command sponsorship program is an extension of a pre-existing ARCENT program, partnering with the U.S. Embassy, Qatar, and placing Air Force family members into secure, select, western-style DOS Housing Pool quarters. Neighborhoods are filled with ARCENT families, U.S. citizens, allies, and a wide variety of professionals serving in diverse capacities including academics, doctors, and corporate executives.

Doha is a very modern Middle Eastern city with many western amenities including instantly-recognizable, western-style restaurants, retailers, and grocery stores that offer international cuisines. For families with K–12 children, there are several education options including enrollment in the American School of Doha, a world renowned, fully-accredited institution. Families with dependents in college can choose from branch campuses of internationally-recognized universities including Texas A&M, Carnegie Mellon, and Northwestern. Modern medical care is available and covered by TRICARE. Finally, the Qatari Ministry of Defense recently approved Air Force military family members access to Al Udeid Air Base, including access to limited morale, welfare, and recreation services, chaplain services, and fitness center resources.

156. Senator GRAHAM. Dr. Carter, what is cost-per-year required to support and protect families on accompanied tours to the CENTCOM AOR?

Dr. CARTER. Bringing up to 60 families to the CENTCOM AOR by fiscal year 2015 increases the support footprint. The Department estimates that the additional net cost to support and protect families in the CENTCOM AOR will be approximately \$6 million per year. This cost includes personnel entitlement and related costs, schooling, housing, additional civilian positions to provide support to families, and associated force protection costs. This figure also takes into account partially offsetting expenses because families assigned to the CENTCOM AOR will no longer receive Basic Allowance for Housing or Family Separation Allowance.

The report of the AFCENT “Families At Al Udeid” (F@AUAB) Working Group, which met at regular intervals from August 2010 through July 2011, included the steps taken to assign the initial set of command-sponsored families in summer 2011. The report also identified the steps required in future years to achieve the COMUSAFCENT’s intent to increase the number of command-sponsored families in Qatar by approximately 12 each year, to a total of about 60 families by 2015.

157. Senator GRAHAM. Dr. Carter, who initiated moving the families from Shaw AFB to the CENTCOM AOR (e.g., AFCENT, CENTCOM, Air Force, DOD and/or DOS)?

Dr. CARTER. The request to expand on the U.S. Army Central program was initiated by then-Lieutenant General Gilmory M. Hostage, former Commander, U.S. Air Forces Central, in coordination with, and approval from, General James N. Mattis, Commander, CENTCOM, and Dr. Clifford L. Stanley, Deputy Under Secretary of Defense (Personnel & Resources).

A small percentage of Air Force members are stationed, unaccompanied, at Al Udeid Air Base (AB), Qatar via permanent change of station orders for 1 year. Tour lengths will be extended to 2 years for a targeted group of individuals who choose to bring their families—there is no move of position authorizations from Shaw AFB to Al Udeid AB. The number of accompanied tours will increase and the number of unaccompanied decrease to maintain the same number of billets at Shaw AFB and Al Udeid AB.

QUESTIONS SUBMITTED BY SENATOR JOHN CORNYN

F-35 JOINT STRIKE FIGHTER

158. Senator CORNYN. Dr. Carter, in your responses to advance policy questions, you made the following statements: “Based on current and projected threats, I believe it is critical that we transition to a fifth generation capability across the Services while maintaining sufficient legacy inventory capacity to prevail in current and near-term conflicts” and “we need JSF to deal with advanced fighters and surface-to-air missiles worldwide, especially in the stressing electronic warfare environments of the future.” Can you elaborate on these statements?

Dr. CARTER. I have not wavered in my firm belief that JSF is the centerpiece of the Department’s tactical air forces. Its unprecedented combination of stealth, sensing, and firepower will give American forces a crucial edge against advanced threats. Thus, as a matter of utmost importance, DOD continued to actively manage the JSF program as it proceeds through development, balancing the capability benefits with the concurrency risks-within increasingly tight resourcing constraints.

159. Senator CORNYN. Dr. Carter, some F-35 critics have called for our military’s planned buy of F-35s to be downsized from the full 2,443 requirement, resulting in a silver bullet fleet of far fewer F-35s, with the rest of the requirement to be filled by fourth generation aircraft. What concerns does this scenario raise for you?

Dr. CARTER. The Department is currently developing the fiscal year 2013 budget and thus is still deliberating investment strategies with respect to specific programs. I understand that the Department must maintain a tactical air portfolio that meets the near and longer-term requirements of the warfighter within the bounds of affordability. JSF’s impressive capabilities make it a key focus of our attention as the Department examines the appropriate size and mix of fourth generation and fifth generation fighter attack aircraft inventories based on strategic priorities, threat assessments, concepts of operations, and force structure requirements.

160. Senator CORNYN. Dr. Carter, what would the effect on our warfighters be, especially in the face of a large-scale military conflict in which they were asked to operate for weeks or months on end in highly contested airspace?

Dr. CARTER. Sustained, large-scale combat operations are inherently stressful, but the key to lowering risk in any type of conflict is to modernize and support our forces with the right capabilities and adequate capacity. The Department is dedicated to that task in building the fiscal year 2013 President’s budget.

161. Senator CORNYN. Dr. Carter, DOD recently provided Congress with the annual report on Communist China’s military modernization and expansion, in which it warned us that, “... China’s military has benefited from robust investment in modern hardware and technology. Many modern systems have reached maturity and others will become operational in the next few years.” One of those investments includes China’s new J-20 stealth fighter unveiled earlier this year. More recently, Russia unveiled its own stealth fighter called the T-50 at the Moscow Air Show in August. Speaking at the air show, the Russian Federation Air Force Commander in Chief said that series production of this fifth generation aircraft could begin as early as 2014. Additionally, the Chinese, North Koreans, and Iranians are fielding sophisticated SAMs that threaten our fleet of fourth generation aircraft. In your written testimony to this committee in May, you stated that “the F-35 will form the backbone of U.S. air combat superiority for generations to come.” Would you agree that in order to maintain air combat superiority for generations to come, the United States needs to successfully field a stealthy, multi-role fighter such as the F-35 in sufficient quantities?

Dr. CARTER. Tactical Air (TACAIR) modernization is a critical component in the Department’s ability to meet our national security requirements. The Department’s goal is to transition the TACAIR fleet to primarily a fifth generation force as efficiently as we can. On June 1, 2010, I certified to Congress that the F-35 program is essential to national security. That certification, following a thorough Nunn-McCurdy review, highlighted the continued need for the F-35 program. However, the F-35 is still under development and the Department has a number of aging legacy aircraft, a portion of which may need replacing before the F-35 is ready for deployment. It is also vitally important that DOD maintains a TACAIR force structure that can fight the wars the U.S. military is currently involved in and the threats it may confront in the near future.

162. Senator CORNYN. Dr. Carter, in your opinion, what does development by our potential adversaries of fifth generation fighters and sophisticated SAMs mean for the U.S. inventory of fourth generation aircraft?

Dr. CARTER. The Department is investing in F-35 and F-22 to address high end threats. While the high-end scenarios are stressing, the F-35 brings an unprecedented combination of stealth, sensing, and firepower, complimented by the F-22's unmatched survivability and lethality in the air-to-air arena. However, pending full rate production of JSF, the Department must consider prudent investments to maintain our inventory capacity, which in the 2012 President's Budget involved expenditure in new FA-18E/Fs and legacy attack fighter aircraft modernization.

163. Senator CORNYN. Dr. Carter, would you agree that these threats are reason to procure more fifth generation aircraft and phase out procurement of fourth generation aircraft?

Dr. CARTER. The Department needs the JSF to deal with advanced fighters and surface-to-air missiles world-wide, especially in the stressing electronic warfare environments of the future, and it is committed to making responsible investment decisions relative to the F-35 that accurately reflect the status of the program, the Services' requirements, and the larger Department priorities.

164. Senator CORNYN. Dr. Carter, in your opinion, what is the survivability of a fourth generation fighter, such as the latest versions of the F/A-18, against a Russian T-50, Chinese J-20, and advanced SAMs?

Dr. CARTER. The F/A-18E/F is a highly capable aircraft designed to meet and defeat today's threats with growth potential for the future. It operates at higher risk in a war fight compared to the JSF but ably conducts the full range of strike fighter missions. F/A-18E/F will be a complementary platform on the Nation's carrier decks with the F-35C into the 2030s and will meet current and projected requirements, with planned investments in the fiscal years 2012-2016 FYDP and beyond. Investments in the F/A-18E/F include upgraded avionics, sensors, and weapons such as Infra-Red Search and Track, AIM-9X Block II, Integrated Defensive Electronic Countermeasures Block 2, and Active Electronically Scanned Array electronic protection upgrades, which will ensure relevancy against many emerging and future threats.

SHORT TAKEOFF VERTICAL LANDING AIRCRAFT

165. Senator CORNYN. Dr. Carter, the Marine Corps has a validated and pressing need for a short takeoff, vertical landing (STOVL) aircraft to replace its famous AV-8B Harrier jump-jets. During the conflict in Libya, Marine Corps Harriers operated with great combat effectiveness from the USS *Kearsarge*, approximately 150 miles off the coast of Libya. Their flight time of 25 minutes from ship to target was just a fraction of the 440-mile, 75-minute transit that conventional U.S. tactical aircraft made from the nearest base in Italy. Additionally, due to the short transit time, Marine Corps combat aviators were able to return to the ship, load more weapons, and fly a second mission that same day. It seems pretty clear that the STOVL capability is a combat multiplier. Do you agree that this unique capability greatly increases the ability of our military units to execute their missions?

Dr. CARTER. STOVL fixed-wing aircraft, operating from forward deployed amphibious ships and expeditionary bases, provide important operational flexibility. With regards to the Libya operation, the presence of the USS *Kearsarge* and its air combat element allowed the United States to provide tactical aircraft capabilities from the sea without changing the disposition of aircraft carriers deployed elsewhere. While our NATO allies operated from bases 440 miles from Libya, most tactical U.S. strike aircraft operated from Aviano Airbase, 1,045 miles from Benghazi. The AV-8B Harriers, however, were based as close as 120 miles from Benghazi, allowing them to operate without aerial refueling and generate multiple sorties per aircraft per day. This ability to operate from such close proximity to the Libyan coast made the Harrier highly effective in attacking fleeting targets of Qaddafi's highly mobile forces.

166. Senator CORNYN. Dr. Carter, the Harrier, due to its STOVL capability, is the only U.S. tactical jet aircraft capable of operating from the Navy's fleet of amphibious assault ships, until the F-35B fleet comes online. It seems that, if the F-35B variant is not fielded in its intended numbers, the United States will have failed to leverage the enormous capability provided by amphibious assault ships and also

the huge investment that U.S. taxpayers have made in these ships. Do you agree? How can we avoid such an undesirable outcome?

Dr. CARTER. The F-35B was designed to operate off our current Landing Helicopter Deck (LHD) class large deck amphibious assault ships, and is currently conducting sea trials aboard the USS *Wasp* LHD. The Department's future America Class Landing Helicopter Assault LHA(R) class vessels are specifically designed to operate F-35Bs, along with the full contingent of Marine Corps assault support rotorcraft. The integration of F-35B and F-35C aircraft into our strike groups will provide multi-role, fifth-generation capabilities across a range of combat operations to deter potential adversaries and enable future Navy and Marine Corps power projection. DOD remains strongly committed to both the F-35B and F-35C JSF.

F-35 CONCURRENCY

167. Senator CORNYN. Dr. Carter, the JSF program was designed with a substantial amount of concurrency built in by DOD. My understanding is that concurrency is the deliberate overlap of the development/testing phase and the production phase of a program. By building in concurrency, DOD decided to start buying production models of the F-35 before development and testing of the aircraft was completed. As I understand it, the goal of building in concurrency would be to get the F-35 to the warfighter faster, but at the risk of creating cost overruns during the early stages of production. Can you comment on why DOD built concurrency into the JSF program?

Dr. CARTER. The Department established a concurrent JSF program with the goal of providing the Department with incremental JSF capability in order to meet operational requirements and address strike fighter shortfall forecasts. Department leadership accepted a level of concurrency that it felt best balanced the risks of concurrent development and production against the need to meet the Services IOC requirements. In the time since this initial decision was made, program delays have substantially increased the level of concurrency and have made it necessary for the Services to delay their IOC dates and extend their legacy fleets. The Department will continue to review concurrency in the program to ensure that it is managed appropriately.

168. Senator CORNYN. Dr. Carter, how has that affected the program's costs? Dr. CARTER. Concurrency has increased procurement costs. Aircraft procured prior to the completion of the development and testing phase require modifications to incorporate changes discovered during testing and those costs are not insignificant. However, those increases have to be taken in the context that accepting concurrency costs allows for earlier delivery of the aircraft.

169. Senator CORNYN. Dr. Carter, has concurrency led to a faster ramp-up to full-rate production?

Dr. CARTER. Yes. Because the program began Low-Rate Initial Production (LRIP) during development, full-rate production can be achieved sooner than if LRIP was delayed until the completion of the development and test phase.

170. Senator CORNYN. Dr. Carter, my understanding is that the total cost overruns for LRIP Lots 1 through 3, which include both performance and concurrency overruns, was \$1.054 billion, of which the Government's share was \$771 million and industry's (both Lockheed Martin and United Technologies Corporation) was \$283 million. DOD built concurrency into the JSF program. Would you agree that a significant portion of these cost overruns is a result of that concurrency?

Dr. CARTER. No. The cost overruns on the LRIP 1-3 contracts are not primarily a result of the concurrent aspects of the program. The good bulk of cost overruns are attributable to additional labor hours required for wing and mate assembly on the production line. It took the contractor longer to manufacture the early lots of aircraft than was predicted and negotiated for. Since these were Cost Plus Incentive Fee contracts, negotiated in 2007, 2008, and 2009, the Department was responsible for the cost increases. For this reason, in 2010 the Department transitioned to a Fixed-Price Incentive Firm contract for LRIP 4. In both the LRIP 4 contract and the LRIP 5 contract currently being negotiated, the Government will be protected against this type of open ended overrun. The costs due to concurrency can be predicted, based on the expected change to the design, and negotiated into these Fixed-Price type contracts. Additionally, an equitable sharing arrangement for overruns, or underruns, as well as a ceiling price is included in the costs to cap the Government's liability.

TAIWAN SELF DEFENSE

171. Senator CORNYN. Dr. Carter, under the Taiwan Relations Act (TRA), the United States is statutorily obligated to make available to Taiwan such defense articles and defense services “as may be necessary to enable Taiwan to maintain a sufficient self-defense capability.” Yet DOD’s 2011 report, *Military and Security Developments Involving the People’s Republic of China*, concludes that the “balance of cross-strait military forces and capabilities continues to shift in the mainland’s favor.” Given this predictable shift in China’s favor, do you assess that the United States has been upholding our obligations under the TRA?

Dr. CARTER. Yes. The balance of military forces and defense capabilities was expected to shift, and indeed it did. The Department is monitoring this shift very closely and discussed these changes and their effects with Taiwan. It is not possible for Taiwan to match China’s military expansion, nor would it be desirable for Taiwan to try to do so. Instead, Taiwan must acquire and deploy advanced and asymmetric military capabilities to defend itself. To offset the shift in military balance we are working with Taiwan to help it develop these capabilities and the appropriate military force that will deter PRC aggression and, should deterrence fail, provide the Taiwan military the capability to defend the island for an extended time.

172. Senator CORNYN. Dr. Carter, in your responses to advance policy questions, you stated that China’s “near-term focus appears to be on preparing for potential contingencies involving Taiwan, including possible U.S. military intervention.” Since 2006, Taiwan has made repeated requests to purchase new F-16C/D multirole combat aircraft from the United States to augment their air force, which is becoming increasingly obsolete. In your opinion, does Taiwan need these 66 new F-16C/D fighters in order to maintain adequate self-defense capabilities?

Dr. CARTER. The Obama administration is firmly committed to the one-China policy, which is based on the three joint U.S.-China communiqués and the TRA. This is a policy that endured across eight administrations, transcended political parties, and served as a central element of our approach to Asia for more than three decades. The administration’s strong commitment to the TRA is evident in its actions, which include the September 21 notification to Congress of our intent to sell Taiwan \$5.85 billion worth of new defense articles and services—including an upgrade package for Taiwan’s 145 F-16 A/B fighters; spare parts for its F-16, F-5, and C-130 aircraft; and training for F-16 pilots at Luke AFB in Arizona.

This decision follows the January 29, 2010 decision to sell Taiwan \$6.4 billion in defensive arms, including 60 UH-60M Blackhawk helicopters, Patriot PAC-III firing units and missiles (three firing units, one training unit, and 114 missiles), Harpoon missiles, two Osprey-class mine hunters, and follow-on support for command and control systems. In addition, in August 2011, the Obama administration submitted a \$310 million direct commercial sales notification to Congress for the approval of export licenses in support of radar equipment for Taiwan Indigenous Defense Fighters and Hughes air defense radars. These collective sales of more than \$12.5 billion in arms to Taiwan are an important indication of our commitment to Taiwan’s defense.

The F-16 retrofit reflects a smart defense policy that provides real and immediate contributions to Taiwan’s security. The retrofitted F-16 A/Bs will provide a more reliable, survivable, and capable aircraft—comparable to the F-16 C/D, but at a lower cost—and Taiwan will have 145 of them.

173. Senator CORNYN. Dr. Carter, what risks would the United States face if Taiwan is unable to protect itself in the future?

Dr. CARTER. A Taiwan that is unable to protect itself could lead to instability in Northeast Asia. A weak Taiwan would be less likely to continue cross-strait engagement with China if it could not resist coercion. The lack of dialogue would potentially result in misunderstandings across the Strait and could escalate to crisis due to miscalculations. Additionally, China may be more likely to resort to force against Taiwan if the island lacks the means to resist coercion and deter aggression.

Taiwan is a visible and important indicator of U.S. commitment to Asia. A Taiwan that is unable to defend itself undermines U.S. interests, and the failure to provide for Taiwan’s defense could cast doubt on U.S. commitments to other friends and allies in the region. Maintaining the current balance of power in the region and across the Taiwan Strait promotes stability and discourages regional arms races from materializing.

DOD CHIEF MANAGEMENT OFFICER

174. Senator CORNYN. Dr. Carter, section 904 of the National Defense Authorization Act for Fiscal Year 2008 designates the Deputy Secretary of Defense as the CMO of DOD. In this capacity, the Deputy Secretary is responsible for overseeing the synchronization, integration, and coordination of DOD business operations, ensuring effectiveness and efficiency—including in DOD’s financial management practices. Arguably, past deputy secretaries have not spent the necessary time on performing the critical job of CMO, which has fallen well short of Congress’ intent for the CMO function. Do you agree that now, more than ever, there is a pressing need for DOD to improve its overall business practices and financial management systems in order to maximize each and every dollar and serve as better stewards of taxpayers’ funding?

Dr. CARTER. I believe that, particularly in light of the current need to rein in spending, in order to acquire with wisdom and care and to make the most of each and every one of the taxpayers’ dollars entrusted to the Department, the oversight of the Department’s business operations and its financial management practices could not be of greater importance.

175. Senator CORNYN. Dr. Carter, are you fully committed to carrying out the important function of DOD CMO on a daily basis?

Dr. CARTER. Yes, I am thoroughly committed to carrying out the function of DOD CMO on a daily basis.

176. Senator CORNYN. Dr. Carter, how much time do you anticipate dedicating to your responsibilities as CMO?

Dr. CARTER. I anticipate dedicating a significant amount of my time to my responsibilities as DOD’s CMO.

LOOMING DOD BUDGET CUTS

177. Senator CORNYN. Dr. Carter, in a speech earlier this year, former Secretary Gates stated that “we must reject the traditional approach of applying across-the-board cuts, the simplest and most politically expedient approach both inside this building and outside of it. . . . It results in a hollowing-out of the force from a lack of proper training, maintenance, and equipment. We’ve been there before, in the 1970s and in the 1990s.” What assurances can you give that you will make every effort to avoid a “hollowing-out of the force”, as described by Secretary Gates?

Dr. CARTER. The Secretary made maintaining an extremely agile, deployable force one of his major priorities. I will use my position to ensure that adequate resources are programmed and budgeted in the readiness accounts in order to meet this priority. We all understand that this force will likely be smaller but will ensure that it is trained to be ready and deployable when called upon to do so.

178. Senator CORNYN. Dr. Carter, given our experience in recent years in Iraq, Afghanistan, and elsewhere, can the United States afford to take another procurement holiday?

Dr. CARTER. Engaging in two simultaneous unconventional wars in Iraq and Afghanistan has demonstrated that our enemies do not look the same as they did in previous wars. This truth has changed the nature of our engagement and the nature of the systems required to properly equip our warfighters. Similarly, we cannot predict exactly what our enemies will look like in the future, and the defense acquisition system must be able to adapt. As we reduce budgets, we must take care to sustain the industrial base in ways that preserve the ability to equip our forces, as well as protect the future in ways that foster innovation, technical superiority, and essential intellectual capability.

179. Senator CORNYN. Dr. Carter, what would doing so mean for our national security?

Dr. CARTER. A procurement “holiday” of sufficient magnitude could erode key sectors of the industrial base, which could in turn impair our ability to equip our warfighters adequately. It could also degrade key industrial capabilities necessary to sustain technical superiority.

DOD EFFICIENCIES INITIATIVES

180. Senator CORNYN. Dr. Carter, it has been over a year since DOD launched its ambitious efficiencies initiative to spur savings. Can you provide specific examples where these initiatives had resulted in real dollar savings and efficiencies?

Dr. CARTER. Increasing competition is a main initiative to spur savings for the Department. Below is an example from each Military Department in which competition resulted in real dollar savings.

In the Army, within the Joint Tactical Radio System (JTRS) portfolio, the Multifunctional Distribution Information System-Low Volume Terminal (MIDS-LVT) radio program is an example of how competition has resulted in cost savings. During the production phase of the MIDS-LVT program, competition has resulted in approximately 60 percent cost savings. The initial production cost of the radio was \$435 thousand per unit and, through ongoing competition between the two approved vendor production sources, the cost per unit has steadily decreased to \$181 thousand per unit. With over 2,600 MIDS-LVT units purchased to date, the program has achieved hundreds of millions of dollars in procurement savings through the successful MIDS-LVT competitive acquisition strategy.

For the Air Force, the MQ-1 Predator organizational-level maintenance contract is a good example of how competition produced acquisition cost savings. The initial contract, issued in March 2005, was a sole source award to the Original Equipment Manufacturer (OEM), General Atomics Aeronautical Systems. This decision not to compete the organization-level maintenance contract was primarily driven by the lack of published technical orders. When those technical orders became available, the contract was recompleted a year ahead of schedule and awarded to Battle Space Flight Services, resulting in a savings of \$102 million. Because of increased and accelerated wartime demand, the Air Force is anticipating additional savings over the life of the contract. The ability to compete the requirement in the future will continue to enable cost savings.

For the Department of Navy (DON), the most visible example is the Littoral Combat Ship (LCS) program. After receiving proposals from Lockheed Martin and Austal USA in early 2010 that were deemed unaffordable, the DON changed its acquisition strategy to an all-or-nothing competitive contract award and encouraged the companies to establish leaner teaming arrangements. After proposals were submitted, the DON realized it could achieve competitive prices. In December 2010, Lockheed Martin and Austal USA were each awarded fixed-price incentive contracts for the design and construction of 10 ships from fiscal year 2010 through fiscal year 2015. The benefits of competition, serial production, employment of mature technologies, design stability, fixed-price contracting, commonality, and economies of scale contributed to a highly affordable ship construction program. The approach, self-financed within the program budget by reinvesting a portion of the greater than \$2 billion in total savings through the FYDP. The approach also enables the DON to efficiently produce the ships at an increased rate to meet operational requirements sooner.

181. Senator CORNYN. Dr. Carter, recognizing that over 70 percent of weapons systems costs are borne in the sustainment vice the initial purchase, you have spurred the Services to focus their efforts at savings there. Can you provide specific examples where your efforts have brought increased competition and lower costs in the sustainment arena?

Dr. CARTER. Program Managers and Product Support Managers have been focused on sustainment solutions that affordably and effectively satisfy the Warfighter's requirements for the weapon system under their control. Part of the solution addressing the tenets reflected in the Better Buying Power initiative is performance-based, life-cycle product support (also known as Performance Based Logistics (PBL)).

PBL strategies involve buying performance (as defined by the Military Services) rather than a traditional transactional support strategy. Inherent in PBL strategy are the overall reduction of financial and mission performance risk and the transfer of some of that risk from the Military Service to the PBL provider.

Fixed-price, incentive-type contracts are central to effective PBL strategies with commercial activities. This approach is consistent with the "Should Cost" philosophy, which challenges programs to find specific ways to beat the existing cost projections reflected by the Independent Cost Estimate or program estimates. It specifically focuses on eliminating non-value added overhead and incentivizes the provider to improve their processes and product. It creates "internal competition," as cost savings is in the organization's best interest, and it is also in the best interests of the warfighter and taxpayer.

The Department instituted a PBL Awards program in 2005 to enhance PBL awareness and encourage PBL excellence. Three PBL award winners recognized this year by the Department for their success delivering sustainment in a more affordable and effective fashion are the Air Force Joint Stars (AF JSTAR), Apache Sensors, and Navy Tires program.

The AF JSTAR program team delivered an average 96-percent mission-effectiveness rate and \$47 million in savings since contract inception. Apache Sensor PBL improved mean time between failure by 100 percent between July 2010 and the present, and reduced sustainment costs by \$7 million over the same period. The Navy Tire program has resulted in \$46 million in savings across the life of the contract and the elimination of Navy wholesale tire inventory, which freed up 280,000 cubic feet of storage space in the DLA and allowed for the reassignment of personnel to other work. Most importantly, warfighter support has been superb with 100 percent of all orders filled without a backorder in delivering more 289,000 tires worldwide.

182. Senator CORNYN. Dr. Carter, Air Force leadership (Major General Fedder at a National Defense Industrial Association breakfast on September 7, 2011) has recognized that in the Air Force garnering savings in sustainment must be lead by focusing on aircraft engines. Given that over 85 percent of Air Force engine sustainment work is sole-sourced, what is OSD doing to help the Air Force spur competition in sustainment?

Dr. CARTER. A key factor necessary for competition is licensing of the data rights to maintenance manuals for continued sustainment. The Department is addressing this issue as part of the Better Buying Power Initiative for promoting real competition. Proper consideration given to acquiring technical data and the appropriate accompanying licenses in both initial acquisition and in recompetition ensures the Department has repair capability available through organic field and depot maintenance, commercial sources of repair, or a combination of both, with the focus of optimizing competition to reduce cost and provide best value.

[The nomination reference of Hon. Ashton B. Carter follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
August 2, 2011.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Ashton B. Carter, of Massachusetts, to be Deputy Secretary of Defense, vice William J. Lynn III.

[The biographical sketch of Hon. Ashton B. Carter, which was transmitted to the committee at the time the nomination was referred, follows:]

RÉSUMÉ OF CAREER SERVICE OF HON. ASHTON B. CARTER

Education:

- Oxford University
 - 1976–1979
 - Ph.D., Theoretical Physics
 - Senior Scholar, St. John's College
 - Best Participant Prize, NATO Center for Subnuclear Physics
- University of Edinburgh
 - Spring 1975, no degree
- Yale University
 - 1972–1976
 - B.A., summa cum laude
 - Honors in Medieval History
 - Honors in Physics
 - Phi Beta Kappa

- Andrew D. White Essay Prize in European History

Employment Record:

- U.S. Department of Defense
 - Under Secretary of Defense for Acquisition, Technology, and Logistics
 - 2009–present
- Harvard University
 - Chair, International and Global Affairs Faculty
 - John F. Kennedy School of Government
 - 2006–2009 (leave of absence 2009–2011)
- Harvard University
 - Ford Foundation Professor of Science and International Affairs
 - John F. Kennedy School of Government
 - 1996–2009
- Preventive Defense Project, Harvard and Stanford Universities
 - Co-Director (with William J. Perry)
 - 1997–2009
- U.S. Department of State
 - Senior Advisor to the North Korea Policy Review
 - 1998–2000
- U.S. Department of Defense
 - Assistant Secretary of Defense for International Security Policy
 - 1993–1996
- Harvard University
 - Director, Center for Science and International Affairs
 - 1990–1993
- Harvard University
 - Professor, and Associate Director, Center for Science and International Affairs
 - 1988–1990
- Harvard University
 - Associate Professor
 - 1986–1990
- Harvard University
 - Assistant Professor
 - 1984–1986
- Massachusetts Institute of Technology
 - Research Fellow, Center for International Studies
 - 1982–1984
- U.S. Department of Defense
 - Program Analysis and Evaluation
 - 1981–1982
- Office of Technology Assessment, U.S. Congress
 - International Security and Commerce Program
 - 1980–1981
- Rockefeller University, New York
 - Research Associate
 - 1979–1980
- Oxford University
 - Physics Instructor (“Tutor” in the Oxford system)
 - Quantum Mechanics and Relativity
 - 1977–1979
- Brookhaven National Laboratory
 - Experimental Research Associate
 - 1976
- Fermi National Accelerator Laboratory
 - Experimental Research Associate
 - 1975

Honors and Awards:

- Defense Intelligence Medal, from the Defense Intelligence Agency, April 1998.
- Distinguished Public Service Medal, Department of Defense (awarded three times) The highest award of the Department of Defense, “for distinguished public service as Under Secretary of Defense for Acquisition, Technology & Logistics” from April 2009 to June 2011, and “for exceptionally distinguished service to the Nation as Assistant Secretary of Defense for International Security Policy,” July 1994 and December 1995.
- Forum Award, American Physical Society, “For his clear and lucid exposition of the physics issues in the nuclear arms race and his unique ability to combine his physics background and good judgment to clarify the technical parameters of these important public policy issues,” 1988.
- Ten Outstanding Young Americans, United States Jaycees, 1987.
- Rhodes Scholar, 1976
- See above under “Education.”

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Hon. Ashton B. Carter, in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Ashton Baldwin Carter (Ash Carter).

2. **Position to which nominated:**

Deputy Secretary of Defense.

3. **Date of nomination:**

August 2, 2011.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

September 24, 1954; Philadelphia, PA.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to Stephanie DeLeeuw Carter.

7. **Names and ages of children:**

William Ashton Carter, 22.

Ava Clayton Carter, 19.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Abington High School, Abington, PA, 1968–1972, High School Diploma 1972

Yale University, New Haven, CT, 1972–1976, B.A. 1976

University of Edinburgh, Edinburgh, Scotland, spring 1975, no degree

Oxford University, Oxford, United Kingdom, 1976–1979, D. Phil., 1979

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Under Secretary of Defense for Acquisition, Technology and Logistics, 2009–present; U.S. Department of Defense—Washington, DC

Chair, International and Global Affairs faculty, 2006–2009 (on leave of absence 2009–2011); John F. Kennedy School of Government, Harvard University—Cambridge, MA

Ford Foundation Professor of Science and International Affairs, 1996–2009; John F. Kennedy School of Government, Harvard University—Cambridge, MA

Co-Director (with William J. Perry), Preventive Defense Project, 1997–2009; Harvard and Stanford Universities—Cambridge, MA

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Member, White House Government Accountability and Transparency Board (2011–present)

Chair, National Security Strategy and Policies Expert Working Group, Congressional Commission on the Strategic Posture of the United States, 2008–2009

Co-Chair, Review Panel on Future Directions for DTRA (Defense Threat Reduction Agency) Missions and Capabilities To Combat Weapons of Mass Destruction, 2007–2008

Member, International Security Advisory Board to the Secretary of State, 2006–2008

Member National Academy of Sciences Committee on Science and Technology for Countering Terrorism, 2001–2003

Member, National Missile Defense White Team, 1998–2009

Member, Threat Reduction Advisory Committee, U.S. Department of Defense, 1998–2002

Member, Defense Science Board, 1991–1993, 1997–2001

Member, Defense Policy Board, 1997–2001

Assistant Secretary of Defense for International Security Policy, U.S. Department of Defense, 1993–1996

Member, National Academy of Sciences, Committee on International Security and Arms Control, 1990–1993

Member, Sandia National Laboratory, President's Advisory Council, 1992–1993

Member, Congressional Office of Technology Assessment, Advisory Panel on START Verification Technologies, 1991–1992

Member, National Academy of Sciences Panel on National Security Export Controls, 1990–1991

Member, National Research Council Naval Studies Advisory Committee on the Future of the Aircraft Carrier, 1990–1991

Member, White House, President's Council of Advisers on Science and Technology. Panel on National Security, 1990–1991

Member, Defense Science Board Task Force on New Scenarios and Intelligence, 1990

Member, Congressional Office of Technology Assessment Advisory Panel on START Verification Technologies, 1989–1990

Member, Joint Chiefs of Staff Advisory Group on the Future of U.S.-Soviet Military Relations, 1988–1989

Member, Commission on The Presidency and Science Advising, 1988

Consultant, Bureau of Intelligence and Research, U.S. Department of State, 1986–1988

Member, Advisory Panel on Military Uses of Space, Office of Technology Assessment, U.S. Congress, 1985–86

Analyst, Program Analysis and Evaluation, Office of the Secretary of Defense, Pentagon, 1981–1982

Analyst, International Security and Commerce Program, Office of Technology Assessment, U.S. Congress, 1980–1981

Experimental Research Associate, Brookhaven National Laboratory, 1976

Experimental Research Associate, Fermi National Accelerator Laboratory, 1975

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

- a. Aspen Strategy Group, 1997–2009 (now emeritus member)
- b. Council on Foreign Relations, 1989–present
- c. Fellow, American Academy of Arts and Sciences, 1989–present
- d. American Physical Society, 1976–present
- e. American Association of Rhodes Scholars, 1977–present

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Member, Department of Defense Agency Review Team, Obama-Biden Transition, 2008–2009

Member of National Security Advisory Group to Senator Tom Daschle, then Senator Harry Reid, chaired by William J. Perry, 2005–2008

Co-Chair, with Ronald Lehman, of Policy Advisory Group to Senator Richard Lugar, 2005–2008

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

8/28/2008	\$2,300	Friends of Hillary
6/24/2008	\$4,600	Obama for America
9/15/2007	\$2,300	Hillary Clinton for President
9/15/2007	\$2,300	Hillary Clinton for President
6/29/2007	\$1,500	Friends of Dick Lugar, Inc.
11/2/2006	\$1,500	Friends of Dick Lugar, Inc.

14. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

1. Defense Intelligence Medal, from the Defense Intelligence Agency, April 1998.

2. Distinguished Public Service Medal, Department of Defense (awarded three times), The highest award of the Department of Defense, “for exceptionally distinguished service to the Nation as Assistant Secretary of Defense for International Security Policy,” July 1994 and December 1995, and “for distinguished public service as Under Secretary of Defense for Acquisition, Technology and Logistics from April 2009 to June 2011.”

3. Forum Award, American Physical Society. “For his clear and lucid exposition of the physics issues in the nuclear arms race and his unique ability to combine his physics background and good judgment to clarify the technical parameters of these important public policy issues,” 1988.

4. Ten Outstanding Young Americans, U.S. Jaycees. 1987.

5. Senior Scholar, St. John’s College, 1978–1979

6. Best Participant Prize, NATO Center for Subnuclear Physics, 1978.

7. Rhodes Scholar, 1976

8. Summa cum laude, Phi Beta Kappa graduate, Yale University, with honors in medieval history and physics (B.A. 1976).

9. Andrew D. White Essay Prize in European History, Yale University, 1976.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Please see attached.

[Nominee responded and the information is contained in the committee’s executive files.]

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years of which you have copies of and are on topics relevant to the position for which you have been nominated.

I have delivered a large number of speeches in my capacity as Under Secretary of Defense for Acquisition, Technology, and Logistics, and, previously, as Chair of

the International and Global Affairs Faculty at Harvard's Kennedy School of Government. In a majority of cases, I have delivered these speeches using no notes, or using handwritten notes that have not been archived. Almost all of my speeches are derived from, or form the basis of, written publications or testimony, and their content can be found in my response to the previous question. As per the committee's request, I am providing two copies of each formal speech I have delivered (of which I have copies) on topics that are relevant to the position for which I have been nominated.

1. "Defense Budgets, American Power, and the National Security Industrial Base." Remarks at the Brookings Institution, 15 July 2011.

2. Remarks at Heritage Foundation Conference, "The Pentagon Efficiency Initiative: Enough to Stave Off More Defense Cuts?" 20 April 2011.

3. "Doing More Without More: Obtaining Efficiency and Productivity in Defense." Remarks at the Center for a New American Security. 22 February 2011.

4. Remarks at Aviation Week's R&D Technology and Requirements Conference. Washington, DC. 16 February 2011.

5. "The Defense Industry Enters a New Era." Remarks to Cowen Investment Conference, New York, NY. 9 February 2011.

6. Remarks at Center for American Progress Conference, "A \$400 Billion Opportunity: 10 Strategies to Cut the Fat out of Federal Procurement." 16 November 2010.

7. "Acquisition Process." Remarks before the Air Force Association Conference. 15 September 2010.

8. Remarks at Navy League Sea-Air-Space Exposition, Gaylord Convention Center, Washington, DC. 4 May 2010.

9. Remarks at Defense Logistics Modernization Conference. Center for Strategic and International Studies. 2 April 2010.

10. Remarks at 38th IFPA-Fletcher Conference on National Security Strategy and Policy, "Air, Space, and Cyberspace Power in the 21st Century." 20 January 2010.

11. Remarks at PEO/SYSCOM Conference, Fort Belvoir, VA. 3 November 2009.

12. "A Conversation with Ashton B. Carter." Council on Foreign Relations. 5 October 2009

13. Remarks at Business Executives for National Security Conference, 13 May 2009.

[Nominee provided copies and they are contained in the committee's executive files.]

17. Commitment regarding nomination, confirmation, and service:

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

(The committee may require that copies of your Federal income tax returns be provided to the committee. These documents will be made available only to Senators and the staff designated by the chairman. They will not be available for public inspection.)

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

ASHTON B. CARTER.

This 6th day of September, 2011.

[The nomination of Hon. Ashton B. Carter was reported to the Senate by Chairman Levin on September 21, 2011, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on September 23, 2011.]

NOMINATIONS OF MICHAEL A. SHEEHAN TO BE ASSISTANT SECRETARY OF DEFENSE FOR SPECIAL OPERATIONS AND LOW INTENSITY CONFLICT; MARK W. LIPPERT TO BE ASSISTANT SECRETARY OF DEFENSE FOR ASIAN AND PACIFIC SECURITY AFFAIRS; BRAD R. CARSON TO BE GENERAL COUNSEL OF THE DEPARTMENT OF THE ARMY; AND KEVIN A. OHLSON TO BE A JUDGE OF THE U.S. COURT OF APPEALS FOR THE ARMED FORCES

THURSDAY, NOVEMBER 17, 2011

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:38 a.m. in room SD-G50, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Webb, McCain, Inhofe, Graham, and Cornyn.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Michael J. Kuiken, professional staff member; Gerald J. Leeling, counsel; Peter K. Levine, general counsel; William G.P. Monahan, counsel; Michael J. Noblet, professional staff member; and Russell L. Shaffer, counsel.

Minority staff members present: David M. Morriss, minority staff director; Adam J. Barker, professional staff member; Michael J. Sistik, research assistant; and Richard F. Walsh, minority counsel.

Staff assistants present: Jennifer R. Knowles and Kathleen A. Kulenkampff.

Committee members' assistants present: Gordon Peterson, assistant to Senator Webb; Chad Kreikemeier, assistant to Senator Shaheen; Anthony Lazarski, assistant to Senator Inhofe; Sergio Sarkany, assistant to Senator Graham; and Dave Hanke, assistant to Senator Cornyn.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody.

The committee meets today to consider the nominations of Mark Lippert to be Assistant Secretary of Defense for Asian and Pacific Security Affairs; Michael Sheehan to be Assistant Secretary of Defense for Special Operations and Low Intensity Conflict (SOLIC); Brad Carson to be General Counsel of the Army; and Kevin Ohlson to be a judge of the U.S. Court of Appeals for the Armed Forces. We welcome our witnesses and our nominees and their families to today's hearing.

The long hours and the other sacrifices that our nominees are willing to make to serve our country are appreciated by us, and as they know full well, they could not happen without the support of their families.

Each of our nominees has a distinguished record of public service.

Mr. Lippert worked in the Senate for the better part of 10 years serving as an advisor to a number of Senators and as a professional staff member for the Senate Appropriations Committee before joining the National Security Council (NSC) staff in 2009. In the same period, he has somehow found time to serve two tours on Active Duty as a naval intelligence officer, earning a Bronze Star in Iraq in 2008.

Mr. Sheehan is currently the president of Lexington Security Group. He previously served on the NSC staff under the first President Bush, under President Clinton as coordinator for counterterrorism in the State Department, as Assistant Secretary General of the United Nations (U.N.), and as a Deputy Commissioner of Counterterrorism for the New York City Police Department (NYPD). Mr. Sheehan is a West Point graduate with a distinguished 20-year career in the Army.

Mr. Carson served as a Congressman from Oklahoma from 2001 to 2005. In 2008 and 2009, Mr. Carson served on Active Duty with an explosive ordnance disposal battalion in Iraq where he was awarded the Bronze Star. Mr. Carson is currently the Director of the National Energy Policy Institute and an associate professor of law and business at the University of Tulsa.

Mr. Ohlson served as the chief of staff to the Attorney General from 2009 to 2011 and chief of staff to the Deputy Attorney General from 1997 to 2001. Before that, he served as a judge advocate in the Army and was awarded a Bronze Star for his role in the first Gulf War. Mr. Ohlson is currently the Chief of the Professional Misconduct Review Unit at the Department of Justice.

If confirmed, Mr. Sheehan and Mr. Lippert would play a key role in guiding Department of Defense (DOD) policy as the Department works to address continuing threats to our national security in an austere budget environment, while Mr. Carson and Mr. Ohlson would be among the most senior legal officials in DOD.

We look forward to the testimony of our nominees and hopefully to their confirmation.

Senator McCain.

STATEMENT OF SENATOR JOHN MCCAIN

Senator MCCAIN. Thank you, Mr. Chairman. I join you in welcoming our nominees and their families today, and I congratulate them on their nominations.

As you mentioned, Mr. Sheehan has been nominated to be the Assistant Secretary of Defense for SOLIC. He has an extensive background in counterterrorism having served as a special forces officer in the Army and subsequently as coordinator for counterterrorism in the Department of State during the Clinton administration and as Assistant Secretary General at the United Nations in the Department of Peacekeeping Operations during the Bush administration.

Mr. Sheehan, if confirmed, you will have a critical, important role given the importance of our Special Operations Forces counterterrorism efforts around the globe. Al Qaeda and associated organizations are becoming increasingly decentralized in nature and remain a serious threat. Prolonged instability in places like Yemen and Somalia continue to provide safe havens for these groups allowing them greater areas of operation to organize and plan attacks against America's allies, interests, and Homeland.

Mr. Lippert has been nominated to be the Assistant Secretary of Defense for Asian and Pacific Security Affairs. Since graduating college in 1997, he has gained national security policy experience on Capitol Hill, with the administration, and without question his service as an intelligence officer with the Navy Reserve has added to his understanding. The next few years are critical to this broader and strategic endeavor. Mr. Lippert appears to be qualified, and I praise his service in uniform.

I have serious concerns regarding his nomination. In a meeting in my office, I asked Mr. Lippert his views on the success of the surge in Iraq, and I find his answers to be less than satisfactory. I would like to follow up on that matter this morning.

Mr. Carson has been nominated to be the Army's General Counsel and is well qualified to be a key advisor to Secretary McHugh and General Odierno. He possesses extensive experience in the public and private sectors, including representing the Second District of Oklahoma in the House of Representatives in the 107th and 108th Congresses. Mr. Carson's military service as a mobilized Navy Reserve intelligence officer serving with the 84th Explosive Ordnance Disposal Battalion in Iraq in 2008 and 2009 is particularly noteworthy.

Finally, Mr. Ohlson has been nominated to be a judge on the U.S. Court of Appeals for the Armed Forces, the civilian appellate court that oversees our military justice system. The court that you will serve on, if confirmed, is a key element in guaranteeing that the goals of the Uniform Code of Military Justice legislation enacted 60 years ago continue to be realized.

Mr. Ohlson, your military service as a judge advocate in the Army and your years of service in the Department of Justice in a variety of capacities demonstrate your qualifications. However, your assignment from 2009 to 2011 as Attorney General Eric Holder's chief of staff and counselor during the period in which the Justice Department managed Operation Fast and Furious raised serious concerns. As a result, I am very troubled. Operation Fast and Furious, as we now know, resulted in over 2,000 weapons walking into Mexico where they have been connected to the slaying of U.S. Border Patrol Agent Brian Terry and U.S. Immigration and Customs Enforcement Special Agent Jaime Zapata. On November 10,

I submitted to you in writing a series of questions on this matter. I find your answers to be problematic.

Without objection, I ask that my letter, Mr. Chairman, and Mr. Ohlson's response be made part of today's record. In other words, Mr. Ohlson's answer was he did not know a thing about it. I wonder why. I wonder why as chief of staff to Eric Holder, he does not know a thing about an operation of the scope and size resulting in the death of one of the citizens of my State, a killing with weapons that he did not know a thing about it.

Chairman LEVIN. Those letters will be made part of the record. [The information referred to follows:]

4. To your knowledge, what information about the Operation was provided to you or to Attorney General Holder about its concept, purpose, progress, and methods while you served as Chief of Staff and Counselor to the Attorney General?

5. Media reports have indicated that internal Department of Justice emails showed that Attorney General Holder was provided with information about the Operation as early as July 2010. As Attorney General Holder's Chief of Staff and Counselor, when did you personally learn of the existence of the Operation and what was the extent of your knowledge in December 2010? Do you believe your transfer in January 2011 was in any way related to the Operation or the slaying of Agent Brian Terry? If so, how?

6. Since moving to the Professional Misconduct Review Unit, what has been your involvement, if any, in responding to questions sent to Attorney General Holder or the Department of Justice about the Operation?

7. Have you been subpoenaed or interviewed in connection with ongoing investigations into the Operation? If so, please provide the Armed Services Committee with copies of the subpoena and any documents, copies of emails, or other responses you have provided to other congressional committees or any other investigative bodies.

8. The Administration's Office of National Drug Control Policy, the National Southwest Border Counternarcotics Strategy, the General Accountability Office in its report on combating firearms trafficking of June 2009, and the U.S. Department of Justice Inspector General Review on Project Gun Runner of November 2010, all cited inter-agency and Department of Justice information sharing and coordination as a priority in order to making Project Gun Runner, of which Operation Fast and Furious was a part, successful.

Following the release of these reports, what actions, if any, were taken by the Attorney General, and what role did you play in initiating action in the Department of Justice to increase coordination and information sharing between the Department of Justice, the Bureau of Alcohol, Tobacco, Firearms and Explosives, Immigration Customs Enforcement, and Customs and Border Protection? Please describe in detail what actions, if any, you took or directed be taken, to comply with the inter-agency information sharing priority of the Department.

Thank you for your cooperation in this matter.

Sincerely,

John McCain

The Honorable Carl Levin
Chairman
Committee on Armed Services
United States Senate
Washington, D.C. 20510-6050

The Honorable John S. McCain III
Ranking Member
Committee on Armed Services
United States Senate
Washington, D.C. 20510-6050

Dear Chairman Levin and Senator McCain,

This correspondence is in response to the November 10, 2011, letter sent to Kathryn Ruemmler, Counsel to the President, by Senator McCain asking about my knowledge of, and involvement in, Operation Fast and Furious. I am pleased to provide you with the following responses.

1. Describe in detail your actions, knowledge, advice, and involvement as Chief of Staff and Counselor to the Attorney General regarding the Operation.

During my tenure as Chief of Staff and Counselor to the Attorney General, I took no actions in regard to, had no knowledge of, provided no advice about, and had no involvement in Operation Fast and Furious.

2. Were you aware of the Operation at any time prior to your departure in January 2011 to become Chief of the Professional Misconduct Review Unit?

No.

3. What recommendations or assistance, if any, regarding the Operation have you provided to Attorney General Holder since first learning of its existence? Please provide the Committee with any written memoranda or other briefing materials you drafted or reviewed in connection with your duties as Chief of Staff and Counselor to the Attorney General regarding the Operation.

On Sunday, November 5, 2011, I participated in a moot session in preparation for the Attorney General's appearance before the Senate Judiciary Committee hearing two days later, and approximately one month ago I made a recommendation to the Attorney General about press outreach in regard to this matter. During my tenure as Chief of Staff and Counselor to the Attorney General, I did not draft any material related to Operation Fast and Furious. I have been informed that routine courtesy copies of weekly reports were forwarded to me that referred to the operation by name, but that did not provide any operational details and did not refer to gun walking or anything similar. There was nothing on the cover sheets of these routine weekly reports indicating that important or sensitive material was included in them, and I did not review them.

4. To your knowledge, what information about the Operation was provided to you or to Attorney General Holder about its concept, purpose, progress, and methods while you served as Chief of Staff and Counselor to the Attorney General?

During my tenure as Chief of Staff and Counselor to the Attorney General, I did not review or hear about any information that pertained to the concept, purpose, progress, or methods of Operation Fast and Furious. I have been informed that routine courtesy copies of weekly reports were forwarded to me that referred to the operation by name, but that did not provide any operational details and did not refer to gun walking or anything similar. There was nothing on the cover sheets of these routine weekly reports indicating that important or sensitive material was included in them, and I did not review them.

5. Media reports have indicated that internal Department of Justice emails showed that Attorney General Holder was provided with information about the Operation as early as July 2010. As Attorney General Holder's Chief of Staff and Counselor, when did you personally learn of the existence of the Operation and what was the extent of your knowledge in December 2010? Do you believe your transfer in January 2011 was in any way related to the Operation or the slaying of Agent Brian Terry? If so, how?

I did not have any knowledge of Operation Fast and Furious in December 2010. I learned of the existence of the Operation in February 2011 from press reports. My assignment to serve as Chief of the Professional Misconduct Review Unit was in no way related to the Operation or to the slaying of Agent Brian Terry.

6. Since moving to the Professional Misconduct Review Unit, what has been your involvement, if any, in responding to questions sent to Attorney General Holder or the Department of Justice about the Operation?

I have not had any involvement in preparing written responses to questions posed by Members of Congress and sent to the Attorney General or the Department of Justice about the Operation. As noted above, on Sunday, November 5, 2011, I participated in a moot session in preparation for the Attorney General's appearance before the Senate Judiciary Committee.

7. Have you been subpoenaed or interviewed in connection with ongoing investigations into the Operation?

No.

8. What actions, if any, were taken by the Attorney General and what role did you play in initiating action in the Department of Justice to increase coordination and information sharing between the Department of Justice, the Bureau of Alcohol, Tobacco, Firearms, and Explosives, Immigration Customs Enforcement, and Customs and Border Protection?

I did not play any role in initiating action in the Department of Justice in regard to this issue.

I hope these responses are of assistance to you.

Very Respectfully,

Kevin A. Ohlson

Senator McCAIN. I thank the Chairman.

Chairman LEVIN. Let me call on Senator Inhofe first, and then we are going to welcome Senator Leahy to our committee for their comments on two of these nominees. Senator Inhofe?

**STATEMENT OF HON. JAMES M. INHOFE, U.S. SENATOR FROM
THE STATE OF OKLAHOMA**

Senator INHOFE. Yes, thank you, Mr. Chairman. I was going to introduce my friend, Brad Carson, and I have been crossing off the list things that have already been mentioned. Let me just say that

he actually, Senator McCain, was born in Arizona in Winslow, and he had the good judgment to come to Oklahoma and spend up to this time there. He graduated from Jenks High School in Tulsa and attended Baylor and Trinity College and then ultimately the University of Oklahoma College of Law.

He has been a friend of mine for a long period of time. We have disagreed on some of the political issues, but I can tell you right now, when he was first nominated and I discussed him with our mutual friend, Secretary McHugh, I went back and looked to refresh my memory and found that his voting record on our defense issues is right down the line where I think it should be for the position that he is nominated for. I am looking forward to supporting his nomination and serving with him.

I want to say that, unfortunately, we have a 10 o'clock meeting in this building of the Environment and Public Works Committee where my attendance is mandatory since I am ranking member. So I have to leave a little bit early and I apologize for that, Mr. Carson.

Chairman LEVIN. Thank you, Senator Inhofe.

Senator Leahy, we are delighted to have you with us. You are the dear friend to all of the members of this committee, all the other Senators that serve with you, and your presence here will make an important statement on behalf of the nominee that you are here for. Senator Leahy?

**STATEMENT OF HON. PATRICK LEAHY, U.S. SENATOR FROM
THE STATE OF VERMONT**

Senator LEAHY. Thank you, Mr. Chairman. I appreciate being here. Earlier I wished Senator Inhofe a happy birthday and I will do it again publicly. It is good to be with you and Senator McCain and Senator Webb. Like Senator Inhofe, I have to leave for the Judiciary Committee right after this.

But I really wanted to be here to introduce Mark Lippert. He is a personal friend but he is also a former member of my staff. The President has nominated him to be Assistant Secretary of Defense for Asian and Pacific Security Affairs. I told the President I thought that was a great nomination. I have known him for years. I know what a lifelong public servant he is. He was raised in Ohio, went to Stanford University for his undergraduate degree, then a master's in international relations in 1997.

When he joined my office 11 years ago in the year 2000, he quickly was promoted through the ranks. I promoted him to be a professional staff member for the Appropriations Subcommittee on State and Foreign Operations where all of the State Department appropriations and all of our international programs go. He assisted me with U.S. foreign policy and assistance programs with a focus on East Asia. He traveled there a number of times. He learned the history, the culture, the people. His advice was very valuable to both Democrats and Republicans on the subcommittee because we knew how professional it was and how non-political it was. He spoke with the highest integrity, but also with great analytical abilities and exceptional intellectual abilities. I hated to see him leave when he went to join then Senator Barack Obama as his chief foreign policy advisor, but then remained with the President

as one of his top foreign policy experts, ultimately as the chief of staff for the NSC.

But then he decided to leave the White House. He had joined the Navy while working in my office. He told me about his commission—I asked him why. He said it was a result of his lifelong dream to serve as a military officer. I remember how proud we all were to see him as a naval officer. He left the White House post. He did it to return to Active Duty in the Navy, including the posting, as you have already indicated, Mr. Chairman, in Afghanistan.

Throughout all this, I have seen nothing but integrity, intelligence, and a willingness, perhaps a desire to serve the United States of America, and I think this is a great appointment.

I should note that Mark's wife Robyn is here, as well as his parents. Robyn was a staff member in my office when she and Mark first met. So I take full credit for their successful marriage. She herself is somebody of great accomplishment.

I will put my full statement in the record, but, Mr. Chairman, those of us who are either chairs or ranking members of various authorizing committees have a great responsibility, along with the other members, in passing on nominees. I can assure you this is one nominee that you can vote to confirm and you will not find a reason to second-guess your decision.

I thank the chair and I thank the ranking member.

[The prepared statement of Senator Leahy follows:]

PREPARED STATEMENT BY SENATOR PATRICK LEAHY

Chairman Levin, Ranking Member McCain, and members of the committee, it is my pleasure to introduce Mark Lippert, my friend and a former member of my staff, and President Obama's nominee to be his Assistant Secretary of Defense for Asian and Pacific Security Affairs.

I have known Mark for many years and am proud of his accomplishments as a lifelong public servant. Mark has the character and the qualifications to make an outstanding defense senior leader, and I am proud to give him my highest endorsement.

Mark was raised in Ohio and attended Stanford University where he received his undergraduate degree in Political Science in 1996 and a Masters in International Relations in 1997. In 2000, Mark joined my office as a research assistant and quickly stood out on account of the sharpness of his intellect which was matched only by his sense of humor.

In 2001, I promoted him to be a professional staff member for the Appropriations Subcommittee on State and Foreign Operations, where he assisted me with U.S. foreign policy and assistance programs with a focus on East Asia. In that capacity, he traveled to the region several times and developed a deep knowledge of the history, politics, and cultures of that critically important part of the world.

Mark did an outstanding job for the subcommittee and was universally respected by his peers of both parties for being a person of the highest integrity with exceptional intellectual and analytical abilities.

In 2005, I felt a mixture of pride and sadness when I bid Mark good luck as he joined the staff of then Senator Barack Obama as his chief foreign policy advisor. After President Obama's election in 2008, Mark remained one of the President's top foreign policy experts and ultimately the chief of staff of the National Security Council.

Parallel to his civilian career, Mark has also had an exemplary military career as a Naval Reserve officer. In 2007, Mark paused his civilian life—which at that time meant taking the difficult step of leaving a political campaign during a key moment—and deployed to provide intelligence support to Navy SEAL operations in Iraq.

When he decided to leave his White House post in 2009, Mark did so in order to return to Active Duty in the Navy. That tour included postings in Afghanistan and the Horn of Africa.

Mark actually joined the Navy while working in my office, and he expressed to me that his commission was the result of his lifelong dream to serve as a military officer. In that light, I see this nomination, and today's hearing, as the predictable consequence of Mark's passion for service, his professional excellence, and his outstanding character and integrity.

I would be remiss if I did not also introduce Mark's wife Robyn to the committee. Robyn was also a staff member in my office when she and Mark first met, so I take full credit for that. Robyn has had well-deserved success in her own career, and I know the committee joins me in thanking her for her support of Mark during his multiple mobilizations overseas.

Chairman Levin, Ranking Member McCain, and members of this committee, I urge you to favorably report the nomination of Mark Lippert to be Assistant Secretary of Defense for Asian and Pacific Security Affairs. I know firsthand, as does the President, that Mark is well-qualified for the job.

