The CTR Global Security Engagement program in Africa that our nominee will inherit is designed to help secure vulnerable facilities, promote cooperative research and transparency in handling dangerous pathogens, and help build an "early warning system" capable of quickly detecting, diagnosing, and reporting infections to help determine if they are natural or manmade and stop their spread.

Last November, I invited several members of Madelyn's staff-to-be in the Pentagon to join me in a visit to East Africa, particularly the states of Uganda and Kenya, to look into the interface between biosecurity and public health issues and the means by which the Nunn-Lugar Global Security Engagement program might help to contain this threat.

With their proximity to the Middle East and large swaths of weakly governed lands like Somalia, biological virus and bacteria research facilities could be attractive targets for terrorist groups or black-market traders. Moreover, public health boosts are important benefits to future security work of CTR Global. Along with humanitarian interest in helping to prevent disease, such cooperative efforts to quickly detect, diagnose, and report dangerous infections are critical to stopping global pandemics.

Our nominee will be required to practice all of her diplomatic skills in mentoring these programs in Africa. The CTR program is building on relationships established by the Center for Disease Control and U.S. Army Medical Research Units to work with these laboratories as additional security and shared scientific research is performed. The intersection of public health issues with bioterrorism concerns will test the mettle of our nominee.

The selection of Madelyn to lead policy efforts in Global Strategic Affairs is a good one. Despite the broad nature of the policy areas she will oversee—including countering weapons of mass destruction, nuclear forces, missile defense, cybersecurity and space issues—she will be asked to ensure that the bedrocks of the CTR and Global Security Engagement components of our future counter-proliferation efforts are not left to bureaucratic drudgery and interagency inertia. I know she understands that effective program execution relies on the collaboration of both the policy and implementation functions of DOD.

For all of these reasons, Mr. Chairman, I strongly support her nomination. Thank you.

Chairman LEVIN. Thank you so much for that introduction. It is very important to us and very important to Madelyn Creedon as well.

We also know you have an important scheduling commitment to keep. You are free to leave, of course, as you wish.

Thank you so much, Senator Lugar.

We are delighted Senator Bingaman has joined us this morning. Formerly a member of this committee, he is the chairman of the Senate Energy and Natural Resources Committee.

We are counting on him to give us some more progress in the area of energy independence this year. But for this morning's purpose, he really is well-acquainted with Madelyn Creedon. We would call upon you, Senator Bingaman.

**STATEMENT OF HON. JEFF BINGAMAN, U.S. SENATOR FROM
THE STATE OF NEW MEXICO**

Senator BINGAMAN. Yes, Mr. Chairman, thank you for letting me take just a couple of minutes to heartily endorse the nomination of Madelyn Creedon for this important position as Assistant Secretary of Defense for Global Security Affairs.

I know this committee knows her work extremely well. She has been a stalwart of the professional staff on this committee, essentially during all the time that I served here and for many, many years.

Some of that work was interrupted when she was Deputy Administrator for Defense Programs at NNSA, when it was first formed. She was also Associate Deputy Secretary of Energy for National Security Programs and General Counsel to the Base Closure and Realignment Commission.

She has had broad experience in the executive branch as well as here in Congress, knows these issues extremely well, as all of us have come to realize.

Most of my interaction with Madelyn has been in connection with the nuclear deterrent issues that come into play at our two national laboratories in New Mexico, Los Alamos and Sandia. But I know she is extremely well-informed as to the importance of maintaining the nuclear deterrent, also extremely well-informed on the international situation.

I have had the good fortune to travel with her to Russia. I know she has traveled there and many other parts of the world extensively in the time she has worked here on the committee staff.

I heartily recommend her, and I think the President should be complimented for an excellent choice.

Chairman LEVIN. Thank you so much, Senator Bingaman, for your very important and useful introduction of Madelyn Creedon.

Now we will call upon our nominees for their opening statements. We will first call on Ms. Creedon.

**STATEMENT OF MADELYN R. CREEDON, NOMINATED TO BE
ASSISTANT SECRETARY OF DEFENSE FOR GLOBAL STRATEGIC AFFAIRS**

Ms. CREEDON. Chairman Levin, Senator McCain, all the members of the Senate Armed Services Committee, it is a pleasure to be here this morning.

I would also add that, as a long-time member of the committee staff, it is a little strange to sit on this side of the dais.

Thank you, Senator Lugar, Senator Bingaman, for your kind and supportive words. Senator Lugar's leadership, along with that of former Senator Sam Nunn, at a time of great uncertainty, resulted in the establishment of the CTR program, which continues to be the keystone of the global proliferation prevention programs.

Senator Bingaman has been a leader in emphasizing the importance of research and development and has supported all things nuclear. It has been a particular honor for me to have been able to support their goals.

I am grateful for and humbled by President Obama's decision to nominate me to be the Assistant Secretary of Defense for Global Strategic Affairs. I would like to thank Secretary Gates, Secretary

Panetta, Deputy Secretary Lynn, Under Secretary Flournoy, and Deputy Under Secretary Jim Miller for their support.

If confirmed, I will be honored to serve as the Assistant Secretary of Defense for Global Strategic Affairs.

I would also like to thank my family for both supporting me and putting up with me over the last 30 years of my government service. I am proud to have with me this morning my husband and partner in all things, Jim Bracco, and our daughter and son-in-law, Meredith and Mike Walsh. Our son, John Bracco, lives in Atlanta and could not be here this morning.

I would also like to acknowledge my parents, Marilyn and Dick Creedon, who live in Indianapolis, and who were also not able to be here this morning. Their devotion to charitable and public service, including my father's over 30 years as an Army Reserve officer, has always inspired me to do more.

The position of Assistant Secretary of Defense for Global Strategic Affairs covers a range of complex and often controversial issues, including nuclear deterrence, missile defense, countering WMD, space, and cyberspace.

If confirmed, I will work to ensure that the new policies and strategies that have been developed in these areas are implemented thoughtfully, expeditiously, and in a cost-effective manner. Most importantly, I would work to ensure that all the policies in these areas continue to support U.S. leadership and advantage.

One of the most difficult of the policy areas in which I will work, if confirmed, is the area of cyberspace. Cyberspace presents new and unique challenges, as cyber capabilities are an integral part of almost everything we do personally, professionally, and as a country.

Cyberspace provides both an advantage and a vulnerability. As the first man-made domain, it has no natural, geographic, or other boundaries, and few historic precedents. There are lots of questions, however, that, if confirmed, I would hope to begin to address.

In closing, I have to thank all of the members of this committee on both sides of the aisle. If confirmed, I will have to leave the staff of this committee. While I look forward to the new challenge, it will be very difficult to leave.

I hope that I will be able to continue to work with all the members and all of the great personal and committee staff in the same bipartisan way that this committee has always worked.

Finally, Senator Levin, your leadership, endless hard work, and dedication to the men and women in Military Service are unequalled. It has been a pleasure, an honor, a privilege, and great fun to work for you.

Thank you.

Chairman LEVIN. Well, thank you for that great introduction. [Laughter.]

We will miss you for many, many reasons, as I said.

Mr. Estevez, you are next.

STATEMENT OF ALAN F. ESTEVEZ, NOMINATED TO BE ASSISTANT SECRETARY OF DEFENSE FOR LOGISTICS AND MATERIEL READINESS

Mr. ESTEVEZ. Chairman Levin, Senator McCain, distinguished members of the committee, I appreciate the opportunity to appear before you today.

I am grateful for the confidence that President Obama has shown in me by nominating me to be the Assistant Secretary of Defense for Logistics and Materiel Readiness.

I also want to thank Secretary Gates, Secretary Panetta, and Under Secretary Carter for supporting my nomination.

I want to thank my family for their support, and I am happy to say that my wife, Susan Pearson, is here with me today. I want to thank her for her support, counsel, and understanding she has provided me over the last 8 years.

I would also like to note that my father, who was a career Army officer and subsequently a teacher, and my mother spent many years in civil service. While they are both now deceased, they instilled in me the values that have led me to this point in my career, and I know that they would be proud.

Having served for over 30 years in the government, the last several in the position of the Principal Deputy Assistant Secretary of Defense for Logistics and Materiel Readiness, and having made numerous trips to visit our men and women who are deployed in harm's way, I know firsthand how important it is to provide critical logistics support to our forces deployed in Iraq and Afghanistan.

I had the opportunity to visit our forces in Afghanistan last month and saw how our ability to deliver and sustain key items—ranging from mine-resistant ambush-protected (MRAP) all-terrain vehicles to aerostats—have improved our force protection and our warfighting capabilities.

I appreciate that the President and Congress are working to ensure that the Department's equipment is being properly sustained, maintained, and reset to overcome the wear and tear and damage that are a result of our ongoing combat operations. I am hopeful that my words here today will show my continued dedication toward implementing a comprehensive end-to-end logistics strategy that provides effective support to our warfighters and provides value to the American taxpayers who pay for that support.

In closing, I am deeply humbled and honored by this nomination. If confirmed, I will do my best to continue to provide quality support to the men and women of our Armed Forces while keeping a focus on affordability.

Thank you.

Chairman LEVIN. Thank you, Mr. Estevez.

Let me now ask you both the standard questions that we ask of all of our nominees.

Have you adhered to applicable laws and regulations governing conflicts of interest?

Ms. CREEDON. I have.

Mr. ESTEVEZ. I have.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

Ms. CREEDON. No.

Mr. ESTEVEZ. No.

Chairman LEVIN. Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Ms. CREEDON. I will, yes.

Mr. ESTEVEZ. I will.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

Ms. CREEDON. Yes.

Mr. ESTEVEZ. I will.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Ms. CREEDON. Yes.

Mr. ESTEVEZ. Yes.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify upon request before this committee?

Ms. CREEDON. Yes.

Mr. ESTEVEZ. Yes.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good-faith delay or denial in providing such documents?

Ms. CREEDON. Yes.

Mr. ESTEVEZ. Yes.

Chairman LEVIN. Thank you.

Why don't we try a 7-minute first round for questions, and if we need it, we will have, I am quite sure, an opportunity for a second round.

Let me start with you, Ms. Creedon, on the issue of proliferation of WMD. Do you see any opportunities for reducing the dangers of that proliferation?

Ms. CREEDON. I do, sir. There has been an awful lot of work done under the CTR programs, both at DOD and the Department of Energy, and a lot of progress has been made.

There has been a tremendous amount of progress in securing materials at their source. There has been a lot of progress made in what is referred to as the second line of defense, and that is developing mechanisms and capabilities to detect materials if they should be stolen or if they should be removed from where they are supposed to be and if they are trying to be transported across borders. There is a lot of work going on to enable other countries to facilitate and recognize when there are materials in transit.

There is a lot of work that has been done, but there is a lot of work that is left to be done. A good part of that is dealing with not only the rogue elements who want to steal either weapons or materials, but also the broader issue of proliferation by state actors.

There is a lot to be done. But I do think there is hope. I think the initiative to secure vulnerable, usable nuclear materials—materials that could be used in a nuclear weapon—in 4 years is a good goal. Whether we meet it or not really depends on the cooperation of the international community, but it is a good goal.

So I do think there is hope.

Chairman LEVIN. On the cyberspace issue, Senator McCain made strong reference to the need for progress in this area. You, in your opening comments, likewise made reference to it.

General Cartwright, in an interview last week, advocated a change in strategy from an emphasis on defense to an emphasis on offense, some form of retaliation to deter attacks. I am wondering whether you are in a position yet that you have an opinion on this issue as to whether we need to change the emphasis from defense to at least being able to threaten retaliation, to be in a position to retaliate in order to deter these growing number of attacks?

Ms. CREEDON. I have heard General Cartwright talk on this topic before, and I know that one of the issues is that right now our capabilities really are limited to defense. One of the areas where over time—and I don't know how to define "over time," but probably some years possibly—that we need to shift from a mostly defensive position.

General Cartwright has indicated that in his view it is about 90–10 right now, that we need to shift from a mostly defensive position to something where you also have at least 50–50 on the part of the U.S. Government and probably on the part of DOD something that looks like 90 percent offense and 10 percent defense.

But it is one of those longer-term goals, as we understand more about this problem and how to deal with more active defenses, how to deal with more offensive capabilities.

Chairman LEVIN. Mr. Estevez, let me ask you a couple of questions about Afghanistan. What kind of additional steps can we take to reduce our logistical footprint, either through improvements in energy efficiency or the increased use of renewable sources of power such as solar and wind?

The dangers to our troops, the losses of lives which are involved in protecting these shipments of energy into Afghanistan, the huge cost of that energy in lives and in treasure, I think, require us to look for ways to reduce the logistical footprint for energy. Apparently, 80 percent of our ground convoys are dedicated to carrying just fuel and water. What would be your thoughts on that?

Mr. ESTEVEZ. There are a couple of things we can do, and we are teaming up with Sharon Burke, who is the Assistant Secretary of Defense for Operational Energy Plans and Programs, on those things. When we look at things like our contract for sustainment of our bases, the Logistics Civil Augmentation Program, and what we need to do is require fuel-efficient generators, we need to ensure that we are putting up fuel-efficient housing, the containerized housing that we put up, that would reduce our energy footprint.

We are doing some tests on things like solar power out on the battlefield, which in certain areas of Afghanistan could work. Obviously, a number of gallons of our fuel go to our mobility assets. Those are longer-term issues to deal with. But in the near term, working on our base infrastructure, our deployed base infrastructure can reduce our energy consumption on the battlefield, reducing our convoys to sustain that.

Chairman LEVIN. It is an area that we need to pay much greater attention to. I know there has been attention paid to it, and it is not a new issue. But it is a huge issue.

We hope that when you are confirmed, that this will be one of the first items on your agenda to look at. There is potential for huge progress here, and the costs have been incredible.

Now, Mr. Estevez, if the Government of Iraq were to ask for the continued presence of U.S. forces beyond the end of this year, assuming they made that request and if we agreed to such an extension, either as requested or modified, what would be some of the more important logistical complications associated with interrupting our withdrawal and adjusting to some kind of a limited extension?

Mr. ESTEVEZ. U.S. forces in Iraq right now have multiple plans based on those scenarios. Obviously, as we close bases and we remove our presence in those bases, going back to those bases would be difficult. We do have certain tripwires on those, and we do have alternatives to those plans.

As we are moving equipment out, having to return that equipment back to Iraq would also be a logistics ripple. General Austin is holding forces back in Iraq right now. Again, it will be in the fall where those tripwires start to hit, which would increase our difficulty.

We also have contracts that are drawing down for sustainment of food and fuel, base support in Iraq. We can turn the volume on those contracts back up. They are drawing down now.

Most of those contracts will remain in place to sustain the Department of State presence in Iraq, as well as our foreign military sales and advisory presence. So it will be just extending those contracts and increasing the numbers that they support.

Chairman LEVIN. You say General Austin was holding back forces?

Mr. ESTEVEZ. Our drawdown plan starts in the fall, so late August, early fall. He has that ramp-down plan based on our current scenario.

Chairman LEVIN. Thank you.

Senator McCain.

Senator MCCAIN. Thank you, Mr. Chairman.

Again, congratulations to the nominees.

Mr. Estevez, in your answer to the advance policy questions, you stated you have, "also worked extensively with the commercial sector to understand best logistic practices across a wide range of industrial and commercial activities." What have you learned that DOD isn't doing?

Mr. ESTEVEZ. When you look at some of the best commercial places—use a Wal-Mart—

Senator MCCAIN. Best Buy, Home Depot, all of the major retailers.

Mr. ESTEVEZ. Yes. Right. Of course, they are in the retail business. So it is not exactly a match for us, but the way they—

Senator MCCAIN. But it is a match from getting much-needed whatever it is from one place to another in the most efficient fashion.

Mr. ESTEVEZ. That's correct, Senator.

Senator MCCAIN. Go ahead, please.

Mr. ESTEVEZ. Seeing how they collaborate with their supply base to understand what the demand and the forecast would be, they do

that much better than we do. We are trying to copy their ways of doing that.

They use third-party logistics more extensively than we do. They select where and how to do that. We have also implemented some of those practices.

Senator MCCAIN. For example, what practices? It is my understanding that these major entities that we discuss, they somehow are able to identify a need, and within a matter of hours, that particular need or requirement is fulfilled. The efficiencies is what makes them far more cost-effective as compared with smaller commercial enterprises is what I am trying to get at.

What do we do in the Defense Department to emulate that?

Mr. ESTEVEZ. They have the ability to shape demand that we can't. They have sales, and they can offer things. But we do have—

Senator MCCAIN. Maybe we need some sales. [Laughter.]

Mr. ESTEVEZ. But we do need a better predictive capability. We need to work closer with our industrial base on them understanding what we are consuming so that they can provide that in advance. We are doing some of that. We need to do better, Senator.

Senator MCCAIN. I hope so. Because one of the recurrent, not complaints, but voiced requirements, that I hear in places like Kabul, Baghdad, Kandahar, and other places is that there is a significant delay. If they have to consume a certain amount of whatever they have, whether it be ammunition or food or whatever, unforeseen consumption of what they have on hand, that there is still, in their view, too long a delay.

I am sure they would like to have it instantaneously, but I think that we might look again at what commercial enterprises do to react as quickly as they do.

Ms. Creedon, as I mentioned earlier, General Cartwright said that DOD is spending 90 percent of its time playing defense against cyber attacks and 10 percent playing offense and that, in his view, the Department should invert this ratio to demonstrate there will be consequences to a cyber attack against the United States.

To start with, do you agree with General Cartwright?

Ms. CREEDON. I do, sir, and he said over time that is where the Department has to be.

Senator MCCAIN. Give me an example of what the consequences would be, for example, of a cyber attack that shut down our defense logistics system in some way.

Ms. CREEDON. One of the things that he put in this context was that the constant building higher defenses, it becomes more and more expensive. The attacks are inexpensive, and the defenses are more expensive.

So one of his constructs, and although he conceded that it was in a very hypothetical construct, is that someday we have to figure out that right now the attack just causes us to spend more money on defenses. What he is trying to say is that at some point, we have to make it clear that that attack, in fact, there is more to that attacker to pay than there is to us to pay for the higher defense.

Senator MCCAIN. I fully understand that. Now, what is the consequence?

Ms. CREEDON. How to get there is hard. Part of this is, like any other thing, you have to look at, what is the attack? What was the result of the attack? Then——

Senator MCCAIN. Well, I just gave you an example. What would be the consequence?

Ms. CREEDON.—and act appropriately on something like that. So, it doesn't——

Senator MCCAIN. What would be an appropriate action?

Ms. CREEDON. It wouldn't necessarily have to be a cyber attack. You also have the problem of figuring out who did it.

Senator MCCAIN. Will you give me an answer as to what the consequences would be?

Ms. CREEDON. For instance, on something like that, if we knew who did it, it could be something that would deal with their ability to attack us further. So it could be a response in cyber. Maybe it is taking out some of their computer systems.

It depends on where they are. It depends on who is behind it. It could be a land-based attack. But again, it would have to be modulated based on the time, the duration, and the impact.

Senator MCCAIN. Thank you.

Would you agree, now that you are free from your tenure here, that Congress, as much as we would like to hear from DOD and we like to hear proposals, as I just talked to you about, Congress really doesn't have its act together on this issue, for a variety of reasons, including the proliferation of committees of jurisdiction.

Would you agree with that assertion that we really haven't been able to address it effectively, not because of lack of dedication of members, but simply the way the Senate functions?

Ms. CREEDON. I don't think anybody is unique in this. It is very new. It is very difficult, and it is very uncertain. Over time, again, I think there is going to have to be a lot of rethinking on how everybody addresses these issues.

Far be it from me, after a lot of years up here, to try and either explain or understand or suggest how Congress should act, because in the end, it does always seem to get to the right conclusion.

Senator MCCAIN. It does?

Ms. CREEDON. I think, by and large, it does. But it is just sometimes really hard to get there.

Senator MCCAIN. But you would agree that because of cross-jurisdictional situation, that it makes it a little more difficult?

Ms. CREEDON. It does.

Senator MCCAIN. There is inherent sometimes competition between the committees for jurisdiction, which really should be resolved in one way or the other.

Ms. CREEDON. This is true.

Senator MCCAIN. I congratulate both of you on your nominations, and we look forward to confirming you as rapidly as possible.

Thank you. I thank the witnesses.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator McCain.

Senator Nelson.

Senator NELSON. Thank you, Mr. Chairman.

Let me add my congratulations to our two nominees as well, and a very special thank you to Ms. Creedon for her support for the

Strategic Forces Subcommittee, which I have been honored to chair.

The responsibilities that you have helped me with include nuclear and strategic forces, ballistic missile defense, intelligence programs, space programs, information warfare programs, and Department of Energy defense-related nuclear and environmental programs, as you have led professional staff on these issues. It really is no surprise that your immense experience, knowledge, and expertise in these areas have resulted in your nomination to this extremely important position.

If confirmed, you will be advising the Secretary of Defense on policy and strategy in these areas, and you have already mentioned cyberspace and countering WMD. It doesn't seem like much of a stretch for me that you would go from the Senate to DOD to work on this.

From your work on the Strategic Forces Subcommittee, I have no doubt that, if confirmed, you will work to develop and grow the relationships and knowledge necessary to provide policy guidance on these multitude of issues. It is no exaggeration that, if confirmed, we are going to miss you as well on the Strategic Forces Subcommittee.

But I hope that, as I support your nomination, in spite of the fact of losing you in that position, we will be able to look forward to continuing our relationship once you take over these responsibilities.

Both Senator John McCain and Senator Carl Levin have mentioned cyber. Given the fact that we have learned about the cyber leak most recently, obviously it is one of the most important things, and it is in the forefront of our minds about how do we begin to deal with this.

It is perhaps a little bit unfair to ask you what your plans are to deal with this at this point in time, but if confirmed, do you have any initial thoughts about how we get to the bottom of what causes the leaks and what to do to prevent the leaks?

Whether it is offense or defense, the first thing that we need to focus on is how do we get control over our cyber opportunities so that they don't become opportunities for our adversaries?

Ms. CREEDON. Thank you, Senator Nelson, and thank you for your kind words as well.

The issue of cyberspace is incredibly complicated, obviously. From where I sit right now, I really have been on the receiving end of various briefings on what exactly these instances lately have been. RSA, the little secure token company, that is one of the most recent ones.

But in looking at how to address these in the future, it is very clear that this is going to take lots of entities, including the private sector. The Defense Industrial Base Pilot is a good example of a good place to start, frankly, on how both government and industry have to work together to figure out how to both stop and counter these attacks.

DOD is heavily reliant on commercial systems for much of what they do. It is absolutely essential that not only government resources be brought to bear, but also the commercial things.

If I am confirmed, one of the things that I want to really dig down into and understand is what are the relationships that exist right now in the commercial sector? What are the commercial capabilities? What are the defensive capabilities that exist in the government? Where are the possibilities to bring these two things together?

So that you don't have seams between the government approach and the industry approach, and really try to understand how this becomes an integrated function because, as we have discussed, this is not a geographically-constrained domain.

A lot of times you can't even tell who the attacker is or where the attacker is coming from. Sometimes you can, and then it also is very hard to sort out even when it is state sponsored. Is it a terrorist? Is it a criminal? What is the motivation? What drove this?

It is a complicated subject. I look forward to getting into it.

Senator NELSON. It is very clear that our enthusiasm for cyber and for the benefits that we receive from being able to transmit information in the manner that we have been able to do it so effectively and efficiently has gotten us a little ahead of ourselves in terms of being able to protect that very important process at the same time as we have expanded it.

We didn't build the firewalls that we would ordinarily build in the transfer and transmittal of information. Whether it is WikiLeaks or whatever it is, we have to tighten our capabilities of our controlling the very vital information that we have, military and national security data, so that this sort of attack can't occur. If we can firewall our information, then we are going to be less concerned about whether we take offensive means or otherwise because there won't be any need if we can get ahead of our adversaries.

I hope that as you assume this position, if confirmed, that you will find ways to make certain that all the users are as enthusiastic about building the protection as they are about using the procedures that are there so easily available to pass information on from one group to another or to retain it for future use.

If we don't do that, then I am in favor of going back to vaults and paper and the old way of doing things because that is one thing that you potentially, at least visually, can see you have some control over. The problem is we don't have the visual control over cyber.

I wish you well in the new position. I hope that the Senate will act rather promptly to confirm both of you in your new positions.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Nelson.

Senator Ayotte.

Senator AYOTTE. Thank you, Mr. Chairman.

I want to congratulate both of you on your nominations, and very much appreciate your service, both to this committee and also in DOD.

I want to ask Mr. Estevez about our Guard and Reserve because clearly in the conflicts that we have been engaged in, we have been using the Guard and Reserve as an operational force. Yet not all DOD systems and budget decisions have necessarily evolved to that place of where we are in terms of using the Guard and Reserve.

A recent National Guard and Reserve equipment report found major item shortages for the Guard and Reserve. Despite some very important investments in modernization and maintenance, some Guard units still don't have sufficient equipment on hand to properly train or respond to domestic contingencies.

If you are confirmed, I wanted to get your thoughts on where we are with respect to equipment to train and maintain readiness for our Guard and Reserve and how you expect to work on those issues going forward, given what we have asked our Guard and Reserve units to do in the conflicts we have been involved in.

Mr. ESTEVEZ. The Guard and Reserve, as you noted, Senator, are part of our holistic force. They are part of the total force that we have out there.

We are working to ensure that they have the same equipment, at the same level of readiness, as the Active Force. Certainly, any force that is deploying has the equipment that they need to deploy with or they are falling in on equipment in Afghanistan or Iraq, depending on where they are going, just as the Active units do. They don't bring their equipment anymore. They fall in on equipment.

We do have work, as we rotate equipment around in the rear base, in the training base, and at home station, to ensure that people have that, and they do get in that training. We do have equipment, of course, that is forward deployed that will eventually come back, and that will be distributed to make the force whole again at the return.

In the meantime, we are working hard to fill those gaps and ensure that we do have correct response capability for domestic incidents.

Senator AYOTTE. Thank you.

I wanted to follow up on an issue that I have been concerned about as a new member of this committee. I realize that your position is really dealing with logistics, materiel readiness, and that is what you will be focused on.

But as I have been on the Readiness and Management Support Subcommittee, one of the issues that I have seen time and time again is the issues we have had with procurement overall, particularly in weapon systems. We have spent \$46 billion over the past decade developing weapon systems that ultimately were never fielded, due to cost overruns or technical challenges, we weren't able to bring forward.

Given the difficulties we have right now in terms of the fiscal challenges that our country faces, I wanted to get your thoughts on how we could improve the procurement process. Because I have also been very troubled by some of the terms that we agree to in the contracts that we have been involved in that aren't as beneficial as I think they should be to our interests.

Mr. ESTEVEZ. As you note, as the logistician of the Department, that is not my main focus. However, I do have the pleasure of working with Dr. Carter and Mr. Kendall, the Under Secretary for Acquisition, Technology, and Logistics and his Principal Deputy, who have a major focus on that.

Dr. Carter is leading a major effort inside the Department called Better Buying Power, which is full-focused on improving the way we buy. Part of that is looking at the requirements so that we go

into the process knowing that we can achieve the end result of getting the capability we are trying to buy.

As the logistician, I have a full seat at the table on that, and looking to ensure that what we buy is sustainable and affordable in that sustainment over the course of its life cycle. Frankly, 70 percent of the cost of an acquisition tends to be after the acquisition takes place in sustaining that piece of equipment over time.

Senator AYOTTE. In the maintenance costs?

Mr. ESTEVEZ. Yes, ma'am.

Senator AYOTTE. I would ask you, as you have that seat at the table, if there are issues that you see that you think we can help here to give you better tools so that we can improve that procurement process, would you let us know? I think that is very critical, given the fiscal challenges that we are facing. We can't continue to pour money into either weapons systems or other equipment that isn't going to serve its purpose.

Mr. ESTEVEZ. I agree, ma'am.

Senator AYOTTE. Thank you.

Ms. Creedon, I wanted to ask you about a statement. I wanted to ask you about our nuclear force levels.

Tom Donilon announced on March 29 that the administration would be preparing for the next round of nuclear reductions. DOD will review the strategic requirements and develop options for further reductions in our current nuclear stockpile.

One of the issues that I wanted to ask you about is if we go below the New START force levels, that may require significant changes to the U.S. force structure, nuclear weapons, targeting guidance, and the nuclear doctrine. None of these changes, in my view, should be taken lightly.

I believe that we need to take serious caution before the administration makes a commitment to further reductions below New START force levels, especially since recently General Chilton, the Commander of U.S. Strategic Command, told the Senate during its consideration of the New START treaty that, "The arsenal we have is exactly what is needed to provide the deterrent."

Ms. Creedon, can you assure this committee that in your capacity as Assistant Secretary for Global Strategic Affairs, that you would help ensure that DOD conducts its strategic assessment in a manner consistent with our interests, rather just in the pure pursuit of reductions for the sake of reductions? Because my concern is that it is very important that we maintain a proper deterrent.

Ms. CREEDON. Yes, Senator, I agree.

As the START treaty comes into effect, it is going to take about 7 years before all of the reductions, even under the START treaty, have been implemented. Yes, Senator, I will assure you that as, if I am confirmed and as I undertake this new responsibility, that I will make sure that as we review our deterrent, we will always make sure that the deterrent is safe, secure, reliable, and adequate to meet our national security requirements.

Senator AYOTTE. If we were to be in a position where we lower our nuclear force levels to a point where the assurances to our friends and our nuclear deterrence in terms of our enemies began to be called into question, what would be the impact, in your view, of that if we didn't take that seriously?

Ms. CREEDON. I absolutely agree with you. We do need to take that very seriously. Frankly, from my perspective here, I don't see that as part of any of the policy documents that have been outlined by the Department.

Certainly, in the Nuclear Posture Review, which is, at this point, the overarching policy document for the administration, that document is very clear that we will maintain the triad, that we will maintain the stockpile at the current levels set out in the START treaty. That above all, we will maintain a deterrent, and it will be safe, secure, and reliable.

It talked about the relationship with our regional allies and the importance of that extended deterrence and the importance of making sure that our allies are comfortable and that our deterrent is adequate to ensure that comfort level. Because if it is not, one of the concerns, obviously, that has long been out there and long been a worry is that if we are not adequately providing that regional comfort, that it could drive others to seek independent nuclear capabilities, which is clearly not where we want to head.

Senator AYOTTE. I couldn't agree more.

Thank you both. I appreciate your testimony, and I look forward to your confirmation.

Chairman LEVIN. Thank you, Senator Ayotte.

Senator Blumenthal?

Senator BLUMENTHAL. Thank you, Mr. Chairman.

Let me add my thanks for your service, both of your service in the past, and congratulations on your future. I join in hoping that your confirmations will be prompt.

I would like to ask Mr. Estevez a question about delivering power and fuel to our troops in the field. I know that you are aware, we all are, of the potential for fuel cell technology, which is a particularly important product in the State of Connecticut, to be used more frequently and in greater volume in the field. Is that correct?

Mr. ESTEVEZ. I am not an expert on fuel cell technology. But, yes, sir.

Senator BLUMENTHAL. I would like your assurance that you will, in fact, focus on fuel cell technology and its potential uses in delivering energy sources to our troops in the field.

Mr. ESTEVEZ. To the point that Senator Levin made opening up, reducing our energy consumption on the battlefield is a force multiplier for us. It gives us more flexibility. We will certainly be looking at all capabilities to do that, including fuel cell technology, Senator.

Senator BLUMENTHAL. I think there are also opportunities for improving the efficiency of the existing capability that we have. I know that as the drawdown occurs in Afghanistan, we are going to be bringing back to this country many of the micro-generators that rely now on diesel, and there is a proposal or a plan to refurbish them, make them more efficient, link them in micro-grids.

I am familiar with this plan because one of the potential companies that could be doing some of the work is located in Connecticut, DRS. The proposal, as I understand it, is to bring back those 12,000 generators, save 30 percent of their fuel, millions of dollars. The Army is finalizing those requirements. Are you familiar with that plan?

Mr. ESTEVEZ. I am not, but I could certainly look into that. The mix of generators that are out there on the battlefield are generators that we, the U.S. military, owns as part of unit equipment and generators that our commercial sustainers are helping us put on the battlefield to build capability. The mix will come back.

Senator BLUMENTHAL. If you could report back, if I could ask you, respectfully, to report back on how the Army will be finalizing those requirements, I would appreciate it.

Mr. ESTEVEZ. I will do so, sir.

[The information referred to follows:]

The Department of Defense, and most notably the Army, has several initiatives aimed at improving the energy efficiency of its tactical power generation and distribution systems. For example, the Army has undertaken several efforts to design and evaluate micro-grids that save energy at fixed sites by better matching the production of power to required loads. The Army is also reviewing the specifications of its force provider systems—its deployable life support capabilities—in order to make them 30 percent more energy efficient than the current sets. The Army will accomplish this through enhanced power generation and distribution, improved shelters and appliances, systems that reduce water use, and the integration of renewable power sources. The Systems Integration Laboratory at Fort Devens, MA, is conducting side-by-side comparisons of existing equipment with new technologies, in a training environment with soldiers, in order to analyze and determine if the new technologies provide enhanced efficiencies and capabilities.

Other ongoing energy efficiency initiatives include the Army's new generator program—the Advanced Medium-sized Mobile Power Sources (AMMPS)—which is presently going into production. The AMMPS generators consume 21 percent less fuel across the fleet than the Tactical Quiet Generators (TQG), and are between 100 to 500 percent (depending on size) more reliable than the TQGs. Because of these improvements, the Army is working to accelerate production and fielding of the new AMMPS to replace the TQGs currently used in Afghanistan.

The Department's intent is to maximize the life of its equipment and provide economical upgrades that offer the best return on investment for taxpayers' dollars, while providing energy savings across the battlefield.

Senator BLUMENTHAL. Ms. Creedon, if I could ask you, one of the points that particularly interested me in the exchange involving Mr. Lynn and General Cartwright in their recent briefing, concerned the issue of when a cyber attack becomes an act of war and when a proportional and justified military response is appropriate.

The theft or disruption of 24,000 files seems to me to be an act of war if it is done by a nation against DOD. Would you agree?

Ms. CREEDON. Sir, I think that is one of the areas where the policy is very uncertain. Frankly, I have not delved into this enough. Even General Cartwright said a lot of the discussion really right now is based on theoretical constructs as to what really would constitute an act of war.

Obviously, there are lots of other existing legal documents that define "act of war". But that is certainly one of the things that I am going to have to look at very closely, if I am confirmed.

Senator BLUMENTHAL. General Cartwright, I think, himself said that an act of war, to some extent, is in the eye of the beholder. But at the same time, there are rules, standards, and guidelines.

From a 30,000-foot level, if another nation goes into our DOD and takes 24,000 files or disrupts our defense capability in some way, I think the average American would say, "That is an act of war." Would you agree?

Ms. CREEDON. Sir, again, I don't have enough background right now from where I sit here on the committee to make that conclusion and to make that statement. But this has to be, I think, as

we look at all these things, put in the context of anything else and looking at an act of war.

Part of the difficulty in all this, too, is really understanding who that actor was. Was it a state actor? Was it somebody acting on behalf of the state? Is this criminally motivated? Is it terrorist motivated? It gets very complicated in sorting out the attribution as well.

Senator BLUMENTHAL. Are you satisfied that we have the means and capability to determine who the perpetrator was in these instances?

Ms. CREEDON. From what I have been briefed on at the staff level, I can only say that I think it is a very complicated and difficult question, and in not all instances do I think we fully understand that.

Senator BLUMENTHAL. Are you satisfied that on our side there is a clear division of responsibility between DOD, the Department of Homeland Security, and the Department of Justice since, as you have mentioned and others have, there is a law enforcement element here as well?

Ms. CREEDON. I think at a certain, 100,000-foot level, yes. The Department of Homeland Security has the dot-gov. DOD has the dot-mil. But to make it all work because even though, it is dot-mil, it also travels over commercial lines.

To make it all work, it has to be much more coordinated and unified, and industry has to play a very large part in this. I think there is a lot of work to be done.

Senator BLUMENTHAL. Can you envision situations where a cyber attack on a utility or a bank or an Internet company could be interpreted as an act of war, if it is done by a nation to disrupt essential services or activities in this country?

Ms. CREEDON. This is one of those things that is really hard to speculate on in the abstract. But in the same way that if it were a kinetic attack, what would be the result? What would be the analysis? What would be the reaction to a kinetic attack that had a similar, if you would, effect, and how would we respond to that?

I think at the moment we have to really look at these analogies and figure out, okay, just because it is cyber, is it different? If the bank were blown up, what is our reaction? If the bank is taken out by a cyber attack, what is our reaction?

I think you have to look at these in the context of the effect as well as how it happened before you can make these decisions.

Senator BLUMENTHAL. My time is up. I know that I have nowhere near scratched the surface of these very complex and difficult issues. I do appreciate your very candid and forthright answers and your service, both of you.

Thank you for being here and being willing to serve in the future as well. Thank you.

Ms. CREEDON. Thank you, sir.

Chairman LEVIN. Thank you very much, Senator Blumenthal.

Senator Brown is next.

Senator BROWN. Thank you, Mr. Chairman.

Also, Ms. Creedon, thank you. First of all, congratulations to both of you.

Just to follow up to Senator McCain's questions on cybersecurity. In testimony before the Senate Armed Services Committee earlier this year, General Alexander stated that he would give the military a "C" on its ability to defend DOD networks.

Do you agree with his assessment? If so, what must be done in the near-term to improve the network defense?

Ms. CREEDON. Senator, I don't have any basis right now to disagree with that. I would have to really struggle to see if that is the case, although he is, given his position, in a good position to know.

Senator BROWN. If you find that when you are there, what would you, in fact, try to do?

Ms. CREEDON. I would certainly hope it is no worse. This is obviously one of those situations where I think whatever the grade is, it can always be better.

As General Cartwright has said, or Deputy Secretary Lynn said, in the rollout of the new cyber strategy, we definitely need to get better. We, as a country, need to get better—not just DOD, but everybody needs to get better.

Senator BROWN. Section 934 of the National Defense Authorization Act for Fiscal Year 2011 required the Secretary of Defense to develop a cyber strategy and inform Congress on the policy for offensive and defensive operations by March 1, 2011. Unfortunately, the strategy released last week fails to do so.

If you are confirmed, do you intend to provide the requested answers to the comprehensive list of unanswered policy and legal questions regarding operating in cyberspace?

Ms. CREEDON. Yes, sir. I will certainly work on those, along with colleagues.

Senator BROWN. Finally, do you agree that irrespective of Russian objectives, the United States should remain committed to the continued development and deployment of the U.S. missile defense systems worldwide, including qualitative and quantitative improvements to such systems?

Ms. CREEDON. Yes, sir. I believe that is included in the administration's ballistic missile defense review and policy.

Thank you.

Senator BROWN. Thank you.

Mr. Estevez, the Center for Strategic and Budgetary Assessments has published its analysis of the fiscal year 2012 defense budget. Are you familiar with that study, sir?

Mr. ESTEVEZ. I am not familiar with that one specifically, but I am familiar with a lot of assessments of the budget ongoing right now.

Senator BROWN. That being said, the study commented—just to let you know a little bit about what it said—about hollow growth that has resulted from a whole lot of defense spending over the past decade without actually gaining in readiness.

It concluded that it has happened for several reasons. Half of the spending over the past decade was unrelated to the wars in Afghanistan and Iraq. Personnel costs have grown. Personnel costs have grown, while actual end strength has remained flat. Cost of peacetime operations has expanded, while the actual pace has gone down. Acquisition costs have ballooned, while the actual inventory has become smaller and older.

Do you agree that DOD is spending more, but not getting more?
 Mr. ESTEVEZ. I did read an article this morning that pointed out that we spent \$46 billion and did not achieve the acquisition side. Without having read that whole report, I can't make an assessment of that.

I do know that, and I responded to Senator McCain earlier, on the logistics side we do need to put a focus on driving down our costs and adapting best practices in order to sustain our warfighters.

Senator BROWN. Because, with the significant DOD cuts over the next 12 years, it is obviously very important. What do you suggest the Department can implement in the areas of readiness and logistics policies to prevent these cuts from hurting our readiness and creating conditions of the so-called hollow force?

Mr. ESTEVEZ. As I cited to Senator McCain, we need to do better on managing our inventory and how we spend our inventory. We took \$366 million out of the Program Objective Memorandum last year. I think that is a down payment. We can do better.

In order to do that, we need to understand our forecast. What is going to break on weapons systems? What do we need to buy? Focus our buy, and we need to do better in collaborating with our industrial base as we do that.

We can also look to best practices, like use of third-party logistics support. We are doing that in our transportation area now to lower our costs.

Senator BROWN. Ms. Creedon, just to get back to Senator McCain's follow-up, he says, "Well, what would happen if"—remember that question? He said, "What would happen if that happened?" He said, "Yes, but what would happen?"

Let me tell you what I would like to happen if we find somebody who is actually perpetrating a crime on the United States. I would like them to be held accountable. I would like them to be shut down. I would like them to get the maximum amount of penalties that are afforded by our laws.

I think that is what he was looking for. Is that your position, if we find somebody, they should have the book thrown at them?

Ms. CREEDON. From a criminal perspective, which is obviously not the Defense Department, that is obviously a Justice Department perspective, but, yes. As I understand this, it gets quite complicated because, very often, the actor is not necessarily within the United States.

Senator BROWN. If there are problems, we need to know what they are. So if you identify what the complications are, we just can't continue to allow this to go willy-nilly.

Mr. Estevez, when you are dealing with what you are doing, I am not opposed to making judicious, thoughtful cuts. But in the middle of two and a half wars, I want to make sure that whatever we are doing is going to ensure that our men and women cannot only serve and do their jobs effectively and safely but, in fact, come home.

As a result of cuts that may affect that job performance and their safety, then I and others have a very real problem with that.

Thank you. I wish you both well.

Ms. CREEDON. Thank you.

Chairman LEVIN. Thank you very much, Senator Brown.
Senator Hagan.

Senator HAGAN. Thank you, Mr. Chairman.

I just want to publicly acknowledge Ms. Madelyn Creedon and express my heartfelt endorsement for her nomination. I have been working closely with her, as with my duties in chairing the Emerging Threats and Capabilities Subcommittee of the Senate Armed Services Committee.

She is a true professional that I have worked so closely with. She is well-qualified to discuss the issues addressed in this hearing today. I offer her my sincerest congratulations on this nomination. I am proud that she stands to contribute to the immeasurable accomplishments of women serving in DOD.

My first question for you, Ms. Creedon, is this spring the President released a statement on the Nuclear Posture Review, and he publicly stated that the United States intends to reduce the role of nuclear weapons in our national security strategy and focus on reducing the nuclear dangers for the 21st century.

We will, however, maintain our current stockpile, while making substantial investments to improve infrastructure, strengthen science and technology, and retain the human capital to sustain our stockpile. I am very concerned about the science, technology, engineering, and mathematics workforce in our country.

What are your thoughts, as far as DOD, what can DOD do to ensure that DOD continues to have access to future scientific and technical talents in our country?

Ms. CREEDON. Thank you, Senator.

This is a very large concern. I have looked at it over the years within the confines of the nuclear arena, to some extent in the confines of the space arena. It is a problem that extends not only in DOD, but also to the Department of Energy, which also has a very large role in making sure that our deterrent remains safe, secure, and reliable.

It is difficult to motivate students to stay with the science and technology career path and educational path. Motivating students early on is extraordinarily important. I am also aware that DOD has various programs to help these students, to provide scholarships for these students. The Department of Energy has some similar programs.

Part of the problem is also making sure that we have enough Ph.D. graduates, master's degree candidates, bachelor's degree candidates in our requisite science and technology disciplines that actually can come to work for DOD. In many instances, this requires clearances. It's about making sure that they can get the clearances. Some of this then goes to their nationalities.

DOD is looking at this. There are some very early programs looking at how to accelerate the citizenship path. But this is a very serious problem we have to face going forward.

Senator HAGAN. It is a serious problem.

Mr. Estevez, thank you, too, for being here and your nomination. I look forward to both of your confirmations.

I have met with many soldiers who have been severely injured or wounded in Afghanistan. A large number of our wounded warriors are exposed, obviously, to improvised explosive devices (IED)

and to enemy attacks because of their involvement in moving supplies. It is of critical concern that our servicemembers have access to the necessary equipment, food, and resupplies, but I am concerned about supply movements, which are often the target of the enemy.

Afghanistan is landlocked, and the road networks are hard to navigate, and the country has few airports. What, if any, changes do you think can be made to meet the mission of the warfighters but minimize their exposure to enemy attacks in logistical supply movements?

Mr. ESTEVEZ. I share those concerns, Senator, again, having just come back from Afghanistan and looking at some of the things that we are doing to protect our soldiers on the battlefield.

First of all, our movement in providing things like MRAP vehicles, and their all-terrain variant, are incredible lifesaving devices out there that allow us a level of protection. There is nothing that is full protection, unfortunately.

Through our rapid acquisition initiatives that Dr. Carter is leading and that I am part of in sustaining that equipment, we are also providing things like mine rollers, intelligence, surveillance, and reconnaissance assets, handheld devices that you can find IEDs on the road. We just need to do more of that.

For internal transportation in Afghanistan, we are doing more air drop to our remote outposts. That takes convoys off the road or combat logistics patrols, as we prefer to call them, because those guys are out there doing combat as well and performing their logistics duties. More vertical lift, helicopter lift, both commercial and our own, can also help in that regard.

Most of the movements in Afghanistan are actually commercial movements, using either Afghan national trucks or prime vendors who are contract. Now, those people also get wounded and killed out there. So taking them off the road is also beneficial. But commercial movements have better ability in some areas to get through than our own military convoys.

Put all those things together, and we have focus on doing exactly what we both share in trying to take our folks off the road and provide safer movements.

Senator HAGAN. Thank you, because I have spent a lot of time with wounded warriors, and it is something that is of grave concern to me.

Ms. Creedon, due to the rising threat of cyber attacks, DOD established the U.S. Cyber Command. Currently, much of the attacks on DOD networks involve theft, which include stealing password and information from secure networks.

The cyber attacks on DOD are similar to the cyber attacks on large financial institutions and other major commercial industries that also face those attacks. How do you think DOD can work with the Department of Homeland Security and the private sector to protect critical national infrastructure, like the power-grid, the transportation system, and the financial sector?

Ms. CREEDON. It is important, obviously, that all of these sectors work together. DOD uses commercial communications capabilities. It relies on domestic power supplies in the United States. It relies

on commercial fiber lines. It is absolutely essential that these entities work together.

The difficulty, obviously, in getting three very disparate entities that are not often working together, that are not used to working together, working together is a difficult challenge. I know that this is a focus of the new cybersecurity strategy, the cybersecurity policy document that was just released.

It is also one of the big focuses of the Defense Industrial Base Pilot really trying to partner with industry, particularly industry that is working with DOD and that has sensitive DOD materials, trying to figure out both the advantages of the commercial approaches, the advantages of DOD approaches, and figure out what is really the best actor in these instances.

There are a lot of different ideas that I have heard. If confirmed, I look forward to really taking this on and trying to figure out how to improve our capabilities in this area.

Senator HAGAN. I will miss you on the committee, but I certainly do look forward to the confirmation of both of you.

Thank you very much for your testimony.

Ms. CREEDON. Thank you.

Chairman LEVIN. Thank you very much, Senator Hagan.

Senator BEGICH.

Senator BEGICH. Thank you very much, Mr. Chairman.

To both of you, thank you very much for your willingness to serve. I agree, I hope the nominations go smooth, and you can be in your new roles.

First, Ms. Creedon, if I could ask you a couple questions. As you probably know, I am a big supporter of the Ground-Based Missile Defense (GMD) System, and I want to get your opinion of how you see the GMD that is currently assembled. Do you believe this is the only system at this point that is capable of defending the Nation against intercontinental ballistic missile attack?

Ms. CREEDON. Yes, sir, it is, and it needs to be maintained.

Senator BEGICH. Let me add to that. When you say "maintained", can you elaborate a little bit on that? Where do you see the missile defense system for the United States in maintenance and/or expansion or other needs they may have?

Ms. CREEDON. My understanding that right now the Missile Defense Agency is focused on maintaining, updating, and upgrading the ground-based interceptors (GBI), so that they will eventually be in a common configuration, and to identify the root causes of the recent test failure and to make sure that once those are identified, that those fixes are incorporated across the land-based missile defense in Alaska.

Senator BEGICH. In your advance policy questions, and this may go to what you just said—you had made the comment that need for additional interceptors. Is that what you are referring to or just elaborate a little bit more maybe?

Ms. CREEDON. My understanding is that as part of the overall review of the GBIs, and as part of the review that is now ongoing as a result of the test failures, as well as the continuing overall review as to what the threat looks like over time, and also the need to have a certain number of tests and replacement assets, that the combination of all that, from what I understand, it is looking at if

there will probably be additional GBIs that will be needed over time. The amount, the timing of those, as I understand it, is still very much in the “to be determined” category.

Senator BEGICH. Thank you for your comment.

I want to let you know I agree with that. I have said that for the last 2½ years, that based on the schedule—actually, we had a hearing here maybe a year and a half ago with General O’Reilly, and we were talking about this. I made the comment that I think they are going to be short on how many they will need based on replacement.

It sounds like there is a full review, and like you said, they are not sure when and how, but it is clear that there is an additional need of interceptors. When and how they will be placed is still up in debate. Is that fair?

Ms. CREEDON. That is my understanding at this point.

Senator BEGICH. Very good.

I don’t know how much you are familiar in Alaska with the Kodiak Launch Complex and how it has been used or not been used, depends on the agency.

Give me, if you could, some of your thoughts on how DOD will utilize their own systems, their own Federal facilities, as well as potentially facilities like this that are partially federally-funded, but State-operated. That is what this one is. It is not private, it is a quasi-government facility.

Can you give me some thoughts on that? I am being very specific here around Kodiak launch facility, but in the broader perspective of other facilities that might be out there.

Ms. CREEDON. As you are well aware, we have been waiting for some time to get one of the TacSat satellites off. It looks like it is going to happen later this summer. That will be launched out of Kodiak.

Senator BEGICH. Out of Kodiak.

Ms. CREEDON. That will be a good thing. We need that capability on orbit.

Looking farther, looking broader at where we go with the smaller satellites is an issue that, if confirmed, I would hope to really look at some more. This committee has been very active in sponsoring the Operationally Responsive Satellite office, making sure that there is focus and attention paid on small satellites.

Small satellites, I think, have an opportunity to play a very large role, both increasing our redundancy in space and also resiliency. It also has the added benefit of making more targets, if you will, which also has a deterrent effect on adversaries.

Looking at other possibilities about disaggregating large satellites into small satellite components, these are all things that I think we need to do. If all of that pans out, then there become opportunities for smaller launchers, for the smaller launch sites. There is a launch site in Virginia that has also been very active in these smaller satellite launches. I think it is all very much tied with where we actually decide to go in small satellite operations.

Senator BEGICH. The assumption is that you will be appointed and move forward in your new position, will you keep our office informed? Obviously, it is a great asset that the Federal Government

has invested in, and we sure don't want to have it idle or not utilize it, what you might think is a possibility.

But also, as you think of the long-term what your small satellite deployment might be, if there are issues that they need to deal with, please keep us informed and what we need to be doing there to make sure it is an asset that the military can utilize or not utilize, but at least be available to utilize.

Ms. CREEDON. I will, Senator.

Senator BEGICH. Very good.

Mr. Estevez, if I could ask you a couple questions. This one is DOD on Defense Personal Property System (DPS), which is a new system. It is Web-based. It helps manage personal property moves, and so forth.

It has had some good changes, now you award these based on satisfactory performance, not just low bid, which I am a big believer in this, because sometimes the low bid is a garbage bid. Having a quality bid is a better bid. I think that is a good move.

Here is the struggle. I know U.S. Transportation Command (TRANSCOM) is working on this, and I just ask you to look into this. Alaska is being treated a little differently in how the rate structure is being designed, and it is actually a disadvantage because of how you can't access 80 percent of the communities by roads.

It is not like pulling up a moving van and hauling people out. It is a little different. Because of that, we have asked them to reexamine the rate structure.

There is a group called Alaska Movers Association that has been aggressive in trying to figure this out. They are fine with the new Web base. They are all good with that. It is just the way they are developing the model is based on a lower 48 model, actually is inconsistent, to some extent, with the lower 48 model.

I don't know how much you are familiar with this, but, if not, would you be willing to work with our office and the Alaska Movers Association and make sure we are on the right path here? We want to make sure that individuals aren't dipping in their own pocket, military personnel, because of the formula.

We just had this problem with some housing issues, which is now being corrected, because of the uniqueness of Alaska housing costs.

Mr. ESTEVEZ. Senator, I am very familiar with DPS. I am not familiar with the Alaska issue related to DPS. To your point, DPS is actually showing some pretty good results. This year, because of some bandwidth increases, it is actually working better than it did last year in returning savings.

The transportation policy, the Deputy Assistant Secretary on the Logistics and Materiel Readiness staff, on the staff which I will lead, if confirmed, co-chairs an oversight board with TRANSCOM that looks at how DPS is structured. I will absolutely work with your staff to address disparities related to the Alaska Movers Association.

Senator BEGICH. Great. We are looking just for fairness, we are not looking for anything special. It is just the uniqueness of the transportation challenges are a little different than maybe Fort McChord or any of that kind of activity.

Let me end there. My time is expired.

But one area I would like to touch on and you don't have to do it now, but maybe in the future, I would like to talk to you about rare earth materials. The comment I would make is with so much concentration in China, with, I think, 95, 96, 97 percent of our rare earth capacity, is to reexamine what we need to do. There are a lot of pieces of legislation floating now to try to figure out how do we deal with this from a defense perspective and a national security perspective.

At some point, maybe as we move on some legislation or have these discussions raised, Alaska has several of these potentials for rare earth development. I would be curious about how you will handle that and deal with that in the future.

But if you are confirmed, is this an area that will be of interest to you and willing to look at to make sure we are on the right path here?

Mr. ESTEVEZ. It is not my primary area. Brett Lambert, our Deputy Assistant Secretary for Manufacturing and Industrial Policy, leads that. However, I do oversee the stockpile that the Defense Logistics Agency manages. We share that concern. I would be happy to work with you, Senator.

Senator BEGICH. Great. I just want to make sure what stockpile you are looking at isn't empty, and so that is our goal.

Thank you very much. Congratulations to both of you. I know I am saying that without the vote being done yet. But I hope you are confirmed, and thank you for your service.

Chairman LEVIN. Thank you, Senator Begich.

On the missile defense system issue, first of all, Ms. Creedon, would you agree that operational missile defense systems should be operationally effective before they are deployed?

Ms. CREEDON. Yes, sir.

Chairman LEVIN. They should be cost effective?

Ms. CREEDON. Yes, sir.

Chairman LEVIN. As stated in the ballistic missile defense review.

Now, the United States and NATO are exploring options for cooperation with Russia on missile defense in order to enhance mutual security against common missile threats from Iran. Do you believe it is worth exploring those options?

Ms. CREEDON. I do, sir.

Chairman LEVIN. Russia has expressed concerns that our missile defense systems may undermine its strategic deterrent. Will you use your best efforts to dissuade them from that perspective?

Ms. CREEDON. Yes, sir.

Chairman LEVIN. On the cyber issues, which have been raised by a number of us, I think we should appreciate the caution that you use in terms of your response to these questions as to when is a cyber attack an act of war. But I think we also need to do what you and others have suggested we do, which is to sort out the elements of that question because these are vitally critical issues to our security, to our own cybersecurity, to our country's security.

But when we are talking about acts of war, we are then talking about a necessity, if we can't deter, of responding to those acts. It seems to me that the question, if there is an intentional attack on our capability and our systems by another country and where that

intention is to disrupt our systems, that the issue of what is an appropriate response is an open issue. What is proportionate, for instance.

However, if you know who the actor is, and if it is another nation and if its purpose is not espionage—which we conduct as well, not just other nations that conduct acts of espionage. We conduct acts of espionage. We have spies out there, too.

If we decide that the motive is not espionage or spying on us, but that the motive is to disrupt our systems, that then it may be that the issue we haven't sorted out is what is an appropriate response, but that the question of whether or not it is an act of war, it seems to me, is resolved by the way the question is framed.

If it is a purposeful, intentional effort on the part of another nation to disrupt some system of ours, putting aside the response and what is appropriate, that does constitute an aggressive act of war against us.

I know you are being cautious, and I admire that, and you should be. But I am trying to phrase a question in a way where it seems to me the issue becomes not how do you know. That is part of the question. It is the given. It is the assumption.

The question isn't how do you respond? Set that aside. It is an important question, and proportionality is critically important. But I am trying to put everything into the question in a way that, yes, that sure sounds like an act of war to me, which it does to me, by the way. Would it not sound like an act of war to you, the way I phrased the question?

Ms. CREEDON. Sir, yes. I think part of this is understanding, and this is where I have trouble. I think this is where a lot of people have trouble, so you start with, okay, is it possible that a cyber act could be an act of war? I think that answer to that is absolutely yes. Just like any kinetic act could be an act of war.

The question then is, okay, let us assume that it was. It is a cyber attack, and we have determined that it is an act of war. That still gets you back to, well, what are we going to do about it?

Chairman LEVIN. No, but that is not the question.

Ms. CREEDON. But there is certainly a construct where an attack is an act of war. Whether it is a cyber attack or a kinetic attack, it can be determined an act of war.

Chairman LEVIN. I am trying to construct an example. That is what I am trying to do is construct an example so we have a feel as to where you are.

How would that not be? If the actor is known, it is a state actor. If the motive is known, its motive is to disrupt or destroy. Why would that not be an act of war?

Ms. CREEDON. It sure sounds like it is, but I don't know for sure that it is.

Chairman LEVIN. Even with my givens and assumptions?

Ms. CREEDON. Yes, and I think some of this—

Chairman LEVIN. How could it not be?

Ms. CREEDON. I think part of it, we would have to go back and look at what is understood international law as to what is an act of war. It is certainly a hostile act. It is certainly a hostile intent. It is where does it become an act of war? That is where I think that there is some uncertainty.

Chairman LEVIN. The word “disrupt” doesn’t answer that question?

Ms. CREEDON. I am not sure “disrupt” answers that. I am not sure “disrupt”——

Chairman LEVIN. If it is intentionally——

Ms. CREEDON. Maybe it is the size of the disruption. Maybe there is a proportionality.

Chairman LEVIN. That is an issue of what the response is.

Ms. CREEDON. There is an intent as well.

Chairman LEVIN. I have given the intent in my question. The intent is to disrupt.

Ms. CREEDON. I think there is a point at which it probably could be. I think it probably could be. I think it is just really hard in the abstract to say, okay, that specific example is, in fact, an act of war because there is a danger, I think, also in laying out red lines.

If you say, “Okay, this is it. You cross this line. It is an act of war.” There is a danger there because it sets us up for some act that we might not necessarily be prepared to take.

Chairman LEVIN. I think we have to sort that out pretty quick because it sounds to me with all of the qualifications that I put in there, that there is an intent to disrupt. It is not a side effect. It is not an unintentional consequence of an act of espionage. It is an intent to disrupt.

That seems to me to go to the heart of the matter. But if it isn’t, we sure better find that out fast because we could give a false signal as well if we are ambiguous about considering that to be a hostile act or an act of war, and I think we better end that ambiguity fast.

The proportionality issue, that is always a problem. That is an issue after you have been attacked.

Ms. CREEDON. Yes, sir.

Chairman LEVIN. But if you know what the intent is, once you know that intent is to disrupt or destroy, it seems to me then the issue becomes what is the appropriate reaction. But it is not a question of whether there should be a response at that point.

I think that your testimony indicates that there sure is a heck of a lot of work to do, and I think we better do some of the basic work quickly while we spend more time perhaps in trying to figure out how do we know and what do we do? Those are questions which may take a lot more time to figure out.

But the question of whether we respond to an intentional act to disrupt, seems to me, should not be difficult. It should not be difficult as to whether we respond.

We thank you both. We thank your families, those who are here and those who are not here. We look forward to a speedy confirmation.

The committee will stand adjourned.

[Whereupon, at 11:10 a.m., the committee adjourned.]

[Prepared questions submitted to Madelyn R. Creedon by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense (DOD) Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. No. The Goldwater-Nichols legislation has been very successful in improving operational and warfighting effectiveness.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I do not see the need to change this legislation.

RELATIONSHIPS

Question. If confirmed, what will be your relationship with:

The Secretary of Defense.

Answer. At the direction of the Under Secretary of Defense for Policy (USD(P)), the Assistant Secretary of Defense for Global Strategic Affairs (ASD/GSA) advises the Secretary of Defense on strategy and policy on issues relating to nuclear weapons, missile defense, countering weapons of mass destruction (WMD), and the space and cyberspace domains.

Question. The Deputy Secretary of Defense.

Answer. The ASD/GSA provides support to the Deputy Secretary of Defense similar to the support provided to the Secretary of Defense.

Question. The Under Secretary of Defense for Policy.

Answer. The ASD/GSA provides support to the Under Secretary of Defense for Policy similar to the support provided to the Secretary and Deputy Secretary of Defense.

Question. The Under Secretary of Defense for Acquisition, Technology, and Logistics.

Answer. Under guidance of the USD(P), the ASD/GSA works with the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)) in pursuit of the Secretary's objectives and ensures that policy execution is well-informed and supported appropriately. The ASD/GSA also provides policy input regarding acquisition and programmatic activities that relate to nuclear weapons, missile defense, countering WMD, and the space and cyberspace domains.

Question. The Assistant Secretary of Defense for International Security Affairs.

Answer. The ASD/GSA works collaboratively and collegially with the Assistant Secretary of Defense for International Security Affairs to provide policy advice to the USD(P) and the Secretary on crosscutting global security strategy and policy issues, such as regional missile defense cooperation and NATO developments pertaining to GSA's functional expertise.

Question. The Assistant Secretary of Defense for Asian and Pacific Security Affairs.

Answer. The ASD/GSA works with the Assistant Secretary of Defense for Asian and Pacific Security Affairs to provide policy advice to the USD(P) and the Secretary on cross-cutting global security strategy and policy issues, such as containing North Korean proliferation of WMD.

Question. The Assistant Secretary of Defense for Homeland Defense.

Answer. The ASD/GSA works with the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs to provide policy advice to the USD(P) and the Secretary on cross-cutting security strategy and policy issues, such as enhancing the survivability of critical cyberspace infrastructure.

Question. The Assistant Secretary of Defense for Special Operations, Low Intensity Conflict, and Interdependent Capabilities.

Answer. The ASD/GSA works with the Assistant Secretary of Defense for Special Operations/Low-Intensity Conflict to provide policy advice to the USD(P) and the Secretary on cross-cutting global security strategy and policy issues, such as countering the proliferation of WMD through improved synchronization of contingency plans.

Question. The Assistant Secretary of Defense for Nuclear, Chemical, and Biological Defense Programs.

Answer. The ASD/GSA works closely with the Assistant Secretary of Defense for Nuclear, Chemical and Biological Defense Programs (ASD/NCB) to provide policy advice to the USD(P) and the Secretary on cross-cutting global security strategy and policy issues. The ASD/NCB is responsible for implementing many of the activities for which the ASD/GSA develops policy guidance, such as chemical/biological defense, Nunn-Lugar Cooperative Threat Reduction (CTR) program, and oversight of the Defense Threat Reduction Agency. Therefore, the relationship between the two offices should be particularly close.

Question. The Chairman and Vice Chairman of the Joint Chiefs of Staff.

Answer. At the direction of the USD(P), the ASD/GSA works with the Chairman (CJCS) and Vice Chairman of the Joint Chiefs of Staff to provide support on matters that affect strategy and policy for nuclear weapons, missile defense, countering WMD, and the space and cyberspace domains.

Question. The Service Secretaries.

Answer. At the direction of the USD(P), the ASD/GSA works with the Military Department Secretaries on a broad range of policy issues.

Question. The Service Chiefs.

Answer. At the direction of the USD(P), the ASD/GSA works with the Service Chiefs on a broad range of policy issues.

Question. The Commander of U.S. Strategic Command.

Answer. At the direction of the USD(P) and in coordination with the CJCS, the ASD/GSA works with the Commander of U.S. Strategic Command on a broad range of issues that affect strategy and policy for nuclear weapons, missile defense, countering WMD, and the space and cyberspace domains.

Question. The Commander of U.S. Cyber Command.

Answer. At the direction of the USD(P) and in coordination with the CJCS, the ASD/GSA works with the Commander of U.S. Cyber Command on a broad range of issues that affect defense activities in cyberspace. As the OSD Principal Staff Assistant with responsibility for cyber policy, the relationship with U.S. Cyber Command should be very close to ensure appropriate coordination of this dynamic mission area.

Question. The regional combatant commanders.

Answer. In coordination with the CJCS, the ASD/GSA works closely with the geographic combatant commanders (GCC) to provide policy oversight of strategy, plans and operations relating to nuclear weapons, missile defense, countering WMD, and the space and cyberspace domains in support of the USD(P), the Secretary, and the President of the United States.

Question. The Administrator and Deputy Administrators of the National Nuclear Security Administration.

Answer. The ASD/GSA works with the Administrator and Deputy Administrators of the National Nuclear Security Administration to provide policy support to the USD(P) and the Secretary on strategy and policy issues, relating to nonproliferation of nuclear weapons, nuclear material security, U.S. nuclear stockpile matters, and related issues.

DUTIES

Question. The position for which you have been nominated has been substantially restructured over the last few years.

What is your understanding of the duties that you will be assigned if you are confirmed?

Answer. My understanding is that ASD/GSA is primarily responsible for advising and supporting the USD(P) and the Secretary on policy and strategy in the areas of U.S. nuclear weapons and missile defense, countering WMD, and the space and cyberspace domains.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. I have had over 30 years of experience in a variety of executive branch positions and as a member of the staff of the Senate Committee on Armed Services in the areas of responsibility assigned to the ASD/GSA.

Question. What additional actions do you believe you need to take, if any, to fulfill the responsibilities of this position?

Answer. If confirmed, I will focus on understanding the many specific responsibilities and interactions that are necessary to ensure that I can effectively carry out the duties of the office of ASD/GSA. Many of the overarching policy documents governing nuclear, space, and missile defense policies have been issued. I will develop

an understanding of the actions needed to implement these policies. The area of cyber policy will need particular attention and, if confirmed, I will work to develop and grow the relationships and knowledge necessary to provide policy guidance in this challenging issue area.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the Assistant ASD/GSA?

Answer. Implementation of the Nuclear Posture Review (NPR), Ballistic Missile Defense Review (BMDR) and Space Posture Review (SPR), as well as the New Strategic Arms Reduction Treaty (START), the National Space Security Strategy, the DOD Cyber Strategy, and the President's nuclear security agenda and biosecurity strategy will all be significant challenges. Implementing these new policies and strategies under a constrained budget will be even more challenging.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If I am confirmed as ASD/GSA, I will develop the close working relationships with key partners in DOD, with other relevant executive branch partners, and within Congress, to understand and address the various programs, issues, and concerns necessary to implement the new policies and strategies.

Question. What do you anticipate will be the most serious problems in the performance of your responsibilities?

Answer. At present I am not sure what will be the most serious problems that I would face if confirmed, but I am very concerned about ensuring that the new policies and strategies are implemented in a cost efficient manner.

Question. If confirmed, what management action and timelines would you establish to address these problems?

Answer. If confirmed, I will work with the ASD/GSA staff and the USD(P) to identify, understand, and prioritize any problems impeding performance of my responsibilities, and to develop timelines to resolve these problems.

PRIORITIES

Question. If confirmed, what broad priorities would you establish for the office to which you have been nominated?

Answer. I understand that Under Secretary Flournoy has emphasized the importance of her team's support to the Secretary to improve interagency development of long-term national security policy options. If confirmed, I will ensure that staff of the ASD/GAS is equipped to support her and the Secretary in achieving these goals.

NUCLEAR POSTURE REVIEW

Question. If confirmed, what role will you play in overseeing and implementing the policies, strategies, and priorities established in the NPR?

Answer. If confirmed, I understand that I would help to develop and oversee implementation of the agenda set forth in the NPR. This would include helping to frame key issues and decisions for the USD(P) and the Secretary in coordination with my colleagues in USD(AT&L), the Joint Staff, the Military Departments, and STRATCOM, as well as the NNSA and the National Security Staff.

SPACE POSTURE REVIEW

Question. If confirmed, what role will you play in overseeing and implementing the policies, strategies, and priorities established in the Space Posture Review?

Answer. If confirmed, I understand that I would support the USD(P) and the Secretary to continue implementation of President's 2010 National Space Policy and the National Security Space Strategy, which included the Space Posture Review. In that regard, if confirmed, I understand that I would help to develop and oversee implementation of DOD policies related to space. This would include overseeing implementation of strategy and plans related to space forces, systems, and activities in close coordination with other DOD officials, as well as serving on the Defense Space Council.

SPACE PROGRAMS

Question. If confirmed, what role will you play in establishing architectures for various space systems, such as communications and Overhead Persistent Infrared (OPIR)?

Answer. If confirmed, I expect to participate actively in the Planning, Programming, Budgeting and Execution system, as well as other DOD decisionmaking proc-

esses, to ensure space system architectures support our national security objectives effectively. I would expect that this would include support to effective, efficient, and well-coordinated communications, OPIR, and other essential national security space applications and programs.

Question. If confirmed, what role will you play in developing a space protection strategy and improving space situational awareness?

Answer. The United States is heavily reliant upon and gains unique benefits from its national security space capabilities. Continually improving space situational awareness underpins our ability to operate safely in the increasingly congested space environment and enables the protection of space assets. If I am confirmed, I will work to ensure appropriate and effective strategies are in place to increase our space situational awareness as well as to ensure that critical space capabilities are resilient and redundant to maintain the advantages provided by these capabilities.

SPACE RULES OF THE ROAD

Question. Over the course of the last several years there has been discussion about establishing international space rules of the road to deal with, mitigate, and reduce generation of space debris.

What are your views on establishing space rules of the road?

Answer. Establishing norms for the responsible, peaceful, and safe use of space and preservation of the space environment are important issues for all space-faring nations. Rules of the road or other pragmatic guidelines for safe activity in space could help avoid collisions and other debris-producing events, reduce radio-frequency interference, and strengthen safety, stability, transparency, and security in the space domain.

INTERNATIONAL SPACE COOPERATION

Question. Do you support arms control limitations on space capabilities?

Answer. I support the principles outlined in the 2010 National Space Policy, which states that the United States will pursue bilateral and multilateral transparency and confidence-building measures to encourage responsible actions in, and the peaceful use of, space, and will consider proposals and concepts for arms control measures if they are equitable, effectively verifiable, and enhance the national security of the United States and its allies.

Question. Would you support the United States signing the so-called European Union Code of Conduct for Outer Space Activities?

Answer. I understand that the Department is currently evaluating the European Union's proposed international Code of Conduct for Outer Space Activities. If confirmed, I look forward to continuing this evaluation.

Question. Given the concern about the increase in space debris, and the need to improve the ability to forecast and avoid potential conjunctions, in your view is there an opportunity to cooperate with Russia and other nations in the area of space debris analysis and warning?

Answer. The significant increase in space debris presents challenges to all space faring nations. I believe that coordinated international efforts to develop and share information, particularly with respect to space debris, could help increase awareness and prevent mishaps, misperceptions, and mistrust. I understand that the Department recently signed statements of principles on Space Situational Awareness sharing with Australia, Canada, and France. Additional such statements signed with other nations, and with commercial firms, would continue to enhance spaceflight safety for all parties.

NUCLEAR WEAPONS MANAGEMENT

Question. Since the Air Force unknowingly flew nuclear weapons on a B-52 bomber from Minot Air Force Base in North Dakota to Barksdale Air Force Base in Louisiana on August 30, 2007, the Air Force has taken a number of significant steps to increase its attention, discipline, and expertise on nuclear weapons management.

If confirmed, what role, if any, will you play in ensuring that nuclear weapons are safe, secure, and accounted for, and that the Military Services have established a high level of attention, discipline, and conduct of operations with respect to nuclear weapons?

Answer. Since the events of August 2007 the Air Force has made significant improvements in its management of the Air Force nuclear enterprise. If confirmed, I will work with the other stakeholders in OSD, the Joint Staff, the Military Departments, and combatant commands, as well as with NNSA, to ensure that the renewed senior-level focus and attention and new management approaches are sustained and institutionalized. It is vitally important that all aspects of our nuclear

force and the nuclear weapons enterprise are positioned to ensure their long-term safety, security, accounting, and reliability.

Question. The various reviews of the Air Force incident also exposed significant gaps in the Office of the Secretary of Defense (OSD) with respect to the attention and expertise to deal with nuclear weapons issues.

If confirmed, what steps will you take to ensure that there is sufficient attention to management of nuclear weapon matters in the OSD?

Answer. If confirmed, I will work with the USD(P), the ASD-NCB, the Military Departments and other key stakeholders to sustain senior-level attention on the safety, security, and reliability of our nuclear deterrent.

Question. If confirmed, what steps will you take to ensure that there is sufficient technical expertise in OSD with respect to nuclear weapons?

Answer. I would note that with the reorganization in the policy office and the creation of the ASD/GSA, a strong focus on nuclear and other relevant expertise was reestablished. If confirmed, I will continue to evaluate the expertise available to the ASD/GSA. Included in this evaluation will be the means to ensure that new technical and policy expertise relating to nuclear policy is “grown” in OSD since the aging nuclear workforce poses a challenge to our deterrent. If confirmed, I will continue OSD’s traditional outreach to institutions such as the NNSA National Security Laboratories, in order to strengthen relationships and enlist on-site support through their experts detailed to OSD.

NUCLEAR WEAPONS COUNCIL

Question. The Nuclear Weapons Council (NWC) is intended to be the joint DOD-Department of Energy (DOE) management organization for nuclear weapons matters.

If confirmed, what responsibilities and interaction do you expect to have relative to the NWC?

Answer. The NWC is a statutorily established entity with broad responsibility for nuclear weapons. The Under Secretary of Defense for Policy is a member of the NWC. If confirmed, I would expect to support the USD(P) in the work of the NWC.

STRATEGIC NUCLEAR PROGRAMS

Question. The NPR established, among other things, nuclear force structure parameters prior to negotiation of the New START treaty. The administration has indicated that it is continuing to study future nuclear force levels, consistent with the NPR.

If confirmed, what roles and responsibilities do you expect to have relative to policy development concerning future nuclear force structure and planning?

Answer. If confirmed, I expect to help shape the development of policy for the nuclear force structure and the planning to implement the President’s vision of a recapitalized nuclear enterprise.

NEW START TREATY IMPLEMENTATION

Question. The New START treaty entered into force in February 2011, and establishes limits on the deployed and nondeployed strategic nuclear forces of Russia and the United States. The treaty allows the parties up to 7 years to comply with the numerical limits of the treaty.

If confirmed, what role do you expect to play in overseeing implementation of the New START treaty?

Answer. If confirmed, I expect to work with the Air Force and the Navy, Strategic Command, the Joint Staff, the NNSA, and others to implement the New START treaty to meet the central limits of the New START treaty by 2018 while maintaining a safe, secure, and reliable nuclear deterrent.

MODERNIZATION OF THE NUCLEAR WEAPONS ENTERPRISE

Question. A principal issue in the debate of the New START treaty was ensuring that as we draw down the number of deployed nuclear warheads that we modernize our nuclear warhead production capability as well as their command and control systems and delivery platforms.

If confirmed, what role do you expect to play in modernizing these three areas?

Answer. If confirmed, I will continue the Department’s commitment to a safe, secure, and reliable nuclear deterrent. This includes sustaining and maintaining the nuclear stockpile, and modernizing the nuclear infrastructure and delivery systems.

Question. Do you agree that the full funding of the President's plan for modernizing the nuclear weapons complex, commonly referred to as the 1251 report, is a critical national security priority?

Answer. Yes.

Question. Prior to completing this modernization effort do you believe it would be prudent to consider reductions below New START treaty limits for either the deployed or nondeployed stockpile of nuclear weapons?

Answer. The most recent section 1251 report covers funding through 2021, the term of the New START treaty, but these substantial investments in nuclear infrastructure must continue well beyond this timeframe. As a result, any proposed future reductions in deployed strategic warheads covered by the treaty, or deployed non-strategic warheads and non-deployed warheads, not covered by the treaty, must all be considered in a number of contexts, including the rate and progress of the complex modernization, the success of the life extensions, and the sustainment and modernization of the delivery systems, as well as the geopolitical environment. I would note that the NPR states that any future nuclear reductions must continue to strengthen deterrence of potential regional adversaries, maintain strategic stability vis-a-vis Russia and China, and maintain the reliability and effectiveness of our security assurances to our allies and partners. Ensuring that we are well-hedged against geopolitical or technical surprise also remains a key priority. If confirmed, I will support the Department's continuing assessment of the proper force size and the capabilities required for a safe, secure, and reliable nuclear deterrent.

Question. Without the construction of the Chemical and Metallurgy Research Replacement Facility at Los Alamos and the Uranium Production Facility at Y-12 and the other elements associated with the robust plan for modernizing the nuclear weapons complex, do you believe reductions to the strategic hedge would be prudent?

Answer. Ensuring that we are well-hedged against geopolitical or technical surprise remains a key priority of the NPR report with which I agree. Modernization of the nuclear complex, the success of the life extension programs, and the progress maintaining and modernizing nuclear delivery platforms, as well as the geopolitical environment, will all inform any future proposals to reduce the hedge. The NPR also stated that modernization of the nuclear weapons complex will eventually allow the United States to shift its "hedging strategy" away from retaining large numbers of non-deployed warheads to a smaller, more responsive manufacturing infrastructure. If confirmed, I will support the Department's continuing assessment of the proper force size and the capabilities required for a safe, secure, and reliable nuclear deterrent.

NUCLEAR POLICY

Question. Do you support the President's vision for a world without nuclear weapons?

Answer. The Nuclear Nonproliferation Treaty (NPT), which entered into force in 1970, included as a goal the cessation of the nuclear arms race and set forth the commitment "to undertake effective measures in the direction of nuclear disarmament." The President's ultimate goal of eliminating nuclear weapons worldwide is consistent with the NPT. The President has also said, however, that while working toward that goal the United States will retain a safe, secure, and reliable nuclear deterrent, as long as nuclear weapons exist. I support both of these goals.

Question. Do you believe this goal is a viable near- and/or long-term strategic strategy for the United States?

Answer. The conditions that would ultimately permit the United States and others to give up their nuclear weapons without risking greater international instability and insecurity do not exist today. As a result I think the goal is a long-term one.

Question. In a recent speech at the 2011 Carnegie International Nuclear Policy Conference, Thomas Donilon, the President's National Security Advisor, stated that the administration is currently "making preparations for the next round of nuclear reductions" and that DOD will "review our strategic requirements and develop options for further reductions in our current nuclear stockpile." He continued by stating that in meeting these objectives, the White House will direct DOD to consider "potential changes in targeting requirements and alert postures."

Do you believe the United States should pursue further reductions? Please explain why or why not.

Answer. I would note that the NPR states that any future nuclear reductions must continue to strengthen deterrence of potential regional adversaries, maintain strategic stability vis-à-vis Russia and China, and maintain the reliability and effec-

tiveness of our security assurances to our allies and partners. Ensuring that we are well-hedged against geopolitical or technical surprise also remains a key priority. If confirmed, I will support the Department's continuing assessment of the proper force size and capabilities required for a safe, secure, and reliable nuclear deterrent.

Question. Do you believe it would be prudent for the United States to pursue unilateral nuclear reductions? Please explain why or why not.

Answer. On balance I do not believe the United States should make unilateral reductions in the strategic nuclear systems covered under the New START treaty, while the treaty is in force. Reductions in nuclear systems not covered by the new treaty should be addressed on a case-by-case basis and should reflect geopolitical situations as well as the technical requirements associated with maintaining a safe, secure, and reliable nuclear deterrent.

Question. Do you believe changes to well-established nuclear targeting requirements could negatively impact our ability to: (1) assure our allies; (2) discourage other countries from seeking strategic equivalence with the United States in nuclear weapons; and (3) hedge against future threats and uncertainties?

Answer. While I understand that DOD continually assesses deterrence requirements, including potential changes in targeting requirements, I am not familiar with the specific targeting policy. If confirmed, I will continue to support a safe, secure, and reliable nuclear enterprise that maintains strategic deterrence and stability, strengthens regional deterrence, and assures our allies and partners.

BALLISTIC MISSILE DEFENSE REVIEW

Question. In February 2010, the Defense Department issued its report on the first-ever comprehensive review of U.S. ballistic missile defense policy and strategy, the Ballistic Missile Defense Review (BMDR), as required by Congress. The BMDR established a number of policy priorities, including establishing defense against near-term regional missile threats as a top priority of missile defense plans, programs, and capabilities. It also stated the policy of sustaining and enhancing the ability of the Ground-based Midcourse Defense system to defend the Homeland against attack by a small number of long-range missiles by countries such as North Korea and Iran.

Do you support the policies, strategies, and priorities set forth in the Ballistic Missile Defense Review?

Answer. Yes.

Question. If confirmed, what role do you expect to have in implementing these policies, strategies, and priorities?

Answer. If confirmed, I expect to provide oversight and guidance to implement the BMDR, and to participate in the development of related policies, as well as prioritization of resources.

PHASED ADAPTIVE APPROACH

Question. In September 2009, President Obama announced that he had accepted the unanimous recommendation of the Secretary of Defense and the Joint Chiefs of Staff to pursue a Phased Adaptive Approach (PAA) to missile defense in Europe. This approach is intended to defend all of Europe against existing and emerging threats from Iranian missiles, starting this year and increasing in capability with each of its four phases. Phase 4 of the European PAA is intended to provide a capability to defend against long-range missiles that could reach all of Europe or the United States, thus augmenting the existing Homeland missile defense capability.

Do you support the Phased Adaptive Approach to missile defense in Europe and, if confirmed, what role do you expect to have in implementing this approach?

Answer. Yes, I support the European PAA and, if confirmed, I will continue the substantial U.S. efforts already underway to deploy all four phases of the European PAA. I would expect that a significant part of my role would include working with our allies and partners to ensure pragmatic and cost-effective cooperation, and providing oversight and guidance to the development and deployment of U.S. missile defense capabilities.

"FLY BEFORE YOU BUY" APPROACH TO MISSILE DEFENSE

Question. The two most recent flight tests of the Ground-based Midcourse Defense (GMD) system failed to intercept their targets. The Director of the Missile Defense Agency (MDA) has formed a Failure Review Board to determine the root cause of the most recent failure, and will devise a corrective plan that includes two flight tests to confirm the correction. Until the second flight test confirms the correction, the Director of MDA has suspended production of the Exo-atmospheric Kill Vehicles

(EKV) of the type that failed last year's flight tests, in order to ensure that those EKVs are not deployed with a flaw that would need to be corrected later.

Do you agree that it is essential to verify that the GMD flight test failure problem has been corrected before continuing production of the EKVs, and before delivering more Ground-Based Interceptors (GBIs) or deciding how many additional GBIs may be needed in the future?

Answer. Yes. I understand that although the exact number of additional GBIs will not be decided until the test failure problems are identified and resolved, it does appear that additional GBIs will be required.

Question. Do you agree with the Defense Department's "fly before you buy" policy for missile defense that "before new capabilities are deployed they must undergo testing that enables an assessment under realistic operational conditions against threat-representative targets" to demonstrate that they will be effective and reliable?

Answer. Yes.

Question. Do you support the continued modernization and sustainment of the Ground-Based Midcourse Defense System?

Answer. Yes.

HOMELAND MISSILE DEFENSE HEDGING STRATEGY

Question. One of the elements of the BMDR is the policy of hedging our Homeland missile defense options in case the threat of future long-range ballistic missiles from countries like North Korea and Iran develops more rapidly or more robustly than expected, or if we encounter technical problems or delays in developing the Standard Missile-3 Block IIB interceptor. DOD has already decided to pursue a number of hedging options, and is considering others.

Do you support the policy that the United States should maintain a hedging strategy for Homeland missile defense?

Answer. Yes.

Question. If confirmed, what role do you expect to play in overseeing our missile defense hedging strategy?

Answer. If confirmed, I expect to monitor the ballistic missile threat and to be responsible for ensuring that we have the policies and strategies in place to address changes in the threat or unexpected delays in development of new technical capabilities.

MISSILE DEFENSE COOPERATION WITH RUSSIA

Question. The United States and NATO are exploring options to cooperate with Russia on missile defense. President Obama has announced that such cooperation would not limit U.S. or NATO missile defense capabilities.

Do you agree that such cooperation could enhance the security of the United States, NATO, and Russia against common missile threats from nations such as Iran?

Answer. I think that cooperation with Russia could strengthen the effectiveness of U.S. and NATO missile defenses, as well as those of the Russian Federation against Iran.

Question. Do you believe that U.S.-Russian missile defense cooperation could send an important signal to Iran that the United States and Russia are unified in their determination to reduce the risks of Iran's nuclear and missile programs?

Answer. Yes, missile defense cooperation with Russia could send an important signal to Iran that Russia and the United States are working together to counter the acquisition, deployment, and use of ballistic missiles. This in turn could further strengthen the international commitment to prevent Iran from acquiring nuclear weapons.

Question. Do you agree that irrespective of Russian objections, the United States is committed to the continued development and deployment of U.S. missile defense capabilities, including qualitative and quantitative improvements to such capabilities?

Answer. My understanding is that the United States is committed to this goal and to developing and deploying improved missile defenses against states such as Iran and North Korea.

Question. If confirmed, what role do you expect to play in efforts to pursue missile defense cooperation with Russia?

Answer. The administration is pursuing a broad agenda with Russia focused on shared early warning of missile launches, technical cooperation, and even operational cooperation. Cooperation with Russia could offer some important tangible benefits for the United States, our NATO allies, and Russia. If confirmed, I will sup-

port the efforts of the Defense Relations Working Group, established by Defense Secretary Gates and Defense Minister Serduykov, to further practical cooperation in a number of areas, including missile defense.

CHEMICAL AND BIOLOGICAL DEFENSE

Question. One of the areas under the ASD/GSA is the Chemical and Biological Defense Program of the Defense Department.

What do you believe are the principal challenges in chemical and biological defense, and what would be your priorities for the DOD Chemical and Biological Defense Program?

Answer. As part of the Department's overall effort to counter WMD, the Office of the ASD/NCB manages the Chemical and Biological Defense Program. If confirmed, I would be responsible for development of policies to guide the program. I am informed that current priority issues include developing defenses against non-traditional chemical agents, and accelerating the ability to detect and attribute any chemical, nuclear, or biological materials used to attack or threaten the United States. These appear to be appropriate priorities. I would note that DOD, through the CTR and other programs, is developing a comprehensive toolkit of biological defense options for the Secretary that includes biosurveillance, vaccines, and other medical countermeasures to protect our forces against multiple threats.

Question. Do you believe the Chemical and Biological Defense Program should be closely coordinated with related efforts of the Defense Department's CTR program focused on reducing biological threats?

Answer. Yes. The Chemical and Biological Defense program and the CTR program are well-established components of the U.S. efforts to counter WMD. The two programs have related but distinct goals, but they should be closely coordinated for the best effect. If confirmed, I will ensure that these and other DOD biological defense policies are coordinated appropriately both within the DOD and with other relevant U.S. and international agencies.

CHEMICAL DEMILITARIZATION

Question. DOD Directive 5160.05E states the DOD policy that "DOD shall be in full compliance" with the Chemical Weapons Convention (CWC) and the Biological Warfare Convention (BWC). In 2006, the Department announced that the United States would not meet even the extended deadline of April 2012 for destruction of its chemical weapons stockpile, as required under the CWC.

Do you agree that DOD and the U.S. Government should be in full compliance with the terms and obligations of the CWC and the BWC, including the deadline for destruction of the U.S. chemical weapons stockpile under the CWC?

Answer. I understand that in 2006, the United States informed the Organization for the Prohibition of Chemical Weapons that it did not expect to meet the 2012 deadline. Since then the United States has continued to follow a policy of transparency about the U.S. chemical weapons destruction program and stressed U.S. efforts to find ways to accelerate it. I understand that the Department is on track to destroy 90 percent of the U.S. stockpile by the CWC deadline, and that the Army and the office of the USD(AT&L) are focusing significant senior leadership attention on this issue.

Question. If confirmed, will you work to ensure that the Department takes steps needed to minimize the time to complete destruction of the U.S. chemical weapons stockpile, without sacrificing safety or security, and that the Department requests the resources necessary to complete destruction as close to April 2012 as practicable?

Answer. Yes.

COUNTER-WMD EFFORTS

Question. One of the issue areas under the ASD/GSA is the DOD effort to counter WMD, meaning nuclear, biological, and chemical weapons.

What do you believe are the principal challenges in countering WMD, and what are your priorities for Defense Department efforts to counter WMD?

Answer. President Obama made clear in his April 2009 speech in Prague that overcoming the twin dangers of WMD proliferation and WMD terrorism are the greatest threats facing our country and will require a comprehensive approach to reduce and counter these threats. Countering these threats takes commitment not only by the United States but also by the international community. One of the significant challenges is developing a sustained commitment among international partners to both recognize the threat and to take the actions necessary to reduce the dangers.

Question. If confirmed, what role do you expect to play in the creation of policy for, and oversight of, Defense Department programs to counter WMD?

Answer. If confirmed, I will pursue policies to reduce and eliminate WMD dangers at their source and in transit, while enhancing our ability to detect and respond to emerging threats. Another key priority is to continue refining policy guidance that ensures our forces and coalition partners can fight and win, in an environment contaminated by chemical, biological, and other hazards. I would support the USD(P) in developing these policies and coordinate the efforts within DOD with the Department of State, Department of Homeland Security (DHS), and DOE, and other entities that will be essential to execute this function successfully.

PROLIFERATION SECURITY INITIATIVE

Question. The Proliferation Security Initiative (PSI) is an international effort to identify and interdict WMD and related materials.

If confirmed, would you recommend that the PSI program continue, and if so, do you believe that it should be modified in any way?

Answer. I agree with the 2010 National Security Strategy and the NPR Report, which state that the PSI should become a “durable international effort.” If confirmed, I will support the Department’s continued lead role in organizing U.S. support for PSI Operational Experts Group activities, including interdiction exercises.

Question. The absence of funding specifically identified for the PSI program has made it difficult for the Department and Congress to provide appropriate oversight.

If confirmed, would you seek to establish a separate budget account for PSI? If not, why not?

Answer. I understand that congressional oversight of the PSI program has been difficult and that the PSI activities have not always been clear or well-understood by Congress. If confirmed, I would seek to improve understanding of the PSI and to ensure that Congress has whatever information it needs to conduct appropriate oversight of PSI activities.

COOPERATIVE THREAT REDUCTION PROGRAM

Question. If confirmed, what will your role be in implementing and overseeing the CTR program?

Answer. If confirmed, I will provide departmental policy guidance for activities of the CTR program. My understanding is that the ASD/GSA works closely with the Director of the Defense Threat Reduction Agency and the ASD/NCB to ensure that the execution of the CTR program activities is consistent with policy guidance.

Question. If confirmed, what changes, if any, would you recommend to the CTR program, including changes in legislative authorities, programs, or funding?

Answer. Congress has taken steps to streamline CTR’s authorities over the past several years, and I believe this process should continue. Congress has authorized the CTR programs to expand its activities beyond the traditional geographic focus on the states of the former Soviet Union. In carrying out this expanded authority, the DOD CTR program has expanded its biological defense work to address those challenges around the world. If confirmed, I will work with CTR’s many stakeholders in the administration and in Congress to ensure that this expansion is conducted in coordination with other relevant entities and that it is carried out in a cost effective manner.

COMPREHENSIVE TEST BAN TREATY

Question. If confirmed, what role will you play in any efforts to obtain Senate ratification of the Comprehensive Test Ban Treaty (CTBT)?

Answer. If the Senate takes up the CTBT for consideration, and if I am confirmed, I would expect to play a significant role in presenting the views of the DOD to the Senate.

Question. Would you support and/or advocate for the administration to pursue the ratification of the CTBT?

Answer. The President set forth his agenda for nuclear security during his April 2009 address in Prague, Czech Republic. Nonproliferation was a central goal of this agenda, and U.S. ratification of CTBT would play an important part in that agenda. The NPR reflected the Department’s commitment to the goal of ratifying the CTBT. I support the CTBT. If confirmed, I look forward to supporting an effort to ratify the CTBT when the Senate decides to take up the CTBT.

RUSSIA

Question. What areas of opportunity and cooperation do you believe the United States could take to improve overall U.S.-Russian relationships?

Answer. ASD/International Security Affairs (ISA) leads OSD's involvement in defense relations with Russia. If confirmed, I will work with ASD/ISA in support of the Under Secretary of Defense for Policy in those areas that fall under the ASD/GSA including nonproliferation, nuclear security, and missile defense. I believe that the historic cooperation with Russia under the CTR program could help guide such future cooperation.

Question. Would you support an expansion of the U.S. and Russian military-to-military relationship?

Answer. While I do support such cooperation, my understanding is that the office of the ASD/GSA has minimal involvement in military-to-military relations with Russia, and if confirmed, I would look to the ASD/ISA to guide such contacts and to support that office as needed.

Question. What role do you expect to play, if confirmed, on these issues?

Answer. If confirmed, I expect to work with the ASD/ISA, U.S. European Command, and the Joint Staff as appropriate, on any issue relating to nuclear policy and arms control, missile defense cooperation, combating WMD, and the space and cyberspace domains.

CYBERSECURITY

Question. What are the main policy challenges facing DOD in the area of cybersecurity, both within the Department and with respect to the Federal Government as a whole?

Answer. My understanding is that the Department's primary policy challenge is to determine how U.S. Government departments and agencies can best collaborate to provide for the cybersecurity of Federal Government systems and U.S. critical information infrastructure. The President's International Strategy for Cyberspace calls for a whole-of-government approach to cybersecurity while ensuring the continued promotion of an open, interoperable, secure and reliable information and communications infrastructure. I am told that the Department is a full partner in these efforts, which include a commitment to protect the privacy and civil liberties of U.S. citizens.

Question. What should the Defense Department's role be in defending the Nation against cyber threats? Should the Department play the lead role in stopping attacks from abroad through cyberspace, just as the Department defends the Nation from attack by missiles, aircraft, or ships?

Answer. DOD has cyberdefense capabilities that make it an invaluable player in defending the Nation against cyber threats, but it should not be the lead in non-DOD cybersecurity. My understanding is that DHS is the lead for U.S. Federal Government and critical information infrastructure security, a designation with which I agree. The challenge for DOD is to leverage its cybersecurity capabilities to ensure that other agencies, under DHS leadership, are synchronized appropriately for the best defense of U.S. Government networks and critical infrastructure.

Question. What should be the role of law enforcement and DHS in directing operations to defend the Nation in cyberspace?

Answer. I understand that the DHS is the lead for the cybersecurity of non-DOD U.S. Federal systems, and critical infrastructure, a designation with which I agree. Law enforcement can play a key role in U.S. cyber defense by assisting in development of complete forensic information regarding a cyber-intrusion and should maintain its criminal investigative responsibilities. This is an essential step in formulating a U.S. policy and operational response. I am told that DOD organizations such as the Defense Cyber Crime Center have been working to improve collaboration with various law enforcement agencies within DHS and the Department of Justice to ensure enhanced cybersecurity of federal and critical information infrastructure systems.

Question. What organizational and operational construct would allow multiple departments and agencies to mount an effective, unified defense of the Nation's cyber networks and resources?

Answer. My understanding is that the administration's current organizational construct allows multiple departments and agencies to develop, implement, and maintain an effective, unified defense of our federal and critical information infrastructure networks and the resources that reside or pass through those networks. DOD leads this effort, developing plans to secure Federal Government (.gov) systems. My understanding is that DOD is responsible for the security of its networks, some classified government networks, and is currently engaged with the defense in-

dustrial base, through a pilot program, to look at the appropriate role for DOD to protect defense industrial base information systems. I would note that the legislation recently submitted by the President would, if enacted, address many of these issues, including the ability to share information.

Question. In your view, is there a need for a strategy and doctrine for deterring foreign adversaries from engaging in attacks on the United States through cyberspace, just as there is a nuclear deterrence strategy and doctrine based on the threat of retaliation?

Answer. Yes. I believe there is a need to develop a deterrence strategy in cyberspace. The President's International Strategy for Cyberspace states, "The United States will ensure that all risks associated with attacking or exploiting our networks vastly outweigh the potential benefits" and reserves the right to defend vital national assets as necessary and appropriate. If confirmed, I would devote considerable attention to developing appropriate policies and guidance to ensure that all DOD components are coordinated closely in this rapidly evolving aspect of our national security posture.

Question. Should the United States have the ability, and announce the intention, to undertake offensive operations in cyberspace, through DOD, in retaliation against, or to defeat, foreign aggression in cyberspace? Does such doctrine exist today, in your view?

Answer. The President's recently announced International Strategy for Cyberspace states that the United States will maintain the full spectrum of options for cyber deterrence, and that the United States will respond to hostile acts in cyberspace as we would to any other threat to our country. The strategy highlights that nations' inherent right of self-defense applies to cyberspace. If confirmed, I would devote considerable attention to developing appropriate policies and guidance to ensure that all DOD components are coordinated closely in this rapidly evolving aspect of our national security posture.

Question. When do you expect the Department to have a policy and rules of engagement for offensive operations in cyberspace?

Answer. My understanding is that DOD and the executive branch have existing policies and rules of engagement for cyberspace, but that further development and clarification may be useful. The Strategy for Operating in Cyberspace provides guidance on DOD's role in cyberspace. If confirmed, I will work with senior leaders in OSD, U.S. Cyber Command, U.S. Strategic Command, and the Joint Staff to ensure that rules of engagement are consistent with applicable international laws, and drafted to allow us to defend our Nation, our allies, our partners, and our interests.

Question. Defending cyberspace implies the need for conducting surveillance in cyberspace to achieve the ability to warn of threats and to characterize them.

Can surveillance in cyberspace be conducted effectively without impinging on the privacy interests of the American people?

Answer. While this is a challenge, the privacy of U.S. persons should be protected. Balancing requirements for surveillance in cyberspace against privacy interests of the American people is a critical element of any policy or strategy for government operations in cyberspace. The balance between national security and privacy is one we have confronted many times before in other security domains. If confirmed, I will ensure that the Department's senior leadership is fully invested in decisionmaking on this essential civil liberties challenge.

Question. In your view, will it be necessary to publicly disclose more information about the government's plans and methods for conducting surveillance in cyberspace in order to explain how civil liberties and privacy will be protected?

Answer. While the public's understanding of the threat is growing, it is not clear to me at this time whether there is a good understanding of the actions that are taken or could be taken by the U.S. Government. If confirmed, I will devote all necessary attention to ensure that policies and procedures are appropriate to support public confidence in DOD's cyberspace activities.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate

and necessary security protection, with respect to your responsibilities as the ASD/GSA?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

PREVENTING ANOTHER WIKILEAKS

1. Senator MCCAIN. Ms. Creedon, a cyber defense, or shield, should defend against insider threats, such as the downloading of classified documents in Wikileaks. Setting Department of Defense (DOD) computers to prevent unauthorized downloading or transmission of data would seem to be a necessary systemic precaution. What role would you expect to play as the Assistant Secretary in countering these kinds of insider threats?

Ms. CREEDON. No matter how strong we make our external defenses, we will constantly face an insider threat. DOD's recently released Defense Strategy for Operating in Cyberspace outlines top-level requirements to mitigate that threat. The strategy states that in order to deter and mitigate insider threats, DOD will strengthen its workforce communications, workforce accountability, internal monitoring, and information management capabilities.

As Assistant Secretary of Defense for Global Strategic Affairs, I will work closely with the Office of the Under Secretary of Defense for Intelligence and the DOD Chief Information Officer, as well as our military departments, defense agencies, and combatant command partners, as we implement our Defense Strategy for Cyberspace Operations and defend against insider threats.

NUCLEAR DECLARATORY POLICY

2. Senator MCCAIN. Ms. Creedon, the longstanding nuclear declaratory policy of calculated ambiguity has been embraced by past administrations on a bipartisan basis and was strongly endorsed by the Perry-Schlesinger Commission in their 2009 report. Unfortunately, this administration, in my opinion, recklessly abandoned this longstanding policy in its 2010 Nuclear Posture Review (NPR) which asserted that the United States will not use or threaten to use nuclear weapons against non-nuclear weapons states that are party to the Nonproliferation Treaty (NPT), a shift in policy which some argue will lead our enemies to rapidly develop chemical and biological weapons. Do you support this significant change in our declaratory policy?

Ms. CREEDON. I support the change in declaratory policy that sends a strong message to Iran and any other future states parties that fail to comply with the NPT. Under the previous U.S. "negative security assurance," the United States indicated it would "not use nuclear weapons against non-nuclear-weapon states parties to the [NPT]."

The previous policy statement implied that the United States would not consider as an option the use of nuclear weapons against Iran, a non-nuclear-weapon state party to the NPT, "except in the case of an invasion or any other attack on the United States, its territories, its Armed Forces or other troops, its allies, or on a state towards which it has a security commitment, carried out or sustained by such a non-nuclear-weapon state in association or alliance with a nuclear-weapon state."

The revised negative security assurance in the 2010 NPR addresses this issue by committing that the United States "will not use or threaten to use nuclear weapons against non-nuclear weapons states that are party to the NPT and in compliance with their nuclear non-proliferation obligations," thus leaving the door open to using or threatening to use nuclear weapons against non-nuclear states parties to the NPT, like Iran, that are in violation of the NPT.

U.S. declaratory policy, as stated in the 2010 NPR, has a number of distinct audiences, including both potential adversaries we wish to deter, and allies and partners

we wish to reassure. With respect to potential adversaries, the NPR affirmed that “any state eligible for the assurance that uses chemical or biological weapons (CBW) against the United States or its allies and partners would face the prospect of a devastating conventional military response.” In addition, the NPR states that the United States reserves the right to make any adjustments to this assurance that may be warranted by the evolution and proliferation of the biological weapons threat, and U.S. capacities to counter that threat.

In the case of states that possess nuclear weapons and states that fail to comply with their nuclear nonproliferation obligations, the NPR makes clear that there remains a narrow range of contingencies in which U.S. nuclear weapons still play a role in deterring conventional or CBW attack against the United States or its allies and partners. This statement makes clear what the risks and consequences may be for those states considering the use of CBW against the United States, or its allies and partners. As such, the 2010 NPR is less a significant departure from previous declaratory policy than a refinement that takes into account present day challenges and future risks, while preserving U.S. flexibility. This is an evolution that I support.

3. Senator MCCAIN. Ms. Creedon, how does the new policy make us safer and deter the growing nuclear ambitions of rogue nations like North Korea and Iran?

Ms. CREEDON. The revised declaratory policy proclaims that states that do not comply with the NPT are not covered by the U.S. “negative security assurance”. This change in policy makes clear that, in addition to sanctions, pursuing nuclear proliferation carries the additional risk that the United States may consider the use of nuclear in response to nuclear or non-nuclear attack.

The 2010 NPR states that “the United States . . . would only consider the use of nuclear weapons in extreme circumstances to defend the vital interests of the United States or its allies and partners.” The NPR emphasizes that in cases where a country possesses nuclear weapons, but fails to comply with its nuclear nonproliferation obligations, there remains a narrow range of contingencies in which U.S. nuclear weapons may still play a role in deterring conventional, chemical, or biological weapon attacks against the United States, or its allies and partners. Together, these statements make clear what the risks and consequences may be for states considering the use or threatening the use of nuclear weapons or CBW against the United States or its allies and partners.

DEFENSE SPACE

4. Senator MCCAIN. Ms. Creedon, in your advance policy questions you were asked if you support arms control limitations on space capabilities. In your response, you stated that you support the principles outlined in the 2010 National Space Policy which clearly states that the administration will “consider proposals and concepts for arms control measures if they are equitable, effectively verifiable, and enhance the national security of the United States and its allies.” Do you agree that space capabilities—including the ground and space segments and supporting links—are vital to our national interests?

Ms. CREEDON. Yes. I agree with the President’s 2010 National Space Policy statement that the sustainability, stability, free access to, and use of space are vital to U.S. national interests. Thus, any arms control measures should be evaluated in terms of our national interests to determine whether they would enhance our national security. If the terms of any such agreement would not enhance our national security objectives, I would not support the agreement.

5. Senator MCCAIN. Ms. Creedon, do you agree that freedom of action in space is as important to the United States as air power and sea power?

Ms. CREEDON. A key objective of the 2011 National Security Space Strategy, as I understand it, is to maintain and enhance the strategic national security advantages afforded to the United States by space in an environment that is increasingly congested, contested, and competitive. Space capabilities provide the United States and our allies unprecedented strategic advantages in national decisionmaking, military operations, and Homeland security. Similar to our air and naval systems, space systems provide national security decisionmakers with unfettered global access, and create an advantage by enabling a rapid and tailored response to global challenges. As the President’s National Security Strategy makes clear, the sea, air, and space domains must be protected from those who would deny us access or use them for hostile purposes.

6. Senator MCCAIN. Ms. Creedon, are you committed to informing Congress prior to signing any multilateral commitments on space activities?

Ms. CREEDON. I am committed to keeping Congress fully informed in a timely fashion on efforts in this area.

QUESTION SUBMITTED BY SENATOR SAXBY CHAMBLISS

FLY-BEFORE-YOU-BUY

7. Senator CHAMBLISS. Ms. Creedon, in your responses to the advance policy questions you commented on the Fly-Before-You-Buy approach to missile defense and, specifically, said that you agree that “before new capabilities are deployed they must undergo testing that enables an assessment under realistic operational conditions against threat-representative targets to demonstrate that they will be effective and reliable.”

While I don’t necessarily disagree with the Fly-Before-You-Buy approach, I do believe that missile defenses are fundamentally different than other DOD systems and that therefore our criteria for testing and fielding them should also be different.

For example, if 95 percent of the time a fighter plane took off it was able to land successfully, but 5 percent of the time it crashed, that would be unacceptable and we would never tolerate it. However, if 95 percent of the time we launched a ballistic missile interceptor it hit its target, but 5 percent of the time it missed, in my view that is a good track record and infinitely better than having no missile defense system at all, particularly given the exceptional complexity of hitting a missile with another missile in outer space.

What are your thoughts on this and do you believe that, when it comes to protecting our country from a possible nuclear attack, and given the choice between fielding a system which although not perfect is very effective—or instead—fielding no system at all, that it may be acceptable to have different standards for what represents operationally effective and reliable with respect to ballistic missile defense than we have for some other DOD programs?

Ms. CREEDON. I agree that we should take a common-sense approach to standards for assessing what constitutes an operationally effective and reliable system. Operationally realistic testing presents a picture of the operational capabilities of the system. When a system is deployed, the warfighter needs to know its capabilities. Operationally realistic testing would also inform any future modifications needed to improve the performance of the system, either before or after deployment. It is my understanding that DOD is pursuing a balanced approach that seeks to conduct operationally realistic missile defense testing to ensure such systems are reliable, effective, and responsive to warfighter requirements. This approach recognizes that even less than perfect defenses can strengthen both deterrence and the protection of deployed forces, the U.S. Homeland, and allies. Moreover, given the grave consequences of a ballistic missile attack with WMD, DOD is executing a rigorous test program that will continue to improve our missile defense systems to make them as reliable and effective as possible.

[The nomination reference of Madelyn R. Creedon follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
March 14, 2011.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Madelyn R. Creedon of Indiana, to be an Assistant Secretary of Defense, vice Michael Nacht.

[The biographical sketch of Madelyn R. Creedon, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF MADELYN R. CREEDON

Education:

- University of Evansville
 - September 1969–June 1973
 - BA awarded June 1973
- Tulane University School of Law
 - September 1973–June 1974
- St. Louis University School of Law
 - September 1974–June 1976
 - JD awarded June 1976

Employment Record:

- Senate Committee on Armed Services, Counsel, January 2001–present
- U.S. Department of Energy, National Nuclear Security Administration, Assistant Administrator for Defense Programs, June 2000–January 2001
- Senate Committee on Armed Services, Counsel, March 1997–July 2000
- U.S. Department of Energy, Associate Deputy Secretary for National Security, November 1995–March 1997
- Base Realignment and Closure Commission, General Counsel, November 1994–November 1995
- Senate Committee on Armed Services, Counsel, February 1990–November 1994
- U.S. Department of Energy, Trial Attorney, July 1980–February 1990
- Private practice of law, September 1977–July 1980
- Alexandria City Attorney's Office, Law Clerk, March 1977–September 1977 (Approximately)

Honors and awards:

- Department of Energy, Secretary's Achievement Award, 2001
- Department of Energy, Distinguished Service Award, 1990

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Madelyn R. Creedon in connection with her nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Madelyn Raub Creedon.
2. **Position to which nominated:**
Assistant Secretary of Defense, Office of the Under Secretary of Department of Defense, Policy.
3. **Date of nomination:**
March 14, 2011.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
November 1, 1951; Indianapolis, IN.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to James J. Bracco.
7. **Names and ages of children:**
Meredith Bracco Walsh, age 29.
John Edward Bracco, age 26.
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
Broad Ripple High School, 1964–1969, High School Diploma
University of Evansville, 1969–1973, BA
Tulane University School of Law, 1973–1974
St. Louis University School of Law, 1974–1976, JD
9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.
Counsel, Senate Committee on Armed Services, January 2001–present
Deputy Administrator for Defense Programs, National Nuclear Security Administration, July 2000–January 2001
10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.
Trial Attorney, U.S. Department of Energy, July 1980–February 1990
Counsel, Senate Committee on Armed Services, February 1990–November 1994
General Counsel, Defense Base Closure and Realignment Commission, November 1994–October 1995
Associate Deputy Secretary of Energy, U.S. Department of Energy, October 1995–March 1997
Counsel, Senate Committee on Armed Services, March 1997–July 2000
11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.
None.
12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.
Daughters of the American Revolution
Women in Aerospace
13. **Political affiliations and activities:**
 - (a) List all offices with a political party which you have held or any public office for which you have been a candidate.
None.
 - (b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.
None.
 - (c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.
None.
14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.
DOE Secretary's Achievement Award, 2001
DOE Distinguished Service Award, 1990

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

None.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. **Commitments regarding nomination, confirmation, and service:**

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

MADELYN R. CREEDON.

This 13th day of April, 2011.

[The nomination of Madelyn R. Creedon was reported to the Senate by Chairman Levin on August 2, 2011, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on August 2, 2011.]

[Prepared questions submitted to Alan F. Estevez by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?
 Answer. Currently I see no specific changes in the act that I would recommend.
Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. Currently I see no specific changes in the act that I would recommend.

DUTIES

Question. Section 138a of title 10, U.S.C., provides that the Assistant Secretary of Defense for Logistics and Materiel Readiness is to serve as the principal advisor to the Secretary of Defense and the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)) on logistics and materiel readiness in the Department of Defense (DOD).

If confirmed as Assistant Secretary of Defense, what would you view as your principal responsibilities to the Secretary and the Under Secretary?

Answer. If confirmed, I would fulfill the statutory responsibilities of being the principal advisor on logistics and materiel readiness issues to the Secretary and the USD(AT&L), and serving as the principal logistics official for DOD. In this capacity, my responsibilities would include providing oversight and developing policy for all logistics, maintenance, materiel readiness, strategic mobility, and sustainment support programs.

Question. If confirmed, what other duties do you expect that the Secretary and the Under Secretary would prescribe for you?

Answer. If confirmed, I would remain responsive to changes of mission and leadership direction. I would work to provide superior logistics support to the warfighter and find new ways to provide the goods and services we offer in a more efficient and cost effective manner. I strongly believe that logistics has been and will always be a key enabler to the warfighter.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I believe my extensive experience in a variety of positions as a DOD logistician qualifies me to perform the duties of this position. I am currently serving as the Principal Deputy Assistant Secretary of Defense (Logistics and Materiel Readiness). In this capacity, I am responsible for guiding the transformation of DOD logistics processes to ensure cost-effective joint logistics support to support the warfighter.

Furthermore, I have served in every leadership position within the Office of the Assistant Secretary of Defense for Logistics and Materiel Readiness during my tenure in the Office of the Secretary of Defense (OSD). I understand fully the linkages between different logistics capabilities, as well as the relationship between the Department, the Services, our interagency partners, and Congress. My experience provides me with a grounded perspective and insight into DOD operations, allows me to quickly assess a diverse range of issues, and make the rapid but informed decisions needed to support our national interests. I have also worked extensively with the commercial sector to understand best logistics practices across a wide range of industrial and commercial activities.

Question. Do you believe that there are any additional steps that you need to take to enhance your expertise to perform these duties?

Answer. I believe I am prepared to commence these duties, if confirmed. I would embrace this position with enthusiasm and energy.

RELATIONSHIPS

Question. If confirmed, what would your relationship be with:
 The Secretary of Defense.

Answer. If confirmed, I would serve as the principal advisor to the Secretary of Defense on logistics and materiel readiness issues within the DOD.

Question. The Under Secretary of Defense for Acquisition, Technology, and Logistics.

Answer. If confirmed, I would serve as the principal advisor to the USD(AT&L) on all logistics and materiel readiness issues in DOD. I would also monitor, review, and provide oversight of all logistics, maintenance, materiel readiness, and sustainment support programs within DOD, in accordance with applicable DOD policies. In addition, I would assist the USD(AT&L) in the performance of his duties relating to acquisition and technology (logistics and materiel readiness) in any other capacity that he might direct.

Question. The Principal Deputy Under Secretary of Defense for Acquisition, Technology, and Logistics.

Answer. If confirmed, my relationship with the Principal Deputy USD(AT&L) would be the same as that described above in relation to the USD(AT&L).

Question. The Under Secretary of Defense for Personnel and Readiness.

Answer. If confirmed, I would work closely with the Under Secretary of Defense for Personnel and Readiness so that we can both carry out our statutory obligations relating to readiness.

Question. The Director for Logistics (J4), the Joint Staff.

Answer. If confirmed, my relationship with the Director for Logistics (J4), the Joint Staff, would be based on my role as principal advisor to the Secretary of Defense and the USD(AT&L) on logistics and materiel readiness in DOD, and as the principal advisor to the Chairman of the Joint Chiefs of Staff on logistics and materiel readiness.

Question. The Director for Operational Plans and Joint Force Development (J7), the Joint Staff.

Answer. If confirmed, I would coordinate and exchange information with the Director for Operational Plans and Joint Force Development, the Joint Staff, to ensure that DOD logistics and materiel readiness policies are coordinated with operational planning and joint force development requirements.

Question. The Director for Force Structure, Resources, and Assessment (J8), the Joint Staff.

Answer. If confirmed, I would coordinate and exchange information with the Director for Force Structure, Resources, and Assessment (J8), to ensure DOD logistics and materiel readiness policies are coordinated with force structure and resource requirements.

Question. Commander, U.S. Transportation Command (TRANSCOM).

Answer. If confirmed, I would expect to continue to work closely with the Commander, TRANSCOM, to ensure seamless support to meet warfighter requirements.

Question. The Defense Logistics Agency.

Answer. If confirmed, I would exercise authority, direction, and control over the Defense Logistics Agency through its Director.

Question. The Army Materiel Command.

Answer. If confirmed, I would coordinate and exchange information with the Commanding General, Army Materiel Command, to ensure DOD logistics and materiel readiness policies are coordinated with Army materiel requirements.

Question. The Naval Sea Systems Command.

Answer. If confirmed, I would coordinate and exchange information with the Commander, Naval Sea Systems Command, to ensure DOD logistics and materiel readiness policies are coordinated with Navy materiel requirements.

Question. The Naval Air Systems Command.

Answer. If confirmed, I would coordinate and exchange information with the Commander, Naval Air Systems Command, to ensure DOD logistics and materiel readiness policies are coordinated with Navy materiel requirements.

Question. The Marine Corps Systems Command.

Answer. If confirmed, I would coordinate and exchange information with the Commander, Marine Corps Systems Command, to ensure DOD logistics and materiel readiness policies are coordinated with Marine materiel requirements.

Question. The Air Force Materiel Command.

Answer. If confirmed, I would coordinate and exchange information with the Commander, Air Force Materiel Command, to ensure DOD logistics and materiel readiness policies are coordinated with Air Force materiel requirements.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges confronting the Assistant Secretary of Defense for Logistics and Materiel Readiness?

Answer. If confirmed, I would anticipate the major challenges to be:

- (1) Ensuring our warfighters engaged in contingency operations are provided with the best possible logistics support in an era of limited resources. While my key focus in this area would be on our drawdown of forces and transition to the Department of State in Iraq, and continued sustainment of our operations in Afghanistan, I would ensure that we have logistics capability to support any contingency or humanitarian operation.
- (2) Integrating lifecycle management and long-term logistics planning into the acquisition process.
- (3) Optimizing the DOD supply chain so that it is globally responsive to the demands of our warfighters.

While focused on these priorities, I would work to ensure that support was seamless, cost-effective, and timely. I would strive to lower costs and continuously evaluate ways to improve support.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I would:

- (1) Continue to optimize all elements of the DOD's logistics community to include commercial partners and build on measures that would effectively support our warfighters at the best value to the American taxpayers.
- (2) Continue to partner with our Services, the OSD agencies, program offices, and industry partners to integrate long-term lifecycle management considerations early on and throughout the acquisition process.
- (3) Continue to manage supply chain policy and refine our logistics processes to ensure that the DOD operates at its optimum capacity while providing seamless support to the warfighter.

I would continue to streamline operations and enhance capabilities, where appropriate. We continue to work to find more joint solutions from procurement to day-to-day logistics support. This is a natural progression from the way we fight as a joint force to the way we must jointly provision in the future.

DEGRADATION OF EQUIPMENT READINESS DUE TO OPERATIONS TEMPO

Question. The committee has received testimony from senior DOD officials and the Military Services citing the effects of operations tempo on the materiel readiness of equipment deployed in support of contingency operations.

What is your understanding of the extent to which current operations are impacting the service life of major equipment items?

Answer. The engagement of all Services during nearly 10 years of combat since September 11 does have lifespan implications. High usage of equipment based on an aggressive operational tempo, coupled with the harsh environments in which these systems operate, create logistical challenges that the Department must deal with on a continuing basis in order to ensure readiness of critical systems. This is especially true of ground combat equipment and helicopters, but also applies to key Air Force and Navy platforms.

Question. If confirmed, what would your approach be to regenerating materiel readiness that has been degraded by operations tempo?

Answer. If confirmed, I would work to ensure that we reset our systems to a level where we can adequately support the Nation's objectives. After 10 years of conflict we must realize that many of our systems have been degraded and are in need of extensive maintenance in order to bring them back to an acceptable level of operational readiness. DOD will need to make sure that dollars are spent wisely to gain the highest degree of readiness possible.

DRAWDOWN, RESET, AND RECONSTITUTION

Question. The military departments face a major challenge in resetting and reconstituting their equipment as they draw down their forces in Iraq and Afghanistan. The Army and the Marine Corps anticipate that this effort will continue for several years beyond the end of military operations.

Do you believe that the Army and the Marine Corps have set aside adequate levels of funding in their budgets for fiscal year 2012 and future years to meet anticipated reset and reconstitution requirements?

Answer. Reset and reconstitution of both Army and Marine Corps equipment is dependent upon Overseas Contingency Operations (OCO) or supplemental funding, as baseline budgets are insufficient to cover these costs. We must expect to fund reset for 2 to 3 years beyond the end of major contingency operations.

Question. If not, what steps do you believe the Department should take to ensure that this effort is successfully completed in a timely manner?

Answer. Currently, the depots and reset facilities are workloaded to satisfy the Services' readiness requirements within available funding allocations. To ensure work is accomplished in a timely manner, we must continuously improve our processes while ensuring that adequate funding (from both base and OCO accounts) is available. If confirmed, I would ensure we request the appropriate resources, reduce logistics operating costs, reduce total maintenance and supply-chain cycle-times, and increase the effectiveness of all of our programs.

AIR FORCE AND NAVY MAINTENANCE FUNDING

Question. In recent years, the Navy and Air Force appear to have significantly underfunded readiness accounts for maintenance and repair of ships and aircraft and relied upon Congress to provide additional funding in response to unfunded requirements lists. As the country faces an increasingly difficult budget situation, it is likely to become increasingly difficult for Congress to address these unfunded requirements.

Do you believe that maintenance and repair of ships and aircraft has received an appropriate level of priority in the budget processes of the Navy and the Air Force?

Answer. The Navy and the Air Force continue to plan for and request sufficient funding to manage the maintenance and repair of ships and aircraft.

However, reset and reconstitution of both Navy and Air Force equipment is dependent upon OCO or supplemental funding, as baseline budgets are insufficient to cover these costs.

Question. If confirmed, what steps, if any, would you take to address this issue?

Answer. If confirmed, I would work to ensure we request adequate resources to allow us to maximize readiness. I would make certain that we strive to reduce logistics operating costs, reduce total maintenance and supply-chain cycle-times, and increase the effectiveness of all of our programs.

DEPOT MAINTENANCE STRATEGIC PLANS

Question. The Government Accountability Office (GAO) has reported that the Military Services lack clear and comprehensive depot maintenance strategic plans addressing capital investment in facilities and equipment, implementation of a methodology to revitalize and resource organic depot facilities, public-private partnerships, workforce planning and development, and the integration of logistics enterprise planning systems.

What is your understanding of the extent to which the Military Services have updated or revised their depot maintenance strategic plans to address current and future reset requirements, the type and mix of equipment expected to return for reset, equipping priorities, required reset funds for operations and maintenance, and the impact of contractor support work to reset equipment?

Answer. The Military Services regularly update their depot maintenance strategic plans. I believe they are generally prepared to adjust to new equipping priorities and have been successfully performing reset and other maintenance functions for the past 8 years. The appropriate mix of organic and contractor support is also conforming to the 50/50 statute as well.

Question. Do you believe that the steps taken by the Military Services are adequate, or are additional measures needed?

Answer. Yes, I do believe that the steps the Services are currently taking are appropriate given the warfighting requirements and available resources. If confirmed, I would look for additional opportunities to seek efficiencies and increase effectiveness across the logistics enterprise.

Question. What is your understanding of the extent to which the Military Services have assessed the effects of reset on the baseline budgets, competing demands to reset equipment to meet unit readiness goals, the preservation of core capabilities, and the risk level that organic depot maintenance facilities may be able to accommodate in order to complete reset workload requirements?

Answer. Reset for all Services is reliant on OCO funding as well as on baseline budgets. Currently, the depots and reset facilities are workloaded to satisfy the Services' readiness requirements within available funding allocations. To ensure work is accomplished in a timely manner we must continuously improve our processes while ensuring that adequate funding (from both base and OCO accounts) is available. We must expect to fund reset for 2 to 3 years beyond the end of major OCOs.

Question. Do you believe that the steps taken by the Military Services are adequate or are additional measures needed?

Answer. I believe that the Services are taking appropriate steps and performing the correct activities to ensure long-term sustainment of equipment. If confirmed, I would ensure we request the appropriate resources, reduce logistics operating costs, reduce total maintenance and supply chain cycle times, and increase the effectiveness of all of our programs.

Question. What is your understanding of the extent to which the depots' plans address the need to manage workload as current operations draw down and decreases in maintenance requirements when these operations end?

Answer. As a Department, we are preparing to draw down prudently to ensure the warfighter is supported and equipped properly. Air Force and Navy require-

ments will change very little due to the nature of commitments placed on them in Operation New Dawn (OND)/Operation Enduring Freedom (OEF). However, the Army and Marine Corps requirements will decrease in direct proportion to the drawdown of deployed forces. There will be a 2- to 3-year enduring requirement during the post-drawdown phase to ensure that all reset and other maintenance work is completed and forces are readied for future requirements. If confirmed, I would look for additional opportunities to seek efficiencies and increase effectiveness across the logistics enterprise.

Question. Do you believe that the steps taken by the Military Services are adequate or are additional measures needed?

Answer. Yes, I do believe that the steps the Services are currently taking are appropriate given the warfighting requirements and available resources. If confirmed, I would continue to examine this issue closely to identify whether additional measures are needed.

ARMY UNIT EQUIPMENT REQUIREMENTS

Question. As the pace of overseas operations declines, the Army is resetting equipment and rebuilding the readiness of its forces. Two documents—Modification Tables of Organization and Equipment (MTOE), and Table of Distribution and Allowances (TDA)—provide the basic personnel and equipment requirements against which on-hand personnel and equipment are measured in determining unit readiness. During our operations in Iraq and Afghanistan, U.S. Central Command repeatedly requested force capabilities that did not align well with Army MTOEs.

What is your understanding of the action the Army is taking to review and update unit requirements so that they better reflect the needs of the combatant commands?

Answer. All Services, including the Army, continually adjust to meet the changing requirements of the mission. Multiple DOD/Service Centers ensure that the lessons learned are incorporated into Service/DOD doctrine, as appropriate. These efforts shape the current and future training of our men and women in uniform, as well as the equipment that they use. For example, when improvised explosive devices (IED) became the prevalent threat to the health and safety of our troops engaged in OND/OEF, service-specific tactics, techniques, and procedures (TTP) changed to meet that threat and the acquisition and logistics arms of the DOD partnered to produce multiple variants of the Mine Resistant Ambush Protected (MRAP) family of vehicles. The Army has ongoing work to ensure its ability to sustain items acquired to meet urgent operational needs. The Department continues to work to train and equip units for emerging and nontraditional missions as outlined in the Quadrennial Defense Review.

Question. Do you believe that this action is adequate or are additional measures needed?

Answer. Yes, this action is appropriate.

Question. If confirmed, how will you approach the task of ensuring that unit equipment requirement documents (MTOE and TDA) are updated in sufficient time to be considered in the development of future budget requests?

Answer. This issue is largely a Service responsibility and they must determine what equipment they need to support the operational mission. However, I recognize that rapidly developing threats require the rapid fielding of systems to meet them. We are doing this now by integrating with organizations like the Joint Improvised Explosive Device Defeat Organization (JIEDDO), and with our Joint Rapid Acquisition Cell, where we address these types of issues early on to improve systems and support the warfighter. If confirmed, I would plan to continue this work.

AIRCRAFT CONDITION-BASED MAINTENANCE

Question. DOD helicopters are under high demand and flying well beyond their anticipated flying hours, and the Army is currently engaged in an effort to install digital source collectors (DSC) on its manned aircraft (AH-64 A, AH64 D, CH-47 D, CH-47 F, MH-47 G, UH-60 A, UH-60 L, UH-60 M, MH-60 L, MH-6, and OH-58 D) in order to conduct Condition-Based Maintenance (CBM). The DSC are being installed on all new production utilizing procurement appropriations. However, the funding of the transmission, storage, and analysis of the data is minimally funded and heavily leveraged with OCO funding at this point. An Army Acquisition, Logistics, and Technology report released this month stated, "there is clear evidence that CBM+ technologies and procedures have avoided at least three catastrophic Class A accidents that would have resulted in the total loss of the aircraft."

Do you believe the Army should extend the Product Improvement Pilot Program beyond fiscal year 2013? If so, why?

Answer. The Army has taken advantage of the current authority and is in the process of completing an assessment of the Aviation Pilot Program. As requested by current legislation, the Army will provide a report and recommendation to Congress in fiscal year 2012. I believe the Army's current direction is prudent and will allow both the Department and Congress ample opportunities to take action and make corrections as necessary in the future.

Question. What is your understanding of the Army's plans to fund the transmission, storage, and analysis of the data that are important to improving maintenance efforts, decreasing maintenance and spare part costs, and increasing readiness?

Answer. The Army funds Condition-Based Maintenance (CBM) functions, such as CBM data storage, analysis, and transmission, within the budget cycle. The long-term strategy for CBM data transmission, storage, and analysis includes the integration of actionable logistics data in a future increment of the Global Combat Service Support-Army (GCSS-A). The engineering unique CBM data transmission and storage requirements to enable weapon system performance analyses are separately funded from the GCSS-A.

Question. Do you believe that the planned level of funding is adequate for this purpose?

Answer. The fiscal year 2012 President's budget request is sufficient to meet our Condition-Based Maintenance data storage, analysis, and transmission critical requirements. If confirmed, I would work with the Army to adequately fund Condition-Based Maintenance Programs.

Question. What is your understanding of the results of the condition-based maintenance effort thus far in terms of readiness and cost-savings?

Answer. The beneficial outcomes of the Army's Aviation Condition-Based Maintenance program include a 3 to 12 percent reduction in Non-Mission Capable Maintenance rate, a 5 to 8 percent increase in fleet readiness, and a 1 to 4 percent reduction in Maintenance Test Flight Hours. These results have increased the Army's combat power, reduced maintenance costs, and have provided critical information that avoided catastrophic failures during flight.

Question. What do you believe should be the overall goal of the Condition-Based Maintenance effort in the Army?

Answer. I believe the overall goal of Condition-Based Maintenance-Plus (CBM+) should be to increase combat power by performing maintenance and supply functions based upon evidence of need. The Army has set forth four CBM program objectives to meet this goal:

- (1) Decrease the maintenance burden
- (2) Increase platform availability and readiness
- (3) Enhance safety
- (4) Reduce operations and support costs

ARMY PREPOSITIONED STOCK

Question. As contingency operations in Iraq wind down, the Military Services have begun reconstituting their prepositioned equipment. At the same time, the Military Services have begun to review future requirements for their prepositioned stocks. We also understand that DOD also intends to include prepositioned stock in some of its department-wide strategy planning, and has a number of initiatives underway to improve the mobility system, responsiveness to forces, and effectiveness of prepositioned capabilities.

What is your understanding of the extent to which the Department is working with the Military Services to develop an integrated requirement for prepositioned stocks that is based on a Department-wide strategy?

Answer. The Department is currently conducting a repositioning study that has a high probability of reshaping the future landscape of repositioning programs. This initiative, The Comprehensive Materiel Response Plan (CMRP), is a VCJCS-directed and TRANSCOM/DLA-led study aimed at developing a comprehensive plan for DOD materiel positioning and distribution.

Question. Do you believe that the Army has adequately assessed which of the many pieces of nonstandard equipment that were purchased to meet urgent warfighter needs should be added to the prepositioned stock sets?

Answer. The assessment of which equipment goes into prepositioned stocks is generally driven by operational vice logistics considerations. All non-standard equipment the Army has procured is being systematically reviewed as part of the Army's Capabilities Development for Rapid Transition (CDRT) process. One of the possible outcomes for materiel going through CDRT is to be selected for stockage in Army Prepositioned Stock (APS). Probably the best example of nonstandard equipment

being selected for APS is the MRAP—in fact, the majority of the total MRAP vehicle population will be positioned into global APS sets.

Question. What additional reset and sustainment resources will be needed to add to these stocks?

Answer. In order for the Army to complete its APS Strategy 2015, sets used in support of current operations will require the continuation of OCO funding to ensure the reset of equipment for future use.

Question. Do you believe that these new requirements are appropriately accounted for in the APS Strategy 2015?

Answer. I believe the Army is incorporating new requirement in APS 2015. Currently, new requirements in the Army's APS sets include MRAP vehicles, Long Term Armor Strategy (LTAS) Tactical Wheeled Vehicles, and Counter Measure Electronic Warfare equipment. The Army continues to modernize its APS in accordance with warfighting strategy and priorities.

Question. In your view, has the Army identified adequate funding to meet its plan of reconstituting its prepositioned stocks around the world by 2015?

Answer. The Army is counting on the reset of theater retrograded equipment from OND and OEF in order to fill its Army Prepositioned Stock strategic requirements. In order for the Army to complete its APS Strategy 2015, sets used in support of current operations will require the continuation of OCO funding to ensure the reset of equipment for future use. Most of the equipment will come to the Army's Army prepositioned stock inventory from depot stocks or equipment already purchased.

Question. What steps, if any, would you take if confirmed to address this issue?

Answer. Prepositioning decisions are based on warfighting strategy and requirements that are informed by logistics capabilities. If confirmed, I would shape the future of prepositioning strategy by leveraging efforts such as the Comprehensive Material Readiness Plan to ensure our policies on prepositioned equipment provide the Services with the overarching guidance they need to make informed programming decisions. L&MR is currently incorporating improvements, including new reporting procedures that will provide Congress with greater insight into the Services prepositioning program.

DEFENSE LOGISTICS AGENCY FULFILLMENT OF SPARE PARTS ORDERS

Question. Air Force Logistics Centers (ALC) have expressed frustration over DLA's inability to deliver some parts on time to the ALCs. DLA achieves a 94 percent fill rate for spare parts, however, the remaining 6 percent can occasionally ground an aircraft. Some parts can take well over a year to arrive at the ALCs and it appears that DLA will not order parts until the aircraft reaches an ALC. As a result, the Air Force is sometimes forced to cannibalize a part off of one aircraft to repair another.

What is your view of DLA's track record on delivering parts to the Air Force's ALCs?

Answer. DLA has acknowledged that there is room for continued improvement in delivering parts to the Air Force ALCs. It is working closely with the Air Force to improve performance and is sharply focused on the supply chain management planning activity. To accomplish this, DLA conducts senior leadership engagements to review issues of major importance to the Air Force. These engagements have improved demand forecasting and helped to standardize critical planning processes.

The Air Force and DLA must continue to partner with one another to improve demand and supply chain processes. While we still have a way to go to improve our collaborative demand planning processes, the focus is there and we are seeing benefits.

Question. What changes, if any, do you think are needed to improve DLA's performance in this regard?

Answer. DLA is continuously working with the Air Force to improve performance. The efforts to standardize critical planning processes have improved demand forecasting. The Air Force and DLA will continue to partner to improve the supply chain process through synchronizing workflows between the Air Force industrial customers and DLA's distribution points. If confirmed, I would work to ensure that DLA remains responsive to the Air Force's needs.

Question. What is your view of the High Velocity Maintenance (HVM) program and the role that it can play in expediting needed parts for aircraft maintenance?

Answer. I fully support the HVM program and believe it is extremely beneficial to both the Air Force and DLA. It will provide predictability for the respective System Program Office's plan to induct weapon systems (down to the specific tail number) for repair which will improve demand planning accuracy. Improved demand

planning accuracy will allow DLA to optimize its supply chain response to future customer requirements.

BALANCED SCORECARD AND LOGISTICS PERFORMANCE MANAGEMENT

Question. DOD's logistics leadership has adopted the Balanced Scorecard concept as one of the important components of logistics performance management. The process of adapting and implementing the Balanced Scorecard in DOD is almost 2 years old.

In your view, what are the benefits of the Balanced Scorecard for logistics performance management?

Answer. While the Department does not currently use a formalized Balanced Scorecard, we do apply a performance framework to logistics which has many of the same attributes and objectives of the Balanced Scorecard. Performance is monitored quarterly against defined goals and targets for response time to customer (warfighter) requests. These include the total time for a customer to receive an ordered item (Customer Wait Time) and the percentage of orders filled to customer specification (Perfect Order Fulfillment). This framework is implemented as part of the Department's Strategic Management Plan and Performance Budget, and the performance measurements are reviewed by senior logisticians in the Services and DLA, by logistics leadership in OSD, and by the Deputy Chief Management Officer, as part of the process of monitoring Department-wide performance goals.

Question. Do you believe that implementation of the Balanced Scorecard in DOD can be accelerated?

Answer. We do not intend to accelerate implementation of a formalized Balanced Scorecard. However, as described above, we apply a performance framework for logistics which has many of the same attributes and objectives of the Balanced Scorecard. Performance is monitored quarterly against defined goals and targets. To meet these goals and targets, we are implementing key initiatives such as the Comprehensive Inventory Management Improvement Plan, automated identification technology, and improved Operational Contract Support (OCS), and we continue to seek ways to accelerate the time to implement fully these key initiatives.

CORROSION PREVENTION AND CONTROL

Question. Congress and DOD have significantly increased their emphasis on the prevention and management of corrosion in equipment and materiel of the Services. Actions to address corrosion challenges include establishment of a central corrosion program management office and the institutionalization of corrosion prevention and mitigation as a key component of the Department's Planning, Programming, Budgeting, and Execution process.

What is your understanding of the challenge to the readiness of the Military Services as a result of corrosion in equipment and materiel and the extent to which the Services are coordinating their efforts?

Answer. Corrosion has a negative impact on readiness, cost, and safety. The Department has completed analyses over the last 5 years which provide the Services with detailed data on the cost of corrosion for weapon systems.

Clearly, corrosion is a growing challenge that every weapon system in the DOD faces and, as such, the Department is aggressively working to share knowledge between the Services and commercial entities all aimed at finding the best solutions at the least cost to the Department.

Question. If confirmed, what would be your relationship with the Director of Corrosion Policy and Oversight Office?

Answer. If confirmed, I would collaborate with the Director of Corrosion Policy and Oversight in several activities. Since corrosion is closely linked to sustainment, I would continue to foster this partnership.

Question. If confirmed, how would you assess the implementation and effectiveness of corrosion prevention and control efforts in programs under your purview and, working with other responsible officials, address identified areas of concern?

Answer. If confirmed, I would aggressively attack this growing logistics issue by collaborating with the Director of Corrosion Policy and Oversight and through corrosion prevention control forums.

RADIO FREQUENCY IDENTIFICATION

Question. Congress has supported DOD's Radio Frequency Identification (RFID) program in order to improve the visibility and identification of, and access to, equipment and supplies.

What experience and familiarity do you have with RFID technologies and their implementation?

Answer. I have been a leader in DOD's efforts to implement RFID technologies since the early mid-1990s, implementing the world's largest active RFID network to provide in-transit visibility to combatant commanders and implementing satellite tracking and intrusion detection devices to reduce pilferage in hostile regions of the world. Under my leadership, we have leveraged commercial global RFID standards to align public and private sector standards, implemented passive RFID at strategic distribution depots, and continued to focus on the use of RFID to add enterprise business value.

Question. In order for RFID technology to be effective, it must be used consistently throughout DOD and the Military Services. One of the problems highlighted in ongoing contingency operations is a lack of understanding of RFID technology and how to use the devices, particularly in field operations.

If confirmed, what actions would you take to ensure that standardized training on the use of RFID and other tracking technologies is being provided to all necessary military and civilian logistics personnel?

Answer. I continue to lead efforts to improve the tracking of key assets through the use of RFID across the spectrum of DOD operations, especially in Iraq and Afghanistan. I lead a senior-level summit with the Joint Staff J-4 to continue to improve in-transit visibility.

Currently, our forces train on the use of RFID technologies. We apply active RFID tags to our sustainment shipments bound for overseas destinations even during peacetime, and use them at major training centers as a means to ensure soldiers are trained before they are deployed. If confirmed, I would continue to focus on ensuring our forces are properly trained on the use of our tracking capabilities.

DOD INDUSTRIAL FACILITIES

Question. Each of the Military Departments has its own maintenance depots, shipyards, and air logistics centers to help maintain its equipment. The Military Departments also contract with the private sector for maintenance support. LMI recently completed a congressionally-directed review of depot maintenance issues and recommended significant changes.

What are your views of the LMI study?

Answer. The study made specific recommendations to DOD that it felt would improve the depot maintenance processes. Overall, the study provided DOD with a review of the organic depot maintenance environment and raised broad issues that we now must more fully assess in the context of the Department's related and ongoing logistics support improvements and efficiency initiatives. We are assessing their recommended follow-on policy and legislative implementation activities for feasibility.

Question. What changes, if any, do you plan to institute, if confirmed, in response to the recommendations of the LMI study?

Answer. Given the far-ranging and long-term implications of any changes, the Department is working through a very deliberate process to determine the most appropriate way forward. If confirmed, I would continue to shape this process.

DATA VALIDATION FOR DEPOT MAINTENANCE PUBLIC-PRIVATE WORKLOAD DISTRIBUTION REPORT

Question. Section 2466 of title 10, U.S.C., directs the Secretary of Defense to submit a report to Congress by April 1 of each year outlining the percent distribution of depot-level maintenance and repair workload between the public and private sectors for the preceding fiscal year and the projected distribution for the current and ensuing physical years. One of the continuing problems noted in the preparation of this report is the validity and accuracy of data submitted by the Services. As a result, the actual percentage of work completed at public depots is less than what is reported by the department in some cases.

If confirmed, what steps will you take to ensure the accuracy of DOD public-private workload distribution reporting?

Answer. The Department has taken steps to improve the accuracy of these reports. These steps include:

- Improved guidance and instructions. Detailed instructions now accompany our annual data call that supports this reporting;
- Third-party review by Military Service audit agencies is required;
- Emphasis on prompt and proper training for those responsible for developing the report; and
- The use of a 2 percent "trigger" for increased oversight—a Military Service must submit a plan to OSD identifying actions taken to ensure compliance if they are within 2 percent of the limitation.

In their last audit in November 2006, the GAO found only one error in our reporting that amounted to approximately ½ of 1 percent of the private sector share of the Army's workload.

If confirmed, I would plan to send Congress the most accurate data available on depot maintenance and public-private workload distribution.

DEFENSE PERSONAL PROPERTY SYSTEM

Question. After many years of costly development, DOD in 2009 implemented the Defense Personal Property System (DPS) which is a web-based system for managing personal property moves for all DOD personnel. The DPS incorporates numerous improvements including contractual awards to movers based on satisfactory performance, not lowest bid; full replacement value as the standard for lost, stolen, or severely damaged personal property; on-demand web-based move counseling; and many other features. An important means of evaluating who the best and worst moving contractors are in DPS is satisfaction surveys that should be submitted by DOD personnel who have completed permanent change-of-station moves.

What is your understanding of the cost-efficiency of the DPS and whether its reliance on web-based systems has produced any savings for the Services?

Answer. DPS was intended as a quality-of-life initiative. However, DPS drives a more competitive rate environment and the Department has realized a savings of \$300 million since implementation in April 2009, and continues to realize savings of more than \$20 million per month.

Question. What is your understanding of the current return rate of satisfaction surveys by DPS customers?

Answer. The overall customer satisfaction survey return rate for the last 12 months has been gradually improving, and is now at 25 percent.

Question. If the rate is below 50 percent, to what do you attribute the inability to achieve a higher rate of return and do you believe that the current rate of return jeopardizes the ability to distinguish good and bad movers?

Answer. Although the current 25 percent survey return rate is statistically valid and provides the Department with the ability to distinguish between good and bad movers, a higher return rate would optimize the carrier selection process by awarding more business to higher performing movers. The Department, in collaboration with industry, has set a new survey return goal of 35 percent, which we believe is achievable.

Question. What methods do you think could properly be used to improve the survey return rate?

Answer. In addition to setting a customer survey return rate goal of 35 percent, the Department is communicating the importance of completing the customer satisfaction survey via entitlement counseling, on-site inspections, 24/7 call centers, automatic email alerts, brochures, and overseas commercials on the Armed Forces Network. The Department is using every possible opportunity to remind customers about the importance of completing the customer satisfaction survey.

Question. What is your understanding of actions being taken by TRANSCOM and the Services to improve the performance and utility of DPS?

Answer. The Department is constantly looking for ways to improve DPS for all DOD and industry users. We established a General Office Steering Committee that meets regularly to prioritize work and to steer the program. An example of a recent improvement that TRANSCOM and the Military Services have made is increasing the bandwidth to allow more users on the system, which results in improved DPS response times. Another improvement is that the Department is leveraging DPS to transition household goods storage invoicing and payments from a manual to electronic process.

LOGISTICS SUPPLY ROUTES FOR OPERATIONS IN AFGHANISTAN

Question. Logistics supply for ongoing operations in Afghanistan present a number of difficult issues, including the difficulty of transporting cargo through neighboring countries, security issues on Afghan roads, unreliable transportation and security contractors, limited airfield infrastructure within Afghanistan, synchronizing arrival of units with equipment, and competing logistics priorities in a coalition environment.

What role do you expect to play, if confirmed, in addressing these logistics challenges?

Answer. If confirmed, I would continue to focus on operations in support of Afghanistan.

While understanding that Afghanistan is a challenging logistical environment, we must continue to identify ways to improve our support to the warfighter. Working

with our government and industry partners, I will work to ensure that strategic and in-theater logistics operations are synchronized. We will also focus on improving the visibility of assets and movements in order to better synchronize the arrival of units with equipment and supplies.

Question. What steps, if any, do you plan to take, if confirmed, to address logistics supply challenges for ongoing operations in Afghanistan?

Answer. If confirmed, I would continue to monitor the delivery to and sustainment of materiel in Afghanistan. My goal would be to continuously improve our logistical support to the warfighter.

L&MR has integrated logistics experts into the requirements process to ensure that sustainment considerations and solutions are incorporated into rapidly fielded programs. Additionally we have focused on programs such as the MRAP vehicle. We conduct MRAP Deep Dives quarterly in order to focus on the readiness of this key warfighting capability and ensure that all logistical requirements are addressed.

Question. What additional steps, if any, do you believe we can and should be taking to address the possibility that the southern supply route may become less available or more challenging in light of recent events in Pakistan?

Answer. The Department continues to plan for contingencies that threaten any of our routes into and out of Afghanistan. We continue to look at ways to mitigate dependency on any one country's logistics support by expanding existing capabilities and developing new logistics routes. DOD has already increased the amount of cargo moving via the Northern Distribution Network and we continue to work to minimize the impact of any one route failure. We have also established viable multi-modal and airlift only alternatives to ground movement that can work in both directions.

PLANNING FOR CONTRACTOR SUPPORT IN CONTINGENCY OPERATIONS

Question. GAO recently reviewed DOD's OPLANs and found that only four such plans include an approved Annex W addressing contract support requirements, contractor management plans, contract oversight processes, and manpower requirements to execute contractor oversight. Moreover, GAO found that the few annexes that do exist merely "restate broad language from existing OCS guidance" and fail to identify military capability shortfalls that will require contract solutions or ensure that combatant commanders are aware of even the general scope and scale of contract support that will be needed for an operation.

Do you believe that the current level of military planning for contractor support in military operations is adequate and appropriate?

Answer. This is a complex issue and may be different for every mission. We have learned a lot and continue to improve and evolve our strategy regarding the use and management of contractors. In terms of forecasting and planning for contracted support, the Department is integrating contractor support estimates into existing adaptive planning systems. If confirmed, I would work through the Defense Logistics Agency to resource joint OCS planners for each of the combatant commanders. These planners have the background experience and expertise to address the shortfalls noted by the GAO study. The Chairman of the Joint Chiefs of Staff issued guidance to include contractor deployment planning into Joint Operation Planning and Execution System (JOPES) and to ensure visibility of appropriate development of relevant Annex Ws. Additionally, the Department is ensuring that OCS requirements are considered in force planning scenario development and joint force assessments. To enhance these efforts, I would ensure that we continue to develop the automated tools to support Operational Contractor Support in adaptive planning under JOPES. We need the same level of fidelity in planning for OCS as we have for organic military forces.

Question. What steps, if any, would you take, if confirmed, to improve military planning for contractor support in military operations?

Answer. If confirmed, I would continue to work with and support the Chairman in the development of automated tools use to plan for contractors during military operations. The Chairman is currently working on the development of a tool that estimates contractor requirements at the operational level. We are simultaneously developing a complementary type of tool that will allow DOD leaders to have insight into global and strategic requirements that include that availability, readiness, and capabilities of contractors. Both of these automation tools will allow senior decision-makers to quickly and accurately assess the impacts, risks, and mitigating strategies for proposed changes to forces, capabilities, assignments, apportionments, and allocations/options. I would also continue to adequately resource joint OCS planners currently supporting each of the combatant commands. In addition, DOD expects to provide over 50 planners to support the Military Services and Defense Agencies, resourced through the Defense Acquisition Workforce Initiative as provided by the

fiscal years 2012 to 2016 Resource Management Directive 700A2. In coordination with the Chairman and Military Services, if confirmed, I would maintain visibility and oversight of these planners to ensure that they continue to be relevant for contingency contractor planning.

PRIVATE SECURITY CONTRACTORS

Question. Federal agencies, including DOD, have spent more than \$5 billion for private security contractors in Iraq and Afghanistan over the last decade. Over this period, there have been numerous reports of abuses by private security contractors, including allegations of contractors shooting recklessly at civilians as they have driven down the streets of Baghdad and other Iraqi cities. In September 2007, employees of Blackwater allegedly opened fire on Iraqis at Nisour Square in downtown Baghdad, killing more than a dozen Iraqis and wounding many more. More recently, the Senate Armed Services Committee reported on questionable activities by private security contractors in Afghanistan.

What role do you expect to play, if confirmed, in addressing issues relating to the use of private security contractors in OCOs?

Answer. The Office of the Assistant Secretary of Defense for Logistics, Materiel, and Readiness oversees the Operational Contractor Support capability along with the Director of Defense Procurement and Acquisition Policy. This is accomplished through the development of joint policies on requirements definitions, contingency program management, and contingency contracting and includes contracted security functions. If confirmed, I would expect that my role would be to ensure that this policy reflects the statutory requirements enacted by law and the values of DOD—consistent with other national and international laws and the enduring values of our Nation.

Question. Do you believe DOD and other Federal agencies should rely upon contractors to perform security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations?

Answer. Without a substantial increase in the force structure committed to contingency operations, the use of contractors for some security functions in contingencies is a necessity. However, these security contractors must be properly regulated and supervised and their roles must be carefully limited and defined. Contractors cannot engage in combat operations. Their use of force is limited to self defense and the defense of others against criminal violence and the protection of critical property. Under these circumstances, I believe that the limited use of security contractors in contingency operations is acceptable. It would be inappropriate for me to comment on their use by other departments and agencies. If confirmed, I would ensure that proper limitations on private security contractors are reflected in DOD instructions, regulations, and the processes that implement those instructions.

Question. In your view, has the U.S. reliance upon private security contractors to perform such functions risked undermining our defense and foreign policy objectives in Iraq and Afghanistan?

Answer. The use of force by contractors or military personnel can, if misapplied, undermine our policy objectives. Private security providers are a necessity in Iraq and Afghanistan and will likely continue to be so in future contingency operations. DOD has established policies and procedures to manage contractors effectively to prevent unnecessary violence that would be detrimental to our policy objectives. This is an area that requires constant attention and in which continued supervision and policy refinement are required.

Question. What steps, if any, would you take, if confirmed, to ensure that any private security contractors who may continue to operate in an area of combat operations act in a responsible manner, consistent with U.S. defense and foreign policy objectives?

Answer. If confirmed, I would work to ensure that two actions are taken. First, policy for the management and oversight of private security contractors involved in military operations would be fully coordinated and understood across the Department and in the field. To this end I would work to ensure that DOD instructions remain current, clear, and aligned with combatant commander guidance and orders, and consistent with U.S. defense and foreign policy objectives.

Second, there must be unified and consistent procedures for all private security contractors (PSC) that define the proper roles, limitations, and basic operating practices of PSCs among all U.S. Government agencies, coalition partners, and private sector customers of PSCs operating in contingency areas. If confirmed, I would continue to collaborate with the State Department and other governmental agencies to

ensure consistent policy is developed and to promote a common international understanding of responsible use and oversight of private security services.

Question. Do you support the extension of the Military Extraterritorial Jurisdiction Act to private security contractors of all Federal agencies?

Answer. I support steps to ensure that there is legal accountability for the actions of all contractors supporting the U.S. Government in contingency operations. DOD has consistently supported unambiguous application of the Military Extraterritorial Jurisdiction Act to all DOD contractors and all U.S. Government private security contractors who are supporting the DOD mission in a contingency area. If confirmed, I would consult with DOD's interagency partners concerning appropriate mechanisms to ensure such accountability.

Question. What is your view of the appropriate application of the Uniform Code of Military Justice to employees of private security contractors operating in an area of combat operations?

Answer. I support the use of appropriate civilian and military legal processes to enforce accountability for the actions of all contractors deployed to an area of combat operations. I believe that in the absence of an effective civil legal system, the application of the Uniform Code of Military Justice is one tool that can be employed effectively to hold contractors accountable for their actions if it is authorized.

Question. OMB Circular A-76 defines "inherently governmental functions" to include "discretionary functions" that could "significantly affect the life, liberty, or property of private persons".

In your view, is the performance of security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations an inherently governmental function?

Answer. There are certain situations where this may be the case, or be so close to inherently governmental as to blur the distinction. For this reason, current defense instructions require combatant commanders to carefully assess the likelihood of an activity becoming involved in combat before authorizing the use of private security contractors. This is particularly true for tasks involving access control to military installations and protecting military supplies.

Whether military or civilian contractors, it is critical that we ensure that all security elements are properly trained to a common standard, regardless of who they work for. Further, it is essential that these contractors are effectively supervised, under the control of competent authority, and accountable for their actions. To this end, DOD is facilitating the development of the business and operational standards for private security companies described in section 835 of the National Defense Authorization Act of 2011. DOD is also working with the State Department to develop international norms for private security provider conduct and oversight. If confirmed, I would ensure that as these efforts mature, and they are incorporated into DOD policy and contracting procedures.

Question. Do you see a need for a comprehensive reevaluation of these issues now?

Answer. The use, oversight, and management of private security contractors must be continually reviewed. The changing situation on the ground demands that we look to see if our policy remains relevant. International efforts, such as the Montreux Document, the International Code of Conduct for Private Security Service Providers, and the current effort to write business and operational standards for private security service, also require us to regularly review our policies. The implementation of these policies must be reviewed as well. If confirmed, I would continue to review these issues to determine whether there is a need to reevaluate these policies.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of Defense for Logistics and Materiel Readiness?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

USE OF CONTRACTORS AT DEPLOYED LOCATIONS

1. Senator MCCAIN. Mr. Estevez, I note in your advance policy answers regarding the use of contractors in support of overseas contingency operations that this is a complex issue and may be different for every mission. In your opinion, can the combatant commanders feasibly plan and carry out operations without the use of contractors?

Mr. ESTEVEZ. The Department of Defense (DOD) has, and continues to utilize contractors for operational support during contingency operations. While the extent of our use of contractors depends in part on the size, scope, and complexity of the mission, DOD expects that future operations will require the integration of substantial contractor support. The 2010 Quadrennial Defense Review acknowledged that contractors are part of the Total Force. The Department has issued strategic planning guidance that significantly increases the requirement to include contracted support during the operational planning process. As part of operational planning, combatant commanders must factor in contractor support as a component of the Total Force. Planning for contracted support is essential and is now the norm where it was not in previous operations.

2. Senator MCCAIN. Mr. Estevez, what impact does the reliance on military contractors have on the idea of combat force multiplication on the battlefield?

Mr. ESTEVEZ. As a result of the report produced by the Chairman of the Joint Chiefs of Staff Task Force on Contractor Dependency (April 2010), the Department is focused on operational contractor support and continues to assess implications with respect to force mix, contract support integration, planning, and resourcing. Contractors serve as force multipliers, performing non-inherently governmental functions while allowing military forces to focus on the operational mission.

3. Senator MCCAIN. Mr. Estevez, if confirmed, what would you do to reform contracting and oversight processes to ensure contingency contractors perform their tasks efficiently without waste of taxpayers' funds?

Mr. ESTEVEZ. The Under Secretary of Defense (Acquisition, Technology, and Logistics) exercises management and oversight of contingency contracting through the Office of Defense Procurement and Acquisition Policy in conjunction with the Assistant Secretary of Defense (Logistics and Material Readiness) (ASD(L&MR)). Additionally, DOD has a functioning governance body which synchronizes the efforts of the Joint Staff, the Services, and other departmental staff agencies—the Operational Contract Support Functional Capabilities Integration Board which is chaired by the Deputy Assistant Secretary of Defense for Program Support, a key leader on the ASD(L&MR) staff, and includes the Service Operational Contract Support Program Managers, the Joint Staff, OSD offices, and defense agencies. This entity ensures that processes and policy are in place to effectively oversee contracted support during contingency operations and is the primary body that addresses findings and recommendations from other organizations such as the Commission on Wartime Contracting and the Defense Science Board. Furthermore, the ASD(L&MR), in conjunction with the Joint Staff, the Services, and DOD staff agencies, continues to update policies and procedures to incorporate lessons learned along with emerging legislative requirements, while assessing planning capability requirements, and updating business systems, in order to improve processes related to contingency contracting and contractor oversight.

QUESTIONS SUBMITTED BY SENATOR SAXBY CHAMBLISS

50/50 STATUTE

4. Senator CHAMBLISS. Mr. Estevez, the well-known 50/50 statute is codified in title 10, U.S.C. 2466, and states that “Not more than 50 percent of the funds made available in a fiscal year to a military department or a defense agency for depot-level maintenance and repair workload may be used to contract for the performance by non-Federal Government personnel of such workload for the military department or the defense agency. Any such funds that are not used for such a contract shall be used for the performance of depot-level maintenance and repair workload by employees of DOD.”

The rationale for this statute as well as the companion core statute codified in title 10, U.S.C. 2464, is that the United States needs to ensure we have the organic capability and capacity to carry out critical depot maintenance activity, that the government’s skills and capabilities in this area do not atrophy, and that we are always able to respond effectively and timely to a mobilization, national defense contingency, or other emergency requirement.

What are your views of the core and 50/50 provisions and, if confirmed, will you be committed to retaining a robust organic capability and capacity for depot maintenance within DOD and the Military Services?

Mr. ESTEVEZ. I believe robust, organic capabilities, shaped by core depot maintenance requirements, are essential in order to maintain the readiness of our force. The legislative framework provided by core and 50/50 has served us well in the past and supports considerations we must address to ensure the continuation of appropriate organic depot maintenance capabilities and capacity. It is critical that we guarantee that a robust capability is available in the national industrial base, and as part of that, key capabilities must reside in the organic depots. Additionally, we must ensure that our commercial industrial base stays vital, and along with our organic base, is capable of surging to support our national security requirements. I am committed to the efficient utilization of both of these enablers and, indeed, to all aspects of logistical support throughout the industrial base.

5. Senator CHAMBLISS. Mr. Estevez, every area of the DOD budget is under scrutiny for savings and readiness, and logistics are no exception. What are your thoughts regarding how DOD and the Services might attain efficiencies and savings, specifically in the area of logistics, while still complying with the core and 50/50 provisions?

Mr. ESTEVEZ. The tenets of core and 50/50 will serve as boundary conditions as we pursue efficiencies throughout the entire industrial base—both in the organic and commercial sectors. While doing so, we will actively monitor and assess the impacts of our initiatives on compliance with the provisions—and all initiatives will include, as a basic tenet, consideration of the health of both sectors. Our objective is to strengthen the depot maintenance industrial base by improving the efficiency of its operations, not to weaken it. This is true whether we are implementing initiatives that affect the organic sector, commercial sector, or both.

6. Senator CHAMBLISS. Mr. Estevez, is interservicing of workload a possible means of achieving savings and, if so, what are your views on interservicing of workload?

Mr. ESTEVEZ. I believe that interservicing of workloads is one of many effective tools that may be used to achieve increased efficiency at DOD depots and DOD conducts substantive interservicing maintenance operations today. We need to give careful consideration to interservicing options during the “source of repair decision-making process.” Most notably, we must examine those decisions associated with new systems, where the establishment of a duplicate capability may be avoided, and where the Department can maximize on the use of existing capabilities. As DOD explores options related to interservicing of depot maintenance, we must fully consider responsiveness to our warfighters and maintain adequate robustness within our industrial base.

[The nomination reference of Alan F. Estevez follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
April 6, 2011.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Alan F. Estevez, of the District of Columbia, to be Assistant Secretary of Defense for Logistics and Materiel Readiness. (New Position)

[The biographical sketch of Alan F. Estevez, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF ALAN F. ESTEVEZ

Education:

- Rutgers University
 - September 1975–May 1979
 - Bachelor of Arts degree awarded May 1979
- Industrial College of the Armed Forces
 - August 1994–June 1995
 - Master of National Security Resource Strategy degree awarded June 1995

Employment Record:

Principal Deputy Assistant Secretary of Defense (Logistics & Materiel Readiness), Department of Defense, Pentagon, Washington, DC, Nov. 2006–Present

- Performing the Duties of the Assistant Secretary of Defense (Logistics & Materiel Readiness), April 2009–Present

Assistant Deputy Under Secretary of Defense (Supply Chain Integration), Department of Defense, Pentagon, Washington, DC, Oct. 2002–Nov. 2006

Acting Assistant Deputy Under Secretary of Defense (Transportation Policy), Department of Defense, Pentagon, Washington, DC, Sept. 2001–Dec. 2001

Deputy, Office of the Assistant Deputy Under Secretary of Defense (Transportation Policy), Department of Defense, Pentagon, Washington, DC, May 2000–Oct. 2002

Assistant for Traffic Management, Office of the Assistant Deputy Under Secretary of Defense (Transportation Policy), Department of Defense, Pentagon, Washington, DC, Dec. 1995–May 2000

Logistics Management Specialist, U.S. Army Strategic Logistics Agency, Alexandria, VA, May 1991–Dec. 1995

Supervisory Traffic Management Specialist, Military Traffic Management Command, Falls Church, VA, Mar. 1989–May 1991

Supervisory Traffic Management Specialist, Military Traffic Management Command, Western Area, Oakland, CA, July 1987–Mar. 1989

Traffic Management Specialist, Military Traffic Management Command, Eastern Area, Bayonne, NJ, June 1981–July 1987

Honors and awards:

- Presidential Rank Distinguished Executive Award (2011)
- Presidential Rank Meritorious Executive Award (2006)
- Secretary of Defense Medal for Meritorious Civilian Service (two awards—2005, 2009)
- Service to America Medal, National Security category (2005)
- Office of the Secretary of Defense Medal for Exceptional Civilian Service, 2001
- Office of the Secretary of Defense Award for Excellence, 1997
- Defense Logistics Agency Superior Civilian Service Award, 1997

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate, to complete a form that details the biographical, financial, and other information of the nominee.

The form executed by Alan F. Estevez in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Alan Fredric Estevez.

2. **Position to which nominated:**

Assistant Secretary of Defense (Logistics and Materiel Readiness).

3. **Date of nomination:**

April 6, 2011.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

September 20, 1957; Kearny, NJ.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to Susan Hideko Pearson (Ludrick).

7. **Names and ages of children:**

N/A.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Industrial College of the Armed Forces/National Defense University, Masters of National Security Resources, 1994-1995

Rutgers University, BA in Political Science, 1975-1979

North Arlington High School, NJ, HS Degree, 1971-1975

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Principal Deputy assistant Secretary of Defense (Logistics & Materiel Readiness), Department of Defense, Pentagon, Washington, DC, Nov. 2006-Present

- Performing the Duties of the Assistant Secretary of Defense (Logistics & Materiel Readiness), April 2009-Present

Assistant Deputy Under Secretary of Defense (Supply Chain Integration), Department of Defense, Pentagon, Washington, DC, Oct. 2002-Nov. 2006

Acting Assistant Deputy Under Secretary of Defense (Transportation Policy), Department of Defense, Pentagon, Washington, DC, Sept. 2001-Dec. 2001

Deputy, Office of the Assistant Deputy Under Secretary of Defense (Transportation Policy), Department of Defense, Pentagon, Washington, DC, May 2000-Oct. 2002

Assistant for Traffic Management, Office of the Assistant Deputy Under Secretary of Defense (Transportation Policy), Department of Defense, Pentagon, Washington, DC, Dec. 1995–May 2000

Logistics Management Specialist, U.S. Army Strategic Logistics Agency, Alexandria, VA, May 1991–Dec 1995

Supervisory Traffic Management Specialist, Military Traffic Management Command, Falls Church, VA, Mar. 1989–May 1991

Supervisory Traffic Management Specialist, Military Traffic Management Command, Western Area, Oakland, CA, July 1987–Mar. 1989

Traffic Management Specialist, Military Traffic Management Command, Eastern Area, Bayonne, NJ, June 1981–July 1987

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

DOD Liaison to Board of Governors, Electronic Product Code Global (EPCGlobal), Global Standard 1 (GS1) (standard setting group), 2004–Present.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Board Member/Chapter Treasurer, National Defense Transportation Association, Washington, DC, Chapter, 1992–Present.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member, National Defense Industrial Association

Member, Museum of Modern Art, NY

Member, Defenders of Wildlife

Member, Friends of the National Zoo

Member, Corcoran Gallery

Member, WETA

Member, The Potomac Conservancy

Member, Habitat For Humanity

Member, National Parks Conservation Association

Member, The Nature Conservancy

Member, Rails to Trails

Member, Chesapeake Bay Foundation

Member, WAMU885

Member, Philips Collection

Member, Potomac Appalachian Trail Club

Member, C&O Canal Trust

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

None.

14. Honors and awards: List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Presidential Rank Distinguished Executive Award, 2011

Presidential Rank Meritorious Executive Award, 2006

Office of the Secretary of Defense Medal for Meritorious Civilian Service (two Awards—2005, 2009)

Service to America Medal, National Security category, 2005

Office of the Secretary of Defense Medal for Exceptional Civilian Service, 2001

Office of the Secretary of Defense Award for Excellence, 1997

Defense Logistics Agency Superior Civilian Service Award, 1997

15. Published writings: List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Estevez, A.F. and S. Geary (2006), “RFID: The Future is Now,” Exceptional Release Magazine, Summer 2006, pp 26–29.

Estevez, Alan F., (2005), "RFID Vision in the DOD Supply Chain," Army Logistian, May-June 2005, pp 5-9.

Estevez, A.F. and S. Geary (2004), "Lessons from the Desert," Supply Chain Management Review, November/December 2004, pp. 38-43.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

I speak in my official capacity at conferences and luncheons about once a month on topics ranging from Radio Frequency Identification technology implementation to general Department of Defense logistics programs. However, these are not formal speeches.

17. **Commitments regarding nomination, confirmation, and service:**

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B-F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B-F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

ALAN F. ESTEVEZ.

This 13th day of April, 2011.

[The nomination of Alan F. Estevez was reported to the Senate by Chairman Levin on August 2, 2011, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on August 2, 2011.]

NOMINATIONS OF ADM JAMES A. WINNEFELD, JR., USN, FOR REAPPOINTMENT TO THE GRADE OF ADMIRAL AND TO BE VICE CHAIRMAN OF THE JOINT CHIEFS OF STAFF; GEN RAYMOND T. ODIERNO, USA, FOR REAPPOINTMENT TO THE GRADE OF GENERAL AND TO BE CHIEF OF STAFF, U.S. ARMY; AND GEN. WILLIAM M. FRASER III, USAF, FOR REAPPOINTMENT TO THE GRADE OF GENERAL AND TO BE COMMANDER, U.S. TRANSPORTATION COMMAND

THURSDAY, JULY 21, 2011

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:41 a.m. in room SH-216, Hart Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Lieberman, Reed, Akaka, Nelson, Udall, Hagan, Begich, Blumenthal, McCain, Sessions, Wicker, Brown, Ayotte, and Graham.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Jonathan D. Clark, counsel; Madelyn R. Creedon, counsel; Richard W. Fieldhouse, professional staff member; Creighton Greene, professional staff member; Jessica L. Kingston, research assistant; Michael J. Kuiken, professional staff member; Peter K. Levine, general counsel; William G.P. Monahan, counsel; Michael J. Noblet, professional staff member; and William K. Sutey, professional staff member.

Minority staff members present: David M. Morriss, minority staff director; Adam J. Barker, professional staff member; Paul C. Hutton IV, professional staff member; Daniel A. Lerner, professional staff member; Lucian L. Niemeyer, professional staff member; Michael J. Sistik, research assistant; Diana G. Tabler, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: Brian F. Sebold and Breon N. Wells.

Committee members' assistants present: Margaret Goodlander and Christopher Griffin, assistants to Senator Lieberman; Carolyn Chuhta and Elyse Wasch, assistants to Senator Reed; Nick Ikeda,

assistant to Senator Akaka; Ann Premer, assistant to Senator Nelson; Casey Howard, assistant to Senator Udall; Lindsay Kavanaugh, assistant to Senator Begich; Joanne McLaughlin, assistant to Senator Manchin; Jordan Baugh, assistant to Senator Gillibrand; Ethan Saxon, assistant to Senator Blumenthal; Anthony Lazarski, assistant to Senator Inhofe; Lenwood Landrum, assistant to Senator Sessions; Clyde Taylor IV, assistant to Senator Chambliss; Joseph Lai, assistant to Senator Wicker; Charles Prosch, assistant to Senator Brown; Brad Bowman, assistant to Senator Ayotte; Ryan Kaldahl, assistant to Senator Collins; and Sergio Sarkany, assistant to Senator Graham.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody. The committee meets this morning to consider the nominations of three outstanding military officers for positions of leadership and command, among the most important in the Department of Defense (DOD).

Our witnesses today are Admiral Sandy Winnefeld, U.S. Navy, to be Vice Chairman of the Joint Chiefs of Staff (JCS); General Raymond Odierno, to be Chief of Staff of the U.S. Army; and General William Fraser III, USAF, to be Commander of the U.S. Transportation Command (TRANSCOM).

We thank each of you for many decades of dedicated service to our Nation and your willingness to continue that service in these positions of great responsibility and challenge.

Let me also extend on behalf of the committee our thanks to your families, whose support has been so important to the success that you have enjoyed, and whose support for you makes a difference for the Nation as well. As is a tradition that we particularly enjoy, we would invite each of you to introduce any family members or friends who may be here with you during your opening remarks.

One of the first actions that all three of our nominees will carry out, if confirmed, will be immediately implementing the reduction of U.S. forces in Afghanistan by 10,000 by the end of this year, and removing the rest of 33,000 U.S. surge forces from Afghanistan by the end of the summer in 2012.

These reductions are part of an ongoing process of transitioning, increasing responsibility for Afghanistan's security to the Afghan security forces, which by 2014 would have leader responsibility for security throughout the country.

The course which the President's decision sets provides a strategy for success in Afghanistan. The Afghan security forces have increased by almost 100,000 since the President announced the surge in December 2009, and that Afghan army will expand by another 70,000 security forces by the time all of the U.S. surge forces are brought home by September 2012.

The growing capabilities of the Afghan security forces provide the Afghan people, but one Afghanistan elder in southern Afghanistan told me what they want the most, which is the ability to secure their own country themselves. Having Afghan forces in the lead puts to the lie to the Taliban's propaganda that international forces are there to occupy Afghanistan. The Afghans taking over their own security is the key to the strategy for success in Afghanistan.

Admiral Sandy Winnefeld currently serves as the Commander of U.S. Northern Command (NORTHCOM) and is Commander of the North American Aerospace Defense Command (NORAD) with Canada. In this capacity, he has been responsible for defense of the Homeland, military support through civil authorities for domestic emergencies, as well as aerospace warning and control for North America.

In his current capacity, he is the combatant commander responsible for the operation of the ground-based midcourse defense (GMD) system. If confirmed as Vice Chairman of the JCS, he would have a number of key roles and responsibilities related to missile defense.

We would be interested in Admiral Winnefeld's views on whether he believes we should demonstrate correction of the two recent GMD flight test failures before resuming production or delivery of the kill vehicles for the GMD interceptors.

The Vice Chairman of the JCS has a wide range of responsibilities, including playing a major role as Chairman of the Joint Requirements Oversight Council (JROC) in defining and improving requirements for future acquisition programs, and monitoring the progress of ongoing programs.

As we all know, most of the major acquisition programs at DOD are over budget and behind schedule. The F-35 Joint Strike Fighter is one dramatic example. As the Defense budget is reduced, the inability of the Department to acquire, and its contractors to provide, needed systems on time and on budget becomes an even more significant problem than it is already.

A significant challenge related to the Vice Chairman's acquisition responsibility is in the area of cyber security. All of the systems, equipment, support, intelligence, and almost everything else that DOD does relies on is on networks. Making sure that the networks can support the operations reliably will be a large part of Admiral Winnefeld's responsibilities.

There also are issues, such as when does a cyber attack on United States' activities or entities require or justify a U.S. offensive reaction, cyber or other. The Vice Chairman will surely be involved in addressing that issue as well.

If confirmed, Admiral Winnefeld would also serve as a member of the Nuclear Weapons Council. Producing and maintaining nuclear weapons is expensive and technically challenging. Today the Nuclear Weapons Council is participating in the design of the nuclear deterrent for the next generation. If confirmed, one of the challenges would be to keep both the costs and the scope of maintenance and modernization within reason.

Of course, a central part of the Vice Chairman's role will be to act as chairman of the Joint Chiefs in the chairman's absence.

General Odierno is well known to this committee. He has been before us several times as a commander of U.S. forces in Iraq, and more recently when nominated for his current position as Commander, U.S. Joint Forces Command.

General Odierno will assume leadership of an Army that is battle tested and proven, but stretched by 10 years of war. The Army has met every challenge with the courage, dedication, and professionalism for which all of us are profoundly grateful.

Over the next 4 years, under General Odierno's leadership, the Army will deal with many enduring and new challenges. First and foremost, the Army must continue to meet the demand for trained and ready forces in support of operations in Afghanistan and Iraq. As a commander with recent operational experience, we will be interested to hear General Odierno's views on the continuing demands for Army units in support of operations, their preparation, readiness, and performance, and how he would ensure that we continue to meet this challenge.

The future beyond operations in Afghanistan and Iraq holds real questions about what we will need the Army to do, how it will be structured and equipped, and how we manage to keep a force that is as good and ready as it is today, modernizes to stay relevant for tomorrow, and that is at the same time affordable. We will be interested to hear General Odierno's views on how he will deal with the budget pressures that are already being felt throughout the Defense Department and that no doubt will result in funding challenges over the next several years.

Perhaps the greatest leadership challenge that General Odierno will face is the 49,000 soldier end strength reduction planned for completion by 2017. The Army has reduced its size many times in its history, most recently at the end of the Cold War and Operation Desert Storm. The Army must plan and be able to manage its troop reductions and accompanying force structure changes to avoid hollowing out units and to remain as capable as it is today. We are interested to hear General Odierno's thoughts on end strength reduction, force structure changes, and how best to manage this change without losing the Army's hard won fighting edge.

Finally, the Army must continue to work as hard as possible to deal with the human costs to soldiers and their families from the pressures and consequences of an army in continuous combat for 10 years. The Army has instituted significant programs to improve deployment predictability and reduce the stress of multiple rotations on soldiers and their families, improve care for our wounded soldiers and their families, and strive to deal with the heart-breaking incidence of suicides that continue in the Active-Duty Force, and have been increasing in our National Guard and Reserves. The committee will be interested to hear General Odierno's assessment and plans for the Army's efforts in those areas.

General Fraser will also face critical challenges in his new position. The strategic mobility of our Armed Forces enables us to project power anywhere around the world. TRANSCOM, which encompasses the Air Force's Mobility Command, the Navy's Military Sealift Command, and the Army's Surface Deployment and Distribution Command, is the linchpin of that strategic mobility.

General Fraser will also be dealing with the disparate components of the private transportation sector, including railroad, commercial air carriers, who participate in the Civil Reserve Air Fleet (CRAF) program, and commercial ship operators.

One area where General Fraser will be immediately deluged is the growing challenge of logistical support for the Afghanistan theater of operations, concerns about over reliance on sometimes tenuous surface lines of communication through Pakistan, for logistic support into Afghanistan had led to over the past couple of years

to the establishment of the Northern Distribution Network through Central Asia. However, these northern routes may need to be expanded to allow increased movement, both into and increasingly out of, Afghanistan if we are to maintain the quality and the timeliness of that support to our forces.

We will be interested in General Fraser's views on that challenge.

Again, gentlemen, our deepest thanks to you and to your families for all that you have done and will do for the Nation in the days ahead.

Senator McCain.

STATEMENT OF SENATOR JOHN MCCAIN

Senator MCCAIN. Thank you, Mr. Chairman. I welcome General Odierno, Admiral Winnefeld, General Fraser, and their families. A special thanks to their families, and I congratulate them on their nominations.

I particularly want to recognize Mr. Tony Odierno, a distinguished wounded warrior and former soldier who is here today supporting his father.

General Odierno, I strongly support your nomination to be the next Chief of Staff of the Army. Your critical role in Iraq, and I note that you are one of the very few officers to have commanded at the division, corps, and Army level during a single conflict, gives you a unique perspective on the capabilities of U.S. forces as you executed maneuver and counterinsurgency operations.

Your service as Commander of the 4th Infantry Division, as Commander of Multi-National Force-Iraq, and U.S. Forces-Iraq, was instrumental in implementing the surge strategy and turning the tide of battle in Iraq.

Your career of Army service and your various joint assignments, currently as Commander of U.S. Joint Forces Command, have provided you with an essential understanding of counterinsurgency operations, joint operations, and, most importantly, of soldiers and their families.

We know that soldiers, Active Duty, reservists, and national guardsmen and their families have served gallantly and with a single-minded focus on victory under the most stressful conditions. As the Army has transformed itself into an expeditionary force while meeting the demands of two wars, we are enormously grateful for their service and sacrifices. The human costs of combat have been great.

The comprehensive study completed last year under the Army Vice Chief's direction underline the effects of continuous combat rotations and the work that has to be done. But I applaud the efforts of senior military leaders in the Army and in DOD to understand these problems, provide the best medical care possible in responding to the needs of wounded soldiers, and to assist the families of all soldiers. If you are confirmed, there will be no higher priority than continuing this work.

Winning the current fight in Afghanistan and preserving the hard-won gains in Iraq must continue to be the Army's top priority. In his few short months on the job, General Dempsey identified resolving the future mix of personnel and equipment as the Army's

top priority. In this regard, you will be required to deliver honest assessments and make hard choices.