Chairman LEVIN. Thank you so much, Senator Leahy, and we know that you, like Senator Inhofe, have to leave us and we totally understand.

Senator Inhofe, apparently today is your birthday.

Senator INHOFE. It is.

Chairman LEVIN. The little birdie just said that, Senator Leahy. Happy Birthday Senator Inhofe.

Thank you very much, Senator Leahy.

We will now move to our nominees. The defense authorization bill is on the floor beginning at 11 o'clock, so we may have to do some scrambling if we are not done by then.

Please introduce any family or any other people who are here with you; feel free to do that. We will start with Mr. Sheehan.

STATEMENT OF MICHAEL A. SHEEHAN, NOMINATED TO BE ASSISTANT SECRETARY OF DEFENSE FOR SPECIAL OPERATIONS AND LOW INTENSITY CONFLICT

Mr. SHEEHAN. Thank you, Mr. Chairman. Chairman Levin, Ranking Member McCain, and members of the Senate Armed Services Committee, thank you for the opportunity to appear before your committee today. I am grateful of the confidence that President Obama has shown by nominating me to be Assistant Secretary of Defense for SOLIC. I also want to thank Secretary Pannetta, Deputy Secretary Carter, and Under Secretary Flournoy for their support of my nomination. If confirmed, I will be deeply honored to serve.

Given that SOLIC was created by Congress, there has always been a unique and valuable relationship between this committee and the office for which I have been nominated. Your support and that of the American people for our Special Operations Forces continues to be one of the key enablers of our success. Thank you for that.

I also want to thank my family for my support. My wife Sita Vasan is with me this morning and my son Michael is right directly behind me. Thank you to them for their great support during my career and their being with me today.

I believe that my policy background, as mentioned before, at the State Department, the U.N., and at the NYPD has well prepared me for this nomination, as well as my operational experience as an Active Duty Special Forces officer in both the counterterrorism unit as the assault team leader for our Special Forces A team in Pan-

ama and also as a counterinsurgency advisor in Central America for many years.

If the Senate confirms me in this position, I will make every effort to live up to the confidence placed in me and the excellence demonstrated by our Special Operations Forces around the world every day.

Thank you very much.

Chairman LEVIN. Thank you very much, Mr. Sheehan.

Now Mr. Lippert.

STATEMENT OF MARK W. LIPPERT, NOMINATED TO BE ASSISTANT SECRETARY OF DEFENSE FOR ASIAN AND PACIFIC SECURITY AFFAIRS

Mr. LIPPERT. Thank you. Mr. Chairman, Senator McCain, members of the committee, thank you for the opportunity to appear before you this morning.

I have to admit that after working for 10 years on Capitol Hill as a staff member, it is much more intimidating to sit on this side of the dais.

I would also like to thank my former boss, Senator Leahy, for his gracious introduction. From past experience, I know how busy he is every Thursday morning with his responsibilities as chairman of the Judiciary Committee, and I very much appreciate his time.

I wish to thank President Obama, Secretary Panetta, and Under Secretary Flournoy for their support of my nomination.

Please let me say a few words about my family. I would like to introduce my wife, Robyn Lippert, whom I met while working, as Senator Leahy mentioned, together on Capitol Hill. She has been the best partner that anyone could ask for and has patiently put up with military deployments to Iraq, Afghanistan, and elsewhere, long hours at the NSC, and the grind of the State and Foreign Operations Subcommittee.

My mother and father, Susan and Jim Lippert, have made the trip from home, Cincinnati, OH, and I am deeply grateful for their lifetime of support.

I would also be remiss if I did not introduce Captain John Burnham and Master Chief Bubba Dodson, two friends and mentors from my time on Active Duty at Naval Special Warfare Development Group.

Members of the committee, from the fight to disrupt, dismantle, and defeat al Qaeda in Afghanistan and Pakistan, to maintaining and enhancing our force posture with treaty allies and partners in East and Southeast Asia, to engaging emerging powers such as India and China and preventing the proliferation of weapons of mass destruction, the challenges of this dynamic and important portfolio are self-evident. Accordingly, in the interest of time, I will simply say that these are among the greatest challenges that our Nation faces today and could face well into the future.

If confirmed, I look forward to working with the committee and Congress as a whole to help address these challenges in an effective and bipartisan way to keep America safe, secure, and prosperous, ensuring it continues to be the greatest country on Earth.

Thank you.

Chairman LEVIN. Thank you very much.

Next we will call on Brad Carson. We welcome you particularly as a former colleague. Mr. Carson?

**STATEMENT OF BRAD R. CARSON, NOMINATED TO BE
GENERAL COUNSEL OF THE DEPARTMENT OF THE ARMY**

Mr. CARSON. Thank you, Senator Levin. Mr. Chairman, Senator McCain, Senator Webb, Senator Cornyn, other members of the committee, I do appreciate the opportunity to appear before you today. I would like to thank President Obama for nominating me to the position of General Counsel of the Army. I would also like to thank Secretary McHugh for his support of my nomination, and Senator Inhofe for his very kind words. If confirmed, I will be honored to serve as General Counsel of the Army.

My wife Julie is here with me today. She has always been an unflinching supporter of mine. Also present is Karen Kuhlman who is a dear friend and the former legislative director of my office when I served in the U.S. House of Representatives.

I believe that my background in law, education, business, and politics well prepare me to meet the extraordinary challenges facing the U.S. Army today. If the Senate confirms me to this position, I will make every effort to live up to the confidence placed in me. I am grateful for your consideration, and I look forward to your questions.

Chairman LEVIN. Thank you very much, Mr. Carson.
Mr. Ohlson?

**STATEMENT OF KEVIN A. OHLSON, NOMINATED TO BE A
JUDGE OF THE U.S. COURT OF APPEALS FOR THE ARMED
FORCES**

Mr. OHLSON. Thank you, Senator Levin. Mr. Chairman, it is a great privilege to appear before this committee as the President's nominee to be a judge on the U.S. Court of Appeals for the Armed Forces.

I would like to thank you, Mr. Chairman, and the members of this committee for convening this hearing today and for considering me for this important post.

I would also like to thank the President for his expression of confidence in me by nominating me for this position. If confirmed, I promise to do my level best to vindicate that trust.

Of course, I would like to thank my wife Carolyn and our two children, Matthew and Katherine, who are in school today. It is clear to me that I would not be sitting here today if it were not for their enduring love and support.

Mr. Chairman, during my entire professional career, I have experienced no greater honor than serving as an officer in the U.S. Army. I was privileged to serve in the Judge Advocate General's Corps and to prosecute a number of cases as a trial counsel, as well as to provide legal advice to commanders and their staff on a wide range of legal issues.

But beyond that, during my time in the Army, I was privileged to become personally familiar with the men, women, mission, and ethos of the U.S. military and to see firsthand the exceptional quality of our Armed Forces. I will always treasure the opportunities I had to rappel out of helicopters at Air Assault School, to jump out

of airplanes during my tour of duty at Fort Bragg, and to serve our Nation during Operation Desert Storm. If confirmed, I will bring to bear on my duties as a judge on the U.S. Court of Appeals for the Armed Forces all of these experiences that I have had in the military.

But in addition to this, if I am confirmed, I will also keep in mind my family's long tradition of serving as citizen soldiers at the hour of our Nation's greatest need. I have had relatives serve in virtually every armed conflict that our country has engaged in during the last century. As just a few examples, my grandfather, Leo Gauvreau, was an American doughboy who served in the trenches during World War I. My uncle, Leif Ohlson, made the ultimate sacrifice for our country on the battlefields of France on June 29, 1944, and today lies at rest at the cemetery at Normandy. Mr. Chairman, I am very proud to note that even as we sit here today, my nephew, Blake Perron, is in basic training at Fort Benning striving to become the very best infantryman he can be.

So if I am confirmed, it is to these citizen soldiers and to all their comrades in arms to whom I will dedicate my service on the U.S. Court of Appeals for the Armed Forces.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Mr. Ohlson.

Let me now ask you a set of standard questions and you can answer together.

Have you adhered to applicable laws and regulations governing conflicts of interest?

Mr. SHEEHAN. Yes.

Mr. LIPPERT. Yes.

Mr. CARSON. Yes.

Mr. OHLSON. Yes, sir.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

Mr. SHEEHAN. No.

Mr. LIPPERT. No.

Mr. CARSON. No.

Mr. OHLSON. No.

Chairman LEVIN. Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Mr. SHEEHAN. Yes, sir.

Mr. LIPPERT. Yes, sir.

Mr. CARSON. Yes, sir.

Mr. OHLSON. Yes, sir.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

Mr. SHEEHAN. Yes.

Mr. LIPPERT. Yes.

Mr. CARSON. Yes.

Mr. OHLSON. Yes.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Mr. SHEEHAN. Yes.

Mr. LIPPERT. Yes.

Mr. CARSON. Yes.

Mr. OHLSON. Yes.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify upon request before this committee?

Mr. SHEEHAN. Yes.

Mr. LIPPERT. Yes.

Mr. CARSON. Yes.

Mr. OHLSON. Yes.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Mr. SHEEHAN. Yes.

Mr. LIPPERT. Yes.

Mr. CARSON. Yes.

Mr. OHLSON. Yes.

Chairman LEVIN. Thank you.

Let us have a first round of 7 minutes for questions, and there are only a few of us here at the moment. We can have a second round if appropriate or needed, a third round for that matter. We can have whatever number of rounds we need.

Let me start with you, Mr. Sheehan. In your book titled "Crush the Cell", you say that by working closely with foreign units that we may be able to reduce human rights violations associated with those operations. But if you want to get things done, sometimes we must work in conjunction with tough organizations with spotty human rights records.

Can you give us an idea as to how the benefits of working with partners be balanced with the necessity that they meet our human rights standards under the law?

Mr. SHEEHAN. Yes, Mr. Chairman. When I was Ambassador-at-Large for Counterterrorism prior to September 11 and I was focusing on al Qaeda, I found that our Government had cut off relationships with some of the intelligence agencies for human rights violations and that I felt made our life a little bit more difficult. Moving forward, I find that often where al Qaeda resides, you are often working with countries that have less developed systems of governance and less developed judicial systems. So often you are dealing with organizations that do not maintain the same standards that we are accustomed to in the United States and in the West.

I feel that working together with them, we can achieve both our intelligence collection objectives and work to professionalize those services as they work towards moving to the standards of professionalism in human rights that we expect of them. I think there has been great progress in that area, but as with most of these very developing and sometimes broken states, it requires a lot of patience and long work to achieve those objectives. But in the long run, I think both are equally important to achieving our security objectives in those broken and developing states.

Chairman LEVIN. Let me ask you another question, Mr. Sheehan, relative to the Special Operations Forces night raids along with Afghan commandoes in Afghanistan. Frequently they have removed literally thousands of insurgents from the battlefield without any

shots being fired, but nonetheless, night raids remain controversial in Afghanistan as we read again in this morning's paper when we see President Karzai indicating that the ending of those night raids is a condition of a long-term relationship with the United States. The Afghan Government and community leaders have repeatedly called for eliminating their use.

Can you talk about those night raids? How important is the participation of Afghan commandoes in those operations? How do we address Afghan concerns about those night raids?

Mr. SHEEHAN. Mr. Chairman, the ability to operate at night is one of the great advantages our Special Operations Forces have in every theater of operations, to include as we train our local counterparts and give them the technology and expertise to work at night, it also gives them a great advantage. Simultaneously we are aware of the cultural issues and other problems raised politically by the Afghan Government. We are trying to find the proper balance in that.

But as you mentioned, the key here is transferring the lead of these night operations to the local Special Operations Forces as they develop their capacity in conjunction with ours. I think we are moving well in that direction. I think the commanders are very aware of the issue of the sensitivity of night raids and have taken that under consideration. I think there has been a reduction in the amount of civilian casualties from what I understand. I think we are moving on the right track in that very important area, but as you had mentioned, the key, as in all counter-insurgency operations, is shifting that primary burden to the local security forces that then can make that initial interaction in the villages in Afghanistan.

Chairman LEVIN. Thank you.

Mr. Lippert, there is a real issue that has been raised by Senator Webb, Senator McCain, and myself relative to the realignment issues on Okinawa and Guam. I have a lot of questions of you about that, but I see that Senator Webb is here, and in the hope that he may take on that subject, I will withhold at this time. However, if he either is unable to or has to leave—and I do not want to put this onus on him, but if he is unable to do it—I know what his thoughts are on this and I totally share them—I would then ask you questions for the record. I am just going to leave it at that at the moment because I think we have to change, the road we are on is not workable, and that is my view. I think Senator Webb would probably go into it in more detail, but I will press you on more detail again on the record if he is not able to get into that for whatever reason.

Mr. Lippert, I will ask you, though, about the Haqqani Network. Would you agree that in order for relations between the United States and Pakistan to be normalized, that the Government of Pakistan has to go after safe havens in Pakistan for the extremists who are crossing the border and attacking U.S., Afghan, and coalition forces?

Mr. LIPPERT. Yes, Senator.

Chairman LEVIN. Mr. Carson, just one quick question for you and that has to do with the legal status of contractors on the battlefield. There is a very significant number of issues here about the

legal status of contractors in the battlefield areas. Are you familiar with some of those issues? If so, would you agree that DOD needs to review the legal status of contractors on the battlefield to ensure that we are not subjecting contractor employees to legal jeopardy when they work to support our efforts in hostile areas like Iraq and Afghanistan?

Mr. CARSON. Senator, I believe that is, in fact, a very significant issue, and I know DOD is reviewing those issues even as we speak. If confirmed, I hope to get myself more expert in those issues and make it a top priority to resolve them.

Chairman LEVIN. Thank you.

Mr. Ohlson, criminal defendants in the Article III judicial system have an automatic right to appeal to Federal courts of appeal and then a right to at least petition the U.S. Supreme Court for final review of their criminal cases. In contrast, defendants in military courts martial may not appeal their cases to the U.S. Supreme Court unless the U.S. Court of Appeals for the Armed Forces has also granted discretionary review.

Should defendants in the military justice system in your opinion in Article I courts have the same right as defendants in Article III courts to petition the Supreme Court for review of their case even if the Court of Appeals for the Armed Forces has denied their petition for review?

Mr. OHLSON. Mr. Chairman, I do believe that individuals within the Article I court made up by the Court of Appeals for the Armed Forces should have the identical right as those defendants in the Article III courts and that the Supreme Court should have the ability to address those cases.

Chairman LEVIN. Thank you all.

Senator McCain.

Senator MCCAIN. Thank you, Mr. Chairman.

Mr. Ohlson, in your response to my letter of November 10, you stated you had no knowledge of Operation Fast and Furious throughout your assignment as Attorney General Holder's chief of staff and counselor. Your letter, not surprisingly, seems to track closely with Attorney General Holder's assertions about a lack of knowledge of this disastrous operation.

Was there ever a time in 2009 or 2010 you can remember reading about or discussing with Bureau of Alcohol, Tobacco, and Firearms (ATF) officials Operation Gun Runner or Operation Fast and Furious?

Mr. OHLSON. No, Senator. That never occurred.

Senator MCCAIN. Agent Brian Terry was murdered in Arizona in a firefight on December 14, 2010. Did you hear about his death at that time and the circumstances?

Mr. OHLSON. I did, Senator McCain.

Senator MCCAIN. When did you become aware then that two weapons that were found at the scene were linked to the gun-walking program known as Operation Fast and Furious?

Mr. OHLSON. Senator, I found out about that through press accounts sometime after I left serving as chief of staff to the Attorney General.

Senator MCCAIN. So when this agent was murdered, it did not arouse your curiosity as to find out the details of his death?

Mr. OHLSON. There was no indication at that time, sir, that there was any connection with Fast and Furious. I was not aware of Fast and Furious.

Senator MCCAIN. But when a Border Patrol agent is murdered, you did not say, hey, what is the story here? How did this happen?

Mr. OHLSON. Yes, sir, and I remember the tragedy of—

Senator MCCAIN. Well, did you ask questions about it?

Mr. OHLSON. No, sir. I was in a briefing of the Attorney General at that time and I learned of the death of Agent Terry.

Senator MCCAIN. When you learned about it, no matter what you were doing, it did not arouse your curiosity as to ask what the circumstances were?

Mr. OHLSON. We were briefed on that, sir. It certainly aroused my sympathy for the family and I think it was—

Senator MCCAIN. But you did not ask enough to find out that this was part of Fast and Furious.

Mr. OHLSON. Senator McCain, there was not a basis for me to ask that question at that time.

Senator MCCAIN. You would not ask how did the murderers get the weapons that they were using? That again did not arouse your curiosity?

Mr. OHLSON. Sir, I did not ask that question.

Senator MCCAIN. You discussed in your letter routine courtesy copies of weekly reports that were sent to you. What information did those reports include about the gun-selling tactics of Operation Fast and Furious?

Mr. OHLSON. Sir, as I understand it, those reports did not make any mention of gun-walking. They simply referred to the operation as Operation Fast and Furious.

Senator MCCAIN. So you get a memo and it says it is part of Operation Fast and Furious and you do not say, hey, what is Operation Fast and Furious?

Mr. OHLSON. As it turned out, Senator, I did not read that weekly report.

Senator MCCAIN. So you are given weekly reports that you do not read?

Mr. OHLSON. Sir, there were a number of courtesy copies that are sent around the Department, and you are correct. I did not read that report.

Senator MCCAIN. So we have reports that are required to be submitted to your department and they come to you, the chief of staff for the Attorney General of the United States, only as a courtesy.

Mr. OHLSON. Yes, sir.

Senator MCCAIN. Did you or Mr. Holder ever receive information from the Bureau of Alcohol, Tobacco, Firearms, and Explosives about its efforts to curtail firearms smuggling into Mexico?

Mr. OHLSON. I was not privy to any such conversation, sir, no.

Senator MCCAIN. Again, you were not curious even though the issue of guns being smuggled into Mexico has been widely discussed, widely—a source of deep concern amongst many of us in public life. But it did not arouse your curiosity.

Mr. OHLSON. I certainly take your point, Senator. As chief of staff, that was not within my area of purview, but in retrospect, I wish I had known more about that operation.

Senator MCCAIN. What actions did you take following news about Agent Terry's death?

Mr. OHLSON. I did not take any actions in particular, Senator McCain.

Senator MCCAIN. Mr. Lippert, it has been widely reported that while serving in the White House, you and then-National Security Advisor General Jim Jones clashed significantly. It has also been widely reported that your departure from the White House to return to Active Duty in the Navy was an attempt to resolve this conflict. Would you please explain your interpretation of these events?

Mr. LIPPERT. Senator, I have great respect for General Jones' lifetime of service from Vietnam veteran to Commandant of the Marine Corps to Supreme Allied Commander to his service in the White House, just the highest degree of respect for him and his service.

In terms of the press accounts, I did not leak to the press about General Jones. My departure from the White House was voluntary. I actually turned down a promotion at the White House to return to Active Duty.

Senator MCCAIN. So there was no conflict between you and General Jones?

Mr. LIPPERT. Senator, General Jones and I worked collaboratively on many issues, and I am proud of what we accomplished. But there were also times we disagreed. But I knew General Jones was the boss.

Senator MCCAIN. So your departure from the White House had no relation whatsoever to the problems with the relationship between you and General Jones?

Mr. LIPPERT. Senator, as I mentioned, I was offered a promotion in the White House and then I turned down that promotion to return to Active Duty.

Senator MCCAIN. You are not answering the question.

Mr. LIPPERT. Senator, the promotion was to the White House Military Affairs Office which would have been separate and apart from the NSC. At that point, I turned down that job and returned to—

Senator MCCAIN. I will ask the question one more time, Mr. Lippert, and I would like to have an answer. Did your departure from the White House have anything to do with the widely reported conflict that you had with General Jones?

Mr. LIPPERT. Again, Senator, I would say it was due to the fact that I wanted to leave the NSC, went over to the White House Military Affairs Office, and turned down that promotion, sir.

Senator MCCAIN. If you do not choose to answer the question, that is fine.

Ambassador Sheehan, very quickly do you believe that the Afghans are capable of carrying on night raids without U.S. military presence?

Mr. SHEEHAN. Senator McCain, from my understanding, the Afghan Special Operations Forces that work in tandem with our Special Operations Forces have demonstrated a greatly increased capacity to operate on a wide range and some night operations. Right now at this point, I am not sure they are ready to really step up fully to the plate.

Senator MCCAIN. Do you know anybody that does?

Mr. SHEEHAN. No, sir. I think most believe they still need some more work with our folks.

Senator MCCAIN. I thank you.

I thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator McCain.

Senator Webb.

Senator WEBB. Thank you, Mr. Chairman.

First, with respect to the chairman's question about the issue on Okinawa and Guam, I would suggest that we work up a joint written question for the record that could be answered in an accelerated fashion before the confirmation comes before the whole committee. I do not have enough time in 7 minutes to do the question justice, but it is a vital question in terms of what we are doing in that part of the world including, by the way, the announcement yesterday after a court ruling that the Navy says it is going to take more than 2 years for it to figure out an environmental impact report on the training ranges in Guam, which really I find kind of confusing at this point.

Chairman LEVIN. Thank you, Senator Webb, for that suggestion, and I just checked also with Senator McCain and we will ask our staffs, the three of us, to put together a joint question.

Senator WEBB. I appreciate that. It is very important for us to have a clear understanding of where Mr. Lippert and the Pentagon at large is going on that.

First, I would like to congratulate all of the nominees and to thank them for having taken time in various ways to serve our country as they moved forward on those other careers and to welcome family and friends who are here today. I intend to support, without question, three of these nominations.

Mr. Lippert, you and I need to have a longer meeting. These nominations, although they may have been in process for some time, were moved very quickly once they were announced. I have a number of concerns.

First is this position that you are being nominated to is one of the three or four most vital assistant secretaryships right now in DOD given the transitions that we are looking at and the renewed emphasis which I have cared about for a very long time on our strategic presence in that part of the world. There have been questions about how this matches up with your professional skill set, however accomplished it is at this point. I would ask, first, if you would give us an explanation, first in terms of your view of the scope policy-wise and geographically of the position and how your experiences match up with that.

Mr. LIPPERT. Senator, the answer to your first question on the scope of the position, it covers everything from the Western Pacific, U.S. Pacific Command area of responsibility to South Asia, Armed Forces Pacific, up to Central Asia.

In terms of my qualifications for the job, I bring a unique skill set of hands-on and policy experience to the position. In terms of hands-on, I was on the ground in Afghanistan. I have that experience. I studied Mandarin Chinese, lived in Beijing while I was a graduate student at Beijing University taking language courses.

In terms of policy experience, I have 10 years of service on Capitol Hill working for Senator Daschle, the Democratic Policy Committee, working for Senator Leahy on the State and Foreign Operations Subcommittee, and then working for Senator Obama on the Senate Foreign Relations Committee. All of that time gave me the skill set to tackle a lot of complex, difficult problems. It also had me engage in a range of these issues that we are still facing today. It allowed me to balance portfolios, juggle responsibilities, and deal with these substantive issues head on.

Then finally my time with the NSC. During that time, I regularly engaged in these types of issues day-in, day-out, and at senior levels of the Government.

I would just say in terms of my experience, I bring somewhat anecdotally to someone who sat in summits with the President and Asian leaders, someone who has been on the ground in Afghanistan, and someone who has a mastery of foreign assistance programs in Southeast Asia and the South Asia region.

Senator WEBB. I thank you for that. I look forward to spending some time with you when you can visit my office when we can discuss that connection further.

I want to follow on to something that Senator McCain raised because it is a question that has been widely reported in the media and it affects not simply whether or not you and General Jones had some sort of a fallout but it is also a question of how someone works when they are on one of these high-level staffs.

I, like most people on this committee, have a tremendous regard for General Jones. I have known him for many, many years. I believe he is one of the most knowing public servants that we have had, and I greatly admire his leadership style.

The question that came up—and there have been a couple of reports on this. This is to give you an opportunity to clarify this. It said you were widely suspected of leaking salacious and damaging stories about General Jones. This was reported—I am reading from an article by Josh Rogin, but it was also reported by Bob Woodward in his book. There was a comment in there that at one point people seemed to agree this was rank insubordination. These are words that have been reported.

Can you explain to us a little more what these reports were all about?

Mr. LIPPERT. Senator, there were a number of reports derogatory towards General Jones that were coming out while I was chief of staff at the NSC. I, again as I said to Senator McCain, had nothing to do with those reports. I did not talk to the press about General Jones. Full stop there.

On the other issue, in terms of rank insubordination, I knew General Jones was the boss. So on this issue, it is clear in my head. It is that I did not leak to the press and there was not insubordination.

Senator WEBB. So you can say categorically you were not the author of any of these personal leaks to the press directly or indirectly through a third party?

Mr. LIPPERT. Yes.

Senator WEBB. Thank you. I will look forward to seeing you on a longer visit in my office.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Webb.

Senator Cornyn.

Senator CORNYN. Thank you, Mr. Chairman.

Mr. Ohlson, I wanted to just ask you some questions briefly following up on Senator McCain. What was the description of your duties as chief of staff for the Attorney General from January 2009 through January 2011?

Mr. OHLSON. Senator Cornyn, there were a number of attorneys who worked within the Office of the Attorney General. I supervised them, and I also provided advice as a career member of the Department of Justice for 22 years. I am quite familiar with the Department and advised the Attorney General on issues related to it.

Senator CORNYN. Let me ask specifically. In the Judiciary hearings of last week or so when we were asking the Attorney General some questions about memos that had been directed to him, there was one directed to him, an NDIC memo. Do you know what that stands for?

Mr. OHLSON. National Drug Intelligence Center, sir.

Senator CORNYN. That referred to Fast and Furious. It was dated July 5, 2010. There was a subsequent memo entitled "Significant Recent Events Memo" that was dated November 1, 2010. Would you have been involved in either the preparation of or in the forwarding of those memos to the Attorney General for his attention?

Mr. OHLSON. No, Senator Cornyn.

Senator CORNYN. Who would be responsible to make sure that the Attorney General sees relevant memos from the Department of Justice that require his attention?

Mr. OHLSON. We had within the Office of the Attorney General attorneys who were subject-matter experts with the various components, and if through reviewing material they determined that there was information that needed to be forwarded to the Attorney General, they would do so, sir.

Senator CORNYN. But is there anybody who serves as, for lack of a better word, a traffic cop for the Attorney General to make sure that he sees the most important things that require his eyes-on attention?

Mr. OHLSON. I would be the ultimate funnel point for that information, sir.

Senator CORNYN. When did you first learn about the gun-walking associated with Fast and Furious?

Mr. OHLSON. Through press accounts in approximately February of this year after I was no longer chief of staff, Senator Cornyn.

Senator CORNYN. Was that about the time the Assistant Attorney General Weich delivered a letter to Senator Grassley denying that any gun-walking had occurred?

Mr. OHLSON. Yes, sir, that would be the same time frame.

Senator CORNYN. Were you involved in preparing or approving that letter?

Mr. OHLSON. I was not, sir. I was no longer serving within main Justice at that time.

Senator CORNYN. When did you first learn that that letter was false?

Mr. OHLSON. Approximately 10 days ago.

Senator CORNYN. Would that have been roughly the time Lanny Breuer was testifying before the Judiciary Committee?

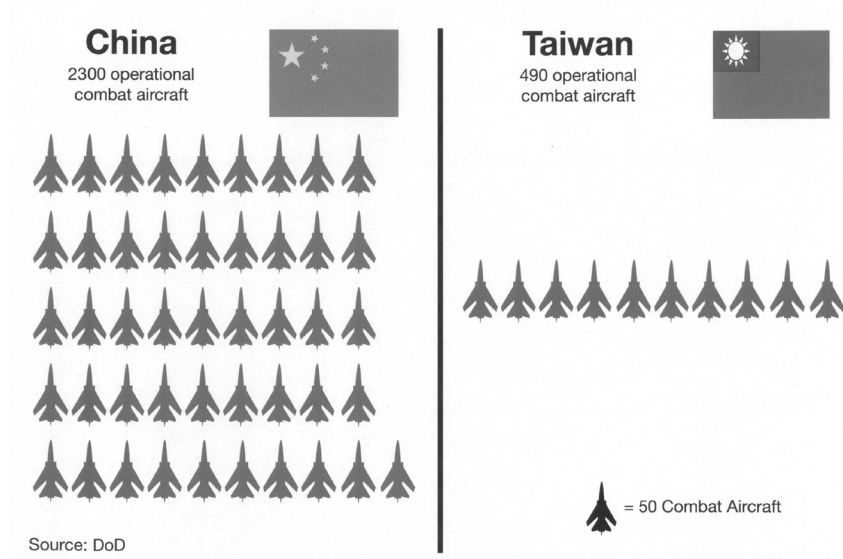

Mr. OHLSON. Yes, sir.

Senator CORNYN. Mr. Lippert, let me ask you some questions about Taiwan. You have been nominated for a very important position in that very important part of the world. I have some charts here I would like to just show you. First, a chart that shows the official estimates by DOD. It shows the People's Republic of China with about 2,300 operational combat aircraft while the Government of Taiwan has only 490 operational combat aircraft.

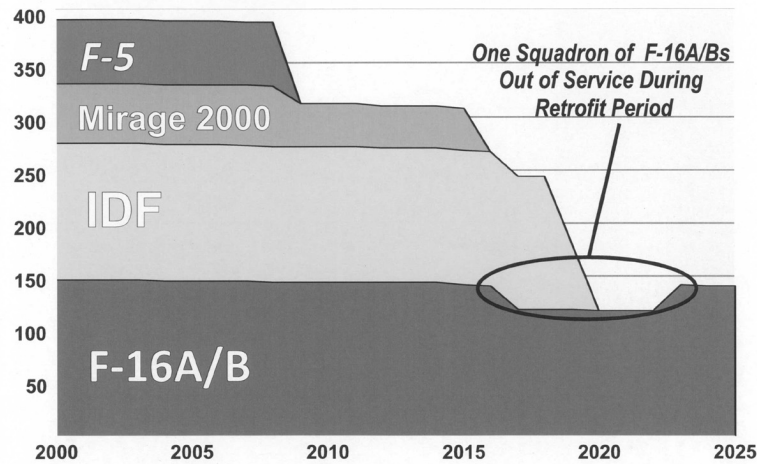

Let me show the second chart, please. The reason why that is very important is out of the 490 operational aircraft—as you can see, this chart from the Defense Intelligence Agency demonstrates that F-5 aircraft, as well as French Mirage aircraft, are old and becoming quickly obsolete, hard to repair, hard to get replacement parts for. You can see the huge cliff here dropping down in roughly 2020 in terms of the number of operational combat aircraft that Taiwan will have to deal with any Chinese aggression.

[The information referred to follows:]

A Growing Imbalance in the Taiwan Strait

The Incredible Shrinking Taiwan Air Force Taiwan's Projected Fighter Fleet Over Time

Source: Lockheed Martin/Defense Intelligence Agency

Senator CORNYN. If confirmed, what course of action do you plan to pursue to ensure that the U.S. Government keeps its commitments under the Taiwan Relations Act to make sure they have the defensive weaponry necessary to defend that nation against aggression by communist China?

Mr. LIPPERT. Senator, I strongly support a comprehensive, durable, and unofficial relationship with Taiwan, this vibrant democracy, and I am deeply concerned with the buildup that you referenced in your charts. My thinking will be guided by the “one China policy”, the three communiques, the Taiwan Relations Act, and the six assurances. If confirmed, I can assure you that I am going to be an open-minded official that hears all sides of this debate, but I am not in the job yet, so I would not want to go further on that point.

Senator CORNYN. Do you have an opinion as to how many viable combat aircraft Taiwan needs in order to defend itself against communist aggression?

Mr. LIPPERT. I do not at this point in time, but if confirmed, I would dig into that question and work with your staff on that, sir.

Senator CORNYN. In light of the imbalance that I have just shown you and the deterioration of Taiwan's air force, do you believe that the U.S. Government is fully upholding our legal responsibilities under the Taiwan Relations Act?

Mr. LIPPERT. Senator, my sense is that the administration is upholding their responsibilities under the Taiwan Relations Act.

Senator CORNYN. What is that based on?

Mr. LIPPERT. That is based on the decision to upgrade the F-16 As and Bs. That is based on the \$12 billion in sales over the last 2 years to Taiwan, and that is based on the close coordination and consultation with the Taiwan Government.

Senator CORNYN. Mr. Lippert, you know that upgrading the As and Bs does nothing to replace the obsolete F-5s and French Mirages. Do you think that sort of a dramatic decrease in the number of operating combat aircraft increases the risk for Taiwan, or do you think it is irrelevant?

Mr. LIPPERT. My sense, Senator, is that reading the testimony of Assistant Secretary Campbell and Deputy Assistant Secretary Lavoy, that this decision was made on the As and Bs to get the most bang for the buck quickly, get the 160-plus aircrafts over to Taipei as soon as possible, and then go from there.

Senator CORNYN. Mr. Lippert, during the upgrades of the As and Bs, there will be a period of time where the As and Bs will actually be out of service. When though Taiwan has As and Bs aircraft, there will be—and it is reflected here in the circled area around 2020. It is going to take a long time, and there will actually be even a reduction beyond the retiring F-5s and French Mirages where the As and Bs will not be in service. Are you serious when you say you think that this provides Taiwan what they need in order to defend themselves?

Mr. LIPPERT. Senator, what I am saying is that the administration, from what I have seen in testimony, felt that the best bang for the buck was to get the As and Bs over there as soon as possible.

Senator CORNYN. You have no other views other than embracing the administration's position?

Mr. LIPPERT. Senator, as I said in the first point, I would look forward to working with you and your office on this issue going forward.

Senator CORNYN. Why are we trying to manage Taiwan's defense budget?

Mr. LIPPERT. Could you clarify the question, Senator?

Senator CORNYN. Yes. When Taiwan is ready to pay cash for American exported military aircraft, why would we deny them that ability? Is there any rationale you can see either from a commercial perspective or from a national security perspective why we would deny Taiwan those aircraft?

Mr. LIPPERT. Again, Senator, all I can say is that the administration, from what I saw outside of the Government, made this decision consistent with the Taiwan Relations Act to try to get the best capability over there as soon as possible.

Chairman LEVIN. Thank you, Senator Cornyn.

Senator Graham.

Senator GRAHAM. Very quickly. Let us follow up with that line of reasoning. Senator Cornyn is the expert on this. I will certainly defer to him and may get him involved in this question.

But they are willing to buy new F-16s. Is that right?

Senator CORNYN. Yes, sir.

Senator GRAHAM. Okay. Why would we not sell a good friend the F-16s?

Mr. LIPPERT. Again, Senator, the decision—

Senator GRAHAM. Best bang for whose buck? Best bang for the buck. Whose buck?

Mr. LIPPERT. The bottom line here, Senator, is that—

Senator GRAHAM. We are not letting the People's Republic of China manage our military sales to Taiwan, are we?

Mr. LIPPERT. Absolutely not.

Senator GRAHAM. Okay. Well then, when you say "bang for buck", is it our buck or their buck that you are worried about?

Mr. LIPPERT. Senator, again, it was a question of getting 160-plus aircraft over with similar capabilities as soon as possible versus the newer airframes.

Senator GRAHAM. It takes longer to get the newer airframes over there?

Mr. LIPPERT. Senator, that is my understanding, but again, I am happy to dig into this and work with your office on it.

Senator GRAHAM. Okay. We are selling new F-16s to Iraq. Is that right?

Mr. LIPPERT. I will take your word for it on that, sir.

Senator GRAHAM. Well, I am very curious. I do not know why we would not be willing to sell them the plane they want and think they need the most, and I hope mainland China is not dictating what we are doing.

Mr. Sheehan, are you familiar with the special operations missions in Afghanistan?

Mr. SHEEHAN. Yes, Senator, I am somewhat although I am not in a post and I am a civilian right now.

Senator GRAHAM. I understand.

Back to Senator McCain's question. There were some disturbing reports coming out of Afghanistan today from President Karzai, and I just want to be on the record that I am very supportive of an enduring relationship with Afghanistan. I think it is in our national security interest to have a political, economic, military relationship that extends to 2014. I have been open about the idea of having bases, joint bases, post 2014 with American aircraft, Special Operations Forces units, to make sure that the Afghan security forces can always win any engagement with the Taliban. I think you could do that with a footprint around 20,000 or less. But between now and that time—do you feel the insurgency is still alive and well in Afghanistan?

Mr. SHEEHAN. Absolutely, Senator Graham.

Senator GRAHAM. What percentage of detainees coming into American law of war detention at Bagram Air Base comes from night raids? Do you know?

Mr. SHEEHAN. I do not know the answer.

Senator GRAHAM. It is 82 percent. To the members of the committee, the night raids, which are Afghan partnered—are you familiar with that?

Mr. SHEEHAN. Yes, Senator.

Senator GRAHAM. Every night raid has Afghan partners. We try to make sure they are the first to go through the door. Are you familiar with the fact that most night raids end with captures without a shot being fired?

Mr. SHEEHAN. I do, Senator, and I recognize how important night raids are for our forces.

Senator GRAHAM. As a matter of fact, it is important not only for the Afghan people to defeat the insurgency, but it is important to

make sure that the leadership of the insurgency is kept off balance and cannot mount attacks against our forces. Is that correct?

Mr. SHEEHAN. Absolutely correct, Senator.

Senator GRAHAM. So you are of the mind set representing the special operations community that we are not ready yet, nor are the Afghans ready yet to do this without American assistance?

Mr. SHEEHAN. My understanding, Senator, is that the Special Operations Forces that we have been working with for many years over there have greatly enhanced their capability. I have talked to special operators that say they are pretty good, but they are not quite ready.

Senator GRAHAM. How many helicopters do they have?

Mr. SHEEHAN. I do not know the exact answers.

Senator GRAHAM. I can tell you almost none that can do this. So when you look at the equipment and the technology and the expertise, I think we need to be joint special operation, Afghan-U.S. night raid capable for a while to come.

I just want our Afghan friends to understand that they have a political concern. We want you to have sovereignty. On the detention front, nothing would please me more to transfer the 2,800 prisoners we have in American law of war detention to Afghan control, but there is no legal system capable of receiving them yet. As long as you have American troops at the level we are anticipating, we have an obligation here to protect them.

That is sort of my editorial comment about detention and night raids. We do respect Afghan sovereignty. We want to enhance it but we want to do it in a way to make sure we defeat the insurgency, protect the Afghan people, and protect American soldiers and those who are fighting on our behalf.

Now, when it comes to special operations missions throughout the world, if we captured a high-level al Qaeda operative tomorrow, a special operator, what are they supposed to do with him in terms of detention?

Mr. SHEEHAN. Senator, right now, my understanding is they go to Bagram Air Force Base.

Senator GRAHAM. I would correct that. If we caught someone in Yemen tomorrow, we are not taking them to Bagram.

Mr. SHEEHAN. Caught them in Afghanistan.

Senator GRAHAM. Yes.

In Afghanistan, we have available Afghanistan confinement facilities at least for a little while longer. Do you think that is a long-term detention facility for the U.S. war on terror? Do you think the Afghans are going to allow Afghan soil to be the U.S. prison in the war on terror?

Mr. SHEEHAN. Probably not, Senator.

Senator GRAHAM. Now, let us say a capture was made in Yemen, special operations. Where would we put that person? What would we do with them?

Mr. SHEEHAN. I am not sure of the exact answer to that, Senator, at this point.

Senator GRAHAM. Do you not think humane detention should be available to every member of the military, particularly special operators because that takes them out of the dilemma of having to kill or release, that we need a coherent detention strategy?

Mr. SHEEHAN. Absolutely, Senator.

Senator GRAHAM. It is hard to interrogate a dead man, is it not?

Mr. SHEEHAN. Absolutely.

Senator GRAHAM. I would just urge you on behalf of the special operations community to push the administration and Congress to take a burden off their backs. It is not fair to these men and women who are on the tip of the spear to have to capture people, let them go or kill them when this country's intelligence gathering needs are going to be left behind if you cannot capture, detain, and interrogate. We need an answer to that question, do you not agree?

Mr. SHEEHAN. Yes, Senator, and if confirmed, I will work closely with you and this committee to get a better answer to that question.

Senator GRAHAM. Is your understanding that Congress basically has prohibited transfers into the United States of terror suspects? That is the law?

Mr. SHEEHAN. I am aware of that, yes, Senator.

Senator GRAHAM. Please work on this with us because this is an unacceptable outcome for our military, for our Intelligence Community, and for our own safety. Thank you very much.

Chairman LEVIN. Let me just quickly ask one question. I can just see if I can ask Senator Graham this question. My understanding is that the prohibition is that terror suspects cannot be brought here from Guantanamo. Is that correct?

Senator GRAHAM. Yes, sir. If you captured someone in Yemen tomorrow, the idea of bringing them into the United States for civilian prosecution seems to be the only lane available because we are not using military commissions. We are not using Guantanamo Bay as the detention facility. My concern, Mr. Chairman, is that that is criminalizing the war, that if you do not use Guantanamo Bay as a confinement facility to hold and interrogate, then there is no other jail available other than American civilian institutions.

Chairman LEVIN. Or a military commission inside the United States?

Senator GRAHAM. Yes, sir. Mr. Chairman, I think that idea of, say, bringing someone captured in Yemen to Charleston Air Force Base for a military commission is not going to fly because most of us believe that Guantanamo Bay is a very appropriate place to do the trials, detention, and interrogation.

Here is the main concern, Mr. Chairman. I am not so much worried about the prosecution as I am holding these people long enough to gather good intelligence. Being on a Navy ship is an ad hoc approach. You cannot keep someone on a ship very long. We have learned that long-term detention sometimes is the most appropriate way to gather intelligence that would be humane, but the only place I know that would allow us to do that is going to be Guantanamo Bay. If you bring them back to the United States, Mr. Chairman, for civilian prosecutions, I believe that is criminalizing the war. You lose intelligence gathering. I just do not think Congress is going to allow this administration or a Republican administration to jump over Guantanamo Bay. I may be wrong, but we are a Nation without a jail, and that is not good for us.

Chairman LEVIN. I just want to clarify factually there is no prohibition on bringing folks other—

Senator GRAHAM. No. You are right.

Chairman LEVIN. I just wanted to know.

Senator GRAHAM. You are right, Mr. Chairman, but the fact is we are not doing it. We do not have a confinement facility because of executive policy, but there is no bar of bringing someone back in the United States for civilian trial captured overseas or for confinement at a military base inside the United States. But we both know one would lead to criminalization of the war and the second is going to be rejected by Congress. The fact that we are not doing it shows that the policy is broken. We are not doing any of the above.

Chairman LEVIN. I happen to agree with you. Our policy is broken for many reasons, probably for different reasons, however, but—

Senator GRAHAM. Yes, but we are where we are.

Chairman LEVIN. However, I just want to clarify that factually—and this is for your benefit, Mr. Sheehan—at the moment at least, there is no prohibition on bringing in folks that are captured into the United States either for a civilian trial or for a military commission trial and to be kept at a proper prison or jail, more accurately, on a military base. I think that factually is correct.

Senator GRAHAM. That is factually correct and we are not using any of those facilities, but that is factually accurate.

Chairman LEVIN. Just in terms of your response, Mr. Sheehan, I wanted to clarify that.

One quick question and that has to do with—and this is the point also that Senator Graham was making accurately, I believe, with my total support, and that has to do with these night raids. I also made a comment about those night raids in addition to what Senator Graham said about the night raids and the importance of them and the care with which they are done and how few people have actually been killed, if any Afghans. We have captured a lot of insurgents and it is important for intelligence purposes. But in addition to everything which he mentioned, I believe that we also have female troops that go in with those teams on those night raids. We are being sensitive to Afghan culture in many, many ways. I just wanted to add that to what Senator Graham was saying.

Senator GRAHAM. Mr. Chairman, you are dead right. We have learned night raids have been problematic for the Afghan people. Early on, we were doing them in probably less than an effective manner. We were creating more enemies than we were friends. But I would say that Admiral McCraven and the current task force commander, along with Generals Allen and Petraeus, have created a system, not only are we Afghan culturally sensitive, that when someone is called out, there is an Afghan partner doing the calling out. There are women associated with these raids to deal with the sensitivity of interrogating a woman. The amount of force being used now is just very small. They are very well coordinated with the Afghan legal system. Before we do a raid, we have a cell of Afghans who get to vote as to whether or not we go and take this target down. It is a very Afghan-centric system, but it cannot be done without American capability at this point.

So when President Karzai says things like he said about 2 hours ago or it was reported about 2 hours ago, it is not helpful. I think all of us—Senator Levin, McCain, and myself—have a goal of transitioning to Afghan control. We have 2,800 law of order detainees at Parwan Prison, the old Bagram Air Base prison, the most modern prison I have seen anywhere in that part of the world, more modern than most in South Carolina. We want to shift those prisoners under the Afghan control.

If you will just bear with me a second, this is important for the committee to understand. We have a court panel. We have three panels of Afghan judges at the air base doing trials with our prison population. They do about 50 a month, but we are capturing 150 a month. Outside their criminal system, there is no way to detain people under Afghan law. So we are trying to create a new way forward under Afghan law to hold people as a threat to the state with ample due process. We are not there yet.

One final thought about the Afghan legal system. It is very immature, and it would be a national security mistake for us to dump 2,800 people that we have caught on the battlefield into the Afghan legal system. They do not have the capacity or capability, but we are getting there. President Karzai, we share your goal but we are just not there yet.

Chairman LEVIN. Thank you, Senator Graham.

Senator McCain.

Senator MCCAIN. Mr. Chairman, I know we are short of time. We are due on the floor in just a few minutes, so I will try to be very brief.

Mr. Carson, do you believe that water-boarding qualifies as torture in violation of the Geneva Conventions?

Mr. CARSON. These are complicated questions, but I do believe it does, Senator.

Senator MCCAIN. You really think that that is complicated?

Mr. CARSON. I think the definition of torture is a complicated question, but I do believe that water-boarding is a violation of the Geneva Conventions.

Senator MCCAIN. Mr. Ohlson?

Mr. OHLSON. Yes, I do believe it is a violation of the Geneva Conventions.

Senator MCCAIN. Ambassador?

Mr. SHEEHAN. Yes, sir.

Senator MCCAIN. On the issue of detention, we need a couple more answers from you, Ambassador Sheehan, on this whole issue of night raids and detention because we need to know your thoughts on it, and I hope you will get up to speed in response to some written questions that we will be submitting to you.

Mr. Ohlson, I guess according to your testimony that despite all the information about the murder of Agent Brian Terry and the ATF significant involvement with Operation Fast and Furious, you knew nothing about it nor expressed any curiosity about it.

Mr. OHLSON. I did not know about any connection to Fast and Furious. That is correct, Senator McCain.

Senator MCCAIN. I guess we were shocked that gambling was going on in the establishment.

Mr. Lippert, it has been documented in numerous books and other reports that there were significant, shall we say, disconnects and leaks to the media concerning General Jones that was harmful to his reputation during your tenure at the NSC, but your testimony is you had nothing to do with any of it.

Mr. LIPPERT. That is correct.

Senator MCCAIN. Finally, I will ask you again, do you believe that we could have succeeded in Iraq without the surge?

Mr. LIPPERT. Senator, the surge was vital in our success in Iraq, and I was in Anbar Province 2007–2008 to witness the surge break the back of the insurgency firsthand. I think we are where we are because of the surge.

Senator MCCAIN. We are out of time I am afraid, Mr. Chairman, and I thank the witnesses. Thank you.

Senator GRAHAM. Mr. Chairman, could I just add one thing? You said that water-boarding violated the Geneva Convention. Would you agree that it violates the War Crimes Act and the Detainee Treatment Act that are now U.S. law? If you do not know the answer, go look at it, I mean, if you are unsure.

Mr. CARSON. I do not know the answer to those questions and do not know the specific provisions of the statutes. I believe it is bad policy in addition to a violation of the Geneva Convention. I would be happy to look at those laws as well to see—

Senator GRAHAM. The Detainee Treatment Act and the War Crimes Act. Okay? Is that the same with the rest of you?

All of them nodded in the affirmative.

Mr. SHEEHAN. Yes, Senator.

Chairman LEVIN. Nodded in the affirmative that what?

Senator GRAHAM. That it does violate the War Crimes Act and it does violate the Detainee Treatment Act.

Chairman LEVIN. I would hope they would nod in the affirmative, and Mr. Carson, I hope when you answer for the record—that you provide us an answer to the question for the record and you do that promptly.

Mr. CARSON. Certainly, Senator.

[The information referred to follows:]

The use of waterboarding against a person in the custody or under the effective control of the Department of Defense (DOD) or under detention in a DOD facility would violate section 1402(a) of the Detainee Treatment Act of 2005 (Public Law 109–163), which provides that “No person in the custody or under the effective control of DOD or under detention in a DOD facility shall be subject to any treatment or technique of interrogation not authorized by and listed in the U.S. Army Field Manual on Intelligence Interrogation.” Waterboarding is not one of the interrogation techniques authorized by and listed in the Army Field Manual on intelligence interrogation (i.e., Army Field Manual 2–22.3, “Human Intelligence Collector Operations,” September 2006). Furthermore, paragraph 5–75 of the Army Field Manual specifically prohibits waterboarding if used in conjunction with intelligence interrogations. This prohibition is reiterated in DOD Directive 3115.09, which establishes Department-wide policy for intelligence interrogations.

DOD does not use waterboarding in conjunction with intelligence interrogations and, therefore, has not considered whether its use would violate the War Crimes Act (18 U.S.C. §2441). Waterboarding is prohibited by the Detainee Treatment Act, DOD policy, and the Army Field Manual.

Chairman LEVIN. I want to thank my colleagues and thank you all for your presence, and I thank your families.

We will stand adjourned.

[Whereupon, at 10:52 a.m., the committee adjourned.]

[Prepared questions submitted to Michael A. Sheehan by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the special operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act or special operations reform provisions? If so, what areas do you believe might be appropriate to address in these modifications?

Answer. No. The Act and current special operations authorities have served the Department and our Nation well and have enhanced the Department's capabilities to respond when called, such as in Operation Enduring Freedom. If confirmed, I will make proposals for modifications if and when required.

DUTIES

Question. Section 138(b)(4) of title 10, U.S.C., describes the duties and roles of the Assistant Secretary of Defense for Special Operations and Low-Intensity Conflict (ASD(SO/LIC)).

What is your understanding of the duties and functions of the ASD(SO/LIC)?

Answer. The ASD(SO/LIC) is the principal civilian advisor to the Secretary of Defense on special operations and low-intensity conflict matters. After the Secretary and Deputy Secretary, the ASD(SO/LIC) is the principal special operations and low-intensity conflict official within the senior management of the Department of Defense (DOD). The ASD(SO/LIC) has as his principal duty overall supervision (to include oversight of policy and resources) of special operations and low-intensity conflict activities. In addition, the ASD(SO/LIC) oversees DOD's counternarcotics policies and resources, humanitarian assistance policies, strategies for building partner capacity, and stability operations policies in accordance with the Under Secretary of Defense for Policy's priorities and guidance.

Question. What DOD activities are currently encompassed by the Department's definition of special operations and low-intensity conflict?

Answer. Special operations and low intensity conflict activities, as defined in title 10 U.S.C. section 167, include direct action, strategic reconnaissance, unconventional warfare, foreign internal defense, civil affairs, psychological operations, counterterrorism, humanitarian assistance, theater search and rescue, and such other activities as may be specified by the President or Secretary of Defense.

Question. If confirmed, what changes, if any, in the duties and functions of ASD(SO/LIC) do you expect that the Secretary of Defense would prescribe for you?

Answer. I do not currently expect any changes to the duties and functions assigned.

Question. In your view, are the duties set forth in section 138(b)(4) of title 10, U.S.C., up to date, or should changes be considered?

Answer. I do not believe any changes are needed at this time.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the ASD(SO/LIC)?

Answer. No.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. I believe that my background in operational units, working counternarcotics strategy on the NSC staff, as Coordinator for Counterterrorism (Ambassador-at-Large), as Assistant Secretary General for the U.N.'s Department of Peacekeeping, as Deputy Commissioner of Counter Terrorism for the New York Police Department, and as an analyst of the best methods for combating terrorism at New York University (NYU) and West Point provide me with the necessary foundation for this position.

In addition, I served as an Active Duty Army Special Forces officer in a counterterrorism unit (as a detachment commander of an assault team) and as a counterinsurgency advisor in El Salvador.

RELATIONSHIPS

Question. In carrying out your duties, how will you work with the following:
The Secretary of Defense.

Answer. If confirmed, I will perform my duties to provide overall supervision of special operations activities and advise to the Secretary of Defense and the Under Secretary of Defense for Policy regarding special operations activities and low-intensity conflict.

Question. The Deputy Secretary of Defense.

Answer. If confirmed, I will provide advice and support to the Deputy Secretary on special operations, stability operations, counternarcotics, and low-intensity conflict capabilities development and employment, among other matters.

Question. The Under Secretary of Defense for Policy.

Answer. If confirmed, I will work very closely with the Under Secretary of Defense for Policy my advice on matters pertaining to special operations, stability operations, counternarcotics, and low-intensity conflict capabilities, among other matters.

Question. The Under Secretary of Defense for Intelligence.

Answer. Special operations and intelligence are mutually supporting, so, if confirmed, I will work closely with the Under Secretary of Defense for Intelligence.

Question. The Assistant Secretary of Defense for International Security Affairs, the Assistant Secretary of Defense for Asian and Pacific Security Affairs, and the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs.

Answer. If confirmed, I expect to work closely with the regional Assistant Secretaries of Defense in the Office of the Under Secretary of Defense for Policy, providing advice regarding special operations and stability operations that are ongoing or in the planning stage. We would also work together on policies to build partner capacity, counternarcotics, and combat global threats. I would also anticipate working very closely with the Assistant Secretary of Defense for Global Security Affairs on our counterproliferation and cyber policy efforts.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. Successful policy and resource oversight of special operations requires close coordination and collaboration with the Chairman of the Joint Chiefs of Staff, the Chiefs of Staff, and the Chairman's staff. If confirmed, I plan to maintain a close working relationship with the Chairman, the Chiefs, and the Chairman's staff.

Question. The Service Secretaries and Service Chiefs.

Answer. If confirmed, I will work with the Military Department Secretaries and Service Chiefs to ensure that the requirements to organize, train, and equip personnel and units that enable or feed Special Operations Forces are met and that maintaining the capability to perform stability operations is a priority. I would also work with them to ensure adequate resourcing of Service-common requirements and infrastructure for Special Operations Forces.

Question. Commander, U.S. Special Operations Command (SOCOM).

Answer. The Commander, SOCOM and the ASD(SO/LIC) must be partners in defining and meeting the needs of our Special Operations Forces. If confirmed, I am committed to maximizing that partnership and providing SOCOM with a senior civilian advisor in accordance with the ASD(SO/LIC)'s statutory requirement to oversee the policy and resources for special operations activities.

Question. The commanders of the Service SOCOMs.

Answer. If confirmed, I will work closely with the Service special operations commands to ensure they have the policies and resources needed to develop and provide the capabilities needed by the Commander, SOCOM and the regional combatant commanders.

Question. The regional combatant commanders.

Answer. The regional combatant commands are at the forefront of the global fight against terrorists and violent extremists. They are responsible for maintaining a forward posture to deter and dissuade adversaries and assure and build the capabilities of our allies. If confirmed, I will work closely with the regional combatant commands in all of these areas.

Question. The Director of National Intelligence.

Answer. As mentioned above, special operations and intelligence are mutually supporting, so, if confirmed, I will work closely with the Director of National Intelligence and his subordinates.

Question. The Director of Central Intelligence.

Answer. Again, special operations and intelligence are mutually supporting, so, if confirmed, I will work closely with the Director of Central Intelligence and his subordinates.

Question. The Coordinator for Counterterrorism, Department of State.

Answer. The Department of State is a key partner in the fight against global terrorists and violent extremists. As the former Coordinator (Ambassador-at-Large) for Counterterrorism at the Department of State, I would hope to find opportunities to further integrate and coordinate our efforts with the Coordinator.

Question. The National Security Council.

Answer. All aspects of the ASD(SO/LIC)'s responsibilities require interagency engagement, coordination, and cooperation. The ASD(SO/LIC) represents DOD in the interagency on relevant matters including counterterrorism, counternarcotics, stability operations, partner capacity building, and other relevant SO/LIC issues.

Question. The Director, National Counterterrorism Center (NCTC).

Answer. Special Operations Forces (SOF) activities are central to counterterrorism; the NCTC helps ensure coordination of all U.S. Government counterterrorism activities. If confirmed, I will maintain ASD SO/LIC's role as the primary Office of the Secretary of Defense's interface on SOF and counterterrorism (CT) matters.

MAJOR CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges confronting the ASD(SO/LIC)?

Answer. In addition to ensuring adequate resources to provide the special operations and stability operations capabilities needed by the Nation, the ASD(SO/LIC) must also provide policies and resources to keep the pressure on al Qaeda and its affiliates worldwide as we draw down force structure in Iraq and Afghanistan. It is vital that the U.S. Government remain focused on denying al Qaeda and its affiliates the "sanctuary of impunity" globally.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. As a veteran of the interagency process, if confirmed, I plan to keep the issue front and center—and to ensure that programs key to effective counterterrorism operations are properly supported—both politically and with resources.

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the ASD(SO/LIC)?

Answer. If confirmed, I would continue to prioritize the defeat of al Qaeda and like-minded extremists, dismantling their ability to attack us at home or our interests abroad.

I would also focus on sustaining the warfighting capability of SOF warriors. In the past 10 years, they have developed enormous capability both to fight terrorists and to build partner capacity which must be sustained for the long haul; terrorism will not go away any time soon and the need for effective allies and partners is critical to our national security.

Question. Former ASD(SO/LIC) Michael Vickers was quoted as saying "I spend about 95 percent of my time on operations" leaving the rest of his time for "Service Secretary-like" activities including policy, personnel, organizational, and development and acquisition decisions impacting Special Operations Forces.

Would you anticipate a similar division of time as ASD(SO/LIC)?

Answer. Mike Vickers did a great job as the ASD(SO/LIC). If confirmed, I will certainly evaluate his approach as I take this job, but would expect to spend more time on Military Department Secretary-like activities as we face a period of declining DOD budgets.

CIVILIAN OVERSIGHT OF THE U.S. SPECIAL OPERATIONS COMMAND

Question. The legislation creating the SOCOM assigned extraordinary authority to the commander to conduct some of the functions of both a military service and a unified combatant command.

Which civilian officials in the DOD exercise civilian oversight of the "service-like" authorities of the Commander, SOCOM?

Answer. Per title 10 U.S.C. § 138 and DOD Directive 5111.10 (in accordance with USD(P) priorities and guidance), the ASD(SO/LIC) is the principal civilian oversight for all special operations activities. Other DOD civilian officials also exercise oversight in some capacity:

- USD(I) coordinates on intelligence issues
- USD(AT&L) coordinates on acquisition issues

- USD(P&R) coordinates on personnel policies such as SOF-unique incentive packages
- USD(Comptroller) coordinates on SOF budget and year-of-execution program issues
- Military Department Secretaries coordinate on SOF manpower issues
- Director, CAPE, coordinates on SOF Program development and issues

Question. In your view, what organizational relationship should exist between the ASD(SO/LIC) and the Commander, SOCOM?

Answer. ASD(SO/LIC) provides civilian oversight of all special operations matters as required by title 10 U.S.C. § 138. As such, the ASD(SO/LIC) provides oversight of special operations policy and resources matters and advice to implement Secretary of Defense and USD(P) priorities. The ASD(SO/LIC) is a voting member of SOCOM's Board of Directors for program guidance and decisions. The relationship with the Commander, SOCOM should be collaborative and cooperative to develop the best possible forces and employ them effectively.

Question. What should be the role of the ASD(SO/LIC) in preparation and review of Major Force Program 11 and the SOCOM's Program Objective Memorandum?

Answer. The ASD(SO/LIC) provides policy oversight for the preparation and justification of the SOCOM program and budget. The ASD(SO/LIC) co-chairs the SOCOM Board of Directors—the SOCOM resource decision forum. If confirmed, I will work closely with the Commander, SOCOM, to ensure that SOCOM funding sustains a ready, capable force, prepared to meet this new era's challenges.

Question. What is the appropriate role of the ASD(SO/LIC) in the research and development and procurement functions of the SOCOM?

Answer. The appropriate role of ASD(SO/LIC) is to provide policy oversight in resolving special operations acquisition issues. As the lead OSD official for SOF acquisition matters, the ASD(SO/LIC) represents SOF acquisition interests within DOD and before Congress. The responsibilities and relationships between the ASD(SO/LIC) and the Commander, SOCOM are defined and described in a Memorandum of Agreement between the ASD and Commander, SOCOM. The ASD directs and provides policy oversight to technology development programs that address priority mission areas to meet other Departmental, interagency, and international capability needs (e.g., the Combating Terrorism Technical Support Office).

Question. What is the appropriate role of the ASD(SO/LIC) in the operational planning of missions that involve Special Operations Forces, whether the supported command is SOCOM, a Geographic Combatant Command, or another department or agency of the U.S. Government?

Answer. The ASD(SO/LIC) serves as the principal advisor to the Under Secretary of Defense for Policy and the Secretary of Defense for all aspects of employment, deployment, and oversight of special operations and counterterrorism capabilities. The ASD(SO/LIC) provides policy oversight of SOCOM's mission planning and Geographic Combatant Commanders' employment of SOF to ensure compliance with law and DOD priorities. The ASD(SO/LIC) coordinates deployment authorities and plans involving SOF within DOD and with interagency partners as required.

SPECIAL OPERATIONS COMMAND ACQUISITION AUTHORITIES

Question. SOCOM is unique within DOD as the only unified command with acquisition authorities and funding. Further, the Commander of SOCOM is the only unified command with a subordinate senior acquisition executive.

If confirmed, how would you ensure SOCOM requirements are adequately vetted and balanced against available resources before moving forward with an acquisition program?

Answer. The ASD(SO/LIC) is closely involved in all facets of the SOCOM Planning, Programming, Budgeting and Execution system, providing oversight of these matters. Additionally, through the annual program budget review process, the ASD(SO/LIC) is able to ensure that SOCOM's priorities and resource allocation are in alignment with the Department's strategic and policy imperatives.

Question. What role can SOCOM's development and acquisition activities play in broader Service and DOD efforts?

Answer. SOCOM can continue to serve as an incubator for developing new equipment and capabilities that initially are for special operations-specific needs but often transition to the rest of the Services. Some of the SOF technologies that have made their way to the Services include the MH-47 Chinook helicopter common avionics architecture system cockpit, an extended service life wing for the C-130, the MK48 lightweight machine gun, software-defined tactical radios, and an improved sniper sight. Particularly noteworthy is SOCOM's ability to conduct rapid evaluations of

technology, systems, and concepts of operations, and the ability to integrate emerging off-the-shelf technologies.

Question. If confirmed, how would you ensure that special operations capabilities and requirements are integrated into overall DOD research, development and acquisition programs?

Answer. If confirmed, I would continue to support SOCOM's important initiatives in this area, particularly the regularly-convened SOCOM-led "Acquisition Summits" with OSD, drawing together SOCOM, USD(AT&L), and the Service Acquisition Executives where all elements discuss acquisition issues of common interest. As SOCOM requirements are provided to the Joint Staff for inclusion in the Joint Requirements Knowledge Management System, I am comfortable that SOCOM's efforts are synchronized with the DOD process.

Question. If confirmed, how would you ensure sufficient resources are dedicated to the development of special operations-unique platforms, when required?

Answer. As noted above, ASD(SO/LIC) is closely involved and integrated with SOCOM's planning, resourcing, and execution. Additionally, the ASD(SO/LIC) attends the SOCOM Board of Directors meetings, which allows him to ensure that he is aware of matters of concern and import to SOCOM and its subordinate commands. Naturally, advocating for steady and predictable resourcing of SOCOM is the principal means I would use, if confirmed, to oversee the investment strategy in these capabilities. If confirmed, I will also provide advice and support to the Under Secretary of Defense for Policy as she sits on critical resource decision-making bodies.

Question. If confirmed, what metrics will you use to determine the effectiveness of SOCOM technology development investments and whether SOCOM is investing sufficient resources in these efforts?

Answer. SOCOM has created a series of technology roadmaps that are effective in identifying promising solutions to meet requirements. These roadmaps have quantifiable metrics (e.g., cost, schedule, performance, and technology readiness) embedded in them and allow the ASD(SO/LIC) to monitor progress and identify obstacles that may require Department-level involvement.

Question. If confirmed, how will you ensure that SOCOM has an acquisition workforce with the skills, qualifications, and experience needed to develop and manage its acquisition and research and development programs?

Answer. If confirmed, I would support Admiral McRaven's efforts to manage the SOF acquisition workforce, which is similar to the process used by the Service Acquisition Executives. SOCOM's acquisition workforce experts are professionally trained and certified, and have substantial experience in the SOF-unique processes needed to meet the equipping needs of SOF. I would also support SOCOM's efforts with USD(AT&L) to expand its organic acquisition workforce, as well as to create a unique identifier for SOF acquisition positions.

SPECIAL OPERATIONS PERSONNEL MANAGEMENT

Question. Some have argued that the Commander of SOCOM should have greater influence on special operations personnel management issues including assignment, promotion, compensation, and retention of Special Operations Forces. One proposal would modify section 167 of title 10, U.S.C., to change the role of the SOCOM Commander from "monitoring" the readiness of special operations personnel to "coordinating" with the services on personnel and manpower management policies that directly affect Special Operations Forces.

What is your view of this proposal?

Answer. Changing section 167 of title 10, U.S.C., to reflect the word "coordinating" rather than "monitoring" would give SOCOM more influence over Service personnel policies that affect SOF retention. However, I believe that additional coordination and study should be done within the Department to fully understand the impact of this proposal.

SIZE OF SPECIAL OPERATIONS FORCES

Question. The previous two Quadrennial Defense Reviews have mandated significant growth in our Special Operations Forces and enablers that directly support their operations.

Do you believe that we should further increase the number of special operations personnel? If so, why, and by how much?

Answer. I believe that completing the directed growth in SOF and Combat Support and Combat Service Support personnel directed in the 2006 and 2010 QDRs would posture SOCOM to conduct the range of anticipated operations effectively to meet future requirements.

Question. In your view, how can the size of Special Operations Forces be increased, while also maintaining the rigorous recruiting and training standards for special operators?

Answer. Experience has shown that SOF manpower growth of 3 to 5 percent annually can be sustained and will not dilute the force or outpace the required training and support structure. In my view, SOCOM has done a magnificent job of adjusting its processes to maintain the quality of SOF operators and support personnel during this current era of SOF growth.

SPECIAL OPERATIONS MISSIONS

Question. In recent years, Special Operations Forces have taken on an expanded role in a number of areas important to countering violent extremist organizations, including those related to information and military intelligence operations. Some have advocated significant changes to SOCOM's title 10 missions to make them better reflect the activities Special Operations Forces are carrying out around the world.

What current missions, if any, do you believe can and should be divested by SOCOM, and why?

Answer. As a result of the 2010 QDR, the Department is building the capacity and capabilities of the general-purpose forces (GPF) to conduct security force assistance to develop the capacity and capabilities of foreign security forces in permissive or semi-permissive environments. The GPF capability to train, equip and advise large numbers of foreign security forces could allow SOF to focus on more complex missions. However, I believe that SOF must maintain a very robust capability to train, equip, and advise foreign security forces as part of ensuring SOF capability to conduct operations in politically-sensitive environments, ensuring access for other SOF activities, and ensuring the ability to train, equip and advise either Special Operations Forces or irregular forces.

Question. Are there any additional missions that you believe SOCOM should assume, and, if so, what are they and why do you advocate adding them?

Answer. I do not currently foresee any additional missions that SOCOM should assume. I believe however, that SOF-led approaches to counterinsurgency are worth exploring. Counterinsurgency operations conducted by the United States will, more often than not, be conducted indirectly. SOF specializes in the indirect approach. I believe that employing unconventional warfare against non-state actors holds considerable promise as an expanded SOCOM mission area.

LANGUAGE AND CULTURAL AWARENESS CAPABILITIES

Question. Deployed special operations personnel remain heavily concentrated in the U.S. Central Command (CENTCOM) theater of operations, including many who have been deployed outside of their regional area of expertise.

Are you concerned that the language and cultural skills among Special Operations Forces have been degraded because of repeated deployments outside their regional area of expertise?

Answer. Rotational deployments of SOF units not regionally aligned to the CENTCOM area of responsibility have indeed taken a toll on the language, regional expertise, and culture capabilities of those units for their aligned regions. Current operations tempo limits the ability to train SOF for their primary areas of responsibility while still preparing for the next CENTCOM deployment. This is being addressed to a degree by SOCOM force structure growth and requires continued monitoring.

Question. If so and if confirmed, what, if anything, would you do to ensure these unique skills are adequately maintained?

Answer. I support recent SOCOM initiatives to implement higher requirements for language capability as well as to improve the training processes for its components. If confirmed, I would seek to continue to pursue several key policy issues in close coordination with SOCOM, including: native/heritage recruiting, valuing language and regional capabilities in selections and promotions, language testing and incentives, maintaining DOD-funded Defense Language Institute detachments at some of our components, adding SOF-specific school billets and funding from the Services for foreign education, and encouraging the Services to award Intermediate Level Education and Senior Level Education equivalency for Foreign Professional Military Education programs.

MARINE CORPS FORCES SPECIAL OPERATIONS COMMAND

Question. Marine Corps Forces, Special Operations Command (MARSOC), is a subordinate component command to SOCOM established in 2005.

What is your assessment of the progress made in standing up and growing MARSOC, and what do you consider to be the principal issues that need to be addressed to improve its operations?

Answer. I believe that the establishment of MARSOC has been a resounding success, largely due to the commitment of the Marine Corps and Navy. My initial assessment is that the planned Combat Service and Combat Service Support growth must be fully implemented to support most effectively MARSOC's full spectrum of capabilities.

Question. What unique attributes, if any, does MARSOC contribute to the capabilities of U.S. Special Operations Forces?

Answer. Incorporating the wonderful heritage, spirit, expeditionary mindset, and "can do" attitude of the U.S. Marine Corps into SOCOM has been an extremely positive thing, in my view. MARSOC has led the effort to integrate intelligence and operations completely at the lowest possible level, and MARSOC's distinctive command and control procedures have created dynamism in the SOF community.

Question. The Marine Corps have approved a primary military occupational specialty for enlisted marines trained as special operators allowing these personnel to remain in MARSOC for their professional careers.

Do you believe officers should have a similar opportunity as enlisted marines to serve the duration of their military career in MARSOC rather than rotating through the command as they do currently?

Answer. As a former Army Special Forces officer, I recall the process that the Army went through to establish Special Forces as a separate officer career field. One lesson from that experience was that such transitions occur during the maturation of an organization, and that it is probably too early to decide definitively how MARSOC-qualified officers should be managed long-term. I am confident that the Marine Corps will regularly review this topic and conduct the necessary study and analysis to determine if it is appropriate to make a change.

MILITARY INFORMATION SUPPORT OPERATIONS

Question. DOD recently announced that it was discontinuing use of the term "Psychological Operations" in favor of the term "Military Information Support Operations (MISO)."

Do you support this change? Why or why not?

Answer. Yes. Today, for some, the terms "Psychological Operations" or "PSYOP" unfortunately conjure up images of propaganda, lies, or deception. These inaccurate perceptions limit the willingness to employ MISO personnel in some areas where they could be extremely effective.

To date, there are some indications that the name change has allowed for some increases in acceptance, cooperation and coordination regarding MISO activities throughout the U.S. Government and with our partner nations.

Question. What operational and doctrinal impacts do you believe such a change will have?

Answer. Changing the term "Psychological Operations" to "Military Information Support Operations" throughout military doctrine, manuals, and other documents is one of semantics. There were no directed changes in doctrine or operational employment of the force.

Question. Do you believe the Armed Forces have sufficient personnel and other assets to conduct the range of MISO being asked of them?

Answer. MISO forces and assets, like the rest of the military, are stretched thin with the ongoing operational requirements to support deployed combat forces. MISO forces are low-density forces and are among the most deployed forces in the U.S. military. Under Admiral Olson, SOCOM conducted several reviews to address this issue. I know Admiral McRaven is committed to following through on this with the objective of enhancing DOD's MISO capabilities. One of the first efforts toward increasing the MISO capability is the reorganization of SOCOM MISO forces. This reorganization will reduce redundancy in commands and allow for the repurposing of numerous positions from staff to operational capability.

Question. Al Qaeda and affiliated violent extremist groups work hard to appeal to both local and foreign populations. The composition and size of these groups in comparison to the U.S. Government permits them to make policy decisions quickly.

Do you believe DOD is organized to respond quickly and effectively to the messaging and influence efforts of al Qaeda and other affiliated terrorist groups?

Answer. DOD is well positioned and organized from the strategic level to the tactical level to respond quickly to al Qaeda and its affiliates when a quick response is required. But unlike kinetic warfare, effectiveness in the war of ideas does not necessarily lie in outpacing the tempo of our enemies. A steady drumbeat that clear-

ly articulates U.S. policy over time, anchored in the bedrock truth, best serves our national interests. DOD takes its lead from the President, and relies heavily on the Department of State, in reenforcing the Nation's message. In doing so, DOD has been extremely effective in face-to-face encounters, through a broad array of engagements with our allied, partner, and host nations on a daily basis. As a representative example, DOD reinforces its engagements with printed products, such as Geographic Combatant Commands' Regional Magazines and the foreign engagement websites. These mediums provide DOD a broad range of options.

In addressing al Qaeda, DOD seeks collectively to identify and exploit their misdeeds and errors, and force them into a reactive role. In that way, DOD determines the appropriate level of response and quickly coordinates that response with other agencies.

Question. What do you believe is the appropriate role for Military Information Support Teams (MIST) in these activities?

Answer. The MIST is the MISO equivalent of the Special Forces operational detachment. This is the element that executes MISO at the operational and tactical level. MISTs develop messages to counter hostile information and propaganda, in a manner that is culturally relevant and acceptable to the host national population. Such messaging is closely coordinated with the U.S. Embassy. MISTs also can maintain awareness of the information environment by identifying current trends in local and regional media reporting, detecting hostile messaging, and measuring local populace reaction.

MILITARY INTELLIGENCE OPERATIONS

Question. In your view, how are intelligence operations carried out by special operations personnel different from those carried out by others in the Intelligence Community?

Answer. In my view, Special Operations Forces (SOF) intelligence operations are complementary and mutually supporting to those carried out by the Intelligence Community (IC). These operations comply with the policies and regulations guiding DOD and interagency activities. One key distinction between SOF intelligence operations and those conducted by the IC is the pace of these activities. SOF have refined the Find, Fix, Finish, Exploit, Analyze (F3EA) intelligence cycle to support the rapid cycle rate of special operations activities. The F3EA process is now being migrated to conventional forces. SOF have also placed a premium on sensitive site exploitation and the collection and registration of biometrics data from the battlefield.

SOCOM elements have also developed a series of joint interagency task force nodes, both in deployed areas and in the United States, that bring together expertise from all our interagency partners. SOF maximizes interagency contributions through reachback, de-confliction, and coordination of activities between agencies. This improves our forces' chances to get inside the enemy's decision cycle.

Question. If confirmed, how would you ensure intelligence activities carried out by Special Operations Forces are coordinated adequately with other activities carried out by those in the Intelligence Community?

Answer. I believe that interagency collaboration is the most important contributing factor to many of SOF's achievements. As Admiral McRaven has stated, SOCOM will continue to follow all applicable Intelligence Community directives, report required sensitive activities to the USD(I), and maintain the robust intelligence oversight processes they have established with their Inspector General, Staff Judge Advocate, and the Command Oversight Review Board.

If confirmed, I will oversee, maintain, and build upon the important relationships SOCOM—as a key member of DOD's Intelligence Community—has developed with the Federal intelligence and law enforcement agencies. Additionally, I am aware that SOCOM continues to employ SOF liaison officers, called Special Operations Support Team members, effectively to coordinate with agencies in the national capital region.

CIVIL AFFAIRS OPERATIONS

Question. Civil Affairs activities carried out by U.S. Special Operations Forces in partnership with host nation personnel play an important role in developing infrastructure, supporting good governance and civil societies, and providing humanitarian assistance, including medical and veterinary services to needy populations.

In your view, does SOCOM have sufficient personnel and resources to conduct the range of Civil Affairs missions required for today's operations?

Answer. I understand that SOCOM and the Army have determined that current and already programmed Civil Affairs (CA) force structure provides sufficient capacity within the CENTCOM AOR and other combatant command generated Theater

Security Cooperation requirements. Any capability shortfalls within the CA force are being addressed in detail by the respective Military Departments and SOCOM, and solution sets are being provided through the CA Capabilities Based Assessment. Implementation of those solutions, by the Military Departments, will eliminate much of the existing capability gaps. Ensuring the Department has the correct force capacity to meet current requirements will be one of my priorities, and if confirmed, I would resist the temptation to create a new capability or increase capacity when it may suffice simply to enhance capabilities within current force structure, through additional, enhanced, or new training; structure and manning updates; and progressive equipping coupled with continued evolution of the roles, missions, and responsibilities of the current CA force.

Question. Civil Affairs activities are most effective when coordinated with other U.S. Government efforts, most notably those carried out by U.S. Agency for International Development (USAID).

If confirmed, how would you ensure Civil Affairs activities by special operations personnel are integrated into larger U.S. Government efforts?

Answer. I understand that SOCOM employs two significant tools to ensure effective interagency coordination: the SOCOM Interagency Task Force (IATF), and an Interagency Partnership Program. The IATF identifies discrete problems and opportunities to foster interagency collaboration by leveraging unique interagency authorities, resources, and capabilities in support of the mission to expose, disrupt, dismantle, and defeat threats. This capability is available to the CA force as a reach-back mechanism for interagency coordination.

The Interagency Partnership program established and maintains a network of SOCOM personnel in the national capital region to facilitate the synchronization of planning for global operations against terrorist networks and addressing other emerging national security concerns in coordination with appropriate U.S. Government agencies, the Joint Staff, OSD, combatant commands, combat support agencies, the military departments, and others. Two CA officers are currently in the USAID Military Affairs office. These mechanisms seek to ensure that SOF CA remains integrated into key U.S. Government efforts.

Question. MISOs can have an amplifying effect on Civil Affairs activities by actively promoting the efforts of the U.S. military and host nation and by communicating truthful messages to counter the spread of violent extremist ideology among vulnerable populations.

If confirmed, how would you ensure Civil Affairs and MISOs are adequately coordinated to achieve a maximum impact?

Answer. If confirmed, I would support SOCOM in its role as joint proponent for both CA and MISO. This will enable unity of effort and the coordinated execution of CA and MISO. CA and MISO force representation at the operational and strategic levels will also remain critical in achieving a coordinated impact. At the tactical and operational levels, (e.g., country teams at the U.S. Embassies where CA and MISO are working), this is accomplished as a matter of course. CA and MISO personnel receive similar training and understand that their specialties are mutually supporting.

SPECIAL OPERATIONS ENABLING CAPABILITIES

Question. The previous Commander of SOCOM described the “non-availability” of force enablers as SOCOM’s “most vexing issue in the operational environment.” The 2010 QDR sought to balance previously mandated growth in Special Operations Forces with additional enabling capabilities.

What do you believe are the greatest shortages in enabling capabilities facing Special Operations Forces?

Answer. Shortages of enabling capabilities for SOF are often similar to the shortage of high-demand enablers that challenge the rest of the deployed forces (e.g., intelligence, explosive ordnance disposal, communications, medical, security).

SOCOM’s organic enabling capabilities are those that provide SOF the ability to self-sustain for short durations while maintaining the agility to deploy forces quickly in support of the combatant commanders. Longer-term support of Special Operations Forces, by doctrine, and except under special circumstances, becomes the responsibility of each Service’s theater logistic command and control structure.

Question. Do you believe additional enabling capabilities, beyond those mandated by the QDR, are required to support Special Operations Forces?

Answer. The QDR mandated an increase in the number of organic combat and combat service support assets available to both the Army and Navy special operations units. These capabilities include logisticians, communications assets, forensic analysts, information support specialists, and intelligence experts. DOD is slowly re-

alizing this programmed growth, and it will make a difference in how SOF units are supported. The QDR only addresses growth within SOCOM, however, SOCOM will always rely on the Services for some level of support as addressed in the previous question.

Question. Do you believe additional enabling capabilities should be grown within SOCOM or provided in support of Special Operations Forces by the Services?

Answer. I believe both should occur, but the preponderance of those support capabilities should remain in the conventional force and be provided to SOF through the habitual association of Service Combat Support and Combat Service Support capabilities with the SOF units they primarily support. Currently the responsibility of the conventional force to provide sustainment support to SOF is not clearly defined or specified. At times, this limits SOF's ability to sustain operations. SOCOM is currently working with its components, the Services, and the Joint Staff to develop the Special Operations Force Generation process to improve how it requests these critical capabilities. If confirmed, I will work with SOCOM to define enabler requirements more clearly, and to identify them farther in advance to allow the Services to plan for the employment of habitually associated units in support of SOF. A reduction of SOF emergent requests and an increase in habitually associated Service-provided capabilities will go a long way toward resolving this problem.

RENDER SAFE PROFICIENCY

Question. The proliferation of weapons of mass destruction is a growing and especially concerning threat to our Nation. Select special operations units are assigned the task of interdicting and rendering-safe weapons of mass destruction should they ever fall into the wrong hands.

If confirmed, how would you ensure render-safe capabilities are adequately maintained by special operations units who may currently be heavily engaged in offensive kill/capture missions against high value targets in Afghanistan and elsewhere?

Answer. The National Strategy for Counterterrorism highlights the danger of nuclear terrorism as being the single greatest threat to global security. I understand that, even amidst a sustained focus on offensive operations to capture/kill high-value targets in Afghanistan and elsewhere, the Department ensures that its render-safe capabilities are adequately maintained. If confirmed, I will work closely with SOCOM on this important issue. I will carefully monitor and assess the impact of our operational tempo on DOD's render-safe capabilities and ensure that these capabilities are maintained.

Question. Do you believe additional render-safe capabilities are needed within SOCOM?

Answer. Not at this time, though I have not yet had the opportunity to examine these capabilities in detail. I believe SOCOM has the capabilities now to accomplish its render-safe mission.

As long as States continue to proliferate weapons of mass destruction, and both state and non-state actors continue their attempts to acquire these devices with the intent to target the United States and/or U.S. interests, we must remain vigilant and effective in our efforts. It is important to stay ahead of the threat, which requires expanded research and development efforts to ensure that our skilled operators are properly trained and equipped to defeat these threats.

SUPPORTED COMBATANT COMMAND

Question. Under certain circumstances and subject to direction by the President or Secretary of Defense, SOCOM may operate as a supported combatant command.

In your view, under what circumstances should SOCOM conduct operations as a supported combatant command?

Answer. SOCOM should be, in accordance with the Unified Command Plan, the supported commander for planning and synchronizing planning for global operations against terrorist networks. Mission execution in most instances remains under the command of Geographic Combatant Commanders, or, more precisely, in accordance with title 10 U.S.C. 167 unless otherwise directed by the President or Secretary of Defense, a special operations activity or mission shall be conducted under the command of the commander of the unified combatant command in whose geographic area the activity or mission is to be conducted.

Only in rare instances, involving highly sensitive targets or significant political considerations, does Commander, SOCOM execute a mission.

Question. In your view, what resource, organization, and force structure changes, if any, are required in order for SOCOM to more effectively conduct both supporting and supported combatant command responsibilities?

Answer. It seems to me that, after 10 years of active combat, SOCOM is probably structured correctly to conduct both supporting and supported combatant command responsibilities. I understand SOCOM and the office of the ASD(SO/LIC) are currently studying the Theater Special Operations Commands to determine what changes, if any, should be considered in the future. I will look at this issue carefully if confirmed.

TRAINING CAPABILITY

Question. What capabilities do you consider most important for effective training of special operations personnel?

Answer. Special Operations Forces cannot be created rapidly since they require a high degree of training, experience, and job skill sets that are often unique. The human component of SOCOM is where its strength lies and to develop our special operations personnel we must be willing to invest the necessary time and resources in advanced, realistic training. We must be able to leverage real-world exercises like the Joint Combined Exchange Training (JCET) programs to expose our SOF to real-world experiences. It is critical that they develop language and cultural skills that allow them to operate in diverse foreign environments where our national interests are greatest. Special operations personnel must develop a mastery of their skills. DOD/SOCOM must maintain or increase resources and time spent on training ranges and developing interoperability with the Services and our allies who serve as significant enabling components to SOF.

Question. What improvements are necessary, in your view, to enhance training for special operations personnel?

Answer. Professional military education remains an important part of developing the critical language and cultural skills required of SOF personnel. DOD must be willing to prioritize additional resources and incentives to encourage the development of language and cultural skills in our servicemembers and more importantly within our special operations personnel. DOD should take advantage of, and increase where possible, immersion training opportunities, exchanges, and advanced education opportunities. At the same time, DOD/SOCOM must not allow our SOF to lose their core combat capabilities; the balance between warrior and ambassador should be respected and SOCOM needs to prioritize the continued development of the core combat skills that make our SOF unique and experienced.

Admiral McRaven has additionally highlighted that pre-mission and predeployment training with relevant Service-provided capabilities (e.g. mobility, fires, engineers, etc) is critical to ensure that joint SOF packages are effective.

Question. What are the most significant challenges in achieving effective training of special operations personnel?

Answer. SOCOM has highlighted that it needs to move from a primarily threat-focused approach to a population-focused approach. This means conducting indirect warfare and moving beyond core SOF skills. It already takes significant time to develop the basic skill sets for special operations personnel. Developing additional language, cultural, diplomatic, and other non-combat SOF skills will be a challenge. SOF are deployed at an extremely high rate leading an effective effort to combat terrorism throughout the world. Deploying persistently and for long durations results in great experiences for special operations personnel, but in many cases a focused mission may result in the atrophy of other skill sets. For example, aircrews may conduct repetitive air-land missions on a long deployment, but may not conduct a specific airdrop mission due to deployment constraints. SOCOM must ensure there is enough time to train in the deployment cycles to maintain proficiency in core SOF capabilities. Additionally, since most SOF missions require non-SOF support, time must be added to work closely with Service counterparts supporting SOF.

Question. What, if any, training benefits accrue to U.S. Special Operations Forces from training foreign military personnel?

Answer. Training foreign military personnel has a substantial benefit for SOF, especially when they are foreign military units tied directly to current and future operations. The training of these units can increase interoperability, and allow the foreign units to take a larger lead in their own defense operations while our special operations trainers maintain their instructor skills. The training of the foreign military personnel greatly benefits SOF as they gain an increased situational awareness of future operating environments and allies while honing language and cultural skill sets that are critical to successful operations. JCETs and other regionally synchronized training efforts help pave the way for critical counterterrorism operations or even humanitarian efforts or other SOF mission sets. These activities help expose SOF to new tactics, techniques, and procedures while also encouraging the development of communication and intelligence-sharing mechanisms that enable CT oper-

ations. Training foreign military units helps build trusting relationships and fosters familiarization that in return enables our SOF to work in foreign countries with greater success and confidence.

Question. To what extent, in your view, is it appropriate for the U.S. to rely upon contractors for training foreign military personnel? What do you see as the primary risks and advantages in such contractor training?

Answer. SOF cannot be replaced by contractors, but there may be times when utilizing contractors makes more sense and should be the course of action. In some situations, it may be prudent to contract out a specific mission because we may not possess that skill within our own SOF. For example, there may not be a SOF aviator trained on a certain aircraft, or there may not be a Green Beret with a specific language skill required for a training event. In these cases, a contract solution might be the best option to ensure an important mission is still conducted.

Answer. On the other hand, there are risks of utilizing contractors. DOD is obligated to maintain strong oversight over contractors. Contractors are also not permitted to represent the U.S. Government. They are not a replacement for SOF and if not properly utilized may undermine efforts to train foreign units. Contractors can help provide augmented logistics, administrative support, and technical/computer expertise which in turn frees up special operations personnel for more SOF-unique training opportunities and operational missions.

Question. On March 1, 2011, Admiral Eric Olson, the former Commander of SOCOM, provided written testimony to this committee that stated: "The shortage of readily available, local ranges currently hampers Special Operations Forces' ability to meet deployment training timelines and causes our operators to 'travel to train,' further increasing their already excessive time away from home."

What efforts do you plan to undertake in coordination with the military services to ensure that Special Operations Forces have timely, consistent and predictable access to training ranges and facilities?

Answer. If confirmed, I would coordinate with SOCOM and take a closer look at how the GPF and SOF share training ranges and facilities. Where possible I would look to prioritize limited training resources for SOF training and those Service enablers supporting SOF. For example, if confirmed, I would prioritize future military construction efforts to expand training capabilities for SOF. I would also look to enter into additional memorandums of agreement for expanded GPF-SOF training opportunities on ranges and associated facilities to prepare our SOF for combat deployments.

CAPABILITIES OF SPECIAL OPERATIONS AND GENERAL PURPOSE FORCES

Question. The 2010 Quadrennial Defense Review (QDR) called for increased counterinsurgency (COIN), counterterrorism, and security force assistance capabilities within the general purpose forces.

What is your assessment of the QDR with regard to the mix of responsibilities assigned to general purpose and Special Operations Forces, particularly with respect to security force assistance and building partner military capabilities?

Do you believe that our general purpose forces need to become more like Special Operations Forces in mission areas that are critical to countering violent extremists?

Are there certain mission areas that should be reserved for Special Operations Forces only?

Answer. I fully support the strategy of building the defense capacity and capabilities of our partners as articulated in the 2010 QDR. I believe that the mix of capabilities between general purpose and Special Operations Forces as called for in the QDR is correct. Each of the Services has gained valuable experience in this area over the past 10 years, especially as a result of operations in both Iraq and Afghanistan. The Services are increasingly growing their organic capability and capacity to conduct security force assistance (SFA) operations in permissive and non-sensitive environments or where a large U.S. footprint is acceptable. Likewise, SOF have gained valuable experience in building the military capability and capacities of our partners not only in Iraq and Afghanistan, but also with our coalition partners as they prepare to deploy in support of both combat and stability operations. The Service SFA capability and capacity, however, should be for Service core competencies and not for missions best suited for SOF. SOF are still the force of choice for those security force assistance missions in non-permissive and politically sensitive areas and where the host nation demands a small footprint. In addition, SOF are the correct choice to train our partner nation SOF and improve their capabilities for counterterrorism operations.

SOF have worked closely with the Service general purpose forces to prepare them to execute COIN and combating terrorism missions appropriate to their capabilities. The partnership between general purpose and Special Operations Forces is strong. The extensive combat employment of both forces in shared battle spaces has increased the need to coordinate our operations closely. This has resulted in a sharing of tactics, techniques, and procedures between SOF and general purpose forces that has helped to increase the Services' capabilities to execute COIN and combating terrorism operations. The Services can continue to complement SOF's capabilities by providing those combat enablers that are not organic to SOF units or that are not available in adequate quantities. These combat enablers, including intelligence and combat service support, are vital to the success of SOF, especially in today's complex operating environment.

COMBATTING TERRORISM

Question. What is your understanding of the Department's strategy for combatting terrorism?

Answer. The President's National Strategy for Counterterrorism maintains the focus on pressuring al Qaeda's core while emphasizing the need to build foreign partnerships and capacity and to strengthen our resilience. The United States is specifically at war with al Qaeda and associated forces, not the tactic of terrorism or the larger group of violent extremists in the world. Overarching goals are to protect the American people, Homeland, and interests; disrupt, degrade, dismantle, and defeat al Qaeda; prevent terrorists from acquiring or using weapons of mass destruction; eliminate safehavens; build enduring counterterrorism partnerships; degrade links between al Qaeda and its affiliates and adherents; counter al Qaeda's ideology; and deprive terrorists of their financial support and other enablers.

The U.S. Government is engaged in a multi-departmental, multinational effort. Some of the activities that DOD directly undertakes to support this strategy include training, advising, and assisting partner security forces; supporting intelligence collection on al Qaeda; conducting information operations against al Qaeda; and, when appropriate, capturing or killing al Qaeda operatives. However, I understand DOD is also committed to enabling its intelligence and law enforcement partners, both in the United States and overseas, in their efforts to counter this threat.

Question. If confirmed, how would you fulfill your responsibilities related to combatting terrorism?

Answer. The ASD(SO/LIC) is the DOD lead for all special operations and low-intensity conflict matters. If confirmed, I would also advise the Secretary of Defense on sensitive counterterrorism and information operations; sections 1206, 1208, and related counterterrorism authorities; and the development of Special Operations Force capabilities necessary for countering the terrorist threat.

Question. Are there steps the Department should take to better coordinate its efforts to combat terrorism with those of other Federal departments and agencies?

Answer. In general, I think DOD is doing a good job of coordinating its counterterrorism efforts. At the operational level, the U.S. military, Intelligence Community, and law enforcement agencies regularly collaborate on operations. The various departments and agencies constantly share intelligence, with little of the "stovepiping" that we saw before September 11. At the strategic level, the multiple counterterrorism bodies chaired by the National Security Staff provide ample opportunity for senior leaders to discuss key terrorism issues. There will always be some natural bureaucratic tensions, but I think the U.S. Government is well postured for continued strong counterterrorism collaboration. I will look at this closely if confirmed.

Question. As you look around the globe at this moment, what do you see to be the most significant counterterrorism threats to the United States, our allies, and partners?

Answer. The most significant groups that threaten the United States and our allies are al Qaeda in Pakistan and al Qaeda in the Arabian Peninsula. However, a few key operatives operating from any of al Qaeda's affiliates, or even "lone wolves" inspired by al Qaeda, can wreak havoc anywhere in the world. I am very concerned with preventing terrorists from obtaining weapons of mass destruction or loose anti-aircraft weapons proliferating from unstable states. I understand that the U.S. Government is continually working to identify new terrorist methods of concealing improvised explosives.

Question. On September 22, 2011, Secretary of State Hillary Clinton launched the Global Counterterrorism Forum (GCTF) with 30 founding members from around the world. The GCTF is a major initiative within the Obama administration's broader effort to build the international architecture for dealing with terrorism. The primary

focus of the GCTF is capacity building in relevant areas and aims to increase the number of countries capable of dealing with the terrorist threats within their borders and regions.

What is your understanding of this initiative?

Answer. The GCTF is a multilateral platform that will provide a venue for countries to meet and identify counterterrorism needs, and mobilize the necessary expertise and resources to address such needs and enhance global cooperation. The GCTF is intended to complement ongoing efforts with the United Nations, as well as other regional and sub-regional bodies. I understand that the September launch of the GCTF was positively received by all of the countries involved.

Question. Given the emphasis on building partner capacity, what is your understanding for the role of DOD—and in particular Special Operations Forces—in this initiative?

Answer. The defeat of al Qaeda cannot be achieved without bringing together the expertise and resources of the entire U.S. Government—intelligence, law enforcement, military, and other instruments of national power—in a coordinated and synchronized manner. If confirmed, I would seek strong relationships with DOD's inter-agency partners, in particular, the National Counterterrorism Center, the State Department's Office of the Coordinator for Counterterrorism, and the Center for Strategic Counterterrorism Communications, to maximize DOD's efforts to counter violent extremism. The GCTF, as a State Department-led effort, is one example where SOF's counterterrorism and security cooperation activities can support and inform interagency partners' efforts in counterterrorism.

SECTION 1208 OPERATIONS

Question. Section 1208 of the Ronald Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108–375), as amended by subsequent legislation, authorizes the provision of support (including training, funding, and equipment) to regular forces, irregular forces, and individuals supporting or facilitating military operations by U.S. Special Operations Forces to combat terrorism.

What is your assessment of this authority?

Answer. I understand that section 1208 authority is a key tool that combatant commanders have repeatedly confirmed as essential to combating terrorism in their areas of responsibility. It enables the Special Operations Forces under their control to leverage willing partners who possess access to areas, people, and information that are denied to U.S. forces, but which are critical to our tactical and strategic success. The authority has allowed DOD to respond quickly to emergent global challenges. Use of section 1208 requires appropriate civilian oversight, including the Secretary of Defense's approval and congressional notification.

AFGHANISTAN

Question. What is your assessment of the current situation in Afghanistan? What are the weaknesses and shortcomings in the current effort to combat terrorism and insurgency in Afghanistan?

Answer. In my view, the International Security Assistance Force (ISAF) and its Afghan partners have made important security gains, reversing violence trends in much of the country, and beginning to transition Afghan security to lead in seven areas. Continued military pressure through partnered operations has allowed joint ISAF-Afghan forces to maintain and expand the security gains, especially in the former Taliban strongholds in Helmand and Kandahar. The Afghan National Security Forces (ANSF) have been integral to this success, demonstrating substantial growth in quantity, quality, and operational effectiveness.

The United States is employing the right methodology, and security continues to improve. However, the insurgency's safe havens in Pakistan and the limited capacity of the Afghan Government remain the biggest threats to consolidating security gains to enable an enduring, stable Afghanistan. The insurgency remains resilient, benefiting from safe havens, with a notable operational capacity as reflected in isolated, high-profile attacks and elevated violence levels in eastern Afghanistan. Nevertheless, this partnered campaign has provided increased security and stability for the Afghan population, and the United States continues to build upon this success.

Question. In your view, what is the appropriate role of Special Operations Forces in Afghanistan, and the proper relationship between counterterrorism and counterinsurgency operations there?

Answer. In my view, counterterrorism (CT) and counterinsurgency (COIN) are inextricably linked in Afghanistan. There must be a balanced and measured approach to their application. CT efforts, including direct action, shape the environment and create conditions necessary for the causes of instability to be addressed. This en-

ables the further capacity development of Afghan governance and Afghan security forces.

Question. Night raids conducted by U.S. Special Operations Forces and Afghan commandos have resulted in removing thousands of insurgents from the battlefield, often without any shots being fired. Nonetheless, night raids remain controversial in Afghanistan, and the Afghan Government and community leaders have repeatedly called for restricting or eliminating their use.

In your view, what should be the role of night raids in our strategy in Afghanistan?

Answer. In my view, night operations are an essential and highly effective element of a strategy against al Qaeda and the Afghan insurgency, and they should continue to play an important role in maintaining pressure on militant groups. Night operations allow the United States, with its Afghan and international partners, to fight the insurgency with precision and focus while minimizing risk to civilians.

I understand that Afghanistan's highly trained Special Operations Forces are steadily growing, and that Afghans currently play a key role in coordinating and partnering in the vast majority of these operations. Of course, night operations must continue to be conducted with due respect for cultural sensitivities and great care for the prevention of civilian casualties. Ultimately, the goal must be to ensure that Afghan and international forces have the capabilities and authorities necessary to achieve the transition goals agreed at the Lisbon Summit last November, while also being mindful of the goal to increase Afghan ownership throughout the transition process.

Question. What is your assessment of the effectiveness of night raids, particularly in removing from the battlefield mid- and senior-level insurgent commanders?

Answer. The amount of pressure these operations have placed on the insurgency has been immense. Night operations have been particularly effective at using rapid exploitation of intelligence to target command and control structures, organizational capabilities, support networks, and infrastructure of insurgent and militant groups.

I understand that the United States conducts the vast majority of night operations jointly with Afghan Security Forces, and we share a common goal—transition to Afghan security lead by 2014 and full transition as soon as the ANSF has the necessary capacity. Because of the high level of skill and professionalism of the joint U.S.-Afghan forces, no shots are fired during approximately 90 percent of night operations, and less than 1 percent of these operations result in civilian casualties.

Question. What steps, if any, would you recommend to address Afghan concerns regarding the use of night raids?

Answer. I understand that the United States has already taken numerous steps to minimize the potential for civilian casualties and give Afghan security forces leadership on night operations. All of our forces receive formal instruction in theater tactical directives pertaining to civilian casualties. Afghan Security Force leadership has been integrated into the planning, execution, and post-operation phases to ensure full transparency and enable its leadership to balance risk, cultural considerations, and operational requirements. Every U.S. operation is conducted with Afghan counterparts, and the Afghans are always in the lead during entry of compounds and call-outs. Measures for escalation of force are strictly followed. I understand that our Afghan partners, as well as U.S. commanders, strive to keep district and provincial political leadership informed of all operations.

Question. Secretary Panetta and others have emphasized the importance of the Village Stability Operations and Afghan Local Police programs to the strategy in Afghanistan.

What has been the effect of these programs on rural Afghan populations and what has been the response from the Taliban?

Answer. Village Stability Operations (VSO) are a critical component of the COIN/CT balance in the ISAF campaign plan. VSO is a bottom-up approach linking governance to the village level. VSO uses Afghan and ISAF Special Operations Forces embedded in the community full-time to help improve security, governance, and development in more remote areas of Afghanistan where the ANSF and ISAF have a limited presence. I understand that, since its inception, VSO has expanded Afghan Government influence in key rural areas from 1,000 square kilometers to 23,500 square kilometers today. VSO has also enabled a massive expansion in small-scale infrastructure development in these key rural areas. Across Afghanistan, increasing numbers of local communities are requesting to participate in this program.

The Afghan Local Police (ALP), the armed local security program associated with VSO and established by President Karzai, has expanded to more than 8,000 members. Due to the increase in ALP effectiveness, the Afghan Ministry of the Interior has authorized an ALP end strength of 30,000. ALP are empowering local commu-

nities and have proven to be a significant threat to the Taliban, denying them safe-haven, and ultimately creating the conditions for long-term stability.

As a result, the Taliban have mounted an aggressive intimidation, assassination, and disruption effort against Afghan Government officials, ALP members, and supportive populations. These attacks have largely failed to intimidate ALP forces and local communities, which continue to defend their villages effectively against insurgent attacks.

Question. Do you believe the availability of U.S. Special Operations Forces is a limiting factor in expanding these programs to a point where they can have a strategic impact in Afghanistan?

Answer. Yes, I believe that the expansion of this effort will need to rely on the application of theater Special Operations Forces and enablers. To assist in the responsible growth of these programs, ISAF has integrated specially trained conventional forces into the SOF-led VSO program, mainly to augment security requirements. These combined teams are producing strategic changes, and additional Special Operations Force structure will demonstrably expand this effect across the country. The approved expansion to 30,000 ALP patrolmen will likely strain the capacity of the coalition Special Operations Forces in Afghanistan and may require additional conventional forces to partner with SOF in order to support projected ALP growth adequately.

Question. How do indirect approaches like the Village Stability Operations and Afghan Local Police Programs complement direct action counterterrorism missions within the U.S. strategy in Afghanistan?

Answer. The U.S. National and Military strategies are based on direct and indirect approaches. Indirect SOF missions are part of what the Department now calls foundational activities. Village Stability Operations and the Afghan Local Police are part of that indirect approach and are critical to the success of General Allen's population-centric campaign strategy in key rural areas across Afghanistan. Counterterrorism efforts complement these rural efforts by shaping and managing the security environment where these indirect approaches are pursued. One is no less or more important than the other; they are distinct yet complementary efforts that work in tandem to achieve near-term and enduring stability.

Question. On an annual basis, DOD spends approximately \$500 million building the capacity of the Afghanistan Government to counter the illegal narcotics trade. Despite this sizeable annual investment, according to the United Nations Office of Drugs and Crime (UNODC), Afghanistan remains the "wellspring of the global opium trade, accounting for 93 percent of all opium poppy cultivation." UNODC has also found that about 80 percent of the drugs derived from Afghan opium poppies are smuggled out by transnational organized criminal groups through the Islamic Republic of Iran and Pakistan; the rest flows through Central Asia.

What is your assessment of DOD's counternarcotics program in Afghanistan?

Answer. I understand that DOD supports counternarcotics efforts in Afghanistan by building Afghan capacity and working with U.S. law enforcement agencies such as DEA, CBP, FBI, and ICE to interdict narcotics trafficking. Although DOD supports Afghan eradication efforts, the Department of State has the lead for that effort. This year the interdiction of opiates and precursor chemicals in Afghanistan has increased. Afghan Counternarcotics Police vetted units, mentored by DEA, are now capable of conducting drug interdiction operations and have been actively involved in combined operations with DEA and military forces. DOD has also been building the capacity of the Afghan border management efforts to stop drugs from leaving Afghanistan and precursor chemicals from entering the country.

Question. How would you improve DOD's counternarcotics efforts in Afghanistan?

Answer. I believe that there have been considerable improvements this year in military and law enforcement coordination. Military commanders in Afghanistan are now requesting support from DEA and Afghanistan's Counternarcotics Police. Although there has been improvement there are probably other improvements that could be made; if confirmed, I will look into this.

PAKISTAN

Question. The relationship between the United States and Pakistan has often been described as tumultuous. Reports indicate Pakistan has expelled U.S. special operations personnel who were deployed there to train the Frontier Corps and other Pakistani security forces to fight al Qaeda, the Taliban, and other associated groups.

How important in your assessment is the U.S.-Pakistan military-to-military relationship to the success of our overall counterterrorism strategy?

Answer. The National Strategy for Counterterrorism is clear in stating that the United States will only achieve the strategic defeat of al Qaeda through a sustained

partnership with Pakistan. In my view, the military-to-military relationship is an important part of this partnership as it facilitates the indirect approach of working through and with our Pakistan Military (PAKMIL) partners to achieve mutually beneficial counterterrorism goals. U.S. military assistance to Pakistan has helped the PAKMIL achieve success in its counterinsurgency efforts. Despite recent setbacks in this relationship, it is important that we continue to engage our PAKMIL counterparts to reestablish and rebuild the relationship and continue achieving these successes.

Question. Do you believe the current difficulties, including the reductions in U.S. trainers, are temporary or lasting?

Answer. The recent ouster of Special Operations Command (Forward)-Pakistan trainers was a significant setback in the overall military-to-military relationship in Pakistan. However, I do not believe that this event is indicative of the relationships that U.S. and Pakistan military leaders have established at the unit levels. I understand these relationships are strong, and I believe we should be making every attempt to ensure that our tactical and operational level leaders are able to maintain these ties however possible. In terms of disagreements at the more senior levels, I believe that these can be mended, but it will require persistent, patient engagement. It may require reducing expectations of the military-to-military relationship in the short term, but I do believe that over time the two countries can return to more robust levels of military cooperation.

IRAQ

Question. What are the main “lessons learned” from Operation Iraqi Freedom and Operation New Dawn as they pertain to Special Operations Forces?

Answer. I believe that the U.S. has learned many lessons through current operations. Some of these lessons include: the need to maximize combined operations with partner forces, the necessity of culturally attuned forces, the need for a unified U.S. Government approach, and the need for active and integrated interagency coordination.

Question. What is your assessment of the security situation in Iraq?

Answer. Although Iraq today is closer to being a stable and secure country, I remain mindful of the challenges. The Iraqis are taking critical steps to resolve ongoing political issues, but internal divisions remain. These issues must be addressed to avoid potential conflicts.

The push for influence by Iran, and the activities of Iranian-backed militias that have attacked U.S. forces and the Iraqi people, are other issues that Iraq will still need to face. Unlike Iran, the United States is working to build a safer and stronger Iraq, and it is that shared interest that gives me confidence that the United States can build an enduring partnership with the Iraqi Government. I am also mindful of al Qaeda’s role in Iraq.

Regardless of DOD’s post-2011 role, its civilian mission should be focused on helping Iraqis address their issues through a robust and representative Iraqi political process, which is the best safeguard against a return to violence.

Question. What is your assessment of the capability of the Iraqi security forces? Do you assess that they are capable of conducting independent operations throughout the country?

Answer. Iraq no longer needs large numbers of U.S. forces to maintain internal stability. U.S. commanders in the field believe that the Iraqi Security Forces are competent at conducting counter-insurgency operations, but that the Iraqis will have gaps in their ability to defend against external threats and in areas such as integrated air defense, intelligence sharing, and logistics.

Question. Do you believe an enduring military-to-military relationship with Iraq is important to the long-term stability of Iraq?

Answer. Yes. The United States wants a normal, productive relationship and close strategic partnership with a sovereign Iraqi Government going forward—similar to the partnerships we have with other countries in the region and around the world.

Question. What do you believe to be the threat of al Qaeda to security and stability in Iraq?

Answer. Iraq’s security and political situation is improving after years of instability that enabled groups such as al Qaeda in Iraq (AQI) to spread chaos and sectarian conflict. AQI continues to be the main focus of counterterrorism efforts in Iraq, as it poses a threat not only to stability but to remaining U.S. military forces and civilians. Iraqi-led counterterrorism operations have dismantled AQI’s previous senior leadership, but new AQI leaders have assumed control and the group continues to conduct high-profile attacks. DOD will continue to watch for AQI attempts

to reinvigorate its efforts and draw on a still-significant network of associates that spans the region and includes associates in the United States.

YEMEN

Question. Prior to the current political crisis in Yemen, the U.S. Government had a robust security assistance program to help the Yemeni security forces take action against al Qaeda. Some observers, while supportive of U.S. security assistance to Yemen, have suggested that the problems being confronted by the Government of Yemen cannot simply be addressed with the provision of additional security assistance.

What is your assessment of the security situation in Yemen?

Answer. The security situation remains tense. Al Qaeda in the Arabian Peninsula (AQAP) has taken advantage of the instability in Yemen, and operates with greater impunity in the most unstable areas while attempting to seize and control territory in the south.

The Yemeni Government has recently made some gains against AQAP in the south, driving most of the group out of Zinjibar and removing several key leaders from the battlefield. However, the larger political instability in Yemen will not be resolved until President Saleh agrees to a political transition plan, which he has thus far been unwilling to do.

Question. What criteria would you use in determining whether security assistance activities in Yemen should resume?

Answer. I understand the United States is currently providing some modest, non-lethal assistance to Yemeni forces, but DOD is also assessing how the United States could resume more robust security assistance. This will require greater political stability, which will probably require President Saleh to leave power. The United States will also need to see an improved security situation that allows U.S. personnel to work safely with Yemeni forces. It will be important to ensure any partner units have not committed human rights abuses or been involved in suppressing the political opposition over these past months. Finally, it will be necessary to assess Yemeni willingness to employ partner units against AQAP and focus support on those units that are most receptive to U.S. assistance and most likely to be used against our common adversary.

Question. Given the current limitations on lethal security assistance to the Yemeni counterterrorism forces, what is your assessment of the U.S. strategy to counter al Qaeda in the Arabian Peninsula?

Answer. Although resuming capacity building is critical to long-term efforts against AQAP, the U.S. strategy goes beyond capacity building. I believe a number of important gains against AQAP have been made over the past year. DOD continues to collaborate extensively with Yemeni forces on operational matters. The United States is closely monitoring AQAP and regularly improving understanding of its external attack plots. Efforts to counter AQAP's narrative have also helped delegitimize the group and discourage its efforts to recruit new operatives. The U.S. Government's work on countering threat financing has made it more difficult for AQAP to receive funds and to support other parts of al Qaeda. Finally, the past year has seen several key leaders removed from the battlefield, including Anwar al-Aulaqi.

SOMALIA

Question. In your view, what should be the U.S. policy towards Somalia and what do you believe to be the appropriate role of the DOD in support of that policy?

Answer. U.S. policies toward Somalia should support the Somali Transitional Federal Government's and the African Union Mission to Somalia's abilities to deliver security and basic services and lay the foundation for a stable, functioning government. That is what the United States wants to see for the people of Somalia.

However, Somalia's decades-long lack of governance and sparse population make it appealing as a safe haven for al Qaeda. As al Qaeda undergoes leadership changes and responds to counterterrorism operations in Pakistan, the need to ensure that it does not relocate its center of operations to Somalia is critical.

I understand that DOD's primary mission in the Horn of Africa is to build partner-nation capacity in order to promote regional security and stability, prevent conflict, and protect U.S. interests. I believe this mission is appropriate. I am informed that U.S. Africa Command is undertaking a review of East Africa to determine how military efforts in the region work in concert with DOD's interagency partners to achieve collective regional goals and counter al Qaeda's linkages to elements of al Shabaab. DOD's ultimate goal should be a fully integrated strategy under which security assistance, capacity building, operational collaboration with regional partners,

and counterterrorism actions which are synchronized to provide the regional security and stability that are in the interest of both the United States and our regional partners.

If confirmed, I would work to ensure our strategy is developed as part of a coordinated U.S. national security policy towards the Horn of Africa, and to determine how DOD can and should best support this policy.

TERRORISM THREATS IN AFRICA

Question. Over the course of the last decade, al Qaeda-inspired and affiliated groups in Africa have gained strength, leading some to express concern about their intent and ability to strike the interests of the U.S. and partner nations.

What is your understanding of U.S. policy with regard to countering the threats posed by these groups?

Answer. In East Africa the U.S. strategy is focused on dismantling al Qaeda elements while building the capacity of countries and local administrations to serve as countervailing forces to the supporters of al Qaeda and the purveyors of instability that enable the transnational terrorist threat to persist.

Al Qaeda elements in East Africa continue to be a primary focus of the United States in light of clear indications of their ongoing intent to conduct attacks against U.S. facilities and interests abroad. Al Qaeda's presence within al Shabaab is increasingly leading that group to pose a regional threat with growing trans-regional ties to other al Qaeda affiliates.

U.S. efforts against al Qaeda in the Islamic Maghreb (AQIM) are closely integrated with the broader U.S. regional strategy, especially since the long-term eradication of AQIM will not be addressed by traditional counterterrorism tools alone. As appropriate, the United States will use its counterterrorism tools, weighing the costs and benefits of its approach in the context of regional dynamics and perceptions and the actions, will, and capabilities of its partners in the region—local governments and European allies. I understand that the United States will seek to bolster efforts for regional cooperation against AQIM, especially among Algeria, Mauritania, Mali, and Niger as an essential element of our strategy. The United States should also continue to work with our interagency and international partners on mitigating threats from emergent groups such as Boko Haram in Nigeria.

Question. Do you believe DOD's assets and other resources allocated to countering terrorist threats in Africa are adequate to understand and respond to the threats posed by these groups?

Answer. A significant portion of the U.S. counterterrorism effort is focused on the Middle East and Afghanistan/Pakistan regions and CENTCOM has received the majority of DOD's operational and intelligence assets. To address terrorist threats in Africa, I understand we have executed an economy of effort. As our Nation's activities in the CENTCOM region change, additional assets may be available to address U.S. Africa Command's (AFRICOM) needs. Our Special Operations Forces will undoubtedly be an integral part of future engagements in Africa and will support partner nations in their response to terrorist networks working on the continent.

COLOMBIA

Question. For more than a decade, Colombian security forces have worked in partnership with U.S. Special Operations Forces to counter security threats. This partnership has helped to enable the Colombians to significantly degrade the terrorist organization known as the FARC.

What do you believe are the primary lessons learned from U.S. Special Operations Forces training and advising activities in Colombia?

Answer. In Colombia, the U.S. military learned the value of playing a supporting role, seeking to complement Colombian strategies, rather than develop competing ones. DOD's experience in Colombia also prepared us to adapt to the changing environment; to recognize and embrace opportunities when they presented themselves. DOD has learned that our partnerships must constantly evolve from the point where they start, to confront and counter threats that are also adapting and changing.

Question. Are there lessons learned that may apply to U.S. support to Mexico and Central America in their efforts to counter the threats posed by transnational criminal organizations?

Answer. Yes. Many of the U.S. Government's lessons learned from our experiences in Colombia are currently reflected in our efforts in Mexico. Transnational criminal activities, including narcotics trafficking, kidnapping for ransom, and arms smuggling, provide pathways and opportunities for criminal and terrorist organizations to move people and resources across the region. Moreover, effectively addressing

these transnational criminal threats in Colombia and Mexico is critical to addressing security throughout the region, including in Central America and along our southwest border.