As the Army decides upon the optimal number and type of vehicles and equipment and invests in recapitalization and modernization, I urge you to look carefully at recent history. Over the last decade, the Army embarked on a number of developmental procurement and modernization programs that were subsequently de-scoped, re-baselined, or cancelled outright. I am very interested in the specific steps you intend to take to improve the Army's procurement track record.

The committee will be interested to know your views on the continued drawdown of our forces in Iraq, and under what conditions you would advise an enduring troop presence. I have expressed my concerns about the size and pace of the drawdown of troops in Afghanistan. I also want to hear your views about reducing Army manpower by 22,000 soldiers over the next 3 years, and another 27,000 in future years, while absorbing a growing population of nondeployable soldiers.

As you take the reins of Chief of Staff, we need to know how much risk the Army, and individual units and soldiers, are being required to absorb in this challenging environment.

Admiral Winnefeld, congratulations on your nomination to be the next Vice Chief. I think you set a very high standard as Commander, NORTHCOM, improving our homeland defense capabilities and enhancing security in our southwestern border.

There are still many challenges in this regard, and I hope that as Vice Chairman of the JCS, you will continue to participate in this important work.

You are stepping into big shoes following General Cartwright. I thank him for his great service, and I hope he will continue to contribute his expertise to national security debates in the future.

I urge you to focus immediately, upon confirmation, on improving the acquisition process. The Department and its industry partners have stumbled again and again in producing weapons systems at an affordable cost that, without question, the Services desperately need.

Your involvement is also needed in furthering cyber defense strategy and nuclear strategy, in ensuring we achieve success in the Middle East and Libya, and in ensuring that the demand for budgetary reductions does not result in loss of capabilities and a military diminished and unable to respond in defense of our vital national interests.

General Fraser, you are following in the steps of two outstanding leaders at TRANSCOM, General McNabb and General Schwartz. I am sure you will receive excellent mentoring and advice from them.

Last year, DOD released the Mobility Capabilities and Requirements Study-2016 (MCRS-16), that found the Department's planned mobility capabilities are sufficient to support the most demanding projected requirements. Specifically, the study found that large cargo aircraft airlift capacity exceeds the peak demand in all the peacetime and wartime scenarios considered, which covered a broad spectrum of military operations.

The study concluded that the military needs only 264 to 300 large cargo aircraft. Eliminating the 316 large cargo aircraft for re-

striction would allow the Air Force to retire an additional 15 C-5A aircraft, and provide substantial savings by freeing up billions in taxpayers' dollars over the next few years. Given the current climate of fiscal austerity, which requires we look to all corners of the defense enterprise to determine how DOD can conduct itself more efficiently, this is a move in the right direction.

I thank our witnesses again for their service and their willingness to serve in these key positions.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator McCain.

Let me now call first on Admiral Winnefeld.

STATEMENT OF ADM JAMES A. WINNEFELD, JR., USN, FOR RE-APPOINTMENT TO THE GRADE OF ADMIRAL AND TO BE VICE CHAIRMAN OF THE JOINT CHIEFS OF STAFF

Admiral WINNEFELD. Chairman Levin, Senator McCain, and distinguished members of the Senate Armed Services Committee, I am very honored to appear before you today as the President's nominee to become the Vice Chairman of the JCS.

This nomination is especially humbling to me when I consider the eight exceptional officers who have previously held this position. I am very energized by the opportunity to continue serving alongside America's young men and women in uniform.

It is also an honor to appear alongside two very special colleagues in Ray Odierno and General Will Fraser, with whom I have been so privileged to serve in the past, and whom I hold in such high regard. If we are confirmed, I look forward very much to the opportunity to continue working closely with them in the future.

It goes without saying that we as a Nation face many serious near-term and long-term challenges, and that many of them fall inside the military's lane. If confirmed, I will do my part, do my best to ensure that our many ongoing operations around the world are concluded successfully, to assist the Secretary of Defense and the Chairman in crafting a way ahead for the Department to include operating in a challenging budget environment, the continued improvements in the requirements and acquisitions process that Senator McCain referred, and also to maintain the best possible stewardship of the young men and women that have been entrusted to our care.

As such, I look forward to working with not only the senior leadership in DOD in Washington, but also with our combatant commanders and our friends and allies around the world, and also key members of the executive branch and Congress to include the members of this committee to do our best to make sure that we're defending the American people.

If I am confirmed, I will be joined in Washington by my family, who unfortunately could not be here today. But I want to mention my incredible wife, Mary, who is so supportive of military families, and my two sons, L.J. and Jonathan, who I love dearly and I am very proud of.

My parents were also unable to be here today, but I will forever be indebted to them for their love and support, and also for their service together with a 30-year Navy career.

Thank you again very much for the opportunity to appear before you. Thank you for the ongoing support that you on this committee and your hardworking staff continue to provide to our men and women serving in uniform.

I look forward to your questions. Thank you, sir.

Chairman LEVIN. Thank you so much, Admiral.

General Odierno.

STATEMENT OF GEN RAYMOND T. ODIERNO, USA, FOR RE-APPOINTMENT TO THE GRADE OF GENERAL AND TO BE CHIEF OF STAFF, U.S. ARMY

General ODIERNO. Chairman Levin, Senator McCain, other distinguished members of the Senate Armed Services Committee, thank you for allowing me to have the opportunity to appear before you today.

Before I get started, I would like to introduce my family. I would first like to start out with my wife, Linda, who has been by my side for my entire 35-year career. She has dedicated herself to soldiers and family, leading family readiness groups at company, battalion, brigade, division, and corps levels, volunteering and leading to ensure our soldiers and their families are taken care of. But most importantly, I believe she served as a role model for all the young spouses throughout the military.

Over the last 3 years, she has dedicated herself to championing and providing pet therapy to our wounded soldiers and taking this on as a great opportunity to help to continue to move forward with their lives. She has done all this while being the mother of three children and three grandchildren. I could not do it without her. She has been by my side the whole time, and she is, frankly, my personal hero and my partner.

I am also blessed to have three wonderful children who are all here today. First, my youngest son, Michael, who is a senior at Texas Tech University, and who has probably had to live with more deployments than any other child in recent years, and has done so well in helping my wife as they have worked through these together.

My daughter, Katie, and her wonderful husband, Nick, who are here today, they are from Baltimore. Katie is a mother and also works in interior architecture. They live in Baltimore, and they are so supportive of me.

Finally, my oldest son, Tony, who many of you know, West Point graduate, served in Iraq, was injured in 2004. He has set such an excellent example for all of us through his perseverance and dedication. Today, Tony is married to Danielle. Unfortunately, she could not be here today. She is watching their twin boys and could not make it out today. He works for the Yankees, but he continues to—

Senator LIEBERMAN. You were doing so well until then. [Laughter.]

General ODIERNO. But he continues to dedicate himself to wounded warriors as he is on the board of directors of the Wounded Warrior Project. It is an honor for me to have them here as they continue to serve me and our country.

Mr. Chairman, if I could go on, over the last 10 years, our Army has proven itself in arguably the most difficult environment this Nation has ever faced. Our leaders at every level have displayed unparalleled ingenuity, flexibility, and adaptability. Our soldiers have displayed mental and physical toughness and courage under fire. They have transformed the Army into the most versatile, agile, rapidly deployable, and sustainable strategic land force in the world today.

I am proud to be part of this Army with the opportunity to serve with these great men and women. I am humbled and honored that I have been nominated to be the 38th Chief of Staff for the Army.

But today is like no other in our history. It is a time of uncertainty and historic change. We face a multitude of security challenges, such as transnational and regional terrorism in places like Yemen, Somalia, North Africa, and Pakistan's Federally Administered Tribal Areas. We have uncertainty surrounding the Arab spring, and the proliferation of nuclear weapons. We face the challenges of rising powers. But most importantly, all of this is underpinned by our own fiscal crisis.

I know that if confirmed, we will face some very difficult resource decisions within DOD. As we determine those essential characteristics and capabilities which we will need on our Joint Force to meet our future security challenges, I pledge that I will work with everyone to make sure we come up with the right answer and mitigate the risks associated with such.

But I do have a word of caution. We must avoid our historical pattern of drawing down too fast and getting too small, especially since our record of predicting the future has not been very good. As you make difficult resource decisions, you must be thoughtful in understanding the risks we incur to our Nation's future security.

Today, the Army must continue to provide trained and ready forces to ensure we prevail in our current missions in Iraq and Afghanistan. In the future, we must ensure that our Army remains our national force of decisive action, a highly relevant and effective force across the spectrum of conflict.

In order to do this, we must sustain our own volunteer Army today and in the future, providing depth and versatility to the Joint Force, an army that is more efficient in its deployment, provides greater flexibility for national security decisionmakers, and defense of our interests at home and abroad.

Finally, and most importantly, if confirmed, it is my moral responsibility as Chief of Staff of the Army to be the number one advocate for our soldiers and their families. It is their dedication and sacrifice that has earned the respect and confidence of the American people as they continue to put their lives in harm's way for our Nation's security.

I want to close by stating my appreciation to the committee, its unwavering support of our soldiers and their families throughout the last several years. We could not do it without that great cooperation.

I promise you that if confirmed, I will dedicate myself to carrying out my duties to the best of my ability and continue to work openly with Congress to support our warfighters.

I look forward to answering your questions. Thank you, Mr. Chairman.

Chairman LEVIN. General, thank you so much.
General Fraser.

STATEMENT OF GEN. WILLIAM M. FRASER III, USAF, FOR RE-APPOINTMENT TO THE GRADE OF GENERAL AND TO BE COMMANDER, U.S. TRANSPORTATION COMMAND

General FRASER. Senator Levin, Ranking Member McCain, distinguished members of this committee, I am indeed honored to appear before you today as the President's nominee to be the Commander of TRANSCOM.

It is also a privilege to join two fine officers on this panel, Admiral Sandy Winnefeld and General Ray Odierno, with whom I have worked closely not only in my current command, but in previous assignments. It is an honor and a privilege to join them today.

This morning I am joined, as I have been throughout my 37-year military career, by my wife, Bev, with whom I have been blessed to share this extraordinary experience of serving in the Armed Forces of this great Nation. Bev and I are indeed humbled to serve with the terrific men and women who have volunteered to serve our Nation, and we are grateful for this opportunity to continue serving, if confirmed, in this new capacity.

As you all well know, the military is truly a family, and Bev and I are extremely proud that our family has been a part of it. Our son, Mack, served in the U.S. Marine Corps. Our daughter, Ashley, is a military spouse of an Air Force officer. They have blessed us with six grandchildren.

Throughout my career, I have become increasingly appreciative of the team effort required of all military families. All families of our soldiers, sailors, airmen, marines, and Coast Guards members, they help us perform our mission on a day-to-day basis and make many sacrifices.

The families of our servicemembers that make these tremendous sacrifices are doing it for their husbands, their wives, their fathers, their mothers, their sons, and their daughters to answer our Nation's call. I thank them for their priceless contribution to our freedom.

If confirmed, I look forward to joining the TRANSCOM family, the more than 145,000 men and women who are dedicated to delivering, sustaining, and then returning our forces.

In my current role as Commander, Air Combat Command, I know the critical importance of rapid, efficient, and timely global logistics. I also understand at the heart of that capability is the innovation and creativity of thousands of men and women who really make it happen.

If confirmed, I pledge to enable our total force—soldiers, sailors, airmen, marines, and coastguardmen, and civilian team members—to build on the superior legacy of my friend and colleague, General Duncan McNabb. He has chartered a vision based on making our forces more effective and more efficient through rapid and responsive global logistical solutions and interagency, non-governmental, commercial, and international partnerships. We will always deliver.

Finally, if confirmed, I look forward to working with this committee and all Members of Congress to ensure that TRANSCOM can continue to provide world class support through all of our incredible men and women.

Once again, I am humbled to have been nominated by the President for this position. I appreciate the trust and confidence of the Secretary of Defense and the Chairman of the Joint Chiefs in considering me for this command. I am grateful for the opportunity to appear before you today.

I look forward to your questions. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, General.

Let me ask you the standard questions. You can all answer together.

Have you adhered to applicable laws and regulations governing conflicts of interests?

[All three witnesses answered in the affirmative.]

Do you agree when asked to give your personal views, even if those views differ from the administration in power?

[All three witnesses answered in the affirmative.]

Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

[All three witnesses answered in the negative.]

Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

[All three witnesses answered in the affirmative.]

Will you cooperate in providing witnesses and briefers in response to congressional requests?

[All three witnesses answered in the affirmative.]

Will those witnesses be protected from reprisal for their testimony or briefings?

[All three witnesses answered in the affirmative.]

Do you agree if confirmed to appear and testify upon request before this committee?

[All three witnesses answered in the affirmative.]

Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

[All three witnesses answered in the affirmative.]

Thank you all.

Let us have an 8-minute first round of questions today.

On June 22, President Obama announced his decision that the United States would draw down its forces in Afghanistan by 10,000 by the end of this year, and the remaining 23,000 U.S. surge forces by the end of the summer 2012, for a total of 33,000.

Let me ask each of you, and start with you, Admiral. Are you comfortable with the President's decision relative to those reductions?

Admiral WINNEFELD. Yes, sir, I am.

Chairman LEVIN. General Odierno?

General ODIERNO. Yes, sir.

Chairman LEVIN. General Fraser?

General FRASER. Yes, sir, I am.

Chairman LEVIN. General Odierno, the now former Secretary of Defense, Secretary Gates, made a speech at West Point last February saying that the Army is going to be increasingly challenged to justify the number, size, and cost of its heavy formations. The Army's first major challenge will be how to structure itself, how to train-and-equip for the extraordinarily diverse range of missions that it's going to face in the future.

Now, there were a number of other assertions by Secretary Gates, and I think you are familiar with them. But basically, how would you react to his statement that the Army is going to have difficulty justifying size, structure, and cost to the leadership of Congress and to the country?

General ODIERNO. Thank you very much, Mr. Chairman. I have actually had several conversations with Secretary Gates about this. What I believe he was doing was challenging all of us as leaders to make sure that we are looking ahead, that we understand the future of conflict by being informed by the past, and the lessons we have learned in conflict. Because of that, we must make sure we shape our Army for the future to meet what we believe will be our future requirements. It is about identifying the right capabilities and characteristics that we need.

I think what we have to do is become agile. We have to become more adaptable. We have to be able to respond to a wide variety of potential capabilities that national command authority will need the Army to do. He is challenging us to make sure we do that as we conduct our assessments. I am confident that the Army, as we are looking both at today and into the future, are conducting detailed assessments to decide what we should look like as we move forward. I will report this out as we review and make progress in this effort.

Chairman LEVIN. Thank you.

Let me ask you, Admiral, a couple of questions about Afghanistan and Pakistan as you undertake these major responsibilities. How important is it, in your judgment, to the success of our counterinsurgency campaign in Afghanistan that we maintain the process of transitioning more and more responsibility to the Afghan security forces for their country's security?

Admiral WINNEFELD. I think it is fundamental to the entire campaign that we transition responsibility for security to the Afghan National Security Forces. The ultimate goal in Afghanistan is establishing adequate stability so that al Qaeda and other extremist groups cannot return there and have a position from which to attack this country. Ultimately, the Afghans are going to have to step up and take that kind of responsibility for themselves. I think it is fundamental to the campaign.

Chairman LEVIN. One of the challenges to that campaign is the Pakistanis' remaining reluctance to take on the Haqqani network. Do you have an assessment as to why they are refusing to take them on?

Admiral WINNEFELD. Of course, Pakistan is a very difficult partner, and we all know that. We do not always share the same world view or the same opinions or the same national interests. I believe it is very unfortunate that Pakistan years ago made a decision to

go down a very risky road of using proxy groups to carry out some of its desires to protect what it views as its own national interests. Among those groups has been the Haqqani network.

I think we need to keep continued pressure on Pakistan using all elements of pressure that we are able to apply to what really should be a friend, to get them to realize that the Haqqani network poses a threat to their own country, and to take the steps that we have asked to take and that they need to take in order to eliminate that as a threat, not only inside Pakistan, but equally importantly for us in Afghanistan.

Chairman LEVIN. Relative to Pakistan, we have a real problem of resupplying our forces in Afghanistan, particularly as the Pakistan lines of communication are degraded or threatened or interrupted.

When we met earlier, General Fraser, you indicated that we might have to rely more heavily on sealift with intra-theater airlift as the last leg of support for Afghanistan operations. Can you tell us about that, and what would be the problems associated with relying more heavily on that combination of sealift and intra-theater airlift if we have to resort to that?

General FRASER. One of the things that in preparation for this hearing I have taken a hard look at is the expansion that we have had through the Northern Distribution Network. We have made progress there. If confirmed, I will continue to work that very aggressively to expand the opportunities there as an alternative mode for getting goods into the theater.

We understand the challenges that may be presented with Pakistan if it was to shut down, and, therefore, that is why we are working hard to expand the network through the use of inter-theater lift, but once getting the supplies through the ports. Working with the countries in the Persian Gulf to have access to ports will allow us in to bring goods into the ports and then move them on from there with intra-theater lift.

If it shuts down, I am confident that we will be able to satisfy the requirements in the theater.

Chairman LEVIN. Thank you.

General Odierno, what is the operational urgency to field a new ground combat vehicle (GCV) in 7 years? How do you propose to manage the program risk which is associated with that kind of a fairly aggressive schedule through technology development or otherwise?

General ODIERNO. Thank you very much.

The Army for almost 10 years now has been on a path of a developing capability for light forces, medium force with the Stryker, and sustain our heavy forces with the Abrams battle tank and the Bradley fighting vehicle. There was a plan at one time for us in the future—2020, 2025—to convert all that to the Future Combat System (FCS).

We all know that the FCS program specifically was not successful. So, we have to constantly look at what is going to be the vehicle that the Army uses as we bring our force together for the future?

One of the potential vehicles is the GCV. What we have to do is continue to assess, look at the requirements that we have estab-

lished for the GCV to see if it will meet the future requirements that we see for our Army in the future.

We are constantly assessing and working that, and we will continue to work with the committee on that.

Chairman LEVIN. Okay. Thank you all.

Senator McCain.

Senator MCCAIN. Thank you, Mr. Chairman.

General Fraser, to follow up on Chairman Levin's question about what would happen if Pakistan cut off its supply routes, what percent of our logistics now goes through Pakistan?

General FRASER. Sir, it is my understanding that approximately 35 percent moves through the ground, and the other is moving through the Northern Distribution Network, coupled with the lift as we bring in supplies by air.

Senator MCCAIN. How long would it take you to make up for that 35 percent? Suppose tomorrow Pakistan shut off those supply routes. How long would it take you to adjust to keep the same level of logistics into Afghanistan?

General FRASER. If confirmed, I will certainly delve deeply into that.

Senator MCCAIN. You do not know.

General FRASER. I have not gotten the details of that.

Senator MCCAIN. It cannot be right away, you know that much about it.

General FRASER. Yes, sir.

Senator MCCAIN. So, there would be a period of time where we would not have the normal logistic supply.

General FRASER. Sir, in my visits to the theater, I see the—

Senator MCCAIN. Is that true or false?

General FRASER. I'm sorry, sir?

Senator MCCAIN. True or false. It would be a period where we would not be able to maintain the same level of supply.

General FRASER. That is true, sir.

Senator MCCAIN. If we have to use airlift, airlift is approximately four or five times as expensive as the present mode of ground transportation, right?

General FRASER. Sir, we are doing everything we can to reduce the costs through the multi—

Senator MCCAIN. Is it true that it is three or four or five times more expensive to use air to carry these logistics than the present mode of overland?

General FRASER. Sir, I will delve deeply into those cost figures. I do not have them off of the top of my head. It is more expensive to go by air.

Senator MCCAIN. Thank you.

Admiral Winnefeld, how big of a threat do the drug cartels in Mexico pose to the very government and country of Mexico?

Admiral WINNEFELD. I do not think they pose an existential threat to the central Government of Mexico, but it is very clear that in particular regions of Mexico, that they have coopted elements of the government, and that the Mexican Government is facing a very serious challenge in those areas. But in terms of the viability of the democracy of the central Government of Mexico, I am not overly concerned about that.

Senator MCCAIN. Do you believe that there's any law enforcement institution in Mexico that is untainted by corruption?

Admiral WINNEFELD. I think that the higher you go in the Mexican law enforcement realm, the less tainted they are. I have more confidence certainly in the Secretaria de Seguridad Publica (SSP), which is the federal police. They have made tremendous strides. They are working very hard. As you get down closer to the municipal level, there is a great deal of corruption, yes, sir.

Senator MCCAIN. Do you agree with the Government Accountability Office assessment that our border is about 44 percent "operationally secure"?

Admiral WINNEFELD. I do not have any facts that would dispute that conclusion.

Senator MCCAIN. Is it your view that there are some parts of our border that are still not operationally secure?

Admiral WINNEFELD. In terms of operationally secure, meaning being able to completely shut off the flow of illegal immigration, I would agree with you.

Senator MCCAIN. Maybe not completely, but operational control, I think you and I both share the same definition.

Admiral WINNEFELD. Yes, sir.

Senator MCCAIN. There are parts of our border that you agree are not operationally secure?

Admiral WINNEFELD. I would say that there are definitely parts that are very challenged in terms of their operational security. But I would hasten to add that there has been a lot of progress made over the last few years. I would defer to the Secretary of the Department of Homeland Security to give you the real details on that.

Senator MCCAIN. General Odierno, today there is a report that a senior broad-base analyst says that al Qaeda is expanding in Yemen and Somalia, posing a new threat to U.S. military planning. The tactic could be part of the outfit's strategy of energizing its franchise with an objective of widening the areas of conflict, and hitting at its enemy, the United States, in places where such attacks are the least expected. Do you agree with that assessment, particularly in regards to Yemen and Somalia?

General ODIERNO. I think for years we have been tracking the fact that al Qaeda has been trying to establish significant capability in Yemen. They are, I believe, starting to join other terrorist elements within Somalia, building a relationship with them in order for them to expand their organization as we continue to challenge them in other places.

Senator MCCAIN. In your view and most experts say that it is a growing threat, both Somalia and Yemen, particularly given the unrest in both those countries.

General ODIERNO. It is a very big concern, Senator.

Senator MCCAIN. Should we not take that into consideration as we talk about massive cuts in defense?

General ODIERNO. As I said in my opening statement, Senator, I believe the transnational and regional terrorist threat is a huge issue for us as we look forward. We have to consider that as we move forward with any reductions and what our policies and strategies are to go after these threats.

Senator MCCAIN. Let me ask you about a continuing presence in Iraq. You obviously have been disturbed by hearing about the published reports of increased weapons from Iran coming into Iraq, and Afghanistan as well, increased Iranian influence in southern Iraq. How important do you think it would be for us to maintain, with the agreement of the Iraqi Government, a troop presence, say, of about 10,000 people in Iraq, air defense, the Tikrit, the areas under dispute on the Kurdish border, and also for air defenses?

General ODIERNO. I think that if the Government of Iraq were to request, as you said, I think it is important that we provide them with the support they think is necessary. It is clear that Iran is attempting to influence this decision with the actions they have taken, specifically over the last several months, in continuing to support, fund, train, and equip surrogates in southern Iraq and central Iraq, specifically going after the remnants of our U.S. presence inside of Iraq.

It is important that we continue to support Iraq for their external security, both for air sovereignty, and also to help them in some of their security challenges, to include potentially some of the Kurdish areas. Those will be decisions that will be made by General Austin, the Ambassador, and General Mattis as they move forward.

Senator MCCAIN. You do agree that there is clear evidence of increased Iranian activity in Iraq in a broad variety of areas, including the supply of weapons?

General ODIERNO. Absolutely, Senator.

Senator MCCAIN. Which makes one wonder if the Iranians believe that we are totally evacuating the area.

Let me just mention again, you and I have talked about it a lot, but there are those of us who are deeply concerned about continued cuts in defense. I would like to have your views of the effects of significant cuts in defense, particularly in personnel areas.

Again, a group chartered by the Secretary of the Army to look into how the Army procures major weapons systems found that every year since 1996, the Army has spent more than \$1 billion annually on programs that were ultimately cancelled. Since 2004, \$3.3 billion to \$3.8 billion per year of Army developmental testing and evaluation funding has been lost due to cancelled programs, including the now cancelled FCS program. It goes on and on. You are very aware of it.

Does that not have to be one of your highest priorities of trying to get this procurement situation under control? Would it not be helpful if we gave legislative authority to the Service Chiefs to be more involved in the whole acquisition process?

General ODIERNO. First off, I will work very closely with the Secretary of the Army on these issues. We have identified several issues. First, it takes us too long to develop programs, and as the length of time increases, we change the requirements, so it becomes more expensive. We have not been good at predicting the technologies that are available. We have to work at all this so we are not wasting money, and we are putting money in places that will be essential to us in meeting the future.

I will have to think about the legislation about giving the Chiefs more authority, and I will certainly get back to you, Senator, on that.

[The information referred to follows:]

I believe the authorities vested in the position of the Chief of Staff under title 10 sufficiently establish roles and responsibilities within the acquisition process. I pledge to work diligently with the Secretary of the Army and the Army leadership, along with the Office of the Secretary of Defense and Congress, to ensure a unified effort centered on effectiveness and efficiency that meets the capability needs of our force.

Senator MCCAIN. On the whole issue of defense cuts and its effect on personnel, I would like your comments.

General ODIERNO. First off, in the Army, the Army is about soldiers. When we talk about defense cuts, you are talking about structure. You are talking about end strength of the Army, 42 percent of the budget is personnel costs in the Army budget. As we look at reductions, it will be about structure and personnel.

It is important for us that we understand that as we go forward we are in a supply and demand business. It will depend on what the demand is for the use of our soldiers so we can continue to sustain our All-Volunteer Force, and we are able to continue to meet the commitments around the world. That must all be considered as we look at the characteristics and capabilities you want the future force to look at it, because the Army will pay a force structure because that is what we are, and that is what we provide to the joint force.

Senator MCCAIN. All right, thank you. Thank you, Mr. Chairman, and I thank all the witnesses for their service. I would just like to add, again, I have had the honor of watching General Odierno lead the brave men and women under his command in Iraq, and there is no one that I think is a finer leader that I have encountered in the team of Odierno, Petraeus, and Crocker, as instrumental in our success in implementing the surge in Iraq.

I thank you, Mr. Chairman, and thank the witnesses.

Chairman LEVIN. Thank you, Senator McCain.

Senator Reed.

Senator REED. Thank you, Mr. Chairman, and, gentlemen, thank you for your service to the country, and to the families that have supported you, thank you very much.

Admiral Winnefeld, one of your principle responsibilities will be in the requirements process, and ultimately that transitions into procurement. The former Secretary of the Navy, Gordon England, who I greatly admire and has great insights, suggested a procurement holiday, if you will, as we face a great deal of uncertainty in terms of what systems are going forward and how much money you will have.

In the context of that proposal, how do you propose to get your hands around the reset that is necessary, the new innovative technologies that have to be incorporated, and a budget that is going to be extremely challenging, more so I think than I believe today.

Admiral WINNEFELD. Sir, I do not have the details of the proposal that you referred to regarding a procurement holiday. I think that would probably be unwise. We have future challenges in the world we need to continue to address and prepare ourselves for as

a military, even as we resolve the conflicts that we have going on today.

I think this is a big ship in terms of the acquisition programs and the processes and the embedded requirements process, that we need to turn into a much more favorable direction for the taxpayers. I will be the first one to agree with that.

I think that we have a confluence of tools that are going to work for us. I think beginning with the Weapon System Acquisition Reform Act, which I think is good legislation, but it is going to take time for that to have its effect. I believe that Under Secretary Carter has a very good approach in better buying power that he is imposing on the Department to get more cost efficiencies, to provide incentives for industry, to provide more for competition and the like. Then I think that General Cartwright, if I am confirmed, has set me up for success to further improve the requirements process.

I think those three things working together are going to get this ship turned in the right direction. We are going to be doing that, as you point out, sir, inside a very challenging budget environment.

Senator REED. Again, I do not want to presume to argue Secretary England's case, but what it suggested to me is at least the possibility of stepping back, and instead of continuing to procure what is in the pipeline of looking out strategically to what we might really want 10 years from now or 15 years from now.

Again, we have had the discussion with all three gentlemen privately that in times like this, we would like to think strategy drives the budget, the decisions, but most times it is the budget that drives things. Given this tight budget, this notion of looking ahead and maybe not simply doing what we're doing today, but a little less and a little less and a little less might be the appropriate approach. I do not know if you would consider that.

Admiral WINNEFELD. I think that the old adage, if you keep on doing the same thing you have been doing that is the definition of insanity, right? I think that we are going to have to take a very close look, especially in a very difficult budget environment. There are probably some of these programs, depending on the pressures, depending on the decisions that are made by the senior leadership of the Department based on ongoing comprehensive review, that may end up falling by the wayside.

But I hope that those decisions can be made with a strategy in mind. That strategy, of course, lives in an environment with a changing world, with threats that are out in the world, but also budget realities that we have to live with. We have to get the balance just right.

Senator REED. Let me switch to General Odierno. First, again, I join my colleagues in commending all of you, but I have had the privilege to work with General Odierno for many years now. I personally commend him for his incredible service to the Nation, to the Army, and, most importantly, the troops he leads. Thank you, sir.

One of the challenges you had, you talked about end strength. You talked about budgets. But one of the challenges you have is, how do you continue to maintain, develop, the talent, the enthusiasm, the energy of the superb officers and noncommissioned offi-

cers (NCO) that are the heart and soul of what you do, not the equipment, not the force structure, at a time they have been in combat, many of them, their entire careers, which no generation of American soldiers has ever experienced.

That creates psychological pressures. It creates family pressures. It creates real, profound questioning within the profession. I think the profession is where these questions have to be addressed initially before they come to us about what do we do? What changes do we make?

I know you have thought about this, but your comments today would be appreciated.

General ODIERNO. Thank you, Senator Reed. I think one of my number one priorities is to first view leader development and how we are going to do leader development.

One of the things we have learned over the last 10 years is the requirement that we have on our leaders has changed significantly and grown frankly—what we expect them to be able to do, how we expect them to adapt, how we expect them to be agile. We now have to infuse in our leader development program, how do we develop this from the time they start at Reserve Officers' Training Corps (ROTC) or West Point to their time as they develop as young officers to senior officers, and as well as NCOs.

We have to dedicate ourselves to look at new ways, broaden their horizons so they are able to better react and better be prepared for the world situations that they will be placed.

Second, we have to understand that we have a force that is very different now. We have majors and captains today that all they have experienced is war. We have to help and understand and make sure they understand the profession of arms and reinvigorate our thoughts on the profession of arms, and reinvigorate how we are going to continue to move forward with trust within our system to understand how we operate as professionals. We are going to reinvigorate this as we move forward, and I think these are important.

We also have to understand we have to challenge them. This is about challenging these leaders who have had so many challenges and been so successful, that we have to be able to continue to challenge them because we are going to need them as we move forward in the future. If confirmed, I will dedicate myself and the Army leadership to putting programs in place that allow us to do this.

Senator REED. Let me ask a question for both you and Admiral Winnefeld. One would love to be able to conduct a full spectrum, panoply of training, operations, and anticipation. But in thinking back 40 years now, when I entered the Army in 1967, it was all about counter-guerilla training, et cetera. When I left it in 1979, it was all about the major land air attack battle in Europe.

It raises the question of, not only in terms of reaction to what we have been through, but in terms of resources, are you both going to emphasize full spectrum capabilities, or are you going to drive to shift one way or the other, presumably away from some of the recent activities and more to other activities?

Admiral WINNEFELD. Senator, I would say it is a very good question that speaks to reset for what? That is going to depend on the strategic environment. I think as we look out ahead of us in that

environment, we are going to have to be ready for a very broad spectrum of potential conflicts.

If you look at what a conflict might be like in a place like Korea as opposed to other places, we are going to need to be prepared for that full spectrum of operations. That is going to be a big challenge, not only resetting the equipment for that, but also resetting our people for that, and making sure that we don't myopically focus on one type of conflict over another, but that we are prepared as well as we can be for whatever comes across the plate, but as General Odierno pointed out earlier, we do not have a very good track record of predicting what comes next.

Senator REED. General Odierno?

General ODIERNO. Senator, as we look to the future, we are determining what we are now calling hybrid threat. I think this is the basis on how we move forward. Hybrid threat consists of irregular/regular terrorists and criminality. We have to understand that that is going to be more and more part of what we face no matter where we go.

What we have to do is then develop the programs and the capabilities that allow our formations to adapt depending on where they will have to operate.

I think that is what we have to focus on. I think there are some basic fundamentals that we must always train on. They must always be able to understand their weapons systems and be able to execute with their weapons systems with lethality any time. But they also must understand that the environment that they are going to operate in is going to be very different, and they have to be able to adapt and adjust. That is why we talk about leader development as well as part of this.

Senator REED. General Fraser, we had a chance to talk in the office, and you have, I think, a central role because without TRANSCOM, these folks do not have soldiers, sailors, marines, and ammo to do the job. I appreciate what you are doing.

The challenges ahead, I think, are similar, which is in a tight budget to manage your resources very well. I think you are inheriting from General McNabb a quite effective organization, and I know you are going to carry on in that tradition. Let me just commend you for your service.

Just to simply ask, because we have had a discussion about strategy, budgets, et cetera, any comments you might have on this issue as it affects TRANSCOM.

General FRASER. Sir, if confirmed for the position, I will certainly work as hard as I can to continue to ensure that we not only effectively support the warfighter in the field, but do it in the most efficient manner. That is going to be partnering with our commercial partners, international partners, and working through other agencies. I look forward to that opportunity, should I be confirmed.

Senator REED. Thank you very much.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Reed.

Senator Brown.

Senator BROWN. Thank you, Mr. Chairman.

General Fraser, I agree with Senator McCain's concerns about the logistic network through Pakistan. Do we have other options that you are aware of that we can rely on?

General FRASER. Sir, I have not delved deeply into the plan. I know ongoing planning is happening. I know there would be a disruption. But if confirmed, I would delve deeply into that plan to ensure that any disruption that we have is minimal, to ensure that we continue to provide that effective, yet efficient, support for the warfighter.

We would also have the ability to tap into strategic airlift from the United States, too. It is not just intra-theater, but is also inter-theater. Intra-theater, it is also using ships. It would be a holistic look that we would have to address, sir, and I will delve deeply into that.

Senator BROWN. Based on Senator McCain's initial foray, I would suggest that you do that probably sooner rather than later. I know you are at a disadvantage, so I am sure you are going to assess what the risks of those other logistical avenues will be. I look forward to maybe offline touching base when you get settled. I think it is an important issue.

General Odierno, I met with you yesterday, and you failed to include your Yankees connection as you were looking at my Red Sox memorabilia in the room. [Laughter.]

But it is okay. It is okay.

Chairman LEVIN. You are speaking for yourself when you say it is okay, by the way. [Laughter.]

Senator BROWN. I am speaking for two people actually, sir.

Sir, obviously I asked a lot of questions yesterday and was obviously satisfied with those answers. I was just wanting to take a further question.

The Army recently requested to reprogram procurement dollars away from the modular handgun system into the lightweight .50 caliber machine gun. It was based upon a decision to delay the procurement of the Army pistol to the fiscal year 2014, as well as changes to the requirement documents. Do you have any comments on that at all?

General ODIERNO. I do not know the specifics of the reprogramming, but what I would say is that I think we are fairly happy with the handgun, and we think that we can continue to work and satisfy our needs through 2014. I think that we feel it is more of a need for the light machine gun, and that is why that was done.

Senator BROWN. Okay. Admiral, if I could shift over to you, one of the challenges facing the National Guard in its Homeland mission while at the same time it continues its obligations as an operational reserve that will continue to experience the stresses and strains resulting from today's global threat. If you could comment on that.

Admiral WINNEFELD. Thank you, Senator. First of all, I think it goes without saying that the National Guard has been absolutely fantastic over the last decade in stepping up to support operations overseas in places like Iraq and Afghanistan at the same time they continue to maintain their homeland security disaster relief-type responsibilities. They have just done a magnificent job.

The process over the last year, I have grown very close to the Guard. I think I understand them better than I ever did as naval officer certainly, and they do face challenges.

We are doing a much better job of equipping them, I think, that former Secretary Gates quoted going from 40 to 70-something percent. I think we need to continue that progress to equip the Guard.

I think that we need to make sure that we account for the same challenges that a guardsman has when he or she deploys regarding being a wounded warrior, regarding their families, and making sure that we support those people who tend to be dispersed around the country. We cannot lose sight of their family needs as we try to do the best we can to take care of the Active Forces' need, which tends to be, as hard as it is, a little bit easier.

I think those are our challenges, and I think we just need to make sure that we continue to strike the right balance between the Homeland mission and maintaining the Guard as an Operational Reserve.

Senator BROWN. General Odierno, I was going to submit that question for the record. I apologize for asking that first question. But I did have a question, one that I forgot to ask yesterday. I understand that the Humvee will serve as the majority of the Army's and Marine Corps' light tactical vehicle fleet for the next 20 or 30 years with nearly 100,000 vehicles slated for recapitalization and modernization.

However, it fails to include scalable solutions and provide light-weight and affordable protection capabilities. Nonetheless, these scalable solutions seem to be a key design feature for both the GCV and the joint light tactical vehicle (JLTV).

Do you think the Humvee recapitalization program should also incorporate scalable protection solutions and rocket propelled grenade protection similar to the GCV and the JLTV programs?

General ODIERNO. I think we constantly have to conduct these assessments. Obviously the protection of our troops and how we use these vehicles is important. We always try to include the most protection that we can, either in the original design or some sort of armor that can be attached later on to protect them.

Now, I will get back with you, Senator, on this to give you a more specific answer than that.

[The information referred to follows:]

Yes, but given the light weight of a high mobility multipurpose wheeled vehicle (HMMWV), the scalable solution may not be as robust as that on a Ground Combat Vehicle or Joint Light Tactical Vehicle. Scalable protection is a very important tenet of our Tactical Wheeled Vehicle Strategy. We have seen how rapidly technology and the threat can change, so we have adapted a strategy to acquire vehicles with an inherent protection level we refer to as an A-kit, to optimize protection with other essential capabilities such as mobility, transportability, and payload. Supplemental protection in the form of a B-kit may be added as required. We remain conscious of cost and only plan to buy a fraction of the total requirement to meet our essential Army Force Generation need, while reserving the opportunity to insert future improvements in protection. The Army, with congressional approval, has initiated the Modernized Expanded Capacity Vehicle (MECV)/HMMWV Competitive RECAP Program that will incorporate scalable protection and plan for additional protection against rocket propelled grenades. The final MECV design will depend largely on solutions proposed by industry to meet our requirements within the cost constraints established as affordable.

Senator BROWN. Thank you. Admiral Winnefeld, sir, initially there was a conversation where Secretary Gates ordered us to find \$100 billion, and then several months ago the President advocated a plan to cut \$400 billion. Then there is a potential plan to cut \$800 billion, and there is another senator who said, let us do a trillion.

Sir, at what point do these cuts affect our operational readiness and then prohibit our men and women from not only getting the equipment, tools, and resources they need to do their job, but in fact do it safely and come home. Is there a number that you have a feeling is a good number? I just wanted to explore that a little bit.

Admiral WINNEFELD. From my current vantage point as the Commander of NORTHCOM and NORAD, I do not have a specific number in mind.

Senator BROWN. How would those cuts affect you and your present command position?

Admiral WINNEFELD. It depends on how they were applied. I think that your question is a very good one, and it highlights the importance of doing this in a strategy-based manner rather than just driving into individual programs and cutting out the ones that people like or do not like.

As we get to a higher and higher number, we are going to find that the strategies that we currently have are going to reach inflection points where we are just going to have to stop doing some of the things that we are currently able to do, because what we cannot afford is to have any kind of a cut result in a hollow force. We cannot afford to have a cut result in irreversible damage to our industrial base. We have to make sure that the All-Volunteer Force remains viable and we take care of these young men and women.

I think we are going to find strategic inflection points. I do not have an exact number for you, Senator.

Senator BROWN. Of course not.

Admiral WINNEFELD. But we are going to have to explore that very carefully and articulate it very carefully as these decisions come forward.

Senator BROWN. No, and I would ask that you do articulate it to the chairman and us so we can advocate and/or criticize, depending on what it is, and then help in that effort. We would be happy to do what we can certainly to provide that safety and security for our troops.

[The information referred to follows:]

To my knowledge, the Department has not evaluated what an \$800 billion or greater budget reduction would entail. In my judgment, cuts of this magnitude to defense spending would likely require us to reexamine our national security and military strategies. Based on that examination, we would need to look both across and within the many roles our military plays in protecting our Nation's vital and important interests based these adjustments to strategy. Such an examination is likely an iterative process, and would have to consider both capability and capacity within each role, and then determine how the role itself might change or how we might accept risk therein. We would need to ensure any force structure and modernization cuts do not come at the expense of readiness in order to avoid migrating into a hollow force. We also need to take care to protect our industrial base in a way that can adjust to potential future needs. As Vice Chairman, I will work to ensure any cuts to the defense budget are made in a way that sustains a responsive and versatile Joint Force.

Senator BROWN. Just one final question. General Fraser, the Guard and Reserve airlift and transport capabilities, how does that figure into your overall strategy?

General FRASER. Sir, the total force is a key and integral part of our accomplishment of this mission, not only as they look forward towards TRANSCOM, but also in my current position as Air Combat Commander. It takes a total force to get the job done. There are men and women who are on a day-to-day basis making tremendous contributions. I am very appreciative of that, and I thank them for their service.

Senator BROWN. Thank you.

Chairman LEVIN. Thank you, Senator Brown.

Senator Akaka.

Senator AKAKA. Thank you very much, Mr. Chairman. I want to add my welcome to our witnesses this morning and want to wish them well, and especially their families as well, because we know their families really make a difference in helping our witnesses in their work and also our country.

Admiral Winnefeld, the Air Force and Navy predict that significant savings can be achieved by leveraging research efforts in the Globalhawk and Broad Area Maritime Surveillance (BAMS) program. There are other examples of the Services working jointly to take advantage of efficiencies. You have been working on that as well.

Admiral, do you see additional opportunities for efficiencies and eliminating duplication?

Admiral WINNEFELD. Senator, thank you. I believe this speaks to what former Secretary Gates spoke to as the different bins where we approach the problem of decreasing potentially our budget. One of those is reducing redundancies and programs that just aren't working for us. The example you point to of the Globalhawk and the BAMS is a very good one.

I do not have any specific instances in mind, but if confirmed, I can promise you that I will be doing my part to look for those because there may be some fertile ground there for us find greater efficiencies. Absolutely.

Senator AKAKA. Thank you. I am glad you are looking forward to that.

General Odierno, as the Department continues to look for efficiencies and savings, I want to ensure that our troops have the necessary equipment and training to accomplish their missions.

General, while I think the Active Duty will continue to fare well, I have some concern about resources for the Guard and Reserves. What will you do to ensure that they receive the training and equipment needed so that they can be ready whenever they are called upon?

General ODIERNO. Thank you very much, Senator. As you are well aware, over the last 10 years, the National Guard and Reserve component have played such an integral role in all of our war efforts in Iraq, Afghanistan, other places around the world. They are a part of what we do. As we get into budget decisions, they will become more of a part of what we have to do.

The operationalization of the National Guard and Reserve component in my mind has had a significant impact on our capability

and the depth that we need to execute operations. Based on this, it is important that we keep them equipped.

Part of the things we have to look is in the future as we come out of Iraq and Afghanistan, we believe we still need to have an operational capability within the National Guard and the Reserve component. We have to identify what that will look like. We have to ensure we have access to the National Guard and Reserve component.

All of this will enable us then to ensure that they get the training and equipment necessary to meet the requirements that we will place on them as we move forward. This is critical to us in our success.

I promise you that, if confirmed, we will constantly assess, study, work very closely with the National Guard Bureau, with the Reserve component leaders in order to deal with these issues.

Senator AKAKA. Thank you very much, General.

General Fraser, in April, General McNabb testified that the CRAF is a critical component to rapidly deployed forces and equipment with response times between 24 and 48 hours after the mission is assigned.

What are your thoughts on the future of this partnership with the civilian sector?

General FRASER. Thank you, Senator. I agree with General McNabb that the CRAF, as it is called, is a significant part of what we have in our capabilities that are available to us. If confirmed, I will work my hardest to make sure that it stays viable, and that means reaching out and working with our commercial partners, and doing everything I can in working with this committee and Congress along those lines to keep it viable.

Senator AKAKA. Thank you very much.

General Odierno, the Military Leadership Diversity Commission was formed to look at the policies and practices that shape diversity among military leaders. One of the recommendations was that senior leadership within the Services and DOD personally commit to making diversity an institutional priority.

General, can you share your thoughts on this topic as well as potential efforts you would undertake, should you be confirmed?

General ODIERNO. Senator, first off, I will tell you that I believe this is the strength of our Services, and I will speak to the Army specifically, is its diversity. That is what gives us the strength. It gives us people from all backgrounds, all capabilities that enables us to be very successful.

In my mind, we become stronger the more diverse that we become. It is important that we have programs in place, both in our recruiting, in our ROTC programs, in our military academies, that then gets carried on as we continue to develop our leaders through our training programs.

Now, we have to monitor this. We have to make sure that everyone is being fairly treated. But most important, we have to make sure everybody is given the opportunities to do the jobs that are career enhancing. We have to track this regularly to ensure that happens.

I will be dedicated to that, if confirmed, to ensure that we understand the importance of diversity, include that in all of our develop-

mental programs both for our leaders and all the soldiers within the Army.

Senator AKAKA. Thank you.

Thank you very much, Mr. Chairman.

Chairman LEVIN. Thank you.

Senator Ayotte is next.

Senator AYOTTE. Thank you, Mr. Chairman.

I want to thank all of you for your outstanding service to our country. The three of you are incredible leaders, and we are so fortunate to have you, and particularly want to thank all of the soldiers and sailors, our service men and women who serve underneath you for what they do for our country to keep us safe.

Admiral Winnefeld, if confirmed to be the Vice Chairman of the JCS, you will have a very important role in advising the Chairman, the Secretary of Defense, and the President regarding a variety of DOD policies.

In your written testimony, you discussed al Qaeda and the Arabian Peninsula, as well as al Shabbab, and you called al Qaeda a growing threat to our Homeland, and noted that al Shabbab is planning to conduct attacks against United States' interests in East Africa.

During the hearing on June 28, I had the opportunity to ask Vice Admiral McCraven if it would be helpful 10 years into the war on terror to have a designated long-term detention and interrogation facility for terrorists from groups like al Qaeda in the Arabian Peninsula and al Shabbab. He said that he thought it would be very helpful. What is your opinion about that?

Admiral WINNEFELD. I would share, I think, both Secretary Pannetta's and Bill's opinion on that, that it would be helpful to have a long-term detention facility. For now, we are making due, as Bill pointed out. We recently apprehended somebody, got pretty good interrogation of that person, and I think we got the information we needed. But it would be much better for us to have a longer-term solution.

Senator AYOTTE. I believe, Admiral, you were referring to Orsami, who was held on a ship for nearly 2 months and was interrogated on the ship, and then has been brought for trial within the United States.

I remain concerned about the fact that we could have put an individual like that in Guantanamo versus having to rely on keeping individuals on ships because if we get to a situation where we need longer than a couple of months to interrogate someone, a ship does not become a viable option. Would you agree with me?

Admiral WINNEFELD. It is a lot less convenient to put them on a ship. It is a burden on the ship. But we did just fine with Orsami, and we may have to do that from time to time in the future. I do agree that would be a good idea to have a longer-term solution if we can find one. If I am confirmed, I will drill into that more obviously and work with the committee as required to see what the options are.

Senator AYOTTE. Can I ask you a question? There was an Associated Press report about a man named Ali Musa Daqduq, who is a senior Hezbollah operative, who has been held by the United States in Baghdad as a top threat to American troops. He has been ac-

cused of working with Iranian agents, basically with their Shi'ite militias, to fight Americans.

The article noted that this dangerous Hezbollah terrorist could be turned over to the Iraqi authorities within days, and within the article, if it is purported to be true, U.S. security officials are worrying that he could escape or even be freed from the Iraqis.

Admiral, are you familiar with this situation?

Admiral WINNEFELD. No, ma'am, I am not familiar with that specific situation.

Senator AYOTTE. I would ask you to follow up either here or in a classified setting an answer to what is the situation with this individual. It brings to mind to me, again, the concern with the lack of a long-term detention facility for individuals that remain dangerous to us.

I firmly believe that Guantanamo is a top rate facility having visited it and should be that facility. We end up making decisions, like turning over people to other countries that are not prepared to assure their security, and then they end up in the battle against us again. It is one of the reasons I would like a follow-up on this particular individual. But, again, why I think it is so important that we establish this. I think we have a facility. It works well.

I hope as you go forward in this role that you will be focused on this as you advise the President.

Admiral WINNEFELD. Senator, I will provide an answer for the record on that.

[The information referred to follows:]

Currently, we examine all options for persons captured outside of Afghanistan and Iraq on a case-by-case basis to determine an appropriate disposition. As part of that analysis, we consider long-term detention as one of the possible disposition options. If a decision is made to detain a future capture in long-term detention, we would necessarily address an appropriate detention location. In reference to your specific question about Ali Musa Daqduq, he currently remains in U.S. forces' custody in Iraq, and we are looking at all options for his ultimate disposition.

Senator AYOTTE. Thank you very much.

I also wanted to ask both General Odierno and you, Admiral, as well about the President's recommendations in terms of withdrawal from Afghanistan, and his plan that he has brought forth.

I know a number of us have shared concerns. I am deeply concerned about one particular aspect of it, and that is the plan to fully remove the surge troops during September 2012 as opposed to at end of the fighting season. The fighting season, as I am sure both of you know, is generally from April through October. We are going to be withdrawing troops during July and August as we are in the middle of the fighting season. As far as I can see, there does not appear to be a strategic or operational reason to do it at that particular time.

As we go forward towards 2012, Admiral, if it becomes apparent to you that based on the recommendations of General Allen and General Mattis that it is necessary to change that recommendation, or to stop the Afghanistan troop withdrawal in terms of the timing given that we are going to be in the middle of the fighting season, would you be willing to recommend to the President and the chain of command a change in that deadline based on conditions on the ground?

Admiral WINNEFELD. Senator, throughout the nomination process, it has been made very clear to me from the senior leadership of the Department and the Nation that they expect candor from me, and I intend to provide that candor. I do, in consultation certainly with the theater commander and with the combatant commander, if it becomes apparent that conditions on the ground warrant some sort of a shift, I would not hesitate to make a different recommendation.

Senator AYOTTE. General Odierno, I appreciate your leadership in Iraq, and obviously the key leadership that you provided working with General Petraeus and a successful surge in Iraq.

I first wanted to get your view. Do you have an opinion whether there was any strategic, operational, or tactical advantages to the September withdrawal versus at the end of the fighting season?

General ODIERNO. I am not privy to conversations that went on and what General Petraeus' recommendations, General Mattis', and now General Allen's recommendation had been. I am not privy to that.

What I would say, though, is that this does remind me a bit of where we were in Iraq in 2008. Although Iraq and Afghanistan are different, the situations are somewhat the same.

In 2008, we still had some violence. Although the surge had started to bring violence, we still had violence in Iraq. But we did have to begin to withdraw the surge forces for no other reason that we could no longer continue to supply the surge force because we did not have the capability to back fill surge forces.

But what this does, I believe the most important thing in this plan is it provides flexibility now to General Allen to decide how he withdraws those forces, when he withdraws them. I think that is what is most important because that enables us to buy down risk. This is about risk. It is about how some people are concerned that we are assuming high risk at the end of the fighting season, August/September/October potentially as we withdraw. But at least the President and the Secretary of Defense and General Mattis have given him the flexibility of when he will bring these troops out.

I would just say a year is a long time, so I think we have to wait. I think we have to see how he is able to execute this. I think it is doable, but he will be the one who has to determine the risk and then provide us input as it moves forward.

Senator AYOTTE. General Odierno, just a follow-up. Given your experience in Iraq, would you agree with me that General Allen's recommendations about the conditions on the ground are really what should determine the timing there?

General ODIERNO. I think, again, yes. I think how he withdraws with what he has been given, I think, will be based on conditions. If he believes at some time the conditions do not warrant it, it is incumbent on him to bring that forward through General Mattis.

Senator AYOTTE. Thank you. I appreciate it.

My time is up, but if I could ask just one quick question, Mr. Chairman? Thank you.

General Fraser, I just wanted to follow up. Ranking Member McCain asked you about the strategic airlift capacity level. We just recently had a hearing before the Subcommittee on Seapower with

General McNabb. Do you fully agree with his recommendations that we can meet our capacity at approximately 300?

General FRASER. Thank you, Senator. I have taken a look at the MCRS-16, and discussed with General McNabb and others, and I do support it.

Senator AYOTTE. Thank you very much.

Chairman LEVIN. Thank you, Senator Ayotte.

Senator Udall.

Senator UDALL. Thank you, Mr. Chairman.

Good morning, gentlemen. Thank you for your service and willingness to take on even additional responsibility.

If I might indulge in a bit of personal commentary, Admiral Winnefeld, it has been terrific to have you in Colorado heading NORTHCOM. You are going to be missed, but you are going to add an enormously capable voice, presence to the Joint Chiefs, and you will always have a home in Colorado. I hope you know that.

General Odierno, we have phenomenal presence with the Army at Fort Carson. We are really proud of our soldiers. We are looking forward to the arrival of the combat aviation brigade. I also wanted to point out that General Dave Perkins, who is deployed right now, and along with General Doherty, who has taken his place, and Colonel McLaughlin. The Army has been very well represented.

You and I talked about the Pinon Canyon situation, and I know that we are committed to working with you and the ranching community to see if we can put that issue to rest.

General Fraser, I do not know you as well, but I am reminded of an adage I have heard, at least quietly shared among the ranks of military leaders, and that is as follows: "Tactics are for amateurs. Strategy is rank amateurs. But logistics is for the true professional." We are excited to have you on the verge of taking the helm of this important command.

General Odierno, if I could turn to the dwell time question. I understand in the current Army force generation cycle, we are just not going to be able to provide that optimal ratio of 2 years at home for every year deployed. My question is, we know that the quantity of time at home station will be limited. What steps might you be able to take as chief to improve the quality of that time at home?

General ODIERNO. Thank you, Senator.

First off, we are moving closer and closer to that goal. We are not there yet as you stated. As we stay engaged in Iraq and Afghanistan, we will work towards trying to achieve that goal because we know that is one of the key factors of ensuring that we sustain our soldiers and their families as we continue to ask them to sacrifice.

There are other things that we can do. What we have to do first is we have to be more predictable to them while they are home, predictable where they will be stationed, predictable on what kind of training cycle they are in as they are preparing to redeploy in 2 years, so they can have more predictability with their families.

That is an area we have to focus. It is about having resiliency centers that allow them to go and discuss issues and their families to discuss issues as they work with the reintegration and the stresses of repeated deployments. It is things like this that we have

to continue to do that helps us to improve the quality of life of our soldiers and families, as well as continue to work towards increasing our dwell time home. Those are things we have to continue to focus on as we move forward, sir.

Senator UDALL. I look forward to working with you in that area, and I know how important it is, and I know you know that.

Admiral Winnefeld, in your capacity as the NORTHCOM Commander, you have a unique understanding of the capabilities and the contributions of the Military's Reserve components. We all know since September 11, the Guard and the Reserve have played a vital role here at home and overseas.

As we begin to transition out of Iraq and Afghanistan, do you anticipate there will be a need to adjust Reserve component force structure or the missions they currently perform?

Admiral WINNEFELD. I have not had a chance to really participate in the comprehensive review, Senator, that is going on right now that will consider that very question. I wouldn't want to get out in front of that or pre-judge it. We are going to have to take a closer look at it, but I really do believe that we need to strike the right balance between maintaining the Guard as an Operational Reserve, as well as maintaining their capability to conduct the day-in and day-out work that they do so well inside the States.

There is an overlap there in terms of equipment and training, but there also is uniqueness there. We are going to need to strike the right balance as they come home.

Senator UDALL. If I could, let me add a question for the record as you undertake that survey. The question is as follows, if the current budget constraints and the reduced number of deployed troops would cause DOD to either cut into the Reserve or additional missions in order to maintain Active-Duty Force structure and capabilities, how would you end up answering that question? I'll ask for the record.

Admiral WINNEFELD. Yes, sir, I will take that for the record.

Senator UDALL. That would be terrific.

[The information referred to follows:]

Force structure is not necessarily best viewed as a stark Active component versus Reserve component trade-off. To cut into the Reserve simply to maintain Active-Duty Force structure and capabilities would not serve our national security interests well.

Over the last 10 years, we have seen a tremendous interdependency develop between Active and Reserve Forces. The success of this transformation is not only a result of the tremendous investment made in training, equipping and deploying Reserve Forces, but also our strategic policy commitment to employ an Operational Reserve. Moving forward, it is crucial to capitalize on these investments and the "value proposition" presented by an operationally capable Reserve component.

As we face a resource-constrained fiscal environment, the Department must take a comprehensive approach that will likely involve a rebalancing of the Total Force. There are many capabilities residing in the Reserve component that can be provided in a more cost effective manner than in the Active component. Conversely, there are capabilities that require very short timelines, or have such a significant demand signal and require such a high degree of training and currency, that they are best suited to reside in the Active component. We will need to strike a balance that best addresses the strategic environment we will likely face, while minimizing cost.

The Office of the Secretary of Defense is currently conducting a Front End Assessment to provide a comprehensive analysis of our Total Force mix as we complete our draw downs in Iraq and Afghanistan. I look forward to working with the committee and Congress to implement their recommendations.

Senator UDALL. Let me turn to cyber. You and I talked about this the other day, and, again, your responsibilities at NORTHCOM have linked you to that very important and new concern we all have.

The Comprehensive National Cyber Security Initiative that the President initiated has identified cyber as one of the most serious economic and national security challenges that we face.

I know there is a limit to what we can discuss here, but can you discuss what you believe DOD's role should be in defending the United States and our vital assets against cyber attack? Then would you talk, if you think you can, about where a kinetic military response might be justified?

Admiral WINNEFELD. Clearly, DOD has a role in cyber defense of the country. The first and easiest thing to talk about is defense of our own networks within the dot.mil domain.

We also have a role, I believe, in supporting the Department of Homeland Security in their role of helping defend the rest of government and the rest of the country. That is a complex relationship. I believe that former Secretary Gates and Secretary Napolitano struck a very good, solid agreement. General Alexander, my counterpart over at U.S. Cyber Command, is doing a very good job, I believe, of working with the Department of Homeland Security to construct how that support would work to include making sure that we have respect for civil liberties as we do that.

That is a growth industry, to be sure, that we need to pay very close attention to.

Regarding your question on offensive capability, it is very clear that an element of deterrence, one of the several elements of deterrence, is the ability to respond to an attack, and to make that attack so costly for an attacker that they are unwilling to conduct it. I believe that we have to consider the full range of potential responses to an attack, not only, by the way, military responses, but also the full range of diplomatic and using force as a last resort, as it were. But I would never want to rule anything out in responding to a serious cyber attack on this country offensively. It could be a cyber response or it could be a kinetic response, depending on the nature of the attack and the circumstances that surround it.

Senator UDALL. I would like to acknowledge the tremendous work that General Cartwright has done in this area. I know you will build on what he has learned and what he has proposed. This committee had an opportunity to sit in secured settings and learn more and more about the threats and also the responses that we have available to us.

Before my time runs out, I want to turn to energy. I visited with all three of you about the opportunities and also the challenges we have in the energy space. Admiral Mullen, I think, put it quite well recently when he said, energy needs to be the first thing we think about before we deploy another soldier and before we build another ship or plane. He also said saving energy saves lives. I know you all three know that acutely.

General Fraser, would you care to comment on any thoughts you have in regards to how we can do a better job and enhance our national security, and perhaps also develop some technologies that will have great application in the civilian sector.

General FRASER. Thank you, Senator. I appreciate it.

The Air Force is doing a lot in the area to certify our aviation assets to run on alternative fuels. We continue to move forward in a number of different platforms. In fact, just this year, at the Andrews air show, the F-16s that flew as a part of the Thunderbirds, we had an aircraft that was on alternative fuel. I think that we need to continue to move forward in that area.

Right now, we also need to see about making it more economical. It is very costly, and so I think as more get in line and we find out that there are opportunities there, there is a competition for it that will drive costs down, and it may be an opportunity to look forward into the future to using these blends and these mixes or biofuels.

I also feel that there are some technologies that we need to continue to explore with respect to our engines. Alternative engines, as we look to the future, are the things from the engineering and design perspective that we can get more efficient use out of our engines in the future? That ought to be something that is taken into consideration as we move forward to the future in everything that we do.

Energy is an integral part of our analysis, and I look forward as I move into this position, if confirmed, to continue to move forward, ensure that we are doing things in a most efficient and effective manner.

A couple of things that I have already been made aware of that we are doing is utilizing tools to maximize the assets that we have. There is a route planning tool that is used that has actually increased the efficiency along routes by upwards of 15 percent. There is an air optimization tool that has also been used to increase our ability by up to about 10 percent.

It is these types of things I look forward to delving into even greater if confirmed and moving into my next position. Thank you very much, sir.

Senator UDALL. Thank you for that update. Again, I look forward to working with all of you on this important opportunity when it comes to saving energy and developing new energy technologies.

Thanks again for your service.

Chairman LEVIN. Thank you, Senator Udall.

Senator Graham.

Senator GRAHAM. Thank you, Mr. Chairman.

Thank you all for your service. I am sure you will be confirmed, and congratulations on being nominated by the President to very important jobs at a critical time.

Admiral Winnefeld, whatever number of transport aircraft we have available as a Nation, do you agree with me that over the last decade we have been flying the wings off these things?

Admiral WINNEFELD. Sir, did you mean that for General Fraser?

Senator GRAHAM. Yes, General Fraser, I am sorry. I apologize.

General FRASER. Sir, we are indeed flying at a higher rate with respect to a large number of our platforms, whether it is tactical air or strategic air. Our assets have been deeply engaged in today's fight.

Senator GRAHAM. As a matter of fact, the operational tempo is probably unheard of maybe since World War II. Is that correct?

General FRASER. Sir, it is a high ops tempo across all of our platforms.

Senator GRAHAM. When we look at numbers, we all need to understand from the committee's point of view, I believe, that we are really aging these airplanes pretty quickly because of the demands.

Admiral, as Vice Chairman, do you believe that the term "war on terror" is a correct term for the threats we are facing?

Admiral WINNEFELD. That is a very good question. I think that term has passed out of vogue with a number of people, but I think we are still so much in a fight with al Qaeda and their related extremist groups that it sure feels like a war, yes, sir.

Senator GRAHAM. That is a good response, I think. What do you tell the public? Is it close to being over? Is it just beginning? Are we in the middle? Or we don't know?

Admiral WINNEFELD. I think I would echo Secretary Panetta when he was asked a question about this, and he said we are close to being able to strategically defeat al Qaeda. To me, that means their message being bankrupt, a lack of financial support that enables them to conduct operations and the like, that ultimately causes them to unravel from their internal contradictions, much the same way the Soviet Union did.

But that said, al Qaeda is morphing. It is less of a centrally-controlled organization. There are more home grown terrorists out there that are ascribing to the ideology in some cases.

This is not yet over. It is not even close. We still have a fight on our hands in places like Yemen and Somalia, and even ensuring, with the cooperation of our law enforcement partners, that of course we manage this at home.

It is going to be a long struggle.

Senator GRAHAM. What would you call the potential threat we face from a nuclear armed Iran? Is that part of the war on terror, or is that a different threat all together?

Admiral WINNEFELD. Unless Iran were to hand a nuclear weapon over to an extremist, then I would consider it a completely different animal.

Senator GRAHAM. What do you think the odds are that if the Iranians developed a nuclear capability they would indeed hand it to an extremist group?

Admiral WINNEFELD. I think the Iranians understand that if they handed it to an extremist group, it probably would not be very difficult for us attribute any use of that weapon to Iran. I think they know that they would suffer grave consequences if that occurred.

Senator GRAHAM. Do you think they believe they would suffer grave consequences if they developed one at all?

Admiral WINNEFELD. I believe that they are going to understand that they are going to feel the effects of all elements of national and international power applied to them as required if and when they continue this development.

Senator GRAHAM. Do you believe that all the efforts of international power being applied is deterring the Iranians from obtaining a nuclear weapon?

Admiral WINNEFELD. It remains to be seen, Senator. It is a very good question. It certainly, I believe, slowed them down, but there

is more pressure, I think, that could be and probably should be applied eventually.

Senator GRAHAM. In terms of the threats we face in the future, if Iran acquired a nuclear capability, what kind of threat and what would be the likely consequences of that event to our national security?

Admiral WINNEFELD. I think it would be grave if they acquired a nuclear weapon and the ability to deliver it.

Senator GRAHAM. Right.

Admiral WINNEFELD. Of course, we need to watch that very carefully and pace that so that we can—

Senator GRAHAM. That takes us to missile defense and to suppress the Iranian nuclear threat could require some pretty sophisticated military capability. Do you agree with that?

Admiral WINNEFELD. Yes, sir.

Senator GRAHAM. That the idea of attacking Iran with a single strike and neutering their nuclear capability if the President chose to do that is probably not going to happen. It would be a more sustained effort if we went down that road?

Admiral WINNEFELD. I would not want to rule anything out, Senator, at this point.

Senator GRAHAM. That is why F-35s and F-22s have become important, is that correct?

Admiral WINNEFELD. The F-35 and the F-22 certainly represent a very important capability.

Senator GRAHAM. That is why air refueling capability becomes important. That is why bases in the region become important.

The reason I ask these questions is to get to what kind of threats the Nation faces. I would argue that the fight against al Qaeda has been successful, but not nearly over. It is morphing, that the Pakistani border is more unstable than it has been in the past. That when you look at the amount of money which we spend to defend the Nation, you have to look at the threats. We have not even gotten to North Korea yet.

My question for all of you, is it fair to use gross domestic product (GDP) spending on defense as a guide to what is sufficient? Is that a good measuring device?

Admiral WINNEFELD. Senator, I think it is an indicator, a comparative indicator. But it is also very often comparing apples to oranges. If you look at what we spend as a percentage of GDP in World War II, it does not even compare to what we are spending now.

Senator GRAHAM. Right. Secretary Gates identified GDP as a benchmark for defense spending. I associate myself with that. When you look at World War II spending, you are right. We went up to 42 percent at the height of the war of GDP. Korea was 8.23 to 13 percent; Vietnam was 7.65 to 10.8 percent. In 2010, we are spending 5.78 percent of our GDP on defense.

If you believe it is a benchmark, would you agree that it is on the low end of conflicts in recent memory?

Admiral WINNEFELD. I would say factually it is on the low end GDP-wise, yes, sir.

Senator GRAHAM. General, can the Army withstand 49,000 troop reductions and deal with some of the threats we have just talked about?

General ODIERNO. The 49,000 troop reduction depends on our commitments, and I think the assumption in that reduction is our commitments to Afghanistan will go away. Our commitments in Iraq will go away and there will be no new more commitments generated.

Senator GRAHAM. Do you think it is logical for this country to assume in the future that we are not going to have to use the Army in some kind of role in the future operations in the war on terror?

General ODIERNO. As I said earlier, we have never been good at predicting the future. We must have an Army that is capable of responding to worldwide issues.

Senator GRAHAM. When we respond, we want to respond with overwhelming force. We are not looking for a fair fight here, right?

General ODIERNO. We are not looking for a fair fight, no, Senator.

Senator GRAHAM. Now, you mentioned to Senator Ayotte's questions that you believe that General Allen had flexibility in terms of withdrawal. Are you suggesting to the committee the President's dictate that we will remove all surge forces out of Afghanistan by September 2012 is conditions based?

General ODIERNO. What I was suggesting is that he has flexibility within the timeline that was set for him by the President.

Senator GRAHAM. But my question is, it is not condition-based. As I understand the policy, all troops will be removed by the end of September.

General ODIERNO. What I was discussing was the flexibility he has within those dates of removing troops.

Senator GRAHAM. I guess he could bring 30,000 out on September 15 but that would be pretty hard to do.

General ODIERNO. He could.

Senator GRAHAM. I just want to thank you all. As the committee inquires into what is enough to defend America, we are going to need your counsel and advice. There is a budget problem we are all facing. Defense spending has to be on the table. But I do not want to America to lose sight, Mr. Chairman, of the threats we are facing.

This is not a time to seek a peace dividend because we are nowhere near peace. The way to avoid war is to be able to deter it. When you go into it, end it quickly, and we need capability as far as the eye can see.

Thank you all and God bless.

Chairman LEVIN. Thank you, Senator Graham.

Senator BEGICH.

Senator BEGICH. Thank you, Mr. Chairman. Thank you all for your service and your willingness to serve. Thank all of you for most recently and some over the last few months having conversations about what is important to Alaska.

Let me, if I can, to Admiral Winnefeld. Again, thank you for moving to this level. As Senator Udall said, we will miss you in regards to your role in NORTHCOM. I know I owed you a call back from your call to me, but thank you for figuring out who is in

charge in the Arctic. We appreciate that more than you can imagine, per our conversation that we had.

On that issue, if I can walk through a concern, and we have talked about this before. In dealing with the Arctic, which is now becoming more and more apparent to almost all aspects, it does not matter if it is military, industry, environmentalists, you name it, the Arctic is becoming a pretty important piece of the puzzle for our country. Of course, for Alaska, it is a critical piece.

One of the pieces of this puzzle is the Law of the Sea that has been delayed or we are one of the few countries that have not signed on. One, I would be interested in your thoughts on that. Two, the concerns that we hear from people, and a very small amount of people, as we have talked about before, is it that somehow we will lose our sovereignty by signing on to the Law of the Sea.

First, can you respond to the importance of the Law of the Sea from your perspective? Then this whole issue of sovereignty and that we would be giving up our role? Admiral?

Admiral WINNEFELD. Sir, I think the Law of the Sea Treaty is important to us, both from a strategic perspective, and also inside the military perspective. From the strategic perspective, specifically to the Arctic, it gives you a seat at the table when other nations are starting to step forward and assert their claims in the Arctic. We want to be there as part of the international community to participate in that process to make sure that that is adjudicated properly.

Senator BEGICH. Can I hold you there for a second? Could I just read to you, and it might have been over the last month that Russia is moving aggressively with military operations potentially in the Arctic. Did I read that correctly?

Admiral WINNEFELD. They have made a number of statements, for example, putting a couple of brigades up in the Arctic. It remains to be seen where they go, what they do, and how they are configured. I am withholding judgment on that a little bit. But it is a significant statement on their part.

Regarding the military piece of the Law of the Sea, there is nothing in the Law of the Sea that prevents us from exercising any of the standard operations that we need to be able to do—straights passages, freedom of navigation, and that sort of thing. If anything, it more formally codifies it and gives us a seat at the table as they might be modified in the future.

I fully support accession to the Law of the Sea Treaty.

Senator BEGICH. It does not, again, to the main question, limit or reduce our rights and sovereignty in the areas that we control?

Admiral WINNEFELD. As far as I can tell, and reading the treaty and consulting with our people, it does not. There are mechanisms that we have in place where if that were attempted, we would be able to avoid any kind of a limitation on our freedoms or sovereignty.

Senator BEGICH. The military supports the effort to get the Law of the Sea Treaty resolved.

Admiral WINNEFELD. I do not know of anybody in the Defense Department, including the Navy, that is not in favor of acceding to it.

Senator BEGICH. Thank you very much. I just wanted to make sure that is, again, on the record. I know we talked about it several months ago, and I just wanted to make sure.

The second is, if I can shift here to, I sit also on the Veterans' Affairs Committee, and one of the big issues is transition from DOD, military operations, individuals, and then going into veterans' programs, and that transition. I can only speak for the last 2½, 3 years that I have been here, but I know there was concerns in the past that transition was not as smooth as it could have been. Can you give me some general comments of what you think, and how that is improving? The reason I ask, I come to the Armed Services Committee here, talk to the Active Duty members and hear pieces. Then I go to the Veterans' Affairs Committee and hear pieces. Not all the time do they meet. But I am seeing some progress, at least in my 3 years here. But maybe you could respond to that and tell me what you think, and is there some areas of room for improvement in that arena?

Admiral WINNEFELD. Senator, it is a very good question. It is something that I would need to dive into deeply, if confirmed.

I do know that there have been, as you point out correctly, problems in the past where we have not stitched together those two systems as we well we probably should have. I also know cursorily that the Department is determined to work with the Department of Veterans Affairs (VA) to stitch that together the way it should be. I can assure you that if I am confirmed, I will look into that.

Senator BEGICH. I appreciate that. I know as we talked about what the future is in end strength, there will be less in the Active end and more in the veteran end. We want to make sure that transition works very smoothly.

Very parochial, but yet a more broad sweep, and that is how the Defense Department will work with nonprofit organizations, organizations that are important to family support. What I mean by that is I know in Alaska we have a program, Alaska Assistance Dogs, that are important for many of our veterans and wounded warriors. It is basically run by a nonprofit organization. I know sometimes the Defense Department is very rigid in their access or allowability of access from nonprofits.

One, do you see these organizations as important for the long term, especially with our wounded warriors? Two, can you make a commitment here that you will aggressively look at how we ensure these non-profit organizations really do integrate their services or provide these services that the military just cannot?

Admiral WINNEFELD. Sir, I think that Chairman Mullen has done an exceptional job of outreach into the country through his conversations with the country and a number of other initiatives that he has had in place to reach out and leverage every capability that the Nation can muster to try to help our families and our wounded warriors.

I would be committed to continuing that. I think it involves a number of different bins, if you will, of awareness within the population and certainly businesses and schools in the country of what military families' needs are. It includes employment. It includes education. It includes wellness. It includes what I believe are qual-

ity of services that we provide to our military individuals. I think that non-profits can have a key role to play in that.

I do not know the exact details, whether there are any particular limitations on non-profits being able to participate in that. But if confirmed, I will make it a matter of priority to continue to support Chairman Mullen's program in that regard.

Senator BEGICH. If you see areas that, just because of regulatory or old systems that we put in place through legislation, that limits their ability, even though it sounds like a good idea to include them, please let me know or let others know, because I think we want to engage the community because I think the community is very interested and want to help as much as possible.

Admiral WINNEFELD. Senator, I relish cutting through red tape like that. As long as I can do it legally and ethically, I will be all over it.

Senator BEGICH. On the legal end, if you see laws that need to be changed, that is our job, so please feel free to tell us. It may take longer than we want, but let us see what we can do.

Thank you very much. To General Odierno, let me ask you a couple of questions.

I know we had a great conversation regarding family support and the need to ensure—and there is no question in my mind after our conversation, your strong interest to have a strong Army, you need to have a strong family component to it.

One area we talked about a little bit was education and how and what we need to do. Can you give me your thoughts—and I know I talked to you about ensure that our DOD facilities are properly maintained, but I thought it was very interesting your conversation about the community part of it and how you can kind of see this balance. Could you respond a little bit?

General ODIERNO. As I have my three children here who all grew up in DOD schools as well as community schools, I think the important part about this is there are places where there is no other choice, but you have to have DOD schools. I think in those places, it is important that we support the infrastructure in order so our children can continue to be educated.

But there are many programs around in many places, and I will use Killeen, TX, as an example, out of Fort Hood where there is a partnership where the Killeen school district is taking over the infrastructure on post in order to have our kids get a good education. I think these partnerships are important.

My personal opinion is inside the United States, we should really continue to build these partnerships, and that should be the way ahead for our education. I think it brings more resources. It brings more capability to our children.

If you could just indulge me, if I could just comment on the question you just asked. It is absolutely critical that we have the opportunity for non-profit organizations to supplement our support to our soldiers and families, wounded warriors. There are so many of them out there who do so many great things for our soldiers. It is important. We have to have that, and it is so important. Sometimes it is difficult for us to reach out them, and I think we have to look at ways at how we can do this legally and ethically in such a way where they can provide more support to our soldiers, sailors, air-

men, marines, and their families in order to provide them what they need as we go through this time of war. I think that is a very important effort, and I would like to work with you and the committee on that, if confirmed.

Senator BEGICH. Thank you very much. Thanks for those comments. I will just throw an idea, and then my time is up here, and that is, it just dawned on me as you were talking. I wonder if the military when the school board associations meet on an annual basis, they meet, I think, a couple of times a year, all the school boards from across the country. If the military actually participates in those meetings.

General ODIERNO. I would tell you in a couple of ways. First, in the community I was involved with, there are four or five communities. Frankly, I met once a month with all the superintendents.

Senator BEGICH. Excellent.

General ODIERNO. They would come in together, and we had a program where I met personally with them. Those are the kind of relationships I think we have to have. But I think in many places that is in fact the case, but we have to continue at things like that.

Senator BEGICH. Thank you very much. General Fraser, we had a great conversation. I have run out of time. But I would say I know you have been run ragged a little bit on logistics in Afghanistan and Pakistan and what could happen there. But from our conversation, I have faith that you are not going to leave the troops hanging out there without the right logistic support they will need to do their job. I just want to put that on the record.

I know we talked about a little bit about a plan B. As you get confirmed, you will be engaging in that in an aggressive level. I want to at least reassure people who might be watching us that there may be slight gaps, but it is not about a total gap. The goal is to have a full plan to make sure all logistics are dealt with wherever our troops are, Afghanistan being one of the places obviously now. You do not have to respond. I just want to put that out there.

Thank you very much to all three of you, and to the families that are behind you, thank you very much.

Chairman LEVIN. Thank you, Senator Begich. Senator, if you will look into the issue that you raised about the National Association of School Boards and whether or not there is a connection at those national meetings, I would be happy to join with you. Perhaps the committee could even, if it is not already the case, suggest to them that it be the case.

Senator BEGICH. I think that is a great idea, Mr. Chairman. Why it dawned on me when I was with U.S. Conference of Mayors, they never had one, and we created one because it was critical that mayors have that connection, so it just dawned on me. I will do that.

Chairman LEVIN. It was a good idea.

Senator BEGICH. We will do it.

Chairman LEVIN. Thank you.

Senator Sessions.

Senator SESSIONS. Thank you. Thank all of you, and congratulations on your appointments and nominations. I expect to support you and continue to support you after confirmation, which I am certain will happen.

I truly believe we have the greatest military the world has ever known. It is large. It is mobile. It is courageous. It is well led by the finest operations corps we have ever had, and I believe the finest NCO corps. It is just a remarkable thing.

As the ranking member of the Senate Budget Committee, things are going to be tighter in the years to come. I would just say that we have to tighten our belts, but do it in a way that does not damage this fabulous morale and spirit and capability that the military has accomplished. I just would say that in opening comments.

General Odierno, Senator Ayotte, a former prosecutor like I have been, asked you about prisoners, prosecutions, and jails. Those are fundamental things. I truly think we are going to have to examine how we are detaining dangerous individuals.

I am aware that there are problems in Afghanistan now with some very dangerous individuals being arrested and being detained and then being released rather rapidly. Are you aware of that? Is it a concern? If you need assistance in bringing that to the right level, let us know.

General ODIERNO. I am not aware of any of the specifics in Afghanistan, specific cases, but I would make a general comment on this.

What we have learned over the last 5 to 6 years specifically is that the ability to detain those dangerous individuals for long-term detention is critical to us in getting the information we need to prosecute our campaigns. It was the case in Iraq. It was the case in Afghanistan, and we found that to be important.

I think it is important that we take a look at this. I clearly agree with Admiral McCraven's assessment of this, that it is important that we take a hard look at this because it does have a significant impact in us getting the information necessary to continue to prosecute our operations around the world against terrorism.

Senator SESSIONS. I just agree. I think policies in Iraq changed. I think we did a better job of identifying using normal police techniques, fingerprints, biometrics, and bomb characteristics to identify people. They have to be detained. It is very demoralizing and dangerous to release someone who is going to go back to the war and kill people. We would not do that in the United States.

My observation is that undeveloped nations are consistently deficient in being able to detain people in prison for long periods of time. I suppose that is one reason they had a death penalty so much. They did not have the ability. My observation is that people tend to get out. They either pretend to talk. They either bribe their way out. They either escape, or they are released because there is not room for them.

I do think that you should give attention to that, and if we need more resources, I hope you would call on us.

With regard to our forces in Europe, the original plan was to bring back two Army brigades, General Odierno, from Europe. I understand those plans are now on hold. According to Stars and Stripes, in April, the Army will return only 1 brigade, and that only represents 5,000 soldiers out of 80,000 U.S. troops in Europe.

I think it is time for us to have a serious heart-to-heart with the Europeans on their defense expenditures. In Germany, I understand they are about 1.2 percent of GDP. Other countries are at

that level in Europe. Very few are meeting their goal of 2 percent of GDP on defense as a North Atlantic Treaty Organization obligation, while we are at about 4 to 5 percent of GDP on defense.

Are you aware of this discussion? Maybe Admiral Winnefeld would be, and I just have to say it means a lot economically to Germany or other places where we have people spending money in their economy. It means a lot to our Nation when our people are at home spending money in our economy, number one. Number two, if they do not need to be there for serious strategic reasons, I think we should look to bring more home and reduce our presence.

General ODIERNO. Senator, my understanding of that decision is similar to yours, the most recent decision.

I would just say as we go through these budget reductions potentially, we have to review all of this again. In my opinion, it will have to be reassessed. Where this will all be part of where we put Army force structure, where we most need it depending on what is left based on the budget realities that we are facing over the next 10 years. That will have to be part of the discussion.

I am assuming we will have to continue to look at this, continue to look at strategically what is best in order for us to execute our policies. We certainly will continuously review this as we move forward over the next several years.

Senator SESSIONS. I was in a security conference some months ago, and the British told us they were reducing their defense spending 8 percent. Frankly, they are not spending enough now. I responded, I guess you feel okay because the United States will be there to take care of you. But we need to have this kind of conversation with our allies. They have to participate more.

I see Senator Lieberman relooking at the budget numbers. A lot of people have complained that our deficit is a result of our military efforts in Iraq and Afghanistan. Looking at the numbers, that is not really so. We have spent a tremendous amount of money on those two efforts, about \$1.5 trillion, maybe a little less. The deficit has increased about \$15 trillion during this time.

At this point, we are projected, this year we are spending about \$150 billion on the military effort, \$158 maybe, this fiscal year, going to \$118 next fiscal year. But our deficit this year is \$1,500 billion. Those numbers would come down to \$118 billion and continue to drop under the plan that we have seen and I am hopeful that we can adhere to.

But I just want to say that while every dollar has to be managed carefully, the reason we have a severe financial crisis in America is not because of our military effort. It may be a part of it, but it is about 10 percent. We will have to look at it.

You do represent about half of the non-defense discretionary spending. In the last 2 years, non-defense discretionary spending has increased 24 percent. Military spending is about 2 or so percent, maybe 3. It is projected to stay at 2 or 2½ percent the next decade, and I do not think it will. I do not think we can have that big an increase, frankly. But we have had much, much larger surges in non-defense spending than defense spending, and certainly in recent years.

How we work our way through that, I do not know, but I call on all of you to realize that we are at a level of spending, borrowing 40 cents of every dollar we spend, that cannot be sustained. You represent about half of the discretionary spending budget of the United States, separate from Social Security and Medicare. You will have to be part of the belt tightening, there is just no doubt about it.

General Odierno, you have had such tremendous on-the-ground experience in Iraq and in that area. I know you are fully aware of the requirement to give your honest and best judgment to Congress when you are called upon to do so. You have to respect the Commander in Chief and the civilian defense officials. But you have led those men and women in combat. Many of them have lost limbs. Many of them have lost their lives. I am sure you feel an obligation to speak for them to avoid unwise decisions that could inadvertently give away the things they fought and too many of them have died for.

Will you share with us that first and foremost that you will give us your best military advice regardless of the consequences, that you will just give us your best leadership, because I think uniquely as the chief of staff have the kind of experience that could help us make the difficult decisions that we will be facing.

General ODIERNO. Senator, I absolutely always give my honest and frank opinion, especially when it comes to taking care of our soldiers and their families, but on all issues when asked. I will continue to do that.

Many of the issues that we deal with are not black and white; they are very gray, as you are well aware. There are many second, third order effects that impact decisions as well as opinions on issues. It is my job, I believe, from a military perspective to always identify the issues, identify what the risks are, and give my opinion how to mitigate those risks and be successful in accomplishing our missions. I will always do that when I am in front of the committee or any other forum that I participate in within the government.

Senator SESSIONS. I know our soldiers and their families and Americans are happy that we can draw down our force presence as rapidly as possible. But what impact would it have, in your opinion, if we drew down too fast and ended up undermining the success that we have gained, and maybe suffering a strategic loss that was not necessary as a result? What impact would that have on our morale of our men and women, as well as strategically?

General ODIERNO. Senator, my assessment is, it obviously would have a huge impact. But I would just say I do not think there is anybody who believes that is the case.

Senator SESSIONS. I understand. My question to you is, but if we did so, if events occurred unlike something you expect this moment, and we unwisely did not handle the situation based on a goal just to reduce troop levels regardless, it would have an adverse impact on the men and women who put their lives at risk for us, would it not?

General ODIERNO. I would just say obviously that for many who have participated in the wars in Iraq, Afghanistan, and other places around the world, obviously they believe in what they are

doing. That's why they continue to reenlist. That is why they continue to go back on multiple, multiple deployments.

It is our duty as leaders to ensure that we do everything we can to ensure their success and safety. We will never stop from doing that. If that becomes the case, it would obviously have an impact on morale as we move forward.

Chairman LEVIN. Thank you, Senator Sessions.

Senator Blumenthal.

Senator BLUMENTHAL. Thank you, Mr. Chairman. I want to begin by thanking each of you for your extraordinary service to our Nation, and thank your families as well as others have done who share in the sacrifice that you have made. I know some of them are here today, and I would just like to assure them that we share in the gratitude of the country for their as well as your service.

General Odierno, you have talked very eloquently and powerfully about your caring and attention to all of our warriors, our wounded warriors and those who are serving now in theater. Most especially to the need for better care when it comes to traumatic brain injury and post-traumatic stress. I understand from your testimony and our conversations that you will continue to seek to upgrade and improve the kind of care that the military provides to those warriors. Am I correct with that assumption?

General ODIERNO. Absolutely, Senator.

Senator BLUMENTHAL. So far as particularly the problem of suicide, which you again have spoken to very eloquently and powerfully in your written testimony, and I was very impressed by it. Would you have plans to try to upgrade the kind of preventive care that is provided to our warriors?

General ODIERNO. The work that General Pete Chiarelli has done, the Vice Chief of Staff for the Army, has been tremendous, but it is not done yet. There is much more that we have to do. We have identified factors, but now we have to figure out how we mitigate those factors that we believe are responsible for suicides and all the components of the Army and the Armed Forces themselves. We still have a lot of work to do, and we are dedicated to doing all we can to reduce this terrible risk that we have today.

Senator BLUMENTHAL. Do you have any thoughts that you could share with us about potentially the causes of those increased rates of suicide, the stress factors and so forth?

General ODIERNO. Senator, it is a combination of things. It has to do with dwell time and the number of deployments. It has to do with family stress. It has to do with uncertainty. It has to do with many other issues that we deal with. It has to do with physical injuries that affect individuals mentally. It has to do with sometimes the home environment that they are involved with. It is all of these things.

The main thing is we have to understand what those risk factors are, how many are applying, and when does it become critical. It is about us training our young leaders to understand the signs, to understand the factors. The Army specifically, I will talk to, has done a lot of work in helping our leaders to understand these issues.

But then it is about the individuals themselves feel comfortable in identifying that they do have their own issues, and they do come

forward, and they do ask for assistance and help. That is so important in this part of this process is that they feel comfortable doing that. We have to create an environment that allows them to do this, and that is the key that we want to continue to move forward in and accomplish, sir.

Senator BLUMENTHAL. I do not mean to put you on the spot here, but part of the popular view of making a frank and candid self-reporting of problems more effective and more frequent, and making it more acceptable many people have debated might involve the condolence letters that are sent by the President. I wonder if you could share with the committee your view as to whether those letters should be provided more broadly, more frequently, to the families of individuals who might be affected?

General ODIERNO. I will not comment specifically on the President, but I will comment that as a commander in Iraq at the division, corps, and theater level, I sent letters to all to include those who committed suicide because they were such an integral part of our force. They are a part of our family, our Army family, and they are our comrades. Although they might have struggled with the situation they were in, we still owe them the utmost respect and honor for their service.

Senator BLUMENTHAL. Thank you. You also have commented in your written testimony, and again, in other forums about the need for better transition for our wounded warriors to the VA. Maybe you could expand on that point.

General ODIERNO. First off, the Army has done some good work, and they have 70 teams out around the country, specifically located with VA centers. They are helping us to do a better transition as they transition out of the Army into the Veterans Affairs.

From anecdotal discussions that I have actually had recently with several wounded warriors who are getting ready to transition, one of the things we have to continue to work is the discussion between treatment of a military doctor to a Veterans Affairs doctor, because one of the things that bothers them and sometimes becomes traumatic is that they use different treatment regimens, and it makes them feel uncomfortable. We have to work this piece.

I think we have the administration piece taken care of. We now have to look at the medical transition itself as they transition from military medical care to Veterans Affairs medical care.

Senator BLUMENTHAL. I thank you and commend you and welcome your attention to this problem. I know it comes from a genuine caring, and I think that is extraordinarily impressive. Any way that I can be helpful or I am sure members of the committee, we will be there.

General Fraser, I wanted to follow up, if I could, on a couple of the questions that Senator Udall mentioned, and some of the comments in your testimony about cyber security, and your comment in your testimony that you move lots of information. I think the American public does not appreciate how much information is part of what you transport, so to speak.

I wonder if you could share with the committee your view as to whether more does need to be done of an offensive or deterrent nature to make invasions or intrusions more costly, as Admiral

Winnefeld commented, for any enemy that has an intention to do so.

General FRASER. Thank you, Senator. The cyber domain and protection of our data is a high focus area, certainly of mine in my current position, but as I look forward and moving possibly, if confirmed, into TRANSCOM's realm in which they deal not only in the .mil, but also the .com domain. The reason I mention that is because there is a seam there, and there has to be a partnership to ensure that the right data is getting to the right place with the information at the right time. Protection of that data is something that I will certainly be focused on, if confirmed, and move to TRANSCOM.

I think behind the defense and the .mil domain and the active defense that we have, that we are doing a lot. What I would be doing is then going out and engaging our commercial partners to ensure that they are protecting their data as much as possible. That is going to have to be a collaborative effort that we will have to work together to ensure that we are able still to accomplish the mission. Cyber will be very high, if I move into this position, to ensure the protection of that data.

Senator BLUMENTHAL. Thank you. My time has expired, but I would just like to suggest in closing that at some point these attacks obviously have to be viewed as an act of war on this country, whether it is on .mil or .com, if the attacks on the .com area so impact our infrastructure, our utilities, our banking system that they in effect constitute an act of hostility toward this country. I welcome your thinking about that topic, as you have indicated you are doing, and look forward to working with you.

I am sure you will be confirmed. You certainly have earned it, and the country deserves and will need your service. I want to thank you in advance. Thank you very much.

Chairman LEVIN. Thank you, Senator Blumenthal.

Senator Lieberman.

Senator LIEBERMAN. Thanks, Mr. Chairman. I am really sorry I could not get here earlier this morning, but I am glad I could get here while we are still in session to welcome the three nominees, to thank you for your extraordinary service to our country, and to say that I think President Obama could not have made better selections.

I have known the three of you in your previous positions, particularly in the case of General Odierno and Iraq, and Admiral Winnefeld at NORTHCOM. I know you have done really, not just good work, but great work, really transformational work, and I appreciate it. We are lucky to have you in our service.

In the case of General Odierno, getting here while you are in still in session gives me the opportunity to welcome his family, at least one of whom had the wisdom to marry a woman from Connecticut and to become my constituent. He also is living out my childhood fantasy of working for the greatest sports franchise in the history of American sports, that is the New York Yankees. [Laughter.]

With Senator Blumenthal and me here, I think we have a majority on the committee to support that conclusion. [Laughter.]

Senator BLUMENTHAL. I would second that observation. [Laughter.]

Chairman LEVIN. The quality of our dismay outweighs the quantity of your support. [Laughter.]

Senator LIEBERMAN. Okay, enough of that.

I know that many of my colleagues earlier have talked about the impact of budget cuts on the military. This is a real serious challenge.

We are the Armed Services Committee, so I suppose we understandably feel a special protectiveness of the military budget, but we should. To me, it is, after all is said and done, the first responsibility of our National Government, which is to protect our security. If we do not have security, the American people do not have anything else that matters. We do not have our freedom, and nor we do have the economic opportunity that has been part of what it has meant to be an American.

Everybody has to give in this crisis. As Admiral Mullen said a while ago, our national debt has become a national security problem, and, therefore, we have to work together to cut it down. But we have to be really careful about the impact of these cuts on our military.

We all have to understand that the classic members' district advocacy has to be tempered by the national interests of getting our government back into fiscal balance. But beyond that, I think, and this is what I want to focus on in my questions, how we treat the military personnel, the men and women in uniform, and the numbers we have, are critically important, and are beyond parochial district level or State level concerns. These are what I want to focus on.

A lot of us on this committee, including myself, spent a fair amount of time in recent years trying to make sure that the two Services that have been most stressed, under most demand in Iraq and Afghanistan, namely the Army and the Marine Corps, had end strength increase in recent years, and fortunately that happened.

Now, the Army has been directed to carry out a reduction from the 570,000 essentially that we reached in Active Army numbers down to 520,000 or 521,000 over the next 5 years. I know the Army, General Odierno, has said they will do that. I think we have to be really careful about going beyond that.

But you said something, sir, in your answers to the questions that the committee asked, written answers, that when I read, I was so glad to see you say it, and I agree 100 percent. Here is the quote: "End strength reductions should not be automatic. They are conditions based and will require periodic assessment." We are not operating in a static universe. Things are changing all the time with regard to our national security.

I wanted to ask you, General, if you would discuss what are some of the conditions that as Chief of Staff of the Army you will ask be weighed before these end strength reductions are carried out?

General ODIERNO. Thank you, Senator.

As I look at this, I believe that the reduction down to 520,000 has been based on the temporary end strength increase of 22,000, which was put into place to account for frankly many of the wounded warriors and other non-availables that we have had that has taken away from meeting our requirements, of filling our units.

The other 27,000 is based on the fact that the assumption that we will continue to come out of Afghanistan on time by 2014. Because of that, we will be able to maintain a dwell time deployment ratio that is something that we can sustain over a long period of time.

If those conditions change, if we decide to stay in Afghanistan longer or if another contingency comes up that requires deployment of Army units, then that would be something that could impact that force reduction, because what it could then do is significantly again increase and go after the dwell time, and put even more pressure on the Army itself.

Those are the kind of things that we have to understand, and those are the kind of things that we have to constantly reassess based on reality and what is going on around the world.

Senator LIEBERMAN. Okay. I appreciate that answer. Just one follow-up on it.

Am I right that the 22,000 number of non-deployables, including wounded warriors, has not gone down?

General ODIERNO. In fact, it continues to go up.

Senator LIEBERMAN. It goes up. That also puts stress on you as you try to go down.

General ODIERNO. It does.

Senator LIEBERMAN. Yes. I think we have to follow that carefully, and I hope there may be a way, and I will work with the chairman on this, to see if in the defense authorization bill when it comes to the floor, we can state some of these conditions, because just as we say, our drawdowns in Iraq and Afghanistan have been conditions based. It seems to me it is fair to say that the drawdown of our end strength, how many people we have in uniform, ought to be conditions based as well.

I wanted to ask about Iran. I do not believe this has been asked before. General Odierno, because we have talked about this when you were in Iraq, Army personnel and others in Iraq at different times over the last years have come out and specifically said, publicly, I am not revealing anything classified, we know that Iran has been training and equipping Shia extremists who have then gone back into Iraq and are responsible really for the murders, for the death of hundreds of American soldiers

I guess people could argue about whether it is hundreds. I believe it is, but it is certainly some, and the wounding of a lot of others, and the killing of thousands of other Iraqi soldiers and civilians.

I was really encouraged by that. I know a lot was going on. In a sense, you would say that if a far nation is training people to come in and kill our soldiers, classically it is a *causus belli*. It is cause for war. But I understand there was a lot going on.

I was very encouraged about a week ago, both Secretary Panetta and Admiral Mullen made statements. Admiral Mullen said, "Iran is very directly supporting extremist Shia groups which are killing our troops." Secretary Panetta said, "We are very concerned about Iran and the weapons they are providing to extremist in Iraq."

We cannot simply stand back and allow this to continue to happen. This is not something we are going to walk away from. It is something we are going to take on head-on.

Admiral Winnefeld, as you begin a new chapter in your career as the Vice Chairman of the Joint Chiefs, I wanted to ask you to comment on, do you agree with Secretary Panetta and Admiral Mullen about this behavior by Iran?

Admiral WINNEFELD. Sir, I absolutely agree with it. I would not want to take away any options or anything like that, but I would say that they are testing our patience to be sure. We always would use force as a last resort. There are plenty of instruments of national power that can be applied. But it is a very serious problem, and I fully support what Secretary Panetta and Chairman Mullen said about it.

Senator LIEBERMAN. I thank you for your statement. I do not have to say to any of you because you have been on the battlefield, and you know how important it is. But we have now escalated our identification of what the Iranians are doing. I think if they do not stop, our credibility with them and a lot of others in the region, if not the world, is going to go down if we do not do something about it. I appreciate your statement, and I am encouraged by the others. None of us want to have more conflict, but we are not asking for it by our behavior. In this case, they clearly are.

Anyway, I thank the three of you. I look forward to working with you. I would say that, if I may paraphrase an old political slogan. The great thing to say is that not only are the three of you extraordinary, but you are as extraordinary as the people you are leading. In other words, this is a bottom up, top rate, high quality military we have. To me, it is the one institution in our country that I always say look at it when people tell me that America's best days are behind us. I wish I could say that as you look at the U.S. Congress. I cannot quite say that at this moment, but they can look at the military. I thank you for that.

Thanks, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Lieberman. I share your thoughts and comments very deeply.

Just a couple of quick questions. One, General Odierno, about Iraq. You have indicated you would support retaining some U.S. forces in Iraq beyond the December 31 deadline if there is a request. How much longer does Iraq have to make a request for us to consider?

General ODIERNO. Every day it makes it more difficult because it is not only us. I know General Austin has built a lot of flexibility in his plan for the final withdraw of our troops, but he has to do some planning.

But, more importantly, there has to be some work done on some sort of a status of forces agreement between our two countries. It has to be done soon because it could take a little bit of time to get that. I cannot give you a specific date, Mr. Chairman, but I would say it has to be the sooner for us in order to make this appropriate transition.

Chairman LEVIN. You said something before, which I think you did not exactly mean, but let me probe you on it. You said it is important we provide Iraq with the support they think is necessary. I assume it would be a joint decision, not only they think is necessary, but that we are willing to provide.

General ODIERNO. Yes. I think we have done a joint assessment where we identified gaps in their capabilities, and that has been done jointly and driven by us.

Chairman LEVIN. So, it is not only what they think.

General ODIERNO. It is not just what they think. It is a joint assessment.

Chairman LEVIN. Now, General, relative to the importance of keeping the Guard equipped, you indicated very strong feelings about the importance of doing that because there are requirements we place on them, in your words, among other things.

We have in the Army, the main battle tank, the M1-Abrams, a tank which is going to remain in the inventory. As it currently stands, it is going to end production of upgraded M-1A2 version vehicles in 2013. The Active Army now has the M-1A2 version of the tank, and most of the Guard has the M-1A1 version. Stopping that production will mean stopping of the equipping of the Guard with the M-1A2.

Here is the issue. The Army is going to begin the next Abrams upgrade modernization effort in 2016, and they are going to end the production of the upgraded M-1A2 in 2013 as it now stands. There is going to be a 3-year gap there between production of the upgraded M-1A2 in the next upgrade program. But we know there is going to be an upgrade program. That is a given as I understand it.

The Army has initiated a comprehensive cost benefit and risk analysis of the impact of that gap in production on our armored vehicle production facility, which is in Ohio, and the supporting industrial base. The final results of the analysis are expected at the end of the year. We are not going to have the results of the analysis until the end of the year.

In considering the costs of closing and restarting the production line, which we know is going to be restarted, should we not consider the increased capability in the National Guard tank units which would result from continuing this production during this gap?

General ODIERNO. Certainly, Senator, we will take a look at it.

The problem we have is we will have several other factors maybe that could impact on this. It has to do with budget reductions and force structure reductions and the mix that we decide we need in the force. It could be that we decide that potentially the number of heavy units reduce, and we are able to push more M-2A2s to the Guard out of the Active component. That could be one solution. Part of this problem is waiting to see what we are going to have to do with our force mix and force structure as we think about this problem.

But I understand the issue, Senator. We will look at it very carefully, and we will work with you on this issue.

Chairman LEVIN. All right, because there is a question as to whether or not it pays us to terminate the cost to restart and whether those costs are not better.

General ODIERNO. I am not completely familiar with all the details of that, but I will certainly get back to you, Senator.

[The information referred to follows:]

The M1A1 SA remains one of the best tanks in the world, providing overmatch against known threats and digital command interoperability within the Heavy Brigade Combat Team formation. The Army does not plan to immediately replace this very capable and relatively young portion of the Abrams fleet. The Army National Guard began receiving the M1A1 SA tank in August 2008 and will complete fielding in June 2014.

The Army has a young Abrams fleet. By 2013, when the Army fully meets the Abrams tank requirement for the Heavy Brigade Combat Team, the average Abrams fleet age will only be 2- to 3-years-old. Because of this, the Army will not need to begin modernizing through recapitalization of the Abrams tank fleet until approximately 2016. Our analysis indicates that total costs would not exceed \$822 million for a 3- to 4-year shutdown and restart of Abrams tank production. These costs include the impact on the supplier base; government-furnished materiel; storage, preservation, manpower and equipment; re-qualifying vendors; a Production Verification Test and the impact to Anniston Army Depot. In comparison, maintaining a production rate of 70 tanks per year during fiscal years 2012–2016 will cost approximately \$2.67 billion.

Analysis of the most cost-effective approaches to sustain the required combat vehicle industrial base capabilities during the upcoming production gaps is ongoing. This analysis is expected to be complete by December 2011, and the results will help shape and begin to right-size the industrial base in an effort to maximize more cost-efficient capabilities within the industrial base.

Given that the Army can save approximately \$1.85 billion by shutting down and restarting production, the Army must stop Abrams tank production with the last M1A2 System Enhancement Program v2 tank delivery in June 2013.

I would be happy to have my staff provide an update to your office once this analysis is complete in order to provide you with the Army's plan for the Abrams tank and the industrial base.

Chairman LEVIN. Thank you.

This is for Admiral Winnefeld. Do you agree that missile defense systems should be operationally effective and cost effective and should be tested in an operationally realistic manner before deployment?

Admiral WINNEFELD. Yes, sir, I do. We are also in a simultaneous training test and development phase.

Chairman LEVIN. Finally for the admiral, you have experienced as the combatant commander responsible for the GMD system that currently provides protection of the Homeland against the threat of a limited missile attack from nations like North Korea and Iran. You also have experience working in a cooperative manner with Russian military officials.

If we could work out something in a cooperative manner with Russia on missile defense, that would enhance our security against common missile threats from Iran. Would you agree?

Admiral WINNEFELD. Yes, sir, absolutely.

Chairman LEVIN. Senator Lieberman?

Senator LIEBERMAN. Nothing more for me, thank you.

Chairman LEVIN. Gentleman, we are all in your debt, and the Nation is in your debt. We are in debt to your families. We thank you and them profusely. We will do this confirmation just as speedily as we can, given the U.S. Senate. You never know for sure, but I think all of us are pretty darn confident that it will happen very quickly.

Thank you. We will stand adjourned.

Senator LIEBERMAN. Hear, hear.

[Whereupon, at 12:18 p.m., the committee adjourned.]

[Prepared questions submitted to ADM James A. Winnefeld, Jr., USN, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. Previously you have answered the committee's policy questions on the reforms brought about by the Goldwater-Nichols Act in connection with your nomination to be Commander of U.S. Northern Command (NORTHCOM).

Has your view of the importance, implementation, and practice of these reforms changed since you testified before the committee at your most recent confirmation hearing?

Answer. No. I have served in various joint capacities throughout my naval career and witnessed first-hand the tremendous advancements this landmark legislation has created, not only among our Nation's military and civilian leadership, but as a whole within the joint services and interagency environment. As such, I do not see a need to change the provisions of this legislation.

Question. In your previous response to a question concerning whether you saw a need for modifications of Goldwater-Nichols in light of the changing environment, you indicated that you would "take a hard look at ways NORTHCOM does business to determine if changes in the legislation are warranted."

In light of your experience as Commander of NORTHCOM do you see any need for modifications to Goldwater-Nichols? If so, what areas do you believe it might be appropriate to address in these modifications?

Answer. I do not believe changes to Goldwater-Nichols are necessary at this time. However, if confirmed, I will remain alert to opportunities or shortcomings that might indicate that changes to the legislation are warranted.

DUTIES AND QUALIFICATIONS

Question. What recommendations, if any, do you have for changes in the duties and functions of the Vice Chairman of the Joint Chiefs of Staff as set forth in section 154 of title 10, U.S.C., and in regulations of the Department of Defense (DOD) pertaining to functions of the Vice Chairman of the Joint Chiefs of Staff?

Answer. None at this time.

Question. What background and experience do you possess that you believe qualifies you to perform the duties of the Vice Chairman of the Joint Chiefs of Staff?

Answer. It has been my honor to serve for 33 years in a diverse set of positions that I believe have prepared me to serve as Vice Chairman of the Joint Chiefs of Staff. I have experience on the Joint Staff and Navy staff; served as a joint, combined, and combatant commander; and have worked closely with Congress on a variety of issues. My technical background should be useful in my role, if confirmed, as the Chairman of the Joint Requirements Oversight Council (JROC). As the Director for Strategic Plans and Policy on the Joint Staff, I gained insight into the conduct of joint, combined, and international operations. In my current position as Commander of NORTHCOM and the North American Aerospace Defense Command (NORAD), I command forces in the execution of Homeland defense and civil support operations. In this position, I have seen first-hand the importance of the Total Force in defending our Nation's interests at home and abroad.

Question. Is there anything that you need to do to better prepare yourself to perform the duties of the Vice Chairman of the Joint Chiefs of Staff?

Answer. Although there are always opportunities for additional learning in advance of assuming a new position, I feel well-prepared to serve as the Vice Chairman of the Joint Chiefs of Staff.

RELATIONSHIPS

Question. Please describe your understanding of the relationship of the Vice Chairman of the Joint Chiefs of Staff to the following officials:

The Secretary of Defense.

Answer. The Vice Chairman performs the duties assigned to him and other such duties as may be assigned by the Chairman, with the approval of the Secretary of Defense. Additionally, in the absence or disability of the Chairman, the Vice Chairman acts as the Chairman and performs the duties of the Chairman until a successor is appointed or until the absence or disability ceases. These duties would include providing military advice to the Secretary of Defense. The Vice Chairman may also provide the Secretary of Defense advice upon the Secretary's request in his capacity as a military adviser.

Question. The Deputy Secretary of Defense.

Answer. The Deputy Secretary of Defense has been delegated full power and authority to act for the Secretary of Defense on any matters upon which the Secretary

is authorized to act. As such, the relationship of the Vice Chairman with the Deputy Secretary is similar to that with the Secretary.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Vice Chairman performs the duties assigned to him as a member of the Joint Chiefs of Staff and such other duties as assigned by the Chairman, with the approval of the Secretary of Defense. When there is a vacancy in the office of the Chairman, or during the absence or disability of the Chairman, the Vice Chairman acts as Chairman and performs the duties of the Chairman until a successor is appointed or the absence or disability ceases. If confirmed, I look forward to a close working relationship with the Chairman.

Question. The Under Secretary of Defense for Acquisition, Technology and Logistics (USD(AT&L)).

Answer. Title 10, U.S.C. and current DOD directives establish the Under Secretaries of Defense as the principal staff assistants and advisers to the Secretary regarding matters related to their functional areas. With particular regard to the USD(AT&L), the Vice Chairman serves on many deliberative panels focused on resource decisions, including the Deputies Advisory Working Group as its Vice Chair and as Chairman of the JROC. If confirmed, I look forward to working very closely with the USD(AT&L) on continuing improvements to the requirements process and providing senior-level focus on key acquisition programs.

Question. The Under Secretary of Defense (Comptroller) (USD(C)).

Answer. I recognize the importance of the Vice Chairman working closely with the USD(C) in appropriately managing and providing oversight of the budgetary and fiscal processes of the Joint Staff required to achieve the budgetary goals prescribed by the Secretary of Defense and Chairman of the Joint Chiefs of Staff.

Question. The Under Secretary of Defense for Policy (USD(P)).

Answer. With regard to the duties of the Vice Chairman as they relate to the USD(P), the Vice Chairman co-chairs the Policy and Strategy Committee, serves as a member of the Counter-proliferation Council, represents military interest in Inter-agency Affairs, and provides oversight and direction on behalf of the Chairman in areas such as use allocation and use of military forces. The Vice Chairman and USD(P) serve together on the Deputies Committee. If confirmed, I plan to have frequent interaction with the USD(P).

Question. The other Under Secretaries of Defense.

Answer. Within their assigned areas, Under Secretaries exercise policy and oversight functions and interact frequently with the Joint Staff. They may issue instructions and directive-type memoranda that implement policy approved by the Secretary. These instructions and directives are applicable to all DOD components. In carrying out their responsibilities, and when directed by the President and Secretary of Defense, communications from the Under Secretaries to commanders of the unified and specified commands are transmitted through the Chairman of the Joint Chiefs of Staff. If confirmed, I will work closely with the Under Secretaries of Defense.

Question. The Director of Cost Assessment and Program Evaluation.

Answer. Title 10, U.S.C., and current DOD directives establish the Director of Cost Assessment and Program Evaluation as a principal advisor to the Secretary of Defense and other senior officials of the DOD on cost assessment and program evaluation. If confirmed, I look forward to working closely with the Director under the auspices of the Vice Chairman's resourcing and requirements functions, as well as benefitting from the extensive and independent analysis provided by the Cost Assessment and Program Evaluation office towards making informed resourcing decisions.

Question. The Assistant Secretaries of Defense.

Answer. With the exception of the Assistant Secretaries of Defense for Public Affairs, Legislative Affairs, and for Networks and Information Integration, all Assistant Secretaries of Defense are subordinate to one of the Under Secretaries of Defense. In carrying out their responsibilities, and when directed by the President and Secretary of Defense, communications from the Under Secretaries to commanders of unified and specified commands are transmitted through the Chairman of the Joint Chiefs of Staff. If confirmed, I will work closely with the Assistant Secretaries in a manner similar to that of working with the Under Secretaries.

Question. The Secretaries of the Military Departments.

Answer. Title 10, U.S.C., section 165 provides that, subject to the authority, direction and control of the Secretary of Defense, and subject to the authority of the combatant commanders, the Secretaries of Military Departments are responsible for administration and support of forces assigned to unified and specified commands.

The Chairman, or Vice Chairman when directed or when acting as the Chairman, advises the Secretary of Defense on the extent to which program recommendations

and budget proposals of the Military Departments conform with priorities in strategic plans and with the requirements of the combatant commanders. The Vice Chairman has numerous interactions with the Service Secretaries in the various management forums within the Department. Finally, in his role as the Chairman of the JROC, the Vice Chairman has considerable interaction with the Service Secretaries' acquisition staffs. If confirmed, I look forward to a close and productive working relationship with the Service Secretaries and their staffs.

Question. The Chiefs of Staff of the Services.

Answer. The Service Chiefs serve two significant roles. First, they are responsible for the organization, manning, training, and equipping of their respective Services. Without the full support and cooperation of the Service Chiefs, no combatant commander can be ensured of the readiness of his assigned forces for missions directed by the President and Secretary of Defense. Second, as members of the Joint Chiefs of Staff, they are advisors to the Chairman and the Secretary of Defense as the senior uniformed leaders of their respective Services. The Service vice chiefs play a key role on the JROC, chaired by the Vice Chairman. If confirmed, I will work closely with the Service chiefs and their vice chiefs to fulfill the combatant commanders' warfighting and operational requirements and on other relevant policy matters.

Question. The Combatant Commanders.

Answer. The combatant commanders fight our wars and conduct military operations around the world. The Chairman provides a vital link between the combatant commanders and other elements of DOD and, as directed by the President, may serve as the means of communication between the combatant commanders and the President or Secretary of Defense. When there is a vacancy in the office of Chairman or in the absence or disability of the Chairman, the Vice Chairman acts as Chairman when interacting with the combatant commanders. Having served as a combatant commander, I have clear insight into the capabilities and limitations of combatant command (COCOM) staffs. If confirmed, I will work closely with the combatant commanders to enable their warfighting capabilities and provide other support as required.

MAJOR CHALLENGES AND PROBLEMS

Question. What are the major challenges that you see facing the Vice Chairman of the Joint Chiefs of Staff?

Answer. The principal challenge I will face, if confirmed, will be in assisting the Secretary of Defense and the Chairman of the Joint Chiefs of Staff in formulating their recommendations to the President regarding balancing the national security imperative of regaining our fiscal solvency against the national defense imperatives of winning our current fights and maintaining our ability to deter or defeat a broad spectrum of potential threats to our Nation's vital and important interests.

Our most important near term task is to ensure our service men and women deployed and in combat overseas—and their families and those who return wounded, ill, or injured—are supported to the best of our ability as a nation.

The spectrum of potential threats against which we must defend within an increasingly constrained budget environment includes:

- Violent extremism, which is the only threat that currently possesses both the capability and active intent to harm the United States and our allies and friends;
- Regional instability, including the uncertainty caused by recent turmoil in the Arab world, that could threaten the United States' or allies' vital or important interests or that poses a grave threat of human disaster;
- Self-alienated nations whose leaders view acquisition of weapons of mass destruction as an insurance policy for preserving their status and increasing their regional influence;
- Powerful states, to include those with strategic offensive capability, that could threaten the survival or vital interests of the United States or our allies;
- The growing threat of cyber attack against defense or civilian infrastructure posed by individuals and nations;
- Transnational criminal organizations (TCO) that produce serious corrosive effects within the United States and among our friends and allies; and
- The constant threat of natural and manmade disasters.

We must also work to ensure the American people maintain their connection to and support for our Armed Forces.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will work closely with the Secretary, the Chairman, the other Joint Chiefs, the combatant commanders, and other key national security officials to ensure our national defense remains strong by:

- Ensuring our service men and women in combat are fully and properly supported;
- Making appropriate recommendations when the use of U.S. military force is being contemplated;
- Contributing to policy discussions regarding the trajectories of threat capabilities and capacities, their implications for U.S. vital and important interests, and the relative priority, cost, posture, and temporal aspects of ensuring U.S. capabilities and capacities are able to defeat them;
- Continuing ongoing efforts to improve the requirements system—ensuring the combatant commanders are properly represented therein, among other imperatives—as well as ensuring the system is well-synchronized with budgeting and acquisition processes;
- Continuing the search for greater efficiency and effectiveness in the way we do business within the Department;
- Working collegially within the U.S. interagency to synchronize our efforts to advance the security interests of our Nation;
- Strengthening our relationships with our allies and friends; and
- Ensuring our families and wounded warriors are properly cared for.

As always, the national security leadership will need to make difficult choices. Thus, I intend to contribute to the collaborative and collegial approach that will be required—among what I view to be an exceptional group of Joint Chiefs, combatant commanders, and other stakeholders in the executive branch and Congress—to accomplish these difficult tasks in an increasingly constrained budget environment.

JOINT REQUIREMENTS OVERSIGHT COUNCIL

Question. As the Vice Chairman of the Joint Chiefs of Staff, if confirmed, you would be the Chairman of the JROC. The JROC has the responsibility to review and validate Service requirements.

Are there any recommendations that you would make to modify the JROC or its authority or the requirements process?

Answer. If confirmed, I will continue on the current trend in line with recent changes to the National Defense Authorization Act (NDAA) for Fiscal Year 2011 of empowering the combatant commanders in providing the warfighter a clear voice in the requirements process. Additionally, I would continue to streamline the Joint Capabilities Integration and Development System (JCIDS) to provide more informed decisionmaking of the JROC. Currently there are two requirements processes: Joint Urgent Operational Needs (JUONs) and JCIDS. The JUONs process provides the warfighter in combat a quick way to procure a system that prevents loss of life and critical mission failure due to direct enemy action. JCIDS is utilized for all other Joint acquisition systems—both long-term large and near-term small programs use the same requirements process. I believe we need to develop a system that better addresses the continuum of requirements and acquisition programs. It is my understanding that such a system is currently being designed, and if confirmed, I will continue that effort.

Question. During the confirmation of General Cartwright for the position of Vice Chairman, the committee asked him a variety of questions about problems, challenges, and recommendations for improvements in the requirements process and the workings of the JROC. General Cartwright emphasized his view of the importance of enhancing the role of the combatant commanders in the JROC beyond what was mandated in the Weapons Systems Acquisition Reform Act (WSARA) of 2009. Specifically, he recommended that the combatant commanders become members of the JROC, along with representatives from the offices of USD(P), USD(AT&L), and USD(C). He also suggested that the Vice Chairman be authorized to delegate authority to functional combatant commanders to approve certain specific types of requirements. Section 841 of the Ike Skelton NDAA for Fiscal Year 2011 makes changes to the JROC authorizing statute, based on General Cartwright's recommendations.

What are your views on General Cartwright's specific recommendations?

Answer. I fully support General Cartwright's specific recommendations that have been written into section 841 of the NDAA for Fiscal Year 2011.

Question. What are your views on the changes made by section 841?

Answer. As a currently-serving combatant commander, I am pleased with General Cartwright's recommendations that were written into section 841 to empower the combatant commanders in the requirements process. If confirmed, I will investigate

whether there is even more we can do in this regard, subject to the capacity and expertise of the combatant commander staffs to participate.

Question. What is your understanding of the status of proposed guidance to implement the changes made by section 841?

Answer. My understanding is that these changes have been fully implemented. On 26 April 2011, I sat on the JROC as a voting member specifically for an Initial Capability Document briefing in which my COCOM had specific interest.

Question. What are your views on the proposed guidance?

Answer. The combatant commander now has a clear voice in the requirements process with his vote on the JROC, though I acknowledge that it is not always easy for combatant commanders to participate. Also, adding the additional advisors to the JROC provides a wide breadth of expertise and experience. However, I believe we must continue to pursue ways to further include combatant commanders in the requirements process.

Question. General Cartwright was also asked about the role of the requirements process in the acquisition process after requirements have been initially approved and a program begins engineering and manufacturing development. General Cartwright noted that in 2007, the JROC established what he called a “trip-wire” process to “bring troubled programs back to the JROC for a review and to consider performance trade-offs to mitigate further cost growth and/or schedule delays before the program faced a Nunn-McCurdy review.”

To your knowledge, has this review mechanism been regularly employed on large programs that have experienced significant cost growth and schedule delays?

Answer. Yes, the first “trip-wire” review was conducted in 2007 and this mechanism has been used regularly for several defense programs. I personally observed, while attending a JROC meeting as the NORTHCOM Commander, this process in action in scrutinizing a troubled program. If confirmed, I will continue this practice.

Question. Has the JROC altered requirements, either for performance or procurement quantities, as a result of such reviews?

Answer. My understanding is that the “trip-wire” review forces an assessment of the relationship between requirements and program cost drivers, allowing the JROC to weigh the cost benefit of reducing a requirement to control cost growth. It is a maturing process as cited in a recent Government Accountability Office (GAO) report. My understanding is that a recent example where the JROC altered requirements is the Joint Tactical Radio System.

Question. WSARA required the Secretary of Defense to ensure that trade-off analyses are conducted on cost, schedule, and performance as part of the requirements development and approval process. Such analyses enhance the Department’s understanding of what performance factors are the critical ones driving costs and schedules.

In your view does the Joint Staff have the operations research expertise to determine where the cost “knees in the curve” lie for weapons systems performance?

Answer. Currently the Joint Staff relies on CAPE as an advisor to the JROC for their operations research expertise to determine where the cost “knees in the curve” lie for weapons systems performance. The Joint Staff then utilizes that data to determine proper tradeoffs regarding Key Performance Parameters (KPP). The ongoing review of JCIDS is addressing this and will provide recommendations on increased Joint Staff analytical expertise on cost, schedule, and performance considerations.

Question. In your view has the Department effectively integrated the operations research and cost estimating resources across the Joint Staff, the Office of Cost Analysis and Program Evaluation (CAPE), and the Office of the Under Secretary for Acquisition, Technology, and Logistics (OSD(AT&L)) to conduct these trade-off analyses?

Answer. It is my understanding that synergistic staffing between the Joint Staff, Office of the Secretary of Defense (OSD) CAPE, and OSD(AT&L) has been effective.

Question. What is your view of the modifications to the JROC process made by the Weapon Systems Acquisition Reform Act of 2009?

Answer. Implementation of a “trip-wire” process helps inform the JROC of critical cost growth of Major Defense Acquisition Programs. This enables the JROC to properly inform the Secretary of Defense of potential Critical Breaches. When there is a breach, these programs must report to the JROC for validation and to review program cost, schedule, and performance. I fully support these modifications, which have been codified into the JROC process.

Question. What additional steps do you believe that Congress or the Department should take to ensure that trade-offs between cost, schedule, and performance objectives for major weapon systems are made at an appropriately early point in the acquisition process?

Answer. It is my observation that the Department is already moving to make assessments of cost, performance, and technical readiness of weapon systems earlier in the acquisition process. I believe that the JROC should work to synchronize its decision points to better inform the acquisition milestone decisions. One course being considered is for the JROC to review Analysis of Alternatives (AOA) from major defense acquisition programs and provide advice to the milestone decision authority in support of milestone A. This also addresses a key recommendation made in a recent GAO report.

Question. Are there any other recommendations that you would make to modify the JROC or its authority or the requirements process?

Answer. I believe the changes in the Ike Skelton NDAA for Fiscal Year 2011 captured several positive changes to the JROC and should be allowed to mature for a period of time to assess the implementation of those changes. If confirmed, I will remain alert to opportunities to improve this process.

Question. How would you assess the effectiveness of the JROC in the DOD acquisition process?

Answer. I believe the JROC is an effective partner with OSD in the acquisition process. Through participation in many common forums, such as the Defense Acquisition Board and the Deputies Advisory Working Group, JROC members are able to identify disconnects early and make the necessary course corrections.

Question. What is your vision for the role and priorities of the JROC in the future?

Answer. First and foremost, if confirmed, I will continue to ensure the warfighter's voice is heard and supported in the requirements process. Additionally, as we move into a period where it appears there will be great downward pressure on the defense budget, I believe the JROC and joint requirements process will need to play a key role in prioritizing what capabilities are most important to the Department. This will enable the JROC to make informed decisions to ensure the Department's most important warfighting capabilities remain intact. I also believe we must do a better job of controlling requirements creep within programs, and that tight synchronization between requirements, budgeting, and acquisition will become even more important in the coming years.

Question. Do you believe the JROC process is sufficient to understand and identify where there are opportunities for multi-Service collaboration or where programs could or should be modified to take advantage of related acquisition programs?

Answer. Recent implementations of the NDAA for Fiscal Year 2011 have provided a broader look into current programs and future collaboration, not only among Services but between COCOMs. There is always room for improvement, but generally I believe the JROC is effective in ensuring collaboration among the major stakeholders.

Question. What principles guide your approach to inviting, and helping ensure the sufficient participation of other stakeholders in the JROC?

Answer. I believe transparency and honesty are crucial to the effective determination of joint requirements in order to meet warfighter needs. If confirmed, I will fully support the recommendations made by General Cartwright, to include advice from any organization with a stake in the requirements being validated.

JOINT CAPABILITIES INTEGRATION AND DEVELOPMENT SYSTEMS

Question. There have been longstanding concerns about the lack of flexibility and responsiveness within DOD's complex process of addressing the needs of the warfighters. Recently, GAO reported that the JCIDS has evolved to provide many opportunities for combatant commanders to express their capability gaps, but that combatant commanders are frustrated with the lengthy, staff intensive advisory process that results in investments driven by Service priorities.

As a combatant commander, what is your perspective on the responsiveness of the JCIDS process in addressing joint capabilities needs?

Answer. JCIDS is a deliberate requirements process, designed to be analytical to ensure Service proposals are aligned with Joint Concepts of Operations and strategic guidance. It is also designed to ensure the Department complies with applicable laws by fully supporting acquisition and budgetary processes.

As concept of operations and missions have rapidly evolved to support the current security environment, and as acquisition and budget processes were adjusted to be more responsive to urgent warfighter needs, a parallel requirements process (supporting acquisition of JUONs) was created to ensure joint needs were met in the short term (preventing loss of life or mission failure).

I have experienced frustration as a combatant commander in being caught between these two processes. However, the Joint Staff in this case proved to be very

responsive in accelerating the JCIDS process to meet my needs, though final resolution of my requirement is pending. As stated above, the Joint Staff, with inputs from all COCOMs and Services, continues to make adjustments to both processes based on inputs from users, lessons learned, and changes in law, to ensure responsiveness to critical joint capabilities needs. I believe the ongoing JCIDS review will provide solid recommendations to improve the responsiveness and decision support to the JROC, COCOMs, Services, and Defense Agencies.

Question. What level of involvement in the joint requirements process and the JROC do you believe is appropriate for the COCOMs?

Answer. COCOMs continue to play an important role in the requirements process. They have always been able to act as a sponsor, identifying capability gaps for consideration by the JROC for validation. COCOMs have always had an open invitation to attend and participate in any JROC meeting, to ensure their equity was considered on any subject.

Since the changes mandated by the Weapon System Acquisition Reform Act, and the changes in the structure of the JROC mandated by the 2011 NDAA, the COCOMs' role on the JROC is now equivalent to that of a Service. Because of this, the COCOM voice is able to be heard in all levels of the joint requirements process. The expansion of the COCOM role, and the active participation of COCOM commanders in the JROC, is completely appropriate, and I applaud the work General Cartwright has done to bring this to fruition.

However, I believe the COCOMs still have work to do to grow into this role, as their limited capacity and expertise, as well as limited senior officer bandwidth, makes it challenging to fully participate in this process. If confirmed, I will search for ways to not only provide the rule set that permits COCOM participation, but to provide the means for them to do it. I believe this is the next step in improving this process.

Question. Section 862 of the Ike Skelton NDAA for Fiscal Year 2011 directs the GAO to evaluate the advantages and disadvantages of designating a COCOM to provide a Joint Evaluation Task Force to participate in the development of a material solution for a new requirements document.

Do you think that such a Joint Evaluation Task Force would improve the dialogue between COCOMs and the Services' acquisition communities? Why or why not?

Answer. I believe that the current requirements process already provides a mechanism for joint dialogue between COCOMs and acquisition communities. The challenge is not in establishing a process, it is in enabling COCOMs to participate in it. My concern is that establishment of a Joint Evaluation Task Force may result in an additional layer of coordination and staffing between the existing requirements and acquisition processes, further delaying the identification of capability gaps and the subsequent fielding of systems addressing those gaps.

Question. What additional steps do you think need to be taken to improve coordination and better integrate the warfighters into a requirements development process that is controlled by the Services?

The process known as the Senior Warfighter Forum (SWarF), led by the COCOM Vice Commanders, provides a consolidated COCOM voice in prioritizing the attributes of capability needs in identified mission areas. An additional step that is being recommended as part of the ongoing JCIDS review is to formalize the SWarF process to better inform JROC decisionmaking to further integrate and coordinate requirements efforts of services and COCOMs.

Question. As Vice Chairman of the Joint Chiefs of Staff, General Cartwright directed the Joint Staff to begin an effort to overhaul the JCIDS process to make it more responsive to warfighter needs, have a stronger voice, and to develop a methodology for setting investment priorities across the Department.

Do you think that JCIDS needs to be changed? If so, what are your views on the how it could be improved to make the process more responsive to users' needs while efficiently investing resources in a fiscally constrained budget environment?

Answer. Yes, JCIDS continues to change as the agencies that support it (Services, COCOMs, Joint Staff), and that it supports (acquisition and budgeting) continue to evolve. The work that has been going on since last summer has produced several significant recommendations to revise the joint requirements process. These recommendations take into account recent efficiencies gained by the disestablishment of U.S. Joint Forces Command, the Joint Staff J-6, and the office of the Assistant Secretary of Defense for Network Integration and Information (ASD/NII), as well as the changes ongoing in the acquisition community with the revision of the DOD Directive 5000.02.

The fundamental idea behind JCIDS—that is, to assist the JROC in identifying and assessing joint military capability needs—will not change. The process used by the Joint Staff, and the content of the submissions, will move away from a docu-

ment-centric toward a data-centric model, with more time spent on analysis of the risks associated with cost, schedule, and performance considerations to meet the urgency of the requirement. Staffing time and redundancy will be significantly reduced. It will also enable the JROC to make a better informed decision on the validation and prioritization of joint military requirements.

Question. How do you envision your role, if confirmed, as the Chairman of the JROC?

Answer. The Vice Chairman, as JROC Chairman, co-chairman of the Deputies Advisory Working Group, and a member of the Defense Acquisition Board, is the only person who sits at the intersection of both requirements and acquisition processes at the executive level. The JROC controls the requirements process through exercise of their validation authority. The JROC Chairman, therefore, must ensure the needs of the warfighter are met within the fiscal constraints placed on the Department.

Question. What are your thoughts on the need for a joint force model to guide the development of requirements by each of the Services and the fielding of capabilities?

Answer. Our move from threat-based planning to capabilities-based planning has enabled a joint assessment of capabilities that are interoperable and supportable across the joint force. Requirements are based on strategic guidance, which is constantly being revised to meet the current and anticipated threat. Services, as the principal sponsors of requirement submissions, identify capability gaps that are aligned with strategic guidance. The current capabilities-based planning model is sound, yet is it prudent that we continue to review the model to ensure our highest priority joint military requirements are being fielded to meet the needs of our joint force.

Question. The requirements development process is not a stand-alone process, but instead is required to work collaboratively with the acquisition and budgeting processes.

What steps are needed to better align the requirements development process with the acquisition and budgeting processes to make for a more efficient and effective process for delivering capabilities?

Answer. It is my understanding that the ongoing JCIDS review evaluated several areas for improvement, and the Joint Staff has been working together with the Office of the Secretary of Defense for Acquisition, Technology, and Logistics (OSD/AT&L) to implement these improvements.

The implementation of expanded requirements manager certification training, through courses designed and conducted by the Defense Acquisition University, ensures responsible managers from both the requirements and acquisition communities have a common understanding of the needs of both processes, an awareness of the touch points between the two communities, and can work together effectively.

The move to a data-centric requirements generation model, partly facilitated by the creation of Capability Development Tracking and Management software, was mandated on 30 June of this year. This has the potential to provide acquisition communities greater visibility of requirements earlier in the process.

Another recommendation from the JCIDS review is for Joint Staff requirements experts to advise the Director of Cost Assessment and Program Evaluation (OSD/CAPE) and the OSD/AT&L by conducting a Joint Staff review of the results of the AOAs to better inform the Milestone "A" acquisition decision. This will facilitate a better competitive prototyping strategy and allow a joint assessment of AOA results prior to the establishment of KPP.

Question. How soon do you anticipate that reforms to the JCIDS could be implemented?

Answer. It is my understanding that some improvements to JCIDS have already been implemented and final recommendations will be approved in the coming months. We anticipate implementation of major reforms by the end of this year.

Question. Do you anticipate that the drawdown of U.S. combat forces in Iraq and Afghanistan will affect efforts to overhaul the system, and if so, how?

Answer. I do not anticipate that changes in existing force deployment levels will significantly affect the reforms to the joint military requirements process.

ACQUISITION REFORM AND ACQUISITION MANAGEMENT

Question. What is your view of the changes made by the Weapon Systems Acquisition Reform Act of 2009?

Answer. I fully support the changes made in the Weapons Systems Acquisition Reform Act, and if confirmed, will work to implement any necessary changes in the requirements process.

Question. What role have you played, and do you expect to play, if confirmed, in the implementation of that Act?

Answer. I have played no direct role in the act's implementation in the billets I have held since its passage. However, I have read the act and fully support it—if confirmed, I will work within the authority vested in the Chairman of the JROC to implement any changes to the requirements process necessary to support implementation of the act.

Question. What role, if any, do you believe the JROC should play in the oversight and management of acquisition programs after requirements have been established?

Answer. I believe the JROC should continue to monitor acquisition program execution to identify areas where requirements may drive cost growth and schedule delays. The JROC should play a key role in determining the appropriate balance between the performance of weapons systems and the resources needed to develop and procure them.

Question. What role if, any, do you believe the JROC should play in reviewing the progress of major defense acquisition programs or other acquisition programs?

Answer. I believe the JROC should continue to review the progress of major defense acquisition programs and other programs of joint interest to fulfill its role in achieving appropriate balance between capability, schedule, and cost.

Question. Do you see a need for any change in the role of the Chairman or the Vice Chairman of the Joint Chiefs of Staff in the requirements determination, resource allocation, or acquisition management processes?

Answer. Not at this time.

Question. What is your view of the role played by Configuration Steering Boards in preventing cost growth due to requirements creep?

Answer. I believe the Configuration Steering Boards are still maturing, but are increasingly providing a forum that promotes control of requirements and cost growth.

Question. What do you see as the proper relationship between Configuration Steering Boards and the JROC in managing requirements for acquisition programs?

Answer. In my view, when the Configuration Steering Board recommends adjusting requirements in order to mitigate cost or schedule growth, the requirements community should consider the impact of the adjustment and provide guidance in support of the recommendations that balances the priority of the requirement with the program cost and schedule.

Question. What is your view of the Nunn-McCurdy requirements for Major Defense Acquisition Programs that fail to meet cost, schedule, and performance objectives?

Answer. I support the Nunn-McCurdy requirements. I believe they force the Department to take a critical look at poor performing programs and reassess the path to achieving valid warfighter needs.

Question. What do you see as the proper relationship between the JROC and those DOD officials charged with implementing the Nunn-McCurdy requirements?

Answer. I believe the role of the JROC as military advisor to the Milestone Decision Authority is appropriate when assessing Nunn-McCurdy breaches.

URGENT NEEDS PROCESSES

Question. Section 804 of the Ike Skelton NDAA for Fiscal Year 2011 requires DOD to develop a comprehensive approach for managing all of its various urgent needs processes that would, among other things, define roles, responsibilities, and authorities, and designate a senior-level focal point for urgent needs.

Do you agree that DOD should develop DOD-wide guidance that better defines roles, responsibilities, and authorities and designates a senior-level focal point for urgent needs?

Answer. Yes, and I am aware that efforts are underway to address those concerns. The Department has recently made positive steps in addressing JUONs with the establishment of the warfighter Senior Integration Group (SIG) co-chaired by the USD(AT&L) and the Joint Staff J3. This group is providing a streamlined and tightly integrated approach to expedite the resolution of issues associated with rapid fielding to include requirements, funding, acquisition, sustainment, and performance. The JUONs process has been very successful in recent years in providing much needed capability to our warfighters, and the process is continuously being improved.

Question. In your view, what specific steps should the Department take to better manage the joint urgent needs process?

Answer. I believe the Department should continue to streamline the urgent needs process to quickly respond to urgent needs. Establishment of the SIG is a positive step and Joint Staff refinements to the validation process will continue to enhance the Department's support to the warfighter.

I also believe we should continue to build a process that bridges the gap between urgent needs and the formal JCIDS process. Many requirements are not urgent enough to require the full court press of a JUONs process, but should be subject to the same process that establishes requirements for and procures a large weapons system.

Question. What is your sense of where the DOD might consolidate urgent needs entities and/or processes and how cost savings could be achieved through such consolidation?

Answer. I believe that the warfighter SIG has the potential to become DOD's permanent oversight body of Urgent Operational Needs (UON). This has potential for significant cost savings since the SIG can monitor the Services and various agencies to minimize the duplication of effort on urgent needs.

Question. Do you believe that the Joint Staff should take steps to integrate the Joint Urgent Needs process with the individual Services' processes? If so, please explain?

Answer. I believe it is important that the distinction between Service UONs and JUONs remain in place so that the combatant commander has an effective channel to ensure joint warfighter needs are promptly addressed. Execution of Service UONs and JUONs are already largely an integrated process as, both requirements generally flow to directorates with the requisite expertise to resolve all urgent needs.

NUCLEAR WEAPONS COUNCIL

Question. If confirmed as Vice Chairman of the Joint Chiefs of Staff, you would serve as a member of the Nuclear Weapons Council (NWC).

What would your priorities be for the NWC?

Answer. Sustaining a safe, secure, and effective nuclear arsenal is a key priority in the 2010 Nuclear Posture Review (NPR), central to the responsibilities of the NWC. If confirmed, I will work with the members to review the NWC work plan and execute it in accordance with the President's guidance in the NPR.

I will also work with the members of the NWC to pursue sound Stockpile Management for extending the life of U.S. nuclear weapons, ensuring a safe, secure, and effective deterrent.

Additionally, I will work with NWC members to ensure the modernization of our aging nuclear facilities and investment in human capital, to enable a substantial reduction to the number of nuclear weapons that need to be retained as a hedge against technical or geopolitical surprise, to accelerate dismantlement of retired warheads, and to improve our understanding of foreign nuclear weapons activities.

Question. What changes if any would you recommend to the organization, structure, or function of the NWC?

Answer. U.S.C., title 10, section 179, sets forth the organization, structure and function of the NWC. I have no recommendations at this time. However, if confirmed, I will work with the NWC chairman and members to assess the organization, structure and function of the NWC, and where warranted, provide recommendations for change to increase effectiveness and value in support of the nuclear mission for national security.

LEGISLATIVE GAPS IN DEFENSE SUPPORT TO CIVIL AUTHORITIES

Question. The Department continues to lack statutory authority to order Army, Navy, Air Force, and Marine Corps Reserve personnel to Active Duty in order to provide support in response to a natural disaster. Despite determined efforts by you, as Commander, NORTHCOM, and the Council of Governors to address concerns of State Governors about operational control of Federal forces during naturally causes emergencies, no resolution that would facilitate a legislative change has been achieved.

From a contingency planning perspective, how necessary, in your view, is modification of title 10, U.S.C., to allow reservists involuntarily to be called to Active Duty to respond to natural disasters?

Answer. I believe it is important for DOD to be able to plan for and access title 10 Federal Reserve capabilities to ensure adequate speed, capability, and capacity in responding to natural disasters in support of the American people. Title 10 Federal Reserve Forces possess significant capabilities to mitigate the effects of major disasters or emergencies, whether natural or manmade. Federal Reserve Forces are geographically dispersed throughout the Nation and are often located closer to the incident site than Active-Duty Forces. A high percentage of skill sets and capabilities needed during response to natural disaster is contained in the Federal Reserves.

Question. What is the current status of negotiations with State Governors, and what unresolved issues remain that stand in the way of an agreement?

Answer. In the 2009 NDAA, Congress recommended that DOD “engage with the community of governors to work out an understanding of unity of effort during domestic terrorist events and public emergencies.” The President established a Council of Governors in 2010 to address this and other issues. The Council has already made important progress in approving a concept that provides dual chains of command to ensure unity of effort in response to disasters.

Proposed legislation to address access to the Federal Reserve Forces has been a priority topic of discussion in the Council over the past year. The members of the Council have worked hard to ensure we get the language right.

Based upon the 17 July 2011 Council of Governors meeting that I attended in Salt Lake City, I believe there are no more unresolved issues. My understanding is that there is now full concurrence among the Council, the Department of Homeland Security, and the DOD for the National Governors Association regarding language to recommend to Congress for inclusion in NDAA for Fiscal Year 2012.

Question. If confirmed, what role, if any, would you play in ensuring the Department addresses what is clearly a significant vulnerability?

Answer. If confirmed, I look forward to the opportunity to continue to support the Council of Governors and the Assistant Secretary of Defense for Homeland Defense and Americas’ Security Affairs as they finalize work on a legislative proposal to gain access to Federal Reserve Forces for domestic incidents that can increase the speed of response and deliver necessary capabilities to our citizens in need. I believe we are close to positive resolution of this matter.

HOMOSEXUAL CONDUCT POLICY

Question. The “Don’t Ask, Don’t Tell Repeal Act of 2010,” enacted on December 22, 2010, provides for the repeal of the current DOD policy concerning homosexuality in the Armed Forces, to be effective 60 days after the Secretary of Defense has received the DOD’s comprehensive review on the implementation of such repeal, and the President, Secretary, and Chairman of the Joint Chiefs of Staff certify to the congressional defense committees that they have considered the report and proposed plan of action, that DOD has prepared the necessary policies and regulations to exercise the discretion provided by such repeal, and that implementation of such policies and regulations is consistent with the standards of military readiness and effectiveness, unit cohesion, and military recruiting and retention.

What is your view on repealing the current DOD policy?

Answer. I support repeal of the Don’t Ask, Don’t Tell policy in the manner that the repeal has been crafted. I believe the Armed Forces are prepared to implement the repeal of 10 U.S.C. 654, consistent with the Don’t Ask, Don’t Tell Repeal Act of 2010 (Public Law 111–321). I have expressed to the Chairman of the Joint Chiefs of Staff in writing that NORTHCOM is prepared for implementation.

Question. What effect do you anticipate the repeal will have on readiness and discipline in the Armed Forces?

Answer. We have the policy and regulations needed for implementation, consistent with standards of military readiness, military effectiveness, unit cohesion, and recruiting and retention. I am confident that we are ready now to affect repeal while sustaining military effectiveness, even in our current conflicts.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. The Department has in recent years developed comprehensive policies and procedures to improve the prevention of and response to incidents of sexual assaults, including providing appropriate resources and care for victims of sexual assault. However, numerous incidents of sexual misconduct involving military personnel in combat areas of operation and at home stations are still being reported. Victims and their advocates claim that they are victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate treatment for the victim. Despite the leaders’ commitment to “zero tolerance,” the view is held by some that the Department has not done enough to provide the resources and policies needed to prevent sexual assaults.

Do you consider the current sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Answer. I believe current policies and programs designed to address sexual assault have allowed the Department to both care for victims and hold offenders accountable. That said, I believe that, until no sexual assaults occur within our forces, we should continue to look for ways to improve the system.

Question. What problems, if any, are you aware of in the manner in which confidential reporting procedure has been put into operation?

Answer. I am not personally aware of any problems in the implementation of the restricted reporting option. Confidential reporting allows victims who wish to remain anonymous to obtain the support they need following an assault. I will remain alert and receptive to reported flaws in the program and support taking prompt action to improve the system.

Question. What is your view of the steps the Services (including the Reserve components) have taken to prevent and respond to sexual assaults in combat zones, including assaults against contractor personnel and assaults by foreign nationals?

Answer. No sexual assault is acceptable anywhere in our Armed Forces, whether deployed or not. I believe the Services have procedures in place to address the challenges of preventing and responding to sexual assaults in an operational environment to include working with host governments and our international partners. Every effort is made to take care of all victims and hold offenders accountable. However, as I stated above, until no sexual assaults occur within our Armed Forces, we should continue to look for ways to improve prevention and response.

Question. What is your view of the adequacy of the training and resources the Services have in place to investigate and respond to allegations of sexual assault?

Answer. Our investigators and first responders are well trained. All Services recently enhanced their resources for investigating and prosecuting sexual assault cases.

Question. What do you see as the most difficult problems commanders must contend with in holding assailants accountable for their acts?

Answer. I believe building and maintaining victim confidence to assist in the investigation can often be difficult for commanders trying to take appropriate command action against assailants. Commanders are also frequently confronted with the challenge that alleged sexual assaults are also often accompanied by other lesser misconduct on the part of both the victim and the alleged assailant that is easier to prove than sexual assault.

Question. If confirmed, what actions will you take to ensure senior level direction and oversight of efforts to prevent and respond to sexual assaults?

Answer. Senior leadership focus on this important topic is critical. If confirmed, I will work closely with the Chiefs to monitor progress in eradicating sexual assault in the military.

ACTIVE-DUTY END STRENGTH

Question. Former Secretary of Defense Gates announced this year that the Army would reduce its end strength by 22,000 through fiscal year 2013, including 7,400 in fiscal year 2012. This end strength was part of the temporary increase authorized in 2009 and was intended to more fully fill out the existing force structure. Beginning in fiscal year 2015, depending on conditions on the ground, the Army and Marine Corps plan to reduce their permanent end strength and force structure by 27,000 soldiers and at least 15,000 marines, respectively.

Does the foregoing statement accurately reflect current planning?

Answer. The statement appears to be consistent with remarks made by Secretary Gates. It is also my understanding that the Army and the Marine Corps need a bit more time to confirm these projected personnel numbers and the timeframe for their implementation, particularly for the out-years.

Question. How would you describe the risk in adhering to these reductions?

Answer. Given current trends in Iraq and Afghanistan, including reduced demand for ground forces in Iraq, the risk is manageable, but dynamic. This process will require careful monitoring and potential management flexibility during the drawdown.

Question. Can the Army accelerate to 2012 more of its planned reduction in its temporary overstrength?

Answer. Though I currently do not have the information I need in order to reach a firm conclusion, I believe it would be difficult to accelerate a reduction in ground forces prior to concluding the Afghan campaign. Accelerated reductions would likely increase the stress on the force and could introduce unacceptable risk to other COCOMs that have ground force requirements. If confirmed, I will pay close attention to the pace at which force structure changes are planned for our ground forces.

Question. What are the assumptions regarding "conditions on the ground" that will allow for the planned reductions beginning in 2015 to occur on time?

Answer. In general, I would expect such a decision to depend to a significant degree on our assessment of progress against security objectives in specific theaters and the elements of key strategic decisions regarding potential future contingencies as 2015 approaches. I would solicit the advice of our combatant commanders and

DOD's senior military and civilian leaders to inform my recommendations on such decisions.

Question. The Navy and Air Force, while not currently facing the same level of planned reductions in their Active Duty end strengths in the coming years, are concerned about exceeding their end strength authorizations due to higher than expected retention. Consequently, both Services are seeking force management tools that require congressional authorization and relying on involuntary separations to reduce their forces.

What tools do the Department and the Services need to get down to authorized strengths by the end of this fiscal year, and which of these require congressional authorization?

Answer. I understand that some of the authorities used during previous force reductions have expired or are expiring soon. DOD is seeking to renew these authorities and is requesting new legislation to size and shape the force. My view is that DOD should make maximum use of voluntary authorities; however, great care should be taken to ensure those who leave are not going to be needed in the near term. If confirmed, I will study this issue closely and rely on the advice of both civilian and military professionals within DOD.

RESERVE COMPONENTS AS AN OPERATIONAL RESERVE

Question. What is your understanding and assessment of the Reserve components as an Operational Reserve, as opposed to its longstanding traditional role as a Strategic Reserve?

Answer. Sustained engagement in combat operations has transformed the Reserve components of our Armed Forces from a purely strategic force to one that also provides operational, full-spectrum capabilities to the Nation. Repeated combat deployments, as well as peacekeeping, humanitarian relief, and Homeland defense missions, have produced a force more operationally capable and experienced than any time in our Nation's history. Given sufficient predictability of the "next" deployment, the vast majority of Reserve component forces and capabilities can be accessed systematically long into the future. National Guard and Reserve members expect to deploy periodically to meet the Nation's security needs, and all have volunteered to remain a part of the force with this "new normal." This operational force is a direct result of the substantial investment in resourcing commitments and the personal sacrifice of members, their families, and their civilian employers. I expect that as budget pressures tighten, the Reserve component role will evolve along with that of the Active component in a strategy-driven process, which could alter the current shape of the Reserve component in ways not yet clearly understood.

Question. In your view, what are the major challenges to maintaining and enhancing the National Guard and Reserves as a relevant and capable Operational Reserve?

Answer. Two key challenges that come to mind are access to the Reserve components and sustained funding for their operation. Since September 11, the Department has relied on the provisions of the Presidential Declaration of National Emergency to gain involuntary access to the Reserve components. This declaration must be extended annually for the provisions to remain in effect. The Reserve component is no longer considered a solely strategic capability to call upon in a national emergency. Therefore, to ensure continued access, I understand that DOD is working with the Armed Services Committees within the 2012 NDAA to enable and facilitate periodic and recurring use by granting the Secretaries limited mobilization authority for up to 365 days for non-named contingency operations. This would better satisfy Joint Force Commanders' requirements.

In addition to access, and depending on available resources, the Department will need to program sufficient resources to use the Reserve component on a predictable and periodic basis to meet requirements, preserve readiness gains, avoid snapping back to a purely Strategic Reserve, and capitalize on cost efficiencies inherent in Reserve component employment. As an operationally experienced and capable force, requiring only a small portion of defense funds, the Reserve components can provide solid solutions to the significant fiscal challenges our military and our Nation face.

Question. What are your views about the optimal employment in generating forces for combat missions of the National Guard and Reserve?

Answer. We've seen a significant change in Reserve component use over the past 20 years and have developed a Total Force—Active, National Guard, and Reserve—to meet sustained combatant commander requirements around the globe. This evolution, combined with the current era of conflict and the broad range of security challenges on the horizon requires us to make smart decisions about Total Force capabilities and capacities to make sure we have the forces needed to defend and ad-

vance our national interests. To that end, the Secretary of Defense directed a Reserve component front end assessment that will inform the 2013 Program Budget Review and should be completed in September. I would want to read that assessment before making any firm commitments. I believe those findings, combined with recommendations articulated in the Department's Comprehensive Review of the Future Role of the Reserve component, will present and shape optimum mix and employment models for our Total Force.

Question. In your view, should Homeland defense or other global or domestic civil support missions be assigned exclusively to the National Guard?

Answer. No, I believe each component of the Total Force—Active, Guard, or Reserve—has an important, layered, and interdependent role in the successful execution of Homeland defense and civil support missions.

NATIONAL GUARD

Question. What is your understanding and assessment of changes in the global and domestic roles and mission of the Army National Guard, the Air National Guard, and the National Guard Bureau?

Answer. The roles of the Army National Guard, Air National Guard, and the National Guard Bureau in domestic missions have not changed over the last few years. The National Guard continues to be the first military response to a community-based event. Meanwhile, the National Guard has performed exceptionally well in our conflicts overseas during the past 10 years, and is a combat-seasoned force.

If confirmed, I look forward to participating in the discussion of how the National Guard will evolve its dual role of supporting domestic missions while remaining a relevant contributor to global missions in support of an evolving national military strategy.

Question. What is your assessment of the effect, if any, of increasing the grade of the Chief of the National Guard Bureau to General (O-10)?

Answer. From my experience as Commander, NORTHCOM, I believe elevating the grade of the Chief of the National Guard Bureau (NGB) to the rank of General has proven to be the right decision. In my current capacity, I have benefitted from being able to interact with a four-star officer leading the NGB, and we have formed a solid partnership. The National Guard is an indispensable component of the operational military and the Chief serves as a bridge for the States to the Federal Government and the Active components of the military.

Question. In your view, should there be a requirement that the position of Commander, NORTHCOM or Commander, U.S. Army North, the Army component commander, be filled only by a National Guard officer? Please explain.

Answer. While I absolutely welcome the possibility that a National Guard officer could be assigned to either position, I do not believe there should be a mandated requirement for either position to be filled by a National Guard officer. I believe the best-qualified officer, regardless of status as Active, Guard or Reserve, should be selected as Commander, NORTHCOM and Commander, U.S. Army North.

Question. In your opinion, should the Chief of the National Guard Bureau be a member of the Joint Chiefs of Staff?

Answer. I have developed a strong relationship with—and am a big believer in—America's National Guard and I would, if confirmed, give such a change the serious consideration it deserves. Although, like the Commandant of the Coast Guard, the Chief of the National Guard Bureau already attends most meetings of the JCS, I do see potential advantages to this initiative, to include bringing his unique insights more formally into this forum. However, before making such a recommendation, I would want to gain a better understanding of its implications, to include: what it means for the rest of the Reserve component and whether they would feel disempowered, how it would affect the existing balance on the Joint Chiefs or would be redundant, whether other organizations with a title 10 role would subsequently require full membership, the potential implication that the National Guard would evolve into separate Services, and other implications of which I may not yet be aware.

Question. What steps need to be taken, in your view, to ensure that a “deep bench” of National Guard general officers is continually being developed?

Answer. I believe there should be more joint education and training opportunities for National Guard general officers. Additionally, I am encouraged by the Air Force's recent elevation of the 1st Air Force/Air Forces Northern Commander position to three stars and filling it with an Air Guard officer. I support reestablishing the three-star position of Vice Chief of the National Guard in order to develop National Guard lieutenant generals for promotion. As Commander of NORTHCOM and NORAD, I have benefitted by having National Guard officers assigned to my head-

quarters, which has surely contributed to their development, and I would encourage expansion of this program. The program under which we temporarily bring National Guard general officers into NORAD and NORTHCOM headquarters to fill in for Active Duty officers attending the CAPSTONE senior officer course has been a major success. If confirmed, I will continue to seek opportunities to grow and develop our bench of National Guard officers.

WOMEN IN THE MILITARY

Question. In the past year, the Navy has opened on submarines to women, the Marine Corps has expanded opportunities for women in intelligence specialties, and the Army is reviewing its assignment policy for female soldiers. The issue of the appropriate role of women in the Armed Forces is a matter of continuing interest to Congress and the American public.

Do you believe additional warfare specialties currently closed to women members should be opened for by women?

Answer. I have always believed in opening the door to additional roles for women in the Services. Current policies provide DOD sufficient flexibility under current law to make changes to assignment policy for women. I believe the Services should continue to assess their combat needs in order to make those determinations and notify Congress accordingly as required by statute (10 U.S.C., § 652 and/or § 6035).

Question. Do you believe any changes in the current policy regarding women in combat are needed or warranted?

Answer. It is my understanding that the Department's policies and practices that restrict assigning female members are being reviewed at this time as mandated by section 535 of the NDAA for Fiscal Year 2011. I would want to have access to the facts from that review before making a recommendation.

RISING COSTS OF MEDICAL CARE

Question. In testimony presented to Congress in February 2009, the Assistant Director of the Congressional Budget Office asserted that "medical funding accounts for more than one-third of the growth projected for operations and support funding between 2009 and 2026." In April 2009, then Secretary of Defense Gates told an audience at Maxwell Air Force Base that "health care is eating the Department alive."

What is your assessment of the long-term impact of rising medical costs on future DOD plans?

Answer. The continuing cost growth trend will pose a greater problem for the Department the longer it remains unresolved. Rising costs of medical care will require the Department to balance the costs of the health care system against risks in warfighting capability. This may either require increased strategic and military risk or the acceptance of changes in the system of health care.

If confirmed, I will help to ensure the health care system is flexible, efficient, and cost-effective to meet the requirements of the Military Departments, Services, and combatant commanders to achieve our military objectives. I will also consider the critical importance of the medical system for our people—military members, retirees, and their families.

If confirmed, I look forward to continuing our efforts with Congress and DOD to find effective ways to improve the cost-effectiveness of the Military Health System.

Question. If confirmed, what actions would you initiate or recommend to mitigate the effect of such costs on the DOD top-line?

Answer. The rising cost of health care is clearly an issue we need to work and will require the close support of Congress. Based on my current position, I do not have any specific initiatives in mind at this time. However, if confirmed, I will support the Secretary of Defense as he works with both the health care leadership of the Department, the health care industry, and veterans groups to examine new ways to ensure military beneficiaries are provided the highest quality care possible while managing cost growth. Although this may require some adjustments to the program, I will keep in mind the critical importance of the medical system for our people—military members, retirees, and their families. It is especially important that we provide the most advanced system of care possible in our combat theaters and provide for our forces who are returning with both "seen" and "unseen" combat injuries.

Question. What reforms in infrastructure, benefits, or benefit management, if any, do you think should be examined in order to control the costs of military health care?

Answer. If confirmed, I will assist the Secretary of Defense, as he leads the Department's ongoing effort to explore all possibilities to control the costs of military health care. This may include an analysis of benefit payment structures, organiza-

tions, systems, and policies for the military health system. I would also support a strong push for the potential long-term gains available through the promotion of healthy life styles and prevention among our beneficiaries to help reduce the demand for health services.

PERSONNEL AND ENTITLEMENT COSTS

Question. In addition to health care costs, personnel and related entitlement spending continues to grow and is becoming an ever increasing portion of the DOD budget. Secretary Panetta, in his confirmation process, advocated for a comprehensive review of military compensation, saying “everything must be on the table,” including military retirement.

Do you believe the time is right to begin discussing reform of military compensation and retirement benefits?

Answer. I agree with Secretary Panetta about the need to conduct a comprehensive review of military pay and benefits. I believe that it is possible to restructure our military pay and benefits in a way that continues to attract, support, and retain our men and women in uniform and their families while containing cost.

Question. Other than reducing Active Duty and Reserve end strength, what actions do you believe can be taken to control the rise in personnel costs and entitlement spending?

Answer. I understand that personnel-related costs represent a growing percentage of the DOD’s limited resources. I’m also concerned about the fact that our current military compensation system is deep-seated in structures established decades ago. To control the rise in personnel costs and entitlement spending, I believe it is appropriate to conduct a comprehensive review of the military pay and benefits structure to determine where costs can be contained. However, while I support a review of military pay and benefits, we must do so in a manner that supports and sustains the all volunteer force.

MILITARY RETIREMENT

Question. The 10th Quadrennial Review of Military Compensation proposed a new defined benefit retirement plan that more resembles the benefits available under the Federal Employee Retirement System than the current military retirement benefit. Many other studies have questioned the affordability, feasibility, and fairness of the current “cliff vesting” system.

While it is often said that the military retirement benefit encourages retention after the 10-year point, do you believe it provides any significant boost to recruitment? Do 17–18 year olds, in your experience, care about retirement benefits when deciding to enlist?

Answer. My understanding is that recruit surveys show retirement benefits are often not a driving factor to enlist for those who are 17–18 years old, but I believe it may be appropriate to review the military retirement system for needed changes and efficiencies that encourage retention and boost recruitment. I understand that the Defense Business Board is reviewing military retirement and I look forward to reviewing their proposed alternatives to the current military retirement system in order to make an informed recommendation, if confirmed.

Question. How might the military retirement system be modernized to reflect the needs of a new generation of recruits, while easing the long-term retirement cost to the government?

Answer. There are many proposed alternatives to the current military retirement system. As General Cartwright has stated, changes these benefits tend to only impact on the Department’s budget requirements in the long term. Any changes should be carefully considered, as they will have far-reaching and long-lasting effects on our force. I have no specific suggestions to offer at this time, but if confirmed, will closely review, along with the rest of the Joint Chiefs, those proposals and their impact in order to make an informed recommendation.

SYSTEMS AND SUPPORT FOR WOUNDED WARRIORS

Question. Members who are or have been wounded and injured performing duties in Operations Enduring Freedom, Iraqi Freedom, and New Dawn deserve the highest priority from their for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from Active Duty when appropriate, and continuing support beyond retirement or discharge. Despite the enactment of legislation and continuing emphasis, many challenges remain in both the Active and Reserve components in responding to the needs of wounded, ill, and injured members under current law and regulations.

What is your assessment of the progress made to date by DOD, the Department of Veterans Affairs, and the Services to improve the care, management, and transition of seriously ill and injured members and their families?

Answer. Since the institution of the Wounded, Ill, and Injured, Senior Oversight Council in 2007, DOD and VA have been working on multiple ways to improve the care, management, and transition of our wounded warriors and their families. DOD has established Wounded Warrior Units and Program oversight offices through which individual and family medical, mental, and social-economical needs are addressed. I understand DOD and VA have established several Centers of Excellence for development of diagnostic tools, treatment modalities, education, and training for care providers, wounded warriors, and family members to provide treatment for the multiple facets of injuries or illness our seriously wounded warriors face.

Question. What are the strengths upon which continued progress should be based?

Answer. I have been advised that we should continue to expand upon the research and treatment baselines established both within the private medical research and health care sector (e.g. Johns-Hopkins University on Traumatic Brain Injury, Mayo Clinic on Biomechanics, University of Utah and University of Massachusetts on Limb Regeneration) and the Centers of Excellence which fall under the Defense Center of Excellence for Psychological Health and Traumatic Brain Injury. These groups are making daily strides in providing the best level and quality of care to our wounded warriors and their families. If confirmed, I will continue to support their efforts and work to ensure that they receive the support (both financial and manpower) required for them to continue their important work.

Question. What are the weaknesses that need to be corrected?

Answer. One weakness is clinical case management through the period when members transition from the Active Force to DOD retiree or eligible veteran status. For example, a single electronic health record is needed, and is in development but is still not deployed. Additionally, the improvement of the transition process and tracking for wounded warriors with unseen psychological wounds is an area of special concern. We must strive for continued process improvement for our wounded warriors—if confirmed, I will work to coordinate with all stakeholders to develop systems and processes to close these gaps.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase support for wounded members and their families, and to monitor their progress in returning to duty or to civilian life?

Answer. I would continue to capitalize on the many non-profit programs and organizations that fall within “the Sea of Goodwill”. There are hundreds of these organizations and programs that have come to the aide of the wounded warriors and their families to provide for everything from assistive devices (e.g. wheel chairs, house ramps), to conducting research on medical treatments, to providing direct economic aid. The Chairman’s Office of Warrior and Family Support has been at the forefront on coordinating with a number of these organizations, cataloging those which provide the best quality and quantity of assistance to our wounded warriors and their families. I will also encourage continued work between the Federal and State governments on this important topic via the Council of Governors and other potential forums.

Question. Studies conducted as a result of the revelations at WRAMC pointed to the need to reform the disability evaluation system (DES). A DES pilot program, and now an Integrated DES program, have been established to improve processing of members.

What is your assessment of the need to further streamline and improve the Integrated DES?

Answer. I agree with the need to streamline the current Integrated Disability Evaluation System (IDES). It is my understanding that earlier this year, the Secretary of Defense and the Secretary of the Veteran’s Administration established an IDES Tiger Team. Since May, the Tiger Team initiated a reform program and has set in motion a campaign plan to reduce the IDES total process time. The goal is to eventually reduce the IDES total process time to 90 days or less. This will require close coordination with Congress for legislative change. This will reduce the total number of warriors in the evaluation process, thus reducing the overall cost to the system and the burden on our wounded warriors.

Question. If confirmed, how will you address any need for change?

Answer. If confirmed, I will support current IDES reform initiatives as set forth by the secretaries and, if necessary, make recommendations to ensure the appropriate levels of disability rating and compensation are provided our Wounded Warriors.

SUICIDE PREVENTION, HIGH-RISK BEHAVIOR, AND MENTAL HEALTH RESOURCES

Question. The numbers of suicides in each of the Services has increased in recent years. The Army released a report entitled "Army Health Promotion Risk Reduction Suicide Prevention" in June 2010 that analyzed the causes of its growing suicide rate and examined disturbing trends in drug use, disciplinary offenses, and high risk behaviors. In addition, mental health surveys conducted by the Army of soldiers and marines in theater document declines in individual morale and increases in mental health strain, especially among those who have experienced multiple deployments.

In your view, what role should the Joint Chiefs of Staff play in shaping policies to help prevent suicides both in garrison and in theater and to increase the resiliency of all members and their families?

Answer. The rising suicide rate amongst Active Duty personnel is deeply concerning. In response to the 2010 DOD Task Force Report on Prevention of Suicide, the DOD is developing an action plan to address the 13 foundational and 76 targeted recommendations in the report. Expedient implementation and resourcing of the particular recommendations the services have identified as high priority would benefit DOD commitment to reducing suicides. If confirmed, I will continue to work closely with Congress, our military leaders, Veterans Affairs, and other Federal and civilian organizations to see that our members' and families' psychological health and mental health issues are addressed.

Question. What is your understanding of the action taken in response to the June 2010 Army report, and the data in Chapter 3 ("The Lost Art of Leadership in Garrison") in particular?

Answer. It is my understanding that the Army continues to evaluate and modify programs and services that are related to health promotion, risk reduction, and suicide prevention. Early identification of "high risk" behavior, such as substance abuse and behavior problems, should allow leaders to intervene early. I understand that the Army has engaged leaders at all levels to improve education and awareness of behavioral health issues and high-risk behaviors. The Army has increased behavioral health providers at the brigade level in Active, National Guard, and Army Reserve units; required increased behavioral health screening before and after deployments; improved training for chaplains and suicide prevention coordinators; and improved training for primary care medical providers to identify and respond to behavioral health issues.

Question. What actions, if any, should the Joint Chiefs of Staff take with respect to Army policies regarding detection of and response to illegal drug abuse?

Answer. On 1 November 2010, the Chairman of the Joint Chiefs of Staff outlined several initiatives to improve the detection and response to illegal drug abuse. The DOD Biological Testing Advisory Board, which has Army representation, has been working to jointly address the recommendations identified and to discuss additional actions that would be beneficial. However, I understand that funding remains a constraint to immediate implementation of identified improvements.

Question. If confirmed, what actions will you take to ensure that sufficient mental health resources are available to members in theater, and to the members and their families upon return to home station?

Answer. Personal mental health issues cannot be ignored and, as an institution, DOD must continue to directly address this issue. My understanding is that there are three areas that must be addressed to ensure sufficient resources are available to members and their families.

First, we must ensure that members are comfortable seeking treatment and using the resources that are available. A DOD Instruction will be issued soon to address this directly. This new instruction will positively affect command notification reducing the stigma associated with receiving mental health treatment. Second, we must continue working to develop additional and more effective mental health therapies. Third, we must ensure that we have the necessary resources available, including trained mental health professionals. We must continue to coordinate closely with our VA and civilian counterparts to ensure consistent staffing of mental health professionals across the continuum of care.

MILITARY QUALITY OF LIFE

Question. In January 2009, the Department published its second Quadrennial Quality of Life Review, which focused on the importance of key quality of life factors for military families, such as family support, child care, education, health care, and morale, welfare, and recreation services.

How do you perceive the relationship between military and family readiness and quality of life improvements and your own top priorities for the Armed Forces?

Answer. I expressed in a previous question that I will work closely with the Secretary and his staff, the Chairman, the other Joint Chiefs, and the combatant commanders to ensure our national defense remains strong by, among other things, ensuring our families and wounded warriors are cared for properly. We cannot protect this country unless we have healthy, personally-secure fighting men and women who are willing to put their lives on the line. A key component of this is ensuring we do everything possible and appropriate to meet their personal needs.

Question. If confirmed, what further enhancements, if any, to military quality of life would you consider a priority in an era of intense downward pressure on budgets, and how do you envision working with the Services, combatant commanders, family advocacy groups, and Congress to achieve them?

Answer. I understand the importance of quality of life programs on the wellness of the total force. If confirmed, I will encourage proactive management of the key areas such as access to counseling, fitness opportunities, child care support and spouse employment opportunities. Though basic quality of items such as satisfaction with PCS moves are largely issues, I have a keen interest in ensuring they are looked after properly. I look forward to working with advocacy groups and Congress to efficiently close gaps and reduce overlaps in programs and to communicate effectively with families to ensure that they know how to access available support when they need it.

FAMILY SUPPORT

Question. Military members and their families in both the Active and Reserve components have made, and continue to make, tremendous sacrifices in support of operational deployments. Senior military leaders have warned of growing concerns among military families as a result of the stress of frequent deployments and the long separations that go with them.

What do you consider to be the most important family readiness issues for members and their families, and, if confirmed, how would you ensure that family readiness needs are addressed and adequately resourced?

Answer. I believe family readiness is tethered to family resilience. It is DOD's responsibility to ensure families are well-prepared to meet the challenges that come with deployment and service. Through focusing on the psychological, social, financial, and educational well-being of military families, DOD can continue to build family resilience. I understand that strides have been made in improving access to resources for families through such programs as Military OneSource, and the Yellow Ribbon Program, but there is always room for improvement.

Question. How would you address these family readiness needs in light of global rebasing, BRAC, deployments, and growth in end strength?

Answer. It is DOD's responsibility to ensure that all available resources, including those in health care, education, and employment, are available to families at the required level and location. In order to accurately address the needs of these families in a changing environment, it is also critical to DOD's success to build community partnerships between all Federal agencies and with local governments, businesses, and nonprofit organizations that are stakeholders in addressing the stressful aspects of military life. I also believe we need to encourage continued progress among individual states' legislative initiatives to ease recognition of professional accreditation of family members and support for various school programs transferring children. If confirmed, I will monitor the changing needs of our military families closely.

Question. If confirmed, how would you ensure support to Reserve component families related to mobilization, deployment and family readiness, as well as to Active Duty families who do not reside near a military installation?

Answer. DOD has a duty to ensure that every family has access to quality resources, regardless of location. These resources should provide information, access, referrals, and outreach to all military members and their families. This needs to be underwritten by a coordinated, community based network of care encompassing DOD, VA, State, local, nonprofit, and private providers. It is my understanding that DOD's Yellow Ribbon Program has been successful in addressing these needs. If confirmed, I will assess this program to ensure that it is properly focused and funded to address the issues faced by Active Duty, Guard, and Reserve members and their families.

Question. If confirmed, what additional steps will you take to enhance family support?

Answer. I understand there are many excellent State programs that support members and their families. If confirmed, I would like to explore these further and see if they can be expanded across all States. If confirmed, I would encourage the implementation of flexible family support programs that meet the needs of our

members and their families, whether they live on military installations, near military installations, or far from military installations

DEFENSE READINESS REPORTING SYSTEM

Question. In June 2002, the Department issued a directive to replace the current readiness reporting system, yet that replacement is yet to be fully operational.

What challenges still remain in the transition from the Global Status of Resources and Training System (GSORTS) to the Defense Readiness Reporting System (DRSS) and what is the plan to fully implement DRRS?

Answer. It is my understanding that the transition from the GSORTS to the DRRS faces challenges associated with management, acquisition practices, definition of requirements, and testing. The transition is scheduled to be complete the end of fiscal year 2012. I also understand that as part of the DRRS governance structure, the Joint Staff is working with the Under Secretary of Defense (USD) for Personnel and Readiness to develop an executable implementation plan, including milestones, performance goals and quantifiable, measurable validated requirements. On 6 June 2011, the DRRS was placed under Director, Operational Test and Evaluation, and USD Acquisition Test and Logistics Developmental Test and Evaluation oversight.

Question. Have any delays or obstacles been attributed to technological maturity or changing requirements?

Answer. I understand the Joint Staff was informed by the DRRS Implementation Office (DIO) during normal governance processes of some technological challenges. These included challenges associated with the ability of the DRRS to connect to strategic command and control systems and connections within the DRRS enterprise. I also understand that changing requirements have also contributed to delays in the development of a long-term DRRS program, and the transition from GSORTS. Additionally, since the originally planned Full Operational Capability (FOC) date of 2007, challenges remain with clearly defining measurable requirements. When combined with growing lists of requirements that still require prioritization or validation, efforts to develop executable plans have been delayed. Work continues to define FOC criteria, finalize dates for transition, and complete the accompanying implementation plan.

Question. GAO has reported that significant shortfalls remain in the implementation of DRRS, stability of requirements, adequacy of testing, and overall management and oversight of the program.

What is your view on their findings?

Answer. I concur with the specified findings of the 2009 GAO report. I support the DRRS oversight related findings in GAO-11-256, "Military Readiness: Army and Marine Corps Reporting Provides Additional Data, but Actions Needed to Improve Consistency" report. Specifically, I believe steps are needed to achieve interoperability, oversight, and execution. Additionally, I concur with the GAO assessment that an independent program risk assessment is needed to improve program organization.

Question. With respect to DRRS development and implementation, to what extent, if any, has the USD for Personnel and Readiness, worked or coordinated with the Director of Defense Research and Engineering and the Chief Information Officer of DOD?

Answer. I am aware of a report and corresponding memorandum produced for the Defense Committee as directed by the NDAA for Fiscal Year 2010. I understand the USD for Personnel and Readiness and the Director of Defense Research and Engineering produced the report. I do not believe the September 2010 report, "Preliminary Technology Readiness Assessment Report on the DRRS," and accompanying memorandum to the committee, "DRRS—Response to the Request Made on Page 111 of Senate Report 111-35" was coordinated with or endorsed by the Joint Staff. I am aware the Assistant Secretary of Defense, Networks and Information Integration/DOD Chief Information Officer coordinates with the USD for Personnel and Readiness through participation in the DRRS governance process.

AIR FORCE TACTICAL AVIATION

Question. As the head of the JROC, you would be responsible for overseeing the development and validation of requirements for major weapons systems. Some have raised concerns that many of the problems within the Joint Strike Fighter (JSF) program derive from growth in requirements.

Do you agree that this is a problem with the JSF program?

Answer. I understand that issues with the JSF program have been addressed through a deliberate requirements and acquisition review process, and that requirements growth has been an issue. A high level replan was approved in January 2011,

and the program expects to deliver a fully-compliant weapon system. I am taking steps to gain in-depth familiarity with the JSF program, intend to give the program my close personal attention, and fully support continuing JROC reviews of the program.

Question. What actions would you propose to take to prevent requirements growth on major weapons systems?

Answer. Requirements growth requires continued vigilance, which will be especially important in an increasingly constrained budget environment. If confirmed, I will continue to emphasize current checks and balances that are in place to include the "trip-wire" process and Configuration Steering Boards. Additionally, I understand that one of the core elements of the ongoing JCIDS review is to strengthen requirements synchronization with the acquisition process, which will serve to improve control of requirements growth.

Question. If the JROC cannot control requirements growth on the largest acquisition program in the DOD portfolio, what prospect is there that the JROC could control requirements growth on any other major acquisition programs?

Answer. I fully acknowledge the committee's concern regarding requirements growth. I have confidence that the JROC maintains adequate authorities and processes to manage requirements growth, and if confirmed, I will continue General Cartwright's emphasis on imposing discipline on such growth.

Question. At a hearing earlier this year, the committee received testimony from senior DOD officials that there really is no alternative to continuing the JSF program.

What actions would you propose to take to prevent DOD from finding that future major acquisition programs that run into cost schedule or performance problems leaves us with no alternative but to continue the troubled programs?

Answer. I do not believe any program is too big to fail or should be fenced. That said, we need to work hard to ensure programs, including the JSF, are successfully executed. Process improvements resulting from the Weapons Systems Acquisition Reform Act and JCIDS review should reduce the risk of similar circumstances in the future. If confirmed, I will work closely with my and OSD(AT&L) counterparts to properly manage current and future program development to balance cost, schedule, and performance in the best interest of the taxpayer.

IRAQ LESSONS LEARNED

Question. What do you believe are the major lessons learned from the Iraq invasion and the ongoing effort to stabilize the country?

Answer. While there are other lessons to be sure, perhaps the most important lesson is that in executing a major contingency, we must remain prepared for the difficult work that occurs in the wake of major combat. This will manifest itself in two ways. First, in framing future strategic and force sizing constructs, we must account for the fact that conflicts are never as compact as predicted, and that the notion of rapidly swinging forces from one conflict to another must be viewed with healthy skepticism. Second, we must plan and train with our civilian counterparts and be prepared to operate effectively in all phases of conflict. That said, the military should also be prepared to undertake critical non-military tasks when civilian agencies cannot operate effectively, either due to the security environment or due to lack of capacity. Indeed, the need for greater capabilities and capacity in civilian agencies has been a recurring lesson for the entire U.S. Government. Finally, we need to obtain better situational awareness of the underlying political, cultural, and economic drivers within a host nation to ensure our actions meet our objectives and not trigger unintended consequences.

Question. What is your understanding and assessment, if any, of the Department's adaptations or changes in policy, programs, force structure, or operational concepts based upon the lessons learned?

Answer. The Iraq war has led to deep and far-reaching changes in all of the areas listed above. For example, counterinsurgency doctrine has been completely revised, culminating in the publication of Counterinsurgency Field Manual 3-24. Force structure changes include the development of the Advise and Assist Brigade. Additionally, the Department better understands that in Irregular Warfare, the strategic center of gravity is a population, and not necessarily a nation-state. The Department has demonstrated the ability to learn and adapt across Doctrine, Organization, Training, Materiel, Leadership & Education, Personnel, Facilities, and Policy.

Question. If confirmed, what additional changes, if any, would you propose making to policy, programs, force structure, or operating concepts based on the lessons of combat and stability operations in Iraq?

Answer. I understand that most of the lessons from Iraq are in the process of being integrated into DOD policy and doctrine. However, I do believe we need to be cautious in not over-correcting into a force that is exclusively prepared for an Iraq-type of conflict.

Question. What is your understanding of the role of the Joint Staff in supporting and resourcing efforts in Iraq, Afghanistan, and elsewhere to foster commitment to the "Rule of Law" as part of stability operations and doctrine?

Answer. The principle of respect for the rule of law is thoroughly embedded in our military forces and is reinforced throughout joint doctrine with regard to stability operations. Stability operations are a core military mission and our support to other U.S. Government agencies is a significant force multiplier. Indeed we recognize that it is often the establishment of the rule of law, and a security sector that can enforce it, that will permit the redeployment of the joint force when supporting a stabilization effort in a failed or failing state. Even in a non-combat theater, at NORTHCOM we maintain an extensive relationship with the Mexican military on human rights and the rule of law that, with the support of Congress, is fully supported by counternarcotics funding.

I understand that a portion of the OSD's Operations and Maintenance budget has been designated to support continued strategic planning, programming, and inter-agency training for rule of law operations and that the Joint Staff recently assisted the Under Secretary of Defense for Policy in gathering information to draft a rule of law report that soon will be delivered to Congress.

DRAWDOWN IN IRAQ

Question. Do you support the plan for the drawdown of U.S. forces from Iraq consistent with the 2008 U.S.-Iraq Security Agreement?

Answer. I support the current plan for the drawdown of U.S. forces from Iraq in accordance with the 2008 U.S.-Iraq Security Agreement. It is important that we fulfill our obligations under this bilateral agreement and we are on track to complete the drawdown by December 31, 2011.

Question. What is your assessment of the Department's planning for the withdrawal of troops and equipment out of Iraq consistent with the December 2011 deadline of the 2008 U.S.-Iraq Security Agreement?

Answer. The drawdown of troops and equipment in Iraq is on track due to solid planning and the discipline, training, and dedication of our deployed forces. My understanding is that the Joint Staff closely tracks the progress of the drawdown on a daily basis. Since this process began in 2010 with the force reduction from 159,000 to 50,000 troops, we have closed hundreds of bases and outposts and turned them over to our Iraqi partners in better condition than we inherited them. Our logisticians have moved mountains of equipment. The plan is on time and on schedule for a complete withdrawal by the December 2011 deadline of the Security Agreement.

Question. It's been reported that the administration is considering options for a U.S. force to remain in Iraq beyond December 2011 should the Iraqi Government request the continuing presence of U.S. forces.

If a continuing U.S. troop presence in Iraq beyond the end of this year is requested by the Government of Iraq (GOI), would you support the deployment or retention of additional troops in Iraq beyond the present deadline for U.S. troop withdrawal?

Answer. If the GOI requests the presence of U.S. forces beyond 2011, I will consider the missions the GOI is asking our forces to perform, the risks our forces will face, the willingness of the GOI to take action against militias and other extremist groups that could target U.S. forces, the benefit it might bring to Iraq and the U.S.-Iraq relationship, and the cost of the mission. If confirmed, and if these factors support retention of U.S. forces, I would make such a recommendation.

LEAD AGENCY TRANSITION IN IRAQ

Question. Responsibility for lead U.S. agency in Iraq is scheduled to transition from DOD to the Department of State (DOS) by October 2011. However, a May 2011 State Department Inspector General report found that progress in effectively transitioning to a civilian-led presence in Iraq is slipping in a number of key areas, including the establishment of the Office of Security Cooperation in Iraq to manage the defense relationship between the U.S. Government and the GOI.

What is your assessment, if any, of the planning and progress in executing the transition from DOD to DOS? In your view, what are the sources of greatest risk to the current plan and the successful implementation of the transition?

Answer. My understanding is that the transition from DOD and DOS is on track. DOD, DOS, and other agencies and offices have undertaken unprecedented levels

of coordination and planning for the transition in Iraq. We have an excellent working relationship with our State Department colleagues and are working together at all levels to achieve a successful transition. As one would expect with a transition of this scope and complexity, challenges exist, but it is my understanding that we are working together to overcome them and remain on schedule. Fully funding the State mission to its completion is vital to this effort.

Question. If confirmed, what changes, if any, would you recommend to the current plan or the implementation of transition?

Answer. The transition plan is solid, and my understanding is that we are on track to fully implement it. Normal operational challenges remain as we close bases and move personnel and equipment, but we anticipate no issues meeting the deadline in accordance with the transition plan. However, should the Iraqis request a continued U.S. presence beyond 2011, I would want to be closely involved in subsequent planning efforts.

U.S.-IRAQ STRATEGIC RELATIONSHIP

Question. In your view, what will be the nature of our strategic relationship with Iraq after December 31, 2011?

Answer. Our stated goal has always been to establish a long-term strategic partnership with Iraq. We support an Iraq that is sovereign and self-reliant; that has a just, representative, and accountable government; that denies support and safe haven to terrorists; that is integrated into the global economy; and that contributes to regional peace and security. All these elements of our desired strategic relationship with Iraq were codified in the 2008 Strategic Framework Agreement established between Iraq and the United States. If confirmed, it is my intention to closely monitor the status and progress of our relationship.

AFGHANISTAN STRATEGY

Question. Do you agree with President Obama's strategy for Afghanistan and Pakistan announced at West Point in December 2009?

Answer. Yes.

Question. On June 22, 2011 President Obama announced his decision to draw down 10,000 U.S. troops from Afghanistan by the end of this year and to withdraw the remaining 23,000 "surge" force by September 2012, for a total announced draw-down of 33,000.

Do you support the President's decision to begin reducing U.S. forces in July 2011? Why or why not?

Answer. While I have not been focused on the mission in Afghanistan while executing my duties at NORAD and NORTHCOM, it is my understanding that we have made significant gains as a result of deploying the surge force. This force increase has allowed us to arrest Taliban momentum, establish security in previously-held Taliban areas such as Central Helmand and Kandahar (areas of historic importance to the insurgency), and expand Afghan National Security Forces (ANSF) capacity and capability. It is my understanding that the theater and combatant commander have expressed that we can drawdown and continue to manage the risk, as long as we retain flexibility if circumstances on the ground change. Commencing the drawdown in July 2011 has the benefit of sending an important signal to the Afghan Government that international support is not open-ended.

Question. Do you support the President's decision regarding the size and pace of reductions in U.S. forces? Why or why not?

Answer. Yes. It is my understanding that this decision does not represent a change in our strategy—the ends, ways, means, and boundary conditions outlined for the mission in Afghanistan remain the same. It appears to me that we have reached a point in the campaign where a responsible drawdown in U.S. forces is possible. Once surge forces are removed, there will still be more than 68,000 U.S. troops and thousands of international forces in Afghanistan—not to mention the addition of some 70,000 Afghan forces that will join the fight during the next 15 months. At the same time, the international community has demonstrated its intention to support Afghanistan until at least 2014, and the U.S. and NATO are both discussing some form of long-term partnership relationship with Afghanistan.

Thus, I agree with the President's decision. If confirmed, I will remain abreast of conditions on the ground in Afghanistan and, should I determine the situation has changed, I will provide such advice to the Chairman and the Secretary.

SECURITY SITUATION IN AFGHANISTAN

Question. What is your assessment of the current security situation in Afghanistan?

Answer. It is my understanding that the security situation in Afghanistan continues to improve though, as General Petraeus has said, it is fragile and reversible. Insurgent momentum has been halted in most of the country and reversed in many key areas like Helmand and Kandahar. For example, May and June mark the first time since 2006 that insurgent attacks have decreased when compared to the same months the year prior. The enemy is resilient and retains lethal capacity as well as the ability to regenerate over time. However, even in the wake of recent attacks, the Government of the Islamic Republic of Afghanistan (GIROA) and the ANSF have also proven their resilience and it appears that they will continue to push forward for a secure and stable Afghanistan. Our forces, partnering with the ANSF, should help to further pressure the enemy by degrading support networks and further reduce support for the enemy among the Afghan population. Nonetheless, numerous security challenges remain, and there will be tough fighting in the years ahead as we transition security to Afghan lead by the end of 2014.

BEGINNING OF TRANSITION OF SECURITY RESPONSIBILITY

Question. The transition of lead security responsibility to Afghan security forces is set to begin in mid-July, with the initial phase to be completed by the end of this year. In March President Karzai announced the first tranche of provinces and municipal districts designated for the transition of security responsibility to an Afghan lead. President Karzai has called for the transition of security responsibility throughout Afghanistan to be completed by 2014, and International Security Assistance Force (ISAF) members endorsed this goal at the NATO Lisbon Summit in November 2010.

Do you support the decision to transition the lead security responsibility to the Afghan security forces in the areas announced by President Karzai beginning this month?

Answer. Yes, based on support from our commander on the ground.

Question. In your view, how important is it to the counterinsurgency effort in Afghanistan that the transition of security responsibility begin in July 2011?

Answer. Transitioning to Afghan-led security responsibility is the next step in our comprehensive counterinsurgency (COIN) effort in Afghanistan. It will not be easy, and there will likely be setbacks as well as progress. However, as we seek to eliminate safe havens from which al Qaeda or its affiliates can launch attacks against our homeland or our allies, the Afghan Government must step up its ability to protect its people and move forward with actions to build a more stable, economically viable country in the future. We should remain committed to working with the Afghan Government and our coalition partners in executing the transition phase of the NATO/ISAF comprehensive COIN strategy in order to transfer lead security responsibility to the Afghan Government by the end of 2014.

Question. What is your assessment of the capacity of the Afghan security forces to assume the lead for security in the areas designated for this initial round of transition?

Answer. I believe that the Afghans are prepared to assume the lead for security in the areas designated in the first tranche based on my understanding of the current size and capability of Afghan security forces. Afghan security forces are already in the lead in some places, such as Kabul and Panshir. It goes without saying that our support will be critical, especially in the early days of the transition, but the Afghan National Security Forces must step up, and these areas are a good place to start.

BUILDING THE AFGHAN NATIONAL SECURITY FORCES

Question. There are approximately 100,000 more Afghan soldiers and police now than there were in November 2009 and by September 2012 another 70,000 personnel will be added to the ANSF. A new ANSF target end strength of 352,000 by 2012 is awaiting final approval by the Joint Coordination and Monitoring Board.

In your view, is the target end strength level for the ANSF sufficient to provide security and stability in Afghanistan?

Answer. I believe the Afghan National Army and Afghan National Police should be capable of achieving the lead for security by the end of 2014 if the Joint Coordination and Monitoring Board approves the 352,000 ANSF target end strength and if that end-strength is achieved.

Question. What in your view are the greatest challenges to building the capacity of the ANSF to assume responsibility for Afghanistan's security?

Answer. I believe the primary challenges to ANSF capacity building are: building literacy, reducing attrition, developing leaders, eliminating insider threats, and provision of key enablers such as logistics, maintenance, and intelligence capability.

Question. There remains a shortfall in the number of training personnel required for the NATO Training Mission Afghanistan (NTM-A) and in the number of embedded training teams, the Operational Mentoring and Liaison Teams (OMLTs) embedding with Afghan Army units and the Police OMLTs (POMLTs) embedding with Afghan Police units.

In your view, to what extent should U.S. forces be used to source the shortfall in NTM-A trainers?

Answer. Fielding professional and capable ANSF is critical to our long-term success in Afghanistan. This is a priority for ISAF and NTM-A. U.S. personnel are currently filling numerous training and partnership requirements throughout Afghanistan. Our forces will continue to support the ANSF as required in order to achieve our mission objectives. This may require shifting U.S. forces into positions to cover trainer shortfalls if required by the commanders in the field.

Question. What more should be done to get NATO members and other coalition partners to meet the ISAF requirements for additional NTM-A trainers and OMLTs and POMLTs?

Answer. Training shortfalls are a longstanding issue best addressed by continued engagement with our partners by all elements of the U.S. Government—including Congress—as well as by NATO/SHAPE HQ, HQ ISAF, and representatives of the NATO training mission. Our allies and contributing nations with operational commitments are being encouraged to reinvest any combat troop reductions with trainers, as has recently occurred with our Canadian partners. Personnel with specialized skills such as police, logisticians, medical, and maintenance specialists are essential. We continue to work on filling all training requirements, while also developing more Afghan trainers, in order to realign coalition trainers.

Question. A key component of efforts to build the capacity of Afghan security forces is partnering ANSF units together with ISAF units in the field.

In your view, how effective has partnering been in building the capacity of the Afghan Army and Afghan police?

Answer. Partnering is an essential component of building Afghan security force capacity in order to allow Afghans to assume the lead for security across the country by the end of 2014. It is my understanding that we have made significant strides with our baseline training while, at the same time, focusing on our partnership efforts. This has proven to be the most effective way of increasing Afghan capability, confidence, and professionalism in the field. Afghan units that are partnered with ISAF elements continue to develop more rapidly. Partnered units are more effective in the field, have a better understanding on how to sustain their forces and have fewer incidents of corruption.

Question. Would you support moving to a partnership ratio of ISAF and ANSF forces below 1:1 (less than one ISAF soldier for every ANSF soldier) as the capability of Afghan security forces improves?

Answer. My understanding is that we intend to do this as we transition security responsibility. This is part of the process of building ANSF capacity and then putting them in the lead. Developing units will require greater partner support, while effective units will have less partner support. Balancing partner efforts increases their capacity. Partner ratios will change dramatically as we move to complete Afghan control. My understanding is that there are several units now below a 1:1 partner ratio, and there are increasingly more areas where Afghans are in the lead or operating independently.

RELATIONSHIP BETWEEN COUNTERTERRORISM AND COUNTERINSURGENCY

Question. In your view, what is the proper relationship between counterterrorism and counterinsurgency operations in Afghanistan?

Answer. The mission in Afghanistan is to degrade, disrupt, and destroy al Qaeda and to provide sufficient stability so that Afghanistan can never again become a safe haven for terrorists. As such, counterterrorism directly targets al Qaeda networks themselves, including leadership, thereby addressing the first imperative. It also supports the counterinsurgency campaign, which in turn intends to eliminate the conditions in which al Qaeda can exist. Special operations forces are vital in both roles.

AFGHAN LOCAL POLICE/VILLAGE STABILITY OPERATIONS

Question. Secretary Panetta and others have emphasized the importance of the Village Stability Operations and Afghan Local Police programs to the strategy in Afghanistan.

What has been the effect of these programs on rural Afghan populations and what has been the response from the Taliban?

Answer. My understanding is that the Afghan Local Police (ALP) program and Village Stability Operations (VSO) have had a measurable and positive effect on security in Afghanistan. Since the program's inception by Afghan presidential decree in August 2010, ALP has grown to over 6,700 patrolmen operating at 44 validated sites. ALP is a means of extending legitimate security where ISAF forces are scarce or non-existent. VSO, of which ALP is a component, builds the connection between the village, the province, and the central government. The program is intended to jump-start local governance and also mobilize communities, a key condition for local populations to resist Taliban predation. The enemy has explicitly targeted VSO because they fear its effectiveness and ALP members have successfully fought off Taliban attacks in a number of recent incidents. The ALP program and VSO continue to grow, and Afghans across the country are eager for the program to come to their area.

Question. Do you believe the availability of U.S. special operations teams is a limiting factor in expanding these programs to a point where they can have a strategic impact in Afghanistan?

Answer. My understanding is that the number of ALP and VSO sites we can establish in Afghanistan is limited by the availability of Special Operations teams. This is because Special Operations teams embed and live where VSO/ALP has been established. In order to expand the VSO/ALP program, Combined Forces Special Operations Component Command-Afghanistan (CFSOCC-A) has operational control of two U.S. Army Infantry battalions. The deployment of these two battalions under CFSOCC-A control has allowed us to thicken the Special Operations forces and free up more special forces personnel for new ALP/VSO missions. We expect that this will allow us to continue to increase the ALP program, even as the number of Special Operations in Afghanistan remains fairly constant.

Question. How do indirect approaches like Village Stability Operations and Afghan Local Police Programs compliment direct action counterterrorism missions within the U.S. strategy in Afghanistan?

Answer. I understand that the VSO/ALP program methodology includes full-time embedded partnership between Special Operations Forces and local villagers. Local villagers have among the best insight into insurgent actors, intentions, and their support structures. Special Operations forces conducting VSO/ALP and those conducting precision strike operations habitually cooperate and share information. The combination of these two efforts has had significant synergistic effects for the overall campaign and have made key areas of Afghanistan inhospitable to the Taliban and other insurgent groups.

PAKISTAN

Question. The relationship between the United States and Pakistan has often been described as tumultuous. Recent reports indicate Pakistan has expelled approximately 90 out of 135 special operations personnel who were deployed there to train the Frontier Corps and other Pakistani security forces to fight al Qaeda, the Taliban, and other associated groups. Also the United States has announced that some aid to Pakistan's military will be suspended.

What is your assessment of the military-to-military relationship between the United States and Pakistan?

Answer. Militaries in general tend to respect the common ethos associated with serving their nations' interests through the profession of arms. This general appreciation applies to how we regard Pakistan's military: since 2001, they have incurred roughly 12,000 casualties (3,000 KIA, 9,000 WIA) fighting violent extremists. We respect their courage and commitment to the defense of their nation. Relationships ebb and flow based on a combination of national interests, communications, and events. It is no surprise that our relationship is undergoing a turbulent period at present. The Pakistan military leadership has concluded that, for a variety of reasons, we should reduce our footprint inside their country, and we will of course abide by their decision, which will result in withholding some related aid. But we take our Pakistani counterparts at their word that this footprint reduction is temporary in nature.

Even though this is a difficult partnership, it is an important one. We cannot afford to return to the days when there was no partnership at all and a generation of Pakistani officers grew up with no contact with the United States. This professional relationship will continue to evolve at the most senior levels in Islamabad and Rawalpindi, and along the Pakistan-Afghanistan border at the tactical and operational levels.

Question. In your view does the presence of nuclear weapons in Pakistan and the security of these weapons have any effect on the military-to-military relationship between the United States and Pakistan and if so, how is that best addressed?

Answer. The fact that Pakistan is a nuclear-armed state that faces internal threats from extremist organizations makes it even more important to maintain a solid military to military relationship. Although the nature of the Pakistani state makes it unreasonable for us to expect routine access and perfect transparency, through military relationships we can offer perspectives on modernization, engagement with regional partners, and professionalism that will further develop our shared interests and shared approaches. From a DOD perspective, we have confidence in the caliber of officers Pakistan has charged with maintaining their strategic weapons systems. Should Pakistan desire, I believe we stand ready to support additional efforts to improve the security and safety of their nuclear weapons, and I believe we would welcome increased engagement in this facet of the security arena.

Question. Do you believe the current difficulties, including reported reductions in U.S. trainers, are temporary or lasting?

Answer. Difficulties and opportunities ebb and flow; we have a good measure of both right now. Certainly the reduction of our footprint and training capacity are one of the difficulties. No doubt we will continue to maintain some of the more constructive aspects of our relationship, and I believe the relationship will recover. I am unable to discern whether or when Pakistan will invite our Special Forces Trainers back in at the levels we believe would best benefit their efforts to counter violent extremists bent on overthrowing their government and threatening the United States and our allies. Nonetheless, we continue to have productive engagements in other venues, including coordination between units on both sides of the border.

Question. In your assessment, how important is the U.S.-Pakistan military-to-military relationship to the success of our counterterrorism strategy?

Answer. U.S. strategic interests in Pakistan encompass both our relationship with Pakistan itself and Pakistan's role in the campaign against al Qaeda and its adherents and affiliates. Because our efforts in Afghanistan have eliminated it as a safe haven, al Qaeda and other extremists use Pakistan as a base for the movement's overall ideology and to plot and prepare attacks against the United States and our allies and partners. These safe havens also pose a major challenge to our campaign in Afghanistan. Pakistan's efforts in eliminating these safe havens are dependent in some measure on U.S. support, which implies the need for a strong military-to-military relationship. Their full commitment to this effort would mark a new era of deeper partnership in which we share the mission of defeating terrorists and extremists.

Question. What is your assessment of U.S. programs to build the capacity of the Pakistan Army and the Pakistan Frontier Scouts to conduct counterinsurgency operations in the Pakistan-Afghanistan border region, including train and equip programs under the Pakistan Counterinsurgency Fund?

Answer. Enabling the Pakistani Army and the Frontier Corps to eliminate extremist safe havens is the premise of our outreach through the Pakistan Counterinsurgency Fund, intended to add additional capability to Pakistani courage and competence that already exists. Pakistan's senior military and civil leaders must in turn demonstrate the willingness to aggressively take on this mission.

I understand that PCF-funded training, equipment, and infrastructure have produced some important initial results for the Frontier Scouts, Special Services Group, and other organizations involved. The quality of Pakistani Army and Frontier Corps units' tactical maneuver, communications, marksmanship, and intelligence have demonstrably improved for participating small units. These programs have only begun to fully operate, and they remain vulnerable to disruptions of funding or access.

Question. In your view, to what extent does the Pakistan military recognize that militant extremist groups pose a threat to Pakistan's own national security interests, including such groups as the Haqqani network, the Afghan Taliban operating in and around Quetta, and Lashkar-e-Taiba?

Answer. The Pakistani nation will always act in its own interests, which are often different from our own. Pakistan has viewed India itself and Indian (or any other nation's) domination of Afghanistan as an existential threat, and has taken steps it believes are necessary to counter this threat, including developing nuclear weapons and nurturing extremist groups to fight proxy irregular warfare. That the Pakistani military benefits from presenting India as a threat, and that there are many in the military who sympathize with the extremist views of these groups, only reinforces this tendency. Moreover, these groups fought hard against the Soviets during their invasion of Afghanistan, and thus the military bears a certain loyalty to them.

However, in both supporting and tolerating these groups, the Pakistani military has grabbed the tail of a tiger that they may or may not be able to control. Military and civilian leadership seem to have gained in recent years a greater appreciation for the costs and dangers of such tolerance. For that reason, Pakistan has increasingly proven ready to act against extremist groups that target their own government. We are working, with limited success, to convince our Pakistani partners that they must take externally-focused terror groups just as seriously as domestic terror groups, that in fact all such groups form a linked syndicate of sorts.

CYBERSECURITY

Question. In a recent interview with Defense News, Admiral Mullen stated that “The single biggest existential threat that’s out there, I think, is cyber.”

Do you agree with Admiral Mullen and, if you do, do you believe this threat is receiving appropriate focus and resources within DOD?

Answer. I agree on both counts. Both state and non-state actors have or are developing the capability to severely impact both our national infrastructure and our ability to execute command and control and other military functions that have become dependent on cyber capability. It is a serious threat. Last year the Secretary of Defense created a new, sub-unified command, U.S. Cyber Command, to address this issue and help preserve the Nation’s freedom of action in cyberspace. The launch of the DOD Strategy for Operating in Cyberspace on 14 July 2011 is also a clear indicator that the Department is focused on the cyber threat. With the implementation of the strategy’s five strategic initiatives, the Department is focusing its resources both internally and externally to organize, train, and equip our forces to take full advantage of cyberspace’s potential; employ new defense operating concepts to protect DOD networks and systems; partner with other U.S. Government departments and agencies and the private sector to enable a whole-of-government cybersecurity strategy; build robust relationships with U.S. allies and international partners to strengthen collective cybersecurity; and leverage the Nation’s ingenuity through an exceptional cyber workforce and rapid technological innovation.

Question. What role do you expect to play, if confirmed, in the development of DOD’s cybersecurity policy, strategy, and planning?

Answer. Our reliance on cyber capabilities, the many and varied threats, and the rapid rate of technological change all demand we shine a spotlight on defense of our information networks. If confirmed, I will advocate within the Department, and with Federal agencies and Members of Congress, for appropriate policies and resources regarding cyberspace. Although the Department just released the DOD Strategy for Operating in Cyberspace, there is still a great deal of work to do, including placing greater focus on interagency relationships, authorities, and building flexible and responsive capabilities. We also need to protect our warfighting mission, strengthen and expand partnerships in the domain, build capability to conduct full-spectrum cyberspace operations, and develop processes to integrate cyberspace capabilities into COCOM operations and plans.

Question. What do you believe is the appropriate role for NORTHCOM in providing support to civil authorities in the cyber domain in relation to U.S. Cyber Command?

Answer. The Department of Homeland Security (DHS) is the lead Federal agency for national cyber security policy and programs. As such, the DHS will manage and lead a fully-coordinated response to a significant cyber incident to minimize impact, restore operations, and reduce the risk of future occurrence of the event or events. DOD organizations may be asked to support the federal cyber response, if military resources are needed to address the specific situation. NORTHCOM’s position is that U.S. Strategic Command (STRATCOM) and its subordinate sub-unified COCOM, U.S. Cyber Command (CYBERCOM), should be in the lead for DOD support to civil authorities for the technical aspects of recovery from a cyber attack. CYBERCOM and DHS have established a strong relationship for exactly this purpose. NORTHCOM’s role would be in assisting the DHS in mitigating the physical effects of such an event. For example, if a cyber attack disables our Nation’s electrical grid for an extended period of time, the effects could be devastating. In such a situation, NORTHCOM could provide transportation and other logistical support using military capabilities. STRATCOM, NORTHCOM, and CYBERCOM would coordinate closely throughout such an event.

COORDINATION WITH THE DEPARTMENT OF HOMELAND SECURITY

Question. After the terrorist attacks on September 11, 2001, Congress established the Department of Homeland Security, and DOD established the NORTHCOM and

an Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs.

What is your assessment of the current level of cooperation and coordination between DOD and DHS on homeland security matters, and what will be your goals in this regard if you are confirmed?

Answer. Cooperation and coordination between the DOD and the DHS is very strong and constantly improving. DOD staffs are tightly connected with the DHS and its component agencies through continued exchange of department representatives, to include DOD COCOMs and DHS headquarters and subordinate agencies. As the Commander of NORTHCOM, I have directly observed and benefitted from such cooperation, notably including close partnerships with the Federal Emergency Management Agency, Customs and Border Protection, and the U.S. Coast Guard. There continues to be a significant increase in the overall collaboration in deliberate and crisis action planning, policy decisions, and applicable directives impacting homeland security matters. The many correlations in our mission sets demand this collaboration. If confirmed, I will help the DOD continue to mature and strengthen our relationship with the DHS through information sharing, exercises, operations, and planning.

Question. What do you believe is the appropriate mechanism for DOD to respond to the needs of domestic agencies for DOD support—whether through new or modified programs within DOD or otherwise?

Answer. I believe the current Request For Assistance (RFA) mechanism for Federal agencies to obtain assistance from the DOD, through the exchange of Executive Secretary memoranda, is appropriate. The DOD has unique capabilities that have supported domestic agencies such as the U.S. Coast Guard and the Department of Interior for the Deep Water Horizon oil spill, Federal Emergency Management Agency for Hurricanes Gustav and Ike, and the National Interagency Fire Center for wildland forest fires. In domestic natural disasters, DOD is always in support of a Primary Agency. If confirmed, I will continue to seek ways to respond more quickly and effectively to requests from our Federal partners, to include expanded use of pre-scripted mission assignments.

COMBATING TERRORISM

Question. The administration recently released its National Strategy for Counterterrorism. This strategy highlights the need to maintain pressure on al Qaeda's core while building the capacity of partners to confront mutual threats. The strategy also underscores the need to augment efforts to counter threats from al Qaeda-linked threats "that continue to emerge from beyond its core safe haven in South Asia."

How do you view the Department's role under the new National Strategy for Counterterrorism?

Answer. DOD plays a significant role within the government-wide global fight against al Qaeda (AQ) and its adherents primarily through partner nation capacity-building and enabling efforts, targeted counterterrorism (CT) operations, and countering violent extremist messaging. Building competent, professional and responsive CT forces that protect populations and strengthen the rule of law reinforces the legitimacy of partner governments, creates sustainable security, and reduces AQ's ability to establish safe havens. Targeted CT operations are focused on eliminating near-term threats, creating space and time to develop partner nation capacity, and supporting the development of sustainable host nation government institutions.

Question. Do you believe the National Strategy for Counterterrorism modifies the Department's role in combating the threat posed by al Qaeda and affiliated groups?

Answer. The National Strategy for Counterterrorism further codifies DOD's priorities and roles as part of the whole of government global CT approach. The new strategy is closely aligned with our existing priorities and does not significantly modify our ongoing efforts.

Question. What do you believe is the appropriate role for the Department in countering threats from al Qaeda and affiliated groups outside of South Asia?

Answer. Building partner nation capacity and enabling partner forces is the primary role for DOD in countering threats from al Qaeda (AQ) and affiliated groups. DOD also conducts limited targeted CT operations as directed in order to eliminate imminent threats to the United States and U.S. interests and to create space and time for the very challenging development of enduring host nation solutions to CT problems. Building strong and enduring partnerships based upon shared understanding of the threat and common objectives is essential for success. DOD also supports other efforts led by interagency partners, which focus on the development of

better governance and supplying basic needs, thereby reducing the underlying causes that enable AQ to recruit from vulnerable populations.

Question. Are there steps the Department should take to better coordinate its efforts to combat terrorism with those of other Federal departments and agencies?

Answer. The level of interagency coordination that occurs in the global CT fight is greater than it has ever been, but must be continually emphasized and prioritized. To succeed at both the tactical and strategic levels, we must foster a rapid, coordinated, and effective CT effort that reflects the full capabilities and resources of our whole government. I will continually emphasize the need for transparency and interagency communication and prioritize the existing NSS-led CT planning and decisionmaking venues.

SPECIAL OPERATIONS PERSONNEL MANAGEMENT

Question. Vice Admiral McRaven, USN, Commander of Joint Special Operations Command, has argued that the Commander of U.S. Special Operations Command (SOCOM) should have greater influence on special operations personnel management issues including assignment, promotion, compensation, and retention of Special Operations Forces. One proposal would modify section 167 of title 10, U.S.C., to change the role of the SOCOM Commander from “monitoring” the readiness of special operations personnel to “coordinating” with the Services on personnel and manpower management policies that directly affect Special Operations Forces.

What is your view about the authority of Commander, SOCOM in this regard?

Answer. I support the coordination between SOCOM and the Services related to personnel issues. To improve this coordination, DOD Directive (DODD) 5100.01, “Functions of the Department of Defense and Its Major Components,” was published in December 2010. Currently, subject to the authority, direction, and control of the Secretary of Defense, Commander SOCOM, is responsible for, and has the authority necessary to conduct, in addition to those specified, all affairs of command relating to special operations activities, including: coordinate on Military Department and Military personnel management policy and plans as they relate to accessions, assignments, compensation, promotions, professional development, readiness, retention, sustainment, and training of all Special Operations Forces personnel. This coordination shall not interfere with the title 10 authorities of the Military Departments or Military Services.

SPECIAL OPERATIONS ENABLING CAPABILITIES

Question. The Commander, SOCOM, has described the “non-availability” of enabling capabilities as SOCOM’s “most vexing issue in the operational environment.” The 2010 Quadrennial Defense Review (QDR) sought to balance previously mandated growth in Special Operations Forces with additional enabling capabilities.

What do you believe are the greatest shortages in enabling capabilities facing Special Operations Forces?

Answer. In the recent past, rotary wing lift has been one of the special operations community’s biggest shortfalls. The Department is mitigating these shortages by growing SOF forces through fiscal year 2015 by several thousand personnel and adding additional rotary wing units to SOF.

Question. Do you believe additional enabling capabilities, beyond those mandated by the QDR, are required to support Special Operations Forces?

Answer. It is my understanding that the Services and SOCOM are increasing enabling capabilities as mandated by the QDR. The Force Sufficiency Assessment should inform our senior leaders in deciding whether more enabling capabilities are needed.

Question. Do you believe the process for Special Operations Forces to request enabling capabilities from the Services, when required, should be formalized? If so, how?

Answer. This process is formalized in the Global Force Management Board (GFMB) Force Allocation process. COCOMs submit their SOF and enabling capability rotational requirements annually through the GFMB. The COCOMs also submit their emergent SOF and enabling capability requirements as a request for forces through the force allocation process.

Additionally, it is my understanding that SOCOM is incorporating SOF-enabler requirements in the Strategic Analysis products, which support senior-leader force development decisionmaking, and the Services are integrating SOF-enabler support into their Force Generation Models.

SPECIAL OPERATIONS MISSIONS

Question. In recent years, Special Operations Forces have taken on an expanded role in a number of areas important to countering violent extremist organizations, including those related to information and military intelligence operations. Some have advocated significant changes to SOCOM's title 10 missions to make them better reflect the activities Special Operations Forces are carrying out around the world.

Do you believe any modifications to SOCOM's title 10 missions are appropriate? If so, what modifications would you suggest?

Answer. I believe SOCOM's title 10 authorities are structured properly and that no modifications are required at this time.

INTERAGENCY COLLABORATION

Question. The collaboration between U.S. Special Operations Forces, general purpose forces, and other U.S. Government departments and agencies has played a significant role in the success of counterinsurgency and counterterrorism operations in recent years. However, much of this collaboration has been ad hoc in nature.

What do you believe are the most important lessons learned from interagency collaboration on counterinsurgency and counterterrorism operations in Afghanistan, Iraq, and elsewhere?

Answer. Information sharing, leveraging the strengths of interagency partners, and collaboration during the planning and execution of operations has led to increasingly successful results. Organizationally, the innovation of forming purpose-built task forces that draw upon expertise from among the interagency community has provided a high level of agility and efficiency in the conduct of civil-military operations. The practice of flattened, agile communications, extensive senior leader involvement across the U.S. Government and allies, and leveraging information dominance provided by these subject matter experts and their systems are among our key lessons learned.

Question. How do you believe these efforts can be improved?

Answer. Preserving the lessons learned of the interagency task force in doctrinal publications, properly resourcing future task forces, continuing our efforts to raise the state of the art of intelligence and operations fusion, and applying the lessons learned in future challenges will be among the ways we continue to improve upon the many hard fought insights made during the last decade. Our ability to address future complex challenges through the application of faster, flatter interagency organizations will be key.

Question. How can the lessons learned in recent years be captured in military doctrine and adopted as "best practices" for future contingency operations?

Answer. Codifying our work is key. I believe it is critical that doctrinal publications such as Joint Pub 3-08, "Interagency, Intergovernmental Organization, and Nongovernmental Organization Coordination During Joint Operations" capture the best practices of these horizontal interagency teams.

Our centers of and joint excellence are charged with making changes institutional across the military, and they will do this by integrating doctrine, organization, training, materiel, leader development and education, personnel, and facilities across all levels of command, from Joint Force Commanders to component commands to the unit level.

CAPABILITIES OF SPECIAL OPERATIONS FORCES AND GENERAL PURPOSE FORCES

Question. The 2010 Quadrennial Defense Review called for increased counter insurgency, counterterrorism, and security force assistance capabilities within the general purpose forces. These missions have traditionally been within the purview of Special Operations Forces.

What actions, if any, do you believe need to be taken in order to allow special operations and general purpose forces to successfully share these missions in the future?

Answer. I believe the 2010 QDR's strategic shift toward expanding general purpose forces' capabilities and capacity for these contingencies makes sense. The overall flexibility of our Armed Forces can be greatly improved by investing in key enablers within our conventional force, such as strengthening and expanding capabilities for security force assistance; increasing the availability of rotary-wing assets; expanding manned and unmanned aircraft systems for intelligence, surveillance, and reconnaissance; improving counter-improvised explosive device capabilities; and enhancing linguistic, cultural, counterinsurgency, and stability operations competency and capacity.

Question. Are there certain mission areas that should be reserved for Special Operations Forces only?

Answer. Special Operations Forces are a unique component of our U.S. Armed Forces that are trained to conduct operations in areas under enemy control or in politically-sensitive environments, including counterterrorism, unconventional warfare, direct action, special reconnaissance, foreign internal defense, and counter-proliferation of weapons of mass destruction. In such environments, Special Operations Forces provide a unique and essential capability.

LIBYA

Question. Do you support the limited U.S. military mission in Libya?

Answer. Yes. We are operating in Libya as a part of an international coalition enforcing United Nations Security Council Resolution (UNSCR) 1973. Our role is to support and assist our partners in preventing the mass killing of innocent civilians in Libya. The U.S. military provides unique capabilities to this effort such as electronic warfare; aerial refueling, intelligence, surveillance and reconnaissance support, and unmanned strike drones. In my view, we should maintain pressure until the goals agreed by NATO allies and partners are met.

Question. Do you support broadening the military mission to include regime change?

Answer. The goal of our military effort, and the mandate of the UN resolution, is very clear: we are protecting the Libyan people. I believe the regime's attacks on its own people will continue unless Colonel Qadhafi relinquishes power, and that such attacks will dramatically increase if pressure is removed. To this end, while to my knowledge forced regime change is not specified in the military mission, this mission complements other instruments of power and will add significant pressure on Colonel Qadhafi over time to step down.

Question. Do you believe the United States should provide arms and training to the Libyan rebels?

Answer. Since the purpose of our military action is grounded in UNSCR 1973, which specifies protection for the Libyan people in population centers like Benghazi from a massacre at the hands of Colonel Qadhafi's forces, any such assistance should be for that purpose. Because this is not a unique U.S. capability, and we are heavily engaged in other locations, I believe other countries should be the first to provide such assistance.

ARAB SPRING

Question. The Arab Spring has changed—and will likely continue to change—the political and military dynamics in the Middle East and North Africa for many years to come. These changes may require the United States to adjust our military-to-military and defense civilian relations engagements in this region.

In your personal view, what adjustments—if any—should be made to U.S. military-to-military and defense civilian relations in the region?

Answer. It is clear this is a moment of profound transformation and change in the Middle East and North Africa. People in this region seek greater individual rights, political reform, and economic opportunities. These calls for reform are gaining momentum across the region and are likely irreversible. Although we can expect instability as this region transforms, we have a unique opportunity to support these reform movements through our military relationships.

Military-to-military relationships offer important policy influence opportunities with our partners. We have very strong relationships with our military partners in the region, which has helped us keep pace with the transitions and to be in position to offer advice and assistance. A good example of this is our relationship with the Egyptian Military and their Supreme Council of the Armed Forces (SCAF). Throughout the political transition in Egypt, we have kept in close contact with Field Marshall Tantawi (Minister of Defense), Lieutenant General Enan (Chief of Defense Forces) and other members of the SCAF. These personal relationships have allowed us to engage on behalf of the U.S. Government and keep track of the events in Egypt.

Although our military relationships throughout the region are strong, these reform movements give us an opportunity to review our security cooperation and assistance policies to ensure they support and complement these democratic transitions. We are working closely with OSD and our COCOMs to review our programs and policies and ensure they help our partners continue to develop military forces that respect the rule of law and human rights.

STRATEGIC COMMUNICATIONS AND INFORMATION OPERATIONS

Question. Over the past decade, DOD has funded an increasing number of military information support operations and influence programs. While the Department does not have any separate budget documentation outlining its strategic communication activities, GAO reports that DOD “spent hundreds of millions of dollars each year” to support its information operations outreach activities. Many of these programs are in support of operations in Iraq and Afghanistan, but Military Information Support Teams (MISTs) from SOCOM are also deploying to U.S. embassies in countries of particular interest around the globe to bolster the efforts of the Department of State and the U.S. Agency for International Development. Further, the geographic COCOMs—at the theater and regional level—are moving into this operational space.

What are your views on DOD’s military information support operations and influence programs?

Answer. DOD communication strategy and the unique capabilities of Military Information Support Operations play an important role in DOD communications efforts. I view Military Information Support Operations as traditional military activities that a global combatant commander uses to support Theater Security Cooperation and underpin the essential shaping operations required to support achievement of Theater Campaign Plan objectives, and (if needed) contingency operations in an area of hostilities. Influence programs and activities are one method by which DOD can support U.S. foreign policy objectives. In a world dominated by information purveyors and consumers, information-related capabilities have grown significantly in importance. Through Military Information Support Operations, we have a tremendous opportunity to shape the environment in support of a broad range of activities to include security cooperation and deterrence efforts. At the same time, it is critical that such activities be conducted in a synchronized manner with other U.S. Government departments.

Question. What was your experience with these types of operations in your capacity as the Commander of NORTHCOM?

Answer. NORTHCOM uses multiple communication methods to reach audiences outside the borders of the United States that are within our area of responsibility. We have used web sites, magazines, personal engagements, and blogs as tools, and have worked hard to improve internal DOD (and to some extent, external) understanding of the best ways, including the most appropriate messages, to communicate publicly about our partnership with Mexico, in particular. These operations are vital tools for enhancing military-to-military relationships and achieving our Theater Campaign Plan goals. Of course, these have to be well-integrated with other U.S. agencies, the Country Teams, and neighboring global COCOMs to ensure a whole-of-government effort.

Question. In your view, are DOD’s programs adequately integrated into overall U.S. foreign policy activities?

Answer. Every effort is made to integrate DOD programs into U.S. foreign policy activities. A “whole-of-government” approach is critical in achieving U.S. foreign policy objectives. DOD’s information and influence activities support DOD policy guidance and military objectives established by a theater’s combatant commander. Activities conducted outside areas of hostility are often led by and always coordinated with our interagency partners. Activities conducted inside areas of hostility are similarly coordinated when they touch other activities of the U.S. Government or other activities of partner nations.

Question. In 2005, al Qaeda’s Ayman al-Zawahiri declared that “We are in a battle, and more than half of it is taking place in the battlefield of the media.” Last year, a non-partisan study highlighted the lack of a U.S. strategy to counter radical ideologies that foment violence.

In your view, what are the appropriate roles of DOD, the Intelligence Community (IC), and the State Department in information operations to counter violent extremist ideology?

Answer. Ultimately, it is our collective actions that send the strongest messages to populations across the globe regarding radical ideologies and extremist groups. However, DOD also works closely with the CIA, the Department of State (principally its Center for Strategic Counterterrorism Communications), and the National Counterterrorism Center, in an interagency effort to coordinate programs and deconflict activities aimed at delegitimizing radical extremist ideology and its messages. The respective roles of all government departments and agencies involved in this campaign are defined by their legal authorities, institutional functions, and operational capabilities. DOD’s global presence and outreach opportunities enable it to engage with local populations and develop relationships with credible interlocu-

tors to counter the messaging and discredit the appeal of violent extremist movements.

Question. In your view, what is the most effective means to counter radical ideologies that foment violence?

Answer. I believe that the most effective means to counter radical extremist rhetoric is through delegitimizing the leaders and ideology behind it to the point that these movements collapse under the weight of their own contradictory messages and actions. This is a war of ideas and ideals, and optimally moderating ideas are communicated by local voices. Our activity in this area must be persistent and long-term, focused foremost on clearly communicating our strategic narrative—our national interests, values, and policies—through both words and actions. An essential component of this effort is an adaptive communication framework that enables leaders at all levels to send coherent messages through credible messengers to key audiences using mediums that resonate at the right time. Our overarching objective is to truthfully and consistently demonstrate the efficacy of our policies and values, influencing our intended audiences to challenge and ultimately reject the sociopathic inducement to terrorism and violence that radical Islamist ideologies propagate.

Question. Defense Secretary Gates launched the Minerva Program in 2009 to develop deeper social, cultural, and behavioral expertise for policy and strategy purposes in the Middle East and the Far East. What do you believe this program contributes to broader DOD and U.S. Government efforts to counter violent extremist groups and their ideologies?

Answer. Although I've not had an opportunity to be closely associated with the Minerva program, I fully endorse the imperative of understanding the perceptions, attitudes, ethnic identities, religious beliefs, and predispositions of the audiences we seek to reach. Indeed, in my role as the NORTHCOM Commander, I have found that our efforts with Mexico have benefitted in proportion to the degree to which we understand Mexican outlooks and sensitivities. The same applies in other parts of the world. Commanders and leaders at all levels need to appreciate not only how radical Islamist ideology and its messages resonate with its intended audiences, but how their own words and actions are processed through foreign cultural receptors. Our ability to effectively challenge the legitimacy of violent extremist groups depends on our appeal to the core interests and values of our target audiences, and that requires an in-depth understanding of their perspectives.

EAST AFRICA—AL QAEDA AND AL SHABAAB

Question. Somalia is a failed state with a weak government unable to project either power or stability or to provide basic services to its people. Somalia is also a training and operations hub for al Shabaab and other violent extremists; pirates operating in the Indian Ocean and Arabian Peninsula; illicit traffickers of weapons, humans, and drugs; and remnants of the al Qaeda East Africa cell that was responsible for the destruction of our embassies in Dar es Salaam and Nairobi in August 1998.

What is your assessment of the threat posed by al Qaeda and al Shabaab to the U.S. and Western interests in East Africa and to the U.S. Homeland?

Answer. I anticipate al Shabaab is planning to conduct attacks against U.S. interests in East Africa. I also expect the May death of al Qaeda emir Osama bin Laden increased al Shabaab's planning against U.S. targets in East Africa, despite its primary focus on internal Somali issues, which include repelling a regionally-backed Transitional Federal Government (TFG) and African Union Mission in Somalia (AMISOM) offensive. I further expect al Qaeda associated al Shabaab foreign-fighters will continue planning attacks against U.S. and Western targets. I remain concerned that individuals who successfully travel to Somalia and receive training from al Shabaab could become further radicalized and return to the United States to conduct operations without al Shabaab's guidance.

Question. What is your understanding of DOD's role in countering the threat posed by al Qaeda in East Africa and al Shabaab?

Answer. Al Qaeda has clearly set their sights on this region as potential safe haven from which to plan and to train for future attacks both within and outside the region. I am increasingly concerned about as well as about al Qaeda's growing influence on and near the Arabian peninsula, including al Shabab's growing ties to al Qaeda and its transregional ambitions.

As we do elsewhere, we have provided—and congressional support will continue to provide—assistance to regional partner nation forces to counter threats from violent extremists in East Africa. DOD assists these efforts in concert with interagency partners, by focusing our approach on populations, security capacity, and basic human needs. Some of that support is also aimed directly at improving counter-ter-

rorism capabilities. I cannot get into the specifics about operations we are supporting, but the work remains critical to our goal of disrupting and dismantling al Qaeda and their affiliates, and is having a significant impact on the terror network's leadership, planning and resourcing efforts.

Question. What is your understanding of DOD's supporting role to other departments and agencies of the U.S. Government in this region?

Answer. DOD supports other U.S. department and agency efforts in the region, such as the Department of State and the U.S. Agency for International Development through the Combined Joint Task Force-Horn of Africa (CJTF-HOA) in Djibouti. The CJTF-HOA's mission in the East Africa region is to build partner nation capacity in order to promote regional stability, prevent conflict, and protect U.S. and coalition interests. These activities directly support each country team's objective of good partner nation governance by focusing on improving its security institutions' professionalism and commitment to human security. As part of the overall "3-Ds" whole-of-government approach—Diplomacy, Development, and Defense—the CJTF-HOA's role is a long-term commitment to regional stability through population-centric activities that strengthen both internal and international counter-violent extremist organization relationships.

Question. What changes, if any, would you recommend to DOD's current role in East Africa?

Answer. I believe we must view Somalia from a regional East Africa perspective, not least because most of the U.S. Government's traditional security cooperation tools are restricted from being used in Somalia. I understand that DOD is reviewing the status of Joint Task Forces to determine if any should transition to more permanent Joint Interagency Task Forces. In addition, U.S. Africa Command is looking at how best to direct our military efforts in the region to work in concert with our interagency partners. The ultimate goal is a strategy under which security assistance, capacity building, cooperation with regional partners, and counterterrorism actions are fully integrated to provide security and stability in East Africa.

YEMEN AND AL QAEDA IN THE ARABIAN PENINSULA

Question. A number of senior U.S. officials have indicated the most significant threat to the U.S. Homeland currently emanates from Yemen.

What is your assessment of the current U.S. strategy in Yemen and what is your understanding of the role of DOD within that strategy?

Answer. The current strategy in Yemen, as outlined in the State Department's fiscal year 2011 Mission Strategic Plan, remains our best option for achieving a stable Yemen, one in which violent extremists cannot operate. The near-term goal of containing and degrading al Qaeda in the Arabian Peninsula (AQAP), while pursuing long-term initiatives to create a stable Yemen that can provide internal security, remain valid.

DOD's role within this strategy is two-fold. First and foremost, U.S. Central Command works with interagency partners to build Yemen's counterterrorism (CT) capacity and enhance CT partnerships. Separately, select elements work with the Yemeni Government to disrupt near-term threats to the U.S. Homeland. This effort is intended to provide time and space for the Yemeni security forces to increase their effectiveness and eventually eliminate Yemen as an al Qaeda safe haven.

Question. Given the ongoing political upheaval and splintering of the military in Yemen, what are your views on the United States continuing to provide security assistance—most significantly DOD section 1206 funding—to Yemeni counterterrorism forces?

Answer. My understanding is that, given the growing AQAP presence in Yemen, its threat to the Homeland, the ongoing unrest that has already weakened the Yemeni Government and the economy and allowed AQAP to expand its influence, we continue to closely evaluate our security assistance programs in Yemen—particularly those provided under section 1206. The Republic of Yemen Government currently remains a critical partner in the war against al Qaeda, and we remain particularly alert to the continued and growing threat to the Homeland from AQAP. I understand that we believe the likelihood of continued counterterrorism cooperation with the Yemeni Government will remain high during and after any future political transitions, but are prepared to reevaluate our partnership as necessary to address the changing military situation.

DEPARTMENT OF DEFENSE COUNTERNARCOTICS ACTIVITIES

Question. On an annual basis, DOD's counternarcotics (CN) program expends approximately \$1.5 billion to support the Department's CN operations, building the capacity of certain foreign governments around the globe, and analyzing intelligence

on CN-related matters. In a recent GAO report, GAO found that DOD “does not have an effective performance measurement system to track the progress of its counternarcotics activities.” This is the second such finding relating by GAO to DOD CN in the last decade.

What is your assessment of the DOD CN program?

Answer. Drug trafficking and associated organized crime are a multi-dimensional threat to the United States. In addition to the impact on our Nation’s public health and economy, drug trafficking and other forms of transnational organized crime provide a funding source for terrorists and insurgents, undermine legitimate government institutions, and contribute to international instability.

As the Commander of NORTHCOM, I have had the opportunity to work with the DOD’s interagency and foreign partners to ensure that our counternarcotics programs achieved positive results that were aligned with the goals of the National Security Strategy and the National Drug Control Strategy. If confirmed, I look forward to applying my experience in North America to the global DOD counternarcotics program.

Question. In your personal view, should DOD continue to play a role in stemming the flow of illegal narcotics?

Answer. Based on my experience, confronting this issue requires that all agencies work closely together to confront the flow of illicit narcotics. This whole-of-government approach has been critically important to the progress we have made since the 1980s and should continue. While the effort should largely be led by law enforcement, DOD has unique capabilities to bring to bear to this important effort. Moreover, DOD’s existing partnerships with countries throughout the world can help support U.S. Government efforts to confront this problem.

Question. In your position as the Commander of NORTHCOM, what was your assessment of the DOD CN program as it related to Mexico and the Caribbean?

Answer. The DOD CN program is critical to the success of NORTHCOM efforts in both Mexico and the Caribbean. Resourcing has improved over the last year, which has considerably improved our ability to assist our Mexican partners in their struggle against TCOs. Mexican security organizations are gradually transforming from a force principally focused on natural disasters into one able to integrate intelligence and operations in support of law enforcement operations that fully respect human rights and the rule of law. Counternarcotics funding is a key enabler of that effort. Recognizing that the threat posed by TCOs extends well beyond drugs, and that there are complex challenges associated with defeating them, future increased collaboration with mission partners and adequate resourcing are essential.

Question. In your position as the Commander of NORTHCOM, were there any activities that you had hoped to be able to conduct using DOD CN funding, but were not able to do and that you, if confirmed, would recommend DOD seek the authority to conduct?

Answer. Current authorities are appropriate and sufficient for successful execution of the NORTHCOM counternarcotics mission and the support we provide to our mission partners. Should I be confirmed, and should my view change based on the evolution of our relationship with regional partners or the perspectives I gain as Vice Chairman of the Joint Chiefs of Staff, I will work with the Committee to suggest potential improvements.

INTERNATIONAL PEACEKEEPING CONTRIBUTIONS

Question. In testimony before the House Committee on Foreign Affairs on July 29, 2009, Ambassador Susan Rice, U.S. Ambassador to the United Nations, stated that the United States “is willing to consider directly contributing more military observers, military staff officers, civilian police, and other civilian personnel—including more women I should note—to U.N. peacekeeping operations.”

What is your view on whether the United States should contribute more military personnel to both staff positions and military observers in support of U.N. peacekeeping operations?

Answer. In my previous duty as director for Strategic Plans and Policy on the Joint Staff, I had the privilege of concurrently serving as senior member of the U.S. delegation to the U.N. Military Staff Committee. In that role, I gained a first-hand appreciation of the valuable contributions our members make in support of U.N. peacekeeping missions. Keeping in mind our continuing troop commitments in Iraq and Afghanistan, I believe the United States can and should consider assigning a modest number of additional personnel to peacekeeping missions. Even in small numbers, U.S. members make a special contribution to these activities by virtue of their experience, training, and special skills.

Question. What are the advantages and disadvantages of contributing additional military personnel to U.N. operations?

Answer. Some of the compelling benefits of providing U.S. personnel to these missions include:

- Delivering combat-tested expertise in logistics, intelligence, planning, and other key military functions where they are most needed;
- Providing our members with valuable experience in working shoulder to shoulder with international troops—a critical skill at the heart of our operations in Afghanistan, Iraq, and elsewhere; and
- Sending an unmistakable signal that the United States values U.N. peacekeeping operations—and because they are far more cost-effective than unilateral American interventions.

Among potential disadvantages, I would cite our significant troop commitments to Iraq and Afghanistan, which take priority and continue to subject our force to stress. I would also point out that, in some cases, U.S. personnel on the ground are not what a U.N. mission most needs. Local sensitivities will sometimes lead us to contribute to peacekeeping in other, less visible ways.

Question. If confirmed, would you support identifying methods through which the DOD personnel system could be more responsive to requests for personnel support from multilateral institutions like the United Nations?

Answer. The personnel management systems of our armed services do not perfectly align with the needs of multinational organizations like the United Nations. If confirmed, I would explore alternate mechanisms to respond to the requests of these institutions within the demands of our ongoing operations elsewhere in the world. In particular, we should examine how our Reserve components, whose personnel have recently delivered specialized, hard-to-find skills to Iraq and Afghanistan with such distinction, can make a greater contribution in this area.

GLOBAL PEACE OPERATIONS INITIATIVE

Question. The Global Peace Operations Initiative (GPOI) was established after the 2004 G8 Sea Island Summit to address growing gaps in international peace operations. In most cases, DOD plays a supporting role in the implementation of this train and equip program.

What is your understanding and assessment of this program?

Answer. GPOI is an important part of our government's strategy to build the capabilities of U.S. partners in peacekeeping operations. Through comparatively small investments in training and equipment, we can help those countries that want to contribute to peacekeeping operations. Over 80,000 military personnel have been trained under GPOI since 2005—a significant achievement. I also consider GPOI to be a strong example of the results we obtain when the Departments of State and Defense collaborate to promote our Nation's security.

Question. Would you support additional DOD contributions—in the form of U.S. military trainers—to support this program?

Answer. From my perspective, GPOI has been successful in building partnership capacity because of its flexibility. The program has given our combatant commanders the freedom to tailor assistance to the specific needs of individual partners. If confirmed, I would consider recommending provision of additional military trainers under the GPOI program subject to the demands of our other operations overseas.

COUNTER THREAT FINANCE

Question. A number of officials in DOD and the IC have called for investing significantly more resources in identifying and tracking the flow of money associated with terrorist networks and illicit trafficking.

What are your views on the role of DOD in counter threat finance activities?

Answer. Terrorists, drug and weapons traffickers, and other adversaries rely heavily on legal and illegal funding sources to support their activities, which routinely work against U.S. interests. It is critical to engage all U.S. Government tools to track and halt the flow of money associated with these organizations. It is my understanding that DOD has capability to identify and disrupt our adversaries' finances while working with our interagency counterparts both in countering terrorism and illicit trafficking. Counter Threat Finance is a cost-effective measure because both licit and illicit finances are often exposed through Western banking and customs processes and are subsequently vulnerable to interdiction, sanctions, and other law enforcement action. DOD is not the U.S. Government lead agency in counter threat finance but, it plays a supportive role by working with other depart-

ments and agencies—and with partner nations—to counter our adversaries' ability to use global financial networks.

Question. In your view, should DOD seek to expand its support to other U.S. Government departments and agencies conducting counter threat finance activities?

Answer. Recent DOD efficiencies decisions directed the creation of a Joint Threat Finance Intelligence Office to consolidate the counter threat finance intelligence functions resident in the Department, and this new office is expected to be operational in fiscal year 2012 under the direction of the Defense Intelligence Agency. Although this effort does not seek to expand DOD's role in CTF, it is my opinion that it streamlines the DOD's efforts with the intent of improving support to other U.S. departments and agencies.

Question. TCOs in Central America and Mexico are having a debilitating impact on the ability of our foreign partners to govern their nations and provide opportunities for their people.

Do you think expanded Counter Threat Finance activities in this region would be beneficial? If so, what role—if any—should DOD play in those activities?

Answer. Expanding the scope and scale of counter threat finance activities in the Central and North American regions would be beneficial, and DOD has a strong supporting role in those activities. NORTHCOM and U.S. Southern Command (SOUTHCOM) are helping to shape and leverage unique capabilities in support of our foreign and domestic mission partners. Rather than attempting to conduct this mission in isolation, the correct approach is to understand the unique intelligence analysis capability that DOD can bring to this effort and then leverage it in support of other lead agencies, such as the Treasury Department. This will enable all stakeholders to achieve unity of effort in gaining leverage against potentially significant TCO vulnerability.

CENTRAL AMERICA AND MEXICO

Question. During a recent Senate Armed Services Committee hearing, the Commander of SOUTHCOM and you—in your capacity as the Commander of NORTHCOM—discussed the increasingly dangerous region along the northern and southern borders of Mexico and the devastating impact TCOs are having on the people and security of southern Mexico, Guatemala, Belize, Honduras, and El Salvador. The United States has increased its assistance in this region, but—to date—DOD has had only a small role.

What are your views on the threats posed by TCOs in this region?

Answer. The corrosive effects of TCO-fostered drug abuse are taking an increasingly severe toll on our economy and our human capital. The presence of TCO distribution networks in many of our cities increases the scale and complexity of gang activity in our urban areas. The pervasive activity and influence of TCOs among our friends and neighbors in North and Central America are directly and negatively impacting their prosperity and security—to include increased violence, decreased real economic activity, and increased drug abuse—which carries its own indirect impact on the United States. The TCOs are vicious in the extreme, better-armed than many police forces, very well-financed, diversified, and increasingly adaptable and sophisticated in their methods. Their criminality extends far beyond drugs to extortion, robbery, kidnapping, trafficking in firearms and persons, and many other illegal activities. Currently, TCOs are using military grade equipment and tactics, including sophisticated assault weapons, sniper rifles, grenades, aircraft, improvised armored vehicles, and even submarines to move illegal drugs.

Question. What is your assessment of DOD's current activities in Mexico and Central America?

Answer. I believe that DOD's current activities in Mexico and Central America are having a positive impact. The scope and depth of our military-to-military relationships with most regional nations, including Mexico, have reached unprecedented levels. While continuing to emphasize the importance of the sovereignty of regional nations, NORTHCOM and SOUTHCOM have dramatically increased senior level interactions, subject matter expert exchanges, human rights training, mobile training teams, intelligence support, and exercises. Within the NORTHCOM area of responsibility, while Mexico deserves great credit for its own work, we are beginning to see the positive effects of our support, to include more Mexican emphasis on intelligence-operations fusion, greater tactical proficiency, jointness, and willingness to work with interagency partners. These nations' security forces are often out-gunned by the TCOs, but they are making progress on all fronts in their ability to confront the serious threat of TCOs.

Question. What changes, if any, would you recommend to DOD's current activities in this region?

Answer. I believe we need to further tighten the already-close cooperation among U.S. Government agencies, to include a willingness to expose regional militaries—beginning with Mexico—to more of the lessons learned and capabilities we have used overseas in the past decade. In so doing, we need to continually reinforce the need to fully respect the sovereignty of our partner nations. We should also support in any way we can the parallel activities that fall under other departments' missions, such as strengthening justice institutions and building strong and resilient communities. Counter threat finance is an area we could better exploit to disrupt the funding streams fueling the TCOs. Finally, I have always believed we are better able to support observance of human rights by building close partnerships with our partners' forces. Our activities in supporting human rights training have been highly successful and I would support more engagements of this type as requested by partner nations, and more freedom to interact with nations that have troubled histories in human rights.

Question. If DOD expands its activities in Mexico and Central America, where—in your view—can U.S. assistance have the greatest impact?

Answer. The greatest DOD impact will be felt in increasing regional militaries' ability to conduct effective intelligence-driven operations—that are fully meshed with law enforcement and that respect human rights and democratic ideals—against the TCOs. This will involve assisting them in improving their ability to integrate intelligence and operations at the highest levels of proficiency while fully respecting their sovereignty in the process.

Question. What is your assessment of the current situation along the border of the United States and Mexico?

Answer. I believe we have made significant progress in securing our southwest border over the past couple years. As a nation, we have joined forces with our Mexican partners in dedicating increased manpower, technology, and infrastructure to counter the corrosive effects of TCOs, and we are seeing positive results. Seizures of contraband (illicit drugs, weapons, and bulk cash) have risen, illegal immigration attempts have decreased, and crime rates in southwest border communities have remained steady or dropped in recent years. In spite of this progress, I remain concerned about TCO-related violence in Mexico and the potential for spillover violence in the United States. If confirmed, my intent is to continue DOD's strong support of our law enforcement partners to enhance their efforts to make the southwest border even more secure.

Question. What changes, if any, would you recommend to the Department's support to civilian agencies operating along the southern border?

Answer. DOD support to civilian agencies operating along the U.S. southern border has a long history of collaboration and is on the rise as NORTHCOM and our Federal partners seek additional opportunities to partner. Through Joint Task Force North, NORTHCOM provides a wide array of training, assistance, and resources to support our partner agencies' efforts. NORTHCOM has made progress over the past year through closer collaboration at senior leadership levels (to include our first-ever staff talks with Customs and Border Protection (CBP) senior leadership), increased agency presence (including CBP, Immigration and Customs Enforcement, Drug Enforcement Administration and others) in NORTHCOM headquarters, increased agency participation in planning, exposure to CBP of tactics and techniques the DOD has accumulated overseas, and direct provision of support. If confirmed, I will emphasize the need to understand partner agency plans, priorities, and concerns to aid the DOD in identifying areas where we can provide additional support to these agencies within DOD's authorities and capabilities.

U.S. ASSISTANCE TO COLOMBIA

Question. Since fiscal year 2000, the United States has provided more than \$7 billion to support Colombia's efforts to counter the threat of narcotics and various insurgent groups.

In light of budget conditions, do you believe more significant reductions in U.S. security assistance to Colombia are advisable?

Answer. A significant reduction in U.S. assistance to Colombia would be ill-advised at this critical juncture of Colombia's fight against TCOs and insurgent groups. Unquestionably, Colombia has made great strides, enabled by U.S. assistance, in its effort against TCOs and the illicit drug trades that feeds them. However, the Colombians have not defeated this threat. Any precipitous drop beyond the United States and Colombia coordinated and synchronized glide path reductions in our assistance is likely to inhibit achievement of a final negotiated settlement.

Question. What options do you believe are available to the United States to counter Iran's growing influence in the Middle East region?

Answer. Nearly every source of instability or other challenge in the Middle East—including support for terrorism, threats to the internal stability of regional nations, weapons proliferation, mischief in Iraq and Afghanistan, and overt and covert threats to Israel—may be traced in some manner back to Iran. We should encourage Iran to take its rightful place in the international community as a force for peace, stability, and prosperity in the Middle East. Until that occurs, however, every element of national and international power should be brought to bear to pressure Iran to change its behavior. Among other possible actions, these elements include:

- Diplomacy to maintain international resolve and overcome objections from both major states and non-aligned nations to taking firmer action, as well as continued attempts to engage Iran in responsible dialogue;
- Economic sanctions to place greater pressure on all sectors of Iran's government;
- Financial sanctions on individuals within Iran who support activity such as weapons proliferation, terrorist activity, and support for groups that target U.S. forces;
- Intelligence sharing to bring Iran's activities into sharper focus;
- Coherent information strategies to expose Iran's destabilizing behavior to the world at large;
- Law enforcement to curtail criminal activity on the part of Iranian surrogates and proxies;
- Close cooperation with regional militaries to ensure Iran is aware that aggression will be met by a capable and coherent response; and
- Continued presence of U.S. forces in the region to bolster our partners and deter Iran from taking irresponsible action.

Question. Do you believe that a protracted deployment of U.S. troops in Afghanistan, beyond 2014, would increase, decrease or have no effect on Iran's influence in the region?

Answer. I do not believe a protracted U.S. deployment in Afghanistan after 2014 would measurably change Iran's influence in the region. Because such a deployment would serve as an irritant to Iran, that nation would support any group in Afghanistan that resists U.S. presence, but this influence would not likely extend far beyond Afghanistan. Should Afghanistan achieve greater stability, it is possible that Iran's influence could slightly decrease. On the other hand, Iran could claim some sympathy within the region under the banner of U.S. occupation.

Question. In your view, does Iran pose a near-term military threat to the United States by way of either its missile program or its nuclear program?

Answer. Iran openly states its intent to use its missile program as a deterrent against the United States as well as Israel and other regional nations. Iranian research, development, and testing continues for short and medium-range missiles, along with its pursuit of an anti-ship ballistic missile capability. These systems pose a near-term threat to U.S. forces in the Middle East, including in the Arabian Gulf region, as well as a threat to our vital interests in the region.

In the near- to mid-term, Iranian space program advancements include dual-use technologies that can be applied to development of long-range ballistic missiles that could carry a nuclear warhead. Iran also continues to pursue activities to improve its ability acquire nuclear weapons. Iran continues to enrich uranium at the Natanz facility in violation of U.N. Security Council resolutions, and has announced its intent to build additional enrichment facilities. In June, Iran announced it would triple its production of 20 percent uranium enrichment at the previously covert Qom enrichment facility by the end of this summer. Additionally, the International Atomic Energy Agency continues to assert that Iran has not provided sufficient answers to the possible military dimensions of their nuclear program.

Question. If you believe either of these programs pose a near-term threat, what in your view are the best ways to address such a threat?

Answer. For the near term, we should deter Iran by continuing robust regional security cooperation efforts in the Middle East region, to include assistance and cooperation efforts with the Gulf States, Iraq, Israel, Saudi Arabia, and other allies and partners. This would include continuing our commitment to air and ballistic missile defenses, shared early warning systems, counterterrorism, and counter-piracy programs, as well as programs to build partner capacity and protect critical infrastructure. Iran should have no doubt that we are committed to regional stability—we should thus maintain presence in the region to reassure our partners and persuade Iran that aggressive actions will come with a high cost.

An Iran with a nuclear weapon is extremely destabilizing and could precipitate a nuclear arms race in the region. I support the current U.S. position—that we cannot accept Iranian acquisition of a nuclear weapon. We should maintain a robust international consensus using all elements of power, including robust sanctions and targeting the finances of those involved in Iran’s nuclear program, to place pressure on Iran to reject its nuclear program and its other destabilizing activities.

Question. Other than nuclear or missile programs what are your concerns, if any, about Iran?

Answer. Malicious Iranian activities throughout the region include the use of proxies to extend Iranian influence into sovereign nations by providing increasingly sophisticated weapons, training, and finance. We are concerned Iran’s activities will negatively impact stability and erode the regional economy. It is important to maintain and strengthen our relationships with our regional partners and allies by continuing to build their security capacity.

Additionally, Iran supports Shia militant groups whose attacks on U.S. forces in Iraq are increasing in frequency, scope, and lethality. Asaib Ahl al-haqq’s recent attack (15 June 2011) is an example of increased lethality based on Iranian technological partnerships.

Meanwhile, Iranian mischief elsewhere in the region continues. They have supported the Taliban with weapons shipments to enable Taliban attacks against U.S. and coalition forces in Afghanistan. Iranian support to Lebanese Hizballah and Syria directly counters U.S. interests regionally and threatens Israel. Finally, the Iranian Revolutionary Guard Corps Navy has the ability to threaten shipping in the Strait of Hormuz. In Iran’s recent Noble Prophet 6 exercises, Iran publicly stated that their intent was to demonstrate the ability to attack U.S. naval forces with anti-ship missiles.

U.S. RELATIONS WITH RUSSIA

Question. U.S. relations with Russia, although previously strained over a variety of issues, have recently improved in some areas.

If confirmed, do you believe that there are any opportunities to improve relations through military-to-military programs, or other actions that you would recommend be taken?

Answer. We have already taken many positive steps to improve military-to-military relations between the United States and the Russian Federation, and we will continue to pursue improved relations in the future. Following the creation of the Military Cooperation Working Group in January 2010, we held several joint exercises, exchanges, and working group meetings to improve cooperation and transparency between our two countries. To illustrate, during 2010, NORTHCOM and NORAD held a joint field training exercise that demonstrated the ability of our forces to work together against airborne terrorist activities (Vigilant Eagle 2010). In my view, we have more work to do in order to make these types of exchanges more a matter of routine and less transactional. However, I look forward to continued exchanges and dialogue between the United States and Russia, which will help formulate and reinforce the trust and respect necessary to promote continued cooperation and increased transparency between our two nations.

Question. In January of this year you indicated that you would like to open a dialogue with Russian military officials and that you would welcome the opportunity to host a Russian counterpart.

If confirmed, would you still welcome dialogue with your Russian counterpart?

Answer. Yes. As the NORTHCOM Commander, I have hosted several Russian delegations, and I strongly believe such exchanges can improve our communications and understanding and enhance our mutual security. Although there is no direct counterpart to the Vice Chairman’s position on the Russian General Staff, I welcome engagement on behalf of the Chairman with the Chief of the General Staff and with other members of the General Staff.

Question. What issues do you consider to be most important to address?

Answer. We have made great strides over the last year on improving the formal lines of communication between the U.S. and Russian militaries. Our communications must remain candid and constructive to ensure continued cooperation in areas such as the Northern Distribution Network in support of the Afghanistan effort and to close gaps in mutual understanding in areas such as missile defense. We should continue to cooperate on combating terrorism and piracy, and there is room for discussions regarding cyber security. Perhaps most importantly, we should make greater strides in establishing routine contact between many different levels of our military forces, as such contacts build trust and confidence and grow future leaders who will be on a familiar basis with their partners. However, this will require greater

willingness on the part of the Russian Federation Armed Forces to allow such communication.

INTEGRATION OF SPACE PROGRAMS

Question. What is your view on the need to institute a more integrated approach to both the military and intelligence sides of the space community?

Answer. I agree with the need to better integrate military and intelligence space capabilities. Members of both communities participate in a number of joint forums and I believe that progress is being made. We are jointly developing programs, and at senior levels have very integral relationships. However, when the needs of either side diverge to the extent that solutions impose impractical cost on the government, consideration should be given to potential independent, but complimentary solutions.

SPACE PROGRAM MANAGEMENT

Question. In many instances the military and intelligence space programs have experienced technical, budget, and schedule difficulties. In some instances these difficulties can be traced to problems with establishing realistic, clear, requirements and then maintaining control over the integrity of the requirements once established. If confirmed as chairman of the JROC you will be involved in determining these requirements.

How in your view can or should the space systems requirements process be improved?

Answer. If confirmed, I will ensure that space system requirements process improvements are considered within the context of the Joint Capability Integration and Development Systems (JCIDS) process review in collaboration with the Director of National Intelligence.

Question. In general, space programs take many years to move from conception to launch. The result is that the technology in the satellites is significantly outdated by the time the satellites are launched and operational, which in turn, can lead to a decision to terminate a program early, and look to a newer technology. This vicious cycle results in significantly increased costs for space systems as sunk costs are never fully amortized.

How in your view can this cycle be addressed?

Answer. I believe shorter cycle times from concept to launch that are based on less complex system requirements can provide more frequent opportunities to infuse technology as it is determined to be mature enough for operational use.

SPACE COOPERATION

Question. Do you support arms control limitations on space capabilities?

Answer. I support the principles outlined in the 2010 National Space Policy, which states that the United States will pursue bilateral and multilateral transparency and confidence-building measures to encourage responsible actions in, and the peaceful use of, space. We should only consider proposals and concepts for arms control measures if they are equitable, effectively verifiable, and enhance the national security of the United States and its allies.

Question. Would you support the United States signing the so-called European Union Code of Conduct for Outer Space Activities?

Answer. I understand that the Department is currently evaluating the European Union's proposed international Code of Conduct for Outer Space as a pragmatic first set of guidelines for safe activities in space. If confirmed, I look forward to continuing this evaluation and considering appropriate steps to establish rules of the road for space operations.

OPERATIONALLY RESPONSIVE SPACE

Question. Do you support the concept of operationally responsive small satellites and what do you see as the most promising opportunities for small satellites?

Answer. The concept of providing operationally responsive space capabilities to address emergent warfighter needs when existing capabilities cannot is sound. I understand that the recent launch of the first Operationally Responsive Space satellite is a good first step along the road to low cost, responsive space capabilities.

Question. Do you believe that smaller less complicated less expensive satellites can play a role in providing resiliency or redundancy for space systems?

Answer. I believe smaller, simpler, lower cost satellites can certainly play a role in providing resiliency for space systems. The specific role will depend on the priority of the mission, the state of technology, and the cost. The potential benefits in-

clude better availability of capability for the warfighter, and a more stable industrial base.

PROMPT GLOBAL STRIKE

Question. DOD is currently working on technologies that if successful could lead to the decision to develop and deploy conventional, non-nuclear, prompt global strike capability.

Do you believe that a prompt global strike capability should be developed and deployed?

Answer. I believe DOD should continue to study and test technologies relevant to Conventional Prompt Global Strike (CPGS) capabilities, with an eye towards future acquisition. Affordable CPGS weapons would provide the Nation with a unique capability to strike time-sensitive targets without using nuclear weapons, so that distant, heretofore inaccessible locations will no longer provide sanctuary to adversaries.

Question. If your answer to the previous question is yes, what is your vision of the capability that should be developed for prompt global strike and the types of targets that would underpin the need to develop the capability?

Answer. CPGS systems could be useful in scenarios involving regional adversaries considering an imminent attack using weapons of mass destruction or against high-priority non-state adversaries. More broadly, CPGS may be the only system available in situations where a fleeting, serious threat was located in a region not readily accessible by other means. Fielding this capability strengthens deterrence by providing a credible means of responding to potential threats without resorting to the use of nuclear weapons.

NUCLEAR WEAPONS

Question. If confirmed, you would become a member of the Nuclear Weapons Council, and work closely with the National Nuclear Security Administration and its Stockpile Stewardship Program.

What, in your view, are the longer-term Stockpile Stewardship Program goals and what are the key elements that should be addressed from a DOD perspective?

Answer. Congress established the Stockpile Stewardship Program with the aim of creating the computational capabilities and experimental tools needed to allow for the continued certification of the nuclear weapons stockpile as safe, secure, and reliable without the need for nuclear weapons testing. The Secretaries of Defense and Energy are statutorily required to certify annually to Congress the continued safety, security, and reliability of the nuclear weapons stockpile.

It is my understanding that stockpile stewardship is effective; today's stockpile has been certified and does not require further nuclear testing. But the stockpile is aging. I understand that there are challenges in identifying and remedying the effects of aging on the stockpile. If confirmed, I am committed to working with the Department of Energy to maintain the critical skills, capabilities, and infrastructure needed to ensure the safety, reliability, and security of the stockpile, within a constrained budget environment.

Question. In your view is the Stockpile Stewardship Program providing the tools to ensure the safety, reliability, and security of the nuclear weapons stockpile without testing and if not what tools are needed?

Answer. If confirmed, I would continue to study options for ensuring the safety, security, and reliability of nuclear warheads on a case-by-case basis, consistent with the congressionally-mandated Stockpile Management Program. It is important that the full range of life extension programs be considered to include: refurbishment of existing warheads, reuse of nuclear components from different warheads, and replacement of nuclear components.

Question. Do you believe the administration's 1251 report sets forth an appropriate road map for the modernization of the nuclear weapons complex and the strategic delivery systems?

Answer. I do believe the administration's 1251 report details the right roadmap for ensuring the future safety, security, and reliability of the nuclear stockpile and associated delivery platforms as well as for modernizing the nuclear weapons complex. The 1251 report details a strong commitment to the nuclear mission and is an important element of assurance that the U.S. deterrent remains strong.

Question. Do you agree that the full funding of the President's plan for modernizing the nuclear weapons complex, commonly referred to as the 1251 report, is a critical national security priority?

Answer. I agree that the full funding of the 1251 report is a critical national security priority. As stated by Secretary Gates and Secretary Chu in their joint 1251

transmittal letter to Chairman Levin, “... an increase of \$4.1 billion in the Department of Energy’s National Nuclear Security Administration (NNSA) budget highlights the administration’s strong commitment to the long-term effort to maintain the safety, security, and effectiveness of the nuclear deterrent and the NNSA infrastructure that supports it. We look forward to continuing the modernization and sustainment of our nuclear weapons delivery systems, stockpile, and infrastructure.”

Question. Prior to completing this modernization effort do you believe it would be prudent to consider reductions below New START Treaty limits for either the deployed or nondeployed stockpile of nuclear weapons?

Answer. It is my understanding that the 2010 NPR Report stated that we would pursue additional reductions in strategic and non-strategic nuclear weapons with Russia, and a key aspect of implementing the 2010 NPR, as with previous such reviews, is conducting follow-on analysis. In determining U.S. objectives in future negotiations with Russia, our subsequent analysis will consider multiple factors in the effort to secure an outcome that best advances U.S. objectives for reductions in the numbers of deployed and non-deployed nuclear weapons, both strategic and non-strategic, in a manner that supports the President’s commitment to strengthen deterrence of potential regional adversaries, strategic stability with Russia and China, and assurance of our allies and partners. I believe that the status of the modernization effort will play a role in these deliberations.

Finally, the Senate noted in its resolution of advice and consent to ratification of the New START Treaty, and certified by the administration, that we must seek to initiate negotiations with Russia on a new arms control agreement by February 2012.

If confirmed, as we complete follow-on analysis required by the NPR, I will support the Department’s continuing assessment of the proper force size and capabilities required for an effective nuclear deterrent.

Question. Without the construction of the Chemical and Metallurgy Research Replacement (CMRR) Facility at Los Alamos and the Uranium Production Facility (UPF) at Y-12 and the other elements associated with the robust plan for modernizing the nuclear weapons complex, do you believe reductions to the strategic hedge would be prudent?

Answer. Without CMRR, UPF, and other elements to modernize the nuclear weapons complex, the United States will not have sufficient infrastructure or capability to sustain the nuclear stockpile, nor will it have the capability to address a critical failure in a weapon type. Without the ability to correct deficiencies and failures, no matter how remote, careful analysis and the potential acceptance of risk would be required to enable or accept reductions in the strategic hedge.

Without construction of CMRR, the Nuclear Weapons Enterprise will not have essential tools to manufacture or assess the special nuclear materials required to produce or rebuild pits and other components. Aging facilities, long past their useful life and already partially condemned, cannot be sustained to meet ongoing requirements for the U.S. nuclear stockpile. CMRR is an important key to sustaining the U.S. nuclear stockpile and enabling reductions to the strategic hedge.

UPF at Y-12 is also key to the ability of NNSA and the National Security Laboratories to sustain the existing U.S. nuclear stockpile and provide capability to rebuild secondaries as long as a nuclear stockpile is required. As at Los Alamos, aging facilities, long past their useful life and already partially condemned, cannot be sustained to meet ongoing requirements for the U.S. nuclear stockpile. UPF is essential to sustaining the U.S. nuclear stockpile and enabling reductions to the strategic hedge.

NEW START TREATY AND FUTURE REDUCTIONS

Question. Earlier this year the New START treaty entered into force. Under the terms of the treaty both sides have 7 years to come into compliance with the treaty.

Do you believe that there is any opportunity to come into compliance in less than 7 years and what would be the conditions under which such compliance could be achieved?

Answer. The treaty requires both parties to ensure their strategic offensive forces are at levels within the treaty’s three central limits 7 years after entry into force, which will occur on February 5, 2018. DOD is undertaking efforts to ensure we will comply with our treaty obligations. For instance, to date, all B-1B bombers have been converted to conventional use and all Minuteman II Intercontinental Ballistic Missile (ICBM) launchers have been eliminated or converted into Minuteman III ICBM launchers, thereby removing these formerly accountable items from being counted under the treaty’s central limits.

Question. Do you believe that reductions in the total number of warheads, both Reserve and operationally deployed, is feasible prior to the expiration of the New START treaty and, if so, under what conditions?

Answer. The Article II central limit of 1,550 warheads applies only to warheads on deployed ICBMs, warheads on deployed SLBMs, and nuclear warheads counted for deployed heavy bombers. Seven years after entry into force (February 5, 2018), the New START treaty requires both State Parties to ensure total numbers of deployed strategic warheads are within this central limit. The DOD is undertaking efforts to ensure the United States will comply with our treaty obligations.

The New START treaty does not address non-deployed strategic nuclear warheads, e.g., nuclear warheads in the U.S. stockpile. Thus, any reductions in these weapons would be subject to a different analytical process that would consider stockpile reliability, modernization of our nuclear infrastructure, and other factors.

NUCLEAR TRIAD MODERNIZATION

Question. Under the NPR, the administration has committed to begin modernization of each leg of the nuclear triad including development of new nuclear cruise missiles and extending the life of nuclear weapons. This process will continue over the next 30 years and longer, and will be very expensive.

If confirmed, would you agree to review the requirements and cost of these initiatives, identify any opportunities for cost savings, and report back to the committee on a periodic basis if you identify such opportunities?

Answer. Yes, this will fall under my responsibilities, if confirmed, as Vice Chairman, and I would be pleased to report any opportunities for cost savings to the committee.

NUCLEAR POLICY

Question. Do you support President Obama's vision for a world without nuclear weapons?

Answer. I share the President's vision to "seek the peace and security of a world without nuclear weapons." I also share the President's commitment to a safe, secure, and effective nuclear deterrent capability as long as nuclear weapons exist.

Question. Do you believe this goal is a viable near- and/or long-term strategic strategy for the United States?

Answer. The President recognized, and I agree, that such an ambitious goal could not be reached quickly and perhaps, as he said, not in his lifetime. He also pledged that as long as nuclear weapons exist, the United States will maintain a safe, secure, and effective arsenal, both to deter potential adversaries and to assure U.S. allies and other security partners that they can count on America's security commitments.

A commitment to a safe, secure, and effective nuclear deterrent means sustaining our nuclear deterrent through life extension programs for warheads and modernization of delivery systems. I believe that providing necessary resources for nuclear modernization should be a national strategic priority.

When considered in total, I believe this is a viable long-term strategy.

Question. In a recent speech at the Carnegie Endowment the President's National Security Advisor stated that the administration is currently "making preparations for the next round of nuclear reductions" and that DOD will "review our strategic requirements and develop options for further reductions in our current nuclear stockpile." He continued by stating that in meeting these objectives, the White House will direct DOD to consider "potential changes in targeting requirements and alert postures."

Do you believe the United States should pursue further reductions? Please explain why or why not.

Answer. I believe the United States should carefully consider future reductions in the numbers of nuclear weapons—deployed and nondeployed, strategic and non-strategic. Ideally, U.S. reductions would be associated with reductions in Russian nuclear forces, and they should continue to support U.S. commitments to stability, deterrence, and assurance. Any reductions in these weapons should consider non-Russian threats, stockpile reliability and other factors in addition to the status of any planned or ongoing negotiations with Russia.

Question. Do you believe it would be prudent for the United States to pursue unilateral nuclear reductions? Please explain why or why not.

Answer. I believe the size and composition of Russia's nuclear forces will remain a significant factor in determining how much and how fast the United States is prepared to reduce its forces; therefore, we should place importance on Russia joining us as we move to lower levels.

Any future reductions must continue to strengthen deterrence of potential regional adversaries, strategic stability vis-à-vis Russia and China, and assurance of our allies and partners.

Question. Do you believe changes to well-established nuclear targeting requirements could negatively impact our ability to assure our allies, to discourage other countries from seeking strategic equivalence with the United States in nuclear weapons, and hedge against future threats and uncertainties?

Answer. I believe the United States is committed to maintaining a credible nuclear deterrent and reinforcing regional security architectures and that we will continue to reassure our allies and partners worldwide of our security commitments to them. I have observed that no significant changes to such DOD policies occur without thorough analysis and review. National Security Advisor Donilon has stated the next round of nuclear reductions will be accompanied by such a review to include targeting policy. If confirmed, I look forward to participating in this review.

FUTURE TECHNOLOGIES

Question. During the Cold War, DOD pursued three key technologies to offset the numerical superiority of Soviet conventional forces: precision guided munitions, stealth technology, and satellite-based navigation. These three technologies have given U.S. forces unparalleled superiority until now. Our technology edge, however, in these areas is beginning to erode.

What do you think are key technologies that DOD should be pursuing in order to maintain a technological edge?

Answer. The Department recently published seven strategic science and technology priorities. I believe focusing efforts in these areas are key to maintaining a technological edge. These priorities include:

- Data to Decisions to reduce cycle time and manpower needs;
- Engineering Resilient Systems for agile manufacturing of trusted and assured systems;
- Cyber Science and technology for effective cyber capabilities;
- Electronic Warfare and Protection to protect across the electro-magnetic spectrum;
- Counter Weapons of Mass Destruction;
- Autonomy for reliable and safe autonomous systems; and
- Human Systems to enhance human machine interfaces.

UNITED NATIONS CONVENTION ON THE LAW OF THE SEA

Question. Do you support U.S. accession to the United Nations Convention on the Law of the Sea?

Answer. Yes, I strongly support U.S. accession to the United Nations Convention on the Law of the Sea as the best possible means for maximizing the rights of our Armed Forces to move freely through and over the world's oceans. I believe that joining the Convention will strengthen our military's ability to conduct operations.

Question. How would you answer the critics of the Convention who assert that accession is not in the national security interests of the United States?

Answer. Accession to the Convention would more permanently secure the global mobility rights that are of vital importance to ongoing and future national security operations and humanitarian assistance missions. From the right of unimpeded transit passage through straits used for international navigation, to reaffirming the sovereign immunity of our warships, to providing a framework for countering excessive claims of other states, to preserving the right to conduct military activities in exclusive economic zones, the Convention provides the stable and predictable legal regime we need to conduct our operations today and in the future. The Convention codifies fundamental benefits important to our operating forces as they train and fight, supports the operational maneuver space for combat and other operations of our warships and aircraft, and enhances our own maritime interests in our territorial sea, contiguous zone, exclusive economic zone and continental shelf. Further, amendments made to the Convention in the 1990s satisfied many of the concerns that opponents have expressed.

Among the vital rights provided by the Convention that accession would place on a more secure footing are:

- Innocent Passage through territorial seas;
- Archipelagic sea lanes passage through island nations;
- Transit passage through, under and over international straits;
- Warship right of approach and visit; and
- Laying and maintaining of submarine cables.

For example, in the ongoing tensions over rights in the South China Sea, the United States is in a weaker position in both bilateral and multilateral discussion by not having ratified the treaty. As another example, absent joining the Convention, we will lose the opportunity to influence key international decisions that will be made in the coming years regarding Arctic resource claims.

Accession would eliminate the need for the United States to assert that vital portions of the Convention addressing traditional uses of the oceans are reflective of customary international law. As the Law of the Sea continues to be developed, there is a need to lock in the Convention's provisions as a matter of treaty law while we still can as a bulwark against customary law drifting in a negative direction. Accession would give the United States a seat at the table as the world's nations deliberate the future direction of the Law of the Sea.

The Convention provides the only internationally-accepted process for nations to establish legal title to a continental shelf beyond 200 nautical miles from their coasts. Only by submitting its claim of an extended continental shelf to the Commission set up under the Convention can the U.S. guarantee international acceptance of its claim to an extended continental shelf off its coasts, including sovereign rights to potentially vast energy resources in the Arctic.

Finally, joining the Convention will enable us to shape the future evolution of the Law of the Sea Treaty by placing U.S. nominees in key positions within important bodies, including those currently interpreting the Convention.

TREATMENT OF DETAINEES

Question. The Constitution, laws, and treaty obligations of the United States prohibit the torture or cruel, inhuman, or degrading treatment or punishment of persons held in U.S. custody.

If confirmed, will you take steps to ensure that all relevant DOD directives, regulations, policies, practices, and procedures applicable to U.S. forces fully comply with the requirements of section 1403 of the Detainee Treatment Act and with Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, DOD Detainee Program, dated September 5, 2006?

Answer. Yes.

BALLISTIC MISSILE DEFENSE

Question. In September 2009, President Obama announced that he had accepted the unanimous recommendation of the Secretary of Defense and the Joint Chiefs of Staff to pursue a Phased Adaptive Approach (PAA) to missile defense in Europe. This approach is intended to defend all of Europe against existing and emerging threats from Iranian missiles, starting this year and increasing in capability with each of its four phases. Phase 4 of the European PAA is intended to provide a capability to defend against long-range missiles that could reach the United States, thus augmenting the existing homeland missile defense capability.

Do you support the Phased Adaptive Approach to Missile Defense in Europe?

Answer. I support the President's policy on European Phased Adaptive Approach and, if confirmed, I will ensure DOD supports the program's full implementation.

Question. In February 2010, DOD issued its report on the first-ever comprehensive review of U.S. ballistic missile defense policy and strategy, the Ballistic Missile Defense Review (BMDR), as required by Congress. The BMDR established a number of policy priorities, including establishing defense against near-term regional missile threats as a top priority of missile defense plans, programs, and capabilities. It also stated the policy of sustaining and enhancing the ability of the Ground-based Midcourse Defense system to defend the Homeland against attack by a small number of long-range missiles by countries such as North Korea and Iran, and of hedging against future uncertainties.

Do you support the policies, strategies, and priorities set forth in the BMDR?

Answer. I support the policies, strategies, and priorities as set forth in the BMDR. If confirmed, I will implement the policy priorities of the BMDR, including sustaining and enhancing defense of the Homeland, while increasing our capability against growing regional threats.

Question. As the Commander of NORTHCOM, you are the combatant commander responsible for the operation of the Ground-based Midcourse Defense (GMD) system to defend the homeland against potential limited missile attacks from nations like North Korea and Iran. The most recent GMD flight test, in December 2010, failed,

and the Missile Defense Agency is working to fully understand and correct the problem that caused that flight test failure.

Do you agree that it is essential to correct the problem that caused the December 2010 flight test failure, and to verify the success of that correction through extensive testing, including flight testing, before continuing production and delivery of additional Exo-atmospheric Kill Vehicles (EKV) for the GMD system?

Answer. Verifying and correcting the problems with the EKVs prior to continuing production is prudent and supports the administration's policy to "fly before you buy" in order to improve reliability, confidence, and cost control of U.S. missile defense systems.

Question. Do you support the continued modernization and sustainment of the GMD system?

Answer. Yes. The United States is currently protected against the threat of limited ICBM attack from states like North Korea and Iran. It is important that we maintain this advantage by continuing to improve the GMD system and ensuring we have adequate capacity to counter limited threats as they evolve.

Question. The United States and NATO are seeking options to cooperate with Russia on missile defense. President Obama has announced that such cooperation would not limit U.S. or NATO missile defense capabilities.

Do you agree that such cooperation could enhance the security of the United States, NATO, and Russia against common missile threats from nations such as Iran?

Answer. Yes, cooperation with Russia would strengthen the effectiveness of U.S. and NATO missile defenses, as well as those of the Russian Federation. In this particular case, effective ballistic missile defenses devalue Iran's ballistic missile arsenal by reducing its confidence that an attack would be successful.

Question. What do you believe would be the security benefits of such missile defense cooperation, and what types of cooperation do you believe would be beneficial?

Answer. Cooperation could offer tangible benefits to the United States, Europe, and Russia in the form of stronger protection against missile threats and a greater insight into our respective missile defense plans, which could strengthen strategic stability. As President Obama stated, this cooperation can happen "even as we have made clear that the system we intend to pursue with Russia will not be a joint system, and it will not in any way limit United States' or NATO's missile defense capabilities." Pursuing a broad agenda with Russia focused on shared early warning of missile launches, technical cooperation, operational cooperation and planning, and joint exercise would be beneficial cooperative efforts.

Question. The Vice Chairman of the JCS is a member of the Missile Defense Executive Board, and the Chairman of the JROC. This gives the Vice Chairman a unique perspective on the oversight and management of the Ballistic Missile Defense System (BMDS), including its requirements component.

Are there additional steps that you believe would make the BMDS more responsive to the operational needs of the combatant commanders, and are there additional steps that you believe would improve the requirements process for missile defense?

Answer. I believe that we must continue to involve the combatant commanders in the acquisition process to ensure that their operational needs are considered as we develop and field systems to support the joint warfighter. To that end, we continually review these processes to ensure that we are doing the best job that we can to support the warfighter. While recognizing that BMD systems developed by the Missile Defense Agency are not subject to the JROC, the unique position of the Vice Chairman as a member of both the Missile Defense Executive Board and JROC provides the oversight to ensure that we are integrating all of the development and requirements of missile defense.

FUTURE OF THE NORTH ATLANTIC TREATY ORGANIZATION

Question. In your view, what existing or new missions should be the focus of NATO's strategic efforts over the next 5 years?

Answer. The focus of NATO's strategic efforts should be to collectively secure our Nations through collective defense, crisis management and cooperative security. NATO must complete its current missions in Afghanistan, Libya, the Mediterranean, off the Horn of Africa, and in the Balkans. We must also maintain the flexibility to respond to emergent threats such as ballistic missiles, nuclear proliferation, terrorism, and cyber attacks.

Question. In your view, how should NATO proceed on the issue of further enlargement of the alliance over the next 5 years?

Answer. This is clearly a decision reserved for NATO Heads of State and Government. However, in accordance with Article 10 of the NATO treaty, I believe that any Transatlantic State that is in a position to further the principles of the NATO treaty and that is willing and able to contribute to the security of the NATO Atlantic area commensurate with its capacity should be favorably considered for NATO membership.

Question. At a NATO Defense Ministers meeting in June, then-Secretary of Defense Gates warned that NATO was at risk of losing U.S. financial support for an alliance “on behalf of nations that are apparently unwilling to devote the necessary resources or make the necessary changes to be serious and capable partners in their own defense.” He criticized the “significant shortcomings in NATO—in military capabilities, and in political will.” He worried that NATO would turn into a “two-tiered alliance” consisting of “those willing and able to pay the price and bear the burdens of alliance commitments, and those who enjoy the benefits of NATO membership.”

Do you share Secretary Gates’ concerns regarding NATO capabilities? Why or why not?

Answer. Yes, I do share former Secretary Gate’s concerns. Most allies (due to limited resources made available to defense ministries) have been forced to make critical choices between spending money on transforming their militaries or on contributing to alliance operations.

Many allies have been able to strike a delicate balance between these two competing demands. However, it has resulted in an overall loss of effectiveness, which initially was minor but has now been compounded by time.

The current economic climate has added to this as all allies envisage budget reductions. This lack of resources is the biggest threat to the alliance’s ability to accomplish its core missions.

Question. What steps, if any, could or should NATO take, in your view, to reduce tensions with Russia?

Answer. I believe that NATO should continue to engage actively and positively with Russia on issues of mutual interest through the NATO Russia Council. This Council serves as a valuable forum not only to discuss issues on which we agree, but also to discuss issues on which we disagree. This engagement has facilitated NATO-Russia cooperation in numerous areas such as counter-piracy, combating-terrorism, non-proliferation, search and rescue at sea, and disaster response. The continuation of this type of cooperation is important not only from a military perspective, but it remains an essential means by which to enhance transparency and therefore avoid or reduce tensions.

Question. What is your view of the Comprehensive Test Ban Treaty (CTBT)? If confirmed, would you advocate ratification of the treaty?

Answer. The CTBT is an important tool that will help counter nuclear proliferation. An in-force CTBT would limit the development of more advanced and destructive nuclear weapons and inhibit the ability of non-nuclear weapons states from developing their own programs. I understand that it has been assessed that CTBT would have no impact on U.S. military confidence in its nuclear stockpile. If confirmed, I would support ratification of the CTBT with adequate safeguards regarding stockpile stewardship and verification.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Vice Chairman of the Joint Chiefs of Staff?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTION SUBMITTED BY SENATOR JOSEPH I. LIEBERMAN

BORDER SECURITY

1. Senator LIEBERMAN. Admiral Winnefeld, Joint Task Force (JTF)-North is the sole Department of Defense (DOD) organization tasked to support the Nation's Federal law enforcement agencies in the identification and interdiction of suspected transnational threats within and along the approaches to the Continental United States (CONUS). While the potential threats vary, they can include narco-trafficking, smuggling, weapons of mass destruction, and other threats to our security. The Open Source Intelligence (OSINT) for Force Protection and Intelligence Analysis program was created in order to research, exploit, analyze, and disseminate unclassified information on cartels and transnational criminal organizations along the U.S./Mexico border. What is your assessment of the OSINT program administered by JTF-North and whether it provides value to our interagency border security and counter-narcotics efforts?

Admiral WINNEFELD. As the U.S. Northern Command (NORTHCOM) Commander, I have seen the important mission contributions that OSINT provides, including those to NORTHCOM's JTF-North component. I understand that funding for the continuation of the OSINT for Force Protection and Analysis program is currently under review, but assure you that the critical merits of this program will be reviewed before a final decision is made. I would defer to Department of Homeland Security for an assessment of the value of OSINT to its border security mission and to the Drug Enforcement Administration for the impact of OSINT on counter-narcotics trafficking.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

HEALTH CARE COSTS

2. Senator MCCAIN. Admiral Winnefeld, in a modest attempt to control DOD's health care costs, former Secretary Gates sought to apply a medical inflation factor to TRICARE Prime enrollment fees for working-age retirees beginning in fiscal year 2013. Unfortunately, our committee balked at that idea, and reported a bill that would permanently tie DOD's hands to annual increases to the annual increase in retired pay, which has been minimal.

TRICARE fees haven't changed since they were established in 1995. At that time, according to DOD, working age retirees paid about 27 percent of their total costs when using civilian care. Today, out of pocket expenses for working age retirees represent less than 9 percent of the total cost of the family's health care costs. Some argue that health care benefits to retirees have been eroded over time. Do you agree?

Admiral WINNEFELD. DOD provides generous health benefits to retirees while maintaining TRICARE enrollment fees that are still well below the inflation-adjusted out-of-pocket costs set in 1995. However, rising medical costs add pressure to the Department's budget, which make modest attempts to control DOD's health care costs applied fairly to veterans necessary.

The health benefits we provide to retirees are a significant part of the military quality of life. This commitment to caring for our men and women in uniform also provides the opportunity to recruit and retain the highest caliber personnel the Nation has to offer. I intend to continue our efforts to identify effective ways to improve the quality and cost-effectiveness of the Military Health System.

3. Senator MCCAIN. Admiral Winnefeld, do you support the administration's modest goal of linking future increases in fees for working age retirees to a factor that relates to rising national medical costs?

Admiral WINNEFELD. I believe that the proposed health care efficiencies, including modest increases in beneficiaries' cost shares, are sensible efforts to control DOD's health care costs while maintaining the same level of care.

If confirmed, I will continue to identify cost-effective improvements to the Military Health System. Such an examination would include consideration of future changes in fees related to national medical costs.

4. Senator MCCAIN. Admiral Winnefeld, do you see the rise in health care costs as a threat to readiness and if so, what would you do or recommend, if confirmed, to address this very serious issue for DOD?

Admiral WINNEFELD. I believe that the rise in health care costs is a threat to readiness, as projected rising costs of medical care could demand an increasing share of a decreasing top line for DOD.

Our uniformed servicemembers make great sacrifices for the Nation and deserve a quality of health care that is both commiserate with their quality of service and ensures they are ready for whatever we ask of them. Additionally, the generous health benefits we provide to their families and retirees are a significant contribution to our ability to recruit, and even more significantly, retain the best our Nation has to offer which directly correlates to our future readiness.

QUESTIONS SUBMITTED BY SENATOR SAXBY CHAMBLISS

CYBERSPACE

5. Senator CHAMBLISS. Admiral Winnefeld, DOD's recently released its report "Strategy for Operating in Cyber-Space" which portrays a bleak outlook for our Nation's network security and highlights the need for increased defensive operations. However, the strategy sidesteps the question of retaliation measures the United States can take against attackers, as well as how to locate the culprits in order to punish them. General Cartwright stated that this strategy is "too predictable" and expressed dismay that it outlined a defensive plan without mentioning an offense. In unveiling the strategy, Deputy Secretary of Defense Lynn disclosed that, in March, DOD discovered that a foreign intelligence service stole 24,000 computer files related to a weapons system under development. While the President has said large-scale attacks such as knocking out a power grid would be subject to full-scale retaliation by the U.S. military, smaller attacks such as data theft and security breaches are far more rampant and serious today and apparently have no defined consequences. What are your thoughts on this issue?

Admiral WINNEFELD. We must ensure our adversaries understand the consequences of a cyber-attack against the United States. As with more traditional domains, we must make a determination of when espionage crosses the line into hostile intent or a hostile act. While it can be more challenging to make this determination in cyberspace, as stated in the President's International Strategy for Cyberspace, when warranted, the United States will respond to hostile acts in cyberspace as we would to any other threat to our country. DOD is prepared to defend U.S. national security interests through all available means, if so directed. At the same time, we are addressing our vulnerabilities in cyberspace and the efforts of state and non-state actors to gain unauthorized access to our networks and systems.

6. Senator CHAMBLISS. Admiral Winnefeld, do you agree that DOD needs an offensive as well as a defensive strategy for cyberspace?

Admiral WINNEFELD. Yes. DOD requires a strategy for cyberspace operations that includes both offensive and defensive components. To this end, the Department must strike a balance between offensive and defensive cyber capabilities. This balance includes continuing with our cyberspace deterrent strategy; collaborating with the interagency community and international partners to increase our cyber security posture; continuing the ongoing executive level interagency review of the current offensive policy; and supporting efforts with the Department of Homeland Security, which protects U.S. networks, to develop the procedures to identify and mitigate threats.

NATIONAL MILITARY STRATEGY

7. Senator CHAMBLISS. Admiral Winnefeld, the statutory functions of the Joint Chiefs of Staff relate primarily to planning, providing advice, and policy formulation, particularly related to the strategic direction of the Armed Forces and strategic plans. In this capacity, not later than January 1st of each odd-numbered year, the Chairman is required to submit to the Secretary of Defense his assessment of the nature and magnitude of the strategic and military risks associated with executing the missions called for under the National Military Strategy (NMS). Not later than

February 15 of each even-numbered year, the Chairman is required to submit to the Senate and House Defense Committees a comprehensive examination of the NMS. While I realize you have been nominated for Vice Chairman, not Chairman, nevertheless you will be involved in these discussions and your views will carry great weight.

With that in mind, I would appreciate your views on our current NMS, whether you believe the Armed Forces are adequately postured and, if not, what changes we need to make to improve our posture with respect to our global responsibilities and global threats.

Admiral WINNEFELD. At this time, I believe the current NMS meets our requirements and is appropriately nested with the National Security Strategy and Quadrennial Defense Review. The Joint Force remains fully engaged executing that strategy. That includes major combat operations in Iraq and Afghanistan, conducting strategic and conventional deterrence, defending the Homeland, countering terrorism and piracy, and operating with our key allies and partners. As U.S. Northern Command Commander, I participated in the development of Admiral Mullen's 2011 Chairman's Risk Assessment, and fully support his conclusion that we face a number of challenges in holding down strategic and military risk in this uncertain security and funding environment. However, based on the growing national security imperative of deficit reduction and how this may impact resources available to DOD, we may need to reexamine our strategy. As Vice Chairman, I will, along with the Chairman, the Joint Chiefs of Staff, and combatant commanders continue to work with the Secretary of Defense to develop a strategic approach that best mitigates these risks including how we posture our forces.

8. Senator CHAMBLISS. Admiral Winnefeld, in light of pending reductions in all aspects of Federal spending including defense, do you have any thoughts on what commitments, responsibilities, and tasks you believe the U.S. military should consider stop doing?

Admiral WINNEFELD. The Department is continuing its Comprehensive Defense Review to ensure our spending decisions are strategy-based, risk-informed, and defend and advance our national interests given the range of threats we face in the current and projected security environment. We are taking a close look at those essential missions we must undertake today and in the future to meet our national security needs. We are also reviewing the capabilities, force structure, posture, and resources required for those missions, considering throughout the process what we should stop doing, or do less of, to not sacrifice the readiness and training of our forces.

In the current environment, I believe we can achieve our financial imperative through a combination of efficiencies and, essentially, "doing less of the same." It goes without saying that the latter will involve increased risk. Should additional funding reductions be mandated, we will likely be forced into a strategic inflection point that would cause us to migrate towards less balance among the "prevent," "prevail," and "prepare" imperatives of the Quadrennial Defense Review, while maintaining our commitment to the "preserve" imperative. The Chairman and I, in close consultation with the Joint Chiefs of Staff and combatant commanders, are closely examining every issue as part of this review, and will provide our military advice on where we think we can assume additional strategic and military risk resulting from reductions in the defense budget.

QUESTION SUBMITTED BY SENATOR KELLY AYOTTE

HIGH MOBILITY MULTIPURPOSE WHEELED VEHICLE RECAPITALIZATION PROGRAM

9. Senator AYOTTE. Admiral Winnefeld, regarding the High Mobility Multipurpose Wheeled Vehicle (HMMWV) Recapitalization Program, the currently submitted P-forms show volumes between 1,300 and 2,900 vehicles expected to go through the program annually with a budget allocation of approximately \$161 million per year. With a target price for HMMWV recapitalization between \$160,000 and \$180,000 each, this would only equate to about 1,000 vehicles recapitalized annually. Can you explain this potential discrepancy? Based on this, what is the expected timeline to complete all 60,000 HMMWVs slated for recapitalization?

Admiral WINNEFELD. The discrepancy in question arises from different cost assessments for each variant of the HMMWV. Specifically, we intend to procure 1,362 Up-Armored HMMWVs (UAHs) in fiscal year 2012 at the unit cost of \$101,000 as shown on the P-form. The vehicle quantity of 2,963 per year depicted for fiscal year

2013–2016 was based purely on non-armored HMMWVs at approximately half the cost of the UAHs per unit.

As indicated on the P-form, the Army was initiating plans for UAH RECAP Modernization effort beginning in fiscal year 2013 to add improved performance and protection to the UAHs which aligns with the \$160,000–\$180,000 referenced in the question. Upon successful completion of the integration and testing of these efforts, the recapitalization of UAHs will migrate to the UAH RECAP Modernization Program. With better knowledge of the scope of this effort, the BES–13 submission will reflect a mix of UAH RECAP Modernization and non-armored HMMWVs.

An ongoing assessment of the state of the HMMWV fleet and available funding will inform the overall vehicle quantity and mix, as well as the final timeline to completion.

QUESTIONS SUBMITTED BY SENATOR SUSAN M. COLLINS

313-SHIP NAVY

10. Senator COLLINS. Admiral Winnefeld, the U.S. Navy currently has the fewest number of ships since before World War I. In fact, the Navy has established a requirement for fiscal year 2024 of having a force of 94 multi-mission large surface combatants, but the Navy's fiscal year 2012 30-year shipbuilding plan projects the Navy will only achieve the 94-ship goal for BMD-capable ships in 2020 and 2012, with force levels declining thereafter. Furthermore, a February 2011 Navy report on Surface Ship Readiness found that 60 percent of the fleet is underway at any given time and 43 percent forward deployed, both of which represent historically high percentages, and negatively impacts material readiness and service life capacity. As national security requirements demand more from our ships, it is increasingly unlikely our surface combatants with programmed 35-year service lives will reach that goal. Do you support the Navy's plan to eliminate the gap between the 285-ship Navy we have today and the 313-ship Navy that has been described by the current Chief of Naval Operations as the minimum number of ships needed to meet the national security requirements?

Admiral WINNEFELD. I support the Navy's current plan to eliminate the gap between the 285-ship Navy we have today and the 313-ship Navy needed to meet the national security requirements of our current strategy. However, I also acknowledge that it may be necessary to adjust our strategy to match the national security imperative of deficit reduction with our investments in national defense. Thus it may be difficult to achieve the 313-ship goal. In any case, I will work to ensure that the Navy's shipbuilding plan continues to provide a battle force capable of meeting our national security requirements and that is properly balanced against risk and cost.

COMBATANT COMMAND MISSILE DEFENSE REQUIREMENTS

11. Senator COLLINS. Admiral Winnefeld, as Vice Chairman of the Joint Chiefs of Staff, you will chair the Joint Requirements Oversight Council (JROC) which is responsible for ensuring our warfighters have the capabilities they need to achieve the National Security Strategy. Many of us are concerned about the number of missiles and ships required to deploy an adequate ballistic missile defense (BMD) for our Nation and our allies. In March 2011, General Mattis testified before the Senate Armed Services Committee that he does not expect his requirements in U.S. Central Command (CENTCOM) for these assets will be fully satisfied now or in the future. He said, "There simply are not enough assets to deal with the global threat." I would anticipate the other combatant commanders in Europe and in the Pacific would say something similar. How will you ensure the combatant commanders' BMD requirements are met through the JROC process?

Admiral WINNEFELD. As a sitting combatant commander, I am intimately aware of both the importance of understanding combatant command equities in the JROC process and ensuring we deliver necessary capabilities to our warfighters. From that experience, I believe involving the commanders in the acquisition process ensures their operational needs are considered as we develop and deploy future systems.

If confirmed, I will have a role in the resourcing of our BMD capability as a member of the Missile Defense Executive Board (MDEB), but specific requirements for BMD fall outside of the JROC and are instead managed by the Missile Defense Agency with MDEB oversight. I also recognize that the Vice Chairman is uniquely suited to ensure combatant command BMD requirements are met as a member of both the MDEB and JROC and through his general involvement in the budget proc-

ess. I look forward, if confirmed, to ensuring we deliver for the warfighter in this valuable mission set.

SHIPBUILDING INDUSTRIAL BASE

12. Senator COLLINS. Admiral Winnefeld, in their fiscal year 2012 budget testimony, former Secretary Gates and Admiral Mullen identified shipbuilding as one of the two components of the defense industrial base that worried them, in particular. Secretary Gates stated, "A number of the Navy ships that were built during the Reagan years will basically reach the end of their planned life in the 2020s, and where the money comes from to replace those ships is going to be a challenge ... there are some tough choices in terms of big capabilities that are coming down the road." Do you agree with that assessment and the importance of sustaining the shipbuilding industrial base?

Admiral WINNEFELD. A healthy industrial base is critical in all areas of defense acquisition to ensure delivery of the industrial capacity and quality necessary to meet our national security requirements. I agree that a number of ships will reach their planned life in the 2020s. The Navy's long-term shipbuilding plan includes retirement of 105 ships from 2020 to 2029. During the same period, the Navy plans to take delivery of 94 ships. Based on the Comprehensive Review and expected defense spending reductions, I will work to ensure that the Navy's shipbuilding plan continues to provide a force capable of meeting our national strategic objectives. As we work through the difficult decisions we will face due to ongoing deficit reduction efforts, maintaining an adequate industrial base must, in my view, remain a priority.

SAFE HAVENS

13. Senator COLLINS. Admiral Winnefeld, on July 17, 2011, Maine lost another one of its proud soldiers, Private First Class Tyler Springmann, to an improvised explosive device that exploded in Afghanistan. Given the tremendous sacrifice that our service men and women are making, I want to be sure that the strategy currently being pursued can work. The President has stated the core goal of the U.S. strategy in Central Asia is to disrupt, dismantle, and defeat al Qaeda in Afghanistan and Pakistan, and to prevent their return to either country in the future. Earlier this year, Admiral Mullen testified that one of the necessary conditions to achieve that goal was to neutralize insurgent sanctuaries in Pakistan, but that insurgent groups currently operate unhindered in those sanctuaries. Yet, General Mattis recently testified that he does not expect Pakistan will reverse its current approach and eliminate the safe havens that exist there. He said that "satisfactory end-states are attainable in Afghanistan, even if the sanctuaries persist." Even if there is a satisfactory end-state in Afghanistan, how can we achieve the President's goal of preventing the return of al Qaeda fighters to Afghanistan and Pakistan so long as they can take advantage of the safe havens enjoyed by the Quetta Shura and the Haqqani network just across the border in Pakistan?

Admiral WINNEFELD. The loss of Private First Class Tyler Springmann and others like him exemplifies the challenges our forces currently face; a challenge exacerbated by sanctuaries in Pakistan and by Pakistan's apparent unwillingness to fully engage these extremist networks.

A satisfactory end state in Afghanistan should make it more difficult for extremists finding safe haven in Pakistan to operate in Afghanistan. We have found that areas in Afghanistan in which security and economic progress are achieved tend to reject the presence of these extremists. Moreover, we intend to continue our efforts to persuade Pakistani leaders that extremist groups operating in Pakistan, including some that exist as proxies of the Pakistani government, pose a threat to regional stability and to Pakistan itself, and should be disrupted and dismantled.

SUCCESS METRICS

14. Senator COLLINS. Admiral Winnefeld, the fiscal year 2012 budget request documents state the top strategic goal for DOD is to prevail in today's wars. I am surprised that the budget documents include only six metrics to measure whether DOD is prevailing in today's war in Afghanistan. Two of the metrics look at the number of trained Afghan security forces. Another metric evaluates whether CENTCOM has the resources to conduct military operations. The last three of the six DOD metrics are tied to contracting actions in theater. I am concerned that most of these metrics fail to address the major challenges in Afghanistan: eliminating the Pakistan safe

havens, reducing corruption, building a robust agriculture economy, and improving governance. The metrics do not even include how many al Qaeda members are present in either country. Given that prevailing in today's wars is the most important goal of DOD, do you believe the current metrics allow you and the rest of the Services to adequately measure success in Afghanistan and Pakistan?

Admiral WINNEFELD. As part of a budget document, the fiscal year 2011 and fiscal year 2012 DOD-wide priority performance goals in the fiscal year 2012 Defense budget are specifically related to business operations and logistics support to overseas contingency operations. The specific metrics for evaluating progress and measuring success in Afghanistan and Pakistan, including the two DOD-assigned objectives, are spelled out in Annex B of the NSC's 2009 strategic implementation plan for Afghanistan and Pakistan.

Examples, among many others, include the extent of militant-controlled areas in Pakistan, the effectiveness of Pakistani border security efforts, measures of population security at all levels including the number of districts or extent of area under insurgent control, the size and capability of the Afghan National Army and Afghan National Police, and effectiveness of Afghan National Security Forces-International Security Assistance Force partnered counterinsurgency operations.

While I believe these metrics, indicators, and submetrics are sufficient, we continue to work with the interagency to refine our criteria as the environment changes.

[The nomination reference of ADM James A. Winnefeld, Jr., USN, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
June 6, 2011.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment as the Vice Chairman of the Joint Chiefs of Staff and appointment to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., sections 601 and 154:

To be Admiral

ADM James A. Winnefeld, Jr., 0000.

[The biographical sketch of ADM James A. Winnefeld, Jr., USN, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF VADM JAMES ALEXANDER WINNEFELD, JR., USN

24 Apr. 1956	Born in Coronado, CA
07 June 1978	Ensign
07 June 1980	Lieutenant (junior grade)
01 July 1982	Lieutenant
01 Sep. 1988	Lieutenant Commander
01 Sep. 1992	Commander
01 Sep. 1997	Captain
01 Oct. 2003	Rear Admiral (lower half)
06 May 2006	Designated Rear Admiral while serving in billets commensurate with that grade
01 Aug. 2006	Rear Admiral
14 Sep. 2007	Vice Admiral
19 May 2010	Admiral, Service continuous to date

Major duty assignments:

Assignments and duties	From	To
Naval Station, Annapolis, MD (Division Officer)	June 1978	Nov. 1978
Naval Aviation Schools Command, Pensacola, FL (DUINS)	Nov. 1978	Apr. 1979

Assignments and duties	From	To
Training Squadron Six (Student)	Apr. 1979	June 1979
Naval Aviation Schools Command, Pensacola, FL (DUINS)	June 1979	June 1979
Training Squadron Two Three (Student)	June 1979	Dec. 1979
Training Squadron Two Two (Student)	Dec. 1979	May 1980
Fighter Squadron One Two Four (Replacement Pilot)	June 1980	Apr. 1981
Fighter Squadron Two Four (Power Plants Branch Officer)	Apr. 1981	Nov. 1983
Naval Fighter Weapons School, San Diego, CA (Quality Assurance Officer)	Nov. 1983	Jan. 1987
Fighter Squadron One Two Four (Replacement Naval Aviator)	Jan. 1987	Apr. 1987
Fighter Squadron One (Operations Officer)	Apr. 1987	Jan. 1990
Joint Staff (Action Officer, EUCOM/CENTCOM Branch, J3)	Feb. 1990	July 1991
Joint Staff (Senior Aide-De-Camp to the Chairman of the Joint Chiefs of Staff)	July 1991	Aug. 1992
Fighter Squadron One Two Four (Student)	Aug. 1992	Jan. 1993
XO, Fighter Squadron Two One One	Jan. 1993	Apr. 1994
CO, Fighter Squadron Two One One	Apr. 1994	Mar. 1995
Naval Nuclear Power Training Command, Orlando, FL (Student)	Mar. 1995	Feb. 1996
Prospective Executive Officer, USS <i>John C. Stennis</i> (CVN 74)	Feb. 1996	Mar. 1996
Naval Reactors, Department of Energy, Washington, DC (Student)	Mar. 1996	Aug. 1996
XO, USS <i>John C. Stennis</i> (CVN 74)	Aug. 1996	May 1998
CO, USS <i>Cleveland</i> (LPD 7)	May 1998	Feb. 2000
CO, USS <i>Enterprise</i> (CVN 65)	Feb. 2000	Mar. 2002
Office of the Vice Chief of Naval Operations (Executive Assistant)	Mar. 2002	July 2003
Commander, U.S. Atlantic Fleet (Director, Warfare Programs and Readiness) (N8)	July 2003	Dec. 2004
Commander, Carrier Strike Group Two	Dec. 2004	June 2006
Commander, U.S. Joint Forces Command (Director of Joint Innovation and Experimentation, J9) ...	June 2006	Aug. 2007
Commander, Sixth Fleet/Commander, Striking and Support Forces NATO/Deputy Commander, U.S. Naval Forces Europe/Commander, Joint Headquarters Lisbon	Sep. 2007	Aug. 2008
Joint Staff (Director, Strategic Plans and Policy) (J5)/Senior Member, U.S. Delegation to the United Nations Military Staff Committee	Aug. 2008	May 2010
Commander, Northern Command/Commander, North American Aerospace Defense Command	May 2010	To date

Medals and awards:

Distinguished Service Medal
 Defense Superior Service Medal
 Legion of Merit with two Gold Stars
 Bronze Star Medal
 Defense Meritorious Service Medal
 Meritorious Service Medal
 Air Medal with First Strike/Flight Award
 Navy and Marine Corps Commendation Medal with one Gold Star
 Joint Service Achievement Medal
 Navy and Marine Corps Achievement Medal
 Joint Meritorious Unit Award
 Navy Unit Commendation with one Bronze Star
 Navy "E" Ribbon with "E" Device
 National Defense Service Medal with one Bronze Star
 Armed Forces Expeditionary Medal with two Bronze Stars
 Southwest Asia Service Medal with one Bronze Star
 Global War on Terrorism Expeditionary Medal
 Global War on Terrorism Service Medal
 Sea Service Deployment Ribbon with one Silver Star and one Bronze Star
 Expert Pistol Shot Medal

Special qualifications:

BS (Aerospace Engineering) Georgia Institute of Technology, 1978
 Designated Naval Aviator, 1980
 Capstone, 2004–3
 Designated Level IV Joint Qualified Officer, 2009

Personal data:

Wife: Mary Alice Werner of Menomonie, WI
 Children: James A. Winnefeld II (Son), Born: 29 November 1995
 Jonathan J. Winnefeld (Son) Born: 11 May 1998.

Summary of joint duty assignments:

Assignment	Dates	Rank
Joint Staff (Action Officer, EUCOM/CENTCOM Branch, J3)	Feb. 90–July 91	LCDR

Assignment	Dates	Rank
Joint Staff (Senior Aide-De-Camp to the Chairman of the Joint Chiefs of Staff) Commander, U.S. Joint Forces Command (Director of Joint Innovation and Experimentation, J9).	July 91–Aug. 92 June 06–Aug. 07	CDR RADM
Commander, Sixth Fleet/Commander, Striking and Support Forces NATO/Deputy Commander, U.S. Naval Forces Europe/Commander, Joint Headquarters Lisbon.	Sep. 07–Aug. 08	VADM
Joint Staff (Director, Strategic Plans and Policy) (J5)/Senior Member, U.S. Delegation to the United Nations Military Staff Committee.	Aug. 08–May 10	VADM
Commander, Northern Command/Commander, North American Aerospace Defense Command.	May 10–to date	ADM

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by ADM James A. Winnefeld, Jr., USN, in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR–228
Washington, DC 20510–6050
(202) 224–3871

COMMITTEE ON ARMED SERVICES FORM
BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A–9, B–4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
James A. Winnefeld, Jr. (Nickname: Sandy).
2. **Position to which nominated:**
Vice Chairman of the Joint Chiefs of Staff.
3. **Date of nomination:**
June 6, 2011.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
24 April 1956; Coronado, CA.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Mary Alice Winnefeld, Maiden name: Werner.
7. **Names and ages of children:**
James A. Winnefeld II; age 15.
Jonathan Jacob Winnefeld; age 13.
8. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

None.

9. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational or other institution.

My wife and I participate in two limited liability corporations (LLC) with her sister, Dr. Sarah Werner of Denver, CO, in ownership of two real estate properties in Breckenridge, CO. One LLC is for a vacation residence that is offered for rent when not being used by the owners and for which my wife and I earned moderate income (\$1,006) in calendar year 2010. The other LLC is for an unimproved lot that we intend to build a vacation residence on. These LLCs are closely-held family entities, and I do not serve on a compensated basis in the management of them. There are no conflicts of interest associated with these arrangements.

10. Memberships: List all memberships and offices held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member (otherwise referred to as a Trustee) of the U.S. Naval Academy Foundation: Athletic and Scholarships Program (a nonprofit organization).

11. Honors and awards: List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

None.

12. Commitment to testify before Senate committees: Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

13. Personal views: Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?

Yes.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–E are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

JAMES A. WINNEFELD, JR.

This 6th day of June, 2011.

[The nomination of ADM James A. Winnefeld, Jr., USN, was reported to the Senate by Chairman Levin on August 2, 2011, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on August 2, 2011.]

[Prepared questions submitted to GEN Raymond T. Odierno, USA, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to re-

cruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?
Answer. No.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. None. In my view, the Goldwater-Nichols Act has been very effective in making the armed services an integrated joint force.

DUTIES AND QUALIFICATIONS

Question. Section 3033 of title 10, U.S.C., establishes the responsibilities and authority of the Chief of Staff of the Army.

What is your understanding of the duties and functions of the Chief of Staff of the Army?

Answer. The Chief of Staff of the Army is the senior military advisor to the Secretary of the Army. In addition to his role as an advisor, the Chief of Staff is responsible for the effective and efficient functioning of Army organizations and commands in executing their statutory missions. The Chief of Staff shall also perform the duties prescribed for him as a member of the Joint Chiefs of Staff under section 151 of title 10.

Question. Assuming you are confirmed, what duties do you expect that the Secretary of the Army would prescribe for you?

Answer. If confirmed, I would expect Secretary McHugh to assign me the following duties:

- (a) Serve as the senior military leader of the Army and all its components;
- (b) Assist the Secretary with his external affairs functions, including presenting and justifying Army policies, plans, programs, and budgets to the Secretary of Defense, executive branch, and Congress;
- (c) Assist the Secretary with his compliance functions, to include directing The Inspector General to perform inspections and investigations as required;
- (d) Preside over the Army Staff and ensure the effective and efficient functioning of the headquarters, to include integrating Reserve Component matters into all aspects of Army business;
- (e) Serve as a member of the Joint Chiefs of Staff and provide independent military advice to the Secretary of Defense, Congress, and the President. To the extent such action does not impair my independence in my performance as a member of the Joint Chiefs of Staff, I would keep the Secretary of the Army informed of military advice that the Joint Chiefs of Staff render on matters affecting the Army. I would inform the Secretary of the Army of significant military operations affecting his duties and responsibilities, subject to the authority, direction, and control of the Secretary of Defense;
- (f) Represent Army capabilities, programs, policy, and requirements in Joint Forces;
- (g) Supervise the execution of Army policies, plans, programs, and activities and assess the performance of Army commands in the execution of their assigned statutory missions and functions; and
- (h) Task and supervise the Vice Chief of Staff, Army, the Army Staff and, as authorized by the Secretary of the Army, elements of the Army Secretariat to perform assigned duties and responsibilities.

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. I have over 35 years of experience in the Army with joint and combined operations. I have commanded at every level from platoon to theater level. I had the distinct privilege to command at the division, corps, and theater level in the Iraq combat theater. I have participated in Operations Desert Shield, Desert Storm, supported the operations in Bosnia as the V Corps Chief of Staff, and deployed to Albania in support of the war in Kosovo. In Iraq, I've had the opportunity to apply the full range of Army, joint, and combined force capabilities against a broad range of complex environments as well as to establish strong civil military relationships to achieve unity of effort. My considerable service in joint as well as Army positions has given me a unique perspective of the Army, its processes and capabilities. The combination of all these things as well as my experience in working with the great young soldiers that we have in the Army today will enable me to lead the Army to meet our current and future missions and requirements.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the Chief of Staff of the Army?

Answer. If confirmed, my tenure as Chief of Staff will be marked by continuous self-assessment of my ability to perform my duties. As I believe necessary, I will enact measures which will improve my ability to lead the Army. It is essential in this complex environment that we continue to learn and adapt to ensure that our skills remain current so we remain viable to meet our future challenges.

Question. What duties and responsibilities would you plan to assign to the Vice Chief of Staff of the Army?

Answer. If confirmed as Chief of Staff of the Army, I would ensure the Vice Chief of Staff is responsible for providing me advice and assistance in the execution of my duties, specifically with regard to manpower and personnel; logistics; operations and plans; requirements and programs; intelligence; command, control, and communications; and readiness.

RELATIONSHIPS

Question. If confirmed, what would be your working relationship with: The Secretary of Defense.

Answer. The Secretary of Defense, as the head of the Department of Defense (DOD) and the principal assistant to the President in all Department of Defense matters, provides guidance and direction to the military departments. If confirmed, I will be responsible to the Secretary of Defense and his Deputy, through the Secretary of the Army, for the operation of the Army in accordance with the Secretary of Defense's guidance and direction. If confirmed, as a member of the Joint Chiefs of Staff, I will serve as a military adviser to the Secretary of Defense as appropriate. I will cooperate fully with the Secretary of Defense to ensure that the Army properly implements the policies established by his office. In coordination with the Secretary of the Army, I will communicate with the Secretary of Defense in articulating the views of the Army.

Question. The Deputy Secretary of Defense.

Answer. The Deputy Secretary of Defense performs such duties and exercises such powers as the Secretary of Defense may prescribe. The Secretary of Defense also delegates to the Deputy Secretary of Defense full power and authority to act for the Secretary of Defense and exercise the powers of the Secretary on any and all matters for which the Secretary is authorized to act pursuant to law. If confirmed, I will be responsible to the Secretary of Defense, and to his deputy, through the Secretary of the Army, for the operation of the Army in accordance with the Secretary's guidance and direction. Also, in coordination with the Secretary of the Army, I will communicate with the Deputy Secretary in articulating the views of the Army. I will work closely with them to ensure that the Army is administered in accordance with the guidance and direction issued by the Office of the Secretary of Defense.

Question. The Under Secretaries of Defense.

Answer. Acting on behalf of the Secretary of Defense, the Under Secretaries perform responsibilities that require them, from time to time, to issue guidance—and in the case of the Under Secretary of Defense for Acquisition, Technology, and Logistics, direction—to the military departments. If confirmed, in coordination with the Secretary of the Army, I will communicate with the Under Secretaries in articulating the views of the Army. I will work closely with the Under Secretaries to ensure that the Army is administered in accordance with the Office of the Secretary of Defense's guidance and direction.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Chairman of the Joint Chiefs of Staff is the principal military adviser to the President, the National Security Council, and the Secretary of Defense. Subject to the authority, direction, and control of the President and the Secretary of Defense, the Chairman plans the strategic direction and contingency operations of the Armed Forces; advises the Secretary of Defense on requirements, programs, and budgets that the combatant command commanders identify; develops doctrine for the joint employment of the Armed Forces; reports on assignment of functions (or roles and missions) to the Armed Forces; provides for representation of the United States on the Military Staff Committee of the United Nations; and performs such other duties as the law or the President or Secretary of Defense may prescribe.

In conjunction with the other members of the Joint Chiefs, the Chief of Staff of the Army assists the Chairman in providing military advice to the President, the National Security Council, and the Secretary of Defense. If confirmed as a member of the Joint Chiefs of Staff, I will provide my individual military advice to the President, the National Security Council, and the Secretary of Defense. If confirmed, it would be my duty as a member of the Joint Chiefs of Staff to provide frank and timely advice and opinions to the Chairman to assist him in his performance of these responsibilities. If confirmed, and as appropriate, I will also provide advice in

addition to or in disagreement with that of the Chairman. I will establish and maintain a close and professional relationship with the Chairman, and I will communicate directly and openly with him on any policy matters impacting the Army and the Armed Forces as a whole.

Question. The Vice Chairman of the Joint Chiefs of Staff.

Answer. The Vice Chairman of the Joint Chiefs of Staff assists the Chairman in providing military advice to the Secretary of Defense and the President. If confirmed, it would be my duty as a member of the Joint Chiefs of Staff to ensure that the Vice Chairman receives my frank views and opinions to assist him in performing his responsibilities.

Question. The chiefs of the other Services.

Answer. If confirmed, as a member of the Joint Chiefs of Staff, it would be my duty to engage in frank and timely exchanges of advice and opinions with my fellow Service Chiefs. I look forward to developing strong working relationships with these colleagues, if I am confirmed.

Question. The combatant commanders.

Answer. Subject to the direction of the President, the combatant commanders perform their duties under the authority, direction, and control of the Secretary of Defense, and are directly responsible to the Secretary of Defense for their commands' preparedness to execute missions assigned to them. As directed by the Secretary of Defense, the Service Secretaries assign all forces under their jurisdiction to the unified and specified combatant commands or to the U.S. element of the North American Aerospace Defense Command, to perform missions assigned to those commands. In addition, subject to the authority, direction, and control of the Secretary of Defense and the authority of combatant commanders under title 10, U.S.C., section 164(c), the Service Secretaries are responsible for administering and supporting the forces that they assign to a combatant command. If confirmed, I will cooperate fully with the combatant commanders in performing these administrative and support responsibilities. I will establish close, professional relationships with the combatant commanders and I will communicate directly and openly with them on matters involving the Department of the Army and Army forces and personnel assigned to or supporting the combatant commands.

Question. The Army component commanders of the combatant commands

Answer. The Army component commanders of the combatant commands exercise command and control under the authority and direction of the combatant commanders to whom they are assigned and in accordance with the policies and procedures established by the Secretary of Defense. The combatant commanders normally delegate operational control of Army forces to the Army component commander. The Secretary of the Army generally delegates administrative control of Army forces assigned to the combatant commander to the Army component commander of that combatant command. The Army component commander is responsible for recommendations to the joint force commander on the allocation and employment of Army forces within the combatant command. If confirmed, I will cooperate fully with the combatant commanders and Army component commanders in performing these responsibilities.

Question. The Secretary of the Army.

Answer. If confirmed, I will establish a close, direct, and supportive relationship with the Secretary of the Army. Within the Army, one of my primary responsibilities as Chief of Staff would be to serve as the Secretary's principal military adviser. My responsibilities would also involve communicating the Army Staff's plans to the Secretary and supervising the implementation of the Secretary's decisions through the Army Staff, commands, and agencies. My actions would be subject to the authority, direction, and control of the Secretary. In my capacity as a member of the Joint Chiefs of Staff, I would also be responsible for appropriately informing the Secretary about conclusions reached by the Joint Chiefs of Staff and about significant military operations, to the extent this would not impair my independence in performing my duties as a member of the Joint Chiefs of Staff. If confirmed, I look forward to working closely and in concert with the Secretary of the Army to establish the best policies for the Army, taking into account national interests.

Question. The Under Secretary of the Army.

Answer. The Under Secretary of the Army is the Secretary's principal civilian assistant. The Under Secretary of the Army performs such duties and exercises such powers as prescribed by the Secretary of the Army. The Under Secretary's responsibilities require him, from time to time, to issue guidance and direction to the Army Staff. If confirmed, I will be responsible to the Secretary and to the Under Secretary for the operation of the Army in accordance with such directives. I will cooperate fully with the Under Secretary to ensure that the policies that the Office of the Secretary of the Army establishes are implemented properly. I will communicate openly

and directly with the Under Secretary in articulating the views of the Army Staff, commands, and agencies.

Question. The Vice Chief of Staff of the Army.

Answer. The Vice Chief of Staff of the Army serves as the principal advisor and assistant to the Chief of Staff. If confirmed, I will establish and maintain a close, professional relationship with Vice Chief of Staff, Army.

Question. The Assistant Secretaries of the Army.

Answer. The Assistant Secretaries of the Army have functional responsibilities that, from time to time, require them to issue guidance to the Army Staff and to the Army as a whole. If confirmed, I will establish and maintain close, professional relationships with the Assistant Secretaries in order to foster an environment of cooperative teamwork between the Army Staff and the Army Secretariat as we address the Army's day-to-day management and long-range planning requirements.

Question. The General Counsel of the Army.

Answer. The General Counsel is the chief legal officer of the Department of the Army. The duties of the General Counsel include coordinating legal and policy advice to all members of the Department regarding matters of interest to the Secretariat, as well as determining the position of the Army on any legal question or procedure, other than military justice matters, which are assigned to The Judge Advocate General. If confirmed, I will establish and maintain a close, professional relationship with the General Counsel to assist in the performance of these important duties.

Question. The Inspector General of the Army.

Answer. The Inspector General is responsible for inspections and certain investigations within the Department of the Army, such as inquiring into and reporting to the Secretary of the Army and the Chief of Staff regarding discipline, efficiency, and economy of the Army with continuing assessment of command, operational, logistical, and administrative effectiveness; and serving as the focal point for the Department of the Army regarding DOD Inspector General inspections and non-criminal investigations, as well as the DOD inspection policy. If confirmed, I will establish and maintain a close, professional relationship with the Inspector General of the Army to ensure effective accomplishment of these important duties.

Question. The Judge Advocate General of the Army.

Answer. The Judge Advocate General is the military legal advisor to the Secretary of the Army and all officers and agencies of the Department of the Army. The Judge Advocate General provides legal advice directly to the Chief of Staff and to the Army Staff in matters concerning military justice; environmental law; labor and civilian personnel law; contract, fiscal, and tax law; international law; and the worldwide operational deployment of Army forces. The Chief of Staff does not appoint The Judge Advocate General, and does not have the personal authority to remove him. This enables The Judge Advocate General to provide independent legal advice. If confirmed, I will establish and maintain a close, professional relationship with The Judge Advocate General as my legal advisor and I will assist him in the performance of his important duties as the legal advisor to the Secretary of the Army.

Question. The Chief of the National Guard Bureau.

Answer. The National Guard Bureau is a joint activity of DOD. The Chief National Guard Bureau is appointed by the President, he serves as a principal adviser to the Secretary of Defense through the Chairman of the Joint Chiefs of Staff on matters concerning non-Federalized National Guard forces. He is also the principal advisor to the Secretary of the Army and the Chief of Staff on matters relating to the National Guard. If confirmed, I will establish and maintain a close, professional relationship with the Chief, National Guard Bureau to foster an environment of cooperative teamwork between the Army Staff and the National Guard Bureau, as we deal together with the day-to-day management and long-range planning requirements facing the Army.

Question. The Director of the Army National Guard.

Answer. The Director, Army National Guard is responsible for assisting the Chief, National Guard Bureau in carrying out the functions of the National Guard Bureau, as they relate to the Army National Guard. If confirmed, I will establish and maintain a close, professional relationship with the Director, Army National Guard to foster an environment of cooperative teamwork between the Army Staff and the National Guard Bureau. This will be essential as we deal together with the day-to-day management and long-range planning requirements facing the Army to sustain and improve the Army National Guard's operational capabilities.

Question. The Chief of the Army Reserve.

Answer. The Chief, Army Reserve is responsible for justifying and executing the Army Reserve's personnel, operation and maintenance, and construction budgets. As such, the Chief, Army Reserve is the director and functional manager of appropria-

tions made for the Army Reserve in those areas. If confirmed, I will establish and maintain a close, professional relationship with the Chief, Army Reserve as we deal together with the Army's day-to-day management and long-range planning requirements in order to sustain and improve the Army Reserve's operational capabilities.

VISION FOR THE FUTURE

Question. What is your vision for the Army of today and the future?

Answer. My vision is of an All-Volunteer Army today and in the future that provides depth and versatility to the Joint Force, is efficient in its employment and provides flexibility for national security decisionmakers in defense of the Nation's interests at home and abroad.

Question. What roles do you believe the Army should play in contingency, humanitarian, and stability operations?

Answer. I believe our Army must maintain the right capabilities and amount of capability (depth) to provide our national leaders with trained and ready forces that can perform missions across the spectrum of conflict. We are capable of executing contingency, humanitarian or stability operations as directed by the President or Secretary of Defense under the control of the appropriate combatant commander.

We are also capable of assisting our international partners in building their own operational capacity. Through theater engagement and Security Force Assistance, we have the capability to increase the capacity of partner nations to uphold the rule of law, ensure domestic order, protect its citizens during natural disasters, and avoid conflicts, which would otherwise require U.S. military support.

Question. Do you see any unnecessary redundancy between Army and Marine Corps ground combat forces, particularly between Army combat battalions, regiments/brigades, and divisions and the equivalent Marine Corps formations?

Answer. No, we each have unique but complementary capabilities that provide the National Command Authority flexibility. We have proven over the last 10 years, specifically, the flexibility and the adaptability of the Army and the Marine Corps to complement each other in a variety of operations and environments.

MAJOR CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges that will confront the next Chief of Staff of the Army?

Answer. In a potentially resource constrained environment, we must:

- (1) Continue to provide trained and ready forces to meet current wartime requirements and other worldwide contingencies;
- (2) Continue to reset the Army to meet future challenges;
- (3) Continue to adapt and develop a more effective and efficient force to meet our Nation's future challenges; and
- (4) Right-size the Army and sustain the All-Volunteer Army by ensuring programs are in place to care for and develop our soldiers and their families.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will continue to work closely with Congress to address these challenges. We will continue to refine and update our training programs to ensure all our soldiers are fully prepared to deploy to combat. We will continue to review our reset, force modernization and acquisition programs in order to more efficiently meet the needs and requirements of today and the future. I will work closely with the Secretary of Defense, the Secretary of the Army, and combatant commanders to identify the capabilities needed to provide depth and versatility to the Joint Force in order to provide more effective and flexible forces for employment. I will continue to adjust our leader development programs in order to develop thinking, adaptable decisionmakers necessary to operate in an increasingly complex and unpredictable environment. I will review our soldier and family programs to ensure we are meeting their needs.

Question. What do you consider to be the most serious problems in the performance of the functions of the Chief of Staff of the Army?

Answer. At this point, I am not aware of any problems that would impede the performance of the Chief of Staff of the Army.

Question. If confirmed, what management actions and timelines would you establish to address these problems?

Answer. I will ensure that management systems are in place. I will continue to monitor and to assess those processes, and I will specifically reinforce and review our management processes to ensure stewardship of the precious resources we are given to accomplish our mission.

I am committed to the wise stewardship of our limited and valuable resources. Having just completed the disestablishment of Joint Forces Command, I understand the tough choices that must be made to operate within fiscal constraints, while minimizing risk to operational capability. If confirmed, I will carry this experience and ethos into this position.

Question. If confirmed, what broad priorities will you establish?

Answer. I will work closely with the Secretary of the Army to lay out the priorities of the Army. Within the framework of the Secretary of the Army's vision, here are my priorities:

- Develop and articulate a vision of the Army that addresses the needs of the Nation;
- Keep faith with our All-Volunteer Force;
- Focus on leader development to ensure our future leaders remain resilient;
- Explore, outline, and implement tangible methods to become more efficient and effective; and
- Reininvigorate the Profession of Arms.

U.S. FORCES IN IRAQ.

Question. If the Government of Iraq were to ask for the continued presence in Iraq of U.S. forces beyond the end of 2011, would you recommend to the President the deployment or retention of additional troops in Iraq beyond the current deadline for U.S. troop withdrawal?

Answer. Based on the information I have available to me now, my personal opinion is that I would recommend that the United States continue to support the Government of Iraq as it assumes responsibility for security. Our assessments indicate that Iraq is well on its way to being capable of providing for its own security, but they must have the opportunity to ensure their systems are fully capable of meeting their needs. If asked by the Government of Iraq, I would recommend a continued presence focused on training and filling any gaps in external security as required, combined with a variety of continued engagements, exercises, and other mutual security arrangements. Our commitment to Iraq is a signal of our commitment to the region, which is closely linked to our national interests.

Question. The Army has recently announced the extension in Iraq of elements of the 25th Infantry Division beyond the normal 12-month deployed limit.

What is your understanding and assessment of this extension and its potential impact on Army, unit, and family morale, well-being, and future rotation cycles?

Answer. As we withdraw from Iraq, there remain some critical requirements and issues that necessitate continuity and experience. I understand that this 30-day extension of the of 25th ID Headquarters specifically, was fully reviewed by U.S. Forces-Iraq (USF-I), U.S. Central Command (CENTCOM), and the former Secretary of Defense and steps were taken to minimize any negative impacts on the soldiers and the families.

Although extensions are always difficult, I expect that this extension may have only a minimal effect due to its relatively short duration and the nature of redeployment. To mitigate the impact when approving the extension, the Secretary of Defense also directed that the maximum number of soldiers, with consideration of special family issues, redeploy prior to the holiday period.

Question. If confirmed, how would you monitor the redeployment of these troops to ensure that the requirements of the U.S.-Iraq security agreement are met and that delay of their return home is avoided?

Answer. This extension was approved by the Secretary of Defense at the request of USF-I and CENTCOM. The Army continually monitors the deployment and redeployment of soldiers rotating or taking leave. If confirmed, we will do everything we can to facilitate the redeployment and ensure that we maintain accountability of all soldiers to ensure their safety and well being while accomplishing the mission. We will monitor the redeployment of these soldiers as we do all others and provide whatever support is needed to U.S. Pacific Command as they redeploy to Hawaii.

Question. Is it your understanding that those soldiers who are extended will be compensated for their additional deployed time in the same manner as those who have been extended in the past?

Answer. Yes, the Army will provide compensation for those soldiers whose deployments are extended in a similar manner to those who have been extended in the past.

Question. What is your understanding of how the Army will address the needs of those families who have incurred nonrefundable expenses based upon original redeployment plans?

Answer. If mission conditions dictate extending soldiers beyond scheduled redeployment dates and families have incurred nonrefundable expenses, the Army has a claims process they can use to address the situation. Additionally, the Army does provide monthly compensation for soldiers who are involuntarily extended.

To mitigate the impact when approving the extension, the Secretary of Defense also directed that the maximum number of soldiers, with consideration of special family issues, redeploy prior to the holiday period.

DEPARTMENT OF DEFENSE EFFICIENCY INITIATIVES AND BUDGET TOP LINE REDUCTIONS

Question. The Army's share of the DOD efficiency initiatives in the near-term is about \$29.5 billion that the Army will keep for reinvestment in its own programs. The Army's plan to achieve these savings is based on reorganizations and consolidations of management activities, deferral of military construction costs, and cancellation of some major weapons programs. DOD has also reduced its planned top-line by \$78.0 billion over fiscal year 2012 to fiscal year 2016 and will achieve this goal, in part, with end strength reductions in the Army.

What is your understanding and assessment of the DOD efficiency initiatives and the additional \$78.0 billion cut to the top line?

Answer. The Army must do its part in our national effort to reduce the Federal budget deficit and improve our economic posture. The Army exceeded Secretary Gates' efficiencies guidance target of \$28.3 billion by achieving over \$29.5 billion in efficiencies and applied these savings to enhance capabilities and improve quality of life for our soldiers and families.

Question. In your view, what are the major risks for the Army associated with these reductions and, if confirmed, how would you propose to manage those risks?

Answer. The projected reductions in the Army's permanent Active-Duty end strength that are part of the DOD's \$78 billion top-line decrease are based on an assumption that America's ground combat commitment in Afghanistan would be reduced by the end of 2014, in accordance with the President's strategy. As we reduce end strength, we must continue to assess the impacts to our current and future requirements. This also applies to our civilian workforce. If I am confirmed, I will continue to review the status of efficiencies with particular focus on areas we assess as medium to high risk of implementing. The Army reviews status of efficiencies with particular focus on areas we assess as low to high risk of implementing. Reviews are conducted monthly to ensure that we are able to evaluate plan development, milestone achievement, and resource execution.

Question. Harvesting savings through process improvements and efficiencies has a mixed record of success in DOD. In your view, how likely is it that the planned savings will be achieved?

Answer. I do know that the Army is working to ensure successful implementation or continuation of all efficiencies and related initiatives. As I understand it, comprehensive Capability Portfolio Reviews and the Task Forces commissioned by the Secretary of the Army and the Chief of Staff on such key topics as the Generating Force, utilization of the Reserve components, and improved installation management are aggressively pursuing these efficiencies. If confirmed, I will be in a better position to determine if the Army's objective will be achieved. I feel strongly, however, that we have to make sure that we achieve real savings through realistic and obtainable methods and goals.

MODULARITY

Question. Modularity refers to the Army's fundamental reconfiguration of the force from a division-based to a brigade-based structure. Although somewhat smaller in size, modular combat brigades are supposed to be just as, or more capable than the divisional brigades they replace because they will have a more capable mix of equipment—such as advanced communications and surveillance equipment. To date, the Army has established over 90 percent of its planned modular units, however, estimates on how long it will take to fully equip this force as required by its design have slipped to 2019.

What is your understanding and assessment of the Army's modularity transformation strategy?

Answer. I know the Army is almost complete with transformation and is currently assessing the effort. I personally believe that modular transformation has increased the Army's ability to meet combatant commander requirements and national security strategy objectives by providing tailored formations and leaders who are accustomed to building teams based on changing requirements. It has enabled us to sustain operations in Iraq and Afghanistan. But after almost 6 years since the begin-

ning of the modularity transition, we must incorporate and capitalize on lessons learned.

Question. If confirmed, what actions or changes, if any, would you propose relative to the Army's modular transformation strategy?

Answer. If confirmed, I will continue to review Army plans and strategies, including the modular transformation strategy, force structure, and modernization to ensure the Army continues to provide the joint force with the best mix of capabilities to prevail in today's wars, and engage to build partner capacity, support civil authorities, and deter and defeat potential adversaries.

Question. What is your understanding and assessment of the employment and performance of modular combat brigades and supporting units in Operations Iraqi Freedom, New Dawn, and Enduring Freedom?

Answer. As the Multi-National Corps-Iraq, Multi-National Force-Iraq, and U.S. Forces-Iraq commander, I was extremely pleased with the employment and performance of the modular brigades. Soldiers from across the combat, combat support, and combat service support formations were able to adapt, change, and react to the ever-changing operational environment. We also learned some key lessons that must be reviewed. If confirmed, we will review and incorporate these lessons into the modular force.

Question. What changes, if any, would you propose to the modular design, the mix of combat and supporting brigades, or modular unit employment to improve performance or reduce risk?

Answer. We are currently working with current and former commanders to examine our organizations to see if they are the best we can provide. We are continuously looking at alternate force designs and force mixes to see how we can improve, in both effectiveness and efficiency, our force structure. If confirmed, I will ensure that we look at span of control and training and readiness oversight paradigms in order to provide the most effective and efficient force to the combatant commanders.

Question. With respect to the Army's modular combat brigade force structure design, General Dempsey's June 2011 pamphlet titled: "CSA's Thoughts on the Army's Future," directs the Army to assess the feasibility of adding a third maneuver battalion to each heavy and infantry brigade where there are only two maneuver battalions now.

What is your understanding and assessment of the need to add a third maneuver battalion to the modular heavy and infantry brigades?

Answer. The Army is currently conducting analysis on this potential organizational change through a deliberate and holistic process. I am personally in favor of a third maneuver battalion based on my experience in combat, stability, and humanitarian missions, but I will wait to see the results of the ongoing analysis in order to make a more informed decision.

Question. If confirmed, how would you propose to implement a decision to add a third maneuver battalion to the heavy and infantry combat brigades? What force structure or capabilities would you propose to reduce in order to increase maneuver forces within the combat brigades?

Answer. If confirmed, I will review the analysis of the modular brigade designs and the associated force mix, including the number and type of brigades. I will discuss this with commanders in order to make an informed decision on the future force structure and design of our combat brigades.

ACTIVE-DUTY END STRENGTH

Question. The Army has increased its Active-Duty end strength over the last several years to meet current, and what was believed to be future, demands of operational requirements. Authorized Active-Duty Army end strength is now 569,400. The Secretary of Defense has announced Army Active-Duty end strength reductions beginning this year through 2014 of 22,000 soldiers followed by another 27,000 beginning in 2015. The fiscal year 2012 budget starts this reduction by requesting 7,400 fewer soldiers.

In your view, what is the appropriate Army Active-Duty end strength needed to meet today's demand for deployed forces, increase non-deployed readiness, build strategic depth, and relieve stress on soldiers and their families?

Answer. I know the Army is continuously assessing the factors that affect end strength including assigned missions, operational demands, unit readiness, soldier and family well-being, Reserve component capability and capacity, and fiscal constraints in order to determine required Active-Duty end strength. If confirmed, I will work with the Secretary of Defense and the Secretary of the Army to determine the appropriate Army Active-Duty end strength based on our National Military Strategy and contributions to the Joint Force.

Question. In your view, what is the appropriate Army Active-Duty end strength needed to meet the likely future demand for deployed forces, maintain non-deployed readiness, ensure ground force strategic depth, and avoid increasing stress on soldiers and their families?

Answer. I am not yet prepared to provide you with an answer on future Army end strength. If confirmed, this will be a priority focus of mine.

Question. Plans for the reduction of Army end strength assumes that the cuts will be made gradually over several years.

What, in your view, are the critical requirements for the management of this end strength reduction to ensure that should strategic circumstances change the cuts can be stopped and, if necessary, reversed?

Answer. End strength reductions should not be automatic. They are conditions based and will require periodic assessment. If confirmed, I will work with Secretary McHugh and the Army leadership to develop a plan that will allow us to accomplish current and projected missions, balance the well-being of soldiers and families, and keep us prepared to meet unforeseen operational demands by retaining the best leaders and sustaining the optimal force structure.

Question. The gradual reduction of end strength may provide a hedge against an unforeseen contingency requiring sufficient and available Army forces, however, savings from the reduction of forces could be realized sooner and with greater long-term advantages with faster implementation.

What, in your view, are the most important advantages and disadvantages of faster end strength reductions?

Answer. I believe the Army's deliberate and responsible draw-down plans should proceed at a pace necessary to ensure mission success, the well-being of soldiers and families, compliance with directed resource constraints and flexibility for unforeseen demands.

The advantage of drawing down faster would be the flexibility to invest in other required areas. The disadvantages lie in the reduced flexibility for meeting unforeseen demands and the ability to maintain the skills and quality of the remaining force.

We want to be able to make sure that we have the force necessary to meet the needs of the National Command Authority.

Question. End strength reductions totaling 49,000 soldiers are likely to require force structure reductions.

If confirmed, how would you propose to reduce Army force structure, if at all, to avoid the problems associated with a force that is over-structured and undermanned?

Answer. I would continue to implement the Total Army Analysis process to ensure Army force structure contains required capability and capacity to meet current and future operational requirements. I am dedicated to ensuring that we have a quality force that is trained and equipped to meet the needs of our future security challenges.

Question. How will these planned end strength reductions impact the Army's plans for overseas basing of its units?

Answer. In my present position, I have not had a chance to examine the potential impact of end strength reductions on overseas basing. If confirmed, I will address this as part of the Army's continuing force structure assessment.

Question. The Army has had two other major post-conflict end strength reductions in the last 40 years: after Vietnam and after Operation Desert Storm.

What, in your view, are the critical elements of the planning and management of a major force reduction to ensure that the Army as a whole is not crippled, impacting ongoing operations or general readiness?

Answer. Today's environment is very different than the one following Operation Desert Storm. There are significant uncertainties in many regions. We are facing a significantly greater number of regional and transnational threats and hot spots that could pose a concern for our national security; a sharp and distinct contrast to the early 1990s. Therefore, end strength reductions must be conditions based, well thought out and executed deliberately and responsibly. The Army's plan should ensure accomplishment of its assigned missions, operational readiness for future demands, and resource constraints while ensuring the sustainment of the All-Volunteer Force.

Question. If confirmed, what actions would you take to ensure that the planning and management of an end strength reduction minimizes the negative impact on the readiness of the Army and soldier families?

Answer. Whatever decisions are made, we must ensure that we have a decisive, quality Army that is trained, ready, and optimally equipped while sustaining a

healthy environment for our soldiers and families which allows them to thrive and grow.

Question. Does the Army have the legislative authority it needs to properly shape the force as part of the personnel drawdown?

Answer. I am not aware of any specific issues, but if confirmed, I will assess this area to ensure the Army has the appropriate authorities necessary. Should I determine the need for changes, I will work with Secretary McHugh and Congress to identify any needed authorities.

STRATEGIC RISK

Question. Do you believe that the extended pace and scope of operations in Iraq and Afghanistan create increased levels of strategic risk for the United States based on the lack of available trained and ready forces for other contingencies?

Answer. It is well known that the extended pace and scope of combat and other contingency operations over the last 10 years have created a demand on our forces that exceeded the previously programmed available mission forces. As the Army looks to drawdown in both theaters and adjust the boots-on-the-ground to dwell ratios, units will have more time to reset, train, and prepare for full spectrum operations. This in turn will allow for greater flexibility to meet our national security challenges.

Question. If so, how would you characterize the increase in strategic risk in terms of the Army's ability to mobilize, deploy, and employ a force for a new contingency? In your view, is this level of risk acceptable?

Answer. The Army would be challenged to generate responsive combat power for an additional unforeseen contingency. A concerted effort to reduce risk created by unsustainably high deploy-to-dwell ratios is required to ensure we maintain a high state of readiness and restore strategic depth in our force given these demands. The Army's plan to reduce this risk to the force is contingent upon achieving sustainable deploy-to-dwell ratios over the long-term, maintaining assured access to the Reserve component, adequately providing for soldiers, civilians, and families, and receiving reliable, timely, and consistent funding to reset depleted equipment sets.

Question. What is the impact of the decision to decrease Army forces committed to Afghanistan on our ability to meet our security obligations in other parts of the world?

Answer. As we continue to reduce our commitments in Iraq and Afghanistan, it allows us the ability to reset and train forces to make them available to meet other world-wide contingencies and thereby reduce the risk. But this will take some time.

Question. How and over what periods of time, if at all, will reductions to Army end strength increase or aggravate this risk?

Answer. Any potential reductions beyond the 27,000 will be thoroughly assessed through our Total Army Analysis modeling efforts to understand the risks involved given anticipated mission requirements. We must be prudent in our approach to budget cuts and ensure we adequately man, train, and equip without hollowing out the force. With tightening budgetary constraints, our intent is to arrive at the right mix of capabilities to meet current demands as well as future challenges and ensure we continue to provide national leaders options in a crisis. We will achieve this by ensuring our forces have the greatest possible versatility while maintaining core capabilities. Any of these reductions must be tied to consideration of the actual drawdown of forces in Iraq and Afghanistan.

Question. If confirmed, what additional actions would you take, if any, to reduce or mitigate this strategic risk?

Answer. As we look to the future, it is my view that we have to develop an Army that provides depth and versatility to the Joint Force, is more efficient in its employment, and provides greater flexibility for our national security decisionmakers. Our efforts must be tied to the National Military Strategy and our anticipated strategic and operational environment.

INSTITUTIONALIZING SUPPORT FOR IRREGULAR WARFARE

Question. A major objective of the Department over recent years has been increasing emphasis on lower-end, irregular, counterinsurgency, and stability-type operations. All of which are areas that place a high premium and demands on Army capabilities. In order to ensure that a rebalance achieves this objective, and perhaps more importantly is then sustainable, Secretary Gates has stressed the need for the Department to "institutionalize and finance" the support necessary for the irregular warfare capabilities that have been developed over the last few years and will be needed in the future.

What, in your view, does it mean to institutionalize capabilities and support for irregular warfare capabilities in the Army?

Answer. Institutionalizing Irregular Warfare means developing the appropriate doctrine, organizations, materiel solutions, leader developments, personnel assignments and facilities (DOTMLPF) into the Army. Thus far, we have institutionalized Irregular Warfare into the Army through our Leader Development, Individual, and Collective Training and Doctrine Development.

Question. What is your understanding and assessment of Army efforts to date to institutionalize and support these capabilities?

Answer. The Army is in the process of creating specified proponents responsible for the institutional management for key tasks associated with Irregular Warfare:

1. The U.S. Army Peacekeeping and Stability Operations Institute at Carlisle Barracks charged with maintaining our doctrine on stability operations and coordinating with other government agencies to facilitate interagency cooperation required to ensure a whole-of-government approach to the conduct of stability operations.
2. The Army Irregular Warfare Fusion Cell at Fort Leavenworth charged with coordinating all IW activities within TRADOC, but in particular with maintaining and training doctrine on counterinsurgency.
3. The U.S. Army Information Operations Proponent at Fort Leavenworth charged with maintaining doctrine on Inform and Influence Activities and conducting a course to train officers specifically on information operations.
4. We are creating a proponent for Cyber/Electromagnetic Activities at Fort Leavenworth to write doctrine for Cyber/Electromagnetic Activities and manage the entire DOTMLPF process for Cyber/EM.
5. The Security Force Assistance Proponent provides input on working by, with and through host nation security forces to increase our partners' capability and capacity. This proponent is located at Fort Leavenworth, KS.

From a doctrine standpoint we have made significant strides in creating a mindset that treats all of the above mentioned activities as central to how the Army conducts operations. Specifically, within doctrine we have done the following:

1. The Army's senior operations manual, FM 3-0, has elevated stability tasks to be co-equal with combat tasks, in line with DODD 3000.05. FM 3-0 also designates inform and influence activities and cyber/electromagnetic activities as key tasks within the mission command warfighting function.
2. We published a separate FM on Stability Operations that goes into great detail on the tasks of stability operations and how they fit within a broader construct of the whole-of-government approach. Further we are in the process of writing an additional manual on stability tasks that goes into more detail on the specifics at the tactical level of tasks directly related to stability operations.
3. We published FM 3-24, Counterinsurgency, that laid out a new and innovative approach to the conduct of counterinsurgency campaigns.
4. We published an FM on Information Operations tactics, techniques, and procedures, that is currently being updated to account for lessons learned in our current conflicts.
5. We published an FM on Security Force Assistance that lays out guidelines and specific tasks for conducting security force assistance operations to build partnership capacity. This manual too is being updated based on the latest lessons learned from active operations.
6. We are writing doctrine on the conduct of Cyber/Electromagnetic Activities.

The Center for Army Lessons Learned has collected, collated, and distributed numerous Handbooks and Newsletters on Irregular Warfare related topics, to include:

1. The Operation Enduring Freedom-Philippines handbook sharing best practices and lessons learned from Special Operations Forces that are assisting Philippine Military and Police forces conducting Counterinsurgency.
2. The Army Security Force Assistance handbook that shares best practices and lessons learned from Iraq, Afghanistan, Horn of Africa, Trans Sahel, and the Philippines.

The information collected by the Center for Army Lessons Learned helps to inform what should be incorporated into new Doctrine and Tactics manuals.

From an organizational standpoint we have also made significant changes in our organizational structure to account for all of the general tasks mentioned above:

1. All of our division, corps, and theater Army headquarters have been given additional staff structure specifically to address, inform, and influence activities, increased civil affairs capability, increased engineer staff to support infrastructure development, and restoration of essential services.

2. We have created the 1st Information Operations Brigade to assist units in the conduct of inform and influence activities, the Army Asymmetric Warfare Group to support rapid adaptation to the activities of hybrid threats, and U.S. Army Cyber Command to execute cyber/electromagnetic activities for the Army.
3. We created a specialized training brigade to prepare individuals and units to conduct security force assistance missions.
4. We are active participants in the Joint Improvised Explosive Device Defeat Organization.

Training the Army starts with the time that soldiers enter the Army, all the way through their Professional Military Education (PME). We've incorporated Irregular Warfare into basic training scenarios for use during initial military training by both soldiers and officers, and have counterinsurgency training and education for students attending the War College. Irregular Warfare is part of our preparation for units deploying to Afghanistan and Iraq:

1. Scenarios at our collective training centers include Stability Operations, Security Force Assistance, Counterinsurgency, and Counterterrorism.
2. All Brigade Combat Teams attend a 5-day Counterinsurgency seminar at Fort Leavenworth taught by the Army's Counterinsurgency Center.

Question. In your view, what are the obstacles, if any, to institutionalizing this kind of support, and what will be necessary to overcome them?

Answer. The biggest obstacles will be downsizing the right formations for our mission and requirements. As pressures for cuts in defense spending and force structures increase, we will have to assess which of these capabilities we retain and at what level. Finding the right mix will be a challenge. We can maintain our doctrine and lessons learned databases fairly easily, but retaining all of the necessary force structure will be more challenging.

Question. While force structure and program changes may be necessary, they are unlikely to prove sufficient to achieve full institutionalization. The greater challenge may be found in changing Army culture, attitudes, management, and career path requirements and choices, for example, through adjustments to organization, training, doctrine, and personnel policies.

In your view, what are the most important changes, if any, that might be necessary to complement programmatic changes in support of the further institutionalization of capabilities for irregular warfare in the Army?

Answer. The most important thing we need to do is to ensure that we educate our leadership through professional military education about the conduct of irregular warfare, to include COIN, stability operations, inform and influence activities, cyber/EM activities, and security force assistance. We must also maintain our doctrine and lessons learned that we've gained from almost a decade of active operations. We need to keep this knowledge-base updated, based on only our own operations, but also those of our coalition partners. Through education and maintaining a sound knowledge base, we'll be able to respond effectively to a wide range of tasks in the future. Much as the Army did between the two world wars, we must have a highly professional education system that educates future leaders on the hard earned lessons of this past decade so we don't repeat the mistakes of post-Vietnam of thinking these kinds of operations are behind us.

We have to retain the flexibility, adaptability, and agility to operate both in missions requiring maneuver over-extended distances and in missions requiring the establishment of security over wide areas regardless of what kind of threats populate the battlefield.

Question. Institutionalizing support for irregular, counterinsurgency, and stability capabilities in the force does not mean ignoring the requirement for the Army to be trained, equipped, and ready for major combat at the high-end of the full spectrum of operations.

If confirmed, how would you propose to prioritize and allocate the Army's efforts and resources to ensure that the force is prepared for major combat while at the same time it increases and institutionalizes support for irregular, counterinsurgency, and stability operations?

Answer. The future battlefield will be populated with hybrid threats—combinations of regular, irregular, terrorist, and criminal groups. We must train and educate our leaders and units to understand and prevail against hybrid threats. We are training and educating our soldiers to understand that they must be capable of both combined arms maneuver and wide area security in this hybrid threat environment. In training, we must replicate the threats and conditions they are likely to face in their next mission. For 10 years, that has meant irregular threats and conditions common in the wide area security role that supports counterinsurgency operations.

Question. Do you anticipate that the Army will continue to train and equip general purpose force brigades for the “advise and assist brigade (AAB)” mission after the wars in Iraq and Afghanistan come to an end?

Answer. I was involved in developing the initial requirements for the advise and assist brigades when I was the Multi-National Force-Iraq commander. The flexibility of the modular brigades allowed us to organize, train, and equip for Security Force Assistance activities. I anticipate that there will be an ongoing requirement for Security Force Assistance activities of the type carried out by these brigades into the future. If confirmed, I will continue to assess requirements and work with Congress to ensure we have the resources and flexibility required to accomplish these missions.

Question. If so, what mission essential task list or other training guidance changes do you plan to institutionalize this mission set in training for the general purpose force brigades?

Answer. If confirmed, I will work with our joint partners to identify the mission essential tasks for Security Force Assistance and incorporate them into the Unified Joint Task List and Army Unified Task List.

Question. Do you foresee that general purpose force brigades or other formations will be regionally aligned to carry out an AAB-type mission? If so, what changes to unit training and equipping based on the requirements of the Army Force Generation (ARFORGEN) model will be necessary to support regional alignment?

Answer. As we look to the future, I believe some brigades may be regionally aligned. This will depend on combatant command requirements. The number and type of brigades will depend upon what we have available after meeting the operational requirements in the CENTCOM AOR. If confirmed, I will work with Secretary McHugh to determine the best allocation to support operational requirements. The ARFORGEN model and our modular design are well-suited to the kind of adaptations that will be required to meet Security Force Assistance requirements in the future.

LESSONS LEARNED

Question. What do you believe are the major lessons that the Army has and should have learned from Operation Enduring Freedom (OEF), Operation Iraqi Freedom (OIF), and Operation New Dawn (OND) regarding its title 10, U.S.C., responsibilities for manning, training, and equipping the force?

Answer.

1. We must ensure that our future leaders understand their environment. A combination of socio-economic, political, cultural, and military factors will affect operations at all levels. We must develop leaders who are adaptable and flexible in solving complex problems.
2. We have learned that soldiers require more than a year to fully recover from extended deployments and to prepare for another deployment. We must do better at identifying and incorporating lessons learned at the tactical, operational, and strategic levels. We have learned that the ability to adapt rapidly is the key to success in current and future operational environments.
3. We must have a fully integrated Reserve component to meet our operational needs.
4. ARFORGEN works, but must constantly be reviewed and adjusted to the operational environment.

Question. If confirmed, which of these lessons, if any, would you address as a matter of urgent priority?

Answer. They are equally important and all must be addressed in order to ensure our Army remains as effective and efficient in the future.

EQUIPMENT AVAILABILITY

Question. Both deploying and non-deploying Active and Reserve component Army units are training without all their required equipment. Deploying units do not receive some of their equipment until late in their pre-deployment training cycle or as they arrive in theater.

In your view, has deployment of additional brigades to Afghanistan increased the strain on maintenance systems and further reduced equipment availability for training?

Answer. With our commitments in Iraq and Afghanistan, we have a significant requirement and responsibility to ensure the most modern and capable equipment is available to our forces in combat. This has at times limited equipment availability for training. ARFORGEN has helped us to manage the movement of equipment for

training. It is our responsibility to ensure units are properly trained upon deployment. As force generation requirements reduce, this will mitigate some of the risk.

Question. What do you expect will be the impact, if any, of our drawdown from Iraq and Afghanistan in this regard?

Answer. The drawdown from Iraq has already improved availability of equipment for units to conduct predeployment training. The future drawdown in Afghanistan will also help if we sustain the resources to do reset.

Question. What is your understanding and assessment of the availability of modern equipment to fully support the predeployment training and operations of deploying units?

Answer. With our commitments in Iraq and Afghanistan, we have a significant requirement and responsibility to ensure the most modern and capable equipment is available to our forces in combat. This has at times limited equipment availability for training. ARFORGEN has helped us to manage the movement of equipment for training. It is our responsibility to ensure units are properly trained upon deployment. As force generation requirements reduce this will mitigate some of the risk.

Question. What do you see as the critical equipment shortfalls, if any, for training and operations?

Answer. I understand that the Army is short Unmanned Aerial Systems and some non-Line of Sight communications equipment. I am told that light infantry equipment shortfalls in Afghanistan are being addressed through existing processes. As we continue to reset equipment returning from Iraq we will see a steady improvement in on-hand equipment for units training for and deploying in support of operational missions.

Question. What steps would you take, if confirmed, to address these shortfalls and ensure that units have what they need to train and operate?

Answer. If confirmed, I will continue to support the ARFORGEN Model of phased equipping through which the Army intensively manages our equipment on-hand to ensure next deploying units, from all components, have sufficient equipment for training and deployment. If confirmed, I will continue our capability portfolio reviews to evaluate our priorities against mission requirements and adjust our resource allocations to ensure the Army continues to strike the critical balance between having enough modern equipment to fully support pre-deployment training and operations in theater.

EQUIPMENT REPAIR/RESET

Question. Congress provided the Army with approximately \$15 to \$17 billion annually to help with the reset of nondeployed forces and accelerate the repair and replacement of equipment. However, the amount of reset funding requested for DOD in fiscal year 2012 decreased to \$11.9 billion from the fiscal year 2011 request of \$21.4 billion.

In your view, is this level of funding sufficient to not only prepare Army forces for operations in Afghanistan but to also improve the readiness of non-deployed forces for other potential contingencies?

Answer. The level of funding appears sufficient. In my experience, Congress has been very supportive of the Army's reset requests, providing the Army with what we require to reset our redeploying forces. It is true that in fiscal year 2010 and fiscal year 2011, the Army was appropriated approximately \$10 billion for reset, and in fiscal year 2012, the request is less than half that. However, with the drawdown in one theater and more efficient management of materiel moving in and out of Afghanistan, our annual reset requirements have decreased. The Army will continue requiring reset funding 2 to 3 years beyond end of operation in both theaters to move all materiel through repair programs.

Question. Is it your understanding that our repair depots are operating at full capacity to meet rebuild and repair requirements for reset?

Answer. It is my understanding that our repair depots are currently fully engaged and have the ability to meet a surge in our repair requirements as necessary.

Question. What additional steps, if any, do you believe could be taken to increase the Army's capacity to fix its equipment and make it available for operations and training?

Answer. The Army has the needed capacity through certain measures, such as adding additional shifts, contract augmentation or rebalancing workload that could be used to increase production at our facilities. This will, of course, also increase cost. At this time, I do not know if such measures are necessary. If confirmed, I will look into this matter further.

Question. What impact is this level of funding likely to have, if any, on the ability of Army National Guard units to respond to Homeland defense and support to civil authorities' missions?

Answer. I am told that the decrease in the Army's reset funding requirements for fiscal year 2012 should have no impact on the Army National Guard's ability to respond to Homeland defense missions and provide support to civil authorities. I also understand that Reserve component reset requirements are fully funded.

DEPLOYMENT AND ROTATION CYCLES

Question. Over the last year, the Active Army's ratio of time spent deployed to time at home station has improved from 1:1 to 1:1.6—that is for each year deployed a soldier spends about 1½ years at home station. The previously stated Active Army objective was 1:2 whereby soldiers could expect to be home for 2 years for each year deployed. The Reserve component objective is 1:5 where soldiers can expect to be home for 5 years for each year deployed. In General Dempsey's June 2011 pamphlet titled "CSA's Thoughts on the Army's Future," he sets a new dwell time goal of 27 months at home for every 9 months deployed as soon as possible.

What is your understanding and assessment of the Army's near- and intermediate-term plans for deployment length (or boots-on-the-ground (BOG)) and dwell time?

Answer. The Army utilizes a rotational ARFORGEN readiness model that effectively and efficiently generates trained and ready forces for combatant commanders at sustainable levels. ARFORGEN also provides ready forces for unforeseen contingencies. Starting in fiscal year 2012, the Army's intermediate goal for BOG is 1 year deployed to 2 years dwell at home station for the Active component and 1 year deployed to 4 years dwell at home station for Reserve component soldiers. The Army's long-term goals are 1 year deployed with 3 years at home station for the Active component and 1 year deployed with 5 years at home station for Reserve component soldiers. The Army is moving to a 9-month BOG, which I support. It should begin to reduce some of the strain on our soldiers and families. If confirmed, we will constantly monitor the implementation of the 9-month BOG and its impact on dwell.

Question. What impact do you expect the proposed troop reductions in Iraq and Afghanistan to have on the dwell time of Army soldiers? Is it possible that the reduction of demand for Army forces in Iraq alone will allow the Army to achieve the 1:2 dwell time goal by the end 2011, or the 1:3 dwell time goal (whether in terms of months or years) by 2014?

Answer. Utilizing Operation New Dawn (Iraq) drawdown planning assumptions, projections show corps, divisions, and Brigade Combat Teams will continue to improve BOG/dwell and move closer to achieving our goals.

Question. What is your understanding and assessment of the potential impact of the decision to decrease Army end strength on the rotation schedule and meeting the near-term dwell goal of 1:2 for Active-Duty Forces?

Answer. The Army will plan to reduce its end-strength and restructure its force mix consistent with reductions in overseas contingency operations commitments and in conjunction with the needs of the Department and the combatant commanders. Our intent is to arrive at the right mix of capabilities to meet current demands as well as future challenges, within budgetary constraints. Based on the current strategic guidance and projected future requirements, the Army should be able to maintain its progress to reach its Boots on Ground to dwell ratio goal and have sufficient troops to respond to unforeseen events. But if our overseas contingency operations commitments differ from those planned, it will impact BOG/dwell and availability of forces.

Question. How, in your view, will the proposed reductions in Iraq and Afghanistan impact the demand on Army Reserve and National Guard troops? In your view, how might a reduction in demand, if any, for Army Reserve and Guard troops impact their availability to respond to contingencies for Homeland defense and support to civil authorities?

Answer. The return of these Army National Guard forces to State control should provide the Governors and Adjutants General with increased forces to conduct Homeland defense, disaster response, and defense support of civil authorities. These forces will be better trained and more experienced due to their Iraq and Afghanistan combat deployments. Although the National Guard has been able to meet all disaster relief requirements, the return of forces will allow more flexibility to accomplish local missions.

CAPABILITIES OF SPECIAL OPERATIONS FORCES AND GENERAL PURPOSE FORCES

Question. The 2010 Quadrennial Defense Review (QDR) called for increased counterinsurgency, counterterrorism, and security force assistance capabilities within the general purpose forces (GPF).

What is your assessment of the QDR with regard to the mix of responsibilities assigned to GPF and SOF, particularly with respect to security force assistance and building partner military capabilities?

Answer. The report of the 2010 QDR struck an appropriate balance between the capabilities and capacity of our special operations and multipurpose forces. Today's demand for security force assistance and building partner military capabilities exceeds the capacity of our Special Operations Forces requiring the integration of our multi-purpose forces with our Special Operations Forces to accomplish the mission. Additionally, some of the security force assistance missions, such as those related to building national institutions like military academies and logistics systems, are typically more appropriate for our multipurpose forces and our generating force institutions.

Question. Do you believe that our general purpose forces need to become more like SOF in mission areas that are critical to countering violent extremists?

Answer. Over the last 10 years our multipurpose ground forces have developed many of the capabilities once only inherent in our Special Operations Forces. Just as our multipurpose forces have improved their capabilities, so too have our Special Operations Forces. Both forces are national capabilities that must be sustained and continuously enhanced. They increase our flexibility and agility. The needs of our combatant commanders will continue to inform the degree of overlap or specialization required between our special operations and multipurpose forces.

Question. What actions, if any, do you believe need to be taken in order to allow SOF and GPF to successfully share these missions in the future?

Answer. In all of the geographic commands, close collaboration and planning between SOF and GPF will ensure optimum use of all available forces. Additionally, we have a process within DOD whereby combatant commanders identify their future needs and request the allocation of forces to accomplish specific tasks. Through this process—the Global Force Management Process—we integrate the demands and allocation of special operations and multipurpose forces to fill combatant commander needs. We should integrate combatant commander needs for both special operations and multipurpose forces, including their supporting forces, into this common process.

Question. Are there certain mission areas that should be reserved for SOF only?

Answer. Generally speaking, mission areas that require minimal footprint or recognized presence, operations independent of larger ground forces in the immediate area, or operations that place a premium on regional cultural awareness and negotiation skills appear best suited for our Special Operations Forces. While our special operations and multipurpose forces share much of the same skills, equipment, and tactics, our Special Operations Forces are generally more mature, at a higher skill level in these common skills, and also equipped and trained in unique capabilities. Where that difference is needed for mission success, that is where we should employ our Special Operations Forces.

SPECIAL OPERATIONS ENABLING CAPABILITIES

Question. The Commander of U.S. Special Operations Command (SOCOM) has described the “non-availability” of force enablers as the “most vexing issue in the operational environment” for SOF. A recent report required by the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–84) indicated that adequately enabling SOF in the future will require improvements to “the process by which SOF gains access to enabler support, and by synchronizing efforts with the Services.” The report also stated that “Currently, SOF units divert scarce organic resources to satisfy enabler requirements and accomplish the assigned mission. In future operating environments, the effects of enabler shortfalls will be further exacerbated unless SOCOM and the Services can better forecast the need for support, codify support through formal agreements, and eventually get SOF units and their GPF counterparts training together throughout the deployment cycle.”

If confirmed, how would you work with the Commander of SOCOM to address the enabling requirements of Army SOF throughout the deployment cycle?

Answer. Special Operations Forces (SOF) and general purpose forces have made great strides in providing integrated sourcing solutions to increase the overall combat effectiveness of the force. It is the early identification of the right mix of forces that will allow units to properly integrate. It is my understanding that U.S. Army Special Operations Command (ASOC) is refining its force generation methodology

to build appropriate enabling support into existing ASOC formations and integrating requirements into the ARFORGEN process. Through this effort, SOF and critical enabling support will be better integrated on a more sustained and predictable basis. If I am confirmed, I will work with SOCOM and ASOC to ensure the effective and efficient accomplishment of our enabling requirements.