REPUBLIC OF THE PHILIPPINES

Question. What is your view of the effectiveness of U.S. assistance being provided through the Joint Special Operations Task Force-Philippines to the military of the Republic of the Philippines in its fight against terrorist groups?

Answer. Though a great deal of our focus in the Philippines has been on countering terrorist groups, U.S. assistance to the Philippines has always been, and continues to be, a multi-faceted approach. The Joint Special Operations Task Force-Philippines (JSOTF-P) engages each branch of the Armed Forces of the Philippines (AFP) and Philippine National Police (PNP) using appropriate authorities to help build capacity and improve the image and professionalism of all elements of the AFP and PNP. Examples of successes range from the Department of State (DOS)-funded training to improve AFP aviation and maritime capabilities to DOD-funded procurement of precision munitions under section 1206. DOD has also conducted MISO activities and Civil Affairs projects, and has supported DOS-led diplomatic efforts. As a direct result of these combined efforts, the capability of the Philippine Security Forces has been vastly improved. The Philippine Government has become more effective in maintaining the pressure on the key terrorist groups.

STABILITY AND PEACEKEEPING OPERATIONS

Question. The office of ASD(SO/LIC) is responsible for policy and activities concerning stability operations, such as peacekeeping and humanitarian assistance.

If confirmed, what role would you play in the planning and conduct of ongoing and future stability operations? What are the major challenges in this area and how would you address them?

Answer. Stability operations are a core mission that DOD must be ready to carry out with proficiency equivalent to high-intensity combat operations. Although this represents a cultural shift for DOD, they understand that all the Military Departments must adequately train, organize, and equip forces to conduct such missions. If confirmed, I would work with the Secretary, the Chairman, and leadership of the Military Departments to ensure that DOD is preparing U.S. forces for stability operations.

Question. From 2000 to 2003, you served as the Assistant Secretary General (ASG) for Peacekeeping Operations at the United Nations (U.N.). What lessons did you learn from your experience at the U.N. that might apply to your work as the ASD(SO/LIC)?

Answer. My time at the U.N. was invaluable. Much like assuming a leadership position at DOD, working as an ASG at the U.N. meant learning how to navigate an enormous organization with a culture and a bureaucracy all its own, the pressures of competing priorities and multiple stakeholders, and managing a large staff and complex operations with finite resources. It was a challenging experience, and, if confirmed, I look forward to applying it to my new post in SO/LIC.

Question. Experience in Iraq has underscored the importance of planning and training to prepare for the conduct and support of stability operations in post-conflict situations.

In your view, what is the appropriate relationship between DOD and other departments of government in the planning and conduct of stability and support operations in a post-conflict environment?

Answer. Ideally, DOD would provide support to other departments and agencies such as the Department of State, U.S. Agency for International Development, and the Department of Justice in the planning and conduct of stability operations. But, when directed, DOD has led stability operations activities to establish civil security and control and to restore essential services, repair and protect critical infrastructure, and deliver humanitarian assistance, and then has transitioned lead responsibility to other U.S. Government agencies, foreign governments' security forces, and international governmental organizations and non-governmental organizations. If confirmed, I would ensure that DOD operates within U.S. Government and international structures for managing civil-military operations, and would seek to enable the deployment and use of civilian capabilities and resources, as directed and as appropriate.

Question. What lessons do you believe the Department has learned from the experience of planning and training for post-conflict operations in Iraq?

Answer. I think we need to strengthen the U.S. Government's collective ability to plan and train together and be more collaborative in designing stabilization and re-

construction activities. I am aware that the Department is working with interagency partners to identify areas where they can improve planning efforts.

Question. In testimony before the House Committee on Foreign Affairs (July 29, 2009), Ambassador Susan Rice, U.S. Ambassador to the U.N., stated that the United States “is willing to consider directly contributing more military observers, military staff officers, civilian police, and other civilian personnel—including more women I should note—to U.N. peacekeeping operations.”

What is your view on whether the United States should contribute additional military personnel to both staff positions and military observers in support of U.N. peacekeeping operations?

Answer. In general, I would support additional contributions of personnel to staff officer positions, provided that they are positions that would add significant value to the mission, and that the mission is a strategic priority for the United States.

Question. What are the advantages and disadvantages of contributing additional military personnel to U.N. operations?

Answer. There are several potential advantages to contributing additional military personnel to U.N. missions: the opportunity to shape these missions from the inside; professional development opportunities for servicemembers to serve in a joint, multi-lateral environment; and the benefit of receiving real-time information and insights on emerging threats and crises from places where there might not otherwise be a U.S. presence. It also enables an increased professional interaction by U.S. servicemembers with numerous partner nations’ servicemembers, with whom we may not normally have the opportunity to serve.

The potential disadvantage of providing additional military personnel is the additional demands these assignments would impose on a U.S. military force that has seen extensive deployments in recent years and is still heavily engaged in overseas operations. I do not believe the United States will be in a position to provide significant numbers of military personnel to peacekeeping missions anytime in the foreseeable future. However, I believe the selective placement of even modest numbers of U.S. military personnel in addition to the fewer than 30 currently assigned to U.N. operations can have a significant, positive, impact on U.N. peacekeeping operations.

Question. If confirmed, would you support identifying methods through which the DOD personnel system could be more responsive to requests for personnel support from multilateral institutions like the U.N.?

Answer. If confirmed, I would support exploring ways that DOD could more quickly respond to requests for personnel support, bearing in mind applicable legal requirements and the current operational tempo of U.S. forces.

Question. DOD has provided logistics, communications, and headquarters staff to a variety of United Nations (U.N.) peacekeeping missions over the past decade.

In your view, beyond providing key personnel and observers, what support, if any, should DOD provide to multilateral peacekeeping missions?

Answer. The Department already provides support to multilateral peacekeeping missions beyond personnel and observers. For example, the combatant commands implement roughly half of all Global Peace Operations Initiative activities, and many troop contributor countries also benefit from inclusion in the regional Combatant Commands’ regional peacekeeping exercises. The Army’s Peacekeeping and Stability Operations Institute is involved in a number of efforts to improve international peacekeeping. Additional support might also be possible, but DOD will need to balance increase support for peacekeeping with other operational requirements.

Question. In 2005, the United States along with our partners in the G-8 launched the Global Peace Operations Initiative (GPOI) to train peacekeepers. This program is run by the Department of State. DOD has provided varying degrees of support since the program’s inception.

What are your views on the GPOI program?

Answer. I fully support the GPOI program. GPOI is not only a successful capacity-building program, but it is also a great example of a DOD-State Department partnership.

GPOI’s efforts are especially needed now as the demands on U.N. peacekeeping are great and missions continue to increase in scope and complexity.

Question. In your view, what is the appropriate role of the DOD in this program and, more generally, in the training of peacekeepers?

In general, peacekeeping training should be done by the military to the extent possible.

As previously mentioned, the combatant commands already implement roughly half of all GPOI activities, and include peacekeeping contributor countries in their regional peacekeeping exercises.

The State Partnership Program has also taken a role in peacekeeping training, partnering with contingents readying to deploy to U.N. peacekeeping missions.

INTERAGENCY COLLABORATION

Question. The collaboration between U.S. Special Operations Forces, general purpose forces, and other U.S. Government departments and agencies has played a significant role in the success of counterinsurgency and counterterrorism operations in recent years. However, much of this collaboration has been ad hoc in nature.

What do you believe are the most important lessons learned from the collaborative interagency efforts in Afghanistan, Iraq, and elsewhere?

Answer. Our Nation has learned many hard lessons about the importance of whole-of-government approaches in counterinsurgency and counterterrorism operations over the past several years. One of the most important lessons of our experiences in Afghanistan and Iraq is that success in counterinsurgency, counterterrorism, and post-conflict stability operations depends upon the integrated efforts of both civilian and military organizations in all phases of an operation, from planning through execution. Sustainable outcomes require civilian development and governance experts who can help build local civilian capacity. I understand that DOD supports the lead by other departments and agencies such as State, Justice, and USAID in areas such as fostering political reconciliation, building accountable institutions of government, restoring public infrastructure, and reviving economic activity, so that DOD can focus on providing a safe and secure environment and assist in building accountable armed forces. If confirmed, I will continue efforts to ensure that interagency collaboration is as robust and effective as possible.

Question. How do you believe these efforts can be improved?

Answer. I believe interagency collaboration can be improved by continuing to ensure that the U.S. military plans and trains with our civilian counterparts, and is prepared to operate effectively in all phases of conflict, including post-conflict reconstruction and stabilization. In addition, improving the interagency planning process would ensure that optimal use is made of all national instruments of statecraft, while also enhancing the ability to conduct comprehensive assessments, analyses, planning, and execution of whole-of-government operations. I understand a 3D (Development, Diplomacy, and Defense) planning group is underway as one method of reviewing and improving interagency planning and coordination efforts. Robust civilian capabilities are critical to realizing any improvements in interagency efforts and implementation of best practices for future operations.

Question. Should these informal and ad hoc arrangements be made more formal (i.e. through legislation, DOD Directives or Instructions, etc . . .) or is their ad hoc nature the reason for their success?

Answer. I note that DOD policy states that "integrated civilian and military efforts are essential to the conduct of stability operations." The same policy states that the Department shall support, collaborate with, and assist other U.S. Government departments and agencies to plan, prepare for, and conduct stability operations. Although I have not studied this issue in detail, I believe we should build on the working relationships developed as a result of experience in Afghanistan and Iraq in order to improve interagency cooperation, interoperability, and unity of effort. If confirmed, I will be open to the advice of others on this issue.

TREATMENT OF DETAINEES

Question. Section 1403 of the National Defense Authorization Act for Fiscal Year 2006 provides that no individual in the custody or under the physical control of the U.S. Government, regardless of nationality or physical location shall be subject to cruel, inhuman, or degrading treatment or punishment.

In your view, is the prohibition in the best interest of the United States? Why or why not?

Answer. Yes, this prohibition helps to ensure that individuals in the custody of U.S. forces are treated humanely consistent with the applicable U.S. laws and the laws governing armed conflicts. To treat individuals in our custody otherwise could increase the chances that U.S. servicemembers will be treated inhumanely should they be captured by enemy forces.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. Yes.

Question. Section 2441 of title 18, U.S.C., as amended by the Military Commissions Act of 2006, defines grave breaches of common Article 3 of the Geneva Conventions, including torture and cruel and inhuman treatment.

Do you believe it is consistent with effective counterinsurgency operations for U.S. forces to comply fully with the requirements of Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. If confirmed, how would you ensure that our Special Operations Forces comply with the standards in the Army Field Manual, the DOD Directive, and applicable requirements of U.S. and international law regarding detention and interrogation operations?

Answer. If confirmed, I will work to ensure that all U.S. Special Operations Forces continue to receive the necessary education and training in the standards established in the Army Field Manual, relevant DOD Directives, and other applicable requirements of U.S. and international law regarding detention and interrogation operations.

Question. What steps, if any, would you take to ensure that those foreign forces trained by our Special Operations Forces understand the necessity of complying with the Geneva Conventions when detaining and interrogating individuals?

Answer. If confirmed, I will work to ensure that our Special Operations Forces continue to stress in our training operations with foreign forces the importance of complying with the Geneva Conventions when detaining and interrogating individuals.

SPECIAL OPERATIONS PERSONNEL IN EMBASSIES

Question. SOCOM deploys personnel to work with country teams in a number of priority countries where the United States is not engaged in direct action operations, but rather trying to counter the spread of violent extremism. Their mission is to support the priorities of the ambassador and the combatant commander's theater campaign plan against terrorist networks. At times, ambassadors have expressed concern that they have not been adequately informed of activities by Special Operations Forces in their country.

Are you aware of these concerns?

Answer. Yes. However, no significant concerns have been raised in recent years that I am aware of.

Question. If confirmed, what do you intend to do to make sure the goals of special operations personnel deployed to these countries are aligned closely with those of the Ambassadors they are working with?

Please describe the value of these special operations personnel to their respective Geographic Combatant Commands and the country teams they are supporting.

Answer. The partnership among our geographic combatant commanders, ambassadors overseas, embassy country teams, and forward deployed Special Operations Forces has been strong throughout the past 10 years, even in view of the few isolated incidents where coordination could have been better. If confirmed, a priority of mine will be to continue working with Admiral McRaven, the Geographic Combatant Commanders, and State Department colleagues to strengthen these trusted partnerships further.

DOD COUNTERNARCOTICS ACTIVITIES

Question. DOD serves as the single lead agency for the detection and monitoring of aerial and maritime foreign shipments of drugs flowing toward the United States. On an annual basis, DOD's counternarcotics (CN) program expends approximately \$1.5 billion to support the Department's CN operations, including to build the capacity of Federal, State and local law enforcement agencies, and certain foreign governments, and provide intelligence support on CN-related matters and a variety of other unique enabling capabilities.

In your view, what is the appropriate role of DOD in U.S. counterdrug efforts?

Answer. In my view, DOD should continue to play an important role in U.S. counterdrug efforts in support of the National Security Strategy, the National Drug Control Strategy, and the Strategy to Combat Transnational Organized Crime. In addition to being the statutory lead agency for the detection and monitoring of drug trafficking bound for the United States, DOD provides critical counterdrug support to supporting State, local, Federal, and foreign law enforcement partners. The enemies America faces on the battlefield today are increasingly financed through non-traditional means, including through drug trafficking and other forms of organized crime. Just as DOD has long been focused on how traditional, State-funded adversaries are supported, the U.S. must use all of the tools at its disposal to attack the

sources of revenue that support the asymmetrical threat the U.S. faces today and is likely to face for the foreseeable future. Transnational organized crime contributes to global instability by undermining legitimate government institutions, fostering corruption, and distorting legitimate economic activity. DOD's efforts to build the counternarcotics capacity of partner nation security forces serve to prevent and deter broader conflicts that could require a much more costly military intervention in the future.

Question. What is your understanding and assessment of the DOD CN program?

Answer. I have not yet had the opportunity to evaluate the effectiveness of the CN program. Based on my past experience, however, I fully recognize the importance of DOD counterdrug activities, including as the statutory lead agency for aerial and maritime detection and monitoring of drugs bound for the United States, DOD's activities in support of the warfighter in Afghanistan, and other areas of national security interest such as Mexico and Colombia. I also believe that DOD CN authorities are extremely useful tools that fit well into the current construct of the ASD for SO/LIC. If confirmed, I look forward to ensuring that these activities are given their appropriate level of attention and oversight, and to ensure that they are as cost-effective as possible.

Question. What is your assessment of the ongoing efforts of the United States to reduce the amount of illegal narcotics entering into the United States?

Answer. As outlined in the National Drug Control Strategy, the counterdrug efforts of the United States and partner nations have achieved major and sustained progress against cocaine use and distribution throughout the Western Hemisphere. These efforts have had an impact on both the demand and supply side of the cocaine threat as evidenced by declining border seizures, increased street price, falling cocaine retail purity, and sharply decreased domestic cocaine consumption. DOD support, such as the establishment of Joint Interagency Task Force-South and support to Plan Colombia, has played a critical role in this whole-of-government effort by bringing unique military capabilities and expertise to enhance the capability of our law enforcement partners.

Question. In your view, what should be the role of the United States in countering the flow of narcotics to nations other than the United States?

Answer. Confronting the threat of drugs bound for the United States should continue to be a high priority, but we cannot afford to turn a blind eye to drug trafficking that is not directly bound for the United States. Drug trafficking is by far the world's most lucrative illicit activity and therefore is used as a source of revenue by terrorists, insurgents, and other threats to national security. The vast illicit proceeds of drug trafficking can also contribute to instability in affected countries, particularly in smaller, more vulnerable countries along key transit routes as we are seeing today in Central America and West Africa. The national security implications of drug trafficking necessitate our close attention—even when the drugs are not bound directly for the United States.

Question. Criminal networks are not only expanding their operations, but they are also diversifying their activities, resulting in a convergence of transnational threats that has evolved to become more complex, volatile, and destabilizing. In July 2011, the President released his Strategy to Combat Transnational Organized Crime: Addressing Converging Threats to National Security. One of the priority action areas designating in the strategy is "enhancing DOD support to U.S. law enforcement".

What is your understanding of the President's strategy to combat transnational criminal organizations?

Answer. The President's strategy declares that transnational organized crime is a threat to national and international security. It calls on the U.S. Government to build, balance, and integrate the tools of national power to combat transnational organized crime and related threats to national security. The strategy calls for integrated, whole-of-government approaches to transnational organized crime. Importantly, the President's strategy addresses drug trafficking and transnational organized crime as increasingly intertwined threats. The fact that transnational organized crime poses a national security threat beyond that of illegal narcotics and requires integrated interagency responses means that DOD must ensure that it is organized, resourced, and appropriately authorized to provide vital support to law enforcement and foreign partners against transnational organized crime. DOD is not in the lead against transnational organized crime, but it provides unique and critically important support in efforts to combat the manifestations of transnational organized crime that threaten national security.

Question. What kind of additional support, if any, would you envision DOD providing to U.S. law enforcement—either in the United States or in support of U.S. law enforcement operations abroad?

Answer. It is important that DOD's unique supporting capabilities—from military intelligence support to counter-threat finance support—be available to support U.S. law enforcement at home and abroad. If confirmed, I will examine whether additional forms of such support are needed.

Question. DOD and the Intelligence Community have determined that some terrorist organizations are beginning to rely more heavily on producing and trafficking narcotics to fund their operations.

In your view, what role, if any, should DOD have in broader U.S. Government efforts to combat the nexus between narcotics and terrorism? Should DOD be the lead agency?

Answer. DOD should continue to provide a range of support to law enforcement, the broader interagency, and foreign partner nations as part of integrated efforts to combat the narcotics-terrorism nexus. Support includes military intelligence support to law enforcement, counter threat finance support, military-to-military capability development, and operational activities against threats to the United States.

DOD should not assume the role of lead agency in combating the drug-terror nexus. In some cases, DOD might be the operational lead in actions to degrade a specific threat related to the narcotics-terrorism nexus, but, in general, the Department should focus on remaining ready to deploy our unique capabilities as part of coordinated U.S. Government approaches against this nexus. It is also important to note that the nexus is broader than just drugs and terrorism—it often manifests as a crime-terror-insurgent nexus, in which a range of illicit activities undertaken by networks of criminals merge with, or are exploited by, violent, politically-motivated groups.

COUNTER THREAT FINANCE

Question. A number of officials in DOD and the Intelligence Community have called for investing additional resources in identifying and tracking the flow of money associated with terrorist networks and illicit trafficking.

What are your views on the role of DOD in counter threat finance activities?

Answer. Terrorists, drug traffickers, and other adversaries rely heavily on legal and illegal funding sources to support their activities, which routinely work against U.S. interests. In my view, it is critical to engage all U.S. Government tools to track and halt the flow of money associated with these organizations. It is my understanding that DOD has a capability, working with its interagency counterparts in both Iraq and Afghanistan, to identify and disrupt our adversaries' finances. Although DOD is not the U.S. Government lead agency in counter-threat finance, it plays a supportive role by working with other departments and agencies, and with partner nations, to fight our adversaries' ability to use global financial networks.

Question. What do you believe is the appropriate role, if any, of SOCOM in supporting counter threat finance activities?

Answer. I believe SOCOM plays a critical role in the field of counter-threat finance, and should continue to pursue activities, as appropriate, with interagency partners in identifying and disrupting threat-finance networks. This involves synchronizing DOD counter-threat finance activities and integrating them into broader counter-network planning and operations.

Question. In your view, should DOD seek to expand its support to other U.S. Government departments and agencies conducting counter threat finance activities (such as Department of Treasury, Drug Enforcement Agency, and Federal Bureau of Investigation)?

Answer. I believe that DOD should increase its cooperation with U.S. law enforcement agencies, the Department of the Treasury, the intelligence community, and Department of State to target and degrade our adversaries' funding sources where necessary and possible. DOD Counter Threat Finance (CTF) Policy provides that DOD should work with other U.S. Government departments and agencies and with partner nations to deny and disrupt, or defeat and degrade, adversaries' ability to use global licit and illicit financial networks to affect U.S. interests negatively. Greater cooperation would yield an enhanced ability to target our adversaries' vulnerabilities using a whole-of-government approach, including interdiction, sanctions, and other law enforcement actions.

COUNTERING VIOLENT EXTREMISM

Question. Over the past few years, DOD has funded a growing number of MISOs and influence programs under the rubric of strategic communications programs. While the Department does not have any separate documentation outlining these activities, the Government Accountability Office reports that DOD "spent hundreds of millions of dollars each year" to support these operations, including initiatives

funded by the Joint Improvised Explosive Device Defeat Organization, the geographic combatant commands, and SOCOM.

What are your views on DOD's strategic communications, MISOs and other influence programs, and their integration into overall U.S. foreign policy objectives?

Answer. Operating in an information environment is a critical component of military operations. DOD's information and influence activities support military objectives established by Combatant Commanders, which in turn support the National Military Strategy. U.S. military objectives, by design, support U.S. foreign policy objectives. Recent changes to how DOD oversees, organizes, and employs Information Operations have resulted in significant improvements in the management and accountability of these activities. DOD recognizes the challenges of evaluating the effectiveness of these operations in the short-term and has placed an emphasis on better evaluating these activities.

Question. In 2005, al Qaeda leader Ayman al-Zawahiri declared that "We are in a battle, and more than half of it is taking place in the battlefield of the media." Many observers have criticized the lack of a U.S. strategy to counter radical ideologies that foment violence.

As ASD(SO/LIC), how would you seek to further DOD's strategic appreciation of the ideological basis of al Qaeda, its affiliates, and other non-state actors?

Answer. DOD's global presence means our forces often come face-to-face with radical ideologies and the violence propagated by Islamist extremists. Therefore, DOD personnel are in an ideal position to contribute to U.S. Government efforts to counter the extremist messages. DOD seeks to reduce support for al Qaeda, its affiliates, and adherents by engaging foreign local populations, countering adversarial propaganda, and developing relationships with key leaders and credible local interlocutors across the globe.

Question. In your view, how do we counter radical ideologies that foment violence?

Answer. In my view, the efforts of the U.S. Government to counter radical ideologies that foment violence must be persistent and long-term, and should be developed in a way that will shape and support collaborative regional security initiatives. DOD participates in, and often provides support to, several interagency efforts to counter violent extremism. DOD works closely with State, the Central Intelligence Agency (CIA), the National Counterterrorism Center, and others, to deconflict operations and realize efficiencies.

BUILDING PARTNER CAPACITY

Question. In the past few years, Congress has provided DOD a number of temporary authorities to provide security assistance to partner nations.

In your view, what are our strategic objectives in building the capacities of partner nations?

Answer. DOD's primary objective in building the capacity of foreign partners should continue to be to help them develop effective and legitimate security institutions that can provide for their countries' internal security, and contribute to regional and multilateral responses to threats and instability. This, in turn, mitigates the burden on U.S. forces responding to security threats outside the United States and promotes interoperability between U.S. and partner forces.

Question. In light of demands for defense budget cuts, how would you assess the trade-offs between providing funding for U.S. military forces and providing assistance to build the capacity of partner nations' security forces?

Answer. The energy and resources devoted to building partner capacity contribute directly to country, regional, and global security and better enable our partners to provide for their own security needs. Even modest military and security capabilities may prevent or help manage conflict so that the United States and its allies and partners are not called to intervene in a much larger conflagration at great cost to the United States and U.S. forces. Cooperation through security capacity-building efforts ensures a relationship and interoperability with ready partners able to participate competently in coalition or collaborative operations. Building partner capacity in like-minded partners will mean less demand on U.S. forces to lead military operations, enabling the United States instead to work with and through our partners to meet common security challenges.

Question. What is your understanding of the purpose of the section 1206 train and equip authority? What is your assessment of the implementation of the global train and equip program?

Answer. This authority has two discrete purposes outlined in law: to build a partner's national military or maritime security forces' capacity either to: (1) conduct counterterrorist operations, or (2) conduct or support stability operations where U.S. forces are participating.

I have not been involved in the implementation of section 1206, but I understand the Department has begun an in-depth assessment of the effectiveness of section 1206 programs. If confirmed, I will ensure the authority is used in keeping with the intent of the authority and that it produces the intended security outcomes. I will also look forward to sharing the results of the ongoing assessment effort with Congress, and specifically this committee. As I understand it, section 1206 to date has enthusiastic support from embassies and combatant commanders, and reflects close collaboration between the Department of State and the Pentagon.

Question. What is the relationship of the train and equip authority to other security assistance authorities, such as counternarcotics assistance, foreign military financing, and other title 22 authorities? What should be done to ensure that the global train and equip authority does not duplicate the efforts of these other assistance programs?

Answer. It is critical that duplication of effort among these activities be avoided. If confirmed, I will do everything I can to deconflict among them.

The Global Train and Equip (section 1206) authority fills two specific legal requirements: to build capacity for counterterrorism operations and stability operations where U.S. forces are a participant. Counternarcotics authorities are focused on providing DOD the ability to support U.S. or other government efforts to counter the flow of narcotics globally. If confirmed, both section 1206 and counternarcotics authorities will be under my purview, and I will monitor their implementation to ensure they continue to be used appropriately, and in keeping with their intent.

Foreign Military Financing serves broad foreign policy objectives such as improving bilateral relations, encouraging behavior in the U.S. interest, increasing access and influence, and building capacity particularly where host-nation and U.S. interests align. As I understand it, the close collaboration between DOD and the State Department on the development, selection, and approval of section 1206 program ensures we make the best use of available authorities.

COUNTERPIRACY OPERATIONS

Question. Since January 2009, the U.S. Navy has been patrolling the waters of the Gulf of Aden and off the coast of Somalia as part of the international coalition engaged in counterpiracy operations. The Office of ASD(SO/LIC) leads the Department's policy and coordination efforts relating to counterpiracy operations.

What is your understanding and assessment of the Department's ongoing counter piracy and counter piracy support operations?

Answer. I understand that U.S. naval forces participate in Combined Task Force 151, a multinational counterpiracy task force established in January 2009, and in the North Atlantic Treaty Organization's (NATO) Operation Ocean Shield. On average, there are three to four U.S. Navy ships supporting both of these task forces on a daily basis. Since 2008, DOD has provided surface combatants (including helicopters and boarding teams), replenishment ships, P-3C maritime patrol and reconnaissance aircraft, communications support, and command staff in support of counterpiracy operations.

Somali pirate operations have become more lucrative over the last 3 years, demonstrating success as a business model. Despite the expansion of the piracy enterprise, there is still an overwhelming lack of judicial capacity in the region.

The U.S. Government has focused on encouraging the use of Best Management Practices (BMPs) and Privately Contracted Armed Security Personnel (PCASP) in its outreach to industry, which DOD strongly supports. To date, ships that employ BMPs and armed security have a 100 percent success rate in countering pirate attacks, strategically diminishing the pirates' success rate.

Question. What do you believe to be the appropriate role of DOD in countering the threat posed by piracy?

Answer. I believe that DOD should continue to support the National Security Council's "Action Plan" for countering piracy off the Horn of Africa by interrupting and terminating acts of piracy. Furthermore, DOD should continue to remain engaged with the international "Contact Group on Piracy off the Coast of Somalia" on numerous initiatives related to military operations, industry outreach, public diplomacy, legal issues, and supporting the Departments of State and Treasury in their efforts to make piracy less lucrative.

Countering piracy in the region must be a shared responsibility with the maritime shipping industry—the first line of defense against pirates. The single most effective way to deter piracy is to ensure vessels follow BMPs and employ armed security personnel.

The root causes of Somali piracy lie in the poverty and instability of Somalia. I believe that the solution to piracy does not lie in committing additional naval forces.

Rather, addressing the problem depends on progress in restoring Somalia from a failed state to a functioning one.

Question. Some have argued for kinetic operations against the network of pirates that operate in Somalia. Others argue that the threat of piracy is primarily a law enforcement issue and should be dealt with by civilian agencies.

What is your assessment of these two views and what do you believe to be the most effective approach?

Answer. I have also heard about both proposals. If confirmed, I look forward to learning more about these proposals, and would weigh the implications before deciding what I believe would be the most effective approach.

CRUSH THE CELL

Question. In 2008, you published a book called “Crush the Cell: How to Defeat Terrorism without Terrorizing Ourselves.”

In your book, you state that U.S. counterterror policy should focus on “strategic terrorism” which you define as “the capability to sustain multiple conventional attacks over time, or develop and deploy a single catastrophic attack with a weapon of mass destruction.”

In your view, what terrorist organizations are strategic terrorists?

Answer. I would define al Qaeda and its affiliates and adherents as a strategic terrorist organization.

Question. Do you believe the National Counterterrorism Strategy is appropriately focused on only those organizations that pose a “strategic terrorist” threat to the United States and our interests?

Answer. I believe the National Strategy for Counterterrorism is appropriately focused on the preeminent security threat to the United States—namely al Qaeda and its affiliates and adherents. The Strategy also rightly ensures we remain committed to working vigorously and effectively to counter the efforts and activities of other foreign and domestic terrorists, even as we are careful to avoid conflating them with al Qaeda into a single enemy.

Question. Your book is critical of Congress for creating the National Counterterrorism Center, Department of Homeland Security and the Office of the Director of National Intelligence following September 11. You state, “I’m convinced we could have fought this war with no budget increase, just a shifting of funds to counterterrorism and a new focus on the problem.”

Do you still hold these views today? Why or why not?

Answer. I was not in favor of creating new Federal bureaucracies after September 11. However, at this point, I would not reverse course.

In terms of budget, I have long believed that the Federal Government should find off-sets for new, higher-priority missions whenever possible.

Question. Your book includes a discussion of the effectiveness of U.S. military and intelligence personnel partnering with host nation personnel to conduct counterterrorism operations. You state, “By working closely with foreign units, we may be able to reduce human rights violations associated with these operations. But if we want to get things done, sometimes we must work in conjunction with tough organizations with spotty human rights records.”

Do you still hold these views today? Why or why not?

Answer. When I was in the Federal Government, we were restricted from working with some key agencies in the Middle East and other parts of the world. I believe this was shortsighted, as working with them exposes them to operational tactics that are both more effective and based on protecting civilians. It is still true that many foreign police and intelligence agencies do not uphold the highest standards of human rights, but I believe we should engage both to improve their record and be effective in fighting terrorists—the two goals can and should be compatible. Of course, such engagement is currently restricted by law in many circumstances, and I would take care to oversee compliance with applicable law in contemplating any such engagement.

Question. Your book expresses concern about the risk averse nature of senior commanders, bureaucratic decisionmaking, and separation of intelligence and operational functions as they relate to U.S. counterterrorism operations. To help solve these issues, you recommend that a single organization, either DOD or CIA, be assigned responsibility for “special operations” to combat terrorism. This recommendation echoes one made by the 9/11 Commission that lead responsibility for all clandestine and covert paramilitary operations be assigned to DOD.

Do you still hold these views today? Why or why not?

Answer. I wrote this 5 years ago, and much has changed. If confirmed, I will have the opportunity to evaluate our current decisionmaking process closely. I am open-minded and not sure I still hold those views.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed, to appear before this committee and other appropriate committees of Congress?

Answer. Yes, if confirmed, I will appear before this committee and other appropriate committees of Congress when called upon to do so.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the ASD(SO/LIC)?

Answer. Yes, if confirmed, I will provide this committee or members of this committee accurate and appropriate information to the best of my ability when called upon to do so.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes, if confirmed, I will provide the necessary information to this committee and other appropriate committees and their staff when asked to do so.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes, if confirmed, I will provide the committee the necessary documents when appropriate and will consult with the committee regarding the basis for any good faith delay or denial in providing documents.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR SCOTT P. BROWN

SPECIAL OPERATION FORCES

1. Senator BROWN. Ambassador Sheehan, last spring Admiral Olson testified that our Special Operations Forces (SOF) are “fraying at the edges”. The current fight’s high demand for SOF and its relatively small size has placed strain on our most elite fighting force. With the continuing budget cuts affecting all aspects of the military and with the military as a whole downsizing in troop end strength are you concerned about the future of our SOF?

Mr. SHEEHAN. If confirmed as the Assistant Secretary of Defense for Special Operations Forces and Low-Intensity Conflict (ASD(SO/LIC)), I would place the highest priority on addressing the U.S. Special Operations Command (SOCOM) commander’s concerns about the demand on the force. I would also staunchly advocate preserving programmed SOF growth to ensure SOCOM is sized to the current and future demand. This would include ensuring that SOF are resourced at a level that supports a sustainable rotation model that provides time in between deployments for reset, special skills training, professional development, and appropriate predeployment training.

2. Senator BROWN. Ambassador Sheehan, do you believe that our SOF will be able to grow at a rate of 3 to 5 percent per year that is currently projected?

Mr. SHEEHAN. Although I have not seen the details of the current SOF growth plan, my general sense is that the Department has done an excellent job improving quality while also growing the force over the past 10 years. An average growth rate of 3 to 5 percent per year sounds reasonable to me, but I know from my own experience that this will vary across the force given varying complexity of skills and functions within the special operations community. Our core principle must be not to sacrifice quality for quantity as we grow and sustain SOF; and if confirmed as ASD(SO/LIC), I will work closely with the SOCOM commander to ensure our SOF accession programs are resourced and managed accordingly.

[The nomination reference of Michael A. Sheehan follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
November 1, 2011.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Michael A. Sheehan, of New Jersey, to be an Assistant Secretary of Defense, vice Michael G. Vickers.

[The biographical sketch of Michael A. Sheehan, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF MICHAEL A. SHEEHAN

Education:

- U.S. Military Academy
 - 1973–1977 (BS, 1977)
- Georgetown University School of Foreign Service
 - 1986–1988 (MSFS, 1988)
- Army Command and General Staff College
 - (MA 1991–1992)

Employment Record:

- Terrorism Analyst, NBC News
 - 2006 to Current
- CEO and Partner, Lexington Security Group, LLC
 - 2007 to 2011
- Partner, Torch Hill Equity Partners
 - 2006 to Current
 - Private equity firm (I have been unpaid and inactive in the past year)
- Fellow, Combating Terrorism Center, West Point, NY
 - 2006 to Current
- Fellow (for counterterrorism), NYU Center for Law and Security
 - 2006 to Current
- Executive Director, Madison Policy Forum
 - 2009 to Current
- Deputy Commissioner for Counterterrorism, NYPD
 - 2003 to 2006
- Assistant Secretary General, U.N. Department of Peacekeeping Operations (In charge of logistics, budgets, and personnel for U.N. peacekeeping operations)
 - 2001 to 2003

Honors and Awards:

- Fellow: NYU Center for Law and Security (2006 to Current)
- Fellow: Combating Terrorism Center, West Point, NY (2006 to Current)
- U.S. Army Awards: Airborne (1975), Ranger (1978), Special Forces (1979), Combat Infantry Badge (for service in 1985, 1986)
- Selected/Graduated from Colombian Special Forces School, Lancero (1980)

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Michael A. Sheehan in connection with his nomination follows:]

1235

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Michael A. Sheehan.

2. **Position to which nominated:**
Assistant Secretary of Defense for Special Operations/Low-Intensity Conflict (SO/LIC) and Interdependent Capabilities.

3. **Date of nomination:**
1 November 2011.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
10 February 1955; Red Bank, NJ.

6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Sita G. Vasan.

7. **Names and ages of children:**
Alexandra Eitel Sheehan, 20.
Michael Vasan Sheehan, 8.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
Christian Brothers Academy High School (1972-1973).
U.S. Military Academy, 1973-1977 (BS, 1977).
Georgetown University School of Foreign Service, 1986-1988 (MSFS, 1988).
Army Command and General Staff College (MA 1991-1992).

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Terrorism Analyst, NBC News (2006 to Current), 30 Rockefeller Center, New York, NY.

CEO and Partner, Lexington Security Group, LLC (2007-2011), 645 Madison Ave., 16th Floor, New York, NY.

Partner, Torch Hill Equity Partners (2006 to Current), Private equity firm (I have been unpaid and inactive in the past year), 2000 Pennsylvania Avenue, NW, Suite 5100, Washington, DC.

Fellow, Combating Terrorism Center, West Point, NY, (2006 to Current), U.S. Military Academy, West Point, NY.

Fellow (for counterterrorism), NYU Center for Law and Security (2006 to Current), 139 MacDougal Street, 4th Floor, New York, NY.

Executive Director, Madison Policy Forum (2009 to current), 645 Madison Ave., New York, NY.

Deputy Commissioner for Counterterrorism, NYPD (2003 to 2006), New York City Police Department, One Police Plaza, New York, NY.

Assistant Secretary General, U.N. Dept of Peacekeeping Operations (2001–2003), In charge of logistics, budgets, and personnel for U.N. peacekeeping operations, The United Nations, One U.N. Plaza, New York, NY.

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Member, Senior Advisory Group for the Director of National Intelligence (2008–2010).

Coordinator for Counterterrorism. with the rank and status of Ambassador-at-Large. U.S. Department of State, 1998–2000, Acting 1998–1999. Confirmed 1999–2000.

Deputy Assistant Secretary, Bureau of International Organizations Affairs, Department of State (1997–1998).

Director of Global Issues (peacekeeping, counternarcotics, low intensity conflict), National Security Council (1995–1997).

Special Counselor to U.S. Permanent Representative. U.S. Mission to the United Nations (1993–1995).

Director. International Programs and Intelligence Analyst. National Security Council (1989–1993).

Lieutenant Colonel. U.S. Army Special Forces (1977–1997).

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Partner. Torch Hill Equity Partners (2006 to Current).

Periodic consultancy on international police and counterterrorism issues with the following organizations (All inactive except as noted):

Boeing

Lockheed-PAE (Active-termination in progress) UAE, Ministry of Interior

AAR Corporation

Pacific Architect and Engineers

CTC (Active-termination in progress)

NBC (Active-termination in progress)

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Special Forces Association (1980–present).

International Association of Chiefs of Police (2004–present).

Council of Foreign Relations (1997–present).

Veterans of Foreign Wars (1999–present).

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

None.

14. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

Fellow: NYU Center for Law and Security (2006 to Current).

Fellow: Combating Terrorism Center, West Point, NY (2006 to Current).

U.S. Army Awards: Airborne (1975), Ranger (1978), Special Forces (1979),

Combat Infantry Badge (for service in 1985, 1986).

Selected/Graduated from Colombian Special Forces School, Lancero (1980).

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Crush the Cell: How to Defeat Terrorism Without Terrorizing Ourselves, Michael A. Sheehan; Random House, May 2008.

Book Chapter: “Diplomacy” in *Attacking Terrorism, Elements of a Grand Strategy*, edited by Audrey Kurth Cronin and James M. Ludes, Georgetown University Press, 2004.

Conference Report: "Partners in Peacekeeping: Logistics Support Issues of the United Nations and Troop Contributing Countries," United Nations, Department of Peacekeeping Operations, 2003.

Book Chapter: "Careers in International Organizations" in the book *Careers in International Affairs*, Seventh Edition, Georgetown University Press, 2003.

Journal Article: "International Terrorism: Trends and Responses," *DePaul Business Law Journal*, Volume 12 Fall/Spring 1999/2000. Numbers 1 & 2.

Book Review: "Blue Helmets: The Strategy of U.N. Military Operations," by John F. Hillen," *Joint Force Quarterly*, National Defense University, Spring Edition, 1998.

Journal Article: "Comparative Counterinsurgency Strategies: Guatemala and El Salvador," *Conflict*, Volume 9, November 1989.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

I have given a variety of speeches, mainly in regards to my book; *Crush the Cell: How to Defeat Terrorism Without Terrorizing Ourselves*. For those speeches I have given, I primarily use note cards which I have not retained.

17. **Commitments regarding nomination, confirmation, and service:**

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes, however the Department of Defense recently determined that my receipt of compensation from the United Arab Emirates, Ministry of Interior, as part of my consulting work through Lexington Security Group, LLC, violated the Emoluments Clause (U.S. Const. Art. 1, § 9, cl. 8). This determination carries with it a monetary penalty that is deducted from my retirement pay. I am currently appealing the amount of the penalty.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to Congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

MICHAEL A. SHEEHAN.

This 16th day of November, 2011.

[The nomination of Michael A. Sheehan was reported to the Senate by Chairman Levin on December 15, 2011, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on December 17, 2011.]

[Prepared questions submitted to Mark W. Lippert by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions? If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I do not see a need for modification of any Goldwater-Nichols Act provisions at this time. The Act has served the Department and our Nation well, fostering the spirit of a joint force that has enhanced the Department's capabilities to respond to critical security demands, such as in Operation Enduring Freedom. If confirmed, I will continue to consider this issue, and I will make proposals for modifications if, and when, required.

DUTIES

Question. Department of Defense (DOD) Directive 5111.17 assigns the responsibilities, functions, relationships and authorities of the Assistant Secretary of Defense for Asian and Pacific Security Affairs (ASD(APSA)). The directive establishes ASD(APSA) as the principal advisor to the Under Secretary of Defense for Policy and the Secretary of Defense on various matters relating to the Asian and Pacific regions, their governments, and defense establishments.

What is your understanding of the duties and functions of the ASD(APSA)? Will they differ in any way from those described in DOD Directive 5111.17?

Answer. The ASD(APSA) is the principal advisor to the Under Secretary of Defense for Policy (USD(P)) and the Secretary of Defense on international security strategy and policy on issues of DOD interest that relate to the Nations and international organizations of the Asian and Pacific regions, their governments, and defense establishments and for oversight of security cooperation programs, including Foreign Military Sales, in these regions. The ASD(APSA) is also responsible for developing regional security and defense strategy and policy, as well as for overseeing the implementation and coordination with appropriate DOD officials of such policies and strategies.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. My experience on Capitol Hill, at the National Security Staff, and in the military have provided me with a unique skill set and the relationships that will allow me to be effective at managing a large issue portfolio and staff.

As the Chief of Staff to the National Security Staff, my duties often required me to work at senior levels of the U.S. Government on a number of issues related to the East and South Asia region. In this capacity, I collaborated closely with key U.S. officials (such as NSS Senior Directors and officials of various agencies) on a range of policy matters, participated in bilateral and multilateral meetings, and coordinated foreign travel conducted by the President. I also performed similar functions with respect to the Obama-Biden Transition Project. During my tenure in these positions, I was responsible for helping to manage complex organizations with large numbers of employees and/or volunteers.

As a staff member of the U.S. Senate, I held three different positions over the course of a decade, each of which required me to engage on East Asia and Pacific Rim issues. As foreign policy advisor to then-Senator Obama, I handled all of the Asia-related work for the Senator on the Foreign Relations Committee, including spearheading early efforts to combat avian flu in Asia. As a professional staff member on the State-Foreign Operations Subcommittee of the Appropriations Committee, I dealt frequently and extensively with East Asia-Pacific issues especially related to U.S. bilateral and multilateral assistance programs and associated legislation. As an aide to Senator Daschle (Democratic Policy Committee), I worked on issues such as the accession of China to the World Trade Organization.

During my time in the military, I deployed in support of Joint Task Force operations in Afghanistan. I helped to manage a number of intelligence professionals spread out over a large forward deployed area, facilitating timely intelligence support for multiple direct action operations. I was selected to lead multiple, post-operation mitigation efforts with senior Afghans and coalition military and political leaders. As a reservist at the Office of Naval Intelligence, I was selected to work on highly-specialized projects concerning a key nation in East Asia.

As for my education, I was awarded an M.A. in International Policy Studies from Stanford University. My coursework included a Stanford University-Beijing University study abroad program which focused on Mandarin language training (as well as continued Chinese language studies upon return to the United States).

RELATIONSHIPS

Question. If confirmed, what will be your relationship with:

- The Secretary of Defense
- The Deputy Secretary of Defense
- The Under Secretary of Defense for Policy
- The Under Secretary of Defense for Intelligence
- The Chairman of the Joint Chiefs of Staff
- Commander, U.S. Pacific Command
- Commander, U.S. Central Command
- Commander, U.S. Special Operations Command
- Other Combatant Commanders
- The Service Secretaries and Service Chiefs
- The Assistant Secretary of Defense for International Security Affairs
- The Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs
- The Assistant Secretary of Defense for Global Strategic Affairs
- The Assistant Secretary of Defense for SO/LIC
- Commander, U.S. Forces Korea

Answer. If confirmed, I will report to the Secretary of Defense and Deputy Secretary of Defense through the Under Secretary of Defense for Policy. I expect to develop and maintain a close working relationship with under secretaries and assistant secretaries across the Department, the General Counsel of DOD, the Secretaries of the Military Departments, the Chairman and Vice Chairman of the Joint Chiefs of Staff, the Combatant Commanders, and as appropriate, the Commander, U.S. Forces, Korea. If confirmed, I would also work closely with and coordinate with the other Assistant Secretaries of Defense within the Office of the Secretary of Defense (OSD) Policy. Examples of this coordination include working with the Assistant Secretary of Defense for International Security Affairs on the role of NATO in Afghanistan; the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict on counterterrorism, counternarcotics, and security assistance matters; the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs on humanitarian assistance and disaster relief efforts in Asia; and the Assistant Secretary of Defense for a Global Strategic Affairs to implement the Proliferation Security Initiative in the Asian and Pacific regions.

CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges that will confront the next ASD(APSAs)?

Answer. I think the administration has rightly acknowledged that Asia is increasingly critical to U.S. prosperity and security interests. This is evident from the administration's steadfast commitment to defeating al Qaeda and countering violent extremism in South and Central Asia and efforts to enhance U.S. relationships across the Asia-Pacific region. At the broadest level, I believe the most significant challenge for the entire DOD is managing a changing global security environment in an era of budget austerity. As Secretary Panetta has noted, the Department faces hard, but manageable, choices in order to maintain a globally engaged force amidst domestic fiscal constraints.

In Afghanistan, I note undeniable progress on the security front—particularly in the core goal of disrupting, dismantling, and ultimately defeating al Qaeda. U.S. forces along with Afghan and coalition partners are degrading the insurgency, building up the Afghan security forces, and continuing to transition key areas of the country to Afghan lead for security. Pakistan continues to remain a critical part of the fight against al Qaeda, and despite the many challenges in this relationship, I believe we need to continue to work closely with Pakistan to combat the extremists that threaten U.S. and regional security and stability.

In the Asia-Pacific region, I think the administration has rightly focused on the need to support key norms and principles that benefit all nations. China's military buildup continues to pose anti-access/area-denial challenges and shift the cross-Strait balance in the mainland's favor. It remains important to encourage greater transparency from China about how it will use its growing capabilities.

It is also vital to modernize and enhance U.S. regional security alliances, including efforts to enhance defense posture in the Asia-Pacific region. Finally, I think it will be essential to continue the administration's strong efforts to address the increase in non-traditional threats beyond violent extremism, such as the proliferation of nuclear and ballistic missile technologies, competition for scarce resources, and devastating natural disasters. If confirmed, I look forward to working with Congress to address these issues.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. I believe the administration has done a good job of putting in place the right strategies and plans to address the challenges facing the next ASD(APSA). These issues, and the plans associated with them, are always evolving. If confirmed, I would work closely with others in the Department, the interagency, Congress, and our international allies and partners to adapt and shape these strategies for the future. I would analyze current strategies, review the results of the recent strategy reviews, and participate in ongoing policy reviews as deemed necessary. If confirmed, I look forward to collaborating closely with the committee on the range of challenges and opportunities in the Asia-Pacific region.

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the ASD(APSA)?

Answer. Strategies for dealing with the set of challenges facing the ASD(APSA) are largely in place in DOD and in other departments and agencies within the U.S. Government, and are reflected in agreements with our allies and partners in the region. If confirmed, I see the challenge as principally one of careful, sustained execution of these strategies. However, if confirmed, I will be carefully evaluating current strategies to determine if a reordering of priorities, applicable to ASD(APSA), is in order. Overall, the key priorities are to continue to make progress against al Qaeda and its affiliates in Afghanistan and Pakistan; to broaden and deepen existing alliances, while developing our ties to new allies and partners; to work on a constructive relationship with China; to enhance the development of action-oriented regional organizations that can tackle shared challenges; and to ensure that the U.S. military is postured to protect and advance American interests in this critical region.

In Afghanistan and Pakistan, the priority will remain to disrupt, dismantle, and eventually defeat al Qaeda and affiliates, and to prevent their return to either country, while increasing the capacity of the Afghan National Security Forces and the Afghan Government so they can assume the lead for Afghanistan's security by the end of 2014. If confirmed, I will work first and foremost to ensure the U.S. military stays on track and has the guidance and tools required to succeed in these missions.

With regard to China, it is my understanding that DOD seeks a healthy, stable, reliable, and continuous military-to-military relationship with China's People's Liberation Army (PLA), in support of President Obama and the People's Republic of China (PRC) President Hu's vision for a positive, cooperative, and comprehensive bilateral relationship. Strengthening the military-to-military relationship serves a critical role in shaping China's choices, as does the continued adaptation of U.S. forces, posture, and operational concepts to ensure a stable and secure environment.

U.S. regional security alliances remain vital, and central to the larger regional strategy. If confirmed, I will make it a priority to continue to broaden and deepen the U.S. defense and security agenda with allies and partners, expanding areas of cooperation even while reinforcing traditional missions of deterrence and reassurance. Finally, if confirmed, I will work to support the Department's effort to maintain and enhance defense posture and capabilities across the Asia-Pacific region.

ENGAGEMENT POLICY

Question. One of the central pillars of our national security strategy has been military engagement as a means of building relationships around the world. Military-to-military contacts, joint combined exchange training exercises, combatant commander exercises, humanitarian assistance operations, and similar activities are used to achieve this goal.

If confirmed, would you support continued engagement activities of the U.S. military? If yes, would you advocate for expanding U.S. military-to-military engagement? If not, why not?

Answer. If confirmed, I will support continued U.S. military-to-military engagement with nations in Asia. I believe the current and emerging security environment will require robust engagement with the militaries of our allies and partners around the world, and building productive relationships with many States in which our past military-to-military engagements have been limited or absent entirely.

Question. Do you believe that these activities contribute to U.S. national security?

Answer. Yes.

STABILITY OPERATIONS

Question. Experience in Iraq has underscored the importance of planning and training to prepare for the conduct and support of stability operations in post-conflict situations.

In your view, what is the appropriate relationship between DOD and other departments of government in the planning and conduct of stability and support operations in a post-conflict environment?

Answer. DOD has played and will continue to play an important role supporting other key U.S. departments and agencies in stability and support operations post-conflict.

Question. What lessons do you believe the Department has learned from the experience of planning and training for post-conflict operations in Iraq?

Answer. Operations in Iraq demonstrate that long-term success requires a robust capacity for integrated civil-military action and substantially more resources to support the expeditionary capacity of other key departments and agencies. Long-term success will also require close cooperation between DOD and other U.S. Government departments in planning, preparing for and conducting stability and support operations, both in terms of DOD participation in whole-of-government efforts and for interagency participation in the review of military campaign and contingency planning. The U.S. military must plan and train with civilian counterparts, be prepared to operate effectively in all phases of conflict, and develop better awareness of political, cultural, and economic factors to ensure that our actions will meet our objectives.

BUILDING PARTNER CAPACITY

Question. In the past few years, Congress has provided DOD a number of temporary authorities to provide security assistance to partner nations, including the global train and equip authority (section 1206).

In your view, what are our strategic objectives in building the capacities of partner nations in the Asia and Pacific region?

Answer. The United States' primary objective in building the capacity of foreign partners should continue to be to help them develop effective and legitimate security institutions that can provide for their countries' internal security, and contribute to regional and multilateral responses to threats and instability. This, in turn, mitigates the burden on U.S. forces responding to security threats outside the United States and promotes interoperability between our forces.

Question. What is your understanding of the purpose of the section 1206 global train and equip authority?

Answer. As I understand it, this authority has two discrete purposes outlined in law: to build a partner's national military or maritime security forces' capacity either to: (1) conduct counterterrorist operations; or (2) conduct or support stability operations where U.S. forces are participating.

Question. Former Secretary of Defense Robert Gates called for an expansion of the Government's resources devoted to instruments of non-military "soft power"—civilian expertise in reconstruction, development, and governance.

In your view, what should be the role of DOD, vis-à-vis other civilian departments and agencies of the Government, in the exercise of instruments of soft power?

Answer. In my view, the Department's role should generally be to support, not lead, in the exercise of soft power.

AFGHANISTAN POLICY

Question. Do you support the counterinsurgency strategy for Afghanistan? In your view, is that the right strategy?

Answer. Yes, I support the strategy that the President has set forth, and I believe it is the right strategy. A focused counterinsurgency campaign will allow us to help the Afghans build security forces and government capacity capable of providing the security and basic services necessary to achieve a peaceful, stable Afghanistan that does not again become a safe haven for terrorists.

Question. If confirmed, are there changes you would recommend to the U.S. strategy in Afghanistan? For example, would you support an increase in counterterrorism action in Afghanistan?

Answer. I believe the U.S. strategy in Afghanistan is sound. The administration tracks metrics on progress toward its objectives in Afghanistan throughout the year, and constantly assesses and adjusts its implementation of the overall strategy. Counterterrorism is a significant part of the counterinsurgency strategy, and managing the balance of all aspects of the strategy is an ongoing process.

Question. Do you support the President's decision to withdraw the 33,000 U.S. surge forces from Afghanistan, with 10,000 troops to be withdrawn by the end of this year and the remaining 23,000 troops to return by next summer?

Answer. Yes. I support a responsible, conditions-based drawdown as called for by the President. I believe we have made the progress necessary to allow us to begin to bring home U.S. surge forces.

AFGHANISTAN TRANSITION

Question. At the NATO Summit in Lisbon last November, the participants in the International Security Assistance Force endorsed President Karzai's goal of the Afghanistan National Security Forces (ANSF) having the primary responsibility for providing security throughout Afghanistan by 2014.

Do you support the goal of transitioning responsibility for security throughout Afghanistan to the Afghan security forces by 2014?

Answer. Yes. As I understand it, the transition to Afghan security lead in the first tranche of provinces and municipalities has progressed smoothly and without any significant increase of enemy-initiated attacks in those areas. The administration's transition strategy, as adopted at the November 2010 NATO Lisbon Summit, is to complete security transition nationwide by the end of 2014.

Question. In your view, how important is it to the counterinsurgency effort in Afghanistan that the transition of primary responsibility to the Afghan security forces for providing security throughout Afghanistan be completed by 2014?

Answer. In my view, the current goal of completing transition by the end of 2014—as proposed by President Karzai and confirmed by our allies and partners at the November 2010 NATO Lisbon Summit—is important to our effort in Afghanistan. A key element of U.S. strategy is building an increasingly capable and professional Afghanistan National Security Force (ANSF) that can protect its citizens. To that end, my understanding is that the administration is focused on increasing the size, quality and performance of the ANSF to ensure the successful transition of security lead to Afghan control.

With an increasingly capable ANSF, the Afghan Government has been able to begin the process of transitioning areas to Afghan security lead—a process that began in July 2011 and will continue through 2014. As a result, about 25 percent of the Afghan population now lives in areas where the ANSF have lead security responsibility. The Afghan Government will soon announce a second set of areas to begin the transition process, and will likely include locations where approximately 50 percent of Afghans live.

Question. In your view, what are the main challenges to the success of the transition to an Afghan lead for security throughout the country by 2014?

Answer. Safe havens for insurgents in Pakistan, and Afghan capacity in the governance and development areas, remain the most challenging aspects of transition. The limited capacity of the Afghan Government to manage development programs and fill government positions at the national and subnational levels hinders the ability to assume leadership on these lines of operation. Efforts in these areas must underpin the success of the security transition in order to achieve durable stability in Afghanistan.

AFGHANISTAN NATIONAL SECURITY FORCES

Question. According to a recent DOD report, the NATO training mission has met its target end strength of 305,000 ANSF by October of this year. The Afghan Government has approved a new ANSF target end strength of 352,000 by 2012 comprised of 171,600 Afghan National Army (ANA) and 134,000 Afghan National Police (ANP).

What is your assessment of the progress in developing a professional and effective Afghanistan National Security Forces (ANSF)?

Answer. My assessment is that the ANSF, in partnership with U.S. and NATO forces, have made enormous progress in size and quality over the past 2 years and remain ahead of schedule for their growth targets this year. In addition, both the ANA and ANP have made significant gains in effectiveness and professionalism.

The establishment of the Afghan Local Police (ALP) program has also fostered greater local capability to resist insurgents. However, real challenges remain, such as stemming attrition rates.

Question. What do you see as the main challenges to building the capacity of the ANSF and, if confirmed, what recommendations, if any, would you make for addressing those challenges?

Answer. Some of the main challenges to building the capacity of the ANSF include poor literacy rates and low education levels in the Afghan population, which constrain the development of operational enablers, including logistics, aviation, medical, and communications capabilities. These capabilities will be necessary for an increasingly self-sufficient ANSF to ensure Afghanistan does not again become a safe haven for terrorists. NATO Training Mission-Afghanistan has put considerable attention on, and resources toward, the literacy challenge. Another key challenge is the development of strong and capable leaders, which will take time and experience to cultivate. If confirmed, I would work with military and civilian leaders and international partners to explore ways to bolster ANSF capabilities.

AFGHAN GOVERNANCE AND DEVELOPMENT

Question. While improving security for the Afghan people is critical, the success of the counterinsurgency strategy in Afghanistan also depends on improving the Government of Afghanistan's capacity to provide governance, better services, and economic development. Significant concerns remain over the performance of the Government of Afghanistan in meeting the needs of the Afghan people and fighting corruption.

What do you see as the role for DOD in building the capacity of the Government of Afghanistan to deliver services, provide better governance, improve economic development, and fight corruption in Afghanistan?