Question. Vice Admiral William McRaven, Commander of Joint Special Operations Command, has stated that SOCOM needs greater personnel management authority to shape mid- and senior-grade SOF operators to meet SOCOM-defined requirements. In his view, promotions, selection for command, selection for advanced educational opportunities, foreign language testing policy, and foreign language proficiency bonus payment policy all differ significantly by Military Services and are all primarily crafted to support Services' needs.

Do you agree that Army special operations personnel should be managed by SOCOM? Please explain.

Answer. No. The Army must consider both operational needs and career management in order to ensure the best possible force for the future and not limit flexibility in managing its force. Throughout its operations, Special Operations Forces (SOF) have demonstrated a unique ability to operate in a joint and multinational environment. There are also Service-specific career milestones and development opportunities that vary based upon the individual soldier. Given these unique needs, the Army should retain management of all members of its force. However, we must work closely with SOCOM to identify those skills and opportunities needed so we can incorporate appropriate leader development programs to meet their needs.

ARMY READINESS

Question. How would you characterize Army readiness in its deployed and non-deployed units?

Answer. Simply stated, I believe that Army readiness is out of balance between deployed and non-deployed units. Deployed and deploying Army units are given every priority for manning, equipping, and training in order to achieve the combatant commander's mission requirements. Due to excessive demand, non-deployed Army units are used to provide the additive resources to ensure that deployed and deploying Army units can meet mission requirements. Routinely, non-deployed commanders are providing personnel and equipment to support deployed and deploying units. The effect of these actions on the force and on specific operational plans, in specific terms, is amply covered in the Chairman's Comprehensive Joint Assessment.

Question. Do you believe the current state of Army readiness is acceptable?

Answer. No. However, the Army and DOD senior leadership recognize that the Army operates in a fiscally constrained environment. The readiness of Army units, while of utmost concern to the Senior Leadership, must be balanced with other national security and domestic priorities. In light of those competing priorities, the Army has developed a force generation model that synchronizes available soldiers and resources with units during periods of predictable availability.

Question. How do you see operations in Iraq and Afghanistan impacting the readiness of Army forces that may be called upon to respond to an attack or another contingency?

Answer. Clearly, the current demand for Army forces coupled with the cumulative effect of nearly 10 years of conflict impacts the Army's ability and reduces our flexibility to provide forces to respond to an attack or other incident or disaster inside the United States. The Army has "surged" to meet additional contingencies in the past and will do so again in the future—but those "surge" operations impact the readiness of Army units for months and even years after completion. I concur with the specific and well-documented effects and examples covered in the Chairman's Comprehensive Joint Assessment.

DEPLOYMENTS AND STRESS ON THE ARMY

Question. Many soldiers are on their fourth and some their fifth major deployment to Iraq or Afghanistan. Beginning in August 2008 DOD policy has been to limit deployments for Active component soldiers and mobilization of Reserve component soldiers to not longer than 12 months.

What is your assessment of the impact of multiple deployments of troops to Afghanistan and Iraq on retention, particularly among young enlisted and officer personnel after their initial Active Duty obligated service has been completed?

Answer. The Army monitors retention very closely, as I do as a commander given the high operational demand and multiple deployments that soldiers are experi-

encing. Statistics reveal that multiple deployments to Afghanistan and Iraq are not adversely impacting retention.

Since fiscal year 2005, retention rates of initial term and mid-career enlisted soldiers in deploying units has remained above Army goals while retention rates among officers continue to exceed historic rates and outpace the preceding decade. Continuous improvements to Army benefits, such as world class health care advances for wounded soldiers, enhancements in family support programs, and additional monetary bonuses have encouraged large numbers of our soldiers to continue their commitments beyond their obligated service periods. The Army is focused now on retaining the highest quality soldiers and officers as we move forward into a period of tightly constrained resources decreased operational demands, and reductions in authorized end strength.

Question. What are the indicators of stress on the force, and what do these indicators tell you about that level of stress currently? In addition to any other stress indicators that you address, please discuss suicide and divorce rates, drug and alcohol abuse, AWOLs, and rates of indiscipline.

Answer. The indicators of stress on the force that the Army tracks continuously include: reenlistments, chapter separations, divorce, domestic violence, sexual assault, enlisted desertion, AWOL offenses, drug and alcohol enrollments, drug use, courts-martial, and suicides.

I understand that Army discipline and misconduct rates, including desertion, absence without leave and courts-martial, have remained steady or declined in the past year while other indicators of stress on the force, such as substance abuse and domestic violence have increased. However, the significant increase in the number of soldier suicides is of the greatest concern. Soldiers and their families continue to make significant personal sacrifices in support of our Nation. If confirmed, I am committed to providing soldiers and families with a quality of life commensurate with their service and to continuing Army efforts to develop multi-disciplinary solutions directed at mitigating risk behaviors and enhancing soldier and family fitness and resilience.

Question. For how long do you believe these levels of commitments can continue before there will be significant adverse consequences for the Army?

Answer. I am very concerned about the long-term health of the force if we are unable to achieve the appropriate deployment to dwell ratio for our soldiers. Adequate dwell time should help the visible and invisible wounds of this protracted conflict. If confirmed, I will closely monitor indicators of stress on the force and work to ensure that the Army has plans and programs to confront these issues appropriately.

FORMER CHIEF OF STAFF OF THE ARMY, GENERAL CASEY, STATED THAT THE ARMY WAS "OUT OF BALANCE."

Question. What is your understanding and assessment of the concept and efforts to achieve "balance" for the Army?

Answer. I understand balance to be the Army's ability to sustain the Army's soldiers, families, and civilians, prepare forces for success in the current conflict, reset returning units to rebuild the readiness consumed in operations and to prepare for future deployments and contingencies, and transform to meet future demands. With the help of Congress we have made progress over the past 3 years to restore balance. If confirmed, I will continue to work with Congress on this issue.

Question. If confirmed, what actions, if any, would you take to achieve and sustain Army "balance"?

Answer. If confirmed, I will work with Secretary McHugh and Army leadership to adopt measures and strategies to achieve and sustain balance. Building and maintaining resilience among our forces will be one of my highest priorities.

"TOXIC" LEADERSHIP IN THE ARMY (G1, ASA M&RA)

Question. A recent press report outlined the results of an Army survey of leadership and morale that found 80 percent of Army officers and noncommissioned officers had observed and 20 percent had worked for a "toxic" leader in the last year. According to the press report, the survey, conducted by the Center for Army Leadership at Fort Leavenworth, KS, concluded that toxic leadership "may create a self-perpetuating cycle with harmful and long-lasting effects on morale, productivity, and retention of quality personnel." They also note that, "there is no indication that the toxic leadership issue will correct itself."

What is your understanding and assessment of "toxic" leadership in the Army and its impact or potential impact, if any, on morale, productivity, and retention of quality personnel?

Answer. Throughout my career my top priority has been to create an environment where individual soldiers and leaders feel empowered and a central part of the organization to which they are assigned. Leadership built on trust, values and standards is essential to our success. Our Army leaders must be disciplined, positive, tolerant, supremely competent, and exemplars of our system of values. Anything less negatively impacts morale, unit effectiveness, and individual soldiers' willingness to continue service.

If confirmed, we will review and assess how we continue to prepare our leaders for command and will develop practices that will allow us to identify "toxic" leader environments and take action to correct.

Question. If confirmed, what actions would you propose to take, if any, to deal with the risk to the Army posed by "toxic" leadership?

Answer. Leadership education is a critical component in ensuring a positive command climate. The Army's professional military education curricula and pre-command specific training address this important aspect of leadership. If confirmed, I will work with my staff to ensure that the Army continues looking at itself to determine if it is placing appropriate emphasis at all levels of military education on the interpersonal dynamics of positive command climate.

Question. What are your views on the benefits and risks of incorporating input from both subordinates and peers, also known as "360-degree" evaluations, into the officer and non-commissioned officer evaluation and promotion selection systems?

Answer. Constructive criticism from peers and subordinates can be an invaluable tool to help leaders see themselves from different perspectives. It is my understanding that the Army is currently evaluating options for revision of its Performance Evaluation System and that a tool utilizing the Army's Multi-source assessment and feedback/360 degree will be incorporated beginning on 1 October of this year. There will also be a requirement to discuss the 360 degree assessment feedback as part of periodic performance counseling. The Army is also considering inclusion of a 360 degree assessment into the Brigade Command Selection process. I look favorably on changes to our performance evaluation system that enhance the development of leaders without risking fair and equitable treatment of all our soldiers.

RESERVE COMPONENTS AS AN OPERATIONAL RESERVE

Question. What is your understanding and assessment of the Army's Reserve components as an Operational Reserve, as opposed to its longstanding traditional role as a Strategic Reserve?

Answer. The demand for U.S. ground forces over this past decade has required continuous use of Active component and Reserve component forces in order to meet the Army's operational requirements. The Reserve component is no longer solely a Strategic Reserve. Current and projected demand for Army forces will require continued access to the Reserve component. Mobilization and operational use of the Reserve component will continue for the foreseeable future.

Question. In your view, what are the major challenges to maintaining and enhancing the Army Reserve and Army National Guard as a relevant and capable Operational Reserve?

Answer. In my opinion, the Army must ensure continued access to the Reserves as an essential part of the Total Force. If confirmed, I will work to ensure they have the necessary training and equipment to accomplish all missions. Maintaining an appropriate level of resourcing for the Operational Reserve and mobilizing these forces on a predictable and recurring basis will be important to our success.

Question. What are your views about the optimal role for the Reserve component forces in meeting combat missions?

Answer. Reserve component forces play a critical role in enabling the Joint Force Commanders to meet assigned missions. Today's force is structured to balance maneuver capability in the Active component with a majority of the enablers in the Reserve component. This balance should provide capabilities to meet operational requirements in sustained operations.

In addition, the Reserve components are well-suited for those operational missions that are recurring and predictable, such as enduring overseas contingency operations, support of treaty obligations, Homeland defense and theater security cooperation requirements.

Question. In your view, should DOD assign Homeland defense or any other global or domestic civil support missions exclusively to the Reserve?

Answer. Reserve component forces are uniquely positioned to be the first responder to these missions, however, the Army's Total Force must be able to execute Homeland defense or other global domestic support missions.

Through experience we've found that the Army works best as a Total Force, sharing requirements and responsibilities across the formation and between components. Although Reserve component forces are uniquely positioned to be the first military responder to these missions, the Army's Total Force must be able to execute Homeland defense as well as other global and domestic support missions.

Question. In your view, how will predictable cycles of 1-year mobilized to 5 years at home affect the viability and sustainability of the All-Volunteer Reserve Force?

Answer. Once the Army can restore its balance and stress on the force has been significantly reduced, a predictable cycle that ensures full recovery and training will support the viability and sustainability of the All-Volunteer Reserve Force. The Army's long-term goal of 1-year deployed to 5 years at home station for Reserve component units is optimal in supporting both the unit's ability to effectively generate readiness, and to ensure soldier and family well-being and employability.

Question. Advocates for the National Guard and Reserve assert that funding levels do not meet the requirements of the Reserve components for operational missions.

Do you agree that the Army's Reserve components are inadequately resourced, particularly in view of the commitment to maintaining an Operational Reserve?

Answer. Nine years of mobilization and employment for current contingencies has produced the most experienced, ready Reserve component forces in history and yielded unprecedented readiness levels. The Army must continue to adequately resource the Reserve command for training and operational requirements. Failure to resource an Operational Reserve may result in unit and enabler shortfalls to the total Army.

NATIONAL GUARD ISSUES

Question. What is your understanding and assessment of changes in the global and domestic roles and missions of the Army National Guard and the National Guard Bureau in the last decade?

Answer. The Army National Guard is and will remain a critical component of the Army. It provides depth to the Army and links us to the local U.S. population. During the last 10 years, the Army National Guard has transformed from a Strategic Reserve to an operational force, a trend which should continue with predictable operational use of the Reserve components. The Army National Guard, with direction and oversight provided by the National Guard Bureau, has proven to be integral to the Army's Total Force.

Question. What is your understanding and assessment of the Army's commitment to fully fund Defense Department requirements for Army National Guard equipment?

Answer. The Army is committed to fully equipping the Army National Guard to DOD requirements, and I understand significant progress in achieving both modernization and interoperability has been made as the Army National Guard has transformed to an operational force. If confirmed, I will maintain emphasis on the importance of the Army National Guard and its readiness as a part of the Army Total Force.

Question. In your view, do Army processes for planning, programming, budgeting, and execution sufficiently address these requirements for National Guard equipment?

Answer. If confirmed, I will examine the funding of the Army National Guard to ensure it receives the appropriate level of resources as a part of the Army's Total Force.

Question. If confirmed, how would you ensure that these equipment needs of the Army National Guard are fully considered and resourced through the Army budget process? In your view, what is the appropriate role for the Chief of the National Guard Bureau in this regard?

Answer. If confirmed, I will work closely with the Chief, National Guard Bureau to ensure that Army National Guard requirements and needs are considered, and appropriately synchronized with Army priorities and resourcing strategy.

Question. What is your understanding and assessment of the effect, if any, of increasing the grade of the Chief of the National Guard Bureau to General (O-10)?

Answer. The increase in grade reflects the importance of the National Guard to our Total Force and the significant responsibilities of the Chief of the National Guard Bureau. I have had the opportunity to work closely with the Chief of the National Guard Bureau on several issues as Commander of Multi-National Force-Iraq and U.S. Joint Forces Command.

Question. In your opinion, should the Chief of the National Guard Bureau be a member of the Joint Chiefs of Staff?

Answer. I am aware of this topic, but have not had any discussions regarding the Chief of the National Guard Bureau becoming a member of the Joint Chiefs of Staff. If confirmed, I will consider this important question further before forming my opinion.

Question. What is your understanding and assessment of the role and authority of the Director of the Army National Guard, and, in your view, how does this compare with the role and authority of the Chief of the Army Reserve?

Answer. The Director of the Army National Guard leads the Army National Guard Directorate of the National Guard Bureau, and assists the Chief, National Guard Bureau in carrying out the functions of the National Guard Bureau as they relate to the Army. The Director, Army National Guard serves as a member of the Army Staff and as a Reserve component chief in similar fashion to the Chief, Army Reserve.

Question. In your view, should the Director of the Army National Guard be "dual hatted" as a Deputy Chief of Staff of the Army?

Answer. I have not had the opportunity to fully consider this issue before, but if confirmed, will be better able to understand the duties and responsibilities of Director, Army National Guard as they relate to the Chief of Staff of the Army and the Army Staff.

Given my understanding of the National Guard Bureau, however, the Chief, National Guard Bureau is the principal advisor to the Chief of Staff of the Army on National Guard matters, while the Director, Army National Guard assists the Chief of National Guard Bureau in carrying out the functions of the Bureau as they relate to the Army.

If confirmed, I will continue to study the duties and responsibilities of Director, Army National Guard as they relate to the Chief of Staff of the Army and the Army Staff and make recommendations as appropriate.

Question. In your view, should there be a requirement that the position of Commander, U.S. Northern Command (NORTHCOM) or Commander, U.S. Army North, the Army component commander, be filled only by a National Guard officer? Please explain.

Answer. No. We want to sustain flexibility to ensure we have the most experienced and capable leaders. In my opinion, we should not be restricted to Reserve component or Active Duty component when selecting a commander to fill either of these positions. Recognizing the roles of NORTHCOM and Army North, however, it is logical to conclude that Army National Guard leaders should be considered for senior command and staff positions.

GLOBAL POSITIONING SYSTEM RECEIVERS AND EQUIPMENT

Question. As a major user of global positioning system (GPS) receivers, what is your understanding and assessment of the Army's participation, if any, in testing GPS receivers and equipment that use GPS signals with respect to potential interference or disruptions associated with commercial broadband services?

Answer. The Army is a major acquirer of GPS systems both stand alone or embedded in other weapon systems that require position location information. I understand that the Army has tested these systems to verify their requirements, including their GPS functionality. The Army has been a partner with the Air Force, developers of the GPS constellation, since the inception of the program, and has participated extensively in development and operational testing throughout the life of the program.

Question. Has all Army equipment utilizing GPS signals been tested?

Answer. The Army has tested all GPS equipment it provides to the field either through independent development tests, operational tests, in partnership with other services and in participation in the prime contractor test efforts. The Army will continue to conduct testing in this manner to address continuing equipment developments, the introduction of new GPS features, and evolutionary changes to the GPS system.

Question. Is there specific equipment, if any, that has not been tested for which interference or disruption is not known?

Answer. I am not aware of any. The GPS program continues to evolve, as it must, to address changes in technology and to address any disruptions or attempts by adversaries to deny us the use of GPS. The Army will participate in the testing of new GPS equipment and waveform (signaling) changes to verify systems performance. New GPS security, space segment, and waveform changes meant to improve GPS performance will be tested as those program enhancements mature and proceed through their development cycles.

Question. In your view, has the time allotted for testing been adequate?

Answer. Yes, based on my current understanding, the time allotted to testing has been adequate.

Question. What are the preliminary results, if any, from testing?

Answer. All equipment testing is meant to verify performance of the systems against the requirements levied upon them prior to providing them to the field. Testing has been successful and any issues resulting from tests are addressed and any fixes are verified and incorporated via software or hardware changes as necessary.

WOMEN IN COMBAT

Question. What is your view of the appropriate combat role for female soldiers on the modern battlefield?

Answer. Because of the distributive nature of the battlefield in Iraq and Afghanistan, women's exposure to combat conditions has changed significantly. We must conduct constant reviews and assess how women can continue to improve our capabilities and flexibility and maximize their contributions to the Army.

Female soldiers have been and continue to be an integral part of our Army team, contributing to its success and overall readiness, as they perform exceptionally well in specialties and positions open to them and remain critical to the success of ongoing missions in Iraq and Afghanistan.

Question. In your view, should the current Army policy prohibiting the assignment of women to ground combat units be revised or clarified in any way to reflect changing roles for female soldiers and the changing nature of warfare?

Answer. I believe we must constantly assess the role of women, especially considering the changing nature of war and our experiences over the last 10 years. A review of current policies and regulations is ongoing in concert with the Office of the Under Secretary of Defense (Personnel and Readiness), as directed in the Women in the Service Restriction (WISR) under section 535, National Defense Authorization Act (NDAA) for Fiscal Year 2011. If any changes are determined to be appropriate, required notice would be provided to Congress prior to implementing any changes to current policy.

Question. Do you believe that it is appropriate for female soldiers to serve in positions in which they may be exposed to combat?

Answer. Women in the Army continue to make tremendous contributions as well as demonstrate their selfless-service and sacrifices in roles and responsibilities critical to the safety and security of our Nation and to the readiness of the Army. The contemporary operating environment finds our female soldiers serving in positions that have exposed them to combat and they have proven that they are up to any task, regardless of their occupational specialty, when freedom is threatened and when their country calls.

SUICIDES

Question. The committee continues to be concerned about the continuing increase in soldier suicides, especially the increase in Reserve component suicides. In June 2010, the Army released a report on Health Promotion, Risk Reduction, and Suicide Prevention that analyzed the causes of suicides in the Army and in Chapter III ("The Lost Art of Leadership in Garrison") reported disturbing trends in drug use, disciplinary offenses, high risk behaviors, and inadequate responses by Army leaders.

In your view, what is the cause of this apparent increase in the number of suicides of Reserve component members?

Answer. I am concerned about suicide as an issue for the Total Army, including both the Active component and the Reserve component. The Army is focusing attention on the differences between our Active component and Reserve component suicides because there may be unique variables at play for Reserve component soldiers not serving on Active Duty, including: economic and civilian job-related stress; military service factors; and access to medical and behavioral health care. The economic recession has added additional stress to those Reserve component soldiers who find it increasingly difficult to find or sustain employment whether as a result of a military deployment or merely the prospect of one. Within their military units, Reserve component soldiers are often only involved with their chain of command during battle assemblies and have fewer opportunities to form "buddy teams" of peers. In terms of access to medical and behavioral health care, Reserve component soldiers generally do not have the same access to base and family support services, such as Army Substance Abuse Program, Family Life Chaplains, and other Services that Active Duty soldiers utilize.

Question. What is your assessment of the Army's response to the continuing increase in suicide rates?

Answer. Leaders across the Army have taken aggressive steps to improve the health of the force, decrease high risk behavior, and stem the increasing rate of suicides in our formations. This is a very complex issue and it is going to take fully engaged leadership to modify programs and policies, fully understand the causes for this increase, identify the indicators, and implement appropriate intervention measures. After nearly a decade of war, we are working to keep pace with the expanding needs of our strained Army, and continuously identify and address the gaps that exist in our policies, programs, and services. The Army Health Promotion, Risk Reduction and Suicide Prevention Report 2010, along with the DOD Task Force on the Prevention of Suicide by Members of the Armed Forces and other strategic reports, serve as the foundation for our systemic effort to improve.

Question. What is the Army doing to address the disciplinary and other issues raised in the report on Health Promotion, Risk Reduction, and Suicide Prevention?

Answer. The Health Promotion, Risk Reduction, and Suicide Prevention (HP/RR/SP) report was a focused 15-month effort by a multidisciplinary team (leader/medical/personnel/law enforcement) to better understand the increasing rate of suicides in the force. This candid report informed and educated Army leaders on the importance of identifying and reducing high risk behavior related to suicide and accidental death, and promoting help-seeking behavior. Important issues raised in the report include: gaps in the current policies, processes and programs necessary to mitigate high risk behavior; an erosion of adherence to existing Army policies and standards; an increase in indicators of high risk behavior including illicit drug use other crimes, suicide attempts, and an increased operational tempo.

To address gaps in the current policies, processes and programs necessary to mitigate high risk behavior, the Army has taken actions such as establishing policies that limit the duration of prescriptions for controlled substances to 6 months, which addresses the issue of abuse of pharmaceutical drugs.

To address the erosion of adherence to existing Army policies and standards, the Army has established policies emphasizing the Army's current policies and systems for assessment, detection, and intervention of high risk behavior. This has already increased our compliance and utilization rates across numerous proven policies and processes.

To address the complex stressors associated with an increased operational tempo, the Army has increased the number of chaplains, behavioral health providers, substance abuse counselors and military family life consultants. These care providers work with soldiers and their families during high-stress periods, both prior to deployment/mobilization and during reintegration upon return from deployment.

Question. What is your assessment of the status of the Army's Resiliency Program in ensuring the readiness and well being of the Total Force?

Answer. The Army's Resiliency Program, Comprehensive Soldier Fitness, initiated in 2008, has been fully deployed beginning in fiscal year 2009. This is a long-term strategy that better prepares the Army community—including all soldiers, family members, and Department of the Army civilian workforce—to not only survive, but also thrive at a cognitive and behavioral level in the face of protracted warfare and the everyday challenges of Army life that are common in the 21st century. It has made developing psychological strength as much a part of Army culture as becoming physically fit and technically proficient.

The program, based on 30-plus years of scientific study and results, uses individual assessments, virtual training, classroom training, and embedded resilience experts to provide the critical skills our soldiers, family members, and Army civilians need. There is now solid scientific evidence that a well-implemented resilience program increases good coping, adaptability, and decrease catastrophic thinking among soldiers, especially young soldiers. A robust program evaluation is continuing to ensure we continue to provide the best education and training for our force.

Question. The National Institute of Mental Health (NIMH) is currently performing a 5-year, \$50 million study on suicides in the Army (referred to as the Study to Assess Risk and Resilience in Servicemembers) (STARRS). According to NIMH, preliminary data reveal several potential predictors for suicide as well as a three-fold increase in suicide rates among women who have deployed.

In light of this information, and based on your own experience as commander, what actions will you take, if confirmed, to enhance the Army's suicide prevention program?

Answer. It is important to recognize that the problem of the increasing suicide rate is complex. The findings from Army STARRS are being used to inform the Force, raise awareness, and promote help-seeking behavior. The Army STARRS team will continue to work with Army leadership to analyze and integrate context

into the research that is being conducted. This is an enduring problem that requires enduring solutions. If confirmed, I will sustain the extensive leader focus on this issue and its challenges.

SUPPORT FOR WOUNDED SOLDIERS

Question. Wounded soldiers from Operations Enduring Freedom, Iraqi Freedom, and New Dawn deserve the highest priority from the Army for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from Active Duty, if required, and continuing support beyond retirement or discharge. Yet, as the revelations at Fort Stewart in 2003 and Walter Reed in 2007 revealed, the Army was not prepared to meet the needs of returning wounded soldiers.

In your view, what were the most critical shortcomings in warrior care since 2001?

Answer. The quality of military medical care has and continues to be superb. I have seen first-hand how innovations such as the combat application tourniquet and combat gauze have saved hundreds of lives on the battlefield, allowing severely wounded soldiers to avoid bleeding to death before additional medical care is able to get to them. At the outset of Operations Enduring Freedom and Iraqi Freedom, the Army's infrastructure in garrison was lacking in the area of housing and managing outpatient care for returning wounded, ill, and injured soldiers. Additionally, we identified shortcomings in traumatic brain injury, post-traumatic stress, behavioral health, and pain management. Since 2001, we have invested significant research and resources to learn how to better care for these injuries and as a result have developed formal programs to improve warrior care. If confirmed, I will work with Secretary McHugh to ensure we continue to assess and enable procedures, processes, and care for our soldiers.

Question. What is your assessment of the Army's response?

Answer. With the support of Congress, the Army has improved in the housing of wounded and injured soldiers, developed well-resourced Wounded Warrior Transition Units (WTU) and more effectively centralized our Army programs under the Warrior Transition Command. If confirmed, I will work with Secretary McHugh to assess and monitor procedures, processes, and care of our soldiers.

Question. How does the Army provide follow-on assistance to wounded personnel who have separated from Active Service?

Answer. In 2004, the Army created the Wounded Warrior program to provide follow-on assistance to wounded personnel who separated from service. Under the program, the Army maintains contact with soldiers to provide a continuum of care and support.

Question. How effective, in your view, are those programs?

Answer. With more than 190 advocates stationed around the country in Department of Veteran Affairs medical facilities, at WTUs, and everywhere severely injured Army veterans reside, the Army Wounded Warrior (AW2) Program has continued to progress in support of our wounded warriors. These advocates enhance the Veteran Affairs Federal Recovery Care Coordinators to ensure seamless support for our most seriously wounded. As part of the Warrior Transition Command, AW2 is now positioned to ease the transition from soldier to veteran as part of a continuum of care and support that stretches from the battlefield to where they reside today. We still have some work to ensure seamless medical care as we transition our wounded warriors to the VA. We will continue to assess and make adjustments.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase the Army's support for wounded personnel, and to monitor their progress in returning to duty or to civilian life?

Answer. If confirmed, I will continuously assess the efficiency and appropriateness of the Army's support for wounded personnel. I would implement strategies and seek resources as needed to ensure that the Army meets the needs of wounded soldiers.

Question. Studies following the revelations at Walter Reed point to the need to reform the Army's disability evaluation system.

What is your understanding and assessment of the Army's disability evaluation system?

Answer. The Disability Evaluation System (DES) is better than it was 4 years ago; legislative changes and the new Integrated Disability Evaluation System has made the system less adversarial; provided greater consistency between military and VA ratings; reduced the time it takes to start receiving VA benefits after separation. However, the DES remains complex, disjointed, and hard to understand. We must do better to achieve a sustainable system that is understood and better serves

our wounded warriors. I also believe the rehabilitation and disability evaluation systems deserve a broader national and interagency discussion which focuses on the holistic care of our wounded warriors as they transition from the Army to the VA.

Question. If confirmed, what actions, if any, would you direct to address needed changes in this system, including the Army's growing population of non-deployable injured, ill, or wounded soldiers?

Answer. If confirmed, I will work with the other Services, DOD, the Department of Veterans Affairs to bring real reform to the process and get the Services out of the disability evaluation business.

ARMY WARRIOR CARE AND TRANSITION PROGRAM (OTSG, G1)

Question. In February, the Pittsburgh Tribune-Review published a series of articles that alleged that the Army's 38 WTUs had become "a dumping ground for criminals, malingerers, and dope addicts" creating an imbalance of soldiers who need complex medical case management and soldiers that commanders do not want to take on combat deployment.

Does the Army have adequate guidelines to ensure that only those soldiers with qualifying medical needs are assigned to WTUs?

Answer. I am concerned that WTUs maintain the focus on complex medical care management and support those soldiers with a genuine need. If confirmed, I will continuously assess guidelines to ensure that only soldiers with qualifying needs are assigned to the WTUs.

Question. In your view, are the WTUs serving the purpose for which they were created?

Answer. Over the past 4 years, the Warrior Care and Transition Program has significantly improved the quality of care and support soldiers and families have received.

Question. If confirmed, do you plan to make any changes to the criteria for assignment to a WTU?

Answer. While I do not have plans to change the criteria for assignment to WTUs at this time, this is an issue I will thoroughly assess, if confirmed. Also, I will continually assess the effectiveness of the Warrior Care and Transition Program to ensure it provides the level of care and support our wounded warriors deserve.

Question. Staffing of WTUs has been a major issue, especially at installations experiencing surges of redeploying troops.

In your view, are the WTUs staffed with sufficient numbers of qualified personnel?

Answer. While not fully informed concerning existing staffing levels in WTUs. I know that the Army Staff led by the Director of Force Management, in coordination with key leaders from the U.S. Army Medical Command and the Warrior Transition Command, reviews the structure and staffing of the WTUs on a quarterly basis. I will, if confirmed, learn more about this area and ensure that the WTUs are appropriately resourced to support the soldiers under their care.

IMPLEMENTATION OF THE REPEAL OF "DON'T ASK DON'T TELL" POLICY

Question. What is your assessment of the Army's readiness and capability to implement the repeal of the "Don't Ask Don't Tell" (DADT) policy?

Answer. Per the Chief of Staff, Army memorandum for Director, Joint Staff, subject: Assessment of Preparedness for Implementation of the Repeal of Don't Ask, Don't Tell, dated July 6, 2011: Based on both objective and subjective criteria, it is the CSA's judgment that the Army is prepared for implementation of the repeal of Don't Ask, Don't Tell consistent with the standards of military readiness, military effectiveness, unit cohesion, and the recruiting and retention of the Armed Forces. I concur in this assessment. Policies have been reviewed and training conducted to prepare for repeal within 60 days after certification.

Question. What in your view are the major challenges, if any, that could confront the Army in implementing the repeal of DADT? If confirmed, what actions, if any, would you propose taking to deal with these challenges?

Answer. The most important challenge has been educating our soldiers who are in combat situations with a minimum of disruption and risk and we have already successfully trained over 92 percent of the soldiers currently in theater with expected completion by mid-August. Although we have done some training with currently deployed units, we have made it our priority to train units prior to deploying and upon redeployment, and have allowed deployed units the maximum time to complete training. We will follow up with deployed units to ensure that all soldiers receive the required training upon their return from deployment.

Question. What measures has the Army taken to focus training on combat units and other deployed units and ensure that repeal of the current policy does not adversely affect combat operations?

Answer. The Army is using a chain teach methodology, where each commander is responsible for educating his/her subordinates and they in turn train their soldiers. Commanders and leaders are carefully managing deployed units' training to minimize impact on the mission. The Army continues to make every effort to train units prior to deployment.

Question. If confirmed, what conditions or circumstances would you expect to be achieved, if any, before recommending that the Chairman of the Joint Chiefs certify that DADT can be repealed without adversely affecting the Army?

Answer. If confirmed, I would base my recommendation on the input I receive from commanders and leaders, various assessments on chain teaching and propensity to be consistent with the requirements established by Congress and the DOD leadership. The Army is completing training according to Army guidance.

ARMY ROLE IN THE JOINT FORCE

Question. The committee's advance policy questions for General Dempsey raised a series of issues on the role of the Army as a part of the joint force.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I generally concur with General Dempsey that the Army best contributes to improved joint military capabilities while preserving its service unique capabilities and culture by providing forces for prompt and sustained combat operations on land and making permanent the advantages gained by the joint forces.

I would add, however, that I will continue to look closely at what capabilities the Joint Force and Nation require of its Army. We have learned to fight well as a Joint Force over the past decade and to leverage our sister service strengths and unique capabilities. If confirmed, one of my charters will be to ensure the Army continues to look outwardly at its role as a member of the Joint Force.

ACQUISITION ISSUES

Question. The committee's advance policy questions for General Dempsey raised a series of issues on the poor performance and challenges of major defense acquisition programs and the Army's efforts with its capability portfolio review process.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I generally concur with General Dempsey's answers to the acquisition issues raised in the advance policy questions. The Army must have carefully refined contract requirements, a sound program strategy, and stable funding to be successful in fielding major weapons systems and any other large acquisition programs. We also need to take a hard look at our acquisition process overall in an effort to shorten the delivery time, reduce costs, and improve our record of delivering the capability we require. Building a degree of flexibility to react to emerging requirements during production may be one area to consider but I would need to study this issue further before I make any specific recommendations for change.

I believe the Army is a learning organization and it continues to look for ways to improve itself in the acquisition arena, through both internally directed reviews like the Decker-Wagner study commissioned by the Secretary of the Army and external reviews like the Comptroller General's assessment referenced in the acquisition questions. As General Dempsey pointed out, we are already making progress with future programs and I am confident in our ability to continue to improve in our future acquisitions.

If I am confirmed, I look forward to reviewing the results of these assessments and I pledge to work diligently with the Secretary of the Army and the Army leadership, along with the Office of the Secretary of Defense and Congress, to ensure a unified effort toward acquisition effectiveness and efficiency that meets the capability needs of our force.

Question. If so, what steps do you believe the Department of the Army should take to address these problems?

Answer. The Department of the Army has already begun taking steps to address these concerns. There is a renewed emphasis on collaboration between the requirements and acquisition communities in the development of new programs. Last year,

Secretary McHugh commissioned a thorough review of the Army's acquisition process led by Hon. Gil Decker and Gen (Ret.) Lou Wagner that provides a blueprint for improvements to the acquisition process. I understand the Army is now studying these recommendations and developing a plan to implement those that help our process. As a whole, the Department must continue to build on these efforts to avoid unnecessary cost and delay in our programs.

ARMY MODERNIZATION

Question. The committee's advance policy questions for General Dempsey raised a series of issues on Army modernization efforts over the last decade and the findings of a recent modernization study done for the Secretary of the Army by former Assistant Secretary of the Army Gilbert Decker and retired Army General Louis Wagner.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I concur with General Dempsey's assessments of the Army's modernization efforts over the last decade. We have had success when it comes to equipping our soldiers, but we have also learned some valuable lessons including the importance of carefully and rigorously reviewing programs before we initiate them. If I am confirmed, I pledge that I will study the Army's acquisition process, and the results of the recent reviews of the process, and work closely with Secretary McHugh to identify areas where we can improve our modernization efforts and the acquisition process. I will definitely look hard at our capability as an Army to meet all potential threats and to operate in the variety of environments we are sure to find ourselves.

I recognize that all of my decisions and recommendations with respect to vision, structure, force mix, and modernization will be made against a backdrop fiscal constraint. However, I also agree with General Dempsey in that every decision and recommendation for trade-offs must be made only after considering and consciously acknowledging an acceptable level of risk.

Question. If confirmed, what actions, if any, would you propose to take to achieve a genuinely stable modernization strategy and program for the Army?

Answer. I recognize that a stable modernization strategy and program is an important component to both a balanced Army and to exercise good stewardship of resources entrusted to the Services. If confirmed, I will work closely with Secretary McHugh on how to achieve this.

Question. What is your understanding and assessment of the Army's current modernization investment strategy?

Answer. While it is true that several of our major modernization efforts over the past decade have been unsuccessful, I would submit that the American soldier today is the best equipped and enabled soldier this country has ever fielded. Successes such as the Stryker vehicle, world class body armor, soldier night vision equipment, soldier weapons, Precision fire systems such as Excalibur and HIMARS, and vehicles such as the Family of Medium Trucks all suggest to me that the Army has had some tremendous success in modernization.

I believe the Army has learned and continues to learn some important and valuable lessons in its processes and mindset to more carefully and rigorously review programs both before we initiate them and while they are in progress. We will have to do better as we move forward. This will be an area I will assess more deeply if I am confirmed as Chief of Staff and will periodically give this committee my frank assessments.

Question. Do you believe that this strategy is affordable and sustainable?

Answer. If confirmed, I plan to closely examine this strategy to ensure it is affordable and sustainable.

ARMY WEAPON SYSTEM PROGRAMS

Question. The committee's advance policy questions for General Dempsey raised a series of issues on several specific major Army research, development, and acquisition programs.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. If confirmed, I will ensure to monitor the progress and validity of each of these programs with respect to our current and future capability requirements.

1. Ground Combat Vehicle (GCV). In the development of the Ground Combat vehicle—the replacement for the Bradley Infantry Fighting vehicle—the Army is fully committed to the “Big Four” imperatives: Soldier protection; soldier capacity (squad plus crew); the capability to operate across the Full Spectrum of operations; and Timing (7 years to the first production vehicle from contract award). The Ground Combat Vehicle will be the first vehicle that will be designed from the ground up to operate in an Improvised Explosive Device (IED) environment. Modular armor will allow commanders the option to add or remove armor based on the current threat environment. The Ground Combat Vehicle will be designed with the capacity for Space, Weight, and Power growth to incorporate future technologies as they mature. The Army is using an incremental strategy for the Ground Combat Vehicle with the first increment being an Infantry Fighting Vehicle. The Army is currently reviewing proposals from vendors for Technology Development contracts.
2. Warfighter Information Network-Tactical (WIN-T). I believe that the Warfighter Information Network-Tactical is one of the Army’s most important programs. It provides the broadband backbone communications for the tactical Army. Warfighter Information Network-Tactical Increment 1 (formerly Joint Network Node) began fielding in 2004 to provide a satellite based Internet Protocol network down to battalion level. Warfighter Information Network-Tactical Increment 2 begins fielding in fiscal year 2012 to provide an initial On the Move capability, extending down to company level. Warfighter Information Network-Tactical Increment 3 will provide improved capabilities, including higher throughput, three to four times more bandwidth efficiency, and an aerial transmission layer, to all 126 brigades/division headquarters with an on-the-move requirement.
3. E-IBCT Network Integration Kit (NIK). The E-IBCT investment provides the infrastructure that will allow the Army to grow the tactical network capability, and an opportunity for both large and small companies to support the Army’s tactical network strategy. The NIK is a necessary bridge solution that allows the Army to continue evaluation and development of incorporated network technologies.
4. Joint Tactical Radio System (JTRS) including the Ground Mobile Radio (GMR) and Handheld, Manpack, and Small Form Fit (HMS) radios. Joint Tactical Radio System is the Services’ future deployable, mobile communications family of radios. They provide Army forces dynamic, scalable, on-the-move network architecture, connecting the soldier to the network. Fiscal year 2012 procurement funding supports fielding of Joint Tactical Radio System capability to 8 Infantry Brigade Combat Teams to meet fiscal years 2013/2014 network requirements. The Ground Mobile Radio is the primary vehicular radio capability using the Wideband Networking Waveform and Soldier Radio Waveform to meet tactical networking requirements. The Man Pack and Rifleman Radio are the primary Joint Tactical Radio System capability for battalion and below tactical operations. The man pack supports the Soldier Radio Waveform and interoperates with legacy waveforms (Single Channel Ground and Airborne Radio Systems, Ultra High Frequency Satellite Communications). Rifleman Radio primarily serves the dismounted formation and utilizes the Soldier Radio Waveform to provide voice and individual location information from the dismounted soldier to the leader. The combination of the three radios helps the Army to push the network to the individual soldier.
5. Stryker combat vehicle, including the Double-V Hull initiative, procurement of more flat-bottom vehicles, and the Stryker mobile gun variant. The current Stryker vehicle has exceeded its Space, Weight and Power and Cooling (SWaP-C) limits due to add-on appliqué (armor and devices) required for on-going combat operations. In the near term, it is imperative to increase crew protection with the Double-V Hull (DVH) Stryker. In the mid-term, Stryker modernization will improve protection and mobility by recouping SWaP-C, enabling future growth and allowing integration of the emerging network for all Stryker variants. Fleet-wide modernization for all variants upgrades protection, counter-IED, drive train, suspension, electrical power generation and management, and digital communications and network integration. Double-V Hull: Stryker Double-V Hull (DVH) is on track for June 2011 fielding. The initial DVH test results are positive, indicating the vehicle will be ready for fielding as scheduled. Non-Double V Hull and NBCRV: The Army will procure 168 Stryker NBCRVs in fiscal years 2012 and 2013 for a total quantity of 284 (an ARFORGEN rotation quantity). These vehicles are in normal Hull configuration. The Stryker NBCRV provides a unique capability to the Joint Force including a critical mission of Homeland defense, for which DVH protec-

tion is a lesser consideration. Stryker Mobile Gun System (MGS): The Army has procured and fielded 142 of 335 MGS. In August 2009, the Army decided to not pursue additional MGS procurement at this time with forthcoming fleet-wide modernization.

6. Joint Light Tactical Vehicle (JLTV). The JLTV is a joint program with the USMC, Navy and the Army; the Australian Army is also currently a partner in the Technology Development phase. I believe that the JLTV is a vital program to fill the force protection and payload gaps not currently satisfied by HMMWV. It will also fill the mobility, transportability, and communication architecture gaps not satisfied by the Mine Resistant Ambush Protected (MRAP) vehicles being used in Light Tactical Vehicle (LTV) roles. The Army Tactical Wheeled Vehicle Strategy plans for the JLTV to replace about a third of the LTV fleet, which is roughly 46,000 vehicles. The Army is currently examining the attributes of the JLTV program to ensure it meets our needs for the future Army light tactical fleet, especially in terms of protection.
7. Armed Aerial Scout (AAS). I agree the Army has an enduring requirement for an armed aerial scout as was reaffirmed after the termination of the Armed Reconnaissance Helicopter (ARH) program. This requirement will be validated by the ongoing AAS Analysis of Alternatives whose findings are scheduled for release in the third quarter of fiscal year 2011.
8. M1 Abrams tank modernization. In my view, the Abrams modernization is necessary and will initially enable integration of the emerging network and provide ability to fire the next generation of 120mm ammunition. Future modernization will provide capability improvements in lethality, protection, mission command, mobility, and reliability intended to maintain the fleet's combat overmatch and restore space, weight, and power margins to keep the tank relevant through 2050. The Abrams modernization program is funded in the fiscal year 2012 budget request. If confirmed, I will be able to offer an assessment as the program matures.
9. M2 Bradley infantry fighting vehicle modernization. The Bradley Infantry Fighting Vehicle (IFV) will be replaced by the Ground Combat Vehicle beginning in 2018. Bradley Non-Infantry Fighting Vehicle (Cavalry, Engineer and Fire Support variants) modernization will address recoupment of space, weight, and power to provide platform growth and enable improvements in protection, mobility, and ability to integrate the emerging network.
10. Logistics Modernization Program (LMP). Logistics Modernization Program (LMP). I understand that LMP is the Enterprise Resource Planning (ERP) system used by the Army Materiel Command for national-level (wholesale) logistics, including the operation of our depots and arsenals. LMP has 25,000 users and completed its final deployment in October 2010, making it the first fully-deployed Army ERP. Based on commercial off-the-shelf SAP software technology, LMP provides the Army with an integrated end-to-end supply chain solution at the national level that improves overall synchronization of information. I concur with the Army's vision to achieve a seamless, end-to-end modernized business enterprise and to develop and implement an enterprise logistics architecture. To support that vision, LMP integrates with other Army ERPs, including the General Funds Enterprise Business System (GFEBS), and Global Combat Support System-Army (GCSS-Army), to provide a seamless enterprise-wide logistics environment spanning the factory to the foxhole in accordance with the Army's overall ERP Strategy.
11. Paladin Integrated Management Vehicle program. I understand that the Paladin Integrated Management (PIM) program is an effort to address an existing capability gap in the self-propelled artillery portfolio brought about by an aging fleet and the termination of prior howitzer modernization efforts (Crusader and Non-Line of Sight-Cannon (NLOS-C)). The PIM program provides upgrades that allow the Army to meet existing and future needs, and leverages the commonality with the Bradley Fighting Vehicle chassis and automotive components. PIM should provide growth potential in space, weight, and power and capacity for network expansion to accommodate future howitzer related needs, to include the addition of such force protection packages as add-on armor.
12. M4 Carbine Upgrades/Individual Carbine Competition. The Army continues to make improvements and upgrades based on operational lessons learned through the M4 Product Improvement Program. The Army's effort is designed to integrate full automatic firing, an ambidextrous selector switch and a more durable "heavy" barrel. Simultaneously, the Army has initiated a full and open competition to confirm the best possible Individual Carbine solution. Results of the competition are expected in fiscal year 2013.

MINE RESISTANT AMBUSH PROTECTED (MRAP) VEHICLES

Question. The committee's advance policy questions for General Dempsey raised a series of issues on the future of the Army's large MRAP and MRAP-All Terrain Vehicle fleets.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I generally concur with General Dempsey that the Army should try to provide MRAP levels of protection to deploying forces worldwide commensurate with the mission assigned.

QUADRENNIAL DEFENSE REVIEW

Question. The committee's advance policy questions for General Dempsey raised a series of issues on the 2010 report of the Quadrennial Defense Review (QDR), its guidance with regard to the sizing of military forces for the future, and the military departments' orientation on six key mission areas.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I agree with General Dempsey's assessment that the Army's size and structure have proven adequate to meet the demands of our defense strategy, although the toll on our soldiers and families has been high. When trying to predict future size or structure changes, we need to maintain some flexibility.

It is difficult to predict what our future commitments will be and we need to account for our wounded warriors and nondeployables which will continue to increase over the next several years as we continue to engage in Afghanistan. Like General Dempsey, if I am confirmed, I pledge to work closely with the Secretary of Defense, the Secretary of the Army, the Chairman of the Joint Chiefs, and our combatant commanders to match end strength, structure, and tempo in our ARFORGEN rotational model to meet demands as they change.

Question. If confirmed, what size or structure changes would you pursue, if any, to improve or enhance the Army's capability to meet these requirements?

Answer. The nature of the strategic environment requires the Army to continuously assess its capabilities and force requirements. It's taken 10 years to achieve a size, structure, and capability that we can reasonably describe as balanced. We are accustomed to change, and we will undoubtedly need to continue to change. As we do we must seek to maintain a balance of capabilities that are available to meet the Nation's needs at a sustainable tempo.

I concur with each of General Dempsey's assessments of the improved capabilities required in the six key mission areas discussed in the attached reference. I also agree with his assessment that the Army is currently capable of supporting these mission requirements, but there are areas where we need to restore our proficiency and improve our training. If confirmed, I will study the QDR further and better evaluate areas where additional emphasis may be needed.

Question. The QDR report particularly emphasizes the requirement for improved capabilities in the following six key mission areas. For each, what is your assessment of the Army's current ability to provide capabilities to support these mission requirements?

If confirmed, what changes, if any, would you pursue to improve the Army's capabilities to support:

Defense of the United States.

Answer. The Army is fully capable of fulfilling its responsibility to defend the Homeland through detection, deterrence, prevention, and if necessary, the defeat of external threats or aggression from both state and non-state actors. A specific program recently undertaken to enhance this ability include the fielding of the enhanced Stryker Nuclear Biological and Chemical Reconnaissance Vehicle. This provides us with a much improved technical assessment and decontamination capability.

Question. Support of civil authorities at home.

Answer. The Army is well-postured to provide support to civil authorities. We are organized and trained to provide responsive and flexible support to mitigate domestic disasters, CBRNE consequence management, support to civilian law enforcement agencies, counter WMD operations, and to counter narcotics trafficking activities. We continue to address the challenges associated with this mission set including

unity of command, integration with civilian authorities, and the integration of title 10 and title 32 forces.

Question. Succeed in counterinsurgency, stability, and counterterrorism operations.

Answer. We are highly proficient in counterinsurgency, stability and counterterrorism operations. This has been the focus for the Army for much of the last 10 years and we have institutionalized lessons learned across the operating and generating force.

Question. Build the security capacity of partner states (including your views, if any, on the use of general purpose forces in the security force assistance role).

Answer. General Purpose Forces have a clear role in building sustainable capability and capacity of partner nation security forces and their supporting institutions. Peace time engagement is our best opportunity to shape the future operating environment. General Purpose Forces are well-suited to support these activities through Security Force Assistance.

Question. Deter and defeat aggression in anti-access environments.

Answer. The Army's ability to deter and defeat aggression in anti-access environments as part of the joint force is adequate to meet the demands of the current security environment. That said, there are some tasks and skills to which we have not trained due to the demands of our ongoing conflicts. We must restore our proficiency in those tasks. We work with our sister Services to assess our capabilities to conduct entry operations as part of the joint force and watch closely the improved anti-access/area denial capabilities being developed by potential adversaries.

Question. Prevent proliferation and counter weapons of mass destruction (WMD).

Answer. The Army provides highly trained and ready forces with capabilities to support combatant commander requirements to counter the proliferation of WMD. Current capabilities include operating effectively within a chemical, biological, radiological, and nuclear environment, specialized teams to locate and neutralize WMD, and an operational headquarters with expertise in eliminating WMD.

Question. Operate effectively in cyberspace.

Answer. We are on the right glide path to support U.S. Cyber Command and our geographic combatant commanders to operate effectively in cyberspace. On 1 October 2010, the Army stood up a new three-star command (U.S. Army Cyber Command/2nd Army), to direct the operations and defense of all Army networks, and when directed, provide full-spectrum cyberspace operations. The Army is bringing the forces of network operations, defense, exploitation, and attack under one operational level command to integrate and synchronize global operations for the first time.

MISSILE DEFENSE

Question. The committee's advance policy questions for General Dempsey raised a series of issues on air defense missile programs and a recent proposal to transfer a number of Army air and missile development programs to the Missile Defense Agency.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I agree with General Dempsey's responses involving the Army's missile defense program and his understanding of the Army's relationship with the Missile Defense Agency. In addition to protection of our deployed forces, I would add defense of our Nation's national security interests as one of the priorities of this program.

Yes. The Army has confirmed on many occasions that Air and Missile Defense is a core competency. Defense of our Nation's national security interest and protection of our deployed forces is the priority. The Army provides this protection in coordination with our sister Services and coalition partners.

I concur with General Dempsey in that the Army needs to continue to monitor the threat and prioritize required future capabilities to ensure we provide effective affordable solutions in a timely manner to our forces.

SPACE

Question. The committee's advance policy questions for General Dempsey raised a series of issues on Army support to Strategic Command in getting space based communications to the warfighter and the apparent lag in the acquisition of ground and other terminals to work with new satellite systems.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. Similar to General Dempsey, I am not currently in a position to provide an informed assessment of what needs the Army could address from space or what my vision for future Army space forces would be. I certainly appreciate, however, the importance of the Army's role in space and of ensuring that the Army does not fall behind or fail to be a complimentary contributor to the Joint Force in this domain. The Army depends on capabilities from space-based systems such as global positioning satellites, communication satellites, weather satellites, and intelligence collection platforms for the effective execution of full spectrum operations. I experienced some of the challenges the Army has with respect to the lag in acquiring required space technology in theater, but I would need to examine this issue more closely, if I am confirmed, before I can determine the real cause of any lag or recommend future action.

LOW-DENSITY/HIGH-DEMAND FORCES

Question. The committee's advance policy questions for General Dempsey raised a series of issues on low-density/high-demand forces.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I concur with General Dempsey that the Army needs to use the Total Army Analysis (TAA) to identify the capabilities necessary, within resource constraints, to achieve the full spectrum of missions expected of the Army. This process allows us to identify requirements while still managing acceptable risk for all forces, in both Active and Reserve components. I am not aware of any necessary functional changes that should be made between the components at this time, but if I am confirmed, I will continue to evaluate this matter. I also intend to continue to reinforce the great interaction seen between the Active and Reserve components of the Army that we have seen in the past 10 years.

MOBILIZATION AND DEMOBILIZATION OF NATIONAL GUARD AND RESERVES

Question. The committee's advance policy questions for General Dempsey raised a series of issues on the challenges associated with the mobilization of Army National Guard and Reserve Forces.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I have seen firsthand throughout my career how critical our Reserve component soldiers are to the Total Force. With increased deployments in the last decade, the Army has learned a lot about mobilizing and demobilizing these forces, and it will continue to learn from our experiences and to improve our processes. I understand the Army is currently reviewing all of its mobilization policies to ensure that the systems in place are effective and responsive to meet the Army's needs and the needs of our Reserve component soldiers and their families. If confirmed, I will continue to support these efforts.

I share General Dempsey's understandings and assessments of Reserve Force management policies and changes to how the Army uses the ARFORGEN model to build unit readiness for mobilization requirements. If I am confirmed, I will continue to assess the validity and effectiveness of this model over time and to work with Secretary McHugh to identify areas where changes may be needed. At present though, I am not aware of any required changes.

INDIVIDUAL READY RESERVE

Question. The committee's advance policy questions for General Dempsey raised a series of issues on accessing the Individual Ready Reserve (IRR).

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I concur with General Dempsey that the IRR has proven to be an invaluable asset to all Army components in support of contingency operations around the world and it is a critical source of highly-skilled soldiers. I continue to be amazed

at the incredible talent resident across our Total Force. I am not aware of any changes that need to be made to the mobilization or recall policies of our IRR. If I am confirmed, I will learn more about these policies before making any final assessment.

In response to the recent studies showing higher rates of suicide among the IRR, I concur with General Dempsey's response and acknowledge the gravity of this particular issue. If confirmed, I will continue to support the Army's effort to pursue all avenues available to assure the well being of our Total Force.

PERSONNEL AND ENTITLEMENT COSTS

Question. The committee's advance policy questions for General Dempsey raised a series of issues on the challenges of personnel and entitlement cost growth.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I agree with General Dempsey that in order to take control of the Army's personnel costs and entitlement spending, we need to strike a balance between preserving the All-Volunteer Force, accomplishing operational missions, and retraining an Army that is affordable to the Nation. I am not familiar with a requirement to reprogram money to cover current personnel costs.

I also understand that the Military Personnel Army (MPA) appropriation was passed by Congress in April 2011; and both the MPA OCO and Active component base force requirements are adequate to meet current personnel costs.

MEDICAL AND DENTAL READINESS OF ARMY NATIONAL GUARD AND ARMY RESERVE PERSONNEL

Question. The committee's advance policy questions for General Dempsey raised a series of issues on medical and dental readiness of Reserve component personnel.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I concur with General Dempsey and believe the Army should develop and resource mechanisms to routinely identify, screen, and assess Reserve component medical readiness. I also believe that the health and fitness of the Reserve component is a very important issue. In addition to the Comprehensive Soldier Fitness Program already discussed by General Dempsey, the Army is also moving forward with a Soldier Medical Readiness Campaign Plan that seeks to improve health and fitness, increase soldier resilience, and reduce injury rates. If confirmed, I would work with the Army's Active and Reserve component leadership to continue these important initiatives and to develop policies for more effectively identifying ready and medically non-ready soldiers across the force.

ARMY SCIENCE AND TECHNOLOGY

Question. The committee's advance policy questions for General Dempsey raised a series of issues on Army the value and management science and technology programs.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. As General Dempsey stated, the Army's science and technology investment strategy is shaped to foster invention, innovation, and demonstration of technologies for the current and future warfighter. I believe that a strong Army science and technology program has already provided many advanced capabilities demonstrated in the past 10 years of war.

Technological innovations have resulted in the rapid development and deployment of lightweight and adaptable armor solutions, jammers, unmanned air vehicles, unmanned ground vehicles, surveillance systems, communications devices, and day/night vision systems. All of these technology enabled capabilities have significantly improved our warfighters' capabilities in recent operations. If I am confirmed, then like General Dempsey, I would use metrics that demonstrate improved warfighters' capabilities; improve acquisition programs; and align technology development to warfighters' requirements, to judge the value and investment level in Army science and technology programs. I do not currently envision any specific new science and

technology areas for the Army to pursue, but I would welcome the opportunity to study this matter further.

ARMY LABORATORIES AND RESEARCH, DEVELOPMENT, AND ENGINEERING CENTERS

Question. The committee's advance policy questions for General Dempsey raised a series of issues on the Army's commitment to and investment in its laboratories and research, development, and engineering centers.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. As General Dempsey stated, Army laboratories are science and technology performing organizations that play a major role in supporting current operations with best capabilities available and providing critical new capabilities for soldiers particularly in key strategic science and technology areas.

I concur with General Dempsey that the Army laboratories and research and development centers need to maintain the resources required to continue initiatives and advancements that support the warfighters. If confirmed, I will learn more about their operations and support efforts to improve best practices and workforce quality necessary for mission accomplishments.

ARMY TEST AND EVALUATION EFFORTS

Question. The committee's advance policy questions for General Dempsey raised a series of issues on the Army's failure to meet test and evaluation range investment certification requirements from the DOD Test Resource Management Center.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I have reviewed General Dempsey's answer and concur with his response, that testing is a crucial capability for maintaining the Army's combat edge and modernizing the force. I fully recognize the value of testing to ensure new technologies and equipment address the capabilities our warfighters need. If confirmed, I will work closely with the Army test and evaluation community and the Office of the Secretary of Defense test and evaluation leadership to ensure the Army's test and evaluation infrastructure is adequately resourced to address testing requirements and maintain robust test capabilities.

ARMY INFORMATION TECHNOLOGY PROGRAMS

Question. The committee's advance policy questions for General Dempsey raised a series of issues on Army information technology management, consolidation, and efficiencies initiatives.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I concur with General Dempsey's response and believe the Army needs to implement and enforce technical standards, make acquisition of commercial off-the-shelf (COTS) or near-COTS technology easier, and field new technology to operational forces more quickly. This is in line with the congressional mandate you gave us in section 804 of the 2010 NDAA.

The center for network integration at Fort Bliss, TX—the Army Evaluation Task Force (AETF) will serve as the Network's primary test unit with a two-fold intent, to remove the integration burden from the operational units and to provide an operational venue to evaluate new technologies and network capabilities prior to fielding to operational units. The new capabilities they develop should ultimately provide the impetus for future acquisition and equipping decisions.

HUMAN TERRAIN SYSTEMS

Question. The committee's advance policy questions for General Dempsey raised a series of issues on Army's plans to institutionalize its Human Terrain System program.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I concur with General Dempsey and I understand the Army has institutionalized the Human Terrain System as an enduring capability assigned to Training and Doctrine Command and funded capability starting in the fiscal year 2011. I also believe there is merit to developing a joint capability. In September 2010, General Dempsey directed a Training and Doctrine Command capability-based assessment of all socio-cultural capabilities throughout the combatant commands and Services. The intent is to identify other ongoing socio-cultural initiatives, to determine potential synergies and best practices in order to develop and evolve an enduring joint capability. The results of this assessment have been compiled, and if confirmed, I will make this part of my review.

OPERATIONAL ENERGY

Question. The committee's advance policy questions for General Dempsey raised a series of issues on the Army's operational energy program and its lack of quantitative metrics against which to measure progress.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I concur with General Dempsey's response that the most important issue with operational energy is the amount of fuel used to meet our operational needs. Most of our fuel is used in generation of electricity. The Army has implemented, and accelerated deployment, of generators that use less fuel as well as microgrid systems that tie generators together to operate more efficiently. We are developing more efficient motors for helicopters and vehicles to reduce our operational energy footprint and, ultimately, wars are won or lost by dismounted soldiers, so the Army is addressing excessive soldier loads, driven in large part by energy and power constraints. If confirmed, I will continue efforts currently underway to increase our energy efficient capabilities in theater and emphasize energy awareness through the military chain of command, and across the Army, to foster a more energy-aware culture.

Question. What is your understanding of the Army's progress with respect to testing and deploying operational energy technologies?

Answer. As General Dempsey stated, the Army is taking advantage of every avenue, to include industry, to help us develop technologies that can reduce our operational energy footprint. Renewable energy systems and insulated tentage are some of the systems being piloted and tested. We are also evaluating technologies that will help lighten soldier loads and reduce the amount of batteries and fuel we must procure and deliver to theater. We will continue to pursue more efficient devices, emphasize energy conservation, and employ energy management capabilities that are essential to retain energy as an operational advantage.

Question. What is your understanding of how the Army is taking advantage of its labs and research, engineering, and development centers to further its operational energy and security goals?

Answer. I concur with General Dempsey's response that the Army has integrated the national laboratories with Department of Energy and Army laboratories to develop solutions to a range of operational energy, power, and security needs. Some of the initiatives include research to reduce the size and weight of components, broadening alternative energy sources, leveraging various emergent energy efficient technologies. These new technologies will increase energy efficiency and improve power supplies for contingency bases, forward operating bases and equipment carried by individual soldiers. If confirmed, I will work to ensure that the research conducted at Army facilities continues to focus on meeting the operational energy needs of the current and future Army and to support DOD's high priority program to increase energy efficiencies.

INVESTMENT IN INFRASTRUCTURE

Question. The committee's advance policy questions for General Dempsey raised a series of issues on decades of under-investment in installation infrastructure that have led to increasing maintenance backlogs and substandard living and working conditions.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I concur with General Dempsey's statement that since fiscal year 2007, with Base Realignment and Closure, Transformation, and Grow the Army initia-

tives, the Army has made significant military construction investments in its infrastructure. Additionally, a variety of public-private partnership initiatives have complemented direct Army investments. If confirmed, I will work with the Assistant Secretary of the Army, Installation, Energy and Environment, the Assistant Chief of Staff for Installation Management, and the Commanding General at Installation Management Command to assess our infrastructure investments.

Question. If confirmed, what actions, if any, would you propose to increase resources to reduce the backlog and improve Army facilities?

Answer. The proper stewardship of our facilities portfolio requires the Army to fully sustain current facilities, dispose of our excess facilities, improve the quality of our worst facilities, and build-out our largest and most critical shortages, all at a level adequate to support the mission. The Army is utilizing programs in which it leverages private financing to upgrade infrastructure and ensure more sustainable, efficient, and reliable mission support. If confirmed, I will evaluate the proper balance of funding, to include evaluating privatization opportunities and whether the Army should increase operation and maintenance funding for restoration and modernization and proper stewardship of our facilities portfolio requires the Army to fully sustain the current facilities, dispose of our excess facilities, improve the quality of our worst facilities, and build-out our largest and most critical shortages, all at a level adequate to support the mission.

ARMY POLICIES REGARDING DRUG AND ALCOHOL ABUSE

Question. The committee's advance policy questions for General Dempsey raised a series of issues on the Army drug and alcohol abuse policies and programs.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I concur with General Dempsey that Army policy directs commanders to initiate administrative separation for all soldiers involved in trafficking, distribution, possession, use, or sale of illegal drugs. While the policy requires initiation of separation, commanders have the authority to retain or separate a soldier. I concur with this policy as it has proven effective in allowing commanders necessary discretion in treating each soldier and incident on its merits while balancing the needs of the Army.

Question. What is your understanding of the Army's policy with respect to rehabilitation and retention on Active Duty of soldiers who have been determined to have used illegal drugs or abused alcohol or prescription drugs? Do you agree with this policy?

Answer. I agree with General Dempsey. Army policy requires the separation authority consider a soldier drug offender's potential for rehabilitation and further military service allowing effective management of the Army's personnel and discipline needs. To effectively enforce this policy, soldiers who commit drug and alcohol offenses are required to be evaluated by a certified substance abuse counselor through the Army Substance Abuse Program (ASAP). The ASAP counselor's recommendation is considered by the commander when determining a soldier's potential for rehabilitation and retention. I concur with this policy.

Question. Do you believe that the Army has devoted sufficient resources to implementation of its rehabilitation policies and objectives since 2001? If not, in what ways?

Answer. I have served at numerous command levels since 2001. In my experience, sufficient resources are devoted to the Army's rehabilitation policies and objectives. If confirmed, I will assess and closely monitor the level of resourcing for this important area.

Question. What measures are being taken to improve the Army's performance in responding to problems of drug and alcohol abuse?

Answer. The Army is very adept at analyzing itself to determine a better way ahead. The Army's policy is a comprehensive approach bringing together the skills and experience of commanders, law enforcement, and the medical community for drug and alcohol abuse incidents. The Army continues working on improving systems for detecting drug and alcohol abuse as well as on improving intervention systems so that we can help our soldiers who selflessly sacrifice for our Nation. One method through which the Army builds resiliency in the force is through the continually expanding Comprehensive Soldier Fitness Program. By encouraging a more resilient force and through awareness of available confidential programs, the Army's goal is to promote help seeking behavior by soldiers.

MEDICAL PERSONNEL RECRUITING AND RETENTION

Question. The committee's advance policy questions for General Dempsey raised a series of issues on significant shortages in critically needed medical personnel in both the Army's Active and Reserve components.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

The Army continues to face significant shortages in critically needed medical personnel in both Active and Reserve components.

What is your understanding of the most significant personnel challenges in recruiting and retaining health professionals in the Army?

Answer. I concur with General Dempsey, there continues to be a national shortage of medical professionals that challenges the Army's efforts to recruit and retain health care professionals. We are concerned that escalating need in the civilian sector will impact the demand for these critically short professionals. To take care of our soldiers, the Army must continue evaluating initiatives and programs to attract and retain the most skilled and talented health care providers.

Question. If confirmed, would you undertake a comprehensive review of the medical support requirements for the Army, incorporating all new requirements for 2011 and beyond?

Answer. Like General Dempsey stated, I also believe it is important to review medical support requirements on a regular, recurring basis. If confirmed, this review will allow me to assess whether the Army is meeting its medical support requirements and, if not, determine where improvements can be implemented to better serve our soldiers.

Question. If confirmed, what policies or legislative initiatives, if any, are necessary in order to ensure that the Army can continue to fulfill ongoing medical support requirements?

Answer. I do not believe additional legislative authorities are needed to ensure the Army fulfills medical support requirements. Like General Dempsey, the policy initiatives currently underway and the changes implemented by the National Defense Authorization Act for Fiscal Year 2011 at this time, allow the Army to serve the needs of its soldiers. If confirmed, this will be an area I closely monitor. If any additional authorities are identified as necessary to maintain this goal, I will work closely with the administration and Congress to address the needs.

FOREIGN LANGUAGE PROFICIENCY

Question. The committee's advance policy questions for General Dempsey raised a series of issues on foreign language policy, doctrine, and building capabilities for both military and civilian personnel.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

A Foreign Language Transformation Roadmap announced by DOD in March 2005, directed a series of actions aimed at transforming the Department's foreign language capabilities to include revision of policy and doctrine, building a capabilities based requirements process, and enhancing foreign language capability for both military and civilian personnel.

What is your assessment of the progress the Army has made in increasing its foreign language capabilities in operations in Iraq and Afghanistan?

Answer. I concur with General Dempsey that the Army has increased in foreign language capabilities in support of OIF/OEF. The Army revolutionized its recruiting processes to enlist native and heritage speakers into vital interpreter/translator positions. Overall, these initiatives have provided enhanced capabilities for counterinsurgency operations and building partner capacity overseas.

Like General Dempsey, I also believe a high priority for DOD should be the continued support of the Defense Language Institute Foreign Language Center, which provides Culturally Based Language Training to all Services and DOD components.

PROTECTION OF U.S. FORCES AGAINST INTERNAL THREATS

Question. The committee's advance policy questions for General Dempsey raised a series of issues on a DOD review of the attack at Fort Hood concluding that the Department was poorly prepared to defend against internal threats, including radicalization of military personnel.

Answer. I concur with General Dempsey that the lessons learned are invaluable to the Army as we strive to improve the Army Protection Program for individuals and units against emerging threats. If confirmed, and as General Dempsey also stated, I will ensure that we continue to integrate and synchronize the many Army Protection Programs that protect our soldiers, family members, and Department of the Army civilians by ensuring that commanders and leaders have the information and tools needed to address the ever changing threat environment.

RELIGIOUS GUIDELINES

Question. The committee's advance policy questions for General Dempsey raised a series of issues on a DOD review of the attack at Fort Hood observation that "DOD policy regarding religious accommodation lacks the clarity necessary to help commanders distinguish appropriate religious practices from those that might indicate a potential for violence or self-radicalization" and recommended that the policy be updated.

Answer. I concur with General Dempsey that there are established policies for religious accommodation in wear and appearance of Army uniforms and insignia and because the Army is a diverse, professional force, committed to treating all soldiers with dignity and respect, that our policies must be clear and provide appropriate guidance to both soldiers and commanders. Like General Dempsey, I also believe that current Army policies provide commanders with adequate flexibility to balance accommodation for religious beliefs and maintain good order and discipline. To this end, if confirmed, I will assess the current policy and determine if further changes are necessary.

FAMILY SUPPORT

Question. The committee's advance policy questions for General Dempsey raised a series of issues on the Army Family Action Plan and its success in identifying and promoting quality of life issues for Army families.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I concur with General Dempsey's statement that the most pressing family readiness issues include sustaining the Army Family Covenant and improving communication and awareness of the extensive range of available support programs and services the Army has to improve soldier and family quality of life. The Army Family Action Plan, Survey of Army families, and other studies revealed that soldiers and families may not be aware of the myriad of available support services.

To address this concern, the Army is transforming Army Community Service (ACS) to help connect soldiers and families to the right service at the right time. The Army has begun piloting ACS transformation and anticipates completion by October 2011. I also will endeavor to ensure that Army family programs reach out to all soldiers and their families, regardless of component, geographic location or deployment status. I will work to ensure that family program platforms and delivery systems keep pace with a mobile Army and utilize technological advances and social networking so services are available to the soldiers and families who need them.

I am highly interested in the results of the ACS pilot and if confirmed, I will continue to strengthen our support services and ensure our programs efficiently meet the needs of the soldiers and families who use them.

MENTAL HEALTH ADVISORY TEAMS

Question. The committee's advance policy questions for General Dempsey raised a series of issues on the Army's Mental Health Advisory Team (MHAT) studies in Iraq and Afghanistan and their value in identifying the extent of mental health conditions and resource and training challenges being experienced in combat theaters.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I concur with General Dempsey that the MHAT studies have played a key role in proactively identifying how changes in the operational environment impact the ability to provide behavioral health care. Both MHAT VI OEF and VII OEF recommended several critical measure that we have put into effect, namely the number of behavioral health personnel in theater to number of soldiers. One of the most valuable findings from the MHATs has been to document that soldiers suffering multiple deployments and/or short dwell times report higher mental health

problems. Overall, the willingness to take a systematic look at the behavioral health care system and the behavioral health status of soldiers through programs such as the MHATs has ensured that the Army is being responsive to the needs of deployed soldiers. If confirmed, I will ensure that the Army continues to develop and synchronize the expeditionary components of health promotion, risk reduction, and suicide prevention programs and services.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. The committee's advance policy questions for General Dempsey raised a series of issues on policies and procedures to improve the prevention of, and response to, incidents of sexual assault, including providing appropriate resources and care for victims of sexual assault and addressing the challenges that remain.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. Like General Dempsey, I am very concerned about reports of sexual assault in our Army, whether deployed or otherwise. We cannot tolerate this behavior wherever it occurs. The Army is committed to providing victims in all units with appropriate medical care, resources, and support while ensuring that our prevention and response programs are fully available and prepared. The Army's SHARP program is a formidable effort at dealing with this issue. There is no doubt that this is a challenging problem that will require leadership and constant vigilance at all levels, and if confirmed, I will continue to look closely at the Army's sexual assault program, to ensure there is trust and faith in the Army's programs and system, and that there is continuous oversight and leadership involvement.

MORALE, WELFARE, AND RECREATION

Question. The committee's advance policy questions for General Dempsey raised a series of issues on Morale, Welfare, and Recreation (MWR) programs critical to the enhancement of military life for members and their families.

We ask that you respond to the same questions. In doing so, you may incorporate General Dempsey's responses by reference, or provide your answer in the form of an explanation of any differences that you may have from, or areas in which you would like to further amplify, the views expressed by General Dempsey.

Answer. I concur with General Dempsey that the Army has taken steps to ensure we care for and retain families through a broad range of meaningful initiatives, to include many family and MWR programs and services. The criticality of these programs is immeasurable and I feel we cannot afford to lose such a key enabler of our Force.

The challenge will be in our resource-constrained environment to sustain a consistent level of funding for these programs. If confirmed, I will consult with commanders, soldiers, and families to ensure that these programs are adequate and meet their needs.

DETAINEE TREATMENT STANDARDS

Question. Do you agree with the policy set forth in the July 7, 2006, memorandum issued by the Deputy Secretary of Defense stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. Yes. The U.S. military will continue to follow the principles of humane treatment outlined in Common Article 3. These basic rules of the law of armed conflict will continue to guide our conduct toward detainees, no matter how they were captured or how the conflict is characterized.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the DOD Detainee Program, dated September 5, 2006?

Answer. Yes. Both of these documents provide effective, practical guidance, and direction to the field on critically important issues relative to detainee treatment, detainee operations training, and the interrogation of detainees.

Question. Do you believe it is consistent with effective military operations for U.S. forces to comply fully with the requirements of Common Article 3 of the Geneva Conventions?

Answer. Yes. Common Article 3 has long provided the minimum standards of conduct for the U.S. military. Our forces have adhered to the humane treatment protec-

tions outlined in this article and they have been a part of U.S. policy on the law of war for many years.

Question. If confirmed, how would you ensure that U.S. forces in Iraq and Afghanistan comply with the standards in the Army Field Manual, the DOD Directive, and applicable requirements of U.S. and international law regarding detention and interrogation operations?

Answer. First, the Army is committed to adherence to the law of war and the humane treatment of detainees. The value of adherence to the rule of law in our operations cannot be underestimated—it ensures the trust and respect of the American people, enhances our international credibility, and establishes our professional credentials. Our professional and ethical conduct on the battlefield also earns the respect of the civilian populace we are sworn to protect on this asymmetric battlefield.

I intend to emphasize the importance of conducting disciplined military operations, characterized by adhering to the laws of war, treating detainees humanely, and showing compassion and restraint on the modern battlefield.

I would also seek to sustain and improve our existing systems for helping our soldiers to understand and adhere to the proper standards for detainee treatment, detention operations, and interrogations.

Finally, when allegations of wrongdoing by soldiers surface, the Army will continue to fully investigate and hold soldiers accountable, as appropriate and consistent with the Uniform Code of Military Justice, if misconduct is substantiated.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as Chief of Staff of the Army?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Note: General Martin E. Dempsey's responses to his Advance Policy Questions from his nomination hearing dated March 3, 2011, to be Chief of Staff of the U.S. Army, appear at the end of this transcript, located at Annex A.]

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR CARL LEVIN

ARMY FORCES

1. Senator LEVIN. General Odierno, in your advance policy questions, you note that “during the last 10 years, the Army National Guard has transformed from a Strategic Reserve to an Operational Force.” When considering the relationship between the Army's Active component and its Reserves and National Guard, in your view, what distinguishes a “Strategic Reserve” from an “Operational Reserve” and from an “Operational Force”?

General ODIERNO. We structure the Army—Active, National Guard, and Army Reserve—as a Total Force, responding together to meet the requirements of the combatant commanders. An important distinction between Strategic Reserves and Operational Reserves is readiness and length of time and resources required to deploy a unit to a theater of operation. Continuous investment in a Strategic Reserve is considerably less than that of an Operational Reserve because the Strategic Reserve has no immediate or short-term expectation of deployment; however, any rapid need for this force requires unprogrammed resources. The Operational Reserve has an assigned mission and must be at a higher state of readiness, similar to an Active Duty unit.

The demand for U.S. ground forces over this past decade has highlighted the need for the Army to maintain an Operational Reserve to meet both current and future operational requirements. Reducing our presence in Iraq and Afghanistan will not alleviate the responsibility of the Army to be prepared to rapidly participate in the full spectrum of contingency operations across the globe. Maintaining an appropriate level of resourcing for the Operational Reserve coupled with Army Force Generation (ARFORGEN) will allow the mobilization of these forces on a predictable and recurring basis. It will be the enabling edge that ensures our success in a complex security environment. The operating force consists of the units (both Active and Reserve) whose primary missions are to participate in combat and the integral supporting elements thereof.

2. Senator LEVIN. General Odierno, how would you treat each with respect to resource requirements and allocation if they are distinguished by different standards of readiness in manning, equipping, and training?

General ODIERNO. We do not distinguish components by different standards of readiness. We structure the Army—Active, National Guard, and Army Reserve—as a Total Force, responding together to meet the requirements of the combatant commanders. To meet joint force requirements for rotational and contingency operations in the new security environment, the Army moved to the sustainable ARFORGEN system. Under ARFORGEN, standards of readiness in manning, equipping, and training of units are synchronized to meet their respective operational deployment mission and training/readiness timeline. We ensure that any unit, regardless of component, is resourced to accomplish its assigned mission. To enable us to keep all units ready we need continued assured access to the Reserves, and the resources to sustain readiness.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

ARMY MAJOR WEAPONS PROCUREMENT PROCESS

3. Senator MCCAIN. General Odierno, as you likely know, a group chartered by the Secretary of the Army to look into how the Army procures major weapons systems found that, every year since 1996, the Army has spent more than \$1 billion annually on programs that were ultimately cancelled. Since 2004, including the now-cancelled Future Combat System program, \$3.3 billion to \$3.8 billion (or 35 percent to 42 percent) per year of Army developmental testing and evaluation funding has been lost to cancelled programs. The Center for Strategic Budgetary Assessments just recently came out with a similarly harsh assessment of how poorly major Army weapons programs have performed as promised. Do you agree that the Army cannot afford to continue losing funds in this manner? If so, how would you address it, if confirmed as the Army Chief of Staff?

General ODIERNO. I agree that the Army must exercise very careful stewardship of the taxpayers' dollars, particularly in this time of budgetary constraints. Although the Army has clearly faced challenges with the development of major weapons systems, Secretary McHugh has undertaken an unprecedented review of the Army acquisition process. The Decker-Wagner panel examined weapons system procurements from “cradle-to-grave” with a key focus on properly defining requirements. I understand that many of the Army's development and procurement problems stemmed from pursuing requirements that ultimately did not match the needs of the soldier, were cost prohibitive or were technologically infeasible. The Army has been working to implement many of the recommendations of the Decker-Wagner panel and many of these recommendations are already reflected in the acquisition strategy for the new Ground Combat Vehicle (GCV).

If confirmed, I will work closely with the Secretary of the Army to ensure a unified effort to improve the effectiveness of the process to meet the capability needs of our force.

4. Senator MCCAIN. General Odierno, in your view, what are the lessons learned from the Army's experience with these failed major Army weapons programs?

General ODIERNO. In my view, the most important lesson learned from past experience is that materiel solutions require diligent and complementary efforts throughout the acquisition lifecycle among the requirements, acquisition, and resourcing communities in pursuit of affordable and achievable solutions. Affordability and risk must be addressed from the earliest stages of requirements development throughout the execution of acquisition programs with an emphasis on what we can realistically afford and develop. The lessons learned from recent conflicts and prior acquisition efforts will help the Army invest limited fiscal resources in a responsible manner.

5. Senator MCCAIN. General Odierno, if confirmed, how would you help to ensure that the enormously expensive lessons learned from these failed major Army programs are brought to bear on the GCV program?

General ODIERNO. I understand the Army acquisition community has already applied some of these lessons learned on the GCV program. Under the leadership of the Army Acquisition Executive, the Army assembled a team of senior subject matter experts as they refined the 900-plus GCV requirements and revised the original Request for Proposals. The Army team, which included members of the requirements, resourcing, contracting, and program management communities, developed a set of tiered requirements that distinguish critical must-have capabilities and provide industry with the necessary flexibility to develop vehicle designs that meet the Army's strict cost and schedule constraints. In addition, the GCV acquisition strategy implements innovative measures designed to keep the program on schedule and on budget, to include fixed price incentive fee contracts in the 2-year technology development phase, an increased emphasis on mature technologies and reliance on competition throughout the program as an incentive. In short, GCV is an example of the Army's implementation of acquisition reform.

ARMY MEADS PROGRAM

6. Senator MCCAIN. General Odierno, as you probably know, this committee declined to authorize the President's request for \$407 million to continue U.S. participation in the Army's troubled Medium Extended Air Defense System (MEADS) program. During the previous administration, the United States partnered with Italy and Germany to develop this aspect of the missile defense program in Europe. But, since then, this development effort dramatically overran in cost and has failed to perform as promised. Considerably frustrated with the program's failure and how the program addressed "termination liability" as to the United States, this committee zeroed out the administration's funding request for the program for fiscal year 2012. However, a few days ago, a top German defense official reportedly had strong words for the United States and the likelihood that it would unilaterally withdraw from the program. This official indicated that such a withdrawal was "not an option" and called on the Department of Defense (DOD) to uphold U.S. "contribution commitments—even beyond the development phase". What is your reaction to the German officials' comments and how this committee addressed the administration's funding request for the program?

General ODIERNO. The President's fiscal year 2012 budget request funds MEADS development in fiscal year 2012 and fiscal year 2013 in accordance with the international agreement with Italy and Germany. The funding will complete a Proof of Concept effort to mature advanced air and missile defense technologies under the MEADS MOU and will culminate with two intercept flight tests in fiscal year 2013 using the PAC-3 Missile Segment Enhancement (MSE) missile. The Proof of Concept is intended to place the program on sound footing should Germany and Italy wish to continue to production. Per recent correspondence to Dr. Carter from both German and Italian government officials, both partners have agreed that refocusing the remaining MEADS development as a Proof of Concept, as reflected in the President's budget, is the proper course of action and that is the course that we strongly recommend pursuing.

7. Senator MCCAIN. General Odierno, as far as you know, DOD's current plan is only to participate in the program inasmuch as it is restructured as a Proof of Concept program, as opposed to a larger development effort. But, the German official is clearly calling for the United States to modify its plan. Are you aware of any current interest whatsoever among leadership at the Army, or the Office of the Secretary of Defense (OSD), to change its approach as the German official suggested?

General ODIERNO. No, the Army continues to support OSD's decision that DOD will participate only through the completion of the Proof of Concept approach.

PERSONNEL COSTS

8. Senator MCCAIN. General Odierno, what percentage of the U.S. Army is non-deployable due to medical conditions, being on a temporary retired status, or awaiting disability determinations prior to separation from military service?

General ODIERNO. About 10 percent of soldiers currently serving in the Active Army are nondeployable due to medical conditions; this includes soldiers awaiting disability determinations and soldiers with temporary conditions. Soldiers on the Temporary Disability Retired List (TDRL) are retired and considered veterans, so they do not count against end strength.

9. Senator MCCAIN. General Odierno, do you know if that number has increased or decreased in recent years?

General ODIERNO. Since January 2008, the number of soldiers in the Army's Disability Evaluation System (DES) has increased 169 percent (6,948 to 18,671). In the last year, we have seen a 50 percent increase in this population (12,419 to 18,671) and currently we have over 18,000 soldiers in the DES. We currently have over 11,000 soldiers on the TDRL. Soldiers on the TDRL are retired and considered veterans, so they do not count against end strength, but we do use limited medical resources conducting their disability reevaluation. Since January 2008, the number of soldiers on the TDRL has increased 127 percent (4,959 to 11,049), and in the last year we've seen an increase of 15 percent (9,586 to 11,049). Normally, soldiers on the TDRL receive a medical reevaluation at least once every 18 months, and at any given time we have a third undergoing a medical reexamination.

10. Senator MCCAIN. General Odierno, do these prolonged processes represent costs that could be avoided in the personnel arena, and applied to other readiness requirements?

General ODIERNO. The Army has 18,671 soldiers in the DES. Apart from the impact these nondeployable soldiers have on our ability to man contingency forces at 90 percent, the DES process diverts limited medical resources. Medical requirements for DES population increasingly compete for care with deploying SM, family members, and those recovering from wounds and injuries; the DES pulls limited medical resources away from treatment and rehabilitation.

Additionally, there has been a significant increase in the number of administrative staff required to prepare for and manage the board process and to provide direct support to the soldiers going through the disability evaluation process.

11. Senator MCCAIN. General Odierno, as Chief of Staff of the Army, what actions do you think are necessary to address this issue?

General ODIERNO. The DES is better than it was 4 years ago. Legislative changes have improved the consistency between Military and VA ratings, and the new joint DOD/VA DES has reduced the time it takes for soldiers separated for a disability to start receiving the VA benefits. However, the process remains complex, adversarial, not fully integrated, and takes far too long to complete.

While the two departments have merged their separate disability systems, each still must follow the laws and policies specific to their own department. This dichotomy produces differing results. The military compensates only for conditions related to being unfit to serve while the VA compensates for all Service-connected conditions. Military conditions related to unfitness are a subset of all Service-connected conditions; so the military's combined rating is usually going to be less than VA's combined rating. This creates confusion, and causes soldiers to believe the Army does not recognize their complete medical condition in a deliberate effort to minimize disability compensation and limit access to other valuable benefits.

As long as this system of dual adjudication exists, we are not going to have an integrated process. In a fully integrated process, the Military Services would determine fitness.

HEALTH CARE COSTS

12. Senator MCCAIN. General Odierno, in a modest attempt to control DOD's health care costs, former Secretary Gates sought to apply a medical inflation factor to TRICARE Prime enrollment fees for working-age retirees beginning in fiscal year 2013. Unfortunately, our committee balked at that idea, and reported a bill that

would permanently tie DOD's hands to annual increases to the annual increase in retired pay, which has been minimal.

TRICARE fees haven't changed since they were established in 1995. At that time, according to DOD, working age retirees paid about 27 percent of their total costs when using civilian care. Today, out of pocket expenses for working age retirees represent less than 9 percent of the total cost of the family's health care costs. Some argue that health care benefits to retirees have been eroded over time. Do you agree?

General ODIERNO. Health care costs are increasingly becoming a larger part of everyone's budget including DOD's annual budget. Military health care costs have increased due to an expansion of benefits rather than an erosion, increased use of TRICARE, and no change to TRICARE premiums since the program began in 1995. Because of DOD's low enrollment costs compared with private health insurance, there has been a steady increase in retirees enrolling in TRICARE. The Army believes these proposals to raise the TRICARE enrollment fees for working age retirees and adjust future increases to be modest, gradual, and responsible. Even with this proposed fee change, TRICARE would remain one of the Nation's very best health benefits and beneficiaries would continue to have less out-of-pocket costs in comparison to Federal, State, and private health plans.

13. Senator MCCAIN. General Odierno, do you support the administration's modest goal of linking future increases in fees for working age retirees to a factor that relates to rising national medical costs?

General ODIERNO. The Army, in partnership with DOD, is committed to preserving this health care benefit while recognizing that continued increases in costs are not sustainable. I support DOD efforts to work with Congress to find ways to help control escalating health care costs including fee increases for working age retirees that can be adjusted in some way to reflect rising national medical costs.

14. Senator MCCAIN. General Odierno, do you see the rise in health care costs as a threat to readiness, and if so, what would you do or recommend, if confirmed, to address this very serious issue for DOD?

General ODIERNO. I share former Secretary of Defense Gates' concerns about the rise of DOD's health care expenditures and its impact on the overall DOD budget including readiness. I support DOD efforts to work with Congress to find ways to help control escalating health care costs. The Army, in partnership with DOD, is committed to preserving this health care benefit while recognizing that continued increases in costs are not sustainable. Even with the proposed fee changes DOD recommended for fiscal year 2012, TRICARE would remain one of the Nation's very best health benefits and beneficiaries would continue to have less out-of-pocket costs in comparison to Federal, State, and private health plans. I believe this proposal balances our commitment to preserve readiness while slowing future growth in health care costs.

GROUND COMBAT VEHICLE

15. Senator MCCAIN. General Odierno, please describe the operational urgency driving a GCV by 2017.

General ODIERNO. Lessons from the last 10 years of sustained combat operations indicate that the Bradley Infantry Fighting Vehicle (IFV) is no longer capable of fully meeting the necessary levels of protection, fire power, and mobility requirements that our infantrymen will need as they face both current and future hybrid and conventional threats. We will counter that threat by building a GCV IFV that has the mobility to keep up with, communicate with, and survive alongside the improved Abrams Main Battle Tank. We believe the Bradley IFV will have reached its capacity to improve in these areas upon completion of its next modernization efforts. The GCV's research, development, test, and evaluation and production timeline (7 years from technology development contract award) should provide vehicles that have the increased protection, mobility, and network capability to maneuver and fight alongside the Abrams, meet our near-term threats, and have the capacity to grow in the future.

16. Senator MCCAIN. General Odierno, would GCVs be employed within Heavy Brigade Combat Teams (BCT) as part of GCV/Bradley mixed fleet?

General ODIERNO. Yes. The GCV will replace the Bradley IFV in the Heavy BCTs as unit sets.

MRAP VEHICLES

17. Senator McCAIN. General Odierno, what is the Army's plan to recapitalize and incorporate thousands of mine resistant ambush protected (MRAP) vehicles into the wheeled vehicle fleet?

General ODIERNO. In accordance with the Army's Tactical Wheeled Vehicle Strategy and the Army Campaign Plan, the Army plans to incorporate most of the MRAP Family of Vehicles (FOV) into enduring force structure, while divesting a small number of low-density and under-utilized variants such as the RG33L, MAXXPro XL, and Caiman CAT II XM1220. The Army will work closely with the Office of the Secretary of Defense and the MRAP Joint Program Office to reset/recapitalize the MRAP variants selected for retention. The reset/recapitalization will incorporate upgrades to standardize variants to a common baseline as vehicles are retrograded from theater. The upgrades will infuse commonality, increase survivability, mobility, and sustainability to meet emerging hybrid threats. Today the MRAP FOV is comprised of 25 variants delivered by 6 different manufacturers. With the required resources, these upgrades will reduce the MRAP FOV to nine variants produced by four manufacturers and provide soldiers with the greatest capability available. The Army plans a balanced distribution of MRAP vehicles with 37 percent going into units and training bases, 59 percent into Army Prepositioned Stocks, and 4 percent going into Army War Reserve and Contingency Retention Stocks.

18. Senator McCAIN. General Odierno, where do these vehicles fit into the force structure?

General ODIERNO. The Army plans a balanced distribution of MRAP vehicles into units, training bases, Army Prepositioned Stock, Army War Reserve, and Contingency Retention Stocks. This distribution of MRAPs maximizes their capabilities (primarily protection) based on operational needs by making MRAPs available to deployed formations in sets configured to their needs. They will also fill specific mission roles in Army units where there are gaps.

NONDEPLOYABLE SOLDIERS

19. Senator McCAIN. General Odierno, what is the total number of nondeployable soldiers currently serving?

General ODIERNO. There are about 92,000 soldiers currently serving in the Active Army that are nondeployable for one or more reasons; the majority of these are temporary conditions.

20. Senator McCAIN. General Odierno, of this total, how many have a permanent profile which would prevent them from ever deploying?

General ODIERNO. There are about 15,000 soldiers currently serving in the Active Army who have a permanent (P3 or P4) profile. More than 90 percent of these soldiers will be separated from service upon completion of their Medical Evaluation Board (MEB)/Physical Evaluation Board (PEB).

21. Senator McCAIN. General Odierno, what is your intent with regard to permanently non-deployable soldiers?

General ODIERNO. Ninety-nine percent of soldiers identified as permanently nondeployable for other than medical reasons are in the process of separating from the Army. Of the soldiers with permanent (P3 or P4) profiles who are referred to the MEB/PEB process, more than 90 percent will ultimately be separated from service. For those who are retained, the Army is currently exploring options to more heavily weight deployability as a criterion for retainability.

22. Senator McCAIN. General Odierno, how would you characterize the efficiency of the Army's medical review board process?

General ODIERNO. The Army's medical review board process is very complex, lengthy, and confusing. The transformation from legacy disability processing to the Integrated Disability Evaluation System (IDES) has been a gradual process in the Army since November 2007. The DES is better than it was 4 years ago. Although legislative changes and the new IDES have made the system less adversarial, it has not made the process more efficient.

IDES facilitates soldiers/veterans receiving VA disability ratings in concurrence with the Service's disability process. IDES has provided greater consistency between Military and VA ratings, reduced the time it takes for a soldier to start receiving VA benefits after separation, and increased soldiers' satisfaction. But the amount

of time to process veterans under IDES has actually increased due to the many additional VA exams that were not required under the previous process.

END STRENGTH

23. Senator MCCAIN. General Odierno, former Secretary of Defense Gates previously announced that Army end strength will be reduced by some 49,000 troops over the next 5 to 10 years, beginning with 7,400 fewer troops in 2012. Do these reductions introduce risk to continued operations in Afghanistan?

General ODIERNO. No, the initial end strength reductions in 2012 are a portion of the planned decrease of the temporary end strength increase approved in 2009. For the remaining end strength reductions, the Army will use a deliberate process and take into consideration operational demands, unit readiness, and those actions necessary to sustain and care for the All-Volunteer Force. Our plan will proceed at a pace necessary to ensure mission success and retain flexibility to respond to unforeseen demand.

24. Senator MCCAIN. General Odierno, what is the personnel reduction threshold for force structure change?

General ODIERNO. Army force structure is dependent on the Army end strength limit. Any reduction in Army end strength drives reductions to force structure. The Army is coordinating end strength reductions with its deliberate Total Army Analysis (TAA) process to ensure Army force structure contains the required capability and capacity to meet current and future operational requirements within its authorized end strength.

25. Senator MCCAIN. General Odierno, in your view, what is the optimal end strength number to meet worldwide commitments?

General ODIERNO. The Army continuously analyzes current and projected factors such as assigned missions, operational demands, unit readiness, soldier and family well-being, Reserve component capability and capacity, and fiscal constraints in order to achieve the required Active-Duty end strength. The highly analytical process to determine force structure is called the TAA. The focus of our TAA process is to answer this very question while considering the uncertainty of future operational requirements. The answer to your question is dependent on what America is asking its Army to do; it is entirely driven by demand. For today, the Active Army end strength is 569,400; end strength in the future could be higher or lower depending on missions assigned. As worldwide commitments change, our optimal end strength number will change as well.

26. Senator MCCAIN. General Odierno, what does dwell-time for the average soldier look like in a post-Iraq environment?

General ODIERNO. Individual dwell time varies greatly among grades and specialties and is largely a function of demand. As the demand for our forces decreases, we expect most soldiers will continue to experience dwell periods of longer duration.

GUARD/RESERVE

27. Senator MCCAIN. General Odierno, what practical changes will be implemented to transition the Army National Guard and Army Reserve into operational forces?

General ODIERNO. This year, DOD requested a change in title 10, U.S.C., section 12304, that would allow the Reserve components to be involuntarily activated with prior coordination at the service chief level, and provide the necessary budgetary authority to support the deployment. This will allow for the continued critical contributions of the Reserve component. This proposal would ensure that DOD is able to utilize the National Guards' unique capability throughout the world and codify the requirement for the National Guard as an operational force.

In addition, by continuing the use of the ARFORGEN cycle, the Army can maintain an Operational Reserve that is more integrated into the day-to-day military operations, and participates at a higher level of operational missions. The Army, in coordination with the National Guard Bureau, has also developed a training strategy for units to participate in collective training, including additional inactive duty training, annual training, and Active Duty days. This strategy achieves company level proficiency for all units as they move into the available force pool.

Estimates for the cost of the Reserve's operational role vary. Overseas contingency operation accounts currently fund much of the Reserve component deployments,

training, and family support. To ensure continued funding to support the Reserve component as an operational force, the Army has included the National Guard's operational role in its future budget planning.

QUESTIONS SUBMITTED BY SENATOR SAXBY CHAMBLISS

ARMY MODULAR TRANSFORMATION STRATEGY

28. Senator CHAMBLISS. General Odierno, in one of the advance policy questions regarding what actions or changes, if any, would you propose relative to the Army's modular transformation strategy, you replied that "if confirmed, [you] will continue to review Army plans and strategies, including the modular transformation strategy, force structure, and modernization to ensure the Army continues to provide the joint force with the best mix of capabilities to prevail in today's wars, and engage to build partner capacity, support civil authorities, and deter and defeat potential adversaries." In your opinion, are we lacking any capabilities within the joint force to prevail in today's wars? If so, what are they?

General ODIERNO. The Army, as part of the joint force, has sufficient capability to prevail in today's wars. Building partner capacity, stability operations, and counter insurgency operations have been primary missions of the Army for the past 10 years and we have incorporated lessons learned across the entire force. We are exceedingly proficient in these operational missions with the current force in support of today's wars. There are concerns regarding the downsizing of Army force structure associated with our ability to meet the continued demand, and our ability to be proactive in order to prevent and prevail in future conflicts. We have to ensure that the drawdown of our force structure is coordinated with the reduction in forces committed to ongoing operations. Additionally, we have to ensure that the drawdown will not adversely affect the ability of the Army to train for full spectrum operations to provide strategic flexibility for the Nation.

29. Senator CHAMBLISS. General Odierno, is the Army's current mix of capabilities properly apportioned to accomplish the tasks we must do now, such as building partner capacity, supporting civil authorities, and deterring and defeating potential adversaries?

General ODIERNO. The Army's sustainable capacity for steady-state combatant command requirements is known as the Mission Force, currently comprised of one corps headquarters, five division headquarters, 20 brigade combat teams, and approximately 90,000 troops worth of enabling capabilities. A Mission Force of this size satisfies steady-state combatant command demands, meets the national military strategy objectives, and facilitates the Army's dwell-time goals to allow time for reset, training, and troop recovery.

The Mission Force is currently operating at a greater velocity than designed because higher than expected demand by combatant commanders. These satisfied demands include the Iraq and Afghanistan campaigns, global posture requirements in Korea, the Army contribution to the Global Response Force and DOD Homeland defense requirements, and other missions such as Multi-National Force and Observers force in the Sinai. As the Army completes its Iraq force draw down and begins its Afghanistan force draw down, the Mission Force will begin to build toward its dwell goals and be better postured to satisfy combatant command demands related to building partnership capacity and other security cooperation activities outside the Central Command area of responsibility.

While the Army will be able to meet all combatant commander requirements, it will take a few challenging years to fully reset equipment, replenish prepositioned stocks, reintegrate Army families, and train forces for full spectrum operations. At that point the Nation will have true strategic flexibility and will have reduced both strategic and military risk in the mid- to long-term.

30. Senator CHAMBLISS. General Odierno, in a resource-constrained environment, could embedding critical, indirect enablers responsible for building partner capacity and providing support to civil authorities, such as civil affairs personnel, within BCTs help the Army accomplish these critical tasks and save precious Army resources?

General ODIERNO. Enabling capabilities such as medical, legal, and civil affairs are vital augmentation to the BCT's capabilities. Augmenting the BCTs with modular, cohesive unit enabling capabilities ensures that the right augmentation is fully capable to support the commander, can be tailored to the specific mission, and allows rapid increase or decrease depending on the environment. Some indirect

enablers such as medical and legal personnel have a role in building partner capacity and providing support to civil authorities but also serve a day-to-day function within the BCTs. Other enablers such as civil affairs and foreign area officers don't have a day-to-day function inside the BCT but have a role in building partner capacity and providing support to civil authorities. Therefore, the Army is effectively and efficiently served by civil affairs forces that can support multiple BCTs, as needed. We are working on attaining the correct balance of enablers between the Active component and Reserve component.

31. Senator CHAMBLISS. General Odierno, if the Army continues to build a second Civil Affairs Brigade to support the General Purpose Forces, what then do we do with the preponderance of the Nation's tactical Civil Affairs force structure located in the Army Reserve?

General ODIERNO. The ability of the Army to provide sufficient Civil Affairs tactical capability to the General Purpose Force for two or more simultaneous conflicts has been significantly enhanced by the inclusion of the 85th Civil Affairs Brigade to the nine Reserve Civil Affairs Brigades. Over the past 10 years, the Army Reserve had to make up for a shortage of Active component Civil Affairs by deploying Reserve units more often than any other type of Reserve unit. While a second Active component brigade will provide Civil Affairs capability on a more rapidly available and rotational basis, the Army Reserve Civil Affairs will continue to provide support for the long-term with planned, predictable missions of Building Partner Capacity throughout the world. In addition, the Army Reserve will continue to provide the capacity to surge as missions require.

The new Active Duty Civil Affairs Brigade will enable the Army to concentrate the Reserve component Civil Affairs Units on their functional skills and redevelop the capability to conduct Transitional Military Authority (Military Government) while providing the capacity to support maneuver brigades and geographical combatant commanders in phase zero operations.

32. Senator CHAMBLISS. General Odierno, how do we further integrate Army Reserve Civil Affairs forces and their vitally important civilian skills and expertise into the future Army?

General ODIERNO. Army Reserve Civil Affairs forces bring unique skill sets and experience to augment the capabilities of the Army. These skills and experience enable the United States to fulfill its obligations under the Geneva Conventions to provide for the care and governance of the areas we occupy pending transfer of this responsibility to other authority. Army Reserve Civil Affairs forces should be the vanguard of our Nation's capability to provide for the care and governance of ungoverned populations and to provide training to our partner nations to do the same. The specific functional skills such as agriculture, education, and economics will be valuable to the combatant commands in operations supporting building partner capacity.

QUESTION SUBMITTED BY SENATOR KELLY AYOTTE

PRIVATE FIRST CLASS BOWE BERGDahl

33. Senator AYOTTE. General Odierno, Private First Class (PFC) Bowe Bergdahl, U.S. Army, was captured by the Taliban over 2 years ago, on June 30, 2009, in Paktika province in eastern Afghanistan. As the only known U.S. soldier held captive in Afghanistan by enemy belligerents, I want to ensure that we are doing everything we can to obtain his release. What is PFC Bergdahl's status, and what is DOD doing to obtain his release?

General ODIERNO. Sergeant (then-PFC) Bowe R. Bergdahl, of Hailey, Idaho, was declared Missing-Captured on July 3, 2009, after he was discovered missing from his combat outpost in Afghanistan on June 30, 2009. At the time of his capture, SGT Bergdahl was assigned to 1st Battalion, 501st Parachute Infantry Regiment, 4th BCT, 25th Infantry Division.

Sergeant Bergdahl is one of two U.S. military members, both U.S. Army soldiers, currently listed by DOD as having the duty status "Missing-Captured," the other soldier being SSG Ahmed Altaie. U.S. Central Command is responsible for the ongoing efforts in theater to recover both soldiers. For the safety and security of the soldiers and units involved, the details of these efforts remain classified.

Sergeant Bergdahl's parents continue to receive regular updates from DOD regarding significant developments in the efforts to recover their son.

QUESTIONS SUBMITTED BY SENATOR SUSAN COLLINS

FORT HOOD ATTACK

34. Senator COLLINS. General Odierno, as ranking member of the Senate Homeland Security and Governmental Affairs Committee, I worked with Senator Lieberman to investigate the U.S. Government's failure to prevent the Fort Hood attack. One of the most distressing aspects of this report was that it found the Army and the Federal Bureau of Investigation "collectively had sufficient information necessary to have detected Major Hasan's radicalization to violent Islamist extremism but failed both to understand and to act on it." In light of the Fort Hood attack and the findings in this report, what steps has the Army taken to improve personnel oversight such that warning signs of individual problems are identified and acted on as early as possible?

General ODIERNO. The Army has implemented over 20 of the recommendations proposed by the DOD's Independent Review Panel and the Army's Internal Review Team and continues to improve its ability to identify and quickly respond to potential insider threats to the force.

In January 2011, the Army established the Army Protection Program (APP) to better manage risks relative to the safety and security of our soldiers, families, civilians, infrastructure, and information. The program provides a strategic management framework to synchronize, prioritize, and coordinate Army protection policies, resources, and activities.

As part of the APP, the Army is developing a Security Resiliency Program to strengthen security policies, processes, and systems, and provide the Army an enterprise approach to addressing the "insider threat". One of the key components of the strategy is to focus on deterring and preventing insider threats through improved personnel security and suitability screenings, counterintelligence and security awareness training, improved information sharing, and an Automated Continuous Evaluation System to proactively alert and flag issues of concern for cleared personnel.

The Army also established a Counterintelligence/Security Fusion Cell to review and flag security background investigations to identify threat, security, and other high-risk behavioral concerns. Additionally, the Army expanded the Threat Awareness and Reporting Program and the Security Education Training and Awareness Program. These programs increase awareness of potential adverse behaviors and provide a systematic approach to threat reporting and educating all commanders and leaders on their roles and responsibilities for reporting adverse information.

The Army revised its policy regarding command-directed mental health evaluations. Behavioral health providers are now required to report to the soldier's chain of command within 24 hours, those individuals who may present a risk to the protection of classified information, and commanders must notify the Army Central Clearance Facility when concerns are noted.

The Army has reinforced, through Army-wide messages, commander and soldier roles and responsibilities to report threat-related incidents and behaviors deemed detrimental to good order and discipline (including violent behavior and prohibited activities). The goal is to improve knowledge of which behaviors to report, who to report them to, and the importance of Army leaders taking appropriate action when behavior or activity is reported. The result will be a better awareness of potential insider threats, early intervention, and a safer environment for our Army community, installations, and activities.

The Army has improved its behavior health screenings for new Army applicants by requiring medical personnel to conduct face-to-face screenings at all 65 Military Entrance Processing Centers utilizing five questions that better assess the potential behavioral health issues. The Army is consulting with national experts (e.g., Columbia University, Harvard University, National Institute of Mental Health, et cetera) to develop, test, evaluate, and deliver improved behavior health screening tools.

DWELL TIME

35. Senator COLLINS. General Odierno, the Army plans to reduce its end strength by 22,000 soldiers in 2013 and 27,000 soldiers in 2015 and beyond as we draw down forces in Iraq and Afghanistan. Army officials and mental health experts have repeatedly said that a dwell time of 2 years at home for every 1 year deployed is the minimum time necessary to preserve the long-term mental and physical well-being necessary to sustain our soldiers and our Army over the long-term. Can you assure me that the Army's manpower reductions will not be made until the Army has reached its target dwell time of 2 years at home for every 1 year deployed for sol-

diers, and specifically for those soldiers who are in the combat arms, who have served on the frontlines for the last 10 years of war?

General ODIERNO. Boots-on-the-ground (BOG) time to dwell time ratios are largely based on demand; given the current strategic guidance and the associated projected future requirements, the Army can achieve and sustain 1:2 BOG to dwell ratio for high demand and low density units. The Army expects to improve on this ratio and have sufficient troops to respond to unforeseen events. With current and projected force demand consistent with current strategic guidance, and with some exceptions, the Army will adopt shorter deployment periods (9 months) for division-level-and-below units in 2012.

QUESTIONS SUBMITTED BY SENATOR JOHN CORNYN

DOD BUDGET CUTS

36. Senator CORNYN. General Odierno, in the President's April speech on debt reduction, he targeted security spending for \$400 billion in cuts over the next 12 years, the preponderance of which is expected to come from the DOD budget. However, news reports are now indicating that DOD is bracing for much deeper cuts, potentially reaching \$800 billion or more over the next decade. In your opinion, what impact would deeper cuts have on our ability to adequately meet our national security requirements, maintain our Nation's historic military superiority, and provide the requisite resources and support for our soldiers?

General ODIERNO. Deeper cuts would impact the level of risk, both to soldiers and to mission accomplishment. Based on the challenges we faced in finding efficiencies to make \$400 billion in cuts, I believe that \$800 billion in cuts would be extremely high risk. The Army is committed globally, and we must be able to accomplish the unforeseen when called to do so. We will reduce the size of our Army by ensuring we remain in balance with synchronized adjustments of manpower, modernization, training, maintenance, and infrastructure. We are also determined to honor our commitments to the force by fully resourcing the most important family programs, transitioning to a 9-month BOG commitment and holding, as a minimum, a 1:2 BOG-dwell ratio. Our end state is to provide a force capable of meeting the current National Military Strategy with enough flexibility to provide the National Command Authority the greatest possible number of options for an uncertain future.

ARMY ACQUISITION REFORM

37. Senator CORNYN. General Odierno, according to the final report of the 2010 Army Acquisition Review, between 1990 and 2010, the Army terminated 22 major acquisition programs before completion, totaling at least \$32 billion—which represents almost one-third of the Army's budget for creating new weapons. The report notes that, "Every year since 1996, the Army has spent more than \$1 billion annually on programs that were ultimately cancelled." Since 2004, \$3.3 billion to \$3.8 billion per year (35 percent to 45 percent) of the Army's Developmental, Test, and Evaluation funding has been lost to cancelled programs. In my view, this represents extremely poor stewardship of taxpayers' dollars. In your opinion, what are the primary problems in the Army's acquisition process that have caused these program cancellations, and what can be done to end this decade-long trend of sinking billions of dollars into trying to develop weapons systems that will never be fielded?

General ODIERNO. I understand the Army acquisition community has already applied some of these lessons learned on the GCV program. Under the leadership of the Army Acquisition Executive, the Army assembled a team of senior subject-matter experts as they refined the 900-plus GCV requirements and revised the original Requests for Proposals. The Army team, which included members of the requirements, resourcing, contracting, and program management communities, developed a set of tiered requirements that distinguish critical must-have capabilities and provide industry with the necessary flexibility to develop vehicle designs that meet the Army's strict cost and schedule constraints. In addition, the GCV is the first major program to implement innovative measures designed to keep the program on schedule and on budget, to include fixed price incentive fee contracts in the 2-year technology development phase, an increased emphasis on mature technologies as well as reliance on competition throughout the program as an incentive. We will continue to monitor the GCV and assess these acquisition reform initiatives. I am committed to continue acquisition reform to assure effectiveness in attaining our future capability requirements.

ARMY BASING IN EUROPE

38. Senator CORNYN. General Odierno, earlier this year, the Army announced its decision to reduce the number of Army BCTs it has in Europe from four to three after 2015. This development is a change from the 2004 plan, which called for withdrawing two of the BCTs and leaving two in Europe. Reports have indicated the original plan was suspended due to concerns that it would hamper the U.S. military's ability to respond to trouble in Africa and the Middle East, leave it unable to fulfill its commitments to North Atlantic Treaty Organization (NATO), or leave it unable to engage effectively with European allies. Maintaining large units like BCTs overseas is very expensive, especially when substantial new military construction funding is involved, as with the Army plan for maintaining BCTs in Europe. With the Army budget under increasing pressure, keeping so many BCTs in Europe will involve trade-offs elsewhere in the Army budget. Would it not be more cost-effective to bring additional BCTs home to posts in CONUS, especially when the Army has posts in CONUS that already have the infrastructure and facilities in place to support another BCT and provide training opportunities far superior to those reasonably available in Europe?

General ODIERNO. The Army is considering the disposition of BCTs in Europe as part of TAA 14-18 and Program Objective Memorandum (POM) deliberations. No decisions have been made. The cost-effectiveness of BCT stationing decisions will be considered as part of this process.

39. Senator CORNYN. General Odierno, do our European allies not have their own capable militaries to provide for their national defense?

General ODIERNO. Our European allies have modern militaries, but with limited capabilities because they are not designed to provide stand-alone, 360-degree national defense. Their militaries, through the NATO Defense Planning Process, are designed to provide their nation's contribution to the collective defense of all 28 members of the NATO alliance, as stipulated by Article 5 of the Washington Treaty.

AFGHANISTAN DRAWDOWN

40. Senator CORNYN. General Odierno, on June 22, 2011, President Obama announced he would withdraw 10,000 troops from Afghanistan by the end of this year and another 23,000 by next summer, resulting in a complete drawdown of the 33,000 troop surge by September 2012. Following the President's announcement, Admiral Mullen testified to the House Armed Services Committee that: "the President's decisions are more aggressive and incur more risk than I was originally prepared to accept." Do you agree with Admiral Mullen's statement? If so, what pace of drawdown do you believe will incur an acceptable level of risk?

General ODIERNO. The National Command Authority has directed the surge recovery of troop strength in Afghanistan. The Army is postured to support the drawdown. The drawdown in Afghanistan will enable the Army to better posture itself for potential contingency operations and future operations as determined by the National Command Authority.

As the Army completes its responsible drawdown from Iraq and begins its Afghanistan force recovery, it will achieve the higher dwell time goals it has sought and be better-postured to satisfy combatant command demands related to building partnership capacity and other security cooperation activities.

While the Army will continue to be able to meet all combatant commander requirements, it will take a few challenging years to fully reset equipment, replenish prepositioned stocks, reintegrate Army families, and train forces for Full Spectrum Operations. At that point the Nation will have true strategic flexibility and will have reduced both strategic and military risk in the mid- to long-term.

LIBYA

41. Senator CORNYN. General Odierno, in the early 1990s, then-Chairman of the Joint Chiefs of Staff, General Colin Powell, laid out his policies for conducting military operations, which have since come to be known as the Powell Doctrine. General Powell stated that: "We should always be skeptical when so-called experts suggest that all a particular crisis calls for is a little surgical bombing or a limited attack. When the surgery is over and the desired result is not obtained, a new set of experts then comes forward with talk of just a little escalation . . . history has not been kind to this approach to warmaking." Regarding the air war over Libya, do you believe that a vital U.S. national security interest was or is threatened there?

General ODIERNO. The stability of the region, especially following the transformational effects of the Arab Spring, is a national security interest for the United States.

42. Senator CORNYN. General Odierno, does the United States have a clear, attainable objective in Libya? If so, what is that objective?

General ODIERNO. Yes, the goal of the NATO-led military effort and the mandate of the U.N. resolution is very clear: to protect the Libyan people. While forced regime change is not specified in the military mission, this mission complements other instruments of power and will add significant pressure on Colonel Qadhafi over time to step down.

ARMY SURFACE FLEET

43. Senator CORNYN. General Odierno, the Army currently operates a fleet of over 100 ships, used mostly for logistics purposes. The vessels range from large landing ships to medium-sized and smaller utility landing craft, to a force of tugboats and barges. Those vessels are operated by over 2,000 soldiers and another 200 civilians in support roles. A 2010 report by Defense News stated that the Army was in discussions with the Navy over the potential transfer of the Army's watercraft mission and its vessels. In today's Joint Service, does it make sense for the Army to continue operating a fleet of over 100 ships?

General ODIERNO. While it is true that the Army was in discussions with the Navy over potential transfer of the Army's watercraft mission and its vessels over the past year, we have mutually concluded that it makes sense for the Army to continue operating a fleet of over 100 watercraft.

Army watercraft are a critical maneuver element that enable Army logistics operations and bridge the sea-land gap. We envision expanded roles and missions for Army watercraft in the 21st century, and we can gain better efficiencies in partnering our capabilities with the Navy versus combining them.

However, the Army and Navy did agree to transfer the Joint High Speed Vessel (JHSV) program, in which the Army was to receive five JHSVs starting in 2012, to the Navy. A Memorandum of Agreement (MOA) to that effect has been signed by the Secretaries of both Services, and appropriate budget transfers have been made.

Joint doctrine directs the Army to prepare for land combat and provide watercraft support in a theater of operations. In sourcing watercraft support for land combat ashore, the Army will be called upon to perform the post-assault resupply mission for joint and combined operations that may also include coastal and inland waterway transportation. Army watercraft also supports Joint Logistics-Over-The-Shore operations, requiring Army watercraft to be capable of performing a wide range of ship-to-shore cargo transfer and harbor utility functions in support of full fixed ports, partial fixed ports, or bare beach operations.

The mission of Army watercraft is different from the mission of Navy watercraft. Army watercraft executes a tactical port mission, conducting distribution and operational maneuverability within a theater in support of combatant commanders. The Army is also responsible for operating common user ports, and the watercraft are critical to performing that function. These are not carriers, destroyers, or the submarines that immediately come to mind when one envisions the Navy. The Navy watercraft that are similar to Army vessels assist in the establishment of beachheads for the U.S. Marine Corps. In today's joint environment, these capabilities complement one another rather than create redundancies. The Army watercraft support all Services based on combatant commanders' theater support requirements.

Over the past few years, the Army has conducted three separate capabilities-based assessments associated with watercraft requirements in the joint environment. The results from all three of those assessments repeated the same message: the need exists for the Army to continue to operate a small amount of watercraft to support Army and joint operations.

44. Senator CORNYN. General Odierno, please comment on the proposed transfer of this mission and assets from the Army to the Navy, and provide a status update.

General ODIERNO. While it is true that the Army was in discussions with the Navy over potential transfer of the Army's watercraft mission and its vessels over the past year, we have mutually concluded that it makes sense for the Army to continue operating a fleet of over 100 watercraft.

Army watercraft are a critical maneuver element that enable Army logistics operations and bridge the sea-land gap. We envision expanded roles and missions for

Army watercraft in the 21st Century, and we can gain better efficiencies in partnering our capabilities with the Navy versus combining them.

However, the Army and Navy did agree to transfer the JHSV program, in which the Army was to receive five JHSVs starting in 2012, to the Navy. An MOA to that effect has been signed by the Secretaries of both Services, and appropriate budget transfers have been made.

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
June 6, 2011.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment as the Chief of Staff, U.S. Army, and appointment to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., sections 601 and 3033:

To be General

GEN Raymond T. Odierno, 0000.

[The biographical sketch of GEN Raymond T. Odierno, USA, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF GEN RAYMOND T. ODIERNO, USA

Source of commissioned service: USMA

Educational degrees:

U.S. Military Academy, BS, No Major
North Carolina State University, MS, Engineering, Nuclear Effects
U.S. Naval War College, MA, National Security and Strategy

Military schools attended:

Field Artillery Officer Basic and Advanced Courses
U.S. Naval Command and Staff College
U.S. Army War College

Foreign languages: None recorded.

Promotions:

	Dates of appointment
2LT	2 June 76
1LT	2 June 78
CPT	1 Aug. 80
MAJ	1 Dec. 86
LTC	1 Feb. 92
COL	1 Sep. 95
BG	1 July 99
MG	1 Nov. 02
LTG	1 Jan. 05
GEN	16 Sep. 08

Major duty assignments:

From	To	Assignment
Oct. 76	Jan. 78 ...	Support Platoon Leader, later Firing Platoon Leader, C Battery, 1st Battalion, 41st Field Artillery, 56th Field Artillery Brigade, U.S. Army Europe and Seventh Army, Germany
Jan. 78	Aug. 78 ...	Survey Officer, 1st Battalion, 41st Field Artillery, 56th Field Artillery Brigade, U.S. Army Europe and Seventh Army, Germany
Aug. 78	Oct. 79 ...	Aide-de-Camp to the Commanding General, 56th Field Artillery Brigade, U.S. Army Europe and Seventh Army, Germany
Nov. 79	July 80	Student, Field Artillery Advanced Course, Fort Sill, OK
Aug. 80	Dec. 80 ...	Liaison Officer, 1st Battalion, 73d Field Artillery, XVIII Airborne Corps, Fort Bragg, NC
Dec. 80	Dec. 82 ...	Commander, Service Battery, later A Battery, 1st Battalion, 73d Field Artillery, XVIII Airborne Corps, Fort Bragg, NC
Dec. 82	May 83 ...	Assistant S-3 (Operations), 1st Battalion, 73d Field Artillery, XVIII Airborne Corps, Fort Bragg, NC
June 83	May 84 ...	S-3 (Operations), 3d Battalion, 8th Field Artillery, XVIII Airborne Corps, Fort Bragg, NC
June 84	Aug. 86 ...	Student, North Carolina State University, Raleigh, NC
Sep. 86	June 89 ...	Nuclear Research Officer, later Chief, Acquisition Support Division, Defense Nuclear Agency, Alexandria, VA, later detailed as Military Advisor for Arms Control, Office of the Secretary of Defense, Washington, DC
June 89	June 90 ...	Student, U.S. Naval Command and Staff Course, Newport, RI
July 90	Dec. 90 ...	Executive Officer, 2d Battalion, 3d Field Artillery, 3d Armored Division, U.S. Army Europe and Seventh Army, Germany
Dec. 90	June 91 ...	Executive Officer, Division Artillery, 3d Armored Division, U.S. Army Europe and Seventh Army, Germany and Operations Desert Shield/Storm, Saudi Arabia
June 91	May 92 ...	Executive Officer, 42d Field Artillery Brigade, V Corps, U.S. Army Europe and Seventh Army, Germany
June 92	June 94 ...	Commander, 2d Battalion, 8th Field Artillery, 7th Infantry Division (Light), Fort Ord, CA (relocated to Fort Lewis, WA)
June 94	June 95 ...	Student, U.S. Army War College, Carlisle Barracks, PA
June 95	June 97 ...	Commander, Division Artillery, 1st Cavalry Division, Fort Hood, TX
June 97	Aug. 98 ...	Chief of Staff, V Corps, U.S. Army Europe and Seventh Army, Germany
Aug. 98	July 99 ...	Assistant Division Commander (Support), 1st Armored Division, U.S. Army Europe and Seventh Army, Germany to include duty as Deputy Commanding General for Ground Operations, Task Force Hawk, Operation Allied Force, Albania
July 99	July 01	Director, Force Management, Office of the Deputy Chief of Staff for Operations and Plans, U.S. Army, Washington, DC
Oct. 01	Aug. 04 ...	Commanding General, 4th Infantry Division (Mechanized), Fort Hood, TX and Operation Iraqi Freedom, Iraq
Aug. 04	Oct. 04 ...	Special Assistant to Vice Chief of Staff, U.S. Army, Washington, DC
Oct. 04	May 06 ...	Assistant to the Chairman of the Joint Chiefs of Staff, Office of the Joint Chiefs of Staff, Washington, DC
May 06	Dec. 06 ...	Commanding General, III Corps and Fort Hood, Fort Hood, TX
Dec. 06	Feb. 08 ...	Commander, Multi-National Corps-Iraq, Operation Iraqi Freedom, Iraq/Commanding General, III Corps
Feb. 08	Sep. 08 ...	Commanding General, III Corps and Fort Hood, Fort Hood, TX
Sep. 08	Dec. 09 ...	Commander, Multi-National Force-Iraq, Operation Iraqi Freedom, Iraq
Jan. 10	Sep. 10 ...	Commander, U.S. Forces-Iraq, Operation Iraqi Freedom/New Dawn, Iraq
Oct. 10	Present ...	Commander, U.S. Joint Forces Command, Norfolk, VA

Summary of joint assignments:

Assignment	Date	Grade
Nuclear Research Officer, later Chief, Acquisition Support Division, Defense Nuclear Agency, Alexandria, VA, later detailed as Military Advisor for Arms Control, Office of the Secretary of Defense, Washington, DC	Sep. 86–June 89	Captain/Major
Assistant to the Chairman of the Joint Chiefs of Staff, Office of the Joint Chiefs of Staff, Washington, DC	Oct. 04–May 06	Lieutenant General
Commander, Multi-National Corps-Iraq, Operation Iraqi Freedom, Iraq/Commanding General, III Corps	Dec. 06–Feb. 08	Lieutenant General
Commander, Multi-National Force-Iraq, Operation Iraqi Freedom, Iraq	Sep. 08–Dec. 09	General
Commander, U.S. Forces-Iraq, Operation Iraqi Freedom/New Dawn, Iraq	Jan. 10–Sep. 10	General
Commander, U.S. Joint Forces Command, Norfolk, VA	Oct. 10–Present	General

Summary of operations assignments:

Assignment	Date	Grade
Executive Officer, Division Artillery, 3d Armored Division, U.S. Army Europe and Seventh Army, Operations Desert Shield/Storm, Saudi Arabia	Dec. 90–May 91	Major
Deputy Commanding General for Ground Operations, Task Force Hawk, Operation Allied Force, Albania	Apr. 99–June 99	Brigadier General
Commanding General, 4th Infantry Division (Mechanized), Operation Iraqi Freedom, Iraq	Apr. 03–Mar. 04	Major General
Commander, Multi-National Corps-Iraq, Operation Iraqi Freedom, Iraq/Commanding General, III Corps	Dec. 06–Feb. 08	Lieutenant General
Commander, Multi-National Force-Iraq, Operation Iraqi Freedom, Iraq	Sep. 08–Dec. 09	General
Commander, U.S. Forces-Iraq, Operation Iraqi Freedom/New Dawn, Iraq	Jan. 10–Sep. 10	General

U.S. decorations and badges:

Defense Distinguished Service Medal (with two Oak Leaf Clusters)
 Distinguished Service Medal (with Oak Leaf Cluster)
 Defense Superior Service Medal
 Legion of Merit (with five Oak Leaf Clusters)
 Bronze Star Medal
 Defense Meritorious Service Medal
 Meritorious Service Medal (with three Oak Leaf Clusters)
 Army Commendation Medal
 Army Achievement Medal
 Combat Action Badge
 Office of the Secretary of Defense Identification Badge
 Joint Chiefs of Staff Identification Badge
 Army Staff Identification Badge

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by GEN Raymond T. Odierno, USA, in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Raymond T. Odierno.

2. **Position to which nominated:**
Chief of Staff, U.S. Army, Washington, DC.

3. **Date of nomination:**
6 June 2011.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
8 September 1954; Rockaway, NJ.

6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Linda Marie Odierno. (Maiden Name: Bukarth).

7. **Names and ages of children:**
Tony Odierno, age 32.
Kathrine Funk, age 30.
Mike Odierno, age 24.

8. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.
None.

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.
None.

10. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.
Association of the U.S. Army
Field Artillery Association
VII Corps Association
9th Regiment Association
4th Infantry Division Association
1st Cavalry Division Association
American Legion
Veterans of Foreign Wars
The Lotos Club (Honorary for 2011-2012)
Union League Club of New York City (Honorary)
Union League Club of Chicago (Honorary)
Union League Club of Philadelphia (Honorary)

11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

Ryan C. Crocker Award
 Abraham Lincoln Award
 USO's Distinguished Service Award
 U.S. News & World Report: America's Best Leaders of 2009
 Romanian National Order For Merit in Rank of Grand Officer, For War
 Naval War College Distinguished Graduate Leadership Award
 Union League Club of NYC Leadership Award
 Morris Hills Regional District Hall of Fame
 National Italian American Foundation (NIAF) Special Achievement Award
 Secretary of State Distinguished Service Medal
 No Greater Sacrifice Freedom Award

When responding to questionnaires in support of previous nominations, I was advised that I needed to list only those awards, honors, et cetera, that were totally outside of my military service, of which I have none (i.e., all of the above awards were given in recognition of my service as a senior U.S. military officer). However, while preparing this nomination package, I was advised differently that this question was meant to include all outside awards and honors, regardless of the capacity in which they were presented to me. Based on that, all outside awards and honors I have received are now listed above.

Of note, I received the Ryan C. Crocker Award, the Abraham Lincoln Award, and the Union League Club of NYC during my current tour of duty as Commander of U.S. Joint Forces Command.

Additionally, in June 2009, while serving as Commander, Multi-National Forces Iraq, I received the Romanian National Order For Merit in Rank of Grand Officer, For War. This foreign decoration has been approved by the U.S. Army Human Resources Command as required by Army Regulation 600-8-22.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?

Yes.

[The nominee responded to the questions in Parts B-E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B-E are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

RAYMOND T. ODIERNO.

This 1st day of June, 2011.

[The nomination of GEN Raymond T. Odierno, USA, was reported to the Senate by Chairman Levin on August 2, 2011, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on August 2, 2011.]

[Prepared questions submitted to Gen. William M. Fraser III, USAF, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders' responsibilities and authorities and the role of the Chairman of the Joint Chiefs of Staff (JCS). These reforms have also vastly improved cooperation between the Services and the combatant commanders, among other things, in joint training and education and in the execution of military operations.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. No. Goldwater-Nichols has transformed the Department of Defense (DOD) and the military for the better. I have completed six joint assignments and can personally say that now as Commander of Air Combat Command (ACC), I have seen first-hand how we continue to institutionalize "jointness" within our Armed Forces. The reforms of Goldwater-Nichols remain an essential part of the DOD fabric and the efficient and effective way we employ forces.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I have no suggested changes to Goldwater-Nichols; however, if confirmed, I will work closely with Congress, the Secretary of Defense, and other senior leaders of our military to continually review Goldwater-Nichols and then implement any changes that are needed.

DUTIES

Question. What is your understanding of the duties and functions of the Commander, U.S. Transportation Command (TRANSCOM)?

Answer. The mission of the Commander, TRANSCOM, is to provide air, land, and sea transportation for DOD, in peace, crisis, and war. The Commander relies on his component commands—Air Mobility Command (AMC), Military Sealift Command (MSC), and the Military Surface Deployment and Distribution Command (SDDC)—to accomplish this mission. The Commander also has the Distribution Process Owner (DPO) mission to improve the worldwide DOD distribution system. As DPO, the Commander works closely with the Defense Logistics Agency (DLA) and the Services to identify inefficiencies, develop solutions, and implement improvements throughout the end-to-end distribution system. The TRANSCOM team blends Active and Reserve Forces, civilian employees, and commercial industry partners to provide the mobility forces and assets necessary to respond to the full range of military operations.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. My entire Air Force career has been filled with a variety of opportunities and experiences that prepared me for this job. This includes operational tours commanding strategic bomber units which deployed, employed, and returned home. But also tours as the Air Force Vice Chief of Staff, Commander, ACC, and six joint assignments to include time as Assistant to the Chairman, JCS.

As the Assistant to the Chairman, JCS, I traveled the globe with the Secretary of State working to build partnerships with foreign governments and international and non-governmental organizations. I also participated in numerous interagency deputies meetings at the National Security Council.

As the Air Force Vice Chief of Staff, I interacted frequently with the Secretary of Defense, Chairman of the JCS, combatant commanders, and Service Chiefs on major issues facing our military.

Finally, in my current capacity as Commander, ACC, I organize, train, equip, and maintain combat-ready air forces of more than 1,000 aircraft and 79,000 Active-Duty and civilian personnel in the Air Force's largest command. When mobilized, the Air National Guard and Air Force Reserve contribute more than 700 aircraft and 49,000 people to ACC. This includes the logistics of preparing airmen to deploy around the globe, a complex task I have led for various organizations at virtually all Air Force levels. In doing so, I've worked with some of the military's finest logisticians and they have taught me well.

If confirmed, it will be my distinct honor to lead the men and women of TRANSCOM in their world-wide mission.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform the duties of the Commander, TRANSCOM?

Answer. If confirmed, I will personally engage the component commands, agencies, and commercial partners to better grasp the scope of the issues they face in order to execute this critical duty. I need a complete understanding of current DOD and national transportation issues, including the challenges facing the commercial transportation industry and other national partners upon whom we so heavily rely.

RELATIONSHIPS

Question. Section 162(b) of title 10, U.S.C., provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the combatant commands. Other sections of law and traditional practice, however, establish important relationships outside the chain of command. Please describe your understanding of the relationship of the Commander, TRANSCOM, to the following offices:

The Deputy Secretary of Defense.

Answer. The Deputy Secretary of Defense has full power and authority to act for the Secretary of Defense when serving as his designated representative in the Secretary's absence. As such, the Commander, TRANSCOM, will report to and through the Deputy Secretary when serving in that capacity.

Question. The Under Secretaries of Defense.

Answer. Under Secretaries of Defense coordinate and exchange information with DOD components, including combatant commands, which have collateral or related functions. In practice, this coordination and exchange is normally routed through the Chairman of the JCS. If confirmed as a combatant commander, I will act accordingly.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Chairman is established by title 10 as the principal military advisor to the President and Secretary of Defense. The Chairman serves as an advisor, and is not, according to the law, in the chain of command, which runs from the President through the Secretary to each combatant commander. The President normally directs communications between himself and the Secretary of Defense to the combatant commanders via the Chairman of the Joint Chief of Staff. This keeps the Chairman fully involved and allows the Chairman to execute his other legal responsibilities. A key responsibility of the Chairman is to speak for the combatant commanders, especially on operational requirements. If confirmed as a Commander, I will keep the Chairman and the Secretary of Defense promptly informed on matters for which I would be personally accountable.

Question. The Vice Chairman of the Joint Chiefs of Staff.

Answer. Although the Vice Chairman does not fall within the combatant command chain of command, he is delegated full power and authority to act for the Chairman in the Chairman's absence. If confirmed as a combatant commander, I will keep the Chairman informed, but if the Vice Chairman is representing the Chairman I will keep him informed as I would the Chairman.

Question. The Director of the Joint Staff.

Answer. The Director of the Joint Staff assists the Chairman in managing the Joint Staff. The Director of the Joint Staff does not fall within the combatant commander's chain of command. However, he enables important decisions to be made as the combatant commander's staff interacts with the Joint Staff. The Director is also a key interface with the Office of the Secretary of Defense (OSD) principles and interagency leadership, and can assist combatant commanders working issues below the Chairman's level.

Question. The Secretaries of the Military Departments.

Answer. Close coordination with each Service Secretary is required to ensure that there is no infringement upon the lawful responsibilities held by a Service Secretary.

Question. The Chiefs of Staff of the Services.

Answer. The Chiefs of Staff of the Services organize, train, and equip their respective forces. No combatant commander can ensure preparedness of his assigned forces without the full cooperation and support of the Service Chiefs and their respective Reserve components. As members of the JCS, the Service Chiefs have a lawful obligation to provide military advice. The experience and judgment the Service Chiefs provide is an invaluable resource for every combatant commander. If confirmed, as Commander, TRANSCOM, I will pursue an open dialogue with the Service Chiefs and the Commandant of the U.S. Coast Guard.

Question. The other combatant commanders.

Answer. If confirmed, I will maintain open dialogue with the other combatant commanders to foster trust and build mutual support. Today's security environment requires us to work together to execute U.S. national security policy.

MAJOR CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges confronting the next Commander, TRANSCOM?

Answer. The next commander's near-term challenge will be maintaining today's warfighter support, including redeployment of forces, while building and sustaining alternative strategic lines of communication in case we lose any of our current primary routes. Long-term challenges include preparing for a future with a wide range of adversaries in an ever-changing, more complex and distributed battlespace. Even as the Department prepares for a broad range of military crises, we know we will face disaster-related humanitarian crises like those that have occurred here at home, as well as in Haiti, Japan, and elsewhere. We will need to do this in a more expeditionary, yet fiscally constrained environment than ever before.

The real strength of TRANSCOM—as with any military organization—is evident in the unique talents and skills of its people. There is no more important challenge to a commander than proper stewardship of this resource. TRANSCOM's components rely heavily on Reserve elements. TRANSCOM includes multi-Service Active Military and large amounts of Reserve personnel, government civilians, and contractors. If confirmed, I would take an active role in preserving and enhancing the quality and expertise of TRANSCOM's personnel resources.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will address these challenges by improving our global end-to-end ability to deliver to the point of need in the most cost-effective way possible—projecting power where our national interests dictate. To do this, I will work with our commercial partners and the interagency to expand capacity and continue TRANSCOM efforts around the world to secure diplomatic and physical accesses to ground and airspace infrastructure for logistics. I will also leverage ongoing multimodal efforts to optimize our operations to support the warfighter while improving the performance and efficiency of deployment and distribution enterprise. Working closely with CYBERCOM, I will ensure our networks remain secure as TRANSCOM's Agile Transportation for the 21st century (AT 21) program is brought to operational status. This will provide decisionmakers with automated tools to improve the end-to-end movement and distribution of forces and sustainment.

Question. If confirmed, what broad priorities would you establish?

Answer. If confirmed, TRANSCOM's number one priority will remain to support the warfighter with whatever is needed to meet national objectives; including deployment, sustainment, rapid maneuver, aeromedical evacuation, redeployment, and humanitarian crisis response. Always mindful of our resources, I will continue process improvements and enterprise synchronization efforts through relationships within the Department, around the U.S. Government, and with commercial and international partners.

Question. What do you consider to be the most serious problems in the performance of the functions of the Commander, TRANSCOM?

Answer. TRANSCOM has done a world-class job supporting the Nation and our military forces over the years. Its stock with the warfighter has never been higher, earned through deployments, sustainment, redeployments, surges, drawdowns, and humanitarian crises like the recent calamity in Japan or the earthquake in Haiti. TRANSCOM's human enterprise is large, diverse, and global, and there will always be things we wish we can do better. The most significant area I would focus on would be improving the coordination and synchronization of the entire Joint Deployment and Distribution Enterprise (JDDE). The JDDE is a vast network of organizations both in and out of DOD that relies heavily on commercial partnerships with industry. General McNabb has made great strides toward this end, and if confirmed, I will continue this work by aligning JDDE authorities and resources commensurate with responsibilities, improving our ability to rapidly build strategic lines of communication, and institutionalizing best practices learned during the last decade.

Question. If confirmed, what management actions and timelines would you establish to address these problems?

Answer. If confirmed, I will reach outside of the command early to deepen strategic relationships with my fellow combatant commanders, TRANSCOM's components, commercial and international partners, leaders within the interagency, and with Members of Congress. As we move forward, we will balance our desire for perfection with the art of what is possible across a highly diverse enterprise, proceeding smartly after considering the options and balancing their costs and benefits.

EXPERIENCE IN MANAGING LOGISTICS OPERATIONS

Question. Unlike the current Commander of TRANSCOM, you have not had extensive experience in managing transportation forces. Much of your operational experience has been in bomber units.

What steps do you believe you need to take to achieve a more complete understanding of the logistics operations that TRANSCOM and the component commands within command manage for DOD?

Answer. I will work diligently to increase my knowledge of DOD and national transportation issues, including the challenges facing the commercial transportation industry and other national partners. If confirmed, this will include ensuring the TRANSCOM staff works to enhance my understanding of logistics operations and the mission of the command. I will also personally engage our interagency, non-governmental, commercial, and multi-national partners to learn and discuss improvements to our shared logistics priorities.

DISTRIBUTION PROCESS OWNER

Question. In September 2003, following a review of logistics operations, the Secretary of Defense designated the Commander, TRANSCOM, the Distribution Process Owner (DPO). As the DPO, TRANSCOM was tasked to improve the overall efficiency and interoperability of distribution related activities—deployment, sustainment, and redeployment support during peace and war.

What is your understanding of TRANSCOM's responsibilities as the DPO?

Answer. The mission of TRANSCOM as the DPO is twofold: first, to coordinate and oversee the DOD distribution system to provide interoperability, synchronization and alignment of DOD-wide, end-to-end distribution; and, second, to develop and implement distribution process improvements that enhance the Defense Logistics and Global Supply Chain Management System.

Question. What is your assessment of the progress TRANSCOM has made in improving the distribution process?

Answer. The Command has made significant progress in transforming DOD distribution. In collaboration with the COCOMs, Services, DLA, and GSA, TRANSCOM has matured the DPO governance structure to use a robust performance measurement framework, with common metrics and negotiated Time Definite Delivery (TDD) standards which establish expectations, identify where the system needs improvement, and prioritize resources to making improvements.

TRANSCOM has made improvements through the DPO Strategic Opportunities (DSO) initiatives, which is a collaborative effort between TRANSCOM, DLA, GSA, the Services, and COCOMs to move sustainment through the distribution network faster and cheaper. For fiscal year 2011, these combined initiatives have delivered approximately \$280 million in savings through July.

For example, the Strategic Surface Route Plan maximized 40 foot container utilization and improved velocity on key routes by 15 percent. Strategic Air Optimization has improved aircraft cargo utilization by ~10 percent by employing the full array of airlift services, improving Aerial Port pallet build processes and better matching airlift capacity with demand. Lastly, by applying lean principles to air and surface cargo distribution processes, TRANSCOM improved velocity by up to 40 percent across multiple COCOM distribution lanes.

Looking forward, there are always ways to institutionalize process improvements and efficiencies through business process reengineering. One example is the AT 21 program, which uses industry best-practices and government and commercial off-the-shelf optimization and scheduling tools to deliver best value, end-to-end distribution and deployment solutions. Business process reengineering improves transportation planning, forecast accuracy, and on-time delivery of forces and sustainment to combatant commanders at a lower cost to the Services.

Question. Do you believe that the current system needs any changes to enhance the ability of TRANSCOM to execute the responsibilities of the DPO?

Answer. No. I believe the Commander of TRANSCOM has the necessary authorities to execute his responsibility as the DPO. If confirmed, I will continue to build on the hard work and successes achieved to date. I will emphasize reducing costs by exploring new areas in the DOD supply chain that emphasize a total cost management view, balancing efficiency with effectiveness to achieve best value and visibility for the warfighters and the taxpayers. I will enhance unity of effort by promoting the Joint Deployment Distribution Enterprise and pursuing opportunities to remove barriers to reinvesting enterprise cost savings.

STRATEGIC AIRLIFT

Question. The requirement for organic strategic airlift needed to support wartime requirements has been set at a level of 32.7 million ton-miles per day. This requirement is somewhat smaller than the capability of 222 C-17s and 111 C-5s which could carry roughly 35 million ton-miles per day. With that situation in mind, the Air Force intends to retire some portion of the C-5A fleet of aircraft.

Do you agree with the DOD proposal to eliminate the strategic airlift force structure floor of 316 aircraft?

Answer. Yes. Our national defense strategy requires a viable fleet of about 300 organic strategic airlift aircraft, which would provide the 32.7 million ton-miles per day peak wartime requirement as established in the Mobility Capabilities and Requirements Study-2016 (MCRS-16). The C-17 will continue to be our premier airlifter, and our modernized C-5s are achieving their expected levels of mission readiness. However, in order to achieve the correct mix of C-17 and C-5 aircraft, and take full advantage of our aircrews, maintainers, and aerial porters, the Air Force should be given the authority to retire the oldest, least capable C-5As. This action would improve aircraft availability by removing aircraft with the lowest mission capable rates from the fleet and will allow the Air Force to focus their critical personnel and resources on the right-sized fleet.

Question. What is your view of the requirements in peacetime for such organic airlift aircraft?

Answer. The MCRS-16 established the organic strategic airlift requirement at 32.7 million ton-miles per day. This requirement includes steady-state (peacetime) requirements as well as wartime requirements. Proactive management of the Guard and Reserve participation and commercial augmentation allows TRANSCOM to respond rapidly to sudden changes in the peacetime requirements. If confirmed, I will work to ensure our partnership with the Guard, Reserve, and CRAF carriers remain strong for our national security.

Question. Do you believe that the Air Force could, at reasonable costs and within reasonable timeframes, reactivate some portion of the 32 C-5 aircraft that will have been retired under the Air Force's current plans, if later we find out that 301 strategic airlift aircraft is not sufficient to meet our peacetime and wartime needs?

Answer. Based on the MCRS-16, the Air Force does not anticipate the requirement for strategic airlift to exceed 32.7 million ton-miles per day, which equates to about 300 aircraft. If, at some point in the future, we determine that the requirement is greater than anticipated, TRANSCOM will support the Air Force to find the best solution, which might include reactivation of aircraft.

Question. Does possible closure of Pakistan lines of communication supporting Afghanistan operations change your assessment of airlift requirements, and if so, how?

Answer. No. The possible closure of Pakistan lines of communication would not change the requirement of about 300 organic strategic airlift aircraft. Improving throughput at existing airports and expanding capacity in our surface networks which supply Afghanistan has again been a centerpiece of our efforts in 2010. The Northern Distribution Network (NDN) remains a priority for TRANSCOM. In 2010, two additional routes were added through the Baltics and Central Asia and continue to improve the processes, facilitating a faster, less costly cargo flow. In addition to the NDN improvements, capacity was added at intermodal Persian Gulf locations. Realizing that more capacity was needed to support the surge of forces into Afghanistan and the movement of thousands of Mine Resistant Ambush Protected (MRAP) Vehicles, TRANSCOM worked closely with CENTCOM and the Department of State to secure access to additional airfields and seaports in the Persian Gulf. Using a concept called multi-modal operations, large volumes of cargo and thousands of vehicles were moved by sea to locations in closer proximity to the CENTCOM area of operations, by truck from the seaports to the nearby airfields and then by air to Afghanistan.

NORTHERN DISTRIBUTION NETWORK

Question. The Defense Department has plans to expand its use of air and ground supply routes along the NDN to deliver equipment and supplies to Afghanistan, in part to reduce the U.S. reliance on supply routes through Pakistan. Yet significant portions of the NDN go through certain countries, particularly in Central Asia, that have extremely poor track records on human rights and corruption.

What do you see as the major challenges to expanding the use of the NDN to deliver supplies to Afghanistan?

Answer. The primary challenges we face with expanding the NDN are access and types of cargo allowed to transit. Receiving necessary and timely transit permissions from partner nations, particularly those in Central Asia, has been a challenge. Addi-

tionally, the current transit agreements only allow non-lethal cargo to transit the NDN. This limiting factor leads to heavier reliance on the Pakistan ground lines of communication for some military equipment and airlift for delivery of lethal and critical or sensitive cargo.

Question. To what extent, if any, should concerns about the human rights and corruption records of authoritarian regimes, particularly in Central Asia, be taken into account in negotiating expanded access to supply routes along the NDN?

Answer. It is in the national interests of the United States to advance and protect fundamental human rights, and to promote democratic institutions that are responsive and accountable to its citizens. These strategic priorities should be taken into account and balanced against other strategic priorities in our dealings with foreign governments. We need to work with the whole-of-government to take a holistic approach to our bilateral relationships, and it is in this context that negotiations to expand needed NDN supply routes should be considered.

STRATEGIC SEALIFT

Question. Strategic sealift has always played a significant role in providing support to our forces overseas. Typically, we have seen strategic sealift delivering 95 percent of the equipment transported to overseas contingencies.

Are there any initiatives that you believe are necessary, if confirmed, in the area of strategic sealift?

Answer. If confirmed, I will work with the U.S. Navy and our commercial sealift partners to develop initiatives such as Joint Seabasing and Joint High Speed Vessels, which may play a role in enhancing strategic sealift. Strategic sealift continues to play a vital role in the transportation of equipment and supplies for DOD. The MSC, the SDDC, and U.S. Maritime Administration, working in partnership with the U.S. maritime industry, have done a superb job at meeting the performance requirements of strategic sealift as we execute Operations Enduring Freedom and New Dawn and support other military missions around the globe.

MARITIME SECURITY PROGRAM

Question. Through programs like the Maritime Security Program (MSP), the Voluntary Intermodal Sealift Agreement (VISA), and the Voluntary Tanker Agreement (VTA) administered by the Maritime Administration, DOD has maintained access to U.S. commercial capabilities and transportation networks while ensuring the continued viability of both the U.S.-flag fleet and the pool of citizen mariners who man those vessels.

What is your view of the importance of these Maritime Administration programs?

Answer. The MSP, VISA, and VTA are all vital components of the overall strategic sealift capability required to meet the Nation's strategic sealift requirements. The MSP maintains a modern U.S. flag fleet providing military access to vessels and vessel capacity, as well as a total global, intermodal transportation network. This network includes not only vessels, but logistics management services, infrastructure, terminals facilities and, perhaps most importantly, U.S. citizen merchant mariners to crew the government owned/controlled and commercial fleets.

Question. What changes in these programs, if any, do you believe are appropriate and would make them more effective or more efficient in supporting DOD transportation requirements?

Answer. TRANSCOM is coordinating with the Maritime Administration on proposed enhancements to the MSP that would allow an opportunity for cost efficient recapitalization of our organic surge sealift fleet. As force drawdowns continue in Operations New Dawn and Enduring Freedom, so will the deployment and sustainment cargoes which have become such a valuable piece of our commercial partners' business plans. If confirmed, I will work to mold these programs to respond to the ever changing global strategic and economic environment maintaining our U.S. flag fleet, our precious pool of U.S. citizen merchant mariners, and the industrial base which supports them.

CIVIL RESERVE AIR FLEET

Question. With the expansion of military operations since September 11, 2001, the Air Force's mobility requirements have increased. The Air Force has in the past, and may very well in the future, rely heavily on the Civil Reserve Air Fleet (CRAF) to supplement its organic airlift.

Do the changes in the commercial airline industry, characterized by bankruptcies and a move toward smaller and shorter-range aircraft, bring into question the future viability of the CRAF system?

Answer. Several recent studies indicate that the airline industry will continue to provide sufficient numbers of large, long-range aircraft to meet our defense needs. In this past year, through discussions with our commercial industry partners, TRANSCOM has made the most sweeping changes to the CRAF program in 15 years. These changes will result in a stronger, more viable program and address congressional mandates to improve predictability of DOD commercial requirements and incentivize carriers to use modern aircraft.

To ensure the CRAF partnership remains strong, TRANSCOM created the Executive Working Group (EWG), modeled after a similar venue with our sealift partners. The CRAF EWG brings together TRANSCOM and AMC leaders with Chief Executive Officers, Presidents, and other representatives of the commercial airline industry to discuss issues with the CRAF program. The CRAF EWG will continue to meet on a regular basis to discuss additional changes to this vital program. If confirmed, I will continue to work with our CRAF partners to ensure the business relationships are solid and the contracts support DOD requirements.

Question. How much should we be relying on CRAF aircraft to meet our peacetime and wartime airlift requirements?

Answer. The CRAF is a critical component in our ability to rapidly deploy forces and equipment. We must balance and integrate all the tools of American power, to include our industrial capacity and partners, to succeed in ensuring our national security.

The CRAF is intended to augment wartime capability to carry passengers and bulk air cargo, which it is very efficient in doing, allowing the organic fleet to focus on missions for which they are better suited. It is a win-win for our Nation.

JOINT COMMAND AND CONTROL

Question. Initial reporting from recent military operations indicate joint command and control capabilities have greatly improved in recent years.

What is your assessment of the performance of TRANSCOM's global and theater command and control (C2) systems?

Answer. TRANSCOM's global C2 systems work well, as evidenced by their timely support of warfighter requirements. If confirmed, I will work to improve TRANSCOM's C2 systems to focus on enhancing situational awareness, rapid decisionmaking, and end-to-end distribution optimization.

Question. What interoperability challenges remain between Service-to-Service and Service-to-joint C2 systems?

Answer. There is a need to improve information exchanges across the various classification boundaries and between Services and combatant commanders, while simultaneously improving information sharing with our commercial and coalition partners. Information sharing is crucial to successful and safe mission accomplishment, but there are security risks that require constant attention.

To enhance Service-to-joint C2 systems, TRANSCOM is working to identify key processes and information technology solutions that best integrate Service unique or stand-alone applications to enhance the delivery of timely, accurate, and complete data. TRANSCOM is teaming with commercial partners and individual Services to ensure these interoperability risks are addressed. If confirmed, I will continue to improve TRANSCOM's superior service to their customers, and most importantly, our warfighters.

Question. What role should the TRANSCOM Commander play in ensuring the development of reliable, interoperable, and agile C2 systems?

Answer. As DPO, the TRANSCOM Commander plays a preeminent role in the integration of C2 systems across boundaries and domains from one end of the distribution chain to the other. Commercial partners, DLA, Joint Staff, combatant commanders, Services, and coalition partners all have unique logistics systems that serve their mission.

If confirmed, I will work with distribution partners and customers to make C2 improvements which will allow protected and unconstrained sharing of information across these domains. This is a clear challenge, but necessary, if we are to maximize the combat multiplying effects of logistics for the warfighters.

CYBERSPACE OPERATIONS AND SECURITY

Question. TRANSCOM must communicate over the unclassified Internet with many private-sector entities that are central to DOD's force generation and deployment operations—in the transportation and shipping industries in particular. Much of the rest of the critical communications and operations of DOD can be conducted over the classified DOD internet service, which is not connected to the public Internet and is therefore much more protected against eavesdropping and disruption by

computer network attacks. General McNabb has been quoted as stating that TRANSCOM is the most attacked command in the Department.

What do you believe are the critical needs of TRANSCOM for cyber security?

Answer. TRANSCOM not only moves cargo and passengers, but vast amounts of information between our military and commercial partners. Command and control systems must get the right information to the right people at the right time, while protecting it from exploitation and attack. If confirmed, I will work to protect the command's information from new technologies that exploit and attack, reduce costs by eliminating duplication of data, systems, or processes, and set data standards across the enterprise to build trust, security, and efficiency.

Question. What plans do you have for addressing these critical needs?

Answer. TRANSCOM will need to continue addressing these issues on multiple fronts. Keeping command and control systems secure and protecting them from attack is a huge challenge. TRANSCOM has been partnering with CYBERCOM, industry, and academia to introduce innovative technologies and methodologies to protect essential systems and information. To reduce costs and boost security, the command is implementing architectures to leverage new technologies, eliminate duplication of data, and better protect its command and control systems. To improve the accuracy and trust of our information, TRANSCOM is partnering with military and commercial partners to define standards for the processing and handling of data. Implementation of these standards streamlines information flow, provides better transparency to authorized users, and leverages new technologies. The results are trusted and timely information supporting a more responsive transportation enterprise. If confirmed, I will focus on cyber security by working with our components, the Department, and industry experts to develop innovative solutions that maintain our freedom of operations through data security.

Question. Is DOD taking adequate steps to address your special needs?

Answer. Yes. TRANSCOM is engaged with the Principal Deputy Under Secretary of Defense for Policy, DOD Chief Information Officer, U.S. Cyber Command, the Cyberspace Integration Group, and COCOM Senior Warfighter Forums in a concerted effort to enhance cyberspace operations security posture and countering cyber threats to our enterprise networks and information.

AEROMEDICAL EVACUATION

Question. Following the cancellation of the C-9A aircraft for medical evacuation in 2003, the AMC adopted a new operational approach to its worldwide mission of aeromedical evacuation. The concept employs other airlift, such as cargo and aerial refueling aircraft, for the air evacuation of wounded and ill patients.

Based on lessons learned in OIF, OEF, and Operation New Dawn, are you satisfied that the current model ensures the highest quality of aeromedical evacuation support for our severely injured or ill personnel?

Answer. I am extremely satisfied with the high quality of aeromedical evacuation support TRANSCOM provides for our severely injured or ill personnel. The current approach using designated versus dedicated aircraft has transformed our global patient movement capability. The transition from the C-9A to cargo and aerial refueling aircraft provided access to a greater variety of airframes globally while offsetting the cost of maintaining a dedicated air fleet solely for aeromedical evacuation. This also provides greater flexibility to respond to urgent and priority patient needs with In-system Select missions that can land at airfields not accessible by a C-9A. Ten years of experience and lessons learned has led to significant advancements in mission operations, technology, and medical capability. Patient support pallets and specially trained critical care teams are just two examples of enhancements that made cargo and aerial refueling aircraft suitable for aeromedical evacuation. This has allowed safe movement of severely injured and ill patients more effectively through the enroute care system. In addition, the Civilian Reserve Air Fleet (CRAF) is able to provide additional aeromedical evacuation capability if patient movement requirements exceed current system capacity. If confirmed, I will continue to ensure the highest quality of aeromedical evacuation support for our severely injured or ill personnel. I believe this is a critical pillar to conduct combat operations and to sustaining an exceptional All-Volunteer Force.

Question. If confirmed, how would you continuously evaluate the quality standards of aeromedical evacuation?

Answer. If confirmed, I would support an integrated approach to evaluate the quality standards of aeromedical evacuation. This includes expanding the use of aeromedical evacuation data from the Patient Movement Quality Reporting System and the TRANSCOM Regulating and Command and Control Evacuation System to pinpoint opportunities to optimize patient care. Integrating other existing patient

safety databases used by the Services, COCOMs, USTC/AMC aeromedical evacuation patient safety monitors, the Critical Care Air Transport Performance Improvement Team, and the Joint Theatre Trauma System would further enhance patient safety and quality standards. In addition, I would support development and deployment of a user-friendly electronic medical record that captures patient information and care data all the way from point of injury, through care in the air, to the medical treatment facility or rehabilitation facility.

RESEARCH AND DEVELOPMENT

Question. TRANSCOM's budget includes funding for a research and development (R&D) activity designed to allow for examination and improvement of the entire supply chain as part of TRANSCOM's role as DPO.

What are the major capability gaps related to TRANSCOM's mission that need to be addressed through R&D efforts?

Answer. Increased demands on TRANSCOM's global mission and the ability to execute those responsibilities in an ever-increasing contested cyberspace environment represent challenges that require innovative solutions to maintain critical communication with the distribution community including our commercial partners. Additionally, new technologies may increase the efficiency and effectiveness of our distribution options. If confirmed, TRANSCOM's R&D investment focus will explore technologies that improve efficiencies and lower the operating cost of our Nation's joint logistics enterprise. Some examples include:

- Point of Need Delivery—improve delivery speed, volume, and accuracy of airdropped cargo, as well as leverage unmanned and hybrid airlift capabilities in operationally relevant conditions and synchronize strategic and theater delivery capabilities to meet increasingly dynamic customer needs;
- Joint Sea Basing—capability to safely and efficiently move vehicles, containers, and cargo in a sea base environment;
- Command and Control (C2)/Decision Support Tools—improve visibility, decisionmaking, and collaboration within DOD's logistics chain;
- Ability to Operate in All Environments—improve expeditionary operations for environments that feature anti-access, austere conditions, adverse weather, and contested cyberspace; and
- Fossil Fuel Dependency Reduction—explore energy alternatives to enhance our ability to employ our Nation's airlift and aerial refueling capacity and reduce cost relative to warfighter requirements.

Question. What unique processes and technologies do you feel TRANSCOM needs to develop through its own program and investments?

Answer. TRANSCOM is investing in process reengineering as part of the AT 21 program to institutionalize improvement opportunities that are repeatable and reliable. Examples include the Strategic Surface Route Plan, and Strategic Air Optimization, which use demand, capacity, and other factors to maximize utilization of containers and pallets while maintaining desired service levels. In addition, TRANSCOM continues to enhance warfighter support with technologies ranging from precision airdrop to exploring the potential of hybrid airships. If confirmed, I will examine the entire R&D portfolio to find innovative solutions to enhance enterprise support to the warfighter.

Question. How will you work with other R&D organizations to ensure that TRANSCOM's current and future capability gaps are addressed?

Answer. Nearly 75 percent of TRANSCOM's RDT&E projects are collaboratively funded efforts that place proven capabilities in the hands of the warfighter within 2 to 3 years. If confirmed, I will work, in partnership with the Services, DLA, the combatant commands, OSD, and the Joint Staff, to identify, validate, and recommend RDT&E projects to explore emerging technologies that close validated capability gaps.

TECHNOLOGY PRIORITIES

Question. Serving the needs of the combatant commanders both in the near-term and in the future is one of the key goals of the Department's science and technology executives, who list outreach to commanders as an activity of continued focus.

What do you see as the most challenging technological needs or capability gaps facing TRANSCOM in its mission to provide air, land, and sea transportation to DOD?

Answer. Of utmost concern is the need to improve the Department's ability to provide timely and precise delivery of sustainment to our warfighters as well as humanitarian aid and relief anywhere and anytime and to do so in a fiscally responsible manner. Additionally, we need to explore information security and assurance

as well as new cyber technologies to ensure greater efficiency and mission accomplishment. Mitigating fossil fuel dependency also remains a major focus area.

Question. What would you do, if confirmed, to make your technology requirements known to the department's science and technology community to ensure the availability of needed equipment and capabilities in the long-term?

Answer. If confirmed, I will focus on enhancing Department/industry partnerships to rapidly develop and field proven technologies. Within DOD and the interagency, I will work through the established processes to ensure our support to the warfighter continues.

TECHNOLOGY TRANSITION

Question. TRANSCOM has been active in the Joint Concept Technology Development (JCTD) process.

What are your views on the JCTD process as a means to spiral emerging technologies into use to confront changing threats and to meet warfighter needs?

Answer. The Department's JCTD program is an extremely effective tool that COCOMs can use to insert emerging technologies into the warfight. It provides the joint community an agile means to deliver mature technology addressing warfighter gaps. Building on TRANSCOM's past record of success, if confirmed, I will strongly advocate for technologies that rapidly enhance warfighter support and success.

Question. What steps will you take, if confirmed, to enhance the effectiveness of technology transition efforts within your command and in cooperation with other Services and defense agencies?

Answer. If confirmed, I will continue to apply the Command's RDT&E investments, in partnership with other COCOMs, Services, defense agencies, academia, and industry to advance our Nation's warfighting capabilities. I will leverage the Department's many programs (JCTD, Coalition Warfare Program, Joint Test & Evaluation, Small Business Innovative Research, et cetera) to develop and field, in collaboration with our government, coalition, industry, and academic partners, the rapid development and transition of proven technologies. Specifically, I will include the Services, COCOMs, JDDE partners, OSD, and the Joint Staff in the JCTD and RDT&E project selection process to ensure buy-in and avoid unnecessary duplication of effort. Finally, I will ensure that all projects have a program of record identified for transition and emphasize rapid fielding from day one.

DEPLOYMENT CHALLENGES

Question. Multiple studies by TRANSCOM and the Army, and direct experience in Afghanistan and elsewhere, demonstrate that the airlift strategy and airlift platforms developed for the Cold War confrontation in Central Europe are not ideal to support operations in third-world regions. Unlike Europe, most of the world has few airfields with long runways, and there are fewer still that have parking space for more than a couple of cargo aircraft to unload at one time. This "Maximum-on-Ground" or MOG metric is the critical measure of throughput capacity at airfields. The few airfields with MOG greater than 2 are scarce and are located within major urban areas, usually far from where ground forces would be employed. Traditional fixed-wing airlifters—even flexible ones like the C-17—cannot be effectively employed in large numbers to deploy and support ground forces in these regions because of these infrastructure limitations.

TRANSCOM is now completing a Future Deployment and Distribution Assessment that documents this capability gap and evaluates alternatives to traditional fixed-wing transports. The alternatives that scored very high are heavy-lift airships and heavy vertical take-off and landing (VTOL) rotorcraft. These alternatives would deploy more forces faster, save lots of fuel, and increase sustainment. Because they deliver troops and supplies directly to the point of need, they reduce the number of trucks on the road that are vulnerable to IEDs, as well as the length of supply lines. In other words, they would also reduce the vulnerability of our supply lines and save lives.

The Air Force and the Army are conducting an Analysis of Alternatives (AOA) for a replacement of the C-130. We understand that the Army favors a heavy lift second generation tilt-rotor that would provide VTOL capabilities.

Do you support development of such a platform?

Answer. The AOA you refer to is the Joint Future Theater Lift Technology Study (JFTL TS), and it is due to be completed within the next year. The AOA is ongoing, and it is unclear what platform or platforms will provide the best warfighter value for DOD. The intent of the JFTL TS is not to replace the C-130 but to supplement the C-17, C-130, and C-27 capabilities to deliver medium weight combat vehicles into very austere environments. The JFTL TS is assessing the overall value and cost

of a cadre of fixed wing aircraft, hybrid airships, and tilt-rotor platforms as to how they might perform in emerging, future intra-theater airlift missions. Upon completion of the AOA, OSD in concert with the Air Force and the joint partners will develop conclusions and recommendations.

Question. TRANSCOM has apparently assessed the airships in this review to be much more mature technology. This assessment also agrees with other independent assessments.

Do you think that DOD should develop and produce such platforms, or do you think the government could buy or lease them from the private sector to acquire a capability sooner?

Answer. At this time, a hybrid airship configured for heavy cargo, equivalent to legacy lift platforms, does not exist. Industry has developed an ISR hybrid airship, which may serve as the basis for further expansion as a cargo carrying platform. Initial flight testing of this platform is scheduled to begin in early 2012. I believe the DOD should partner with industry as we go forward advancing this transportation modal option.

Question. In natural disasters such as the Haiti earthquake or Hurricane Katrina, the airfields, roads, and bridges that are required to fly in and distribute relief forces and supplies were destroyed by the disaster. Fixed-wing transports that need functioning airfields are not much use, but vertical lift aircraft or airships have the potential for continuing effective operations.

Do you believe that the TRANSCOM analyses have adequately factored disaster relief into their assessments?

Answer. TRANSCOM is conducting studies and analyses to ensure we can respond across the full range of military activities. They are working with industry partners through the use of Cooperative Research and Development Agreements with specific focus on humanitarian assistance and disaster relief and contingency sustainment (Afghanistan) operations. These look to determine the feasibility of using hybrid airships as a modal option for the transportation distribution system. In order to continue or increase TRANSCOM's capability to support the warfighter and nations in need with effective and efficient distribution, this team is engaged to ensure situations such as Haiti's earthquake and other natural disasters are analyzed for the use of the hybrid airship.

DEFENSE PERSONAL PROPERTY SYSTEM

Question. For over 10 years, TRANSCOM and its subordinate command, Surface Deployment and Distribution Command, have been working to improve the process of moving servicemembers' household goods and gaining the support of the transportation provider industry for needed changes. Implementation of the new system—Defense Personal Property System (DPS)—uses a “best value” approach to contracting with movers that focuses on quality of performance, web-based scheduling and tracking of shipments, servicemember involvement throughout the moving process, and a claims system that provides full replacement value for damaged household goods. Successful implementation of this system depends on replacement of the legacy Transportation Operational Personal Property Standard System (TOPS) with the web-based DPS.

What do you view as the most significant challenges that remain in continuing to implement DPS?

Answer. The DPS is now booking over 90 percent of all household goods shipments, with Active Duty, Reserve, and civilian members taking advantage of on-line self-counseling. Awards to move their personal property are made on a best-value basis to transportation service providers (TSPs). Based on the 17 Mar 11 DPS Cost Savings Analysis, DPS has saved approximately \$153 million in fiscal year 2011 personal property movement costs through the use of more competitive rates and best-value scoring. Although the program has come a long way, some final implementation steps remain. TRANSCOM is currently incorporating the last remaining functionality, such as Domestic Small Shipments, Intra-Country Moves, and Non-Temporary Storage, into the DPS software while continuing to enhance the overall system performance and the user experience.

Question. What is your assessment of the success of DPS in achieving the requirement for full replacement value for damaged or missing household goods claims?

Answer. Full replacement value (FRV) is implemented across the Services, and is now in place for all modes of shipments in support of the Defense Personal Property Program (DP3). If confirmed, I will ensure process improvements are in place so claims submission procedures become more straightforward for the DPS Claims module user.

Question. What is your understanding under DPS of the percentage of valid personal claims for damage or loss of household goods that is currently paid for by DOD and the percentage that is paid for by the movers who caused the damage?

Answer. Based on metrics provided by the Military Claims Offices (MCOs), the percentage of claims paid by the DOD is approximately 52 percent. However, when a MCO pays a claim to a servicemember, the next step in the MCO process is to initiate collection of those funds from the mover who caused the damage.

Question. What is your assessment of the adequacy of the response rate on customer satisfaction surveys as a method for identifying best and worst performers?

Answer. Customer satisfaction survey response rates have risen to 27 percent. It is clear the survey response rates are key to ensuring only quality service providers participate in the program. If confirmed, I will work closely with the Service Headquarters to increase the response rate.

Question. If confirmed, what role would you play in ensuring that DPS is fully funded and implemented and will you make every effort to ensure this program is successful in meeting its goals?

Answer. If confirmed, I will leverage DPS to continue to improve our business processes for household goods and services. I will work to ensure the DPS program successfully meets its goals and full funding is obtained. OSD and the Services have committed to fully fund the DPS program. In May of this year, the Office of the Secretary of Defense, Capability Assessment and Program Evaluation office validated the fiscal years 2012 to 2017 funding required for DPS development and sustainment. In addition, OSD, Joint Staff, and the Services have indicated their support to fund DPS.

AIR FORCE ABILITY TO RESPOND TO WORLDWIDE CONTINGENCIES

Question. What impact, if any, do you see on the Air Force's ability to respond to worldwide contingencies as a consequence of the demands of current operations in Iraq and Afghanistan?

Answer. The Air Force has the right people, skills, and equipment to support operations in Iraq and Afghanistan as a full partner. The continued operations tempo does however take its toll. Continued deployments place stress upon our people and their families. Our equipment is also being stressed and aged at an accelerated rate. Despite this, the Air Force is proud to be serving alongside our sister Services in protecting the future of this great country.

Question. How much additional risk has the United States assumed in this regard?

Answer. Our forces engaged in combat today are ready to perform their missions, but many Air Force capabilities require modernization to help us shape and respond to a very challenging future. We must retain an enduring technological edge that flows from our unmatched ability to research, develop, operate, and sustain the world's premier Air Force. The Air Force remains committed to recruiting and retaining the highest caliber airmen and sustaining the quality of service for them and their families, and we must continue to ensure we are able to set the conditions for America's success against emerging threats in an uncertain future.

JOINT CARGO AIRCRAFT

Question. Subsequent to the Air Force assuming full responsibility for the direct support airlift mission capability for the Army, the Air Force decided that a total program of 38 C-27Js would be sufficient to meet their responsibility for providing that capability. The Air Force based this conclusion on: (1) an analysis of the Army's demand for the direct support mission; (2) a Mobility Capability Requirements Study conclusion that the programmed Air Force fleet of 401 C-130 aircraft exceeded maximum demand for intra-theater airlift in any wartime scenario by 66 C-130 aircraft; and (3) an analysis that showed that a supply of 38 C-27J aircraft, along with 20 C-130 aircraft diverted from an intra-theater airlift mission to the Army direct support mission, would meet the Army's needs.

Should the Air Force consider buying more C-27Js specifically for meeting the Army direct support mission requirements, rather than recapitalizing C-130 inventory that may be excess to intra-theater airlift requirements, since the cost per flying hour for a C-27J should be much less expensive than that for a C-130J aircraft?

Answer. No. The Air Force Intra-Theater Airlift Force Mix Analysis accomplished by RAND in 2008 demonstrated the C-130J as being consistently most cost-effective in accomplishing the spectrum of theater lift missions. C-130s and C-27Js have comparable short-field access and soft-field performance. The C-27J has a niche for small loads (3 pallets or fewer) and is well-suited to perform that role with the cur-

rent plan to acquire 38 aircraft. The continued recapitalization of the C-130 fleet offers the warfighter greater and more cost-effective capability and flexibility.

Question. The Defense Department also has requirements for supporting domestic missions, such as those from the Department of Homeland Security. Absent other information, it would appear to the committee that the Department merely assumes that it can muster the appropriate support for domestic missions from within those forces that are derived from warfighting requirements. Just as it has turned out that the current conflicts in Afghanistan and Iraq were not exactly the “lesser included contingencies” that previous defense planning had assumed, it is altogether possible that the same would be true for meeting whatever domestic demands may be placed on the Department.

How would you propose to ensure that TRANSCOM forces are able to meet domestic mission requirements?

Answer. MCRS-16 concluded intra-theater airlift was adequate in supporting each of the three cases studied. Each case contained not only a major contingency campaign but also included worldwide commitments, training, and Homeland defense scenarios.

SPACE AVAILABLE TRAVEL POLICIES

Question. DOD, in consultation with TRANSCOM, submitted a report to Congress on Space Available Travel for Certain Disabled Veterans and Gray-Area Retirees in December 2007. The report concluded that increases in space available eligibility would significantly impact DOD’s ability to accomplish effectively the airlift mission and negatively affect support to Active Duty military space-available travelers. Additionally, the report concluded that adding to the eligibility pool would increase support costs and displace the current policy that mandates that space-A travel not incur additional costs to DOD.

Do you consider the conclusions and recommendations of the December 2007 report to still be valid?

Answer. I believe the conclusions and recommendations remain valid. The potential for expanding the eligibility pool cited in the report by nearly 2 million individuals (a 27 percent increase) cannot be accommodated without having a detrimental impact to our Active Duty members. The space-A travel system’s primary objective is to enhance the morale and welfare of our Active-Duty Force.

Question. What are the constraints in today’s operational environment of expanding the categories of individuals eligible for space available travel?

Answer. Given current operational requirements, I do not believe DOD has the global ability to support this expansion. The expansion would increase support costs for security identification, administration, processing, baggage handling, safety equipment, training, personnel, and facilities, and would undermine the current policy that execution of the space-A travel is at no cost to DOD. An expansion places additional stress on heavily tasked DOD aircrews and support personnel because of wartime commitments.

Question. What recommendations, if any, do you have regarding changes to the existing policies controlling space available travel eligibility?

Answer. Due to the current operational requirements, I do not see space-A expansion as advisable.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Commander, TRANSCOM?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR CARL LEVIN

NORTHERN DISTRIBUTION NETWORK

1. Senator LEVIN. General Fraser, a major concern has been our significant reliance on supply routes through Pakistan which have been subject to attack by militant extremists. Currently, nearly 40 percent of surface cargo to Afghanistan arrives from the north, and military planners reportedly intend to expand to 75 percent the share of surface cargo coming into Afghanistan along the northern network. While the growth of the Northern Distribution Network (NDN) has reduced concerns about vulnerable supply lines through Pakistan, it has also raised concerns about U.S. dependence on authoritarian regimes in Central Asia with high levels of corruption. Given the levels of corruption in a number of Central Asian countries, what steps has U.S. Transportation Command (TRANSCOM) taken to ensure that its contractors and their subcontractors operate in a manner that safeguards against corrupt practices that result in U.S. tax dollars being siphoned off?

General FRASER. There is a continual dialogue between TRANSCOM and our commercial carriers who transport cargo into Afghanistan as part of the Universal Services Contract (USC). By using our commercial carriers, who have established commercial networks and subcontracts throughout the NDN, the rates for TRANSCOM transportation are competitive and considered reasonable in comparison to commercial tariffs in those countries. With our rates being comparable to both commercial and NATO cargo rates, we believe the opportunity for funds being siphoned off through corruption is minimal. The USCs contain a clause requiring contractors to have a business code of ethics and conduct, along with all the required U.S. Central Command (CENTCOM) Contracting Command clauses. Additionally, the prime contractors have a vested interest in ensuring all business conducted in these countries is above board and free of any corruption. They have international brands with untarnished reputations—reputations they want to maintain. We work closely with our prime contractor and by maintaining continuous communications, we remain alert to any potential corruption. In addition, our embassies have provided guidance to local carriers regarding the legitimacy of transit fees charged by Central Asian governments to ensure all charges are valid.

2. Senator LEVIN. General Fraser, in Kyrgyzstan, questions have arisen regarding payments under a contract to provide fuel to the Manas Transit Center that may have been diverted to relatives of two presidents. What is the status of any Department of Defense (DOD) investigations into allegations of possible corruption in connection with fuel contracts relating to the Manas Transit Center?

General FRASER. The Office of the Secretary of Defense (OSD)(Policy) and Defense Logistics Agency-Energy are currently engaged with the Government of Kyrgyzstan concerning the fuel contract to support Manas Transit Center, and the contractual process continues to move gradually forward.

Regarding allegations of possible corruption, the December 2010 congressional report "Mystery at Manas" was critical of Departments of State and Defense oversight of fuel contracts in Central Asia due to the high risk of corruption in the region and concern that negative public perception may be detrimental to U.S. efforts. However, the House Subcommittee on National Security and Foreign Affairs uncovered no credible evidence that Mina Corporation and Red Star Enterprises were linked to corrupt activities and we are not aware of any further DOD investigations at this time.

Manas Transit Center continues to be a critical hub for strategic airflow as TRANSCOM provides continuous support to CENTCOM operations in Afghanistan.

QUESTION SUBMITTED BY SENATOR KIRSTEN E. GILLIBRAND

STEWART AIR NATIONAL GUARD BASE

3. Senator GILLIBRAND. General Fraser, as I'm sure you are aware, Stewart Air National Guard Base (ANGB), NY, is the proud home of the 105th Airlift Wing. Rich in history and tradition, Stewart ANGB employs more than 660 full-time and part-time military members and some 1,700 traditional guardsmen.

Earlier this year I was pleased with the decision by the Air Force to replace the 12 retiring C-5A Galaxy aircraft with the C-17. However, I was surprised to learn only eight C-17 are going to be based at Stewart ANGB. I've asked the Air Force for an explanation and received a response indicating they were currently researching the issue and promised me a more detailed answer upon completion of their review.

I understand the 8 C-17s destined for Stewart ANGB are coming from Charleston Air Force Base (AFB), SC, and McChord AFB, WA, both of which already have in excess of 50 aircraft. With another 13 C-17s still to be delivered to the Air Force, I believe basing an additional 8 C-17s (for a total of 16) with the 105th Airlift Wing will not only maximize the capability of Stewart ANGB and its highly trained and dedicated personnel, it will increase the geographic distribution of this important national asset, and increase available ramp space at Charleston and McChord AFBs, relieving any potential overcrowding. With the retirement of the C-5As, Stewart ANGB has the infrastructure, personnel, and community desire to accommodate more than eight C-17s.

While I was unable to attend your confirmation hearing due to a conflict in my schedule, I have reviewed your testimony and appreciated your comments on the importance of the Air National Guard and Air Force Reserve. As the President's nominee to command TRANSCOM, I would appreciate your thoughts on maximizing the capabilities of Stewart ANGB by increasing the number of C-17s based there.

General FRASER. TRANSCOM recognizes the importance of the Air National Guard (ANG) and Air Force Reserve Command (AFRC) to the strategic airlift mission. The continued contributions of the Stewart ANGB airmen are invaluable to the Air Force, as they complete the transition from C-5As to C-17s. The Air Force is responsible for the basing of strategic airlift assets which is accomplished through the Secretary of the Air Force's Strategic Basing Process. The process is deliberate, repeatable, and transparent, with defined roles and responsibilities designed to find the appropriate location for aircraft and personnel basing.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

SUPPORT FOR AFGHANISTAN

4. Senator MCCAIN. General Fraser, our relations with Pakistan have hit new lows since the raid that killed Osama bin Laden in early May. Pakistan has insisted that some of our training and assistance forces be withdrawn, and has continued to create delays and uncertainty in authorizing visas for a wide variety of Americans to enter Pakistan. How concerned are you about our logistics routes that support our troops in Afghanistan that run through Pakistan?

General FRASER. All of our lines of communication are vital and we must continue with our best diplomatic efforts to maintain them and keep them open. It is mutually beneficial for the United States and Pakistan to promote a stable Afghanistan. Pakistan remains an important ally in that effort. Our logistical networks within Pakistan are just a portion of a vast network of supply lines serving Afghanistan.

5. Senator MCCAIN. General Fraser, what alternatives could we use, if needed?

General FRASER. TRANSCOM, in coordination with U.S. European Command and CENTCOM, has built a network of routes to support operations in Afghanistan.

Surface cargo supporting Afghanistan travels via the Pakistan road network or the NDN road and railway routes. TRANSCOM is working with our commercial and international partners to further expand NDN capability by seeking approval to transport wheel armored vehicles and their spare parts.

Cargo requiring airlift travels via Pakistan or the northern air corridors transiting Central Asia. TRANSCOM is continually developing and maturing multi-modal locations throughout the Middle East and in Europe to include the recent addition of a 100 percent commercial multi-modal hub in Dubai and the recently completed 172nd Brigade Combat Team deployment via commercial assets through Romania. TRANSCOM continues to seek multi-modal opportunities to reduce airlift costs while improving overall asset utilization and velocity.

These routes are designed to overlap and maintain the ability to surge if one node is restricted due to unforeseen events while keeping the warfighter supported within Afghanistan.

6. Senator MCCAIN. General Fraser, how confident are you that TRANSCOM will be able to fully support the movement of troops and equipment that will be needed to implement our strategy in Afghanistan?

General FRASER. As a land-locked country with remarkable topography, logistical support into and out of Afghanistan is extremely challenging. Over the last 10 years we have learned many lessons and have worked to build as many land, air, and sea routes to support the warfighter in Afghanistan as possible. TRANSCOM and CENTCOM both assess that we will continue to be able to sustain the current force level within Afghanistan. Together, we have worked hard to create a robust and efficient logistical network with multiple overlapping routes that fosters competition in the commercial industry to help keep costs in check while providing sufficient logistical capacity.

7. Senator MCCAIN. General Fraser, under the President's Afghanistan withdrawal strategy, do the caps or limits on the numbers of troops authorized in Afghanistan provide a challenge for TRANSCOM forces as they move equipment in, out, and around Afghanistan and continue to support our remaining combat forces there?

General FRASER. TRANSCOM has sufficient military and commercial logistical personnel on the ground to successfully sustain current operations within Afghanistan.

U.S. FUNDS TO THE TALIBAN

8. Senator MCCAIN. General Fraser, reportedly, a year-long military-led investigation recently concluded that U.S. taxpayers' money has been indirectly funneled to the Taliban under a \$2.2 billion ground transportation contract. Yet U.S. and Afghan efforts to address the problem have been slow and ineffective, and all eight of the trucking firms involved in the work apparently remain on the U.S. payroll. According to reports, DOD found that four of the eight transportation contracts in Afghanistan are funding the insurgents there and that six of the eight companies were associated with "fraudulent paperwork and behavior." Despite these findings by the Government Accountability Office and DOD, in March, the Pentagon extended the contract for another 6 months. In your view, how much of a problem is our unwittingly contracting with the enemy in Afghanistan—particularly with regard to transportation contracts?

General FRASER. Any funds being siphoned off to the enemy is a problem. The Host Nation Trucking contracts referred to in these reports fall under the responsibility of CENTCOM and do not correlate to the inter-modal transportation contracts managed by TRANSCOM. TRANSCOM assessed potential risk upon receipt of the Warlord Inc. report and found minimal risk to our contracts. We have provided this report to Universal Services Contract carriers for their reference when subcontracting transportation services in Afghanistan. We also forwarded a 25 July 2011 Washington Post article, titled: "U.S. Cash Said to be Reaching Taliban", to our commercial partners and the carriers confirmed they are not doing business with the companies cited in the article. As the TRANSCOM commander, I will ensure we work hard to assist CENTCOM in their efforts to address this issue.

9. Senator MCCAIN. General Fraser, how do you intend to address this issue?

General FRASER. TRANSCOM will continue to work with contractors to mitigate risk concerning this issue, when acquiring transportation services into Afghanistan. We shared the Warlord Inc. report with our contractors providing transportation services in Afghanistan, asking them to compare their operations to those of the Host Nation Trucking contract carriers and assess the risk. Based on the Warlord Inc. report and our carriers' feedback, it appears most of the risk of money going to the Taliban was associated with subcontracted security for convoys. Our carriers are using Afghanistan Ministry of the Interior vetted companies for their convoy security. Additionally, we will continue to work with CENTCOM and the various task forces established to identify and eliminate this type of corruption.

10. Senator MCCAIN. General Fraser, at General Petraeus' request, this committee adopted legislation in the National Defense Authorization Act (NDAA) for Fiscal Year 2012 that would give military commanders additional powers to inves-

tigate and cancel contracts in which insurgent ties have been found. It also imposes an affirmative obligation on contractors doing business with CENTCOM to conduct the due diligence necessary to determine if malign actors are benefitting from these contracts. Are you aware of these possible authorities?

General FRASER. Yes, I understand the new legislation adopted by the Senate Armed Services Committee for inclusion in the proposed NDAA for Fiscal Year 2012. As Commander, I will work to help ensure the TRANSCOM commercial partners are aware of these authorities and my acquisition staff will execute them appropriately.

11. Senator MCCAIN. General Fraser, do you think they may be helpful with respect to contracting for transportation in Afghanistan? Please explain your answer fully.

General FRASER. Yes. Further, the Commander, International Security Assistance Force published the Counterinsurgency Contracting Guidance in September 2010 which emphasized contracting within a contingency environment is a commander's business and leaders must be aware of contracting activities that are occurring within their areas of responsibility. If not properly monitored, contract and donor funds could be diverted from their intended purpose and fuel corruption, finance insurgent organizations, or strengthen criminal networks. Being able to terminate a contract when this occurs will stop the flow of funds immediately, and facilitate the ability to look into records of contractors and subcontractors at any tier. This will assist Task Force 2010 which was established to ensure the money spent by the coalition is delivering the intended purpose and that contract efforts are linked to implementing the counterinsurgency strategy effectively.

AIRLIFT CAPABILITY

12. Senator MCCAIN. General Fraser, a major reason why the Air Force has excess large cargo aircraft is because the Senate and House Appropriations Committees in recent years have earmarked 44 additional C-17s for the Boeing Company that were not requested by DOD nor authorized by the Senate and House Armed Services Committees. Does the programmed fleet of 300 large cargo aircraft provide enough capacity to meet wartime and peacetime requirements?

General FRASER. Yes. The most demanding scenario in the Mobility Capabilities and Requirements Study 2016 (MCRS-16) generates a strategic airlift fleet requirement of 32.7 million ton miles per day (MTM/D). A fleet of 222 C-17s, 52 C-5Ms, and 27 C-5As meets the 32.7 MTM/D requirements.

13. Senator MCCAIN. General Fraser, in your view, what is the budgetary impact to the Air Force if restricted from executing programmed C-5A retirements?

General FRASER. The fiscal year 2012 President's budget recommends retiring 10 C-5As. Without relief from the NDAA for Fiscal Year 2010's 316 airlift floor restriction, these 10 C-5As, as well as the remaining 5 from the fiscal year 2011 President's budget (15 C-5As in total) would be restricted from retirement. To continue to operate and maintain these aircraft drives a \$1.23 billion Future Years Defense Program bill. Of this \$1.23 billion, \$844 million is operations and maintenance funding for flying hours and depot level maintenance. This funding is not included in the fiscal year 2012 President's budget and would have to be sourced from other Air Force programs.

14. Senator MCCAIN. General Fraser, in your view, where will the funding come from to pay for maintaining and flying the extra aircraft if the Air Force is not allowed to retire them?

General FRASER. Assuming a fixed or declining defense budget for the foreseeable future, funding to pay for maintaining and flying the extra C-5A aircraft would have to be sourced from other Air Force programs.

15. Senator MCCAIN. General Fraser, the President has announced we will begin to withdraw from Afghanistan. Is there adequate airlift to support this endeavor and the continued withdrawal from Iraq?

General FRASER. Yes. There is adequate airlift capacity to support the withdrawal from Afghanistan. The MCRS-16 determined the strategic airlift requirement to be 32.7 MTM/D. That determination is based upon a requirement to support two overlapping large-scale land campaigns occurring in different theaters, and still handle the steady-state requirements of Operation Enduring Freedom in Afghanistan. As an illustration, while supporting both the troop withdrawal from Iraq and the surge

into Afghanistan, TRANSCOM's busiest day in Air Mobility Command was March 23, where they performed 16.6 MTM/D of lift. The difficulty in planning the withdrawal from Afghanistan and Iraq is determining the rate of withdrawal, which will be directed by our national leadership.

16. Senator MCCAIN. General Fraser, what limitations are there and how do you intend to overcome them, if confirmed?

General FRASER. First and foremost, TRANSCOM will always deliver, and we have the capability to do that today. We must continue to support the warfighter, in all locations and climates, without fail. While doing so, we must remain good stewards of the taxpayers' money, and continue our efforts to locate faster, less-expensive ways to deliver the forces and support, and bring our troops home. I intend to overcome any limitations by relying upon the hard work and innovation of the men and women of TRANSCOM, our component commands and commercial partners, and by encouraging efforts to find new and efficient ways of doing business. This will also require support from Congress to complete the right-sizing of the airlift fleet to facilitate efficiencies. As Commander, I look forward to working with Congress on this issue.

HEALTH CARE COSTS

17. Senator MCCAIN. General Fraser, in a modest attempt to control DOD's health care costs, former Secretary Gates sought to apply a medical inflation factor to TRICARE Prime enrollment fees for working-age retirees beginning in fiscal year 2013. Unfortunately, our committee balked at that idea, and reported a bill that would permanently tie DOD's hands to annual increases to the annual increase in retired pay, which has been minimal.

TRICARE fees haven't changed since they were established in 1995. At that time, according to DOD, working age retirees paid about 27 percent of their total costs when using civilian care. Today, out-of-pocket expenses for working age retirees represent less than 9 percent of the total cost of the family's health care costs. Some argue that health care benefits to retirees have been eroded over time. Do you agree?

General FRASER. I believe military retiree health benefits are well deserved and are important to all retirees. The Assistant Secretary of Defense Health Affairs and TRICARE Management Activity (TMA) should address any possible erosion of DOD health care benefit.

18. Senator MCCAIN. General Fraser, do you support the administration's modest goal of linking future increases in fees for working age retirees to a factor that relates to rising national medical costs?

General FRASER. This question relates to DOD Health Care Benefits and belongs in the purview of Assistant Secretary of Defense Health Affairs and/or TMA.

19. Senator MCCAIN. General Fraser, do you see the rise in health care costs as a threat to readiness and if so, what would you do or recommend, if confirmed, to address this very serious issue for DOD?

General FRASER. This question relates to DOD Health Care Benefits and belongs in the purview of Assistant Secretary of Defense Health Affairs and/or TMA.

DEFENSE PERSONAL PROPERTY SYSTEM

20. Senator MCCAIN. General Fraser, in your advance policy question regarding Defense Personal Property System (DPS), you indicated that DOD currently is paying approximately 52 percent of all claims from servicemembers for lost or damaged household goods in connection with permanent change of station (PCS) moves. This is a surprisingly high number given the assurances from Surface Deployment and Distribution Command (SDDC) and TRANSCOM when the DPS was proposed and justified to Congress that the movers and shippers, who cause the damage, would be required by the terms of their contracts to reimburse the servicemember directly at full replacement value. Please explain why DOD is currently paying such a high percentage of household goods claims for lost or damaged property.

General FRASER. Although 52 percent of claims are paid through the Military Claims Office (MCO), this figure is a fraction of all DOD shipments in fiscal year 2010, whether moved in the DPS or the legacy system, the Transportation Operational Personal Property Standard System (TOPS). During fiscal year 2010, ap-

proximately 55 percent of shipments were transferred through TOPS, which partially accounts for the high percentage of shipments settled by the DOD.

21. Senator MCCAIN. General Fraser, what is the dollar figure of the amount, per year, that DOD is paying out in claims in connection with PCS moves, and what percentage of that amount is DOD actually collecting after-the-fact from movers?

General FRASER. The DOD amount paid and recovery amounts are not a one-on-one, per claim, correlation. DOD could pay an amount on a claim during 1 fiscal year, and the recovery could very well be in the next fiscal year. Due to reasons such as, but not limited to, appeal processes (negotiating, rebutting, going back and forth with the Transportation Service Provider (TSP)), previous lack of offset capability, and MCO consolidations, providing a consolidated monetary comparison which ties a fiscal year payout to the same fiscal year for recovery is not a possible task.

The claims payments and recoveries vary slightly between Services, but the individual recovery rate(s) are approximately 95 to 97 percent. As of 31 July 11, DOD MCOs collectively paid out approximately \$3.9 million and collected approximately \$3.3 million. However, it must be reiterated that the collections reflected above do not correlate to the claims paid during this fiscal year for the reasons previously stated.

22. Senator MCCAIN. General Fraser, are meritorious claims being paid by DOD to servicemembers being paid at depreciated value or full replacement value of the items lost or damaged?

General FRASER. A meritorious claim is one that meets all the statutory and regulatory criteria for payment and they are the only kind the Services pay. Initial payment to the servicemember is depreciated value; however, when the MCO is successful at recouping from the TSP full replacement value and additional monies are recovered, those additional monies are provided back to the customer.

23. Senator MCCAIN. General Fraser, PCS moves involving international travel present unique challenges because of the numbers of movers and shippers involved and the time and distance involved in the shipments. Last year, DOD requested and received statutory authority for DOD to pay full replacement value claims of this kind. What is your assessment of DOD and SDDC's practical and legal ability to require reimbursement of claims at full replacement value from movers and shippers for international moves?

General FRASER. The SDDC's assessment is that claims are being processed and settled internationally at the full replacement value as detailed in the policy guidance.

24. Senator MCCAIN. General Fraser, is there a solution for this aspect of the DPS claims system, or is this a cost DOD and the Services must plan on absorbing?

General FRASER. There is no additional cost to DOD for claims associated with DPS.

QUESTIONS SUBMITTED BY SENATOR SAXBY CHAMBLISS

CONTRACTING AIRLIFT FROM RUSSIA AND UKRAINE

25. Senator CHAMBLISS. General Fraser, the Air Force is proposing to retire additional C-5As for a total of 32 aircraft because they believe these aircraft are excess to the Air Force's needs. It has been estimated that between 2005 and 2009, DOD spent \$1.7 billion contracting airlift from the Russians and Ukrainians. This is a good deal more than the amount of resources the Air Force hopes to save by retiring additional C-5s. Do you think it makes sense and is a good expenditure of U.S. taxpayers' resources to retire U.S. aircraft when we are already relying on foreign aircraft to meet our needs and are spending billions of dollars contracting with the Russians and Ukrainians for these aircraft?

General FRASER. Contracting for oversize/outsize commercial airlift using our Civil Reserve Airlift Fleet (CRAF) carriers and their commercial partners is a prudent use of taxpayers' dollars. When not operating at full war-time capability and utilization rates, as in current operations today, it is 25 percent less costly to move Mine Resistant Ambush Protected (MRAP) vehicles by AN-124s than by C-5s. Furthermore, by contracting for foreign strategic airlift today, we extend the useful life of our strategic airlift fleet into the future, increasing our system capacity, operational flexibility, and strengthening relationships with our commercial partners.

26. Senator CHAMBLISS. General Fraser, are Russian and Ukrainian aircraft available worldwide or just in limited locations?

General FRASER. Foreign airlift is available worldwide to support TRANSCOM requirements when U.S. flag capabilities are not suitable due to cargo constraints or destination restrictions.

27. Senator CHAMBLISS. General Fraser, how, or does, the United States account for the fact that, based on the specific requirement the Russians and Ukrainians are asked to support, they might decline to do so, similar to how some countries where we have troops or assets stationed have denied over-flight rights or denied those troops or assets being used for certain purposes?

General FRASER. There is a distinction between resources we use for our planned war-time capability and those we use in current operations. Our planned war-time capability does not rely upon any foreign source of airlift. By contracting for foreign strategic airlift today, we extend the useful life of our organic inventory into the future. Additionally, TRANSCOM use of foreign airlift via subcontracts with our CRAF partners increases system capacity and flexibility, is a prudent use of taxpayers' dollars as these capabilities are often less costly to utilize than organic assets, and serves to strengthen our important relationship with our commercial partners.

MOBILITY CAPABILITIES AND REQUIREMENTS STUDY RELIABILITY

28. Senator CHAMBLISS. General Fraser, in 2008, DOD conducted a Strategic Airlift Review and concluded that the then current program of record was the most cost effective and there was no need for additional C-17s. The Joint Requirements Oversight Council also established a requirement for 33.95 million-ton-miles (MTM) organic capability and stated that any reduction in strategic airlift capability would increase risk to unacceptable levels and jeopardize DOD's ability to adequately support the combatant commands.

In 2008, OSD also certified the need for 316 strategic airlifters. In 2009, a congressionally-directed airlift review conducted by the Institute for Defense Analyses concluded that the current program of record (316 aircraft) met all requirements and that retiring C-5As to buy/operate additional C-17s was not cost effective. Air Force leadership also testified to Congress that 316 strategic airlift aircraft was "the sweet spot".

In 2009, the MCRS established a new 32.7 MTM worst-case requirement which was lower than previous studies in recent years. The Air Force's desire to retire 30+ C-5As which could drive the strategic airlift fleet below 300 aircraft is based on this most recent study.

Over the last 3 to 4 years, DOD and the Air Force have changed their position several times on what the strategic airlift requirement is. How do you compare the results of these studies and which study is most correct?

General FRASER. All previous DOD-level studies you reference were correct. History has shown a need to update such studies every quadrennial review cycle and we respond to those validated and reviewed changes each time we submit a new Program Objective Memorandum (POM). The MCRS-16 is the most current and now serves as the foundation for a requirements demand signal extending to fiscal year 2016.

Based on MCRS-16, we know that the peak demand signal for 32.7 MTM/D of strategic organic airlift capacity can be met with approximately 300 aircraft. Our program of record for 222 C-17s, 52 RERPed C-5Ms, and 27 C-5As assures we can address the most demanding validated needs of the Nation with this force structure.

29. Senator CHAMBLISS. General Fraser, how do we know that you have it right this time and that we are not incurring unacceptable or unnecessary risk?

General FRASER. The MCRS-16 is the most current assessment of the need for mobility assets based on 2 years of studying three demanding cases involving the integration of scenarios to simultaneously protect the Homeland, posture our Nation to respond to events around the globe, and be prepared to address significant overlapping combatant campaigns in response to threats to our national interests. These DOD validated scenario sets are continuously being reviewed and updated to assure we can respond to world events and address conflicts with acceptable levels of risk. Each year we submit our programming actions based upon the most current family of scenario sets and demands approved by the Department.

[The nomination reference of Gen. William M. Fraser III, USAF, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
June 16, 2011.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment in the U.S. Air Force to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be General

Gen. William M. Fraser III, 0000.

[The biographical sketch of Gen. William M. Fraser III, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF GEN. WILLIAM M. FRASER III, USAF

Gen. William M. Fraser III is Commander, Air Combat Command, with headquarters at Langley Air Force Base, VA, and Air Component Commander (ACC) for U.S. Joint Forces Command. As the commander, he is responsible for organizing, training, equipping, and maintaining combat-ready forces for rapid deployment and employment while ensuring strategic air defense forces are ready to meet the challenges of peacetime air sovereignty and wartime defense. ACC operates more than 1,000 aircraft, 22 wings, 13 bases, and more than 300 operating locations worldwide with 79,000 Active-Duty and civilian personnel. When mobilized, the Air National Guard and Air Force Reserve contribute more than 700 aircraft and 49,000 people to ACC. As the Combat Air Forces lead agent, ACC develops strategy, doctrine, concepts, tactics, and procedures for air and space power employment. The command provides conventional and information warfare forces to all unified commands to ensure air, space, and information superiority for warfighters and national decision-makers. ACC can also be called upon to assist national agencies with intelligence, surveillance, and crisis response capabilities.

General Fraser entered the Air Force in 1974 as a distinguished graduate of the Texas A&M University Reserve Officers' Training Corps program. His operational assignments include duty as a T-37, B-52, B-1, and B-2 instructor pilot and evaluator. General Fraser has commanded an operations group and two bomb wings. His staff duties include tours on the Air Staff, Joint Staff, and Joint Strategic Target Planning Staff at Offutt Air Force Base, NE. He has also served as Chief of the Nuclear Requirements Cell at Supreme Headquarters Allied Powers Europe, Chief of Staff for U.S. Strategic Command, and as the Assistant to the Chairman of the Joint Chiefs of Staff.

General Fraser has extensive war time, contingency, and humanitarian relief operational experience. During Operation Enduring Freedom he led an intelligence fusion organization that provided direct support to the warfighter. Prior to assuming his current position, General Fraser served as the Air Force Vice Chief of Staff.

Education:

1974	Bachelor of Science degree in engineering technology, Texas A&M University
1977	Squadron Officer School, Maxwell AFB, AL
1980	Master of Science degree in management information systems, University of Northern Colorado, Greeley
1983	Marine Corps Command and Staff College, Quantico, VA
1985	Armed Forces Staff College, Norfolk, VA
1987	National Security Management Course, Syracuse University, NY
1991	Air War College, Maxwell AFB, AL
1995	Executive Development Program, Johnson Graduate School of Management, Cornell University, Ithaca, NY
1999	Combined Force Air Component Commander Course, Maxwell AFB, AL

1999 Senior Information Warfare Applications Course, Maxwell AFB, AL
 2000 National Security Leadership Course, National Security Studies, Maxwell School of Citizenship and Public Affairs, Syracuse University, NY
 2002 Executive Program for Russian and U.S. General Officers, John F. Kennedy School of Government, Harvard University, Cambridge, MA
 2002 Joint Flag Officer Warfighting Course, Maxwell AFB, AL
 2002 Senior Intelligence Fellows Program, Wye River, MD
 2003 Program for Senior Executives in National and International Security, John F. Kennedy School of Government, Harvard University, Cambridge, MA
 2005 Leadership at the Peak, Center for Creative Leadership, Colorado Springs, CO

Major duty assignments:

From	To	Assignment
November 1974	October 1975	Student, undergraduate pilot training, Williams AFB, AZ
October 1975	March 1976	Student, instructor pilot training, Randolph AFB, TX
March 1976	February 1978 ...	T-37 instructor pilot and T-37 check pilot, 96th Flying Training Squadron, Williams AFB, AZ
March 1978	March 1980	T-37 instructor pilot and flight examiner, 82nd Flying Training Wing, Williams AFB, AZ
March 1980	October 1980	Operational Support Aircraft Program Element Monitor, Air Staff Training Program, Headquarters U.S. Air Force, Washington, DC
October 1980	April 1981	Worldwide Military Command, Control and Communications Program Element Monitor, Air Staff Training Program, Headquarters U.S. Air Force, Washington, DC
May 1981	October 1981	B-52H student, 4017th Combat Crew Training Squadron, Castle AFB, CA
October 1981	March 1983	B-52H aircraft commander, later B-52G aircraft commander and instructor pilot, 46th Bomb Squadron, Grand Forks AFB, ND
March 1983	December 1984	Chief, B-52G Standardization and Evaluation Branch, 319th Bomb Wing, Grand Forks AFB, ND
January 1985	June 1985	Student, Armed Forces Staff College, Norfolk, VA
June 1985	March 1986	Chief, European Single Integrated Operational Plan Tactics, Joint Strategic Target Planning Staff, Offutt AFB, NE
April 1986	October 1987	Executive officer to the Strategic Air Command Chief of Staff, Headquarters SAC, Offutt AFB, NE
October 1987	July 1990	Chief, Nuclear Requirements Cell, SHAPE, Mons, Belgium
July 1990	July 1991	Student, Air War College, Maxwell AFB, AL
July 1991	July 1993	Deputy Commander, 384th Operations Group, McConnell AFB, KS
July 1993	January 1995	Commander, 509th Operations Group, Whiteman AFB, MO
January 1995	August 1995	Vice Commander, 509th Bomb Wing, Whiteman AFB, MO
August 1995	January 1997	Special Assistant to the Supreme Allied Commander Europe, SHAPE, Mons, Belgium
February 1997 ..	May 1998	Commander, 28th Bomb Wing, Ellsworth AFB, SD
May 1998	May 1999	Chief of Staff, U.S. Strategic Command, Offutt AFB, NE
May 1999	December 2000	Commander, 2nd Bomb Wing, Barksdale AFB, LA
December 2000	December 2002	Deputy Director for National Systems Operations, the Joint Staff; Director, Defense Space Reconnaissance Program; and Deputy Director for Military Support, National Reconnaissance Office, Washington, DC
January 2003	October 2004	Director of Operations, Headquarters AETC, Randolph AFB, TX
November 2004	February 2005 ...	Special Assistant to the Commander, Air Force Command and Control, Intelligence, Surveillance and Reconnaissance Center, Deputy Chief of Staff for Warfighting Integration, Langley AFB, VA
February 2005 ..	May 2006	Vice Commander, Air Combat Command, Langley AFB, VA
May 2006	October 2008	Assistant to the Chairman of the Joint Chiefs of Staff, Washington, DC
October 2008	September 2009	Vice Chief of Staff, Headquarters U.S. Air Force, Washington, DC
September 2009	Present	Commander, Air Combat Command, Langley AFB, VA, and Air Component Commander for U.S. Joint Forces Command

Summary of joint assignments:

From	To	Assignment
June 1985	March 1986	Chief, European Single Integrated Operational Plan Tactics, Joint Strategic Target Planning Staff, Offutt AFB, NE, as a major
October 1987	July 1990	Chief, Nuclear Requirements Cell, SHAPE, Mons, Belgium, as a lieutenant colonel
August 1995	January 1997	Special Assistant to the Supreme Allied Commander Europe, SHAPE, Mons, Belgium, as a colonel
May 1998	May 1999	Chief of Staff, U.S. Strategic Command, Offutt AFB, NE, as a colonel

From	To	Assignment
December 2000	December 2002	Deputy Director for National Systems Operations, the Joint Staff; Director, Defense Space Reconnaissance Program; and Deputy Director for Military Support, National Reconnaissance Office, Washington, DC, as a brigadier general
May 2006	October 2008	Assistant to the Chairman of the Joint Chiefs of Staff, Washington, DC, as a lieutenant general

Flight information:

Rating: Command pilot

Flight hours: More than 4,200

Aircraft flown: T-37, T-38, T-1, KC-135R, B-1B, B-2, B-52G/H, and C-21

Major awards and decorations:

Defense Distinguished Service Medal

Distinguished Service Medal with oak leaf cluster

Defense Superior Service Medal with two oak leaf clusters

Legion of Merit with two oak leaf clusters

Defense Meritorious Service Medal with oak leaf cluster

Meritorious Service Medal with oak leaf cluster

Air Force Commendation Medal with oak leaf cluster

Air Force Achievement Medal

Secretary's Distinguished Service Award, Department of State

National Intelligence Medal of Achievement

Combat Readiness Medal

National Defense Service Medal with bronze star

Armed Forces Expeditionary Medal

Global War on Terrorism Service Medal

Armed Forces Service Medal

Military Outstanding Volunteer Service Medal

Other achievements:

Officer training award, undergraduate pilot training

Top graduate, T-37 pilot instructor training

T-37 Instructor Pilot of the Year

Distinguished graduate, B-52 G/H combat crew training

Air Force Public Affairs Directors Special Achievement Award for commander support

Joseph A. Moller Award, Outstanding Wing Commander, ACC

Gold Medal, National Reconnaissance Office

Effective dates of promotion:

Second Lieutenant November 8, 1974

First Lieutenant November 8, 1976

Captain November 8, 1978

Major October 1, 1983

Lieutenant Colonel June 1, 1988

Colonel January 1, 1992

Brigadier General January 1, 2000

Major General October 1, 2003

Lieutenant General February 3, 2005

General October 8, 2008

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Gen. William M. Fraser III, USAF, in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
William M. Fraser III.
2. **Position to which nominated:**
Commander, U.S. Transportation Command.
3. **Date of nomination:**
June 16, 2011.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
17 August 1952; Lakeland, FL.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Beverly Anne Fraser (Maiden Name: Copeland).
7. **Names and ages of children:**
William M. Fraser IV; age 34.
Ashlee Fraser Cain (Maiden name: Ashlee Jeanette Fraser); age 32.
8. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.
None.
9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational, or other institution.
None.
10. **Memberships:** List all memberships and offices held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.
Air Force Association (member)
Order of Daedalians (member)
Texas A&M University Association of Former Students (member)
15th Air Force Association (member)
Army and Air Force Mutual Aid Association (member)
Military Officers Association of America (member)
American Association of Retired Persons (member)
11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.
None.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?

Yes.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–E are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

WILLIAM M. FRASER III.

This 15th day of February 2011.

[The nomination of Gen. William M. Fraser III, USAF, was reported to the Senate by Chairman Levin on August 2, 2011, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on August 2, 2011.]

ANNEX A

[General Martin E. Dempsey’s responses to his advance policy questions from his nomination hearing dated March 3, 2011, to be Chief of Staff of the U.S. Army follow:]

QUESTIONS AND RESPONSES

ARMY ROLE IN THE JOINT FORCE

Question. The U.S. military fights as a joint force and strives to achieve realistic training in preparation for military operations. The Army provides trained and equipped forces for joint military operations.

How do you believe the Army can best contribute to improved joint military capabilities while preserving its service unique capabilities and culture?

Answer. The Army works our relationships with Sister Services diligently while maintaining our unique values, culture, and traditions. The Army provides forces for prompt and sustained combat operations on land as a component of the Joint Force. Through sustained operations on land and among populations, we make permanent the advantages gained by joint forces.

ACQUISITION ISSUES

Question. Major defense acquisition programs in the Department of the Army and the other military departments continue to be subject to funding and requirements instability.

Do you believe that instability in funding and requirements drives up program costs and leads to delays in the fielding of major weapon systems?

Answer. A variety of factors contribute to increased risks of cost increase and delay, depending on the program, the technologies involved, and the acquisition strategy employed. However, I agree that the foundation for any successful large acquisition program rests on carefully refined requirements, a sound program strategy, and funding stability.

Question. What steps, if any, do you believe the Army should take to address funding and requirements instability?

Answer. Requirements must be carefully refined to meet realistic and affordable objectives, and they must account for the rate of technological and scientific change in meeting needed capabilities.

Question. What is your view of the Configuration Steering Boards required by statute and regulation to control requirements growth?

Answer. I support efforts by Congress to control costs, refine requirements, and reduce program risk in our major acquisition programs. The Configuration Steering Boards play a significant role in oversight of acquisition programs and compliment Army efforts to validate requirements and eliminate redundancies through Capability Portfolio Reviews. In tandem, these oversight processes help the Army avoid cost increases and delays in our programs.

Question. What role would you expect to play in these issues, if confirmed as Army Chief of Staff?

Answer. If confirmed as Chief of Staff, I will work diligently with the Secretary of the Army and the Assistant Secretary of the Army for Acquisition, Logistics, and Technology to ensure that all oversight mechanisms for acquisition programs are used effectively to reduce cost and schedule risk. In the area of requirements, I will work with TRADOC to refine requirements to meet affordable and achievable acquisition strategies.

Question. The Comptroller General has found that DOD programs often move forward with unrealistic program cost and schedule estimates, lack clearly defined and stable requirements, include immature technologies that unnecessarily raise program costs and delay development and production, and fail to solidify design and manufacturing processes at appropriate junctures in the development process.

Do you agree with the Comptroller General's assessment?

Answer. I agree that this assessment is valid with respect to some of the Army's past programs. However, the Army has already adopted different approaches in the development of more recent programs. I understand that prior to the release of the Ground Combat Vehicle (GCV) Request for Proposals (RFP) in November 2010, the program's requirements were carefully reviewed, prioritized and weighted in the RFP to avoid reliance on immature technologies, mitigate cost and schedule risk, and provide an achievable and affordable framework for a new vehicle. The GCV program involved close coordination between acquisition, requirements and resourcing experts to provide a solid program foundation. The Army is vigorously working to avoid the characterizations in the Comptroller General's assessment in future programs.

Question. If so, what steps do you believe the Department of the Army should take to address these problems?

Answer. The Department of the Army has already begun taking significant steps to address these concerns. There is a renewed emphasis on collaboration between the requirements and acquisition communities in the development of new programs. Last year, Secretary McHugh commissioned a thorough review of the Army's acquisition process led by The Hon. Gil Decker and Gen (Ret.) Lou Wagner that provides a blueprint for improvements to the acquisition process. I understand the Army is now studying these recommendations and developing a plan to implement those that help our process. As a whole, the Department must continue to build on these efforts to avoid unnecessary cost and delay in our programs.

Question. What role would you expect to play in these issues, if confirmed as Army Chief of Staff?

Answer. If confirmed as Chief of Staff, I will continue to work with Department of the Army leadership to implement any necessary changes to ensure that the Army's acquisition programs succeed in providing needed capabilities to our soldiers.

Question. Beginning in 2010, the Army began a series of capabilities portfolio reviews that have contributed to the rationalization of the Army's modernization plans and resulted in significant programmatic decisions, including the termination of major weapons programs.

What is your understanding and assessment of the Army's capabilities portfolio reviews and process?

Answer. The capabilities portfolio reviews have been successful in identifying redundancy and finding efficiencies across system portfolios. The Army is now studying how to best institutionalize the capabilities portfolio reviews process to identify additional efficiencies, and then work to achieve them.

Question. If confirmed, what actions would you take, if any, to institutionalize the portfolio review process within the Army?

Answer. If confirmed, I look forward to reviewing the studies to institutionalize portfolio review process to identify and achieve further Army efficiencies.

ARMY MODERNIZATION

Question. In general, major Army modernization efforts have not been successful over the past decade. Since the mid-1990s, Army modernization strategies, plans,

and investment priorities have evolved under a variety of names from Digitization, to Force XXI, to Army After Next, to Interim Force, to Objective Force, to Future Combat System and Modularity. According to press reports, a recent modernization study done for the Secretary of the Army by former Assistant Secretary of the Army Gilbert Decker and retired Army General Louis Wagner found that the Army has spent \$3.3 billion to \$3.8 billion annually since 2004 on weapons programs that have been cancelled.

What is your assessment, if any, of the Army's modernization record?

Answer. Over the last 10 years, our Army has achieved a remarkable degree of modernization in areas such as improving soldier protection, increasing battlefield intelligence, and bringing the network to individual soldiers. At the same time, we have nearly completed the modular conversion of over 300 brigade level organizations and to complete the conversion of our division and higher level headquarters to enable mission command in the operational environments we anticipate in the first half of the 21st century. If confirmed, I look forward to studying the Decker-Wagner recommendations to identify areas where we can improve.

Question. If confirmed, what actions, if any, would you propose to take to achieve a genuinely stable modernization strategy and program for the Army?

Answer. I recognize that a stable modernization strategy and program is an important component to both a balanced Army and to exercise good stewardship of resources entrusted to the Services. If confirmed, I will work closely with Secretary McHugh on how to achieve this.

Question. What is your understanding and assessment of the Army's current modernization investment strategy?

Answer. While it is true that several of our major modernization efforts over the past decade have been unsuccessful, I would submit that the American soldier today is the best equipped and enabled soldier this country has ever fielded. Successes such as the Stryker vehicle, world class body armor, soldier night vision equipment, soldier weapons, precision fire systems such as Excalibur and High Mobility Artillery Rocket System, and vehicles such as the family of medium trucks all suggest to me that the Army has had some tremendous success in modernization.

I believe the Army has learned some valuable lessons and now has both the processes and the mindset to more carefully and rigorously review programs both before we initiate them and while they are in progress. This will be an area I will assess more deeply if I am confirmed as Chief of Staff and will periodically give this committee my frank assessments.

Question. Do you believe that this strategy is affordable and sustainable?

Answer. If confirmed, I plan to closely examine this strategy to ensure it is affordable and sustainable.

Question. In your view does the Army's current modernization investment strategy appropriately or adequately address current and future capabilities that meet requirements for unconventional or irregular conflict?

Answer. From my current position, I believe the current modernization investment strategy strikes an appropriate balance between current and future capabilities. If confirmed, I look forward to studying this further with the Army staff.

Question. Does the investment strategy appropriately or adequately address requirements for conventional, high-end conflict with a peer or near-peer enemy?

Answer. From my current position, I believe the current modernization investment strategy appropriately and adequately addresses requirements for conventional, high-end conflict with the peer or near-peer enemy we can reasonably foresee in the fiscal year 2012–2016 FYDP time horizon.

Question. If confirmed, what other investment initiatives, if any, would you pursue with respect to unconventional or conventional capabilities?

Answer. I have not yet formulated investment initiatives particular to either conventional or unconventional capabilities that are different from those the Army is currently pursuing, but I look forward to doing so, if confirmed.

Question. If confirmed, what actions, if any, would you propose to ensure that all these initiatives are affordable within the current and projected Army budgets?

Answer. To be good stewards of the resources provided, the Army must continue to internalize a "cost culture" that considers "affordability" as an essential element of all (not just modernization) initiatives. If confirmed, I intend to work closely with the Secretary to ensure future initiatives are affordable within current and projected budgets.

Question. In your view, what trade-offs, if any, would most likely have to be taken should budgets fall below or costs grow above what is planned to fund the Army's modernization efforts?

Answer. While I do not have that information at this time, I believe trade-offs must occur after all areas of risk are carefully considered and coordinated with the Secretary of Defense and Congress.

ARMY WEAPON SYSTEM PROGRAMS

Question. What is your understanding and assessment of the following research, development, and acquisition programs?

Ground Combat Vehicle (GCV).

Answer. In the development of the Ground Combat vehicle—the replacement for the Bradley Infantry Fighting vehicle—the Army is fully committed to the “Big Four” imperatives: soldier protection; soldier capacity (squad plus crew); the capability to operate across the Full Spectrum of operations; and Timing (7 years to the first production vehicle from contract award). The Ground Combat Vehicle will be the first vehicle that will be designed from the ground up to operate in an Improvised Explosive Device (IED) environment. Modular armor will allow commanders the option to add or remove armor based on the current threat environment. The Ground Combat Vehicle will be designed with the capacity for Space, Weight, and Power growth to incorporate future technologies as they mature. The Army is using an incremental strategy for the Ground Combat Vehicle with the first increment being an Infantry Fighting Vehicle. The Army is currently reviewing proposals from vendors for Technology Development contracts.

Question. Warfighter Information Network-Tactical (WIN-T).

Answer. I believe that the Warfighter Information Network-Tactical is one of the Army’s most important programs. It provides the broadband backbone communications for the tactical Army. Warfighter Information Network-Tactical Increment 1 (formerly Joint Network Node) began fielding in 2004 to provide a satellite based Internet Protocol network down to battalion level. Warfighter Information Network-Tactical Increment 2 begins fielding in fiscal year 2012 to provide an initial On the Move capability, extending down to company level. Warfighter Information Network-Tactical Increment 3 will provide improved capabilities, including higher throughput, three to four times more bandwidth efficiency, and an aerial transmission layer, to all 126 brigades/division headquarters with an on-the-move requirement.

Question. Early-Infantry Brigade Combat Team (E-IBCT) Network Integration Kit (NIK).

Answer. The E-IBCT investment provides the infrastructure that will allow the Army to grow the tactical network capability, and an opportunity for both large and small companies to support the Army’s tactical network strategy.

The NIK is a necessary bridge solution that allows the Army to continue evaluation and development of incorporated network technologies.

Question. Joint Tactical Radio System (JTRS) including the Ground Mobile Radio (GMR) and Handheld, Manpack, and Small Form Fit (HMS) radios.

Answer. Joint Tactical Radio System is the Services’ future deployable, mobile communications family of radios. They provide Army forces dynamic, scalable, on-the-move network architecture, connecting the soldier to the network. Fiscal year 2012 procurement funding supports fielding of Joint Tactical Radio System capability to eight Infantry Brigade Combat Teams to meet fiscal years 2013/2014 network requirements.

The Ground Mobile Radio is the primary vehicular radio capability using the Wideband Networking Waveform and Soldier Radio Waveform to meet tactical networking requirements.

The Man Pack and Rifleman Radio are the primary Joint Tactical Radio System capability for battalion and below tactical operations. The man pack supports the Soldier Radio Waveform and interoperates with legacy waveforms (Single Channel Ground and Airborne Radio Systems, Ultra High Frequency Satellite Communications). Rifleman Radio primarily serves the dismounted formation and utilizes the Soldier Radio Waveform to provide voice and individual location information from the dismounted soldier to the leader. The combination of the three radios helps the Army to push the network to the individual soldier.

Question. Stryker combat vehicle, including the Double-V Hull initiative, procurement of more flat-bottom vehicles, and the Stryker mobile gun variant.

Answer. The current Stryker vehicle has exceeded its Space, Weight and Power and Cooling (SWaP-C) limits due to add-on appliqué (armor and devices) required for ongoing combat operations. In the near term, it is imperative to increase crew protection with the Double-V-Hull (DVH) Stryker. In the mid-term, Stryker modernization will improve protection and mobility by recouping SWaP-C, enabling future growth and allowing integration of the emerging network for all Stryker

variants. Fleet-wide modernization for all variants upgrades protection, counter-IED, drive train, suspension, electrical power generation and management, and digital communications and network integration.

Double-V Hull: Stryker Double-V Hull (DVH) is on track for June 2011 fielding. The initial DVH test results are positive, indicating the vehicle will be ready for fielding as scheduled.

Non-Double V Hull and Nuclear, Biological, and Chemical Reconnaissance Vehicle (NBCRV): The Army will procure 168 Stryker NBCRVs in fiscal years 2012 and 2013 for a total quantity of 284 (an Army Force Generation (ARFORGEN) model rotation quantity). These vehicles are in normal Hull configuration. The Stryker NBCRV provides a unique capability to the Joint Force including a critical mission of Homeland Defense, for which DVH protection is a lesser consideration.

Stryker Mobile Gun System (MGS): The Army has procured and fielded 142 of 335 MGS. In August 2009, the Army decided to not pursue additional MGS procurement at this time with forthcoming fleet-wide modernization.

Question. Joint Light Tactical Vehicle (JLTV).

Answer. The JLTV is a joint program with the U.S. Marine Corps, Navy, and the Army; the Australian Army is also currently a partner in the Technology Development phase. I believe that the JLTV is a vital program to fill the force protection and payload gaps not currently satisfied by the High Mobility Multipurpose Wheeled Vehicle. It will also fill the mobility, transportability and communication architecture gaps not satisfied by the Mine Resistant Ambush Protected (MRAP) vehicles being used in Light Tactical Vehicle (LTV) roles. The Army Tactical Wheeled Vehicle Strategy plans for the JLTV to replace about a third of the LTV fleet, which is roughly 46,000 vehicles. The Army is currently examining the attributes of the JLTV program to ensure it meets our needs for the future Army light tactical fleet, especially in terms of protection.

Question. Armed Aerial Scout (AAS).

Answer. I agree the Army has an enduring requirement for an armed aerial scout as was reaffirmed after the termination of the Armed Reconnaissance Helicopter (ARH) program.

This requirement will be validated by the ongoing Armed Aerial Scout Analysis of Alternatives whose findings are scheduled for release in third quarter fiscal year 2011.

Question. M1 Abrams tank modernization.

Answer. In my view, the Abrams modernization is necessary and will initially enable integration of the emerging network and provide ability to fire the next generation of 120mm ammunition. Future modernization will provide capability improvements in lethality, protection, mission command, mobility, and reliability intended to maintain the Fleet's combat overmatch and restore space, weight, and power margins to keep the Tank relevant through 2050. The Abrams modernization program is funded in the fiscal year 2012 budget request. If confirmed, I will be able to offer an assessment as the program matures.

Question. M2 Bradley infantry fighting vehicle modernization.

Answer. The Bradley Infantry Fighting Vehicle (IFV) will be replaced by the Ground Combat Vehicle beginning in 2018. Bradley Non-Infantry Fighting Vehicle (Cavalry, Engineer and Fire Support variants) modernization will address recoupment of Space, Weight and Power to provide platform growth and enable improvements in protection, mobility and ability to integrate the emerging network.

Question. Logistics Modernization Program (LMP).

Answer. I understand the LMP is an Enterprise Resource Planning (ERP) system in the Operation and Support phase of its life-cycle.

Based on commercial off-the-shelf SAP Corporation software technology, LMP provides the Army with an integrated end-to-end supply chain solution at the national level that improves overall synchronization of information.

I concur with the Army's vision to achieve a seamless, end-to-end modernized logistics enterprise and to develop and implement logistics enterprise architecture with joint interoperability. To support that vision, the LMP will integrate with other Army ERPs, including General Funds Enterprise Business System (GFEBs), and Global Combat Support System-Army (GCSS-A), to provide a seamless enterprise-wide logistics environment spanning the factory to the foxhole in accordance with the approved Army ERP Strategy.

Question. Paladin Integrated Management Vehicle program.

Answer. I understand that the Paladin Integrated Management (PIM) program is an effort to address an existing capability gap in the self-propelled artillery portfolio brought about by an aging fleet and the termination of prior howitzer modernization efforts [Crusader and Non-Line-of-Sight-Cannon (NLOS-C)]. The PIM program provides upgrades that allow the Army to meet existing and future needs, and

leverages the commonality with the Bradley Fighting Vehicle chassis and automotive components. PIM should provide growth potential in Space, Weight and Power and capacity for network expansion to accommodate future howitzer related needs, to include the addition of such Force Protection packages as add-on armor.

Question. M4 Carbine Upgrades/Individual Carbine Competition.

Answer. The Army continues to make improvements and upgrades based on operational lessons learned through the M4 Product Improvement Program. The Army's effort is designed to integrate full automatic firing, an ambidextrous selector switch and a more durable "heavy" barrel. Simultaneously, the Army has initiated a full and open competition to confirm the best possible Individual Carbine solution. Results of the competition are expected in fiscal year 2013.

MINE RESISTANT AMBUSH PROTECTED (MRAP) VEHICLES

Question. If confirmed, what would you propose should be the Army's long term strategy for the utilization and sustainment of its large MRAP and MRAP-All Terrain Vehicle fleets?

Answer. The Army needs to continue to provide the best level of protection for our deploying soldiers. Given what we have learned during the last 10 years, I believe we should attempt to provide MRAP levels of protection to deploying forces worldwide commensurate with the mission assigned. The Army will integrate MRAPs into the force.

QUADRENNIAL DEFENSE REVIEW

Question. The 2010 report of the Quadrennial Defense Review (QDR) provides guidance that military forces shall be sized to prevail in ongoing conflicts in Afghanistan, Iraq, and the war against al Qaeda as well as for conducting foundational activities that prevent and deter attacks or the emergence of other threats.

What is your assessment of the Army's current size and structure to meet the QDR report's guidance?

Answer. The Army's size and structure have proven adequate to meet the demands of our defense strategy as we know them today, although a very heavy demand has been placed upon soldiers and their families for nearly 10 years. If confirmed, I would work closely with the Secretary of Defense, the Secretary of the Army, the Chairman of the Joint Chiefs, and our combatant commanders to match end strength, structure, and tempo in our ARFORGEN rotational model to meet demands as they change.

Question. If confirmed, what size or structure changes would you pursue, if any, to improve or enhance the Army's capability to meet these requirements?

Answer. The nature of the strategic environment requires the Army to continuously assess its capabilities and force requirements. It's taken 10 years to achieve a size, structure, and capability that we can reasonably describe as balanced. We are accustomed to change, and we will undoubtedly need to continue to change. As we do we must seek to maintain a balance of capabilities that are available to meet the Nation's needs at a sustainable tempo.

Question. The QDR report particularly emphasizes the requirement for improved capabilities in the following six key mission areas.

For each, what is your assessment of the Army's current ability to provide capabilities to support these mission requirements?

If confirmed, what changes, if any, would you pursue to improve the Army's capabilities to support:

Defense of the United States.

Answer. The Army is fully capable of fulfilling its responsibility to defend the homeland through detection, deterrence, prevention, and if necessary, the defeat of external threats or aggression from both state and non-state actors. A specific program recently undertaken to enhance this ability include the fielding of the enhanced Stryker Nuclear Biological and Chemical Reconnaissance Vehicle. This provides us with a much improved technical assessment and decontamination capability.

Question. Support of civil authorities at home.

Answer. The Army is well postured to provide support to civil authorities. We are organized and trained to provide responsive and flexible support to mitigate domestic disasters, CBRNE consequence management, support to civilian law enforcement agencies, counter WMD operations and to counter narcotics trafficking activities. We continue to address the challenges associated with this mission set including unity of command, integration with civilian authorities, and the integration of Title 10 and Title 32 forces.

Question. Succeed in counterinsurgency, stability, and counterterrorism operations.

Answer. We are highly proficient in counter insurgency, stability and counter-terrorism operations. This has been the focus for the Army for much of the last 10 years and we have institutionalized lessons learned across the operating and generating force.

Question. Build the security capacity of partner states (including your views, if any, on the use of general purpose forces in the security force assistance role).

Answer. General Purpose Forces have a clear role in building sustainable capability and capacity of partner nation security forces and their supporting institutions. Peace time engagement is our best opportunity to shape the future operating environment. General Purpose Forces are well-suited to support these activities through Security Force Assistance.

Question. Deter and defeat aggression in anti-access environments.

Answer. The Army's ability to deter and defeat aggression in anti-access environments as part of the joint force is adequate to meet the demands of the current security environment. That said, there are some tasks and skills to which we have not trained due to the demands of our ongoing conflicts. We must restore our proficiency in those tasks. We work with our sister Services to assess our capabilities to conduct entry operations as part of the joint force and watch closely the improved anti-access/area denial capabilities being developed by potential adversaries.

Question. Prevent proliferation and counter weapons of mass destruction.

Answer. The Army provides highly trained and ready forces with capabilities to support combatant commander requirements to counter the proliferation of weapons of mass destruction. Current capabilities include operating effectively within a chemical, biological, radiological, and nuclear environment, specialized teams to locate and neutralize weapons of mass destruction (WMD), and an operational headquarters with expertise in eliminating WMD.

Question. Operate effectively in cyberspace.

Answer. We are on the right glide path to support U.S. Cyber Command and our geographic combatant commanders to operate effectively in cyberspace. On 1 October 2010, the Army stood up a new three star command (U.S. Army Cyber Command/2nd Army), to direct the operations and defense of all Army networks, and when directed, provide full-spectrum cyberspace operations. The Army is bringing the forces of network operations, defense, exploitation, and attack under one operational level command to integrate and synchronize global operations for the first time.

MISSILE DEFENSE

Question. The Department of Defense recently decided to terminate the Army's Surface-Launched Advanced Medium-Range Air-to-Air Missile, and not to proceed with procurement and fielding of the tri-national Medium Extended Air Defense System, two Army air and missile defense systems.

Do you consider missile defense to be one of the Army's core missions?

Answer. Yes. The Army has confirmed on many occasions that Air and Missile Defense is a core competency. Protection of our deployed forces is the priority. The Army provides this protection in coordination with our sister Services and coalition partners.

Question. How do you believe the Army should manage the risks that result from these decisions?

Answer. I believe the Army needs to continue to monitor the threat and prioritize required future capabilities to ensure we provide effective affordable solutions in a timely manner to our forces.

Question. The Army has recently proposed transferring a number of its air and missile development programs to the Missile Defense Agency (MDA).

In your view, what is of the proper relationship between the Army and the Missile Defense Agency?

Answer. It is my understanding that the Army relies on the MDA to develop and produce the Ballistic Missile Defense System (BMDS). The Army works with MDA to provide those BMDS capabilities to the combatant commanders. The Army maintains a relationship with MDA through the Army/MDA Board of Directors and its four standing committees.

Question. The Army has recently completed a review of its air and missile defense portfolio.

In your view, what are or should be the Army's responsibilities, if any, with respect to development, procurement, and operation of missile defense systems?

Answer. The Army's responsibilities depend on the type of missile defense system being developed and guidance from the Office of the Secretary of Defense.

PROTECTION OF U.S. FORCES AGAINST INTERNAL THREATS

Question. One year ago, 13 people were slain and scores wounded during a shooting rampage allegedly carried out by a U.S. Army Medical Corps officer. A Department of Defense review of the attack concluded that the Department was poorly prepared to defend against internal threats, including radicalization of military personnel.

What is your assessment of the lessons learned from the tragedy at Fort Hood?

Answer. The lessons learned are invaluable to the Army as we strive to improve the Army Protection Program for individuals and units against emerging threats. Through a holistic Protection approach, the Army is aggressively fielding material and nonmaterial solutions to address internal and external threats.

Question. If confirmed, what strategies would you advocate to prevent and mitigate such threats in the future?

Answer. If confirmed, I will ensure that we continue to integrate and synchronize the many Army Protection Programs that protect our soldiers, family members, and Department of the Army civilians by ensuring that commanders and leaders have the information and tools needed to address the ever changing threat environment.

RELIGIOUS GUIDELINES

Question. The DOD Independent Review Related to Fort Hood observed that "DOD policy regarding religious accommodation lacks the clarity necessary to help commanders distinguish appropriate religious practices from those that might indicate a potential for violence or self-radicalization" and recommended that the policy be updated.

What is your view of the need to clarify the policy regarding religious accommodation in the Army?

Answer. The policies for religious accommodation in the Army are published in AR 600-20, Army Command Policy. The policy must be clear and provide appropriate guidance to both soldiers and commanders regarding how the Army accommodates for religious beliefs and practices. To this end, if confirmed, I will assess the current policy and determine if further changes are necessary.

Question. Are you concerned that the attack at Fort Hood could lead to harassment or even violence against Muslims in the Army?

Answer. Your question raises a valid concern. However, the Army is a diverse force. As soldiers in the profession of arms, we understand the key role that good order, discipline, morale, and safety have in ensuring units are at all times ready to defend this nation. The Army has long been a place where people from all walks of life can serve proudly and where the many become one—a U.S. Army soldier.

Question. If confirmed, what strategies would you advocate to address the potential for harassment or violence against Muslims in the Army?

Answer. The Army has a longstanding commitment to treat all soldiers with dignity and respect. Treating soldiers with dignity and respect requires continuous leader emphasis and vigilance.

Question. Do Army policies regarding religious practices in the military accommodate, where appropriate, religious practices that require adherents to wear particular forms of dress or other articles with religious significance?

Answer. Regulations regarding wear of religious clothing or items are found in two regulations (AR 600-20, Army Command Policy and AR 670-1, Wear and Appearance of Army Uniforms and Insignia). The policy provides the authority to wear religious jewelry, apparel or articles if they are neat, conservative, and discreet and compliant with these regulations.

Question. In your view, do these policies accommodate the free exercise of religion and other beliefs without impinging on those who have different beliefs, including no religious belief?

Answer. In my opinion, current Army policies provide commanders with adequate flexibility to balance accommodation for religious beliefs and maintain good order and discipline.

Question. In your opinion, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. The Army does not have a policy regarding public prayer by military chaplains. As a matter of practice, however, chaplains are encouraged to be considerate of the audience.

FAMILY SUPPORT

Question. The Army Family Action Plan has been successful in identifying and promoting quality of life issues for Army families.

What do you consider to be the most important family readiness issues in the Army, and, if confirmed, what role would you play to ensure that family readiness needs are addressed and adequately resourced?

Answer. In my view the most pressing family readiness issues include sustaining the Army Family Covenant and improving communication and awareness of the extensive range of available support programs and services the Army has to improve soldier and family quality of life.

In 2007, the Army Family Covenant was unveiled to improve quality of life by providing programs and services that enhance soldier and family strength, readiness, and resilience. Since then, the Army has made great progress and continues to fulfill its commitment to provide soldiers and families a quality of life commensurate with the quality of their service.

The Army Family Action Plan, Survey of Army Families, and other studies revealed that soldiers and families may not be aware of the myriad of available support services. To address this concern, the Army is transforming Army Community Service (ACS) to help connect soldiers and families to the right service at the right time. This transformation will create a more streamlined and modular support structure that better supports our modular Army at every installation. The Army has begun piloting ACS transformation and anticipates completion by October 2011.

The Army has made great progress in building a wide range of support capabilities over the last few years, but the strain on the force continues. If confirmed, I will continue to strengthen our support services and ensure our programs efficiently meet the needs of the soldiers and families who use them.

Question. How would you address these family readiness needs in light of global rebasing, BRAC, and lengthy deployments?

Answer. If confirmed, I will endeavor to ensure that Army Family programs reach out to all soldiers and their families, regardless of geographic location or deployment status. I will also work to ensure that family program platforms and delivery systems keep pace with a mobile Army and utilize technological advances and social networking so services are available to the soldiers and families who need them.

Question. If confirmed, how would you ensure support of Reserve component families related to mobilization, deployment and family readiness, as well as active duty families who do not reside near a military installation?

Answer. I am committed to ensuring soldiers and families remain connected to Army Family services and programs, whether by internet, telephone, or in person regardless of geographic location or Component. Army OneSource (www.MyArmyOneSource.com) is the website of choice for information on Army Family programs and services. Army OneSource highlights Active and Reserve Component Family Programs, is publicly accessible, and thus available to all components and immediate and extended family members.

The State Joint Force Headquarters is the platform for support of geographically dispersed servicemembers and families. This platform projects the Joint Family Support Assistance Program resources, ARNG Family Assistance Centers (FACs), ARNG Family Readiness Support Assistants, and the ARNG Child and Youth program in support of Reserve component families and Active component families that do not reside near the installation. Additionally, Army sponsored programs including Operation Military Kids and Community Based Child Care and Respite Care programs build community capacity for the geographically dispersed Army population. These programs offer similar services and assistance to geo-dispersed Reserve component families as would be available on installations and are connected to local resources that soldiers and families are eligible to use.

SPACE

Question. The Army Space support to Strategic Command works closely with Air Force Space Command in getting space based communications to the warfighter. Recently the Army has begun to look at the possibility of expanding the scope of data that could be provided to the last tactical mile from space.

In your view, what are the needs that the Army could address from space, and, if confirmed, how would you ensure that this is coordinated with OSD?

Answer. While I am not yet in a position to provide an informed assessment, I understand that the importance of space programs continues to increase across DOD, and the Army needs to keep pace to fully leverage capabilities and ensure that space systems are appropriately prioritized within both DOD and the Department of the Army.

Question. If confirmed, what would be your vision for the Army space forces in the future?

Answer. While I am not yet in a position to provide an informed assessment, one of my priorities, if I am confirmed, is to position the Army to keep pace to fully leverage capabilities and ensure that space systems are appropriately prioritized and resourced.

Question. The Army, as do all the Services, tends to lag behind in the acquisition of ground and other terminals to work with new satellite systems. Acquisition of GPS M-code capable equipment is just one example of where there is needed capability on orbit but terminals will not be available in a timely fashion to utilize the capability.

What is your view on this lag and, if confirmed, what actions would you propose taking to resolve the lag?

Answer. If confirmed, I would need to examine this issue more closely. While I understand that all of the Services have specific requirements to meet specific needs for their forces and that the Army depends heavily on these systems, I am not yet in a position to provide an informed assessment.

LOW DENSITY/HIGH DEMAND FORCES

Question. If confirmed, how would you address the Army's management of low density units such as Special Operations Forces, military police, civil affairs, and others which are in extremely high demand in this new strategic environment?

Answer. If confirmed, I would use the Total Army Analysis (TAA) to identify the capabilities necessary, within resource constraints, to achieve the full spectrum of missions expected of the Army. When requirements for additional low density/high demand capabilities are identified through this process, they are resourced within acceptable risk. This process will help determine where these capabilities should reside: the Active component, the Reserve component, or a mix of both. The Army balances the inventory of these low density units to ensure availability of an affordable mix of flexible forces capable of accomplishing the missions required within the most likely security environment.

Question. Are there functional changes among the Active and Reserve components that you believe should be made?

Answer. I am not yet aware at this time of any changes that may be necessary.

MOBILIZATION AND DEMOBILIZATION OF NATIONAL GUARD AND RESERVES

Question. In the aftermath of the attacks of September 11, 2001, the National Guard and Reserves have experienced their largest and most sustained employment since World War II. Numerous problems arose in the planning and procedures for mobilization and demobilization, e.g., inadequate health screening and medical readiness monitoring, errors caused by antiquated pay systems, limited transition assistance programs upon demobilization, and lack of access to members of the Individual Ready Reserve (IRR). Reserve Force management policies and systems have been characterized in the past as "inefficient and rigid" and readiness levels have been adversely affected by equipment stay-behind, cross-leveling, and reset policies.

What is your assessment of advances made in improving Army Reserve component mobilization and demobilization procedures, and in what areas do problems still exist?

Answer. I understand the Army is currently reviewing all of its mobilization policies to ensure that the systems in place are effective and responsive for Reserve component soldiers. I believe Reserve components are a critical part of the Total Force, and if confirmed, I will continue the effort to ensure that Reserve component soldiers are mobilized and demobilized in the most effective and efficient way possible and that their needs and the needs of their families and employers are met.

Question. What is your understanding and assessment of the sufficiency of current Reserve Force management policies?

Answer. As I understand current Reserve Force management policies, the goal is to manage the force to produce a supply of units to the combatant commanders with a short-term goal of 1 year of mobilization every 5 years with a long-term goal of 1 year of mobilization every 6 years. The challenge the Army has faced has been that demand has been greater than the supply and has caused the need for more

frequent mobilizations. As operations in Iraq and Afghanistan start to draw-down, the Army should be better able to attain the mobilization to dwell goals.

Question. What do you consider to be the most significant enduring changes to the administration of the Reserve components aimed at ensuring their readiness for future mobilization requirements?

Answer. The Army Force Generation Model fundamentally changes the way the Army builds unit readiness for mobilization requirements. The ARFORGEN model presents a structured progression of readiness through a multi-year long cycle.

Question. Do you see a need to modify current statutory authorities for the mobilization of members of the National Guard and Reserves?

Answer. At present, I am not aware of a need to modify current statutory authorities to facilitate mobilization of the National Guard and Reserves. If confirmed, I will work with Secretary McHugh to review the statutory authorities to determine if they are sufficient.

INDIVIDUAL READY RESERVE

Question. The Commission on the National Guard and Reserves has found that accessing the IRR as a viable source of manpower for the war was problematic, and that using the IRR as a solution for unit manning is a failed concept.

What is your assessment of the value of the IRR to the All-Volunteer Force?

Answer. I believe the IRR has proven an invaluable asset to all Army components to support contingency operations around the world.

Question. What are your views on the proper role of the IRR in Army force management planning?

Answer. The IRR can serve as a source of experienced and highly-skilled soldiers to help the Army meet critical skill and grade requirements.

Question. If confirmed, what changes, if any, do you foresee making to the Army's IRR recall policy?

Answer. At this time, I do not have sufficient information to recommend changes to this policy. If confirmed, I will consider input from all components to determine the best IRR recall policy.

Question. What is your assessment of the adequacy of the system in place for members in the IRR receiving orders to active duty to request a delay or exemption for that activation, including the procedures in place for appealing the Army's decision on that request?

Answer. While this is an important part of the IRR mobilization, I do not have sufficient familiarity with this policy to recommend changes.

Question. Recent studies of Army suicides show higher rates among the IRR.

What should the Army and DOD do to address this concern?

Answer. Suicides in the IRR are often more difficult to address because those soldiers are not affiliated with a unit. If confirmed, I will consider all methods to integrate IRR soldiers into the Army's Health Promotion/Risk Reduction efforts.

PERSONNEL AND ENTITLEMENT COSTS

Question. In addition to health care costs, personnel and related entitlement spending continues its steep upward growth and is becoming an ever increasing portion of the DOD budget.

If confirmed, what actions would you take to control the rise in the Army's personnel costs and entitlement spending?

Answer. We need to strike a balance between preserving the All-Volunteer Force, accomplishing operational missions and retraining an Army that is affordable to the Nation. If confirmed, I will work with the Secretary of the Army and the Secretary of Defense on how best to achieve it.

Question. If confirmed, what actions would you take to avoid a requirement for massive end-of-year reprogramming to cover personnel costs?

Answer. My understanding is the President's budget is adequate to meet current personnel costs.

Question. What would be the impact of a year-long continuing resolution on Army personnel funding?

Answer. If the Army is given the flexibility to manage total resources (both Base and Overseas Contingency Operations (OCO) funds) to pay its force, then fiscal year 2011 continuing resolution will have minimal impact on military pay and allowances.

MEDICAL AND DENTAL READINESS OF ARMY NATIONAL GUARD AND ARMY RESERVE
PERSONNEL

Question. Medical and dental readiness of Reserve component personnel has been an issue of significant concern to the committee, and shortfalls that have been identified have indicated a need for improved policy oversight and accountability.

If confirmed, how would you seek to clarify and coordinate reporting on the medical and dental readiness of the Reserves?

Answer. I believe the Army should develop and resource mechanisms to routinely identify screen and assess Reserve component medical readiness. If confirmed, I will work with Secretary of the Army, the Chief of Army Reserves, the Director of the Army National Guard, and the Surgeon General to develop policies for more effectively identifying personnel that are nondeployable for medical reasons.

Question. How would you improve upon the Army's ability to produce a healthy and fit Reserve component?

Answer. This is a very important issue, and I will work with the Army's Active and Reserve component leadership to assess whether there are challenges in this area. The Army is moving forward with a Comprehensive Soldier Fitness Program. If confirmed, I would determine how this program applies to Reserve component and National Guard soldiers.

ARMY SCIENCE AND TECHNOLOGY

Question. What do you see as the role that Army science and technology programs will play in continuing to develop capabilities for current and future Army systems?

Answer. It is my understanding that the Army's science and technology investment strategy is shaped to foster invention, innovation, and demonstration of technologies for the current and future warfighter. The science and technology program should retain the flexibility to be responsive to unforeseen needs identified through current operations.

Question. What in your view have been the greatest contributions, if any, of Army science and technology programs to current operations?

Answer. I believe the most significant contribution the Army science and technology community has offered to current operations is the ability to use technology to significantly improve warfighter capabilities. Technological innovations have resulted in the rapid development and deployment of lightweight and adaptable Armor solutions that have been critical to addressing emerging threats, enhancing intelligence capabilities, and better protecting our deployed forces.

Question. What metrics would you use, if confirmed, to judge the value and the investment level in Army science and technology programs?

Answer. To judge the value and investment level in Army science and technology programs, I would use metrics that demonstrate improved warfighter capabilities; improve acquisition programs; and align technology development to warfighter requirements.

Question. What new science and technology areas do you envision the Army pursuing, for instance to lighten soldier load, and to improve the survivability and combat effectiveness of dismounted soldiers and ground vehicles?

Answer. If confirmed, I will engage the Army's science and technology program and its stakeholders, including the acquisition community, Training and Doctrine Command and the combatant commanders to discuss the needs of the warfighter and the "art of the possible" for future technology-enabled capabilities to ensure the Army remains the best equipped force in the world.

ARMY LABORATORIES AND RESEARCH, DEVELOPMENT AND ENGINEERING CENTERS

Question. How will you balance the role of Army laboratories between long-term fundamental research, support to current operations and the development of new capabilities to support current and future Army missions?

Answer. The Army laboratories are science and technology performing organizations and as such have and will continue to play a major role in supporting current operations with best capabilities available. Through their broad range of investments in key strategic science and technology areas, they also provide critical new capabilities for soldiers.

Question. If confirmed, how will you ensure that the Army laboratories and R&D centers have the highest quality workforce, laboratory infrastructure, resources, and management, so that they can continue to support deployed warfighters and develop next generation capabilities?

Answer. Army laboratories and Research and Development Centers need to maintain the resources required to continue initiatives and advancements that support

the warfighter. If confirmed, I will learn more about their operations and support efforts to improve best practices and workforce quality necessary for mission accomplishments.

ARMY TEST AND EVALUATION EFFORTS

Question. In the past, the DOD Test Resource Management Center did not certify the Army's test and evaluation (T&E) budget due to identified shortfalls in T&E range sustainment, operations, and modernization.

If confirmed, how will you ensure that the Army's T&E infrastructure is robust enough to test new systems and technologies and reliably verify their combat effectiveness and suitability?

Answer. Testing is a crucial capability for maintaining the Army's combat edge and modernizing the force. I fully recognize the value of testing to ensure new technologies and equipment address the capabilities our warfighters need. If confirmed, I will work closely with the Army T&E community and the Office of the Secretary of Defense T&E leadership to ensure the Army's T&E infrastructure is adequately resourced to address testing requirements and maintain robust test capabilities.

ARMY INFORMATION TECHNOLOGY (IT) PROGRAMS

Question. What major improvements, if any, would you like to see made in the Army's development and deployment of major information technology systems?

Answer. I believe the Army needs to implement and enforce technical standards, make acquisition of commercial off-the-shelf (COTS) or near-COTS technology easier, and field new technology to operational forces more quickly. This is in line with the congressional mandate you gave us in section 804 of the 2010 NDAA.

As Commanding General for Training and Doctrine Command, I helped establish a center for network integration at Fort Bliss, TX—the Army Evaluation Task Force (AETF). It will serve as the Network's primary test unit with a two-fold intent, to remove the integration burden from the operational units and to provide an operational venue to evaluate new technologies and network capabilities prior to fielding to operational units. The new capabilities they develop should ultimately provide the impetus for future acquisition and equipping decisions.

Question. How will the consolidation of IT systems announced under Secretary Gates efficiency initiative reduce the IT support cost per user to the Army?

Answer. I understand the two primary Army initiatives that fulfill Secretary Gates' mandate are Enterprise Email and consolidation of Army data centers. Implementation of these initiatives should help reduce the cost of information technology support to the Army.

HUMAN TERRAIN SYSTEMS

Question. What is your understanding of the Army's plans to institutionalize the Human Terrain System (HTS) program? Given the proliferation of such capabilities across the Services, what are your views, if any, on developing a joint HTS capability?

Answer. The Army has institutionalized the Human Terrain System as an enduring capability assigned to Training and Doctrine Command and funded capability starting in the fiscal year 2011. I believe there is merit to developing a joint capability. In September 2010, I directed a Training and Doctrine Command capability based assessment of all Socio-cultural capabilities throughout the combatant commands and Services. The intent is to identify other ongoing socio-cultural initiatives, to determine potential synergies and best practices in order to develop and evolve an enduring joint capability. The results of this assessment are due in the spring of 2011.

OPERATIONAL ENERGY

Question. Prior to and since the creation of the Assistant Secretary of Defense for Operational Energy Plans and Program, a number of the Services have made progress addressing concerns associated with operational energy. The Army has announced its operational energy aspirations for the future but, unlike the other Services, the Army's five strategic energy security goals appear vague and lack quantitative metrics against which to measure progress.

If confirmed, how would you propose that the Army address its operational energy challenges, requirements, and opportunities in the immediate short-term?

Answer. The most important issue with operational energy is the amount of fuel used to meet our operational needs. Most of our fuel is used in generation of electricity. The Army has implemented, and accelerated deployment, of generators that

use less fuel as well as microgrid systems that tie generators together to operate more efficiently. We are developing more efficient motors for helicopters and vehicles to reduce our operational energy footprint and, ultimately, wars are won or lost by dismounted soldiers, so the Army is addressing excessive soldier loads, driven in large part by energy and power constraints. As the Commanding General of the Army Training and Doctrine Command, I'm a charter member of the Army's Senior Energy and Sustainability Council, which is responsible for addressing energy challenges across the Army. If confirmed I will continue efforts currently underway to increase our energy efficient capabilities in theater and emphasize energy awareness through the military chain of command, and across the Army, to foster a more energy-aware culture.

Question. What is your understanding of the Army's progress with respect to testing and deploying operational energy technologies?

Answer. The Army is taking advantage of every avenue, to include industry, to help us develop technologies that can reduce our operational energy footprint. Renewable energy systems and insulated tentage are some of the systems being piloted and tested. We are also evaluating technologies that will help lighten soldier loads and reduce the amount of batteries and fuel we must procure and deliver to theater. We will continue to pursue more efficient devices and employ energy management capabilities that are essential to retain energy as an operational advantage.

Question. What is your understanding of how the Army is taking advantage of its labs and research, engineering and development centers to further its operational energy and security goals?

Answer. The Army has integrated the national laboratories with Department of Energy and Army laboratories to develop solutions to a range of operational energy, power and security needs. Some of the initiatives include research to reduce the size and weight of components, broadening alternative energy sources, leveraging various emergent energy efficient technologies. These new technologies will increase energy efficiency and improve power supplies for contingency bases, forward operating bases and equipment carried by individual soldiers. If confirmed I will work to ensure that the research conducted at Army facilities continues to focus on meeting the operational energy needs of the current and future Army.

INVESTMENT IN INFRASTRUCTURE

Question. Witnesses appearing before the committee in recent years have testified that the military Services under-invest in their facilities compared to private industry standards. Decades of under-investment in our installations have led to increasing backlogs of facility maintenance needs, created substandard living and working conditions, and made it harder to take advantage of new technologies that could increase productivity.

What is your assessment of Army infrastructure investment?

Answer. Since fiscal year 2007, with BRAC, Transformation, and Grow the Army initiatives, the Army has made significant MILCON investments in its infrastructure. If confirmed, I will work with the Assistant Secretary of the Army, Installation, Energy and Environment, and the Commanding General at Installation Management Command to assess our infrastructure investments.

Question. If confirmed, what actions, if any, would you propose to increase resources to reduce the backlog and improve Army facilities?

Answer. Proper stewardship of our facilities portfolio requires the Army to fully sustain the current facilities, dispose of our excess facilities, improve the quality of our worst facilities and build-out our largest and most critical shortages, all at a level adequate to support the mission.

If confirmed, I will evaluate the proper balance of funding, to include evaluating whether the Army should increase operation and maintenance funding for restoration and modernization and Demolition.

ARMY POLICIES REGARDING DRUG AND ALCOHOL ABUSE

Question. What is your understanding of the Army's policy with respect to disciplinary action and administrative separation of soldiers who have been determined to have used illegal drugs? Do you agree with this policy?

Answer. Army policy directs commanders to initiate administrative separation for all soldiers involved in trafficking, distribution, possession, use, or sale of illegal drugs. While the policy requires initiation of separation, commanders have the authority to retain or separate a soldier.

I concur with this policy.

Question. What is your understanding of the Army's policy with respect to rehabilitation and retention on active duty of soldiers who have been determined to have

used illegal drugs or abused alcohol or prescription drugs? Do you agree with this policy?

Answer. Army policy requires that the separation authority consider a soldier drug offender's potential for rehabilitation and further military service. For this reason, soldiers who commit drug and alcohol offenses are required to be evaluated by a certified substance abuse counselor through the Army Substance Abuse Program (ASAP). Commanders consider the recommendation of ASAP counselors when determining a soldier's potential for rehabilitation and retention.

I concur with this policy.

Question. Do you believe that the Army has devoted sufficient resources to implementation of its rehabilitation policies and objectives since 2001? If not, in what ways?

Answer. My personal experience at various command levels since 2001 has been that the Army devotes sufficient resources to implement these objectives. If confirmed, I will assess and closely monitor the level of resourcing for this important area.

Question. What measures are being taken to improve the Army's performance in responding to problems of drug and alcohol abuse?

Answer. Army policy requires a comprehensive approach by commanders, law enforcement and the medical community for drug and alcohol abuse. The Army is working diligently to improve its surveillance, detection, and intervention systems for drug and alcohol abuse.

The Army investigates all reported drug and alcohol incidents to assist commanders in properly adjudicating the offense. The Army is also enhancing detection capabilities through the Drug Suppression Teams.

The Army is also working to improve intervention systems. In addition to increasing the number of ASAP counselors to accommodate the increasing demand, the Army continues to expand the Comprehensive Soldier Fitness program to build resiliency in the force. The Army is also conducting the Confidential Alcohol Treatment and Education Pilot program at six installations to promote help seeking behavior by allowing soldiers to confidentially seek help for alcohol problems.

MEDICAL PERSONNEL RECRUITING AND RETENTION

Question. The Army continues to face significant shortages in critically needed medical personnel in both Active and Reserve components.

What is your understanding of the most significant personnel challenges in recruiting and retaining health professionals in the Army?

Answer. There continues to be a national shortage of medical professionals that challenges the Army's efforts to recruit and retain health care professionals. The Army competes with governmental and non-governmental agencies, as well as private health care organizations to attract and retain the most skilled and talented health care providers, in a uniformed or civilian capacity. The Army continues to evaluate initiatives to provide more flexibility to allow the Army to adequately compete in these areas.

Question. If confirmed, would you undertake a comprehensive review of the medical support requirements for the Army, incorporating all new requirements for 2011 and beyond?

Answer. I believe it is important to review medical support requirements on a regular, recurring basis. With that in mind, if confirmed I will assess whether the Army should undertake a comprehensive review of the medical support requirements for the Army.

Question. If confirmed, what policies or legislative initiatives, if any, are necessary in order to ensure that the Army can continue to fulfill ongoing medical support requirements?

Answer. Given the policy initiatives currently underway and the changes implemented by the National Defense Authorization Act for Fiscal Year 2011 at this time, I do not believe additional legislative authorities are needed to ensure that the Army fulfills medical support requirements. If confirmed, I will closely monitor this area and will work closely with the administration and Congress to seek any additional authorities identified as necessarily to maintain this goal.

FOREIGN LANGUAGE PROFICIENCY

Question. A Foreign Language Transformation Roadmap announced by the Department of Defense in March 2005, directed a series of actions aimed at transforming the Department's foreign language capabilities to include revision of policy and doctrine, building a capabilities based requirements process, and enhancing foreign language capability for both military and civilian personnel.

What is your assessment of the progress the Army has made in increasing its foreign language capabilities in operations in Iraq and Afghanistan?

Answer. As Commanding General for the Training and Doctrine Command, I witnessed a tremendous increase in foreign language capabilities in support of OIF/OEF. The Army revolutionized its recruiting processes to enlist native and heritage speakers into vital interpreter/translator positions. Pre-deployment training for the General Purpose Force Soldiers and Civilians has transformed to include Afghanistan/Pakistan Hands Program, Language Enabled Soldiers training, the Rapport Program, and other Soldiers and Civilians with Culturally Based Language Training. The Reserve Officer Training Corps has introduced a very successful Culture and Language Program, which provides incentives and immersion opportunities for cadets who take foreign language and related cultural studies. Overall, these initiatives have provided enhanced capabilities for counterinsurgency operations and building partner capacity overseas.

Question. In your view, what should be the priorities of the Department of Defense, and the Army in particular, in responding to the need for improved foreign language proficiency and improving coordination of foreign language programs and activities among Federal agencies?

Answer. In my opinion, one of the highest priorities for the Department of Defense should be the continued support of the Defense Language Institute Foreign Language Center, which provides Culturally Based Language Training to all Services and Department of Defense Components. With the increasing demand for Pashto and Dari instructors, and foreign language professionals in general, the Department of Defense must coordinate with Federal agencies to ensure best practices are shared to recruit and retain personnel with these critical skills.

MENTAL HEALTH ADVISORY TEAMS

Question. The Army's Mental Health Advisory Team (MHAT) studies in Iraq and Afghanistan have been valuable in identifying the extent of mental health conditions and resource and training challenges being experienced in combat theaters. The most recent report, MHAT VI, stated that multiple deployments were related to higher rates of acute stress and psychological problems, that servicemembers on their third and fourth deployment "reported using medications for psychological or combat stress problems at a significantly higher rate," and that "soldiers with short dwell-time report high mental health problems, high intent to leave the military and low morale."

Based on the findings of MHAT VI that soldiers experience increased stress due to multiple deployments and short dwell time, what actions would you take, if confirmed, to ensure that appropriate mental health resources are available to soldiers in theater, as well as upon their return?

Answer. The MHAT studies play a key role in proactively identifying how changes in the operational environment impact the ability to provide behavioral health care. Since OEF MHAT VI, the number of behavioral health personnel in theater was significantly increased to improve the ratio of behavioral health specialists to soldiers. Specifically, the MHAT team recommended one behavioral health personnel should be deployed for every 700 soldiers, and this ratio was met. Second, the MHAT team recommended a redistribution of behavioral health personnel to ensure that each BCT had one additional dedicated provider to augment their organic provider. This "dual provider" model was designed to ensure that a provider would be available to travel to remote outposts to see soldiers who had limited access to the larger Forward Operating Bases. If confirmed, I will ensure that the Army continues to develop and synchronize the expeditionary components of health promotion, risk reduction, and suicide prevention programs and services.

Question. What do you think have been the most valuable findings of the Army's Mental Health Advisory Teams, and what are the lessons which can be applied to future deployments?

Answer. One of the most valuable findings from the MHATs has been to document that soldiers on multiple deployments report higher mental health problems. This finding was first observed in 2005 (MHAT III), and has been replicated in every subsequent MHAT. Another valuable finding noted in the question was the observation that mental health problems are related to dwell-times. Specifically, short dwell-times are associated with a heightened increase in reports of mental health problems. Other key findings include the observation that deployment length is strongly associated with reports of mental health problems and deployments have put a strain on marital relationships. Overall, the willingness to take a systematic look at the behavioral health care system and the behavioral health status of soldiers through programs such as the MHATs has ensured that the Army is being respon-

sive to the needs of deployed soldiers to include refining behavioral health care delivery models.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. Numerous cases of sexual misconduct involving soldiers in Iraq, Kuwait, and Afghanistan have been reported over the last several years. Many victims and their advocates contend that they were victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate military treatment. They asserted that the Army failed to respond appropriately by providing basic services, including medical attention and criminal investigation of their charges and, ultimately, appropriate disciplinary action.

What is your understanding of the resources and programs the Army has in place in deployed locations to offer victims of sexual assaults the medical, psychological, and legal help that they need?

Answer. I am very concerned about reports of sexual assault anywhere in our Army but especially in deployed locations. We cannot tolerate this behavior wherever it occurs. While the deployed theatres pose special challenges, the Army is committed to providing victims in deployed units with appropriate medical care, resources and support. The Army has taken a number of significant steps to improve the assistance to victims of sexual assault, including enhanced recognition of the special circumstances posed by deployed soldiers. The Army's Sexual Harassment Assault Response and Prevention (SHARP) Program includes medical, advocacy, chaplain, investigative and legal services. This program requires every brigade sized unit to appoint and train a deployable sexual assault response coordinator and every battalion to appoint and train unit victim advocates.

Question. What is your view of the steps the Army has taken to prevent additional sexual assaults at deployed locations as well as home stations?

Answer. In 2008, the Army implemented its I. A.M. (Intervene, Act, Motivate) Strong Sexual Assault Prevention Campaign. The campaign includes strategic, operational and tactical level execution of the I. A.M. Strong Campaign, with heavy emphasis on soldiers' commitment to intervene and protect their fellow soldiers from the risk of sexual assault and from the risk of sexual harassment. The campaign places additional emphasis on establishing a command climate that deters sexual harassment and assault.

Question. What is your view of the adequacy of the training and resources the Army has in place to investigate and respond to allegations of sexual assault?

Answer. While increasing emphasis to prevent sexual assaults before they occur, the Army continues to emphasize victim services and response capabilities, to include enhancements to investigation and prosecution resources.

The SHARP Program is a great start to managing strategies, policies and resources necessary to adequately prevent and respond to incidents of sexual assault. This is a challenging problem that will require leadership and constant vigilance at all levels.

Question. Do you consider the Army's current sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Prior to implementation of the I. A.M. Strong Prevention Campaign, the focus of the Army program was primarily on victim response. Part of that response focus was the implementation of confidential reporting, or restricted reporting, which is an effective way to allow a victim to come forward and have their personal needs met without fear that may be associated with a criminal investigation. If confirmed, I will continue to look closely at the Army's sexual assault program.

Question. What problems, if any, are you aware of in the manner in which the confidential reporting procedures have been put into effect?

Answer. Getting victims to trust the system and come forward can be challenging; however, I am not aware of any specific problems with the current reporting procedure. Confidential reporting, or restricted reporting, allows a victim to come forward and have their personal needs met without fear that may be associated with a criminal investigation.

Question. What is your view of the appropriate role for senior military and civilian leaders in the Secretariat and the Army staff in overseeing the effectiveness of implementation of new policies relating to sexual assault?

Answer. Perhaps the most important role of any Senior Army Leader is to ensure there is an adequate assessment of an organizational climate, where such behavior is not tolerated and where victims feel free to report incidents without fear of reprisal.

Question. If confirmed, what actions would you take to ensure senior management level direction and oversight of Departmental efforts on sexual assault prevention and response?

Answer. If confirmed, I will have an active role in the oversight and implementation of the Army's Sexual Harassment/Assault Response and Prevention (SHARP) Program. I will work with the Secretary and the Army leadership to ensure the Army's SHARP program continues to receive the appropriate level of supervision, guidance, and support needed to drastically reduce incidents of this unacceptable crime.

MORALE, WELFARE, AND RECREATION

Question. Morale, Welfare, and Recreation (MWR) programs are critical to enhancement of military life for members and their families, especially in light of frequent and lengthy deployments. These programs must be relevant and attractive to all eligible users, including Active Duty and Reserve personnel, and their eligible family members.

What challenges do you foresee in sustaining and enhancing Army MWR programs and, if confirmed, what improvements would you seek to achieve?

Answer. The Army has taken steps to ensure we care for and retain Families through a broad range of meaningful initiatives, to include many family and MWR programs and services. In October 2007, the Army leadership unveiled the Army Family Covenant, which institutionalized the Army's promise to provide soldiers and their families with a quality of life that is commensurate with their service to the Nation. The Soldier Family Action Plan provided the original roadmap to implement the Army Family Covenant, and includes such important programs as Soldier Family Assistance Centers, Survivor Outreach Services, improved services to the geographically dispersed, Exceptional Family Member respite care, Army OneSource, Child, Youth and School Services, Child Development Center and Youth Center construction, and more.

A challenge will be to sustain a consistent level of funding for these programs. If confirmed, I will consult with commanders, soldiers and families to ensure that these programs are adequate and meet their needs.

**NOMINATION OF GEN MARTIN E. DEMPSEY,
USA, FOR REAPPOINTMENT TO THE GRADE
OF GENERAL AND TO BE CHAIRMAN OF
THE JOINT CHIEFS OF STAFF**

TUESDAY, JULY 26, 2011

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:34 a.m. in room SD-106, Dirksen Senate Office Building, Senator Carl Levin (chairman), presiding.

Committee members present: Senators Levin, Lieberman, Reed, Akaka, Webb, Udall, Hagan, Begich, Manchin, Shaheen, Gillibrand, Blumenthal, McCain, Sessions, Chambliss, Wicker, Brown, Portman, Ayotte, Collins, and Graham.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Jessica L. Kingston, research assistant; Gerald J. Leeling, counsel; Peter K. Levine, general counsel; William G.P. Monahan, counsel; Michael J. Noblet, professional staff member; Russell L. Shaffer, counsel; William K. Sutey, professional staff member.

Minority staff members present: David M. Morriss, minority staff director; Adam J. Barker, professional staff member; Paul C. Hutton IV, professional staff member; Daniel A. Lerner, professional staff member; Lucian Niemeyer, professional staff member; Michael J. Sistik, research assistant; Diana G. Tabler, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: Jennifer R. Knowles and Christine G. Lang.

Committee members' assistants present: Christopher Griffin, assistant to Senator Lieberman; Carolyn Chuhta, assistant to Senator Reed; Nick Ikeda, assistant to Senator Akaka; Ann Premer, assistant to Senator Nelson; Gordon I. Peterson, assistant to Senator Webb; Casey Howard, assistant to Senator Udall; Lindsay Kavanaugh, assistant to Senator Begich; Joanne McLaughlin, assistant to Senator Manchin; Chad Kreikemeier, assistant to Senator Shaheen; Elena Broitman, assistant to Senator Gillibrand; and Ethan Saxon, assistant to Senator Blumenthal; Anthony J. Lazarski, assistant to Senator Inhofe; Lenwood Landrum, assistant to Senator Sessions; Clyde Taylor IV, assistant to Senator Chambliss; Joseph Lai, assistant to Senator Wicker; Charles Prosch, assistant to Senator Brown; Brent Bombach, assistant to

Senator Portman; Brad Bowman, assistant to Senator Ayotte; Ryan Kaldahl, assistant to Senator Collins; and Sergio Sarkany, assistant to Senator Graham.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody. The committee meets this morning to consider the nomination of General Martin Dempsey to be Chairman of the Joint Chiefs of Staff. It was not long ago that General Dempsey came before us for his nomination hearing to become Chief of Staff of the Army. We welcome him back, with thanks again for his 36 years of dedicated service to our Nation and his willingness to serve as Chairman of the Joint Chiefs of Staff.

As we know from those decades of service, General Dempsey is an exceptionally well qualified American soldier and leader. As we were reminded at his last hearing, he is also a proud husband, father, and grandfather. General Dempsey, we remain grateful for the sacrifices that you and your family have made over the years, for the devotion of your beloved wife Deanie, and the military service of your daughters and your son. As is our tradition, at the beginning of your testimony we would welcome your introducing to us any family members and friends who may be with you this morning.

General Dempsey will replace Admiral Mike Mullen as Chairman of the Joint Chiefs of Staff, the most senior military adviser in the Department of Defense (DOD). Admiral Mullen's service over the last 4 years during the daunting challenges of the wars in Iraq and Afghanistan has been truly remarkable and the Nation owes him our deepest gratitude.

It is appropriate at today's hearing also to note the passing last week of former Chairman of the Joint Chiefs of Staff retired Army General John Shalikashvili. General Shalikashvili's personal story is well known, rising from post-World War II immigrant youth to Chairman of the Joint Chiefs. His example of patriotism, leadership, and selfless service to the Nation and our Armed Forces inspired the generation that leads our military today. For those of us who knew him, we treasured his professionalism, his candor, and his deep love for America and our men and women in uniform.

General Dempsey's confirmation will help complete the transition to President Obama's new national security team, which has seen significant changes in the last few months. The next Chairman of the Joint Chiefs of Staff will face complex and demanding challenges as operations in Afghanistan and Iraq continue at the same time the fiscal realities that confront the Nation will put tremendous pressures on the Defense Department's budget.

Those fiscal realities require us, when considering defense planning and programs, to take into consideration historic budgetary constraints. Admiral Mullen has said that: "Our national debt is our biggest national security problem." Most everyone agrees that the Defense Department cannot be immune from efforts to bring our fiscal house in order.

We have been told that the Department is conducting a comprehensive program review and that the details are not yet known, but it is likely that this review will include significant additional

suggested reductions in the 2012 budget request, cuts that are even more than the \$6 billion reduction to the Department's request that this committee recently reported in our fiscal year 2012 authorization bill.

The Department will have to make tough funding choices and we will need our military's best advice on how to reduce spending that realistically manages risk in ways that adequately addresses our top national security challenges. We will be interested in hearing General Dempsey's thoughts on defense spending and in particular whatever he can tell us about the comprehensive national security review that I referred to.

The next Chairman of the Joint Chiefs will also have to manage the transition of security responsibility and the drawdown of U.S. forces in both Iraq and Afghanistan. In Iraq, the coming months will be crucial, leading up to the December 2011 deadline for the withdrawal of our remaining 49,000 U.S. troops. Even though there are still concerns in Iraq over their security forces' capacity to assume full responsibility for Iraq's security, Iraq's political leaders have yet to request that the United States consider retaining a U.S. troop presence there beyond the end of the year deadline set by President Bush for complete military withdrawal. We will be interested to hear what General Dempsey's recommendations would be if the Government of Iraq makes a timely request for a continuing U.S. troop presence beyond 2011.

In Afghanistan, the President has set a course for transitioning increased security responsibility to the Afghans and drawing down U.S. forces, beginning with the withdrawal of 10,000 U.S. troops by the end of this year and bringing the balance of 33,000 U.S. surge forces home by next summer. I applaud the President for sticking to the July 2011 date that he set in his West Point speech 1½ years ago for the beginning of the drawdown. Doing so offers the best chance of success for the counterinsurgency campaign in Afghanistan. That is, getting Afghan security forces in the position to take principal charge of that nation's security.

The sense of urgency that this timetable created at the highest levels of the Afghan Government contributed to a surge of some 100,000 additional Afghan security forces in just the last year and a half. Over the next 15 months, the Afghan security forces will be increasingly in the lead in operations, while another 70,000 Afghan soldiers and police will be added to their ranks.

At the same time, General John Allen, the commander of coalition forces in Afghanistan, stated that the campaign plan calls for more and more Afghan security forces to be partnered in operations with fewer coalition forces. The growth in the capabilities of the Afghan security forces, both in quantity and professionalism, has already made possible the first phase of transition to an Afghan lead for security in a number of provinces and areas around Afghanistan.

A significant challenge to achieving our goals in Afghanistan remains Pakistan's failure to act against militant extremists like the Haqqani network in North Waziristan, the Afghan Taliban around Quetta, and other militant extremists. We will be interested in hearing General Dempsey's thoughts on how to get the Pakistan

military to go after terrorist groups finding sanctuary in Pakistan's Tribal Regions.

Al Qaeda in the Arabian Peninsula in Yemen and al Qaeda elements of al Shabab in Somalia continue to take advantage of failing and failed states to train their operatives and to plan attacks against the United States and our interests. It is critical that we continue to apply significant pressure to these terrorist organizations and to work with governments and international organizations in the region to address the long-term problems.

Iran remains probably the greatest risk to world peace and to regional stability. We share the concerns of many nations about Iran's continued support of terrorist activities beyond its borders, development of its missile programs, and refusal to cooperate with the International Atomic Energy Commission with respect to its nuclear program. While we have seen evidence that the international sanctions have put stress on Iran, more remains to be done to pressure Iran to give up its nuclear weapons ambitions.

In Libya, our Armed Forces continue to provide unique enabling capabilities to our North Atlantic Treaty Organization (NATO) and regional partners as they carry out the United Nations mandate to protect Libyan civilians from a dictator bent on killing his own people and destroying a country simply to preserve his grip on power.

In the dynamic Asia Pacific region, we are committed to working with our many allies and partners to maintain peace and stability and to align our forces in a way that is both strategically sound and fiscally responsible. This is not only true in Northeast Asia, where the United States is realigning its forces in Korea and Japan, but it is also true in South and Southeast Asia.

General Dempsey's leadership will be critical in determining how the Defense Department and indeed the Nation addresses the many and growing threats to our cyber security. All of our military communications, weapons systems, support, intelligence, and virtually everything else that DOD does relies on cyber networks. Making sure that we have the policies, practices, and technologies to reliably support military operations is a matter of increasing urgency. A recent critical Government Accountability Office (GAO) report emphasized the urgency of having a clear and coordinated cyber policy put in place.

General Dempsey no doubt will also be called upon to help develop national cyber security policies, such as when does a cyber attack on activities or entities in the United States require or justify a U.S. offensive response, cyber or otherwise. We'll be interested in hearing General Dempsey's views on that.

Repeated deployments of our military over the last decade has resulted in many of our service men and women being away from their families and homes for many tours, stressing our servicemembers and their families. Reducing the demand for deployed forces is essential to increasing time at home station, increasing unit readiness, and reducing our strategic risk in the event of an unforeseen contingency. We look forward to hearing General Dempsey's views on how best to manage both the demand for rotational forces and how we meet that demand while restoring our strategic depth, that is the readiness of our non-deployed forces.

The Nation could not be more proud of their families. We are grateful for General Dempsey's leadership and his willingness to assume greater responsibility for the readiness, employment, and care of all of our forces and the families that support them.

Senator McCain.

STATEMENT OF SENATOR JOHN MCCAIN

Senator MCCAIN. Thank you, Mr. Chairman. I add my welcome to General Dempsey and his family, his wife, and congratulate him on this nomination.

I first want to express my condolences to the family of General John Shalikashvili, who passed away last Saturday. General Shali was born in Poland of Georgian parents in 1936, fled from the advancing Soviets near the end of World War II, came to the United States as a teenager, and rose in the ranks to become Chairman of the Joint Chiefs of Staff from 1993 to 1997. He was a great American patriot and Army leader.

General Dempsey, just 3 months ago on April 11, you became the Chief of Staff of the Army. You're now poised to become the Chairman of the Joint Chiefs of Staff. Your impressive history of assignments I believe has prepared you well to become the principal military adviser to the President and the leader of the Joint Chiefs. Without question, your combat experience and career military leadership, your service as Acting Commander of U.S. Central Command (CENTCOM), and your thorough understanding of our transforming force stressed by a decade of combat will serve you well as strategic decisions regarding Iraq and Afghanistan must be made and we face hard calls about our priorities in the future.

We're conducting this hearing at a time when Americans are deeply frustrated over the enormous debt we've accumulated and the effects of runaway entitlement spending on our economy and on our future. In this very difficult fiscal environment, there's no doubt that the defense budget will be constrained in the years ahead as we seek to solve our debt crisis.

Clearly, DOD cannot afford to waste taxpayers' resources on Pentagon programs that are over cost, behind schedule, or fail to provide an increase in warfighting capability to our troops. However, I hope the President and the Secretary of Defense, with your assistance, advice, and counsel, will realize that defense expenditures following the attacks of September 11, which were preceded by nearly a decade of drastic reductions in military personnel, equipment, and readiness, are not the cause of the economic dilemma we find ourselves in today.

Congress and the President must address the issue of unsustainable deficit spending and unprecedented debt in non-defense spending and entitlements which will impact the future of our military during your term. Since this year began, the President has already asked the Defense Department to cut more than \$178 billion by finding efficiencies and taking top-line reductions in proposed defense spending over the next 5 years. But, even the current direction by the President to cut an additional \$400 billion in defense spending by 2023 has been eclipsed by some debt reduction proposals that include \$800 billion to a trillion dollars in cuts in defense spending over the next 10 years.

I'd be the first to suggest that the Defense Department budget could be responsibly reduced and reasonable people can disagree over how deep those cuts should be. But what concerns me most about our current debate is that the defense cuts being discussed have little to no strategic or military rationale to support them. They are simply numbers on a page. Our national defense planning and spending must be driven by considered strategy, not arbitrary arithmetic.

The defense cuts currently proposed reflect minimal, if any, understanding of how they will be applied or what impacts they will have on our defense capabilities or our national security. While Secretary Panetta has made it clear that a comprehensive review will precede any decision of further defense cuts, Congress currently has no specific indication of how the current proposals would impact the size of our military forces, what changes they would require to our compensation system, what equipment and weapons would have to be cancelled as a result, or what additional risks to the readiness and modernization of our forces and their equipment we would have to accept.

If Congress is to make informed decisions about our national defense spending, we need information like this. I hope, Mr. Chairman, that we can begin holding hearings on this important subject.

I also hope that you will carefully monitor Department contracting and expenditures. Your frankness and candor on how money is spent by the Department will be much needed by Congress as we assess how to direct Pentagon spending.

General Dempsey, obviously I'm confident you will be confirmed. I hope you and Secretary Panetta will avoid misguided and excessive reductions in defense spending that cut into the muscle of our military capabilities. Defense spending is not what is sinking this country into fiscal crisis, and if Congress and the President act on that flawed assumption they will create a situation that is truly unaffordable—the hollowing out of U.S. military power and the loss of faith of our military members and their families.

I trust that you will have the ability and confidence to advise the President and Congress on your views regarding the health of our military and the ability of our forces to meet our cooperative security commitments with our allies around the world. We will need an honest and forthright military assessment of the impacts of funding decisions.

I look forward to your opinions today and on these matters and your vision of the way forward. Again, my congratulations.

Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator McCain.

General Dempsey.

STATEMENT OF GEN MARTIN E. DEMPSEY, USA, FOR RE-APPOINTMENT TO THE GRADE OF GENERAL AND TO BE CHAIRMAN OF THE JOINT CHIEFS OF STAFF

General DEMPSEY. Chairman Levin, Senator McCain, distinguished members of the Senate Armed Services Committee, I'm honored by the opportunity to appear before you today in support of my nomination as Chairman of the Joint Chiefs of Staff. I want to thank the President and both Secretaries, Gates and Panetta,

for their confidence in me. I also want to compliment Admiral Mike Mullen for his remarkable service over more than 4 decades as he nears the end of a distinguished career. I would as well like to add my condolences to the family of General John Shalikashvili. He was truly an accomplished soldier and a great American.

As always when something important is happening in my life, I am joined this morning by my wife Deanie. I met Deanie 41 years ago and she's been my wife for just over 35 of those years. I have asked a lot of her and she's always given more than I've asked. We have three wonderful children, three near-perfect grandchildren, and three more on the way.

We're also blessed to have several brigades' worth of young men and women in uniform and their families with whom we've served and who we consider our extended family and it's on their shoulders that I have been lifted up today to be considered for this position.

But it won't surprise you to know that the glue that holds all of that together is Deanie, and I can't thank her enough for her love and support and for her dedication to our military, its families, and our Nation.

I appeared before this committee just a few short months ago and as far as I can tell my tenure as 37th Chief of Staff of the Army hasn't changed me very much. However, now that I'm nominated as Chairman, the images that drive me are beginning to change. I'll share just one of those images.

In 2008, as the Acting Commander of CENTCOM, I visited the aircraft carrier *USS Abraham Lincoln* in the Indian Ocean and observed flight operations there that were being conducted in support of ground operations in Afghanistan. As I watched these brave young men and women departing on their missions, I saw looming in the background on the superstructure of the aircraft carrier the imposing profile of Abraham Lincoln, and inscribed above that image were the words "Shall Not Perish," taken, of course, from Lincoln's Gettysburg Address. It occurred to me then, as it reminds me now, that those who volunteer to serve our country in uniform understand what's at stake when we send them into harm's way.

I relate this story simply to assure you that I know what this nomination means and I will do my best to live up to the responsibility. If confirmed, I will work with the Joint Chiefs to ensure that this Nation has the military it needs.

It's clear we have work to finish in the current conflicts and it should be just as clear that we have work to do in preparing for an uncertain future. Our work must result in a joint force that is responsive, decisive, versatile, interdependent, and affordable. We must keep faith with service men and women, their families, and our veterans.

We're all very proud of the military forces of the United States and this committee has been instrumental in making it the finest force ever assembled anywhere at any time. We are also aware that a new fiscal reality confronts us.

In 1973, as Chief of Staff of the Army, General Creighton Abrams led us out of the Vietnam conflict and he said that it was the enduring role of the Army to ensure that America remains immune from coercion. That benchmark remains as true today as it

was 38 years ago, and it applies, of course, not only to our Army, but to all our Services.

I look forward to working with the Joint Chiefs, with our civilian leaders, and with the members of this committee to adapt the U.S. military to a new fiscal reality while ensuring, as my primary responsibility, that America remains immune from coercion. Should you confirm me as Chairman, you have my solemn commitment to those tasks.

Thank you and I look forward to your questions.

Chairman LEVIN. Thank you very much, General Dempsey. Again, thanks to Deanie.

General, the committee has a series of standard questions that we ask all of our nominees and I'll ask them of you. Have you adhered to applicable laws and regulations governing conflicts of interest?

General DEMPSEY. I do, sir.

Chairman LEVIN. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

General DEMPSEY. I will.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

General DEMPSEY. I have not.

Chairman LEVIN. Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

General DEMPSEY. I will.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

General DEMPSEY. I will.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

General DEMPSEY. They will, sir.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify upon request before this committee?

General DEMPSEY. I do.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

General DEMPSEY. I do.

Chairman LEVIN. Let us have a 7-minute first round of questions. I understand there's a vote at around 12:15.

General, first relative to Afghanistan. On June 22, President Obama announced his decision that the United States would draw down its forces in Afghanistan by 10,000 by the end of this year and the remaining 23,000 U.S. surge forces by the end of the summer in 2012, for a total drawdown of 33,000. Do you agree with the President's decision on these reductions?

General DEMPSEY. I do, Senator. I've been in contact with both General Petraeus and now General Allen and, based on their mili-

tary judgments and the options they've presented, I do agree with the decision taken.

Chairman LEVIN. How important is it to the success of the counterinsurgency campaign in Afghanistan that we maintain the momentum for transitioning more and more responsibility to the Afghan security forces for their country's security?

General DEMPSEY. As it was in Iraq and is now in Afghanistan, it is the transition at the end of the day that will determine our successful outcome. Of course, it does take a great deal of thought, a great deal of deliberation and collaboration, to understand the capabilities as they are accrued by security forces of those nations where we task ourselves to build those security forces.

Chairman LEVIN. A recent Defense Department report called the extremist Haqqani network "the most significant threat in eastern Afghanistan". Yet, the Haqqanis continue to find safe haven across the border in Pakistan and the Pakistan army has so far refused to conduct major operations to eliminate the Haqqani sanctuary in the tribal area of North Waziristan.

Will you press the Government of Pakistan to take the fight to the Haqqani network in North Waziristan?

General DEMPSEY. I will, Senator. As the Acting Commander of CENTCOM, in those days we talked about four particular networks that existed along the Afghan-Pakistan border, and we encouraged our Pakistani counterparts to press them. They have pressed some of those groups, but not all. It's not always been clear to us exactly why they press some, but not all. But I will continue to work with Pakistan to reduce the safe haven on the Pak border.

Chairman LEVIN. In answers to your advance policy questions, you state that in working with Pakistan on security cooperation we should not push programs the Pakistanis do not want, because doing so dilutes the value of U.S. cooperation, and you call for a frank and respectful dialogue in order for our security cooperation to be successful.

Can you give us your assessment on the DOD programs of assistance to Pakistan, in particular the coalition support funds and the Pakistan counterinsurgency fund, and to tell us whether or not those are programs that the Pakistanis want or whether or not we've been pushing them on Pakistan, which has reduced Pakistan's buy-in to those assistance programs?

General DEMPSEY. I'd reflect back on my tour as the Acting Commander of CENTCOM in answering this question. I'm not current on the state of the coalition support funds and the programs you described as they've evolved. But I will tell you it's always been a matter of discussion between us and our Pakistan counterparts about what threats are most serious to them and to us. They persist in the idea that India poses an existential threat to their existence, while the terrorists that operate with some impunity in the Northwest Frontier Province and in the Federally Administered Tribal Areas are less threat to them, and therefore they allocate their resources accordingly and they embrace different engagement activities with us differently.

We have been, over the course of time, working to convince them that the terrorist threat, the extremist threat, to their west is as great a threat and probably a greater threat to them than any

threat that India might pose. But it's on that basis, it's on that intellectual disagreement about what is most threatening to them, that these programs are viewed. We would tend to view programs to improve counterinsurgency capability in their general purpose forces, policing and security role for their Frontier Corps, we would tend to view those as more important than the higher end processes and programs. It's just one of those things we have to continue to work through.

Chairman LEVIN. Thank you.

There's been a great deal of discussion about standards of interrogation and detainee treatment, and some of the language in our authorization bill relates to that subject. First, do you support the standards for interrogation and detainee treatment which are specified in the Army Field Manual on Interrogations?

General DEMPSEY. I do, Senator.

Chairman LEVIN. Would you tell us why?

General DEMPSEY. I had a hand in preparing them and so I have a certain sense of ownership for them. But I do think that they articulate the nexus of the importance of gaining intelligence with the importance of preserving our values as a Nation and as an Army.

Chairman LEVIN. Would you agree that the standards for detainee treatment should be based on the principle of reciprocity, in other words that the manner in which we treat detainees that are under our control may have a direct impact on how U.S. troops are treated should they be captured in future conflicts?

General DEMPSEY. I do believe that reciprocity should absolutely be one of the principles on which our approach to detainee operations should be based.

Chairman LEVIN. A number of us—many, probably all of us on this committee—are increasingly concerned about cyber attacks. It's a subject of, obviously, great and increasing concern for our country. One of the questions is whether or not when we are a victim of cyber attack, as to how we should respond. Of course, I guess the real question is whether or not we can identify the attacker as being a state actor and whether or not an attack is intentional or not. It could be an act of espionage which we engage in ourselves. We engage in espionage and other countries engage in espionage, and those acts apparently are not considered to be acts of war.

On the other hand, if something intentionally damages, destroys, a facility or an entity in another country that it would seem to me at least to be an act of war or an aggressive act which requires a response.

Can you give us your thinking about the whole growing emerging issue of cyber attacks and how should the Defense Department participate in determining what the response is to those attacks?

General DEMPSEY. I can, Senator, but I'll confess at the start that my thinking on this is nascent at best. It has been suggested to me that, if confirmed, the issue of cyber and cyber warfare, the cyber domain, will probably be one of a handful of issues that define my tenure as Chairman. I'm taking a greater interest in it. But I have some thoughts on it right now as well.

The decision about whether something is an act of war or whether we would respond to it is, of course, a political decision, and it's the role of the Department and, if confirmed, with my advice as Chairman, on how to respond to it. At this point my greater interest is in determining what capabilities we must provide the Nation to be prepared to respond should we be attacked and should the determination be made that it was a hostile act or an act of war.

You've described the challenge very articulately. It's very hard to trace fingerprints and threads back through the cyber domain because of the ability to use servers at remote locations. It's a place, it's a domain, where anonymity is more an issue than it might be in the domains of space, air, land, or sea.

That said, we have done a lot of work. You know that the President published a policy in May 2011. That was followed up just a week ago, actually, by a DOD declaration by Deputy Secretary of Defense Lynn, and at this point I'm in the process of studying that. I have a series of meetings scheduled, if confirmed, between the time I'm confirmed and when I take the job, with those who are delivering that capability today to better understand it.

Chairman LEVIN. Thank you very much.

Senator McCain.

Senator MCCAIN. Thank you, Mr. Chairman.

Again, congratulations, General. Just to follow up on what Chairman Levin said, you want to assess the capabilities, but you have to develop a strategy and a policy before. That comes before the capabilities, in all due respect.

Look, this is a serious issue. Congress has not done its job, but certainly DOD has not done its job, and to just say we're going to assess our capabilities—we have to develop a strategy. This is a serious, serious issue that hardly when we pick up the newspaper every week or so that somebody hasn't been hacked into, not always military, but industrial, which obviously are key to our Nation's economic and military success.

I suggest you start working on a policy, and I also suggest we here in Congress start working on legislation which would implement that policy.

I hate to keep going back to this issue of the withdrawal from Afghanistan. Now, the President announced the drawdown, and you said you supported it. Was it recommended by any military leader, the President's schedule for the drawdown?

General DEMPSEY. Senator, my understanding is that General Petraeus proposed three options. I haven't talked to him about how he felt about those options, but no military man would propose an option he considered to be infeasible. The President chose one of those three options. So I can only say—

Senator MCCAIN. General Petraeus did not give him this option of the accelerated withdrawal so that they didn't have two fighting seasons, General. I'm sure you know that.

General DEMPSEY. No, I do not know that, Senator.

Senator MCCAIN. You do not know that?

General DEMPSEY. I do not.

Senator MCCAIN. General, I'll send you the testimony of General Petraeus before this committee, and I'm disappointed that you didn't know that, because it was not recommended by any military

leader, nor would it be. In fact, General Petraeus and others have testified that it increased the risk. Do you share that view?

General DEMPSEY. I think it did increase the risk, yes.

Senator MCCAIN. Thank you. An unnecessary risk in my view.

I want to talk about budget cuts. You just left as Chief of Staff of the Army and I understand the President has called for \$800 billion in budget cuts; is that correct?

General DEMPSEY. The current number we're targeting is \$400 billion, Senator, over 12 years.

Senator MCCAIN. Have you developed any plans as to how to implement that?

General DEMPSEY. We are working on that even as we speak. We have a task from the Department to look at what the impact of that budget cut would be.

Senator MCCAIN. When could we expect to have that assessment, since the appropriations process moves on here?

General DEMPSEY. Senator, back to your point about strategy, we have a task to try to keep strategy running parallel with resource decisions, and the comprehensive strategy that the chairman mentioned is due for completion some time in late September, early October.

Senator MCCAIN. So we have announced cuts without the commensurate strategy to go along with it? Not comforting.

General DEMPSEY. Senator, what I would describe is we've announced a target and we're trying to determine what the impact would be to meet that target, and we are looking at that.

Senator MCCAIN. In most cases that I've seen, the strategy has been developed and then the budget for it is arrived at, not the other way around.

General DEMPSEY. Sir, I can speak as the Chief of Staff of the Army. Because the cuts are articulated over 10 or 12 years, it'll affect four program operating memorandums. Decisions taken in 2013–2017 would not be binding on the following three targets, but would certainly affect that program operating memorandum.

Senator MCCAIN. But we are talking about \$80 billion developed for next year; is that correct?

General DEMPSEY. Potentially, sir.

Senator MCCAIN. Potentially?

General DEMPSEY. Again, sir—

Senator MCCAIN. Isn't that what the President has called for?

General DEMPSEY. He has, sir, but we have not provided the analysis back to the Secretary of Defense on what the impact would be as yet.

Senator MCCAIN. Which brings me again full circle. We have announced cuts without a commensurate assessment of the impact of those cuts. In your view, what would an \$800 billion to \$1 trillion cut in defense spending over the next 10 years do to our readiness, General?

General DEMPSEY. Senator, I haven't been asked to look at that number, but we have looked and we are looking at \$400 billion. I would react in this way. Based on the difficulty of achieving the \$400 billion cut, I believe \$800 billion would be extraordinarily difficult and very high risk.

Senator MCCAIN. I forgot to mention at the beginning of our conversation an article yesterday: "U.S. drawdown, internal crises, fuel fears for Afghanistan. The start of the U.S. troop drawdown, overlapping security, political, and economic crises are fueling fears that Afghanistan could sink into wholesale turmoil and even civil war as the U.S.-led international combat mission winds up at the end of 2014."

Are you concerned about that?

General DEMPSEY. Yes, sir, I am.

Senator MCCAIN. On the supply routes for Afghanistan, our relations with Pakistan have hit in the view of most observers an all-time low. Have you assessed and looked at, in your previous role, the impact on our ability to supply the forces in Afghanistan if the Pakistanis cut off those supply routes across Pakistan?

General DEMPSEY. Yes, Senator, we have.

Senator MCCAIN. What's been your conclusion?

General DEMPSEY. The conclusion is that we would have to rely more on what we describe as the Northern Supply Route, which does exist, and that it would be more expensive.

Senator MCCAIN. Suppose tomorrow Pakistan cut it off, what would be the period of time between then and when you would be able to maintain the same level of supply through the northern routes or air resupply?

General DEMPSEY. It would be a classified issue of how many days of supply we maintain inside the country. But beyond that, we believe that if that Southern Supply Route were cut off that we could react.

Senator MCCAIN. You could react. There would be a delay?

General DEMPSEY. Yes, sir, but in a way that would not jeopardize the mission.

Senator MCCAIN. Would not jeopardize the mission.

A group chartered by the Secretary of the Army to look into how the Army procures major weapons systems found that every year since 1996 the Army has spent more than \$1 billion annually on programs that were ultimately cancelled. Since 2004, \$3.3 billion to \$3.8 billion per year of Army developmental testing and evaluation funding has been lost to cancelled programs, including the now-cancelled Future Combat System program.

As we know, the cost of the F-35 has lurched completely out of control. The few short months after the awarding of the contract to Boeing for the new tanker, it is now another additional billion dollars in cost, and the list goes on and on. What's the level of your concern and what do you think we ought to be doing about it?

General DEMPSEY. Senator, as we discussed when I was here a few months ago, it would be impossible to sit here and justify the current process, given that it has not delivered the capabilities we've required within the resources available to do so. I think that we're in a point where we absolutely have to seek acquisition reform. I know that the Under Secretary of Defense for Acquisition is seeking that. I know we were helped by the Weapons System Acquisition Reform Act. You know that the Department, based on that, is seeking the Better Buying Power Initiative. We're working toward it.

Right now there's probably a reason to consider a different role for the Service Chiefs in acquisition. Right now it's kind of bifurcated. Service Chiefs do requirements, acquisition does material solution. That hasn't worked and I think it has to be revisited.

I completely agree with your assessment of our current state. Nevertheless, we need capabilities. It will be my role, if confirmed, to argue for that fifth generation fighter, but a fifth generation fighter that the Nation can afford. Therefore, the way to that is through acquisition reform.

Senator MCCAIN. I thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator McCain.

Senator MCCAIN. Thank you, General.

Chairman LEVIN. Senator Reed.

Senator REED. Thank you very much, Mr. Chairman.

Thank you, General Dempsey, for your service to the Army and to the Nation. I have every confidence you're going to be a superb Chairman of the Joint Chiefs of Staff, and I'm going to recognize Deanie and your family. I think I properly pointed out to the chairman that, although you were high school sweethearts, you married after West Point. I just want to make sure of that because it's problematic otherwise.

I also want to salute Admiral Mullen for his extraordinary service and join my colleagues in recognizing the extraordinary service of General John Shalikashvili. General Shalikashvili proudly said he was a citizen of only one country, the United States of America, despite where he was born and where he traveled. He was the consummate citizen soldier, and to his family my deepest sympathies.

The issue that is before us, and it's been alluded to and talked about in your previous hearing for Chief of Staff of the Army, is the budget. With the sake of risking oversimplification, there's at least three major categories that you have to deal with: force structure, including pay and allowances, in this context the Reserve Forces and the retired forces and the National Guard, but particularly retirees; equipment, procurement, how much it costs, what do you need, can you suspend acquisitions; and finally, the issue of operations and training, where we're going to go in an operational sense and how are we going to train.

With that as a very broad context, can you comment upon the approach you're going to take with respect to these issues and the budget you face?

General DEMPSEY. Yes, Senator. I think the important point to make in the question of how to absorb reductions or debt total obligating authority is really to reinforce that it must touch each of the things you mentioned. We will not be able to change the size and the capability of the force—and I'll speak for the Army because I'm immersed in it now—unless we do so by touching each of those areas you talked about.

For example, if we try to artificially preserve manpower we will suffer the consequences in modernization and in operations, maintenance, and training. Conversely, if we go after just manpower, it won't make any sense to have the kind of resources in operations, maintenance, and training.

This really requires us to maintain balance as we make any changes that become necessary by virtue of budget support. I'll also

say that includes pay, compensation, retirement, and health care, because it's important that we place everything on the table, assess the impact, and then request the time to do it in a deliberate fashion, so that we can maintain balance at whatever level we end up at.

Senator REED. When you address the issue of pay and allowances, retirement compensation, health care, there are two factors. One is the relationship between funding those programs and funding troops in the field, equipment in the field, etcetera. Do you propose to make that very explicit, particularly to the retirement community, that with the top line there's no longer the possibility of simply adding more money, that there has to be tradeoffs between operations, training, troops in the field, their safety, and some of the benefits that have accrued to retirees?

General DEMPSEY. I think what I would say—yes. If I could, I'll just elaborate for a moment.

Senator REED. Yes, sir.

General DEMPSEY. I think it's very important that we maintain an open dialogue with all parts of this total force, Active, Guard, Reserve, families, retirees, to help them understand the challenge. The challenge is simply this, and again I'm speaking just for the Army. Right now our manpower costs consume approximately 42 percent of our budget. Left unabated, that is to say left unaddressed, that will rise to approximately 47 or 48 percent by 2017. That is not sustainable.

The question then comes back, what should we do about it and how can we do so in a way that maintains the trust we've established with our force over time. I'll say one other thing. What makes this budget discussion different—I'm a student of history, and I've studied the post-Vietnam period, I've studied the post-Operation Desert Storm/Desert Shield period. What makes this period different is we're doing all this while we're still actively engaged in conflict and we have young men and women in harm's way. That adds a degree of complexity and a degree of uncertainty that I think we can't discount.

Senator REED. A final point with respect to this whole issue of how do you rebalance the personnel costs, etcetera. I presume your view would be to lead from the top, that senior officers and senior personnel would be the first ones to stand up and say: If it's going to have to happen, it'll happen with us. Is that fair?

General DEMPSEY. Did you have to ask me that question in front of my wife, Senator? [Laughter.]

But the short answer is: Absolutely. I think it's leading from the top individually, but I also think it's leading from the top at examining our structure, which tends to be rather top-heavy and in fact historically, again if you look through conflicts, headquarters grow in ways that have to be reconsidered and reformed after conflict.

Senator REED. Let me slightly change the subject, but I think it relates to what we've been saying, that we are on our way out of Afghanistan, as we are in Iraq. Going forward, you have to be prepared to successfully hand over significant activities to the Department of State, to the U.S. Agency for International Development, et cetera. Your success in transition is a function of the resources

they must receive. My perception being here is that when the defense budget is reduced, the State Department budget is decimated.

Do you, one, have those concerns; and two, consciously, if we are going to maintain a credible security force beyond 1 or 2 years, we're going to have to internationally provide resources to Afghan national forces. Is that going to be one of your priorities? My only historic hook here is that Najibullah, the last Soviet-era leader, survived 2-plus years after the Soviets withdrew, but when the resources—and not just for the military, but for everything—dried up, his days were literally numbered.

General DEMPSEY. Yes, sir. We certainly don't want to be guilty of reprising the epilogue of Charlie Wilson's War. I take your point completely. My job will be, given the strategic objectives in Afghanistan, to determine how best to meet them. If and when U.S. force structure reduces, what is it that compensates for that. Is it other agencies of government?

The measure of national power is the aggregate of economic strength, diplomatic strength, and military strength. All three of those have to participate in these outcomes and all three of these have to be considered as we look at these reductions to make sure we stay in balance in that way as well.

Senator REED. Thank you for your service and thank you for your family's service. Thank you.

Chairman LEVIN. Thank you very much, Senator Reed.

Senator SESSIONS.

Senator SESSIONS. Thank you, Mr. Chairman.

Thank you, General Dempsey, for your leadership and your commitment, your willingness to serve in harm's way. I notice just looking at your bio—I looked at it because I remember seeing you in Iraq and coming back and you were still there. I notice you were there the first tour 16 months, came home to Germany and were deployed there for 10 months, and back for 21 months. That's the kind of deployment that a number of our military people have made serving their country in dangerous areas of the globe. I just want to personally thank you for your commitment, and I think it reflects the kind of commitment many other enlisted people, many other of our leaders in the military, have exhibited.

Mrs. Dempsey, it's good to see you, and thank you for being a good partner in those difficult years.

I just want to follow up on Senator McCain's comments about the budget. We've had a lot of people believe that the deficit is caused by the war in Afghanistan and Iraq. It certainly was not inexpensive. It's been an expensive process. Last year was one of our highest years, \$158 billion committed to that effort. But our deficit—I say "last year"; the year we're in, we're projected to spend \$158 billion. It looks like our deficit this year will be \$1,500 billion. A little more than 10 percent only, if you eliminated the war, of our deficit would be eliminated. Over the period of time, that percentage has been fairly accurate about the cost of the war.

I also am a bit troubled that some of the projections for our spending go from, next year we're projected to drop from \$158 to \$118 billion for the overseas contingency operations (OCO). Is that your understanding?

General DEMPSEY. It is, Senator.

Senator SESSIONS. I think is it the next year, 2013, that it's projected to go to just \$50 billion?

General DEMPSEY. I have seen that number, but I'm more confident in the \$118 billion than I am in the follow-on years.

Senator SESSIONS. It would be a dramatic drop to \$50 billion that quickly. I don't think that is likely to be achieved and I'm concerned about it. The President's budget projects \$50 billion for the rest of the decade there for spending. I don't know if that's accurate or not.

I would say that we can't let numbers like that drive the agenda. The agenda has to be if we can draw down our forces, good, let's do it in a strategic, smart way that does not put our soldiers or the goals they've put their lives at risk for in jeopardy just to meet that kind of goal. I hope and expect that you would advise us if you think that number is not acceptable. Would you?

General DEMPSEY. I wonder, Senator, if I could—I mentioned earlier that I'm not a man of numbers necessarily or charts and wiring diagrams, but rather images. Could I ask my staff to pass out an image to you by way of answering your question, if I could? [The information referred to follows:]

General DEMPSEY. While the staff is handing this image out, one of the things we've said consistently, my predecessor and his predecessor as Chief of Staff of the Army, is that when this conflict ends, however we define "ends", it'll take 2 years for us to reset the force because of the stress and strain on equipment and people. It'll take us 2 years to reset, and that reset should be in my judgment funded by OCO and therefore it will be my responsibility, on behalf of all the Services, to define what will it take to reset the force once we have the opportunity to do so.

If I could just ask you to glance at the picture. I've done a lot of thinking about what is it that will get us through, has gotten us through this last 10 years, because frankly if someone had suggested to me 10 years ago that we would be able to fight a war for 10 years with an All-Volunteer Force, I honestly would have been skeptical about it. We have gotten through that, and not only have gotten through it, but we've actually flourished. The force is extraordinarily healthy.

Whatever we do, it's important to remember we're doing it from a foundation of great strength. It is truly the finest military force we've ever had, all components.

The reason I like that picture—my sergeant major, by the way, doesn't like it because the soldier's not wearing his eye protection and he has his sleeves rolled up. But I asked him to get beyond that for a moment, because that picture speaks to me, that image speaks to me, on the issue of trust.

It's trust because, as you see, there's a soldier protecting that soldier's flank. He's wearing a wedding band, so it reminds us that they're married and they trust that we'll take care of their families both now and into the future.

Here's the point. He's on the radio and he's calling for something, and we don't know what it is. It could be a medevac, it could be close air support, it could be artillery. It's likely to be another Service that delivers it. But here's the profound point not to forget: What makes us unique is that noncommissioned officer (NCO) believes he's going to get what he asks for. We are the only army on the face of the Earth that believes that when you ask for something because you need it to prevail in the environment we place you, you're actually going to get it.

As we do whatever we have to do with this force based on the resources, the one thing we cannot lose is that relationship of trust that exists, that what that soldier, airman, sailor, marine, or coast guardsman needs to do the things we ask him to do, they have to have it. That's what carries us through.

In answer to your question about budget numbers, I don't know. But what I do know is that I will not allow that relationship of trust to be violated.

Senator SESSIONS. Thank you. I think this is a very critical point, that we have the finest military the world's ever assembled. They are courageous. They put their lives on the line. They've lost their lives in significant numbers and been injured significantly. But they do have to be confident the people of this country are behind them, and sometimes that means money, dollars, that get them the things that they need. I appreciate your comments on that.

General Dempsey, on a specific matter, I notice in your answers to the advance policy questions you note that you supported the decision to retain three brigade combat teams in Europe and this is the answer—I'm sure staff helped you put it together, since I notice you have a master's in English at Duke, typical of our high quality and highly educated officer corps. But it says: "... to meet a wide array of engagement, building partner capacity, and interoperability objectives while being prepared to support a full range of military operations needed for plausible European and global contingencies."

I'm not sure what that means, but I don't think we need three brigades to do it there. The plan was to bring it to two. I understand we're talking about a new hospital for Lanstuhl, which if, we pray, we're successful in drawing down, maybe that can be scaled down. But that's the kind of things I think we need to ask about when our allies are spending about 1.2 percent of gross domestic product (GDP) on defense, 1.3, only a few of our NATO allies are meeting the goal or coming close to the goal of 2 percent, while we're over 4 percent of GDP on defense. I think we have to ask ourselves, can we continue to maintain that kind of forward deployment of brigades when we were supposed to be reducing to two?

My time is up, Mr. Chairman.

I know you've given that answer that you support the three, but I'd like you to say that you will at least reconsider that in the months to come.

General DEMPSEY. First of all, Senator, I apologize for the run-on sentence. That one got past me, apparently.

But I will say I am an advocate of forward presence—I want to be clear about that—for all the things it does for us, not just for our allies. Second, I am a strong advocate of maintaining a strong relationship with our current allies, because they've been tried and true. I know that we sometimes look at, compare an individual NATO country to us, but the reality is that in the aggregate they commit about \$300 billion a year to defense in the aggregate, and they are serving very bravely and courageously with us in Afghanistan. Notably, I was at a ceremony at the French embassy last night where the French presented five of their equivalent of Silver Stars to our soldiers who had served alongside of them in Kapisa Province, and the French were very proud to note that they have a French battalion under our command without caveat in Afghanistan.

I think we should not, in the midst of our current budget challenges, undervalue our relationships overseas. Now, that said, the comment about whether it's two or three brigades in Europe was made when we were shooting for \$178 billion in reductions, not \$400 billion. I would restate my earlier message in discussion with Senator Reed: Everything is back on the table.

Senator SESSIONS. I would agree. Secretary Gates noted that our allies, with exasperation—he's urged them to do better and share better, and been disappointed that they have not.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Sessions.

Senator Webb.

Senator WEBB. Thank you, Mr. Chairman.

General, I apologize for having had to step out for a few minutes, and I missed your exchange with Senator Reed and the beginning of your exchange with Senator Sessions. I hope these questions aren't redundant to those.

First of all, we are going to be entering into a period of reformulation of our national strategy and our posture around the world in many cases with the wind-downs in Iraq and eventually in Afghanistan. I've not seen anything on your views with respect to sea power as an instrument of national strategy, not simply in terms of supporting ongoing ground operations, which was one of your

comments earlier about visiting the USS *Lincoln*, but actually in its historical role as a direct instrument of deterrence on a larger scale.

General DEMPSEY. Sir, both because of my time in the joint world and now as a member of the Joint Chiefs, I am enormously proud of our Navy and cognizant of and respectful of its role. I think that one of the questions we have to ask ourselves in this strategic review is where are the new power centers across the globe? The Navy has a traditional role in protecting the global commons with respect to, obviously, the maritime domain, as the Air Force does in the aviation domain.

I would say that my views on sea power are about the same as they are on land power, and that is that we should never get to the point where we have to choose between a particular domain and another. We should be increasingly interdependent.

I am concerned, by the way, about the Navy shipbuilding program and the fact that we're sitting at 280 ships with a suppressed demand for 313, and some of the acquisition problems we've had are making it more difficult to get there.

I'm a big fan of the Navy, with one important exception, and that is on that Saturday in November when we play the Army-Navy football game.

Senator WEBB. Having gone from the Naval Academy into the Marine Corps, I don't watch that game very often. [Laughter.]

But it does seem to me that we are at the end of another inevitable historical cycle here, when we have these extended ground combat deployments that expand the size of the Active Duty Army and of the Marine Corps, at the expense very often of what I would call national strategic assets, like our operational Navy.

I think I'm hearing from you the same thing I heard from Secretary Panetta, that the 313-ship goal for the Navy is a reasonable goal. Would that be correct?

General DEMPSEY. My engagements with Gary Roughead over the past 3 months suggest to me that it is. But again, I think we had a conversation a bit earlier about how do we keep strategy apace with resource decisions. That comprehensive strategy review that we're doing should, it seems to me, either reinforce that or cause us to think differently about it.

One of the things I think will happen is, to the question of whether we can absorb \$400 billion, I don't know the answer to that as I sit here today. I don't know for the Army and I certainly don't know for the joint force. But as we look at it, we will reach a point where we have to make a determination, can we execute the strategy we have today, which is what the 313-ship shipbuilding program is built to? Can we continue to execute that strategy or do we have to change our strategy? That's the kind of questions and the answers to those questions that we owe you as a member of this committee.

Senator WEBB. I would hope that part of the reexamination of the strategy is a realization that the model that we put in place in Afghanistan is not going to be the model of the future. It's enormously costly, in more ways than show up in the direct DOD budget.

One of the concerns that I've had since I've been here in the Senate is with what I can only call a deterioration of the management aspects in the Pentagon. I hope you will really take a look at that, items such as data collection that's necessary to have debates on different issues. I could give you a whole string, as someone who worked over there as a manpower person and was used to some fast turnarounds when data was requested, where this wasn't. It took us a year to get attrition data from the Services that were necessary to analyze what percentage of the military actually left the military on or before the end of their first enlistment, which was vitally important in the way that I was trying to advance the GI Bill as a readjustment benefit, which it had been traditionally.

I just held a hearing as chairman of the Personnel Subcommittee and part of it was asking for courtmartial and discharge data, and the Army was not able to tell me with a week's notice how many honorable, general, and other than honorable discharges it had issued over the past year. The other data kind of fluctuated day to day.

This is the kind of stuff that when I was a committee counsel up here a few years ago you could literally get in 24 hours. I hope you will get on top of it. I think it's a management issue. I don't think people are so busy that they can't keep that kind of data, and certainly the size of the military and the retention rate—the size of the military is lower. The retention rates are higher. It shouldn't be difficult data to keep.

One of the pieces of data that jumped out at me goes to the number of general/flag officers Service by Service. I used this as a starting point when we were looking at an issue of whether the Air Force should be able to keep seven—I believe it's seven—six flag officers as Judge Advocates General (JAGs). I'll give these numbers really quickly. The Army has 569,400 people on Active Duty as of this week, the Navy 328,000, the Marine Corps 202,000, the Air Force 332,000. Do you find it curious that the Air Force has more four-star generals than any of the other Services?

General DEMPSEY. I'm not sure how to answer that question, Senator.

Senator WEBB. Let me give you a couple more data points.

General DEMPSEY. It does surprise me. I've never looked.

Senator WEBB. The Air Force has 332,000. This isn't a knock on the Air Force. I see your assistant is getting a little nervous over there. But it's a question of how you properly manage the force.

The Air Force has more brigadier generals than any of the other Services, by far. They have the same number of three-stars. They have almost the same number of two-stars as the Army and more than the Navy and the Marine Corps combined. As I said, this is not a hit on the Air Force. It's just a question of how do you come up with this?

General DEMPSEY. Your point's a good one, Senator. By the way, the Secretary of Defense, Secretary Gates, did take a look at general officer strength and required each Service—I think our number for the Army was we had to eliminate nine general officer billets. That's not the last state of that.

Not by way of justifying it, I'll tell you how some of this has grown up. You've talked about Iraq and Afghanistan—when we

build up new headquarters, they tend to be magnets for flag officers to run particular capabilities and functions within those headquarters.

But if you're suggesting we should see ourselves and determine if we have our ratios right, I take the point.

Senator WEBB. I absolutely think you should, because the other piece of it is when force structure is reduced it's very hard to give up flag commands or flag billets. I would really hope you take a look at it.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Webb.

Senator WICKER.

Senator WICKER. Thank you very much.

I appreciate your service, General Dempsey, and look forward to working with you.

One of Secretary Gates' final actions as Secretary before his retirement was a very important speech before NATO about NATO's future back in June. I want to point out some of the most important facts that he mentioned and ask you to respond to that, if you will. For one thing, he worried openly about NATO turning into a two-tiered alliance, where some members are willing to do the soft tasks and others the hard combat missions.

He also said there is a very real possibility of collective military irrelevance and in light of this member nations must examine new approaches to boosting combat capabilities. He went on to point out that now, 2 decades after the fall of the Berlin Wall, the United States' share of NATO defense spending has now risen to more than 75 percent.

Then he concluded with this very key point, and I will quote him directly: "Indeed, if current trends in the decline of European defense capabilities are not halted or reversed, future U.S. political leaders, those for whom the Cold War was not the formative experience that it was for me, may not consider the return on America's investment in NATO worth the cost."

Now, it's often valuable for someone to be able to speak very frankly toward the end of a career, and I think Secretary Gates did just that. You're about to embark on a new aspect of your career, in which perhaps you have to be a little more diplomatic and more careful. But I would appreciate your responding to the points that Secretary Gates made.

I wonder if you have any new ideas about reversing this continued trend and if you have any suggestions to this committee or this Congress as to what we might do to reverse this trend?

General DEMPSEY. I'll take your caution about trying to figure out whether I'm at the beginning of the next 4 years or the end of my career.

Senator WICKER. I'm assuming you're about to embark on a very important part of your career.

General DEMPSEY. What you can count on, Senator, is that I'll answer and let the chips fall where they fall in that regard.

I think that we have some competing narratives that we should acknowledge. On the one hand, we have a narrative that says we have to, based on the reality of a new fiscal environment, we have

to do less and therefore rely on allies to do more. That is one narrative and we have to acknowledge it.

Then we have the other narrative that you just described, which is they're not doing enough to sustain what they're doing now. The question is, as we go forward in determining whatever adaptations we make to our strategies, we have to do it in a way that doesn't paper over potential problems.

One of the problems we could paper over is what can our allies provide. Now, in terms of new ideas, we've talked about ourselves as a joint force of being interdependent for years. How do we rely on each other and eliminate redundancies? This budget reality is going to cause us to look at that again, and I think it should cause us to look again at that issue vis-a-vis our allies. It may be that we would enter into a discourse with our allies about capabilities that they provide that we may not provide, and in so doing we actually may have to become dependent on them for that.

Now, I'm not advocating that. I am not even advancing it yet. But it may be that if there's a new idea out there in a new fiscal environment, it may be something to do with establishing an interdependent relationship with close allies. Is there risk there? Absolutely. Is there potential opportunity there? I think so. But in answer to your question, I think that's where we find ourselves today.

Senator WICKER. Let's take that down, then, to the specific instance of Libya and the frustration that many of us felt in coming to a consensus over there. Do we risk our adversaries or our competitors finding ways to place the interests of NATO member countries against each other in arriving at consensus, and what observations would you draw from your general statement down to the specific situation that we're in right now with Libya?

General DEMPSEY. I think you've touched on it, Senator. As a consensus organization, it is far more difficult to find end states that are acceptable and achievable to all members. That's the nature of an organization of that size that's built on consensus.

On the other hand, when you can achieve consensus with an organization like NATO, it's pretty powerful and pretty compelling and pretty persuasive. I think as we go forward, as I mentioned, we have to be clear-eyed about not making assumptions that could from their very inception be proven inaccurate. I think it's going to require a different kind of transparency.

Senator WICKER. I wish you very much success in that regard, and I hope if you have further suggestions for this Congress you will work with us on that, because I share Secretary Gates' concern and I don't know when the tipping point might be. But we do have budget concerns in this country and we're bumping up against them within a week. For the United States to expend 75 percent of the combat funds seems to me a situation that has to change.

Let me ask you a very specific question about the culture that Services nurture among our young officers and NCOs with regard to foreign language study and programs that enhance global awareness. Do you have any ideas about how we might do a better job of incentivizing activities across the Services? My son happens to be a second lieutenant in the U.S. Air Force with a Mandarin language proficiency. Do you think we're using the universities and the great resources of our country enough, or is there a different

way that we can be achieving a larger cultural awareness and language proficiency across the Services?

General DEMPSEY. I absolutely do, Senator. I think to the extent we can develop our young leaders to have the kind of global awareness, even if it is manifested in particular regional expertise, whether it's Asia or wherever, I think we will do two things: One, we will make ourselves far better prepared for an uncertain future. We found ourselves short in cultural awareness and language capability in Iraq and Afghanistan for a very long time. I think that as we now have the time to commit to the kind of things you're talking about, we should. That is absolutely, I would describe it as one of the adaptations we need to make to our leader development programs.

The other thing we'll do in so doing is we'll keep these kids interested. They want to know what it is we need them to do, and it's not just about turning wrenches or providing lethal effects. They want to know that they are developing, that they are growing, and that development and growth is valued inside the Service.

The last point I'll make is I think we're going to be able to do exactly what you say. The reason we haven't in the last 10 years is we've been meeting ourselves coming and going. We've been extraordinarily busy and so we haven't taken the time necessary, in particular in expertise outside of Iraq and Afghanistan.

Second, our promotion boards, for example, in wartime always tend to value most the current fight. I can only speak for the Army, but if you look at our promotion boards they have tended to reward time in the saddle in Iraq and Afghanistan disproportionate to potentially what we need for the deeper future. My commitment to you is that, if confirmed, I will be not only the Chairman, but I will believe myself to be the steward of our profession, that is the profession of arms, for all Services and look dutifully and carefully at how we're developing our leaders for the future.

Senator WICKER. Thank you, sir. Tell us what you need and we'll try to provide it for you.

Thank you.

Chairman LEVIN. Thank you very much, Senator Wicker.

Senator Udall.

Senator UDALL. Thank you, Mr. Chairman.

Good morning, General. Good morning, Deanie. It's been a treat to get to know the two of you in this process and discover your connections to Colorado and your love of our wonderful State, the Centennial State, and I look very much forward to working with you when you're confirmed.

If I might, let me pick up on Senator Wicker's line of questioning and discussion, General. I had a chance to ride in yesterday from the airport with former Senator Hart, who's well known for his strategic thinking along with a lot of other retired Senators in both parties, and of course retired military officers.

What have you learned about the last 10 years? What do you think are the most important lessons that stare us in the face and some that aren't so obvious, because it is easy to fight the last war, and yet the world is undergoing enormous change from the Middle East to the events we see in China, and on and on.

If you'd share for a couple minutes your thoughts on some of the lessons.

General DEMPSEY. Thank you, Senator. Again, these are very personal lessons, not to be interpreted as criticism of predecessors or anything else, because, by the way, in some cases I was the one who fumbled a ball here or there. I think that one of the lessons of the last 10 years of war ought to be that we can't look at issues through a soda straw, in isolation. They don't exist that way.

Looking back on it, at least my own personal view about Iraq in 2003 was that Iraq had a particular problem and it was a regime that was destabilizing the region and that we should take action. It was my recommendation that we should take action to change the dynamic inside of Iraq and that the region itself would become more stable. I'm not sure it turned out that way. Probably it is, but it didn't happen exactly as we intended it, and that's because I don't think we understood—let me put it differently.

I didn't understand the dynamic inside that country, particularly with regard to the various sects of Islam that fundamentally on occasion compete with each other for dominance in Islam, so the Shia sect of Islam, the Sunni sect of Islam. When we took the lid off of that, I think we learned some things and I'm not sure we could have learned them any other way. I don't know. I've reflected about that a lot.

But I learned that issues don't exist in isolation. They're always complex. I've been scarred by rereading a quote from Einstein, who said: "If you have an hour to save the world, spend 55 minutes of it understanding the problem and 5 minutes of it trying to solve it." I think sometimes, in particular as a military culture, we don't have that ratio right. We tend to spend 55 minutes trying to solve the problem and 5 minutes understanding it. That's one of the big lessons for me in developing leaders for the future, not only in the Army, but, if confirmed, in the joint force.

Another one is the degree to which military operations in particular, but probably all of them, have been decentralized. You'll hear it called various things: decentralized, distributed operations, empowering the edge. Whatever we call it, we have pushed enormous capability, responsibility, and authority to the edge, to captains and sergeants of all the Services. Yet our leader development paradigms really haven't changed very much. They are beginning to change.

But I think that second lesson, on the enormous responsibility that we put on our subordinates' shoulders, has to be followed with a change in the way we prepare them to accept that responsibility. I think those would be the two big lessons for me.

Senator UDALL. Thank you for sharing those, and I look forward to hearing more of your insights. You're right, we ask particularly personnel on the front lines now to be educators, be diplomats, be aware of civil affairs, cultural, and historical trends, and on and on and on and on. Every single soldier, marine, airman, and sailor presents the face of America. I look forward to working with you on what I see as an opportunity.

Let me turn to a related distributed concept, which is in energy. It's a real interest of mine. I think increasingly the committee is spending more time looking at how we use energy more effectively.

We know that saving energy saves lives, as Admiral Mullen has put it so well. We know that a good quarter of our casualties have been tied to fuel convoys and other kinds of convoys.

How do we help you develop a strategy where we have more fight with less fuel? Please share your thoughts on energy with the committee.

General DEMPSEY. First of all, I agree with you, Senator. Again, I'm at a bit of a disadvantage in this regard, speaking just about the Army now, but that's what I've been working. We have some energy goals that both DOD have established, but that we've established for ourselves as well. In the two broad areas of institutional energy—that's how we manage our posts, camps, and stations—we have six, maybe more, prototype installations that we want to achieve a net zero energy status. One of them happens to be in your State. We're moving along to try to see how we can improve our standing vis-a-vis institutional energy.

The other one is operational energy. That's really the one you're speaking to most clearly with how do we keep soldiers off the road in supply convoys because we've become more energy efficient. Every one of our recent acquisitions and certainly every one going forward for vehicles or other equipment that have an energy demand are always done with a key systems attribute, is the term, related to energy. The Ground Combat Vehicle has an energy target for its design.

But that's sort of the upper end of it. The lower end of it is batteries. I'll give you one vignette that might fascinate you. In pushing responsibility to the edge, we've pushed all kinds of emitters—I'll just call them "emitters", but it could be a Blue Force Tracker, it could be a data collector, it could be a full-streaming video, it could be a set of optics, a night vision device, whatever it is. But they all have a power demand.

In so doing, we see the benefit to the soldier and it makes him more capable, but we often don't see what it does in the aggregate to their ability to carry the batteries. An infantry platoon today for a 72-hour mission has to carry 400 pounds of batteries. Now, what they do, of course, is they don't carry them. You can follow them in some cases like breadcrumbs through the Hindu Kush.

We have to get better at that and figure out what is the energy requirement, how do you deliver it at a lighter load, in a more efficient manner, so that the soldier both becomes more capable and we don't overburden him. I can just assure you we are actively pursuing this, and I think it has implications across the joint force as well.

Senator UDALL. I agree. When we find some of these breakthrough applications for batteries, there will also be utility in the civilian sector as well. I forecast that the military will lead us more broadly to more energy self-reliance.

I'll end on this note. My time's expired. I think you're well aware of the couple of Marine Corps ex-forward operating bases that are now being utilized, and in the end they're actually creating an environment that is much more than experimental. Those environments, I'm learning, are more secure. They have a smaller footprint noise-wise, light-wise, energy-wise, and therefore the mission is more easily performed.

I look forward to working with you on this.

Thank you.

Chairman LEVIN. Thank you, Senator Udall.

Senator Brown.

Senator BROWN. Thank you, Mr. Chairman.

Sir, we've already met and discussed a lot in private. I have just a few follow-up questions. Senator Ayotte and I actually plan to have a bill and are deeply concerned about the evidence that taxpayer money that was intended to be used for a transportation contract has in fact ended up in the hands of the Taliban, and we want it to stop. Not only are we trying to fund our own needs; I guess we're funding the Taliban's needs, too.

I was wondering if you could comment on that and what your thoughts are about lowering the risk involved with our reliance on contractor support and the money trail that goes along with it.

General DEMPSEY. Yes, thanks, Senator. I saw the same report in the media. I haven't yet had time to get the GAO report and understand the details. But I'll tell you, I share that concern completely. In fact, in Iraq when serving as the Commander of Multi-National Security Transition Command-Iraq, now called NATO Training Mission Iraq, and having approximately \$5 billion a year to build the Iraqi Security Forces, it was among my gravest concerns.

I had a concern about building them. I had a concern about enabling them and integrating them with our forces. But there wasn't a day went by that I didn't worry about where the money was going, because it's a very opaque culture in which we deal in Iraq and Afghanistan.

Now, what we've done. We've increased the number of contractors enormously. We've formed Contracting Command. Again, I'm speaking for the Army, but I know the other Services are doing this as well. In our captains' career courses, they're taught contract oversight.

I probably should have mentioned, in response to the former question, what are one of the big lessons of the last 10 years of war? One of the big lessons of the last 10 years of war is that when we apply these kind of resources we have to have the right kind of contract oversight.

I hope what I find in the GAO report is that it's a lagging indicator, in other words that it might be a couple of years ago, before we took the measures I just mentioned. But I don't know. I share your concern about it.

Senator BROWN. Thank you, sir.

Also, I want to just touch upon and follow up with Senator McCain and others: \$100 billion was the initial, now it's \$400 billion, \$800 billion; I'm hearing \$1 trillion. As someone who's still serving, I see in the Guard and Reserves a certain amount of things we could probably do better and more efficiently. But I'm deeply concerned that hasty, across-the-board cuts will dramatically affect the safety and security of the men and women serving.

I would echo Senator McCain's general premise, in that whatever you're planning on doing or whatever recommendations you're considering making, I know we're trying to reach a number, but when it comes to the safety and security of our men and women I don't

think I can put a number on that. I think we need to, if we're going to commit to these wars and we're going to commit our men and women to do it, we have to give them the assets to do just that.

Not really a question, but my hope is if you're running into roadblocks or you need to adjust and adapt, then please come back to the committee so we can work with you in trying to do it differently and shift maybe the burden to other areas of the government before we start jeopardizing the safety and security of our men and women.

That being said, I am in the Guard and I do know that the Guard and Reserves perform a function at a fraction of the cost of the money used for the Active Army and all other Services. We're somewhat leveraging the skills and experience of our citizen-soldiers and airmen. What's your plan? Is there a plan, in order to save money, to potentially shift and expand Guard and Reserve opportunities, or is that in the bailiwick or what?

General DEMPSEY. Senator, we are closer to our Reserve component—that's both the National Guard and the U.S. Army Reserve. I'm speaking for the Army, but I'm sure that General Schwartz would echo this. We're closer to the Guard and Reserve than we've ever been. The question now becomes, as the demand goes down and as potential resource constraints collapse around us, how do we maintain that relationship, how do we articulate what capabilities have to be available in the Active component, which capabilities have to be available in the Guard and Reserve?

One of the things I mentioned in the response to the advance policy questions, was I think there is an opportunity here to reconsider and adapt our relationship with the Guard and Reserve, so that as we become smaller, which seems to me to be inevitable at any one of the numbers you mentioned. It's not just taking the existing structures and the existing relationships and shrinking them, but rather adapting them to actually give the Nation options, because that's ultimately our responsibility, is to provide options for the Nation in meeting its security needs.

My commitment to you is that the issue of the future relationship of Active, Guard, and Reserve will be at the forefront of any decisions we make in responding to these budget issues.

Senator BROWN. I would also ask, if the goalposts used to measure our national objectives in Afghanistan change, which they apparently are, and if you need a new set of requirements based on those changes before the end of the summer, I'm hopeful you'll let us know, so we can help in that regard, as Senator Wicker pointed out, too. Let us know what the needs are.

Finally, I have noticed, being on the Veterans Affairs Committee as well, that many of the soldiers that are coming home—and the unemployment rate amongst military folks, Guard and Reserve in particular, is dramatically higher. Even though many of them have higher technical expertise, leadership skills, and military experience, they feel they're ultimately disqualified for lack of civilian equivalent certificates.

I hear it over and over again. I'm wondering if there's a system or if there's something that you will be able to do that will help members translate their military-specific skills and vocational experience and expertise to the civilian sector? Nothing for today, but

just something to think about, if there's a way we can have someone reach out and work that through, because when you look, the State of Israel does it. Employers actually seek out those folks because they have a higher work ethic, many times they're more experienced. Yet here, especially because of the fear of redeployment, there's an artificial wall, I feel, sometimes. Just a thought, and I wish you well, General.

Thank you.

General DEMPSEY. Thank you, Senator. One of your colleagues is helping us with some legislation that might help with that, in regard of transition for veterans. Some of the reason that we're having this problem is that we haven't paid as much attention as we need to our Army again, career and alumni program.

Senator BROWN. You can talk about the Army all you want. [Laughter.]

General DEMPSEY. But anyway, we're alert to the challenge, working both internal to the Army as well as with this committee to try to determine how we can do a better job.

Senator BROWN. Thank you, sir. Good luck.

Chairman LEVIN. Thank you, Senator Brown.

Senator Lieberman.

Senator LIEBERMAN. Thanks, Mr. Chairman.

Thanks, General Dempsey. Just having the opportunity to sit here and listen to you, you've been really impressive today. We're lucky to have you in the service of our country. I think you are a student of history. You know the details of reality that the military faces, and when you don't you're honest enough to say you don't. I'm very grateful that the President has nominated you and I'll be proud to vote to confirm you, I suppose unless you say something from here to the end of the hearing that I think is over the edge. But I doubt that.

This is a very moving picture and you used it to tell a powerful story of trust, the trust of his family back home, trust of the others in his unit, and the trust that he has when he calls somebody is going to be there.

I was thinking, as I lead into the first topic I wanted to talk about, there's another element and it wouldn't be called trust, it's the certainty, a different kind of certainty, which is the certainty that those who wish us ill, our enemies, have that if they cross lines that we will respond, that they won't get away with it. That's not trust, but it's a certainty that we're credible.

In that regard, I was really struck by your response to one of the advance policy questions submitted by the committee, in which you spoke about the threat posed to the United States by Iran, and you said, "With its nuclear activities and its surrogate activities in southern Iraq, there is a high potential that Iran will make a serious miscalculation of U.S. resolve."

I totally agree with you and I do think in the case of southern Iraq, where the Iranians have been training and equipping Shia extremists, who then go back and have been responsible for the deaths of a lot of Americans, that they have been making a miscalculation. In some sense it's been based, unfortunately, on the fact that they haven't paid a meaningful price up until now for

doing the things that they've done that have been so harmful to so many Americans in uniform.

I wanted to say, one, I appreciated the statement. Two, I wanted to ask you to elaborate on what you meant when you said that there was a high potential that Iran will make a serious miscalculation of U.S. resolve.

General DEMPSEY. Thank you, Senator. Again, I've been out of Iraq for about 4 years now. But that doesn't mean I've lost touch with it or the leaders with whom I have remained engaged. It's their observation, in some cases supported by intelligence, but it's their observation that Iran's activities in southern Iraq are intended to produce some kind of Beirut-like moment and in so doing to send a message that they have expelled us from Iraq.

What I wanted to make clear in my response, and as well today, is that, while we have soldiers in southern Iraq—and, my view is that when you put the U.S. military, whatever Service you place, but you place them someplace, it is the clearest signal of national resolve we have.

Senator LIEBERMAN. Right.

General DEMPSEY. As long as we have those soldiers there, we're going to do whatever we have to do to protect them, and I want to make sure that's clear to everyone.

Senator LIEBERMAN. I appreciate it. I agree with you. It follows on some pretty strong statements made in the last couple of weeks by Admiral Mullen and Secretary Panetta about the risk that Iran is taking by this behavior in supporting the Shias who are going back into southern Iraq and killing our people. Obviously, it's important once the people at the top of our military, like the three of you, say that, that Iran takes it seriously or suffers consequences.

I thank you for that, and I know you're a serious man and I know your word is credible. I hope the Iranians understand that.

I wanted to spend just a few minutes on the budget questions. I thought you said something, if I heard it right earlier, that was really interesting and important for all of us to think about. Obviously, we're facing a big budget crunch and everybody is being asked to contribute to helping the country get back into balance. As far as the military is concerned, this is not like the period at the end of the Cold War, because we are actually still involved in combat in Iraq and Afghanistan, where we're drawing down our troops. But the larger war with the Islamist extremists who attacked us on September 11 goes on on many different fronts in the world.

I wanted to make sure that I caught you right, that's what you were intending to say, that this is a tough time to cut the military budget drastically because we are at war.

General DEMPSEY. That is my professional judgment, Senator. If I could reflect my own anxieties with you; can I share my anxieties with you for just a moment?

Senator LIEBERMAN. Yes, just lay down on the couch. [Laughter.]

General DEMPSEY. This is a three-legged stool. On the one hand, it is the responsibility of the military to provide the Nation options, and that means we have to have capabilities of a certain size, of a certain quality, and in a certain quantity because of the rota-

tional requirement to sustain our effort. That's one leg of the stool, if you'll permit me.

Senator LIEBERMAN. Right.

General DEMPSEY. The other leg of the stool, though, is we demonstrate that we are sensitive to the challenges of the broader Nation. We're all citizens as well as soldiers.

Senator LIEBERMAN. Right.

General DEMPSEY. If we don't show that we recognize that the Nation has a significant economic problem and then do our part, whatever that part may be, to help solve it, we will be seen as simply putting up barriers and defending ourselves against what Eisenhower famously called the military-industrial complex. That's the second leg of the stool.

The third leg of the stool is we have an All-Volunteer Force with whom we must keep faith. It is that element of trust that I described earlier that will keep that All-Volunteer Force in the fight, inspired, in the service of their country over time.

As we go forward, kind of the way I will assess how much of a budget reduction we can absorb will be on the basis of that: How much capability does it provide? Are we contributing something, so that we remain connected to America? Can we preserve the All-Volunteer Force? On that basis, I think we'll be able to make a pretty clear determination.

Senator LIEBERMAN. I appreciate that. That's a very balanced answer and I think you have your anxieties well in control and I would certify to your mental health.

Thanks very much, General. Good luck.

Chairman LEVIN. Thank you very much, Senator Lieberman.

Senator Ayotte.

Senator AYOTTE. Thank you, Mr. Chairman.

I very much want to thank you, General Dempsey and Deanie, for your service, and appreciate your coming before the committee today.

I wanted to echo on the question that Senator Brown had asked you about the Guard and Reserve and the role of the Guard and Reserve. I notice from your written comments you acknowledge what I think we all have seen has been the case, that really we haven't used the Reserve as a Strategic Reserve in these conflicts; we used them as an operational force.

There was a need to do it, but there's also been some need to cost-effectively use the Guard. As we go forward in this difficult fiscal climate, how do you anticipate preserving that readiness that we have as a result of having the Guard and Reserve acting as an operational force, and how do you anticipate working with the Guard and Reserve to seek their feedback as you make some of these difficult choices going forward?

General DEMPSEY. Thank you, Senator.

We are working very closely with the Guard and Reserve. If there's something we're withholding from them, it's not apparent to me, because I've said that it's back to this relationship of trust. It also exists in our Army. It has to exist, and the other Services as well with their Reserve components.

I would like to just elaborate a bit on what you said about the cost-effectiveness, because there is a certain cost-effectiveness to

the Guard and Reserve, but truthfully that's not why we have them. We've had them for centuries, but after Vietnam, General Creighton Abrams made the conscious decision that we would never allow ourselves to go to war again without the Reserves. He did that because he recognized that as we transitioned to an All-Volunteer Force the Guard and Reserve are an extraordinarily important part of our ability to stay connected with America.

As we sit here today, the choice before us is not will we have the participation of the Guard and Reserve. The reality is, Senator, we cannot go anyplace, cannot, without the Guard and Reserve. We've built our structures that way. Two-thirds of our combat power is in the Active component, a third in the Guard. But two-thirds of our sustainment capability is in the Guard and Reserve and only a third of it in the Active component.

We built our Army consciously that way so that we would never again go to war without America. As we go forward with these budget issues, it's not about are we going to make a stark decision to favor one component over the other. We have to find a way to balance them.

Senator AYOTTE. That would include, obviously, readiness across the Active Duty as well as the Guard and Reserve, as the holistic view of our readiness in the future.

General DEMPSEY. Yes, Senator. Again, to be completely transparent here, we have built some expectations on the back of OCO, for example, on the level of readiness we can have in all components. We've never had, really never had an army any component, Active included, that was 100 percent ready to go all the time. That was also true in the Guard and Reserve.

But with OCO now, we've been able to raise the level of equipping, of training, and every aspect for all components. All of that will be affected to some degree as we lose the ability to apply OCO to our Army. But it'll be applied fairly, equally, and with a specific outcome in mind, I promise you that.

Senator AYOTTE. I thank you and appreciate your comments about how important the Guard and Reserve is to our readiness and to our country and our national security.

I also wanted to ask you, as the Chairman of the Joint Chiefs of Staff, one of the roles, very important role that you have, of course, is advising the Secretary of Defense and the President on a variety of Defense Department issues and policies. An issue that I've been very concerned about is our detention policy, our interrogation policy.

During a June 28 hearing I asked Admiral McCraven if it would be helpful, 10 years into the war on terror, to have a designated long-term detention and interrogation facility for terrorists, for groups like al Qaeda in the Arabian Peninsula and al Shabab. I wanted to ask you if you agree whether it would be helpful to have a designated long-term detention and interrogation facility, because it seems to me that we've had to make some ad hoc decisions and that puts our military leaders in a difficult position.

General DEMPSEY. It could be, Senator. I'm not being elusive. I'm reflecting my own, where I am in my understanding of the issues. I say it could be because I think where these individuals are placed and whether what we have in our detention of them rises to the

level of evidence vice simply intelligence, because there's a huge difference, if you want to talk about the rule of law, on what's based on intelligence and what's based on evidence. I think we have to understand how agile we need to be and whether our current policies and locations allow us to do it.

The other issue that plays as well is recidivism. That is to say, when we have these individuals in custody, return them to their nations, do they just simply return back to the fight?

This is another one of those issues where I, because I haven't been involved with it, I haven't studied it to the extent I need to to engage you as articulately as I should, but I will.

Senator AYOTTE. I appreciate it. I just want to highlight I think a couple of examples—the case of Warsame, who is a member of al Qaeda in the Arabian Peninsula and al Shabab, who was kept on a ship for 2 months for interrogation and then brought to the United States. I think we basically, as Admiral Winnefeld said, for now we're making do, and I don't think that making do is good enough, particularly since we're not going to be able to keep every single individual on a ship. That is a short-term type of fix.

I would hope that you would look at this as a very important security issue. As you mentioned, the recidivism rate, 25 percent of those that have been released from Guantanamo have gotten back in the fight against us.

In that vein, I wanted to ask you—my time is almost up, but about a particular case, to ask you to look into. That is Ali Dakduk, who is someone that myself and 18 other Senators, many of whom serve on this committee, he is an individual that was being held in Iraq and is also accused of collaborating with Iranian agents and Shi'ite militias to kill American troops. We received a report that he was going to be released back to the Iraqis. People are very concerned. The 19 Senators that signed that letter, we're concerned that releasing him back to the Iraqis is like releasing him back into the theater.

This is again another case I would ask you to look carefully at, because it is one that demonstrates again why we need a detention facility that ensures the security of these individuals so that they don't just go back to other countries that will just release them and then we'll be fighting them again.

General DEMPSEY. Thank you, Senator.

Senator AYOTTE. Thank you, General.

Chairman LEVIN. Thank you, Senator Ayotte.

Senator Manchin.

Senator MANCHIN. Thank you, Mr. Chairman.

Thank you, General and Deanie, very much for your kind hospitality. We appreciated it very much the other day, stopping by unannounced, and you're very kind.

Sir, with that, I would concur with Senator Lieberman that you're a sound person and I think things will be very well. I'd like to ask a few questions.

One is following up on Senator Ayotte. She asked about the Guard. I know there's been discussions and concerns about would the Guard ever have a post on the Joint Chiefs of Staff or be of equal footing on that. I know you've been a little bit receptive in

thinking about that, and I didn't know what you thought impediments might prevent that from happening or if there's a possibility.

General DEMPSEY. I would describe my current position as being open-minded, Senator, but concerned. I'll express concern on two fronts. One is, of course, I just finished, rather inelegantly perhaps, describing how close we are, speaking again for the Army, but the need for the Guard. I just don't know what that would do to the relationship if we had now two four-stars overseeing the same force, because we aspire to be one force.

The other one is more pragmatic, and that is what gives me my authority as the chief, is the budget. If it weren't for the budget, no one would even pay attention to me. But they pay attention to me because I have to deliver something for the Nation using the resources I'm given. I'm held accountable for delivering it.

I don't know what that would mean to a potential National Guard role. All the Service Chiefs, by the way, are in that same situation. They derive their authority both from the title, but also from the fact that they manage their Service's budget. If we have a National Guard four-star on the Joint Chiefs, he's not accountable because he doesn't have anything with which to deliver capability, and so I'd have to understand how that would be sorted out.

Senator MANCHIN. The other is concerning financial responsibility, but also the situation that we have, and I think that Senator Brown touched on, the \$10 million a day that was reported leaving Kabul in suitcases and never got to where it was needed—which is about \$3.6 billion a year, and not able to have a handle on that.

I think you've seen or you've been hearing about our debt discussions that we've had. Both Democrats and Republicans have anticipated a trillion dollars or more in savings if it's not spent on the war, another \$400 billion in savings on interest that you would be spending on the trillion. That doesn't make a lot of sense to me because we were never anticipated to be there that long. Someone anticipated that we were going to spend that much and now they're taking it as a savings.

Can you give me your thoughts on that? Does it make sense to you at all that we would be saving something we shouldn't have been spending and now they're all counting it and booking it?

General DEMPSEY. Senator, if you would allow me, I would take personal pleasure in telling you I'm not an economist nor a lawyer, and so I can't go anywhere near that question. But I will say that we have done a great deal of work to try to figure out how to get on top of this issue of spending in Iraq and Afghanistan, and I'd be happy at some point to come and chat with you about that.

Senator MANCHIN. Do you have an idea basically of how you can secure the corruption that's going on? As we know, Afghanistan—and I think you know my personal feeling is that we should get out as quickly as we possibly can. It's not going to get any better, and they'll steal as much as they can get their hands on, and they've proven it every chance they've had. But how we can stop this blatant type of thievery?

General DEMPSEY. Yes, sir. We do have some programs. I sent probably our best brigadier general over about a year ago, Brigadier General H.R. McMaster, to stand up an anti-corruption task force and campaign. It's made some progress. In fact, I ought to

have him come back and chat with you about what he's accomplished.

I wouldn't suggest that anyone would ever drive corruption in that part of the world to zero, but we can certainly get a lot closer to zero.

Senator MANCHIN. You and I both talked about contracting, the amount of contracting that goes on in the Defense Department, and the cost of contracting and a lot of fraud, abuse, and waste there. I think you've shown a desire where you want to look into that in a much more critical way.

I would say also on the flight services, I know that we're contracting all of our flight services out to take our goods into that area. With that, with NATO also, has there been any types of decisions or discussions on how we could best curtail that or use our own equipment, or are we just too strapped for that?

General DEMPSEY. I don't know the specifics, sir. I would simply say that I think we have to keep a contracting option open because we would very quickly and very clearly overwhelm our ability to transport the things we need, ground or air, with our own organic resources. I think the issue is really not walking away from contractor support. I think it's getting it under control.

Senator MANCHIN. Finally, I would ask a question—and I truly believe that—on the draft, what your opinions may be or if you have a position, but just your thoughts on the draft. Of course, those of us sitting on this side, living through Vietnam, the draft pretty much brought that skirmish to an end. I would assume that if we had the draft today we would be taking a much more critical look at what we're doing over there than we are as we proceed on now. So your thoughts on the draft?

General DEMPSEY. Sir, this comes up from time to time throughout my career. That would very clearly be a political decision, to go back to a system of universal suffrage. What I would offer you at this point in a discussion would be that I think the Nation is better served by an All-Volunteer Force, and I could elaborate on why I believe that. But I think we are better served by an All-Volunteer Force and would seek to find ways to preserve it in an era of fiscal constraint, rather than move at this point to a draft.

Senator MANCHIN. My reasoning for that question was because of all the deployments that the people, families, are basically going through. It's a tremendous hardship, I know, to them and their families, especially in the Guard back home and to our small States that have a great dependency on the Guard. But with that happening and the pressure that's put upon them and now with three wars going on, there comes a time when we spread ourselves so thin that the draft is the only option that I think that we would have if that's the policy we continue down, unless we intervene and stop these senseless wars.

General DEMPSEY. Without commenting on the wars, because sometimes I think, Senator, wars choose you, you don't choose them. That's just a professional judgment. But I think that as we look at the lessons of the last 10 years of war, I think we'll find that the All-Volunteer Force actually performed better and more resiliently than I think its crafters thought it would back in the early 1970s.

But I think we need other options for the Nation when we enter into conflict that can escalate and that can take longer than we thought.

Senator MANCHIN. Thank you, sir.

Chairman LEVIN. Thank you, Senator Manchin.

Senator Begich.

Senator BEGICH. Thank you very much.

General, thank you for your willingness to continue your service at this level, and I look forward to approving you and again looking forward to your service. I first want to say thank you.

I'm actually going to do one quick thing on Afghanistan to follow up on Senator Manchin. Tell me, from your perspective in regards to the security forces that we and our allies are working to train and ensure that they have their own security force. The question I always have—I know they are growing them, but what is their retention rate of those folks that, once trained by us and doing the service for security at different levels, what's the retention rate that they're able to maintain? At the same time, are they increasing their literacy rate? Because I know we were very successful in Iraq because the literacy rate was also very high. Here it's very low. Can you comment on both those elements, retention and their literacy rate?

General DEMPSEY. Yes, I can, sir. Retention has shifted over time, for two reasons. One is in the early days we were paying them at a rate that I think was probably too low to keep them. That was changed about 2 years ago.

The other factor is seasonal. We have to remember that these young men in Afghanistan and to a lesser extent in Iraq, but absolutely in Afghanistan, they're agrarian and so when the planting and harvesting seasons come and go, the attrition rates wax and wane accordingly.

Now, that said, General Caldwell, who is currently in charge of our NATO Training Mission-Iraq, monitors the attrition issue constantly. We also think the literacy issue is related to attrition.

Senator BEGICH. Absolutely.

General DEMPSEY. I don't have the number committed to memory, Senator, but it's more than 10,000 and growing, the number of soldiers we've risen or helped achieve an eighth grade, as I recall it, level of literacy.

These issues are all related, but your concerns about attrition are shared by us, as well as the concern for how we develop leaders, because you can develop a basic rifleman; it's a little more challenging to develop the leaders to lead them.

Senator BEGICH. Can you share—you don't have to do it right now, obviously, but if you could get to my office—maybe what you see those trend lines look like over the last several years and where we're going in literacy attainment within our security force that Afghanistan has, as well as the retention rate?

General DEMPSEY. Yes, sir.

Senator BEGICH. Will you do that?

General DEMPSEY. Yes. The last time I touched on it the trend line on attrition was trending positive, which means we were gaining control of it. The trend line on literacy training was also

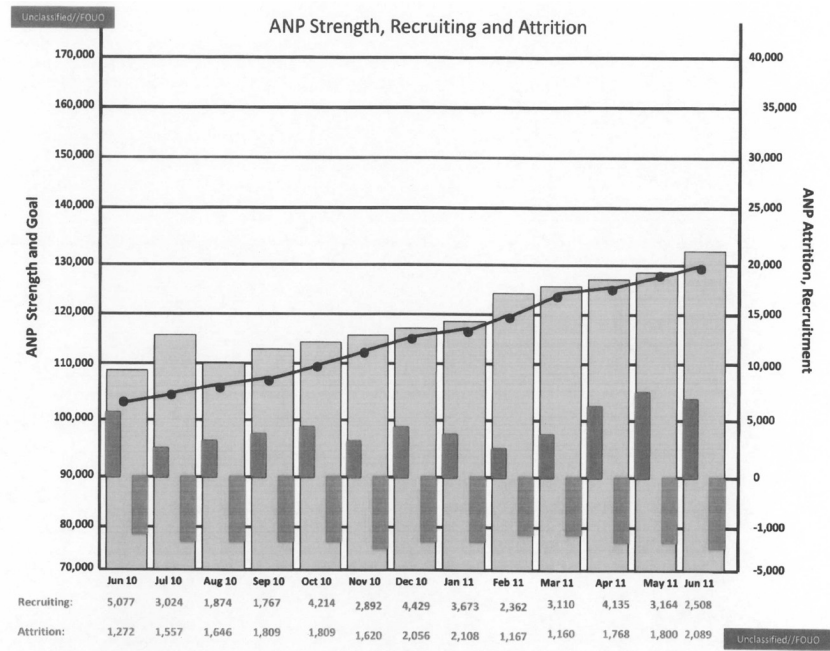

trending positive, but that is an enormous slope to climb, for all the reasons you suggested. But both trends are positive.

Senator BEGICH. Good. If you could share that with us that would be great.

[The information referred to follows:]

Attrition:

Attrition is an ongoing issue within the ANSF. ANA attrition rates from June 2010 to June 2011 averaged 2.5 percent or 3,817 personnel per month. ANA recruiting rates averaged 4.2 percent or 6,241 personnel per month. Attrition will not prevent the ANA from achieving their projected manning fiscal year 2011 goal of 171,600 personnel. This graph displays ANA strength, manning goals, recruiting and attrition from June 2010 to June 2011.

ANP attrition rates from June 2010 to June 2011 averaged 1.4 percent or 1,682 personnel per month. ANP recruiting rates averaged 2.8 percent or 3,248 personnel per month. Attrition will not prevent the ANP from achieving their projected manning fiscal year 2011 goal of 134,000 personnel. This graph displays ANA strength, manning goals, recruiting and attrition from June 2010 to June 2011.

Literacy:

Illiteracy is one of our greatest challenges in developing the ANSF. NTM-A is building a National Army and National Police force out of a population that has a 28 percent literacy rate.

Approximately 86 percent of all new recruits coming into the ANSF are illiterate. In order to address this issue, NTM-A has established literacy programs throughout the ANSF. The literacy program began in October 2009. At the time there were approximately 13,941 ANSF (7,596 ANA and 6,345 ANP) literate at a 1st grade level. On 28 July 11, the 100,000th ANSF student graduated from 1st grade level literacy training. These students completed training and passed a certification exam. The ANA increased the number of personnel with 1st grade literacy by 634 percent since October 2009. The ANP increased the number of personnel with 1st grade literacy by 934 percent since October 2009.

New recruits going through their initial training receive literacy training. Soldiers attending NCO and Officer training receive additional literacy training. There are training programs in place at ANSF forward operating bases throughout Afghanistan.

Senator BEGICH. You just made me think of something additionally. Because I know the military does this. They always have a contingency plan about everything, plan A, B, C, all the way to Z. I'm assuming somewhere, and maybe it's not within DOD, but maybe it's a combo between DOD, State, and others: Assume the scenario we're out of Afghanistan; there is a financial cost that we're going to be committed to at some point, for all the reasons. Their economy can't sustain the security forces that we're training for and everyone else is training for. They don't have the money.

Is there somewhere within DOD, State Department, or a combo, or one of the other agencies, that has looked at a scenario X that, out of Afghanistan, here is the U.S. commitment financially?

General DEMPSEY. Yes, and I would add NATO.

Senator BEGICH. NATO.

General DEMPSEY. Because it's very clear that as we reach 2014 that, as you suggested, there will be a lingering economic challenge for Afghanistan and we will have to assist. I say "we" again meaning not just the United States.

Senator BEGICH. The combination.

General DEMPSEY. Right.

Senator BEGICH. But we'll have a commitment.

General DEMPSEY. I believe we will, yes, sir.

Senator BEGICH. Do you know, is that something that's available at this point to review and what those costs might be? Is that something that you could get back to me, at least, with and determine where I need to direct that question?

General DEMPSEY. Let me contact, if I could, Senator, the CENTCOM commander, who would essentially, as the combatant commander for that region, oversee that effort, and I'll see if I can put him in touch with you or if he can communicate with you through me.

Senator BEGICH. That would be great. Thank you very much.

Let me walk through a couple other quick ones. Obviously, in Alaska we care greatly about missile defense system, and I know the military has done some additional work and they're continuing to make some additional plans of finishing up some of the fields there and also some additional interceptors.

Can you give me your opinion of the missile defense system that's currently in Alaska, but also let me add another caveat to this. As we know, the system there deals with North Korea, the Pacific Rim, so forth, but also has reach to the east coast, but very last minute, last second kind of Iran issue.

It's a two-part question: One, your thoughts on ground-based midcourse defense for Alaska; but also, is there a need for a complementary system on the east coast to then finish the efforts of not only North Korea, but more robust in dealing with Iran? If you could answer those two pieces of the question?

General DEMPSEY. Yes, sir. The current strategy calls for replicating what you would describe as an air defense capability on the West Coast, but replicating that in Europe because of the flight plan of any missile that might be launched from Iran. There's also some, I'll describe them as very early, nascent discussions with Russia about sharing early warning and things that could be very positive.

I think this work is ongoing and important, and I'll give it my full interest.

Senator BEGICH. The system we have up in Alaska is important. You see where I'm going here.

General DEMPSEY. I do, sir, and it is.

Senator BEGICH. Very good.

Let me move to another issue, the Law of the Sea Treaty. Some members that were here last week up for nomination for different positions within DOD, I was asking them the same question. We're one of the few countries that haven't signed onto this treaty. We're hanging out with Syria, Iran, and Libya. Those are the people that we're in company with who haven't signed also, which is not the company I care to keep and I'm sure you don't care to keep either.

Can you tell me just your thoughts on the Law of the Sea Treaty from a military perspective? The complaint people have is that this gives up our sovereignty if we sign this treaty. I disagree with that. I think this helps our sovereignty, strengthens our sovereignty. Can you give me your thoughts on that?

General DEMPSEY. I support the other leaders who have testified and attested to the fact that I think it will improve our standing and our security if we enter into the Law of the Sea Convention.

Senator BEGICH. Thank you very much.

My time is up. I have one question which I'll submit for the record. It's in this very tight budgetary time, where I sit on the Budget Committee—the military budget is a big challenge. We've dealt with some cuts that have to be dealt with. But how we balance that between personnel and assuring that we have a robust volunteer system and ensure that pay and benefits and retirements are there, at the same time how do we balance against some of the infrastructure. I have a more detailed question. I'll submit it to the record, but that's the gist of it, how you will manage that to make sure we have the fighting men and women that we need, but at the same time deal with some severe budget constraints. I'll just submit that for the record, if that's okay.

General DEMPSEY. Okay, Senator. Thanks.

Senator BEGICH. Thank you very much. Good luck.

Chairman LEVIN. Thank you, Senator Begich.

Senator Graham.

Senator GRAHAM. Thank you, Mr. Chairman.

Congratulations on your nomination. I know you will do a good job and your family's proud. This is a special time in your life.

Iraq. There are increasing reports coming from Iraq that Iran is introducing weapons into Iraq, into Shia militia hands, explosively formed penetrators and more lethal rockets. Is that generally true?

General DEMPSEY. I've heard both General Austin and others state that they have intelligence that suggests that is true, yes, Senator.

Senator GRAHAM. The argument is that they're trying to claim they drove us out of Iraq, the Iranians. Do you generally agree with that assessment?

General DEMPSEY. I obviously can't speak for their motivations, but I will say that my contact with my colleagues in Iraq—and I'm talking about my Iraqi colleagues—many of them believe that's the case.

Senator GRAHAM. What is your message to Iran, General Dempsey?

General DEMPSEY. It would be a gross miscalculation to believe that we will simply allow that to occur without taking serious consideration or reacting to it.

Senator GRAHAM. I think that is a very sound position. I doubt if the Iranians are watching, but they need to be listening, because I think it would be a gross miscalculation on the Iranian part to believe that you can be involved in killing Americans and nothing comes your way.