Answer. The role of DOD should be a supporting one. Improving governance and economic development is crucial to our strategy in Afghanistan. Although the Department of State (DOS) and the U.S. Agency for International Development (USAID) are the lead agencies within the U.S. Government on governance and development initiatives in Afghanistan, DOD contributes to this effort and cooperates closely with DOS and USAID. Coordinating DOD stabilization projects with civilian reconstruction and development efforts ensures that the military and civilian activities work together to support longer-term development objectives, as well as near-term stabilization. If confirmed, I would emphasize continued close coordination of these interconnected civilian and military efforts.

RECONCILIATION AND REINTEGRATION

Question. Under what conditions, if any, should reconciliation talks with the Taliban leadership be pursued? In your view, should negotiations be pursued with the leadership of the Haqqani network? If so, under what conditions?

Answer. The President has clearly outlined U.S. support for an Afghan-led process to pursue a political resolution to the conflict in Afghanistan. I support the Afghan Government's efforts to reconcile with groups who agree to cut ties with al Qaeda, cease violence, and accept the Afghan Constitution.

I would defer to the Department of State for further discussion of reconciliation issues.

Question. In your view, what role should Pakistan play in any reconciliation talks?

Answer. I believe Pakistan should play a constructive role in the effort to bring peace and stability to Afghanistan.

Question. What is your understanding and assessment of the current program for reintegrating insurgent fighters willing to lay down their arms? What additional steps, if any, should be taken to improve the reintegration program?

Answer. I understand that, since the Afghan Government established the Afghanistan Peace and Reintegration Program last summer, the Afghans—with international community support—have made steady progress in establishing the support structures to implement the program at the national and sub-national levels. The High Peace Council and working-level Joint Secretariat have conducted extensive outreach activities to spread awareness of this new program. There is a steady entry of reintegration candidates (now more than 2,700) into the program, and I believe the program has inspired informal reintegration as well. The international community should continue its support for program implementers and for the Afghan interagency cooperation necessary to reintegrate these former fighters in a timely way.

U.S. STRATEGIC RELATIONSHIP WITH PAKISTAN

Question. In September, then-Chairman of the Joint Chiefs of Staff Admiral Mike Mullen testified to the committee that he believed a “flawed and difficult relationship [with Pakistan] is better than no relationship at all.”

Do you agree with Admiral Mullen regarding maintaining a “flawed” relationship with Pakistan? Why or why not?

Answer. Our relationship with Pakistan is not always easy, but it is vital to our national security and to our regional interests. The core national security goal remains to disrupt, dismantle, and defeat al Qaeda and its affiliates to ensure that they do not have safe havens in Afghanistan and Pakistan, and to eliminate their capacity to threaten the United States, our allies, and interests abroad. Over the past several years, the United States has made major progress in reducing al Qaeda’s ability to conduct transnational attacks. As Secretary Panetta has said, “the United States is within reach of strategically defeating al Qaeda”. At the same time, there are serious questions about Pakistan’s ability to prevent its territory from being used as a safe haven by the Haqqani network and other militant extremists to attack coalition forces in Afghanistan. Therefore, I believe it is essential to continue working with Pakistan to eliminate these safe havens.

The U.S. military-to-military relationship with Pakistan, like our overall relationship, has seen good and bad phases. Pakistan has suffered more than 11,000 military personnel killed or wounded and more than 30,000 civilian casualties in recent years from terrorist actions, most recently in the significant attacks following the Osama bin Laden operation. Therefore, the United States has a shared interest with Pakistan in preventing terrorism. As President Obama has said, “We have killed more terrorists on Pakistani soil than anywhere else, and that could not have been done without their cooperation.”

Question. What do you believe are the United States’ key strategic interests with regard to Pakistan?

Answer. I believe the United States’ interests in the region and in Asia more broadly require a stable and constructive relationship with Pakistan. The fact that Pakistan is a nuclear state that faces internal threats from extremist organizations adds to the importance of a continued relationship with Pakistan. Preventing, if possible, a potential Pakistan-India conflict is another important strategic interest. It is in the United States’ interest for Pakistan to have a strong, civilian-led government and an open society, to live in peace and security with its neighbors, and to ensure its nuclear assets remain secure, in accordance with international standards.

If confirmed, I will continue to support DOD’s efforts in coordination with our interagency partners for a constructive and mutually beneficial relationship with Pakistan, aimed at advancing shared national security objectives.

THE HAQQANI NETWORK

Question. A number of recent deadly attacks on Afghan, U.S., and other coalition forces in Afghanistan have allegedly been linked to the Haqqani network operating from safe havens across Afghanistan’s border with Pakistan. The Pakistan intelligence agency, the Inter-Services Intelligence (ISI), appears to provide support to the Haqqani network, which then-Chairman of the Joint Chiefs of Staff Admiral Mike Mullen has called a “veritable arm” of the Pakistani ISI.

What is your understanding of the rules of engagement for U.S. troops in Afghanistan who are subjected to cross-border attacks from Haqqani or other insurgent forces on the Pakistan side of the Afghanistan-Pakistan border?

Answer. My understanding is that U.S. forces in Afghanistan are authorized to act in self-defense when they are under attack. I understand that ISAF and CENTCOM are working with the Pakistanis to improve cross-border coordination.

Question. Do you agree that it is essential, if U.S.-Pakistan relations are ever to be normalized, that Pakistan eliminate its support for the Haqqani network and denounce the cross-border attacks conducted by the Haqqanis and other insurgents against Afghan and coalition forces in Afghanistan? Why or why not?

Answer. The ability of violent extremist groups to find support and safe haven in Pakistan poses a significant threat to U.S. forces, the NATO mission, and the long-term stability of Afghanistan. Attacks against U.S. and coalition personnel are unacceptable. It is Pakistan’s responsibility to prevent attacks from its territory on others, including Afghanistan and our forces there. If Pakistan does not address these threats, the United States will have to consider a range of options, but it is best when we have Pakistan’s cooperation. Pakistan has legitimate concerns that should be understood and addressed by the Afghan Government in any process to bring about a stable and durable political solution in Afghanistan. But Pakistan also has responsibilities of its own, including taking decisive steps to ensure that the Afghan

Taliban and affiliated organizations cannot continue to conduct the insurgency from Pakistani territory. Increased action is particularly critical with groups such as the Haqqani network, who continue to maintain close ties to al Qaeda and other violent extremist organizations that pose real threats not only to the United States, but also to the people and Government of Pakistan.

Pakistani military leaders cannot pick and choose among militant groups. However, Pakistan remains a critical country in the fight against terrorists. Therefore, I believe we should continue to work closely with Pakistan to act against the extremists that threaten U.S. and Pakistani security, and pursue a stable, peaceful, and prosperous region. As Secretary Clinton stated in her testimony to the House Foreign Affairs Committee on October 20, working with our Afghan and Pakistani partners is not always easy, but these relationships are advancing U.S. national security interests, and walking away from them would undermine those interests.

Question. Would you support designating the Haqqani network as a Foreign Terrorist Organization in accordance with section 219 of the Immigration and Nationality Act, as amended? Why or why not?

Answer. I would defer to the Secretary of State regarding designation of the Haqqani network as a Foreign Terrorist Organization. It is in the interests of both Pakistan and the United States to eliminate terrorists and safe havens. As Secretary Clinton told the Pakistanis, "There will be dire consequences for Pakistan as well as Afghanistan if this threat from the terrorist networks is not contained, at the very least, because there's no way that any government in Islamabad can control these groups."

U.S. ASSISTANCE TO PAKISTAN

Question. The United States has provided significant military assistance to Pakistan, including foreign military financing and training and equipment through the Pakistan Counterinsurgency Fund (PCF) to build the capacity of the Pakistan Army and Frontier Scouts to conduct counterinsurgency operations. In addition, the United States has provided significant funds ("Coalition Support Funds") to reimburse Pakistan for the costs associated with military operations conducted by Pakistan along the Afghanistan-Pakistan border and other support provided in connection with Operation Enduring Freedom. More recently, the United States has suspended assistance to Pakistan under the PCF and Coalition Support Funds pending greater cooperation from Pakistan.

In your view, under what conditions, if any, would it be in the U.S. strategic interest to resume the provision of PCF assistance and Coalition Support Fund reimbursements to Pakistan?

Answer. In my view, the current "train-advise-equip" programs with the Pakistan military and paramilitary forces have been an important component in pursuing the objective of improving Pakistan's counterterrorism and counterinsurgency capabilities and improving cross-border coordination. Going forward, it is vital that Pakistan live up to its responsibilities, including to cooperate fully in counterterrorism matters, to expand its counterinsurgency campaign against all extremists and militant groups that have found safe haven inside Pakistan. I understand that in the wake of the Osama bin Laden raid, the administration asked Pakistan to take a number of concrete steps to demonstrate its continued commitment to a cooperative and mutually beneficial relationship. Future provision of security-related assistance will be informed by Pakistan's response to these requests. If confirmed, I will work with Congress to ensure that the support the United States provides yields the results we seek.

DETAINEE TREATMENT POLICY

Question. Do you support the policy set forth in the July 7, 2006, memorandum issued by the Deputy Secretary of Defense stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. Yes.

Question. If confirmed, will you ensure that all DOD policies promulgated and plans implemented related to intelligence interrogations, detainee debriefings, and tactical questioning comply with the Common Article 3 of the Geneva Conventions and the Army Field Manual on Interrogations?

Answer. Yes.

Question. Do you share the view that standards for detainee treatment must be based on the principle of reciprocity, that is, that we must always keep in mind the risk that the manner in which we treat our own detainees may have a direct impact on the manner in which U.S. soldiers, sailors, airmen, or marines are treated, should they be captured in future conflicts?

Answer. Yes, I believe that DOD should always maintain principled and legal standards for detainee treatment and comply fully with the law, keeping in mind that the manner in which we treat our own detainees may have a direct impact on the manner in which U.S. soldiers, sailors, airmen, or marines are treated, should they be captured in future conflicts.

FORCE POSTURE IN THE USPACOM AOR

Question. In connection with his recent trip to the U.S. Pacific Command (PACOM) area of responsibility, Secretary Panetta stated that “the United States remains committed to a robust forward presence in Asia.” Significant changes to the U.S. force posture in the region are planned over the next several years, including movement of marines from Okinawa to Guam and the relocation of U.S. forces within South Korea. There are also discussions about increasing presence in southern parts of the Asia-Pacific, including countries like Australia and Singapore, and developing more comprehensive engagement strategies with a number of other countries in the region. These initiatives will likely compete with other global commitments for increasingly constrained funding.

If confirmed, how would you propose to make the tradeoffs and tough choices necessary to manage risks that might result from a U.S. commitment to a “robust” forward presence in Asia in light of other global commitments and in the face of a shrinking DOD budget?

Answer. In keeping with Secretary Panetta’s recent statements I believe it is essential that the United States maintain an enduring military presence that provides a tangible reassurance that the United States is committed to Asia’s security, economic development, and the prosperity essential to the region’s success. It is also important to ensure that the Department maintains a fiscally responsible approach to a defense posture that maximizes U.S. resources. In many cases, it is most efficient to sustain our global posture by forward stationing a portion of our forces closer to where they will be used. Doing so maximizes the capability of our military, giving us “more for less,” and potentially offsetting the impact of necessary force structure cuts.

If confirmed, I would work with my counterparts across the Department and our Commanders in the field to assess the potential global tradeoffs, risks, and budgetary implications associated with any changes in U.S. forward presence in the Asia-Pacific.

Question. In your opinion, what should be the United States’ national security priorities in the Asia-Pacific?

Answer. As outlined in the 2010 National Security Strategy, the United States must develop a positive security agenda for the region. DOD’s priorities include protecting U.S. territory, citizens, and allies; deterring aggression and maintaining regional stability; maintaining free and open access to the maritime, air, and space domains; deterring and defeating violent extremism; and preventing the proliferation of weapons of mass destruction and their associated materials.

Question. In your view, what strategic criteria, if any, should guide the posture of U.S. military forces in that region to best address those priorities at acceptable risk?

Answer. I agree with DOD’s assessment that we should establish a more geographically distributed, operationally resilient, and politically sustainable posture in the Asia-Pacific region.

Question. What, in your view, does “robust” forward presence mean?

Answer. In my view, a “robust” forward presence connotes a powerful, capable, military presence—one that is sufficient for a wide range of contingencies and activities across the range of military operations.

I believe the Department must keep pace with changes in the Asia-Pacific security environment that pose profound challenges to international security, such as the rise of new powers, the growing influence of non-state actors, and the potential spread of weapons of mass destruction (WMD).

As such, I believe the Department should maintain an enduring military presence in the Asia-Pacific region that provides a tangible reassurance that the United States is committed to Asia’s security. To do so, as the Secretary has consistently

said, will require that U.S. posture in the region be geographically distributed, operationally resilient, and, of course, politically sustainable.

My understanding is that the Department is seeking to distribute U.S. forces geographically into Southeast Asia, Oceania, and the Indian Ocean region to address the significant security challenges we face across the entirety of the region. This will allow the United States to perform the types of missions our forces are more likely to face in the future—combating terrorism, responding to natural disasters, and strengthening regional stability. Consulting closely with U.S. allies and partners, and tailoring defense posture appropriately will allow the United States to respond more effectively to the wide range of challenges confronting the Asia-Pacific region in the 21st century.

In East Asia, a robust presence is one that continues to support our long-time alliances while also ensuring our force remains operationally resilient in response to any future challenges. The United States must ensure that our regional allies and partners are confident in the continued strength of our deterrence against the full range of potential threats.

Question. How, if at all, do the methods of forward basing, rotational forces, and agreements with allies for training and logistics activities throughout the region contribute to “robust” forward presence?

Answer. From my understanding, DOD views posture as a combination of three elements: forces, footprint, and agreements. Forces are U.S. military, capabilities, equipment, and units assigned and rotationally deployed overseas. Footprint is the term the Department uses to describe the overseas network of infrastructure, facilities, land, and propositioned equipment. Lastly, “agreements” are the series of treaties and access, transit, support, and status protection agreements and arrangements with allies and partners that set the terms of U.S. military presence within the territory of a host country, as agreed with the host government. In combination, these elements underwrite the Department’s ability to develop a robust forward presence and project military power in support of our national interests.

Some of these elements are more flexible than others, and this fact dictates the ways in which the Department can adapt its current posture to changes, including changes in the security environment, new diplomatic realities, or mounting budgetary pressure. For posture, I believe the whole is greater than the sum of its parts—not only is posture the fundamental enabler of U.S. defense activities overseas, it is also central to defining and communicating U.S. strategic interests to allies, partners, rivals, and adversaries.

Question. In your view, is the right mix of these forward presence methods necessary to achieve an affordable theater posture at acceptable levels of risk? If so, how would you propose broadly assessing each method relative to its cost and benefit?

Answer. Yes. Finding the right mix of forward stationed and rotational forces is one of the U.S.’s toughest challenges; requiring continuous review and assessment with respect to the evolving strategic environment, national interests, regional threats, opportunities, and our operational requirements to respond to crises. The right mix of presence provides the United States affordable regional posture at an acceptable level of military risk.

I believe the Department must ensure defense posture reflects the unique regional and political security dynamics by harmonizing the right combination of relationships and agreements, forward-stationed forces, rotational presence, prepositioned equipment, and basing infrastructure to enable the Department to prevent and deter conflict, prepare to defeat adversaries, and succeed in a wide range of contingencies. This will naturally include the appropriate mix of assigned and rotationally allocated forces in theater in order to meet operational requirements in the most efficient manner.

Question. How important is a forward basing strategy to the ability of PACOM to execute its day-to-day mission? Its operational contingency plans?

Answer. I believe the United States’ forward-basing strategy is critical to enable PACOM’s execution of both its day-to-day operations as well as operational contingency plans. U.S. forward presence provides unique capabilities that can be flexibly deployed, employed, and sustained in a timely manner across a wide spectrum of operations and contingencies.

Question. What do you see as the implications, if any, of the planned force posture changes in Korea, Japan, and Guam on the U.S. commitment to the Asia-Pacific region in general? How does the planned relocation of U.S. forces from Okinawa to Guam improve U.S. security in the region? How does the planned relocation of U.S. forces on the Korean Peninsula improve security?

Answer. As the administration considers posture changes in the Asia-Pacific region, my understanding is that we are seeking to build a presence that is geographi-

cally distributed, operationally resilient, and politically sustainable. As this effort evolves, I understand that our goal is to sustain the U.S. presence in Northeast Asia, while enhancing it in Southeast Asia. I believe that all of the initiatives underway support these broad objectives.

Question. What is your understanding of the plans for the possible U.S. military presence in Australia and how, in your view, will such a presence advance U.S. security interests?

Answer. It is my understanding that in November 2010, the Department established a working group with our Australian counterparts to develop options to align our respective force postures in ways that would benefit the national security of both countries. In September 2011, at the Australia-United States Ministerial Consultations (AUSMIN) meeting in San Francisco, Secretaries Clinton and Panetta discussed a number of options aimed at positioning the military forces of both nations to respond in a timely and effective way to contingencies, including humanitarian assistance and disaster relief, and to enhance their ability to train and exercise together and with regional partners. As I understand it, these options will demonstrate the strength of the U.S.-Australia alliance and the combined resolve to enhance regional stability and security.

Question. In your view, are the levels of funding, manning and military-to-military engagement in the Asia-Pacific region appropriate to the management of current and future risk to U.S. strategic interests in the region? Do you foresee a requirement to increase or to decrease those funding levels in the coming years?

Answer. If confirmed, I will work with my colleagues in DOD and our military commanders to assess the appropriate levels of funding, personnel, and military-to-military engagement necessary to meet our strategic objectives in the Asia-Pacific region.

CHINA

Question. China is viewed by some in the United States as an emerging adversary that poses a potential threat to security in the region, and by others as a constructive international partner that should be welcomed and integrated into the international economic and political community. Others yet believe we are at a crossroads somewhere between those two scenarios.

How would you characterize the current U.S. relationship with China?

Answer. As President Obama stated in January 2011, the United States seeks a positive, cooperative, and comprehensive relationship with China. I would describe the relationship as cooperative and competitive. The United States continues to pursue opportunities to engage where there is mutual benefit while discussing frankly areas where we may have differences.

Question. To what extent do you believe the policies and actions of the United States and other major regional and international actors will affect the direction in which China develops?

Answer. I believe that U.S. policies and actions can influence the direction of China's development. No country has done more to assist, facilitate, and encourage China's national development and integration into the international system than the United States. However, U.S. policy and actions, or the policies and actions of any country or group of countries for that matter, cannot alone determine China's future which, in many ways, will be based upon the choices that China's leaders make. More fundamentally, the United States can also help to shape the environment in which China makes its strategic choices, and in so doing, encourage China to "do the right thing".

Question. What do you see as the impact of current global economic challenges on stability and security in China specifically, and in the Asia-Pacific region generally?

Answer. The full impact of the global economic crisis upon China and stability in the Asia-Pacific region more broadly will continue to play out over time. But those who manage defense and security issues must be attentive to the connections between security and economic issues, and be prepared to work together with colleagues in economic and diplomatic fields, both to guard against negative outcomes and also to seek positive ways forward where they may exist.

Question. China's defense spending has had double-digit increases annually for about the past 20 years. While a certain amount of military growth is to be expected for a country experiencing the kind of economic growth that China has had over about that same period, the types of platforms and capabilities China is developing have been interpreted by some as designed to project power, limit freedom of movement by potential adversaries, and conduct military operations at increasing dis-

tances. Such developments, coupled with strident rhetoric and a lack of transparency, stoke growing concerns about China's intentions in the region.

What do you believe are the objectives of China's steady increase in defense spending and its overall military modernization program?

Answer. China appears to be building the capability to fight and win short duration, high-intensity conflicts along its periphery. Its near-term focus appears to be on preparing for potential contingencies involving Taiwan, and to deter or deny effective intervention in a cross-strait conflict. Its modernization efforts emphasize anti-access and area denial capabilities. China is also devoting increasing attention and resources to conducting operations beyond Taiwan and China's immediate periphery. Beijing's growing focus on military missions other than war includes humanitarian assistance, non-combat evacuation operations, and counterpiracy support. Lastly, China is strengthening its nuclear deterrent and enhancing its strategic strike capabilities through the modernization of its nuclear forces, and is improving other strategic capabilities, such as in space and counter-space operations and in computer network operations.

Question. How should the United States respond to this Chinese military growth and modernization?

Answer. The United States has been and should remain the pivotal military power in the Asia-Pacific region. The United States' response to China's military modernization should be flexible and supported by the continued transformation of our force posture in the Asia-Pacific region, the maintenance of our global presence and access, the modernization of our own capabilities in such areas as countering anti-access and area denial, and the strengthening of our alliances and partnerships.

Question. What do you believe are the Chinese political-military goals in the Asia-Pacific region? Globally?

Answer. Broadly, the overriding objectives of China's leaders appear to be to ensure the continued rule of the Chinese Communist Party, continue China's economic development, maintain the country's domestic political stability, defend China's national sovereignty and territorial integrity, and secure China's status as a great power. Within this context, preventing any moves by Taipei toward de jure independence is a key part of Beijing's strategy. Within each dimension there lies a mix of important challenges and opportunities for the United States that will continue to deserve priority attention.

Question. What effect is China's military growth having on other countries in the region?

Answer. In terms of regional security, China's economic growth has increased China's international profile and influence, and has enabled China's leaders to embark upon and sustain a comprehensive transformation of its military forces. The pace and scale of China's military modernization, coupled with the lack of transparency, raise many questions, both within the United States and in the region as a whole, about China's future.

Other countries in the region are closely watching the growth of China's military, and how its military acts. Although on the one hand China has recently deployed its first hospital ship, conducting good-will missions far from its shores, on the other hand, there have been worrisome incidents in disputed waters in China's neighboring seas that have caused concern in nations such as the Philippines and Vietnam. Security concerns regarding Chinese military intentions have contributed to a greater focus on regional forums, such as the Association of South Asian Nations (ASEAN), where issues may be addressed multilaterally; such security concerns have also led to stronger and more welcoming relations with the United States as a security partner of choice.

Question. How do you assess the current cross-strait relationship between China and Taiwan, and how can we help prevent miscalculation on either side?

Answer. Taiwan has made significant strides to reduce tensions in the Taiwan Strait. These initiatives should be encouraged. I believe the United States can help to prevent miscalculation on either side by continuing to abide by our longstanding policies, based on the three joint U.S.-China Communiqués and the Taiwan Relations Act, including making available to Taiwan "defense articles and services in such quantities as may be necessary to enable Taiwan to maintain a sufficient self-defense capability." Such a continued commitment by the United States will allow Taiwan to continue its outreach to the PRC without fear of coercion.

Question. How do China's efforts to establish a strategic presence in the Indian Ocean by securing and maintaining access to various seaports in South and Southeast Asian countries affect its political-military posture and influence in the region?

Answer. China looks to South and Southeast Asia as an area of strategic importance, which includes political objectives, access to resources, trade, and investment.

With regard to South and Southeast Asian sea-ports, the important question is how China intends to use its presence. The United States retains strong relationships in South and Southeast Asia and should continue to monitor China's growing presence in the region.

Question. What are your views of China's deployment of warships to counter piracy in the western Indian Ocean and how does this deployment contribute to China's ability to project power?

Answer. Generally speaking, I see China's participation in counterpiracy operations as a positive development that contributes to addressing a global security challenge and demonstrates China's ability to use its military in a positive, constructive, and responsible manner. It is more than likely that from this experience China could begin to develop capabilities that would enhance its ability to sustain a deployed force over an extended period of time.

Question. What is the role of DOD in helping to ensure that China's nuclear power industry does not contribute to the proliferation of nuclear weapons in the region?

Answer. The Obama administration has reiterated that preventing the proliferation of weapons of mass destruction and delivery systems, along with related technologies and materials, is a key goal for the United States. I believe that DOD should work in the interagency process to ensure that any proliferation concerns relating to China, including its nuclear power industry, are expressed to the Chinese Government in appropriate forums, and should similarly support the development of appropriate interagency responses in the event that China takes steps that do contribute to nuclear proliferation.

Question. Our military-to-military relations with the Chinese military can be characterized as modest at best and the Chinese approach to these relations can be accurately described as "on again, off again". Clearly, one thing that has hobbled U.S.-China military relations has been China's history of canceling or postponing military-to-military engagements in response to U.S. arm sales to Taiwan.

What is your assessment of the current state of U.S.-China military-to-military relations?

Answer. I have long supported a continuous dialogue between the armed forces of the United States and China to expand practical cooperation where our national interests converge and to discuss candidly those areas where we have disagreement. Such dialogue can be especially important during periods of friction and turbulence.

I believe we should continue to use military engagement with China as one of several means to demonstrate U.S. commitment to the security of the Asia-Pacific region, to encourage China to play a constructive role in the region, and to press China to partner with the United States and our Asian allies and partners in addressing common security challenges.

Question. Do you believe that the United States should make any changes in the quality or quantity of our military relations with China? If so, what changes and why?

Answer. I believe that military exchanges with China can be valuable, but can only truly work if China is willing to reciprocate with transparent and substantive discussions and engagements. If confirmed, I would look for ways to deepen and enhance our military-to-military relationship with China, and to encourage China to act responsibly both regionally and globally.

Question. What is your view regarding the longstanding U.S. policy of selling defense articles and services to Taiwan despite objections and criticism from China?

Answer. U.S. policy on arms sales to Taiwan is based on the 1979 Taiwan Relations Act, which provides that the United States will make available to Taiwan defense articles and services in such quantities as may be necessary to enable Taiwan to maintain a sufficient self-defense capability. The Act also states that the President and Congress shall determine the nature and quantity of such defense articles and services based solely upon their judgment of the needs of Taiwan. That policy has contributed to peace and stability in the region for more than 30 years and is consistent with the longstanding U.S. calls for peaceful resolution of the Taiwan issue in a manner acceptable to the people on both sides of the Taiwan Strait. I believe our arms sales have been carried out in a responsible manner.

Question. In your view, to what extent, if at all, should China's possible reaction to such sales be considered by the United States when making decisions about the provision of defense articles and services to Taiwan?

Answer. None. The United States should not be held hostage to any potential reaction China may have in response to arms sales to Taiwan. The Taiwan Relations Act provided that the United States will make available to Taiwan such defense articles and defense services in such quantity as may be necessary to enable Taiwan to maintain a sufficient self-defense capability.

Question. By most accounts, China has become more assertive in its claims of sovereignty in various domains, including maritime, air, and space. There are numerous examples of this assertiveness, but one in particular is China's increased aggressiveness in asserting its excessive maritime claims in the South China Sea. In one such incident, Chinese-flagged ships harassed the USNS *Impeccable*, a U.S. military ship conducting ocean surveillance in the international waters of the South China Sea. That incident underscored the nature of Chinese maritime claims and the Chinese sensitivity associated with U.S. Navy operations in these areas.

What role should the United States play in the ongoing maritime dispute in the South China Sea?

Answer. As Secretary Gates affirmed at the Shangri-La Dialogue in June of this year, and Secretary Clinton affirmed at the ASEAN Regional Forum meeting in July of this year, the United States is a Pacific nation that has a national interest in freedom of navigation, open access to Asia's maritime domain, the maintenance of peace and stability, free and open commerce, and respect for international law in the South China Sea.

I agree with the assessments of the Departments of State and Defense that the United States should not take a position on the competing territorial claims over land features in the South China Sea, and I believe all parties should resolve their disputes through peaceful means and in accordance with customary international law, without resorting to the threat or use of force. The United States should sustain its presence in the South China Sea and uphold its commitments to its allies and partners in order to maintain peace and stability in the region.

Question. How does the presence of the U.S. Navy in the South China Sea influence this maritime dispute and, in your view, would an increase in U.S. activity in that region serve to stabilize or destabilize the situation?

Answer. The U.S. Navy is a key provider of the military presence that underlies peace and stability across the globe, including in the South China Sea. Although the United States does not take a position on the territorial and maritime disputes, I believe it is essential for the U.S. Navy to maintain its presence and assert its freedom of navigation and overflight rights in the South China Sea in accordance with customary international law.

If confirmed, I will work with our military commanders to evaluate the appropriate level of naval activities in the South China Sea to maintain regional peace and stability as well as unimpeded access for lawful commerce and economic development.

Question. What should the United States do to help prevent dangerous encounters in the South China Sea?

Answer. To reduce the risk of conflict in the South China Sea, I believe the United States should use its position in several regional organizations, including the East Asia Summit, the ASEAN Regional Forum, and the ASEAN Defense Ministers Meeting Plus, to facilitate initiatives and confidence-building measures that will help claimant states reach agreement on a binding Code of Conduct in the South China Sea. Additionally, the United States should encourage all claimants to abide by international "rules of the road", such as the International Regulations for Preventing Collisions at Sea, to ensure greater operational safety and reduce the risk of dangerous incidents at sea.

Question. Cyber space has become a critical realm for civilian and military applications and, as a result, it represents a potentially substantial vulnerability. There are reports that China is aggressively pursuing cyber warfare capabilities, and would likely seek to take advantage of U.S. dependence on cyber space in the event of a potential conflict situation.

What is your understanding of China's efforts to develop and deploy cyber warfare capabilities?

Answer. It is my understanding that in 2010, numerous computer systems around the world, including those owned by the U.S. Government, were the target of intrusions, some of which appear to have originated within the PRC. These intrusions were focused on exfiltrating information. Although this alone is a serious concern, the accesses and skills required for these intrusions are similar to those necessary to conduct computer network attacks. I also understand that developing capabilities for cyber warfare is consistent with authoritative People's Liberation Army military writings. Additionally, China's 2010 Defense White Paper noted China's own concern over foreign cyber warfare efforts and highlighted the importance of cyber-security in China's national defense.

Question. If confirmed, what would you do to help ensure our military is protected in cyber space and prepared to defend against a cyber attack?

Answer. The United States, like many other nations, has been the target of innumerable malicious activities via cyber space from hackers, criminals, and unidenti-

fied entities, some of which may well be nation states. I understand that numerous steps have been taken to increase network defense and monitoring capabilities. This work continues actively today. DOD should continue to evaluate all global threats to its networks and work closely with other government agencies, industry, and the international community in order to meet those threats. If confirmed, I will work closely with the Assistant Secretary of Defense for Global Strategic Affairs, the lead for cyber policy, on these efforts.

Question. In January 2007, China used a ground-based missile to hit and destroy one of its weather satellites in an anti-satellite test creating considerable space debris and raising serious concerns in the international community. Since then, China has continued its active pursuit of missile and satellite technology.

What is your view of China's purposes for its pursuit of these capabilities?

Answer. In my view, this test was just one element of China's military modernization effort to develop and field disruptive military technologies, including those for anti-access/area-denial, as well as for nuclear, space, and cyber warfare. The United States' goal should be to promote the responsible use of space.

Question. What do you see as the long-term implications of such developments for the U.S. military, for U.S. national security, and for U.S. interests in space?

Answer. Space systems are vital to our national security and our economy. In this regard, the United States should seek ways to protect our interests in space. U.S. space policies and programs should be informed by China's space and counterspace capabilities, which have contributed to today's challenging space environment. I believe we need to enhance our deterrence and ability to operate in a degraded environment. At the same time, the United States should seek to engage China, a major space-faring nation, to promote the responsible use of space. However, our concern should not be focused on only one country, but on the range of actors that make space increasingly congested, contested, and competitive.

Question. What are your views regarding the potential weaponization of space and the international agreements to prevent space weaponization?

Answer. I support the principles outlined in the 2010 National Space Policy, including that all nations have a right to explore and use space for peaceful purposes, and that all nations should act responsibly in space to help prevent mishaps, misperceptions, and mistrust.

Space is vital to U.S. national security and that of our allies and partners. I support our longstanding national policies of affirming the right of all nations to use outer space for peaceful purposes, the right of free passage through space, and the right to protect our forces and our Nation from those that would use space for hostile purposes.

TAIWAN

Question. Much of the recent discourse regarding Taiwan has involved the state of Taiwan's defensive military capabilities and the U.S. commitment to do what is "necessary to enable Taiwan to maintain a sufficient self-defense capability" as required by the Taiwan Relations Act (TRA). In particular, much of the debate about how best to enhance Taiwan's current defensive capabilities has revolved around fighter aircraft and what air defense capabilities are most prudent and appropriate under the circumstances.

What is your view of the current state of U.S.-Taiwan security relations?

Answer. In my view, U.S.-Taiwan security relations are excellent and have never been stronger. DOD engages Taiwan at every level to ensure that it maintains its ability to deter aggression from the China.

Question. What do you believe should be the priorities for U.S. military assistance to Taiwan?

Answer. I believe our priority should be to assist Taiwan in the implementation of an innovative defense strategy to deter aggression from China. Taiwan cannot compete militarily with China; it must develop a future defense force that is capable of limiting China's ability to coerce Taiwan.

Question. What is your opinion of the TRA? Enacted 30 years ago this year, do you see any need to modify the TRA to reflect the current state of affairs in the region? If so, how?

Answer. I believe DOD has a special responsibility to monitor China's military developments and to deter aggression and conflict. The TRA has served our country and the region well and has helped guarantee peace and stability in Northeast Asia for more than 30 years. Consistent with the TRA, DOD assists in maintaining the capacity of the United States to take appropriate actions, as determined by the President and Congress in accordance with U.S. constitutional processes, in response to threats to the security or the social or economic system of the people on

Taiwan. DOD works closely with its interagency partners to make available to Taiwan defense articles and services in such quantities to enable Taiwan to maintain a sufficient self-defense capability. This is consistent with longstanding policy that has provided a basis for maintaining security and stability across the Taiwan Strait. I believe that the TRA is a good law that makes for good policy.

Question. Given the increasing military imbalance across the Taiwan Strait, do you think Taiwan is making appropriate investments in its defensive capabilities? If not, what is the best way to encourage Taiwan to invest more in its military?

Answer. My view is that Taiwan needs to increase its defense budget to 3 percent of its GDP. The under-resourcing of Taiwan's defense jeopardizes Taiwan's security and sends the wrong signal to Beijing.

I believe that the best way to encourage Taiwan to invest more in its military is to send strong and consistent messages from both the executive and legislative branches of the U.S. Government to Taiwan.

Question. What military capabilities do you believe would be most effective in improving Taiwan's self-defense capability over the next 5 to 10 years?

Answer. In my view, Taiwan needs to implement a defense strategy that includes asymmetric solutions that undermine the offensive capabilities of the PLA. This strategy requires systems that are survivable. Survivability is enhanced through the implementation and integration of measures that include mobility, redundancy, integration, camouflage, concealment, quantity, deception, decoys, hardening, and joint operations. This defense strategy would not replace traditional military approaches; however, it would ensure that in a crisis Taiwan's defenses would be more effective.

Question. Do you think the United States should sell new F-16 C/D aircraft to Taiwan?

Answer. Given the nature of the multi-dimensional threat that Taiwan faces and the need to prioritize and ensure that Taiwan has a full range of self-defense articles and services (as opposed to simply one platform), I believe that Taiwan needs multiple capabilities and methods that will provide Taiwan the means to defend itself. I believe that retrofitting Taiwan's F-16 A/B is a higher priority than assimilating new F-16 C/D airframes into Taiwan's air force. The F-16 A/B retrofit would provide Taiwan with a robust aircraft that is nearly equivalent to the F-16 C/D in its capabilities. There are a number of other weapons systems that provide important capabilities at reasonable cost and should be a higher priority than Taiwan purchases of F-16 C/Ds.

NORTH KOREA

Question. North Korea still represents one of the greatest near-term challenges to security and stability in Asia and deterring conflict on the Korean peninsula remains a top U.S. priority.

What is your assessment of the current security situation on the Korean peninsula and of the diplomatic efforts to date to persuade North Korea to comply with international mandates regarding its missile and nuclear programs?

Answer. North Korea's provocative behavior, large conventional military, proliferation activities, and pursuit of asymmetric advantages through its ballistic missile and weapons of mass destruction (WMD) programs, including uranium enrichment, present a serious threat to the United States, our allies and partners in the region, and the international community. The opaque nature of the North Korean system, coupled with an uncertain political transition, add to our concerns. The two North Korean attacks against South Korea last year provide a sober reminder that Pyongyang is willing to utilize its capabilities to undertake provocative actions. I believe the United States must work with its allies and other key partners in the region and internationally on diplomatic solutions to the range of pressing concerns we face with North Korea. Under the appropriate conditions, diplomatic engagement with North Korea is important as well. The U.S. commitment to its allies has helped preserve deterrence against North Korea, but deterrence alone will not bring issues of North Korean compliance to a close. Diplomacy too is essential for a lasting resolution to the nuclear, missile, and proliferation threats we face.

Question. What is your understanding of the threat posed to the United States and our allies by North Korea's ballistic missile and WMD capabilities, and the export of those capabilities?

Answer. North Korea's missile and WMD programs pose a direct and serious threat to our regional allies and partners and have the potential to become a direct threat to U.S. territory. The United States must continue to monitor carefully North Korea's WMD and missile development programs and related proliferation activities. If confirmed, I would ensure that DOD continues to work closely with other parts

of the U.S. Government to address these and other emerging threats, reduce our vulnerabilities and those of our allies and partners, and work cooperatively with our allies to ensure our contingency planning remains adaptive and responsive.

Question. What concerns you most about North Korea?

Answer. North Korea maintains a large, offensively-postured conventional military; it continues to develop long-range ballistic missiles; it seeks to develop nuclear weapons; and it engages in proliferation of WMD in contravention of international norms and law. What concerns me most is that this range of threats comes from a single actor who stands on the outside of the international community.

REPUBLIC OF KOREA

Question. The longstanding alliance between the United States and the Republic of Korea (ROK) has been a key pillar of security in the Asia-Pacific region. This relationship, while strong, is undergoing substantial changes in terms of command and control and force laydown over the next several years.

What is your understanding of the current status of the U.S. security relationship with South Korea?

Answer. In my view, the U.S.-ROK alliance remains one of the cornerstones of U.S. strategy in the Asia-Pacific region and is as strong and viable today as it has ever been. This was most recently reaffirmed by the Secretary during his travel and participation in the Security Consultative Meeting in Seoul on October 28, 2011. Our security relationship is based on mutual commitment to common interests, shared values, continuous dialogue, and combined planning, ensuring a comprehensive strategic alliance.

Question. If confirmed, what measures, if any, would you take to improve the U.S.-South Korean security relationship?

Answer. As I understand it, DOD and the ROK continue to work closely to realign U.S. forces on the Peninsula and to prepare for the transition of wartime operational control to the ROK by December 2015. If confirmed, I would support this continued realignment and the return of facilities that our forces no longer require. The United States is also working toward developing new command and control relationships with Korea, which will ensure that contingency plans remain appropriate to changing circumstances. Additionally, I believe it is important to ensure the U.S. and Korean publics continue to understand the enduring mutual benefits derived from this alliance, and that the United States works effectively with the ROK as it plays an increasing role in regional and global security issues commensurate with the ROK's economic status and influence. If confirmed, I would work hard to maintain close contact with my ROK counterpart and to build upon the solid foundation developed to date to improve and transform this important security relationship.

Question. What is your view regarding the timing of the transfer of wartime operational control from the United States to South Korea, now planned for December 2015, and what will you do to ensure this transition takes place by the end of 2015?

Answer. I understand that the United States and the ROK have a comprehensive way forward to transition wartime operational control by December 2015. If confirmed, I will work with my ROK counterpart to complete this process under the Strategic Alliance 2015 framework, ensuring the transition is implemented methodically and validating that the combined defense posture remains strong and seamless.

Question. How do we ensure that we continue to protect our vital regional interests, while continuing meaningful progress toward the transfer of command and control to the Republic of Korea and the relocation of U.S. forces on the Korean Peninsula?

Answer. I believe regional interests are best protected through our presence in the region, strong alliances, and further developing mechanisms that enhance our abilities to engage in the region. A good example in Korea is the Secretary's effort to formalize the Korea-U.S. Integrated Defense Dialogue, a senior-level policy consultative channel, as an umbrella framework that encompasses various defense dialogue mechanisms between the ROK and the United States to ensure high-level political oversight and synchronization of alliance objectives.

Question. Do you support expanding the number of U.S. personnel assigned to the Korean Peninsula for 2- or 3-year tours of duty and increasing the number of military and civilian personnel authorized to be accompanied by their dependents for these longer assignments?

Answer. I understand tour normalization in Korea was designed to further our commitment to support our forward-stationed forces and family members. It was to be implemented on an "as affordable" basis and not according to any specific

timeline. However, as Secretary Panetta has said, DOD is taking a hard look at everything that costs a lot of money, as this would. If confirmed, I will continue to assess thoroughly the cost of implementation and our proposed force posture to determine the best way forward.

Question. Do you believe that the security relationship with South Korea should remain focused on defense of the Korean Peninsula, or should U.S. forces stationed in Korea be available for regional or global deployments?

Answer. In accordance with the commitment to the Mutual Defense Treaty between the United States and the ROK, U.S. presence on the Korean Peninsula serves to deter potential aggressors from taking hostile actions that would threaten the peace and security of the Republic of Korea. In my view, this presence has both deterred further war on the Korean Peninsula and contributed to the stability of the Northeast Asia region. The U.S.-ROK alliance is transforming to ensure a capable and relevant forward presence for the future security environment. For U.S. forces in Korea, it is my understanding that the principles of force management decided at the 42nd Security Consultative Meeting in 2010 provide greater flexibility for regional and global deployments. As ROK military forces have served and will continue to serve with the U.S. military in places off the Peninsula (e.g., Iraq, Afghanistan, and in the Gulf of Aden), I believe the U.S.-ROK alliance will continue to serve an important role regionally and globally.

Question. What is your assessment of the security benefits of the force repositioning agreed to under the Land Partnership Plan and the Yongsan Relocation Plan and how does repositioning U.S. forces change the way they will operate on the Korean Peninsula?

Answer. The two plans work to consolidate and relocate U.S. forces from north of Seoul and from the Seoul metropolitan area to locations south of Seoul, primarily U.S. Army Garrison Humphreys and Daegu. The movement of units and facilities to areas south of the Han River improves force protection and survivability, placing the majority of personnel and equipment outside of the tactical effective range of North Korean artillery. In addition, the move to a central location outside of Seoul provides efficiencies, reduces costs, contributes to the political sustainability of our forward presence, and improves military readiness on the Korean Peninsula.

Question. Since the North Korean attacks last year—the sinking of the South Korean navy ship *Cheonan* and the artillery attack on the South Korean island—South Korea has been adamant that it will respond “firmly” to the next such provocation. A main topic during recent U.S.-ROK Security Consultative Meetings was reportedly the Joint Operational Plan for responding to future North Korean provocations.

What is your understanding of the U.S. obligations in the event of an attack on South Korea by North Korea, and under what circumstances do you believe the U.S. Armed Forces should be committed to engage North Korean forces in response to an attack on South Korea?

Answer. My understanding is that, under the Mutual Defense Treaty, when the political independence or security of South Korea or the United States are threatened by external armed attack, the United States and South Korea will consult together and develop appropriate means to deter the attack. Given the pattern and future likelihood of North Korean provocations, the two sides should continue to consult closely so that responses are effective.

Question. The February 2010 Ballistic Missile Defense Review Report established a policy and program priority for defending against near-term regional ballistic missile threats, and elaborated on the Phased Adaptive Approach (PAA) to regional missile defense, including to defend against North Korean ballistic missile threats.

Do you support the missile defense policies and priorities established in the Ballistic Missile Defense Review, including the PAA to missile defense in the Asia-Pacific region to defend against North Korean regional ballistic missile threats?

Answer. Yes, I support the missile defense policy priorities established in the Ballistic Missile Defense Review, including the implementation of PAA to regional missile defense that are tailored to the threats in each region and capabilities best suited for deployment. It is my understanding that the administration is currently developing a PAA to missile defense for the Asia-Pacific region that builds on our current missile defense efforts in the region.

Question. There has been some speculation, mainly in the South Korean press, that recent incidents in South Korea, such as allegations of assault by U.S. soldiers on Korean civilians and environmental issues associated with U.S. bases, may cause the ROK to seek to renegotiate some of the terms of the current Status of Forces Agreement (SOFA) between the United States and the Republic of Korea.

What is your opinion regarding whether or not the United States should reopen the SOFA to renegotiate any of the terms?

Answer. I believe the SOFA has served the alliance well since its inception in 1967. The U.S.-ROK SOFA is a living document that is constantly reviewed and kept current and fresh through the work of the Joint Committee, the Special Joint Committee, and some 20 subject matter subcommittees that consult frequently with their counterparts across the ROK Government. Although the SOFA has been updated twice through long, difficult negotiations in 1991 and 2001, the Joint Committee process has approved thousands of implementing arrangements that effectively address the way in which the SOFA is implemented. This process has served both countries well over the years and continues to be the best path to address SOFA-related issues.

JAPAN

Question. How would you characterize the U.S.-Japan security relationship?

Answer. The U.S.-Japan relationship is the cornerstone of security in East Asia. Japan is a valued ally and anchor of democracy and prosperity in the region. Our alliance has held fast through the turbulence of the post-Cold War, political turnover in Japan, and some contentious trade disputes, and now stands poised to become a truly global alliance. The United States and Japan are in the middle of a complicated realignment process that is part of a larger alliance transformation agenda that also includes a review of roles, missions, and capabilities to strengthen and ensure the relevance, capability, and cohesiveness of the alliance for the next several decades. The updated Common Strategic Objectives announced at the Security Consultative Committee in June 2011 highlight the alliance's ambitious agenda, which I fully support.

Question. How does Japan's relationship with its regional neighbors, mainly China, North Korea, and South Korea, influence the U.S.-Japan relationship?

Answer. I believe it is important for Japan to continue to cultivate constructive relations with all of its neighbors. By moving forward, Japan and other East Asian nations can increase their security cooperation. Working with other U.S. allies and partners in the region, Japan can increase its contribution to peace, security, and prosperity throughout Asia and globally. Japan is a valued and essential partner in the Six-Party Talks process and in other important regional security architectures.

Question. What steps, if any, do you believe Japan ought to take to become a more active partner in security activities with the United States and in the international security arena?

Answer. The security environment in Asia is changing and the United States needs a more capable alliance with Japan to deal with those challenges, including greater interoperability between our Armed Forces at the strategic, operational, and tactical levels. If confirmed, I would work to encourage Japan's increasing contributions to the alliance, both regionally and globally. I would also encourage trilateral security cooperation with the Republic of Korea and with Australia, as these kinds of activities effectively strengthen the functional capacity of the emerging regional security architecture. Cooperation and the development of complementary and mutually reinforcing capabilities should range from missile defense to increased bilateral training opportunities—in Guam, for example.

Question. What is your view of the U.S.-Japanese joint development of the Standard Missile-3, Block IIA missile defense interceptor, and of the overall program of cooperation between the United States and Japan on ballistic missile defense?

Answer. Ballistic missile defense cooperation with Japan is a success story for the alliance and has resulted in Japan's fielding of both sea- and land-based missile defense systems. Japan is one of our most important ballistic missile defense partners, and U.S.-Japan bilateral cooperation on ballistic missile defense plays an important role in supporting our common strategic objectives on defense. The SM-3 Block IIA is an important cooperative program that will result in a significant increase in ballistic missile defense capability.

Question. Currently, the 2006 Roadmap Agreement between the United States and Japan links the closure of the Futenma Marine Corps Air Station on Okinawa and the movement of U.S. marines from Okinawa to Guam to the plan to build a Futenma Replacement Facility (FRF) at Camp Schwab on Okinawa. The plan to build the FRF has run into difficulty and, as a result, the closure of Futenma and the movement of marines remain uncertain.

What is your opinion of the prospects for the successful construction of the Futenma Replacement Facility at Camp Schwab on Okinawa?

Answer. I believe that the Government of Japan (GOJ), like the U.S. Government, remains committed to the 2006 Realignment Roadmap, and although both governments have acknowledged that the Futenma Replacement Facility will not be con-

structed by 2014, as originally planned, there appears to be positive movement on the construction of a replacement facility at Camp Schwab.

Question. Is the cost-sharing arrangement between the United States and Japan to pay for the relocation of U.S. forces from Okinawa to Guam and the costs associated with the continued presence of U.S. forces in Japan equitable and appropriate? Why or why not?

Answer. I believe the cost-arrangement between the United States and Japan as outlined in the May 2006 Security Consultative Committee (SCC) document known as the Realignment Roadmap is equitable and appropriate. For relocations within Japan, the GOJ is paying the lion's share of the costs to develop new facilities. The GOJ also understood the strong desire of Okinawa residents for the relocation of Marine Corps forces from Japan to Guam to occur rapidly and recognized that this move—which it explicitly sought—would not happen without substantial investment on its part. Spending less than 1 percent of its gross domestic product on its national defense, yet desiring the continued presence of U.S. forces in close proximity, Japan could also clearly justify financial support for U.S. military construction within a U.S. territory on the grounds that it is making a direct contribution to Japanese security and to overall alliance burdensharing. This decision was not without controversy in Japan, as it is highly unusual—perhaps even unprecedented—for a host country to pay for U.S. forces to relocate out of that country. It will be important for DOD to work closely with the GOJ on the project scope, management, and other factors to minimize risks to the efforts.

Question. How, in your view, does building an unpopular new airfield on Okinawa, one that could take 7 to 10 years to finish at a cost of at least \$3.6 billion, serve to improve the U.S.-Japan relations in general and the U.S. military-Okinawa relations in particular?

Answer. It is my understanding that the relocation to the Futenma Replacement Facility will enable the closing of Marine Corps Air Station Futenma (MCAS Futenma), which is located in a very densely populated portion of Okinawa. I believe both the U.S. and Japanese Governments recognize that retaining the Marine Corps air assets on Okinawa, while moving them to a relatively isolated part of the island, is essential to the operational readiness of the Marine Corps ground units stationed there. Successive Japanese and U.S. Government officials have examined this problem, and have concluded that the vicinity of Henoko and Camp Schwab is the best place for this capability.

Question. What do you see as the implications, if any, of the planned force posture changes in Korea, Japan, and Guam on the U.S. commitment to the Asia-Pacific region in general? How does the planned relocation of U.S. forces from Okinawa to Guam improve U.S. security in the region? How does the planned relocation of U.S. forces on the Korean Peninsula improve security?

Answer. As this administration considers posture changes in the Asia-Pacific region, my understanding is that we are seeking to build a presence that is geographically distributed, operationally resilient, and politically sustainable. I understand that our goal is to sustain the U.S. presence in Northeast Asia, while enhancing it in Southeast Asia. I believe that all of the initiatives underway, including changes on the Korean Peninsula as well as Okinawa and Guam, support these broad objectives.

INDIA

Question. What is your view of the current state of the U.S.-India security relations?

Answer. In my view, a close and continuing security relationship with India will be important for security in Asia and for effectively managing Indian Ocean security in the 21st century. The United States and India have a range of common security interests that include maritime security, counterterrorism, and humanitarian assistance and disaster relief. Over the past decade, there has been a rapid transformation in the U.S.-India defense relationship. What was once a nascent relationship between unfamiliar nations has now evolved into a strategic partnership between two of the preeminent security powers in Asia. Today, U.S.-India defense ties are strong and growing. Our defense relationship involves a robust slate of dialogues, military exercises, defense trade, personnel exchanges, and armaments cooperation. Efforts over the past 10 years have focused on relationship-building and establishing the foundation for a long-term partnership. The strong ties between our two militaries reflect this. It is also my understanding that the United States remains committed to a broad defense trade relationship that enables transfers of some of our most advanced technologies.

Question. If confirmed, what specific priorities would you establish for this relationship?

Answer. If confirmed, I believe our priorities for this relationship should be focused on increasing maritime security cooperation, expanding the military-to-military relationship, and deepening cooperation on defense trade and production. Additionally, I believe there is potential for cooperating on counterproliferation, collaborating on humanitarian assistance and disaster response, dealing with piracy, cooperating on counterterrorism, greater intelligence sharing on common threats, and working towards stability in Afghanistan and the broader Indian Ocean region.

Question. What, in your view, is the effect on DOD interests, if any, of the civil-nuclear cooperation agreement with India?

Answer. The civil-nuclear cooperation agreement was a landmark agreement that significantly transformed the U.S.-India bilateral relationship. The agreement has also deepened the level of trust between the United States and India that will have positive effects on DOD interests and will hopefully lead to greater military-to-military cooperation and increased defense trade.

Question. What is your assessment of the relationship between India and China and how does that relationship impact the security and stability of the region?

Answer. As Asia's two largest powers, India and China collectively will have a significant impact on Asia's future security landscape. Both countries are in the process of building their respective military capabilities. It is important to engage actively with both of these Asian powers to ensure they both contribute in a positive way towards Asian stability and security. Both countries should adhere to international norms and standards in their resolution of outstanding issues.

Question. What do you believe the United States should do to assist the Indian Government in the prevention of and response to terrorist events in India?

Answer. As the world's largest democracy, I believe that India is a critical strategic partner of the United States. Both India and the United States share an interest in preventing terrorism. Counterterrorism cooperation with India is led by the Departments of State and Homeland Security, with support from DOD. If confirmed, I will work with both Departments to consider carefully all requests for counterterrorism assistance from India.

Question. What is your assessment of the current relationship between India and Pakistan?

Answer. In announcing the return to talks in early February, India and Pakistan's foreign secretaries agreed that a number of outstanding issues were on the table, including Kashmir, counterterrorism, humanitarian issues, and trade. It is good to see both nations make progress on these fronts. In early November, Pakistan's cabinet approved extending Most Favored Nation trade status to India. Subsequently, India and Pakistan's Prime Ministers met on the sidelines of the recent South Asia Association for Regional Cooperation (SAARC) summit in the Maldives, where they heralded a new chapter in their relationship. I understand there will be talks soon on nuclear and conventional confidence-building measures, which will be critically important. I am pleased that both nations continue to engage with each other, and I am hopeful that confidence-building measures are able to take root to promote a greater level of trust between the two countries.

Question. In your view, what impact has the ongoing tension between Pakistan and India had on the stability of Central and South Asia generally, and on the prospects for lasting security in Afghanistan?

Answer. India, Pakistan, and Afghanistan are linked by history, culture, language, and trade, and regional stability cannot be achieved without the cooperation of all three countries. It is critically important that Afghanistan work to build positive relationships with all of its neighbors. In my view, the strategic partnership between India and Afghanistan is a bilateral matter between these two countries. It is my understanding that both countries have made clear that their partnership is not directed at any other countries. This should not be seen as a threat to Pakistan, nor a statement that Pakistan is no longer part of the solution. I believe it is the administration's view that India and Afghanistan should be transparent with their neighbors, including Pakistan, on the content of their partnership and the activities they carry out under it. I support this position because it has the best chances for stability of Central and South Asia.

REPUBLIC OF THE PHILIPPINES

Question. What is your view of the current state of U.S.-Philippines military-to-military relations?

Answer. The Philippines is one of five treaty allies of the United States and is a committed bilateral and regional partner, especially in combating terrorism. The

alliance with the Philippines remains strong, and the Philippines remains important to the United States and to regional stability in general.

Question. What do you believe the U.S. goals should be in the Republic of the Philippines and how best can we achieve those goals?

Answer. I believe U.S. defense goals should be to deny safe haven, sanctuary, and training areas for terrorist groups; and to partner in cooperative regional maritime security programs. These goals are best achieved through U.S. Government security assistance and security cooperation programs.

Question. What is your assessment of recent U.S. military efforts in the Philippines and the effectiveness of the U.S. assistance being provided to the Philippines military in its fight against insurgent groups?

Answer. In my view, the U.S. military is working effectively with the armed forces of the Philippines to provide assistance that is consistent with Philippines constitutional restrictions on foreign forces. The Philippines armed forces continue to professionalize and reform in a manner consistent with U.S. and Philippine defense goals and objectives. They benefit from various security assistance programs, exercises, and engagement opportunities that develop capacity and capability with their military. These efforts have resulted in successful counterterrorism operations against the Abu Sayaf Group and Jemah Islamiya in the Southern Philippines. Lastly, it is my understanding that our security engagement programs have also resulted in better regional maritime security cooperation.

Question. Do you anticipate a reduced U.S. military footprint or change in mission for U.S. military forces in the Philippines in the near- to mid-term?

Answer. In my view, it is important to support the Philippines military in its operations in the south. It is my understanding that DOD is monitoring progress and plans to assess whether there needs to be an adjustment in the overall mission. If confirmed, I will work to coordinate these efforts with other departments and agencies with an eye towards a whole-of-government approach.

Question. What policy guidelines, if any, would you establish, if confirmed, to ensure that U.S. personnel do not become involved in combat or law enforcement in the Republic of the Philippines?

Answer. In my view, the established current policy guidelines are clear: the Mutual Defense Treaty and the Visiting Forces Agreement guide bilateral policy with the Republic of the Philippines. The Philippines constitution prevents foreign forces from conducting combat operations in the Philippines. Deployed U.S. forces will continue to comply with these limitations set by the Philippines Government.

INDONESIA

Question. Indonesia is a key Asian power and is the largest Muslim country in the world. Consequently, it is important to build on opportunities to improve and expand U.S. relations with Indonesia where possible. Last summer, Secretary Gates announced that DOD intended to resume working with elements of the Indonesian Special Forces, known as Kopassus. DOD engagement with Kopassus had been suspended for more than a decade because of past human rights violations by some of its members.

What is your view of the current state of military-to-military relations with Indonesia and, specifically, Kopassus?

Answer. The U.S.-Indonesian military-to-military relationship continues to improve after the end of years of restrictions. I believe the 2005 decision to waive congressional restrictions on bilateral military cooperation and the July 2010 decision by Secretary Gates to begin limited engagement with Kopassus have enhanced our ability to support Indonesia's efforts to consolidate its democratic transformation and to support its efforts to reform and professionalize the Indonesian Armed Forces (TNI).

Question. What is your understanding of the extent to which the Indonesian Government is cooperating with the United States in the war on terrorism?