Iraq. If the Iraqi Government requested additional troops to remain in 2012 in Iraq, do you think it would be wise for us to agree to that request?

General DEMPSEY. I do, Senator.

Senator GRAHAM. I think there's plans in the works to try to come up with a formulation somewhere around 10,000; is that correct?

General DEMPSEY. I don't know the number, Senator, but it would be a number where we could provide the capability that they would request, that we would be able to protect ourselves, and it would have to meet both of our Nations' mutual interest.

Senator GRAHAM. Right. One, they'd have to ask and we'd have to agree. But one of the concerns is the forces that we have along the Kurdish-Arab fault lines have paid dividends. There has been no real fighting, but there have been some skirmishes. I guess one of the things you would want to look at in terms of future troop presence is to have sort of a referee along those lines; is that correct?

General DEMPSEY. I have heard discussion of that as one of the capabilities we might be able to provide for them if asked.

Senator GRAHAM. Now let's move to Afghanistan. There's a lot of talk about 2014. My view is that the drawdown of all surge forces by September 2012 has reignited the debate in Afghanistan and the region, is America leaving, and the enemy is seizing upon that drawdown schedule. But one thing that we could do in my view to reset that debate is to enter into a relationship with the Afghans, if they request it, post-2014.

Several months ago I asked Secretary Gates about his view as to whether or not he believes it would be wise to have an enduring military, economic, and political relationship with the Afghans if they requested such a relationship past 2014. What he said regarding the security agreement, he said: "A security agreement with Afghanistan that provided for a continuing relationship and some kind of joint facilities and so on for training, for counterterrorism, and so on beyond 2014 I think would be very much in our interest. I think it would serve as a barrier to Iranian influence coming from the west. I think it would serve as a barrier to reconstitution of the Taliban and others coming from the border areas of Pakistan. So I think it would be a stabilizing effect, not just in Afghanistan, but in the region."

Do you agree with that?

General DEMPSEY. I do, Senator.

Senator GRAHAM. As I understand, there are some ongoing negotiations between the Afghans and our government to have a stabilizing, enduring joint relationship on the military side past 2014; is that correct?

General DEMPSEY. I've read that in the open press, Senator. I have not been brought into that dialogue, but I've read the same reports.

Senator GRAHAM. But as the senior military adviser to the President, if you get this job you would recommend that we go down that road to send the right signal to the Afghans and to the region; is that correct?

General DEMPSEY. I would, Senator. That's without putting any assumptions about how long or how big, but I think that simply the thought that we would have an enduring relationship could send the right signal.

Senator GRAHAM. Let's look at this photo again, this photo of this NCO basically calling for assistance. It's called "Trust" and I think it's a great photo.

One of the things that I worry about is that allies of the United States, partners of the United States, need to trust us. Do you agree with that?

General DEMPSEY. Absolutely.

Senator GRAHAM. A lot of people in Afghanistan and Iraq have taken on radical Islamic extremists and they've paid a heavy price; is that true?

General DEMPSEY. They have, Senator.

Senator GRAHAM. The Afghan and Iraqi people have paid a very heavy price fighting for their freedom. What I'm trying to impress upon people back home, I'm going to at noon get asked about, why would you invest money in a schoolhouse in Afghanistan when we need improvements in our schools in South Carolina? How would you answer that question?

General DEMPSEY. I'd probably say that it's important to remember that we went to Afghanistan for our national interest, not theirs, and there is a residual requirement for that for how long as we deem our ability to do so. But this isn't about doing things just for them. It's in some way about doing things for us.

Senator GRAHAM. One way to defeat radical Islam is to provide an education to young women and young men to give them the tools to fight back and chart a new course for Afghanistan; do you agree with that?

General DEMPSEY. I do, sir, within means and capabilities.

Senator GRAHAM. Within means and capability. A schoolhouse may do more good for the long-term security of the United States than maybe a brigade in Afghanistan?

General DEMPSEY. It could very well be, when we reach the point of stability.

Senator GRAHAM. Now, killing bin Laden was a seminal moment in the war on terror. I want to congratulate the President and our Armed Forces and the Central Intelligence Agency and all those who stayed on the case. But I have a theory that killing terrorists only takes you so far when it comes to security. The ultimate security is partnerships; partnerships with people in the region who, if they had the capability to marry up with their will, they would fight back against these radical elements.

I know it's more labor-intensive. I know it costs more money and in many ways it's deadlier. But I believe the payoff is greater.

What is your view of our Nation's security being enhanced by having countries like Iraq and Afghanistan becoming stable, representative in nature, and generally aligned with us in rejecting radical Islam? Would that be a transformational event in the war on terror more than killing bin Laden?

General DEMPSEY. I think it would have benefits beyond just the war on terrorism. I'm an advocate of building global relationships both to promote our values, to have partners who can help us when we encounter an uncertain future. I just think that we are better and we're a better army when we are out and about and interacting with our peers.

Chairman LEVIN. Thank you, Senator Graham.

Senator Collins.

Senator COLLINS. Thank you, Mr. Chairman.

General, first congratulations. I thank you for your many years of service and what was apparently one of the briefest tenures as the Army Chief of Staff in history, I think.

Let me ask you a series of questions. The President's budget proposes that we move to a smaller Army and Marine Corps. In response to the advance policy questions, you indicated agreement with the reductions in end strength that are included in the President's long-range budget. My concern is that we have heard repeatedly from military officials and mental health experts that a dwell time of 2 years at home for every 1 year deployed is the minimum time necessary to preserve the long-term mental and physical health of our forces.

Certainly the Army and the Marine Corps have borne the brunt of the two wars in which we are now engaged. We're not counting Libya as well. What will be the impact in your view of reducing the end strength on our ability to meet those dwell time goals?

General DEMPSEY. Senator, my responsibility as the Service Chief, with my fellow Service Chiefs and the current Chairman, is to take the budget targets we've been given and to determine how we provide capabilities, how much force structure that involves, how much modernization, how much training, maintenance, and readiness—this is your point—at a rate which we can sustain the All-Volunteer Force.

For the Army, it is in fact 1 year deployed to 2 year home boots-on-the-ground (BOG)-dwell ratio. As we do this, some of it is art and some of it's science. The science of it is to take that BOG-dwell ratio, apply the force you can afford, and see if you can sustain it. We're running those models and that analysis right now.

Senator COLLINS. I hope that you will keep a very close watch on this. I think it's absolutely critical. I understand that we're drawing down our troops in Afghanistan and Iraq, but I'm very concerned about the strain and pressure of repeated deployments. This strikes me as the wrong time to be reducing the size of our force, and so I think we need to watch that very carefully.

Let me turn to an issue that Senator Webb raised with you, and that is sea power. The fact is that our Navy currently has the fewest numbers of ships since before World War I. Now, our ships are clearly more capable than they used to be, but, as an admiral once told me, quantity has a quality of its own, and you do need to have a sufficient number of ships.

I'm concerned by what we see in China, with an enormous build-up by the Chinese of their fleet. I'm concerned by a February 2011 report by the Navy on surface ship readiness that found that 60 percent of the fleet is underway at any given time and 43 percent is forward deployed. Those figures represent historic high percentages.

Our national security demands are growing. The ships are now going to be playing a very important role in ballistic missile defense. The fact is that we have a gap between the 285-ship Navy that we currently have and the 313-ship Navy that the Chief of Naval Operations has described repeatedly as the floor, as the absolute minimum.

So first question: Do you support the Navy's goal of increasing the number of ships that we have to 313?

General DEMPSEY. Against the current strategy, Senator, I do. I would only caveat it by saying that as we do this analysis of resources we may have to actually change our strategy. We may reach a point where we say as Joint Chiefs we cannot achieve the strategy, here's the recommendations we make on changing our strategy, whether it's forward presence, whether it's allocating resources or not, to building partner capacity.

In other words, your point hits exactly at the challenge I face, we face, which is we have a strategy and we have the means to execute it today. The means will change. We'll make some adaptations on how we do things. But at some point we may reach a point where we have to recommend to the President that we have to adapt or revise our strategy. We're not there.

In answer to your question, right now I absolutely do agree with the Navy's shipbuilding program. I'm aware how it supports their air-sea battle concept. I'm aware what it does for us with anti-access, denial activities. It's the right strategy with the right resources for today, and if the strategy changes then I'll change my opinion about it.

Senator COLLINS. My concern is that the budget is at risk of dragging the strategy, rather than the other way around. The way we should be doing this is determining our military requirements and have that dictate our resources, not the other way around.

There certainly are savings to be achieved. I'm going to submit a couple of questions for the record on overseas bases, military construction overseas, on some procurements that our Homeland Security and Government Affairs Committee has looked at, that has to do with the enterprise resource programs, which are now sole source contracts and have enormous cost overruns.

But let me use my remaining seconds to bring up a report that Senator Lieberman and I produced through our Homeland Security and Government Affairs Committee. It was on whether or not the Fort Hood shootings could have been prevented. I want to make sure to bring that report to your attention because, while we found that there was very poor communication between the Federal Bureau of Investigation and the Army, we also found that the Army had sufficient evidence on its own of Major Hasan's increasing radicalization.

We found that there was a flawed personnel evaluation process that was very troubling, because not only was his radicalization evident, but the fact is he wasn't a good doctor. Yet many times he received outstanding ratings. One of his supervisors actually told the people at Fort Hood: You're getting our worst. Yet that physician had an outstanding rating.

I would ask you to take a look at the rating process throughout DOD. I think that's absolutely critical.

General DEMPSEY. We actually are in the process of taking those lessons learned and adapting policies. But I will continue the work. You have my commitment for that.

Senator COLLINS. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Collins.

Senator Hagan.

Senator HAGAN. Thank you, Mr. Chairman.

General Dempsey, I just want to welcome you and I am looking forward to your confirmation. To Mrs. Dempsey, it's always a pleasure seeing you and I know this is definitely a team effort. Thank you for all your past service and sacrifice.

Recently I joined several of my colleagues in sending a letter to the Secretary of Defense, Secretary Gates, regarding findings of the Military Leadership Diversity Commission. This commission, established by Congress, issued a decision paper earlier this year. This is about women in combat. It stated that tactical and operational occupations and command assignments are important factors that increase opportunities for promotion to higher officer ranks, but women and minorities are underrepresented in tactical and operational career fields and in candidate pools for command assignments; and the most important barrier keeping women from serving in tactical and operational career fields is the DOD and Service policies that prohibit women from serving in occupations involving direct offensive ground combat.

The commission recommended DOD and the Services conduct a phased elimination of combat exclusion policies for women. My question, General Dempsey, is what do you think are the opportunities and risks for eliminating combat exclusion policies for women?

General DEMPSEY. Thank you, Senator. There is a DOD task force in fact looking at what have we learned over 10 years about the nature of the current conflicts. Of course, I don't have to explain this to you. You have visited. But the nature of current conflict is there's no front line and back line. Some of the rules we have in place on collocation, for example, are simply outdated and need to be revised. We're prepared to do that as an Army.

Now again, the DOD task force is looking both at collocation issues, but also at the issue of changing access to particular military occupational specialties. That work should take place here in the fall. I fully support it. I think we will learn that there are additional opportunities to be made available, and my commitment to you is to keep that on my agenda.

Senator HAGAN. Thank you. I think from a fairness standpoint, from the promotion, it certainly has to be on a level playing field, so that we can have very talented people in the upper levels.

I also wanted to ask on the role of Pakistan. Pakistan is a key regional actor in Central Asia, although right now our relationship with Pakistan is complicated. Pakistan is obviously an important player in terms of regional stability in Central Asia.

Can you describe how the Pressler Amendment has affected our relationship with Pakistan and how do you feel the United States needs to interact currently with Pakistan and in the future? How do you feel we should use the aid as a weapon of influence, based on the current relationship that we have now with Pakistan?

General DEMPSEY. Thank you, Senator. I think Pakistan is an enormously important country in the CENTCOM area of operations. In fact, when I was the Acting CENTCOM Commander I considered it to be among probably the top one or two countries to be addressed.

We've had, as you described it yourself, a very complex relationship with them. But I think it's one we need to stick with. To your point about the Pressler Amendment, that was a period in our history where we made a determination that we had such stark differences with Pakistan, notably on the issue of nuclearization, that we would cut off not only all aid, but all contact. As a result, we have now a generation among the Pakistan military, we have a generation of officers—generally they are field-grade majors and lieutenant colonels—who not only know nothing about us, but actually are somewhat antagonistic toward us because they've had no contact with us, and they simply remember a period of time when they were prohibited from having contact.

I think that's a mistake. The point would be as we go forward to Pakistan, I think we should continue to find areas of common interest. There are plenty of those. I think we ought to acknowledge where we have differences and there ought to be consequences for greater or lesser cooperation. But I think we have to stick with the relationship.

Senator HAGAN. Thank you.

I also wanted to ask a question about the military assistance for education. I know that GAO released a report back in March that focused on the military transition assistance program. My understanding is that oversight of the education programs receiving tuition assistance funds is really lacking and that the for-profit schools in particular have used in some cases, not all, improper tactics to enroll troops.

I'm also told that just this week the Pentagon has imposed some new rules for online-only schools, in which our military are using the tuition assistance dollars. This is a direct result from the findings of the GAO report. I think that's positive. But I also feel strongly that these rules need to go further.

Shouldn't these rules—and we're talking about online—also apply to brick and mortar institutions, so that all of the for-profit institutions are held to the same standards, whether they're online or not? Additionally, with all of the fraud and abuse that we've seen, do you believe these rules should apply to all DOD and Veterans Affairs (VA) benefits and not just the tuition assistance programs?

General DEMPSEY. It's an interesting point you raise. We are focused at this time on online education, but it certainly seems logical that we would be focused on making sure that these soldiers get best value for the money, whether they're in a brick and mortar schoolhouse or online.

But this next generation is more likely to seek education opportunities online, so that's probably why we have chosen to start the process there. But I would support the idea that we should take a look at both.

Senator HAGAN. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Hagan.

Senator PORTMAN.

Senator PORTMAN. Thank you, Mr. Chairman.

General, congratulations on your nomination, it's well deserved. I believe I am the one person standing between you and a very

well-deserved break, so I will try to be succinct. I'm delighted you're willing to step forward, and you've had a very distinguished career and I look forward to working with you.

Let me ask you a few questions, if I could, on the fiscal side, because we find ourselves in, unfortunately, very difficult economic and fiscal times. The current Chairman of the Joint Chiefs, Admiral Mullen, has talked about this. In January he said: "The Pentagon's budget has basically doubled over the last decade and my own experience here is that in doubling we've lost our ability to prioritize, we've lost our ability to make hard decisions, to do tough analysis, to make trades."

He also issued this very famous quote that maybe has been brought up earlier today, which is: "The single biggest threat to our national security is our debt."

Let me ask you a couple just quick comments, if you could, on that. One, do you agree with him on his famous quote about the debt being our biggest national security threat? Second, do you agree with him that we've lost our ability to prioritize, make hard decisions, and do tough analysis?

General DEMPSEY. On the first, Senator, which is the idea that our economic condition is the greatest threat to national security, I don't agree exactly with that. I'm very—

Senator PORTMAN. Fiscal, he said, not economic.

General DEMPSEY. Sorry?

Senator PORTMAN. Fiscal, so the debt.

General DEMPSEY. The way I would prefer to describe it is the issue is national power. From what do we derive our national power? We derive our national power, our influence across the globe, our access to resources, global commons, that is all derived from the combination of three things. You can't pick or choose. You have to have strength in the military arm, the diplomatic arm, and the economic arm.

So to the extent that he says our economic arm is weakened, therefore we are less capable across the globe, I buy that entirely. But I don't want to find myself in a position of voting that one or the other of those is more important than the other.

On the issue, to the second part, about whether the Pentagon has lost the ability to prioritize, yes. I think I would probably say that you develop cultures over time. When times are flush with resources, the culture becomes that you just aren't forced to make those kind of decisions. Then when the cycle returns and resources are more constrained, it requires a change in culture. So yes, I agree with that.

Senator PORTMAN. Let me dig a little deeper on that in terms of one issue, which is the acquisition side of your future role and your current role as a Service Chief. I just left the Contracting Oversight Subcommittee, where I'm the ranking member on the Homeland Security and Governmental Affairs Committee, where we were talking about the tough fiscal conditions we face and how we need to have Government do more with less.

In my time here on this committee, looking at various programs and witnessing some of the challenges we have in fielding capabilities for the Services in a timely way, it seems to me there are a few common themes. Surely there's a lot we can do in the acquisi-

tion process. The chairman and others have been involved with that over the years.

But I hear just as often blame attributed to the way the Department develops requirements. I'm involved again on this contracting issue on a broader scale and looking at the Joint Strike Fighter, for instance, where now we're looking at projected cost overrun of \$150 billion roughly—unbelievable.

You and Admiral Winnefeld, who was up here last week, are going to be in the middle of all this. It seems to me attempts to look at the data and analysis and get away from some of the litany of documents and lockstep wickets is a good thing. I get the feeling a lot of this stuff early on in the programs is time-consuming. It's a lot of paperwork. It's a need to meet the Joint Capabilities Integration Development System review requirements. The intent is certainly the right one. We need to figure out what we need before we develop it.

But something's not working here, and I just wonder if you could talk a little about this. Do you think the efforts being made to alter some of these processes are significant enough, and what would you do to ensure that real change occurs?

General DEMPSEY. I completely agree that the status quo is unacceptable and that the system itself does require reform. The Under Secretary of Defense for Acquisition Ash Carter is working diligently, based on some of the guidance we've received from the Congress of the United States.

I think there are some answers actually. I think the Service Chiefs need to have a greater role throughout the process. Right now we tend to have a role in requirements determination, but then the process is handed over to find a material solution. I think we have to partner more closely throughout the process, from start to finish, with industry.

I think we need to take a shorter time horizon on acquisitions. The way requirements creep is when we have decade-long programs, which allow the aperture to remain open and for guys like me to keep stuffing things through. I think the answer is greater collaboration between requirements determination, material solution, greater collaboration with industry earlier, and shorter time horizons, as a start, but there's probably other opportunities as well.

Senator PORTMAN. I think we're going to be forced to make some of those tough decisions, as you said, to prioritize.

By the way, you said Ash Carter, in reaction to guidance from Congress, is looking at some of these issues. I can't help myself, Mr. Chairman, say that some of the guidance I think it's fair to say from Congress on the second engine on the Joint Strike Fighter is not being adhered to, and that is we want competition.

General DEMPSEY. I had more in mind the Weapons System Acquisition Reform Act.

Senator PORTMAN. I know, yes. I just think we have to go to competition wherever possible, get the costs down, and be sure that it's open and fair.

Financial management. I want to get your thoughts on this. We recently had a debate on this on the floor because the Senate chose not to have so many positions be confirmed through the normal ad-

wise and consent process, which is a good thing. We're streamlining it. I offered an amendment, supported by many on this committee, saying there are some folks in the Federal Government who ought to continue to go through a process because we want to give them the stature that comes with that and empower them, and that included the financial management officials at the Department, including the Comptroller and each Service branch's financial management officer.

We were successful in getting that done. The reason we did it, again, was to be sure that those folks are listened to by others who are confirmed, and those who are in the civilian leadership at the Pentagon are usually the people we talk to about this issue. But I would tell you today that I think the auditing function, being sure that you have financial officers in every Service who are getting the attention from the leadership, is extremely important and I would hope that the uniformed leadership would continue to play a role, in fact, I would say even a more active role. I think some view those back office functions as not important to our fighting forces. I would say, particularly in these times, it's incredibly important.

The Marine Corps recently showed this, I think. By focusing more on financial management, they claimed a three dollar rate of return for every dollar spent on financial management, for instance.

As one member, I will tell you I would hope that you personally will get engaged in this issue. With the increasing pressure on the Pentagon's budget, we ought to be sure that every dollar is spent as intended and that we're freeing up funds for critical needs by focusing on financial management.

Can you give me your quick thoughts on that as a Service Chief now and how you intend to approach this as Chairman?

General DEMPSEY. As a Service Chief, I absolutely concur that we tend to look at—we describe them as Major Defense Acquisition Programs (MDAP), where the money is placed inside of our budget, and we tend to look at the top 10 percent of our MDAPs because that's where the big dollars are. Actually, it's 17 percent of the MDAPs have about 50 percent of the financial management challenges. But that's where we tend to focus our sight because it's the big dollars.

But there's another 50 percent out there in the smaller MDAPs, that total \$3, \$4, \$5 million, and I think we're in one of those environments where we have to be paying attention to all of it.

Then the other aspect of it is audit ability. We're on path to become auditable by 2017, and I'm committed to that.

Senator PORTMAN. Thank you, General. I appreciate it and again appreciate your willingness to step forward.

Chairman LEVIN. Thank you very much, Senator Portman.

I would recommend to you, relative to the issue of contracting in Afghanistan, a report which was a major report of this committee in October 2010, entitled "Inquiry Into the Role and Oversight of Private Security Contractors in Afghanistan." It was a long investigation, a detailed investigation, a very disturbing investigation, about the shortfalls of our private security contractors and the regulations and the policies needed to govern their operations.

The article that we saw in the paper the other day about some of the funds ending up in the hands of our enemy was based on that investigation, made reference, as a matter of fact, to the investigation.

But in terms of trying to put an end to some of the waste and worse that was going on and is going on relative to contractors in Afghanistan, I would recommend that very detailed report that we all worked so hard on.

I was intrigued by your comment about how much personal pleasure you take from not being a lawyer, but I will not pursue that, being a lawyer, since I'm interested in your rapid confirmation.

Unless there are any additional questions from Senator Portman, we will, with thanks to you and your bride, stand adjourned.

[Whereupon, at 12:16 p.m., the committee adjourned.]

[Prepared questions submitted to GEN Martin E. Dempsey, USA, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. You previously have answered the committee's policy questions on the reforms brought about by the Goldwater-Nichols Act in connection with your nomination to be the Chief of Staff, Army.

Has your view of the importance, implementation, and practice of these reforms changed from the perspective of your nomination to become the Chairman of the Joint Chiefs of Staff (CJCS) or since you testified before the committee at your most recent confirmation hearing for the Chief of Staff, Army?

Answer. Generally, no. Goldwater-Nichols made us the joint force we are today. However, if confirmed, I would examine the lessons of the past 10 years of war to determine if there are opportunities to make us an even more effective force.

DUTIES

Question. Section 151 of title 10, U.S.C., provides that the CJCS is the principal military adviser to the President, the National Security Council, and the Secretary of Defense.

What is your understanding of the duties and functions of the CJCS?

Answer. The CJCS performs duties as prescribed in law and as assigned by the Secretary of Defense. These duties include being the principal military adviser to the President, the National Security Council, and the Secretary of Defense. The Chairman also heads and regularly convenes the Joint Chiefs of Staff, and regularly consults with combatant commanders. Where the advice of the Joint Chiefs of Staff differs, the Chairman conveys dissenting opinions in rendering his advice.

Question. Assuming you are confirmed, what duties do you expect that Secretary Panetta would prescribe for you?

Answer. I anticipate the Secretary will assign duties consistent with the law and designed to support the requirements of the Secretary and the President.

Question. If confirmed, what changes to section 151, if any, would you recommend?

Answer. If confirmed, I do not anticipate recommending any changes to the law. I will, however, be attuned to issues and opportunities that might suggest consideration of potential changes to the law in the future.

Question. Sections 152 through 155 of title 10, U.S.C., relate to the duties, organization, and functions of the Chairman and Vice CJCS, and the organization and operation of the Joint Staff.

If confirmed, what changes to sections 152 through 155, if any, would you recommend?

Answer. If confirmed, I do not anticipate recommending any changes to the law. I will, however, be attuned to potential issues and opportunities for improvement that might suggest consideration for eventual changes in the law.

Question. What duties, responsibilities, and priorities would you plan to assign to the Vice CJCS?

Answer. The Vice Chairman performs the duties assigned to him as a member of the Joint Chiefs of Staff and such other duties as assigned by the Chairman, with the approval of the Secretary of Defense. I have not yet determined any additional duty assignments beyond those prescribed in law. If confirmed, I intend to discuss potential duties with the Vice Chairman as part of our close working relationship.

Question. What is your understanding and assessment of the most critical functions and performance of the Joint Staff? If confirmed, what changes, if any, would you propose to enhance the performance of the Joint Staff?

Answer. The Joint Staff is independently organized and operated to support the Chairman and Vice CJCS in discharging their duties as assigned by law. Among these duties, serving as the principal military adviser to the Secretary of Defense and President of the United States is paramount. This requires close collaboration and coordination with the staffs of the Secretary of Defense, Service Chiefs, and combatant commanders as well as other interagency offices and foreign military staffs. One ongoing change to the Joint Staff is the integration of certain functions and responsibilities that currently reside in Joint Forces Command. In addition to managing this transition, I will be alert to other opportunities to improve Joint Staff performance.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. I've been the beneficiary of assignments both with the Joint Force and within the Institutional Army that provide an important perspective on national security issues. Specifically, I've served as General Hugh Shelton's special assistant when he was the CJCS, as a Division Commander in combat, in a security assistance/building partner capacity role in both Saudi Arabia and Iraq, as Deputy and then Acting Commander of U.S. Central Command (CENTCOM), as Commander of U.S. Army Training and Doctrine Command, and as Chief of Staff of the Army.

Question. Do you believe there are actions you need to take to enhance your ability to perform the duties of the CJCS?

Answer. Yes. It seems clear we are entering a future environment that is more complex, less predictable, and faster paced. It is also clear we are entering a new fiscal environment. To be effective in that environment, I will need to establish strong relationships with the Joint Chiefs, the Secretary of Defense, the President, and Congress. I will also have to ensure that as a military we learn faster and adapt more quickly than our potential adversaries. Finally, if confirmed, I will be the senior military officer in the Nation. With that comes responsibility as the steward of our profession. Therefore, I will take personal interest in the development of our force as professionals in the service of our Nation.

RELATIONSHIPS

Question. Other sections of law and traditional practice establish important relationships between the Chairman and other officials. Please describe your understanding of the relationship of the CJCS to the following officials:

The Secretary of Defense.

Answer. The CJCS must have a close working relationship with the Secretary of Defense. Under title 10, the Chairman is assigned several duties that guide the relationship to include serving as the principal military advisor to the President, the National Security Council, and the Secretary of Defense. The Chairman also performs other duties assigned by the Secretary of Defense.

Question. The National Security Advisor.

Answer. The National Security Advisor is a special assistant and direct advisor to the President. As the role of the Chairman is to serve as the principal military advisor to the President, National Security Council, Homeland Security Council, and Secretary of Defense, if confirmed, I will continue to work closely with the National Security Advisor to ensure our efforts are synchronized across the interagency and for the purpose of implementing presidential decisions.

Question. The Deputy Secretary of Defense.

Answer. Under existing directives, the Deputy Secretary of Defense has been delegated full power and authority to act for the Secretary of Defense on any matters upon which the Secretary is authorized to act. As such, the relationship of the Chairman with the Deputy Secretary is similar to that with the Secretary.

Question. The Under Secretaries of Defense.

Answer. Title 10, U.S.C., and current Department of Defense (DOD) directives establish the Under Secretaries of Defense as the principal staff assistants and advisers to the Secretary regarding matters related to their functional areas. Within their areas, Under Secretaries exercise policy and oversight functions. They may issue instructions and directive type memoranda that implement policy approved by the Secretary. These instructions and directives are applicable to all DOD components. In carrying out their responsibilities, and when directed by the President and Secretary of Defense, communications from the Under Secretaries to commanders of the unified and specified commands are transmitted through the CJCS.

Question. The General Counsel of DOD.

Answer. Under title 10, U.S.C., section 140, the DOD General Counsel serves as the chief legal officer of DOD. In general, the DOD General Counsel is responsible for overseeing legal services, establishing policy, and overseeing the DOD Standards of Conduct Program, establishing policy and positions on specific legal issues and advising on significant international law issues raised in major military operations, the DOD Law of War Program, and legality of weapons reviews. The office of the DOD General Counsel works closely with the Office of Legal Counsel to the CJCS, and communications with the combatant commanders by the DOD General Counsel are normally transmitted through the CJCS.

Question. The DOD Inspector General.

Answer. The DOD Inspector General performs the duties, has the responsibilities, and exercises the powers specified in the Inspector General Act of 1978. If confirmed, I will cooperate with and provide support to the DOD Inspector General as required.

Question. The Vice Chairman of the Joint Chiefs of Staff.

Answer. The Vice CJCS performs the duties prescribed for him as a member of the Joint Chiefs of Staff and such other duties as may be prescribed by the Chairman, with the approval of the Secretary of Defense. When there is a vacancy in the Office of the Chairman or in the absence or disability of the Chairman, the Vice Chairman acts as Chairman and performs the duties of the Chairman until a successor is appointed or the absence or disability ceases.

Question. The Secretaries of the Military Departments.

Answer. Title 10, U.S.C., section 165 provides that, subject to the authority, direction and control of the Secretary of Defense, and subject to the authority of the combatant commanders, the Secretaries of Military Departments are responsible for administration and support of forces that are assigned to unified and specified commands. The Chairman advises the Secretary of Defense on the extent to which program recommendations and budget proposals of the military departments conform to priorities in strategic plans and with the priorities established for requirements of the combatant commands.

Question. The Chiefs of Staff of the Services.

Answer. Because of the Goldwater-Nichols Act, the Service Chiefs are no longer involved in the operational chain of command. However, this does not diminish their importance with respect to title 10 responsibilities. Among other things, they serve two significant roles. First, they are responsible for the organization, training, and equipping of their respective Services. Without the full support and cooperation of the Service Chiefs, no combatant commander can assure the preparedness of his assigned forces for missions directed by the Secretary of Defense and the President. Second, as members of the Joint Chiefs of Staff, the Chiefs are advisers to the Chairman and the Secretary of Defense as the senior uniformed leaders of their respective Services. In this function, they play a critically important role in shaping military advice and transforming our joint capabilities. If confirmed, I will continue to work closely with the Service Chiefs to fulfill warfighting and operational requirements.

Question. The combatant commanders.

Answer. The combatant commanders fight our wars and conduct military operations around the world. By law, and to the extent directed by the Secretary of Defense, the Chairman serves as spokesman for the combatant commanders and is charged with overseeing their activities. He provides a vital link between the combatant commanders and other elements of DOD, and as directed by the President, may serve as the means of communication between the combatant commanders and the President or Secretary of Defense. If confirmed, I will work closely with the combatant commanders to enable their warfighting capability and to provide support.

Question. The Chief of the National Guard Bureau.

Answer. The Chief of the National Guard heads a joint activity of DOD and is the senior uniformed National Guard officer responsible for formulating, developing and coordinating all policies, programs, and plans affecting more than half a million Army and Air National Guard personnel. Appointed by the President, he serves as

principal adviser to the Secretary of Defense through the CJCS on National Guard matters. He is also the principal adviser to the Secretary and Chief of Staff of the Army and the Secretary and Chief of Staff of the Air Force on all National Guard issues. As National Guard Bureau Chief, he serves as the Department's official channel of communication with the Governors and Adjutants General. If confirmed, the Chief of the National Guard Bureau will continue to have full access to the upper echelons of the Joint Staff and me.

Question. The Special Representative for Afghanistan and Pakistan.

Answer. There is no command relationship between the Special Representative for Afghanistan and Pakistan and the U.S. military. However, because of the critical importance of coordinating State Department and DOD activities in Afghanistan and Pakistan to advance U.S. policy objectives in the region, if confirmed, I will work closely with him to ensure our efforts are synchronized.

Question. The Commander, U.S. Forces-Afghanistan.

Answer. Although the CJCS is the principal military advisor to the President, the Secretary of Defense, and the National Security Council, he is not in the chain of command of the Commander, U.S. Forces-Afghanistan (USFOR-A). The Commander, USFOR-A reports to the Commander, CENTCOM, who, in turn, reports directly to the Secretary of Defense. This reporting relationship is prescribed in title 10 U.S.C. section 164(d)(1). The Commander, USFOR-A does not have a formal command relationship with the CJCS, but he coordinates with him through the Commander, CENTCOM on a regular basis. The Commander, USFOR-A sends his advice and opinions on military operations to the Commander, CENTCOM, who, in turn, presents them to the Chairman.

Question. The Commander, U.S. Forces-Iraq.

Answer. Although the CJCS is the principal military advisor to the President, the Secretary of Defense, and the National Security Council, he is not in the chain of command of the Commander, U.S. Forces-Iraq (USF-I). The Commander, USF-I reports to the Commander, CENTCOM, who, in turn, reports directly to the Secretary of Defense. This reporting relationship is prescribed in title 10 U.S.C. section 164(d)(1). The Commander, USF-I does not have a formal command relationship with the CJCS, but he coordinates with him through the Commander, CENTCOM on a regular basis. The Commander, USF-I sends his advice and opinions on military operations to the Commander, CENTCOM, who, in turn, presents them to the Chairman.

MAJOR CHALLENGES AND PRIORITIES

Question. What is your vision for the Armed Forces of today and the future?

Answer. We have the finest military in the world today, and we must maintain it as the finest military in the future. We must provide the Nation with the military it needs, and that means we must provide our leaders with options. The force must be responsive, decisive, versatile, interdependent, and affordable. We are likely to be somewhat smaller, but in doing so we must remain capable of providing what the Nation needs. Delivering a force such as I've described will require us to reform many of our current processes including but not limited to the acquisition and procurement processes as well as our training and leader development strategies. It will likely be necessary to establish a different relationship among the Active and Reserve components of our Armed Forces, and it is likely that we will have to establish a different relationship among our closest allies and partners.

Question. In your view, what are the major challenges that will confront the next CJCS?

Answer. The next Chairman must achieve the Nation's objectives in the current conflicts, shape the international security environment, prepare the force for an uncertain future, respond to a changing fiscal reality, and do all of that while preserving the All-Volunteer Force.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. Addressing these challenges starts with a clear-eyed look at the mid-future and the determination of what the Nation needs in its military. Stated another way, we must decide what military capabilities we need in 2020 and determine how we will deliver them.

Question. If confirmed, what broad priorities will you establish?

Answer. We have to provide whatever it takes to achieve our national objectives in Iraq and Afghanistan. We have to maintain pressure on those state and non-state actors who threaten us. We have to maintain and build alliances and partnerships. We have to stay connected to the American people, and we have to keep faith with

soldiers, families, and veterans. As I said earlier, the Joint Force for 2020 must be responsive, decisive, versatile, interdependent, and affordable.

CHAIN OF COMMAND

Question. Section 162(b) of title 10, U.S.C., provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the combatant commands. Section 163(a) of title 10 further provides that the President may direct communications to combatant commanders be transmitted through the CJCS and may assign duties to the Chairman to assist the President and the Secretary of Defense in performing their command function.

Do you believe that these provisions facilitate a clear and effective chain of command?

Answer. The current chain of command provides a clear and effective means for employing our Nation's military. The combatant commanders, under the orders of the Secretary of Defense, fight our wars and conduct military operations around the world. As the principal military advisor to the President and the Secretary of Defense, the Chairman provides a vital link between the President, the Secretary of Defense, the combatant commander, and the Service Chiefs. If confirmed, I may inform decisions and transmit directions, but there will be no question that the combatant commanders receive their orders from the Secretary of Defense.

Question. The recent successful mission against Osama bin Laden was executed using military forces of DOD, under the control of the Central Intelligence Agency, and presumably under the authorities in title 10, U.S.C.

Are there circumstances in which you believe it is appropriate for U.S. military forces to be under the operational command or control of an authority outside the chain of command established under title 10, U.S.C.?

Answer. I believe the chain of command established by title 10 is the appropriate mechanism for the command and control of military operations. Without commenting on the bin Laden operation in particular, it is my understanding that in general there are circumstances in which military capabilities should be made available temporarily to support an activity of a non-DOD U.S. Government department or agency. In these instances, it is appropriate for the head of such department or agency to direct the operations of the element providing that military support. The President remains at the top of the chain of command and at all times has overall command and responsibility for the operation. The military units supporting such an operation are still governed by the laws of armed conflict and, as an administrative matter, the military personnel remain accountable to the military chain of command, including for matters of discipline under the Uniform Code of Military Justice.

Question. In your view, what are the advantages, disadvantages, and risks, if any, in utilizing U.S. military personnel for missions under the authorities contained in title 50, U.S.C.

Answer. Non-DOD Federal departments and agencies may, in carrying out their duties, occasionally require support that resides in the U.S. Armed Forces and does not exist in the department or agency conducting the operation. It sometimes is therefore preferable to make an appropriate military capability temporarily available to support the operations of other departments and agencies. The advantage of this authority is that it allows for specialization and division of labor across departments and agencies and can prevent the development of under-utilized, military-like capabilities in other agencies. A potential disadvantage or risk is of sharing capabilities is that the department or agency receiving the support may not be sufficiently organized, trained, or equipped to most effectively direct the employment of the military capability. In all cases, however, we work to minimize any disadvantages and risk.

Question. What is your understanding and assessment of the authorities and agreements which are in place to allow U.S. military personnel to carry out missions under the authorities contained in title 50, U.S.C.? Do you believe any modifications to these authorities are necessary?

Answer. As noted above, consistent with title 50 of the U.S.C., the President may authorize departments, agencies, or entities of the U.S. Government to participate in or support intelligence activities. As stated above, military personnel in support of any such activities remain subject to the laws of armed conflict and the Uniform Code of Military Justice while operating under the direction of the head of a non-DOD Federal department or agency. I believe that existing authorities are sufficient to facilitate DOD's providing appropriate support under title 50 while ensuring necessary oversight.

Question. Please explain your views on the preferred chain of command structure for counter terrorism operations conducted outside of Iraq and Afghanistan.

Answer. I believe the chain of command established under title 10 is appropriate for command of U.S. military operations regardless of the location. The determination of whether chain of command structure for a specific counterterrorism operation is appropriate will depend on the nature of the contemplated operation and the circumstances specific to the time and place of that operation.

ADVICE OF THE SERVICE CHIEFS AND THE COMBATANT COMMANDERS

Question. Section 163 of title 10, U.S.C., provides that the CJCS serves as the spokesman for the combatant commanders, especially on the operational requirements of their commands. Section 151 of title 10 provides for the other members of the Joint Chiefs of Staff to submit their advice or opinion, in disagreement with or in addition to the advice or opinion of the Chairman, and requires the Chairman to provide that advice at the same time that he presents his own advice to the President, National Security Council, or Secretary of Defense.

What changes to section 151 or 163, if any, do you think may be necessary to ensure that the views of the individual Service Chiefs and of the combatant commanders are presented and considered?

Answer. I believe the legislation is well-crafted and is sufficient to ensure that differing viewpoints are offered to our national leadership, while preserving the Chairman's role as the principal military advisor. It has been my experience that this relationship works well, and I see no need to change the law. If confirmed, I will maintain the very effective and collaborative environment that currently exists.

Question. Do you believe the Chief of the National Guard Bureau should be a member of the Joint Chiefs of Staff? Please explain your position.

Answer. While I am open-minded to the possibility, I have significant concerns about this proposal. The Services have never been closer to their Reserve components, and separating them by title risks creating unnecessary friction in the ranks. Furthermore, the authority of the Service Chiefs is built on the foundation of their budget responsibility. Stated another way, they are accountable for the military advice they provide by virtue of their control of their Service budgets. The Chief of National Guard, if appointed as a member of the JCS, will have authority without accountability. This would concern me.

SECURITY STRATEGIES AND GUIDANCE

Question. In your view, is the Nation's defense strategy appropriate for the threats we face today and could face in the coming decades?

Answer. I believe the strategy is appropriate for the threats we face today, although I am alert to concerns that it might be under-resourced over the mid- to long-term. It is my understanding that the ongoing comprehensive review is being careful to ensure it is strategy-based and risk-informed. If confirmed, I will ensure that we clearly identify the specific risks commensurate with revised resource levels.

Question. What changes, if any, should be considered?

Answer. In my judgment, a good strategy is dynamic and adaptive to changes in the strategic environment the threat, and the needs of our Nation. I believe the existing strategy addresses known threats while posturing for less well-defined or understood threats and contingencies that might arise.

Question. In your view, is our broad defense strategy and current establishment optimally structured, with the roles and missions of the military departments appropriately distributed, and U.S. forces properly armed, trained, and equipped to meet security challenges the Nation faces today and into the next decade?

Answer. Overall, I would say yes, but I would also be careful about the word "optimal", because it implies some static ideal. I would say that as our strategy evolves, so too must our organizations, approaches, and forces. I think we do that well. We continually examine whether our forces are appropriate to the missions at hand. A recent example is the stand up of U.S. Cyber Command in response to challenges in cyberspace.

Question. If confirmed, what changes, if any, would you propose to the structure, roles, and missions of the defense establishment?

Answer. The Defense Department conducts continuous security analysis that results in the periodic publication of strategic evaluations and plans intended to guide all elements of the defense establishment in its strategic and operational planning, programming and budgeting, and for the development and employment of military forces. These evaluations and plans include: the National Security Strategy, the National Strategy for Counterterrorism, the National Military Strategy, the Unified Command Plan, the Quadrennial Defense Review (QDR), the Quadrennial Roles and

Missions Review, the Nuclear Posture Review (NPR), the Ballistic Missile Defense Review, and the Global Defense Posture Review.

If confirmed, I will examine our current status and provide my best military judgment on what needs to be adapted. Title 10 requires the Secretary to conduct a Quadrennial Roles and Missions Review and submit it to Congress prior to the budget submission in 2013. One of my statutory responsibilities will be to provide an assessment of roles, missions, and functions to inform that review. I would do so in collaboration with the Joint Chiefs and Combatant Commanders.

Question. What is your assessment of the most current versions of these strategic evaluation, guidance, and report documents?

Answer. My assessment is that these documents derive from a common understanding of a complex strategic environment, and that their strategy objectives and tasks are integrated, consistent, and appropriate to advancing U.S. national security. The simultaneity of the multiple reviews enhanced the ability for these reviews to complement each other. For example, the QDR was informed by early NPR findings.

Question. What, in your view, is or should be the relationship, if any, of each document to the Department's annual and long range budget request and plans?

Answer. Budget plans and requests must be informed by national strategies as strategies must be resource informed. The security strategies and guidance inform the Program, Planning, Budget, and Execution (PPBE) process and allow the Department to align resources with the execution of strategy, guidance, and policies. The PPBE process allows us to revisit decisions that need review due to changing world situations, and it enables the Department to adjust resources as needed.

Question. If confirmed, what changes, if any, would you propose to the strategic analysis and approval processes or to the reports and guidance contained in each?

Answer. If confirmed, I do not anticipate recommending any immediate changes, but I retain the right to change my mind. The Department conducts rigorous strategic analysis, which informs strategic discussions and provides options. The approval processes ensures that multiple perspectives are captured prior to final direction being provided.

STRATEGIC RISK

Question. Do you believe that the extended pace and scope of operations in Iraq and Afghanistan create increased levels of strategic risk for the United States based on the lack of available trained and ready forces for other contingencies?

Answer. No. Our service men and women have gained enormous combat experience in combat in Iraq and Afghanistan. I think our military and civilian leaders have managed the risks associated with our extended campaigns in Iraq and Afghanistan well. That said, there are skills that have atrophied, and we must address them as time to train permits.

Question. If so, how would you characterize the increase in strategic risk in terms of the military's ability to mobilize, deploy, and employ a force for a new contingency? In your view, is this level of risk acceptable?

Answer. I believe the Services have done a tremendous job maintaining the readiness of our military to respond to contingencies—evidenced, in part, by our rapid ability to plan and execute military operations in Libya, respond to the earthquake and tsunami in Japan, and maintain a credible deterrence against potential aggressors across the globe. The temporary increases in end strength authorized by Congress played an important role in this, and recently, the drawdown in Iraq has made more forces available. I believe any risk we have assumed to be acceptable, because while training in some areas has suffered, our forces are actually the most experienced they have ever been. The focus now needs to be on resetting and reconstituting degraded capabilities.

Question. What is the impact of the decision to decrease U.S. forces committed to Afghanistan on our ability to meet our security obligations in other parts of the world?

Answer. We are meeting our current global security obligations. Given the size of the drawdown scheduled for this year and next year, there will be little initial impact on our ability to meet these obligations. As we reset and reconstitute our military, we will be better able to meet any additional and emergent security obligations.

Question. How and over what periods of time, if at all, will reductions to Army and Marine Corps end strength increase or aggravate this risk?

Answer. An unpredictable and/or hasty timeline to reduce ground forces would damage both the institution and increase military and strategic risks to the Nation.

The current planned reductions and timelines, coupled with efficiency efforts are executable with what I consider acceptable risk.

Question. If confirmed, what additional actions would you take, if any, to reduce or mitigate this strategic risk?

Answer. If confirmed, I will address risks by advising on the employment of the Joint Force to maximum effect, working closely with allies and partners, and integrating coordinating to integrate military actions with other elements of national power. Furthermore, I would use my first annual risk assessment to clearly identify the risks that require mitigation.

TRANSFORMATION

Question. Military “transformation” has been a broad objective of the Armed Forces since the end of the Cold War.

What is your understanding and assessment of the progress made by the Department, including the Joint Chiefs of Staff and the Joint Staff, toward transforming the Armed Forces?

Answer. Transformation can have many different meanings, but in general it implies fundamental organizational change. Such change has certainly occurred over the last decade even as we have preserved our core values and retained the trust of the American people. The Joint Force is more battle-tested and integrated across Services and components than at any time in our history. It has changed its structure, doctrine, education, exercises, training, material, leader focus, and posture to account for changing threats in diverse theaters. If confirmed, I will work to ensure we continue to change in a way that strengthens joint warfighting capabilities over time.

Question. If confirmed, what goals, if any, would you establish regarding military transformation in the future?

Answer. As we adjust our posture and missions in Iraq and Afghanistan, I would like to see a balanced force that is capable across the full spectrum of missions vice optimized for any particular mission set. If confirmed, I would also work to further advance affordable and versatile joint capabilities.

Question. Do you believe the Joint Staff should play a larger role in transformation? If so, in what ways?

Answer. The areas of concept development and experimentation, strategy development, requirements development, and the doctrine development processes. The assumption of many Joint Forces Command responsibilities will ensure that Joint Staff plays an even larger role in the future.

ECONOMIC SECURITY

Question. Current Chairman of the Joint Chiefs, Admiral Michael Mullen, asserted in January that the Pentagon’s “budget has basically doubled in the last decade. My own experience here is in that doubling, we’ve lost our ability to prioritize, to make hard decisions, to do tough analysis, to make trades.” Most recently on July 10th, Admiral Mullen stated that “the single-biggest threat to our national security is our debt”.

Do you agree with Admiral Mullen’s assessments regarding the relationship between U.S. security and debt?

Answer. I wouldn’t describe our economic condition as the single biggest threat to national security. There are a lot of clear and present threats to our security in the current operational environment. That said, there is unquestionably a relationship between U.S. security and the debt. However, national security didn’t cause the debt crisis nor will it solve it. I agree that the national debt is a grave concern. Our national power is the aggregate of our diplomatic, military, and economic influence. We have to address our economic stature, but that doesn’t mean we can neglect the other instruments of national power.

Question. If so, in your view, how does this relationship impact the Defense Department and, if confirmed, what changes, if any, would you propose to ensure that, in building a military capable of meeting our strategic objectives, the defense budget does not at the same time undermine our national security?

Answer. DOD is currently conducting a comprehensive review directed by the President to determine the strategic implications of a \$400 billion reduction in spending. If confirmed, I will focus on delivering the military force the Nation needs while endeavoring to be a good steward of our national resources.

Question. Do you agree with Admiral Mullen that the Defense Department has lost the ability to prioritize and make the tradeoffs that come with tough decisions?

Answer. Over the last decade in an era of relatively unconstrained resources, DOD has not had to make difficult decisions about budgetary tradeoffs. While we

may have lost some of the “muscle memory” for such decision-making, I am confident we can adapt to a changing security and fiscal environment. If confirmed, I will build on current efforts to strengthen the analytical processes needed for making hard choices. More importantly, I will reinforce a culture of cost discipline that will ensure we remain good stewards of our national resources.

Question. If confirmed, what changes, if any, would you propose to regain the Department’s ability to objectively analyze its requirements, prioritize to meet national security needs, and make the tough choices in allocating resources to meet those needs?

Answer. The next Chairman—whoever he or she is—will clearly have to balance ends, ways, and means more proactively than his immediate predecessors to deliver a military that will meet the needs of the Nation. This is not about changing process; it’s about managing change.

NATIONAL SECURITY BUDGET REDUCTIONS

Question. The President has called for \$400 billion in reductions to security spending over a 10-year period starting in 2013, and has asked the Secretary of Defense to lead a review to provide recommendations on where to make those cuts.

What is your understanding of the current status of that review?

Answer. The review is ongoing. I participate in the review now as a Service Chief, and if confirmed, I welcome the opportunity to continue to collaborate with the Secretary of Defense, Service Chiefs, and combatant commanders to achieve a more affordable Joint Force.

Question. What is your view as to how such cuts should be distributed among the various components of security spending?

Answer. While some distribution of cuts among various components of security spending is both inevitable and appropriate, we should avoid simply making formulaic, across-the-board cuts. Reductions in one area have implications in others. Therefore, we must carefully calibrate cuts to ensure the result is a strengthened Joint Force. The precise distribution of cuts across components of security spending is still being determined, but I understand it to be a fundamental consideration for the ongoing review.

Question. What role do you expect to play, if confirmed, in guiding the review and in determining what cuts, if any, should be made to the defense budget?

Answer. If confirmed, I expect to play a prominent role in this review, and I will work closely with both the Secretary of Defense and the Joint Chiefs of Staff to provide my best judgments on how what cuts should be made.

Question. Do you believe that a national security spending reduction of this magnitude can be accomplished without significant adverse impact on our national security?

Answer. The review is ongoing, and it will help inform the risks associated with prospective cuts to our defense budget. If confirmed, I will work with the Secretary of Defense and Joint Chiefs of Staff to ensure an affordable Joint Force that meets our national security needs.

Question. If confirmed, how will you prioritize the objectives of: making needed investments in the future force, addressing pressing requirements for completing the missions in Iraq and Afghanistan, meeting ongoing operational commitments across the globe, resetting of the force, and achieving the level of savings proposed by the President?

Answer. If confirmed, I will continue to prioritize funding to support our troops fighting in our conflicts abroad while helping to assure we are conducting operations in fiscally responsible manner. Given that the review is ongoing, I do not want to prejudge how to prioritize among the other categories listed; however, it is my judgment that we can achieve the level of proposed savings in a way that strengthens the Joint Force over time.

USE OF MILITARY FORCE

Question. The question as to whether and when U.S. forces should participate in the use of force is one of the most important and difficult decisions that the national command authorities have to make. Prior Secretaries of Defense and Chairmen of the Joint Chiefs of Staff have proposed criteria to guide decision-making for such situations.

What factors would you consider in making recommendations to the President on the use of force?

Answer. If confirmed, in making recommendations to the President on the use of force, I would consider the threat to our national interests, the role of non-military means to achieve our objectives, the ability of military means to contribute to our

political objectives, and the likely outcome from the use of military force. If it is determined that the use of military force is appropriate, I would propose its use in a precise and principled manner. I would pursue the cooperation and assistance of our allies and partners and adhere to international standards and treaty agreements while still reserving the right to act alone if necessary.

Question. What circumstances should pertain for you to recommend that the President employ preemptive force?

Answer. If adversaries challenge our vital interests with the threat of force, and both deterrence and diplomacy fail, the United States must be prepared to consider preemptive force. If confirmed, some of the key factors I would consider in recommending the employment of preemptive force include the vital national interests at stake, the degree to which other options have been exhausted, the probability of an attack by our adversary, the potential results of the enemy attack, and the consequences of our preemptive action.

Question. What degree of certainty do you believe is necessary before the United States would use preemptive force?

Answer. While I believe the degree of certainty necessary before the United States should employ preemptive force should be high, it is not reasonable to articulate a pre-existing standard. Rather, it should take into account the imminence and severity of the threat and the likely outcomes of the use of preemptive force.

DWELL TIME

Question. While dwell time is improving as our forces draw down in Iraq, many active duty military members are still not experiencing the dwell-time goal of 2 years at home for every year deployed.

In your view, under what conditions and when will dwell-time objectives be met for the Active and Reserve components?

Answer. All Services are making progress toward achieving objective dwell rates based on guidance issued in the Global Employment of Forces document. While the Army is now averaging about a 1:1 dwell time, we expect to reach 1:2 by the end of this year. I understand the other Services are at about 1:2 already and that dwell times will continue to improve for both the Active and Reserve components through fiscal years 2012–2014. Our goal remains to optimize the quality of life for every soldier, sailor, airman, and marine while still meeting mission requirements. If confirmed, I will closely monitor this important issue.

ACTIVE DUTY END STRENGTH

Question. Under current planning, the Army will reduce its end strength by 22,000 through fiscal year 2013, including 7,400 in fiscal year 2012. This end strength was part of the temporary increase authorized in 2009 and was intended to enable the Army to cease relying on the so-called “stop-loss” authority and to make up for a growing population of nondeployable soldiers. Beginning in fiscal year 2015, depending on conditions on the ground, the Army and Marine Corps plan to reduce their permanent end strength and force structure by 27,000 soldiers and at least 15,000 marines, respectively.

Do you agree with this Active Duty end strength reduction plan?

Answer. Yes. End strength reductions are conditions based and require periodic reevaluation. If confirmed, I will work with Secretary Panetta and support the Army leadership’s plan to accomplish current and projected missions, balance the well-being of soldiers and families, and keep the Army prepared to meet unforeseen operational demands.

Question. What is your view of how these planned end-strength reductions will affect dwell-time ratios?

Answer. The planned end strength reductions are intended to take advantage of reduced demand to support ongoing operations in Afghanistan and Iraq. It is my understanding that if the draw-downs continue as planned, the end strength reductions should allow our forces to achieve and sustain acceptable dwell ratios.

Question. What effect would inability to meet dwell-time objectives have on your decision to implement the planned end strength reductions?

Answer. Should an unforeseen event change our assumptions about end strength assumptions, I would review all options and provide my best military advice in adapting existing plans.

Question. In your view, can the Army accelerate to 2012 more of its planned reduction in its temporary over-strength without an adverse impact on national security?

Answer. Army force structure is directly linked to the pace of ongoing operations. We will manage end strength reductions to ensure that we do not incur excessive

risk. If confirmed, I will work closely with the Army and the Marine Corps to determine our appropriate end strength and the associated timing.

Question. What would be the effect on dwell time of accelerating the Army's force reduction plan?

Answer. Currently, our plans for end strength reductions are well integrated with our dwell-time projections. Any changes to current timelines for end strength reductions would need to be assessed against our current and projected operational requirements and our dwell-time goals.

Question. What are the assumptions regarding "conditions on the ground" that will allow for the planned reductions beginning in 2015 to occur on time?

Answer. We're tracking the: (1) transition of tasks to our Afghan counterparts in the security forces and various government institutions; and (2) the responsible drawdown of our surge forces within the parameters set by the President. The planned reductions in end strength are based on achieving these drawdown objectives in Afghanistan. As 2014 approaches, we will have to assess our enduring strategic interests in the region to determine the appropriate size and nature of force presence in Afghanistan after 2014.

Question. The Navy and Air Force appear to be on pace to exceed authorized strengths for fiscal year 2011, and to address this overstrength, the Department has requested congressional authorization of force management tools to avoid exceeding end strength limits and save money.

In your view, what tools do the Department and Services need to get down to authorized strengths in the future, and which of these require congressional authorization?

Answer. I am not yet familiar with the full extent to which the authorities used during previous force reductions have expired or will soon expire. If confirmed, I will work closely with the senior military and civilian leadership of the Department to identify any additional tools and associated legislation that may be needed to help us meet our authorized end strengths.

INSTITUTIONALIZATION OF COUNTERINSURGENCY CAPABILITIES

Question. The 2010 report of the QDR provided that military forces shall be sized to prevail in ongoing conflicts in Afghanistan, Iraq, and the war against al Qaeda as well as for conducting foundational activities that prevent and deter attacks or the emergence of other threats. The QDR report particularly emphasizes the requirement for improved capabilities in key mission areas such as counterinsurgency, stability, and counterterrorism operations, as well as building the security capacity of partner states.

What is your understanding and assessment of the current ability of each Service to provide capabilities to support these mission requirements and, if confirmed, what changes, if any, would you pursue to improve these capabilities?

Answer. My belief is that we have adapted extraordinarily well. Over the past decade, our forces have made tremendous advances in developing their counterinsurgency, stability, and counterterrorism capabilities. Leaders have put a tremendous amount of effort into actually learning and applying the lessons learned from operations in Iraq and Afghanistan. Just as I did during my tenure with Training and Doctrine Command, it is my understanding that all the Services are continuously incorporating those lessons into doctrine and training regimes. In turn, these lessons are being adapted by our forces in combat, as I witnessed on more than one occasion in Iraq. If confirmed, I will continue to support those recurring and continuous improvement efforts that bring the right mix of capabilities and force structure to address future requirements. I will also continue to assess and balance risk across the spectrum of operations.

Question. A major objective of the Department over recent years, as well as guidance in the QDR report, has been toward increasing emphasis on and institutionalization of lower-end, irregular, counterinsurgency, and stability type operations.

What is your understanding and assessment of the Department's efforts to date to institutionalize and support these capabilities?

Answer. During over 10 years of continuous operations in these areas, DOD has made remarkable progress toward developing and institutionalizing joint capabilities for irregular warfare, counterinsurgency, and stability operations. We have further supported these capabilities by adopting lessons learned and resetting and maintaining the equipment that facilitates those operations. The United States will continue to face challenges from non-state adversaries and regions threatened by terrorist or insurgent violence. If confirmed, I will closely examine our efforts to develop the right capabilities at the right price effectively counter these threats.

Question. If confirmed, how would you propose to redistribute the Department's efforts and resources, if at all, to ensure that the force is prepared for force-on-force combat at the same time it increases and institutionalizes capabilities and support for irregular, counterinsurgency, and stability operations?

Answer. The 2010 QDR recognized the need to balance future military capabilities to meet a broad range of threats across a wide spectrum of adversary capabilities and operating environments. In a period of potentially significant budget constraints, it will be imperative to appropriately balance risk across the spectrum of potential operations. If confirmed, I will support existing and ongoing efforts and processes to assess the impact of these constraints and ensure our forces retain the appropriate size and mix of capabilities. I am committed to preserving the appropriate mix of hard-won, joint capabilities and experiences for our decade-plus of war.

DEFENSE ACQUISITION REFORM

Question. Two years ago, Congress enacted, without a dissenting vote in either House, the Weapon Systems Acquisition Reform Act (WSARA). WSARA is designed to ensure that new defense acquisition programs start on a sound footing, to avoid the high cost of fixing problems late in the acquisition process.

What are your views regarding WSARA and the need for improvements in the Defense acquisition process?

Answer. I welcome WSARA. WSARA mandated much needed reforms to the defense acquisition process. I support its requirements for DOD to examine cost, schedule and performance trade-offs to reduce cost-growth. I am also aware that DOD has pursued significant additional improvements to the acquisition process to include examining the requirements process. If confirmed, I will not only work to implement the changes required by law, but I will continue to pursue improvements to defense acquisitions processes.

Question. If confirmed, how would you improve all three aspects of the acquisition process B requirements, acquisition, and budgeting?

Answer. The 2009 Weapons Systems Acquisition Reform Act was an important step forward in improving defense acquisition. It is my understanding, that DOD has made significant progress toward implementing its requirements and achieving our shared interest in deriving better value for every dollar spent. I fully support the DOD "Better Buying Power" initiative to coordinate the requirements, acquisition, and budget processes in a way that mandates affordable requirements to ensure programs start from a solid foundation. If confirmed, I would work to enhance the quality of interaction among these processes and promote greater participation by the warfighter throughout the acquisition lifecycle.

Question. Do you believe that the current investment budget for major systems is affordable given increasing historic cost growth in major systems, costs of current operations, and asset recapitalization?

Answer. While I am not yet familiar with the entirety of the defense budget, my sense is that the current investment budget for major systems is not affordable in this fiscal and operational environment. Certain progress was made on this front under the leadership of Secretary Gates and Admiral Mullen leading to a leaner major weapons system portfolio. But, we are not finished pursuing cost control and affordability. Given historic cost growth and current budget pressures, we must closely manage existing programs, and start new programs smartly, so that cost growth does not make them unaffordable. If confirmed, I will continue to examine the investment budget closely for opportunities to achieve greater cost savings and improve overall weapon systems affordability.

Question. If confirmed, how do you plan to address this issue and guard against the potential impact of weapon systems cost growth?

Answer. If confirmed, I will address weapons system cost growth in several mutually supportive ways. I will directly leverage the Joint Requirements Oversight Council (JROC) "trip-wire" process to monitor for cost growth and schedule delays in Major Defense Acquisition Programs. This process also helps ensure I am prepared to properly advise the Secretary of Defense with regard to the Nunn-McCurdy certification process and participate in the still maturing Configuration Steering Boards. Additionally, balancing system performance and cost will continue to be a central goal of the ongoing Joint Capabilities Integration and Development process review. Program and portfolio affordability will be important factors in performance trade-off decisions.

Question. If confirmed, what actions would you propose, if any, to ensure that requirements are realistic, and prioritized?

Answer. The National Defense Authorization Act for Fiscal Year 2011 implemented requirements process changes that I would allow to mature if confirmed.

For example, the addition of combatant commanders as voting members of the JROC is proving its value to ensure that Service and Joint priorities are properly aligned. A further improvement is the requirement that JROC validations specify cost, schedule, performance, and quantity to ensure we get the capabilities we need in a responsive and reasonable timeframe. As the Joint Capabilities Integration and Development Systems (JCIDS) review goes forward, I anticipate several reform recommendations that will improve our ability to establish increasingly realistic and properly prioritized requirements.

CONTRACTORS ON THE BATTLEFIELD

Question. U.S. military operations in Iraq and Afghanistan have relied on contractor support to a greater degree than previous U.S. military operations. According to widely published reports, the number of U.S. contractor employees in Iraq and Afghanistan has often exceeded the number of U.S. military deployed in those countries.

Do you believe that DOD has become too dependent on contractor support for military operations?

Answer. While I am not yet in a position to render a judgment about whether we have become too dependent on contractors, my instincts suggest that this is the case. Recently as a result of a study by the Chairman of the Joint Chiefs, the Secretary of Defense issued a memorandum to DOD directing a wide range of changes to improve operational contracting support along with guidance for the assessment high-risk contracted capabilities. If confirmed, I will review this study and the military departments' assessments.

Question. What risks do you see in the Department's reliance on such contractor support? What steps do you believe the Department should take to mitigate such risk?

Answer. The most significant risk is in contract oversight. DOD's recent experience supporting contingency operations in Iraq and Afghanistan has shown that poor contractor management can increase the potential for fraud, waste, and abuse. Additionally, interaction of contractors with local communities, along with their potential use of force, has a direct impact on the operational mission. Therefore, it is imperative for DOD to properly plan for, use, and manage contractors in the operational environment. As with any situation, understanding the current problems and their risks are the first step in mitigation. It is my judgment that the CJCS and the Secretary of Defense have set the department on the right path and if confirmed, I look forward to reviewing ongoing assessments and continuing efforts to improve the use and oversight of contractors.

Question. Do you believe the Department is appropriately organized and staffed to effectively manage contractors on the battlefield?

Answer. I'm not sure. I recognize that initially DOD was not properly organized and staffed to effectively manage contractors in the ongoing contingency operations, but corrective actions have been implemented over the last several years. Operational contracting support efforts will enhance our ability to modify the way we source and oversee contracting. If confirmed, I will review ongoing efforts to ensure that DOD institutionalizes its contingency contracting capabilities and that the lessons learned from our experiences in Iraq and Afghanistan are applied to future operations.

Question. What steps if any do you believe the Department should take to improve its management of contractors on the battlefield?

Answer. DOD has made significant progress in institutionalizing effective management of contractors during contingency operations through several ongoing efforts. DOD's management of contractors on the battlefield has evolved from a more reactionary approach toward pro-active theater-wide management. As an example, DOD stood up Task Force 2010 and Task Force Spotlight to improve contractor management and oversight in Afghanistan. Furthermore, we are using the task force efforts to shape how the department will continue the institutionalization of contractor management in future operations. If confirmed, I will review these efforts and ensure they are adequate and effective, and I will continue to champion effective management processes.

Question. Do you believe DOD and other Federal agencies should rely upon contractors to perform security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations?

Answer. Based on current force structure and the level of operations tempo, the use of contractors for some security functions is necessary. We can mitigate the risk that this accrues if we properly plan for contractor use and have a clear designation

of their mission and assigned tasks. Furthermore, we must ensure they have the necessary skills and training to perform these tasks. Finally, we must have the proper oversight in place. Contractor use of force should remain limited to self-defense and the defense of others against criminal violence and the protection of critical property. With proper planning, contractor capability, and government oversight, I think that the limited use of security contractors by DOD in contingency operations is acceptable. It would be inappropriate for me to comment on their use by other departments. If confirmed, I will ensure that proper limitations on DOD private security contractors are in place and enforced.

Question. In your view, has the U.S. reliance upon private security contractors to perform such functions risked undermining our defense and foreign policy objectives in Iraq and Afghanistan?

Answer. No. The use of contractors to perform security functions remains a viable DOD option and has been necessary in Iraq and Afghanistan. As with all security forces, the inappropriate use of force remains the greatest risk to our policy objectives. Contracted private security, used correctly with proper management and oversight, preserves DOD's ability to achieve defense and foreign policy objectives. If confirmed, I welcome the opportunity to continue to examine and improve DOD's procedures to manage and provide oversight of these contractors.

Question. What steps, if any, would you take, if confirmed, to ensure that any private security contractors who may continue to operate in an area of combat operations act in a responsible manner, consistent with U.S. defense and foreign policy objectives?

Answer. If confirmed, I would work to further institutionalize two primary initiatives already underway. First, the use of private security contractors in any area of combat operations must be fully planned, coordinated, and synchronized with the Joint Force Commander of the designated area of responsibility. Furthermore, commanders on the ground must have the authority and flexibility to restrict security contractors' as the operations dictate. Second, we must continue to hold private security contractors accountable and work with our host nation partners to ensure rigorous licensing procedures and enforcement of their laws.

Question. Do you support the extension of the Military Extraterritorial Jurisdiction Act to private security contractors of all Federal agencies?

Answer. Individuals who provide support to U.S. agencies in our vital missions overseas should not be allowed to operate with legal protection. They should be held accountable for any criminal activity. This is especially true as we work to support the Rule of Law in operations in Iraq and Afghanistan. If confirmed, I would support further study in order to investigate the most effective legal method to ensure private security contractor accountability.

Question. What is your view of the appropriate application of the Uniform Code of Military Justice to employees of private security contractors operating in an area of combat operations?

Answer. Individuals who provide support to the U.S. military operations as private security contractors should not be allowed to operate with impunity. They should be held accountable for any criminal activity. This is especially true as we work to support the Rule of Law in Iraq and Afghanistan. If confirmed, I will remain open to all recommendations for ensuring accountability of private contractors.

FUTURE ARMY

Question. In a speech at West Point last February, former Secretary Gates argued that it is unlikely that the Nation will commit large land forces to future conflicts, and that the Army must "confront the reality that the most plausible, high-end scenarios for the U.S. military [will be] primarily naval and air engagements." The Army's first major challenge, he stated, is "how will it structure itself—how will it train and equip—for the extraordinarily diverse range of missions it will face in the future?" Former Chief of Staff of the Army, General George Casey Jr., said he expected that over the next 10 years we will still have 50,000 to 100,000 soldiers deployed in combat. Chairman of the Joint Chiefs Admiral Michael Mullen said that for planning purposes the Department assumes 6 to 10 combat brigades will likely be deployed.

Do you agree that high-end military operations will primarily be naval and air engagements such that the Army will have difficulty justifying the size, structure, and cost of its heavy formations?

Answer. I believe that the strength of our military is in the synergy and interdependence of the joint force. My experience of 37 years suggests that single-component solutions to security challenges is at best risky and at worst foolhardy.

Question. In your view, what are the most important considerations or criteria for aligning the Army's size, structure, and cost with strategy and resources?

Answer. Our Nation needs a versatile Army that can conduct operations across the spectrum of conflict. We need an Army that can win conventional fights, remains adept at conducting counterinsurgency and stability operations, and that can work shoulder to shoulder with the ground forces of our partner states to impart the necessary skills that can help them bring security and stability to their own countries and regions. I understand that some tradeoffs across the force may be required to meet cost-savings goal. If confirmed, I will work closely with military and civilian leaders to balance these risks and help develop a versatile Army for a versatile Joint Force.

Question. If confirmed, what actions, if any, would you propose to properly align the Army's size and structure with the requirements of security strategies and the likely availability of resources?

Answer. Our Army, like our other Services, must provide options to the national command authority. It must be responsive, decisive, versatile, interdependent, and affordable. In sizing it, we must address three fundamental questions: what do you want it to do, how often, and for how long. This requires a comprehensive analysis of the security environment and a detailed assessment of the relationship of the Active, Guard, and Reserve components.

TACTICAL FIGHTER PROGRAMS

Question. Perhaps the largest modernization effort that we will face over the next several years is the F-35 Joint Strike Fighter (JSF) program to modernize our tactical aviation forces with fifth generation tactical aircraft equipped with stealth technology.

Based on current and projected threats, what are your views on the requirements for and timing of these programs?

Answer. The Department has the necessary fighter aircraft capacity in the near-term to support our Nation's security needs. Based on the current and projected threats, I am convinced that we must transition to a fifth generation tactical aviation capability across the U.S. Military Services.

Question. What is your assessment of whether the restructuring of the JSF program that we have seen over the past 2 years will be sufficient to avoid having to make major adjustments in either cost or schedule in the future?

Answer. It is my understanding that the issues with the JSF program have been addressed through a deliberate requirements and acquisition review process. A high level plan was approved in January 2011, and the program expects to deliver a fully compliant weapon system. If confirmed, I will closely monitor the progress of the program to ensure affordability.

INFORMATION ASSURANCE

Question. Protection of military networks, information, and communications is critical to DOD operations.

What is your understanding and assessment of the cyber security posture of the Department's critical information systems?

Answer. The DOD Strategy for Operating in Cyberspace (DSOC) lays out a roadmap for DOD to effectively conduct the defense of critical information systems and strengthen overall cyber security. The Department is working aggressively with national agencies to assess current and future threats while ensuring the availability, integrity, and confidentiality of critical information systems.

Question. What Department-wide policies, guidance, or changes in legislation do you believe are necessary to address information and cyber security challenges for current and future systems?

Answer. DOD recently released the first DOD Strategy for Operating in Cyberspace which addresses information and cyber security challenges along with the ways and means for employing defense capabilities to meet these challenges. Furthermore, I understand that DOD supports the administration's recommendations for cyber legislation recently provided to Congress. If confirmed, I will work with the administration to provide recommendations to Congress on any additional legislation that may be required to address information and cyber security challenges.

BALLISTIC MISSILE DEFENSE

Question. In September 2009, President Obama announced that he had accepted the unanimous recommendation of the Secretary of Defense and the Joint Chiefs of Staff to pursue a Phased Adaptive Approach (PAA) to missile defense in Europe. This approach is intended to defend all of Europe against existing and emerging

threats from Iranian missiles, starting this year and increasing in capability with each of its four phases. Phase 4 of the European PAA is intended to provide a capability to defend against future long-range missiles from Iran, including those that could reach the United States, thus augmenting the existing homeland missile defense capability.

Do you support the Phased Adaptive Approach to Missile Defense in Europe?

Answer. I support the President's policy on European Phased Adaptive Approach (EPAA).

Question. In February 2010, the Defense Department issued its report on the first-ever comprehensive review of U.S. ballistic missile defense policy and strategy, the Ballistic Missile Defense Review (BMDR), as required by Congress. The BMDR established a number of policy priorities, including establishing defense against near-term regional missile threats as a top priority of missile defense plans, programs and capabilities. It also stated the policy of sustaining and enhancing the ability of the Ground-based Midcourse Defense system to defend the homeland against attack by a small number of long-range missiles by countries such as North Korea and Iran, and of hedging against future uncertainties.

Do you support the policies, strategies, and priorities set forth in the Ballistic Missile Defense Review and, if confirmed, will you implement them?

Answer. I support the administration's policies, strategies, and priorities in concert with this review. If confirmed, I will implement the policies set forth including those that sustain and enhance our Nation's defense while increasing our capability against the growing regional threats.

Question. The two most recent flight tests of the Ground-based Midcourse Defense (GMD) system failed to intercept their targets. The Director of the Missile Defense Agency (MDA) has formed a Failure Review Board to determine the root cause of the most recent failure and will devise a plan to correct it, including two flight tests to confirm the correction. Until the second flight test confirms the correction, the Director of MDA has suspended production of the Exoatmospheric Kill Vehicles (EKVs) of the type that failed last year's flight tests, in order to ensure that those EKV's do not contain a flaw that would need to be corrected later.

Do you agree that it is essential to correct the problem that caused the December 2010 flight test failure, and to verify the success of that correction through extensive testing, including flight testing, before continuing production and delivery of additional EKV's for the GMD system?

Answer. I agree that it is essential to have confidence and reliability in the EKV's prior to continuing production in order to control costs and ensure the United States has an effective missile defense system.

Question. Do you support the continued modernization and sustainment of the GMD system?

Answer. Yes. The GMD system currently protects the United States from the threat of a limited ICBM attack. It is important to maintain this advantage by continuing to improve the GMD system.

Question. The United States and NATO are seeking options to cooperate with Russia on missile defense. President Obama has announced that such cooperation would not limit U.S. or NATO missile defense capabilities.

Do you agree that such cooperation could enhance the security of the United States, NATO, and Russia against common missile threats from nations such as Iran?

Answer. Yes. Russia's cooperation could improve the effectiveness of U.S. and NATO missile defenses as well as those of the Russian Federation. An effective multi-partner ballistic missile defense system has the potential to deter aggression and strengthen regional security.

Question. What do you believe would be the security benefits, if any, of such missile defense cooperation, and what types of cooperation do you believe would be beneficial?

Answer. Cooperation could result in tangible benefits to the United States, Europe, and Russia in the form of a more robust common defense against missile threats, which could strengthen strategic stability and transparency. U.S. cooperation with Russia along the lines of shared early warning of missile launches, technical exchanges, operational cooperation and planning, and joint exercises would be mutually beneficial.

Question. Do you agree that irrespective of Russian objections, the United States is committed to the continued development and deployment of United States missile defense systems, including qualitative and quantitative improvements to such systems?

Answer. Yes, the United States is committed to continued development, improvement, and deployment of U.S. missile defense systems in order to enhance our de-

fense capabilities. Cooperation with Russia on missile defense has the potential to enhance U.S and NATO security.

SPACE

Question. China's test of an anti-satellite weapon in 2007 was a turning point for the United States in its policies and procedure to ensure access to space. As a nation heavily dependent on space assets for both military and economic advantage, protection of space assets became a national priority.

Do you agree that space situational awareness and protection of space assets should be a national security priority?

Answer. Yes. Space situational awareness underpins our ability to operate safely in an increasingly congested space environment. It is vital that the United States protect national space assets to maintain the benefits and advantages dependent on our access to space.

Question. In your view should China's continued development of space systems inform U.S. space policy and programs?

Answer. Yes. The United States should ensure its space policy and programs address China's continued development of space systems as well as systems of other space-faring nations. Our National Security Space Strategy acknowledges space is vital to U.S. national security and our ability to understand emerging threats, project power globally, conduct operations, support diplomatic efforts, and enable the global economy. We are and should seek opportunities to co-operate in space and lead in the formation of rules and behaviors for benefit of all nations. I support development of U.S. space capabilities which preserve the use of space for the United States and our allies, while promoting the principles of the 2010 National Space Policy.

Question. If confirmed would you propose any changes to National Security space policy and programs?

Answer. I am not in a position to recommend any proposed changes at this time. If confirmed, I would continue implementation of the President's 2010 National Space Policy and the supporting National Security Space Strategy.

The Federal Communications Commission is currently considering licensing a telecommunications provider who plans on using a signal that has the potential to interfere with GPS signals and GPS receivers.

Question. If confirmed, would you look into this matter to understand the impact of the proposal to national security GPS signals receivers and commercial receivers used by the national security community?

Answer. It is my understanding that the Joint Staff is currently reviewing this issue, and if confirmed, I will ensure continued emphasis. We are committed to working within DOD and with various government agencies and the FCC to ensure that GPS remains a secure and reliable national asset.

Question. What is your view on weapons in space and the merits of establishing an international agreement establishing rules of the road for space operations?

Answer. I support the principles outlined in the 2010 National Space Policy, which states that the United States will pursue bilateral and multilateral transparency and confidence-building measures to encourage responsible actions in, and the peaceful use of, space. I understand the Department is currently evaluating the European Union's proposed international Code of Conduct for Outer Space as a pragmatic first set of guidelines for safe activities in space. If confirmed, I look forward to continuing this evaluation for space operations.

STRATEGIC SYSTEMS

Question. Over the next 5 years DOD will begin to replace or begin studies to replace all of the strategic delivery systems. For the next 15 plus years, DOD will also have to sustain the current strategic nuclear enterprise. This will be a very expensive undertaking.

Do you have any concerns about the ability of the Department to afford the costs of nuclear systems modernization while meeting the rest of the DOD commitments?

Answer. I share the President's and the Secretary's commitment to maintaining a safe, secure, and effective nuclear deterrent. Sustainment of our nuclear deterrent requires modernization of delivery systems and life extension programs (LEP) for warheads. Successfully accomplishing this will require balancing our current commitments with our national interests and strategic priorities.

Question. If confirmed will you review the modernization and replacement programs to ensure that they are cost effective?

Answer. If confirmed, I will continue to support our commitment to sustaining and modernizing a safe, secure, and effective nuclear deterrent that supports stra-

tegic stability in an efficient and cost effective manner while strengthening regional deterrence and reassuring allies and partners.

READINESS FUNDING

Question. What is your understanding and assessment of the methods currently used for estimating the funding needed for the maintenance of military equipment?

Answer. Each of the Military Services uses costing models to estimate funding for maintenance of equipment at various levels of readiness, including support of overseas contingency operations. Their estimates are based on readiness metrics such as system miles, steaming hours, or flying hours. It is also my understanding that the Joint Staff evaluates readiness across the Joint Force.

Question. Do you believe that we need an increased investment to reduce the backlog in equipment maintenance and improve readiness?

Answer. My primary concern is with reset funding for equipment readiness that currently comes out of Overseas Contingency Operations (OCO) funding. If confirmed, I will examine this issue further. At this juncture, however, it is my understanding that we will need OCO funding 2 years after the end of the conflict in order to ensure all equipment is reset. Without OCO funding, there will be significant pressure on the base budget maintenance accounts to cover those costs, which could impact long-term readiness.

OPERATIONAL ENERGY BUDGETING

Question. The committee recently received the fiscal year 2012 budget certification report from the Assistant Secretary of Defense for Operational Energy Plans and Programs. The certification report highlighted several failures by the Services to fund significant energy efficiency and renewable energy programs, such as: smart and green energy (SAGE), tactical fuel managers defense (TFMD), near-term and mid-term modifications to legacy systems to increase efficiency and reduce operational energy demand, and tent foaming efforts at forward operating bases.

Do you believe the Department should increase funding for operational energy requirements, renewable energy opportunities, and energy efficiency demands?

Answer. My understanding is that DOD certified the 2012 budget submission as adequate to implement operational energy strategic goals. As identified by DOD's Operational Energy Strategy, many operational energy improvements do not necessarily require increased funding and could ultimately save DOD money. If confirmed, I plan to closely monitor the implementation of the Operational Energy Strategy. Overall, I think DOD needs to improve the incorporation of energy considerations into our strategic planning and force development processes. In doing so, the Department will inherently make investments in energy efficiency, alternative energy, and reliability to increase operational effectiveness.

IRAQ

Question. What do you believe are the major lessons learned from the Iraq invasion and the ongoing effort to stabilize the country?

Answer. Perhaps the most important lesson is that our country must remain prepared for the difficult work that occurs in the wake of major combat. Future strategic and force sizing constructs must account for all phases of conflict. We must plan and train with our civilian counterparts and be prepared to operate effectively both at peace and during post combat. Furthermore, our political objectives are best achieved when all the instruments of national power are coordinated toward a common purpose. Finally, I am reminded of the importance of working with allies and partners, none more important than the host nation populace, in order to attain our objectives.

Question. What is your understanding and assessment, if any, of the Department's adaptations or changes in policy, programs, force structure, or operational concepts based upon these lessons learned?

Answer. The Iraq War has led to deep and wide-ranging changes in all of the areas listed above. For example, the Department better understands and is better at Irregular Warfare and Stability Operations. Our shared goal across the Department is to learn and apply these important lessons and experiences to strengthen the Joint Force. The military has demonstrated the ability to learn and adapt across many areas, and if confirmed, I will continue to integrate that valuable knowledge into future doctrine, training, and readiness.

Question. If confirmed, what additional changes, if any, would you propose making to policy, programs, force structure, or operating concepts based on the lessons of combat and stability operations in Iraq?

Answer. Simply stated, we must learn faster and understand more deeply than our adversaries. If confirmed, I will closely monitor the process by which lessons translate into the development of the Joint Force.

Question. What is your assessment of the current security situation in Iraq?

Answer. The overall security situation is relatively stable. I am concerned about increased violence in southern Iraq, about the inability of the Iraqi Government to appoint security ministers, and about the enduring potential for Arab-Kurd violence in Kirkuk and Mosul.

Question. What is your assessment of the threat posed by al Qaeda in Iraq?

Answer. Al Qaeda in Iraq still poses a significant threat within Iraq. Al Qaeda in Iraq continues to pursue an attack strategy focused on Iraqi government officials and security forces personnel, Shia civilians, and Sunnis who oppose the terrorist group's agenda. However, the ISF demonstrates improving counter-terrorism capability and the capacity for maintaining internal security despite occasional high-profile attacks.

Question. What are the main challenges to stability and security in Iraq over the coming months?

Answer. In the coming months, the main threats to Iraqi stability and security are attacks by Sadrist and Iran-sponsored forces against departing U.S. forces and the unresolved status of territories claimed by the Kurdistan Regional Government.

Question. Do you support the current plan for the drawdown of U.S. forces from Iraq consistent with the U.S.-Iraq Security Agreement of 2008 signed by President Bush and Prime Minister Maliki?

Answer. I support the current plan for the drawdown of U.S. forces from Iraq in accordance with the 2008 U.S.-Iraq Security Agreement. It is important that we fulfill our obligations under this bilateral agreement, and we are on track to complete the drawdown by December 31, 2011.

Question. Responsibility and authority for lead U.S. agency in Iraq is scheduled this year to transition from DOD to Department of State (DOS). By October 2011, the Department of State is supposed to achieve an initial operating capability as lead agency and achieve full operating capability by December.

What is your understanding and assessment, if any, of the planning and progress on executing this transition from DOD to DOS? In your view, what are the sources of greatest risk, if any, to the current plan and successful implementation of this transition?

Answer. My understanding is that the transition from the DOD and DOS is on schedule. The DOD, DOS, and other agencies have undertaken unprecedented levels of coordination and planning for the transition in Iraq. As one would expect with a transition of this scope and complexity, challenges exist, but it is my understanding that we are collaborating well to overcome them in order to meet our objectives. Of concern, failure to support fiscal year 2012 State Department budget requirements for Iraq increases the risk for a successful transition of responsibilities.

Question. If confirmed, what changes, if any, would you propose to the current plan or actions for implementation of the transition?

Answer. I wouldn't anticipate any changes at present but will remain vigilant.

Question. In your view, what will be the nature of the U.S.-Iraq strategic relationship after December 31, 2011?

Answer. In my judgment, a long-term strategic partnership with Iraq is in our national interest. As stated by the President, we support an Iraq that is sovereign and self-reliant; that has a just, representative and accountable government; that denies support and safe haven to terrorists; that is integrated into the global economy; and that contributes to regional peace and security. All these elements of our desired strategic relationship with Iraq were codified in the 2008 Strategic Framework Agreement. If confirmed, it is my intention to closely monitor the status and help to advance our relationship.

Question. If the Government of Iraq were to ask for the continued presence in Iraq of U.S. forces beyond the end of 2011, would you support the deployment or retention of additional troops in Iraq beyond the current deadline for U.S. troop withdrawal?

Answer. I am not in a position to recommend such a proposal at this time. If confirmed, I would provide my best military advice to the Secretary of Defense and President after considering all relevant factors.

Question. What do you see as the greatest challenges for that relationship over the coming years?

Answer. The greatest challenges will be maintaining U.S. engagement and support for Iraq during a time of change. Recent turmoil in the broader Middle East highlights the importance of active U.S. engagement and maintaining strategic partnerships with regional partners based on mutual interests and mutual respect. We

must maintain focus on Iraq in order to advance broader U.S. objectives of peace and security in the region.

STABILITY AND SUPPORT OPERATIONS

Question. The U.S. experience in Iraq and Afghanistan has underscored the importance of planning and training to prepare for the conduct and support of stability and support operations in post-conflict situations.

In your view, what are the appropriate roles and responsibilities of DOD and other departments and agencies of the Federal Government in the planning and conduct of stability operations?

Answer. In my judgment, stability operations are a core U.S. military mission which we should be prepared to conduct with a proficiency equivalent to combat operations. Stability operations cut across all phases of conflict. The military often operates in a supporting role to other Federal Government agencies. However, when directed, we have taken a lead role in stability operations activities to establish civil security and control, restore essential services, repair and protect critical infrastructure, and deliver humanitarian assistance. In these cases, our objective is to transition the lead responsibility to other U.S. Government agencies, the host nation or international organizations as the situation dictates. As seen in recent operations, experts from the State Department, U.S. Agency for International Development (USAID), Justice Department, and other agencies are needed to build host nation capacity to improve economic development, establish effective governance, and institute the "rule of law" which are essential for stability.

Question. Do you believe that the U.S. Government needs to establish new procedures to manage stability operations? If so, why?

Answer. We should certainly capture the lessons of 10 years of conflict. DOD policy regarding stability operations adequately clarifies roles and responsibilities. We now treat stability operations as a core U.S. military mission and are prepared to conduct those operations on par with major combat operations in support of other U.S. Government departments and agencies. If confirmed, I will continue to assess our ability to conduct stability operations, and I will remain open to ideas and issues that might suggest needed change.

Question. In Afghanistan, the Combined Joint Interagency Task Force 435 works in partnership with the Government of Afghanistan, the U.S. interagency, and international partners to conduct detention and corrections operations and promote the rule of law and judicial sector reform.

What role do you believe DOD should play in providing training and advocacy for "rule of law" development in Iraq and Afghanistan?

Answer. With respect to Iraq and Afghanistan, the "rule of law" is essential for the creation of stable and enduring democratic governments that can prevent the return of terrorists. I strongly support the State Department's lead in building rule of law capacity in both of these countries. DOD has the capability and capacity to provide "rule of law" related training in a supporting role for civilian and military leaders.

AFGHANISTAN COUNTERINSURGENCY STRATEGY

Question. Do you support the counterinsurgency strategy for Afghanistan? In your view, is that the right strategy?

Answer. Yes. Over the past 18 months we have made significant gains in halting Taliban momentum and reversing it in many places. The surge has allowed us to establish security in previously held Taliban areas such as Central Helmand and Kandahar, areas of historic importance to the insurgency, and to expand Afghan National Security Force capacity and capability. As we drawdown our surge force in Afghanistan and partner with Afghan forces, this will serve to expand the Afghan National Security Forces' responsibilities and their control of Afghanistan.

Question. If confirmed, are there changes you would recommend to the U.S. strategy in Afghanistan? For example, would you support an increase in counterterrorism action in Afghanistan?

Answer. In my judgment, the current U.S. strategy in Afghanistan is on track. Counterterrorism forces support the ISAF campaign plan and are certain to remain an integral part of this effort. If confirmed, and if conditions on the ground warranted a reevaluation of an aspect of the current strategy, I would unhesitatingly provide my recommendations to the Secretary of Defense and President.

Question. What is your assessment of the progress of the counterinsurgency campaign in Afghanistan?

Answer. We have made important gains over the past 18 months, and we have reached a point in the campaign where a responsible drawdown in U.S. surge forces

is possible. An increasing number of Afghan forces will join the fight in protecting Afghanistan over the next 15 months, and the international community has demonstrated its intention to support Afghanistan until at least 2014.

Question. In your view, how significant an impact does the death of Osama bin Laden have on the counterinsurgency campaign in Afghanistan?

Answer. The death of Osama bin Laden is important as it demonstrated our ability to deny safe haven to al Qaeda (AQ) members and our commitment to disrupt, dismantle and defeat AQ. While it is too early to fully understand the long term impact of his death, I believe, the mutual relationship between AQ and the Taliban has been dealt a severe blow and that we have an opportunity to prevent Afghanistan from once again becoming a safe haven and staging area for AQ.

TRANSITION OF SECURITY RESPONSIBILITY IN AFGHANISTAN AND U.S. TROOP
REDUCTIONS

Question. On June 22, President Obama announced his decision to draw down 10,000 U.S. troops from Afghanistan by the end of this year and to withdraw the remaining 23,000 "surge" force by September 2012, for a total drawdown of 33,000.

Do you support the President's decision to begin reducing U.S. forces in July 2011? Why or why not?

Answer. Yes, I agree with the President's decision. If confirmed, I will constantly monitor and assess the situation in consultation with the theater commanders and should it be determined that the situation has changed, I will advise Secretary of Defense and President.

Question. Do you support the President's decision regarding the size and pace of reductions in U.S. forces? Why or why not?

Answer. Yes. I support the President's announced drawdown goals for a condition-based withdrawal of surge forces. As these surge forces are withdrawn, the ANSF will continue to grow in capacity and capability while assuming more responsibility. This component of the strategy is designed to safeguard the significant gains made possible by the surge. I believe the strategy is working at this time. If confirmed, and if conditions on the ground warranted a reevaluation of both the pace and scope of the draw down, I would unhesitatingly provide my recommendations.

Question. At the NATO Summit in Lisbon last November, the participants in the International Security Assistance Force endorsed President Karzai's goal of the Afghanistan National Security Forces having the primary responsibility for providing security throughout Afghanistan by 2014. In March of this year, President Karzai announced the first tranche of provinces and municipal districts designated for the transition of security responsibility to an Afghan lead.

Do you support the goal of transitioning responsibility for security throughout Afghanistan to the Afghan security forces by 2014?

Answer. Yes. There is still a significant amount of work to be done but, I believe, the transition of security can be accomplished to meet this objective.

Question. Do you support the decision to begin this month the transition of lead security responsibility to the Afghan security forces in the areas announced by President Karzai, with that initial transition of security lead to be completed by the end of the year?

Answer. Yes. The first round of transition includes areas such as Lash Kar Gah in Helmand Province, an area where we significantly invested the surge force and has since seen a remarkable change in the security environment. ANSF is providing the bulk of security responsibility in Lash Kar Gah today. This is also true in places such as Kabul, Bamyan, Herat and Mazar-e-Sharif, which are also part of the first tranche of the transition process. I would highlight that transition is conditional on the following: transitioned areas have sustainable ANSF who are responsible for population security and accountable to and serve the people; that ISAF is postured to provide over watch; that provincial governance is inclusive, accountable and acceptable to the Afghan people; and that the population has access to basic social services and adequate rule of law.

Question. In your view, how important is it to the counterinsurgency effort in Afghanistan that the transition of primary responsibility to the Afghan security forces for providing security throughout Afghanistan be completed by 2014?

Answer. I think that momentum in Afghanistan has broadly shifted. The ANSF are on track to begin the transition process by assuming lead security responsibilities in several areas of the country. In my judgment, the transition of security will also aid in the legitimization of the Afghan government, removing some of the impetus behind insurgents who claim to only seek the departure of foreigners.

Question. In your view, how important is it to the counterinsurgency effort in Afghanistan that the initial round of transitioning security responsibility to the Afghan security forces begins in July and be completed by the end of the year?

Answer. Transitioning to Afghan lead for security responsibility in the Tranche 1 areas is a critical part of our comprehensive civil-military campaign in Afghanistan. As we seek to eliminate safe havens from which al Qaeda (AQ) or its affiliates can launch attacks against our homeland or our allies, the Afghan Government must step up its ability to protect its people and move forward with actions to build a more stable, economically viable country. If confirmed, I will remain committed to supporting transfer of lead security responsibility to the Afghan Government by the end of 2014.

AFGHANISTAN NATIONAL SECURITY FORCES

Question. Approximately 100,000 more personnel have been added to the Afghan National Security Forces (ANSF) since November 2009 and by September 2012 another 70,000 Afghan Army and police personnel will be added. The NATO training mission is ahead of schedule for meeting its target end strength of 305,000 ANSF by October of this year. A new ANSF target end strength of 352,000 by 2012 is awaiting final approval by the Joint Coordination and Monitoring Board.

What is your assessment of the progress in developing a professional and effective ANSF?

Answer. The ANSF continues to improve and is developing into a more professional and capable force with each passing day. In May 2011, the Afghan National Army (ANA) completed the fielding of all of their required infantry kandaks—the ANA equivalent of a U.S. battalion. With the fielding of the last infantry kandak, NATO Training Mission-Afghanistan (NTM-A) shifted its focus from force generation to force professionalization. The additional support from NTM-A will enable the ANSF to assume security lead of Afghanistan by the end of 2014.

Question. If approved, will an ANSF end strength of 352,000 be sufficient in your view to enable the ANSF to assume lead responsibility for security in Afghanistan?

Answer. Based on the current security environment, I believe so. Once all of the 352,000 personnel are fielded, the ANSF should be capable of assuming lead responsibility for security in Afghanistan by the end of 2014. If confirmed, however, I will closely monitor progress to assess whether the ANSF and Afghanistan Government are taking ownership of their responsibilities.

Question. What do you see as the main challenges to building the capacity of the ANSF and, if confirmed, what recommendations, if any, would you make for addressing those challenges?

Answer. The three primary challenges for the ANSF are literacy, the lack of enablers, and force attrition. We are assisting the ANSF by providing literacy training, supporting the development of branch schools, and helping with leader development programs. If confirmed, I will explore all options to increase ANSF capacity by working closely with Afghan, U.S. military and civilian leaders and our international partners.

Question. There remains a shortfall in the number of training personnel required for the NATO Training Mission-Afghanistan (NTM-A) and in the number of embedded training teams, the Operational Mentoring and Liaison Teams (OMLTs) embedding with Afghan Army units and the Police OMLTs (POMLTs) embedding with Afghan Police units. This shortfall may become more acute if the new end strength target of 352,000 for the ANSF by 2012 is approved.

What more should be done to get NATO members and other coalition partners to meet the ISAF requirements for additional NTM-A trainers and OMLTs and POMLTs?

Answer. Our NATO allies and other coalition partners have demonstrated a strong commitment to the mission in Afghanistan over the years. As we move forward, we must continue to engage our partners on the importance and need for NATO/SHAPE HQ, HQ ISAF, and representatives of the NATO training mission. They share our view that a strong and capable ANSF is the key to achieve our objectives. Personnel with specialized skills such as police, logisticians, medical personnel, and maintenance specialists are essential. We must also engage coalition members to get their assistance in filling requirements for troops to partner with the ANSF.

Question. If the 352,000 ANSF end strength target is approved, what challenges would this present in generating the necessary training personnel to build these Afghan security forces?

Answer. There are obvious challenges associated with training a larger force. Although there is work being done to fill all vacant trainer requirements, a shortfall

of trainers remains. While this shortage may delay the development of ANSF, it is my understanding that NTM-A is exploring all options to compensate for the shortfall.

Question. If confirmed, what recommendations, if any, would you have for meeting these challenges?

Answer. The ANSF have made significant gains in creating Afghan trainers. The ANA and ANP are participating in Teach the Instructor (T2I) programs in order to build their own internal training capacity. The ANP have trained 474 instructors and are on track to have 900 instructors trained by December 2011. Between the U.S., Coalition, and Afghan trainers, my understanding is that we will have sufficient capacity to meet most training requirements.

Question. A key component of efforts to build the capacity of Afghan security forces is partnering ANSF units together with ISAF units in the field. An April DOD report states that field reports suggest that a partnership ratio of greater than 3 ISAF personnel to one ANSF personnel “reduces the effectiveness of the ANSF’s participation” and that “ANSF are more motivated and, hence, more effective when the partnership ratio [between ISAF and ANSF personnel] is closer to even.”

In your view, how effective has partnering been in building the capacity of the Afghan Army and Afghan police?

Answer. We are committed to partnering. Partnering builds the capacity of Afghan security forces in terms of capability, confidence, and professionalism in the field. The last 18 months have seen significant strides in our baseline training, but our partnership efforts have proven to be the most effective training mechanism. The benefits of partnering work both ways. Our Afghan counterparts have made the most rapid improvements where we have higher partnering ratios and where our troops live and fight alongside their Afghan partners. In addition, our effectiveness increases since Afghan forces understand the human and cultural terrain in ways that we do not.

Question. Would you anticipate ISAF-ANSF partnering moving to a partnership ratio below 1:1 (fewer than 1 ISAF soldier for every ANSF soldier) as the capability of Afghan security forces improves?

Answer. Yes. Over time, we will move from partnered operations, to providing support with Afghans in the lead, and finally to coalition forces in strategic overwatch. There are units already below a 1:1 partner ratio, and there are increasingly more areas where Afghans are in the lead or operating independently. For example, in Kabul Province, Afghans lead almost all operations.

RECONCILIATION AND REINTEGRATION

Question. Under what conditions, if any, should reconciliation talks with the Taliban leadership be pursued?

Answer. Ending the insurgency in Afghanistan will require some sort of political settlement between the Afghan Government and the Taliban. This settlement must be brokered among the Afghans themselves. To this end, I support an Afghan-led reconciliation effort consistent with U.S. policy for reconciliation as laid out by the Secretary of State. In particular, those who are willing to renounce violence, cut ties with al Qaeda, and respect the Afghan Constitution—to include the rights of women and ethnic minorities—should be welcomed as part of this process.

Question. What is your understanding and assessment of the current program for reintegrating insurgent fighters willing to lay down their arms? What additional steps, if any, should be taken to improve the reintegration program?

Answer. It is my understanding that the Afghan Peace and Reintegration Program (APRP) is an essential component of our comprehensive civil-military campaign. The goal of this Afghan program is to convince insurgents to join the peace process, accept the Afghan constitution, renounce violence, and rejoin Afghan society. Regarding additional steps to improve the program, it’s important to note that this program is still relatively new in many provinces. One challenge among many is the capacity to channel funds from the Afghan national level down to the provincial level. Funding at the local level enables many of the reintegration opportunities as they emerge. If confirmed, I will more closely assess the status of this program.

U.S. STRATEGIC RELATIONSHIP WITH PAKISTAN

Question. What in your view are the key U.S. strategic interests with regard to Pakistan?

Answer. Our strategic interests and national security goals remain to disrupt, dismantle, and defeat al Qaeda and its militant allies, and eliminate their capacity to threaten the United States and its allies in the future. Tactically, Pakistan secures our southern lines of communication into Afghanistan. We also have an interest in

stable Pakistan and the nonproliferation of nuclear weapons and technology. U.S. strategic interests in Pakistan encompass both our relationship with Pakistan itself and Pakistan's role in the campaign against violent extremists. Our partnership with Pakistan in the context of the greater South Asia region holds great potential for security, economic advancement, and stability.

Question. What in your view are the key lessons from the operation to kill Osama bin Laden for the U.S.-Pakistan relationship?

Answer. Our relationship must be pragmatic. Pakistan supports us in several key areas. We should leverage those areas and "meter" our support for them against their support of us. That said, I strongly believe we must maintain a relationship with Pakistan.

Question. How significant do you believe military-to-military relations have been for the development of a strategic relationship between the United States and Pakistan?

Answer. Our senior military engagements, and especially our security assistance and cooperation programs, have been essential to laying the foundations for effective military cooperation between our two countries. But these are only foundations. A true strategic relationship is only possible when our countries come to appreciate more closely the compatibility of our vital interests in the region. This can only come through a whole-of-government approach that strengthens civilian institutions, promotes the rule of law, and supports economic development.

Question. If confirmed, what changes, if any, would you recommend for U.S. relations with Pakistan, particularly in terms of military-to-military relations?

Answer. If confirmed, I would sustain the general approach to security cooperation endorsed by the Secretary of Defense and President. From my perspective, the guiding tenet of security cooperation is to assist in areas the host nation considers important, but that also respects the shared interests of the host nation and the United States. We should not push programs the Pakistanis do not want because doing so dilutes the value of U.S. cooperation. Nor should we feel compelled to provide equipment or training just because we are asked. A frank and respectful dialogue is intrinsic to successful security cooperation.

Question. Since 2001, the United States has provided significant military assistance to Pakistan, including foreign military financing and training and equipment through the Pakistan Counterinsurgency Fund to build the capacity of the Pakistan Army and Frontier Scouts to conduct counterinsurgency operations. In addition, the United States has provided significant funds to reimburse Pakistan for the costs associated with military operations conducted by Pakistan along the Afghanistan-Pakistan border and other support provided in connection with Operation Enduring Freedom.

How effective, in your view, has this assistance been in improving Pakistan's efforts and commitment to counter terrorists in Pakistan?

Answer. The Pakistan Counterinsurgency Fund (PCF) has produced some important initial results for Pakistan's Frontier Scouts, the Special Services Group, and other organizations. The quality of tactical maneuver, communications, marksmanship, and intelligence fusion have improved survivability and performance in combat against extremist groups which threaten Pakistan and the U.S. efforts in Afghanistan. U.S. programs offer the potential of exceptional value for both our countries, but cannot succeed without the buy-in and invitation of Pakistan's sovereign leadership and continued support of the U.S. Congress.

IRAN

Question. Iran continues to expand its nuclear program and has failed to provide full and open access to all aspects of its current and historic nuclear program to the International Atomic Energy Agency.

What more do you believe the United States and the international community should be doing, if anything, to dissuade Iran from pursuing a nuclear weapons program?

Answer. If confirmed, I will support the policy objectives for Iran established by the President. It is my understanding that we continue to apply pressure on Iran to make it clear that Iran's failure to meet its international obligations will make it less secure and prosperous. Concurrently, we should continue to encourage Iran to become a responsible member of the international community.

Question. What is your understanding and assessment of the military threat posed by Iran from its nuclear program and its ballistic missile program?

Answer. Iran is a destabilizing influence in the region. It is my understanding that the Government of Iran continues to enrich uranium, pursue nuclear capabilities, enhance its ballistic missile program, and has failed to provide full and open

access to all aspects of its current and historic nuclear program to the International Atomic Energy Agency. With its nuclear activities and its surrogate activities in southern Iraq, there is a high potential that Iran will make a serious miscalculation of U.S. resolve.

Question. In your view, have the various sanctions that have been imposed by the international community reduced the military abilities of Iran?

Answer. International sanctions have hindered Iran's weapons procurement efforts and driven up the costs associated with obtaining necessary components for its military. Sanctions also appear to have slowed Iran's progress on its nuclear program. It has also become increasingly difficult for Iran to import needed materials or skills for its military programs.

OSAMA BIN LADEN AND AL QAEDA

Question. If your view, will the death of Osama bin Laden have a significant impact on the conflict against al Qaeda and if so, how?

Answer. The death of Osama bin Laden is a significant milestone in our campaign to disrupt, dismantle, and defeat al Qaeda. The successful operation does not mean we can rest, but rather we have a window of opportunity to make new gains toward the strategic defeat of al Qaeda. It is too early to assess the long term impact of his death, but it clearly conveys our persistence, determination, and capability to achieve our goals.

Question. What is your assessment of the threat posed by al Qaeda affiliates to the U.S. Homeland, U.S. interests overseas, and western interests more broadly? Which affiliates are of most concern?

Answer. The killing of al Qaeda leader Osama bin Laden may increase the threat from al Qaeda's regional nodes to the U.S. Homeland and U.S. interests overseas. Each of the regional nodes—al Qaeda in the Islamic Maghreb, al Qaeda in Iraq, Somalia-based al Shabaab, and al Qaeda in the Arabian Peninsula—eulogized Bin Laden and vowed attacks against the United States in retaliation. Al Qaeda in the Arabian Peninsula has demonstrated its intent and capability to carry out an attack targeting the U.S. Homeland, as evidenced by the group's 25 December 2009 attempted bombing of a U.S. airliner on approach to Detroit. Each of the other three nodes remain largely focused on attacks within their respective regions, though each is likely capable of supporting operatives engaged in transnational attack planning against U.S. or western interests in Europe and possibly the United States.

ARAB SPRING

Question. The Arab Spring has changed—and will likely continue to change—the political dynamics in the Middle East and North Africa for many years to come. These changes will require the United States to adjust our military-to-military and defense civilian relations in this region. Some observers argue that the United States should reduce significantly our military-to-military contact in countries as a result of the ongoing changes and others advocate more robust and stepped-up contact with our partners in this region.

In your view, what should be the posture of the U.S. Government on military-to-military and defense civilian relations in the region?

Answer. In my judgment, we have a unique opportunity to support some of the Arab Spring reform movements through our military relationships. It is my understanding that the Department and our combatant commands are reviewing our policies and posture in the region to enhance our ability to promote responsible change. If confirmed, I will work to ensure our programs and policies further our national interests while strengthening our relations in the region.

LIBYA

Question. Do you support the limited U.S. military mission in Libya?

Answer. Yes. We are operating in Libya as part of an international coalition enforcing United Nations Security Council Resolution (UNSCR) 1973. Our role is to support and assist our partners in protecting innocent civilians in Libya. The U.S. military provides unique capabilities to this effort such as electronic warfare, aerial refueling, intelligence, surveillance and reconnaissance, and unmanned aerial systems.

Question. Do you support broadening the military mission to include regime change?

Answer. The purpose of our military mission, consistent with the U.N. Security Resolution 1973, is to protect innocent civilians. As directed by the President, we are using all non-military instruments of power to apply further pressure on the Qadhafi regime to end the conflict. If confirmed, I would consider a wide array of fac-

tors before providing my advice on whether the military mission should be changed for any reason.

Question. Should the United States provide arms and training to the Libyan rebels?

Answer. It is my understanding the administration has chosen not to provide arms or training to the rebels at this time. The purpose of our military action is grounded in UNSCR 1973, to protect the Libyan people in population centers like Benghazi from a massacre at the hands of Qadhafi's forces. If confirmed, I would assess the full range of implications for providing arms and training before making any recommendation.

EAST AFRICA—AL QAEDA AND AL SHABAAB

Question. What is your assessment of the threat posed by al Qaeda and al Shabaab to the U.S. and Western interests in East Africa and to the U.S. Homeland?

Answer. The al Shabaab threat to U.S. and western interests in East Africa is significant. While al Shabaab remains focused on resisting the current Transitional Federal Government and African Union Mission in Somalia, the group has the capability to plan attacks against U.S. and western interests in East Africa. The April 2009 attacks in Kampala proved their capability to stage simultaneous suicide attacks, and senior al Qaeda in East Africa operative Harun Fazul had evidence of advanced plans to attack European allies with him at the time of his death. Finally, al Shabaab's effort to recruit U.S. persons increases the threat to the U.S. Homeland.

Question. What is your understanding of DOD's role in countering the threat posed by al Qaeda in East Africa and al Shabaab? What is your understanding of DOD's supporting role to other departments and agencies of the U.S. Government in this region?

Answer. It is my understanding that DOD in concert with interagency partners has provided security assistance to regional partner nations to counter threats from violent extremists. Some of that support is also aimed directly at improving counterterrorism capabilities. I cannot provide detail about the operations we are supporting, but I can say the work remains critical to our goal of strategically defeating al Qaeda and its affiliates.

Question. What changes, if any, would you recommend to DOD's current role in East Africa?

Answer. If confirmed, I do not anticipate making any immediate changes to DOD's role in East Africa. It is my understanding that U.S. Africa Command is looking at how best to direct our military efforts in the region to work in concert with our interagency partners. In my judgment, our goal is a strategy through which security assistance, capacity building, cooperation with regional partners, and counterterrorism actions are fully integrated to provide security and stability in East Africa.

YEMEN AND AL QAEDA IN THE ARABIAN PENINSULA

Question. What is your assessment of the current U.S. strategy in Yemen and what is your understanding of the role of DOD within that strategy?

Answer. The current strategy in Yemen remains our best option. The near term goal of containing and degrading al Qaeda in the Arabian Peninsula (AQAP) while pursuing long term initiatives to create a stable Yemen that can provide internal security remain valid even amidst domestic turmoil. A stable, unified, and economically viable Yemen, free of violent extremist, remains in our best interest. My understanding of DOD's role is that CENTCOM works with interagency partners to build Yemen's counterterrorism capacity and enhance our partnerships. Separately, select elements within DOD work with the Yemeni Government to disrupt near-term threats to the U.S. Homeland. This effort is intended to provide time and space for the Yemeni security forces to increase their effectiveness and eventually eliminate Yemen as an al Qaeda safe haven.

Question. Given the ongoing political upheaval and splintering of the military in Yemen, what are your views on the United States continuing to provide security assistance—most significantly DOD section 1206 funding—to Yemeni counterterrorism forces?

Answer. The ongoing unrest has already weakened the Yemeni Government and economy and has allowed al Qaeda in the Arabian Peninsula (AQAP) to expand its influence. We will continue to closely evaluate our security assistance programs in Yemen, particularly those provided under section 1206. It is my understanding that we expect to continue counterterrorism cooperation with the Yemeni Government during and after any future political transitions, but that we are prepared to re-

evaluate our partnership as necessary to address the changing military situation. If confirmed, I will be attentive to the potential need to reconsider our approach.

NORTH ATLANTIC TREATY ORGANIZATION

Question. In a speech to allies in Brussels in June, then-Secretary of Defense Gates delivered a blunt warning about the North Atlantic Treaty Organization (NATO) becoming “a two-tiered alliance”. Secretary Gates described a division between “members who specialize in ‘soft’ humanitarian, development, peacekeeping, and talking tasks, and those conducting the ‘hard’ combat missions,” and between “those willing and able to pay the price and bear the burdens of alliance commitments, and those who enjoy the benefits of NATO membership . . . but don’t want to share the risks and the costs.” He added, “This is no longer a hypothetical worry. We are there today, and it is unacceptable.”

In your view, how important is the NATO alliance to U.S. national security interests?

Answer. The NATO Alliance is vital to the United States. It is a collective defense alliance and forum for security dialogue that has maintained the trans-Atlantic link and kept Europe peaceful for the past 60 years. NATO remains equally important today providing the foundation for European and supporting global security. NATO is the critical enabler for coalition operations in Afghanistan, and it is leading operations in Libya.

Question. Do you agree with former Secretary Gates that NATO is today a two-tiered alliance?

Answer. I have not been in a position to evaluate it in that way. What I do know is that some allies have made the political decision to limit the resources dedicated to defense. This has forced critical choices between spending money on transforming their militaries and contributing to alliance operations. It has also resulted in an overall loss of effectiveness, which, while initially minor, has compounded over time. Some allies remain capable partners, while others’ past decisions now limit their ability to contribute to collective security.

Question. Given the significant budgetary constraints facing many NATO allies, what in your view needs to be done to enhance the capabilities of the NATO alliance to undertake combat operations?

Answer. Several NATO allies are planning further cuts to defense investment in order to sustain their operations in Afghanistan and elsewhere while coping with financial constraints. To enhance capabilities, Allies must prioritize, seek efficiencies and cost savings, and invest those savings into maintaining credible military power. Additionally, those countries that can afford to should expand their investment in defense. Investments should be coordinated among Allies, and we all must be mindful of threats and risks to collective security.

Question. What are the greatest opportunities and challenges that you foresee for NATO in meeting its strategic objectives over the next 5 years?

Answer. NATO’s new Strategic Concept is an important step in ensuring that NATO will continue to play its unique and essential role in ensuring the common security of its members as well as guide the next phase in NATO’s evolution. Over the next 5 years, the top NATO challenges include: achieving durable progress on a successful transition in Afghanistan; implementing missile defense in Europe; and stemming the deterioration in European military capability. However, this is also an opportunity for allies to develop innovative multi-national solutions to deliver capabilities in a more cost-effective manner such as the C-17 Strategic Airlift Consortium.

Question. In your view, is there a continuing requirement for U.S. nuclear weapons to be deployed in NATO countries?

Answer. NATO’s New Strategic Concept states NATO’s commitment to the goal of creating the conditions for a world without nuclear weapons. However, it also made clear that as long as there are nuclear weapons in the world, NATO will remain a nuclear Alliance. NATO has initiated a review of its overall posture in deterring and defending against the full range of threats to the alliance. NATO’s new Strategic Concept reflects allies’ commitment to a nuclear alliance and to nuclear burden sharing as fundamental to deterrence and assurance in Europe.

U.S. FORCE POSTURE IN EUROPE

Question. In April it was announced that following an extensive review of its force posture in Europe, the Department will revise its plans to withdraw two of four brigade combat teams (BCTs) from Europe, and instead retain three BCTs in Europe. The drawdown of one BCT from Europe will not be implemented until 2015, when a reduced demand on U.S. ground forces is projected.

Do you support the decision to reduce the U.S. force posture in Europe by one BCT?

Answer. I support the decision to retain three BCTs in Europe. It strikes the best balance between responding to a more constrained fiscal environment and the need to maintain a flexible and easily deployable ground force to meet Article 5 and other NATO commitments. This size force will also allow the United States to engage effectively with allies and partners and to satisfy other security objectives.

Question. What do you see as the U.S. security priorities in Europe and would retaining three BCTs in Europe beyond 2015 serve those security priorities? Why or why not?

Answer. U.S. security priorities in Europe are focused on meeting our Article 5 NATO security commitments, building partnership capacity, and engaging with allies and partners. Additionally, the U.S. and NATO allies are preparing to meet a broad range of 21st century threats, including new challenges such as missile defense, cyber security, countering weapons of mass destruction (WMD), and terrorism at home and abroad. In my judgment, retaining three distinct types of BCTs in Europe (Heavy, Stryker, and Airborne) enables U.S. European Command to meet a wide array of engagement, building partner capacity, and interoperability objectives while being prepared to support a full range of military operations needed for plausible European and global contingencies.

U.S. FORCE POSTURE IN THE ASIA PACIFIC REGION

Question. The Defense Department's 2010 report of the QDR states that the United States needs to "sustain and strengthen our Asia-Pacific alliances and partnerships to advance mutual security interests and ensure sustainable peace and security in the region," and that, to accomplish this, DOD "will augment and adapt our forward presence" in the Asia-Pacific region.

Do you agree that the United States needs to augment and adapt our presence in the Asia-Pacific?

Answer. Yes. The Nation's strategic priorities and interests will increasingly emanate from the Asia-Pacific region. The rise of new powers with their growing share of global wealth, the expanding influence of non-state actors, and the potential spread of WMD will create a security environment that poses profound challenges to international security. The U.S. military should maintain an enduring military presence in the Asia-Pacific region that provides tangible reassurance that we are committed to Asia's security and the prosperity essential to the region's success.

Question. If so, what specific capabilities or enhancements are needed in your view?

Answer. If confirmed, I will review our military's force posture in Asia and make appropriate recommendations on any enhancements. In general, U.S. presence must remain capable of reassuring our allies and partners in the region while positioning us to deter against—and if necessary, defeat—the full range of potential threats. Our actions in the Asia-Pacific region should encourage greater regional security cooperation by strengthening and expanding our bilateral and multilateral relationships so that we preserve stability in Northeast Asia while investing new attention and resources in Southeast and South Asia.

Question. What do you see as the U.S. security priorities in the Asia-Pacific region?

Answer. Our alliances in Asia have provided the bedrock for security and economic prosperity in the region. We must continue to deepen these alliances while evolving them to face current and emerging threats. Our security priorities in this region should promote regional peace and stability while combating such threats as terrorism, the proliferation of WMD, piracy, and cyber security threats. Additionally, we must work to maintain free and open access to the maritime, air, and space domains.

NORTH KOREA

Question. What is your assessment of the current security situation on the Korean peninsula?

Answer. North Korea remains the primary threat to security in Northeast Asia. The security situation on the peninsula has reached high levels of tension over the past year with the attack on the Cheonan and the artillery shelling of Yeonpyeong Island. North Korea continues to improve its asymmetric capabilities including WMD, ballistic missiles, Special Operations Forces, and cyber capabilities. Absent evidence of fundamental change, North Korea will remain a serious security threat in the region and a significant concern for the United States and the international community.

Question. In your opinion, what should be the U.S. role in the South Korean response to any future North Korean attacks or provocations?

Answer. The U.S. role as part of a combined force with the Republic of Korea (ROK) is to deter North Korean aggression and if deterrence fails, fight and win. This mission is accomplished through the employment of agile and well-trained forces within the ROK-U.S. Alliance.

Question. In your view does the lack of progress in diplomatic efforts to persuade North Korea to verifiably dismantle its nuclear weapons program inform or guide U.S. nuclear deterrence strategy in the region?

Answer. In my judgment, the U.S. nuclear deterrence strategy has helped prevent the resumption of hostilities on the Korean Peninsula for more than half a century. Successful deterrence creates the space within which diplomacy can operate. The success of diplomatic efforts, however, will ultimately hinge on the willingness of North Korea to comply with the agreements it makes.

Question. What is your assessment of the threat posed to the United States and its allies by North Korea's ballistic missile and WMD capabilities and the export of those capabilities?

Answer. North Korea's missile and WMD programs are increasingly a direct threat to the United States. These programs already pose a serious and real threat to U.S. regional allies and partners. The United States must continue to monitor North Korea's capabilities and related proliferation, while collaborating with our partners and allies, to ensure contingency planning remains adaptive and responsive.

Question. In your view are there additional steps that DOD could take to ensure that North Korea does not proliferate missile and weapons technology to Syria, Iran and others?

Answer. Proliferation of missile and weapon technology by North Korea is a regional and global threat. In my judgment, there may be additional steps that can be taken consistent with the President's policy. If confirmed, I will work to ensure continued coordination and cooperation between DOD, other U.S. agencies, and our international partners to strengthen international consensus against proliferation, invest in capacity building programs with partner nations, and find ways to increase WMD-related information sharing with international partners.

REPUBLIC OF KOREA

Question. What is your understanding of the current U.S. security relationship with the Republic of Korea (ROK)?

Answer. The ROK-U.S. alliance is one of the most successful alliances in the world and serves the interests of both of our Nations. The United States is committed to the security of the peninsula and ensuring the alliance remains a comprehensive, strategic partnership with bilateral, regional, and global scope. The alliance's resolve has never been stronger, and we should continue to advance the alliance in terms of both capability and commitment.

Question. If confirmed, what measures, if any, would you take to improve the U.S.-ROK security relationship?

Answer. If confirmed, I will continue to maintain close contact with my South Korean counterpart to promote the continuation of a strong U.S.-ROK security relationship. DOD and the ROK should continue to work closely to realign U.S. forces on the Peninsula and prepare for the transition of wartime operational control to the ROK by December 2015. U.S. forces should continue the plan to reposition south of Seoul, making the U.S. presence less intrusive to the Korean People and improving force readiness and quality of life.

Question. What is your view regarding the timing of turning over wartime operational command to the ROK?

Answer. The South Korean military is a highly capable and professional force and is increasing its ability to lead the defense of its country. I appreciate that the United States and the ROK have a shared understanding on a comprehensive way forward for the transfer of wartime operational control by December 2015. If confirmed, I will continue to work with my ROK counterpart to advance this process.

Question. Do you believe that current planning regarding tour normalization in the ROK should be reconsidered in view of the high cost of the plan and the risks associated with significantly higher numbers of dependents on the Korean peninsula?

Answer. If confirmed, I will continue to evaluate the associated costs and benefits of implementation and make recommendations based upon proposed force posture and best way forward. I understand the goal of tour normalization is to enhance the quality of life for our forward-stationed forces and their families. A stable family

improves operational readiness. DOD's long-term goal remains full tour normalization with the timeline to be determined based upon affordability.

CHINA

Question. From your perspective, what effect is China's expanding economy and growing military having on the region at-large and how is that growth influencing the U.S. security posture in Asia and the Pacific?

Answer. In my judgment, we should welcome a strong, prosperous, and successful China that plays a responsible role in world affairs. China's economic growth has been a key factor for the Asia-Pacific regions' economic growth and development. Its economic growth has also allowed China to embark upon a comprehensive transformation of its military forces. However, a lack of transparency into the pace and scale of China's military modernization raises concerns within the region. If confirmed, I will continue to monitor China's military development and engage China to promote stability.

Question. What do you believe are the objectives of China's military modernization program?

Answer. If confirmed, my new responsibilities will allow me to more closely examine this issue. From my current perspective, China appears to be building the capability to fight and win short duration, high-intensity conflicts along its periphery, with a near-term focus on preparing for potential contingencies involving Taiwan. This appears to include an emphasis on anti-access and area denial capabilities. China is also devoting increasing attention and resources to conducting operations beyond Taiwan and China's immediate periphery as evidenced by public revelations about their aircraft carrier program. China is modernizing its nuclear forces and strengthening its nuclear deterrence capability, while enhancing its strategic strike capabilities, such as space and counter-space operations and computer network operations. Additional military missions include humanitarian assistance, non-combat evacuation operations, and counter-piracy support.

Question. How do you believe the United States should respond to China's military modernization program?

Answer. If confirmed, I would continue to use our interactions with China's military to encourage a constructive role in addressing common security challenges. Force posture, presence, capability developments, and actions that strengthen our alliances and partnerships will demonstrate our ability and commitment to maintain peace and stability in the Asia-Pacific.

Question. Do you support the sale of F-16 C/D aircraft to Taiwan?

Answer. I have not yet had the opportunity to study in detail Taiwan's defense needs; however, in accordance with the Taiwan Relations Act, we have a responsibility to make available to Taiwan defense articles and services necessary to enable Taiwan to maintain a sufficient self-defense capability. Our China policy has been consistent for the past eight U.S. administrations, and supports the Three Joint U.S.-PRC Communiqués and the Taiwan Relations Act.

Question. In the past 6 months, the United States and China have had a series of high level military-to-military engagements beginning with Secretary Gates' visit to China in January which was followed by Chinese General Chen Bingde's visit to the United States in May. Most recently, Admiral Mullen traveled to China to meet with General Chen and to visit Chinese military sites. Nonetheless, the U.S.-China military-to-military dialogue has been strained over the past several years and efforts to establish and maintain mutually beneficial military relations has been hampered by China's propensity for postponing or canceling military engagements in an apparent effort to influence U.S. actions.

What is your general experience with U.S.-China military-to-military relations?

Answer. My experience so far has been fairly limited during my short tenure as Chief of Staff of the Army. My interactions with my PLA counterpart and other senior leaders have focused on the positive aspects of a military-to-military relationship to increase cooperation between our Nations.

Question. What is your view of the relative importance of sustained military-to-military relations with China?

Answer. I firmly believe that healthy, stable, reliable, and continuous military-to-military relations between the United States and China are very important.

Question. Do you believe we should make any changes in the quality or quantity of our military relations with China? If so, what changes and why?

Answer. I understand General Chen's recent visit to the United States and Admiral Mullen's trip to China to signify progress in the relationship. If confirmed, I will certainly strive to further improve the U.S.-China military-to-military relationship,

both in terms of quantity of exchanges and, more importantly, the quality of the events.

Question. What is your understanding of U.S. military operations in the proximity of the South China Sea and do you think the United States should make any changes in those operations?

Answer. The U.S. military is committed to maintaining peace and stability, freedom of navigation, open access, and respect for law in international waters, including the South China Sea.

DEPARTMENT OF DEFENSE COUNTERNARCOTICS ACTIVITIES

Question. On an annual basis, DOD's counternarcotics (CN) program expends approximately \$1.5 billion to support the Department's CN operations, building the capacity of certain foreign governments around the globe, and analyzing intelligence on CN-related matters. In a recent Government Accountability Office (GAO) report, GAO found that DOD "does not have an effective performance measurement system to track the progress of its counternarcotics activities." This is the second such finding by GAO related to DOD CN in the last decade.

What is your understanding and assessment of the DOD CN program?

Answer. Drug trafficking and transnational organized crime continues to be a complex threat to the United States and its interests abroad. I have not had an opportunity to assess the DOD's counternarcotics program fully. If confirmed, I look forward to ensuring the DOD's program supports our Nation's interests and our foreign partners, aligns with the National Drug Control Strategy, and strives to achieve measureable results.

Question. In your personal view, should DOD continue to play a role in attempting to stem the flow of illegal narcotics?

Answer. Based on my experience, confronting this issue requires a whole-of-government approach to confront the flow of illicit narcotics, associated transnational organized criminal activity, and potential terrorist connections. Interagency collaboration has been critically important to the progress made since the 1980s and should continue. Additionally, DOD's existing partnerships with countries throughout the world contribute considerably to U.S. Government efforts to confront this global problem.

COUNTER-PIRACY OPERATIONS

Question. Since January 2009, the U.S. Navy has been patrolling the waters of the Gulf of Aden and off the coast of Somalia as part of the international coalition engaged in counter-piracy operations. While there have been some high profile interdictions and arrests, data suggests that the number of pirate attacks has not been diminished in any meaningful way. To the contrary, piracy in that region remains a significant problem.

What is your assessment of the counter-piracy mission to date?

Answer. The presence of the coalition navies continues to deter and prevent individual pirate attacks, reducing the success rates of pirate attacks by 15 percent in the Horn of Africa region.

Question. What changes, if any, do you believe are necessary in terms of the level of effort by the U.S. and coalition countries and also in terms of strategy and tactics?

Answer. It is my understanding that current DOD and coalition tactics and procedures are proving effective, especially when executed in conjunction with commercial vessels adhering to industry Best Management Practices. Due to the size of the affected region, additional naval vessels would not necessarily provide significant increase in return on the investment. However, using other instruments of government power, such as disrupting pirates' financial networks or increasing the judicial capacity and capability throughout East Africa, would likely have a greater return on U.S. Government investment.

Question. Do you think DOD should continue the counter-piracy mission, as it has been conducted over the past few years, and, if so, how long do you think the Navy can continue the mission without experiencing any adverse effect on other missions?

Answer. Yes. As articulated in the President's Maritime Security Policy and the NSS Counter Piracy Action Plan, the United States has a unique leadership role in protecting high seas freedom and global sea lines of communication, noting that piracy threatens U.S. security and economic interests and contributes to regional instability. of pirated vessels.

INTERNATIONAL PEACEKEEPING CONTRIBUTIONS

Question. In testimony before the House Committee on Foreign Affairs (July 29, 2009), Ambassador Susan Rice, U.S. Ambassador to the United Nations, stated that the United States “is willing to consider directly contributing more military observers, military staff officers, civilian police, and other civilian personnel—including more women I should note—to U.N. peacekeeping operations.”

What is your view on whether the United States should contribute more military personnel to both staff positions and military observers in support of U.N. peacekeeping operations?

Answer. Our troop commitments in Iraq and Afghanistan remain substantial and take first priority in my judgment. As these commitments change, however, I believe that we should consider opportunities for U.S. personnel to contribute to U.N. peacekeeping missions. Experience shows that even a small number of trained and experienced American servicemembers can have a significant, positive effect on U.N. operations.

Question. What are the advantages and disadvantages of contributing additional military personnel to U.N. operations?

Answer. I regard U.N. peacekeeping operations as a cost-effective alternative to unilateral U.S. military action. These missions save civilian lives, promote stability, and support American interests around the world. U.S. servicemembers can have a very positive impact on U.N. operations, especially in areas where our troops can deliver hard-to-find expertise, like logistics and intelligence. If confirmed, I would carefully weigh the advantages of additional participation in U.N. peacekeeping against potential costs including an increase in the operational tempo of our force. I would also acknowledge the reality that in some cases, U.S. boots on the ground may not be supportive of the mission’s desired end state. In these cases, we may be able to achieve our objectives in other ways.

Question. If confirmed, would you support identifying methods through which the DOD personnel system could be more responsive to requests for personnel support from multilateral institutions like the United Nations?

Answer. I’m not aware that we have been unresponsive. If confirmed, I will seek to learn more about this issue.

COUNTER THREAT FINANCE

Question. A number of officials in DOD and the Intelligence Community (IC) have called for investing significantly more resources in identifying and tracking the flow of money associated with terrorist networks and illicit trafficking.

What are your views on the role of DOD in counter threat finance activities?

Answer. To defeat a network it must be attacked in each of its components including leadership, operations, supply, and financing. DOD has an important role in counter threat finance activities. Terrorist activities and illicit networks that traffic narcotics, WMD, or improvised explosive devices can and will leverage funding to further resource and expand their operations. DOD policy is to effectively deny, disrupt, degrade, and defeat our adversaries’ ability to attain and utilize financial resources. To penetrate the financial networks of our adversaries, we must leverage the full capabilities of our Nation while simultaneously attaining vital assistance from our allies. If confirmed, I will further this effort by working with other U.S. Government departments and agencies, as well as with our partner nations, in order to effectively counter threat finance activities.

Question. In your view, should DOD seek to expand its support to other U.S. Government departments and agencies conducting counter threat finance activities?

Answer. In my judgment, DOD should continue to work with and support other U.S. Government departments and agencies to conduct counter threat finance activities. If confirmed, I do not anticipate an immediate need to expand the support that DOD is providing, but we certainly must ensure that we are fully engaged in the interagency process to counter threat finance activities.

Question. Transnational criminal organizations in Central America and Mexico are having a debilitating impact on the ability of our foreign partners to govern their nations and provide opportunities for their people.

Do you think expanded Counter Threat Finance activities in this region would be beneficial? If so, what role—if any—should DOD play in those activities?

Answer. NORTHCOM and SOUTHCOM are helping to shape and leverage unique capabilities in support of our foreign and domestic mission partners. If confirmed, I will examine this issue carefully.

CENTRAL AMERICA AND MEXICO

Question. During a recent Senate Armed Services Committee hearing, the Commanders of U.S. Northern Command and Southern Command discussed the increasingly dangerous region along the northern and southern borders of Mexico and the devastating impact transnational criminal organizations are having on the people and security of southern Mexico, Guatemala, Belize, Honduras, and El Salvador. The United States has increased its assistance in this region, but—to date—DOD has had only a small role.

What are your views on the threats posed by transnational criminal organizations in this region?

Answer. Transnational Criminal Organizations (TCOs) operating throughout Mexico and Central America are better-armed than many police forces and demonstrate increasing adaptability and sophistication in their methods. Their criminality extends far beyond drugs to extortion, robbery, kidnapping, trafficking in firearms and persons, and many other illegal activities. All of these activities, coupled with the fear, corruption and violence they engender, are having a considerably negative impact on the prosperity and security of our partners in the region.

Question. What is your assessment of DOD's current activities in Mexico and Central America?

Answer. U.S. Northern Command (NORTHCOM) and U.S. Southern Command (SOUTHCOM) have been assisting our regional partners through increased senior level interactions, subject matter expert exchanges, human rights training, mobile training teams, intelligence support, and exercises. Our overall military-to-military relations with Mexico have expanded considerably as have our relationships with Central American nations.

Question. What changes, if any, would you propose to the DOD's current activities in this region?

Answer. If confirmed, I would closely examine all aspects of our activities in the region.

ANTI-ACCESS AND AREA DENIAL

Question. Over the past few years, much has been made of the emerging anti-access and area denial capabilities of certain countries and the prospect that these capabilities may in the future limit the U.S. military's freedom of movement and action in certain regions.

Do you believe emerging anti-access and area denial capabilities are a concern and, if so, what should the U.S. military be doing now and in the next few years to ensure continued access to all strategically important areas?

Answer. The proliferation of anti-access and area denial capabilities are of growing concern to the U.S, threatening assured access and our freedom of maneuver on land, sea, air, and space. They also potentially inhibit global commerce by controlling passage through regional chokepoints. If confirmed, I will focus on developing joint capabilities to counter these threats while working with our allies and partners to deter those who would attempt to deny access to the global commons.

INTERAGENCY COLLABORATION

Question. What do you believe are the most important lessons learned from the collaborative interagency efforts in Afghanistan, Iraq, and elsewhere?

Answer. Among other lessons, it seems clear to me that we have learned that countering insurgent and terrorist threats demands the integration of all instruments of national power toward a common purpose.

Question. How do you believe these efforts can be improved?

Answer. If confirmed, I will pursue opportunities for early and regular interagency engagement to foster enduring partnerships and to develop the planning, training, and education necessary for complex operations. We should seek new opportunities to collaborate and identify common mission tasks and related core training objectives. We should seek opportunities to leverage DOD joint training venues and resources to build capacities that improve our ability to work together.

Question. How can the lessons learned in recent years be captured in military doctrine and adopted as "best practices" for future counterinsurgency and counterterrorism operations?

Answer. As part of the recurring revision of joint doctrine, there is a direct link to joint lessons learned and best practices. If confirmed, I will continue to invest in the ability of our joint force to learn and adapt.

Question. Section 944 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (P.L. 111-383) required the Secretary of Defense and the CJCS

to submit a report on the organizational structures of the headquarters of the geographic combatant commands (GCCs). DOD's report, dated June 2011, highlights the role of "interagency" (i.e., non-DOD, non-intelligence community) representatives at each of the GCCs. Stronger and more effective interagency integration was a central theme in the establishment of U.S. Africa Command and has apparently also informed re-organizations at U.S. Southern Command and other GCCs. Yet a number of observers have suggested that there is still room for improvement in both the nature and extent of interagency integration at the regional level.

In your view, what is the importance, if any, of interagency integration to the ability of DOD's GCCs to execute their missions?

Answer. Interagency integration is critical to the ability of the COCOMs to execute their missions. It enables the U.S. Government to build international support, conserve resources, and conduct coherent operations that efficiently achieve shared national and international goals.

Question. If confirmed, how would you envision the appropriate roles of "interagency" representatives at GCCs?

Answer. It is my understanding that the Executive Branch's Interagency Process of national security policy development and implementation integrates all aspects of U.S. national security in a whole-of-government approach to advance our national security interests. If confirmed, I will continue to advocate the roles of interagency representatives at the COCOMs in a similar fashion.

RESPONSIBILITY TO PROTECT

Question. The U.S. Government has recognized the "responsibility to protect" (R2P)—that is, the responsibility of the international community to use appropriate means to help protect populations from genocide, war crimes, ethnic cleansing and crimes against humanity, by encouraging states to protect their own populations, by helping states build the capacity to do so, and by acting directly should national authorities fail to provide such protection. In its 2010 QDR, DOD names "preventing human suffering due to mass atrocities" as one of a long list of potential contingencies that DOD might be called on to address. DOD has begun to explore some of the implications of R2P, by considering "mass atrocity prevention and response operations".

In your view, how high a priority should the "responsibility to protect" be for the U.S. Government as a whole?

Answer. Maintaining the will and the ability of the United States to prevent human suffering is not only a moral imperative but also an important means to promote our values and increase our influence around the globe. This doesn't seem to me to be an issue of prioritization. A well trained and well led Joint Force can accomplish this mission if called upon to do so.

Question. In your view, what should be the role of DOD, if any, in fulfilling the responsibility to protect?

Answer. Given our global reach and organizational capabilities, DOD can play a role in responding to humanitarian disasters including mass atrocities. DOD has played an effective role in support of the efforts of the State Department, USAID, and other agencies to prevent mass atrocities from occurring.

SPECIAL OPERATIONS FORCES

Question. The previous two QDRs have mandated significant growth in our Special Operations Forces and enablers that directly support their operations.

Do you believe that we should further increase the number of special operations personnel? If so, why, and by how much?

Answer. The current growth of 3 to 5 percent in special operations personnel is appropriate. If confirmed, I will examine if additional growth of Special Forces is needed.

Question. In your view, how can the DOD increase the size of Special Operations Forces while also maintaining the rigorous recruiting, selection, and training standards for special operators?

Answer. Although SOF has nearly doubled since September 11, recruitment, assessment, selection, and training standards have not been altered or lowered.

Question. Do you believe any modifications to U.S. Special Operations Command's (SOCOM) title 10, U.S.C., missions are appropriate? If so, what modifications would you suggest?

Answer. In my judgment, no modifications are required at this time. If confirmed, I remain open to issues and ideas that might suggest modifications should be considered.

Question. What can be done to ensure that indirect special operations missions with medium- and long-term impact, such as unconventional warfare and foreign internal defense, receive as much emphasis as direct action, and that they receive appropriate funding?

Answer. The Commander, SOCOM, continues to emphasize the importance of the indirect SOF mission profiles and insures that SOF trains to these mission profiles. It is my understanding that we have grown our SOF Civil Affairs and Military Information Support forces to insure we have extra capacity to conduct indirect operations. If confirmed, I will work with our SOF commanders to ensure that an appropriate balance is maintained.

SPECIAL OPERATIONS FORCES

Question. The previous two QDRs have mandated significant growth in our Special Operations Forces and enablers that directly support their operations.

Answer. The Commander of SOCOM has described the “non-availability” of enabling capabilities as SOCOM’s “most vexing issue in the operational environment”. The 2010 QDR sought to balance previously mandated growth in Special Operations Forces with additional enabling capabilities.

Question. What do you believe are the greatest shortages in enabling capabilities facing Special Operations Forces?

Answer. Rotary wing aircraft is the single most significant shortage, and we are taking steps to address it. If confirmed, I will work with our SOF commanders to identify and resolve other critical shortfalls.

Question. Do you believe additional enabling capabilities, beyond those mandated by the QDR, are required to support Special Operations Forces?

Answer. It is my understanding that the Services and SOCOM are increasing enabling capabilities as mandated by the QDR. The Force Sufficiency Assessment should inform our senior leaders in deciding whether more enabling capabilities are needed.

Question. Do you believe the process for Special Operations Forces to request enabling capabilities from the Services, when required, should be formalized? If so, how?

Answer. This process is formalized in the Global Force Management Board Force Allocation process. The SOCOM Commander and I are in discussion about adapting the process for the Army based on the lessons of the past 10 years. If confirmed, I will closely monitor these processes to ensure SOF requirements for critical enabling capabilities are being addressed.

Question. Some have argued that the Commander of SOCOM should have greater influence on special operations personnel management issues including assignment, promotion, compensation, and retention of Special Operations Forces. One proposal would modify section 167 of title 10, U.S.C., to change the role of the SOCOM Commander from “monitoring” the readiness of special operations personnel to “coordinating” with the Services on personnel and manpower management policies that directly affect Special Operations Forces.

What is your view of this proposal?

Answer. If confirmed, I will closely examine this proposal; however, it is my judgment that the law does not need to change at this time. The recently implemented DOD Instruction 5100.01 requires the Services to coordinate their personnel policies and plans with SOCOM. The “coordination” policy will provide SOCOM more visibility into personnel policy changes and initiatives.

COMBATING TERRORISM

Question. The administration recently released its National Strategy for Counterterrorism. This strategy highlights the need to maintain pressure on al Qaeda’s core while building the capacity of partners to confront mutual threats. The strategy also underscores the need to augment efforts to counter threats from al Qaeda-linked threats “that continue to emerge from beyond its core safe haven in South Asia”.

How do you view the Department’s role under the new National Strategy for Counterterrorism?

Answer. Elements: antiterrorism, or defensive measures; counterterrorism, or offensive actions; and consequence management, or measures to recover from terrorist attacks. Each of these components of combating terrorism has its own policies and strategies, developed in close coordination with interagency partners. DOD plays a significant role within the government-wide global fight against al Qaeda and its affiliates primarily through partner nation capacity-building and enabling efforts, targeted counterterrorism operations, and countering violent extremist messaging.

Question. What do you believe is the appropriate role for the Department in countering threats from al Qaeda and affiliated groups outside of South Asia?

Answer. In my judgment, DOD's primary role is to pursue the ultimate defeat of al Qaeda (AQ) and its affiliates as part of a whole-of-government counterterrorism approach. We accomplish this through security force assistance, building strong and enduring partnerships, and when directed, conducting targeted counterterrorism operations in order to eliminate imminent threats to the United States and U.S. interests. We also support other efforts led by interagency partners who focus on the development of better governance and supplying basic needs thereby reducing the underlying causes that enable AQ to recruit from vulnerable populations.

Question. Are there steps the Department should take to better coordinate its efforts to combat terrorism with those of other Federal departments and agencies?

Answer. It's my personal experience that the level of interagency coordination that occurs in the global counterterrorism (CT) fight is greater than it has ever been. But that does not mean we can rest in continually improving our coordinated efforts to bring the full weight of our national power to bear in the defense of our interests. If confirmed, I will work to ensure we collectively put forth the most effective approach to combat terrorism.

Question. What do you view as the role of the Department in countering al Qaeda and affiliated groups in cyberspace?

Answer. The Department acts in support of the Nation's strategic objective to disrupt, dismantle, and defeat al Qaeda (AQ) and its affiliates. In cyberspace, this includes directing DOD information networks operations, planning against designated cyberspace threats, and executing cyberspace operations as directed. DOD also employs cyber defense measures to prevent intrusions and defeat adversary (including AQ) activities on DOD networks and systems.

SECTION 1208 OPERATIONS

Question. Section 1208 of the Ronald Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375), as amended by subsequent bills, authorizes the provision of support (including training, funding, and equipment) to regular forces, irregular forces, and individuals supporting or facilitating military operations by U.S. Special Operations Forces to combat terrorism.

What is your assessment of this authority?

Answer. Combatant commanders have repeatedly confirmed section 1208 as a key tool in this ongoing fight. The ability for Special Operations Forces to leverage willing partners who possess access to areas, people, and information that are denied to our forces is critical to tactical and strategic success. We have been able to respond quickly to global challenges due to this authority while maintaining the appropriate civilian oversight, including Secretary of Defense approval and congressional notification. The Department is appreciative of Congress's continued support for this authority and if confirmed, I will continue to keep you informed through our annual report and briefings.

CAPABILITIES OF SPECIAL OPERATIONS FORCES AND GENERAL PURPOSE FORCES

Question. The 2010 QDR called for increased counterinsurgency, counterterrorism, and security force assistance capabilities within the general purpose forces.

What is your understanding and assessment of the QDR's guidance with regard to the mix of responsibilities assigned to general purpose and Special Operations Forces, particularly with respect to security force assistance and building partner military capabilities?

Answer. The 2010 QDR emphasized expanding general purpose forces' capabilities and capacity for these missions. Our general purpose forces have always performed some security force assistance and built partner capacity; however, this strategy increases that emphasis and expands the range of missions. This approach is also consistent with the 2010 QDR emphasis on allies and partners.

Question. Do you believe that our general purpose forces need to become more like Special Operations Forces in mission areas that are critical to countering violent extremists?

Answer. Our conventional forces should continue to become more versatile, adopting some special capabilities, particularly in areas such as cultural awareness, linguistic capabilities, information operations, and in the ability to operate in a decentralized, widely dispersed environment. Doing so will improve general purpose force capabilities across mission areas including counterinsurgency and stability operations.

Question. In your view, what mission areas, if any, should be reserved for Special Operations Forces only?

Answer. In my judgment, Special Operations Forces provide unique abilities and are an essential component of our U.S. Armed Forces. In a very unpredictable security environment, they must remain versatile as well. Unconventional warfare, counterterrorism, special reconnaissance, foreign internal defense, and counter-proliferation of WMD are some of the unique mission areas in which they excel and provide an essential capability.

DOD'S COOPERATIVE THREAT REDUCTION PROGRAM

Question. The Cooperative Threat Reduction (CTR) program, which is focused historically on accounting for, securing, or eliminating Cold War era WMD and materials in the states of the former Soviet Union, has started to expand its focus to other countries. With this expansion the CTR program is widening its focus to biological weapons and capabilities including biological surveillance and early warning; and encouraging development of capabilities to reduce proliferation threats.

Do you think the CTR program is well coordinated among the U.S. Government agencies that engage in threat reduction efforts, e.g., DOD, the Department of Energy, and the State Department?

Answer. My understanding is that effective interagency coordination has been a defining characteristic of the CTR program since its inception, which has directly contributed to the program's success. We should continue to evaluate the program's objectives in alignment with our national security interests. If confirmed, I will evaluate whether interagency coordination can be improved.

Question. If confirmed, would you make any changes in the current programs or goals of the CTR program?

Answer. The CTR program has contributed significantly to reducing residual Cold War stockpiles of WMD and associated materials within the states of the former Soviet Union. However, such threats continue to exist, both within the Eurasia region and throughout the world. I support the continued expansion of this program to other regions of the world in order to build global partnerships. Where governments are unable to mitigate this threat on their own, we should consider working with them to secure all WMD and related materials.

PROMPT GLOBAL STRIKE

Question. The 2010 QDR concluded that the United States will continue to experiment with prompt global strike prototypes. There has been no decision to field a prompt global strike capability as the effort is early in the technology and testing phase.

In your view, what is the role for a Conventional Prompt Global Strike (CPGS) capability in addressing the key threats to U.S. national security in the near future?

Answer. There has been no decision to field a CPGS capability; however, the concept has merit in a variety of scenarios. If confirmed, I will closely examine CPGS in order to provide recommendations on its future development.

Question. What approach to implementation of this capability would you expect to pursue if confirmed?

Answer. If confirmed, I will support continued research, development, test, and evaluation of critical technologies. I will also assess the formal establishment of follow-on Service acquisition programs and a concurrent effort to improve the Nation's intelligence, surveillance, and reconnaissance (ISR) capabilities necessary to support a future CPGS capability.

Question. In your view what, if any, improvements in intelligence capabilities would be needed to support a prompt global strike capability?

Answer. As with other weapons systems, effective employment of CPGS weapons depends on the collection, analysis, and dissemination of timely and accurate intelligence information. Currently, DOD is conducting assessments of the adequacy of present and future ISR to support strikes using a CPGS weapon system. If confirmed, I will use these assessments to inform the performance requirements for CPGS, just as assessed CPGS performance will shape future ISR requirements.

NUCLEAR WEAPONS AND STOCKPILE STEWARDSHIP

Question. Congress established the Stockpile Stewardship Program with the aim of creating the computational capabilities and experimental tools needed to allow for the continued certification of the nuclear weapons stockpile as safe, secure, and reliable without the need for nuclear weapons testing. The Secretaries of Defense and Energy are statutorily required to certify annually to Congress the continued safety, security, and reliability of the nuclear weapons stockpile.

As the stockpile continues to age, what do you view as the greatest challenges, if any, with respect to assuring the safety, security, and reliability of the stockpile?

Answer. To sustain a safe, secure, and effective stockpile today, we must prudently manage our nuclear stockpile and related LEPs, while cultivating the nuclear infrastructure, expert workforce, and leadership required to sustain it in the future. If confirmed, I will consider the full range of LEP approaches to include refurbishment of existing warheads, reuse of nuclear components from different warheads, and replacement of nuclear components.

Question. If the technical conclusions and data from the Stockpile Stewardship Program could no longer confidently support the annual certification of the stockpile as safe, secure, and reliable, would you recommend the resumption of underground nuclear testing? What considerations would guide your recommendation in this regard?

Answer. Our current stockpile stewardship is assessed as effective. Today's stockpile has been certified and does not require further nuclear testing. However, the stockpile is aging. I understand that there are challenges in identifying and remedying the effects of aging on the stockpile. If confirmed, I am committed to working with the Department of Energy to maintain the critical skills, capabilities, and infrastructure needed to ensure the safety, reliability, and security of the stockpile within a constrained budget environment.

Question. Do you agree that the full funding of the President's plan for modernizing the nuclear weapons complex, commonly referred to as the 1251 report, is a critical national security priority?

Answer. Yes. The administration's 1251 report details the roadmap for ensuring the future safety, security, and reliability of the nuclear stockpile and associated delivery platforms as well as for modernizing the nuclear weapons complex. It demonstrates a strong commitment to the nuclear mission and is an important signal that the U.S. deterrent remains strong.

Question. Prior to completing this modernization effort, do you believe it would be prudent to consider reductions below New START treaty limits in the deployed stockpile of nuclear weapons?

Answer. The 2010 NPR Report stated that the United States would pursue additional reductions in strategic and non-strategic nuclear weapons with Russia, and a key aspect of implementing the 2010 NPR is conducting follow-on analysis. The Senate also noted in its resolution of advice and consent to ratification of the New START treaty that we must seek to initiate negotiations with Russia on a new arms control agreement by February 2012. The analysis of further reductions would inform my judgment, if confirmed, on whether it is prudent to reduce nuclear weapons below New START treaty limits.

Question. If confirmed, would you recommend any changes to the non-deployed hedge stockpile of nuclear weapons?

Answer. As detailed in the administration's section 1251 report, the National Nuclear Security Administration is pursuing a multi-year program to build critical plutonium and uranium facilities that will give the Nuclear Weapons Enterprise the ability to correct identified stockpile deficiencies. Without these infrastructure improvements and the ability to correct stockpile deficiencies and failures, careful analysis would be required to enable or accept reductions in the strategic hedge. If confirmed, I would assess this analysis before recommending any changes to the non-deployed hedge stockpile.

LAW OF THE SEA CONVENTION

Question. The United Nations Convention on the Law of the Sea is pending consideration in the U.S. Senate.

What is your view on whether or not the United States should join the Law of the Sea convention?

Answer. I support the United States becoming party to the Law of the Sea Convention. This Convention provides U.S. Armed Forces the best possible means to maximize its rights to move freely on, through, and over the world's oceans. I also think that joining the Convention will allow the United States to strengthen our military's ability to conduct operations.

Question. How would being a party to the Law of the Sea convention help or hinder the United States' security posture?

Answer. In my judgment, accession to the Convention would more permanently secure our Nation's global mobility rights, which are critical to America's ongoing and future national security operations and humanitarian assistance missions.

MOBILIZATION AND DEMOBILIZATION OF NATIONAL GUARD AND RESERVES

Question. In support of the current ongoing conflicts, the National Guard and Reserves have experienced their largest and most sustained employment since World

War II. Numerous problems have arisen over time in the planning and procedures for mobilization and demobilization, e.g., inadequate health screening and medical response to service-connected injuries or illnesses, antiquated pay systems, limited transition assistance programs upon demobilization, and inefficient policies regarding members of the Individual Ready Reserve. Reserve Force management policies and systems have been characterized in the past as “inefficient and rigid” and readiness levels have been adversely affected by equipment shortages, cross-leveling, and reset policies.

What is your assessment of advances made in improving Reserve component mobilization and demobilization procedures, and in what areas do problems still exist?

Answer. At this point, I can speak only for the Army Reserve component, but we have made significant progress in this area and eliminated or improved many “inefficient and rigid” procedures. In doing so, we have been able to better sustain the vital employment of the National Guard and Reserves. Some of the direct results of these improvements are: increased deployment predictability, earlier mobilization notifications, stabilized dwell times, and reintegration and transition services throughout the deployment cycle. Deliberate investments and policy commitments to this Operational Reserve have resulted in the best trained, best equipped, and best led Reserve component in our history. There remains room for improvement, such as achieving a single, standardized pay system and providing first-rate medical care before and after deployment. If confirmed, I look forward to working with Congress on the shared goal of providing our Total Force the most capable and best cared for military force in the world.

Question. What do you consider to be the most significant enduring changes to the enabling of an operational Reserve aimed at ensuring Reserve component readiness for future mobilization requirements?

Answer. The future fiscal environment will present significant challenges as we seek to program sufficient resources to preserve the readiness gains of the Reserve component while continuing to use them on a predictable and periodic basis to satisfy our national security requirements. Meeting this challenge will require the commitment of both the Department and Congress.

Question. Do you believe the Reserve components should be Operational or Strategic Reserves?

Answer. The reality is that the Reserve components of our Armed Forces have transformed from an exclusively Strategic Reserve to one that also provides operational, full-spectrum capabilities to the Nation. Repeated combat deployments, as well as peacekeeping, humanitarian relief and Homeland defense missions, have produced a Reserve component far more operationally capable and experienced than at any time in our Nation’s history. Returning to a strictly Strategic Reserve role for the Reserve component would not be in the Nation’s best interest.

Question. Do you see a need to modify current statutory authorities for the mobilization of members of the National Guard and Reserves to further enhance their ability to perform various national security missions?

Answer. Over the past 10 years, the Department has primarily relied on the provisions of the Presidential Declaration of National Emergency to gain involuntary access to the Reserve components. If confirmed, I think it would be prudent to explore more effective and potentially more decentralized authorities to involuntarily access and mobilize Reserve and National Guard Forces. To that end, I understand DOD is working with the Armed Service Committees to include new mobilization authorities in the 2012 National Defense Authorization Act. These authorities would allow Service Secretaries limited mobilization authority, of up to 365 days, for non-named contingencies. Such a change would allow us to better support the requirements of the Joint Force Commanders. Additionally, the recent agreement between DOD and the Governors, which will allow Reserve and National Guard Forces to respond to a domestic emergency or disaster when requested by a Governor, is a positive step forward.

MEDICAL AND DENTAL READINESS OF THE RESERVES

Question. Medical and dental readiness of Reserve component personnel has been an issue of significant concern to the committee, and shortfalls that have been identified have indicated a need for improved policy oversight and accountability.

If confirmed, how would you seek to clarify and coordinate reporting on the medical and dental readiness of the Reserves?

Answer. Medical and dental readiness of Reserve component personnel remains an issue of significant concern. If confirmed, I will continue to support the Reserve Health Readiness Program (RHRP), which provides Periodic Health Assessment (PHA), Post-Deployment Health Reassessment, and other Individual Medical Readiness

ness services—both medical and dental—to all Reserve component forces. In addition to these programs, command emphasis on meeting standards and the integration of RHRP data with our existing readiness systems will improve both reporting accuracy and overall readiness. If confirmed, I will work to improve Reserve readiness across the Department.

Question. How would you improve upon the Department's ability to maintain a healthy and fit Reserve component?

Answer. Improving the Department's ability to maintain a healthy and fit Reserve component requires senior leadership involvement and individual accountability. Strong command emphasis must be in place to produce necessary improvements. If confirmed, I will work with the Defense Safety Oversight Council and the Medical and Personnel Executive Steering Committee to advance health and safety promotion and injury/illness prevention.

RECRUITING STANDARDS

Question. Recruiting highly qualified individuals for military service during wartime in a cost-constrained environment presents unique challenges. The Army has been criticized in past years for relaxing enlistment standards in tough recruiting environments with respect to factors such as age, intelligence, weight and physical fitness standards, citizenship status, tattoos, and past criminal misconduct. On the other hand, as the Deputy Chief of Staff of the Army, G-1, testified earlier this year that less than 25 percent of all 17–24 year olds are eligible to enlist, primarily due to physical and educational requirements.

What is your assessment of the adequacy of current standards regarding qualifications for enlistment in the Armed Forces?

Answer. From my perspective as CSA, the current enlistment qualification standards are well-defined and have stood the test of time. They are driven by the need to provide the Services with men and women who are prepared to adapt to the rigors of military life and meet performance requirements. To that end, the Services carefully screen applicants who come from all walks of life. The traditional high school diploma remains the best single predictor of attrition. That said, some standards may change over time. As an example, I personally believe that the enlistment process should include an open-source social media screening and have asked the Department of the Army to consider whether we have the necessary authorities and whether it is feasible to do so.

Question. In your view, is there any way to increase the pool of eligible enlistees without sacrificing quality?

Answer. Again, speaking from the Army perspective, we are not currently challenged by recruiting and retention. There is an adequate pool of eligible enlistees. However, we are alert to challenges other than quality such as ensuring a reasonable geographic diversity of recruits so that we remain reflective of American society. If confirmed, I will work with the Services to continually find new ways to improve recruitment.

Question. Are there any enlistment requirements or standards that are overly restrictive or which do not directly correlate to successful military service?

Answer. My current assessment is that our military enlistment standards are not overly restrictive. The Services employ fitness, adaptability, and aptitude standards which correlate to the physical, disciplined, regulated lifestyle and cognitive demands needed to succeed in the Armed Forces. If confirmed, I will continue to evaluate this issue closely.

Question. Current recruiting policies define three tiers of high school diploma credentials, aimed at minimizing attrition during the initial enlistment term. At the height of OIF, the Army was particularly forward-leaning in advocating for more GED holders and non-traditional high school graduates to meet recruiting goals. Pending legislative proposals would treat all graduates of State-recognized programs equally for recruiting eligibility.

Do you believe the current "tier" system for evaluating potential enlistees has outlived its usefulness in today's All-Volunteer Force?

Answer. The Services track the attrition rates of military recruits by a variety of credential types. Traditional high school diploma graduates have lower rates of attrition than any other type of credential holder. I am aware of the proposals that would classify graduates of online public schools as "Tier I" candidates for military enrollment, and if confirmed, I will give it careful consideration.

Question. What do you consider to be the most important indicators of future successful Active Duty military service in a new recruit?

Answer. The fitness, adaptability, and aptitude standards which the Services employ have historically correlated to the physical, disciplined, regulated lifestyle and

cognitive demands needed to succeed in the Armed Forces. Young men and women who are motivated to serve their country and desire to excel will have that opportunity through military service.

HOMOSEXUAL CONDUCT POLICY

Question. The “Don’t Ask, Don’t Tell Repeal Act of 2010”, enacted on December 22, 2010, provides for the repeal of the current DOD policy concerning homosexuality in the Armed Forces, to be effective 60 days after the Secretary of Defense has received DOD’s comprehensive review on the implementation of such repeal, and the President, Secretary, and CJCS certify to the congressional defense committees that they have considered the report and proposed plan of action, that DOD has prepared the necessary policies and regulations to exercise the discretion provided by such repeal, and that implementation of such policies and regulations is consistent with the standards of military readiness and effectiveness, unit cohesion, and military recruiting and retention.

What effect do you anticipate the repeal will have on readiness and discipline in the Armed Forces?

Answer. We have the policies and regulations needed for implementation, and they are consistent with standards of military readiness, military effectiveness, unit cohesion, and recruiting and retention. I have considered both objective and subjective measures, and it is my judgment that with our training and preparation nearly complete, we are now ready to affect repeal while sustaining military effectiveness.

PROTECTION OF U.S. FORCES AGAINST INTERNAL THREATS

Question. On November 5, 2009, a gunman opened fire at the Soldier Readiness Center at Fort Hood, Texas, killing 13 people and wounding or injuring 43 others. A DOD review of the attack released in January 2010 concluded that the Department was poorly prepared to defend against internal threats, including radicalization among military personnel.

What, in your view, are the lessons learned from the tragedy at Fort Hood?

Answer. Fort Hood revealed areas that require corrective action. Specific lessons include: (1) identifying and monitoring potential threats through gathering, analyzing, and acting on information and intelligence; (2) providing time-critical information to the right people through the sharing and merging of key indicators; and (3) planning for and responding to incidents through immediate emergency response as well as the long-term care for victims of attacks and their families.

Question. If confirmed, what strategies would you advocate to prevent and mitigate such threats in the future?

Answer. As a result of the tragedy at Fort Hood, the Department will strengthen its policies, programs, and procedures to mitigate internal threats, ensure force protection, enable emergency response, and provide care for victims and families. If confirmed, I will work to: (1) address workplace violence; (2) ensure commander and supervisor access to appropriate information in personnel records; (3) improve information sharing with partner agencies and among installations; (4) expand installations’ emergency response capabilities; (5) integrate force protection policy, and clarifying force protection roles and responsibilities; and (6) ensure that we provide top quality health care to both our servicemembers and our healthcare providers.

RELIGIOUS GUIDELINES

Question. The Independent Review Related to the Tragedy at Fort Hood observed that “DOD policy regarding religious accommodation lacks the clarity necessary to help commanders distinguish appropriate religious practices from those that might indicate a potential for violence or self-radicalization.” Recommendation 2.7 of the Final Recommendations urged the Department to update policy to clarify guidelines for religious accommodation and Recommendation 2.8 urged the Department to task the Defense Science Board to “undertake a multi-disciplinary study to identify behavioral indicators of violence and self-radicalization . . .”

What is your view of these recommendations?

Answer. I understand the Independent Review Related to the Tragedy at Fort Hood issued recommendations based on their findings, and that the Fort Hood Follow-on Review prepared an implementation plan in response to these. If confirmed, I will continue to monitor implementation and track the progress being made to protect our servicemembers from harm while ensuring DOD policies, programs, and procedures appropriately accommodate the free exercise of religion.

Question. What is your understanding and assessment of current policies and programs of DOD regarding religious practices in the military?

Answer. The right of servicemembers to observe their respective religious faiths has always been highly valued by all of the Services. It is my current judgment that our policies and programs reflect this value and provide commanders with adequate flexibility to balance accommodation for religious beliefs and maintain good order and discipline. If confirmed, I will remain open to issues and ideas that might suggest any change in policy or programs.

Question. In your view, do these policies appropriately accommodate the free exercise of religion and other beliefs without impinging on those who have different beliefs, including no religious belief?

Answer. Yes, I believe our policies appropriately accommodate the free exercise of religion.

Question. In your view, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. Yes, I think existing policies and practices strike the proper balance. I admire our military chaplains for their work ministering amidst the pluralistic environment of the military. Even as chaplains express their faith, they and their commanders also are asked to be as inclusive as possible when ministering to an interfaith group. Our chaplains can voluntarily participate, or not participate, in settings which conflict with their faith traditions while remaining mindful of the requirement for inclusiveness. If confirmed, I will remain open to issues and ideas that might suggest improvement to policy and practices.

Question. If confirmed, will you work to ensure that a scientific fact-based approach to understanding radicalization will drive the Department's relevant policies on this topic?

Answer. If confirmed, I will ensure that our force is protected by a reliance on scientific, fact-based approach to countering radicalization. I understand Defense Science Board study on violent radicalization has been commissioned by DOD and that there are plans to commission two additional clinical studies focused on identifying any potential indicators of violent behavior in military personnel. I believe the results of these studies can help inform future policies and programs on radicalization.

Question. Current policy in the Department gives discretion to military leaders to decide whether requests to waive uniform and appearance standards should be granted based on religious beliefs. The Department has submitted a legislative proposal that would clearly exempt the armed services from the requirements of the Religious Freedom Restoration Act (RFRA).

What is your view of the manner in which DOD policies accommodate religious practices that require adherents to wear particular articles of faith?

Answer. I understand the important and delicate balance that we must strike between accommodating religious practices that require adherents to wear particular articles of faith and maintaining the military's uniform grooming and appearance standards. My understanding is that wearing particular articles of faith are permissible so long as the articles are neat and conservative, do not negatively impact the readiness, and good order or discipline of the unit and the mission is not jeopardized. If confirmed, I am committed to ensuring an appropriate balance between maintaining the military's uniform grooming and appearance standards and accommodating particular articles of faith.

Question. Do you believe that the Armed Forces need to be exempted from the strictures of RFRA? If so, why?

Answer. Yes. It is my understanding that the RFRA has the effect of ensuring that a "rational basis" standard in the specific area of military grooming and appearance is applied by the courts instead of by the Armed Forces. The DOD legislative proposal will restore a more appropriate balance between maintaining the military's uniform grooming and appearance standards and approving requested religious accommodations.

MUSLIMS IN THE U.S. MILITARY

Question. Are you concerned that the attack at Fort Hood could lead to harassment or even violence against Muslims in the military?

Answer. First and foremost, the events related to the attack at Fort Hood are a tragedy for all involved. While it is possible that such a tragic act could spur harassment and violence as a means of retaliation, I have confidence in the professionalism of our men and women in the Armed Forces. Furthermore, our military

leaders and supervisors at all levels take precautions to prevent such occurrences while maintaining good order and discipline.

Question. If confirmed, what strategies would you advocate to address the potential for harassment or violence against Muslims in the U.S. military?

Answer. If confirmed, I would focus on sustaining the professionalism of our All-Volunteer Force. I would also advocate open communications, decisive action on the part of military leaders and supervisors, and command emphasis on our standards for maintaining good order and discipline. It's worth noting that the vast majority of our force has lived and worked among Muslims for the past 10 years and is very culturally aware.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. The Department has in recent years developed comprehensive policies and procedures to improve the prevention of and response to incidents of sexual assault, including providing appropriate resources and care for victims of sexual assault. However, numerous incidents of sexual misconduct involving military personnel in combat areas of operation and at home stations are still being reported. Victims and their advocates claim that they are victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate treatment for the victim. They assert that their command fails to respond appropriately with basic medical services and with an adequate investigation of their allegations followed by a failure to hold assailants accountable.

Do you consider the current sexual assault policies and procedures, particularly those on confidential or restricted reporting, to be effective?

Answer. I do, but am also acutely aware that we must continue to do more. Current policies and programs designed to address sexual assault have allowed the Department to both care for victims and hold offenders accountable. However, until we have zero sexual assaults within our forces, we should continue to look for ways to improve the system. If confirmed, I will continue to engage and emphasize the importance of addressing sexual assault, of caring for victims, and of holding offenders accountable.

Question. What problems, if any, are you aware of in the manner in which the restricted reporting procedure has been implemented?

Answer. Getting victims to trust the system and come forward can be challenging. Confidential reporting, or restricted reporting, allows a victim to come forward and have their personal needs met without fear that may be associated with a criminal investigation. I will remain alert and receptive to any reported flaws in the program and take prompt action to improve the system.

Question. What is your view of the steps the Services have taken to prevent and respond to sexual assaults in combat zones, including assaults by or against contractor personnel?

Answer. I am very concerned about reports of sexual assault against anyone in any location. We will not tolerate this behavior. The services have procedures in place to address the challenges of preventing and responding to sexual assaults in an operational environment to include working with host governments and our international partners. The Sexual Assault Prevention and Response (SAPR) Program requires larger units, such as brigades, to appoint and train a deployable sexual assault response coordinator and every battalion or squadron to appoint and train unit victim advocates. Until no sexual assaults occur within our Armed Forces, we will continue to look for ways to improve prevention and response.

Question. What is your view of the adequacy of the training and resources the Services have in place to investigate and respond to allegations of sexual assault?

Answer. DOD is committed to addressing sexual assault in a comprehensive, integrated and uniform manner. All the Services have been directed to establish guidelines for a 24-hour, 7 day a week sexual assault response capability for all locations, including deployed areas. Our investigators and first responders are well trained. All services recently enhanced their resources for investigating and prosecuting sexual assault cases.

Question. What is your view of the willingness and ability of the Services to hold assailants accountable for their acts?

Answer. The Services have the willingness and ability to hold assailants accountable. Moreover, senior leaders are very aware of the importance of establishing a positive organizational climate. Sexual assault is personally destructive for the victim while also undermining organizational climate, unit discipline and morale. When sexual assaults do occur, leaders must ensure victims feel free to report incidents without fear of reprisal, while appropriately applying available resources to investigate and punish assailants.

Question. If confirmed, what actions will you take to ensure senior level direction and oversight of efforts to prevent and respond to sexual assaults?

Answer. DOD has a zero tolerance policy for sexual assault, and we have assigned a General/Flag Officer with operational experience to provide direct oversight of the Sexual Assault Prevention and Response Program office. If confirmed, I will constantly evaluate policies to ensure the safety, dignity, and well being of all members of the Armed Forces.

WOMEN IN THE MILITARY

Question. In recent years, the Navy has opened service on submarines to women, the Marine Corps has expanded service opportunities for women in intelligence specialties, and the Army is currently reviewing its assignment policy for female soldiers. The issue of the appropriate role of women in the Armed Forces is a matter of continuing interest to Congress and the American public.

Do you believe additional specialties should be eligible for service by women?

Answer. DOD is currently conducting a comprehensive review of the role of women in combat. We are participating in this review, and if confirmed, I will continue to monitor combat needs as Services recommend expanding combat roles for women and notify Congress accordingly as required by statute (10 U.S.C., § 652 and/or § 6035). Any decision regarding opening additional specialties for service by women will be based on our obligation to maintain a high state of mission readiness of our All-Volunteer Force.

Question. Do you believe any changes are needed or warranted in the current assignment policies regarding women?

Answer. I support the DOD review and welcome the opportunity to determine what we've learned in 10 years of combat.

RISING COSTS OF MEDICAL CARE

Question. In testimony presented to Congress in February, 2009, the Assistant Director of the Congressional Budget Office asserted that "medical funding accounts for more than one-third of the growth projected for operations and support funding between 2009 and 2026." In April, 2009, then Secretary of Defense Gates told an audience at Maxwell Air Force Base that "health care is eating the Department alive". The administration has proposed health care efficiencies to save nearly \$8.0 billion through 2016.

Do you agree with the proposed health care efficiencies?

Answer. As they have been described to me, I believe that the proposed health care efficiencies are sensible efforts to control DOD's health care costs while maintaining the same level of care. I also believe the modest increases in beneficiaries' cost shares are reasonable and still compare favorably to private sector healthcare plans.

Question. What reforms in infrastructure, benefits, or benefit management, if any, do you think should be examined in order to control the costs of military health care?

Answer. Before reforms can be initiated, detailed analysis must be done. This must include a look at benefit payment structures, organizational structure, systems, and policies for the military health system. If confirmed, I will assist the Secretary of Defense, as he leads the Department's ongoing effort to explore all possibilities to control the costs of military health care. I am also an advocate for the potential long-term gains available through the promotion of healthy life styles and prevention among our beneficiaries to help reduce the demand for health services.

Question. What is your assessment of the long-term impact of rising medical costs on future DOD plans?

Answer. The medical cost growth trend will continue to add pressure to the Department's budget the longer it remains unresolved. Our uniformed servicemembers make great sacrifices for their Nation and the quality of their health care is a critical component to having a fit and ready force to accomplish the National Security Strategy. Additionally, the generous health benefits we provide to their families and retirees are a significant part of the quality of life which allows the military to recruit and retain the highest caliber personnel the Nation has to offer. If confirmed, I will continue our efforts with Congress and DOD to find effective ways to improve the cost-effectiveness of the Military Health System.

Question. If confirmed, what actions would you initiate or recommend to mitigate the effect of such costs on the DOD top-line?

Answer. I'm not in a position to make specific recommendations at this time. If confirmed, I will work closely with health care leadership in DOD to continue the

administration's efforts to examine every opportunity to ensure military beneficiaries are provided the highest quality care possible while managing cost growth.

PERSONNEL AND ENTITLEMENT COSTS

Question. In addition to health care costs, personnel, and related entitlement spending continues to grow and is becoming an ever increasing portion of the DOD budget.

What actions do you believe can and should be taken, if any, to control the rise in personnel costs and entitlement spending?

Answer. The cost related to personnel and entitlements is an increasing portion of DOD's available resources. Our current military compensation system is rooted in structures established a generation ago. In order to control the rise in costs related to personnel and entitlements, it is appropriate to conduct a comprehensive review of the military pay and benefits structure to determine where costs can be contained. If confirmed, I would coordinate with the Secretary of Defense on any review in a manner that supports and sustains the All-Volunteer Force.

Question. In your view, can the Department and the Services efficiently manage the use of bonuses and special pays to place high quality recruits in the right jobs without paying more than the Department needs to pay, or can afford to pay, for other elements of the force?

Answer. In my judgment, recruiting and retention bonuses are cost-effective tools to achieve DOD's personnel strength and experience objectives, but we must continually monitor these tools to ensure they are being used efficiently as well as effectively. It has been my experience that the Services adjust enlisted bonus levels to ensure we get the right numbers of personnel in the corresponding specialties. If confirmed, I would be open to a review of the utilization and efficacy of bonuses as part of any comprehensive review of the military pay and benefits structure.

MILITARY RETIREMENT

Question. The 10th Quadrennial Review of Military Compensation proposed a new defined benefit retirement plan that more resembles the benefits available under the Federal Employee Retirement System than the current military retirement benefit; increasing TRICARE fees for retirees; and the adoption of dependent care and flexible spending accounts for servicemembers. Secretary Panetta has called for a comprehensive review of the military retirement benefit.

While it is often said that the military retirement benefit helps retention after the 10-year point, do you believe it provides any significant boost to recruitment? Do 17–18 year olds care when deciding to enlist?

Answer. Surveys show that retirement benefits are often not a driving factor to enlist 17–18 year old men and women. I agree with Secretary Panetta that it is time to review the military retirement system for needed changes and efficiencies that will still encourage retention and recruitment.

Question. How might it be modernized to reflect the needs of a new generation of recruits, while easing the long-term retirement cost to the Government?

Answer. There are many proposed alternatives to the current military retirement system. I am unable to make recommendations at this time, but if confirmed, I will closely study proposals and their impact as part of a comprehensive review process.

SYSTEMS AND SUPPORT FOR WOUNDED WARRIORS

Question. Servicemembers who are wounded or injured performing duties in Operations Enduring Freedom, Iraqi Freedom, and New Dawn deserve the highest priority from their Service for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from Active Duty if required, and continuing support beyond retirement or discharge. Yet, as the revelations at Walter Reed Army Medical Center (WRAMC) in 2007 illustrated, the Services were not prepared to meet the needs of significant numbers of returning wounded servicemembers. Despite the enactment of legislation and renewed emphasis, many challenges remain, including a growing population of servicemembers awaiting disability evaluation.

What is your assessment of the progress made to date by DOD and the Services to improve the care, management, and transition of seriously ill and injured servicemembers and their families?

Answer. The Wounded, Ill, and Injured, Senior Oversight Council DOD formed in 2007 has provided the necessary consistent focus on these issues, and has made excellent progress. DOD, in collaboration with the Services and the Department of Veterans Affairs, has been working on multiple ways to improve the care, management, and transition of our wounded warriors and their families. The Services'

Wounded Warrior Units and Program oversight offices have made dramatic improvements through which individual and family medical, mental, and social-economic needs are addressed.

Question. What are the strengths upon which continued progress should be based?

Answer. If confirmed, I would continue to build upon the successes of the Services' Wounded Warrior Units. By continuing to appropriately resource and staff these organizations with high quality personnel we can further improve the transition processes and overall well being of our wounded warriors. Additionally, we should continue to expand upon the research and treatment by continued collaboration between the private medical research and healthcare sector and the Centers of Excellence which fall under the DCoE (Defense Center of Excellence for Psychological Health and Traumatic Brain Injury). These groups are making daily strides in providing the best level and quality of care to our wounded warriors and their families, and if confirmed, I will continue to place the highest priority on these efforts.

Question. What are the weaknesses that need to be corrected?

Answer. The Services' have taken great strides to improve care to our wounded servicemembers. However, continuous improvement is needed. One area to further improve is individual case management when a servicemember transitions from the Active Force to DOD retiree or eligible veteran status. The key components of this process are the implementation of a single electronic health record, which follows the servicemember through transition and a single tracking tool for case management. If confirmed, I will work to improve collaboration with our Department of Veterans Affairs partners to expedite fielding of this system. The transition process and tracking for wounded warriors with unseen psychological wounds is an area which requires continued development as well.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase support for wounded servicemembers and their families, and to monitor their progress in returning to duty or to civilian life?

Answer. Yes. For example, if confirmed, I would continue to take advantage of generous support the Department has received from the many non-profit programs and private organizations who have reached out to support our returning veterans. There are hundreds of these organizations and programs that have come to the aide of wounded warriors and their families to provide for everything from assistive devices (wheel chairs, house ramps, et cetera), to conducting research on medical treatments, to providing direct economic aid. I would also continue the Joint Staff's role in providing the Department with evaluation and analysis across the Services in order to share best-practices and lessons learned.

Question. Studies conducted as a result of the revelations at WRAMC pointed to the need to reform the disability evaluation system (DES). A DES pilot program, and now an Integrated DES program, has been established to improve processing of servicemembers.

What is your assessment of the need to further streamline and improve the integrated DES?

Answer. It is my belief that the current Integrated Disability Evaluation System has made significant progress but needs further reform. If confirmed, I would facilitate the Secretary of Defense and the Secretary of the Veterans Administration's collaboration via the IDDES Tiger Team. In order for IDDES to reach its full potential, DOD may need to closely coordinate with Congress for legislative change. Ultimately, this will reduce the total number of warriors in the evaluation process, thus reducing the overall cost to the system and the burden on our wounded warriors.

Question. If confirmed, how will you address any need for change, particularly the Army's growing population of servicemembers awaiting disability evaluation?

Answer. If confirmed, I will support current IDDES reform initiatives and, if necessary, assist the Secretary of Defense with recommendations to Congress on legislative adjustments to the disability rating and compensation system. Additionally, I would continue support for the Services Wounded Warrior units, where significant improvements are being made to the quality of care for our wounded warriors.

SUICIDE PREVENTION AND MENTAL HEALTH RESOURCES

Question. The numbers of suicides in each of the Services has increased in recent years. The Army released a report entitled "Army Health Promotion, Risk Reduction, Suicide Prevention" in July 2010 that analyzed the causes of its growing suicide rate and examined disturbing trends in drug use, disciplinary offenses, and high risk behaviors. In addition, studies conducted by the Army of soldiers and marines in theater are showing declines in individual morale and increases in mental health strain, especially among those who have experienced multiple deployments.

In your view, what should DOD do to shape policies to help prevent suicides both in garrison and in theater and to increase the resiliency of all servicemembers and their families, including members of the Reserve components?