Answer. If confirmed, I would consult with the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict on this question. Based on my current understanding, I believe that the Government of Indonesia has cooperated closely and effectively with the United States and our allies in combating global terrorist networks in the region, particularly against Jema'a Islamiya.

Question. Do you favor increased U.S.-Indonesian military-to-military contacts? If so, under what conditions? Why?

Answer. If confirmed, I would support increased military-to-military contacts. I believe we want Indonesia and the TNI to consider the United States as a strong and credible partner, particularly where our values and interests coincide in the critical areas of democratization and reform, bilateral and regional security coopera-

tion, and counterterrorism. Our measured and gradual program of security activities with Kopassus will continue to take into account the implementation of reforms within the TNI. All activities will be in accordance with U.S. law, which, of course, requires individual and unit human rights vetting as a prelude to receiving U.S. military training or assistance.

Question. What is your understanding of the factors that informed the decision to re-engage with Kopassus members?

Answer. My understanding is that the significant reforms across the TNI and the Indonesian defense ministers' commitment to protect human rights and advance accountability contributed to Secretary Gates' decision for DOD to begin a measured and gradual program of security cooperation activities with Kopassus.

Question. What is your view of the commitment of the Indonesian military leadership to professionalization of its armed forces, adhering to human rights standards, improving military justice, and cooperating with law enforcement efforts to investigate and prosecute those military personnel accused of human rights abuses?

Answer. The Government of Indonesia continues to make progress in military reform. Early progress toward defense reform—separation of the police from the military, eliminating formal political roles for the TNI, increasing accountability, and human rights training—has been sustained. Continued progress on the divestiture of TNI businesses would be an unmistakable indication of Indonesia's commitment to reform. The 2002 Defense Law and the 2004 TNI Law codified the roles and responsibilities of the TNI as a mechanism to support, not replace, civilian government. Continued "hard" reforms that the United States should continue to support include full accountability for past human rights abuses, strengthening civilian control, putting the TNI fully "on budget," and continued professionalization of the TNI officer corps.

Question. If confirmed, what would you do to encourage respect for human rights and accountability in the Indonesian military?

Answer. If confirmed, I would sustain efforts to encourage professionalism within the military in terms of both respect for human rights and accountability, through bilateral security discussions, joint training, military assistance, and military training programs. U.S. security assistance and security cooperation programs are the most effective channels to encourage professionalism in the Indonesian military.

HIGH ALTITUDE TRANSITION PLAN

Question. DOD, under the High Altitude Transition (HAT) Plan, intends to retire the U-2 intelligence, surveillance, and reconnaissance (ISR) fleet in the middle of this decade and replace these aircraft with the Global Hawk RQ-4. Under the HAT Plan, the RQ-4s will apparently be a PACOM-wide asset, flying missions throughout the region, whereas the U-2s have been dedicated to supporting U.S. and Korean forces on the Korean peninsula. The United States and the ROK have been considering a ROK purchase of the Global Hawk aircraft through the Foreign Military Sales (FMS) process. If this FMS case were to proceed, much but not all of the impact of U-2 retirement would be mitigated, but either way the level of airborne ISR available on a day-to-day basis in Korea may well be diminished.

In your assessment, is the possibility that the level of airborne ISR available on a day-to-day basis will be diminished a concern, or are there other means to compensate for the retirement of the U-2?

Answer. Allied ISR capabilities on the Korean Peninsula and in the region contribute significantly to our ability to defend the United States and our allies and partners, promote regional stability, and protect our collective interests. I have not had a chance to review the U-2 retirement issue in detail, but if confirmed, I will be an advocate for a strong and well-equipped U.S. forward presence on the Korean peninsula.

Question. If the sale does not go through, how would you propose that the United States sustain required levels of airborne ISR support on the Korean peninsula?

Answer. I have not had an opportunity to examine this issue in detail. If confirmed, I will research this issue and work closely with my colleagues in DOD and other relevant departments and agencies to ensure that we do not experience a reduction in ISR capabilities that would diminish our ability to execute our required missions.

COUNTERPIRACY OPERATIONS

Question. Since January 2009, the U.S. Navy has been patrolling the waters of the Gulf of Aden and off the coast of Somalia as part of the international coalition engaged in counterpiracy operations. Prior to the engagement off the coast of Soma-

lia, DOD worked with many of our Asian partners to address the threat of piracy in Southeast Asia, such as in the Strait of Malacca.

What is your understanding of the current threat of piracy in the Asia-Pacific region?

Answer. Piracy in the Asia-Pacific region has declined in recent years, largely due to committed efforts of regional littoral states. Indonesia, Singapore, and Malaysia, for example, took the initiative—with U.S. support to provide increased security to key sea lines, in particular, the Strait of Malacca. Although piracy has declined in the Strait of Malacca, there are instances of piracy in the southern parts of the South China Sea, and we should be mindful that, as long as piracy remains a lucrative business model, it will be attractive not only in the Asia-Pacific region, but around the world.

Question. What role, if any, should DOD play in countering any piracy threat in the Asia-Pacific region?

Answer. The situation off the coast of Somalia and in the western Indian Ocean demonstrates that the military cannot solve the overall problem of piracy. Military force addresses the symptoms, not the causes, of piracy. In the Asia-Pacific region, DOD should provide capacity building and training support to enhance the ability of regional states to counter piracy when such support aligns with broader U.S. objectives and interests in the region and complements the political commitment of regional countries, as was the case with Indonesia, Singapore, and Malaysia regarding piracy in the Strait of Malacca.

INTERNATIONAL PEACEKEEPING CONTRIBUTIONS

Question. In testimony before the House Committee on Foreign Affairs (July 29, 2009), Ambassador Susan Rice, U.S. Ambassador to the United Nations, stated that the United States “is willing to consider directly contributing more military observers, military staff officers, civilian police, and other civilian personnel—including more women I should note—to U.N. peacekeeping operations.”

What is your view on whether the United States should contribute more military personnel as both staff officers and military observers in support of U.N. peacekeeping operations?

What are the advantages and disadvantages of contributing additional military personnel to U.N. operations?

If confirmed, would you support identifying methods through which the DOD personnel system could be more responsive to requests for personnel support from multilateral institutions like the United Nations?

Answer. The United States has a stake in the success of U.N. peacekeeping operations. I believe that, where practicable, the United States should continue to provide military personnel for U.N. peacekeeping operations, especially for key staff positions that can help shape the direction and success of the mission. However, as with any investment, there are associated costs.

If confirmed, I will work to ensure that DOD evaluates requests for personnel support from multilateral institutions, weighing the potential positive impact of U.S. participation in the mission against other military commitments and the proposed cost of U.S. involvement.

COMBATTING TERRORISM

Question. The administration recently released its National Strategy for Counterterrorism. This strategy highlights the need to maintain pressure on al Qaeda’s core while building the capacity of partners to confront mutual threats. The strategy also underscores the need to augment efforts to counter threats from al Qaeda-linked groups “that continue to emerge from beyond its core safe haven in South Asia.”

If confirmed, what would be your role within DOD with respect to counterterrorism?

Answer. The National Strategy for Counterterrorism maintains focus on pressuring al Qaeda’s core while emphasizing the need to build foreign partnerships and capacity and to strengthen our resilience. If confirmed, I understand that my role in this effort will be to work closely with the nations in this strategically important region to build enduring partnerships and capabilities, degrade the links between al Qaeda and its affiliates and adherents, and eliminate terrorist safe havens. At the same time, I would work closely with colleagues in the U.S. interagency, as well as with our allies and partners, in order to support the counterterrorism strategy’s objective of applying a whole-of-government approach to defeating al Qaeda.

Question. What do you believe is the terrorism threat from al Qaeda and affiliated groups in the Asia-Pacific region?

Answer. There have been important recent successes in the fight against al Qaeda, most notably the successful operation against Osama bin Laden. Despite these important successes, from its base of operations in Pakistan's Federally Administered Tribal Areas, al Qaeda continues to pose a persistent and evolving threat to the United States. Despite significant losses to its command structure, al Qaeda is adapting, and uses its safe haven to continue attack-planning as well as produce propaganda, communicate guidance to affiliates and operational cells in the region and abroad, solicit logistical and financial support, and provide training and indoctrination to new operatives.

Question. Is there a nexus between terrorist groups and criminal networks in the Asia-Pacific region?

Answer. Transnational criminal activity, including narcotics trafficking and arms smuggling, provides pathways and opportunities for terrorist organizations to move people and resources across the region. Kidnapping for ransom and piracy have the potential to generate millions of dollars, some of which may end up in the hands of terrorists to fund operations, training, and recruitment.

Question. In Southeast Asia, most notably in the Philippines and Indonesia, U.S. engagement with partner nations has helped combat violent extremist ideology and activities. The integration of operations by host nation security forces with U.S. capacity building, development, and information support operations has dramatically reduced the ability of violent extremist organizations to operate.

What more can the United States do in Southeast Asia to help combat the threat of terrorism perpetrated by violent extremists?

Answer. The new National Strategy for Counterterrorism recognizes the success our partners have had in maintaining pressure on the region's most lethal terrorist organizations, while noting that the region remains potentially fertile ground for local terrorists who share al Qaeda's ideology and motivations. Going forward, the United States should continue to assist in building the security capacity of governments in the region that consistently demonstrate their commitment against al Qaeda and its affiliates and adherents.

Question. Which Southeast Asian countries are most important in the fight against terrorism in that region and what should the United States do to enhance relations with those countries?

Answer. Because of the prominent interagency aspects of building partner-nation counterterrorism capacity, especially on the law enforcement side, DOD will often serve in a supporting role. As reflected in the National Strategy for Counterterrorism, the United States has developed a robust network of bilateral counterterrorism relationships with key countries in Southeast Asia, including Indonesia, the Philippines, Singapore, Thailand, and Australia. For DOD, Indonesia and the Philippines should be the top priorities for counterterrorism capacity-building assistance in Southeast Asia, notably through section 1206 programs. Section 1206 (of the National Defense Authorization Act for Fiscal Year 2006, as amended) remains one of DOD's most effective authorities for building partner capacity to combat terrorism. DOD enjoys good relations with Indonesia and the Philippines and, in close consultation with Congress and the Department of State, should sustain and enhance these relationships through continued policy dialogues, security cooperation, and security assistance programs.

SECTION 1208 OPERATIONS

Question. Section 1208 of the Ronald Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375), as amended by subsequent legislation, authorizes the provision of support (including training, funding, and equipment) to regular forces, irregular forces, and individuals supporting or facilitating military operations by U.S. Special Operations Forces to combat terrorism.

What is your assessment of the overall effectiveness of this authority?

Answer. I understand that section 1208 authority is a key tool that combatant commanders have repeatedly confirmed as essential to combating terrorism in their areas of responsibility. It enables the special operations forces under their control to leverage willing partners that possess access to areas, people, and information that are denied to our forces, but critical to tactical and strategic success. The authority has allowed DOD to respond quickly to emergent global challenges. Section 1208 requires appropriate civilian oversight, including Secretary of Defense approval and congressional notification.

DEPARTMENT OF DEFENSE COUNTERNARCOTICS ACTIVITIES

Question. On an annual basis, DOD's counternarcotics (CN) program expends approximately \$1.5 billion to support CN operations, build the capacity of certain for-

eign governments in Asia and around the globe, and analyze intelligence on CN-related matters.

What is your understanding and assessment of the DOD CN program?

Answer. Drug trafficking and associated organized crime are multidimensional threats to the United States. In addition to the impact on our Nation's public health and economy, drug trafficking and other forms of transnational organized crime provide a funding source for terrorists and insurgents, undermine legitimate government institutions, and contribute to international instability.

I have not had an opportunity to assess the DOD CN program. If confirmed, I look forward to working with Congress, and counterparts at DOD, the Department of State, and the National Security Staff to ensure that these programs achieve measureable results in the Asia-Pacific region and that those results are clearly aligned with the goals of the National Security Strategy and the National Drug Control Strategy.

Question. What is your understanding of the illegal narcotics industry in Asia?

Answer. South and Southeast Asia have become increasingly more attractive as bases for drug trafficking organizations' production and smuggling operations. Several Asian and Pacific nations have experienced a significant increase in the production, transshipment, trafficking, and consumption of narcotics in recent years. Methamphetamine produced using diverted precursor chemicals, heroin transshipment through Asia, poppy cultivation, and potential narco-terrorist funding remain the primary drug threats to the United States from the Asia-Pacific region.

Question. What role, if any, should DOD play in countering—either directly or by, through, and with our Asian partners—the illegal narcotics industry in Asia?

Answer. I believe that the current DOD role is appropriate. DOD serves as the single lead agency for the detection and monitoring of aerial and maritime trafficking of illicit drugs flowing toward the United States. In addition, DOD plays a critical role in supporting U.S. and foreign law enforcement agencies responsible for counterdrug and drug-related activities, primarily through information-sharing and building partner-nation security capacity. In cooperation with U.S. interagency and foreign partners, DOD conducts activities to detect, disrupt, and dismantle drug-related transnational threats in Asia and the Pacific.

Question. On an annual basis, DOD spends approximately \$500 million building the capacity of the Afghanistan Government to counter the illegal narcotics trade. Despite this sizable annual investment, Afghanistan remains the “wellspring of the global opium trade, accounting for 93 percent of all opium poppy cultivation,” according to the United Nations Office of Drugs and Crime (UNODC). UNODC has also found that about 80 percent of the drugs derived from Afghan opium poppies are smuggled out by transnational organized criminal groups through the Islamic Republic of Iran and Pakistan; the rest flow through Central Asia.

What is your assessment of DOD's CN program in Afghanistan?

Answer. I understand that DOD supports CN efforts in Afghanistan by building Afghan capacity and working with U.S. law enforcement agencies such as DEA, CBP, FBI, and ICE to interdict narcotics trafficking. Although DOD supports Afghan eradication efforts, the Department of State has the lead for that effort. This year the interdiction of opiates and precursor chemicals in Afghanistan has increased. Afghan CN police-vetted units, mentored by DEA, are now capable of conducting drug interdiction operations and have been actively involved in combined operations with DEA and military forces. DOD has also been building the capacity of the Afghan border management efforts to stop drugs from leaving Afghanistan and precursor chemicals from entering the country.

Question. Do you think the DOD CN program in Afghanistan has been successful to date?

Answer. Yes. I believe that considerable improvements have been made this year with military and law enforcement coordination.

UNITED NATIONS CONVENTION ON THE LAW OF THE SEA

Question. Do you support U.S. accession to the United Nations Convention on the Law of the Sea? If so, why?

Answer. I support U.S. accession to the Law of the Sea Convention. It is in the enduring interests of the United States to be at the forefront of promoting the rule of law, including in the world's oceans. U.S. accession to the Convention would send an additional, clear signal to the world that we remain committed to advancing the rule of law at sea. Additionally, under the Convention, the United States would have the firmest possible legal foundation for the navigational rights and freedoms needed to project power, reassure allies and partners, deter adversaries, respond to

crises, sustain deployed combat forces, and secure sea and air lines of communication that underpin international trade and our own economic prosperity.

Question. Would U.S. accession to the United Nations Law of the Sea Convention benefit the U.S. military's mission in the Asia-Pacific region? If so, how?

Answer. U.S. accession to the Law of the Sea Convention would benefit the U.S. military's mission in the Asia-Pacific region by enabling the United States to reinforce and assert the Convention's freedom of navigation and overflight rights, including transit passage in strategic straits. In addition, becoming a party to the Convention would support combined operations with regional partners and support the Proliferation Security Initiative; establish undisputed title to our extended continental shelf areas; strengthen our position in bilateral discussions with the People's Republic of China; and bolster our leadership in future developments in the law of the sea. Accession would also improve the United States' position and add to our credibility in a large number of Asia-focused multilateral venues where Law of the Sea matters are discussed.

POW/MIA ACCOUNTING EFFORTS

Question. The Joint POW/MIA Accounting Command is critical to the recovery and identification of remains of missing military members. Recovery of remains of U.S. servicemembers from World War II, the Korean War, and the Vietnam war continues to be a high priority. On October 20, 2011, DOD announced an agreement with North Korea that will allow U.S. personnel to return to North Korea to resume recovery of remains of U.S. servicemembers missing from the Korean War. Recovery operations in North Korea were suspended in 2005.

What is your understanding of this recent agreement to resume recovery operations in North Korea?

Answer. It is my understanding that Deputy Assistant Secretary of Defense Robert Newberry, Director of the POW/Missing Personnel Office (DPMO), led an inter-agency team to conduct negotiations with the North Korean military last month, which reached a successful arrangement to resume recovery operations. The operations in North Korea are expected to begin next year and will mark the first operations since 2005 when the United States halted missions because of increased tensions on the Korean Peninsula. Prior to that time, U.S. specialists from the Joint POW/MIA Accounting Command conducted recovery operations in that country for 10 years, recovering remains believed to be more than 225 servicemen since 1996.

It is my understanding that the arrangement calls for U.S. teams to work in two areas in North Korea—Ŭnsan County, about 60 miles north of Pyongyang, and near the Chosin/Jangjin Reservoir—where more than 2,000 soldiers and marines are believed to be missing.

Question. How might the resumption of recovery efforts in North Korea impact the future of the Six-Party Talks or the stability on the Korean Peninsula?

Answer. Remains recovery operations are a humanitarian issue between the United States and North Korea and are divorced from other political issues. I would have to defer to the Department of State for remarks on the future of the Six-Party Talks. The ROK-U.S. alliance and the U.S. commitment to the defense of South Korea remains a cornerstone not only of stability on the Korean Peninsula, but throughout Northeast Asia more broadly.

Question. If confirmed, what steps, if any, would you take to enhance POW/MIA recovery efforts in the U.S. Pacific Command area of responsibility?

Answer. If confirmed, I will work closely with the Deputy Assistant Secretary for DPMO, Pacific Command, the State Department, and all other organizations involved to provide advice and support whenever necessary.

FOREIGN LANGUAGE POLICY

Question. In 2005, DOD approved the Defense Language Transformation Roadmap to improve the Department's foreign language capability and regional area expertise. Since then, the Department has been working toward implementing that roadmap.

How many Mandarin and/or Cantonese speakers does DOD have in intelligence analyst positions?

Is this number sufficient to ensure good intelligence assessments for use by the Office of Asian and Pacific Security Affairs?

In your view, how should the United States expand the foreign language skills of civilian and military personnel in order to improve the quality of intelligence input to, and policy output by, the Office of Asian and Pacific Security Affairs?

Answer. I have not had an opportunity to examine this issue in detail. If confirmed, I will research this issue and will look forward to working with Congress

to ensure DOD builds sufficient foreign language capability and regional area expertise.

COUNTER-THREAT FINANCE

Question. A number of officials in DOD and the Intelligence Community have called for investing significantly more resources in identifying and tracking the flow of money associated with terrorist networks and illicit trafficking.

What are your views on the role of DOD in counter-threat finance activities?

Answer. Terrorists, drug traffickers, and other adversaries rely heavily on legal and illegal funding sources to support their activities, which routinely work against U.S. interests. It is critical to engage all U.S. Government tools to track and halt the flow of money associated with these organizations. It is my understanding that DOD has capability to identify and disrupt our adversaries' finances while working with its interagency counterparts in both Iraq and Afghanistan. DOD is not the U.S. Government lead agency in counter-threat finance, but I believe it plays a supportive role by working with other departments and agencies, and with partner nations, to fight our adversaries' abilities to use global financial networks.

Question. In your view, should DOD seek to expand its support to other U.S. Government departments and agencies conducting counter-threat finance activities?

Answer. DOD should increase its cooperation with U.S. law enforcement agencies, the Treasury Department, the Intelligence Community, and the Department of State to target and degrade adversaries' funding sources where possible. DOD counter-threat finance policy provides that DOD should work with other U.S. Government departments and agencies and with partner nations to deny or disrupt, or defeat and degrade adversaries' abilities to use global licit and illicit financial networks to affect U.S. interests negatively. Greater cooperation will yield greater ability to target adversaries' vulnerabilities using a whole-of-government approach including interdiction, sanctions, and other law enforcement actions.

Question. Transnational criminal organizations are having a debilitating impact on the ability of our foreign partners to govern their nations and provide opportunities for their people.

Do you think expanding counter-threat finance activities in the Asia-Pacific region would be beneficial? If so, what role—if any—should DOD play in those activities?

Answer. Several dangerous terrorist organizations operate in the Asia-Pacific region. Not only do they seek to target the United States, but they work to destabilize the region. Expanding counter-threat finance activities in this part of the world would be a powerful way to target the finances of these organizations, hindering their ability to purchase weapons, pay salaries, and conduct attacks. Conducting counter-threat finance activities is most successful through a whole-of-government approach. I understand that PACOM and JIATF-West have already undertaken counter-threat finance efforts. If confirmed, I would advocate that DOD continue to work in collaboration with interagency partners and provide analytical capabilities, technology, strategic and operations planning, and personnel to attack the revenue used by these terrorist organizations.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of Defense for Asian and Pacific Security Affairs?

Answer. Yes.

Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis of any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JIM WEBB

U.S. BASES IN EAST ASIA

1. Senator WEBB. Mr. Lippert, please describe the leadership approach you would take, if confirmed, to resolve the present challenges regarding the realignment of U.S. bases in East Asia, including Korea, Japan, and Guam. This should include which offices and leaders you believe should be consulted, both in the United States and abroad.

Mr. LIPPERT. If confirmed, I will take an active, intense, and inclusive leadership approach to resolving ongoing realignment initiatives in the Asia-Pacific region, ensuring that the United States remains a Pacific power with a sustainable forward military presence in the region.

I will be sure to give priority to these issues commensurate with the importance that our allies place upon them. For example, basing issues in Japan are among the most important bilateral issues for this key treaty ally, and I believe they should be treated as such. If confirmed, I would request to make my first overseas trip centered around this set of issues.

If confirmed, I will be sure to keep an open mind and consult thoroughly with key stakeholders on these issues. It is critical to hear the views of U.S. Military Services, relevant components of DOD and the rest of the interagency, concerned congressional offices with long track records on this issue, and the elected leadership in Guam. As mentioned above, it is also important to gather the views of foreign leadership—which includes the national-level (to include parliamentarians) and local-level officials in these countries. The views of groups outside the government such as NGOs and think-tanks should also be taken into consideration.

I recognize the limits of the position of Assistant Secretary of Defense on this issue, but I believe that, if confirmed, my background in the executive branch and on Capitol Hill makes me well-positioned to play an important role as a conduit between different elements of the U.S. Government and foreign governments on this complex and critical set of issues.

2. Senator WEBB. Mr. Lippert, please provide your views on the observations contained on these realignment matters contained in the May 6, 2011, letter from Chairman Levin and Senator Webb to then Secretary of Defense Robert M. Gates. [The information referred to follows:]

UNITED STATES SENATE
 COMMITTEE ON ARMED SERVICES
 WASHINGTON, DC 20510-6050

United States Senate
 COMMITTEE ON ARMED SERVICES
 WASHINGTON, DC 20510-6050

May 6, 2011

The Honorable Robert M. Gates
 Secretary of Defense
 The Department of Defense
 The Pentagon, Suite 319
 Washington, DC 20301

Dear Secretary Gates:

The purpose for this letter is to give you our observations and recommendations regarding the future U.S. defense posture and restructuring of our forces in East Asia. During the recent Senate recess, we visited Guam, Tinian, Okinawa, and Tokyo. Numerous meetings with US military commanders and diplomats, government officials, business leaders, and members of local communities allowed us to assess the current status of the planned realignment of our military forces and the political dynamics associated with them.

Our country has reached a critical moment in terms of redefining our military role in East Asia. This moment in history requires that we clearly articulate our operational doctrine, thus reshaping the structure of our military posture in that region, particularly in Korea, Japan and Guam. Importantly, it also warns against a basing policy that now seems to be driven by little more than the momentum of DOD appropriations related to construction projects, rather than an analysis of the logic that set those projects into motion. It calls upon those of us in the Congress, and especially on the Armed Services Committee, to both evaluate and become the stewards of the vital role that the United States military will play in Asia throughout the present century.

Much has changed since the US-Japan Roadmap for Realignment Implementation agreement was signed in 2006. The projected times are totally unrealistic. The significant estimated cost growth associated with some projects is simply unaffordable in today's increasingly constrained fiscal environment. Political realities in Okinawa and Guam, as well as the enormous financial burden imposed on Japan by the devastation resulting from the disastrous March 2011 earthquake and tsunami, also must be considered. What has not changed is that our country is the key to stability in this region. The success of our relationships is guaranteed by the stability our forward-deployed military forces provide and by our continuing close alliance with Japan.

In our view, present realignment plans are unrealistic and unworkable. They need to be carefully re-examined, while providing assurance to Japan, Korea, and other countries in East Asia that we strongly support a continuous and vigorous US presence in the region. Our observations are brief and general in nature, intended as the basis for detailed analysis by your staff.

Observations:**Korea**

1. We are not confident that the proposed basing realignment in Korea is proceeding from an operational posture that fits our future role in Korea and the region writ large. Unlike any other "permanent" posturing of US forces abroad, our military forces in Korea are justified in terms of "local defense" – in other words, the defense of South Korea against an attack from the north. By contrast, our forces in Okinawa and Germany are considered to be available for multiple contingencies throughout their regions and beyond.

This reality calls into question their size, positioning, and compatibility with the South Korean military. Thus, the credibility of our commitment to the defense of Korea should not be measured by the simple number of our troops, but by the specific missions that they perform. In that regard, we recommend a stringent review of their present missions to examine which are redundant, or capable of being performed by the South Korean military, and which are unique to the special capabilities of our own.

2. The ongoing construction of facilities at Camp Humphreys has been taking place through three separate funding mechanisms, only one of which seems to have been subject to careful review by the Congress. First, the South Korean government has been funding "one for one" replacement facilities for the transplacement of US bases in Seoul. Second, the US Commanding General seems to have had wide latitude in approving projects from discretionary funds under his control. And third, future projects, especially those related to the reconfiguration of combat units now on or near the DMZ, will be funded through specific appropriations and thus should receive closer scrutiny by Congress. In some respects this scrutiny is at risk because the momentum from the projects already underway threatens the ability of the Congress to properly examine issues related to the size, functioning and capabilities of US forces that were raised in the above paragraph.

Additionally, the estimated costs for relocations to Camp Humphreys are growing substantially. It is unclear how they will be distributed and whether the Republic of Korea's share of costs is over and above its total direct financial contribution to support US troops in ways not contemplated when the relocation agreement was adopted. In today's fiscal environment, we must achieve cost savings and identify cost avoidances in current and planned military construction projects.

We recommend that the proposed restructuring of US forces in South Korea be placed on hold until the review mentioned above has taken place.

3. The US commander in Korea has decided that the number of American family members and civilians be dramatically increased under a process known as "tour normalization." This process, which would convert almost all US military assignments in Korea from "deployed" status, without family members, to "accompanied" status, would drive up

housing, medical, school, recreational, and other infrastructure costs. We are not convinced of the arguments that have been used to support this concept. Nor have we seen clear, measurable data that properly calculates the cost.

We question the analysis that has been used to support the decision to pursue tour normalization. There is an inherent contradiction in planning to increase the number of U.S. military family members in South Korea when there is the real potential that a destabilizing security situation in North Korea could unfold rapidly and unpredictably.

We recommend that this proposal be the subject of further, careful review.

Okinawa / Guam

The issues related to downsizing the US presence on Okinawa and transferring some of these functions to Guam are militarily complex, potentially costly, and politically sensitive. The US and Japanese governments have been working for fifteen years to come up with an acceptable formula. A general framework has now been agreed upon, whereby the US will relocate many of its bases from the populous southern end of Okinawa, moving some forces to the less populous north and also rebasing 8,000 US Marines on Guam. However, a stalemate has ensued, with many in Okinawa growing intransigent and, to a lesser extent, many on Guam losing their enthusiasm.

On Okinawa, the most difficult issue regards the long-standing dilemma of relocating the US Marine Corps air facility at Futenma, now operating in a highly populated section of the island and the subject of numerous protests. The Marine Corps insists that any relocation must remain on Okinawa due to the unique air / ground partnership that is characteristic of Marine Corps operations. One option – moving Marine Corps helicopter and other functions from Futenma to nearby Kadena Air Force Base – has been opposed because it would bring increased noise levels to Kadena. Many Okinawans, including many leaders, are adamant that the facility should be relocated off-island.

The present compromise reached between the US government and the Government of Japan calls for the construction of a contiguous, partially offshore replacement facility to the far north at Camp Schwab. The US government and the GOJ seem determined to pursue this option in order to bring final closure to the debate, but it is rife with difficulties. This would be a massive, multi-billion dollar undertaking, requiring extensive landfill, destruction and relocation of many existing facilities, and in a best-case scenario, several years of effort – some estimate that the process could take as long as ten years. Moreover, the recent earthquake and tsunami around Sendai in the north of Japan is creating an enormous burden on the Japanese economy and will require years of reconstruction.

On Guam, environmental issues have not been resolved, and many community leaders are concerned that local communities and facilities would be overwhelmed by any large increase in our military presence. Their clear message is that federal money would be necessary to build up infrastructure outside of the bases in a manner commensurate with an increase in the bases themselves. Although several issues are being debated related to firing ranges on Guam and

training activities on places like Tinian, the principal issue for military planners involves whether to relocate families along with the 8,000 Marines who would be assigned to that island or to configure the Marines mostly as deployed units rotating into and out of Guam from a home base such as Hawaii or Camp Pendleton. This distinction would make a strong difference in terms of infrastructure costs for schools, medical, recreational facilities, and housing. A good estimate is that 8,000 Marines would become 23,000 Americans if family members were included.

It should also be noted that Guam's Anderson Air Force Base is a large, under-utilized facility. Mindful that B-52 missions were conducted continuously there in the 1970s, we estimate that Anderson Air Force Base is now operating at less than half of its capacity.

Recommendations.

1. The Marine Corps should consider revising its implementation plan for Guam to a stripped-down presence with a permanently-assigned (family accompanied) headquarters element bolstered by deployed, rotating combat units that are home-based elsewhere, and the construction of a "Camp Fuji" style training site on Tinian. The "planned" versus "preferred" options for Marine Corps presence on Guam need to be resolved so that the Navy can develop and provide to the Committee the master plan for the overall buildup on Guam that was first requested in 2006.
2. DOD should immediately examine the feasibility of moving the Marine Corps assets at Futenma into Kadena Air Force Base, while dispersing a percentage of Air Force assets now at Kadena into other areas of the Pacific region. A number of other options exist in Japan and, especially, Anderson Air Force Base in Guam. In addition, the 6,000-acre ammunition storage area at Kadena could potentially be down-sized, especially in light of the two ammunition storage areas already located on Guam – one of them comprising 8,000 acres in and of itself, and the other one already located on Anderson Air Force Base.

Reducing the burden of the US presence on the people of Okinawa is an important goal associated with the realignment roadmap. Relocating Marine Corps aviation assets as outlined above will allow the US to return the land at the Futenma Air Base faster and at substantially less expense than the current plan for the Replacement Facility at Camp Schwab. Additionally, it is imperative that we pursue every opportunity to avoid unnecessary and unaffordable costs to the US taxpayer. Money saved by abandoning the Camp Schwab FRF could be applied to new projects in the revised realignment plan following negotiations with the Government of Japan to formulate a new cost-sharing agreement.

This option would keep our military forces in the region, would greatly reduce the timing of the sensitive political issues surrounding Futenma, could save billions in costs that would have gone into the offshore facility at Camp Schwab, would reduce the American footprint on Okinawa, and potentially could result in the return of more land to the Okinawan people if the size of the ammunition storage area at Kadena could be reduced.

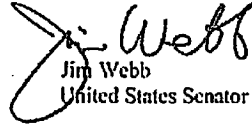

1271

We look forward to discussing these and other possibilities with you and your staff at your earliest convenience.

Sincerely,

Carl Levin
Chairman

Jim Webb
United States Senator

Mr. LIPPERT. It is my belief that this is a thoughtful and an insightful letter written by Members of the Senate with decades of defense and Asian policy experience. After reading the letter, talking with you personally, and consulting with others, I have a clear understanding that there are concerns regarding the feasibility of certain planned realignments and the complexities surrounding these issues—especially cost and political issues. I share your stated goal of a “continuous and vig-

orous U.S. presence in the region” and the importance you place upon the relationship with our allies in the region.

I understand that senior Department of Defense (DOD) officials have been in contact with you to follow-up on this and other letters that you have written on the subject. If confirmed, I will endeavor to get up-to-speed on the latest developments, conduct a rigorous round of consultations, and engage with you further on these issues.

Like you, I am committed to working with the interagency, Congress, our allies, and other stakeholders to effectively address operational, political, and fiscal realities while enhancing our strategic interests in East Asia.

3. Senator WEBB. Mr. Lippert, please provide your views on the questions raised in the October 21, 2011, letter from Chairman Levin and Senator McCain to Secretary Panetta, and the October 19, 2011, letter from Senator Webb to Secretary Panetta.

LEONARD B. BOESE, STAFF DIRECTOR
 COLIN M. MCANIS, MIGHTY STAFF DIRECTOR

The Honorable Leon E. Panetta
 Secretary of Defense
 1000 Defense Pentagon
 Washington, DC 20301

Dear Secretary Panetta:

During your upcoming trip to Japan, we urge you to raise with the Japanese Minister of Defense and other senior Japanese officials the possibility of a joint reconsideration of the terms of the United States-Japan Roadmap for Realignment Agreement that relate to the Futenma Replacement Facility (FRF) and the movement of Marines to Guam. As you know, we and other members of this Committee remain concerned that the plan as agreed to in the 2006 Roadmap Agreement has become unworkable, unrealistic and unaffordable. Also, the Committee recently received a letter from the Governor of Okinawa in which he reiterates his concerns regarding the FRF and calls for a review of the plan.

Reducing the U. S. military presence on Okinawa and transferring personnel and functions to Guam is a complex, costly, and politically sensitive endeavor. In the current environment, the profound difficulties associated with the FRF plan, which is estimated to cost at least \$3.6 billion and take 7- to 10-years to complete in the face of significant public opposition, warrant the review of alternatives that are more realistic in the long term and will avert driving a wedge between the United States and one of our strongest allies, while supporting the strategic needs of the alliance. Moreover, the movement of approximately 8,000 Marines to Guam is tied to tangible progress on the FRF. This movement also faces a number of challenges. While we may not oppose some military build-up on Guam, the Congress has repeatedly withheld funding for the build-up because of a lack of a master plan detailing the cost and schedule for the build-up. Congress has not been provided that plan and has not received information as to which units will actually move, what infrastructure is required to support them, and how they will adequately train once moved.

We appreciate your willingness to look into this issue, as you agreed to do during your confirmation process and most recently during the breakfast meeting with this Committee. We look forward to hearing your assessment of the situation and to working with you to resolve this matter in a manner that benefits the United States and Japan.

Sincerely,

 Carl Levin
 Chairman

 John McCain
 Ranking Member

WASHINGTON OFFICE:
 WASHINGTON, DC 20510
 (202) 224-4024

United States Senate
 WASHINGTON, DC 20510-4605

October 19, 2011

The Honorable Leon Panetta
 Secretary of Defense
 1300 Defense Pentagon
 Washington, DC 20301

Dear Secretary Panetta:

As you depart for your visit to the Pacific region, I would like to emphasize the critical importance of resolving the dispute surrounding US military bases in Japan.

Our security alliance with Japan, buttressed by the presence of U.S. military bases in that country, has long served as an absolutely crucial element in guaranteeing the stability of East Asia. A necessary adjustment of these military bases, especially as it relates to facilities on Okinawa, has now been under serious discussion for fifteen years. But, despite well-intentioned efforts on both sides, there are credible concerns that the provisions of the 2006 agreement between our two national governments are not capable of a timely, cost-effective, politically agreeable and strategically viable implementation.

As we have discussed, our failure to resolve the issue of American bases on Okinawa has resulted in a volatile political debate in Japan, the implications of which should not be under-estimated by American leaders. It is in our national interest that this matter be resolved both quickly and smartly, for the well-being of our alliance and the stability of the region.

Five months ago Senator Levin, Senator McCain, and I forwarded a series of recommendations to then-Secretary of Defense Gates. With regard to basing in Okinawa, we recommended that the Department examine the feasibility of moving U.S. Marine Corps aviation assets assigned at Futenma into Kadena Air Base, while dispersing a percentage of Air Force assets now at Kadena to other locations in the Pacific region, including Andersen Air Force Base in Guam.

Personally, my recommendations were based on many years of careful consideration dating to my time in the Pacific as a military planner during the 1970s, as well as two visits to Okinawa and Guam during the past 20 months. I have also made three visits to Tokyo during that period, and have hosted numerous meetings with Japanese officials here in Washington. I believe this alternative for Futenma is the most

workable, cost-effective, and least intrusive approach to resolving the most serious defense and foreign policy issue facing our foremost ally in the Pacific region.

I am well aware that resolving the Okinawa basing issue would require stiff political debate with different interest groups here and in Japan. I am also aware that any change in the American basing structure threatens institutional "turf" areas within our own military. At the same time, Senator Levin and I were told repeatedly by officials at the highest level of DOD and the uniformed military that there are deep concerns regarding the affordability and workability of the 2006 Roadmap Agreement for basing on Okinawa and Guam, even though our two national governments seem unable to admit this publicly. Thus, my sole purpose in raising this matter with you is to encourage the formulation of a reasonable and timely solution that will guarantee a credible U.S. presence in this vital part of the world, well into the future.

In that spirit, as you examine the relocation of missions related to MCAS Futenma and contingency planning that might occur depending on the implementation of various war scenarios, I would suggest that you seriously re-examine carefully the proposals that Senators Levin, McCain and I put forward last May. I would also suggest that you look at the possibility of our military contingency plans including the option of sharing non-American aviation facilities on Okinawa, which were specifically called for in the 2006 Road Map Agreement.

As you know, the Senate has expressed strong interest in these matters, as reflected in legislative provisions in both the Senate versions of the Fiscal Year 2012 National Defense Authorization Act and the Fiscal Year 2012 Military Construction and Veterans Affairs Appropriations Act. I hope you will keep this in mind during your discussions with government officials in Japan.

Please accept my best wishes for your upcoming visit to the Pacific region.

Sincerely,

Jim Webb
United States Senator

Mr. LIPPERT. My answer to this question does not vary significantly from question #2, as I believe the October 21 and October 19 letters can and should be read as specific proposals that stem from the well-articulated views in the May 6 letter.

I certainly agree with your comments concerning the importance of the security alliance with Japan and the need to resolve the basing issues in that country. Again, after reviewing this correspondence, speaking with you personally, and consulting with others, I have a clear understanding that there are concerns regarding the feasibility of certain planned realignments and the complexities surrounding these issues—especially cost and political issues.

As outlined in question #2, if confirmed, I look forward to engaging with you as a key partner in working to try to resolve these difficult, complex—yet critical—issues.

4. Senator WEBB. Mr. Lippert, please provide your views on the recent statement in the court papers filed by the Department of Justice, as reported in the press, that it will take the Navy at least 2 more years to complete a supplemental environ-

mental study of certain training requirements associated with the military buildup on Guam.

Mr. LIPPERT. I am aware that the Navy is currently responding to this lawsuit, but do not know the specific details at this time. If confirmed, I will be sure to work closely with my counterparts to resolve this issue in an expeditious manner.

5. Senator WEBB. Mr. Lippert, please provide your views on alternate scenarios related to the relocation of Marine Corps Air Station Futenma including the possibility of joint-use runways in Naha, Okinawa.

Mr. LIPPERT. I understand that there are proposals outside of the administration to examine the feasibility of moving Marine Corps assets at Futenma to Kadena Air Force Base, while dispersing a percentage of Air Force assets now at Kadena into other areas of the Pacific. This would be part of a broader plan that would revise the current Marine Corps implementation plan for Guam.

I have heard only the broad contours of proposals, also coming from outside the administration, concerning development of the international airport at Naha as a joint-use facility that could be utilized by U.S. forces in contingency situations. My understanding is that Naha has a single runway, currently shared with the Japan Air Self Defense Force.

If confirmed, I would need to consult thoroughly with key stakeholders and experts on these issues before commenting further.

6. Senator WEBB. Mr. Lippert, please provide your views on the impact on these East Asia realignments, if any, of the recent decision to utilize certain military facilities in Darwin, Australia, for U.S. Marine Corps training and other activities.

Mr. LIPPERT. It is my understanding that the recent announcement regarding enhanced Marine Corps rotational training in Australia is not linked to our realignment agreement with Japan. The U.S. marines deployed to Darwin will be globally sourced.

QUESTION SUBMITTED BY SENATOR SCOTT P. BROWN

CHINESE THREAT

7. Senator BROWN. Mr. Lippert, last year China asserted itself as the second largest economy in world. Along with its growing industrial prowess, China continues to grow and modernize its military. It has both increased its conventional forces, with programs like the J-20 5th generation fighter, and its diplomatic and humanitarian efforts to increase its access to raw materials and overseas markets. Furthermore, China has conducted pervasive collection efforts on the United States including private sector, dual-use, and military industries and technologies. The growth of China's military and its cyber capabilities are of great concern to me. How do you perceive China's threat to the United States and its allies and how is the threat being mitigated?

Mr. LIPPERT. I have a clear-eyed view concerning the U.S. relationship with China. In some aspects it is cooperative; in others aspects it is competitive. As President Obama has stated, "the [U.S.-China] relationship has not been without disagreement and difficulty. But the notion that we must be adversaries is not predestined." China is rapidly modernizing its military in the information age. With a focused set of missions and ready access to advanced technology in the global marketplace, China is accelerating the pace of its military modernization. If unanswered by an effective strategy, this could lead to a gradual erosion of our relative advantage and influence. I believe in a strategy that engages China; helps integrate China into international institutions; and balances China with our capabilities, alliances, and partnerships. Given the uncertainty around the evolution of China, I believe it is vital that we maintain a strong and effective force posture in the region that is geographically distributed, operationally resilient, and politically sustainable.

QUESTIONS SUBMITTED BY SENATOR JOHN CORNYN

CHINA AND TAIWAN CROSS-STRAIT SECURITY BALANCE

8. Senator CORNYN. Mr. Lippert, in your answers to the advance policy questions, you stated that "China's military buildup continues to pose anti-access/area-denial challenges and shift the cross-strait balance" (between China and Taiwan) in China's favor. You also acknowledged that China's "near-term focus appears to be on preparing for potential contingencies involving Taiwan, and to deter or deny effec-

tive intervention in a cross-strait conflict.” Many of us remember the Taiwan Strait crisis of 1996, when China tried to intimidate Taiwan on the eve of its first free presidential elections by conducting a series of military exercises that included the firing of missiles just a few miles north of Taiwan. President Clinton responded by ordering the largest U.S. military force since the Vietnam War to deploy to the region, including two carrier battle groups. Such a scenario may repeat itself, though this time with a much more capable and willful Chinese military. Would you agree that, were China to launch some type of military offensive against Taiwan, such a scenario would have the potential to draw the United States into a dangerous large-scale conflict in the region?

Mr. LIPPERT. The Taiwan Relations Act (TRA) states: “It is the policy of the United States to maintain the capacity of the United States to resist any resort to force or other forms of coercion that would jeopardize the security, or the social or economic system of the people on Taiwan.” In such a scenario, the President would determine the appropriate response; however, this question highlights the importance of the U.S. relationship with Taiwan. The Obama administration’s strong commitment to the TRA is evident in its actions, which include the September 21 notification to Congress of its intent to sell Taiwan \$5.85 billion worth of new defense articles and services—including an upgrade package for Taiwan’s 145 F-16 A/B fighters; spare parts for its F-16, F-5, and C-130 aircraft; and training for F-16 pilots at Luke Air Force Base in Arizona. This decision follows the January 29, 2010, decision to sell Taiwan \$6.4 billion in defensive arms, including 60 UH-60M Blackhawk helicopters, Patriot PAC-III firing units and missiles (3 firing units, 1 training unit, and 114 missiles), Harpoon missiles, 2 Osprey-class mine hunters, and follow-on support for command and control systems. In addition, in August 2011, the Obama administration submitted a \$310 million direct commercial sales notification to Congress for the approval of export licenses in support of radar equipment for Taiwan Indigenous Defense Fighters and Hughes Air Defense Radars. These collective sales of more than \$12.5 billion in arms to Taiwan are an important indication of DOD’s commitment to its obligations of the TRA and to Taiwan’s defense.

9. Senator CORNYN. Mr. Lippert, do you agree that helping deter any cross-strait military conflict is in both our own security interests and the Asia/Pacific region’s security interests?

Mr. LIPPERT. Absolutely.

10. Senator CORNYN. Mr. Lippert, would you also agree that the likelihood of Chinese aggression against Taiwan becomes more likely as Taiwan’s ability to defend itself deteriorates further?

Mr. LIPPERT. I would agree that Chinese aggression could be perceived, by the leadership in China, as an option in a crisis if Taiwan is weak, and the U.S. commitment to Taiwan waivers. This is precisely why I believe the administration was right to pursue collective sales of over \$12.5 billion in arms to Taiwan, continue robust engagement with Taipei, and, more broadly, make a point of emphasis on strong and enduring U.S. presence in the Western Pacific.

TAIWAN’S DETERIORATING AIR FORCE

11. Senator CORNYN. Mr. Lippert, in official estimates provided by DOD, they show that the People’s Republic of China has 2,300 operational combat aircraft, while the Government of Taiwan has only 490 operational combat aircraft. In my opinion, there now exists a serious airpower imbalance between China and Taiwan. Do you disagree?

Mr. LIPPERT. The 2009 Annual Report to Congress on Military Power of the People’s Republic of China reported: “In the 2002 report, DOD assessed that Taiwan has enjoyed dominance of the airspace over the Taiwan Strait for many years. This conclusion no longer holds true.” China’s military has improved across the board, and the threat from combat aircraft is just one of many threats to Taiwan and regional stability. Taiwan will never be able to go toe-to-toe with the PRC; there is no silver bullet to solve this growing problem. Taiwan must properly fund its military and prioritize a defense transformation that incorporates an asymmetric strategy that both deters PRC aggression and, should deterrence fail, allow Taiwan to defend the island.

12. Senator CORNYN. Mr. Lippert, what is your assessment of the risk to both Taiwanese and U.S. interests as a result of this cross-strait imbalance in air power?

Mr. LIPPERT. The defense of Taiwan cannot be viewed through the narrow prism of airpower alone. A more holistic approach that considers all aspects of a joint defense of the island is vital.

13. Senator CORNYN. Mr. Lippert, for years, DOD has documented a steady increase in advanced Chinese weaponry and aircraft positioned opposite Taiwan. It is a consensus belief among security and military experts that Taiwan has lost its technological edge in defense weaponry. What is the tipping point, in terms of Chinese force buildup, that would necessitate the sale of additional U.S. fighter aircraft to Taiwan?

Mr. LIPPERT. The conference report accompanying the National Defense Authorization Act for Fiscal Year 2010 (House Rep. 111-288) requested the Secretary of Defense to provide a report on Taiwan's Air Defense Force. It is my understanding that a detailed classified report addressing these concerns was delivered to Congress in September 2011.

14. Senator CORNYN. Mr. Lippert, do you honestly believe that the current Taiwan forces can successfully repel China's increasingly capable fighter aircraft?

Mr. LIPPERT. The Annual Report to Congress on Military Power of the People's Republic of China 2009 reported: "In the 2002 report, DOD assessed that Taiwan 'has enjoyed dominance of the airspace over the Taiwan Strait for many years. This conclusion no longer holds true.'" From what I am able to discern, China's military has improved across the board; the threat from combat aircraft is just one of many threats to Taiwan and regional stability. My general view is that Taiwan will have severe difficulty in matching the PRC capability for capability, and that there is no silver bullet for this growing problem. I am informed that the DOD Report to Congress on Taiwan's Air Defense Force may contain useful recommendations for the defense of Taiwan.

In my view, the United States must continue its strong commitment to the TRA and that Taiwan must properly fund their military and prioritize a defense transformation that incorporates an asymmetric strategy that both deters PRC aggression, and should deterrence fail, allow Taiwan to defend the island.

15. Senator CORNYN. Mr. Lippert, it is my understanding that DOD conducted its own assessments of Taiwan's defense needs from 1997 through early 2004, producing over a dozen studies. Since that time, DOD has only produced the one 2010 study on Taiwan's air defense forces that was mandated by Congress, although reports indicate it also began a study on Taiwan's joint defense transformation in 2010. Do you believe reports, such as those produced between 1997 and 2004, are essential in understanding the threat posed by shifting China-Taiwan relations?

Mr. LIPPERT. It is my understanding that the conclusions stated in the reports from 1997 to 2004 are no longer valid; these assessments could not have envisioned the rapid growth of PRC capabilities, nor Taiwan's failure to fund its defense adequately. However, the services DOD provides to Taiwan to improve its defensive capabilities have never been more robust. DOD has conducted numerous assessments with Taiwan, and is in year 4 of a 7-year assessment to assist Taiwan in developing an asymmetric strategy that reduces the threat from the PRC. This is just one of many assessments that have been conducted since 2004 to improve Taiwan's defense capabilities.

16. Senator CORNYN. Mr. Lippert, if confirmed, how do you intend to ensure that the executive and legislative branches possess the necessary information to accurately evaluate Taiwan's defense needs?

Mr. LIPPERT. If confirmed, I believe that frequent dialogue would ensure both the executive and legislative branches understand how to improve Taiwan's defense capabilities.

SALE OF F-16s TO TAIWAN

17. Senator CORNYN. Mr. Lippert, what is your position on the proposed sale of 66 new F-16s C/Ds to Taiwan?

Mr. LIPPERT. I believe the congressional notification of the F-16 retrofit reflects a smart defense policy that provides real and immediate contributions to Taiwan's security. The retrofitted F-16 A/B aircraft will provide a more reliable, survivable, and capable aircraft—comparable to the F-16 C/D, but at a lower cost—and Taiwan will have a total of 145 of them.

18. Senator CORNYN. Mr. Lippert, the F-16 production line may shut down before the administration authorizes additional F-16 sales to Taiwan. If that is allowed to happen, would you be in favor of selling Taiwan F-35 Joint Strike Fighters (JSF) to ensure that Taiwan can deter threats from China?

Mr. LIPPERT. I believe we should provide Taiwan real defensive capabilities that will allow Taiwan's military to execute its defense missions effectively today and well into the future. Without the benefit of being in the position, I am limited on the insights I can provide on specific capabilities that would match the administration's strategic intent, though I recognize that is an evolving conversation.

19. Senator CORNYN. Mr. Lippert, in terms of economic benefits, the F-16 C/D sales to Taiwan would mean at least \$8 billion to a critical portion of our industrial base that is about to get hammered by defense cuts. Taiwan clearly needs these aircraft, and the United States clearly needs the thousands of jobs that are supported by the F-16 production line. Do you agree that American jobs, overall economic impact, and the future of the defense industrial base are important considerations in determining whether to sell new F-16s to Taiwan?

Mr. LIPPERT. I believe DOD's first priority is to ensure Taiwan acquires and maintains the necessary defensive equipment to deter aggression from the PRC.

IMPACT OF TAIWAN POLICY ON RELATIONS IN EAST ASIA

20. Senator CORNYN. Mr. Lippert, what message do you think the administration's de facto denial of Taiwan's request for new F-16 C/Ds has sent to other U.S. allies, both in the region and around the world?

Mr. LIPPERT. The Obama administration's strong commitment to the TRA is evident in its actions, which include the September 21, 2011, notification to Congress of the intent to sell Taiwan \$5.85 billion worth of new defense articles and services—including an upgrade package for Taiwan's 145 F-16 A/B fighters; spare parts for its F-16, F-5, and C-130 aircraft; and training for F-16 pilots at Luke Air Force Base in Arizona. This decision follows the January 29, 2010, decision to sell Taiwan \$6.4 billion in defensive arms, including 60 UH-60M Blackhawk helicopters, Patriot PAC-III firing units and missiles (three firing units, one training unit, and 114 missiles), Harpoon missiles, two Osprey-class mine hunters, and follow-on support for command and control systems. In addition, in August 2011, the Obama administration submitted a \$310 million direct commercial sales notification to Congress for the approval of export licenses in support of radar equipment for Taiwan Indigenous Defense Fighters and Hughes air defense radars. These collective sales of more than \$12.5 billion in arms to Taiwan are an important indication of DOD's commitment to the obligations of the TRA and to Taiwan's defense. These sales are a very clear demonstration of U.S. commitment to Taiwan and to maintaining peace and stability in the Taiwan Strait.

21. Senator CORNYN. Mr. Lippert, recently, the United States has engaged in military capacity building for Japan and Korea, which are also threatened by China's second artillery missile threat. The administration also recently announced the planned transfer and upgrade of 24 excess defense article F-16s to Indonesia, which sits on South China Sea. However, this same threat has been halfheartedly addressed by the administration, when it comes to selling Taiwan the F-16s they have requested. Can you explain this policy inconsistency and, if confirmed, will you work to rectify it?

Mr. LIPPERT. In my view, the Obama administration is correct in pursuing collective sales of over \$12.5 billion in arms to Taiwan, continuing robust engagement with Taipei, strongly supporting the TRA, and, more broadly, making a point of emphasis on a strong and enduring U.S. presence in the Western Pacific. If confirmed, I will look for ways to advance both U.S. and Taiwanese interests and mitigate risk in the region. My belief is that the defense of Taiwan should be a multi-faceted approach that considers all aspects of a joint defense of the island versus one that relies solely on air power. It is through this general approach that, if confirmed, I will review intelligence assessments, DOD studies, and other information—in order to form opinions on the state of U.S. and Taiwanese interests. My understanding is that a useful starting point could be the classified report delivered to Congress in September 2011 on Taiwan's Air Defense Force, pursuant to the conference report accompanying the National Defense Authorization Act for Fiscal Year 2010 (House Rep. 111-288).

AIR-SEA BATTLE CONCEPT

22. Senator CORNYN. Mr. Lippert, the Air-Sea Battle Concept has been described by some as a new way for the Navy and Air Force to work together to fight future wars against major powers. As I understand it, the Air-Sea Battle Concept is aimed at maintaining U.S. dominance of the air and sea domains and overpowering any nation-state that might try to defeat our military forces through the use of advanced missiles, stealth aircraft, and/or a blue-water naval fleet of its own. China is currently pursuing advanced missiles, stealth aircraft and a blue-water naval fleet. Does the implementation of the Air-Sea Battle Concept represent the U.S. policy response to a rising military threat from China?

Mr. LIPPERT. It is my understanding that the Air-Sea Battle Concept is not designed with a specific country in mind. Instead, it is a much broader operational concept aimed at countering proliferating capabilities that present significant anti-access/areal denial (A2/AD) challenges. I believe Air-Sea Battle Concept will ultimately be about staying ahead of evolutionary changes in warfare that challenge U.S. power projection.

23. Senator CORNYN. Mr. Lippert, why is it important that the U.S. military have a strategy to deal with China?

Mr. LIPPERT. The U.S.-China relationship has assumed an enduring and global dimension and has become progressively more multi-faceted and complex. Moreover, given the uncertainty around the evolution of China, I believe it is vital that we maintain a strong and effective force posture in the region that is geographically distributed, operationally resilient, and politically sustainable. The U.S. military must support coordinated and deliberate whole-of-government strategic efforts in all regions of the world, and the necessity of doing so with respect to China is no different. DOD contributes to U.S. efforts to promote U.S. interests most effectively, identify shared interests and opportunities for cooperation, and address the most difficult areas of the U.S.-China relationship.

24. Senator CORNYN. Mr. Lippert, in your opinion, does China pose a threat to the United States?

Mr. LIPPERT. I have a clear-eyed view concerning the U.S. relationship with China. In some aspects it is cooperative; in other aspects it is competitive. I agree with President Obama's statement that, "the [U.S.-China] relationship has not been without disagreement and difficulty. But the notion that we must be adversaries is not predestined." I believe in a strategy that engages China; helps integrate China into international institutions; and balances China with our capabilities, alliances, and partnerships. Given the uncertainty around the evolution of China, I believe it is vital that we maintain a strong and effective force posture in the region that is geographically distributed, operationally resilient, and politically sustainable.

UNITED STATES AS A PACIFIC POWER

25. Senator CORNYN. Mr. Lippert, Secretary Panetta said during his recent trip to Asia that the purpose of his visit was "to make very clear to this region and to our allies in the Pacific that . . . the Pacific will remain a key priority for the United States, that we will maintain our force projection in this area, that we will maintain a presence in this area, that we will remain a Pacific power." In light of China's aggressive military buildup, how do you believe the United States can best project itself as a Pacific power in the coming years?

Mr. LIPPERT. As an Asia-Pacific power, I believe the United States must field a military presence in the Asia-Pacific region that is sufficient for a wide range of contingencies and activities, and that keeps pace with changes in the Asia-Pacific security environment, such as the rise of new powers, the growing influence of non-state actors, and the potential spread of weapons of mass destruction.

I believe the U.S. military presence in the Asia-Pacific region should provide reassurance that the United States is committed to Asia's security. To do so, as Secretary Panetta has consistently said, will require that U.S. posture in the region be geographically distributed, operationally resilient, and politically sustainable.

My understanding is that DOD is seeking a more enhanced U.S. force presence in the Southeast Asia, Oceania, and the Indian Ocean regions, enabled by a more geographically distributed network of access relationships and capabilities. This will allow the United States to perform a range of future missions—combating terrorism, responding to natural disasters, and strengthening regional stability. I believe consulting closely with U.S. allies and partners, and with Congress, on defense posture

will allow the United States to respond effectively to the challenges confronting the Asia-Pacific region in the 21st century.