Answer. I am very concerned about the suicide rate. Suicide is a problem that cuts across the Army family, affecting our servicemembers, our Veterans, and their families. If confirmed, I will continue to work closely with Congress, our military leaders, Veterans Affairs, and Federal and civilian organizations to see that our members' and families' psychological health is addressed. DOD has developed an action plan to address the 13 foundational and 76 targeted recommendations outlined in the 2010 DOD Task Force Report on Prevention of Suicide. Resourcing and implementing recommendations set forth by the Services will improve resilience in the force in hopes of ultimately lowering suicide rates.

Question. What is your understanding of the action that the Office of the Secretary of Defense and the Army are taking in response to the July 2010 Army report, and the data in Chapter 3 in particular?

Answer. Early identification of "high risk" behavior and issues such as marital problems, substance abuse, and behavior difficulties are at the forefront of the Services' proactive interventions. This has allowed leaders to intervene on the leading edge. We are seeing increased unit resilience in soldiers and marines, and though it is still a factor the stigma regarding mental health care is dissipating. The Army and the Marine Corps continue to evaluate and modify services related to health promotion, risk reduction, and suicide prevention including increased behavioral health providers at the brigade level in Active and Reserve units, allowing engaged leaders to improve education and awareness of behavioral health issues. In addition, the Army has required increased behavioral health screening before and after deployments; improved training for chaplains and suicide prevention coordinators; and for primary care medical providers to identify and respond to behavioral health issues.

Question. If confirmed, what actions will you take to ensure that sufficient mental health resources are available to servicemembers in theater, and to the servicemembers and their families upon return to home station?

Answer. As an institution, DOD must continue to directly address mental health issues because they directly affect the wellness of our force. There are three key areas that must be addressed to ensure sufficient resources are available to members and their families. First, we must continue to reduce stigma and ensure that members are comfortable seeking treatment and using the resources that are available. Second, we must continue to develop effective mental health therapies that are relevant and appropriate for the experiences of our forces and their families. Third, the necessary resources must be available to include trained mental health professionals.

MILITARY QUALITY OF LIFE

Question. In January 2009, the Department published its second Quadrennial Quality of Life Review, which focused on the importance of key quality of life factors for military families, such as family support, child care, education, health care and morale, welfare, and recreation services.

If confirmed, what further enhancements to military quality of life would you consider a priority, and how do you envision working with the Services, combatant commanders, family advocacy groups, and Congress to achieve them?

Answer. Quality of life programs are important to the wellness of the total force. If confirmed, I will encourage continued improvements and effective management in key areas such as access to counseling, fitness opportunities, child care support, and spouse employment opportunities. I look forward to working with advocacy groups and Congress to efficiently close gaps and reduce overlaps in programs and to communicate effectively with families to ensure that they know how to access available support when they need it.

FAMILY SUPPORT

Question. Military members and their families in both the active and Reserve components have made, and continue to make, tremendous sacrifices in support of operational deployments. Senior military leaders have warned of growing concerns among military families as a result of the stress of frequent deployments and the long separations that go with them.

What do you consider to be the most important family readiness issues for servicemembers and their families?

Answer. I share the common judgment that family resilience is tied to family readiness. We must ensure military families are well prepared to meet the chal-

lenges that come with deployment and service. Through focusing on the psychological, social, financial, and educational well-being of military families, we can continue to build family resilience. Great strides have been made in improving access to resources for families through such programs as Strong Bonds, MilitaryOne Source and the Yellow Ribbon Program. If confirmed, I will continue to focus on these and other initiatives to promote family readiness.

Question. If confirmed, how would you ensure that family readiness needs are addressed and adequately resourced?

Answer. If confirmed, I look forward to working with the Services, the Department, and other agencies on improving resources for benchmark Service programs as well as access to other programs such as MilitaryOne Source and the Yellow Ribbon Program. I believe it is DOD's responsibility to ensure that appropriate resources, including those in health care, education, and employment, are available to families at the level they need wherever they may be located.

Question. How would you address these family readiness needs in light of global rebasing, base realignment and closure, deployments, and future reductions in end strength?

Answer. If confirmed, I will monitor the changing needs of our military families closely to ensure that all available resources are available to families at the required level and location. In order to accurately address the needs of these families in a changing environment, it is critical that we build community partnerships between all Federal agencies and with local governments, businesses, and non-profit organizations that are stakeholders in addressing the stressful aspects of military life. I also believe we need to encourage continued progress among individual states' legislative initiatives to ease recognition of professional accreditation of family members and support for various school programs transferring children.

Question. If confirmed, how would you ensure support to Reserve component families related to mobilization, deployment and family readiness, as well as to Active Duty families who do not reside near a military installation?

Answer. We have a duty to ensure every family has access to quality resources, regardless of component or location. These resources should provide information, access, referrals, and outreach to all military members and their families. This needs to be underwritten by a coordinated, community-based network of care encompassing DOD, VA, State, local, non-profit and private providers. It is my understanding that DOD's Yellow Ribbon Program has been successful in addressing these needs. If confirmed, I will assess this program and others to ensure it is properly focused and funded to address the issues faced by Active Duty, Guard, and Reserve members and their families.

Question. If confirmed, what additional steps will you take to enhance family support?

Answer. If confirmed, I would encourage the implementation of flexible family support programs that meet the needs of our members and their families whether they live on, near, or far from military installations. I understand there are many excellent State programs that support members and their families. If confirmed, I would like to explore these further and see if they can be expanded across all States.

Question. If confirmed, in your view, are the recent increases in military family support (which have risen to \$8.3 billion in the fiscal year 2012 President's budget) sustainable in future years?

Answer. We will have to review family programs with respect to efficiencies just as every other program in DOD will be reviewed against the overall needs of the Department. In so doing, the focus should be on the efficiency and quality of Family Support programs along with the leveraging of community-level organizations and citizens who desire to help their military-connected neighbors. DOD efficiencies, along with community partnerships and cooperation, are key to meeting the long-term needs of our military families in a fiscally constrained environment.

DETAINEE TREATMENT POLICY

Question. Do you support the policy set forth in the July 7, 2006, memorandum issued by the Deputy Secretary of Defense stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. Yes. If confirmed, I would continue to support the Deputy Secretary of Defense's 7 July 2006 memorandum which states that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006,

and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. Yes. If confirmed, I would continue to support the standards for detainee treatment specified in the Army Field Manual on Interrogations and DOD Directive 2310.01E.

Question. If confirmed, will you ensure that all DOD policies promulgated and plans implemented related to intelligence interrogations, detainee debriefings, and tactical questioning comply with the Common Article 3 of the Geneva Conventions and the Army Field Manual on Interrogations?

Answer. Yes. If confirmed, I will continue to ensure all DOD policies and plans related to intelligence interrogations, detainee briefings, and tactical questioning comply with Common Article 3 of the Geneva Conventions and the Army Field Manual on Interrogations.

Question. Do you share the view that standards for detainee treatment must be based on the principle of reciprocity, that is, that we must always keep in mind the risk that the manner in which we treat our own detainees may have a direct impact on the manner in which U.S. soldiers, sailors, airmen, or marines are treated, should they be captured in future conflicts?

Answer. Yes. I share the view that the way in which we treat detainees may have a direct impact on the manner in which U.S. forces are treated should they be captured in future conflicts.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as CJCS?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR CARL LEVIN

RELATIONSHIPS IN THE ARMED FORCES

1. Senator LEVIN. General Dempsey, in response to an advance policy question about your vision for the Armed Forces of today and the future, you responded, in part, that "It will be necessary to establish a different relationship among the Active and Reserve components of our Armed Forces, and it is likely that we will have to establish a different relationship among our closest allies and partners." Can you elaborate on what you meant in terms of what might be different in the relationship among the Active and Reserve components of our Armed Forces and among our closest allies and partners?

General DEMPSEY. In my judgment, it is reasonable to expect the relationship among the Active and Reserve components of our Armed Forces as well as among our closest allies and partners to evolve. Fiscal constraints, for example, will challenge our ability to program and budget sufficient resources to preserve the readiness investments made to the Reserve components. Constrained resources will also drive us to look at new approaches for how we maintain forward presence and build partnerships. As Chairman, I will work with the Secretary of Defense and Joint

Chiefs of Staff to sustain a versatile and affordable Joint Force that preserves the strong relationship between our Active and Reserve components and with our allies and partners.

NOMINEES WITH JOINT EXPERIENCE

2. Senator LEVIN. General Dempsey, recently, the committee became aware in the case of nominees for Service chief and combatant command that there was a need for secretarial waivers for promotion to flag rank and for presidential waivers for such assignments because of a lack of joint experience. Are you committed to ensuring that nominees for these positions of importance and responsibility have the requisite joint qualifications?

General DEMPSEY. I am wholly committed to a Joint Force led joint qualified leaders. Overall, our senior flag officers have substantial joint experience. Eligibility to pin on the rank of brigadier general or rear admiral is contingent on being a Joint Qualified Officer. It is my understanding that waivers are increasingly less frequent as our military continues to progress under Goldwater-Nichols.

QUESTIONS SUBMITTED BY SENATOR MARK BEGICH

MILITARY RETIREMENT SYSTEM

3. Senator BEGICH. General Dempsey, Secretary Panetta has called for a review of the military retirement system. Senior military leadership has vocalized support for a review of the military retirement system since personnel costs are a significant portion of the Department of Defense's (DOD) budget. DOD is going to have to work with constrained resources, however, we have the greatest military in the world because of the people who serve in it and they should be compensated their service—especially if they serve long-term. While studies may show retirement benefits are not a driving factor for young recruits, they certainly become a driving factor with age. Any proposals to Congress to modify the current retirement system must still provide appropriate compensation and recognition for long-term service, especially to retain the best and the brightest. Even the current discussions regarding military retirement are causing alarm among the force and may impact retention. In the midst of three ongoing operations overseas, is now the right time to evaluate and possibly modify the military retirement system?

General DEMPSEY. I share in your conclusion about your military being the finest in the world. Sustaining our force at this level requires, in part, an assessment of how best to structure compensation and benefits to include retirement. In the era of fiscal constraints, we should review the military retirement system for efficiencies and effectiveness. However, any proposal should address the potential effect on recruitment, retention, and sustainment of the All-Volunteer Force.

4. Senator BEGICH. General Dempsey, if confirmed, how do you propose to ensure discussions regarding modifications to the retirement system and any proposed modifications do not result in significant recruiting and retention issues or impact the ability to retain the best and the brightest among our servicemembers?

General DEMPSEY. Our force management and compensation policies and programs are being assessed as part of the comprehensive review. The current statutory and policy framework has served us well during recent conflicts. However, fiscal constraints require us to examine options for a more affordable compensation structure that will not compromise the readiness of the All-Volunteer Force. As Chairman, I will ensure that all options under consideration include an assessment of the likely impact on recruiting and retention. Most importantly, I am committed to ensuring any potential changes do not break faith with our servicemembers, veterans, and their families.

5. Senator BEGICH. General Dempsey, as the discussion continues, how will you and other senior leaders communicate with the force about pay, benefits, and retirement?

General DEMPSEY. As Chairman, I will communicate directly with the Joint Force. I will encourage all our senior military leaders to conduct regular outreach through a variety of mediums to include media engagements, townhalls, journal articles, and social media. Our goal will be to share information openly and widely. I expect that the Service Chiefs will play an especially vital role.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

NATIONAL DEBT AND NATIONAL SECURITY

6. Senator MCCAIN. General Dempsey, the impact of the ongoing financial crisis over deficit spending and the Nation's enormous debt unquestionably will have an impact on defense budgets and how we respond to the many national security threats we face. I agree with Secretary Panetta who recently said that DOD would "continue to be accountable to the American people for what we spend, where we spend it, and what the results are." Do you view the \$14 trillion deficit and projections for significant increases in this amount in the future as a national security threat?

General DEMPSEY. There is a relationship between our national security and our economic prosperity. Our national power is the aggregate of our diplomatic, military, and economic influence. In this respect, the national debt is a serious concern.

7. Senator MCCAIN. General Dempsey, what's the remedy for Admiral Mullen's belief that DOD has "lost the ability to prioritize, to make hard decisions, to do tough analysis, to make trades"?

General DEMPSEY. In my judgment, our acquisition system needs significant improvement. In particular, I will look closely for ways to improve accountability. This likely means a more prominent role for Service Chiefs early in the process. Another option under consideration is making assessments of cost, performance, and technical readiness of weapon systems even earlier in the acquisition process. As Chairman, I will ensure that the Joint Requirements Oversight Council synchronizes its decision points to better inform these earlier acquisition decisions. Through an improved Joint Capabilities Integration Development System, we will also work to ensure more focus on affordability through the analysis of risk versus cost, schedule, performance, and the urgency of the requirement.

8. Senator MCCAIN. General Dempsey, discussions on defense spending cuts as part of negotiations on raising the debt ceiling have, according to media reports, ranged from the \$400 billion over 12 years that President Obama had already announced, to as much as \$800 billion over 10 years, and in some cases \$1 trillion over 10 years. None of these numbers assigned to defense cuts has been accompanied by any sort of strategic analysis. In other words, no one seems to be asking: "What do we need to spend for what we want our military to do?"

In your opinion, what would a cut of \$80 billion to \$100 billion a year over 10 years mean in terms of impact on DOD? What sort of things would we have to be willing to cut? What sort of missions would we have to consider giving up or cutting back?

General DEMPSEY. I would echo the Secretary of Defense who stated that "cuts that deep would damage our national defense". Most likely, such reductions would require changing our national security strategies, and would probably result in a different force than we have today. The force would likely be smaller and less able to address multiple, simultaneous contingencies.

9. Senator MCCAIN. General Dempsey, what are your top priorities for programs or missions you would protect?

General DEMPSEY. As Chairman, my top priority is to protect the homeland and the American people. As mentioned in my hearing testimony, I will work to keep America immune from coercion. To this end, I am committed to developing a decisive, responsive, interdependent, versatile and affordable Joint Force that can deliver options for the Nation. As we make the force affordable, I am focused on keeping faith with our servicemembers, veterans, and their families.

10. Senator MCCAIN. General Dempsey, where do you think DOD can achieve the most savings?

General DEMPSEY. The Department is placing renewed emphasis on creating a cost culture in both our military and civilian leadership. We are expecting significant savings from efficiencies announced and enacted last year. However, efficiencies are unlikely to be sufficient to achieve directed spending reductions. We are currently working through a comprehensive review to identify where additional savings can be achieved. Recommendations will be first provided to the President and eventually submitted through the budget request.

11. Senator MCCAIN. General Dempsey, how would you convince Congress that personnel and health care costs are going to have to be part of any major reduction in defense spending?

General DEMPSEY. Our health care and personnel costs have increased substantially over the past several decades. We have to invest in manpower, training, equipment, and infrastructure. We know what percentage of our total obligating authority we can invest into each account and remain in balance. It is on this basis that we will communicate with Congress.

12. Senator MCCAIN. General Dempsey, some plans currently under discussion claim to achieve a \$1 trillion reduction in defense spending simply by reducing the baseline the Congressional Budget Office has been using for the cost of wars in Iraq and Afghanistan from an assumed level of about \$150 to 160 billion per year for an indefinite period into the future. In your opinion, is DOD already planning for the spending on Iraq and Afghanistan to come down significantly in the future?

General DEMPSEY. The President's recent announcement of troop drawdown in Afghanistan will change the Department's fiscal year 2012 budget requirements for Operation Enduring Freedom (OEF), but the exact change will depend on the commanders' determination of the pace of the drawdown and/or adjustment of the forces mix. The Department is in the process of reformulating its Overseas Contingency Operations (OCO) requirements for OEF for fiscal year 2012, and developing its OCO funding requirements for fiscal year 2013. Given that the Forces in both OEF and Operation New Dawn (OND) are being reduced over time, a reduction in the OCO request logically follows. However, the costs for resetting the force that will extend beyond the drawdown dates.

13. Senator MCCAIN. General Dempsey, how much do you think we will need to spend in Iraq and Afghanistan to sustain our operations there after 2012? In other words, what is a reasonable level of spending for Iraq and Afghanistan to assume for the near-term future?

General DEMPSEY. Spending levels will depend on the results of several pending decisions. Discussions over the structure of our future security relationship with Iraq are ongoing. For Afghanistan, planning is underway to determine the pace of withdrawing the first 33,000 troops. The schedule for reducing remaining forces has not yet been determined. The OCO budget is a bottom-up budget preparation each year that is configured to support the military strategy. We will continue to work to achieve a reasonable estimate of spending.

TRoubLED DEFENSE ACQUISITION PROGRAMS

14. Senator MCCAIN. General Dempsey, 2 weeks ago Congress was informed that the Government share of the cost overruns on the first 3 lots of 28 aircraft for the F-35 Joint Strike Fighter (JSF) was a whopping \$771 million. The next week, we learned that the prime contractor, Lockheed Martin, will face a bill for \$283 million for their share of these cost overruns. Adding everyone's share together, including the additional expenses associated with "concurrency"—which means costs associated with trying to develop the aircraft and build production jets simultaneously—raises the total cost of these first 28 jets by just over \$1 billion to a new estimate now of about \$8.1 billion. That's a 15 percent cost increase for the first three lots of production aircraft. In April, the Government Accountability Office (GAO) projected as of last June that the total cost of development and procurement for the F-35 program would be about \$383 billion. DOD's latest estimate of the sustainment cost for the F-35 over its projected life span is an unaffordable \$1 trillion. In my view, even without 15 percent cost overruns, these costs are unsustainable in this fiscal environment. How can these costs be reduced?

General DEMPSEY. My understanding is that the Department's plan to reduce production costs includes continued use of fixed price contracts and applying aggressive "Should Cost" analysis in our negotiations. This will limit the Department's liability for future cost growth, incentivize the contractor to control costs, and enable low rate initial production negotiations to result in the lowest price achievable. The approach to drive down operations and sustainment (O&S) costs focuses on reducing costs associated with Depot Level Repairables and implementation of cost reduction initiatives being developed in the Affordability Management Plan (AMP).

15. Senator MCCAIN. General Dempsey, does DOD have a "Plan B" if the costs of the F-35 cannot be significantly reduced?

General DEMPSEY. The Department's focus for the F-35 is cost reduction and fielding an affordable 5th generation aircraft. Even as we do so, we will continue to assess ways to meet warfighter needs and our security objectives within the realities of today's fiscal environment.

16. Senator MCCAIN. General Dempsey, what would you do as Chairman to ensure that a program as expensive as the F-35 does not siphon away resources from other defense priorities?

General DEMPSEY. I am committed to ensuring a balanced approach to defense priorities with regard to current operations and future capability requirements. As part of the ongoing comprehensive review, and institutionally through the Joint Requirements Oversight Council and other processes, I will work to ensure that we balance and align our resources to the highest defense priorities.

17. Senator MCCAIN. General Dempsey, we also recently learned from various media reports that the Air Force and Boeing are now expecting that the first four development aircraft for the replacement aerial refueling tanker, the KC-46A, are estimated to cost between \$1 billion to \$1.3 billion more than the contract's target cost. I'm particularly concerned that the taxpayers' share of that first \$1 billion over target cost is 60 percent, or \$600 million. Can you explain how it is that we contract for something using what is supposed to be a fixed price type contract, but before the metal is bent on the first aircraft the taxpayers are told they will face a bill for \$600 million over the target cost?

General DEMPSEY. My understanding is that the KC-46A tanker is a Fixed Price Incentive Firm contract with a ceiling price of \$4.9 billion. The intent is to get the best value for the taxpayer. Boeing acknowledges that its current cost estimate is \$5.2 billion, \$300 million more than the contract ceiling price. Boeing absorbs this cost under the contract.

18. Senator MCCAIN. General Dempsey, when you tell the American people and Congress that the target cost for a program is a certain amount, what does that mean?

General DEMPSEY. Generally, the target price is included in contracts as an element of the incentive structure. As the contractor reduces cost from the ceiling price to the target price, the contractor's profit increases with the government getting a share of the cost savings.

19. Senator MCCAIN. General Dempsey, according to media reports citing Boeing and DOD sources, the current estimated cost of this first development contract is \$4.9 billion to \$5.2 billion. The target cost of the contract was \$3.9 billion. When the contract was announced, the official DOD press release, dated February 24, 2011, described the contract value as being "more than \$3.5 billion". Can you explain why a contract value that was announced as \$3.5 billion has now swelled to as much as \$5.2 billion in 5 months?

General DEMPSEY. It is my understanding that the contract includes both a ceiling price and a target price. The ceiling price of \$4.9 billion represents the maximum government liability for the development of the KC-46A. Any additional costs associated with developing the KC-46A will be borne by Boeing. The announced value reflected a best case should Boeing maximize incentives contained in the contract.

20. Senator MCCAIN. General Dempsey, if confirmed, what will you do as Chairman to ensure that Congress and the American people are not asked to pay huge cost overruns on defense programs that are simply not affordable?

General DEMPSEY. When I assume the office of Chairman, I will work with other Department officials to improve affordability early in the development of new joint capabilities. I will be attentive to requirements overreach or pursuit of insufficiently mature technologies without compromising innovation. Overruns will also be addressed with the Joint Requirements Oversight Council's trip-wire process. Through this process and others, we will continue to examine performance trades to mitigate cost growth and schedules delays, advise the Nunn-McCurdy certification process, and participate in Configuration Steering Boards and the Defense Acquisition Board.

AFGHANISTAN

21. Senator MCCAIN. General Dempsey, Admiral Mullen viewed the President's timetable to take the surge forces out of Afghanistan as more aggressive and incur-

ring more risk than he was originally prepared to accept. What will be the impact of this troop withdrawal on our ability to keep the Taliban on its heels and protect the population?

General DEMPSEY. As we recover the surge force, we will continue to maintain the pressure on the Taliban while simultaneously protecting the population. The surge force allowed us to reverse Taliban momentum, and to that end we have been largely successful, particularly in key districts that were once Taliban safe havens. Concurrent to these operations, we have steadily built Afghan National Security Forces (ANSF) capacity and capability to the point where we are now confident that they are increasingly able to take the lead in security in many areas.

22. Senator MCCAIN. General Dempsey, what are the goals in the year ahead to continue to reduce the influence and resiliency of the Taliban?

General DEMPSEY. Our comprehensive civil-military strategy in Afghanistan will sustain pressure on the Taliban while expanding security for the populace. We will do this through coalition military operations and increasingly through partnered and independent operations by ANSF. Concurrently, we will help grow the Afghan capacity for governance and security as we transition full security responsibility by the end of 2014.

23. Senator MCCAIN. General Dempsey, are you aware of any military leader who recommended the withdrawal strategy the President adopted?

General DEMPSEY. When the President announced the troop surge in December 2009, he also stated that these additional forces would begin to come home within 18 months. Those 18 months have elapsed and, true to his word, the President has made the decision to begin withdrawal of our surge forces beginning in July 2011 to be completed by summer of 2012. It is my understanding that the withdrawal strategy announced by the President was “within the range of options” that military leaders presented. After the recovery of the surge force, there will be 68,000 U.S. troops in Afghanistan.

IRAQ

24. Senator MCCAIN. General Dempsey, what do you consider to be the “point of no return” for the Maliki Government to request the continued presence of U.S. troops to assist in their efforts to defeat al Qaeda and provide a national defense?

General DEMPSEY. On 2 August 2011, Prime Minister Maliki received approval from the Iraqi Council of Representatives to begin negotiations with the United States for a continued U.S. presence after 2011. This important step by the Government of Iraq signifies their desire to maintain an enduring strategic relationship with us. As we continue to draw down our forces, the ability to support an Iraqi request for a continued U.S. presence becomes increasingly problematic, especially after 30 September 2011.

HOLLOW FORCE

25. Senator MCCAIN. General Dempsey, how would you define a hollow force?

General DEMPSEY. While there is no consensus definition, the hollow force construct is useful for thinking about what we must avoid as we shape the future Joint Force. Generally, something hollow appears to have characteristics or capabilities that, in fact, it lacks. Essentially, a hollow force disproportionately retains force and organizational structure at the expense of proper training and fully functional equipment. This creates the illusion of readiness for the full range of military operations.

26. Senator MCCAIN. General Dempsey, if confirmed, what data or signs would you look for to determine if we are trending towards a hollow force?

General DEMPSEY. Given the broad meaning often ascribed to what constitutes a “hollow force”, we should focus on general trends across multiple indicators. This will best enable us to assess our ability to meet the military objectives outlined in national security strategies. Examples of relevant indicators include dwell time, unit readiness, and recruitment and retention rates. I will also be focused on the overall health of the force to include trends in personal and family data like divorce rates and suicide.

27. Senator MCCAIN. General Dempsey, in your opinion, do the Military Services have adequate benchmarks or other measuring criteria to determine how levels of funding affect overall readiness?

General DEMPSEY. It is my understanding that each of the Military Services use costing models to estimate funding for required levels of readiness, including support of OCOs. Their estimates are based on adequate readiness metrics such as system miles, steaming hours, or flying hours. The Services then report readiness through the Defense Readiness Reporting System. The Joint Staff then evaluates readiness across the Joint Force through the Chairman's Readiness System.

28. Senator MCCAIN. General Dempsey, if confirmed, do you have confidence you will be able to tell the Secretary of Defense or the President that defense cuts above a certain level raise the risk of a hollow force?

General DEMPSEY. I am confident that I will be able to define both strategic and institutional risk.

YEMEN

29. Senator MCCAIN. General Dempsey, is al Qaeda in the Arabian Peninsula (AQAP) in a stronger position to plan and launch an attack against the United States or our allies given the sustained political and security unrest in Yemen?

General DEMPSEY. It seems clear that AQAP is attempting to exploit the political unrest in Yemen to strengthen its position. It is also clear that AQAP retains aspirations to plan and launch a transnational attack against us or our allies.

SOMALIA

30. Senator MCCAIN. General Dempsey, General Carter Ham, Commander of U.S. Africa Command (AFRICOM), has stated that al Qaeda and its affiliates in East Africa—to include al Shabaab—have experienced a “dramatic increase” in their influence in the region. In response to advance policy questions posed by the committee, you stated that al Shabaab has the capability to plan attacks against the United States and Western interests and that the group's efforts to recruit U.S. persons increases the threat to the U.S. Homeland. Do you agree with General Ham's assessment?

General DEMPSEY. I do. Al Shabaab has increased its influence in East Africa by merging with like-minded Islamic groups and establishing Islamic administrations southern districts of Somalia. Despite their recently reported withdrawal from Mogadishu, I do not consider the threat they pose has diminished.

31. Senator MCCAIN. General Dempsey, what is your understanding of the extent of al Shabaab's efforts to recruit U.S. and Western citizens for terrorist activity?

General DEMPSEY. To my understanding, it is likely that over 40 Americans have traveled to Somalia to join al Shabaab. A majority of these U.S. persons are ethnic Somalis who have joined al Shabaab for nationalistic reasons. Additionally, al Shabaab supporters in the United States have been known to conduct recruiting and fundraising activities within their communities.

32. Senator MCCAIN. General Dempsey, what is the role of DOD in combating these recruitment efforts?

General DEMPSEY. It is my understanding that DOD supports efforts to identify, disrupt, and disable extremist networks that drive al Shabaab's recruiting. We support all interagency actions against extremist networks by applying unique military capabilities consistent with our legal authorities. We should take all legal means possible to disrupt the recruitment of extremists into the al Shabaab network.

33. Senator MCCAIN. General Dempsey, to what extent does al Shabaab coordinate with al Qaeda?

General DEMPSEY. Al-Shabaab first publicly aligned itself with al Qaeda leaders in Pakistan in 2008. In 2010, al Shabaab declared its loyalty to al Qaeda with the release of a video called “At Your Service, O Usama.” More recently, al Shabaab pledged to follow the new al Qaeda leader Ayman Zawahiri following bin Laden's death. There is also reason to conclude that al Shabaab has established a foreign fighter training program in Somalia, and portrayed itself as playing a role in the international jihad.

MEXICO

34. Senator MCCAIN. General Dempsey, what is your assessment of the security situation in Mexico?

General DEMPSEY. I am concerned about violence in Mexico and how it affects our security. Violent Transnational Criminal Organizations threaten innocent civilians, the Government of Mexico, and the United States. The Mexican security forces face a well-armed and financed adversary with regional, if not global reach. The people and Government of Mexico, including their security forces, are to be admired for their resilience and determination in confronting this threat. Our increasingly strong partnership with Mexico is one way we are sharing in the responsibility to address this dynamic security challenge.

35. Senator MCCAIN. General Dempsey, in what ways can DOD expand its support to President Calderon and his government to combat the cartels and other transnational criminal organizations operating in Mexico and throughout the region?

General DEMPSEY. The scope and depth of our military-to-military relationship with Mexico has grown as part of the overall U.S. Government approach for assisting the Government of Mexico against these criminal organizations. As we further strengthen our relationship with Mexico, we will continue to respect their sovereignty and provide the assistance we can in response to their requests. Among other initiatives, we should continue with subject matter expert exchanges, exercises, and the sharing of information and lessons learned. The sharing of information and intelligence, where appropriate, is particularly valuable as a way to enable operations against these threats to our mutual security.

NUCLEAR TRIAD

36. Senator MCCAIN. General Dempsey, earlier this month, General Cartwright suggested that DOD must re-examine the future role of each leg of the nuclear triad—bomber aircraft, intercontinental ballistic missiles (ICBM), and submarine-launched missiles—so that desired capabilities and quantities are maintained, rather than determined by budget-cutting drills. General Cartwright told reporters that “nothing is off the table” as DOD looks to cut at least \$400 billion from the budget through fiscal year 2023. Do you agree with General Cartwright’s statement?

General DEMPSEY. As we shape the future Joint Force, our assessment should include consideration of what is required for an effective, reliable nuclear deterrent. It is my understanding that includes examining how the nuclear triad might be adapted to the security environment and our national security strategy. As Chairman, I will remain committed to a safe, secure, and effective nuclear force at levels that maintain strategic deterrence and stability vis-à-vis Russia and China, strengthens regional deterrence, and reassures U.S. allies and partners.

37. Senator MCCAIN. General Dempsey, the administration has identified over \$120 billion over the next 10 years for the sustainment and modernization of the triad. Much of that funding is dedicated to the development and procurement of our next-generation ballistic missile submarine and bombers. One of the biggest unanswered questions is the future of the ICBM force, which will need to be replaced by 2030. Do you believe it is essential to sustain the nuclear triad and commit the resources to fulfill the recapitalization of each leg? If not, do you believe it is in our strategic interest to forgo one or more legs of the triad?

General DEMPSEY. I believe we must sustain and modernize a safe, secure, and effective nuclear deterrent that is also affordable. I also believe we must do this in a manner that maintains strategic deterrence and stability, strengthens regional deterrence, and assures our allies and partners. To this end, I am supportive of the conclusions of the 2010 Nuclear Posture Review (NPR) Report, which stated that the U.S. nuclear Triad of ICBMs, SLBMs, and nuclear-capable heavy bombers will be maintained under the New Start treaty. When Chairman, the Joint Staff will continue to assess what is required for an effective nuclear deterrent as part of a future Joint Force.

CYBER SECURITY

38. Senator MCCAIN. General Dempsey, after the release of the DOD cyber strategy last week, General Cartwright, the Vice Chairman of the Joint Chiefs of Staff, stated that DOD is spending 90 percent of its time playing defense against cyber-

attacks and 10 percent playing offense and that DOD should invert this defense-offense ratio to assert that there will be consequences to a cyber-attack against the United States. Do you agree with General Cartwright's statements?

General DEMPSEY. Consistent with my support of the Department's Strategy for Operating in Cyberspace, I agree that we need to ensure our adversaries understand there are consequences to a cyber-attack against the United States. To this end, the Department must strike a balance between offensive and defensive cyber capabilities and capacity. We should do this while continuing our deterrent posture and collaborating with our interagency and international partners to enhance our cyber security posture. We should continue to examine offensive capabilities and the policies required to enable their appropriate use.

39. Senator MCCAIN. General Dempsey, what do you view as the appropriate direction DOD should be headed with respect to cyber strategy?

General DEMPSEY. The recently released DOD Strategy for Operating in Cyberspace provides the foundation for our cyber strategy. I endorse its overall objectives and strategic initiatives. Moreover, it clearly prioritizes reducing our own vulnerabilities as essential to execute this new strategy.

40. Senator MCCAIN. General Dempsey, do you view this as a matter of urgency?

General DEMPSEY. Yes. As the recently released DOD Strategy for Operating in Cyberspace articulates, the Department and the Nation have vulnerabilities in cyberspace. The continuing growth of networked systems, devices, and platforms means that cyberspace is an integral part of an increasing number of capabilities upon which DOD relies to complete its missions. We must leverage the opportunities cyberspace presents to advance our capabilities and national security objectives.

FURTHER NUCLEAR REDUCTIONS

41. Senator MCCAIN. General Dempsey, recent statements by the President's National Security Advisor have prompted new questions regarding the administration's intent to pursue additional reductions. In his speech before the Carnegie Endowment, National Security Advisor Thomas Donilon stated that the administration is currently "making preparations for the next round of nuclear reductions" and that DOD will be directed to "review our strategic requirements and develop options for further reductions in our current nuclear stockpile." Donilon continued by stating that in meeting these objectives, the White House will direct DOD to consider "potential changes in targeting requirements and alert postures."

The New START Treaty entered into force only 5 months ago. Do you believe it is prudent for the United States to pursue further reductions? If so, why?

General DEMPSEY. I believe the United States should carefully consider the implications of future reductions in the numbers of nuclear weapons. As Chairman, I will continue to assess the proper force size and capabilities required for an effective nuclear deterrent. Any potential reductions should consider the full range of potential threats and continue to support U.S. commitments to stability, deterrence, and assurance.

42. Senator MCCAIN. General Dempsey, what conditions in your opinion must exist for the additional near-term reductions; do you believe it would require a fundamental shift in the geopolitical environment?

General DEMPSEY. Any future reductions must continue to strengthen deterrence of potential regional adversaries, enhance strategic stability as it relates to Russia and China, and assure our allies and partners. In my judgment, the size and composition of Russia's nuclear forces will remain a significant factor in determining how much and how fast we are prepared to reduce our nuclear forces. As we engage Russia and China in strategic dialogue, we will continue to assess the proper force size and capabilities required for an effective nuclear deterrent.

43. Senator MCCAIN. General Dempsey, focusing on the reckless ambitions of North Korea and Iran and the fact that every current nuclear weapons state is currently modernizing its nuclear arsenals, do you agree that any reductions to the size and scope of the stockpile should be multilateral and involve not only other nuclear powers but also in serious consultation with our key non-nuclear allies dependent on U.S. nuclear forces?

General DEMPSEY. We will continue, and expand as appropriate, consultations with nuclear and non-nuclear allies and partners to address how to ensure the credibility and effectiveness of the U.S. nuclear deterrent.

44. Senator MCCAIN. General Dempsey, during our committee's hearings on the New START treaty, General Chilton, the former Commander of U.S. Strategic Command, testified that the force level under the New START Treaty (1,550 warheads on 700 deployed delivery vehicles) was "exactly what is needed today to provide the deterrent." We received extensive briefings from General Chilton and other senior DOD officials during consideration of the treaty last year. Do you agree with General Chilton's assessment? If so, do you believe that the global threat environment has changed in any way since General Chilton made these comments to merit a near-term reduction in the size or scope of our nuclear deterrent?

General DEMPSEY. The U.S. nuclear strategy and force structure continually evolves with the global strategic environment. Going forward, and as part of the Nuclear Posture Review Report follow-on analysis, we will continue to evaluate changes to the environment that might impact on our force structure. We are committed to sustaining and modernizing a safe, secure and effective nuclear deterrent in an efficient and cost effective manner.

RESEARCH AND DEVELOPMENT

45. Senator MCCAIN. General Dempsey, in the current fiscal environment, some in Congress have suggested that funding for research and development (R&D) within the Services and for defense-wide agencies should be dramatically reduced to find savings. Do you agree that R&D funding should be cut? If so, please explain. If not, please explain why you disagree and outline what you see as a path forward for R&D funding, particularly with regard to the fiscal situation.

General DEMPSEY. A balanced approach is needed that considers today's operational commitments and tomorrow's anticipated threats within fiscal constraints. We should be cautious about cuts from any account, including R&D. The ongoing comprehensive review will develop guidelines and recommendations on our path forward for R&D funding.

46. Senator MCCAIN. General Dempsey, if you had to make cuts to R&D lines, what would you consider a responsible budget reduction?

General DEMPSEY. My expectation is that the Department's ongoing comprehensive review will provide guidelines and recommendations on responsible budget reductions given today's fiscal realities.

47. Senator MCCAIN. General Dempsey, what criteria would you use to determine what R&D programs should be cut?

General DEMPSEY. The Department's ongoing comprehensive review will provide guidelines and recommendations on responsible budget reductions. This review will take into account our need to protect our core national security interests and provide a set of defense programs that will meet the threats present today and anticipated tomorrow. Within this review, heavy scrutiny will be applied to those programs that are not meeting cost, schedule, and requirements goals.

QUESTIONS SUBMITTED BY SENATOR JAMES M. INHOFE

BOYCOTTS OF CERTAIN U.S. DEFENSE CONTRACTORS

48. Senator INHOFE. General Dempsey, in recent years, global activists, foreign business enterprises, and certain governments have demonstrated an increased willingness to advance de facto foreign boycotts on contractors and subcontractors of DOD that provide certain products to DOD. If successful, such actions would not only harm the U.S. defense industrial base, but also impede the military strategy and tactics of our Armed Forces and allies in regions where our forces are deployed or our interests are at stake.

Such endeavors include a recent effort to classify the Sensor Fuzed Weapon (SFW) as a prohibited weapon under the terms of the Convention on Cluster Munitions (CCM), and ongoing attempts today to pressure investors and suppliers to terminate their relationships with U.S. manufacturers that provide key SFW components to DOD. Meanwhile, similar but less reliable weapons possessed by other governments are permitted for use under the CCM.

The motivations and efforts of those now seeking to enforce the CCM—which was forged outside recognized international bodies—contrast sharply with ongoing efforts by our Government and others to address the true humanitarian impact of cluster munitions while recognizing the SFW's enduring and critical importance to

our military strategy on the Korean Peninsula, Persian Gulf, and other sensitive regions.

I understand that in the coming weeks U.S. diplomats will have an important opportunity to advance a responsible course of action with regard to cluster munitions during preparations for a review of the United Nations (UN) Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons (CCW). Given the potential negative impact of the CCM on the SFW, its role in our military strategy, the defense industrial base, and foreign military sales to allies in key regions, what actions will you take to support and reinforce U.S. diplomatic efforts to achieve tangible progress on an alternative agreement under the auspices of the CCW?

General DEMPSEY. We are not a party to the Convention on Cluster Munitions (CCM or Oslo Treaty); however, we are participating in ongoing negotiations to develop a comprehensive and binding Convention on Certain Conventional Weapons (CCW). We intend for this protocol to align with DOD policy on the use, transfer, stockpile, and destruction of cluster munitions. The CCW protocol under negotiation addresses the legitimate military need to maintain stocks of cluster munitions for national security and defense purposes while reducing the risk of unintended harm to civilians. When Chairman, I will ensure that the Joint Staff fully supports the DOD policy and negotiations to conclude a CCW protocol.

GLOBAL SECURITY CONTINGENCY FUND

49. Senator INHOFE. General Dempsey, our military-to-military (1206), civilian-to-civilian (1207), small-scale Special Forces (1208), Commander's Emergency Response Program (CERP), and Combatant Commander's Initiative Fund (CCIF) have been incredibly successful in aiding developing nations, fighting terrorism, and providing resources for emergency situations. Now the Global Security Contingency Fund, which would be authorized under this committee's version of the National Defense Authorization Act for Fiscal Year 2012, would supply the Department of State (DOS) with authority to use a \$300 million fund drawn from authorities like section 1206 to bolster the security of our allies. My belief is that the key to these programs has been the combined efforts of both DOD and DOS ... Chiefs of Mission and combatant commanders working together to increase the capabilities of our partner nations to provide for their own security, increasing stability in their region and around the globe. What value do these funds provide our warfighters?

General DEMPSEY. The programs you mention are highly valuable to our ability to respond to emergent challenges and opportunities. The provision of timely assistance can help promote stability, combat terrorism, enable partners, and respond to urgent humanitarian relief and reconstruction requirements. Capable partner nations reduce the need for U.S. forces while enhancing security. To this end, the Global Security Contingency Fund makes DOD and DOS collaboration the norm in order to ensure our security assistance programs are as effective as possible. Funding is required from both DOD and DOS, and expenditure of funds requires consultation and concurrence from both departments.

50. Senator INHOFE. General Dempsey, what is the future of the partnership between DOD and DOS when it comes to foreign security assistance?

General DEMPSEY. DOD's relationship with DOS is certain to remain strong on multiple fronts to include our collaboration on security assistance. The proposed Global Security Contingency Fund is just one example of how we can increase cooperation in the delivery of security sector assistance. As Chairman, I will continue to seek ways to strengthen our partnership with DOS and others to ensure a whole-of-government approach.

TRAUMATIC BRAIN INJURY

51. Senator INHOFE. General Dempsey, traumatic brain injury (TBI) continues to be one of the most prevalent wounds from operations in Iraq and Afghanistan. The ability to diagnose and treat TBI continues to be problematic despite the priority Congress and the Army have given to this wound. I remain concerned that we are not adequately screening our soldiers prior to deployment and when they return. Once diagnosed with TBI, we need to be able to treat our wounded warrior and ensure that treatment is continued as long as needed, to include transition to Department of Veterans Affairs (VA) care. Various alternative treatments for TBI may have promise and are used in the private sector but few of these treatments have been approved for use by Army soldiers. In a report by National Public Radio (NPR), General Chiarelli expressed frustration about the pace of the vetting of these treat-

ments. Are you satisfied with the pace with respect to identify TBI and treatment to include alternative treatments?

General DEMPSEY. I share General Chiarelli's sense of urgency to find effective solutions to these problems. I am committed to ensuring early detection of concussion and finding state of the science treatments for wounded warriors with TBI. To my knowledge, we are fast tracking any available treatment strategies that have proven to be safe and effective to our military members. There is considerable work occurring in the civilian academic, industry and VA medical research communities. We are working very closely with our civilian counterparts to vet the outcomes of these studies, and when the clinical results become available, quickly transition treatment protocols to our wounded military.

52. Senator INHOFE. General Dempsey, what frictions are delaying the vetting of alternative treatments?

General DEMPSEY. I am committed to fielding alternative treatments to our wounded warriors as quickly as possible. In doing so, we have a responsibility to make sure that any treatment alternatives have been tested and found to be safe and effective. Good research to determine the clinical effectiveness of any treatment is both time and resource intensive. There are also clinical issues which cloud the blanket adoption of civilian research findings. For example, post-traumatic stress and chronic pain are not seen with such frequency in the civilian sector. However, we are engaged with our civilian counterparts in an effort to appropriately adopt alternative treatment strategies for the care of our wounded warriors.

53. Senator INHOFE. General Dempsey, what can we do to speed up the process of the vetting better ways of diagnosing and treating TBI?

General DEMPSEY. We have made tremendous progress, but we must continuously seek ways to improve the process. For example, it is my understanding that we are undertaking a comprehensive review of over 400 studies on TBI. In-process reviews are conducted on each of the topics, which allow a deep dive analysis of specific treatment strategies. This year, for example, we have reviewed new studies on neuroimaging, non-invasive diagnostics in mild TBI, blast brain research, and biomarker findings. This review process allows us to quickly assess what strategies work and just as important, what strategies do not work.

54. Senator INHOFE. General Dempsey, what types of equipment solutions are being developed, procured, and fielded to help prevent, measure, and identify TBI?

General DEMPSEY. We have developed a program to evaluate and field devices and equipment that can aid in the prevention, identification, and assessment of TBI. Among many others are a portable electroencephalogram (EEG) for battlefield use and an eye tracking device to assess attention/concentration deficits. In addition, we are working with the materiel community to improve helmet design to help mitigate blast effects and prevent head injuries. As Chairman, I will support efforts to aggressively identify, evaluate, and disseminate best practices, equipment, and programs for our wounded warriors with TBI.

QUESTIONS SUBMITTED BY SENATOR ROGER F. WICKER

KIOWA WARRIOR HELICOPTER

55. Senator WICKER. General Dempsey, it worries me that a series of upgrades to extend the service life of the legacy Kiowa Warrior helicopter appear to be conveniently organized into individual programs that will escape the rigor and oversight required under ACAT-1D programs. Can you assure me that, if confirmed, you will exercise your responsibilities as Chairman of the Joint Requirements Oversight Council to personally look into this issue and make sure the Army is on a path that will get the best value from our investment?

General DEMPSEY. As Chairman, you can be assured that the Joint Requirements Oversight Council will ensure the appropriate cost and capability trades are being made to deliver the best value to the Department.

56. Senator WICKER. General Dempsey, I am aware that the Analysis of Alternatives (AOA) for this program is complete, yet we have not been briefed on the results. Would you please provide me with the results of the AOA and what the acquisition plan is for replacing the legacy scout fleet with a modern capability?

General DEMPSEY. Although the Analysis of Alternatives for the Armed Aerial Scout is complete, the final report is still in development. To date, the analytical

results were briefed to the Joint Senior Advisory Group and to the Vice Chief of Staff of the Army. The Army is currently assessing the path forward for the Armed Aerial Scout given the new fiscal environment. As Chairman, I look forward to working with this committee to ensure we are developing an affordable future Joint Force.

ALTERNATIVE ARMED SCOUT

57. Senator WICKER. General Dempsey, will you assure me that the Alternative Armed Scout program will include competition as a fundamental element of the procurement strategy?

General DEMPSEY. Should the Army decide to pursue a new solution to fulfill the requirements of the Armed Aerial Scout, I will advocate for a competitive process consistent with current acquisition policies to derive the best value for the U.S. taxpayer.

FOREIGN LANGUAGE AND CULTURE TRAINING

58. Senator WICKER. General Dempsey, I am a strong proponent of foreign language and cultural training at the military academies and for Reserve Officers' Training Corps (ROTC) cadets and midshipmen. To date these efforts have been limited to a few institutions, for example, the University of Mississippi. To what extent do you believe that education and training in foreign languages and cultures are important in preparing the next generations of military officers, and how would you use the chairmanship of the Joint Chiefs of Staff to further this agenda?

General DEMPSEY. Our future officers will operate in a global environment where national security interests are inextricably linked to the greater international community. Knowledge of foreign languages and culture is essential to building partnerships and multilateral operations. As Chairman, I will work with the Joint Chiefs of Staff and through our joint officer development programs to optimize foreign language and cultural training and education. I will also support DOD efforts authorized under Section 529 of the 2010 National Defense Authorization Act to establish Language Training Centers at accredited universities to accelerate the development of expertise in critical and strategic languages.

QUESTIONS SUBMITTED BY SENATOR SCOTT P. BROWN

2013 FIGHTING SEASON

59. Senator BROWN. General Dempsey, in light of the debate regarding the significance of a missed fighting season in the summer of 2013 due to the President's proposal to withdraw 33,000 troops by the end of next August, does a summer 2013 fighting season matter?

General DEMPSEY. The 2013 summer season does matter. Our ability to maintain pressure on the Taliban will be sustained as the surge force is withdrawn. Even as we reduce forces, the ANSF are gaining in capacity and capability. In addition, Afghan special forces and their coalition partnered forces will continue to degrade Taliban mid- and senior leadership by capturing or killing them wherever they operate in Afghanistan.

AFGHAN CONTRACT FRAUD

60. Senator BROWN. General Dempsey, according to yesterday's Washington Post, a year-long investigation conducted by the U.S. military uncovered definitive evidence that taxpayers' money intended to fund a \$2.16 billion transportation contract in Afghanistan ended up in the hands of the Taliban through fraud, kickbacks, and money laundering. Another report released last week by the Special Inspector General for Afghanistan Reconstruction found that U.S. agencies still have limited visibility over the circulation of these funds, leaving them vulnerable to fraud, waste, or diversion to insurgents. Can you comment on this and tell me how we can lower the risk involved with our reliance on contractor support?

General DEMPSEY. Contractors provide critical logistical and services support to operations in Afghanistan. The use of local national contractors is integral to our civil-military campaign. Despite the capabilities enabled by contractors, corruption remains a challenge. In light of several investigative reports, DOD and U.S. Central Command established several task forces to address contracting accountability and

institute mechanisms to enhance performance monitoring. Additionally, our management of contractors on the battlefield evolved from an initial approach toward pro-active theater-wide management. Together, these broad initiatives—and many others—are improving the way we use contractor support. But clearly more needs to be done.

EMPLOYMENT OF VETERANS

61. Senator BROWN. General Dempsey, last June, 13.3 percent of veterans were unemployed—4 percent higher than the national average, which means approximately 260,000 people in real numbers are out of work. You noted that one area where we can improve is individual case management when a servicemember transitions from the Active Force to veteran status. Can you comment on the ways in which DOD and the VA are collaborating to improve the transition of wounded warriors and their families into the VA system, particularly when it comes to employment?

General DEMPSEY. To strengthen and improve transition of service men to civilian life, DOD is working with the Veterans Administration (VA) and the Department of Labor (DOL) to re-engineer, redesign, and transform the current program in a way that will better meet the needs of servicemembers and their families. The enhanced Transition Assistance Program (TAP) is a collaborative effort where each agency will improve its component of TAP through a number of initiatives to include leveraging technology and improving curriculum, staffing, and training. We are also developing ways to make information accessible 24/7. DOD is also collaborating with the VA, DOL, and the Office of Personnel Management on an Education and Employment Initiative (E2I) to address employment concerns. The goal of the E2I pilot is to engage servicemembers early in their recovery to identify skills they have, the skills they need, and the employment opportunities to which those skills can be matched.

62. Senator BROWN. General Dempsey, I continue to hear from veterans who—despite their technical expertise, leadership skills, and military experience—feel as though they are ultimately disqualified for civilian positions due to a lack of civilian equivalent certifications. I hear it over and over again. They're told while on Active Duty that their veteran status and military experience will put them ahead of their civilian peers when they transition out of the military simply because they've proven themselves as reliable leaders. Unfortunately, this is not always the case. Is DOD working on a system to help servicemembers translate their military-specific skills and vocational expertise to the civilian sector?

General DEMPSEY. I am absolutely convinced that our servicemembers possess valuable skills that should translate well to the civilian sector. To my knowledge, there are many initiatives underway. For example, servicemembers can go to Career One Stop to find information on exploring careers, salary and benefits, education and training, resume and interviews, and licensure and certification (<http://www.careeronestop.org>). The Workforce Credentials Information Center provides a wealth of licensure and certification information. The member can also access the Occupational Information Network called O*NET (www.onlineonetcenter.org). O*NET helps the servicemember to crosswalk his or her Military Occupational Code and the civilian equivalency of that code, linking the member to the Standard Occupational Classifications in the civilian workforce. These tools will help, but they are just part of what must be a more comprehensive solution. As Chairman, I will continue to collaborate with our partners in the DOL to address this critical issue.

SUICIDES

63. Senator BROWN. General Dempsey, in 2010 alone, there were 468 suicides throughout the military. It's estimated that between 2005 and 2009, one servicemember committed suicide every 36 hours. More men and women committed suicide in 2010 than died in combat. Do you agree that the military is facing a suicide epidemic, and what are we doing about it?

General DEMPSEY. I remain deeply concerned about the suicide rate among servicemembers. As Chairman, I will support the action plan resulting from the 2010 DOD Task Force Report on Prevention of Suicide. The plan will address the 13 foundational and 76 targeted recommendations in the report. It is my understanding that DOD intends to update Congress once the plan is implemented this fall. In my judgment, expeditious implementation and resourcing of these rec-

ommendations will go a long way to ensuring that our servicemembers' and families' psychological health and mental health issues are addressed.

QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

DEPLOYMENT CYCLE SUPPORT PROGRAM

64. Senator AYOTTE. General Dempsey, the New Hampshire National Guard has developed the Deployment Cycle Support Program (DCSP) to help prepare and support servicemembers and their families during the full cycle of mobilization, deployment, and reintegration. It is a cost-effective public-private partnership between the New Hampshire National Guard, New Hampshire Department of Health and Human Services, Easter Seals, and civilian and veteran service organizations. The DCSP combines public funding and private resources to establish an integrated, sustainable, and fiscally-responsible service delivery framework that delivers measured results. The National Guard has found that military members involved in DCSP are eight times more likely to be treated for previously untreated mental health issues, four times more likely to stay married, four times more likely to stay in the military, and five times less likely to be homeless. The program also provides licensed support to all servicemembers and their families considered at risk for suicide.

Once you are confirmed, do you commit to work with me and Congress to support and learn from best practices for this important program in order to ensure all servicemembers and their families—especially those in the Reserve component who are often far from bases and established support networks—have access to the quality, full-cycle support they deserve and that our Nation's military readiness demands?

General DEMPSEY. One of my highest priorities is the care of our servicemembers and their families. We need to confront these challenges through innovative government and private sector partnerships like the Deployment Cycle Support Program. Such initiatives will become more valuable in a fiscally constrained environment. They clearly enable us to attend to the unique challenges faced by our community-based and geographically-dispersed Reserve components. I am committed to working closely with Congress, our Service Chiefs, Federal partners like the Department of Veterans Affairs, and State, local, and private organizations to leverage best practices like the ones you highlight.

MEDIUM EXTENDED AIR DEFENSE SYSTEM

65. Senator AYOTTE. General Dempsey, I am concerned about the DOD problems in recent years in the area of procurement. One of the more recent failures is that of the Medium Extended Air Defense System (MEADS). After the investment of \$1.5 billion of taxpayer money, DOD concluded earlier this year that the program remains a high risk for both cost and schedule. Despite these cost and schedule failures, DOD decided to not terminate the program because the Memorandum of Understanding on which the program is based commits the United States to continued funding up to an agreed cost even if the United States withdraws from the program. As a result, DOD has requested \$804 million over fiscal years 2012 to 2013 for the continued development of a system it has no intention of fielding due to technical challenges, cost overruns, and schedule delays. What is your assessment of the MEADS?

General DEMPSEY. It is my understanding that the Department's options are constrained by a 2004 MEADS agreement with our German and Italian partners. Funding MEADS up to the existing ceiling established in the Memorandum of Understanding (MoU) enables all partners to harvest technology and proven concepts from investments thus far. This would also place the development on sufficiently stable footing to support Germany and Italy in continued MEADS development and production after the MoU funding is expended. It would also provide the same options to us should our air defense plans change.

66. Senator AYOTTE. General Dempsey, do you believe it makes sense to spend \$804 million over the next 2 fiscal years on a program we are not going to field?

General DEMPSEY. In light of the Memorandum of Understanding (MoU) with our German and Italian partners, and based on extensive analysis and deliberations, our best option is to complete the lower cost restructured Proof of Concept effort. This will enable the Department and our MEADS partners to harvest technology from our work to date. Additionally, it places the program on stable footing to support Germany and Italy in their plans to continue MEADS while honoring the MoU.

It would provide options to the United States should our air defense plans change. The Department is committed to maximizing the return on remaining funds and prior investments.

67. Senator AYOTTE. General Dempsey, do you believe we should push our allies to work with us to limit our financial obligation and terminate this program multilaterally?

General DEMPSEY. The Department's senior leadership has explored mutual termination with Italy and Germany, and our partners have clearly stated they have no interest in pursuing this course of action. The German National Armaments Director continues to express German support for the program and has recently restated their plans to field MEADS after a successful Proof of Concept effort. Our Italian partners have also confirmed their continued commitment. Faced with these facts, a multilateral withdrawal is not an option, and the United States would be forced to execute a unilateral withdrawal from the program. A unilateral U.S. withdrawal from the program would entail significant termination costs for the United States.

68. Senator AYOTTE. General Dempsey, how can we work together to avoid procurement failures like this in the future?

General DEMPSEY. As Chairman, I look forward to working with Congress and this committee to mitigate program risk and maximize program success rates. Development and procurement of new weapons systems must be carefully assessed to ensure funds are spent wisely. For my part, I will ensure that the Joint Requirements Oversight Council sustains a robust requirements validation process and closely monitors cost growth through the trip-wire process. Participation in Configuration Steering Boards will further shape affordable solutions for the Joint Force.

QUESTIONS SUBMITTED BY SENATOR SUSAN M. COLLINS

FORT HOOD ATTACK

69. Senator COLLINS. General Dempsey, as ranking member of the Senate Homeland Security and Governmental Affairs Committee, I worked with Senator Lieberman to investigate the U.S. Government's failure to prevent the Fort Hood attack. One of the most troubling findings was that it found the Army and Federal Bureau of Investigation "collectively had sufficient information necessary to have detected Major Hasan's radicalization to violent Islamist extremism but failed both to understand and to act on it." In light of the Fort Hood attack and the findings in this report, what steps has the Army taken to improve personnel oversight such that warning signs of individual problems are identified and acted on as early as possible?

General DEMPSEY. The Army has implemented over 20 of the recommendations proposed by the DOD's Independent Review Panel and the Army's Internal Review Team. Among many initiatives, the Army recently established the Army Protection Program to better manage risks relative to the safety and security of our soldiers, families, civilians, infrastructure and information. The Army has also revised its policy regarding command-directed mental health evaluations. Behavior health screenings for new Army applicants is also required using face-to-face physician screenings at all 65 Military Entrance Processing Centers. Underpinning all of this is leadership accountability.

SAFE HAVENS

70. Senator COLLINS. General Dempsey, on July 17, 2011, Maine lost another one of its proud soldiers, Private First Class Tyler Springmann, to an improvised explosive device (IED) that exploded in Afghanistan. Given the tremendous sacrifice that our servicemen and women are making, I want to be sure that the strategy currently being pursued can work. The President has stated the core goal of the U.S. strategy in Central Asia is to disrupt, dismantle, and defeat al Qaeda in Afghanistan and Pakistan, and to prevent their return to either country in the future. Earlier this year, Admiral Mullen testified that one of the necessary conditions to achieve that goal was to neutralize insurgent sanctuaries in Pakistan, but that insurgent groups currently operate unhindered in those sanctuaries. Yet, General Mattis recently testified that he does not expect Pakistan will reverse its current approach and eliminate the safe havens that exist there. He said that "satisfactory end-states are attainable in Afghanistan, even if the sanctuaries persist." Even if

there is a satisfactory end-state in Afghanistan, how can we achieve the President's goal of preventing the return of al Qaeda fighters to Afghanistan and Pakistan so long as they can take advantage of the safe havens enjoyed by the Quetta Shura and the Haqqani network just across the border in Pakistan?

General DEMPSEY. The loss of Private First Class Tyler Springmann and other servicemembers is a tragic example of the challenges our forces face. This challenge is exacerbated by sanctuaries in Pakistan that Islamabad has not always been willing or able to engage to our satisfaction. That said, military actions are being taken on both sides of the border to minimize this threat and reduce the effect of sanctuary in Pakistan. For their part, Pakistan's military has and continues to conduct disruptive counterinsurgency operations against mutual threats throughout the border region. Diplomatically, the U.S. Senior Representative to Afghanistan and Pakistan has made control and elimination of IED precursor materials emanating from Pakistan a priority in all discussion with Pakistani officials. We have also sought to make it clear that Pakistan is itself threatened when violent non-state actors are selectively permitted the free space to engage in hostile actions. We are also helping to build Afghan security forces that can contest the presence of hostile groups even if some safe havens persist.

ENTERPRISE RESOURCE PROGRAMS

71. Senator COLLINS. General Dempsey, DOD's Enterprise Resource Programs (ERP) have been the subject of significant negative GAO reports. DOD has spent billions on nine ERP information technology systems that are intended to be part of DOD's solution to its fiscal problems and achieve audit readiness by 2017. However, according to GAO reports, six of the nine ERPs have experienced schedule delays ranging from 2 to 12 years and five have incurred cost increases ranging from \$530 million to \$2.4 billion. DOD is currently funding non-competitive ERP contract-writing system pilots. I have become increasingly concerned with the way DOD has managed these programs. If confirmed, what will you do to address the ERP cost overruns, schedule slips, and a lack of competition as additional capabilities and functionalities are added to existing ERPs?

General DEMPSEY. When Chairman, I will leverage multiple processes and forums to address these shortfalls. For example, I will rely on the Joint Requirements Oversight Council and the trip-wire process to monitor for cost growth and schedule delays in Major Defense Acquisition Programs. Additionally, balancing system performance and cost will continue to be a central goal of the ongoing Joint Capabilities Integration and Development process review. Program and portfolio affordability will be important factors in performance trade-off decisions.

SHIPBUILDING INDUSTRIAL BASE

72. Senator COLLINS. General Dempsey, in their fiscal year 2012 budget testimony, former Secretary Gates and Admiral Mullen identified shipbuilding as one of the two components of the defense industrial base that worried them, in particular. Secretary Gates stated, "A number of the Navy ships that were built during the Reagan years will basically reach the end of their planned life in the 2020s, and where the money comes from to replace those ships is going to be a challenge ... there are some tough choices in terms of big capabilities that are coming down the road." Do you agree with that assessment and the importance of sustaining the shipbuilding industrial base?

General DEMPSEY. The Navy's long-term shipbuilding plan includes retirement of 105 ships from 2020 to 2029. During the same period, the Navy plans to take delivery of 94 ships. Based on the comprehensive strategy review and expected defense spending reductions, I will ensure that the Navy's shipbuilding plan continues to provide a force capable of meeting our national strategic objectives. Moreover, sustainment of the shipbuilding industrial base is carefully considered with each Navy acquisition decision. A healthy industrial base is critical in all areas of defense acquisition to ensure appropriate capacity and quality is available to meet our national security requirements. A robust industrial base should also enable competition in order to drive down cost and enhance affordability. For its part, the industrial base must be innovative and efficient if it is going to remain relevant to our national security needs.

OVERSEAS BASING

73. Senator COLLINS. General Dempsey, shortly after the issuance of the 2010 Quadrennial Defense Review, Under Secretary for Policy, Michèle Flournoy, indicated a comprehensive review of roles and missions as it relates to the U.S. military's global presence would be forthcoming in 2012. This review is potentially critical to our understanding of funding overseas basing and force structure. Recent polls indicate the vast majority of American citizens support the closure of U.S. military bases overseas where there is no strong foreign policy objectives involved, to save the cost for maintaining these troops, and to protect investment and sustainment accounts for ships, aircraft, and other equipment. Given our increasing ability to project power from further distances, can you comment on whether or not you believe all of the overseas military bases are still necessary?

General DEMPSEY. We continually assess our overseas posture to determine the optimal mix of forward stationed and deployed forces needed to meet current threats, deter conflict, and assure allies. In a fiscally constrained environment, we must carefully calibrate our forward presence and overseas activities. I will ensure the issue is prominent in our comprehensive strategic review.

PHASED ADAPTIVE APPROACH

74. Senator COLLINS. General Dempsey, under the phased adaptive approach (PAA) to missile defense, we plan to protect our forward-based troops, as well as our allies, in addition to protecting the U.S. Homeland. According to current plans, North Atlantic Treaty Organization (NATO) countries will commit \$200 million Euros to establish the European PAA. The United States contributes about 40 percent to NATO activities. This \$200 million Euro commitment is much lower than the commitment from the Japanese, who have invested \$1 billion in the R&D for ballistic missile defense (BMD) in the Pacific. Our European allies, to my knowledge, have made no similar degree of financial commitment, even as BMD is a shared NATO goal. Do you think our European partners should be contributing more to this significant mission?

General DEMPSEY. Our European partners make significant contributions to the NATO integrated air and missile defense mission. They do so by acting as host nations, providing national air and missile defense sensor and interceptor assets, and funding the Active Layered Theatre Ballistic Missile Defence Programme. This program will provide the command and control structure for the NATO capability to accept control of U.S. missile defense assets. The U.S. European Phased Adaptive Approach is our contribution to the NATO integrated air and missile defense mission. As the threat and our own capabilities evolve, we should continue to assess the need for additional resource investments by all parties.

 QUESTIONS SUBMITTED BY SENATOR JOHN CORNYN

TAIWAN

75. Senator CORNYN. General Dempsey, according to DOD's 2010 report, Military and Security Developments Involving the People's Republic of China (PRC), "China's military build-up opposite the island [Taiwan] continued unabated. The People's Liberation Army (PLA) is developing the capability to deter Taiwan independence or influence Taiwan to settle the dispute on Beijing's terms, while simultaneously attempting to deter, delay, or deny any possible U.S. support for the island in case of conflict." Under the Taiwan Relations Act (TRA), the United States is statutorily obligated to make available to Taiwan such defense articles and defense services "as may be necessary to enable Taiwan to maintain a sufficient self-defense capability." What is your assessment of our recent record of fulfilling our obligations under the TRA?

General DEMPSEY. It is my understanding that we have fulfilled our recent obligations in a way that is consistent with the legislation and that enhances Taiwan's self-defense capability without upsetting the cross-Strait balance. Of note, Taiwan's annual defense spending is approximately one-tenth of the Chinese defense budget. Since Taiwan cannot match China's arms procurement, we continue to encourage Taiwan to develop joint capabilities, streamline more effective and less costly defense programs, and seek low-cost innovative and asymmetric solutions that complement traditional military capabilities.

76. Senator CORNYN. General Dempsey, according to DOD's 2010 report, the PRC has a total of approximately 2,300 operational combat aircraft, including 330 fighters and 160 bombers, stationed within range of Taiwan. An unclassified January 2010 Defense Intelligence Agency report on Taiwan's air force concluded that, although Taiwan has an inventory of almost 400 combat aircraft, "far fewer of these are operationally capable". In your opinion, does Taiwan need more modern replacement fighters to maintain a credible air force?

General DEMPSEY. It is my understanding that upgrades to Taiwan's F-16 A/B airframes will provide a stop-gap measure for the Taiwan air force to continue performing its basic defense functions. However, Taiwan will likely need to recapitalize its air force since its F-5s, Indigenous Defense Fighters, and Mirage airframes reach end-of-service life toward the end of this decade. Even then, Taiwan will still face a numeric disadvantage to China's air force, but the modernization of current airframes will allow Taiwan to maintain its current air defense capability.

77. Senator CORNYN. General Dempsey, does this deterioration of Taiwan's air force indicate that the United States has failed to uphold our obligations under the TRA?

General DEMPSEY. The TRA calls for the United States to make available to Taiwan defense articles and defense services in such quantity as may be necessary to enable Taiwan to maintain a sufficient self-defense capability. Multiple factors affect the cross-Strait balance beyond the specific state of Taiwan's air force. That said, it is my understanding that the modernization of current airframes will allow Taiwan to maintain its current air defense capability. We continue to encourage Taiwan to develop joint capabilities, pursue more effective and less costly defense programs, and seek lower-cost innovative solutions to complement traditional military capabilities. Among these initiatives are efforts to improve the Taiwan air force's survivability, assist with the professionalization of Taiwan air force's enlisted ranks, and improve the Taiwan air force's current aircraft defensive capabilities.

78. Senator CORNYN. General Dempsey, how does Taiwan's airbase survivability compare to other air forces in the region?

General DEMPSEY. Given the nature of the missile threat posed against Taiwan, the survivability and operational capability of airbases on Taiwan are at significant risk. Taiwan is undertaking measures, many classified, to enhance the survivability of its airbases and the ability to continue operating its aircraft in case of conflict.

79. Senator CORNYN. General Dempsey, since 2006, the Taiwanese Government has made clear its desire to purchase new F-16 C/Ds from the United States to augment its aging air force and regain dominance, or at least restore balance, in the airspace over the Taiwan Strait. In your opinion, would these additional F-16s bolster Taiwan's ability to conduct maritime interdiction in a blockade scenario?

General DEMPSEY. Taiwan's ability to conduct maritime interdiction in a blockade scenario is effected by several factors to include, but certainly not limited to the quality and quantity of its air force. More important than the number of any particular airframe, is the ability of the airframe, its pilot, and those in support to execute their mission. In this respect, modernizing Taiwan's air force and air defense systems may be just as valuable for a range of scenarios Taiwan could face.

80. Senator CORNYN. General Dempsey, if the administration denies Taiwan's pending request, and it becomes impossible for Taiwan to purchase these new F-16s, what would be the impact on Taiwan's ability to defend its own skies?

General DEMPSEY. It is my understanding that Taiwan's older airframes (F-5, Taiwan's Indigenous Defense Fighters, and Mirage 2000) reach end-of-service-life by the end of this decade. Without modernization, or possibly replacement aircraft, Taiwan will face the challenge of performing basic peacetime defense functions with a less capable air force. As Chairman, I will work to ensure that we recommend options for the best way forward on Taiwan defense capabilities and requirements.

81. Senator CORNYN. General Dempsey, what would be the impact on U.S. interests in the region?

General DEMPSEY. The United States remains committed to engagement in Asia that promotes stability and access to the global commons. The sale of appropriate defense capabilities to Taiwan is required by law and can contribute to peace and stability across the Strait and in the region. Failure to honor our commitments may cause regional partners to lose confidence in the United States as a reliable security partner.

CHINA

82. Senator CORNYN. General Dempsey, a National Ground Intelligence Center report that was recently declassified provides concerning details regarding China's development of electromagnetic pulse (EMP) weapons for use against U.S. aircraft carriers, as well as Taiwan's electronic infrastructure, in the event of any potential conflict over Taiwan. In your opinion, what effect would such an attack have on U.S. aircraft carrier operations?

General DEMPSEY. The U.S. military, including the U.S. Navy, has prepared to withstand the effects of EMP weapons since the Cold War. U.S. aircraft carriers and carrier strike groups train to operate in nuclear and EMP attack scenarios. We will continue to monitor the development of Chinese military capabilities, particularly as they relate to anti-access/area denial capabilities and strategies.

83. Senator CORNYN. General Dempsey, does the United States currently have adequate measures in place to defend against such an attack?

General DEMPSEY. The U.S. military continually conducts extensive analysis, evaluation, and testing of military systems and equipment to ensure they are resistant to the effects of EMP weapons. Critical pieces of equipment are also retrofitted to be made more EMP resistant before they are fielded. After an EMP attack, critical infrastructure and communications would continue to operate, and our forces will still have adequate operational capability.

84. Senator CORNYN. General Dempsey, according to DOD's 2010 report on China's military power, "U.S.-China military-to-military relations improved in 2009, based on the commitment of President Obama and President Hu to deepen and improve ties, and to take concrete steps to advance sustained and reliable military-to-military relations." Given that the Chinese readily terminated this contact over political issues, as we saw in January 2010 following the Obama administration's announcement of its intent to sell defensive arms and equipment to Taiwan, what is your assessment of the overall value China places on this type of engagement?

General DEMPSEY. The leaders of both countries have all committed to improving our military-to-military relationship. Though our relationship has only recently been renewed, the PLA has stated its desire for improved defense relations as well as made steps to follow up. For example, we have agreed to advance planning on various initiatives to include first ever cooperative exchanges in counter-piracy this year and exercises in humanitarian assistance and disaster relief next year. We have exercised our defense telephone link several times this year and have agreed to more routinely use the system.

85. Senator CORNYN. General Dempsey, how is China benefitting from the military-to-military relations, and what does the United States gain?

General DEMPSEY. Greater military cooperation between the United States and China benefits both countries. We jointly face a complex international security environment and our two militaries operate more frequently in close proximity. Our exchanges increase opportunities for positive cooperation, lower the risk of miscalculation, and more effectively communicate our resolve to maintain peace and stability in the Asia-Pacific region. These exchanges provide China opportunities to understand the U.S. military's role in contributing to global and regional security, while providing the U.S. military opportunities to impress upon China the importance of international law and common safety practices in military operations. Our military-to-military contacts and exchanges are based on the principles of transparency, balance, and reciprocity.

DEFENSE BUDGET CUTS

86. Senator CORNYN. General Dempsey, in his April speech on debt reduction, the President targeted security spending for \$400 billion in cuts over the next 12 years, the preponderance of which seems likely to come from the DOD budget. However, news reports are now indicating that DOD is bracing for much deeper cuts, potentially reaching \$800 billion or more over the next decade. During your confirmation hearing, in response to Senator McCain's question regarding defense cuts in the range of \$800 billion to \$1 trillion, you responded that "based on the difficulty of achieving the \$400 billion cut, I believe \$800 billion would be extraordinarily difficult and very high risk." Please elaborate on why cuts of this magnitude (\$800 billion or greater) would be very high risk.

General DEMPSEY. We have not evaluated what an \$800 billion or greater reduction would entail. In my judgment, cuts of this magnitude to defense spending

would likely require us to review and possibly adjust our national security and military strategies. It is reasonable to expect our capacity to shrink, which would affect our ability to meet global security commitments and potentially increase strategic risk. I am also concerned that deeper cuts directed in a compressed timeline could create a hollow force, lacking the training, readiness, equipment, and modernization it needs to accomplish all its objectives. This said, as Chairman, I will work to ensure any defense cuts are made in a way that sustains a responsive and versatile Joint Force.

87. Senator CORNYN. General Dempsey, in your opinion, what impact would cuts deeper than \$400 billion have on our ability to adequately meet our national security requirements, maintain our Nation's historic military superiority, and provide the requisite resources and support for our soldiers?

General DEMPSEY. In my judgment, cuts beyond \$400 billion would likely require us to review and possibly adjust our national security and military strategies. It is reasonable to expect our capacity (size which equates to frequency) to shrink, which would affect our ability to meet global security commitments and potentially increase strategic risk. As Chairman, I will work to ensure any defense cuts are made in a way that sustains a responsive and versatile Joint Force without rival. I will also remain committed to sustain a strong All-Volunteer Force that keeps faith with our servicemembers, veterans, and their families.

88. Senator CORNYN. General Dempsey, will it be possible for our military to maintain its current capabilities while absorbing \$800 billion or more in cuts?

General DEMPSEY. We have not yet evaluated the implications of an \$800 billion cut. It seems reasonable, however, to expect that cuts of this magnitude would not enable us to maintain our current military capabilities. It would likely require us to reconsider on national security and military strategies. As Chairman, I will remain committed to ensuring that any size cuts result in a strong Joint Force that continues to protect the Homeland and American people.

89. Senator CORNYN. General Dempsey, in your estimation, how much damage would defense spending cuts of that magnitude do to our national interests around the world?

General DEMPSEY. While we have not studied cuts of that magnitude, deeper cuts would impact the way we protect and promote our national interests around the world. As Chairman, I will work to ensure that any cuts do not imperil the ability of the Joint Force to protect the homeland and secure our national interests.

ACQUISITION REFORM

90. Senator CORNYN. General Dempsey, according to the final report of the 2010 Army Acquisition Review, between 1990 and 2010, the Army terminated 22 major acquisition programs before completion, totaling at least \$32 billion—which represents almost one-third of the Army's budget for creating new weapons. The report notes that, "Every year since 1996, the Army has spent more than \$1 billion annually on programs that were ultimately cancelled." Since 2004, \$3.3 billion to \$3.8 billion per year (35 percent to 45 percent) of the Army's Developmental Test and Evaluation funding has been lost to cancelled programs. In my view, this represents extremely poor stewardship of taxpayers' dollars. Unfortunately, this poor stewardship is not limited to the Army, and there are clear examples of it across DOD. In your opinion, what are the primary problems in the DOD acquisition process that have caused these program cancellations, and what can be done to end this decade-long trend of sinking billions of dollars into trying to develop weapon systems that will never be fielded?

General DEMPSEY. I share your concerns about cost overruns and cancelled programs. I am also aware that program cancellations can stem from many causes to include changing national security priorities, overreaching requirements, immature technology, and insufficient attention to overall affordability at program inception. Congress has taken important steps in the 2009 Acquisition Reform Act and the Department has adopted a better buying program initiative to address these issues. As Chairman, I will support DOD efforts to improve Defense Acquisition processes within my authorities in order to develop the most capable and affordable Joint Force possible.

AIR-SEA BATTLE CONCEPT

91. Senator CORNYN. General Dempsey, the Air-Sea Battle concept has been described by some as a new way for the Navy and Air Force to work together to fight future wars against major powers. In today's budget environment, such coordination between our Military Services is more important than ever. As I understand it, the Air-Sea Battle concept is aimed at maintaining U.S. dominance of the air and sea domains and to overpower any nation-state that might try to defeat our military forces through the use of advanced missiles, stealth aircraft, and/or a blue-water naval fleet of its own. Please describe the importance of the Air-Sea Battle concept in our future operations.

General DEMPSEY. The proliferation of anti-access and area denial strategies and capabilities by potential adversaries threatens our assured access to the global commons. It is a challenge of growing concern. Defeating these strategies and capabilities will require the Joint Force to better integrate core military competencies across all domains. Developing joint interdependencies, capabilities, concepts, and strategies—such as Air-Sea Battle—is an important initiative within the context of this overall effort.

92. Senator CORNYN. General Dempsey, what are the implications for the Air-Sea Battle concept if draconian budget cuts force the Air Force to abandon or curtail the new long-range strike aircraft or the Navy to cut its number of aircraft carrier battle groups?

General DEMPSEY. We are currently studying the impact of a wide range of potential budget cuts on the Joint Force's ability to protect U.S. interests around the globe. Any cuts that negatively affect our ability to project U.S. military power, protect our access to the global commons, and maintain freedom of maneuver, particularly at sea or in the air, must be carefully considered with respect to the strategic and military risks involved.

AFGHANISTAN DRAWDOWN

93. Senator CORNYN. General Dempsey, on June 22, 2011, President Obama announced he would withdraw 10,000 troops from Afghanistan by the end of this year and another 23,000 by next summer, resulting in a complete drawdown of the 33,000 troop surge by September 2012. Following the President's announcement, Admiral Mullen testified to the House Armed Services Committee that: "the President's decisions are more aggressive and incur more risk than I was originally prepared to accept." What pace of withdrawal do you believe would incur an acceptable level of risk?

General DEMPSEY. In my judgment, the projected pace of the surge recovery is within acceptable risk. The recovery of the surge will be complete by summer of 2012. At that point, there will be about 68,000 U.S. troops in Afghanistan. There will be greater than 70,000 additional ANSFs fielded. If conditions on the ground change this judgment, I will advise the Secretary of Defense and President.

LIBYA

94. Senator CORNYN. General Dempsey, in the early 1990s, then-Chairman of the Joint Chiefs of Staff, General Colin Powell, laid out some basic guidelines for conducting effective military operations, which have since come to be known as the Powell Doctrine. General Powell stated that: "We should always be skeptical when so-called experts suggest that all a particular crisis calls for is a little surgical bombing or a limited attack. When the 'surgery' is over and the desired result is not obtained, a new set of experts then comes forward with talk of just a little escalation . . . History has not been kind to this approach to war-making." Regarding the air war over Libya, do you believe that a vital, U.S. national security interest was or is threatened there?

General DEMPSEY. The stability of the region and the range of potential outcomes of the Arab Spring are clearly in our national security interest. As President Obama has stated with regard to Libya, "Our safety is not directly threatened, but our interests and values are." In this respect, it is consistent with our national interest to protect Libyan civilians in accordance with the President's policy and United Nations Security Council resolutions.

95. Senator CORNYN. General Dempsey, does the United States have a clear, attainable objective in Libya? If so, what is that objective?

General DEMPSEY. The goal of the NATO-led military effort, and the mandate of the U.N. resolution, is clear. The United States is supporting NATO in protecting the Libyan people. Forced regime change is not the purpose of the military mission; however, military operations do complement other instruments of power that are being used to pressure for the eventual departure of Qadhafi.

96. Senator CORNYN. General Dempsey, how does the Powell Doctrine apply or not apply with regard to the Libya campaign?

General DEMPSEY. The Powell Doctrine is certainly an appropriate source of counsel for any potential use of force. When writing about the use of force in *Foreign Affairs* (1992), it is my understanding that General Powell did not intend for a rigid application of his words. He did, however, argue that military force “should be restricted to occasions where it can do some good and where the goodwill outweighs the loss of lives and other costs that will surely ensue.” In my judgment, this is just one example of how the Powell Doctrine might be applicable to the NATO led effort in Libya.

ARMY SURFACE FLEET

97. Senator CORNYN. General Dempsey, the Army currently operates a fleet of over 100 ships, used mostly for logistics purposes. The vessels range from large landing ships to medium-sized and smaller utility landing craft, to a force of tug-boats and barges. Those vessels are operated by over 2,000 soldiers and another 200 civilians in support roles. A 2010 report by Defense News stated that the Army was in discussions with the Navy over the potential transfer of the Army’s watercraft mission and its vessels. In today’s Joint Service, does it make sense for the Army to continue operating a fleet of over 100 ships?

General DEMPSEY. As Chairman, I will work to develop and align joint capabilities in a way that leads toward a more interdependent, affordable, responsive, and versatile Joint Force. The Army-Navy Warfighter Talks, conducted in December 2010 to address the issue you raise, worked toward a similar goal. As a result of these talks, the Services agreed to transfer the Army’s share of the Joint High Speed Vessel program to the Navy. The objective is to optimally align Service core competencies for strategic movement and reduce Total Ownership Costs. The transfer of management oversight to the Navy does not change the joint character of the mission set, and the Navy-operated vessels will support Army missions as directed by the combatant commanders. It was also decided to undertake a thorough examination of the potential transfer of the remaining Army watercraft missions to the Navy in light of changing requirements and fiscal constraints.

98. Senator CORNYN. General Dempsey, please share your view on the desirability of the proposed transfer of this mission and assets from the Army to the Navy, and provide a status update.

General DEMPSEY. The Army and Navy leadership have assessed the potential to gain efficiency in this area while minimizing risk. They have determined that it may be feasible to consolidate watercraft roles and missions in response to changes in future global military posture. However, further analysis will be required to fully assess any long-term efficiencies or costs, and identify capability gaps or overlaps that could result. This is not unlike other areas where we are seeking to gain efficiency, but doing so in a deliberate manner that does not compromise national security.

JOINT STRIKE FIGHTER

99. Senator CORNYN. General Dempsey, the F-35 JSF will replace the aging tactical jet fleets of A-10s, F-16s, F-18s, and AV-8s. In prepared remarks to the Senate Armed Services Committee, Under Secretary of Defense Ashton Carter stated that “its [F-35’s] importance to our national security is immense. The F-35 will form the backbone of U.S. air combat superiority for generations to come.” In the past, some major acquisition programs (such as the B-2 and F-22) have experienced large cost increases and other problems so significant that DOD has had to greatly reduce the number of aircraft ultimately procured. Can you comment on the importance of JSF to our national defense?

General DEMPSEY. The F-35 is indeed foundational to our national security. This 5th generation aircraft will preserve our decisive advantage over potential adversaries for a generation. I also recognize that controlling cost is central to our ability

to procure the appropriate quantity of F-35s. As Chairman, I will work to ensure an affordable F-35 program that meets our national security requirements.

100. Senator CORNYN. General Dempsey, what steps will you take to ensure the JSF does not meet the same fate as the B-2 and F-22?

General DEMPSEY. As Chairman, I will work directly with the Office of Secretary of Defense (OSD), the Services, and Congress to deliver the most affordable JSF possible. The Vice Chairman and I will rely on improved joint requirements and acquisition processes to regularly review the JSF program in conjunction with OSD. We will aggressively assess capability and cost trades, closely monitor cost growth through the trip-wire process, and participate in Departmental Boards.

SIZE OF GENERAL/FLAG OFFICER CORPS

101. Senator CORNYN. General Dempsey, during your confirmation hearing, Senator Webb made the following statement regarding the number of general officers in the Air Force: "The Air Force has more brigadier generals than any of the other Services, by far. They have the same number of three stars. They have almost the same number of two stars as the Army and more than the Navy and the Marine Corps combined." According to a May report by the Air Force Times, in the last 7 years alone, the Air Force cut nearly 43,000 airmen but added 44 generals. The efficiencies initiative led by former Secretary Gates touted that it would cut 102 general/flag officer billets. However, roughly 40 percent of that cut comes as a result of ending the wars in Iraq and Afghanistan. In your opinion, where can DOD find further efficiencies within its general/flag officer ranks?

General DEMPSEY. As mentioned, many of the efficiencies have come from the elimination of joint positions associated with the transition of our operations in Iraq and Afghanistan. These cuts impact the Services by reducing the available number of joint general/flag officer positions. In turn, this reduces the number of such officers each Service is authorized to maintain. There are also Service-specific cuts that go beyond these joint cuts that are being considered and implemented. On assuming the office of Chairman, I will continue to examine the issue and seek opportunities for additional reductions.

102. Senator CORNYN. General Dempsey, in light of anticipated cuts to the DOD budget, should the Services look at reducing their numbers of general/flag officers before reducing overall force structure?

General DEMPSEY. As you may be aware, we have already initiated the reduction of 130 general/flag officer positions across DOD. The size and composition of the general/flag officer ranks should continue to face scrutiny as we shape the overall force structure.

103. Senator CORNYN. General Dempsey, how else can we prioritize tooth over tail when it comes to force structure?

General DEMPSEY. In my current role as Chief of Staff of the Army, we are examining the echelons of command as well as the size of higher headquarters. I will say that "staff power" and "intellectual bandwidth" are as important as combat power and lethal effects. As Chairman, I will seek the right balance.

MILITARY BANDS

104. Senator CORNYN. General Dempsey, the fiscal year 2012 DOD budget request included \$320 million for military bands, which many think are of questionable value in bolstering national security. Given the current budgetary crisis and impending cuts to the defense budget, what is your assessment of the importance of military bands?

General DEMPSEY. I am a strong advocate of our military bands. My own 1st Armored Division Band was among my greatest heroes for their service in Iraq in 2003–2004. Our U.S. military bands have had a long and distinguished place in our Nation's history. Through ceremonies, national tours, public concerts, and recordings, our military bands continue to inspire patriotism, elevate esprit de corps, and support recruiting efforts. These bands have also made a significant contribution to preserving our Nation's musical heritage and projecting a positive image of the U.S. military at home and overseas. I am sensitive to our current budget constraints and think we can take a balanced approach that protects our national security priorities while recognizing the important contributions military bands continue to make to our Nation.

105. Senator CORNYN. General Dempsey, what plans do you have to recommend cuts and efficiencies in this area, to ensure that our Military Services prioritize tooth over tail?

General DEMPSEY. At this time, I am not aware of specific recommended cuts to military bands. However, the ongoing comprehensive review is looking at the entire defense structure. As Chairman, I will remain committed to ensuring we have a strong Joint Force capable of meeting our national security objectives.

QUESTIONS SUBMITTED BY SENATOR DAVID VITTER

LAW OF THE SEA

106. Senator VITTER. General Dempsey, it's my understanding that the Joint Chiefs of Staff and the Navy have long supported U.S. accession to the United Nations Convention on the Law of the Sea (UNCLOS). The primary claim is that U.S. membership would guarantee or otherwise secure the navigational rights and freedoms set forth in the convention. However, it is my understanding that the Navy has maintained its global presence despite the fact that the United States has remained outside of UNCLOS. Could you provide me with an example of a situation or operation where the Navy was unable to successfully complete a mission due to the fact that the United States is not a party to UNCLOS?

General DEMPSEY. The decision not to accede to the UNCLOS has not prevented the U.S. Navy from successfully completing any missions. Since 1983, the U.S. Navy has conducted operations consistent with UNCLOS provisions on navigational freedoms, in accordance with then President Reagan's Oceans Policy. Those provisions are vital to our Armed Force's global mobility and must not be allowed to erode. An accession to UNCLOS provides the United States a stronger leadership voice to guide and influence future law of the sea developments instead of relying on UNCLOS provisions only as a matter of customary international law. Becoming a party to UNCLOS closes a seam with our partners and allies.

107. Senator VITTER. General Dempsey, has access to a key international strait—such as Hormuz, Malacca, Bab el-Mandeb, or Gibraltar—ever been denied to the Navy due to the fact that the United States is not a party to UNCLOS?

General DEMPSEY. The decision of the United States not to accede to UNCLOS has not denied our Navy access to any key international straits to date. For this, we rely on the regime of transit passage, a key provision of UNCLOS. An accession to UNCLOS would enable the United States to guide and influence future law of the sea developments and protects its key provisions, like the regime of transit passage. We must ensure these provisions are not eroded in order to preserve our robust navigational freedoms and provide our Armed Forces abroad the highest degree of global mobility.

[The nomination reference of GEN Martin E. Dempsey, USA, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
June 6, 2011.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment as the Chairman of the Joint Chiefs of Staff and appointment to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., sections 152 and 601:

To be General.

GEN Martin E. Dempsey, USA, 0000.

[The biographical sketch of GEN Martin E. Dempsey, USA, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF GEN MARTIN E. DEMPSEY, USA

Source of commissioned service: USMA

Educational degrees:

U.S. Military Academy - BS - No Major

Duke University - MA - English

U.S. Army Command and General Staff College - MMAS - Military Arts and Sciences

National Defense University - MS - National Security and Strategic Studies

Military schools attended:

Armor Officer Basic and Advanced Courses

U.S. Army Command and General Staff College

National War College

Foreign language(s): French

Promotions:

Promotions	Date of Appointment
2LT	5 Jun 74
1LT	5 Jun 76
CPT	8 Aug 78
MAJ	1 Sep 85
LTC	1 Apr 91
COL	1 Sep 95
BG	1 Aug 01
MG	1 Sep 04
LTG	8 Sep 05
GEN	8 Dec 08

Major duty assignments:

From	To	Assignment
Jan 75	May 76	Platoon Leader, B Troop, 1st Squadron, 2d Armored Cavalry, U.S. Army Europe and Seventh Army, Germany.
May 76 ...	Sep 77	Support Platoon Leader, 1st Squadron, 2d Armored Cavalry, U.S. Army Europe and Seventh Army, Germany.
Sep 77	Jun 78	S-1 (Personnel), 1st Squadron, 2d Armored Cavalry, U.S. Army Europe and Seventh Army, Germany.
Jul 78	Jan 79	Student, Armor Officer Advanced Course, U.S. Army Armor School, Fort Knox, KY.
Apr 79	Jan 80	Motor Officer, 1st Squadron, 10th Cavalry, 4th Infantry Division (Mechanized), Fort Carson, CO.
Jan 80	Oct 80	Commander, A Troop, 1st Squadron, 10th Cavalry, 4th Infantry Division (Mechanized), Fort Carson, CO.
Oct 80	Jun 81	S-3 (Operations), 1st Squadron, 10th Cavalry, 4th Infantry Division (Mechanized), Fort Carson, CO.
Jun 81	Jul 82	Commander, Headquarters and Headquarters Troop, 1st Squadron, 10th Cavalry, 4th Infantry Division (Mechanized), Fort Carson, CO.
Aug 82 ...	May 84	Student, Duke University, Durham, NC.
Jun 84	Jul 87	Instructor, later Assistant Professor, Department of English, U.S. Military Academy, West Point, NY.
Aug 87 ...	Jun 88	Student, U.S. Army Command and General Staff College, Fort Leavenworth, KS.
Jul 88	Sep 89	Executive Officer, 4th Battalion, 67th Armor, 3d Armored Division, U.S. Army Europe and Seventh Army, Germany.
Sep 89	May 91	S-3 (Operations), later Executive Officer, 3d Brigade, 3d Armored Division, U.S. Army Europe and Seventh Army, Germany and Operations Desert Shield/Storm, Saudi Arabia.
Jul 91	Jun 93	Commander, 4th Battalion, 67th Armor, 1st Brigade, 1st Armored Division, U.S. Army Europe and Seventh Army, Germany.
Jul 93	Jun 95	Chief, Armor Branch, Combat Arms Division, Officer Personnel Management Directorate, U.S. Total Army Personnel Command, Alexandria, VA.
Aug 95 ...	Jun 96	Student, National War College, Fort Lesley J. McNair, Washington, DC.
Jul 96	Jul 98	Commander, 3d Armored Cavalry Regiment, Fort Carson, CO.
Jul 98	Oct 99	Assistant Deputy Director for Politico-Military Affairs, Europe and Africa, J-5, The Joint Staff, Washington, DC.
Oct 99	Aug 01	Special Assistant to the Chairman of the Joint Chiefs of Staff, The Joint Staff, Washington, DC.
Sep 01	Jun 03	Program Manager, Saudi Arabian National Guard Modernization Program, Saudi Arabia.
Jun 03	Oct 04	Commanding General, 1st Armored Division, U.S. Army Europe and Seventh Army Operation Iraqi Freedom, Iraq.
Oct 04	Jul 05	Commanding General, 1st Armored Division, U.S. Army Europe and Seventh Army, Germany.
Aug 05 ...	May 07	Commander, Multi-National Security Transition Command-Iraq/Commander, NATO Training Mission-Iraq, Operation Iraqi Freedom, Iraq.

From	To	Assignment
Aug 07 ...	Mar 08	Deputy Commander, U.S. Central Command, MacDill Air Force Base, FL.
Mar 08 ...	Oct 08	Acting Commander, U.S. Central Command, MacDill Air Force Base, FL.
Dec 08	Mar 11	Commanding General, U.S. Army Training and Doctrine Command, Fort Monroe, VA.
Apr 11	Present	Chief of Staff, U.S. Army, Washington, DC.

Summary of joint assignments:

Assignments	Date	Grade
Assistant Deputy Director for Politico-Military Affairs, Europe and Africa, J-5, The Joint Staff, Washington, DC	Jul 98–Oct 99	Colonel
Special Assistant to the Chairman of the Joint Chiefs of Staff, The Joint Staff, Washington, DC	Oct 99–Aug 01	Colonel
Commander, Multi-National Security Transition Command-Iraq/Commander, NATO Training Mission-Iraq, Operation Iraqi Freedom, Iraq	Aug 05–May 07	Lieutenant General
Deputy Commander, U.S. Central Command, MacDill Air Force Base, FL	Aug 07–Mar 08	Lieutenant General
Acting Commander, U.S. Central Command, MacDill Air Force Base, FL	Mar 08–Oct 08	Lieutenant General
Executive Officer, 3d Brigade, 3d Armored Division, U.S. Army Europe and Seventh Army, Operations Desert Shield/Storm, Saudi Arabia	Jan 91–Feb 91	Lieutenant Colonel
Commanding General, 1st Armored Division, U.S. Army Europe and Seventh Army, Operation Iraqi Freedom, Iraq	Jun 03–Oct 04	Brigadier General/ Major General
Commander, Multi-National Security Transition Command-Iraq/Commander, NATO Training Mission-Iraq, Operation Iraqi Freedom, Iraq	Aug 05–May 07	Lieutenant General
Deputy Commander, U.S. Central Command, MacDill Air Force Base, FL	Aug 07–Mar 08	Lieutenant General
Acting Commander, U.S. Central Command, MacDill Air Force Base, FL	Mar 08–Oct 08	Lieutenant General

U.S. decorations and badges:

- Defense Distinguished Service Medal (with Oak Leaf Cluster)
- Distinguished Service Medal (with Oak Leaf Cluster)
- Defense Superior Service Medal
- Legion of Merit (with two Oak Leaf Clusters)
- Bronze Star Medal with “V” Device
- Bronze Star Medal
- Meritorious Service Medal (with two Oak Leaf Clusters)
- Joint Service Commendation Medal
- Army Commendation Medal
- Army Achievement Medal (with Oak Leaf Cluster)
- Combat Action Badge
- Parachutist Badge
- Joint Chiefs of Staff Identification Badge

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by GEN Martin E. Dempsey, USA, in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Martin E. Dempsey.
2. **Position to which nominated:**
Chairman of the Joint Chiefs of Staff, Washington, DC.
3. **Date of nomination:**
6 June 2011.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
14 March 1952; Jersey City, NJ.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Diane Sullivan Dempsey.
7. **Names and ages of children:**
Christopher, 32.
Megan, 31.
Caitlin, 28.
8. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.
None.
9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.
None.
10. **Memberships:** List all memberships and offices held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.
Member, Veterans of Foreign Wars.
Member, Association of the U.S. Army.
11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognition for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.
None.
12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify before any duly constituted committee of the Senate?
I, Martin E. Dempsey agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?

I, Martin E. Dempsey, agree, when asked before any duly constituted committee of Congress, to give my personal views, even if those views differ from the administration in power.

[The nominee responded to Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–E are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

MARTIN E. DEMPSEY.

This 6th day of June, 2011.

[The nomination of GEN Martin E. Dempsey, USA, was reported to the Senate by Chairman Levin on August 2, 2011, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on August 2, 2011.]

NOMINATIONS OF ADM JONATHAN W. GREENERT, USN, FOR REAPPOINTMENT TO THE GRADE OF ADMIRAL AND TO BE CHIEF OF NAVAL OPERATIONS; AND LTG CHARLES H. JACOBY, JR., USA, TO BE GENERAL AND TO BE COMMANDER, U.S. NORTHERN COMMAND/COMMANDER, NORTH AMERICAN AEROSPACE DEFENSE COMMAND

THURSDAY, JULY 28, 2011

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:36 a.m. in room SD-106, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Reed, Udall, Hagan, Begich, Blumenthal, McCain, Sessions, Wicker, Brown, Portman, Ayotte, and Collins.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Jonathan D. Clark, counsel; Richard W. Fieldhouse, professional staff member; Creighton Greene, professional staff member; and Jessica L. Kingston, research assistant.

Minority staff members present: David M. Morriss, minority staff director; Adam J. Barker, professional staff member; Christopher J. Paul, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: Jennifer R. Knowles, Kathleen A. Kulenkampff, Brian F. Sebold, and Bradley S. Watson.

Committee members' assistants present: Carolyn Chuhta, assistant to Senator Reed; Nick Ikeda, assistant to Senator Akaka; Gordon Peterson, assistant to Senator Webb; Casey Howard, assistant to Senator Udall; Lindsay Kavanaugh, assistant to Senator Begich; Joanne McLaughlin, assistant to Senator Manchin; Ethan Saxon, assistant to Senator Blumenthal; Lenwood Landrum, assistant to Senator Sessions; Joseph Lai, assistant to Senator Wicker; Charles Prosch, assistant to Senator Brown; Brent Bombach, assistant to Senator Portman; Brad Bowman, assistant to Senator Ayotte; and Ryan Kaldahl, assistant to Senator Collins.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody. Today the committee meets to consider the nominations of two distinguished senior military officers: Admiral Jonathan Greenert, U.S. Navy, the nominee to be Chief of Naval Operations (CNO); and Lieutenant General Charles Jacoby, Jr., U.S. Army, the nominee for Commander, U.S. Northern Command (NORTHCOM) and Commander, North American Aerospace Defense Command (NORAD).

The long hours and the hard work that are put in by our senior military officials at the Department of Defense (DOD) require commitment and sacrifice not only from our nominees, but also from their families. We greatly appreciate the willingness of our nominees to carry out their new responsibilities and we also appreciate the support that they have from their families. Without that support, these nominees could not possibly do what they've been asked to do throughout their careers and what they're going to be asked to do when they are confirmed. Our nominees should feel free to introduce their family members when they make their opening remarks this morning.

The nominees have impressive qualifications and suitability for their positions. Admiral Greenert has served as Vice CNO, Commander, U.S. Fleet Forces Command, Deputy Commander of the Pacific Fleet, and Commander of the U.S. Seventh Fleet.

General Jacoby has served as the Commanding General of the Multinational Corps in Iraq, the Commanding General of ICOR, and the Commanding General of U.S. Army-Alaska. He has also served as the Commander of U.S. Southern Command's Joint Task Force Bravo in Honduras, which provided counterdrug support, and he led relief operations for Hurricane Mitch, missions that are directly relevant to NORTHCOM's missions.

I would also note that he is a native of Michigan, he holds a master's degree in history from the University of Michigan, so from my perspective that seals the deal. The fact that Admiral Greenert's wife hails from Michigan should not hurt his chances, either.

If confirmed, each of our nominees will be responsible for helping DOD face critical challenges. The ongoing use and possible future use of our military forces overseas, as well as the defense of our Homeland, make it critically important that we choose military leaders for DOD who can provide a vision for dealing with a number of critical issues that confront DOD.

These challenges include balancing force structure and modernization needs against the costs of supporting ongoing operations, and to do so in an increasingly constrained fiscal environment.

Those fiscal constraints are likely to get tighter as we deal with whatever agreement comes from the ongoing debt ceiling-deficit reduction discussions. The President announced a reduction in security funding of some \$400 billion over the next 12 years. The actual reduction could be significantly greater, and if that happens this is going to amplify the challenges that you will face.

Admiral Greenert would be the 30th CNO. He will face the difficult tasks of recruiting and retaining a quality force and maintaining current readiness to conduct the ongoing war on terrorism, while at the same time transforming the Navy's force structure to

deal with the threats of the future in the face of difficult cost and scheduling problems with the Navy's major acquisition programs.

Many of the ongoing challenges facing the Navy center on acquisition programs. As CNO, Admiral Greenert would be leading the Navy in defining requirements for the acquisition community to fill. There are some programs that have been proceeding reasonably well, such as ramping up the two attack submarines per year.

But too many acquisition programs are mired down in problems which, unless resolved, will make it difficult, if not impossible, to reach our goal for the size of the fleet.

NORTHCOM is responsible for the defense of the Homeland and for providing defense support to civil authorities in response to domestic natural or manmade disasters. Its area of responsibility includes all of North America, including Mexico. General Jacoby would be dual-hatted as the Commander of NORAD, our binational command with Canada, which has the mission to provide aerospace warning, aerospace control, and maritime warning for North America.

When confirmed, General Jacoby would face a number of significant challenges. These challenges include working with the Mexican military to help them defeat the transnational criminal organizations that are causing high levels of violence in Mexico, which pose a threat within Mexico and to the security of our southern border.

As part of the mission of providing defense support to civil authorities, NORTHCOM must work closely and cooperatively with other Federal agencies and with all the States on plans and coordination for emergency response to domestic disasters, including potential incidents involving weapons of mass destruction.

General Jacoby will need to work with the State Governors and National Guard Forces to improve the capabilities of State and Federal military forces to work together to support the Governors' needs for disaster assistance.

NORTHCOM is also the combatant command responsible for the operation of the Ground-Based Midcourse Defense (GMD) system, whose mission is to help defend the Homeland against the threat of a limited ballistic missile attack from nations such as North Korea and Iran. The GMD system has had two consecutive flight test failures, most recently last December. We look forward to hearing General Jacoby's views on what we need to do to make the system work reliably and effectively, including adequate testing.

We all look forward to hearing your testimony this morning on these and other issues and the kinds of issues that you are going to be facing in your new assignments.

Senator McCain.

STATEMENT OF SENATOR JOHN McCAIN

Senator McCAIN. Thank you, Mr. Chairman.

I welcome Admiral Greenert and General Jacoby and their families and I congratulate them on their nominations. Admiral Greenert, in a nomination hearing on Tuesday for General Martin Dempsey, nominated to be the next Chairman of the Joint Chiefs of Staff, we discussed the likelihood of deep cuts in future defense

budgets and the uncertainty about how these cuts will affect defense personnel, equipment, readiness, and capabilities.

General Dempsey expressed his appreciation for the role of sea power in our national defense strategy and the Navy's enduring role in protecting our economic and national security interests in vast and vital areas, such as the Asia Pacific. Indeed, with the increasing importance of this geopolitical and maritime space, the roles and responsibilities of the Navy are becoming even more critical.

General Dempsey also acknowledged, however, that if adequate funding is not provided by Congress, DOD strategy will have to change to reflect the resources that are made available. Clearly, each of the Services stands to be affected by the budget decisions made in the days ahead. But in my judgment, the Navy, with its capital-intensive shipbuilding and aircraft procurement and maintenance accounts, could be the Service that would be most adversely affected.

This puts huge additional pressure on the Navy to design and produce on time and on budget, reliable, battle-ready ships, submarines, and aircraft, a task in which I'm sad to say the Navy's recent track record has been less than admirable. If the Navy's performance in the design and procurement of its weapons systems doesn't improve, I'm worried that the Service could lose the commitment and support of American taxpayers and Congress, which would be a long-term disaster for the Navy and our Nation.

While I'm confident you will be confirmed, Admiral, you will have many difficult challenges ahead. The Littoral Combat Ship (LCS) heads the list. I continue to think the Navy misjudged in going forward with a dual-source block buy strategy for the LCS and that the true life cycle costs of buying and sustaining both LCS variants will be considerably more than what the Navy has estimated.

In recent days we have learned that one of the newly commissioned LCS ships has experienced unacceptable cracking of its steel hull, while the other variant suffers from aggressive galvanic corrosion that will require repair and backfitting to ensure the safety and durability of its aluminum hull. I'm sure you share my frustration that following an \$8 billion taxpayer investment in the LCS program, the Navy continues to lack a single ship that is operationally effective or reliable.

Similarly with the Joint Strike Fighter (JSF) program, we're all too familiar with its continued cost overruns and schedule slips. After nearly 10 years in development and a \$56 billion investment to date, the program has produced a handful of test and operational aircraft. We've recently learned that the government's share of the most recent cost overruns for the first 28 production aircraft stands at three-quarters of a billion dollars, in addition to a requirement for an additional 33 months and \$7.4 billion as a result of recent program restructuring decisions.

The overall estimated cost of the program, \$383 billion, and an estimated sustainment cost of \$1 trillion, make it the most expensive acquisition program in history. I remain deeply concerned about the affordability of this program and I don't think the taxpayers and Congress will have a lot more tolerance for additional cost increases and schedule slips.

The same is true with the LPD-17 *San Antonio*-class of amphibious ships. Plainly, the Navy faces many difficult challenges. But if we can be confident in one thing without a doubt, it is the performance and commitment of our sailors and that of their families over the last 10 years of constant conflict. They give us reason to redouble our efforts to solve these problems and they make us proud every day, and they deserve better. So do the taxpayers.

General Jacoby, I congratulate you on your nomination. I'm interested in what your priorities will be if confirmed to ensure NORTHCOM is able to accomplish its missions and navigate an increasingly complex security environment.

The current situation in Mexico should be of concern to all of us, and I'm interested in your assessment of what steps need to be taken to strengthen the partnership between our two nations to combat the increasingly capable and ruthless transnational criminal organizations. President Calderon continues to act with great courage in this fight and he has achieved significant successes with the capture or killing of several powerful cartel kingpins. However, the situation remains dire. More than 35,000 Mexicans have lost their lives in drug-related violence since 2006, and this violence continues to rage in many areas in Mexico, threatening the safety and security of Mexican and American citizens alike.

Finally, I'm interested in your views on an increasingly grave threat to both American military and economic security, the growing proliferation of attacks in cyberspace. There isn't a week that goes by without media reports of major intrusion or compromise of cyber networks in the United States, both military and commercial.

We need to focus our attention and act with a real sense of urgency. I think we are long overdue in developing an understanding of how to respond to cyber attacks and when to shift from defense to offense. I've been and remain greatly concerned about the lack of a clear strategy that establishes coordinated, unambiguous command and control relationships that have real capability to effectively respond to cyber attacks within DOD.

In short, I don't think we have answered a host of fundamental questions involving cyberspace, despite recent efforts. I look forward to hearing the role you believe NORTHCOM should play in protecting the Homeland against our cyber threats and what must urgently be done to ensure the roles and responsibilities for protecting the United States are clearly defined and established both within DOD and across the interagency framework.

Thank you both for your willingness to serve in these important leadership positions.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator McCain.

Let me now ask you to give us your opening statements, if you would. Let me first call on Admiral Greenert.

STATEMENT OF ADM JONATHAN W. GREENERT, USN, NOMINATED FOR REAPPOINTMENT TO THE GRADE OF ADMIRAL AND TO BE CHIEF OF NAVAL OPERATIONS

Admiral GREENERT. Thank you very much, Mr. Chairman, and good morning. Senator McCain, distinguished members of the committee: it is indeed an honor, a great honor, to appear before you

as the nominee to be our Navy's CNO. I am thankful for the confidence placed in me by President Obama and Secretaries Panetta and Mabus and Admiral Roughead.

But I'm most grateful for those people behind me who for years have given me great support, understanding, and inspiration, especially my wife Darlene, who is with us today, as you've acknowledged earlier, Mr. Chairman. We've been married for 30 great years. Darlene has been steadfast and, for heaven's sakes, she's been patient. She's a caring Navy spouse and the greatest mother three children could ever have.

Joining us also today is my daughter, Sarah, who's really the apple of my eye, and my son, Bryan. He's obviously the lieutenant behind us. He's just completed a 4-year tour as a Navy surface warfare officer, serving on two destroyers in Japan. Regrettably, Mr. Chairman, our oldest son, Jonathan, could not be here. He too serves our Navy, as a Navy Criminal Investigative Service special agent, and he's currently underway in the Western Pacific on the aircraft carrier *George Washington* as their special agent.

More than anything, I am grateful for the opportunity to continue serving as a sailor in the U.S. Navy. To me there is nothing more meaningful and honorable than to wear the cloth of our Nation and serve alongside today's magnificent Navy men and women. They are committed, they are tough, adaptive, and innovative, and therefore they deserve wisdom, clear direction, and understanding from their leadership.

The sailors we send into harm's way today could not do what they do without the support they receive from their families at home. As the Vice Chief, I have been honored to meet many thousands of Navy family members in an effort to understand how our institution can serve them better. I am grateful for their dedication, their resiliency, and their selflessness.

Today, 50 percent of our ships are underway and 43 percent are deployed. We have over 12,000 sailors on the ground in U.S. Central Command (CENTCOM) and about 10,000 sailors on individual augmentee assignments. Mr. Chairman, these numbers were almost identical to the numbers that Admiral Roughead reported to you almost 4 years ago. Your Navy remains ready. It is agile and it's global, and it has been relentlessly busy. Operating tempo has been high. Our missions have evolved, and changes are occurring in our world, particularly the Middle East, at a pace we couldn't previously imagine.

In spite of all that has taken place around us, one key element endures and I believe will endure: we must assure the security and freedom of the seas in all the domains, so that the economies of the world can flourish. To do this, I believe our Navy must be forward in order to influence events, assist our allies and partners, and provide our Nation an offshore option.

If confirmed, my priorities will be to remain ready to meet the current challenges today; build a relevant and capable future force; continue to take care of our sailors, our civilians, and their families, and institute a manning strategy that recruits and nurtures a motivated, relevant, and diverse future force.

Meeting these challenges in today's budgeting environment will not be easy. Going forward, we must be clear-eyed in commu-

nicating what we will and what we won't be able to provide the Nation in the future.

I recognize there will be rough seas ahead, but with the help of the Navy and DOD leadership and the support of this committee, I am confident we will succeed.

Mr. Chairman, if confirmed as the next CNO, I will give you and the magnificent sailors in our Navy my best efforts. You rightfully expect it, they absolutely deserve it. I look forward to your questions. Thank you very much.

Chairman LEVIN. Thank you very much, Admiral.
General Jacoby.

STATEMENT OF LTG CHARLES H. JACOBY, JR., USA, NOMINATED TO BE GENERAL AND TO BE COMMANDER, U.S. NORTHERN COMMAND/COMMANDER, NORTH AMERICAN AEROSPACE DEFENSE COMMAND

General JACOBY. Chairman Levin, Senator McCain, distinguished members of the committee: it is a great honor and distinct privilege to appear before you today. I'm honored and humbled that President Obama has nominated me to be Commander of NORTHCOM and NORAD. I thank all of you for this opportunity.

Thank you, sir, for your kind words about our families. Today I'm joined by my wonderful wife, Grace, my faithful partner of almost 22 years, who was raised in an Army family and originally hails from Puerto Rico. As a retired U.S. Army officer, Grace knows and understands the sacrifices of our servicemembers and their families, and has worked tirelessly on their behalf. She has also raised three great young men. I know she'll be prepared to give me a comprehensive after-action review at the completion of this hearing. Thank you, sweetheart. [Laughter.]

Chairman LEVIN. One of the benefits of marriage. [Laughter.]

General JACOBY. Yes, sir. [Laughter.]

I'm very proud of my three sons. Mike, a middle schooler, and Vic, a high schooler, are both at camps today; and our eldest, CJ, is a third-year West Point cadet, currently completing his summer duties. I'm blessed with a terrific Army family. I thank the committee for inviting them here today.

Mr. Chairman, over the past year, Admiral Sandy Winnefeld has led the NORTHCOM and NORAD team with distinction. His leadership, vision, and drive will leave a legacy of continuous improvement which, if confirmed, I hope to build upon.

Before fielding your questions, I'd like to emphasize just two points. First, as a leader who has devoted much of his service life to combatting threats outside of the United States, I can think of no greater responsibility now than leading our military in defense of the Homeland, while providing support to our citizens at the Federal, State, and local levels in times of their greatest needs. I view the NORTHCOM and NORAD mission simply as a sacred trust.

Second, in my current role as Director for Strategic Plans and Policy on the Joint Staff, I observed no other command and certainly no other combatant command in which cooperation with and support for partners is more important than with NORTHCOM and NORAD. If confirmed, I will reinforce the critical importance

of a close partnership and teamwork with, first and foremost, the National Guard, the Reserve, other combatant commanders and Service Chiefs, the Department of Homeland Security (DHS), and all other interagency, State, local, and nongovernmental partners, as well as our close friends and neighbors, Canada, Mexico, and the Bahamas.

I look forward to working with the members of this committee and your superb staffs. Your countless visits to support our troops in theater, many of which I personally benefited from in Afghanistan and Iraq, along with your steadfast commitment to providing for their requirements and your unprecedented support for our families, are greatly appreciated.

I look forward to your questions.

Chairman LEVIN. Thank you very much, General.

First, some standard questions that we ask of all of our nominees. Have you adhered to applicable laws and regulations governing conflicts of interest?

Admiral GREENERT. I will.

General JACOBY. Yes, sir.

Chairman LEVIN. Do you agree, when asked, to give your personal views even though those views differ from the administration in power?

Admiral GREENERT. I do.

General JACOBY. Yes, sir.

Chairman LEVIN. Have you assumed any duties or undertaken any actions that appear to assume to outcome of the confirmation process?

Admiral GREENERT. No, sir.

General JACOBY. No, sir.

Chairman LEVIN. Will you ensure that your staff complies with deadlines established for requested communications, including questions for the record, in hearings?

Admiral GREENERT. Yes, sir.

General JACOBY. Yes, sir.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

General JACOBY. Yes, sir.

Admiral GREENERT. Yes, sir.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

General JACOBY. Yes, sir.

Admiral GREENERT. Yes, sir.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify upon request before this committee?

Admiral GREENERT. Yes, sir.

General JACOBY. Yes, sir.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

General JACOBY. Yes, sir.

Admiral GREENERT. Yes, sir.

Chairman LEVIN. Thank you.

We'll have a 7-minute round for our first round. Admiral, let me start with you. You appeared at a House Armed Services Committee hearing earlier this week, I believe, to discuss total force readiness and much of the discussion, understandably, centered around potential budget reductions. I believe that, in an exchange with Mr. Forbes, you pointed out that combatant commander requirements already exceed the Navy's ability to meet those requirements.

Can you outline for us what are the greatest risks to the Navy if there are large budget reductions forthcoming?

Admiral GREENERT. Mr. Chairman, right now the fleet is stressed. We are operating at a tremendous operating tempo and we are seeing some indicators of decreasing readiness. So I think we're operating at a pretty high rate today and we are at a limit.

If given a large budget reduction that we had to take, when I look at the global force management in the future that we might have to meet, I can't reconcile that without some change to that global force management plan. Our options are limited. We can't hollow the force, so the future force has to be ready. As I said before, we have to keep the faith and trust our sailors. We can't go to our personnel. Our Navy hasn't changed much since 2008 in our manning level and our manning plan.

If we reduce force structure, that would exacerbate the problem we already have. If we reduce modernization, that is going to the shipbuilding and aircraft accounts, I'm concerned about the industrial base.

So we have a conundrum here and I believe that this needs to be a strategic approach to such a large reduction.

Chairman LEVIN. Cost increases in our shipbuilding have meant that we're spending more and not making much progress in building the size of the fleet. The next major shipbuilding program over which the Navy has an opportunity to control requirements to keep the ship affordable is the *Ohio*-class replacement, the SSBN-X.

Admiral, are you supportive of the design decisions that the Navy has made on the SSBN-X program to constrain costs?

Admiral GREENERT. Yes, sir, I am.

Chairman LEVIN. The committee's been concerned, very concerned, with the cost growth in the F-35 JSF program. At a hearing earlier this year, several members asked: What are the alternatives to the F-35 program if it is just unaffordable, we just run into new trouble, and we just don't see it working out the way we planned and the way it needs to work out?

Some of the witnesses said we just have no alternative, which of course troubles many of us. Admiral, what are the options for modernizing tactical aviation facing the Navy and the Marine Corps?

Admiral GREENERT. Mr. Chairman, the F-35 provides us a fifth generation strike fighter, which is really a measure of its stealth, its capability. The F/A-18 Hornet, our primary strike fighter right now, is a fourth generation fighter. We have no alternative in the Navy and Marine Corps with regard to an aircraft that will bring that capability.

If for some reason we were unable to bring the F-35 in, we would have to look at the capabilities, the weapons that we could

produce and design for the Hornet, a more standoff weapon, so that we could get a better output from that.

Chairman LEVIN. Admiral, in your written response to the advance policy questions you talked about the U.S. accession to the Law of the Sea Convention. Can you tell us whether or not you believe it's important to our national security to join this treaty?

Admiral GREENERT. Mr. Chairman, I believe it is important to the national security. The legal certainty and the public order that it would bring, our ability to have a dialogue in an international forum for issues such as freedom of navigation, excessive exclusive economic zone claims, and also our continental shelf issues, such as in the Arctic, I think would be enhanced greatly by our accession to the Law of the Sea.

Chairman LEVIN. Thank you.

General, the last two flights, as I mentioned, of the GMD system failed and the Missile Defense Agency (MDA) is working to understand and fix the problem, including plans to conduct two flight tests to verify any fix. Until that happens, MDA has suspended production of the interceptor-kill vehicles. Do you support the need to take the time necessary to fully understand and to fix the problem, to conduct all necessary testing to confirm the fix and to demonstrate that the system works?

General JACOBY. Senator, yes, I do.

Chairman LEVIN. General, last year NORAD conducted the first annual exercise with Russia, called Vigilant Eagle, in which both countries practiced passing control for monitoring and escorting a simulated hijacked aircraft into each other's air space. Can you tell us whether that exercise was a success and whether you believe that these kind of cooperative exercises enhance U.S. security, and if so, how?

General JACOBY. Senator, I believe Vigilant Eagle was a success. It is an annual exercise. It is a practical exercise. As we saw in this last run-through with the Russian Federation, there really was benefit in that transparency that took place in the handoff of a hijacked aircraft, that really builds trust and confidence in a relationship and contributes to U.S. national security interests.

So with the Russian Federation, of course, we work with our eyes wide open. But there are areas of cooperation that are mutually beneficial and I think Vigilant Eagle is a perfect example of how we can both gain in the security realm by cooperating together.

Chairman LEVIN. Would that possible cooperation also be or might be helpful in the area of missile defense with Russia in terms of enhancing our security, particularly against Iranian missile threats?

General JACOBY. Senator, I know there are important discussions going on right now in seeking ways to cooperate with the Russian Federation on missile defense. I know Ambassador Rogozin just recently visited NORTHCOM-NORAD command centers. I know that we've been in extensive dialogue with them.

So again, finding places and venues and capabilities where we can cooperate with the Russian Federation can contribute not just to both nations' mutual security needs, but regional security needs as well.

Chairman LEVIN. Thank you, both.

Senator McCain.

Senator MCCAIN. Thank you, Mr. Chairman, and I thank the witnesses again.

Admiral, I don't know if you had a chance to see the Wall Street Journal this morning and other periodicals. The headline is "China Says Carrier Won't Alter Naval Strategy." The first paragraph says: "China's defense ministry said its first aircraft carrier would be used for research experiments and training and would not affect its defensive naval strategy, in an apparent attempt to ease regional concerns that the vessel could be used to enforce territorial claims."

I have never viewed an aircraft carrier as a method to employ a defensive strategy. I don't believe that's what carriers are intended to. I'm curious of your impression. We've known that this aircraft carrier was in the phase of being refurbished for a long period of time. What's your view of the impact of this very significant move on the part of the Chinese?

Admiral GREENERT. Senator, I believe it's clearly a prototype for what they ultimately want to have, which is a better aircraft carrier, indigenously built and tailored to their needs.

Senator MCCAIN. What do you think of the overall meaning of it?

Admiral GREENERT. By virtue of being an aircraft carrier, it's typically offensive. It's made to project power.

Senator MCCAIN. What is your view of the significance as far as what you think the Chinese thinking is?

Admiral GREENERT. The Chinese say they built it for defensive measures. There's some question as to what their intent is. It's hard to gauge their intent. They could use it for defensive reasons, but as we just stated, this is a power projection.

Senator MCCAIN. When you look at their statements about the South China Sea, about economic zones that are theirs, the near conflicts they've had with their neighbors, their assertion about the oil resources out in the South China Sea, and their new research ship that just reached new depths that exceeded that of the United States, doesn't all this put together a picture for you?

Admiral GREENERT. It puts together a picture of a navy that is interested in expanding its operations to blue water.

Senator MCCAIN. Thereby extending its influence.

Admiral GREENERT. Yes, sir.

Senator MCCAIN. Thank you.

In a House hearing yesterday, in response to a question about the possibility of drastic defense budget cuts ranging from \$400 billion to \$1 trillion over the next 10 years, you said: "Without a comprehensive strategy review, a fundamental look at what we are asking our forces to do, without a change in activity, we won't be able to meet the global force management plan today."

As Vice Chief, are you taking part in DOD's comprehensive strategic review?

Admiral GREENERT. We are not in the major deliberations of that. We are providing some data, but we have been told we would be part of any final decision process in this comprehensive review.

Senator MCCAIN. How would you view a \$400 billion, \$600 billion, \$800 billion, or \$1 trillion cut in defense over the next 10

years? Do you have an assessment of what the impact that would be on our most capital-intensive Service?

Admiral GREENERT. Given that size of budget reduction and assuming it was apportioned to the Navy in accordance with our current ratio, we cannot go hollow, Senator, so we have to sustain our current force. Our personnel levels are not an area we can go to make further reductions. We've done about the best we can with efficiencies. There's some more overhead.

My concern is the cuts at that level, we'd have to go into force structure and modernization, and my concern is about the industrial base and our shipbuilding plan.

Senator MCCAIN. You are already concerned about the downward trend in ship maintenance funding and commensurate rise in ship inspection failures; is that true?

Admiral GREENERT. I am, yes.

Senator MCCAIN. It's already a serious problem.

Admiral GREENERT. Yes, sir. We are making some progress, but it remains a concern.

Senator MCCAIN. I won't go into my rant about the F-35 or the LCS. I will spare you that. But I am deadly serious about the fact that the costs of both of these programs are simply unsustainable. I'm not the only one that holds that view. So I strongly recommend that you give both the LCS and the JSF your serious attention as you assume your new serious responsibilities.

General, give us an assessment of the situation in Mexico vis-a-vis the drug cartels. Is the situation improving, is it deteriorating, is it the same? Is it an area of concern for ranging from American tourists to the threats of increased violence along our border?

General JACOBY. Senator, Mexico and the United States have tremendous shared mutual interests, security interests as well as other interests, along our border, but specifically with regards to countering the transnational criminal threats that are shared by both countries. We both share responsibilities to counter those threats.

Senator MCCAIN. I'm curious about your view of the seriousness of those threats and whether we are making progress or if it's basically stagnant or if it's a standoff between the cartels and the Mexican Government. I'd like to have your assessment of that.

General JACOBY. Yes, Senator. It's my understanding that progress is being made on both sides of the border. I know the Mexican Government and security forces have made courageous political, moral, and physical commitments to countering the transnational criminal organizations. I know that we have made progress. I know there is much more work to do.

I think recently the President has released an executive order declaring a national emergency regarding the threat of transnational criminal organizations, highlighting them as an unusual and extraordinary threat to the U.S. foreign policy, our economy, and our security. I think that that accurately describes the seriousness of the threat.

Senator MCCAIN. The Government Accountability Office has recently stated that the border is approximately 44 percent under operational control. Would you agree with that assessment?

General JACOBY. Senator, DHS is responsible for those assessments. I don't know of any counter to that report in terms of percentages under control or not under control. I know that it is a long border. I'm sure there is much work to be done along the border and at different places.

So if confirmed, it would be a priority for me to work closely with DHS to understand and to see how NORTHCOM could support DHS and other agencies in gaining effective control of the border.

Senator MCCAIN. I can tell you one thing and that is the use of Predator aircraft, unmanned aerial vehicles (UAV), has been extremely effective and helpful. I think you would agree.

General JACOBY. Yes, Senator, I'd agree. We have found UAVs to be a multiplier across the board in all DOD endeavors and certainly can assist in law enforcement operations as well.

Senator MCCAIN. Thank you very much.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator McCain.

Senator Reed.

Senator REED. Thank you very much, Mr. Chairman.

Thank you, gentlemen, for your service and for the service of your families. The chairman indicated he had a threshold level, which is some connection to Michigan. I too have a threshold level and you've both passed it. Admiral Greenert commanded a submarine and General Jacoby commanded the First Battalion, 504th Parachute Infantry Regiment. So I'll ask a few questions, but I think you've already done fine.

Admiral, both the chairman and Senator McCain have brought up the issue of the maintenance issues that are confronting the Fleet. Some reports suggest that some destroyers, for example, will not reach their 30-year expected life or be able to be extended to a 40-year life. With these budget pressures, one of your most obvious responses is to keep the ships at sea. So can you comment generally in terms of will that be a first response? Will that require additional money for maintenance? Are you making any progress there? Because, as much as we all like to see additional platforms, you very well might have to curtail that, which obviously implies keeping the ships at sea longer.

Admiral GREENERT. Senator, the foundation of reaching our 30-year shipbuilding plan and our inventory is to make sure that the ships that we have reach their expected service life. To do that you have to do the right maintenance at the right time. That was something we didn't have right until recently. We were in our surface ship maintenance, we would fully fund a year's worth of maintenance and still not get the right things done in drydocking or otherwise.

We've made some good progress and the key now is we have to schedule it, allow them the time to do the maintenance, so that we can ensure ourselves that the ships make their full life.

Senator REED. Is part of this recent response turning more responsibility over to the Navy and to the crews, rather than contractors? Is that part of it, too?

Admiral GREENERT. Senator, that's part of it, because first of all, it's good for the crew. It's good for a crew to understand their ship, to understand how to operate it, and do that maintenance. That's

what the commanding officers of the ship have said: We need more time to do that maintenance and get to know the equipment, and when you operate it right it'll last.

Senator REED. Admiral, the chairman also mentioned the *Ohio*-class program, which is in the stages of design finalization requirements. One of the issues that I've addressed with Admiral Roughead is given the pressures on the shipbuilding budget, that this, as well designed and as efficient as you can build it, is going to be an expensive proposition.

There's been ongoing discussions, because of its strategic role, of having some costs shared by DOD, not exclusively the Navy. Are those discussions still underway?

Admiral GREENERT. Yes, sir, they are. If confirmed, I intend to try to continue those discussions. In the 2020s we will have a phenomenon, an unfortunate one, where many of the ships built in the 1980s will now come due for retirement. That's right when the *Ohio* replacement comes in. So we'll work very hard to make sure we got the requirements right. We'll work very hard with the acquisition community to drive that cost down.

But we may, even so, need some assistance in the shipbuilding budget if we're going to meet our goals.

Senator REED. The British Government has still fully committed to buying the *Ohio*-class ship, which should help, perhaps not decisively, but should help in terms of the cost allocation; is that correct?

Admiral GREENERT. Yes, Senator. They are all in on the missile compartment agreement that we had.

Senator REED. Thank you.

General Jacoby, and I'll ask the Admiral also to comment, one of the most interesting developments in your theater of operations is the fact that the Navy predicts by 2020 that the Arctic Ocean will be navigable for commercial traffic at least 1 month a year and perhaps longer, which opens up a whole new space that you and the Navy have to operate in.

Can you comment upon your views as to what we should be doing now and what we can anticipate?

General JACOBY. Yes, Senator. In the most recent unified command plan, 2011, NORTHCOM received the responsibility for Arctic Ocean areas. It's shared with U.S. European Command (EUCOM) as EUCOM picks up country responsibilities on the other side. But NORTHCOM is the advocate for the requirements and for the capabilities that will be needed as the Arctic becomes increasingly open.

The Secretary has directed that NORTHCOM ensure the peaceful and responsible opening of the Arctic, with a special emphasis on future transit lanes and potential choke points. I think there is also quite a bit of emphasis that this should be an international effort and that our efforts in the Arctic should strengthen international agreements and a sense of the peaceful opening of the Arctic.

So if confirmed as the NORTHCOM commander, it will again be about building relationships and ensuring that, eyes wide open, we do the right things in the Arctic as it opens up over time.

Senator REED. Admiral, 20 years ago, I don't think the CNO was thinking, how do I support a unified commander with ships in the Arctic Ocean for the transit of commercial vessels. So any thoughts?

Admiral GREENERT. Yes, Senator. I believe we need to think about the Arctic as we think about other attributes when we bring in new programs. It's going to be a fact of life that we may have to operate up there. I'm taken back to when we first started operating in the Persian Gulf. That was a unique experience. We didn't plan this into our equipment, so we had air conditioning issues and other issues with dust, et cetera.

There are unique challenges in the Arctic and I think it needs to become an attribute when we consider requirements. We also need to consider it in our concept of operations (CONOPS) when we talk about what a ship needs to be able to do. Chem-bio and those kind of things; cold weather is another thing and it needs to be built into the CONOPS.

Senator REED. Thank you very much, sir.

General Jacoby, you have significant responsibilities with respect to National Guard and Reserve. There is an ongoing and very healthy debate about whether these units' primary responsibility should be for DOD missions or for homeland security missions, given the fact that they are State militias as well as federalized forces that deploy constantly on the orders of the President of the United States.

Can you give us an idea of where you are in terms of that debate?

General JACOBY. Yes, Senator. I think the verdict is in. They're important for both. They're integral to both. As the Commander of Multi-National Corps-Iraq and deputy in Afghanistan, we could not have accomplished our mission without the effective, properly trained, equipped, and manned Reserve component forces, primarily National Guard, that we fought side-by-side with over the last 10 years.

So as we look at the challenges in the future and balancing our requirements against resources, the National Guard and the Reserves become even more important in our calculus.

Just as well in the Homeland, Senator. They're absolutely essential. The Quadrennial Defense Review (QDR) and just good common sense have driven us to look to the Guard for more of a role in things like chemical, biological, radiological, and nuclear consequence management. I think that is the proper place for that to grow, and of course as the NORTHCOM Commander, if confirmed, one of the things that I'll advocate strongly for are the resources that the Guard and Reserve need to accomplish those missions, and I look forward to that opportunity.

Senator REED. Thank you both, gentlemen, for your service.

Thank you.

Chairman LEVIN. Thank you very much, Senator Reed.

Senator COLLINS.

Senator COLLINS. Thank you, Mr. Chairman.

Admiral, I enjoyed having the opportunity to participate with you last week as we honored the outstanding servicemembers. Although you are not from the State of Maine, and don't have the ties

that you do to the home States of other members, I'm confident that, based on our discussion, that you fully understand the critical role that the great State of Maine plays for our Navy, with Bath Iron Works and also the Portsmouth Naval Shipyard and a Survival, Evasion, Resistance, and Escape training facility as well. I look forward to having you come to Maine to see all of those first-hand.

I want to follow up on the questions that the chairman and the ranking member asked you about shipbuilding and your testimony earlier this week. You testified that the Navy would need approximately 400 ships to meet all of the combatant commanders' demands, a number which is 115 ships more than are in our Fleet today. So that is of great concern to me.

Could you be more specific on what are the unmet requirements of the combatant commanders as they relate to Navy ships?

Admiral GREENERT. Senator, in my statement I was referring to an unconstrained combatant commander input, which is what we get in DOD as part of the process. For those that aren't validated, if you will, by the Joint Staff and make the global force management plan, they tend to be theater security cooperation activity in theaters outside of U.S. Pacific Command and CENTCOM. Those tend to be our centers of operations for the global force management plan.

These are important operations. They help preclude conflict. They help build partnership capacity. But, regrettably, in our force structure limitations we can't meet some of those.

Senator COLLINS. Among those is there a significant gap, for example, in ballistic missile defense (BMD), anti-piracy efforts? Are those some of the unmet needs of the combatant commanders?

Admiral GREENERT. BMD is a limit, Senator, but it is really based on the amount of force structure, writ large, we have. It isn't as if we have a destroyer that would be available for BMD and we don't provide. We provide the combatant commanders all those that are capable today.

Counter-piracy, we do as much as we can in counter-piracy operations, particularly in the CENTCOM and the U.S. African Command areas of responsibility.

Senator COLLINS. General, the Senate Homeland Security and Governmental Affairs Committee, on which I am the ranking member and former chairman, did an in-depth investigation into the failed response to Hurricane Katrina. One of our astonishing findings was that NORTHCOM had so little situational awareness about what was going on in Louisiana and Mississippi.

I know that there has been considerable progress made since that time. Military support to civil authorities during a major disaster relief is absolutely critical to effective response and recovery, as I'm sure you're aware. What are your goals for strengthening the cooperation between NORTHCOM and the Federal Emergency Management Agency, the State National Guard units, and the State emergency managers? Specifically, will you continue the program to train dual-status commanders?

General JACOBY. Senator, I think you've nailed it right on the head in terms of situational awareness. That's been my personal experience in large-scale disasters. It's really a challenge to know

exactly what's happening to you and to gain that. I think under Admiral Winnefeld's leadership it's my understanding that great strides have been made in improving its ability to see and understand what the requirements are, and more importantly, to anticipate those requirements. That's another part of the question you asked. I think it's about building strong, cooperative partnerships and effective relationships prior to an incident, so you're not exchanging business cards after the hurricane strikes; you're doing it beforehand.

That comes down to trust and confidence, and trust and confidence have been built by Admiral Winnefeld in a way that I think is unprecedented. Reflecting that is the initiative by the Council of Governors on dual-status commanders. I think it's a tremendous and overdue initiative. It's something that's been tried and worked before in special, national special security events, and I think that it will serve us well in times of disasters in the future. If confirmed, I will continue to put energy and power behind the back wheels of that program as best I can, supporting State and local authorities.

Senator COLLINS. Thank you. I look forward to working with you to advance that goal.

Admiral, I want to talk further with you about shipbuilding. Admiral Roughead said many times that he considered 313 ships to be the absolute minimum that is really needed for the Fleet. There are other studies, such as the QDR and the independent, bipartisan Perry-Hadley panel, that suggest that the number really should be in the neighborhood of 346 ships.

What is your judgment on the minimum number of ships that, unconstrained by budget, we should have in our Fleet?

Admiral GREENERT. Senator, I believe that the 313-ship floor remains the right number to deliver the capability needed to meet the challenges in the 2020 timeframe.

Senator COLLINS. Finally, and my time has expired, one way that we can reduce the cost per ship is to increase the rate of procurement. We've seen that in the past with the DDG-51 program. In fact, at one point when DDG-51 contracts were being awarded, at a rate of three per year, it saved nearly \$800 million.

Do you have any thoughts on whether we would be able to increase the procurement rate and thus lower the cost per ship?

Admiral GREENERT. Senator, at every opportunity we will pursue multi-year procurement of a DDG-51. As you said, it's an efficient way. You get economic order quantity. It's good for the builder, it's good for the Navy. As we balance resources across the shipbuilding portfolio and all accounts, we'll be looking for that opportunity.

Senator COLLINS. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Collins.

Senator Udall.

Senator UDALL. Thank you, Mr. Chairman.

Good morning, gentlemen. Thank you for being here.

Admiral, I look forward to working with you. Colorado is landlocked, but there are certainly important developments in the world that will be under your purview. I note that a book titled "Monsoon," which I think you've probably seen—and General Jacoby talked about this the other day—presents a fascinating

way, an insightful way, of looking at the Indian Ocean and that part of the world, in which we're very involved. I look forward to carrying on those conversations with you. Thanks for your willingness to serve.

If I might, I'd like to turn to General Jacoby and talk about NORTHCOM. We have been well-served by your predecessors, General. We had a chance to talk about their accomplishments and successes the other day. Thank you for taking the time to come by and see me.

Would you just touch on your top priorities and concerns as you begin to take a look at the command you're going to assume here in the near future?

General JACOBY. Senator, as I look across the portfolio of the NORTHCOM Commander, it really consists of three groupings: defense support for civil authorities in case of natural and manmade disasters; defense of the Homeland; and security cooperation with our neighbors. In all of those mission areas, complex relationships are the key to effectiveness, particularly in support to civil authorities and defense of the Homeland.

There are many stakeholders in the comprehensive defense of the Homeland and support to civil authorities. So without delving immediately into a set of things to do, it's my understanding and as I've watched Admiral Winnefeld command so effectively, it's really building trust and confidence in those relationships, building effective partnerships, ahead of the problem, that will allow NORTHCOM to play its critical supporting role in most of those activities.

Of course, the defense of the Homeland is the responsibility of the NORTHCOM Commander. But so much of the rest of the mission set folds into that and supports that mission that really, I think, getting down to business means rolling up your sleeves and paying attention to the critical partners that are required to really effectively support and defend our people and its interests.

Senator UDALL. Let me build on those comments, as well as those of Senator Collins. You talk about creating those relationships beforehand. We talked about the dual-status command opportunity and Senator Collins just brought it up as well. I just want to underline my support for working with the Guard, particularly those Guard leaders, the State adjutants general (TAG), who know their home States, who know those relationships in the civil and the military world.

I just really encourage you to move in every way possible to firm that up and take advantage of those relationships. I know that's your intention, but I want to work with you and really make that happen.

General JACOBY. Thank you, Senator.

Senator UDALL. If I could, let me turn to cyber. Would you share your thoughts on where we are, and talk a bit about the discussion we're having about kinetic and nonkinetic responses; how do you determine which is most appropriate? I'd appreciate it.

General JACOBY. Senator, like members of this committee and senior leaders across the military, we are recognizing the cyber domain as being critical to our national security. Within the realm of DOD, we rely heavily on the cyber domain for something as signifi-

cant and fundamental as command and control, but also for all the supporting infrastructure that makes DOD run and supportive of our national security interests.

So it is an absolute requirement that we become effective in that domain and that we have the right strategies, the right policies, and the right authorities to conduct the full range of activities required in the cyber domain for now and in the future.

For NORTHCOM specifically, the NORTHCOM responsibilities lie primarily in the physical domain. The technical side is really a comprehensive issue that involves the lead with DHS, but a very close partnership with the U.S. Cyber Command and U.S. Strategic Command. NORTHCOM's role will be to not only protect critical physical infrastructure outside DOD, if requested by local and State authorities, but also DOD facilities as well.

Then in the event of an incident that would certainly have some kind of physical consequences, NORTHCOM would then go into its mode as a supporting element of providing DOD resources in support of civil authorities that are dealing with the consequences of such an incident. I think that all of us can imagine pretty significant consequences as a result of a deliberate cyber attack.

Senator UDALL. I think we have more work to do on the civilian side with the vulnerabilities, but also strengths. Again, I look forward to working with you in that regard.

Admiral, I want to turn to China. I'm sure you're familiar with the piece that Admiral Mullen penned recently. I thought he had some interesting insights into how we interact with China. I'm somebody who thinks we ought to communicate, collaborate, and compete with China. We ought to be careful, though, about getting ourselves into conflicts with China that involve the use of force.

Would you share any of your thoughts on that relationship? Then in particular, a piece of good news is what we're doing in the Gulf of Aden. Sino-American efforts there to counter piracy I think maybe present a model that we might move forward.

Admiral GREENERT. Senator, I think Admiral Mullen had it pretty much exactly right. We need to continue the dialogue. It's a long, grinding affair, but in my experience in the Pacific, especially at Seventh Fleet, I found that we can make some headway. We can't be naive.

What I found was, especially in special mission ships operating in and around China, an understanding of a proportional response. I think we have an opportunity with the desire of both nations for a peaceful resolution of the Korean Peninsula. I think we should leverage that. You've already mentioned the piracy. So there's a few areas that I think we can leverage and continue on. But we can't be naive. We have to be clear and deliberate.

Senator UDALL. Well put.

Thanks again for your service. I look forward, particularly, General, to having you out in Colorado with your great wife. So looking forward to it. Thank you.

Chairman LEVIN. Thank you, Senator Udall.

Senator Brown.

Senator BROWN. Thank you, Mr. Chairman.

Admiral, what's the current strike fighter shortfall?

Admiral GREENERT. The predicted current strike fighter shortfall for the Navy will be 65.

Senator BROWN. Is it your opinion that the Navy needs 28 Super Hornets in fiscal year 2012 to alleviate that shortfall?

Admiral GREENERT. With the 28 Hornets in 2011, that would be the shortfall, Senator.

Senator BROWN. So the cost of a Super Hornet is about \$54 million and, just to kind of pick up a little bit on what Senator McCain didn't want to talk about, the JSF right now is about \$132.8 million. Do you think that the Super Hornet and getting those would be the plan B, the safe hedge against further slips in growth costs of the F-35 JSF for your purposes?

Admiral GREENERT. Senator, that would get us a temporary measure for the strike fighter shortfall. But I go back to the requirement for fifth generation. Eventually we need to move ahead in capability to the fifth generation, that stealth, that ability to deliver the range and the weapon capacity.

Senator BROWN. First of all, congratulations to both of you for, obviously, having this opportunity, and I look forward to voting, as well as probably everybody up here, for your confirmation.

General, what sort of relationship will you have with the Chief of the National Guard Bureau (NGB) in terms of coordination between NORTHCOM and NGB? Are there any improvements that you think we can make?

General JACOBY. Senator, if confirmed, it will be a top priority to develop a relationship, an effective and a strong trusting relationship with NGB. I've watched General McKinley with great respect over the last year. He provides invaluable assistance and advice to the Joint Chiefs of Staff and to the NORTHCOM Commander. I've watched the current NORTHCOM Commander, Admiral Winnefeld, forge those bonds, develop those relationships that allowed them to make these bold initiatives like the dual-status command opportunity.

So if confirmed, I'll commit to you that I will continue to develop those relationships and have that strong, trusting working partnership that's required for support to the States and the civil authorities and for the defense of the Homeland.

Senator BROWN. In your view, how and when will dual-status commanders be utilized?

General JACOBY. Senator, in the past we've proven the concept. Dual-status commanders have worked effectively in support of national special security events. So this leap forward is saying, why do we need 6 months to put in place a dual-status commander? Why can't we do that in advance?

So the training program, the designation in advance of dual-status commanders, and the marrying up of dual-status commanders with a deputy from the other authority, I think those are tremendous initiatives that need to carry forward, and I think that can be used across a broad spectrum of support to civil authorities in response to incidents around the country. It makes a lot of sense. It's about unity of effort.

Senator BROWN. When you're dealing with the Mexican-U.S. border, and the use of guardsmen, some of the concerns are the fact that they don't have the ability to actually defend themselves, like

we would in a war situation. I would argue that what's happening down there is pretty darn close to being a war, a war on drugs, and a form of terror.

What's your position as to giving them the authority to protect themselves when it comes to life and death?

General JACOBY. Senator, I'm not familiar with the exact rules of engagement or the arrangements that have been made for the guardsmen that are serving in a terrific manner along our south-west border. I know that the States have requested that and have implemented that program, and the Guard's mobilized very effectively to support it.

I also know that DHS is training agents to eventually replace those guardsmen. I would say that, as just a matter of professional opinion, any time we put a soldier, sailor, or marine in harm's way, we need to make arrangements for their personal security.

Senator BROWN. Thank you, sir.

Admiral, just getting back to you, you said you predict that there's a 68-strike fighter shortfall. Why is that a prediction?

Admiral GREENERT. It's when we take into account the number of hours on an airframe that we have today, hours flying by tail number, and look at operations and extrapolate it out.

Senator BROWN. The usual that we've talked about.

Admiral GREENERT. It's the throughput, yes, sir.

Senator BROWN. One final question. The Navy's business case analysis of its dual LCS award strategy indicated that it can demonstrate overall cost savings of around \$1 billion. Is that still accurate?

Admiral GREENERT. Senator, I would like to take a look at those numbers and get back to you on the precise number.

[The information referred to follows:]

Yes, the cost savings generated by the Littoral Combat Ship award of the dual block buy included savings of approximately \$1 billion (Then Year) which is directly attributable to the dual award versus the original down select strategy. This number is still an accurate representation of the savings. This strategy is assessed to achieve overall procurement savings of \$2.9 billion when compared to the Department's fiscal year 2011 President's budget Future Years Defense Program through fiscal year 2016 for 20 Littoral Combat Ships.

Senator BROWN. Great. Thank you, sirs.

Mr. Chairman, thank you.

Chairman LEVIN. Thank you, Senator Brown.

Senator SESSIONS.

Senator SESSIONS. Thank you.

Congratulations to both of you. We appreciate your service and value that tremendously. We have a magnificent military and as we go through the financial challenges that we all face we want to be sure that we keep the most magnificent military in the world, and I trust that you will help us achieve that, and also cost savings wherever they can be achieved.

General Jacoby, as NORTHCOM Commander, you will be the person to pull the trigger if we were to have an incoming missile attack. You have the GMD system and other systems that are on the drawing boards. I am a strong believer that the GMD system we have presently will work to protect the country. I do believe that we need to enhance its kill vehicle to be more sophisticated, and that's being worked on, although we did have a defect in that

in a test failure, which will mean we'll have to take a little longer and cost more money to work that out.

My first question to you is: Will you tell us and commit to us that you'll master that program and will keep us advised on any shortfalls or problems that occur and will work to ensure that we properly spend the money to deploy the system that we've invested substantially in over several decades?

General JACOBY. Senator, yes, I will.

Senator SESSIONS. Will you give us your best military judgment when asked about that?

General JACOBY. Senator, if confirmed as the commander responsible and accountable, I will.

Senator SESSIONS. You've had some experience with the National Guard and you told me yesterday your respect for that institution. Would you share with us your understanding of the partnership between Active Duty and the Guard and how that can benefit the Nation?

General JACOBY. Yes, Senator, I will. It's been my privilege to serve side-by-side with guardsmen from my days as a second lieutenant out in the woods at Fort A.P. Hill, VA, on annual training, right up until last year in command of Multi-National Corps-Iraq, where tens of thousands of guardsmen served side-by-side with Active Forces in the accomplishment of a single mission.

It's also been my privilege to serve with guardsmen around the world in support of humanitarian assistance and disaster relief, particularly in Central America and South America. So I have an abiding respect and admiration for the Guard. They bring special talents to every endeavor and they make special and unique sacrifices, as do their families, when we call upon them, both in their home States and abroad, to serve the Nation.

So I believe that this is all about working together. I think it's about taking advantage of unique skills and opportunities. I believe it's about responding locally first and then piling on as required. So there is a very special supporting role that NORTHCOM can provide State Governors and TAGs, and I think that in order to be the most effective in doing that you have to have that relationship with the Guard.

I think exercising, training, and fighting together, those are the keys to building those relationships and bonds that you can't break.

Senator SESSIONS. I agree. I know you'll be working with the 167th Theater Support Command out of Alabama, and I know they look forward to that, and I hope and believe you'll have a positive relationship.

Admiral Greenert, we're at 285 ships in the Navy today. The requirement is for 313. The CNO previously called that a floor for the Navy. We'll have to work hard to get there. I believe that is a reasonable amount for the Navy and hope that we can be able to support you maintaining that.

I know you were asked earlier about the LCS. They're just beginning to be produced and the plan calls for 55 of those to be a part of that Fleet. I understand the personnel required to man the ship is only about 40. How do you see that in terms of being able to help us achieve the Fleet size we need with a cost improvement as compared to conventional ships that we now have in service?

Admiral GREENERT. Senator, I had the pleasure of spending an overnight on the *Freedom* and I went from stem to stern on the *Independence*, and I am very impressed with the potential that those ships will bring. They have speed, volume, agility, and the ability to adapt. They are coveted by Special Forces. The Marine Corps wants to get involved as we are putting together packages.

So with the mission modules, with anti-submarine warfare, with mine warfare, and surface warfare mission modules, the LCS will be a key and essential part of our future fleet. We just have to bring them in on time, budget, and schedule.

Senator SESSIONS. Compared to the other ships that would be most comparable to it, they would be a lot more expensive and require a lot more personnel to operate, do they not?

Admiral GREENERT. That would be correct, yes, sir. The closest thing that I know of to the LCS is the National Security Cutter. It has a different mission, but nonetheless costs a little bit more, the cutter, and its crew is larger than the LCS.

Senator SESSIONS. The DDG-1000 or -51s, some of their missions could be reduced, and they're substantially more expensive and have much larger crews; is that not correct?

Admiral GREENERT. That's correct.

Senator SESSIONS. I think this is a smart Navy move. I remember when Admiral Clarke proposed it, and it came up when I was chairman of the Seapower Subcommittee. I thought it was a good step in the right direction. I will acknowledge that some of those ships now will be built in Alabama, so I'm watching it closely. But I do believe it was a good idea then as a cost-cutting, flexible, more mobile Navy capability with much varied capabilities.

With regard to the corrosion matter that I think Senator McCain asked you about, I've looked into that. I don't know if you've had a chance to. I've talked to DOD people. It does appear that they checked them from stem to stern for corrosion and other problems. They found a bit of corrosion.

For any ship that's in the oceans, corrosion is always a problem, is it not? Do you believe that when launching a ship, you wouldn't be surprised to see some corrosion problem appear; is that correct?

Admiral GREENERT. It has happened in the past. It is not a new problem, corrosion. As you said, with the turbulence of the water, any metal in sea water, you have that threat of corrosion.

Senator SESSIONS. We've looked and talked with DOD officials and, while it may be this ship that's in the water may cost \$1, \$2, \$3 million to fix that problem, once it's been identified there are techniques that can be employed for the new ships ongoing that would avoid that problem at a much, much more modest cost; is that correct?

Admiral GREENERT. That's correct, Senator.

Senator SESSIONS. I just feel that you have a good ship there. I appreciate Senator McCain because he's going to be on top of it, and we should be on all our procurements. Your feet will be held to the fire. The contractors and the Navy will be held to the fire. But I don't think that this is a huge problem. It does not jeopardize the program financially or technologically, and I do believe that the LCS will be cheaper to operate and be a step forward for the Navy

as we strive to create the 300-plus-ship Navy that we'd like to have.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Sessions.
Senator Blumenthal.

Senator BLUMENTHAL. Thank you, Mr. Chairman.

Thank you, General and Admiral, for your extraordinary, very distinguished service to our country, and thank you for your willingness to serve in the future. I apologize that I missed some of your testimony because of my appearing at other committee hearings. But I think I was here for probably some of the most important part, where you thanked your families, and I want to join in thanking them and recognizing their service to our country as well.

In that spirit, Admiral, let me ask you my first question, which really centers on family support. I noted in your testimony your very important reference to the need for "adequate oversight and sufficient funding" for these programs. You say that you "remain open to initiatives designed to further evolve existing programs and look for innovative ways to help our sailors and families become more resilient and ready to meet the enduring demand for Navy forces."

In that spirit, I would like to suggest perhaps to both of you that there really is a need for more family support, particularly in the employment area, where spouses are concerned, and where professional credentialing requirements are imposed that may limit employment for members of families at those bases where they move frequently, as you know much, much better than I, and career options are frequently blocked for frequently relocating military spouses.

I'm sure you're familiar with this problem and I don't need to belabor it for you. But to the extent that we can help on this committee with that issue, certainly I would like to do so. One means of doing so might be to have an individual at bases responsible for those credentialing or professional licensing issues.

But beyond that, perhaps, Admiral, you could speak to the issue of how family support more specifically can be provided to our Navy and perhaps the Navy as a model for the other Services.

Admiral GREENERT. Senator, I appreciate your offer of support. We have a Department-wide, joint effort in credentialing of spouse skills. We have, I believe, eight States where we have gone straight to the governments and the Governor in the case of the chairman, to form a coalition who will agree to accept the credentialing of our military spouses.

We're working very vigorously on this and will be very vigilant. It's a joint effort and we're really mimicking the Army method and model to do that.

I believe that family programs are the foundation for the support of the family, and without a strong family the sailor can't do what he or she needs to do. I'm committed, if I am confirmed, to ensure those programs are properly programmed and budgeted and that they execute properly and we share best practices.

Senator BLUMENTHAL. Thank you.

General, if you could address that same question I'd appreciate it.

General JACOBY. Senator, I really thank you and the committee for taking this on. We are really finding that we've been testing the All-Volunteer Services here over the last 10 years, and we're discovering their strengths and we're discovering things that we can continuously do better.

One of the things that we've discovered is how critical families are. When we ask soldiers, sailors, airmen, marines, and our civilians to deploy over and over and over again in support of our national security interests, we're also asking their families to make tough commitments.

I'm especially grateful for your consideration of the challenges that come from moving, and particularly true for the young families that are moving and young spouses that are seeking employment, and oftentimes that employment is central to running the household. So those initiatives are very, very important. I applaud the efforts and I thank all that are moving those family programs into the base, and I can tell you as a recipient and as a commander across my experience here during the last 10 years of conflict we have gotten better and better with the help of Congress.

So thank you, sir.

Senator BLUMENTHAL. Another area where I found your written testimony very compelling was on the issue of better treatment for our wounded warriors, particularly those suffering from the less visible wounds of war, traumatic brain injury (TBI), and post-traumatic stress. If you could expound perhaps on some of the specifics, where I know that both the Navy and the Army are seeking to address those issues, which are not new to this conflict, but perhaps newly discovered in their importance and their priority.

Admiral GREENERT. Senator, I think we've made some strides. We need to continue to pursue the ability of our medical people to detect the potential for TBI in the field. If somebody gets bonked or has what might be perceived as a concussion, to be able to detect that and to document it and get that person off line and recognize it.

Following up at the completion of a tour of duty, to be sure there are people who may suffer from post-traumatic stress, that we do the proper post-deployment health assessment; and particularly for our reservists, that those that feel different, they may have an issue, that we keep them on active duty, take care of them, do psychological outreach. I think that's a program that has done us well.

Post-deployment returning warrior weekends, people get together, talk about how they feel, what's going on, they get great referrals there.

Lastly, for the Navy we have what we call Navy Safe Harbor. When an individual is wounded, ill, or injured, combat or otherwise, they enter the Navy Safe Harbor. They're a member of Navy Safe Harbor until they choose to leave, go back to full duty, and voluntarily leave Safe Harbor, or they transition to a new lifestyle out of military service and their disability evaluation system is complete.

Senator BLUMENTHAL. My time has unfortunately expired and I may be one of the last of your questioners today. But again, I want to thank you for your service. I want to particularly support your observation, Admiral, in your written testimony, that "An attack

submarine force level below 48 will increase the risk of gaps in our coverage for indications and warnings of potential hostile actions, delay or reduce the arrival of submarines critical to the war fight, and potentially allow an adversary to create and maintain a safe haven.”

I think that is a very powerful and eloquent statement in support of the kind of submarine force that we need. Again, I offer my strong support.

So thank you for being here and thank you for your service, and I look forward to working with you. I have no doubt that you’ll both be confirmed.

Thank you.

Chairman LEVIN. Thank you very much, Senator Blumenthal.

I just have a few questions for the second round and then if any other Senator wants to add to that they should come by.

General, I’ve asked the Admiral about the question of whether the United States should join the Law of the Sea Convention. NORTHCOM is going to have new responsibilities for the Arctic. Can you tell us what your views are about whether the United States should join the Law of the Sea Convention?

General JACOBY. Senator, I believe we should.

Chairman LEVIN. Can you tell us why?

General JACOBY. Senator, I think that when we look at the global commons in all of its domains, particularly at sea, it’s important that the commons are disciplined, that there are international standards, and that those standards are agreed to across the international community. It’s hard to sit at the table with any moral authority or standing when you’re not a member of that treaty.

It’s my understanding as well that we had significant input in the design of it, and so I think our friends, allies, neighbors, and the rest of the community that travels the global commons would benefit from our ability to influence outcomes by being a member.

Chairman LEVIN. Thank you.

You’ve been asked, General, about the cyber security issues and the growing threats of cyber attacks and the growing number of cyber attacks. You indicated in your prehearing questions that DHS is the lead Federal agency for the cyber security of the Nation and that NORTHCOM would operate in support of DHS.

Can you expand just a bit on that? What is the relationship, if any, between the NORTHCOM mission to protect critical infrastructure and its cyber security mitigation role?

General JACOBY. Senator, NORTHCOM would play a supporting role in mitigating consequences of a cyber attack. To that end, close coordination with DHS is a requirement.

Where we have critical infrastructure associated with cyber elements on DOD property, then NORTHCOM would play a critical lead role in defending that or protecting that, with the Services, in protecting that infrastructure. Then, upon request, if there are Federal properties that require additional assistance in their protection, NORTHCOM would play a supporting role.

But across a wide variety of potential impacts on our critical infrastructure, NORTHCOM could be called on to provide support to civil authorities in mitigating the results of a cyber attack. I think when you pull the thread on what could happen if there was a sig-

nificant cyber attack on our electrical grid or other types of infrastructure that has not just maybe local, but regional implications, then you can see where a response of some significance might be required.

Chairman LEVIN. Thank you.

We want to thank you both again and your families for your service. We're going to hope to get these nominations and other pending nominations acted on by the committee yet this week. That's our goal, and then to get you and the others confirmed next week, if not late this week. That's our hope and, even though there are some wild things going on in Congress these days, these nominations I think will not only be confirmed, but will, when people do realize the importance of these nominations and coming together on a bipartisan basis in support of our military efforts and our military families and people who wear our uniforms, these nominations are going to have a settling effort on the environment here in Congress.

So that's our goal, and I will close with that optimistic note, and again with thanks to both of you.

[Whereupon, at 11:07 a.m., the committee adjourned.]

[Prepared questions submitted to ADM Jonathan W. Greenert, USN, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff (CJCS). They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. Goldwater-Nichols has served us well, but in the past 20 years the security environment has changed significantly and a review is worthy of consideration.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. If confirmed, I will work closely with the Secretary of Defense and Secretary of the Navy if I see need for specific improvement.

RELATIONSHIPS

Question. Section 5033 of title 10, U.S.C., discusses the responsibilities and authority of the Chief of Naval Operations (CNO). Section 151 of title 10, U.S.C., discusses the composition and functions of the Joint Chiefs of Staff (JCS), including the authority of the CNO, as a member of the JCS, to submit advice and opinions to the President, the National Security Council, or the Secretary of Defense. Other sections of law and traditional practice, also establish important relationships outside the chain of command. Please describe your understanding of the relationship of the CNO to the following offices:

Secretary of Defense.

Answer. The Secretary of Defense is the principal assistant to the President in all matters relating to the Department of Defense (DOD). As a Service Chief and member of the JCS, the CNO is a military adviser to the Secretary of Defense, particularly regarding matters of naval warfare, policy, and strategy.

Question. Deputy Secretary of Defense.

Answer. The Deputy Secretary of Defense, on occasion, serves as acting Secretary in the absence of the Secretary. During these periods, the CNO's relationship with the Deputy Secretary will essentially be the same as with the Secretary. The Dep-

uty Secretary is also responsible for the day-to-day operation of DOD. If confirmed, I will endeavor to interact regularly with him and provide him with my best possible professional military advice and the same level of support as I would the Secretary.

Question. The Under Secretaries of Defense.

Answer. Under current DOD Directives, Under Secretaries of Defense coordinate and exchange information with DOD components, to include the Services, in the functional areas under their cognizance. If confirmed as CNO, I will respond and reciprocate. If confirmed, I will use this exchange of information as I communicate with the CJCS and provide military advice to the Secretary of Defense.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The CNO is a member of the JCS and, as such, works with and through the Chairman in the execution of duties. Along with the other Service Chiefs, I will be a member of the JCS tasked with the responsibility for actively reviewing and evaluating military matters and offering professional military advice to the President, National Security Council, and Secretary of Defense.

Question. The Vice Chairman of the Joint Chiefs of Staff.

Answer. When functioning as the acting Chairman, the Vice Chairman's relationship with combatant commanders is that of the Chairman. Also, the Vice Chairman has the same rights and obligations as other members of the JCS. If confirmed, I would exchange views with the Vice Chairman on any defense matter considered by the JCS. The Vice Chairman also heads or has a key role on many boards that affect readiness and programs and, therefore, the preparedness of naval forces. If confirmed, I will establish a close relationship with the Vice Chairman on these critical issues.

Question. The Secretary of the Navy.

Answer. The CNO is responsible, under the Secretary of the Navy (SECNAV), for providing properly organized, trained, and equipped forces to support combatant commanders in the accomplishment of their missions. In addition, the CNO assists the SECNAV in the development of plans and recommendations for the operation of the Department of the Navy. The Navy enjoys a productive, collaborative environment within the Department, and if confirmed, I will work closely with the SECNAV.

Question. The Under Secretary of the Navy.

Answer. The Under Secretary of the Navy is the principal assistant to the SECNAV and is first in line of succession. The Under Secretary performs such duties, and exercise such powers, as the Secretary shall direct. If confirmed, I look forward to establishing a close relationship with the Under Secretary and to working with him to achieve the Secretary's goals.

Question. The Assistant Secretaries of the Navy.

Answer. The Assistant Secretaries of the Navy work with the Under Secretary to achieve the Secretary's goals. Like the Under Secretary, the Assistant Secretaries perform such duties, and exercise such powers, as the Secretary shall direct. If confirmed, I will work with the Assistant Secretaries to achieve the Secretary's goals.

Question. The General Counsel of the Navy.

Answer. The General Counsel of the Navy serves as legal advisor to the Department of the Navy and performs such functions as the SECNAV shall direct and as necessary to provide for the proper application of the law and effective delivery of legal services within the Department. If confirmed, I will work closely with the General Counsel to achieve the Secretary's goals.

Question. The Judge Advocate General of the Navy.

Answer. Under 10 U.S.C. §5148(d), the Judge Advocate General (JAG) of the Navy performs duties relating to any and all Department of Navy legal matters assigned to him by SECNAV. The JAG provides and supervises the provision of all legal advice and related services throughout the Department of the Navy, except for the advice and services provided by the General Counsel. It is important that the CNO receive independent legal advice from his senior uniformed judge advocates. If confirmed, I will work closely with the JAG and seek the JAG's legal advice.

Question. The Commandant of the Marine Corps.

Answer. A unique historical and operational relationship exists between the Navy and the Marine Corps. Many of our capabilities, programs, and personnel issues are inextricably linked. Our forces deploy together, and both must be ready on arrival. If confirmed as CNO, my relationship with the Commandant of the Marine Corps must be exceptionally close and I will be committed to making every facet of the Navy-Marine Corps team stronger.

Question. The Chief of the Navy Reserve.

Answer. Under 10 U.S.C. §5143, the Chief of the Navy Reserve serves on the staff of the CNO and is the principal adviser on Navy Reserve matters to the CNO and

is the commander of the Navy Reserve Force. The Chief of the Navy Reserve has an essential role in advising CNO of Navy Reserve capabilities alignment to Navy's Total Force mission and operations. If confirmed, I am committed to working with the Chief of the Navy Reserve to continue and enhance the vast progress and Total Force synergies we have achieved.

Question. The Chiefs of Staff of the Army and Air Force.

Answer. Our Armed Forces must work together to recognize each other's strengths and to complement each other's capabilities. We must achieve and maintain synergy in warfare, training, and procurement to ensure each Service contributes optimally to joint and combined operations. If confirmed, I am committed to working with my counterparts to enhance joint interoperability and other aspects of the joint relationship in order to improve the warfighting capabilities of the United States.

Question. The combatant commanders.

The CNO's responsibility as a Service Chief is to provide properly organized, trained, and equipped forces to the combatant commanders to accomplish their military missions. If confirmed, I will work to foster close working relationships with the unified and specified combatant commanders.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the next CNO?

Answer. The major focus of the next CNO must be to maintain current readiness and provide ready, capable forces; to define and deliver a relevant naval force for the future; and to ensure we continue to attract a motivated, high-quality and diverse force of sailors and civilians. The CNO's enduring leadership covenant is to take care of those who serve today, including our wounded, ill and injured, and their families. The overarching challenge remains balancing priorities in a fiscally-constrained environment.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will remain committed to warfighting readiness to ensure we remain agile, capable, and ready forward. I will continue to employ our Fleet Response Plan while seeking to re-establish a sustainable level of operations consistent with our force structure. We must adapt our deployment models to ensure the viability of both current and future readiness, which involves reaching the expected service lives of our ships and aircraft at reasonable cost.

In light of budget realities, our acquisition programs will face increasing pressure; therefore, it is more important than ever to meticulously review requirements throughout the acquisition process. We will stay in lockstep with the acquisition community and joint partners and be willing to change, adapt, and rescope to meet evolving threats. I intend to partner with the Commandant of the Marine Corps in establishing the finest naval force attainable within fiscal limits; a Naval Force ready to respond today to today's crises—anytime, anywhere. I also plan to remain open, transparent and collaborative with our fellow Services and OSD in efforts to seek cost savings while ensuring our Navy remains strong, effective and relevant. Internal to Navy, we will continue ongoing efforts to eliminate redundant processes, overhead, and costly infrastructures, as well as identify and adopt business best practices as standards for all.

I intend to be unwavering in our obligation to take care of sailors and their families through sustained program oversight and support. They are the Navy's foundation. Attracting and retaining a diverse, high-quality Total Force will require innovative ways to communicate with the youth of our Nation. Once aboard, we will provide opportunities for individuals to rise as far as their talents and ambitions allow.

MOST SERIOUS PROBLEMS

Question. What do you consider to be the most serious problems in the execution of the functions of the CNO?

Answer. The Nation cannot have a strong defense without a strong economy; therefore I view the deficit crisis and corresponding deep cuts in defense as one of the most significant challenges to the entire national security community. Fiscal realities aside, every CNO faces the following challenges executing his duties: (1) properly balancing current resources allocated to sustain, train, and equip the Navy; (2) obtaining the necessary resources to build and man the future Navy; and (3) ensuring continuity among requirements, resourcing, and acquisition in the existing planning, programming, budgeting, and execution process. The Navy's larger imperatives are to remain whole (avoid decisions that create hollow capabilities) and maintain an international forward presence that offers our national leadership options to protect U.S. global interests.

Question. If confirmed, what management actions and time lines would you establish to address these problems?

Answer. If confirmed, I will work closely with my Navy senior leadership team, my fellow Service Chiefs, the CJCS, the SECNAV, and through him, the Secretary of Defense and Congress to develop balanced, fiscally-responsible approaches to addressing and solving these problems.

DUTIES AND QUALIFICATIONS

Question. Section 5033 of title 10, U.S.C., describes the duties of CNO and requires that the person nominated to fill the job have had significant experience in joint duty assignments, including at least one full tour of duty in a joint duty assignment as a flag officer.

What background and experience do you have that you believe qualifies you for this position?

Answer. I believe the breadth and depth of my experience as a naval officer and joint warfighter qualifies me for this position. I had the privilege of five commands, including assignments as Commander U.S. SEVENTHFLT, where I served as a Joint Task Force Commander, Joint Force Maritime Component Commander, and Coalition Force Maritime Component Commander for two major Pacific war plans. As Commander, U.S. Fleet Forces Command, I was responsible for the Navy's Global Force Management and support to three combatant commanders. In my current position as Vice Chief of Naval Operations, one of my core responsibilities is to serve as Navy's representative for joint capabilities development. My five tours on the Navy headquarters staff and financial management specialization have provided me deep insight on integration of warfighting capabilities and resources; business operations; planning, programming, budgeting and execution; and cost reduction efforts in a fiscally constrained environment.

Question. Do you meet the joint requirements for the position or did you require a waiver?

Answer. Yes, I required a waiver. Per 10 U.S.C. section 5033(s)(3), the President may waive the joint requirements. My nomination is based in part on my joint duty assignment as a flag officer while serving as the U.S. Pacific Command Representative, Guam, Commonwealth of the Northern Mariana Islands, Federated States of Micronesia, Republic of Palau. The Secretary of Defense requested this waiver based on the recommendation of the SECNAV and the advice of the CJCS.

UNITED NATIONS CONVENTION ON THE LAW OF THE SEA

Question. Officials of DOD, including previous Chiefs of Naval Operations, have advocated for accession to the Law of the Sea Convention.

Do you support United States accession to the United Nations Convention on the Law of the Sea?

Answer. Yes. The United States is the world's foremost maritime power and our security interests are intrinsically global in nature. Our Navy is deployed throughout the world. We have more to gain from legal certainty and public order in the world's oceans than any other nation. Joining the Convention will reinforce our Cooperative Strategy for 21st Seapower and the Naval Operations Concept 2010 to confront maritime security challenges.

Question. How would you respond to critics of the Convention who assert that accession is not in the national security interests of the United States?

Answer. I believe that accession to the Law of the Sea Convention is in our national security interests. The basic tenets of the Convention are clear and beneficial to the Navy. From the right of unimpeded transit passage through straits used for international navigation and reaffirming the sovereign immunity of our warships, to providing a framework for countering excessive claims of other states and preserving the right to conduct military activities in exclusive economic zones, the Convention provides the stable, predictable, and recognized legal regime we need to conduct our operations today and in the future.

U.S. military forces must be able to operate freely on, over, and above the world's oceans. That freedom is critical to our national security interests, the military in general, and the Navy in particular. The Law of the Sea Convention codifies fundamental benefits important to our operating forces as they train, transit, and fight. Amendments made to the Convention in the 1990s satisfied many of the concerns that opponents have expressed. Also, joining the Convention will not subject the U.S. Navy to the jurisdiction of international courts, nor will it adversely affect the President's Proliferation Security Initiative (PSI) or United States intelligence activities.

The Convention is the bedrock legal instrument underpinning public order for the world's oceans. By joining the Convention, we can best assert our leadership in oceans law and policy, and in conjunction with our Freedom of Navigation program, we can best protect the navigational rights and freedoms that are of such critical importance to our Nation's security and economic prosperity.

Question. In your view, what impact, if any, would U.S. accession to the Law of the Sea Convention have on ongoing and emerging maritime disputes such as in the South China Sea and in the Arctic?

Answer. The United States is the only permanent member of the U.N. Security Council and the only Arctic nation not a party to the Law of the Sea Convention. U.S. economic interests in the Arctic are significant, including natural resources, shipping and trade. The United States has an extended continental shelf (ECS) that is likely to be more than 1 million square kilometers—an area nearly half that of the Louisiana Purchase, with energy and mineral resources that have been estimated to value up to \$1T and include mineral deposits and petroleum resources (oil, gas, gas hydrates).

In the ongoing tensions over rights in the South China Sea, the United States will be in a stronger position of influence by joining the Convention that provides the legal regime for the oceans. U.N. Convention on the Law of the Sea (UNCLOS) membership will put the full weight of U.S. political leadership behind the legal maritime framework it upholds. Application of the legal standards and framework as codified by UNCLOS is central to resolution of existing maritime disputes. Our friends and allies need our political leadership within UNCLOS to influence resolution of South China Sea disputes in accordance with the legal standards and customary maritime law as defined by UNCLOS.

TRANSFORMATION

Question. If confirmed, you would play an important role in the process of transforming the Navy to meet new and emerging threats.

What are your goals regarding Navy transformation?

Answer. The Navy is on a good course and speed regarding transformation initiatives and we have a good navigation plan for the future. If confirmed, my goals will remain largely consistent with our current efforts. For example, Navy has taken the lead within DOD in reshaping itself to meet current and future cyber threats and opportunities, but we have more work to do to capitalize on our progress to date and realize the full potential of our growing cyber force. We must continue to mature Navy's recently-formed Information Dominance Corps, which will help develop integrated solutions in unmanned ISR systems, Electronic Warfare, and C5I. We must continue to retain our advantage in the undersea domain in order to achieve joint assured access wherever it is needed. We will also focus on supporting the development of emerging technologies we think hold the greatest promise for future naval and joint warfighting (such as the railgun, Free Energy Laser, and Directed Energy).

Underpinning all these goals is a need to transform our demographics within the Navy to ensure our personnel reflect the society we defend. I intend to pursue diversity goals within established policy guidelines, so that we can recruit, retain, and promote the best talent the Nation has to offer, regardless of color, creed, ethnicity, sexual orientation, or gender.

FLEET READINESS

Question. Recently, there have been a number of ships that have failed inspections by the Board of Inspection and Survey (INSURV), including Aegis cruisers and destroyers due to poor material condition. Some have suggested that these INSURV failures result from increased deployment demands supporting current operations. Others have suggested they are caused by deficiencies in the maintenance efforts or deficiencies of leadership in maintaining these ships.

What do you believe has caused these increases in INSURV inspection failures, and what would you propose to do about it?

Answer. The Navy has been aggressively tackling causal factors related to increases in INSURV inspections that have resulted in "degraded" or "unsatisfactory" findings. A major contributor to these problems has been our high operational tempo to support ongoing conflicts over the last decade. Frequent deployments, compounded by a decreasing fleet size, have constrained our ability to adhere to pre-planned maintenance schedules. Other causal factors include past decisions regarding "optimum manning" (excessive reductions in ship manning), technical training for sailors, material assessment training for senior officers, shifts in staffing of in-

intermediate maintenance activities, and planning and execution of surface ship maintenance.

We have initiated a number of activities to improve overall readiness of our surface ships over the long term. The Naval Sea Systems Command has established SEA-21, a directorate dedicated to managing the complete lifecycle support, maintenance and modernization for all non-nuclear surface ships operating in the Fleet. Another critical step forward is the improved research, planning, and execution of surface ship maintenance built upon the proven processes we use in the carrier and submarine communities. We are increasing the crew size of select ship classes, focusing on critical technical ratings, creating waterfront material assistance teams, and increasing the staffing of Regional Maintenance Centers. Technical training has been updated to increase hands-on experience and improve the balance between computer-based and instructor-led classes. We have partnered with the American Bureau of Shipping to improve our assessment of ship material condition and actions required to achieve the expected service life of each hull. These initiatives are resulting in tangible improvement in surface ship readiness, and improvement in functional areas in recent INSURV inspections, as attested to by recent Fleet reports. If confirmed, I intend to continue to promote and support these actions, which are expected to continue to have a positive impact on material readiness of our surface ships over the next several years.

ACQUISITION MANAGEMENT

Question. Do you see a need for any change in the role of the Office of the CNO in the requirements determination, resource allocation, or acquisition management processes of the Department of the Navy?

Answer. From my perspective, the role of the CNO in the requirements determination and resource allocation process is clear and appropriate. While the current cooperation among the CNO and acquisition officials is good, it should not be personality dependent. Service Chiefs should have a more formal role in acquisition management to ensure continuity among the requirements, resourcing and acquisition processes.

Question. Do you see a need for any change in the structure or functions of the Joint Requirements Oversight Council (JROC) or the role played by the CNO and the Vice Chief of Naval Operations in the JROC?

Answer. I do not. I will continue to support the important work of the JROC. If confirmed, and after I have participated in the process, I will recommend changes as appropriate.

ANTI-ACCESS/AREA DENIAL

Question. Over the past few years, much has been made of the emerging anti-access and area denial capabilities of certain countries and the prospect that these capabilities may in the future limit the U.S. Navy's freedom of movement and action in certain regions.

Do you believe emerging anti-access and area denial capabilities are a concern and, if so, what do you believe the Navy needs to be doing now and in the next few years to ensure continued access to all strategically important segments of the maritime domain?

Answer. There are an increasing number of foreign capabilities that have the potential to slow or prevent the deployment of friendly forces into the theater, cause our forces to operate from distances further from a crisis than desired, or to disrupt friendly operations in theater by targeting our enabling capabilities. The Navy has and will continue to develop programs that provide capabilities and capacity to address emerging anti-access threats. Accordingly, we are strengthening our partnerships, modernizing our forces, fielding new capabilities and technologies, and developing new operational concepts. One specific initiative that will help preserve access and freedom of action in denied areas is implementation of the Air-Sea Battle Concept. This effort leverages advantages a particular service has in one domain in order to enable or enhance effects in another domain through integrated operations of networked naval and air forces. Air-Sea Battle implementation will ensure continued U.S. advantage against emerging anti-access threats.

RECAPITALIZING THE FLEET

Question. Despite the fact that Navy leadership has determined that it needs to have a 313-ship fleet to meet the maritime requirements of the National Military Strategy, it is currently operating with 284 battle force ships. The Congressional Budget Office (CBO) has concluded that the Navy has underestimated the costs for building the 313-ship fleet by approximately 16 percent.

Do you agree with the CBO's assessment that there is significant cost risk associated with the Navy's shipbuilding plan?

Answer. The Navy and CBO are in relatively close agreement in our cost estimates for the first 10 years of the 30-year shipbuilding plan because we have a good understanding of the ships requirements and costs. In the second 10 years, our cost estimates begin to diverge because we lose some of the cost fidelity, and inflation factors come in to play. There is a difference between the way the Navy cost estimators account for inflation versus the way CBO accounts for inflation, which impacts the gap between CBO's estimates and the Navy's estimates. In the last 10 years of the 30-year plan, the gap increases are driven by this difference in inflation estimates, and by the assumptions made for the capabilities and costs of new ships. As the near term is most relevant from an execution perspective, the relatively small differences pose limited risk to the shipbuilding plan.

Question. What actions do you believe are necessary to execute the Navy's shipbuilding plan within the Navy's budget estimates?

Answer. In the near term, I anticipate the acquisition community will continue its efforts to promote efficiency and competition in the industrial base to gain best value for the Navy and the taxpayer. For the longer term, we will work to control changes in requirements and ensure requirements for new classes of ships are limited to essential or mandated capabilities.