26. Senator CORNYN. Mr. Lippert, if confirmed, how do you intend to support and promote this strategic objective?

Mr. LIPPERT. If confirmed, I will work closely with other components of DOD, the rest of the U.S. Government, and Congress to develop and implement policies that bolster U.S. capabilities and presence in the Asia-Pacific region.

CHINA AND CYBER-WARFARE

27. Senator CORNYN. Mr. Lippert, according to the 2011 DOD report, "Military and Security Developments Involving the People's Republic of China," China maintains aggressive efforts directed toward illegally obtaining sensitive U.S. technologies. The 2009 version of this report cited the conclusion of the Intelligence Community that China is the most aggressive of foreign intelligence organizations in attempts to penetrate U.S. agencies. Additionally, this year's report notes that, of the numerous cyber intrusions directed against the United States, some appear to have originated from within China. According to the Director of National Intelligence, James Clapper, in April 2009; "a large number of routing paths to various Internet Protocol addresses were redirected through networks in China for 17 minutes ... This diversion of data would have given the operators of the servers on those networks the ability to read, delete, or edit e-mail or other information sent along those paths. This incident affected traffic to and from U.S. Government and military sites, including sites for the Senate, the Army, the Navy, the Marine Corps, the Air Force, and the Office of the Secretary of Defense ..." In your opinion, is China engaging in state-sponsored cyber-attacks and cyber-theft against the United States?

Mr. LIPPERT. It is my understanding that attribution of cyber intrusions is extremely difficult. According to DOD's 2011 Report to Congress on "Military and Security Developments in China", "developing capabilities for cyber warfare is consistent with authoritative People's Liberation Army (PLA) military writings. Although [the writings do not identify] the specific criteria for employing computer network attack against an adversary, [they do] advocate developing capabilities to compete in this medium."

As described in the unclassified DOD Strategy for Operating in Cyberspace, the theft of intellectual property may be the most pervasive cyber threat today. The ability to innovate and build intellectual capital is the foundation upon which U.S. military and economic strength rests. Beyond addressing the theft of intellectual property, I understand that DOD is working actively to defend and deter potential cyber attacks and to encourage responsible state behavior in cyberspace.

28. Senator CORNYN. Mr. Lippert, what is your assessment of the threat of cyber-attacks that originate in China?

Mr. LIPPERT. I believe the use of sophisticated and powerful cyber capabilities could be crippling, regardless of where it originates. The unclassified International Strategy for Cyberspace provides a clear statement that the United States reserves the right to use all necessary means—diplomatic, informational, military, and economic—to defend our Nation, our allies, our partners, and our interests in cyberspace.

As stated in the 2011 Report to Congress on "Military and Security Developments in China", "developing capabilities for cyber warfare is consistent with authoritative PLA military writings. Although [the writings do not identify] the specific criteria for employing computer network attack against an adversary, [they do] advocate developing capabilities to compete in this medium."

29. Senator CORNYN. Mr. Lippert, the 2011 DOD report also stated that China continues to leverage "state-sponsored industrial/technical espionage to increase the levels of technologies and expertise available to support military research, development, and acquisition." In April 2009, computer spies successfully hacked into the JSF program and copied large quantities of data related to the design and electronics systems of the aircraft. Former U.S. officials said the attack appears to have originated in China. I view this as a serious risk to our long-term national security. Are you concerned about this?

Mr. LIPPERT. Yes, I am very concerned about this issue. The loss of intellectual property from U.S. public and private sector networks has a corrosive effect on our military strength and the economic competitiveness upon which it depends. More

immediately, the loss of sensitive government information poses great risks to our servicemembers and to DOD operations around the globe.

30. Senator CORNYN. Mr. Lippert, do you think more needs to be done in this area?

Mr. LIPPERT. I absolutely agree that DOD should expand and strengthen its efforts to protect sensitive government information from theft through cyber means.

31. Senator CORNYN. Mr. Lippert, if confirmed for this position, how do you intend to address this problem?

Mr. LIPPERT. If confirmed, I look forward to working closely with the Assistant Secretary of Defense for Global Strategic Affairs, the Military Departments, the combatant commands, and interagency and international partners to undertake the sustained and integrated effort that these challenges require. This includes continuing to improve upon DOD's cyberspace capabilities and training, deepening efforts with the U.S. public and private sector, and working closely with allies and international partners, and strengthen military partnerships to sustain a secure, open, and interoperable cyberspace.

32. Senator CORNYN. Mr. Lippert, given DOD's report indicating that China continues to leverage state-sponsored industrial/technical espionage, and the fact that China is a suspect virtually any time a major cyber-attack against U.S. defense networks occurs, how should the United States respond to the growing threat of Chinese cyber-warfare?

Mr. LIPPERT. I support the President's International Strategy for Cyberspace, which advocates a whole-of-government approach to ensure the risks associated with attacking or exploiting U.S. networks vastly outweigh the potential benefits. I understand that DOD works to ensure that the U.S. military continues to have all necessary capabilities in cyberspace to defend the United States and its interests, as it does in all domains. If confirmed, I will assist in the Department's efforts to improve its cyber capabilities and training, work more closely with the interagency and private sector to expand capacity and cooperation, and strengthen military partnerships to deter and dissuade malicious activity in cyberspace.

[The nomination reference of Mark W. Lippert follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
October 20, 2011.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Mark William Lippert, of Ohio, to be an Assistant Secretary of Defense, vice Wallace C. Gregson, resigned.

[The biographical sketch of Mark W. Lippert, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF MARK W. LIPPERT

Education:

- Stanford University
 - September 1993–June 1997
 - Bachelor of Arts Degree awarded June 1997
- Stanford University
 - September 1996–January 1998
 - Master of Arts Degree awarded January 1998

Employment Record:

- Naval Special Warfare Development Group
 - Intelligence Officer
 - October 2009–present (on terminal leave)

- National Security Council
 - Deputy National Security Adviser/Chief of Staff
 - January 2009–October 2009 (on military leave)
- Obama-Biden Transition Project
 - Deputy Director for Foreign Policy
 - November 2008–January 2009
- Obama For America
 - Senior Foreign Policy Adviser
 - August 2008–November 2008
- SEAL Team One, Task Unit Al Asad
 - Intelligence Officer
 - June 2007–May 2008
- Office of Senator Barack Obama
 - Foreign Policy Adviser
 - Personal Representative of the Member to the Foreign Relations Committee
 - May 2005–August 2008 (on military leave June 2007–May 2008)
- Office of Naval Intelligence, Reserve Unit 0499
 - Intelligence Officer
 - January 2005–present
- Senate Committee on Appropriations, State-Foreign Operations Subcommittee
 - Professional Staff Member
 - August 2000–May 2005
- Office of Senator Tom Daschle, Democratic Policy Committee
 - Policy Adviser
 - Policy Analyst
 - January 1999–August 2000
- Office of Senator Dianne Feinstein
 - Legislative Correspondent
 - July 1998–January 1999
- Legal Aid of Cincinnati
 - Research Assistant
 - September 1992–July 1993

Honors and Awards:

- Presidential Unit Citation (2011)
- Navy and Marine Corps Commendation Medal (2011)
- Joint Service Commendation Medal (2010)
- Afghanistan Campaign Medal (2010)
- Global War on Terrorism Expeditionary Medal (2010)
- Basic Parachutist Badge (2010)
- Information Dominance Warfare Qualification (2010)
- Navy and Marine Corps Achievement Medal (2009)
- Expert Rifleman Medal (2009)
- Expert Pistol Shot Medal (2009)
- Sea Service Deployment Ribbon x3 (2009–2011)
- Bronze Star Medal (2008)
- Iraq Campaign Medal (2008)
- Global War on Terrorism Medal (2008)
- Navy and Marine Corps Overseas Service Ribbon (2008)
- Armed Forces Reserve Medal (2008)
- National Defense Medal (2005)
- Term Member, Council on Foreign Relations (2004–2009)
- Certificate of Completion, Intensive Mandarin Chinese Language Studies Course, Beijing University-Stanford University (1997)
- Graduated With Distinction, Stanford University (1997)
- Teaching Assistant (partial tuition payment), Stanford University (1996)
- Phi Beta Kappa, Stanford University (1996)
- Selected to Intern, U.S. Department of State, Policy Planning Staff (1995)
- Letter of Commendation, Office of U.S. Attorney, Southern District of Ohio (1993)
- Dean's List, University of Chicago (1991–1992)
- Varsity Baseball, University of Chicago (1991–1992)

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Mark W. Lippert in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Mark William Lippert.

2. **Position to which nominated:**

Assistant Secretary of Defense for Asian and Pacific Security Affairs.

3. **Date of nomination:**

20 October 2011.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

28 February 1973; Cincinnati, OH.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to Robin Elizabeth (Schmidek) Lippert.

7. **Names and ages of children:**

N/A.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Stanford University, Sept. 1993-June 1997

B.A., Political Science, June 1997

Stanford University, Sept. 1996-Jan. 1998

M.A., International Policy Studies, January 1998

Beijing University, Exchange Program with Stanford, Summer 1997

Additional Coursework from higher education institutions that was transferred to Stanford University: University of Chicago (9/91-6/92), University of Cincinnati (7/95-8/95), Xavier University (7/95-8/95), San Francisco State University (6/96-8/96)

Mariemont High School, Mariemont, OH, June 1991

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Naval Special Warfare Development Group, Virginia Beach, VA, October 2009-Present (on terminal leave until end of year), Intelligence Officer

National Security Council, Washington, DC, January 2009-October 2009, Chief of Staff (currently on military leave)

Obama-Biden Transition Project, Chicago, IL/Washington, DC, November 2008–January 2009, Deputy Director for Foreign Policy

Obama for America, Chicago, IL, Senior Foreign Policy Advisor, August 2008–November 2008

SEAL Team One, Coronado, CA, Intelligence Officer, June 2007–May 2008

Office of Senator Barack Obama, Washington, DC, U.S. Senate, Foreign Policy Advisor, Personal Representative of the Member to the Foreign Relations Committee, May 2005–August 2008 (On military leave from June 2007–May 2008)

Office of Naval Intelligence, Suitland, MD, Intelligence Officer (Reserve Component), January 2005–Present

Committee on Appropriations, Subcommittee on State-Foreign Operations, U.S. Senate, Washington, DC, Professional Staff Member, August 2000–May 2005

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Office of Senator Tom Daschle, Democratic Policy Committee, Washington, DC, Policy Advisor, Policy Analyst, January 1999–August 2000, (Internship: January 1998–June 1998)

Office of Senator Dianne Feinstein, Washington, DC, Legislative Correspondent, July 1998–January 1999

Department of State, Office of Policy Planning, Washington, DC, Intern (during graduate school) September 1996–December 1996

Office of the Mayor, City of San Jose, San Jose, CA, Intern (Stanford University in Government Program), June 1994–August 1994

Commander's Advisory Group, Naval Special Warfare Development Group, U.S. Navy Dam Neck, VA (Note: Have been invited by the Commanding Officer, group has not yet been established)

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Stanford Alumni Association
Capitol Hill, Navy "Wardroom"

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Obama for America, Chicago, IL, Senior Foreign Policy Advisor, August 2008–November 2008

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

Wayne Lippert for Cincinnati City Council, \$1,100, 9/29/11

14. Honors and awards: List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

- Presidential Unit Citation (2011)
- Navy and Marine Corps Commendation Medal (2011)
- Joint Service Commendation Medal (2010)
- Afghanistan Campaign Medal (2010)
- Global War on Terrorism Expeditionary Medal (2010)
- Basic Parachutist Badge (2010)
- Information Dominance Warfare Qualification (2010)
- Navy and Marine Corps Achievement Medal (2009)
- Expert Rifleman Medal (2009)
- Expert Pistol Shot Medal (2009)
- Sea Service Deployment Ribbon x3 (2009–2011)
- Bronze Star Medal (2008)
- Iraq Campaign Medal (2008)
- Global War on Terrorism Medal (2008)
- Navy and Marine Corps Overseas Service Ribbon (2008)
- Armed Forces Reserve Medal (2008)

- National Defense Medal (2005)
- Term Member, Council on Foreign Relations (2004–2009)
- Certificate of Completion, Intensive Mandarin Chinese Language Studies Course, Beijing University-Stanford University (1997)
- Graduated With Distinction, Stanford University (1997)
- Teaching Assistant (partial tuition payment), Stanford University (1996)
- Phi Beta Kappa, Stanford University (1996)
- Selected to Intern, U.S. Department of State, Policy Planning Staff (1995)
- Letter of Commendation, Office of U.S. Attorney, Southern District of Ohio (1993)
- Dean's List, University of Chicago (1991–1992)
- Varsity Baseball, University of Chicago (1991–1992)

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.
None.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.
None.

17. **Commitments regarding nomination, confirmation, and service:**

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?
Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?
No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?
Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?
Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?
Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?
Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?
Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

MARK W. LIPPERT.

This 16th day of November, 2011.

[The nomination of Mark W. Lippert was reported to the Senate by Chairman Levin on February 17, 2012, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on April 26, 2012.]

[Prepared questions submitted to Brad R. Carson by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. This milestone legislation is now more than 25-years-old and has served our Nation well. Although I believe that the framework established by Goldwater-Nichols has significantly improved inter-Service and joint relationships and promoted the effective execution of responsibilities, the Department, working with Congress, should continually assess the law in light of improving capabilities, evolving threats, and changing organizational dynamics. Although I am currently unaware of any reason to amend Goldwater-Nichols, if confirmed, I hope to have an opportunity to assess whether the challenges posed by today's security environment require amendments to the legislation.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. As noted above, I have no specific proposals to modify Goldwater-Nichols. As with any legislation of this magnitude, however, I believe it may be appropriate to review past experience with the legislation with a view to identifying any areas in which it can be improved upon, and then to consider with Congress whether the act should be revised.

DUTIES

Question. What is your understanding of the duties and functions of the General Counsel of the Department of the Army?

Answer. Title 10, U.S.C., section 3019, provides that the General Counsel of the Army shall perform such functions as the Secretary of the Army may prescribe. The Secretary has prescribed the General Counsel's duties through general orders, regulations, and memoranda. The General Counsel provides legal advice to the Secretary of the Army, the Under Secretary, the Assistant Secretaries, and other offices within the Army Secretariat. As the chief legal officer of the Department of the Army, the General Counsel determines the controlling legal positions of the Department of the Army. The General Counsel's responsibilities extend to any matter of law and to other matters as directed by the Secretary. I understand that examples of specific responsibilities currently assigned to the General Counsel include providing professional guidance to the Army's legal community, overseeing matters in which the Army is involved in litigation, serving as the Designated Agency Ethics Official, exercising the Secretary's oversight of intelligence and other sensitive activities and investigations, providing legal advice to the Army Acquisition Executive, and taking final action on certain claims filed against the Army.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. The duties and responsibilities of the General Counsel of the Department of the Army are broad and far-reaching. Consequently, the General Counsel must possess sound legal and analytical skills, together with absolute integrity and mature judgment. As the diversity and complexity of the legal and policy issues confronting the Army are such that no one lawyer can have in-depth experience in all of them, the General Counsel must have strong interpersonal and leadership abilities and a willingness to work collaboratively with experts in numerous areas. I believe that, if confirmed, my background and diverse legal and executive experiences have well prepared me to execute the duties of the General Counsel of the Department of the Army. A summary of my experience follows:

Currently, I am a professor in the College of Business and College of Law at the University of Tulsa. I attended Baylor University, where I graduated with highest honors, was inducted into Phi Beta Kappa, and selected as a Rhodes Scholar. Studying at Trinity College, Oxford, I earned a B.A./M.A. in Politics, Philosophy, and Economics. I graduated from the University of Oklahoma College of Law, where I served on the law review, received the award for Outstanding Note in the Oklahoma Law Review, and was recognized as the Outstanding Graduate. In 1994, I entered the practice of law at Crowe & Dunlevy, the largest firm in the State of Oklahoma.

During my early years of legal work, I focused on commercial litigation, with a particular emphasis on antitrust law. From 1997 through 1998, I was a White House Fellow, serving in the Department of Defense (DOD). After completing the White House Fellowship, I returned to practicing commercial litigation at Crowe & Dunlevy. In 2000, I was elected to represent the 2nd District of Oklahoma in the U.S. House of Representatives. In 2005, after leaving politics, I was a fellow at the Kennedy School of Government at Harvard University. From 2005 to 2008, I was a director and then Chief Executive Officer of CNB, LLC, where I oversaw all legal matters and a large team of in-house lawyers. From 2009 to 2010, as an officer in the U.S. Navy, I served in Iraq on active military duty with the 84th Explosive Ordnance Battalion of the U.S. Army, where I was officer-in-charge of Weapons Intelligence Teams in Multi-National Division-South. I was awarded the Bronze Star and Army Achievement Medal.

I believe that my extensive experience in law, business, education, politics, and the military have all helped prepare me for the extraordinary challenge of serving as General Counsel of the Department of the Army. I recognize the legal and policy issues facing the Department of the Army in this time of war and transformation. I have extensive experience in compliance, human resources management, corporate governance and strategy, and understanding legal and enterprise risk. If confirmed, I commit to using my skills and experience to diligently and effectively perform the duties of General Counsel.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the General Counsel of the Department of the Army?

Answer. I am confident that I have the requisite legal experience, analytic abilities, and leadership skills to serve as the General Counsel of the Department of the Army. If confirmed, I will work to broaden my expertise and further my understanding and knowledge of the major legal challenges facing the Army, including its personnel and its component organizations. Additionally, if confirmed, I will undertake to establish and maintain collaborative and productive professional working relationships with the career civil servants in the Office of the General Counsel as well as with The Judge Advocate General of the Army and with other offices dealing with matters of mutual interest. If confirmed, I would expect to benefit from their knowledge as we work collaboratively to provide the best possible legal services to all members of the Department of the Army.

Question. Assuming you are confirmed, what duties and functions do you expect that the Secretary of the Army would prescribe for you?

Answer. Although the Secretary of the Army has not discussed with me the duties and functions he will expect of me, I anticipate that he will rely on me to provide accurate and timely legal advice to help ensure that the Army complies with both the letter and spirit of the law. I would expect the current enumeration of General Counsel responsibilities set forth in the General Order prescribing the duties of each principal official of Headquarters, Department of the Army, generally to remain in effect. Apart from such formally prescribed duties, I believe the Secretary of the Army would expect me to continue a collegial and professional relationship with the General Counsels of DOD, the other Military Departments, and the defense agencies and the legal staffs of other Federal agencies. I anticipate that the Secretary of the Army will expect me to continue the extraordinarily effective and professional working relationship that exists between the Office of the General Counsel and The Judge Advocate General and his staff. Finally, I anticipate that the Secretary of the Army will expect me to manage the General Counsel's office efficiently and effectively, and to ensure that the Army legal community is adequately resourced to perform its important mission.

Question. In carrying out your duties, how will you work with the General Counsel of DOD?

Answer. The General Counsel of DOD is the chief legal officer and final legal authority for DOD. As I understand it, the General Counsel of DOD, Mr. Jeh Johnson, has made clear in his testimony before this committee and in his actions in the Department that he intends to work closely with the Service General Counsels. If confirmed, I anticipate having a close and professional relationship with Mr. Johnson, characterized by continuing consultation, communication, and cooperation on matters of mutual interest, in furtherance of the best interests of DOD.

MAJOR CHALLENGES

Question. In your view, what are the major challenges that will confront the General Counsel of the Department of the Army?

Answer. In my opinion, a major challenge will be consistently to provide responsive, accurate legal advice on the broad array of complex issues that will arise in

conjunction with the Army's execution of its mission to provide trained and ready forces to combatant commanders while shaping its structure and operations in an environment of declining resources. Although it is difficult to anticipate specific legal questions, I expect to confront issues relating to operational matters, acquisition reform, privatization initiatives, military and civilian personnel policies, and compliance with environmental laws. I am not aware of any problems in the current delivery of legal services. However, if confirmed, I will work hard to ensure that the Army legal community is adequately staffed and resourced to provide the responsive, accurate, and timely legal advice necessary to ensure success in all of the Army's endeavors.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will prioritize legal issues in the manner that best serves the Department of the Army. I will also ensure that the talented and dedicated lawyers comprising the Army legal community continue to provide timely, value-added legal and policy advice of the highest quality, executing the Department's recurring legal responsibilities and anticipating and responding to the numerous issues that the Army confronts every day. I will endeavor to keep Army lawyers involved at all stages of the decisionmaking process, because I believe that preventive law, practiced early in the formulation of departmental policies, will undoubtedly facilitate the Department's adaptation to the changing operational environment. Additionally, if confirmed, I will work diligently to resource adequately and staff expertly the Army legal community, in order to guarantee decisionmakers at all levels access to the best possible legal advice.

Question. What broad priorities will you establish in terms of issues which must be addressed by the Office of the General Counsel of the Department of the Army?

Answer. If confirmed, I will focus foremost on the issues that directly impact soldiers, their families, readiness, and the support of military operations. I anticipate that the other legal issues of highest priority will arise from the Army's execution of its mission to provide trained and ready forces to combatant commanders while shaping its structure and operations in an environment of declining resources. I will ensure that expert advice is provided to those engaged in the Army's efforts to improve the acquisition process and to eliminate fraud, waste, and abuse. I will also ensure that the Army legal community continues to provide timely legal advice of the highest quality, executing the Department's recurring legal responsibilities and anticipating and responding to the numerous issues the Army confronts every day.

RELATIONSHIPS

Question. What is your understanding of the formal and informal relationship between the General Counsel of the Army and the following offices?

The General Counsel of the Department of Defense.

Answer. As noted above, I am advised that the General Counsel of DOD, Mr. Jeh Johnson, has made clear his intent to work closely with the General Counsels of the Military Departments. If confirmed, I anticipate developing a close and professional relationship with Mr. Johnson, characterized by continuing consultation, communication, and cooperation on matters of mutual interest, in furtherance of the best interests of the Department of the Army and DOD.

Question. The Secretary of the Army.

Answer. The Secretary of the Army is the head of the Department of the Army and is responsible for, and has the authority to conduct, all affairs of the Department. If confirmed, my primary responsibility will be to provide the Secretary with competent legal advice and counsel and to perform the duties and functions he prescribes for me. My goal will be to execute these responsibilities by establishing a close and professional relationship with the Secretary of the Army that will ensure my ability to communicate with him directly and candidly on matters of significance to the Army.

Question. The Chief of Staff of the Army.

Answer. The Chief of Staff, Army, is the senior military officer of the Department of the Army and a member of the Joint Chiefs of Staff. The Chief of Staff is directly responsible to the Secretary of the Army. If confirmed, I will endeavor to continue what I understand to be an excellent relationship between the Army General Counsel and the Chief of Staff and the Army Staff and will work closely with The Judge Advocate General to provide the Chief of Staff with appropriate legal advice and support in the performance of his assigned duties and responsibilities.

Question. The Assistant Secretaries of the Army.

Answer. The five Assistant Secretaries of the Army perform such duties and exercise such authorities as are provided by statute or prescribed by the Secretary. Gen-

erally, the Assistant Secretaries are charged to formulate and oversee policies and programs within their functional areas of responsibility. As the chief legal officer of the Department of the Army, the General Counsel provides legal advice, counsel, and guidance to the Assistant Secretaries and their staffs. If confirmed, I will establish a close and professional relationship with the Assistant Secretaries and provide candid and objective advice regarding the matters entrusted to them.

Question. The Judge Advocate General of the Army.

Answer. The Judge Advocate General is the legal adviser to the Chief of Staff of the Army, members of the Army Staff, and members of the Army generally. In coordination with the Army General Counsel, The Judge Advocate General serves as military legal adviser to the Secretary of the Army. By law, The Judge Advocate General is primarily responsible for providing legal advice and services regarding the Uniform Code of Military Justice (UCMJ) and the administration of military discipline. I believe that close, professional cooperation between the civilian and uniformed members of the Army's legal community is absolutely essential to the effective delivery of legal services to the Department. If confirmed, I will work closely and collaboratively with The Judge Advocate General to ensure that the legal services and legal advice provided to the Army are of the highest possible quality.

Question. The Inspector General of the Department of Defense.

Answer. The Inspector General of DOD is the principal adviser to the Secretary of Defense on all audit and criminal investigative matters and for matters relating to the prevention and detection of fraud, waste, and abuse in the programs and operations of DOD. The Office of the Inspector General is an independent and objective organization within DOD. If confirmed, I will work with the Inspector General of DOD on matters related to the Department of the Army, to ensure that Army interests are fully and fairly represented and that Army actions taken as a result of DOD Inspector General recommendations are executed in compliance with applicable law, directives, and regulations.

Question. The Inspector General of the Army.

Answer. I understand that the The Inspector General of the Army reports directly to the Secretary of the Army regarding the discipline, efficiency, and economy of the Army, and on other matters as required. If confirmed, I anticipate maintaining a close and professional relationship with The Inspector General to ensure he has the legal advice and support required to accomplish his assigned duties and responsibilities.

Question. The General Counsels of the other Military Departments.

Answer. The General Counsels of the other Military Departments serve and act under the authority, direction, and control of the Secretaries of their respective Departments. If confirmed, I would expect to consult closely and collegially with them on matters of mutual interest or concern. I understand that the General Counsel of DOD acts to foster coordination of effort among all of the General Counsels so that DOD, as a whole, can make the best use of the legal services at its disposal. I look forward to participating in that effort, if I am confirmed.

Question. The Attorney General and the Department of Justice.

Answer. I am aware that the Attorney General and the Department of Justice represent the Department of the Army in civil litigation. Further, I have been advised that DOD and the Department of Justice have signed a Memorandum of Understanding delineating the areas of responsibility for the investigation and prosecution of offenses over which the two departments have concurrent jurisdiction. In view of the importance of the Army's relationship with the Attorney General and the Department of Justice, our communications must be clear, consistent, and timely on every level. If confirmed, I will work in conjunction with The Judge Advocate General and the General Counsel of DOD to ensure the continuation of a collaborative relationship with the Attorney General and the Department of Justice.

RELATIONSHIP WITH THE JUDGE ADVOCATE GENERAL

Question. In carrying out your duties, if you are confirmed, how will you work with the Judge Advocate General of the Army?

Answer. I believe that close, professional cooperation between the civilian and uniformed members of the Army's legal community is absolutely essential to the effective delivery of legal services to the Department. If confirmed, I will seek to ensure that the Offices of the General Counsel and The Judge Advocate General, as well as The Judge Advocate General and I, work closely together to deliver the best possible legal services to the Department of the Army.

Question. How are the legal responsibilities of the Department of the Army allocated between the General Counsel and the Judge Advocate General?

Answer. The Army General Counsel is the chief legal officer of the Department of the Army. The Office of the Army General Counsel is a component of the Army Secretariat, and provides advice to the Secretary of the Army and other Secretariat officials on any subject of law and on other matters, as directed by the Secretary of the Army. The Judge Advocate General is the legal adviser to the Chief of Staff of the Army, members of the Army Staff, and members of the Army generally. In coordination with the Army General Counsel, The Judge Advocate General serves as military legal adviser to the Secretary of the Army. The law expressly prohibits interference with the ability of The Judge Advocate General to give independent legal advice to the Secretary of the Army. Even in the absence of that statutory requirement, I would always welcome the expression of independent views about any legal matter under consideration. The Judge Advocate General also directs the members of The Judge Advocate General's Corps in the performance of their duties. By law, The Judge Advocate General is primarily responsible for providing legal advice and services regarding the UCMJ and the administration of military discipline. The Offices of the Army General Counsel and The Judge Advocate General have developed and maintain a close and effective working relationship in performing their respective responsibilities. If confirmed, I will work to continue this synergistic partnership.

Question. If confirmed, how would you ensure that legal opinions of your office will be available to Army attorneys, including judge advocates?

Answer. It is my understanding that the majority of legal opinions provided to Army attorneys and Judge Advocates are issued by the Office of The Judge Advocate General, and that many of these opinions are coordinated with the Office of the Army General Counsel. The close, professional cooperation between the civilian and uniformed members of the Army's legal community is absolutely essential to ensure that legal opinions issued by the Office of the Army General Counsel will be available to all Army attorneys and Judge Advocates and vice versa. If confirmed, I will seek to ensure that the Office of the Army General Counsel appropriately makes available any legal opinions that it issues.

Question. In response to attempts within DOD to subordinate legal functions and authorities of the Judge Advocates General to the General Counsels of DOD and the Military Services, Congress enacted legislation prohibiting any officer or employee of DOD from interfering with the ability of the Judge Advocates General of the military services and the legal adviser to the Chairman of the Joint Chiefs of Staff to provide independent legal advice to the Chairman, service secretaries, and service chiefs.

What is your view of the need for the Judge Advocate General of the Army to have the authority to provide independent legal advice to the Secretary of the Army and the Chief of Staff of the Army?

Answer. The Judge Advocate General's statutory responsibility and authority to provide independent legal advice, set forth in title 10, U.S.C., section 3037, have repeatedly been recognized as essential to the effective delivery of legal services. Uniformed attorneys bring another perspective to the practice of law, providing insight and advice shaped by years of service across the Army. In today's environment, our senior leaders both demand and deserve independent advice from their counsel.

Question. What is your view of the responsibility of Army judge advocates to provide independent legal advice to military commanders?

Answer. I believe that Army Judge Advocates in the field are vested with a critical responsibility: to provide quality, candid, legal advice to military commanders. Army commanders need and deserve the best legal advice and judgment available—that is, in part, made possible when Judge Advocates are empowered to provide commanders with independent legal advice, with appropriate guidance from supervising attorneys in their technical chain.

Question. If confirmed, would you propose any changes to the current relationships between the Judge Advocate General of the Army and the Army General Counsel?

Answer. Based upon my knowledge and understanding to date, I believe that The Judge Advocate General and the Army General Counsel have an excellent working relationship. If confirmed, I will continue to foster this professional and collaborative relationship with The Judge Advocate General and his staff to ensure the effective delivery of legal services to the Department of the Army.

Question. Article 6 of the UCMJ gives primary jurisdiction over military justice to the Judge Advocates General of the Army, Navy, and Air Force.

How do you view the responsibilities of the Army General Counsel in the performance of military justice matters with regard to the Judge Advocate General of the Army?

Answer. The Judge Advocate General's responsibilities to ensure the proper administration of the military justice system require his direct and independent advice to the Secretary of the Army on military justice matters. I look forward to providing The Judge Advocate General with whatever support and coordination I can in this respect. I will, if confirmed, consult with The Judge Advocate General on matters of mutual interest or concern relating to military justice, recognizing his statutory duties and special expertise in this area. I will also work with The Judge Advocate General in safeguarding the integrity of the military justice system.

ATTORNEY RECRUITING AND RETENTION ISSUES

Question. If confirmed, how do you assess your ability to hire and retain top quality attorneys and provide sufficient opportunity for advancement?

Answer. I understand that the Army continues to recruit and retain top quality military and civilian attorneys and provide them opportunities for advancement. If confirmed, I will continue to monitor and assess recruitment, retention, and advancement programs for our military and civilian attorneys.

Question. In your view, does the Department of the Army have a sufficient number of civilian and military attorneys to perform its missions?

Answer. I understand that the Army's enhanced mission requirements in recent years have fueled appropriate growth in the Army's legal community. If confirmed, I will evaluate whether the number of attorneys in the Department of the Army is sufficient to support the successful accomplishment of all the Army's assigned missions.

Question. In your view, what incentives to successful recruiting and retention of attorneys, if any, need to be implemented or established?

Answer. In my view, retention of top notch military and civilian attorneys is essential to the current and future success of Army legal services. Although I am unfamiliar with the full scope of attorney retention programs available in the Army, if confirmed, I intend to review these programs carefully and support those incentives and initiatives that affect the retention of the best attorneys to support the Army mission.

DETAINEE ISSUES

Question. What role do you expect to play, if confirmed, in addressing legal issues regarding detainees?

Answer. Properly addressing legal and policy issues associated with detainees and detention operations is of vital importance to DOD and the Nation as a whole. I understand that the Office of the Army General Counsel and the Office of The Judge Advocate General support the DOD General Counsel in executing elements of the President's Executive Orders related to detainee operations. Additionally, if confirmed, and in coordination with The Judge Advocate General, I will provide advice to the Secretary of the Army in his role as the DOD Executive Agent for the administration of detainee operations policy, with particular focus on our obligation to treat all detainees humanely.

Question. Section 1403 of the National Defense Authorization Act (NDAA) for Fiscal Year 2006 provides that no individual in the custody or under the physical control of the U.S. Government, regardless of nationality or physical location, shall be subject to cruel, inhuman, or degrading treatment or punishment.

In your view, is the foregoing prohibition in the best interest of the United States? Why or why not?

Answer. Yes, I firmly believe that this prohibition is in the best interest of the United States. This prohibition is consistent with the long-standing military tradition of applying the humanitarian provisions of the Law of War to those individuals who, for whatever reason, are no longer actively participating in hostilities and find themselves in custody. Moreover, this prohibition is consistent with international standards to which the United States is a party. Prohibiting the cruel, inhumane, or degrading treatment or punishment of individuals in our custody or under our physical control upholds our ideals and reinforces our moral authority around the world.

Question. Do you believe that the phrase "cruel, inhuman, or degrading treatment or punishment" has been adequately and appropriately defined for the purpose of this provision?

Answer. Although the phrase "cruel, inhuman, or degrading treatment" is, on its face, susceptible to broad interpretation, the proscriptions on such conduct contained in the Department's implementing directives, as well as the provisions of the Geneva Conventions that are embodied in those directives, make it clear to soldiers what

conduct is prohibited. If confirmed, I will ensure the Army's implementation of this policy in doctrine, to include training manuals, is clearly understood.

Question. What role do you believe the General Counsel of the Army should play in the interpretation of this standard?

Answer. The appropriate role of the General Counsel is to provide advice to the Secretary of the Army and his staff on detention and interrogation policies that implement this standard. If confirmed, I will ensure Army implementation is consistent with the law, the intent of the administration, and the guidance issued by the Secretary of Defense.

Question. What role do you believe the Judge Advocate General of the Army should play in the interpretation of this standard?

Answer. The appropriate role of The Judge Advocate General is to provide advice to the Chief of Staff of the Army and the Army staff on detention and interrogation policies that implement this standard. I believe that The Judge Advocate General should continue the training programs that have been developed for Judge Advocates in the field. I understand that these programs have proven to be instrumental in attaining and maintaining adherence to this standard.

Question. If confirmed, will you take steps to ensure that all relevant Army directives, regulations, policies, practices, and procedures fully comply with the requirements of section 1403 and with Common Article 3 of the Geneva Conventions?

Answer. I will. I believe the requirements of section 1403 and Common Article 3 of the Geneva Conventions are essential to maintaining a disciplined Army, whose actions are grounded in the rule of law.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2–22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. I do. These standards have been instrumental in promoting the confidence of the American people in the Army and have been and will continue to be important in guiding our soldiers' actions in contingency operations.

Question. Section 2441 of title 18, U.S.C., as amended by the Military Commissions Act of 2006, defines grave breaches of Common Article 3 of the Geneva Conventions, including torture and cruel and inhuman treatment.

In your view, does section 2441 define these terms in a manner that provides appropriate protection from abusive treatment to U.S. detainees in foreign custody and to foreign detainees in U.S. custody?

Answer. These sections of the War Crimes Act were necessary to define the "serious crimes" or "grave breaches" of Common Article 3 to the Geneva Conventions. Identifying these felony-level offenses in our domestic law implemented our international law obligations to define, with specificity, the grave breaches that must be prosecuted under the Law of War. In addition, I believe that we must continue to enforce these standards through the promulgation of doctrine, training, and oversight, and that we must hold soldiers accountable for violations of these standards.

CONTRACTORS ON THE BATTLEFIELD

Question. U.S. military operations in Iraq and Afghanistan have relied on contractor support to a greater degree than any previous U.S. military operations. The extensive involvement of contractor employees in a broad array of activities—including security functions—has raised questions about the legal accountability of contractor employees for their actions.

Do you believe that current DOD and Department of the Army regulations appropriately define and limit the scope of security functions that may be performed by contractors in an area of combat operations?

Answer. It is my understanding that the DOD regulation concerning workforce mix was updated in 2010 to better define and limit the scope of security functions that may be performed by contractors in an area of combat operations. It is also my understanding that the DOD regulation on contractor personnel authorized to accompany the U.S. Armed Forces is presently under review. If confirmed, I will support this review, as appropriate. Additionally, the Office of Federal Procurement Policy (OFPP) recently redefined the term "inherently governmental" in OFPP Policy 11–01, effective on October 12, 2011. This new policy added to the list of inherently governmental functions: (i) security functions performed in combat; and (ii) security operations in certain situations connected with combat or potential combat. I am advised that this means that each and every one of these situations should be evaluated on a case-by-case basis to determine which security functions and activities are inherently governmental and which can be performed by contractors

with appropriate management and oversight. If confirmed, I will support this process.

Question. What changes, if any, would you recommend to such regulations?

Answer. It would be premature for me to recommend any changes to DOD or Department of the Army regulations. If confirmed, I will carefully consider the current departmental regulations and the results of ongoing reviews and make appropriate recommendations to the Secretary of the Army.

Question. Do you believe that current DOD and Department of the Army regulations appropriately define and limit the scope of contractor participation in the interrogation of detainees?

Answer. I understand that the current DOD and Department of the Army regulations define and, as properly implemented, limit the scope of contractor participation in the interrogation of detainees. However, the NDAA for Fiscal Year 2010 significantly limits departmental authority to use contractors in an interrogation role. It is my understanding that DODD 3115.09, DOD Intelligence Interrogations, Detainee Briefings, and Tactical Questioning, is under revision, and that the draft addresses the limitations on contract interrogators prescribed in the NDAA for Fiscal Year 2010.

Question. What changes, if any, would you recommend to such regulations?

Answer. Although I have no basis of knowledge on which to propose changes at this time, I will, if confirmed, review applicable DOD and Department of the Army regulations to determine what, if any, changes may be necessary and appropriate.

Question. OMB Circular A-76 defines "inherently governmental functions" to include "discretionary functions" that could "significantly affect the life, liberty, or property of private persons." OMB recently issued guidance clarifying the applicability of these terms to the performance of security functions.

In your view, is the performance of security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations an inherently governmental function?

Answer. In the recently revised Office of Federal Procurement Policy (OFPP) policy addressing inherently governmental functions, security operations are listed as inherently governmental when they are performed in actual combat situations. For situations where security will be performed in any hostile situation other than actual combat, the circumstances should be evaluated on a case-by-case basis to determine which security functions and activities are inherently governmental and which can be performed by contractors with appropriate management and oversight. If I am confirmed, I intend to examine this issue in greater depth.

Question. In your view, is the interrogation of enemy prisoners of war and other detainees during and in the aftermath of hostilities an inherently governmental function?

Answer. Currently, DOD policy allows properly trained and cleared contractors to conduct government-approved interrogations, provided they are supervised and closely monitored throughout the process by properly trained DOD military or civilian personnel. However, the NDAA for Fiscal Year 2010 significantly limits departmental authority to use contractors in an interrogation role. It is my understanding that DODD 3115.09, DOD Intelligence Interrogations, Detainee Briefings, and Tactical Questioning, is under revision, and that the draft addresses the limitations on contract interrogators prescribed in the NDAA for Fiscal Year 2010.

Question. What role do you expect to play, if confirmed, in addressing the issue of what functions may appropriately be performed by contractors on the battlefield?

Answer. If confirmed, I will provide advice to the Secretary of the Army and other senior departmental officials regarding the functions that contractors may legally perform on the battlefield. I will assist them in implementing policies regarding the use of contractors that are consistent with applicable statutory and regulatory constraints.

Question. The Military Extraterritorial Jurisdiction Act (MEJA) was enacted in 2000 to extend the criminal jurisdiction of the U.S. courts to persons employed by or accompanying the Armed Forces outside the United States.

In your view, does MEJA provide appropriate jurisdiction for alleged criminal actions of contractor employees in Iraq, Afghanistan, and other areas of combat operations?

Answer. Under the MEJA, Federal jurisdiction covers felony offenses committed overseas by members of the Armed Forces who leave military service prior to prosecution or who conspire with non-servicemembers covered by MEJA; civilian employees of DOD; contractors (including subcontractors at any tier) of DOD; dependents of the above; and civilian employees and contractors (including subcontractors at any tier) of any other Federal agency, but only to the extent their "employment relates to supporting the mission of DOD." I understand that the goal of MEJA is

to ensure that U.S. Federal employees and contractors supporting DOD missions overseas, who commit serious crimes, are not be able to escape Federal prosecution for serious offenses such as murder and rape simply because of a potential jurisdictional gap in the law. There is no analogue to MEJA for felony offenses committed by non-defense personnel overseas who are not supporting the mission of DOD. Rather, civilian employees and contractors who cannot be shown to be supporting the mission of DOD may be prosecuted only under certain specific statutes of extraterritorial scope. I understand, however, that this gap would be addressed by the enactment of the Civilian Extraterritorial Jurisdiction Act (CEJA) of 2011, currently pending before the Senate.

Question. What changes, if any, would you recommend to MEJA?

Answer. In my opinion, CEJA would provide an effective means for the United States to exercise extraterritorial criminal jurisdiction over non-DOD Federal employees and contractors in Iraq, Afghanistan, and other areas of operation, who engage in conduct that would constitute a felony-level Federal crime in the United States. If confirmed, I will assess whether any change or supplement to MEJA may be appropriate.

Question. What role would you expect to play, if confirmed, in developing administration recommendations for changes to MEJA?

Answer. If confirmed, I would seek to offer my views and assist in developing proposals to change or supplement MEJA. I would also coordinate closely with The Judge Advocate General and the DOD Office of General Counsel in the development of any such proposals, given the complementary and sometimes competing availability of criminal jurisdiction under the UCMJ.

Question. Section 552 of the NDAA for Fiscal Year 2007 extended criminal jurisdiction of military courts-martial under the UCMJ to persons serving with or accompanying an armed force in the field during time of declared war or a contingency operation, such as our current operations in Iraq and Afghanistan.

In your view, does the UCMJ provide appropriate jurisdiction over alleged criminal actions of contractor employees in Iraq, Afghanistan, and other areas of combat operations?

Answer. I am aware that Article 2 of the UCMJ was amended in 2006 to extend UCMJ jurisdiction over persons serving with or accompanying U.S. Armed Forces in the field in times of declared war or in a contingency operation. This amendment authorized a commander's exercise of UCMJ disciplinary authority over certain civilians—for example, a contractor employee whose criminal conduct jeopardized good order and discipline or discredited the Armed Forces and thereby had a potential adverse effect on military operation. The Secretary of Defense, in turn, published guidance on the prudent exercise of this unique authority. I understand that this guidance enumerated the command and law enforcement authorities available when a crime is committed within a commander's geographic area of responsibility outside the United States. This guidance further ensures that the Department of Justice and DOD each play an appropriate role in resolving whether jurisdiction over the civilian is most appropriately exercised in a military court under Article 2 of the UCMJ, or in a Federal District Court under MEJA or other Federal laws.

Question. What is your view of the procedures agreed upon by DOD and the Department of Justice to reconcile jurisdictional responsibilities under MEJA and the UCMJ?

Answer. I understand that current policy requires DOD to notify the Department of Justice when offenses alleged to have been committed by civilians violate U.S. Federal criminal laws and to afford the Department of Justice the opportunity to pursue prosecution of the case in Federal Court. As stated above, such notification provides DOD and the Department of Justice the opportunity to determine whether jurisdiction is more appropriately exercised under the UCMJ or pursuant to MEJA or other Federal laws. If confirmed, in coordination with The Judge Advocate General and subject to consultation with the General Counsel of DOD, I will monitor cases in which the UCMJ or MEJA are employed to assess the effectiveness of the current procedures and evaluate whether further refinements of these procedures may be necessary.

Question. What changes, if any, would you recommend to the UCMJ to ensure appropriate jurisdiction for alleged criminal actions of contractor employees?

Answer. At this time, I am not aware of any specific provisions in the UCMJ that need change in this area.

ATTACKS AT FORT HOOD

Question. In your view, do current Army policies limit the ability to include information in official records that may assist in the identification of potential threats?

Answer. At this time, I am not sufficiently familiar with current Army policies regarding the filing of information in official records to permit me to express an opinion on this important question. I am informed, however, that the Army has made progress in addressing the issues associated with the identification of potential threats. If confirmed, I will look closely at this issue, in coordination with the Assistant Secretary of the Army (Manpower and Reserve Affairs); the Deputy Chief of Staff, G-1; and the Deputy Chief of Staff, G-2.

Question. Do current Army procedures hinder the ability to share this type of information with other official agencies charged with identifying and monitoring potential extremist or terrorist activities?

Answer. I am not aware of any specific procedures that hinder the ability to share information between agencies. However, if confirmed, I will review this matter to ensure that the Army's procedures for sharing potential threat and other force protection-related information both internally (e.g., with the Army Criminal Investigation Command), and with other DOD or Federal law enforcement or intelligence agencies are effective and in compliance with all applicable laws, directives, and regulations, as appropriate.

Question. What is your understanding of how the Army balances the need to identify and respond to potentially harmful extremist views held by soldiers against individual privacy and respect for the right of soldiers to hold and express personal beliefs?

Answer. It is my understanding that the Army currently has a robust policy that proscribes participation in extremist organizations and activities. Commanders have been empowered to maintain good order and discipline in their units, and enforcement of this policy is a function of command. I further understand that the Army mandates reporting of suspected or possible international or domestic terrorist activity, espionage, compromises of security or classified information, and similar activities. It is my understanding that the Army regulation addressing counterintelligence and other threat awareness and reporting was updated in November 2010. If confirmed, I will work closely with the proponents of force protection policies to ensure that Army programs addressing potential threats maintain the proper balance between the need for commanders to maintain good order and discipline and protect the force, and soldiers' rights to privacy and to hold and express personal beliefs.

Question. Do you see a need for a change in this balance?

Answer. At this time, I have no basis of knowledge on which to formulate an opinion on this important issue. I do, however, recognize that this is a Department-wide issue that extends beyond the Army. If confirmed, I would support any and all DOD initiatives in this area.

RELIGIOUS GUIDELINES

Question. What is your understanding of current policies and programs of DOD and the Department of the Army regarding religious practices in the military?

Answer. It is my understanding that the Army's policies support religious tolerance and mutual respect. If confirmed, I would continue the Army's firm commitment to upholding the Constitutional tenets of the "free exercise" and "establishment" clauses and review policies as necessary to assure continued compliance with the First Amendment.

Question. In your view, do these policies accommodate the free exercise of religion and other beliefs without impinging on those who have different beliefs, including no religious belief?

Answer. I have been informed that current Army policies require chaplains to support all unit personnel, regardless of their beliefs. It is my view that these Army policies do accommodate free exercise of religion. If confirmed, I am willing to study this issue further to determine if changes in policy are necessary and appropriate.

Question. In your opinion, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious belief?

Answer. I understand that during mandatory official functions, chaplains are not compelled to offer prayers that are inconsistent with their faith, but are expected to remain sensitive to the pluralistic Army and society they serve. In my opinion, these policies strike an appropriate balance, given the diversity of religious views in the Army. If confirmed, I would be willing to study this issue further to determine if changes in policy are necessary and appropriate.

ROLE IN THE OFFICER PROMOTION AND CONFIRMATION PROCESS

Question. What is your understanding of the role of the General Counsel of the Department of the Army in ensuring the integrity and proper functioning of the officer promotion process?

Answer. I have been informed that under title 10, U.S.C., chapter 36, the Secretary of the Army is responsible for the proper functioning of the Department of the Army's promotion selection process. In addition to the legal review of Memoranda of Instruction and selection board reports to ensure they comport with statutory standards, the Army General Counsel must also ensure the conduct of the board process conforms to all legal requirements. The diligent execution of this function requires advising the Secretary of the Army of any case in which a selection board report or selection board process fails to adhere to the statutory standards, either generally or with regard to a particular officer being considered for promotion. In advising the Secretary of the Army and the Office of the Assistant Secretary of the Army (Manpower and Reserve Affairs), the General Counsel helps to ensure that Army promotion policies properly implement applicable laws and regulations and are fairly applied. In these matters, the Office of the Army General Counsel coordinates closely with The Office of the Judge Advocate General.

Question. Do you see a need for change in this role?

Answer. It is my understanding that the current process is working well; however, if I am confirmed and determine that a change is necessary, I would work closely with the Assistant Secretary of the Army (Manpower and Reserve Affairs), The Judge Advocate General, and the Deputy Chief of Staff, G-1, to effect such change, while maintaining both the integrity of the Army's promotion process and the trust of the Army Officer Corps, Congress, and the American people.

GENERAL AND FLAG OFFICER NOMINATIONS

Question. Under DOD Instruction 1320.4, adverse and alleged adverse information pertaining to general and flag officers must be evaluated by senior leaders in the Services and in the Office of the Secretary of Defense prior to nomination for promotion and certain assignments.

If confirmed, what role, if any, would you play in the officer promotion system, particularly in reviewing general officer nominations?

Answer.

- I have been informed that for all officer promotions, including general officer promotions, the Office of the Army General Counsel, in coordination with the Office of The Judge Advocate General, plays an active role in the officer promotion system, to include: Reviewing Memoranda of Instruction that govern the conduct of promotion selection boards and subsequent promotion selection board reports.
- As to officers being considered for promotion to a grade below general officer, I have been advised that adverse information that is not in an officer's official military personnel file that may be presented to the promotion selection board is reviewed to ensure it is accurate and comports with the requirements of title 10 (i.e., that it is "substantiated, relevant information that could reasonably affect the deliberations of the selection board").
- In general officer cases, the standard for adverse information that must be presented to a promotion selection board is "any credible information of an adverse nature." I have been advised that the Office of the Army General Counsel participates in a robust screening process designed to ensure that all adverse information is properly identified for presentation to the promotion selection board.
- I have been advised that when adverse information about an officer becomes available after a promotion selection board makes its recommendations, the Office of the Army General Counsel and the Office of The Judge Advocate General coordinate in providing legal advice to the Secretary of the Army. This advice enables the Secretary's determination as to whether a promotion review board should be convened to consider whether to continue to support the promotion of the considered officer or take steps to remove the officer from the promotion list.

Question. What is your understanding of the role of the General Counsel of the Department of the Army in ensuring the legal sufficiency of statutory selection board processes?

Answer. I understand that under title 10, the Secretary of the Army is responsible for the proper functioning of the Department of the Army's promotion selection process. Prior to approval by the Secretary of the Army, all Memoranda of Instruction for officer promotion selection boards are reviewed by the Office of the Army Gen-

eral Counsel, in coordination with the Office of The Judge Advocate General, to ensure the Secretary's instructions conform to statutes and accurately reflect his guidance regarding attributes necessary for service in the next grade. All reports of promotion selection boards are processed through the Office of the Army General Counsel prior to final action on the report by the Secretary. The Army General Counsel must be satisfied that the Army has met applicable statutory standards and that individual selection board reports conform to the law. The Army General Counsel must advise the Secretary of the Army of any case in which a selection board report fails to adhere to the statutory standards, either generally or with regard to a particular officer being considered for promotion. In advising the Secretary of the Army and the Office of the Assistant Secretary of the Army (Manpower and Reserve Affairs), the Army General Counsel helps to ensure that Army promotion policies properly implement applicable laws and regulations and are fairly applied.

Question. What is the role, if any, of the General Counsel of the Department of the Army in reviewing and providing potentially adverse information pertaining to a nomination to the Senate Armed Services Committee?

Answer. It is my understanding that under current Department of the Army practice, the Office of the Army General Counsel reviews each selection board report, as well as departmental communications to the Committee, the President, and the Secretary of Defense, to ensure that the reports and communications comply in form and substance with law and applicable directives and regulation. The Office of the Army General Counsel gives special attention to cases of nominees with substantiated or potentially adverse information and cases with reportable information in order to ensure that such information is reported to the Senate Armed Services Committee in a timely, accurate, and comprehensible manner.

MILITARY PERSONNEL POLICY AND CASES

Question. In your view, what role, if any, should the General Counsel and civilian attorneys assigned to the Office of General Counsel play in military personnel policy and individual cases, including cases before the Board for Correction of Military Records?

Answer. If confirmed, I will work with the Secretary of the Army, the Assistant Secretary of the Army (Manpower and Reserve Affairs), and other senior leaders, to ensure that the Army properly develops and fairly applies military personnel policies. Were I to become aware that the Department did not fairly and lawfully apply military personnel policies, I would take appropriate action to ensure that the Army properly resolves the issue. In addition, I am aware of and fully respect the independent role that the Army Board for the Correction of Military Records (ABCMR) plays in the correction of military records, and if confirmed, I would coordinate with the Assistant Secretary of the Army (Manpower and Reserve Affairs), who exercises overall responsibility for the Army Review Boards Agency, regarding the legal sufficiency of ABCMR recommendations to the Secretary of the Army.

SEXUAL ASSAULT PREVENTION AND RESPONSE POLICY

Question. Numerous cases of sexual misconduct involving soldiers have been reported from Iraq, Kuwait, and Afghanistan over the last several years. Many victims and their advocates contend that they were victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate military treatment. They asserted that the military failed to respond appropriately by providing basic services, including medical attention and criminal investigations of their charges.

What is your understanding of the resources and programs the Army has in place in deployed locations to offer victims of serious sexual assaults the medical, psychological, and legal help they need?

Answer. This is an extremely important issue for the Army and, if confirmed, I will focus significant attention on it. Although I am not fully aware of all Army initiatives or resources to help sexual assault victims, I understand that the Army has taken significant steps to improve the assistance to all victims of sexual assaults, with specific attention to victims in a deployed environment. If confirmed, I will study this matter in greater depth with a view to ensuring the Army continues to take appropriate steps to provide medical, psychological, and legal help to soldiers who are victims of sexual assault, both in garrison and in deployed locations.

Question. What is your view of the steps the Army has taken to prevent sexual assaults on female soldiers at their home stations and when they are deployed?

Answer. It is my view that the Army has taken several extremely important steps in its campaign to prevent sexual assaults on female soldiers at their home stations and when deployed. I am aware that in 2008, the Army launched a comprehensive new sexual assault prevention and response campaign that has continued to grow

through the present day. If confirmed, I will ensure that the legal community fully supports this initiative.

Question. What is your view of the adequacy of the training and resources the Army has in place to investigate and respond to allegations of sexual assault?

Answer. At this time I am not familiar with all of the Army's training and resources to investigate and respond to allegations of sexual assault. If confirmed, I will assess whether additional steps should be taken to support victims and hold offenders accountable.

Question. Do you consider the Army's current sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Answer. I have been advised that the Army has focused both on eliminating sexual assault from its ranks and on increasing victim support—both key elements of an effective program to address sexual assault. I have been advised that part of the focus on victim support involves an option for confidential reporting (also called "restricted" reporting), which I understand allows sexual assault victims to disclose, confidentially, the details of their assault to specified individuals and to receive medical treatment and counseling without triggering the official investigative process. If confirmed, I will work with knowledgeable professionals to assess and ensure the continuation of effective Army programs in this regard.

Question. Specifically, do you think that Sexual Assault Response Coordinators should be attended a confidentiality privilege in order to help them perform their duties more effectively?

Answer. If confirmed, I will work with knowledgeable professionals to determine whether extending a confidentiality privilege to Sexual Assault Response Coordinators would allow them to perform their duties more effectively.

WHISTLEBLOWER PROTECTION

Question. Section 1034 of title 10, U.S.C., prohibits taking retaliatory personnel action against a member of the Armed Forces as reprisal for making a protected communication. By definition, protected communications include communications to certain individuals and organizations outside of the chain of command.

If confirmed, what actions will you take to ensure that senior military leaders understand the need to protect servicemembers who report misconduct to appropriate authorities within or outside the chain of command?

Answer. Whistleblower protections for military personnel affirm that members of the Armed Forces must be free from reprisal for making or preparing a protected communication to a Member of Congress; an Inspector General; a member of a DOD audit, inspection, investigation, or law enforcement organization; or any other person or organization (within or outside the chain of command) designated under regulations or established procedures to receive such communications. I believe that these protections are essential. If confirmed, I will work with The Judge Advocate General to ensure that senior military leaders are fully and accurately advised of the whistleblower protections accorded by law and regulation to all soldiers, and that they understand their legal responsibilities in this important area. In addition, I will ensure that any individual cases involving allegations of reprisal that may come to my attention are fully addressed in accordance with the law.

SUPPORT TO ARMY INSPECTOR GENERAL

Question. What role, if any, do you think the General Counsel of the Army should have in reviewing the investigations and recommendations of the Army Inspector General?

Answer. If confirmed as the chief legal officer of the Department of the Army and counsel to the Secretary of the Army and other Secretariat officials, I will establish and maintain a close, professional relationship with The Inspector General, and will communicate with him directly and candidly. I will provide independent and objective legal advice to The Inspector General and the Secretary with regard to all matters that relate to Inspector General programs, duties, functions, and responsibilities. In coordination with The Judge Advocate General, I will oversee the provision of effective legal guidance to the Office of The Inspector General in conducting investigations and making recommendations. Further, as part of my responsibility to review legal and policy issues arising from the Army's intelligence and counterintelligence activities, I will advise The Inspector General concerning proper reporting of the Army's intelligence oversight activities.

WOMEN IN COMBAT

Question. Current DOD policies regarding the combat role of women in uniform have been in effect since 1994.

What is your understanding of the conclusions and lessons that have been learned from operations in Iraq and Afghanistan about the feasibility of current policies regarding the assignment of women?

Answer. At this time, I do not have enough information to make an informed assessment of the conclusions and lessons learned from operations in Iraq or Afghanistan in regard to women in combat. It is my understanding that the Army is in compliance with DOD policy relating to the assignment of women.

Question. What is your assessment of the Army's compliance with the requirements of law relating to the assignment of women?

Answer. It is my understanding that the Army is in compliance with the requirements of the DOD policy relating to women in combat. Women have and will continue to be an integral part of the Army team, performing exceptionally well in all specialties and positions open to them.

CIVILIAN ATTORNEYS

Question. Judge advocates in the Armed Forces benefit from an established career progression, substantial mentoring and training opportunities, and exposure to a broad spectrum of legal areas and leadership responsibilities. By contrast, civilian attorneys in the Military Departments normally do not have established career programs and may do the same work for many years, with promotion based solely upon longevity and vacancies.

What is your understanding of the personnel management and career development system for civilian attorneys?

Answer. It is my view that robust attorney career development programs result in excellence in client service, the recruitment and retention of high-performing professionals, and building the bench for the future. If confirmed, I will be in a position to examine this issue closely to ensure comprehensive and effective personnel management and career development programs for civilian attorneys.

Question. In your view does that system need revision? If so, what do you see as the major problems and what changes would you suggest?

Answer. As discussed above, robust attorney career development programs result in excellence in client service, the recruitment and retention of high-performing professionals, and build the bench for the future. However, it may be appropriate to review past experience with a view toward identifying any areas that can be approved. If confirmed, I will be in a position to examine this issue closely to ensure comprehensive and effective personnel management and career development programs for civilian attorneys.

CLIENT

Question. In your opinion, who is the client of the General Counsel of the Department of the Army?

Answer. The client of the General Counsel of the Department of the Army is the Department of the Army, acting through its authorized officials.

ACQUISITION ISSUES

Question. What role should the General Counsel play in ensuring that Army procurement programs are executed in accordance with the law and DOD acquisition policy?

Answer. If confirmed, I will work closely with the Secretary of the Army, the Assistant Secretary of the Army (Acquisition, Logistics and Technology), and other senior Department of the Army leaders to ensure that the Department of the Army's acquisition and procurement programs are executed in accordance with applicable provisions of the U.S. Code, as well as controlling regulations and policies. Today's acquisition professionals face the challenge of managing their programs' cost, schedule, and performance while remaining in compliance with a myriad of legal and policy requirements. I believe it is the responsibility of Army lawyers to proactively assist their acquisition clients in meeting that challenge. From the earliest stages of program development, counsel should be involved in identifying potential issues and, where appropriate, legally-compliant alternative courses of action. In those rare situations where an issue cannot be satisfactorily resolved, it is incumbent on counsel to elevate their concerns promptly in order to protect the Department's overarching interests.

Question. What role should the General Counsel play in ensuring that Army acquisition officials understand flexibilities provided by Congress in the acquisition and financial statutes and can take advantage of those flexibilities to act in the best interests of the Army?

Answer. If confirmed, I would work closely with the Assistant Secretary of the Army (Acquisition, Logistics and Technology) and the Assistant Secretary of the Army (Financial Management and Comptroller) to ensure that the Army's acquisition programs and financial operations are executed in a manner that is consistent with their governing legal framework and to challenge program strategies that may be premised on an unduly restrictive interpretation of the applicable authorities.

Question. What role should the General Counsel play in ensuring that ethics provisions on conflict of interest are followed both by Army personnel and by Army contractors?

Answer. Structuring departmental business practices to avoid both personal and organizational conflicts of interest should be one of the Army's highest priorities. If confirmed, I will work closely with the Secretary of the Army, the Assistant Secretary (Acquisition, Logistics, and Technology) and other senior departmental officials to promote an organizational climate that is sensitive to the need to avoid conflicts of interest and that reacts appropriately when specific issues arise. I believe that Army lawyers can make a significant contribution to this endeavor through the provision of acquisition ethics training and through early and sustained involvement in the Department's acquisition programs and procurement activities.

Question. Allegations of fraud and abuse during contingency contracting in Iraq and Afghanistan have been wide-spread.

What role should the General Counsel play in ensuring that Army personnel are properly trained in contingency contracting and are supervised in the performance of their duties?

Answer. If confirmed, I will work closely with the Secretary of the Army, the Assistant Secretary of the Army (Acquisition, Logistics, and Technology), and other senior Department of the Army personnel to ensure that the legal community continues to support fully the initiatives currently being implemented to improve contingency contracting and to enhance the contracting workforce overall. I would also work closely with The Judge Advocate General of the Army and the other legal offices to ensure that adequate legal resources are available to support the contingency contracting mission.

DETECTING CONFLICTS OF INTEREST

Question. Personal and organizational conflicts of interest have become a major concern. DOD's expanded use of private contractors being tasked to perform key functions that the Services had formerly performed in-house and the new requirement to fill thousands of DOD civilian positions with experienced, qualified individuals present challenges in preventing conflicts of interest and the appearance of conflicts of interest.

What do you think the Army should do, and what should the General Counsel's role be, in ensuring that the Army identifies personal and organizational conflicts of interests and takes the appropriate steps to avoid or mitigate them?

Answer. If confirmed, I would closely examine the Army's process for reviewing and preventing both personal and organizational conflicts of interest. I believe that ethics awareness and instruction for all personnel is vitally important, and I would ensure that ethics training is a priority at all echelons. Bringing functions back "in-house" must be closely monitored with respect to former contractor employees and their relationships to their former employers. If confirmed, I would work closely with senior Army officials to foster a high level of organizational sensitivity to these concerns and to assist in the appropriate resolution of individual situations that may arise.

Question. What is your understanding of the steps the Army takes to identify and address potential conflicts of interest during the hiring process?

Answer. I understand that financial disclosure reporting is a primary source of information to identify and prevent conflicts of interest. If confirmed, I would emphasize the importance of properly identifying positions requiring financial disclosure reporting and ensure that rigorous and timely review of the reports is accomplished by both ethics counselors and supervisors. If confirmed, I will emphasize education in conflicts of interest in the Army's ethics training program.

Question. Recent reports have raised concerns about potential personal conflicts of interest by contractor employees, including retired general and flag officers ("senior mentors") who advise senior government officials.

What is your understanding of existing statutes and regulations pertaining to personal conflicts of interest by contractor employees who advise senior government officials?

Answer. I understand that concerns have been raised in media reports about the Military Services' senior mentor programs. In the past, the Army's senior mentors

often were contractor employees, but I understand the Secretary of Defense and Secretary of the Army have issued policies that mandate employment of senior mentors as Highly-Qualified Experts (HQEs). This means they are Federal Government employees and not contractor employees. Further, I understand that in this capacity, senior mentors file public financial disclosure reports, which are reviewed by their supervisors and Army ethics counselors for financial conflicts of interest. Thus, all the normal statutes and regulations pertaining to employee conflicts of interest now apply to senior mentors. With respect to other contractor employees who might advise senior government officials, if confirmed, I would emphasize the importance of finding acceptable employment or contract arrangements that would minimize conflicts of interest, or any appearance thereof, that could undermine the public's confidence in the integrity of this program.

Question. Do you see any need for changes to these statutes and regulations?

Answer. At the present time, with the Secretary of Defense and Secretary of the Army policies pertaining to senior mentors in place, I believe that the statutes and regulations on personal conflicts of interest adequately protect the public interest. If confirmed, I would monitor this issue and, if I concluded that any changes were warranted, I would proceed through the Department's procedures for proposing legislative and regulatory changes.

Question. What role do you see for the General Counsel in identifying and addressing potential conflicts of interest by employees of Army contractors?

Answer. In my opinion, the Army General Counsel should work closely with the Assistant Secretary of the Army (Acquisition, Logistics and Technology) to ensure compliance with restrictions imposed by the Federal Acquisition Regulation pertaining to organizational conflicts of interest. I also would ensure that Army lawyers emphasize this area as part of the Department of the Army's program for annual ethics training.

LEGAL ETHICS

Question. What is your understanding of the action a Department of the Army attorney or an Army judge advocate should take if the attorney becomes aware of improper activities by a Department of the Army official who has sought the attorney's legal advice and the official is unwilling to follow the attorney's advice?

Answer. Army attorneys generally provide legal advice to Army officials in their capacity as representatives of the Department of the Army. The Department of the Army is the attorney's client, and no attorney-client privilege is established between the attorney and the Army official. When an Army attorney advises an Army official, the official may use that advice to exercise official functions and duties. If an Army attorney suspects that the individual Army official, either in exercising such functions or in failing to do so, violates a law or standard of conduct, I believe the attorney has an obligation to report the potential violation to the appropriate higher authority.

Question. Do you believe that the present limits on pro bono activities of government attorneys are generally correct as a matter of policy or does the policy need to be reviewed and revised?

Answer. I understand that government attorneys may participate in pro bono activities so long as the representation is consistent with general governmental ethical rules and with the rules of professional responsibility applicable to attorneys. I understand that Army civilian attorneys may, for instance, perform pro bono work with supervisory approval so long as the representation does not occur on government time or at its expense, does not interfere with official duties, and does not create a conflict of interest or the appearance of a conflict of interest. I understand the Army also operates a legal assistance program for soldiers and their families, providing free services in areas such as family law, wills and estate planning, tax law, landlord/tenant matters, contract disputes, consumer law, and assistance during the disability evaluation system. If confirmed, I would review the current policies in coordination with The Judge Advocate General and recommend revisions, if appropriate.

Question. In your view, do the laws, regulations, and guidelines that establish the rules of professional responsibility for attorneys in the Department of the Army provide adequate guidance?

Answer. The Army has comprehensive regulations, based upon the American Bar Association Model Rules of Professional Conduct, that govern the ethical conduct of Army lawyers, both military and civilian. All Army attorneys must, at all times, be in good standing with the licensing authority of at least one State, territory of the United States, the District of Columbia, or the Commonwealth of Puerto Rico. This regulatory system would appear to provide adequate guidance; however, if con-

firmed, I would review the current policy, in coordination with The Judge Advocate General and, as appropriate, recommend revisions.

LITIGATION INVOLVING THE DEPARTMENT OF THE ARMY

Question. What is your understanding of the relationship between the Department of the Army and the Department of Justice with respect to litigation involving DOD?

Answer. The Department of Justice represents the Department of the Army in civil litigation. In general, it is my understanding that coordination between the Department of Justice and the Department of the Army is timely and consistent on every level. If confirmed, I will work with The Judge Advocate General and the General Counsel of DOD to ensure the continuation of a collaborative relationship with the Department of Justice with respect to litigation involving the Department of the Army.

Question. In your view, does the Department need more independence and resources to conduct its own litigation or to improve upon its current supporting role?

Answer. The Department of the Army's interests in civil litigation are effectively protected and defended by the Department of Justice. If confirmed, I will work with The Judge Advocate General to ensure that adequate resources are available to ensure that the Army is able to provide the appropriate level of support to the Department of Justice and to protect the Army's interests and equities in civil litigation in which it is involved.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the General Counsel of the Department of the Army?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[The nomination reference of Brad R. Carson follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
September 15, 2011.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Brad Carson, of Oklahoma, to be General Counsel of the Department of the Army, vice Benedict S. Cohen, resigned.

[The biographical sketch of Brad R. Carson, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF BRAD ROGERS CARSON

Degrees Completed

- University of Oklahoma College of Law, Norman, OK. Juris Doctorate with Highest Honors. Attended 1991–1994.
- Trinity College, Oxford University, Oxford, United Kingdom. M.A. Politics, Philosophy, and Economics. Attended 1989–1991. (Attended as Rhodes Scholar).
- Baylor University. Waco, TX. B.A. magna cum laude with highest honors. Attended 1985–1989.

Professional Experience

- Associate Professor of Law and Business, University of Tulsa, January 2010–present. Joint appointment in University of Tulsa College of Law and the Collins College of Business at the University of Tulsa. Classes taught include: Property, Energy Policy, Negotiations and Game Theory, and Seminar on Globalization.
- Director, National Energy Policy Institute, Tulsa, OK, January 2010–present. Directs research institute devoted to better understanding American energy policy options. Completed multi-million dollar study, buttressed by more than 20 technical papers, entitled “Toward a New National Energy Policy: Assessing the Options.” Organizing semiannual conferences and numerous symposia on energy issues. Spring 2011 Conference entitled “OPEC at 50: Its Past, Present, and Future in a Carbon-Constrained World.”
- Officer-In-Charge, Weapons Intelligence Teams, 84th Explosive Ordnance Disposal Battalion, Multi-National Division South, Iraq, December 2008–December 2009. Awarded Bronze Star, Army Achievement Medal.
- President and Chief Executive Officer, Director, Cherokee Nation Businesses, L.L.C., Catoosa, OK, April 2005–December 2008.
- Fellow, Institute of Politics, Harvard University, Cambridge, MA, 2005. Led seminar at Harvard University on contemporary American politics.
- U.S. House of Representatives, Washington, DC, Member of Congress, 2nd District of Oklahoma, 2001–2005, 107th and 108th Congresses.
- Department of Defense, Pentagon, Arlington, VA, Special assistant to the Secretary of Defense for Special Projects and White House Fellow, 1997–1998.
- Crowe & Dunlevy, P.C., Tulsa, OK, Antitrust Attorney, 1994–1997, 1999.

Memberships

- U.S. Association for Energy Economics, council member, 2010–present.
- Oklahoma Bar Association, Member, 1994–present.
- Society of Petroleum Engineers, Member, 2011.
- American Association for the Advancement of Science, 2010–present.

Selected Activities and Honors

- Bronze Star. 2010.
- Army Achievement Medal. 2010.
- Board of Directors, National Job Corps Association, 2005–2008.
- U.S. Junior Chamber of Commerce Ten Outstanding Young Americans, Awarded 2002.
- Rhodes Scholar, 1989–1991.
- White House Fellow, 1997–1998.
- Exceptional Contribution to Legal Services of Eastern Oklahoma, Awarded 1996.
- Bledsoe Award for Outstanding Law School Graduate from the University of Oklahoma, 1994.
- Adjunct Professor of Law (Law and Literature), University of Tulsa College of Law, 1997.
- Legal Services of Eastern Oklahoma Board of Directors, 1997.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Brad R. Carson in connection with his nomination follows:]

1305

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Brad Rogers Carson.

2. **Position to which nominated:**
General Counsel, U.S. Army.

3. **Date of nomination:**
September 15, 2011.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
March 11, 1967; Winslow, AZ.

6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Julie Kruse Carson.

7. **Names and ages of children:**
Jack David Carson, age 5.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
Baylor University, B.A. 1989 (1985-1989)
Oxford University, B.A./M.A. 1991 (1989-1991)
University of Oklahoma, J.D. 1994 (1991-1994)

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

U.S. Congressman, 2nd District of Oklahoma, 2001-2005, Washington, DC.
Fellow, Kennedy School of Government, Harvard University, 2005, Cambridge, MA.

CEO & President/Director, Cherokee Nation Businesses, LLC, 2005-2008, Catoosa, OK.

Officer-In-Charge, Weapons Intelligence Teams, MND-S, 2008-2009, Iraq.
Associate Professor of Business, Associate Professor of Law, University of Tulsa, 2009-present, Tulsa, OK.

Director, National Energy Policy Institute, University of Tulsa, 2009-present, Tulsa, OK.

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

White House Fellow, Special Assistant to the Secretary of Defense, 1996-1997.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Director, Cherokee Nation Businesses, LLC, 2009–present.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Oklahoma Bar Association, Member, 1994–present.

U.S. Association for Energy Economics, Council Member, 2010–present.

Society of Petroleum Engineers, Member, 2011.

American Association for the Advancement of Science, Member, 2010–present.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

U.S. Congress, 2nd District of Oklahoma.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Obama for America National Finance Committee.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

Williams for City Council, 2011, \$500

Smith-Soap for Chief, 2011, \$5,000

Obama for America, 2011, \$1,000

Reid for Senate, 2010, \$1,000

Edmondson for Governor, 2010, \$4,000

Gumm for Senate, 2010, \$1,000

Williams for House, 2010, \$500

Burrage for Senate, 2010, \$2,000

Boren for Congress, 2010, \$2,000

Paddock for State Superintendent, 2010, \$750

Adelson for Mayor, 2009, \$3,000

AmeriPac, 2008, \$2,500

Adelson for Senate, 2008, \$2,000

Hoskin for House, 2008, \$250

Boren for Congress, 2007, \$1,000

Jim Himes for Congress, 2007, \$1,000

Rice for Senate, 2007, \$500

Rice for Senate, 2008, \$250

Snyder for House, 2007, \$250

Obama for America, 2007, \$4,600

Sparks for Senate, 2006, \$250

Burrage for Senate, 2006, \$1,000

Regan for Lt Gov, 2006, \$500

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Bronze Star, 2009.

Army Achievement Medal, 2009.

Board of Directors, National Job Corps Association, 2005–2008.

U.S. Junior Chamber of Commerce Ten Outstanding Young Americans, 2002.

Rhodes Scholar, 1989–1991.

White House Fellow, 1997–1998.

Exceptional Contribution To Legal Services Of Eastern Oklahoma, 1996.

Bledsoe Award For Outstanding Law School Graduate From The University Of Oklahoma, 1994.

Adjunct Professor of Law (Law and Literature). University of Tulsa College of Law, 1997.

Legal Services of Eastern Oklahoma Board of Directors, 1997.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

“The Liberal Moment: What Happened?” in Symposium Issue of Democracy: A Journal of Ideas (along with Michael Sandel, Michael Walzer, Danielle Allen, William Galston, Martha Nussbaum, Robert Reich, Katha Pollit, and Joe Klein) (Spring 2010).

“The Claremore Diarist” in The New Republic (November 22, 2004).

“Does the Democratic Party Have a Future?” in The Weekly Standard (September 16, 2002) (review of The Emerging Democratic Majority by Judis and Teixeira).

“Pay to Play,” in Blueprint Magazine (May 31, 2005).

“The Fall of the House of Representatives” in *Democracy: A Journal of Ideas* (September 2006) (review of *The House: A History of the House of Representatives* by Remini).

Federal Appellate Practice (with Robert E. Bacharach) in *Appellate Manual for Oklahoma Lawyers* (eds. Muchmore & Ellis) (3 vols.) (1997).

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies and are on topics relevant to the position for which you have been nominated.

N/A.

17. Commitments regarding nomination, confirmation, and service:

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

BRAD R. CARSON.

This 3rd day of November, 2011.

[The nomination of Brad R. Carson was reported to the Senate by Chairman Levin on December 15, 2011, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on December 17, 2011.]

[Prepared questions submitted to Kevin A. Ohlson by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DUTIES

Question. Subchapter XII of Chapter 47 of title 10, U.S.C., establishes the U.S. Court of Appeals for the Armed Forces (USCAAF) and provides for its organization and administrative procedures.

What is your understanding of the duties and functions of the USCAAF and its judges?

Answer. The duty of the judges on the USCAAF is to ensure independent civilian oversight of the military courts. This responsibility is accomplished through appellate review of the decisions of the military courts of criminal appeals. The judges also have the duty of serving on the Code Committee which meets annually for the purpose of making an annual survey of the operations of the Uniform Code of Military Justice (UCMJ). This committee also is responsible for preparing an annual report that, among other things, provides information about the number and status of pending cases in the military court system.

The function of the USCAAF is to provide independent civilian oversight of the military justice system through appellate review of the decisions of the military courts of criminal appeals. In exercising this responsibility, the USCAAF is responsible for reviewing those cases where a military court of criminal appeals has affirmed a death sentence, where a Service Judge Advocate General orders a case to be sent to the USCAAF after it has been reviewed by a military court of criminal appeals, and where, upon petition of the accused and for good cause shown, the USCAAF has granted review of a decision rendered by a military court of criminal appeals.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. First, I served as a judge advocate officer in the U.S. Army for 4 years. During that time I not only became familiar with the military justice system by serving as a trial counsel and prosecuting a number of criminal cases, I also became familiar with the men, women, mission, and ethos of the U.S. Armed Forces. I achieved the latter by attending Air Assault school, attending Airborne school, being on "jump status" as a parachutist at Fort Bragg for 4 years, deploying to four foreign countries, and serving in Saudi Arabia (with two very brief forays into Iraq) during the Persian Gulf War and being awarded the Bronze Star.

Second, I served as a Federal prosecutor in the U.S. Attorney's Office for the District of Columbia. In that capacity I indicted and prosecuted a wide variety of cases in a fast-paced, high-volume office, and I became very familiar with the criminal justice system and the duties and responsibilities of prosecutors.

Third, I was appointed as a member of the Board of Immigration Appeals. In that position, I served in a judicial capacity deciding appeals in immigration cases. This professional opportunity enabled me to gain an understanding and appreciation of the role and function of adjudicators at the appellate level.

Fourth, I served as a senior manager within the Department of Justice, and the experiences I had in those positions would help me to run an efficient and productive chambers if I were to have the honor of being confirmed by the Senate.

Fifth, I served for 2 years as the Chief of Staff and Counselor to the Attorney General, which provided me with a broad appreciation of the policy issues that confront any criminal justice system.

Sixth, I currently serve as the Chief of the Department of Justice's Professional Misconduct Review Unit. In collaboration with the attorneys who work for me, I review instances where Federal prosecutors have been accused of misconduct, I determine whether misconduct actually occurred, I write detailed memoranda explaining my reasoning, and then I impose discipline, if appropriate. Serving in this position has reinforced for me the vital importance of performing one's duties consistent with the highest standards of honor, excellence, integrity, and fairness.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of a judge on the USCAAF?

Answer. Being considered for a position that is as important, as challenging, and as consequential as serving as a judge on the USCAAF is a tremendous honor, and I would very willingly take any steps that may be helpful in enhancing my ability to perform those duties. Accordingly, if I have the privilege of being confirmed by the Senate, and even during the confirmation process, I will endeavor to obtain a more in-depth knowledge of the legal issues facing the USCAAF by reviewing and refreshing my memory of the UCMJ, the Rules for Courts-Martial, and the Military Rules of Evidence, and by reading key decisions of the USCAAF and scholarly articles about the military justice system.

RELATIONSHIPS

Question. What are the respective roles of each of the following with respect to the military justice system, and if confirmed, what would your relationship be with: The Secretary of Defense.

Answer. The Secretary of Defense is authorized to be a convening authority for general or special courts-martial, and may promulgate orders and regulations that are actionable under the UCMJ. Further, because the Secretary is responsible for the formulation of policy related to matters directly affecting the Department of Defense (DOD), working through the Joint Services Committee the Secretary may propose legislative or other changes to the Manual for Courts-Martial (MCM) and the UCMJ.

However, Article 141 of the UCMJ clearly states that the USCAAF is located in DOD "for administrative purposes only". Therefore, although it is unlikely that I would have any interaction with the Secretary of Defense even if I were confirmed, if I did so I would treat him or her with the greatest respect and courtesy, but I would always be mindful of the fact that, when it comes to my professional duties and responsibilities, USCAAF judges are wholly independent of the Secretary of Defense.

Question. The Chief Judge of the USCAAF.

Answer. The Chief Judge of the USCAAF is selected based on seniority of commission among those judges on the court who have not previously served in that position. The term of service is 5 years. The Chief Judge presides at court sessions, and oversees the administrative functions of the court. If confirmed, my relationship with the Chief Judge would be both collegial and respectful, but when it comes to decision-making in cases, I would fully exercise my independent judgment.

Question. Judges of the USCAAF.

Answer. If confirmed, I would expect my relationship with the other judges on the court to be very collegial, and I would closely listen to and consider their points-of-view on all issues that come before the court. However, when it comes to a vote on a petition, a writ, or a case, if confirmed, I would exercise my independent judgment in each and every matter.

Question. The military courts of criminal appeals.

The USCAAF reviews all cases where a military court of criminal appeals has affirmed a death sentence, where a Service Judge Advocate General orders the case to be sent to the USCAAF after it has been reviewed by a military court of criminal appeals, and where, upon petition of the accused and for good cause shown, the USCAAF has granted review of a decision rendered by a military court of criminal appeals. If confirmed, I would give full and due consideration to the analysis and reasoning of members of the military courts of criminal appeals in each and every case that comes before me. However, I ultimately would exercise my independent judgment in deciding each case.

Question. The General Counsel of the Department of Defense.

Answer. Although the General Counsel is the chief legal officer of DOD, Article 141 of the UCMJ states that the USCAAF falls under the Department for administrative purposes only. Thus, the court does not fall under the purview, management, or supervision of the General Counsel. However, the General Counsel does have the authority to exercise those delegated duties as the Secretary may prescribe, and thus coordinates any proposed legislative changes to the UCMJ that the Joint Services Committee may recommend. If confirmed, my relationship with the General Counsel would be respectful and cordial, but I would act independently in my role as a judge.

Question. The Judge Advocates General of the Army, Navy, and Air Force, and the Staff Judge Advocate to the Commandant of the Marine Corps.

Answer. The Judge Advocates General of the Army, Navy, and Air Force, and the Staff Judge Advocate to the Commandant of the Marine Corps, provide advice on military justice matters to the Service Chiefs and to the Commandant, respectively. They are responsible for such actions as supervising the administration of military justice, overseeing the judge advocates and military judges within their Service, and reviewing and taking action on certain records of trial. Additionally, a Judge Advocate General may certify questions to the USCAAF, and serves as a member of both the Joint Services Committee and the Code Committee. If confirmed, my relationship with these senior officers would be collegial and respectful, but I would always maintain my judicial independence and neutrality.

LEGAL ISSUES

Question. What do you anticipate would be the most significant legal issues you will be called upon to address if confirmed as a judge of the USCAAF?

Answer. If confirmed, undoubtedly one of the most significant legal issues I would be called upon to address would be the changes to Article 120 of the UCMJ regarding the offense of rape. I also firmly believe that when deciding cases, the judges on the USCAAF must continue to be vigilant about protecting the integrity of the military justice system from the corrosive effects of command influence and ineffective assistance of counsel. Finally, I believe the court will be confronted with issues arising from the use of emerging technology as it pertains to such issues as possession of child pornography and the right of privacy.

JURISDICTION OF THE USCAAF

Question. In your view, has the USCAAF fulfilled the expectations of Congress when the court was established in 1951?

Answer. Yes, very much so. Not only has the court provided the necessary civilian oversight of the military justice system, it also has provided independent judicial review in military justice cases and has served as a bulwark against unlawful command influence.

Question. In your view, are there any legislative changes needed regarding the role and responsibilities or the jurisdiction of the USCAAF?

Answer. I am not aware of the need for any changes at this time.

UCMJ JURISDICTION OVER CIVILIANS

Question. Section 552 of the John Warner National Defense Authorization Act for Fiscal Year 2007 amended the UCMJ to clarify that persons serving with or accompanying an Armed Force in the field are subject to the UCMJ during a contingency operation as well as in a time of declared war.

What challenges, if any, do you anticipate that the armed services and the USCAAF will encounter in implementing the UCMJ with regard to persons serving with or accompanying an Armed Force in the field?

Answer. As with any new law that has not been thoroughly reviewed by the courts, there likely will be a number of challenges to this piece of legislation when and if it is invoked in any additional cases in the future. First and foremost, if it is a U.S. citizen who is prosecuted pursuant to this provision of the UCMJ, the issue will undoubtedly arise whether its application to a civilian violates a defendant's constitutional guarantees, such as the right to a trial by a jury of one's peers. Second, the USCAAF will have to wrestle with determining the scope of the law. For example, issues that may arise in any specific case will likely include determining the definition of such phrases as "serving with or accompanying an Armed Force," "in the field," and "contingency operation." Third, there will be issues about whether the appropriate person within the military command structure exercised jurisdiction in any particular case.

The armed services also will likely encounter challenges when implementing this UCMJ provision. I anticipate that when confronted with a case where this UCMJ provision is potentially applicable, the armed services may become concerned about the need to delay taking action until the Department of Justice (DOJ) has reviewed the case to determine whether DOJ will exercise jurisdiction. Further, when a particular case arises, depending upon the circumstances of the alleged offense, the American public may express concerns about the invocation of this provision of the UCMJ and the resulting prosecution of a civilian who is a U.S. citizen in the military justice system.

DECISIONS OF THE USCAAF

Question. Please describe the three decisions of the USCAAF since 2005 which you believe to have been the most significant.

Answer. *United States v. Lewis*, 63 M.J. 405 (C.A.A.F. 2006). This case reiterates the fact that unlawful command influence is the mortal enemy of military justice and that, where it is found to exist, judicial authorities must take those steps necessary to preserve both the actual fairness, and the apparent fairness, of criminal proceedings.

United States v. Prather, 69 M.J. 338 (2010). In this case the accused was charged with aggravated sexual assault for engaging in sexual intercourse with a person who was substantially incapacitated. The court held that an accused's burden to prove the affirmative defense of consent by a preponderance of the evidence unconstitutionally shifted the burden onto the defense to disprove an element of the offense.

United States v. Lee, 66 M.J. 387 (2008). After conviction at court-martial, the accused alleged that his detailed defense counsel failed to adequately disclose a conflict of interest. The USCAAF held that counsel provided to or retained by the ac-

cused must provide reasonably effective assistance, and that where a constitutional right to counsel exists, there is a correlative right to representation that is free from conflicts of interest.

Question. What is your view of the role of stare decisis in terms of prior decisions of the USCAAF?

Answer. The doctrine of stare decisis is an essential guiding principle for any appellate court. In the military justice system this doctrine is especially important because it provides both commanders and servicemembers with needed stability, consistency, and predictability regarding the handling of criminal offenses. However, there may be rare instances where applicable precedent should be overturned. This step should only be taken after long and careful consideration, and in those instances when it does occur, I believe the judges of the USCAAF are obligated to explain their rationale for doing so clearly, fully, and persuasively.

Question. In view of Article 36 of the UCMJ, what is your view as to the hierarchy of sources of law that must be applied by the USCAAF in determining appropriate rules of evidence and procedure in courts-martial?

Answer. First and foremost, the USCAAF must ensure that its decisions are consistent with the Constitution. The USCAAF is also bound by the decisions of the U.S. Supreme Court. Next, the court should look to the provisions of the UCMJ, other applicable Federal statutes, and its own precedents. Then the court should apply the rules and procedures set forth in the MCM. Finally, the court should look to DOD and Service regulations.

Question. In your view, what is the appropriate standard for determining when the USCAAF should apply a rule that is different from the rule generally applied in the trial of criminal cases in the Federal district courts?

Answer. When the MCM and the Military Rules of Evidence provide guidance in a particular matter, and when that guidance is not contrary to or inconsistent with the Constitution, binding Supreme Court precedent, or the UCMJ, then those rules are applicable. It is only when the MCM or the Military Rules of Evidence are silent on an issue that the court should look to analogous rules applicable in the Federal civilian courts.

MILITARY JUSTICE SYSTEM

Question. In your view, what are the major strengths and weaknesses of the military justice system?

Answer. In my view, the following are the major strengths of the military justice system. First, every accused in the military is entitled to a free, qualified defense counsel at every step of the judicial process. Second, there are sufficient resources devoted to criminal cases in the military so that every case receives the necessary and proper amount of attention. Third, in the military justice system there is no undue pressure for either the government or the defendant to plea bargain a case. Fourth, the accused's right to be present at, and to participate in, the Article 32 proceeding far exceeds any rights that a similarly-situated defendant would have in the civilian justice system. Fifth, the jurors in the military are uniformly educated, informed, and engaged.

In my view, the two greatest weaknesses of the military system are the potential for command influence to play a role in the ultimate outcome of a criminal case, and the flawed perception among some that the military system doles out "drumhead justice" because of their mistaken belief that the rights of the accused are not adequately protected.

Question. What is your view of the relationship between the rights of Service personnel and the disciplinary role of commanders?

Answer. At the core of the UCMJ is the delicate balance that exists between the rights of servicemembers on the one hand and the need for commanders to maintain good order and discipline on the other hand. In the military justice context, an effective military force is grounded both on the high morale that is sustained by the knowledge and belief of the average servicemember that he or she will be treated fairly and that his or her rights will be protected, and on the ability of commanders to enforce high standards of behavior in a wide variety of situations, some of which are not analogous to those found in civilian society. In striking this balance, the UCMJ empowers a commander to take such steps as serving as the convening authority and selecting court members, while at the same time providing servicemembers with a variety of rights and with strong protections against command influence. The fact that fundamental changes to the military justice system have been relatively rare over the last 6 decades serves as a testament to the fact that the UCMJ has struck this balance correctly.

Question. Do you think that changes to the military justice system are called for in light of the experiences of the armed services in Iraq and Afghanistan?

Answer. I believe the military justice system has proven itself to be remarkably adept at adjusting to the varied situations arising out of the many operations, missions, and deployments of our Armed Forces during the last decade. Accordingly, I am not currently aware of any changes that are needed in light of the experiences of the armed services in Iraq and Afghanistan. However, if confirmed, I would always be keenly interested in any recommendations that may be generated by the Joint Services Committee or the Code Committee, as well as any legislative proposals that may be made by, or to, Congress, including the Senate Armed Services Committee.

CAPITAL CASES IN THE ARMED FORCES

Question. The ability of the military justice system to provide qualified personnel and resources necessary to capably defend and prosecute death penalty cases and respond to the constitutional requirements associated with such cases has come under scrutiny.

What is your understanding of the requirements under constitutional precedent for the defense of a capital case?

Answer. In *Strickland v. Washington*, 466 U.S. 668 (1984), the Supreme Court established a framework for determining whether the performance of a defense counsel in a capital case was constitutionally adequate. Specifically, *Strickland* requires the defendant to prove both that the counsel's representation was deficient, and that there is a reasonable probability that, but for the counsel's deficiency, the outcome of the trial would have been different. In later cases the Supreme Court held that failure to conduct a thorough investigation of potential mitigating factors may constitute ineffective assistance of counsel. (See *Wiggins v. Smith*, 123 S. Ct. 2527 (2003); *Porter v. McCollum*, 130 S. Ct. 447 (2009).)

Question. Based on your review of military jurisprudence regarding death penalty cases since the U.S. Supreme Court ruling in *Furman v. Georgia*, what are the issues or errors that have most frequently resulted in overturning of death sentences on appeal?

Answer. In the vast majority of death penalty cases in the military that have been overturned on appeal, the reason for the reversal has been due to ineffective assistance of counsel.

Question. What do you consider to be the essential elements in preparing court-martial practitioners for the prosecution and defense in capital cases?

Answer. In capital cases it is critically important for both the trial counsel and the defense counsel to be top-notch lawyers of the highest caliber. Next, these lawyers must receive the necessary training in order to ensure that they are fully aware of all the facets of handling a capital case so that they will be informed and effective advocates at each stage of the proceedings. Further, these lawyers must have significant experience litigating cases; training is vitally important, but there is no substitute for hands-on litigation experience in the courtroom when handling a capital case. Next, the lawyers must have ready access to assistance and support in handling certain legal aspects of issues that are unique to capital cases. Lastly, the lawyers on both sides must have adequate time to prepare their cases. Even great lawyers with great training, great experience, and great access to resources cannot perform at a level commensurate with what we must demand in all capital cases unless they have adequate time to analyze and prepare the case.

COMMAND INFLUENCE

Question. The problem of command influence, including instances involving judge advocates as well as commanders, is a constant threat to the military justice system.

What is your view as to the role of the USCAAF in addressing this problem?

Answer. As the USCAAF reiterated in *United States v. Lewis*, unlawful command influence is the mortal enemy of military justice, and where it is found to exist, judicial authorities must take those steps necessary to preserve both the actual and apparent fairness of criminal proceedings. Accordingly, the USCAAF has been, and must continue to be, vigilant against the corrosive effects of unlawful command influence at every stage of legal proceedings. Further, the court must ensure that all allegations of unlawful command influence are fully litigated at trial and on appeal. Finally, in those cases where unlawful command influence has occurred, the court must take strong, appropriate action to remedy the problem.

PRECEDENT UNDER MILITARY COMMISSIONS ACT

Question. The Military Commissions Act of 2009 (MCA) provides that the judicial construction and application of the UCMJ, while instructive, is “not of its own force binding on military commissions established under this chapter.” In addition, the MCA amended Article 39 of the UCMJ to provide that the findings, holdings, interpretations, and other precedents of military commissions “may not form the basis of any holding, decision, or other determination of a court-martial.”

What is your understanding of the relationship between the judicial construction of the UCMJ and the judicial construction of the MCA?

Answer. The rules of evidence and procedure in the Manual for Military Commissions (MMC) differ in several important respects from those in the MCM. For example, the MMC allows for admission of certain hearsay evidence “not otherwise admissible under the rules of evidence applicable in trial by general courts-martial.” The Manual notes that these differences “reflect the [Secretary of Defense’s] determinations that departures are required by the unique circumstances” arising out of the conduct of certain military and intelligence operations. However, despite these differences, the procedures for military commissions are generally based on the procedures for trial by general courts-martial under the UCMJ. Nonetheless, as noted above, while the judicial construction and application of the UCMJ are to be considered instructive, they “are not of their own force binding on military commissions.” Therefore, the judges within the military commission system are authorized to interpret the MMC provisions that are the same or similar to provisions in the UCMJ in a different manner than they otherwise would be required to interpret them if USCAAF precedential decisions were binding upon them.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JOHN CORNYN

OPERATION FAST AND FURIOUS

1. Senator CORNYN. Mr. Ohlson, Assistant Attorney General Lanny Breuer has testified to the Senate Judiciary Committee that he learned about the Bureau of Alcohol, Tobacco, Firearms and Explosives’ (ATF) use of gun-walking tactics in April 2010. Attorney General Eric Holder has been unclear about the exact date on which he learned about Operation Fast and Furious, but we know that it was no later than January 30, 2011—when Senator Grassley personally handed him two letters discussing that program and requesting documentation relating to it. On November 14, you sent a letter to Senator McCain stating that you “took no actions in regard to, had no knowledge of, provided no advice about, and had no involvement in Operation Fast and Furious.” While you were the Chief of Staff to Attorney General Holder, did you ever have knowledge that the ATF may have been using gun-walking tactics, whether or not you had specific knowledge about Operation Fast and Furious?

Mr. OHLSON. No. While I was Chief of Staff I never had any knowledge that ATF may have been using gun-walking tactics in any case or operation, past or present.

2. Senator CORNYN. Mr. Ohlson, while you were the Chief of Staff to Attorney General Holder, were you ever present at a briefing or meeting where ATF gun-walking tactics or Operation Fast and Furious were discussed?

Mr. OHLSON. No. While I was Chief of Staff to Attorney General Holder, I was not present at any briefing or meeting where ATF gun-walking tactics or Operation Fast and Furious were discussed.

3. Senator CORNYN. Mr. Ohlson, did you attend a briefing on March 12, 2010, with Acting Deputy Attorney General Gary Grindler where paper copies of an Operation Fast and Furious PowerPoint presentation were distributed?

Mr. OHLSON. No. I did not attend that meeting.

4. Senator CORNYN. Mr. Ohlson, while you were the Chief of Staff to Attorney General Holder, did you ever have any conversations with Acting Deputy Attorney General Gary Grindler where either weapons trafficking investigations or gun-walking tactics were discussed?

Mr. OHLSON. While I was the Chief of Staff to Attorney General Holder, I did not have any conversations with Acting Deputy Attorney General Gary Grindler about gun-walking tactics. In regard to the more general topic of weapons trafficking investigations, I do not recall ever having a conversation with Mr. Grindler about that

issue, but I may have been present when Mr. Grindler discussed that topic with others. If so, I do not recall such a discussion.

5. Senator CORNYN. Mr. Ohlson, while you were the Chief of Staff to Attorney General Holder, did you ever have any conversations with Assistant Attorney General Lanny Breuer where either weapons trafficking investigations or gun-walking tactics were discussed?

Mr. OHLSON. While I was the Chief of Staff to Attorney General Holder, I did not have any conversations with Assistant Attorney General Lanny Breuer about gun-walking tactics. In regard to the more general topic of weapons trafficking investigations, I do not recall ever having a conversation with Mr. Breuer about that issue, but I may have been present when Mr. Breuer discussed that topic with others. If so, I do not recall such a discussion.

6. Senator CORNYN. Mr. Ohlson, while you were the Chief of Staff to Attorney General Holder, did you ever hear of a large firearms case being operated by the Phoenix Field Division of the ATF?

Mr. OHLSON. I do not recall ever hearing of a large firearms case being operated by the Phoenix Field Division of the ATF while I was Chief of Staff to Attorney General Holder.

7. Senator CORNYN. Mr. Ohlson, do you believe that Assistant Attorney General Lanny Breuer should have immediately disclosed his knowledge of ATF gun-walking tactics to yourself and the Attorney General in April 2010?

Mr. OHLSON. I have no personal knowledge of what Assistant Attorney General Breuer knew or did not know about ATF gun-walking tactics in April 2010. However, if Assistant Attorney General Breuer had known about ongoing gun-walking tactics at that time, I believe that he should have, and I expect that he would have, immediately disclosed that information to the Deputy Attorney General and the Attorney General so that those tactics could be halted immediately.

8. Senator CORNYN. Mr. Ohlson, do you have any knowledge of whether gun-walking tactics were used in the State of Texas during your tenure as chief of staff to Attorney General Holder?

Mr. OHLSON. I have seen media reports speculating that these tactics may have been used in Texas, but I have no knowledge to support the contention that it actually occurred.

9. Senator CORNYN. Mr. Ohlson, in the summer of 2010, the Attorney General's office—in which you served as the Chief of Staff—received a series of at least five memos from National Drug Intelligence Center Director Michael Walther that discussed Operation Fast and Furious. These memos were personally addressed to Attorney General Holder, even though he now claims that he never received or reviewed any of these memos.

The documents expressly discuss Operation Fast and Furious as an ATF investigation of a “firearms trafficking ring headed by Manuel Celis-Acosta. Celis-Acosta and straw purchasers are responsible for the purchase of 1,500 firearms that were then supplied to Mexican drug trafficking cartels.” Obviously, this language should have triggered some investigation by the Office of the Attorney General.

Additionally, on November 1, 2010, your office received a memo addressed to the Attorney General from Assistant Attorney General Lanny Breuer that discussed Operation Fast and Furious under the heading of “Significant Recent Events”. On November 14, you sent a letter to Senator McCain stating that “copies of weekly reports were forwarded to me that referred to the operation [Fast and Furious] by name.” Additionally, at your nomination hearing, you told Senator McCain that “I did not read that weekly report.” At that same hearing, however, you also told me that “I would be the ultimate funnel point for that information.”

As the “ultimate funnel point” for the information contained in these reports, as well as an actual recipient of that information, shouldn't you have taken the time to read these memos?

Mr. OHLSON. When I was Chief of Staff, there were a number of attorneys within the Attorney General's office who reported to me. Each of these attorneys was responsible for providing oversight of specific components within the Department of Justice. As part of their duties, these attorneys read the weekly reports prepared by their respective components and informed me of any sensitive or important matters in each week's submission that required my attention. I took this approach because there are many different components within the Department of Justice handling exceedingly complex issues (e.g., Antitrust, Tax, Environment and Natural Re-

sources, the Criminal Division, the Solicitor General's Office, et cetera) and the attorneys in my office were the subject matter experts in regard to their components and possessed the necessary background and knowledge to place any information contained in the weekly reports into proper context. It was through this process that I determined which of the exceedingly large number of informational documents that the Office of the Attorney General typically received each day needed to be provided to (i.e., "funneled to") the Attorney General.

None of the entries in any weekly reports circulated to the Leadership Offices contained any reference to "gun-walking" or other similar tactics that violated Department policies. Therefore, no "alarm bells" went off in anyone's mind who reviewed these documents and they were not flagged for my attention.

10. Senator CORNYN. Mr. Ohlson, shouldn't the American people expect that the Attorney General or the Chief Deputy within his office will be familiar with the operational details of an operation that involved the straw purchase of 1,500 firearms in the United States that were then supplied to Mexican drug trafficking cartels?

Mr. OHLSON. Based on what I have learned from public testimony and media reports during the past 10 months, it is now clear to me that Operation Fast and Furious was a fundamentally-flawed operation and was not handled in a manner consistent with what the American people have a right to expect. First and foremost, gun-walking never should have been allowed to occur at any time or in any place. It was a grievous mistake. Further, the former Acting Director of ATF and the former U.S. Attorney for Arizona should have been knowledgeable about this case, so that they could have exercised proper operational oversight. Next, information about an operation of this importance and magnitude should have been conveyed to the leadership offices of the Department in a fuller, more effective, and more timely manner. Finally, as for my part, I sincerely regret that I was not knowledgeable about this matter and therefore was unable to take steps to inform the Attorney General. I have every confidence that if either the Acting Deputy Attorney General or the Attorney General had been made aware of the inappropriate tactics being employed in this operation, they would have put a stop to them immediately.

11. Senator CORNYN. Mr. Ohlson, shouldn't you have familiarized yourself with the details of the weapons trafficking operation described above, especially where that operation was discussed by the Assistant Attorney General and put to the Attorney General's attention in a memo under the heading of "Significant Recent Events"?

Mr. OHLSON. Within the Office of the Attorney General there were a number of attorneys who reported to me. These attorneys were responsible for providing oversight of certain components within the Department of Justice, and they were the subject matter experts in regard to these components. Further, these attorneys attended the meetings that the Attorney General convened with the heads of each of these components, and they were in constant contact with senior staff within the components to ensure a free flow of information. It is my understanding that at no time was the issue of gun-walking ever raised with any of these attorneys, and there was no basis for these attorneys to raise a red flag with me in my capacity as Chief of Staff. In fact, I understand that the former Acting Director of ATF and the former U.S. Attorney for Arizona have both indicated that even they did not know of these inappropriate tactics while they were being used. In retrospect, I sincerely wish that everyone within the chain-of-command at the Department of Justice, including myself, had been appropriately informed of the misguided and inappropriate tactics employed in Operation Fast and Furious.

12. Senator CORNYN. Mr. Ohlson, are you aware of any individual who has been held accountable for this breakdown in the informational chain under your watch?

Mr. OHLSON. Based on the Attorney General's public testimony and media reports, it is my understanding that there have been some personnel changes in the offices that had supervisory responsibility over Operation Fast and Furious, and that additional actions to hold individuals accountable will likely follow the issuance of the Acting Inspector General's investigation into this matter.

13. Senator CORNYN. Mr. Ohlson, do you believe that anyone should be held accountable for this episode?

Mr. OHLSON. Yes, I do. Based on what I now know about Operation Fast and Furious, it was a fundamentally-flawed operation. These inappropriate tactics never should have occurred under any circumstances. Therefore, I do believe that whoever

was responsible for approving and implementing these tactics should be held accountable.

[The nomination reference of Kevin A. Ohlson follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
September 15, 2011.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Kevin A. Ohlson in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Kevin Alan Ohlson.
2. **Position to which nominated:**
Judge, U.S. Court of Appeals for the Armed Forces.
3. **Date of nomination:**
September 15, 2011.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
March 29, 1960; Town of Holden, Worcester County, MA.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Carolyn Florence Davis.
7. **Names and ages of children:**
Matthew Edward Ohlson, 14.
Katherine Elizabeth Ohlson, 12.
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
Wachusett Regional High School; attended 1974 to 1978; high school diploma received in June 1978

Washington and Jefferson College; attended 1978 to 1982; Bachelor of Arts degree received in May 1982

University of Virginia School of Law; attended 1982 to 1985; Juris Doctorate degree received in May 1985

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

- a. Board Member, Board of Immigration Appeals. I served in a judicial capacity deciding appeals in immigration cases; my employer was the U.S. Department of Justice; my office was located at 5107 Leesburg Pike, Falls Church, VA; I served in this position from March 2001 to November 2002.
- b. Deputy Director, Executive Office for Immigration Review. I supervised the Board of Immigration Appeals and the Office of the Chief Immigration Judge; my employer was the U.S. Department of Justice; my office was located at 5107 Leesburg Pike, Falls Church, VA; I served in this position from December 2002 to March 2007.
- c. Director, Executive Office for Immigration Review. I served as the head of the agency which is responsible for adjudicating all immigration cases nationwide; my employer was the U.S. Department of Justice; my office was located at 5107 Leesburg Pike, Falls Church, VA; I served in this position from March 2007 to January 2009.
- d. Chief of Staff and Counselor to the Attorney General. I advised the Attorney General on legal and policy issues, and I managed the attorneys and staff who worked within the Office of the Attorney General; my employer was the U.S. Department of Justice; my office was located at 950 Pennsylvania Avenue, NW, Washington, DC; I served in this position from January 2009 to January 2011.
- e. Chief, Professional Misconduct Review Unit. This newly-created office is responsible for handling disciplinary actions and State bar referrals in all instances where the Office of Professional Responsibility has made preliminary findings that a Federal prosecutor has engaged in professional misconduct; my employer is the U.S. Department of Justice; my office is located at 1577 Spring Hill Road, Vienna, VA; I have served in this position from January 2011 to the present.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

- a. I served on Active Duty as an officer in the U.S. Army from January 1986 to December 1989. I then was recalled to Active Duty from October 1990 to April 1991 and served overseas during the Persian Gulf War. I also served on Inactive Reserve Duty from January 1990 to September 1990, and from June 1991 to October 1995.
- b. I served as an Assistant U.S. Attorney in the District of Columbia from December 1989 until June 1997 (with a break in service during the time I was recalled to Active Duty, as mentioned above).
- c. I served as Chief of Staff to the Deputy Attorney General at the Department of Justice from June 1997 to March 2001.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Not applicable.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member, American Legion (1992 to present)

Member, Veterans of Foreign Wars (1992 to present)

Member, Virginia State Bar (1985 to present; on inactive status since 1995)

Member, Bar of the District of Columbia (1992 to present)

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

Not applicable.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Not applicable.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

06/27/2008, \$1,000 contribution to Obama for America
07/01/2008, \$200 contribution to ActBlue

14. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Four-year Army R.O.T.C. college scholarship (1978)
Phi Beta Kappa (1982)
James G. Blaine Political Science Prize, Washington and Jefferson College (1982)
George C. Marshall Award (1981)
Bronze Star Medal (1991)
Southwest Asia Service Medal with Two Bronze Service Stars (1991)
Kuwait Liberation Medal (1991)
National Defense Service Medal (1991)
Army Achievement Medal (1989)
Army Air Assault Badge (1980)
Army Parachutist Badge (1986)
Honduran Parachutist Badge (1988)
Department of Justice Edmund J. Randolph Award (2001)
Department of Justice Distinguished Service Award (2010)
Department of Justice Edmund J. Randolph Award (2011)

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Co-author (with Eric H. Holder, Jr.) of "Dealing with the Media in High Profile White Collar Crime Cases: The Prosecutor's Dilemma," in the 1995 edition of the American Bar Association's publication, White Collar Crime.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

Not applicable.

17. **Commitments regarding nomination, confirmation, and service:**

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

KEVIN A. OHLSON.

This 24th day of October, 2011.

[At the time of printing, neither the committee nor the Senate had taken further action on the nomination of Kevin A. Ohlson.]

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

14. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

COMMITTEE ON ARMED SERVICES FORM

FINANCIAL AND OTHER INFORMATION REQUESTED OF NOMINEES

INSTRUCTIONS TO THE NOMINEE: Information furnished in Parts B through F will be retained in the committee's executive files and will not be made available to the public unless specifically directed by the committee.

Name:

PART B—FUTURE EMPLOYMENT RELATIONSHIPS

1. Will you sever all business connections with your present employers, business firms, business associations or business organizations if you are confirmed by the Senate?

2. Do you have any plans, commitments or agreements to pursue outside employment, with or without compensation, during your service with the government? If so, explain.

3. Do you have any plans, commitments or agreements after completing government service to resume employment, affiliation or practice with your previous employer, business firm, association or organization?

4. Has anybody made a commitment to employ your services in any capacity after you leave government service?

5. Is your spouse employed and, if so, where?

6. If confirmed, do you expect to serve out your full term or until the next Presidential election, whichever is applicable?

PART C—POTENTIAL CONFLICTS OF INTEREST

1. Describe all financial arrangements, deferred compensation agreements, and other continuing dealings with business associates, clients or customers.
2. Indicate any investments, obligations, liabilities, or other relationships which could involve potential conflicts of interest in the position to which you have been nominated.
3. Describe any business relationship, dealing or financial transaction which you have had during the last 10 years, whether for yourself, on behalf of a client, or acting as an agent, that could in any way constitute or result in a possible conflict of interest in the position to which you have been nominated.
4. Describe any activity during the past 10 years in which you have engaged for the purpose of directly or indirectly influencing the passage, defeat or modification of any legislation or affecting the administration and execution of law or public policy.
5. Explain how you will resolve any potential conflict of interest, including any that may be disclosed by your responses to the above items. (Please provide a copy of any trust or other agreements.)
6. Do you agree to provide to the committee any written opinions provided by the General Counsel of the agency to which you are nominated and by the Attorney General's office concerning potential conflicts of interest or any legal impediments to your serving in this position?

PART D—LEGAL MATTERS

1. Have you ever been disciplined or cited for a breach of ethics for unprofessional conduct by, or been the subject of a complaint to any court, administrative agency, professional association, disciplinary committee, or other professional group? If so, provide details.
2. Have you ever been investigated, arrested, charged or held by any Federal, State, or other law enforcement authority for violation of any Federal, State, county or municipal law, regulation or ordinance, other than a minor traffic offense? If so, provide details.
3. Have you or any business of which you are or were an officer ever been involved as a party in interest in any administrative agency proceeding or civil litigation? If so, provide details.
4. Have you ever been convicted (including a plea of guilty or nolo contendere) of any criminal violation other than a minor traffic offense?
5. Please advise the committee of any additional information, favorable or unfavorable, which you feel should be considered in connection with your nomination.

PART E—FOREIGN AFFILIATIONS

1. Have you or your spouse ever represented in any capacity (e.g., employee, attorney, business, or political adviser or consultant), with or without compensation, a foreign government or an entity controlled by a foreign government? If so, please fully describe such relationship.
2. If you or your spouse has ever been formally associated with a law, accounting, public relations firm or other service organization, have any of your or your spouse's associates represented, in any capacity, with or without compensation, a foreign government or an entity controlled by a foreign government? If so, please fully describe such relationship.

3. During the past 10 years have you or your spouse received any compensation from, or been involved in any financial or business transactions with, a foreign government or an entity controlled by a foreign government? If so, please furnish details.

4. Have you or your spouse ever registered under the Foreign Agents Registration Act? If so, please furnish details.

PART F—FINANCIAL DATA

All information requested under this heading must be provided for yourself, your spouse, and your dependents.

1. Describe the terms of any beneficial trust or blind trust of which you, your spouse, or your dependents may be a beneficiary. In the case of a blind trust, provide the name of the trustee(s) and a copy of the trust agreement.

2. Provide a description of any fiduciary responsibility or power of attorney which you hold for or on behalf of any other person.

3. List sources, amounts and dates of all anticipated receipts from deferred income arrangements, stock options, executory contracts and other future benefits which you expect to derive from current or previous business relationships, professional services and firm memberships, employers, clients and customers.

4. Have you filed a Federal income tax return for each of the past 10 years? If not, please explain.

5. Have your taxes always been paid on time?

6. Were all your taxes, Federal, State, and local, current (filed and paid) as of the date of your nomination?

7. Has the Internal Revenue Service ever audited your Federal tax return? If so, what resulted from the audit?

8. Have any tax liens, either Federal, State, or local, been filed against you or against any real property or personal property which you own either individually, jointly, or in partnership?

(The committee may require that copies of your Federal income tax returns be provided to the committee. These documents will be made available only to Senators and the staff designated by the Chairman. They will not be available for public inspection.)

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

COMMITTEE ON ARMED SERVICES QUESTIONNAIRE ON BIOGRAPHICAL
AND FINANCIAL INFORMATION REQUESTED OF CERTAIN SENIOR
MILITARY NOMINEES

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES FOR CERTAIN SENIOR MILITARY POSITIONS

INSTRUCTIONS TO THE NOMINEE:

Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

If you have completed this form in connection with a prior military nomination, you may use the following procedure in lieu of submitting a new form. In your letter to the Chairman, add the following paragraph to the end:

"I hereby incorporate by reference the information and commitments contained in the Senate Armed Services Committee form 'Biographical and Financial Information Requested of Nominees for Certain Senior Military Positions,' submitted to the Committee on [insert date or your prior form]. I agree that all such commitments apply to the position to which I have been nominated and that all such information is current except as follows:" [If any information on your prior form needs to be updated, please cite the part of the form and the question number and set forth the updated information in your letter to the Chairman.]

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
2. **Position to which nominated:**
3. **Date of nomination:**
4. **Address:** (List current place of residence and office addresses. Also include your office telephone number.)
5. **Date and place of birth:**
6. **Marital Status:** (Include name of husband or wife, including wife's maiden name.)
7. **Names and ages of children:**
8. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational or other institution.

10. **Memberships:** List all memberships and offices held in professional, fraternal, scholarly, civic, business, charitable and other organizations.

11. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

13. **Personal views:** Do you agree, when asked before any duly constituted committee of the Congress, to give your personal views, even if those views differ from the Administration in power?

COMMITTEE ON ARMED SERVICES FORM

FINANCIAL AND OTHER INFORMATION REQUESTED OF NOMINEES

INSTRUCTIONS TO THE NOMINEE: Information furnished in Parts B through E will be retained in the committee's executive files and will not be made available to the public unless specifically directed by the committee.

Name:

PART B—FUTURE EMPLOYMENT RELATIONSHIPS

1. Do you have any plans, commitments or agreements to pursue outside employment, with or without compensation, during your military service. If so, explain.

2. Has anybody made a commitment to employ your services in any capacity after you leave military service?

PART C—POTENTIAL CONFLICTS OF INTEREST

1. Describe all financial arrangements, deferred compensation agreements, and other continuing dealings with business associates, clients or customers.

2. Indicate any investments, obligations, liabilities, or other relationships which could involve potential conflicts of interest in the position to which you have been nominated.

3. Describe any business relationship, dealing or financial transaction which you have had during the last 10 years, whether for yourself, on behalf of a client, or acting as an agent, that could in any way constitute or result in a possible conflict of interest in the position to which you have been nominated.

4. Explain how you will resolve any potential conflict of interest, including any that may be disclosed by your responses to the above items. (Please provide a copy of any trust or other agreements.)