Question. How would you characterize the risks to mission performance posed by the current shortfall in battle force ships and the growing shortfall in tactical aircraft?

Answer. The Navy is meeting critical Combatant Command (COCOM) demand for battle force ships and associated tactical aircraft. While not able to meet the cumulative annual global COCOM requirements, Navy is meeting all adjudicated demands through the Joint Global Force Management process, based on prioritized requirements defined by the OSD's Guidance for the Employment of the Force.

Question. What adjustments to the respective programs are necessary and appropriate to reduce that operational risk?

Answer. Based on our current strategy, I believe the President's budget reflects the best balance of resources across the totality of our requirements.

Question. What further adjustments would you consider if the Navy's program comes under further pressure due to cost growth?

Answer. Pending the outcome of the current strategic review, it is premature to identify where it might be most appropriate to adjust requirements.

ALTERNATIVE FINANCING METHODS FOR SHIPBUILDING

Question. Navy leaders have testified that alternative financing methods must be found for shipbuilding.

What are your views and recommendations on the benefits and feasibility of alternative financing methods, such as incremental funding and advance appropriations?

Answer. The Navy currently has incremental funding authority for our most expensive ship class, nuclear carriers, and Congress has granted 2-year funding authority for some large amphibious ships. This authority has been helpful in mitigating the impact of the high levels of funding required by these ships on other ships which need to be procured to achieve required force levels and to more efficiently load the shipbuilding industrial base.

Question. What is your assessment of the long-term impact of such alternative financing methods on the availability of funds for shipbuilding?

Answer. Alternative financing methods allow the Navy to maintain the shipbuilding industrial base through more efficient management of SCN total obligational authority. Different financing periodicities provide greater flexibility in executing scarce resources and help avoid individual-year funding spikes. Whenever possible, the Navy remains committed to following a full-funding policy, where the entire obligation is provided upon contract award.

ATTACK SUBMARINE FORCE LEVELS

Question. The Navy's most recent statement of requirements for attack submarine force levels was 48 attack submarines. However, the Navy projects that the number of attack submarines will fall as low as 39 boats and remain below the 48-boat requirement for almost two decades. The Navy is now claiming that it will be able to mitigate this shortage using three techniques: (1) building the new *Virginia*-class submarines faster by reducing the time between the start of construction to delivery from the current level of 86 months for the last boat to deliver to a level of 60 months; (2) extending the life of some boats currently in the fleet from 3 to 24 months; and (3) increasing the length of deployments

What is your assessment of whether the three techniques listed above will yield a number of deployed attack submarines sufficient to meet the requirements of the combatant commanders and other intelligence, surveillance, and reconnaissance needs?

Answer. The Navy has already made progress in shortening the time to build the *Virginia*-class SSN to 66 months for the most recent delivery, USS *Missouri* (SSN-780). The program is on schedule to meet its ultimate goal of a 60-month construction span. This has the effect of adding one submarine to the force, thereby delaying the onset of the SSN force structure trough which will begin in 2024. Projected life extensions of a limited number of SSNs is possible, but will relieve less than 20 percent of the force structure trough and its duration. Increasing the length of deployments can improve forward deployed presence for short-term periods but does not address the impending force structure trough. Taken together, although helpful, these three techniques will not be sufficient to meet the shortfall relative to combatant commander's requirements under current planning guidance.

Question. What risks are being incurred by allowing the attack submarine force levels to remain below 48 for so long?

Answer. Under current planning guidance, an attack submarine force level below 48 will increase the risk of gaps in our coverage for indications and warning of potential hostile action, delay or reduce the arrival of submarines critical to the war fight, and potentially allow an adversary to create and maintain a safe haven.

OHIO-CLASS REPLACEMENT

Question. A major cost risk facing the Navy at the end of this decade is the cost of replacing the *Ohio*-class strategic missile submarines. The acquisition process has already resulted in the Navy acquisition system making a number of cost vs. capability decisions to try to reduce those costs risks to the shipbuilding budget.

Do you agree with the decisions that have been made about the capability of the *Ohio*-class replacement submarines?

Answer. The *Ohio* Replacement Program Milestone "A" decision reflects cost versus capability trades that were jointly agreed on by the requirements and acquisition stakeholders in the Navy and DOD. I support these decisions.

Question. How confident are you that the program will be able to produce an *Ohio*-class replacement vessel that meets current cost objectives?

Answer. The *Ohio* Replacement Program has been thoroughly reviewed. All aspects of the program (warfighting requirements, program execution, design and construction efforts) were aggressively challenged to drive down non-recurring engineering and construction costs. The Navy estimates that the average *Ohio* Replacement cost for hulls 2-12 will be \$5.6 billion with a goal of reducing this to \$4.9 billion.

I believe these estimates are achievable in the context of the current shipbuilding plan due to the scrutiny on requirements and costs leading up to the Milestone "A" decision.

SEA-BASED ISR

Question. There is a documented Joint Urgent Operational Need for sea-based Intelligence, Surveillance, and Reconnaissance (ISR) to support missions by special operations forces in areas where land-based ISR is unavailable. The committee understands the Navy recently completed a proof of concept which demonstrated the value of such a capability to current combat operations, but does not intend to field a program-of-record solution until 2019.

What is your understanding of the requirement for sea-based ISR capabilities to support special operations forces?

Answer. Navy is planning and developing capabilities that will help satisfy legitimate ISR demands of Special Operations Forces. The intent is to procure ISR systems with multi-intelligence sensor modules, on station endurance and integrated weapons to support a broad range of missions from the sea.

Question. Do you believe the responsibility for fielding sea-based ISR capabilities to support Special Operations Forces falls on the Navy or U.S. Special Operations Command (SOCOM)?

Answer. Fielding sea-based ISR capabilities is a shared responsibility that begins with coordination over requirements and development of systems that can execute many types of ISR missions for operational commanders. Demands for service-specific ISR already in the field is managed through the Joint Staff Global Force Management Allocation Plan and Request for Forces. The Navy is investing in sea-based ISR support to SOF with programs of record such as the Small Tactical Unmanned Air System (IOC 2013) and the Medium Range Maritime Unmanned Air System

(IOC 2019). While program development continues, the Navy is committed to supporting SOF from the sea with other capabilities to include Fire Scout, land-based Scan Eagle support, manned ISR aircraft and deployed combatants. The Navy is pursuing options to accelerate the fielding of an upgraded Fire Scout that will provide enhanced endurance and payload.

Question. Do you believe the Navy's current timeline for fielding a program-of-record capability for sea-based ISR is appropriate?

Answer. The Navy has embarked upon a transition to a future ISR "Family of Systems." The Family of Systems will allow the Navy to transition from a limited number of multi-intelligence manned platforms to a greater number of systems that are tailorable and scalable to meet Navy, Coalition and joint warfighter requirements. We are making significant investments of over \$8 billion across fiscal year 2012–fiscal year 2016 to address the Navy's future requirements, including funding for the following Unmanned Airborne Systems: Fire Scout (\$1.1 billion, IOC 2012), Broad Area Maritime Surveillance (\$3.9 billion, IOC 2015), Unmanned Carrier Launched Airborne Surveillance and Strike (\$2.5 billion, IOC 2018), and Medium Range Maritime Unmanned Aerial System (\$1.1 billion, IOC 2019). These platforms with appropriate sensors and processing will recapitalize the capabilities currently provided by EP-3 and Special Projects Aircraft and are programmed for delivery to the fleet prior to EP-3/SPA end of service life in the 2019–2020 timeframe.

SPECIAL OPERATIONS PERSONNEL MANAGEMENT

Question. Some have argued that the Commander of SOCOM should have greater influence on special operations personnel management issues including assignment, promotion, compensation, and retention of Special Operations Forces. One proposal would modify section 167 of title 10, U.S.C., to change the role of the SOCOM Commander from "monitoring" the readiness of special operations personnel to "coordinating" with the services on personnel and manpower management policies that directly affect special operations forces.

What is your view of this proposal?

Answer. I do not believe the proposal is necessary. Navy already coordinates with SOCOM—typically through the component SOF commander to SOCOM—on a wide variety of personnel policy/actions such as individual selection, assignments, promotion precepts, and command selection. It is vital that a Service is vested with final decision authority when it comes to personnel and manpower management policies.

CAPABILITIES OF SPECIAL OPERATIONS FORCES AND GENERAL PURPOSE FORCES

Question. The 2010 Quadrennial Defense Review called for increased counter insurgency, counterterrorism, and security force assistance capabilities within the general purpose forces. These missions have traditionally been within the purview of Special Operations Forces.

What actions, if any, do you believe need to be taken in order to allow special operations and general purpose forces to successfully share these missions in the future?

Answer. The Navy continues to emphasize coordination and integration, where appropriate, of Navy's General Purpose Forces (GPF) and Special Operation Forces (SOF) for Counterterrorism (CT), Counterinsurgency (COIN) and Security Force Assistance (SFA) missions. These missions are shared in many parts of the world, whether using naval platforms for Afloat Forward Staging Bases in remote littoral areas, integrating sea-based ISR and fires support to augment SOF "find, fix, finish" operations, or using Naval Expeditionary Combat Command units to support SFA activities. We will continue to encourage increased coordination between GPF and SOF units in pre-deployment phases. Navy's inherent multi-mission focus continues to give operational commanders options to mix and match capabilities to best meet their mission needs in forward areas.

Question. Are there certain mission areas that should be Reserved for special operations forces only?

Answer. Unconventional Warfare and Direct Action missions in Counterterrorism should stay predominantly within the purview of SOF.

SCIENCE AND TECHNOLOGY PROGRAM

Question. The budget request for defense Science and Technology (S&T) still falls short of the Defense Science Board's recommended goal of dedicating 3 percent of the total defense budget to S&T. In particular, the Navy S&T program, especially the investment in long-term, innovative work which has been so successful in con-

fronting emerging threats, has declined significantly since the fiscal year 2006 request.

If confirmed, what metrics would you use to assess whether the Navy is investing adequately in S&T programs?

Answer. Three key components exist to an effective S&T program: (1) a strong and focused investment in basic and early applied research to build the scientific foundation for future technologies, (2) an emphasis on key “game changing” initiatives that can provide disruptive technologies to the Navy and Marine Corps warfighter, and (3) an ability to transition S&T programs to the acquisition community and the Fleet. One way we assess the adequacy of our investments is to assess the balance of effort and output in each of these areas. A second metric is our success rate in transitioning viable and affordable S&T initiatives into the acquisition programs that make it to the Fleet.

Question. How would you assess the value and appropriate investment level for basic research programs?

Answer. Discovery and Invention (D&I) includes basic research (6.1) and early applied research (6.2) in areas with unique requirements essential to the naval mission and in areas that are undefined but hold promise for future application. D&I develops fundamental knowledge, provides the basis for future Navy/Marine Corps systems, sustains our scientist and engineer workforce, and contributes to long term DoN strategic goals. D&I constitutes the largest portion, approximately 40 percent, of the Navy’s \$2 billion S&T investment. We believe this investment is appropriate for our needs.

TECHNICAL WORKFORCE

Question. A significant challenge facing the Navy today is an impending shortage of high quality scientific and engineering talent to work at Navy laboratories and technical centers.

In your view, what are the pros and cons of having active-duty Navy personnel trained and working as scientists and engineers within the Navy research and acquisition system?

Answer. The Department of the Navy’s technical workforce has been the reason for the Navy’s long-term technical success in developing and fielding advanced maritime systems. The current level of U.S. Navy talent is high—producing the world’s top-ranked government patent portfolio, according to the Institute for Electrical and Electronics Engineers. Navy estimates that close to 50 percent of our S&T professionals will be retirement eligible by 2020. Attracting, recruiting, and retaining qualified scientific and engineering talent is critical to the Navy and the Nation’s future.

The use of uniformed military officers to fill potential shortfalls in our scientific community helps infuse an understanding of fleet operations and requirements, and strengthens the military-civilian partnership in our acquisition system; however, laboratories and technical centers are best served by a strong, stable cadre of civilian specialists who provide long-term, dedicated support in their highly specialized fields of study.

TEST AND EVALUATION ISSUES

Question. What do you see as the role of the developmental and operational test and evaluation communities with respect to rapid acquisition, spiral acquisition, and other evolutionary acquisition processes?

Answer. The developmental and operational test community role in rapid acquisition is the same as that of traditional acquisition. Adequate testing is critical to assess performance of systems in operationally realistic environments. Testing informs decision makers of the capabilities and limitations of systems and how they perform relative to the acquisition program requirements or the operational need. The goal is to do this as early as possible and before systems are fielded. The only significant difference between “normal” acquisition processes and rapid acquisition or urgent needs is the flexibility and timeline for testing requirements and the oversight provided. In general, the test community has flexible policies which can be customized. A good example of this is the Quick Reaction Assessment on the Littoral Combat Ship, which allowed it to deploy earlier in support of Fleet needs.

Question. Are you satisfied with the Navy’s test and evaluation capabilities?

Answer. Yes. Current T&E capabilities are adequately funded to meet acquisition program requirements and Navy Ranges and Labs are considered key to assessing system performance. The Navy has a robust process to evaluate current and future T&E capability needs. Through the Tri-Service T&E Reliance process, we work with the other Services and the OSD Test Resource Management Center to review exist-

ing test infrastructure, assess health, and ensure adequate test capabilities and capacity exist without unnecessary duplication.

Question. In which areas, if any, do you feel the Navy should be developing new test and evaluation capabilities?

Answer. We continue to look at emerging technologies and the T&E capability needed to test them. New focus areas may require future capability investments as systems are developed and their T&E needs and challenges are defined. Requirements for new technologies and programs of record will be used to determine shortfalls and build investment plans for Navy T&E Improvement and Modernization funding. We also work with OSD and the other Services to develop Joint T&E capabilities, where appropriate.

BALLISTIC MISSILE DEFENSE

Question. The Navy will play an important role in defending the Nation against the threat of long range ballistic missile attack and in defending allies, friends, and deployed forces against theater ballistic missile threats.

The Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383) required the SECNAV to submit a report to the congressional defense committees on the requirements for major combatant surface vessels with respect to ballistic missile defense (BMD). The Navy report stated that the Navy has established a requirement for fiscal year 2024 of having a force of 94 multi-mission large surface combatants (including BMD capability).

The Navy also delivered a copy of its 30-year shipbuilding plan to the committee. The Navy projects that they will achieve the 94-ship goal for BMD-capable ships in 2020 and 2021, although force levels will decline thereafter. Specifically, the Navy projects that they will have, at most, 92 BMD-capable ships in 2024 before declining to 65 ships in 2034.

Do you view BMD as a core Navy mission?

Answer. Navy BMD is fully consistent with our Maritime Strategy, enhancing deterrence, supporting sea control and the conditions for power projection, all of which is achieved through forward presence. The Geographic Combatant Commanders recognize the value of this capability and have created a high demand for these assets, as demonstrated through the validation of an increase in the large surface combatant requirement from 88 to 94 in the current planning environment.

Question. What options should the Navy be exploring to reduce the shortfall in meeting the stated requirement of having 94 BMD capable ships?

Answer. The Navy has already embarked on an effort to increase the production of BMD capable large surface combatants through the restart of the DDG-51 production line, promoting competition in DDG production to improve cost, setting the conditions for a future DDG multi-year program, and adding an additional DDG in fiscal year 2014. The Navy has also embarked on a focused effort to control costs in the *Ohio* Strategic Ballistic Submarine replacement program to minimize impacts on other elements of the shipbuilding plan.

ACTIVE-DUTY END STRENGTH

Question. According to the latest data provided to the committee, the Navy remains on pace to exceed its 2011 authorized end strength and the problem is likely to continue into 2012, given the state of the economy and the fact that the Navy plans to reduce its active-duty end strength by 3,000 sailors in 2012. The other Services are facing similar problems as the Air Force is also overstrength and the Army and Marine Corps are planning significant force reductions. To address these issues, DOD is seeking force management tools that require congressional authorization.

What force management tools does the Navy need to address these issues, and which of these require congressional authorization?

Answer. Our strength projections show we will finish the fiscal year under our congressionally-authorized end strength. We have taken action to shape the force, such as reducing accessions, conducting a selective early retirement board and holding an enlisted retention board. High retention and low attrition continue to challenge our ability to keep a balanced force in terms of seniority, skill, and experience.

I support the administration's fiscal year 2012 Defense Authorization Request that seeks approval for the following Force Management Authorities:

- Reinstatement of Enhanced Selective Early Retirement authority would expand the retirement eligible pool of officers to target to shape the force.
- Extension of Voluntary Separation Pay, to provide Secretaries of the military departments with temporary authority to continue using voluntary separation pay.

- Reinstatement of Temporary Early Retirement Authority (TERA) to target officers with between 15 and 20 years of service for early retirement.
- Voluntary Retirement Incentive (VRI) to provide a voluntary retirement incentive to servicemembers with 20 and 29 years of active service, who would retire prior to their planned retirement dates without the need to force their retirement through involuntary means.
- Authority to Reduce Years of Service for Mandatory Retirement for certain Officers in the Grade of O-5 from 28 years to 25 years.
- Authority to Reduce Years of Service for Mandatory Retirement for certain Officers in the Grade of O-6 from 30 years to 27 years.

Question. In addition to Enlisted Retention Boards, what methods does the Navy plan to use to reduce active-duty end strength from 2012 through 2014?

Answer. The objective of our force management policies is to preserve a balanced force based on seniority, skill sets, reward our best performers; and position the force to meet future manpower requirements for our projected force structure. We assess our end strength requirements each year as part of the budget submission process. For fiscal year 2012, Perform to Serve, our centralized reenlistment process, will be augmented by a Selective Early Retirement Board and an Enlisted Retention Board to meet our projected end strength. As we have yet to determine our end strength levels for fiscal year 2013 and beyond, it is too early to determine our required end strength target or assess methods we might use should a reduction be necessary. I anticipate we will make those decisions coincident to our fiscal year 2013 budget request.

NAVY RESERVE

Question. What is your vision for the roles and missions of the Navy Reserve, and, if confirmed, what objectives would you seek to achieve with respect to the Navy Reserve's organization, end strength, and force structure?

Answer. The mission of the Navy Reserve is to provide strategic depth and deliver operational capabilities to our Navy and Marine Corps team and joint forces, from peace to war. Our vision for the Navy Reserve is to be a provider of choice for essential naval warfighting capabilities and expertise, strategically aligned with mission requirements and valued for its readiness, innovation, and agility to respond to any situation. Our Navy is carrying out this mission and working toward that vision.

In the decade since the September 11, 2001, attacks on our Nation, our Navy Reserve has answered the call. Going forward, we face a changing global security and economic environment, and we will ensure our Navy Reserve remains aligned with mission requirements. Because our Navy Reserve is ready, innovative and agile, we can assign capabilities and missions to our Reserve component with confidence. Even as we reduce our presence in Iraq and Afghanistan, I see a continued need and desire to keep our Navy Reserve engaged as a full partner in Navy's Total Force. We will work together to ensure Navy's Total Force, Active and Reserve, delivers the right capabilities to the Nation at the best value to the taxpayer.

Question. How do you anticipate the Navy will use new legislative authorities, if enacted, that would permit involuntary call-up of reservists for pre-planned, operational missions?

Answer. As we move forward into a post-Overseas Contingency Operations (OCO) environment, the Navy Reserve should be a regular part of our worldwide deployment cycle, as well as performing the Navy's predictable, part-time missions, where appropriate. The new authority would provide the ability to fully use the Reserve components as a rotational, operational force to augment the Active component forces in the execution of planned missions in support of the President's national security strategy, as well as for operational missions. For instance, our Navy Reserve Seabees are currently part of the Navy's Total Force mobilized deployment cycle. They mobilize in a one in five cycle, which allows the active duty Seabees to maintain a 1-in-3 cycle. This provides a cost-effective model for both components while maintaining sufficient strategic depth in this capability. Post-OCO, without this legislation, our ability to continue to use some of the Reserve component as an operational force, as we currently are and described above, would be severely inhibited.

JOINT OFFICER MANAGEMENT

Question. What is your assessment of the effectiveness of the Goldwater-Nichols-required Joint Qualification System (JQS)?

Answer. When the JQS was implemented on 1 October 2007, it recognized the skills that support U.S. military response to national security threats, interagency coordination, combat operations, and humanitarian crises. It also accounts for the

intensity, environment, and duration or frequency of a joint experience. The JQS provides the opportunity to create and sustain the largest possible pool of fully-qualified and inherently joint leaders suitable for joint command and staff responsibilities in both the Active and Reserve components.

Question. Do you think additional changes in law or regulation are needed to respond to the unique career-progression needs of Navy officers?

Answer. The JQS effectively addresses the need of the military services to provide qualified Active and Reserve component personnel in support of joint missions. We will continue to evaluate the effectiveness of the JQS and will consider changes in law or regulations as required or needed. No changes are proposed at this time.

Question. In your view, are the requirements associated with becoming a Joint Qualified Officer, including links to promotion to general and flag officer rank, consistent with the operational and professional demands of Navy line officers?

Answer. We have made solid progress in policy initiatives linking career progression and joint management policies within Navy line officer career paths. While it is challenging to meet these joint requirements, especially for nuclear-trained aviators commanding our aircraft carriers, we continue to assign high-quality line officers to joint billets. Our goal is to sustain a cadre of officers who are fully qualified and inherently joint leaders, suitable for joint command and staff responsibilities. We are meeting our joint promotion objectives and filling our joint assignments and JPME seats with high-caliber officers.

Question. Do you think that career judge advocates in the Navy should be required to complete joint professional military requirements in connection with operational law requirements?

Answer. I believe there is value for judge advocates to obtain Joint Professional Military Education (JPME). I understand that the JAG Corps intends to formalize JPME guidance that would strongly encourage judge advocates to complete JPME Phase I as part of JAG Corps training requirements. The feedback the Judge Advocate General will receive from this initiative will inform any decision that will be made regarding the desire to formalize judge advocate participation in the joint officer management program and joint qualification system.

SELECTIVE EARLY RETIREMENT AUTHORITY

Question. The Navy has requested that Congress reinstate enhanced authority for selective early retirement.

What changes in existing law, if any, regarding selective early retirement, are needed in your view?

Answer. Although Navy prefers to utilize voluntary force shaping methods before resorting to use of involuntary Selective Early Retirement (SER), we have determined that its employment will be necessary in fiscal year 2012 and beyond as Navy transforms to meet future warfighting requirements. Accordingly, Navy believes that Selective Early Retirement authority should be extended until December 2018 and that enhanced authority should:

- permit consideration of members for early retirement more than once in any 5-year period;
- permit consideration for officers in the grade of O-5 who have failed to select for promotion one time (rather than two or more times); and
- permit selective early retirement of officers in the grade of O-6 with greater than 2 years time in grade.

INDIVIDUAL AUGMENTEES

Question. The Navy continues to support non-traditional requirements through the use of individual augmentees (IAs). Admiral Roughead, in his written testimony for the Navy Posture Hearing earlier this year, stated that there were, at that time, more than 14,000 sailors deployed in the CENTCOM Area of Operations on the ground, with some significant portion of these sailors serving as IAs.

Will the Navy continue to be able to support these non-traditional assignments as it draws down its end strength?

Answer. Properly manning our ships, squadrons and submarines while simultaneously supporting Overseas Combat Operations (OCO) and meeting end strength limits is increasingly challenging. Previous manpower programming provided additional end strength authorizations to support the OCO IA demand. In anticipation of the drawdown of operations in Iraq and Afghanistan, the Navy has phased out Non-Core and Adaptive Core billets from the baseline budget request, and is no longer authorized OCO-related supplemental end strength. In order to properly man our units, this will require the Navy to limit the number of sailors and officers it sends on OCO IA assignments in coming years.

Question. What are the criteria being applied to determine which Active and Reserve officers and enlisted personnel are assigned duty as IAs?

Answer. The Navy provides over half of its IA support in core skill areas, such as cargo handling, airlift support, and SeaBees. Navy also provides sailors for provincial reconstruction, detainee operations, civil affairs, customs inspection, and a variety of other “non-core” missions. The joint sourcing process to meet both “core” and “non-core” requirements is deliberate and is currently focused on reducing IA requirements without unduly increasing the risk to mission success.

Question. How do these assignments impact Navy readiness?

Answer. Every sailor on an OCO IA assignment is a sailor away from his or her primary duty station. This has a direct impact on the manning of our operational units and ultimately could degrade readiness. Sailors on Non-Core OCO IA assignments are not maintaining their primary, or core Navy skill sets, potentially degrading future operational and material readiness. This requires a balance when considering IA assignments for our sailors so that we do not disadvantage them.

Question. What benefit, if any, inures to the Navy as a result of these assignments?

Answer. Sailors and officers who serve on OCO IA assignments gain valuable leadership skills and experience in joint, interagency, and nontraditional Navy skills. Many OCO IA assignments also provide coalition experience that further enhance professional skills and adaptability.

RESERVE COMPONENTS AS AN OPERATIONAL RESERVE

Question. What is your understanding and assessment of the Navy Reserve as an Operational Reserve, as opposed to its longstanding traditional role as a Strategic Reserve?

Answer. The Navy Reserve is doing a magnificent job in both their operational and strategic roles. These missions are not mutually exclusive. The Navy Reserve can operate anywhere along the spectrum from strategic to operational, and as long as commanders have assured access to their Reserve component sailors, we can confidently assign missions to the Navy Reserve where it makes operational and fiscal sense.

Question. In your view, what are the major challenges to maintaining and enhancing the Navy Reserve as a relevant and capable Operational Reserve?

Answer. Our Navy Reserve is relevant and capable today because we have invested in our people and our equipment, we have assigned them real and meaningful work, and we have honored the support of our families and our employers. In the future, we need to ensure our sailors continue to have the training and equipment they need to maintain their readiness. Much of the Reserve’s valuable training and operational support is funded with Active Duty for Training (ADT) dollars. We must maintain an appropriate level of ADT funding to ensure our sailors are a relevant and capable force. Obtaining congressional legislation allowing assured access of the Navy Reserve for routine deployments would further enhance the Reserve as a relevant and capable operational force.

Question. What are your views about the optimal role for the Reserve component forces in meeting combat missions?

Answer. The optimal role for the Reserve component is as a partner in the Navy Total Force, where we view missions in terms of capabilities first, and then decide where the capability should reside. For some capabilities, the Navy Reserve mirrors the Active component, in some cases the Navy Reserve complements the Active component, and in others, the Active component and the Reserve component augment each other.

Question. In your view, should DOD assign Homeland defense or any other global or domestic civil support missions exclusively to the Reserves?

Answer. We look at each mission from a Total Force perspective and decide what capabilities are needed, how often we need them, and what component is best suited to carry them out. As DOD assigns Navy to Homeland defense or domestic civil support missions, Navy will evaluate which component can best deliver those capabilities.

Question. In your view, how will predictable cycles of 1 year mobilized to 5 years at home affect the viability and sustainability of the All-Volunteer Reserve Force?

Answer. We view predictability as a key element of a viable and sustainable All-Volunteer Reserve Force. With predictability and a 1-in-5 dwell ratio, we can maintain the support of the three elements that make our Navy Reserve strong: sailors, families, and employers.

MOBILIZATION AND DEMOBILIZATION OF THE RESERVES

Question. In the aftermath of the attacks of September 11, 2001, the Reserves have experienced their largest and most sustained employment since World War II. Across all of the Services, numerous problems arose in the planning and procedures for mobilization and demobilization, e.g., inadequate health screening and medical readiness monitoring, errors caused by antiquated pay systems, limited transition assistance programs upon demobilization, and lack of access to members of the Individual Ready Reserve. In the Reserve components, force management policies and systems have been characterized in the past as “inefficient and rigid” and readiness levels have been adversely affected by equipment stay-behind, cross-leveling, and reset policies.

What is your assessment of advances made in improving Navy Reserve mobilization and demobilization procedures, and in what areas do problems still exist?

Answer. The Reserve Force has seen improvements in the planning and notification time of sailors selected to mobilize. Internally, the Reserves have leveraged technology for process improvements via the Ready Mob Pool, Volunteer Portal, IA Portal and a Single Source Deployability metric.

Sailor notification of impending mobilization has greatly improved from an average of 60 days in 2009 to 140 days (orders in hand) as of July 2011. The longer notification time directly translates into needed time for Navy families to plan for impending mobilizations and for our sailors to individually prepare themselves medically, physically, and administratively. This improvement is seen in the significant lowering of the administrative mobilization processing fall-out rate from 40 percent to 15 percent of cancellations. It also allows employers more time to prepare for mobilized employees and eases tension in the workplace.

The Navy Reserve has made a concerted effort to strengthen all phases of the deployment cycle to take the best possible care of sailors and their families. Predeployment Family Readiness Conferences, Command Individual Augmentee Coordinators (a Total Force program), Returning Warrior Workshops, the Psychological Health Outreach Program, and the Navy’s Family Readiness programs minimize risk to Navy missions supported by Navy Reserve sailors. These programs enable servicemembers to focus on the mission by preparing them before, during, and after deployment, and reassuring them that their families are being cared for while they are away.

Question. What is your understanding and assessment of the sufficiency of current Reserve Force management policies?

Answer. Management policies as they relate to mobilization are sufficient. Colocation of Reserve Forces Command with Fleet Forces in Norfolk, VA, following the 2005 BRAC has improved integration and facilitated constant and consistent communications. The joint working space of the Individual Augmentee Portal allows for greater notification of requirements. Coupled with the increased volunteer rate, these have improved the ability to provide the Reserve sailor increased notification of impending mobilization to allow for improved preparation from individual readiness to family preparedness.

Question. What do you consider to be the most significant enduring changes to the administration of the Reserve components aimed at ensuring their readiness for future mobilization requirements?

Answer. Improvements in overall Reserve Force notification time has allowed Reserve sailors to seek additional resources earlier, which has improved the readiness of the Reserve Force.

Question. Do you see a need to modify current statutory authorities for the mobilization of members of the Reserve component?

Answer. Yes. The Reserve component has been used as a rotational, operational force during the past 10 years. DOD expects that there will be a continuing military requirement to augment the Active component to meet the force requirements of the combatant commanders as we execute the President’s national security strategy. Since September 11, 2001, access to the Reserve component has been assured via Presidential action that initially invoked, and has annually extended, a declaration of national emergency that enables the use of the partial mobilization authority detailed in 10 U.S.C. 12302.

DOD has proposed an amendment to section 12304 of title 10, U.S.C., which would enable the President to access the Reserve component for all missions to support his national security strategy, not just operational missions, weapons of mass destruction scenarios, and terrorist threats or attacks.

Question. Is the Navy Reserve currently meeting the dwell-time ration goal of 5 years at home for every year deployed?

Answer. Yes. The Navy Reserve has no communities that are required to involuntarily mobilize any Reserve sailors inside a 1-to-5 dwell ratio. Between new accessions, volunteers and Navy Reserve sailors completing their dwell period, the Navy Reserve has had the necessary inventory to meet all missions assigned without violating the 1-to-5 dwell period.

INDIVIDUAL READY RESERVE

Question. The Commission on the National Guard and Reserves has found that accessing the IRR as a viable source of manpower for the war was problematic, and that using the IRR as a solution for unit manning is not feasible.

What is your assessment of the value of the IRR to the Navy?

Answer. The Navy has developed and implemented new objectives for its IRR, as well as changed the face of the current IRR population to provide improved training, manning, accountability and valuable support to gaining commands worldwide. During the past couple of years, we have strived to streamline the IRR by discharging sailors not able to mobilize and improving access to those members who remain qualified for mobilization and show a continued interest to serve.

Question. What are your views on the proper role of the IRR in Navy force management planning?

Answer. The role of the IRR is and should be a Strategic Reserve of members who are a valuable resource pool of trained veterans that can be mobilized individually or with an augmented Selected Reserve unit with minimal preparation.

Question. If confirmed, what changes, if any, do you foresee making to the Navy's IRR recall policy?

Answer. The Navy has been working for the past 2 years to sustain a ready pool of medically, physically, and training-ready IRR sailors in high demand, low supply skill sets. This right-sizing effort has paid tremendous dividends with the increased demand for IRR support staff at multiple gaining commands worldwide with noticeable results. Also, Navy has recently switched from physical musters of the IRR to completely virtual musters. We have found that the benefits of a physical muster were marginal when compared with the cost and manpower required to administer them.

Question. What is your assessment of the adequacy of the system in place for members in the IRR receiving orders to active duty to request a delay or exemption for that activation, including the procedures in place for appealing a denial of that request?

Answer. Navy has not involuntarily mobilized members from the IRR and currently has no plans to do so. Should we change course with regard to this policy, we have the tools in place to fairly and efficiently recall our IRR sailors. The current delay or exemption process utilized for Selected Reserve sailors could be expanded to include IRR members.

MEDICAL AND DENTAL READINESS OF NAVY RESERVE PERSONNEL

Question. Medical and dental readiness of Reserve component personnel has been an issue of significant concern to the committee, and shortfalls that have been identified have indicated a need for improved policy oversight and accountability.

If confirmed, how would you seek to clarify and coordinate reporting on the medical and dental readiness of the Navy Reserve?

Answer. In the past 2 fiscal years, Navy has exceeded DOD readiness standards for fully and partially ready Reserve component workforce. We attribute our improved readiness status to process improvements in policy implementation and legislative changes. Examples including: (1) improved access to Navy Military Treatment Facilities, satellite clinics, Navy Operational Support Centers and Community healthcare via Reserve Health Readiness Program (RHRP) Point of Service to complete individual medical/dental screening requirements; (2) access to TRICARE Standard 6 months pre- and post-deployment has also contributed to a continuum of available clinical services for our RC sailors identified for mobilization; and (3) implementation of TRICARE Reserve Select, an affordable health plan option available to our selected reservists, enabling them to obtain required medical and dental services that have contributed to our high level of overall medical and dental readiness.

If confirmed, ensuring timely and accurate medical and dental readiness of our Reserve component will remain a priority for me and Navy leadership. Moving forward, we will continue to focus on improvements in readiness reporting including use of Medical Reserve Readiness System (MRRS) as a single source capturing Medical/Dental Readiness indicators. We will also be assessing opportunities in developing interoperability capabilities that will standardize internal readiness processes.

Question. How would you improve upon the Navy's ability to produce a healthy and fit Navy Reserve?

Answer. Our sailors must be healthy, fit and mission capable. A healthy and fit Navy Reserve Force is not negotiable. We will continuously improve our screening process and work to ensure compliance with current individual medical readiness policies (including obtaining required periodic health assessments). Our focus will continue to be one of health promotion and disease prevention.

NAVY POLICIES REGARDING DRUG AND ALCOHOL ABUSE

Question. What is your understanding of the Navy's policy with respect to disciplinary action and administrative separation of sailors who have been determined to have used illegal drugs? Do you agree with this policy?

Answer. Navy's policy on drug abuse is "zero tolerance." Navy members determined to be using, possessing, promoting, manufacturing, or distributing drugs and/or drug abuse paraphernalia shall be disciplined as appropriate and processed for Administrative Separation. Members diagnosed as drug dependent shall be offered treatment prior to separation. I support this policy to preserve troop strength and mission readiness.

Question. What is your understanding of the Navy's policy with respect to rehabilitation and retention on active duty of sailors who have been determined to have used illegal drugs or abused alcohol or prescription drugs? Do you agree with this policy?

Answer. Our policies are sufficiently permissive to allow commanders the opportunity to assist servicemembers with treatment and recovery for both illegal drug use and alcohol abuse. Members diagnosed as drug dependent shall be offered treatment prior to separation. Commanding officers have the discretion to retain members determined to have abused alcohol. The separation authority may, under unusual circumstances, forward cases of illegal drug use or abuse of prescription drugs to Commander, Navy Personnel Command for retention. I agree that Navy policies ensure that the deterrence benefit of disciplinary action is balanced with—but not sacrificed to—the need to appropriately provide treatment and support.

Question. What resources does the Navy have currently to respond to sailors who are alcohol or drug dependent and do you believe that the Navy has devoted sufficient resources to implementation of its rehabilitation policies and objectives since 2001? If not, in what ways?

Answer. Navy maintains a steadfast commitment to resourcing our Substance Abuse Rehabilitation Programs (SARP). Our SARPs offer a broad range of services to include alcohol education, outpatient and intensive outpatient treatment, residential treatment, and medically managed care for withdrawal and/or other medical complications. We have expanded our existing continuum to include cutting-edge residential and intensive outpatient programs that address both substance abuse and other co-occurring mental disorders directed at the complex needs of returning Warriors who may suffer from substance abuse disorders and depression or post-traumatic stress disorder as well as implementing a web-based recovery management program available to servicemembers 24/7 from anywhere in the world.

Question. What measures are being taken to improve the Navy's performance in responding to problems of drug and alcohol abuse?

Answer. Navy has taken an integrated approach across all of our sailor programs to emphasize positive lifestyle choices including physical and mental fitness, nutrition, healthy personal relationships, and alcohol free entertainment opportunities. Navy also emphasizes the significant negative outcomes associated with drug and alcohol abuse such as suicide, domestic abuse, sexual assault and other damaging personal and professional events.

RELIGIOUS GUIDELINES

Question. The DOD Independent Review Related to Fort Hood observed that "DOD policy regarding religious accommodation lacks the clarity necessary to help commanders distinguish appropriate religious practices from those that might indicate a potential for violence or self-radicalization" and recommended that the policy be updated.

Has the Navy revised its policy regarding religious accommodation since the issuance of this report?

Answer. No. We have coordinated with DOD and other Services on a policy that will apply uniformly across all the Services. Once we receive an updated DOD policy, we will work with the SECNAV to update our standing policy.

Question. Are you concerned that the attack at Fort Hood could lead to harassment or even violence against Muslims in the Navy?

Answer. No. I expect that all Navy personnel—both uniformed and civilian—will act professionally and treat their shipmates with dignity and respect. The Navy has a zero tolerance policy for harassment. All commanders and commanding officers routinely reiterate this policy to their personnel and closely monitor their commands for potential issues such as these.

Question. If confirmed, what strategies would you advocate to address the potential for harassment or violence against Muslims in the Navy?

Answer. I do not believe new strategies are required beyond reinforcement of existing policies, guidelines, and standards that emphasize dignity and respect for all.

Question. Do Navy policies regarding religious practices in the military accommodate, where appropriate, religious practices that require adherents to wear particular forms of dress or other articles with religious significance?

Answer. Current Department of the Navy policy is to accommodate the doctrinal or traditional observances of the religious faith practiced by individual members when these doctrines or observances will not have an adverse impact on military readiness, individual or unit readiness, unit cohesion, health, safety, discipline or mission accomplishment. Accommodation of a servicemember's religious practices cannot be guaranteed at all times and is subject to military necessity. Determination of necessity rests entirely with the commanding officer.

When approved by competent military authority, religious apparel not visible or otherwise apparent may be worn with the uniform, provided it does not interfere with the performance of the member's military duties or interfere with the proper wearing of any authorized article of the uniform. Visible items of religious apparel will be authorized for wear with the uniform, except when the item is not neat and conservative (i.e. discrete, tidy and not dissonant or showy in style, size, design, brightness or color), its wearing will interfere with the performance of the member's military duties, or is specifically prohibited if the item impairs the safe and effective operation of weapons, military equipment or machinery; poses a health or safety hazard to the wearer or others; interfere with the wearing or proper functioning of special or protective clothing or equipment (e.g. helmets, flak jackets, flight suits, camouflage uniforms, gas masks, wet suits, and crash and rescue equipment). Furthermore, visible items of religious apparel shall not be worn while wearing historical or ceremonial uniforms; participating in review formations, parades, honor or color guards and similar ceremonial details and functions.

Question. In your view, do these policies accommodate the free exercise of religion and other beliefs without impinging on those who have different beliefs, including no religious belief?

Answer. Yes. It is Department of the Navy policy to foster mutual respect for diverse religious expressions (including no religious expression) and to accommodate the doctrinal or traditional observances of the religious faith practiced by individual members when these doctrines or observances will not have an adverse impact on military readiness, individual or unit readiness, unit cohesion, health, safety, discipline or mission accomplishment.

Question. In your opinion, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. Yes. Title 10 §6031 says, "An officer in the Chaplain Corps may conduct public worship according to the manner and forms of the church of which he is a member." Navy policy on public worship as set forth in SECNAVINST 1730.7D supports this Title 10 guarantee, i.e. "a chaplain may conduct divine services 'according to the manner and forms' of his or her Religious Organization." When inviting a chaplain to deliver religious elements such as prayer at a command function outside of public worship, a commander shall not compel the chaplain to pray in a way that is inconsistent with the tenets of his or her faith and the chaplain may choose not to participate without suffering adverse consequence.

When religious elements are incorporated in command functions outside of public worship, such as changes of command, where all members of the command are required to be present, chaplains are instructed to be sensitive to the needs of the total audience.

Question. Current policy in DOD gives discretion to military leaders to decide whether requests to waive uniform and appearance standards should be granted based on religious beliefs. The DOD has submitted a legislative proposal that would clearly exempt the armed services from the requirements of the Religious Freedom Restoration Act (RFRA).

Do you believe that the Navy needs to be exempted from the strictures of RFRA? If so, why?

Answer. Our current policy provides our commanders adequate ability to provide religious accommodation and is supported. I am aware of this legislative proposal, but have not had the opportunity to assess the need for a change to our current policy.

SUPPORT FOR WOUNDED, INJURED, AND ILL SAILORS

Question. Wounded servicemembers from Operations Enduring Freedom, Iraqi Freedom, and New Dawn deserve the highest priority from the Navy for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from active duty if required, and continuing support beyond retirement or discharge. Yet, as the revelations at Walter Reed Army Medical Center (WRAMC) in 2007 illustrated, all of the Services were not adequately prepared to meet the needs of returning wounded servicemembers. Despite the enactment of legislation and renewed emphasis, many challenges remain.

In your view, what were the most critical shortcomings in warrior care since 2001 in the Navy?

Answer. We have no higher priority than caring for Wounded, Ill and Injured shipmates. I believe we have made significant improvements in the care for our Wounded Warriors and their families; yet all of us remain concerned about the cumulative effects of stress, worry and anxiety due to a decade-long conflict on our sailors and their families. I also understand that preserving the psychological health of personnel is one of the greatest challenges we face today. We are learning more about injuries such as Post-Traumatic Stress Disorder and Traumatic Brain Injury and ensuring our sailors have access to the best treatment available to support their recovery. Fortunately, we are seeing historically unprecedented survival rates and dramatic innovations in the combat casualty care on the battlefield. However, we, like the other Services, also are seeing more complex battle injuries as our personnel return to heal. We must continue to develop our systems of support and recovery for our sailors and families.

Question. What is your assessment of the Navy's response?

Answer. The Navy has made significant progress in developing programs that support the treatment, recovery and reintegration of our wounded sailors and their families. Our medical facilities are providing world-class care—and I am reminded of this each time I visit our wounded personnel. Our programs of support are in place and maturing as we adapt to the needs of our patients. Throughout the Fleet, we have developed an integrated health promotion and prevention program, Operational Stress Control, to help build resiliency at all levels. We have implemented targeted programs such as Families OverComing Under Stress (FOCUS), Returning Warrior Workshops and Psychological Health Outreach Program to ensure both our Active and Reserve component personnel and their families have access to support programs.

Question. How does the Navy provide follow-on assistance to wounded personnel who have separated from active service and transition assistance to help sailors who are disabled find rewarding employment prior to separation?

Answer. We recognize how important it is for our injured sailors to heal in body, mind and spirit and we honor our commitment to provide the support and resources to aid in their recovery and transition. We have significantly increased our medical case management resources at our treatment facilities to help our wounded, ill and injured personnel not only recover but also assist in the coordination of their care. These efforts extend to helping our sailors transition their medical care to the Veterans Administration or TRICARE networks/civilian clinician to provide better care and seamless service and support. Our Navy Safe Harbor program has responsibility for coordinating the non-medical care of wounded, ill, and injured sailors and their families. This program provides exceptional, individually-tailored assistance to our wounded, ill, and injured for the duration of their lives. We have increased our support for community reintegration through the Anchor Program, which pairs members with volunteer Reserve component sailors in their communities, and initiated the Adaptive Athletics Program, designed to support long-term recovery and rehabilitation through whole-body training and education. Additionally, we signed Memoranda of Agreement with the Departments of Labor and Veterans Administration to ensure greater access to employment services and support programs.

Question. How effective, in your view, are those programs?

Answer. I am pleased with the progress and effectiveness of all these programs. Assessing their efficacy, adapting to the needs of our personnel and their families and implementing best practices will remain priorities as we move forward. We are engaged and committed to ensuring resources will be in place to meet our commitments to sailors and their families.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase the Navy's support for wounded personnel, and to monitor their progress in returning to duty or to civilian life?

Answer. We are grateful to the support that Congress has provided in this important area. I remain confident we have good programs in place that will continue to mature and improve. If confirmed, I will continue to build on the progress we have made within the Navy and our collaborative engagements with the VA and other Federal and private sector partners.

Question. Studies conducted as a result of the revelations at WRAMC pointed to the need to reform the disability evaluation system (DES). A DES pilot program, and now an Integrated DES program have been established to improve processing of servicemembers.

What is your assessment of the need to further streamline and improve the Integrated DES (IDES)?

Answer. The IDES provides the process and administrative framework necessary to fulfill the requirements of Title 10 U.S.C., Chapter 61. Designed to function within existing laws, IDES leverages military core competencies to determine servicemember fitness for continued service via the Medical Evaluation Board and Physical Evaluation Board (PEB) processes. Under IDES protocols, the Veterans Administration leverages their core competencies to render the disability rating percentages needed to establish both title 10 and title 38 disability compensation. IDES brings these core competencies together to minimize duplicative burdens on the member and the departments while maximizing support through the seamless availability of post-service benefits for our wounded, ill, or injured (WII).

While the IDES process delivers many significant improvements over the Legacy DES, it does not provide the desired end-state for disability processing because it takes too long to process servicemembers (avg 400 days). Navy supports ongoing OSD and VA efforts to compress the processing down to a more efficient and acceptable duration that limits undesirable personnel and operational impacts.

Question. If confirmed, how will you address any need for change?

Answer. A principle focus for change must be on reducing the amount of time consumed by the IDES process without affecting the quality of support to our WII servicemembers. We continue to support WII servicemembers and our mission needs by supporting process design changes in IDES that are under consideration, adequately resourcing capabilities such as PEB liaison officers at medical treatment facilities, and better leveraging capabilities that exist within Armed Forces Health Longitudinal Technology Application (AHLTA).

NON-WORLDWIDE DEPLOYABLE SAILORS AND DISABILITY EVALUATION

Question. The Navy has used involuntary administrative separation for unsuitability as a means to remove from Active Duty sailors with medical conditions who were found fit for duty by physical evaluation boards. Previous Navy policies authorized denial of re-enlistment of sailors considered to be non-worldwide deployable, even if they had been found fit for duty, or had not been evaluated in the disability evaluation system.

What is current Navy policy regarding the retention of sailors who are non-worldwide deployable due to physical or medical conditions?

Answer. Section 534 of NDAA for Fiscal Year 2011 restricts the involuntary administrative separation of personnel found fit by a Physical Evaluation Board if later found unsuitable due to the inability to deploy for the same medical condition. We are complying with the new law. SECNAV policy is that those retained on active duty after a finding of "fit" should not be denied reenlistment or other career progression simply because of the finding. These individuals shall receive the same opportunity to compete with other sailors for reenlistment and promotion.

IMPLEMENTATION OF THE REPEAL OF "DON'T ASK DON'T TELL" POLICY.

Question. The President, Secretary of Defense, and the CJCS have certified to Congress that repeal of the Don't Ask Don't Tell homosexual conduct policy will not harm military readiness, military effectiveness, unit cohesion, or recruiting and retention. The statute underlying the Don't Ask Don't Tell policy will be repealed on September 20, 2011, 60 days from the date of this certification.

Do you support the repeal of the Don't Ask Don't Tell Policy?

Answer. Yes.

Question. If confirmed, do you foresee any problems with implementing a repeal of the Don't Ask Don't Tell policy in the Navy?

Answer. No.

Question. What effect, if any, do you anticipate the repeal will have on readiness and discipline in the Navy?

Answer. I have every confidence that the men and women of the U.S. Navy, with their character, discipline, and decency, will successfully implement this change in the law and continue to fulfill the U.S. Navy's mission with the utmost professionalism. As always, strong leadership remains essential to a successful transition. Navy leaders will continue to set a positive tone, create an inclusive and respectful work environment, and enforce our high standards of conduct as we serve the Nation.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. What is your understanding of the resources and programs the Navy has in place on ships, overseas, and in CONUS locations to offer victims of sexual assaults the medical, psychological, and legal help that they need?

Answer. Sexual assault is a criminal act that has far-reaching consequences for all involved. It violates the Navy ethos, corrodes morale, undermines trust, and will not be tolerated. A DOD Safe Help line number is available to all and widely posted in command spaces and websites to ensure immediate "hotline" support. Our resources and programs are distributed so that all deployable Navy units have Sexual Assault Prevention and Response (SAPR) Victim Advocates (VAs) and SAPR Command Points of Contact (POCs) assigned. This ensures continuity of victim support regardless of whether the unit is shore based or at sea. Deployed units have ready access to medical, investigative and legal support, and the unit VAs have reachback to a Sexual Assault Response Coordinator (SARC).

To ensure resource and program availability in a joint environment, joint protocols have been developed and joint SARCs meet regularly to outline, understand and mitigate differences in SAPR program requirements. The key is to ensure standardized coordination of SAPR responses across all Services.

Individual Augmentees (IAs) receive pre-deployment briefings from IA Support/Deployment Specialists at the Fleet and Family Support Centers (FFSC) that include specific contacts for both sexual assault reporting options.

Question. What is your view of the steps the Navy has taken to prevent sexual assaults?

Answer. While significant progress has been made to date, we are continuing to implement further enhancements to contribute to ongoing efforts to eliminate sexual assault from the Navy:

- We are implementing Bystander Intervention training to teach sailors how to safely and effectively intervene to prevent sexual assault and other negative behaviors.
- Sexual Assault Response Coordinators have been provided 2 full days of training to better equip them in the collection of data and standardized training for prevention.
- Naval Criminal Investigative Service (NCIS) and the Judge Advocate General (JAG) of the Navy have implemented specialized training to more effectively investigate and prosecute sexual assault cases.
- We are conducting a pilot prevention program, developed in collaboration with national experts, which uses multiple prevention modalities based on local demographics and circumstances. Rigorous pre- and post-pilot survey data will show the efficacy of these modalities and determine applicability to other locations.

Question. What is your view of the adequacy of the training and resources the Navy has in place to investigate and respond to allegations of sexual assault?

Answer. Navy provides robust training for investigators and prosecutors of sexual assaults. All NCIS agents are trained to be "first responders" to sexual assaults and other criminal activity, and attend courses that combine prosecutors and investigators in a shared environment that enhances cross discipline understanding. NCIS agents have recently attended the U.S. Army's advanced course on sexual assault investigative techniques and several other seminars and courses taught by nationally recognized experts.

Members of Navy's Judge Advocate General Corps attend a course on litigating sexual assault at Naval Justice School. JAGs also attend a course on prosecuting alcohol facilitated sexual assaults, prosecuting complex cases (which includes a section on Victim Witness Assistance Program). Navy has hired two nationally recognized experts on adult and child sexual assault and child physical abuse litigation to provide field-level legal training and case consultation, and provide policy support for the Navy SAPR program.

Question. Do you consider the Navy's sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Answer. Navy's policies and execution of confidential reporting (Restricted Reports) are effective. We continue to emphasize to sailors, SAPR stakeholders and leadership, the policy and importance of a restricted reporting option. A 2010 SAPR Quick Poll indicated that nearly 92 percent of respondents are aware victims can report sexual assault without command notification (Restricted Reporting).

Question. What problems, if any, are you aware of in the manner in which the confidential reporting procedures have been put into effect?

Answer. Close-quarters environments such as controlled basic training educational environments and brigs for "incarcerated" sailors provide a challenge with regards to confidential reporting. Solutions to address these situations are being investigated. California state law has also caused confusion due to state-mandated reporting for all medical personnel. Our California-based SARCs continue to educate leaders and responders to ensure compliance with policy and victim privacy when considering the "restricted" reporting option.

Question. What is your view of the appropriate role for senior military and civilian leaders in the Navy in overseeing the effectiveness of implementation of new policies relating to sexual assault?

Answer. Preventing sexual assaults is the job of all Navy leadership. It mandates a synergistic approach by military and civilian leaders. The Department of the Navy established a Sexual Assault Prevention and Response Office and Director in 2009 to serve as the principal point of accountability for all sexual assault matters, program support, and oversight. From the SECNAV on down, we are committed to eliminating sexual assault from our ranks. A key to success is the understanding and engagement by unit level leaders.

Question. If confirmed, what actions would you take to ensure senior management level direction and oversight of Navy efforts on sexual assault prevention and response?

Answer. At a minimum, I intend to maintain strong and viable Family support programs by ensuring adequate oversight and sufficient funding. I will remain open to initiatives designed to further evolve existing programs and look for innovative ways to help our sailors and families become more resilient and ready to meet the enduring demand for Navy forces.

FAMILY SUPPORT

Question. Sailors and their families in both the Active and Reserve components have made, and continue to make, tremendous sacrifices in support of operational deployments. Senior military leaders have warned of growing concerns among military families as a result of the stress of frequent deployments and the long separations that go with them.

What do you consider to be the most important family readiness issues for sailors and their families, and, if confirmed, how would you ensure that family readiness needs are addressed and adequately resourced?

Answer. Family Readiness is critical to Fleet readiness and sailor retention. If confirmed, I intend to continue supporting Navy families with a variety of institutionalized programs and resources to meet their needs. Our existing programs cover everything from Exceptional Family Members and Respite care to deployment preparedness, ensuring our sailors and their families are cared for while deployed.

Navy will continue to pursue opportunities to optimize services, including counseling, family and youth development programs, and deployment readiness to ensure our sailors continue to have access to the necessary resources that enable readiness while minimizing stress and impact to their loved ones at home.

Question. How would you address these family readiness needs in light of global rebasing, BRAC, deployments, and declining O&M budgets?

Answer. Navy will preserve the current Family Readiness budget plan and has realigned funding from supplemental requests and overseas contingency funds to our baseline budget requests. We have consolidated oversight to ensure all Family Readiness programs are adequately sustained and fully resourced as required.

Question. If confirmed, how would you ensure support to Navy Reserve families related to mobilization, deployment, and family readiness, as well as to active duty families who do not reside near a military installation?

Answer. Navy supports geographically isolated servicemembers and their families through the nearest DOD facility whether a Navy Operational Support Center or other sister service installation. If a support site is not conveniently located nearby, then Navy provides remote support through our network of FFSCs and Military OneSource.

In support of Individual Augmentee (IA) spouses and family members, FFSCs have developed programs tailored to their specific needs, such as IA Family Handbook, Deployment Readiness Briefs, IA Family Discussion, Family Connection Newsletter and Families of Warriors in Transition Homecoming Program, and Active and Reserve Command IA Coordinators (CIAC), whose primary responsibility is to serve as the Navy liaison to IA sailors and families.

Question. If confirmed, what additional steps will you take to enhance family support?

Answer. At a minimum, I intend to maintain strong and viable family support programs by ensuring adequate oversight and sufficient funding. I will remain open to initiatives designed to further evolve existing programs and look for innovative ways to help our sailors and families become more resilient and ready to meet the enduring demand for Navy forces.

SUICIDE PREVENTION AND MENTAL HEALTH RESOURCES

Question. The numbers of suicides in each of the Services has increased in recent years. In addition, mental health surveys conducted in theater are showing declines in individual morale and increases in mental health strain, especially among those who have experienced multiple deployments.

In your view, are Navy suicide prevention and resiliency programs adequate to help prevent suicides both in homeports and on deployment, and to increase the resiliency of sailors and their families?

Answer. Yes. I am committed to doing everything possible to prevent the tragedy of suicide and provide our sailors, families, and leaders with the tools, training, and environment to allow them to successfully navigate the stress of Navy life and thrive personally and professionally. Within the past 6 months, Navy has significantly increased staffing and resources devoted to supporting Navy suicide prevention program and institutionalizing resilience building both ashore and within the Fleet. Resilience cannot be built in a day. It will require time to fully take root and grow. As our efforts continue to mature, ongoing assessment will guide further improvement.

Question. If confirmed, what actions will you take to ensure that sufficient mental health resources are available to Navy personnel on deployment, and to their families upon return to home station?

Answer. Navy is committed to fostering a culture that promotes resilience and wellness and empowers our leaders to ensure the health and readiness of our sailors and families. Our Psychological Health program supports the prevention, diagnosis, mitigation, treatment, and rehabilitation of post-traumatic stress disorder, and other mental health conditions, including planning for the seamless transition of such members throughout the recovery and reintegration process.

Through active leadership, we are also working to reduce the stigma associated with seeking help. We have increased the size of our mental health workforce and continue to focus on recruiting and retention of our mental health providers. Our priority is ensuring we have the service and support capabilities for prevention and early intervention available where and when it is needed, including in operational environments. Embedded mental health providers provide coordinated, comprehensive primary and secondary prevention efforts throughout the deployment cycle, focusing on resilience training and stress reduction. In order to understand the behavioral health needs of our sailors serving in theatre, we deployed a Mobile Care Team to administer the Behavioral Health Needs Assessment Survey which allows real-time surveillance and intervention as needed.

If confirmed, I will continue to ensure we have the proper number of mental health providers in place to address the medical, physical, psychological, and family readiness needs of our sailors and their families.

MORALE, WELFARE, AND RECREATION

Question. Morale, Welfare, and Recreation (MWR) programs are critical to enhancement of military life for members and their families, especially in light of frequent and lengthy deployments. These programs must be relevant and attractive to all eligible users, including Active Duty and Reserve personnel, and their eligible family members.

What challenges do you foresee in sustaining and enhancing Navy MWR programs and, if confirmed, what improvements would you seek to achieve?

Answer. The major challenges facing MWR are maintaining adequate funding, repairing or replacing aging infrastructure, and dealing with increased demand for certain core services, particularly in the area of child and youth programs. We have and will continue to take aggressive actions to address these challenges. In the area

of child and youth programs, for example, Navy has funded dozens of new Child Development Centers that, by the end of fiscal year 2012, will increase capacity by over 7,000 spaces. When these centers are completed, we will have almost entirely eliminated unmet demand for child care spaces.

I believe we should continue to expand our stable of partners in the private and public sector off base as we build on our past track record of success in ensuring Navy MWR programs measure up to the needs of our sailors and their families.

WOMEN IN THE MILITARY

Question. In the past year, the Navy has opened service on submarines to women, and the issue of the appropriate role of women in the Armed Forces is a matter of continuing interest to Congress and the American public.

What is the status on the implementation of the decision to allow service by women on submarines?

Answer. In 2010, 18 female officers began their submarine officer pipeline training, which consists of nuclear power school, prototype training and the submarine officer basic course. Two officers deferred their training to complete follow-on graduate studies. The first 16 officers will complete training and report to their submarines between November 2011 and February 2012. Eight female warfare-qualified supply officers have been selected to serve as department heads to provide senior female mentoring. We have applied lessons learned from integration of women in surface combatants and aviation squadrons in the mid-1990s and have incorporated those into our comprehensive women in submarines integration plan.

Question. What challenges still exist and what proactive measures are submarine force leaders taking to enhance the success of female officers assigned to submarine duty?

Answer. Submarine crews that are slated to be integrated will receive appropriate training on fraternization, berthing/privacy requirements, Navy's Equal Opportunity policy, prevention of sexual harassment, and sexual assault and rape prevention. Executive level training will ensure that commanding officers, executive officers and chiefs of the boat are prepared to lead an integrated crew. Independent Duty Corpsman assigned to each submarine to be integrated will receive refresher training on medical situations unique to women. A Command Climate Survey will be conducted on each crew prior to certification and again about 6 months after integration to evaluate and address any unanticipated concerns and challenges that may arise.

Question. Do you believe additional specialties should be eligible for service by female sailors?

Answer. Navy continues to examine opportunities for additional specialties for female sailors. Navy modified its policy in 2007 to allow the temporary assignment of women to units normally closed if the unit is not expected to conduct a combat mission during the period of temporary duty. Since that time the Navy Special Warfare (NSW) Command has deployed 10 to 15 females to the CENTCOM region with each NSW Squadron for support operations (intelligence, administrative, legal, information technology, and construction ratings). From 2008 through the present, certain NSW operational successes have been directly related to the rapport Navy females have been able to develop with both indigenous women and men. Leveraging unique cultural skills of women, NSW has been able to gain access, develop key relationships, calm tense situations, and locate individuals of interest.

Question. Do you believe any changes are needed or warranted in current assignment policies regarding women?

Answer. At present, the Navy's assignment policies for women are in the best interest of the naval service, accomplished per current Secretary of Defense guidelines, and are consistent with the principles of fairness and equal opportunity. However, we continue to evaluate opening other opportunities as appropriate. As part of our current review of restrictions on women in the Navy, we have identified a number of medical and chaplain support billets assigned to Marine Corps units that could potentially be opened to women.

PERSONNEL AND ENTITLEMENT COSTS

Question. In addition to health care costs, personnel, and related entitlement spending continues to grow and is becoming an ever increasing portion of the DOD budget. Secretary Panetta has supported a comprehensive review of military compensation, saying "everything must be on the table," including military retirement.

What percentage of the annual Navy budget from 2011 to 2015 is devoted to personnel costs?

Answer. The percentage of the annual Navy budget, from 2011 to 2015, devoted to Active and Reserve military personnel costs is approximately 23 percent. This is

comprised of the Military Personnel, Navy (MPN); and Reserve Personnel, Navy (RPN) payments to the Medicare-Eligible Retiree Health Care Fund (MERHCF).

Question. Do you believe the time is right to begin discussing reform of military compensation and retirement benefits?

Answer. I support Secretary Panetta's call for a comprehensive review of military compensation, including the retirement benefit. If confirmed, I will support the Navy's continued participation in ongoing efforts to assess the cost, value and effectiveness of all parts of the military compensation system.

Question. Other than reducing Navy end strength, what actions do you believe can be taken by DOD and Navy leaders to control the rise in personnel costs and entitlement spending?

Answer. Reviews of military compensation are currently ongoing. I will use the results of these reviews to inform my judgments.

MILITARY RETIREMENT

Question. The 10th Quadrennial Review of Military Compensation proposed a new defined benefit retirement plan that more resembles the benefits available under the Federal Employee Retirement System than the current military retirement benefit; increasing TRICARE fees for retirees; and the adoption of dependent care and flexible spending accounts for servicemembers. Both Secretary Gates and Secretary Panetta have called for a comprehensive review of the military retirement benefit.

While it is often said that the military retirement benefit encourages retention after the 10-year point, do you believe it provides any significant boost to recruitment? Do 17 and 18 year olds care about the military retirement benefit when deciding to enlist?

Answer. The current retirement benefit is better suited to enhance retention than to serve as an enlistment tool. While a generous retirement benefit relative to the private sector is a good recruiting point, the retirement benefit is not at the top of the list of things that attract new recruits to the Navy. During a recent poll of new recruits, military retirement ranked seventh among reasons for joining.

Question. How might the retirement benefit be modernized to reflect the needs of a new generation of recruits, while easing the long-term retirement cost of the government?

Answer. The overwhelming majority of those who enter military service never qualify for the 20 year military retirement, therefore, many servicemembers would benefit from some form of a defined contribution plan that offered vesting short of a full military career. Navy has not yet studied this option well enough to define how certain contribution plans might impact recruitment and retention.

JUDGE ADVOCATE ISSUES

Question. In December 2010, the DOD Inspector General completed an evaluation of post-trial reviews of courts-martial within the Department of the Navy—triggered in part by the egregious case of *United States v. Foster*—documenting the persistence of serious post-trial processing problems within the Navy and Marine Corps for at least two decades.

If confirmed, what actions will you take to address the post-trial processing issues identified by the DOD Inspector General?

Answer. I am confident that given the improvements in structure, operating procedures, case tracking and oversight that have been undertaken to date, we have a military justice system that works as intended. I will continue to support all efforts to address the issue of post-trial processing.

Question. The Inspector General concluded that current Navy and Marine Corps case-tracking systems do not provide the visibility needed to monitor case progress and timeliness throughout the post-trial process and recommended the development of a single Navy and Marine Corps military justice case processing and tracking system.

What is the current plan for the development of a single Navy and Marine Corps military justice case processing and tracking system?

Answer. Efforts are ongoing within the Department to develop a unified case-tracking system for the Navy and Marine Corps and a joint effort is currently in progress to formally establish a new acquisition program for the Naval Justice Information System (NJIS). In the interim, the Judge Advocate General's Corps has continued to use the Navy Case Management Tracking Information System (CMTIS) to track every case while the new systems are being developed.

Question. Will this case tracking system be funded by the Navy?

Answer. Yes, Navy will fund the system.

Question. At the direction of Congress, the Secretary of Defense appointed an independent panel to review the judge advocate requirements of the Department of the Navy. This Panel issued a report in February, 2011, that concluded that “there is a requirement in the U.S. Navy for approximately 950 active-duty judge advocates. The Panel noted that the Navy had 811 judge advocates on active duty at the end of fiscal year 2010, but had programmed further reductions in judge advocate manning over the next 5 years. The Panel expressed “strong concern over the current and future manning levels for judge advocates in the Navy, believing those manning levels create an unacceptable legal risk to the Department of the Navy.” Testimony at a recent hearing indicated that Navy leadership has now indicated an intent to fund 852 positions over the FYDP.

What is your evaluation of the recommendations of the Independent Panel regarding the role and resources available to the Navy JAG Corps?

Answer. I concur that we need to have adequate judge advocate manning to meet operational law and other requirements, including a first-rate military justice system. In the Navy, this issue is currently undergoing the required budget review process for implementation across the FYDP.

Question. If confirmed, what actions will you take to ensure that the Navy Judge Advocate General’s Corps is adequately manned to address the increasing complexity and intensity of the legal and policy environment in which commanders are required to operate?

Answer. This issue is currently undergoing the required budget review process for implementation across the FYDP.

DEFENSE INCIDENT-BASED REPORTING SYSTEM (DIBRS)

Question. DIBRS is an information technology system funded and managed by the Defense Manpower Data Center and required under DOD Directive 7730.47. It is intended to provide more comprehensive data on the incidence and types of crimes committed within the Armed Forces. The Department of the Navy is developing a Department of the Navy Criminal Justice Information System (DONCJIS) to satisfy DIBRS reporting requirements but has been unable to predict when the system will be fully operational.

What is the status of the Navy’s implementation of DIBRS and DONCJIS?

Answer. The DONCJIS was initiated but did not meet program requirements. The Department cancelled it in September 2010. Efforts are ongoing within the Department to develop a unified case-tracking system for the Navy and Marine Corps and a joint effort is currently in progress to formally establish a new acquisition program for the Naval Justice Information System (NJIS). As currently envisioned, this system will incorporate not only the Defense Incident-Based Reporting System (DIBRS) required data, but expand to include criminal justice case tracking and management.

Question. What utility do you see for Navy’s senior leaders in having the information available through DIBRS?

Answer. The lack of such a functional database inhibits electronic interface and data sharing among all stakeholders of a criminal case and inhibits accurate data collection. We will continue to use the Navy Case Management Tracking Information System (CMTIS) to track every case while the new systems are being developed.

U.S. NAVAL ACADEMY OVERSIGHT

Question. In November 2009, the Naval Inspector General submitted a report harshly critical of the financial management practices at the U.S. Naval Academy, which reflected a lack of oversight and supervision over the Academy’s internal controls, regulatory compliance, and expenditure of appropriated and non-appropriated funds.

What measures have been put in place to ensure that the financial management at the Naval Academy complies with the legal and regulatory requirements that apply to other comparable commands?

Answer. The Naval Academy has worked closely with Navy leadership, including the Navy General Counsel and Office of the Judge Advocate General to improve meaningful oversight, improve guidance and foster continual self assessment of the Academy’s financial management practices. After a series of reviews and audits, including the 2009 Navy Inspector General report, 59 corrective actions were identified. To date, 49 of the 59 have been completed, including a comprehensive fiscal oversight review of Naval Academy Nonappropriated Fund activities by Commander, Navy Installations Command this month (July 2011). In all, these efforts have resulted in improved and revised financial procedures, directives and instruc-

tions, including gift acceptance and expenditure guidance, ensuring the Academy is in compliance with relevant Navy and DOD instructions and policies.

Question. What is your assessment of the changes that have been made to the Honor System at the Naval Academy following the review conducted last year by the Chief of Navy Reserve and what do you consider to be the most important reforms put into place?

Answer. The changes to the Naval Academy Honor Concept have been very positive for the Brigade of Midshipmen and the Naval Academy as a whole. While several important reforms were adopted, improved educational understanding, process efficiency, consistent accountability and Brigade empowerment have been most notable. Specifically, the focus on refining the adjudication process has driven average adjudication time down to approximately 17 days, providing more immediate feedback to the Midshipmen on honor cases. Coupled with consistent application of the Honor Concept and increased ownership of the Honor Concept by the Brigade of Midshipmen, the Naval Academy has seen a significant drop in repeat honor offenses and honor offenses by upper classmen.

Question. What changes, if any, would you recommend in the organization or functioning of the Naval Academy Board of Visitors?

Answer. I wouldn't recommend changes in the organization or functioning of the Naval Academy Board of Visitors. Since the findings of the Navy IG, the Board of Visitors has taken an active and positive role in assisting the Naval Academy and providing oversight.

Question. Following congressional direction, the DOD in August 2007, established a policy regarding modification of the active-service obligation for service academy and ROTC scholarship graduates who are offered professional sports contracts. This policy is currently not being applied uniformly by the Departments of the Air Force, Navy, and Army.

What is your personal view of the appropriate applicability of this DOD policy in the Navy?

Answer. My view is that Navy personnel are first and foremost here to faithfully serve their country and fulfill their military commitment by completing their Active Duty Service Obligations (ADSO). I do believe however, in rare and exceptional cases, a Servicemember can use their exceptional talents in a mutually beneficial way to the Service and the member, after completing a shortened ADSO and then continue to actively engage in the military by participating in the Selected Reserves.

The SECNAV recently updated the early release policy for the Navy and Marine Corps, removing a moratorium imposed in 2007 on applications for early release to participate in professional sports. This change in policy will again allow Naval Reserve Officers Training Corps and U.S. Naval Academy graduates to apply for early release from active duty after 2 years of service providing the requestor has relevant and proven special or unique talents that would aid in recruiting. This policy change aligns the Department of the Navy's application of the DOD policy with the Departments of the Air Force and Army. While the number of those allowed for an early release is expected to be small, I believe that those rare individuals with extraordinary abilities should be allowed to showcase their talents on a national stage when in the best interests of the Service.

INDEPENDENT LEGAL ADVICE

Question. In your past assignments, you have had the opportunity to observe the working relationship between the Navy General Counsel, the Judge Advocate General of the Navy and judge advocates advising commanders in the field.

What is your view of the need for the Judge Advocate General to provide independent legal advice to the CNO and the Commandant of the Marine Corps?

Answer. The ability to provide independent legal advice is vital to the Navy. The law appropriately prohibits any officer or employee of DOD from interfering with the Judge Advocate General's independent legal advice to the SECNAV, CNO, and the Commandant of the Marine Corps.

Question. What is your view of the responsibility of judge advocates within the services and joint commands to provide independent legal advice to military commanders?

Answer. Commanders and commanding officers are obligated to discuss legal issues with their staff judge advocates. To provide legal solutions that address the legal challenges faced by our military commanders requires independence.

ENVIRONMENTAL CONCERNS

Question. The Navy has been involved in civil litigation over its use of mid-frequency active sonar during training exercises and its impact on the environment.

What is the Navy doing to comply with environmental laws so it can continue to effectively train with mid-frequency active sonar?

Answer. The Navy remains committed to accomplishing training goals while still achieving full compliance with all Federal environmental laws and regulations. Continued training with active sonar is absolutely essential in protecting the lives of our sailors and marines and defending our Nation. Increasingly quiet diesel-electric submarines continue to proliferate throughout the world, which requires our Navy to continue to train to counter them. Neutralizing this threat requires the ability to locate, track, and defeat these submarines; active sonar is the primary system to accomplish this task.

The Navy continues to work closely with the National Marine Fisheries Service (NMFS) to receive annual permits under the Marine Mammal Protection Act and Biological Opinions under the Endangered Species Act. In 2002, the Navy began implementation of a comprehensive Phase I strategy to ensure compliance with applicable Federal laws. The process of completing this documentation, including the required analysis and public comment periods, was a multi-year effort and will continue indefinitely. As of July of this year, the Navy has completed environmental planning documentation for 13 of 14 Navy ranges and Operating Areas. This permitting process has ensured that the Navy mitigates its effect on the environment while still meeting national security requirements.

The Navy has already begun work on Phase II at-sea Environmental Impact Statements and permits, significantly expanding the sound sources analyzed and including at-sea testing events that were not part of phase I permits and documentation. Consolidating the 14 Phase I Navy ranges and Operating Areas into 6 study areas will achieve greater consistency, efficiency, and integration of acquisition/military readiness/scientific research information in Navy environmental planning documentation and permits. The Navy continues to work closely with NMFS to ensure these Phase II documents and permits are informed by best available data, providing the most accurate representation of potential impacts to the marine environment. The first of these documents and permits is currently on track to be approved in early 2014.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the CNO?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR CLAIRE McCASKILL

PURCHASING F/A-18 AIRCRAFT

1. Senator McCASKILL. Admiral Greenert, I have often noted we can get 80 percent of the F-35's capability for a fraction of the cost by buying the most advanced F/A-18 aircraft—something the Navy has largely acknowledged. The President's Fiscal Commission made a similar recommendation. What do you think about the recommendation from the President's Fiscal Commission and other similar pro-

posals to basically substitute F/A-18s and F-16s for about half of the Air Force's and Navy's planned buys of the F-35? They say this change could save about \$9.5 billion.

Admiral GREENERT. The Navy's TACAIR transition plan is centered on a balanced force of F-35 and F/A-18E/F. F-35 and F/A-18E/F capabilities are complementary, and together deliver a balance of versatility, lethality, survivability, and capacity that will pace the threat through 2025. The F/A-18E/F provides a proven combat capability and higher weapons capacity at a known cost modeled throughout its service life with planned capability enhancements. The F-35 offers reduced signature with improved sensors and command and control. A mix of F/A-18 E/F and F-35 provides the capacity and capability to carry out the full range of tactical air operations and the requirement for both aircraft remains consistent with the DoN TACAIR transition plan.

2. Senator MCCASKILL. Admiral Greenert, have you considered adopting the Fiscal Commission's option, and if not, why not?

Admiral GREENERT. Each year we consider modifications to the number of F-35 we purchase. This is part of our own budget deliberations and is also part of achieving the right mix of F-35 and F-18E/F aircraft in our future air wings. The Department of the Navy has historically managed its entire aircraft inventory in a purposeful and responsible manner, balancing future operational requirements with the need to maximize the utility of our current aircraft. The F-35 and F/A-18E/F provide complementary capabilities across the spectrum of conflict and the requirement for both aircraft remains consistent with the DoN's TACAIR transition plan. Purchasing both aircraft represents a solution to the strike-fighter shortfall and provides proven conventional combat capability and capacity to support anticipated Carrier Strike Group mission requirements through 2025.

QUESTION SUBMITTED BY SENATOR MARK BEGICH

ARCTIC CLIMATE CHANGE

3. Senator BEGICH. Admiral Greenert, the Navy has been at the forefront of Arctic issues and studying climate change. Your predecessor, Admiral Roughead, understood that Arctic requirements will fall largely on the Navy and he was already preparing for them, establishing a Task Force Climate Change and producing an Arctic Roadmap in 2009. The Arctic Roadmap called for a number of actionable items. If confirmed, do you intend to continue this work on the Arctic and climate change, to include executing the actionable items in the Arctic Roadmap?

Admiral GREENERT. Yes, I intend to continue the work initiated by Admiral Roughead on the Arctic and climate change. I believe that climate change and the Arctic will be a challenge to Navy. In my remarks at the Navy Climate Change and Energy Symposium in March of this year, I encouraged the Navy and industry to take the discussion and ideas generated from the symposium toward future programmatic options.

The Navy views the Arctic as an emerging theater that may require new programs to face the unique challenges of the region. The challenges will be similar to those when the Navy first started operating in the Persian Gulf, where our equipment was not optimized for operations in the new environment. The Navy must also consider the Arctic in our concept of operations especially with respect to our surface ship capabilities in conducting cold weather operations. I recognize that the Navy has to balance preparation for an opening Arctic against other global commitments and fiscal pressures, but we are taking a deliberate approach to the Arctic. This includes conducting studies and assessments that will inform us of gaps in our capabilities to operate in the region, and yet not buying ahead of need.

Outside of the Arctic, global climate change will present additional challenges to our Navy. We are beginning to study the effects that sea level rise and associated processes will have on our installations worldwide. We are closely monitoring the effects of changing precipitation and resource patterns around the world to determine how they may affect humanitarian assistance, and we are identifying partnerships that will ensure the Navy leverages a whole-of-government approach to climate change adaptation.

The Arctic and Climate Change Roadmaps include action items that move the Navy forward in the efforts needed to meet these challenges. The roadmaps are vital tools for preparing the Navy for the future and ensuring that we are ready and capable to meet the mission requirements of the 21st century.

QUESTIONS SUBMITTED BY SENATOR JEANNE SHAHEEN

SUBMARINE SUPPORT FOR SPECIAL FORCES

4. Senator SHAHEEN. Admiral Greenert, the four current *Ohio*-class cruise missile submarines (SSGN) are scheduled to be retired between fiscal years 2026 to 2028. These boats have been particularly useful in providing our combatant commanders with both additional strike capability and Special Forces support. I understand the Navy is considering adding, to at least some of the future *Virginia*-class subs, an additional mid-body section equipped with large-diameter vertical launch tubes suitable for cruise missiles to replace some of the strike capability lost with the end of the SSGNs. I am concerned there is no current plan to replace the SSGN's capability to support larger Special Forces Operations. Could you share with me the Navy's plans to accommodate future covert Special Forces Operations too large for *Virginia*-class submarines once the SSGNs reach the end of their service life?

Admiral GREENERT. While an individual *Virginia*-class attack submarine (SSN) does not provide the same volume as an SSGN for support of Special Forces, the *Virginia*-class is the first SSN class designed up front to support Special Forces. As a result, all *Virginia*-class SSNs have many of the same capabilities to support Special Forces as the SSGN including: the ability to host a Dry-Deck Shelter, the ability to conduct swimmer lock-in and lock-out, advanced ship control for slow-speed station keeping, and dedicated spaces for Special Forces fitness and stowage. In the future, as the SSGNs retire from the inventory, the entire *Virginia*-class will be ready to support a wide range of Special Forces Operations.

The Navy will continue to work closely with Commander, Special Operations Command (SOCOM) to define the long-term requirements for undersea mobility of Special Forces. As the Navy evaluates options to restore undersea payload volume, such as the mid-body section described above, we will also continue to consider the need for enhanced Special Forces support.

PUBLIC SHIPYARDS

5. Senator SHAHEEN. Admiral Greenert, according to a 2009 Government Accountability Office report, the Navy had a backlog of \$3 billion in unfunded, yet absolutely critical, infrastructure projects at the Nation's four public shipyards. At Portsmouth Naval Shipyard alone, the unfunded requirements were valued at \$513 million. Going forward, how will the Navy prioritize investments and support modernization at each of the four public shipyards?

Admiral GREENERT. With workforce safety, health, and quality of life as top priorities, the Navy develops projects to improve shipyard efficiency and productivity, based on Infrastructure Condition Assessment Program (ICAP) and Asset Evaluation (AE) program data.

Regrettably we are unable to address every shortfall in the desired timeframe due to fiscal constraints; therefore, shipyard projects are evaluated and prioritized with all other Navy infrastructure projects. Our shore investments are prioritized to best enable warfighting and Joint capabilities, minimize the decline of mission-essential and quality of life infrastructure, and optimize warfare enterprise outputs and quality of service.

The Navy continues to invest in Naval Shipyard infrastructure within today's fiscally constrained environment through Sustainment (ST), Restoration and Modernization (RM), and Military Construction (MILCON). U.S. Code Title 10, Section 2476, requires that the Navy invest at least 6 percent of intermediate and depot maintenance funds (averaged over the previous 3 years) into the shipyard recapitalization program. The Navy spent 9.5 percent, 9.9 percent, and 15.6 percent of these funds on shipyard recapitalization in fiscal year 2008 through fiscal year 2010, respectively, and is in the process of investing 11.1 percent in fiscal year 2011.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

DEFENSE BUDGET CUTS

6. Senator MCCAIN. Admiral Greenert, in a House of Representatives hearing yesterday you testified in response to a question about the possibility of drastic defense budget cuts ranging from \$400 billion to a trillion dollars over the next 10 years that, "without a comprehensive strategic review, a fundamental look at what we were asking our forces to do, without a change in activity, we won't be able to meet the global force management plan today." As Vice Chief of Naval Operations, are you taking part in DOD's comprehensive strategic review?

Admiral GREENERT. As Vice Chief of Naval Operations, I was personally involved in decisional and informational meetings associated with DOD's comprehensive strategy review. This review involves inter-Service working groups and initiatives including the Joint Staff "Operational Availability 2012" analysis, the Director, Cost Analysis and Program Evaluation (CAPE) "Comprehensive Review," and Deputy Secretary of Defense Advisory Working Group (DAWG) meetings. These initiatives and analyses were helpful in establishing the impact on Joint Force Structure, missions, and capabilities associated with changing priorities or requirements inherent in today's DOD strategic and programmatic guidance. Until we revise today's strategy—what we are asking our forces to do—we will not have a sustainable global force management plan for the expected fiscal environment. Regardless, I remain personally committed to not allowing across-the-board cuts with unchanged operational demands to hollow out the force.

7. Senator MCCAIN. Admiral Greenert, is the review an objective look at our national security commitments or an exercise to find at least \$400 billion to a trillion dollars?

Admiral GREENERT. The need to reduce Federal deficits initiated the review. The review is part of the "ways and means" to an end state of remaining within fiscal guidance.

8. Senator MCCAIN. Admiral Greenert, if the Navy is asked to significantly cut budgets during your tenure as Chief of Naval Operations (CNO), what programs or other current activities do you think you can cut or scale back?

Admiral GREENERT. There are no obvious programs or activities to make further reductions. Today, the Navy is unable to meet unrestrained combatant commander demands. In the fiscal year 2012 budget Navy proposes to cut overhead to reinvest in our ability to provide forces. It would be imprudent to make further overhead reductions without first evaluating the impact of these cuts. Going forward, we will have to make reductions based on an evaluation of the level of budget cuts and the strategic priorities DOD establishes to defend the Nation. In meeting this challenge, my intention would be to:

- Prioritize readiness to ensure the force we have is fully mission capable
- Ensure our sailors, civilians, and their families are properly supported
- Sustain relevant Navy-unique capabilities that support the Joint Mission
- Ensure a coherent balance of capability and capacity of the force, and
- Consider the stability of the industrial base

NAVY SHIP READINESS

9. Senator MCCAIN. Admiral Greenert, I remain concerned about what I see as an overall downward trend in ship maintenance funding and a commensurate rise in ship inspection failures. In a House Armed Services Committee hearing this week you testified, "there is a consistent, downward trend in some indicators of material readiness since 2007. I don't see how we can keep at the current tempo of operations. I'm concerned we will not reach the expected ship service lives planned for in our shipbuilding plan. I can't tell you for sure if we're at a tipping point. However, we're on the edge." What, in your view, has caused this dramatic increase in inspection failures?

Admiral GREENERT. The singular and significant indicator of reduced material readiness has been higher failure rates for surface ships during inspections by the Navy Board of Inspection and Survey. Recent readiness reports by the Fleet indicate that this trend is turning. However, we will remain vigilant and proactive. We conducted a review of surface force readiness, which identified a number of root causes. These include reduced surface ship and intermediate maintenance center manning and the disestablishment (by BRAC 1995) of the surface ship life cycle engineering organization. These changes stopped updates to ship Class Maintenance Plans (CMP); eliminated the technical support to plan maintenance periods, and reduced the ability of crews to complete required maintenance.

In response, we put executive-level oversight in place and initiated a multi-prong plan to improve surface ship readiness. This plan includes increasing surface ship manning (in progress) and restoring organizations to plan and manage ship lifecycle maintenance, including technical support for planning and conducting maintenance periods. We also significantly increased the fiscal year 2011 and fiscal year 2012 baseline ship maintenance budget submissions (compared to fiscal year 2010). Today, Navy's maintenance account is fully funded.

While our ability to plan and conduct maintenance is much more comprehensive, an additional factor affecting surface ship readiness is the high operational tempo of the last 10 years. Since 2001, underway days per ship increased by 15 percent while Fleet size decreased by 10 percent. This reduces the time a ship is available in port to conduct maintenance—even if it is pre-planned and fully funded. The Navy is investigating options to improve the balance between presence and pre-deployment training and maintenance requirements, in order to achieve a sustainable level of operations that is consistent with the size of the fleet.

10. Senator MCCAIN. Admiral Greenert, how do you intend to fix it?

Admiral GREENERT. Numerous initiatives are currently underway to reverse the identified negative trends in Surface Force readiness, and to ensure our ships achieve their Expected Service Life (ESL). Most importantly, Navy has established:

- A surface ship life cycle manager—Naval Sea Systems Command (NAVSEA), Deputy Commander for Surface Warfare (SEA 21);
- A Regional Maintenance Center (RMC) Command for waterfront maintenance oversight—Commander, Navy Regional Maintenance Center (CNRMC); and
- A surface ship life cycle engineering agent—Surface Maintenance Engineering Planning Program (SURFMEPP).

With the establishment of SEA 21 and CNRMC, the Surface Force now has organizations in place to manage fleet maintenance and modernization. CNRMC leads the development and execution of standardized processes, policies, and training at the RMCs, and is improving the management of multi-ship/multi-option private industry maintenance contracts. Under NAVSEA's guidance, the maintenance philosophy for surface ships now parallels the engineering and life cycle processes currently in place for carriers and submarines, which traditionally meet or exceed their design service life.

SURFMEPP reports directly to SEA 21, and will re-establish the engineered requirements and CMPs necessary for surface ships to reach their ESL. Additionally, they are creating life cycle maintenance plans for each ship, based on the CMP and actual ship condition. As a result, the Navy now has a better understanding of the impacts from, and the ability to accurately track, deferred maintenance that must be accomplished in the future.

The Navy is incorporating best practices into how we evaluate and improve material condition. We partnered with the American Bureau of Shipping (ABS) to help assess the material condition of our surface ships. We established the Surface Warfare Enterprise Assessment Program, supported by technical experts from the RMCs, to conduct ship material condition assessments, and are focusing on development and demonstration of new corrosion control technology, materials, and processes. Corrosion control assistance teams have also been established in each Fleet concentration area.

The Navy increased surface ship manning by 1,105 sailors in the fiscal year 2012 budget submission, and is increasing military and civilian manning at RMCs as well. With increased RMC manning, we are reestablishing some intermediate maintenance capabilities and expanding intermediate maintenance capacity. This also increases shore-duty opportunities for Fleet Sailors, who can then return to sea with journeyman-level maintenance skills.

Since fiscal year 2010, the Navy added significant resources to annual ship maintenance budgets, specifically targeted at surface ship maintenance. While fiscal challenges in fiscal year 2012 have required that some risk be taken in ship depot maintenance, we will work to minimize the impacts and continue the gains made in surface ship readiness over the last several budget cycles.

I intend to continue to support these programs and expect that, as they mature, Fleet material readiness will improve. I anticipate it will take a long-term deliberate effort to deliver consistent tangible improvements. The first depot maintenance availabilities planned under SURFMEPP are scheduled to occur in fiscal year 2012. I expect ships to meet Fleet standards and we will continue to closely monitor the Fleet's progress. I am confident that the improvements we are making, based on proven Navy and industry practices, are on the right course.

NAVY'S SUBMARINE PROGRAMS—OHIO-CLASS AND VIRGINIA-CLASS

11. Senator MCCAIN. Admiral Greenert, I note in the answers to your advance policy questions you cite \$5.6 billion for the first two hulls with a goal to reach \$4.9 billion. The *Ohio*-class replacement SSGNs are expected to run about \$6 billion each and the *Virginia*-class submarines cost about \$2 billion each, under the current

multi-year procurement plan. With more than half of the construction and development cost dollars being needed to build extraordinarily expensive nuclear submarines, I'm concerned that our commitment to submarines may be crowding out funding needed to modernize the surface fleet. Given a \$400 billion target for reductions in the DOD budget, and potentially up to a trillion dollar cut, can we afford new submarines that cost that much money?

Admiral GREENERT. Although a significant capital investment, submarines are extraordinarily important to our Nation's security. Attack submarines (SSN) are uniquely capable and possess access-denial capabilities to gather intelligence or perform multiple combat missions—creating considerable strategic uncertainty for an adversary. Ballistic missile submarines (SSBN) are the most survivable leg of our Nation's nuclear deterrent triad.

While we have reduced the cost of the *Ohio* Replacement SSBN substantially, our total shipbuilding budget will be pressurized in the 2020s as we seek to recapitalize our surface and submarine forces while sustaining warfighting readiness and supporting our people. To accommodate SSBN recapitalization we are considering reducing (in the 30-year Shipbuilding Plan) SSN procurement to one per year (from the current two) in the mid-2020s while maintaining the same approximate build rate for surface combatants. In that same timeframe however, many of our existing cruisers, destroyers, and SSNs will reach the end of their service lives. As a result, the number of surface combatants and SSNs may go below our current goal in the mid-2020s; while amphibious ships will remain above their goal until the 2030s.

I am confident our near-term force structure plans provide the capability and capacity we need to meet demands today, but within this decade we must determine how to best resource the shipbuilding programs required in the 2020s. The Navy will continue to consider mitigation strategies for these anticipated changes.

12. Senator McCAIN. Admiral Greenert, how does the Navy intend to ensure that overall surface ship production does not substantially decrease while it's building submarines?

Admiral GREENERT. The Navy remains committed to sustaining the force structure required to implement the Maritime Strategy. Our current shipbuilding plan continues to grow the fleet within available resources over the next decade.

In the 2020s, several factors will challenge our ability to sustain the fleet capacity needed to meet today's level of operational demand. *Ohio*-class ballistic missile submarines (SSBN) must be recapitalized in that timeframe to sustain the most survivable leg of the nuclear triad while many of today's attack submarines (SSN) and large surface combatants will reach their end of service life and be decommissioned. During the years in which the new SSBN is being procured, construction of other ship types will be reduced, impacting our force size and the shipbuilding industrial base.

To reduce costs and minimize the impact on other ship construction, the *Ohio* Replacement Program has been thoroughly reviewed. All aspects of the program (warfighting requirements, program execution, design, and construction efforts) were aggressively challenged to drive down non-recurring engineering and construction costs while still meeting the core military requirements for a survivable nuclear deterrent. In all shipbuilding programs, the Navy continually strives to reduce costs, specifically through designs that reduce total ownership and acquisition costs, establishment of reasonable operational and maintenance requirements, and prudent planning for future disposal.

While the threats, demands, and mission requirements for mid to late 2020s are not well understood, we will continue to consider mitigation strategies for the anticipated shortfalls in fleet capacity. The Navy is planning to manage the service lives and modernization of existing ships during this period to minimize block obsolescence. As requirements, available resources, and the industrial landscape come into better focus, the Navy will procure the most appropriate mix of ships to address the anticipated mission needs of combatant commanders.

NAVY SHIPBUILDING STRATEGY

13. Senator McCAIN. Admiral Greenert, last year the Navy submitted to Congress its 30-year shipbuilding plan, calling for a 313-ship battle force inventory as its baseline. However, building the required force structure will largely depend on controlling shipbuilding costs (including related combat systems) within an affordable range. Will the Navy be able to maintain stability in requirements, funding, and profiles in an effort to control costs?

Admiral GREENERT. The Navy remains committed to sustaining the force structure required to implement the Maritime Strategy. By identifying efficiencies within Navy's portfolio, the fiscal year 2012 President's budget added five ships from fiscal year 2012 to fiscal year 2016 to provide more stability and sustainability to the industrial base and better maintain fleet capacity. Our combined efforts with Congress and industry to stabilize production of ships such as the *Burke*-class destroyer and *Virginia*-class submarine have paid off in lower per-unit costs and more rapid production.

In the 2020s, however, the cost of replacing the *Ohio*-class ballistic missile submarine (SSBN) will impact other elements of the Navy's shipbuilding plan. Recapitalizing this most survivable leg of the nuclear deterrent triad will occur at the same time many of today's cruisers, destroyers and attack submarines will be retiring. As a result, the number of large surface combatants and SSNs may decrease below our current goal in the mid-2020s. This would challenge the Navy's ability to maintain today's level of operations—if that level is required in the future.

To maximize our ability to recapitalize the fleet during SSBN procurement, the Navy will carefully manage the cost of future platforms. We will balance the operational and technical requirements of future platforms against their cost before they are contracted. We will continuously evaluate force structure requirements over the next decade to determine how the force should evolve in the 2020s while staying within available resources. We will continue to rely on proven designs and technology as much as possible to reduce technical risk and cost risk associated with new platforms.

The Navy is committed to maintaining stability in requirements, funding and profile in an effort to control costs. This will require the combined efforts of and collaboration between the Navy, Congress, the shipbuilding industry and the combat systems industry.

14. Senator MCCAIN. Admiral Greenert, controlling shipbuilding costs will require the combined efforts of the Navy, the shipbuilding industry, and the combat systems industry. What is the Navy doing to encourage fixed price contracts and ensuring that requirements are approved by the leadership will not change? Please give some discrete examples by program type.

Admiral GREENERT. The Navy addresses the acquisition strategy for new shipbuilding programs early in the acquisition process as part of the Material Development Decision and prior to initiation of the Analysis of Alternatives. The strategy includes a planned contract type based on a consideration of the risk associated with the program. To reduce costs in general, the Navy shipbuilding strategy leverages existing production designs. Because this also reduces risk, fixed price type contracts are more easily negotiated. If technical risk is considered high because of new program elements, we look for ways to invest in prototyping during technology development to mitigate the risk and achieve fixed price type contract terms prior to detail design and construction. Currently, all shipbuilding contracts are fixed-price, except for the CVN-78 aircraft carrier and DDG-1000 since both are lead ships.

The Navy continues to refine its Two-Pass/Six-Gate Review process to ensure requirements are set early and balanced against cost, and that this balance is visible and managed throughout the acquisition process. The Navy has also strengthened acquisition policy to improve program oversight, control cost growth, and more effectively monitor contractor performance.

For example, prior to Milestone A approval for the *Ohio* Replacement submarine, the Department evaluated numerous capability trades to reduce costs. As a result, the Navy (OPNAV and Secretariat staffs) made trades in the number of ballistic missile tubes, the diameter of those tubes, the number of torpedoes to be carried, acoustic sensors, and other defensive features throughout the design. These trades made the submarine more affordable while maintaining the necessary level of capability, resulting in a reduction of the projected cost to an objective cost of \$4.9 billion (fiscal year 2010 \$) for hulls 2–12.

DDG-1000

15. Senator MCCAIN. Admiral Greenert, 13 years ago, the Navy began what we now call the DDG-1000 program and over that time taxpayers have invested over \$10 billion. For that investment in time and money, we have to show one partially completed ship and no additional combat capability. At last report, the Navy and the builder of the DDG-1000 class were at loggerheads over contract negotiations for the last two DDG-1000 ships. What is the status of this program and why shouldn't it be killed and the savings transferred to other shipbuilding programs,

like the DDG-51 series ships that will have BMD capability that we have a growing need for?

Admiral GREENERT. Work on DDG-1000 and DDG-1001 at Bath Iron Works (BIW) is progressing well. DDG-1000 is over 50-percent complete and scheduled to deliver in fiscal year 2014 with an initial operating capability in fiscal year 2016. The second ship (DDG-1001) is more than 20-percent complete.

After careful and deliberate negotiations, Navy and General Dynamics BIW reached an agreement for pricing, terms, and conditions for construction of DDG-1001 and -1002. Details of the ship construction contract awards are expected to be finalized by the end of September. This agreement includes transitioning the partial construction contract for DDG-1001 into a full ship construction contract. The agreement also includes construction for DDG-1002. Both ships will be procured using fixed-price type contracts.

DDG-1000 *Zumwalt*-class guided missile destroyers will be an optimally crewed, multi-mission surface combatant designed to provide long-range, precision naval surface fire support for ground forces and Marines conducting littoral maneuver and subsequent operations ashore. DDG-1000 features two 155mm Advanced Gun Systems (AGS) capable of engaging targets with the Long-Range Land Attack Projectile at a range of more than 63 nautical miles. In addition to providing vital precise and volume fires in support of ground forces and Marines, DDG-1000 will field advanced technologies such as signature reduction, active and passive self-defense systems, and enhanced survivability features that will, when appropriate, be incorporated into future ship designs.

QUESTIONS SUBMITTED BY SENATOR ROGER F. WICKER

CHALLENGES IN EAST ASIA

16. Senator WICKER. Admiral Greenert, please provide your assessment of our emerging security challenges in Asia.

Admiral GREENERT. I think you can divide our emerging security challenges in Asia into two broad categories: traditional and non-traditional.

Addressing traditional challenges first, one of the most pressing concerns is stability on the Korean peninsula, especially in light of North Korea's impending leadership transition and continued economic decline. Shortages of fuel, food, and capital in North Korea could hit a "tipping point" in the near term that prompts large flows of refugees into South Korea or China. As last year's sinking of a South Korean naval ship and artillery strikes on a South Korean island demonstrate, North Korea's leaders remain unpredictable in the face of these challenges. We also continue to be concerned about North Korea's nuclear weapons, their developing ballistic missile capabilities, and their role in proliferating advanced weapons and associated technology abroad.

The biggest issue worthy of vigilance in the region is China's emergence as a major power economically, politically and militarily. In my view, the PRC is still in the process of defining its role in the world. One key factor in this process is how the PRC leadership perceives the future U.S. role in the region. The U.S. Navy is important to reassuring regional allies and partners. But the Navy can also demonstrate to the PRC the benefits of international security cooperation in areas such as counterpiracy, disaster relief and non-proliferation.

Beyond the Taiwan situation, there is increasing concern in East Asia about China's increasing assertiveness regarding maritime claims in the East China Sea and South China Sea. In both areas, U.S. naval presence plays an important role in reassuring our allies and ensuring that these disputes are settled peacefully, and that the fundamental rights of freedom of navigation and the flow of international trade are respected.

Among nontraditional security challenges, two of the biggest long-term concerns are demographic trends and the potential effects of climate change. These will significantly influence the future foreign policy decisions of countries throughout Asia, and in some cases will challenge their internal stability.

17. Senator WICKER. Admiral Greenert, do such challenges require the United States to maintain adequate maritime and air assets in theater for the indefinite future?

Admiral GREENERT. Yes. As articulated in the Maritime Strategy, the Navy remains committed to advancing our national interests in the Western Pacific. Strong, consistent U.S. military presence is a critical symbol of U.S. commitment to the region, and a key ingredient of continued peace and stability there.

Toward this end, we will remain vigilant, and evaluate and adapt our posture in the Western Pacific, including rotational deployments, forward stationing, and episodic operations with allies and partners. We also explore opportunities for more forward presence in the region that supports increased multilateral cooperation on maritime security and enhances our capabilities for assured Joint access to the sea, air, space, and cyberspace.

18. Senator WICKER. Admiral Greenert, as the United States faces growing challenges in East Asia and the need for budget austerity at home, what future role do you see amphibious ships and aircraft carriers playing in our force projection abroad?

Admiral GREENERT. Forward-stationed and rotationally deployed amphibious ready groups and carrier strike groups are essential to the U.S. Navy's ability to dissuade, deter and (if necessary) project power abroad. The synergistic application of the capabilities within these forces, while forward in the region, projects U.S. influence, responds to crises, and sustains key international relationships. Naval forces' posture—and inherent speed of response—show our commitment to the East Asia region, our partners and allies, and protect our vital national interests.

19. Senator WICKER. Admiral Greenert, this committee has long been interested in ensuring Taiwan's ability to defend itself. In your opinion, do continued arms sales and technical support to Taiwan's military lend to continued stability in the region?

Admiral GREENERT. Consistent with the provisions in the Taiwan Relations Act, the United States makes available to Taiwan defense articles and services in such quantity as may be necessary and appropriate. The United States Taiwan policy is based on our one China Policy, the three joint U.S.-China Communiqués, and the Taiwan Relations Act and reflects longstanding U.S. policy towards Taiwan.

NAVY BATTLE FORCE REQUIREMENTS

20. Senator WICKER. Admiral Greenert, I believe investments in shipbuilding must be directed where necessary to ensure that the Navy's battle force remains equal to the challenges of today as well as those it may face in the future. Our shipbuilding program must represent a balance between the expected demands upon the naval fleet for presence, partnership building, humanitarian assistance, disaster relief, deterrence, and warfighting, as well as available future resources.

With more than half of the construction and development cost dollars being needed to build extraordinarily expensive nuclear submarines, there is concern that our commitment to submarines may be crowding out funding needed to carry out ship modernization and construction of aircraft carriers as well as amphibious ships. This concern is exacerbated as the Navy faces an increasingly austere budget environment.

I am concerned the financial resources may not exist in the coming years to maintain the long-time stated requirement of a 313-ship fleet. As such, how will the Navy ensure proper balance in our shipbuilding programs to ensure our combatant commanders have the ability to maintain security in their respective regions?

Admiral GREENERT. The Navy remains committed to sustaining the force structure required to implement the Maritime Strategy. Our current shipbuilding plan balances the projected demands for naval forces from combatant commanders against expected future resources, taking into account the importance of maintaining an adequate national shipbuilding industrial base. The plan strives to be realistic about the costs of future ships. It is also part of an overall budget submission that balances risk against available resources across the entire Navy portfolio.

Today's fleet is unable to meet the unrestrained combatant commander demand for naval forces. Our current shipbuilding plan grows the fleet within projected resources over the next decade. While the Navy will continue to provide the best capability and capacity it can, combatant commanders will also have to explore innovative and alternative solutions to address the security challenges in their regions. We will collaborate with them in their endeavor.

In the 2020s, several factors will challenge our ability to sustain the fleet capacity needed to meet today's level of operational demand. *Ohio*-class ballistic missile submarines (SSBN) must be recapitalized in that timeframe to sustain the most survivable leg of the nuclear triad while many of today's attack submarines (SSN) and large surface combatants will reach their end of service life and be decommissioned. During the years in which the new SSBN is being procured, construction of other

ship types may be reduced, impacting our force size and the shipbuilding industrial base.

To reduce costs and minimize the impact on other ship construction, the *Ohio* Replacement Program has been thoroughly reviewed. All aspects of the program (warfighting requirements, program execution, design, and construction efforts) were aggressively challenged to drive down non-recurring engineering and construction costs while still meeting the core military requirements for a survivable nuclear deterrent. In all shipbuilding programs, the Navy continually strives to reduce costs, specifically through designs that reduce total ownership and acquisition costs, establishment of reasonable operational and maintenance requirements, and prudent planning for future disposal.

While the specific threats, demands, and mission requirements for mid- to late-2020s are not fully understood, we will continue to consider mitigation strategies for the anticipated shortfalls in fleet capacity. The Navy is planning to manage the service lives and modernization of existing ships during this period to minimize block obsolescence. As requirements, available resources, and the industrial landscape come into better focus, the Navy will procure the most appropriate mix of ships to address the anticipated mission needs of combatant commanders. The Department of Defense will also continue employing a comprehensive Global Force Management (GFM) process to most effectively allocate naval forces to the highest priority combatant commander requirements, and if necessary, re-task assets from other missions to support crisis response.

21. Senator WICKER. Admiral Greenert, please give your view on the impact of submarine construction costs on surface-ship building, including amphibious ships, and how it may impact the shipbuilding industrial base.

Admiral GREENERT. Between 2011 and 2021, submarine construction should not impact our ability to sustain the surface fleet. According to our projected ship inventory, the number of large surface combatants will grow to 97, small surface combatants will return to today's levels after the retirement of the *Perry*-class frigates, and the amphibious fleet will reach our goal of 33 ship.

Recapitalization of the Nation's sea-based strategic deterrent within the Navy shipbuilding account over a 15 year period (fiscal year 2019–fiscal year 2033) creates significant challenges to Navy shipbuilding goals. While we have reduced the projected cost of the *Ohio* Replacement substantially, our total shipbuilding budget will be pressurized in the 2020s as we seek to recapitalize our surface and submarine forces while sustaining warfighting readiness and supporting our people. Pending funding relief from outside the Navy, to accommodate SSBN recapitalization we would plan to reduce our build rate for destroyers and cut our SSN procurement to one per year (from the current two) in the mid-2020s. In that same timeframe however, many of our existing cruisers, destroyers, and SSN may reach the end of their service lives. As a result, the number of destroyers and SSNs will go below our current goal in the mid-2020s, while amphibious ships will remain above their goal until the 2030s.

While the threats, demands, and mission requirements for mid to late 2020s are unpredictable to some extent, we will continue to consider mitigation strategies for the anticipated shortfalls in fleet capacity. The Navy is planning to manage the service lives and modernization of existing ships during this period to minimize block obsolescence. As requirements, available resources, and the industrial landscape come into better focus, the Navy will procure the most appropriate mix of ships to address the anticipated mission needs of combatant commanders.

It is difficult to predict the impact to the shipbuilding industrial base with any precision during the period the *Ohio* Replacement will be procured. The Navy remains committed to sustaining the force structure required to implement the Maritime Strategy and to work with industry to maintain a viable shipbuilding industrial base, since it is the key to our future adaptability.

QUESTIONS SUBMITTED BY SENATOR ROB PORTMAN

UNMANNED SYSTEMS

22. Senator PORTMAN. Admiral Greenert, the Navy's unmanned systems master plan was released in 2004 and most recently updated in 2007. What are your intentions to update this plan and what priority will you accord planning, development, and acquisition of unmanned systems?

Admiral GREENERT. The Navy updated and integrated the 2004 and 2007 unmanned system plans earlier this year. The 2004 Unmanned Undersea Vehicle Mas-

ter Plan and the 2007 Unmanned Surface Vehicle Master Plan laid out a vision for development and employment of unmanned systems in the undersea and sea surface domains, respectively. Those documents were developed by the undersea and surface warfare communities, respectively, supported by their technical communities and fleet counterparts.

With the establishment of Navy's Information Dominance Corps in 2010, the Deputy Chief of Naval Operations for Information Dominance (N2N6) assumed responsibility for unmanned systems across all domains—over, on and under the sea. This alignment is consistent with a significant purpose of these systems to collect and transmit information to support the warfighter. In January 2011, N2N6 developed a single roadmap for unmanned systems that updates and integrates the preceding domain-specific documents as “The U.S. Navy's Information Dominance Roadmap for Unmanned Systems.”

This updated roadmap describes how unmanned systems will add significant capabilities to the Navy's Information Dominance systems and platforms and act as a force multiplier for long-endurance, hazardous or high-threat missions where humans are limited in achieving mission success. The roadmap also identifies where unmanned systems can provide a viable alternative to “traditionally” manned missions. It focuses on the years 2011–2020 and guides development, production, and fielding of unmanned systems and associated support systems into the fleet. I intend to continue placing priority on the planning, development and acquisition of unmanned systems as guided by this roadmap.

23. Senator PORTMAN. Admiral Greenert, what are your thoughts and plans for how to evolve Navy personnel and related programs to support the unmanned systems technology?

Admiral GREENERT. Navy currently operates the majority of its unmanned systems as adjuncts to manned warfare systems. For example, the helicopter community employs the Firescout vertical takeoff and landing unmanned aerial vehicle (UAV) and the maritime patrol community operates the Broad Area Maritime Surveillance UAV. This approach maintains the focus of unmanned systems and their operators on needed missions, capitalizes on commonalities between manned and unmanned systems, and leverages the knowledge and experience of personnel in existing warfare communities. We will expeditiously move from “adjacent” to full integration.

Training for unmanned systems is planned to be modular, and will leverage best-practices developed to support similar manned systems. Modular training for Navy unmanned aircraft systems (UAS) will allow standardization in common subject areas between systems with the flexibility to address specific mission requirements for each UAS. This approach to training allows aviation and non-aviation personnel to attend only those training courses required to attain the necessary skill sets to operate a specific UAS.

Navy is currently working with other services to develop joint operational and training concepts using unmanned systems, and to determine if commonalities between systems will create greater capabilities and increased efficiencies.

As unmanned systems technologies mature and inventories increase, Navy will reevaluate the need for a separate unmanned systems community. As each new unmanned system is developed and integrated within the fleet, Navy manpower and personnel officials will ensure proper community management and career development for personnel involved in these systems. The Navy will also continue to assess new missions and evolving technologies to determine whether new or additional training, education, or experience will be needed to provide the required skills and expertise to maximize our return on investment in unmanned systems.

24. Senator PORTMAN. Admiral Greenert, recently, Admiral Roughead made comments to the effect that unmanned systems might be able to reduce the needs for manned forces, specifically unmanned undersea vehicles (UUV) in place of manned nuclear submarines. Do you see UUVs as an eventual replacement for manned nuclear submarines or in particular, manned nuclear submarine missions?

Admiral GREENERT. UUVs are not specific replacements for manned nuclear submarines (SSN/SSGN). It is unlikely they will have the autonomy, range or endurance to conduct the range of current manned submarine missions for the foreseeable future. UUVs will complement submarines by expanding their reach or conducting specific missions for which UUVs are particularly well-suited. Especially in the littoral environment, UUVs have significant advantages in cost, size, and ability to conduct higher risk operations compared to manned submarines. This will allow UUVs to take on new missions we would not or could not do with a manned plat-

form. UUVs can also take on some current undersea tasks, freeing manned submarines for other critical missions.

Over the past decade, unmanned systems have evolved from unique, stand-alone systems to an integrated part of our warfighting capability. The introduction of UAVs into the fleet has been a great success and I believe that we can duplicate this success with UUVs. I share Admiral Roughead's concern regarding UUV endurance and autonomy. These hurdles are being addressed and I believe that UUVs will eventually serve as a force multiplier and complement to our manned nuclear submarine force, as well as service in other peacetime and warfighting requirements.

There is a very high demand for our manned submarine force in a variety of mission areas and theaters. This sustained demand in the face of decreasing submarine force structure will result in a submarine capacity gap. UUVs can be used to mitigate this capacity gap in some cases by performing important missions that may be allocated to a mission-focused UUV, rather than a multi-mission manned submarine. By combining UUVs and manned submarines as part of an overall undersea network, missions can be performed across a much larger area and for extended periods of time at a significantly reduced cost.

BUDGET CONSTRAINTS

25. Senator PORTMAN. Admiral Greenert, given the budget pressure on the Navy, what is your position on using multiyear service contracts for underway combat logistics force services?

Admiral GREENERT. We are examining multi-year "fee-for-service" contracts in the T-AO(X) Analysis of Alternatives (AoA). We have asked OMB for an opinion how such a construct should be scored, since previous long-term operating lease/service contracts have been scored as capital, vice operating leases, and would not necessarily be cost-effective compared to direct acquisition.

26. Senator PORTMAN. Admiral Greenert, is this approach being considered in the analysis of alternatives for the T-AO(X) program?

Admiral GREENERT. Yes. The Fleet Replenishment Oiler Analysis of Alternatives Scope and Tasking Directive lists a variety of financing including, "consider various leasing options for a commercial tanker modified to provide refueling at sea, to include a fee-for-service cost option."

ALL-ELECTRIC SHIP INITIATIVE

27. Senator PORTMAN. Admiral Greenert, what is your assessment of the progress being made with the All-Electric Ship Initiative?

Admiral GREENERT. The Navy is beginning to realize the benefits of all-electric ship technologies. The flexibility of transmitting electricity around the ship instead of fuel or steam allows power generating and conversion modules to be installed and connected to propulsion or combat systems in the arrangement that best supports the ship's mission at the lowest total ownership cost. We are currently fielding several new all-electric technologies such as hybrid electric drives, advanced energy storage modules, and Integrated Power Systems (IPS) to meet increasing electrical power demands, enhance operational flexibility, and reduce fuel requirements. The Navy is also pursuing an open architecture approach for the next generation IPS, including electric propulsion, power conversion, generation, storage and distribution components, to obtain simpler, more affordable and more capable shipboard systems.

The Navy has begun adoption of the all-electric or IPS architecture. The *Lewis and Clark*-class (T-AKE) dry cargo ships are powered by a commercial IPS, realizing reduced acquisition and life cycle costs. USS *Zumwalt* (DDG-1000), now under construction, will be the first fully militarized IPS ship, providing 78 megawatts of installed power for propulsion and ship service in a single, unified electrical system. USS *Makin Island* (LHD-8) is the first amphibious ship built with gas turbine engines and hybrid electric drive. This system has demonstrated significant fuel savings as compared with steam driven LHDs. The Navy will be demonstrating both hybrid electric drive and energy storage module prototypes on DDG-51 class ships in 2012 as part of the Green Strike Group. Acquisition of both of these energy saving technologies for backfit into existing ships is beginning with production systems expected in the Fleet by 2016.

28. Senator PORTMAN. Admiral Greenert, do you assess that development and testing for the electrification of submarine actuation is progressing to meet program goals?

Admiral GREENERT. Yes I do. Although the migration to the "all-electric" submarine has been slowed by funding constraints and schedule imposed by delivery dates, significant progress is being made toward achieving this goal.

In support of exploiting the benefits of electric actuation, several families of reliable electric actuation components, which will replace their hydraulic counterparts, are being installed this year on a *Virginia*-class submarine for evaluation purposes. These components will be cycled through realistic operational scenarios to the same degree that their hydraulic counterparts are typically cycled during a deployment. Additionally, a retractable bow plane electrically actuated control surface system is under development for *Virginia*-class.

The *Virginia*-class and *Ohio*-replacement submarine programs are already leveraging these electric actuation development efforts. Additionally, a common, open architecture, multiplexing controller for these electric actuators is under development to facilitate lower acquisition and life cycle costs. Final implementation of these electric actuators and the common controller on *Virginia*-class and *Ohio* replacement will continue to undergo evaluation as analysis is conducted and specifics of the detailed design process for each platform are developed.

In addition, a Project Arrangement between the United States and United Kingdom is under development to perform land based comparative performance testing of both countries' submarine control surface electric actuation systems. This Project Arrangement will include sharing of test data and insight into alternative electric actuation prototypes.

QUESTION SUBMITTED BY SENATOR KELLY AYOTTE

BUDGETARY CONSTRAINTS

29. Senator AYOTTE. Admiral Greenert, in your response to the advance policy questions, you state: "The Nation cannot have a strong defense without a strong economy; therefore I view the deficit crisis and corresponding deep cuts in defense as one of the most significant challenges to the entire national security community." Do you agree with Chairman Mullen that, "The most significant threat to our national security is our debt?" Please explain your answer.

Admiral GREENERT. Over the long-term, history shows that a nation's economic strength is the foundation of its national security. This has been true of the United States, as evidenced by our success in two World Wars and the Cold War. If our national debt grows to the point where it begins to tangibly and significantly erode our overall economic position, I think it could become a detriment to our national security. But, I believe this effect would take time to manifest itself. Our current economic challenge is a result of many interrelated factors, of which the debt is one element.

My concern today is balancing the need to reduce our current deficits while minimizing the possibility our national debt will rise to a damaging level. We need to do our part. That means we have to deliver whole and effective warfighting capability and capacity in the most affordable manner possible. Achieving this is one of our most significant challenges.

[The nomination reference of ADM Jonathan W. Greenert, USN, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
July 22, 2011.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment as Chief of Naval Operations, U.S. Navy, and appointment to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., sections 601 and 5033:

To be Admiral

ADM Jonathan W. Greenert, 0000.

[The biographical sketch of ADM Jonathan W. Greenert, USN, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF ADM JONATHAN WILLIAM GREENERT, USN

15 May 1953 Born in Butler, PA
 30 June 1971 Midshipman, U.S. Naval Academy
 04 June 1975 Ensign
 04 June 1977 Lieutenant (junior grade)
 01 July 1979 Lieutenant
 01 Oct. 1983 Lieutenant Commander
 01 Sep. 1988 Commander
 01 Oct. 1994 Captain
 25 Sep. 1998 Designated Rear Admiral (lower half) while serving in billets commensurate with that grade
 01 Oct. 1999 Rear Admiral (lower half)
 Nov. 2001 Designated Rear Admiral while serving in billets commensurate with that grade
 01 Nov. 2002 Rear Admiral
 01 Oct. 2004 Vice Admiral
 28 Sep. 2007 Admiral, Service continuous to date

Major duty assignments:

Assignments and duties	From	To
USS <i>Flying Fish</i> (SSN-673) (Electronics Material Officer)	June 1975	Mar. 1976
Naval Nuclear Power School, Naval Training Center, Orlando, FL (DUINS)	Apr. 1976	Sep. 1976
Naval Nuclear Power Training Unit, Windsor, CT (DUINS)	Sep. 1976	Apr. 1977
Naval Submarine School, Groton, CT (DUINS)	Apr. 1977	July 1977
USS <i>Tautog</i> (SSN-639) (Electrical Division Officer)	July 1977	Aug. 1980
Commander, Submarine Force, U.S. Pacific Fleet (Underwater Fire Control Systems Officer)	Aug. 1980	July 1982
Submarine (NR 1) (Engineer Officer)	July 1982	Oct. 1985
Naval Submarine School, Groton, CT (DUINS)	Nov. 1985	May 1986
Trident Training Facility, Bangor, WA (DUINS)	May 1986	June 1986
XO, USS <i>Michigan</i> (SSBN-727)	June 1986	May 1988
Office of the CNO (Head, Submarine Programs Section) (OP-80)	May 1988	June 1990
Naval Reactors, Department of Energy (PCO Course)	June 1990	Sep. 1990
Commander, Submarine Force, U.S. Pacific Fleet (PCO Training)	Sep. 1990	Dec. 1990
CO, USS <i>Honolulu</i> (SSN-718)	Dec. 1990	July 1993
Strategic Studies Group Fellow, Newport, RI	July 1993	June 1994
Office of the CNO (Head, Program Planning and Development Branch) (N801)	June 1994	June 1996
Commander, Submarine Squadron Eleven	June 1996	June 1997
Commander, Seventh Fleet (Chief of Staff)	June 1997	Oct. 1998
U.S. Pacific Command Representative, Guam, Commonwealth of the Northern Mariana Islands, Federated States of Micronesia, Republic of Palau/Commander, Naval Base, Guam	Oct. 1998	Jan. 2000
Office of the Assistant Secretary of the Navy for Financial Management and Comptroller (Director, Operations Division)/Office of the CNO (Director, Operations Division, Fiscal Management Division) (N821)	Jan. 2000	Aug. 2002
Commander, U.S. Pacific Fleet (Deputy and Chief of Staff)	Aug. 2002	Aug. 2004
Commander, Seventh Fleet	Aug. 2004	Nov. 2006
Office of the CNO (Deputy Chief of Naval Operations for Integration of Capabilities and Resources) (N8)	Nov. 2006	Sep. 2007
Commander, U.S. Fleet Forces Command	Sep. 2007	Aug. 2009
Vice Chief of Naval Operations	Aug. 2009	To date

Medals and awards:

Distinguished Service Medal with two Gold Stars
 Defense Superior Service Medal
 Legion of Merit with three Gold Stars
 Meritorious Service Medal with one Gold Bronze Star
 Navy and Marine Corps Commendation Medal with three Gold Stars
 Navy and Marine Corps Achievement Medal with two Gold Stars
 Joint Meritorious Unit Award
 Meritorious Unit Commendation with two Bronze Stars

Navy "E" Ribbon with "E" Device
 Navy Expeditionary Medal with one Bronze Star
 National Defense Service Medal with one Bronze Star
 Global War on Terrorism Service Medal
 Armed Forces Service Medal
 Sea Service Deployment Ribbon with three Bronze Stars
 Navy and Marine Corps Overseas Service Ribbon
 Coast Guard Special Operations Service Ribbon

Special qualifications:

BS (Engineering) U.S. Naval Academy, 1975
 Designated Qualified in Submarines, 1978
 Capstone, 2000–4
 Designated Level IV Joint Qualified Officer, 2009

Personal data:

Wife: Darleen E. Hodges of Kalamazoo, MI
 Children: Jonathan R. Greenert (Son), Born: 01 May 1983
 Brian L. Greenert (Son), Born: 21 January 1985
 Sarah E. Greenert (Daughter), Born: 12 November 1988

Summary of joint duty assignments:

Assignment	Dates	Rank
U.S. Pacific Command Representative, Guam, Commonwealth of the Northern Mariana Islands, Federated States of Micronesia, Republic of Palau/Commander, Naval Base, Guam.	Oct. 98–Jan. 00	RDML

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by ADM Jonathan W. Greenert, USN, in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR–228

Washington, DC 20510–6050

(202) 224–3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
 NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A–9, B–4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Jonathan W. Greenert.
2. **Position to which nominated:**
Chief of Naval Operations.
3. **Date of nomination:**
July 22, 2011.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
15 May 1953; Butler, PA.

6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Darleen Elizabeth Greenert (Maiden Name: Hodges).

7. **Names and ages of children:**
Jonathan R. Greenert, age 28.
Brian L. Greenert, age 26.
Sarah E. Greenert, age 22.

8. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

None.

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational or other institution.

None.

10. **Memberships:** List all memberships and offices held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Knights of Columbus
U.S. Naval Academy Alumni Association
U.S. Naval Institute
U.S. Navy League
U.S. Navy Memorial
U.S. Naval Submarine League
American Legion

11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

Distinguished graduate award, Butler Area Senior High School, Butler, PA, received: Jun 22, 2002.

"Who's Who in the East" award, received: 2000/2001.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

13. **Personal view:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power.

Yes.

[The nominee responded to Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–E are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

J.W. GREENERT, ADM, USN.

This 29th day of June, 2011.

[The nomination of ADM Jonathan W. Greenert, USN, was reported to the Senate by Chairman Levin on August 2, 2011, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on August 2, 2011.]

[Prepared questions submitted to LTG Charles H. Jacoby, Jr., USA, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders' responsibilities and authorities and the role of the Chairman of the Joint Chiefs of Staff. These reforms have also vastly improved cooperation between the Services and the combatant commanders, among other things, in joint training and education and in the execution of military operations.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. My first combat operation as an Army officer was to command a parachute rifle company in the U.S. intervention in Grenada in 1983. I witnessed first-hand the problems, deficiencies, and challenges we faced in conducting joint operations. A little over a year ago, I completed a tour as the Commanding General, Multi-National Corps-Iraq. This time, I witnessed first-hand the tremendous power, integration, and the unsurpassed adaptability and dominance of our joint force. I attribute the foundation of this remarkable transformation to be the Goldwater-Nichols Act of 1986.

At this time, I do not see a need to modify the provisions of the Goldwater-Nichols Act. If confirmed, I will recommend changes to this landmark legislation, if needed.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. Not applicable.

DUTIES AND QUALIFICATIONS

Question. What is your understanding of the duties and functions of the Commander, U.S. Northern Command (NORTHCOM)?

Answer. The Commander, NORTHCOM, is responsible for defending the people and territory of the United States against threats to our Homeland. The commander is also responsible for security cooperation with Canada, Mexico, and The Bahamas, as well as providing military support to Federal, State and local authorities in response to natural or manmade disasters. The Commander's newest responsibility is to advocate for Arctic capabilities as assigned in the 2011 Unified Command Plan (UCP).

Question. What is your understanding of the duties and functions of the Commander, North American Aerospace Defense Command (NORAD)?

Answer. The Commander of NORAD is responsible for aerospace warning, aerospace control, and maritime warning of North America. Reporting to both the President of the United States and the Canadian Prime Minister, the Commander of NORAD provides both governments tactical warning and attack assessment through an integrated aerospace threat picture.

Question. What background and experience do you possess that you believe qualify you to perform these duties?

Answer. It is my privilege to have served over 33 years in a variety of positions from platoon leader to Commanding General, I Corp. In Afghanistan, Iraq, and Central America, I guided combined and joint task force headquarters comprised of soldiers, sailors, airmen, marines, and Department of Defense (DOD) civilians, as well as interagency and coalition partners. My current position as the Director for Strategic Plans and Policy on the Joint Staff has given me a clear understanding of joint, combined, and international operations; the role a combatant commander plays in theater security cooperation; the importance of interagency teamwork; and the interdependent role of all components of the Total Force—Active, Guard, and Reserves—in defending our Homeland and supporting civil authorities in times of crisis.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform the duties of the Commander, NORTHCOM, and Commander, NORAD?

Answer. If confirmed, I will take advantage of every opportunity to build on my experience of homeland defense and civil support operations. I intend to deepen my understanding of the threat posed to the United States and our neighbors by

transnational criminal organizations (TCO), as well as the whole-of-government approach to defeat them. Another near-term activity, if confirmed, will be to work closely with The Adjutants General, State Governors, and the leadership of key Federal agencies regarding the vital role of National Guard and Federal Reserve Forces in our Nation's response to natural and manmade disasters.

RELATIONSHIPS

Question. Section 162(b) of title 10, U.S.C., provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the commanders of the combatant commands. Other sections of law and traditional practice, however, establish important relationships outside the chain of command. Please describe your understanding of the relationship of the Commander, NORTHCOM, to the following officials:

The Secretary of Defense.

Answer. The Commander of NORTHCOM executes his missions under the authority, direction, and control of the Secretary of Defense. He is directly responsible to him for the preparedness of his Command and its ability to carry out assigned missions. If confirmed, I will ensure NORTHCOM continues the close working relationship it currently has with the Secretary of Defense.

Question. The Deputy Secretary of Defense.

Answer. The Commander of NORTHCOM ensures the Deputy Secretary has the information and support he needs to perform duties as directed by the Secretary of Defense. The Commander of NORTHCOM also coordinates with the Deputy Secretary on major homeland defense and civil support activities.

Question. The Under Secretary of Defense for Policy.

Answer. The Commander of NORTHCOM works closely with the Under Secretary of Defense for Policy in coordinating and exchanging information on strategic policy issues involving homeland defense, defense support of civil authorities, and security cooperation. In addition, the Commander interacts with the Under Secretary to support her duties as a key advocate for NORTHCOM requirements.

Question. The Under Secretary of Defense for Intelligence.

Answer. The Under Secretary of Defense for Intelligence is the Secretary's principal advisor on intelligence and counterintelligence matters. The Commander of NORTHCOM coordinates and exchanges information with the Under Secretary of Defense for Intelligence to obtain threat estimates and timely warning of worldwide threats to the NORTHCOM area of responsibility (AOR).

Question. The Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs.

Answer. The Commander of NORTHCOM works closely with the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs on homeland defense, defense support of civil authorities, and security cooperation issues.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Chairman is not in the chain of command of the Commander of NORTHCOM to the President and the Secretary; however, title 10 does allow for communications from combatant commanders through the Chairman. This keeps the Chairman informed so that he can execute responsibilities as the principal military advisor to the President and Secretary of Defense. If confirmed, I will communicate closely with the Chairman to enable him to perform his duties.

Question. The Secretaries of the Military Departments.

Answer. The Secretaries of the military departments are responsible for organizing, training, and equipping forces assigned to all the combatant commands. The Commander of NORTHCOM works closely with the Secretaries to ensure homeland defense, civil support, and security cooperation requirements are met. This interaction is particularly important to ensure the Reserve component is prepared to respond to domestic crises.

Question. The Chiefs of Staff of the Services.

Answer. The Commander of NORTHCOM exchanges information with the Chiefs of Staff of the Services to support their responsibility for organizing, training and equipping forces for homeland defense and civil support operations, as well as security cooperation activities. Additionally, the Commander of NORTHCOM communicates with the Chiefs on force protection matters within the command's AOR. Similar to the Chairman, the Service Chiefs are valuable sources of judgment and advice for combatant commanders.

Question. The other combatant commanders, particularly U.S. Southern Command (SOUTHCOM).

Answer. The Commander of NORTHCOM maintains close relationships with the other combatant commanders, particularly SOUTHCOM, U.S. Strategic Command,

U.S. Transportation Command, U.S. Special Operations Command, and U.S. Pacific Command (PACOM). These relationships are characterized by mutual support, frequent contact, and productive exchanges of information on key issues. If confirmed, I will maintain open lines of communication with the other combatant commands to execute our National Military Strategy.

Question. The Chief of the National Guard Bureau.

Answer. National Guard forces are likely to be involved in almost all homeland defense and civil support missions. As such, close coordination between the Commander of NORTHCOM and the Chief of the National Guard Bureau is central to the success of these operations. If confirmed, I look forward to advancing this important relationship to strengthen our homeland defense and disaster response capabilities.

Question. The State Governors and Adjutants General.

Answer. State Governors and the Adjutants General play a critical role in NORTHCOM's homeland defense and defense support of civil authorities missions. If confirmed, I look forward to maintaining and developing strong relationships with these key partners, and especially sustaining the great teamwork and trusting relationships that Admiral Winnefeld has established.

Question. If confirmed, in carrying out your duties, how would you work with the Department of Homeland Security (DHS), the Homeland Security Council, and other Federal agencies, as well as state and local authorities and representatives from the private sector?

Answer. If confirmed, I will work operational issues with the DHS and other Federal agencies on a routine basis. If confirmed, I intend to communicate with local, State, and Federal agencies, as well as the private sector both personally and via the NORTHCOM Joint Interagency Coordination Group, to facilitate DOD assistance in accordance with the National Response Framework, and as directed by the President and the Secretary of Defense. I also look forward to having close working relationships with the senior leadership of each of these entities.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the next Commander, NORTHCOM?

Answer. I believe the biggest near-term challenge confronting the next Commander of NORTHCOM is the potential for an attack on our Homeland by violent extremists using asymmetric means or possibly weapons of mass destruction. Another immediate threat to our national security is the growing demand for illegal drugs in the United States, which is contributing to increasingly brutal and aggressive actions by TCOs in Mexico. In the longer term, the possibility of rogue nations acquiring nuclear weapons and the capability to use them against our Homeland may be a continuing challenge for the Commander of NORTHCOM.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will ensure NORTHCOM's plans and operations effectively address the full spectrum of threats to its AOR. In addition, if confirmed, I will strengthen the command's already robust exercise program, involving participants from DOD, the National Guard, and the interagency community, as well as State and local officials, to challenge and improve our Nation's capability to detect, deter, and defeat threats to our Homeland.

MISSION OF U.S. NORTHERN COMMAND

Question. What is the mission of NORTHCOM?

Answer. NORTHCOM conducts homeland defense and civil support operations within its assigned AOR in order to defend and secure the United States and its interests. In addition, the command is responsible for executing theater security cooperation with Mexico, Canada, and The Bahamas, with full respect for their sovereignty. NORTHCOM also advocates for Arctic capabilities in accordance with the 2011 UCP.

Question. How does NORTHCOM's mission relate to the mission of the DHS?

Answer. DHS is responsible for preventing terrorist attacks, as well as response and recovery from natural and manmade disasters. NORTHCOM is responsible for detecting, deterring, and preventing external threats to the United States, and when directed by the President or Secretary of Defense, providing defense support of civil authorities. NORTHCOM works closely with the DHS at all levels to plan, train for, and execute homeland defense and civil support missions and bring a whole-of-government approach to each operational challenge.

Question. Are there circumstances under which you would anticipate NORTHCOM would have the lead Federal role in responding to a domestic terrorist incident? Or do you believe NORTHCOM would operate only in support of other Federal departments and agencies?

Answer. In the event of an armed terrorist attack against the United States, the President may direct that DOD have the lead role in defending the United States. As the geographic combatant command responsible for the homeland, the Commander of NORTHCOM would likely be designated the supported commander for such an event. However, for most terrorist incidents within the United States, NORTHCOM will be in support of a primary agency, such as DHS, the Department of Justice, or the Federal Bureau of Investigation.

Question. What responsibility, if any, does NORTHCOM have with respect to the Defense Critical Infrastructure Program?

Answer. I understand that NORTHCOM's responsibility is defined by the January 2010 Secretary of Defense directive on critical infrastructure, which designates NORTHCOM as "responsible for preventing or mitigating the loss or degradation of DOD-owned critical assets within its AOR."

ORGANIZATION AND AUTHORITY

Question. NORTHCOM has been assigned responsibility for force protection and antiterrorism within its AOR.

What actions would you take, if confirmed, to mitigate force protection vulnerabilities, and what force protection challenges do you anticipate you would face within NORTHCOM's AOR?

Answer. If confirmed, I will place emphasis on executing a synchronized and coordinated antiterrorism program and force protection mission across the NORTHCOM AOR. As part of this, if confirmed, I will continue the progress made in the area of rapid force protection event notification, the use of the e-Guardian system, and the sharing of sensitive force protection threat information between law enforcement and DOD.

If confirmed, I anticipate that a force protection challenge may be to synchronize and effectively execute emerging force protection and security-related policy that is new for DOD. Among the new policy initiatives are DOD's Mission Assurance Strategy, the Defense Security Enterprise, and potentially, a new emergency management policy resulting from the Fort Hood Independent Review process.

Question. What actions would you take, if confirmed, to ensure efficiency in the use of funding for force protection and to prevent unnecessary duplication of efforts between NORTHCOM, the Military Services, and the Office of the Assistant Secretary of Defense for Homeland Defense?

Answer. I believe a comprehensive resource management approach requires the linking of missions, risks, and force protection resources. Although NORTHCOM does not have "oversight authority" over how the Services execute funding, if confirmed, I will work closely with the Service components and DOD to identify and eliminate gaps in our force protection posture. Projects relating to biometrically-enabled installation access control, identity management, and mitigation of vulnerabilities relating to Defense Critical Infrastructure are a few examples where I believe force protection efficiencies can be identified. If confirmed, I will ensure all Service component requests for combatant commander initiative funds for force protection initiatives are properly validated and vetted before they are submitted for final approval.

Question. What specific forces, if any, have been assigned to NORTHCOM?

Answer. NORTHCOM's assigned forces include the Headquarters Staff, as well as the following subordinate and component commands: U.S. Army North, Marine Forces North, Air Forces Northern, Joint Task Force Civil Support, Joint Task Force North and Joint Force Headquarters National Capital Region.

Question. How has the assignment of forces to NORTHCOM changed since NORTHCOM was established on October 1, 2002?

Answer. NORTHCOM achieved full operational capability on 1 October 2003, with forces assigned consisting of the Service component headquarters and two standing Joint Task Force headquarters. The following year, the Command stood up a third Joint Task Force, Joint Force Headquarters National Capital Region. In 2008, NORTHCOM was assigned forces in support of the standing Chemical, Biological, Radiological, Nuclear, and High Yield Explosive (CBRNE) Consequence Management Execute Order for a period of 12 months (October 2008–September 2009). In October 2009, the decision was reversed and CBRNE Consequence Management forces converted back to an allocated status, per the 2010 Global Force Management Allocation Plan. In 2011, NORTHCOM's Standing Joint Forces Headquarters was

disestablished and those resources were re-allocated within NORTHCOM's Operations Directorate.

NORAD

Question. What is the mission of NORAD?

Answer. NORAD conducts aerospace warning, aerospace control, and maritime warning in the defense of North America. Aerospace warning consists of detection, validation, and warning of an attack against North America. Aerospace control consists of air sovereignty and air defense of United States and Canadian airspace. Maritime warning consists of processing, assessing, and disseminating maritime intelligence and information and warning of maritime threats to or attacks against North America.

Question. How has NORAD's mission evolved since the creation of NORTHCOM?

Answer. Since the creation of NORTHCOM in 2002, NORAD's mission has expanded to include warning of maritime threats to or attacks against North America. NORAD also provides ballistic missile warning to NORTHCOM to support its ballistic missile defense mission.

Question. How does NORAD's mission relate to NORTHCOM's mission?

Answer. The missions of NORAD and NORTHCOM are distinctly separate, but complementary. NORAD conducts operations in the air domain and provides NORTHCOM warning of maritime threats to or attacks against North America, as well as warning of ballistic missile attack. NORTHCOM conducts land and maritime defense, U.S.-only air missions, and civil support. The commands coordinate on many issues, operate within a common security environment, and share a largely integrated headquarters staff.

Question. How does NORAD's mission relate to the mission of the DHS?

Answer. NORAD supports DHS by deterring threats in the air and maritime domains and supporting law enforcement when called upon by civilian agencies.

Question. Do you believe that NORAD should continue to have a combined operations and planning staff, and a consolidated command center, with NORTHCOM? Why or why not?

Answer. At this time, I do not have an informed opinion on the merits of separate operations and planning staffs for NORAD and NORTHCOM. However, if confirmed, I will ensure the commands are structured to maximize operational effectiveness.

NORTHCOM JOINT TASK FORCES

Question. Since the establishment of NORTHCOM, several multi-service task forces, e. g., Joint Task Force-Civil Support (JTF-CS), Joint Task Force-North (JTF-North), have been placed under its authority.

What is the current status of the Joint Task Force organizations under NORTHCOM in terms of mission, organization, planning, personnel allocation, and capability?

Answer. NORTHCOM currently has two Joint Task Forces organized under U.S. Army North:

JTF-CS provides command and control of DOD incident management forces that respond to catastrophic chemical, biological, radiological, nuclear, and high-yield explosive events.

JTF-North supports counterdrug and border patrol support along the United States-Canada and southwestern United States border, and other operations against transnational threats.

Also, NORTHCOM's Joint Force Headquarters National Capital Region provides land-based homeland defense, civil support, and incident management in the National Capital Region.

These three task forces operate as multi-Service organizations under NORTHCOM's authority and are manned to conduct homeland defense and defense support of civil authorities operations, as directed by the President or the Secretary of Defense. Their planning efforts are guided through NORTHCOM's family of plans for homeland defense and defense support to civil authorities.

COUNTER-NARCOTICS EFFORTS

Question. Each year, DOD spends several hundred million dollars to counter the flow of illegal drugs into the United States, yet the availability of drugs on the street has not been significantly reduced, and some countries continue to face internal security challenges in responding to this threat. Some of these funds are exe-

cuted within the NORTHCOM AOR, and some have questioned the effectiveness and focus of our counter-narcotics programs.

What role does NORTHCOM play in DOD's overall counterdrug mission and organization?

Answer. It is my understanding that NORTHCOM and its subordinate and component commands support the DOD counterdrug mission in both the domestic arena and with our international host nation partners. Transnational Criminal Organizations (TCOs) are a regional, hemispheric, and global threat to national security and interests. These transnational threats include drugs and other illicit trafficking activities. NORTHCOM has a very close relationship with SOUTHCOM and continues to build closer relationships with the other combatant commands in sharing information and situational awareness of TCO activities. NORTHCOM also works very closely with its host nation partners within its AOR, including its Canadian partners and with The Bahamas on counterdrug matters.

Question. What is your assessment of the ongoing counternarcotics operations within the NORTHCOM AOR and the geographic seam NORTHCOM shares with SOUTHCOM?

Answer. As I understand it, counternarcotics operations in the NORTHCOM AOR are conducted at the local, State, Federal, and bi-lateral level. As Joint Interagency Task Force-South succeeds in interdicting an increasing amount of the traffic heading to North America, TCOs quickly adapt to continue the flow of illicit drugs. Drug demand is a significant challenge in our country and the United States, and our neighbors together are trying to approach this and the flow of drugs as a whole-of-government(s) approach to the problem.

The geographic boundary between SOUTHCOM and NORTHCOM is a key route for drugs to enter Mexico on their way to the United States. My understanding is that the two commands are working closely on a regional approach in support of Mexico, Guatemala, and Belize. The Mexican government's efforts against TCOs have forced drug trafficking activities further south in these border countries where those governments have limited capability and capacity to fight TCOs. If confirmed, I will work to ensure a synchronized, seamless effort across borders between the two areas of responsibility (AOR). If confirmed, I will also further strengthen the command's relationship between Joint Interagency Task Force-South and NORTHCOM's Headquarters and subordinate commands, and continue to facilitate coordinated efforts with interagency and host nation partners.

Question. How are counterdrug operations coordinated across combatant command boundaries with PACOM?

Answer. Counterdrug operations on the boundaries with PACOM are coordinated via shared intelligence information among combatant commands, interagency partners, and the National Interdiction Centers, which includes PACOM's Joint Interagency Task Force-West. I believe synchronization between combatant commands is critical to counterdrug operations, and even more important is bringing to bear the resources of the Nation (a whole-of-government approach) to truly achieve unity of effort. If confirmed, I will continue to foster a strong relationship with PACOM.

Question. If confirmed, what changes, if any, would you propose?

Answer. If confirmed, I will examine NORTHCOM's relationship with the other combatant commands and determine if any changes are needed.

Question. How would you recommend that the success of the Department's counter-narcotics programs be measured?

Answer. As I've served in many capacities over the last 10 years of my career as a Commanding General, I've seen that being a commander is a time for assessing how command missions are being executed and then taking appropriate actions as needed. If confirmed, I commit to looking closely at the current capabilities and partnering efforts in place, as well as the resultant effects, and provide you my thoughts on this important effort.

Question. Do you believe that the current programs that the Department is pursuing are the most effective for the region, or should the Department's efforts focus elsewhere?

Answer. If confirmed, I look forward to developing my personal views regarding the Department's programs for Mexico and its neighbors to improve the success of countering the threats from TCOs.

Question. Compared to other missions that you would be responsible for as Commander, NORTHCOM, if confirmed, where would you rank counter-narcotics in terms of its contribution to our national security and the ability of DOD to make a meaningful contribution?

Answer. I believe that there is no higher priority mission for NORTHCOM than to defend the United States and its interests. Yet, countering the devastating effects related to the TCOs and its importance relative to U.S. national security is a very

important mission for NORTHCOM, and thus I would rank NORTHCOM's role in counternarcotics high. If confirmed, I look forward to contributing to the counternarcotics effort within the authorities granted to NORTHCOM.

Question. There has been a surge in drug-related violence in Mexico over the past year, which has increased the risk of cross-border violence into the United States. Much of the drug supply comes into Mexico across its southern border. The vast majority of Latin America, however, is in the SOUTHCOM AOR, so the security situation in Mexico is an example of the need for a well-coordinated effort between NORTHCOM and SOUTHCOM.

What is your vision of how SOUTHCOM and NORTHCOM could work together in a fully coordinated and seamless fashion with respect to Mexico and other security challenges?

Answer. I support the Chairman of the Joint Chiefs of Staff's belief that efforts to disrupt illicit sources and transit zones must be coordinated across North, Central, and South America, and the Caribbean. If confirmed, I welcome the opportunity to work with SOUTHCOM, the interagency community, and my Mexican counterparts to develop a regional strategy that harnesses the valuable lessons learned from Joint Interagency Task Force-South and the Mexican military's experience in confronting TCOs.

Question. The United States and Mexico announced in 2007, the start of a multiyear, bilateral security agreement called the Mérida Initiative. This Initiative aims to combat drug trafficking and other criminal activity along the U.S.-Mexican border, as well as in Central America. The U.S.-Mexican border is viewed as especially important for U.S. counternarcotics efforts because Mexico is currently the primary point of entry for cocaine and other drug shipments smuggled into the United States.

What is your understanding of the Mérida Initiative as it relates to NORTHCOM?

Answer. I believe the Mérida Initiative has placed us on the road to success in terms of the strong U.S. commitment to shared responsibility in countering the threat from TCOs in North America. The military contribution to the Mérida Initiative is a relatively modest portion of the total package of support, most of which is law enforcement-related and is now making a significant positive impact in Mexico. The long-term success will depend on Mexico's capacity to sustain and advance short-term gains, and to give communities the confidence that they can restore the rule of law.

Question. What is your view of the appropriate role of DOD in countering transnational drug cartels and gangs?

Answer. In my view, the Department's role in countering TCOs is one of support for other U.S. Government efforts and our Mexican partners as well. It is my understanding that NORTHCOM is focused on contributing to the success of the objectives framed by the Beyond Mérida Initiative: disrupt TCOs; promote justice, and the rule of law; build strong and resilient communities; and create a 21st century border. To these ends, the Department is focused on contributing the necessary capabilities and support to disrupt, degrade, or defeat TCOs' abilities that would negatively affect the national security and interests of United States and partner nations.

SECURITY RELATIONSHIPS WITH CANADA AND MEXICO

Question. The NORTHCOM AOR includes the land areas of the United States, Canada, and Mexico. The bi-national NORAD Command ensures close cooperation between the United States and Canada on security matters. NORTHCOM has been working with the Mexican military on security cooperation related to Mexico's efforts to counter TCOs that are involved in trafficking and causing extraordinary violence. Joint Task Force-North (JTF-N) has established itself as a active partner with U.S. law enforcement, mitigating cross border threats posed by trafficking in narcotics, weapons, and humans.

What is your assessment of the current security relationship between the United States and Canada?

Answer. Canada and the United States are close friends, allies, and trading partners. U.S. defense arrangements with Canada pre-date World War II and are one of our country's most extensive defense pacts. Canada and the United States view North American defense and security as shared responsibilities. NORAD is symbolic of this close defense relationship and has served as the epitome of the unique and long-lasting security cooperation relationship between our Nations for over 53 years.

I believe the NORAD and NORTHCOM relationship with Canada is exceptionally strong, especially the relationship that has been developed with Canada Command.

If confirmed, I will be honored to contribute to the long-standing partnership our country shares with Canada.

Question. What is your assessment of the current security relationship between the United States and Mexico?

Answer. My view is that the current security relationship between the U.S. and Mexican military is at its highest level ever at all echelons of command. If confirmed, I look forward to building upon many personal and professional relationships that have been formed by NORTHCOM. As discussed between the Presidents of Mexico and the United States in March 2011, the countries are strategic partners with shared responsibilities in the fight against the TCOs affecting the safety and security of North America.

Question. What is your assessment of the security challenges to the United States posed by TCOs in Mexico?

Answer. I believe that in today's increasingly globalized world, the prosperity and security of our friends and neighbors in North and Central America directly impact the welfare of the United States. Narcotics continue to be a significant security challenge to the United States and as long as there is demand within our borders, cash and weapons will continue to find their way into the hands of TCOs. TCOs not only traffic illicit drugs, they are involved in other significant criminal activity, such as extortion, robbery, kidnapping, trafficking in firearms and persons, and as evident in the 400 percent increase in violence over the past 3 years, they are extremely ruthless and brutal. Many of the TCOs are better financed and armed than many of the Mexican law enforcement agencies. This situation presents a substantial security challenge to the United States as it devastates the communities of our Mexican friends.

Question. What is your assessment of the security situation along the U.S.-Mexico border?

Answer. Responsibility for security along the U.S.-Mexico border falls under the responsibility of DHS. If confirmed, I look forward to working with the DHS and many others in the interagency community and, when directed by the President and the Secretary of Defense, providing DOD support to civil authorities.

Question. Would you characterize NORTHCOM's efforts to protect our southern border, specifically JTF-N's countering of TCOs, as a success?

Answer. I believe that given the counternarcotics resources applied, yes, I would characterize NORTHCOM's efforts as successful and making a difference, but this remains an economy of force effort. If confirmed, I look forward to examining NORTHCOM's efforts to support civil authorities on the border and making a first-hand assessment.

Question. What is your understanding of NORTHCOM's support to civil authorities operating along the southern border?

Answer. It is my understanding that NORTHCOM supports civil authorities when directed by the President or the Secretary of Defense. NORTHCOM has partnered with U.S. Customs and Border Protection and other interagency community partners to provide DOD capabilities along the U.S. southern border.

Question. What improvements in border protection capability, if any, would you recommend?

Answer. Since DHS is responsible for advocating for border protection capabilities, I would defer this question to the DHS.

Question. If confirmed, what would be your goals as Commander of NORTHCOM for improving security relations with Mexico, and how would you plan to achieve them?

Answer. If confirmed, my primary goal will be to continue to support the Mexican military to combat the threat of TCOs as effectively as possible while fully respecting Mexican sovereignty. The Mexican military has been asked by its civilian leadership to actively support Mexican law enforcement agencies to combat TCOs, while respecting Mexico's democratic ideals and the Nation's commitment to the Rule of Law and Human Rights. Mexican Security Forces have exhibited exemplary moral, political, and physical courage in combating TCOs. This struggle is being conducted on Mexican soil and Mexican families are being impacted by the recent escalation in TCO-related violence. If confirmed, I support NORTHCOM plans to continue to increase senior level Distinguished Visitor engagements, Subject Matter Expert Exchanges, Mobile Training Teams, and exercises with the Mexican Military to better counter the TCO threat.

UNMANNED AERIAL VEHICLES

Question. Unmanned aerial vehicle (UAV) flight within the continental United States is severely restricted including portions of the Canadian and Mexican bor-

ders. The Federal Aviation Administration is studying how to integrate unmanned systems and conventionally piloted aircraft in the same airspace.

In your view, have airspace restrictions on unmanned aerial systems (UAS) hindered the development and evolution of these aircraft?

Answer. In my view, airspace management is more of a challenge to UAV employment, than it is to development and evolution.

Question. Would you recommend opening larger parcels of airspace within the continental United States to UAS/UAV over flight?

Answer. It is my understanding that only the Secretary of Defense may approve the use of unmanned aircraft systems for defense support of civil operations, including Federal, State, local, and tribal government organizations. If confirmed, in that case, I would coordinate airspace requirements for an operation with the lead agency.

NORTHCOM-STATE RELATIONS

Question. NORTHCOM has the primary military responsibility to provide defense support to civil authorities when directed by the President and the Secretary of Defense, including consequence management operations. Such military assistance would support Federal assistance to State and local emergency response units.

Do you believe it is important for NORTHCOM to have an understanding of the emergency response capabilities and plans of the various States before a crisis arises, in order to optimize NORTHCOM's consequence management support to civil authorities?

Answer. Yes. It is my belief that State forces for consequence management, including the new Homeland Response Forces (HRF), are integral components of the Chemical, Biological, Radiological, and Nuclear (CBRN) Response Enterprise. It is my understanding that the State National Guards, the National Guard Bureau and interagency partners such as the Federal Emergency Management Agency have participated in NORTHCOM's development of a plan for CBRN response. I believe that this unprecedented level of cooperation will ensure the success of the CBRN Response Enterprise in the whole-of-government response to a CBRN attack or incident.

Question. If so, how would you plan to ensure that NORTHCOM has sufficient knowledge of State emergency response capabilities, including capabilities of National Guard units, capabilities of title 10 Reserve component forces, and a good working relationship with State emergency response leaders?

Answer. I understand NORTHCOM has an array of initiatives and efforts to sustain awareness of civil support requirements, including robust relationships between Defense Coordinating Officers and Defense Coordinating Elements and State emergency officials within their Federal Emergency Management Agency regions; the establishment of the Regional Desk Officer program at NORTHCOM headquarters; direct interaction with their assigned states by Title 10 Deputy Commanders under the Dual-Status Commander concept; and participation in state planning for HRFs as part of the Chemical, Biological, Radiological, and Nuclear Response Enterprise. In addition, DOD has established the policy and procedures to share operational plans with mission critical partners, to include Title 10 Reserve component forces, the National Guard of the States, and the National Guard Dual-Status Commanders. It is my belief that these efforts will enhance shared awareness of state military response plans and requirements. If confirmed, I will continue to support unity of effort in this important area.

FORCE PROVISION FOR NORTHCOM

Question. NORTHCOM has the mission of conducting military operations for homeland defense and, when directed by the President or Secretary of Defense, for providing military assistance to civil authorities, including consequence management for natural disasters and Chemical, Biological, Radiological, Nuclear, and high-yield Explosive (CBRNE) incidents. Yet NORTHCOM has relatively few military forces assigned to it on a permanent basis.

What is your understanding of how forces are planned to be allocated to NORTHCOM for its full range of mission requirements?

Answer. It is my understanding that NORTHCOM's contingency plans and orders for all assigned missions contain force requirements that are allocated by joint force providers. Forces are not normally identified and sourced until just prior to a planned event or impending incident, or immediately after a no-warning incident. The exceptions are the standing Execute Orders for Chemical, Biological, Radiological, and Nuclear Consequence Management response forces and the Homeland Defense Quick Reaction Force/Rapid Response Force. Additionally, under the De-

fense Support of Civil Authorities Operations Standing Execute Order, the NORTHCOM Commander has the authority to place certain military capabilities on a 24-hour prepare-to-deploy order in advance of or in response to a contingency or national emergency.

Question. If confirmed, how do you intend to ensure that NORTHCOM will have sufficient forces available to it, properly trained and equipped, to accomplish its assigned missions?

Answer. If confirmed, I intend to use the established Force Allocation Process to identify NORTHCOM's force requirements for each of its unique assigned missions to the joint force providers to ensure that allocated forces are prepared to support homeland defense and civil support missions. If confirmed, I will ensure that those requirements are matched with trained, equipped, and ready forces that meet NORTHCOM's mission requirements, using the Defense Readiness Reporting System to review unit readiness and training metrics.

Question. If confirmed, how will you monitor the personnel, equipment, and training readiness of U.S. military forces (Active and Reserve) for homeland defense mission-essential tasks in support of NORTHCOM's contingency plans, and for its defense support to civil authorities (DSCA) missions?

Answer. I understand that NORTHCOM has the ability to track the readiness (personnel, equipment, and training) of all DOD forces within its AOR. This includes both Title 10 and Title 32 forces, using the Defense Readiness Reporting System. For units assigned to NORTHCOM missions, if confirmed, I will work with the Services and the National Guard Bureau to validate their readiness.

NORTHCOM–DHS RELATIONSHIP

Question. DHS is still a relatively new Federal agency, and is continuing to improve its ability to meet its homeland security missions.

As the DHS improves and matures its homeland security capabilities, do you expect that will reduce the demands on NORTHCOM to provide defense support to civil authorities, including support for crisis response planning?

Answer. It is my understanding that DHS capabilities to respond to disasters continues to improve and that the relationship between DOD and DHS is very strong. However, I believe that NORTHCOM will have an enduring mission to provide DOD support and capabilities to civil authorities in accordance with the National Response Framework.

Question. What do you consider to be the appropriate role for DOD and NORTHCOM's vis-a-vis DHS and State authorities in identifying and validating the dual-use equipment and other requirements associated with defense and homeland security missions?

Answer. It is my understanding that the role of NORTHCOM, in close coordination with other DOD entities, identifies dual-use equipment required to support civil authorities in natural or manmade disasters. I believe this is an appropriate role for DOD and if confirmed, I look forward to working with DHS and the States to identify equipment requirements.

RESPONSE TO CHRISTMAS DAY AIRCRAFT BOMB PLOT

Question. There has been considerable confusion about the events surrounding the attempted bombing of a commercial U.S. aircraft over Detroit on Christmas Day 2009.

Do you believe that NORTHCOM or NORAD have any responsibility for apprehending, detaining, or interrogating a terrorist suspect who tries to destroy an aircraft in flight inside U.S. airspace? If so, what is that role?

Answer. No. I believe U.S. law enforcement agencies have the sole responsibility for the apprehension, detainment, and interrogation of any individual alleged to have committed a criminal act within U.S. airspace.

NATIONAL GUARD

Question. There is still debate about the role the National Guard should play in homeland security and defense. In an April 21, 2008, letter to the committee concerning the recommendations of the Commission on the National Guard and Reserves, Admiral Mullen, the Chairman of the Joint Chiefs of Staff, wrote that, "I have some concerns about the Commission's ideas on enhancing the Defense Department's role in the Homeland. While Reserve component civil support requirements are important, they should not be of equal importance to DOD combat responsibilities."

Do you agree with this view of Admiral Mullen?

Answer. Yes. All of our Armed Forces are organized, trained, and equipped for their primary mission to fight and win our Nation's wars. There are key roles the Total Force plays in civil support missions and it is important that our forces remained postured that important mission.

Question. Do you believe that defending the homeland or civil support should become the National Guard's primary missions?

Answer. No. It is my belief that the National Guard as a part of the Total Force has a critical responsibility in homeland defense and civil support missions, but should not be limited from participating in other vital DOD missions.

Question. What is the current status of the working relationship between NORTHCOM, the National Guard Bureau, and individual State National Guard headquarters?

Answer. It is my understanding that Admiral Winnefeld has greatly enhanced the cooperation and collaboration among NORTHCOM, the National Guard Bureau, and individual States' Guard headquarters. If confirmed, one of my priorities will be to ensure that these relationships continue to expand and mature as a natural extension of planning and executing NORTHCOM's missions.

Question. If confirmed, what type of liaison relationships for planning and operational purposes would you advocate between NORTHCOM, DHS, Federal, State, and local first responders, and National Guard units under State authority?

Answer. My experience in Afghanistan and Iraq solidified my belief in strong and transparent relationships with liaisons at all levels to coordinate and collaborate for planning and operational details. If confirmed, I will continue to enhance existing partnerships between all of NORTHCOM mission partners, and where appropriate, forge new relationships.

DUAL-STATUS COMMAND ARRANGEMENT

Question. The administration, including Defense Department and NORTHCOM leadership, has been working with the Council of Governors to define appropriate means for Federal military support to the states in the event of natural disasters or other disasters. This effort has apparently produced agreement on a Joint Action Plan, and on the concept for using "dual-status commanders" in each State to ensure that Federal military forces are able to support the needs of the Governors.

What is your understanding of the Department's plan of action with respect to implementing the agreement on a Joint Action Plan?

Answer. My understanding is that the Council of Governors, DHS, and DOD endorsed the Memorandum of Agreement with the States earlier this month, paving the way for a Dual-Status Commander in each of the States and territories. I believe that NORTHCOM supports the DOD position to endorse the Joint Action Plan.

Question. Do you support this effort to establish appropriate command and control arrangements between the states and the Federal Government to ensure that Federal military forces, including the Reserves, are available to support the needs of the Governors in time of crisis?

Answer. Yes. I understand the dual-status command construct has been agreed to by the Governors and the DOD as a mechanism to strengthen unity of effort and improve speed of response to domestic emergency operations when Federal support has been requested and approved. If confirmed, I intend to continue to support the rapid and effective delivery of capabilities to citizens in need in order to mitigate the effects of major disasters or emergencies, whether natural or manmade, when directed by the Secretary of Defense or the President.

Question. If confirmed, would you plan to continue working with the Council of Governors to improve coordination and collaboration between the Federal and state levels of government on the use of military forces for emergency response?

Answer. I believe that the Council of Governors has been integral in the formulation of the Joint Action Plan for Developing Unity of Effort, advancing the Dual-Status Commander Memorandum of Agreement, and supporting legislation to allow Reserve mobilization for events that require DOD support of civil authorities. If confirmed, I welcome the opportunity to work with the Council to continue important progress in many areas aimed at improving our ability to meet our mission requirements and the needs of the citizens we serve.

CBRNE RESPONSE CAPABILITIES

Question. NORTHCOM has two primary missions: Homeland Defense and Defense Support to Civil Authorities (DSCA), including preparation for and response to an incident or attack involving Chemical, Biological, Radiological, Nuclear, or high-yield Explosive (CBRNE) materials or weapons, in the NORTHCOM AOR.

If confirmed, how would you approach the challenge of ensuring adequate military forces, capabilities, and plans to respond to such incidents in support of civil authorities?

Answer. I fully understand that failure is not an option in any CBRN response, and that speed is essential when responding. Moreover, I also understand that our partnership with the National Guard Bureau, the States, and other Federal agencies is critical to success, both in planning and in execution.

If confirmed, I intend to leverage my predecessor's efforts in continuing to work closely with the National Guard Bureau, the States, and the Services to ensure all forces established to accomplish this mission are, and remain, properly manned, trained, and equipped, and that response timelines and command and control relationships during execution of this mission are clearly understood and verified.

Question. There are currently a variety of organizations and units intended for CBRNE response and consequence management, including JTF-CS, the Defense Consequence Management Response Force (DCMRF), the U.S. Marine Corps Chemical-Biological Incident Response Force (CBIRF), National Guard HRFs, National Guard CBRNE Enhanced Response Force Package (CERFP) units, and National Guard Weapons of Mass Destruction Civil Support Teams (WMD-CSTs).

If confirmed, how would you plan to manage this mix of capabilities to ensure the best possible response force to support civil authorities in the event of a CBRNE incident, and to avoid unnecessary duplication?

Answer. I understand the existing two CBRNE Consequence Management Response Forces (CCMRFs) have, to this point, provided a responsive and flexible capability with federally-controlled forces that are trained, equipped, exercised, evaluated, and employed by NORTHCOM to respond to near-simultaneous incidents. The existing CCMRFs will stand down at the end of this fiscal year to establish the new CBRN Response Enterprise, directed by the 2010 Quadrennial Defense Review (QDR).

I am also aware that the 2010 QDR directed the establishment of regional CBRN response capability by the National Guard, called HRFs, in order to leverage geographic proximity to quicken the response. I understand that establishment of the HRFs is ongoing, and recognize that challenges are likely as we fully implement the CBRN response enterprise concept.

If confirmed, I will closely partner with the National Guard Bureau, and the States, to ensure implementation of the new CBRN Response Enterprise is completed as directed by the 2010 QDR and that existing forces are ready to answer the call when needed.

Question. What is your assessment of the ability of the revised DOD Consequence Management Response Forces (DCMRF), as currently constituted, to provide a significant capability to support Federal civil authorities in the event of a CBRNE incident?

Answer. My assessment is that each of these forces presents complementary capabilities that enhance an overall CBRN Consequence Management response. I understand that the new Defense CBRN Response Force is a relatively large force (5,200 personnel) that contains the required centralized capabilities to integrate with and support a Federal response under the National Response Framework. These capabilities include search and extraction, patient decontamination, medical triage and stabilization, air and ground casualty evacuation, mortuary affairs, information dissemination, communications, logistics, and a command and control structure to support integration of follow on forces.

If confirmed, I look forward to seeing the readiness and capability of these forces and I will report to the committee if I determine there are any significant concerns.

Question. How would you ensure the necessary level of coordination and planning between the DCMRF and National Guard HRFs to ensure an adequate response to a CBRNE incident?

Answer. I understand that under the new CBRN Response Enterprise, planning activities are linked between States hosting regional HRFs and NORTHCOM to ensure integration between State and Federal plans. HRF plans are designed to support the States within the Federal Emergency Management Agency (FEMA) Region and also a national response. Therefore, HRF plans support the NORTHCOM Concept Plan (CONPLAN) and likewise, the NORTHCOM CONPLAN supports regional HRF plans. As I understand it, the National Guard Bureau and U.S. Army North have been closely collaborating during the development of these plans and if confirmed, I intend to further strengthen planning relationships and integrate other activities, such as readiness exercises to ensure an adequate, effective, and integrated response.

Question. Do you believe that U.S. military forces providing Defense Support to Civil Authorities in the event of CBRNE incidents should be under the command of the Commander, NORTHCOM?

Answer. When Federal forces respond to a CBRN incident, it would be at the request, and in support of the State Governor(s). If title 10 forces do respond, I believe the Dual-Status Command arrangement may also be identified as a way to command and control these forces to achieve unity of effort. During execution, Federal forces can anticipate mission assignments, as permitted under the National Response Framework, but must always remain in consultation with State Governors and the designated Federal primary agency.

WMD-CSTS AND CERFPS

Question. There is now at least 1 National Guard Weapons of Mass Destruction-Civil Support Team (WMD-CST) in each of the 54 States and territories, and there are 17 National Guard CERFP units. In addition, there are 10 HRFs planned, 1 in each FEMA Region.

Do you believe the WMD-CSTs and CERFPs are appropriately organized, sized, trained, and equipped to accomplish their assigned missions?

Answer. It is my understanding that the States' WMD-CSTs are appropriately organized, sized, trained and equipped to accomplish their assigned mission. If confirmed, I will review how NORTHCOM supports the training and readiness of WMD-CSTs through its Army component, U.S. Army North to ensure that they can accomplish their missions.

Question. If not, what changes do you believe are needed?

Answer. If confirmed, as DOD implements the new CBRN Response Enterprise, I will look for opportunities to recommend adjustments to the Enterprise to ensure a rapid and effective response to mitigate the effects of a CBRN incident on our citizens.

CYBERSECURITY

Question. DOD recently issued its cybersecurity strategy. Cyber threats could affect both our military and civilian sectors in the United States, public and private.

What is NORTHCOM's current role in cybersecurity within its Area of Operations, and how does it relate to the cybersecurity role of DHS?

Answer. DHS is the lead Federal agency for national security policy and programs. I understand NORTHCOM is in a supporting role to the DHS. STRATCOM and its subordinate command, U.S. Cyber Command (CYBERCOM), will support the technical aspects of mitigating a major cyber attack. NORTHCOM, in its role of protecting critical infrastructure within the homeland, will provide physical support to the DHS as part of the defense support of civil authorities' mission. If confirmed, I will work with the DHS to further refine these relationships.

Question. What is the relationship between NORTHCOM and CYBERCOM?

Answer. My understanding is that NORTHCOM works with STRATCOM and CYBERCOM on cyber issues ranging from attack mitigation to network defense. NORTHCOM is generally in support of physical aspects, while CYBERCOM leads on the virtual front from within the .mil domain.

WESTERN HEMISPHERE INSTITUTE FOR SECURITY COOPERATION

Question. The Western Hemisphere Institute for Security Cooperation (WHINSEC), which replaced the School of the Americas in 2001, has the mission of contributing to theater cooperation activities through the education and training of students in the Western Hemisphere from Canada to Chile. If confirmed, you will be a member of the WHINSEC Board of Visitors.

What is the relationship between NORTHCOM and WHINSEC?

Answer. The Commander of NORTHCOM serves on the Board of Visitors (BoV) for WHINSEC, which provides for an opportunity to contribute to the curriculum and ensure compliance with U.S. laws and policy. If confirmed, I look forward to serving on the WHINSEC BoV.

Question. In your view, does WHINSEC promote the national security interests of the United States in the Western Hemisphere?

Answer. Yes. I see WHINSEC as a school that teaches and influences future Latin American leaders in military topics as well as human rights. It is my belief WHINSEC's education and training have had a significant impact on the Latin American leaders in attendance annually from military, law enforcement, and civilian institutions.

Question. In your view, how should NORTHCOM participate in command oversight and curriculum development?

Answer. It is my understanding that NORTHCOM is already participating in command oversight and curriculum development for WHINSEC. In addition, the Commander of NORTHCOM serves on the WHINSEC Board of Visitors (BoV), which reviews and advises on areas such as curriculum, academic instruction, and fiscal affairs of the Institute, and if confirmed, I will continue this support. I believe the WHINSEC BoV reviews provide an invaluable contribution to ensure relevance and consistency with U.S. policy, laws, regulations, and doctrine.

Question. In your view, what more, if anything, does WHINSEC need to do to emphasize human rights in its curriculum?

Answer. I believe that WHINSEC must continue to emphasize human rights in its curriculum and address the concerns of human rights organizations. If confirmed, I will take a close look at this critical portion of the curriculum and advocate for any changes, if needed.

Question. In your view, how can WHINSEC improve its outreach efforts to individuals or groups interested in its activities, particularly those who have accused the school of contributing to human rights violations by former students?

Answer. I have not formed an opinion on this critical issue. If confirmed, I look forward to serving on the Board of Visitors and developing initiatives for broadened outreach efforts in support of their overall mission.

Question. If confirmed, will you attend the WHINSEC Board of Visitor's annual meeting?

Answer. Yes. If confirmed, I will be honored to serve on the WHINSEC Board of Visitors and attend the annual meetings.

INTELLIGENCE SHARING/NCTC

Question. What is NORTHCOM's role and involvement in developing intelligence assessments regarding terrorist threats?

Answer. It is my understanding that NORAD and NORTHCOM's Intelligence Directorate receives raw reports, information and analysis from other intelligence agencies and organizations within the Intelligence Community and within DOD. Command terrorism analysts review this information for threats to the NORTHCOM AOR. This information is analyzed and then developed into original threat assessments that are provided to the Commander, NORAD and NORTHCOM and component commands, tailored to support unique NORAD and NORTHCOM missions and responsibilities. This analysis is also provided to the wider Intelligence Community (IC) at large to supplement analysis and assessments generated by the other elements of the IC, adding to the greater collective body of information.

Question. What intelligence agencies are involved in providing input to U.S. NORTHCOM's staff for the development of intelligence assessments?

Answer. I understand that NORTHCOM receives and has access to information from all members of the Intelligence Community, as well as members of select Federal law enforcement entities. This information provided by other mission partners is the basis for Command analytic assessments and intelligence products. Multiple Intelligence organizations also provide senior liaisons to NORTHCOM to ensure seamless integration of analysis and operations. NORTHCOM liaison officers are likewise embedded in the Federal Bureau of Investigation's National Joint Terrorism Task Force, the DHS's Office of Intelligence and Analysis, the National Counterterrorism Center (NCTC), and Canadian Defence Intelligence staff to ensure a synchronized understanding of significant terrorist threats that could necessitate command responses or preparedness.

Question. What is the current relationship between NORTHCOM and NCTC?

Answer. It is my understanding that in addition to the terrorism analyst NORTHCOM assigns to the NCTC, NORTHCOM terrorism analysts work collaboratively and frequently with NCTC analysts focused on terrorist threats to North America. The Command frequently sends analysts to support NCTC working groups and conferences to ensure Command visibility into developing threats which may impact NORTHCOM mission sets, particularly Force Protection, threats to the aviation sector, or threats with potential Weapons of Mass Destruction and Consequence Management implications. Command terrorism analysts also periodically augment NCTC analytic elements during National Special Security Events or other special events as appropriate.

Question. Does NORTHCOM have representatives located at the NCTC on a daily basis? If so, what are their functions and responsibilities? If not, why not?

Answer. Yes. NORTHCOM has a full-time civilian intelligence officer billet assigned to the Directorate of Intelligence in the NCTC. Additionally, NORTHCOM has assigned an active duty officer as an operations representative to the Directorate of Strategic Operational Planning at the NCTC. The objectives for these ar-

rangements are to produce homeland threat analysis for the NCTC, while ensuring the Command has visibility into homeland threats that may affect NORTHCOM mission sets.

Question. Do you believe NORTHCOM representatives at NCTC have the access to intelligence needed to fully perform their functions?

Answer. It is my understanding that NORTHCOM's analyst embedded in the NCTC has excellent access to terrorist threat information, including information not shared directly with the Command or other DOD elements. NORTHCOM continues to work with NCTC to find the balance between greater information sharing and protecting sensitive operations, investigations, and sources.

Question. How do posse comitatus, privacy restrictions, and other laws and regulations concerning the collection of intelligence within the United States, affect the way U.S. NORTHCOM receives and uses intelligence?

Answer. It is my understanding that NORTHCOM is extremely careful to comply fully with intelligence oversight law and policy in conducting all intelligence activities in support of its mission. If confirmed, I will work hard to ensure all intelligence activities conducted in support of NORTHCOM operations continue to be reviewed by intelligence oversight specialists, thus ensuring the Command completely complies with law and policy.

BALLISTIC MISSILE DEFENSE

Question. One of NORTHCOM's missions is the defense of the United States against the threat of limited ballistic missile attack from nations such as North Korea and Iran. The February 2010 Ballistic Missile Defense Review report stated as one of its policy priorities: "Before new capabilities are deployed, they must undergo testing that enables assessment under realistic conditions."

Do you agree that it is essential that our deployed ballistic missile defense systems are operationally effective?

Answer. Yes. Our deployed missile defense system provides a defensive capability against a limited number of missiles launched by potential adversary rogue nations. The spiral development process used to develop this capability relies in part on ensuring the defensive capabilities we have are indeed operationally effective. If confirmed, I will continue to work with all responsible agencies to ensure the system is operationally effective.

Question. Do you agree that it is important to conduct operationally realistic flight tests to demonstrate the operational capability and reliability of the Ground-based Midcourse Defense (GMD) system?

Answer. Yes. The ballistic missile defense capability now fielded used a capability-based development process. This process allowed the United States to rapidly field a capability to meet the emerging threat posed by rogue nations developing long-range ballistic missiles. An essential part of that development process is an operationally-realistic testing program to verify the capabilities being fielded and ensure a complete understanding of those capabilities by all of the commands and agencies who support this mission and will employ these systems. Because our missile defense capabilities were tested and then fielded following processes to ensure operational effectiveness, we have a more complete understanding of our missile defense capabilities, and can continue to improve those capabilities over time to ensure we outpace developments in the threat.

Question. Do you support the continued modernization and sustainment of the GMD system?

Answer. I believe that continued modernization ensures the Ground Missile Defense (GMD) system will pace ahead of the threat. Continued sustainment of the GMD system ensures that the capabilities the Missile Defense Agency (MDA) has already developed and fielded will be ready when needed.

Question. Do you believe that understanding and correcting the GMD program should be the MDA's highest priority?

Answer. If confirmed, I will work with the Director of the MDA to balance the needs to continually assess and maintain our current system with development of future capabilities, as I explain my requirements as the combatant commander responsible for operation of the ground missile defense system.

Question. The GMD system has experienced two successive flight test failures, and the Director of the MDA is working to fully understand and correct the problems that caused the December 2010 flight test failure, including verifying the correction with two flight tests, before resuming production of the kill vehicles for GMD interceptors.

Do you agree that we should verify the successful correction of the flight test failure problem through extensive testing, and demonstrate that the system works before resuming production of the interceptor kill vehicles?

Answer. Yes. I understand the ballistic missile defense system is based on a design, test, fix, and deploy process. The MDA's efforts to do extensive analysis of the failure and follow that with several tests to verify the success of the fix prior to continuing production and delivery of new exoatmospheric kill vehicles (EKV) is in line with this process. Fixing the EKV problems now on the production line will ensure we do not need to potentially invest additional dollars in the future to repair faulty EKVs.

Question. What priority would you give to the funding of planned work deferred as a result of such remediation efforts?

Answer. The Ballistic Missile Defense Review stated homeland defense is the primary concern for any current or future Ballistic Missile Defense and Ground-Based Missile Defense programs. I understand the MDA continues to keep that foremost in their development of all ballistic missile capabilities. If confirmed, I will work with the MDA, as well as combatant commanders and agencies supporting missile defense capabilities, to ensure the systems we need for future threats is appropriately balanced against the risk of any deferment of work.

MISSILE DEFENSE COOPERATION WITH RUSSIA

Question. The United States and NATO are pursuing efforts at missile defense cooperation with Russia against common missile threats from Iran. President Obama has made clear that any such cooperation would not limit U.S. or NATO missile defense capabilities.

Do you agree that missile defense cooperation with Russia could enhance our security and, if so, what security benefits do you believe might be available through such cooperation?

Answer. Yes. The Ballistic Missile Defense Review outlined opportunities to partner with Russia to enhance overall missile defense security. Missile defense capabilities provide a mutually beneficial path to deter rogue nations and terrorist organizations from deploying and employing ballistic missiles. By cooperating with Russia, we can focus on the deterrence benefits that such capabilities provide and strengthen each nation's overall defensive capabilities without limiting either's national interests. I believe there is little political or defensive cost to pursuing such cooperation and much to be gained by doing so.

Question. Do you believe that the United States is committed to the continued development of U.S. missile defense systems, including qualitative and quantitative improvements, should go forward without regard to Russian objections?

Answer. It is my belief that the pace of our missile defense development should be based on how the threat develops in order to stay ahead of that threat. I believe there is great opportunity to work with the Russians, given our mutual concerns for the defense of our Nation's individual interests, while adequately addressing their concerns over the development of our defensive capability and capacity.

OTHER MILITARY COOPERATION WITH RUSSIA

Question. The United States and Russia are engaged in a variety of security cooperation efforts. Last year, the two nations conducted a joint exercise simulating a coordinated response to a hijacked aircraft crossing into our respective airspace, an exercise named "Vigilant Eagle."

Do you believe such exercises and cooperative efforts enhance our security and, if confirmed, would you plan to continue such cooperation and other military-to-military contacts?

Answer. Yes. I strongly believe cooperative exercises like Vigilant Eagle enhance national security, and if confirmed, I will fully support continuation and expansion of this type of military-to-military contact. Bilateral exercises enhance our security in a variety of ways and serve as a template for future exercise events. These efforts expand transparency and cooperation between NORAD and the Russian military, fostering shared understanding and mutual respect. From an operational perspective, these exercises serve a very real purpose by testing and validating procedures between NORAD and Russian Federation Air Force (RFAF) in the event of an airborne terrorist event (e.g., a hijacked aircraft that transits between the NORAD and RFAF Areas of Operations). If such an event would transpire, both NORAD and the Russian Federation will be much better prepared to deal with the emergency.

CRUISE MISSILE DEFENSE

Question. NORTHCOM and NORAD have responsibilities for warning and defending the United States against airborne threats, including cruise missiles.

Relative to cruise missile defense, what do you believe should be the relationship between the Joint Integrated Air and Missile Defense Organization (JIAMDO) of the Joint Staff, on the one hand, and NORTHCOM and NORAD, on the other hand?

Answer. I believe the work that the JIAMDO and NORAD and NORTHCOM are doing is inextricably linked. Previous commanders have developed a great working relationship with JIAMDO over the years and, if confirmed, I will continue to cultivate that partnership through our liaison officers and direct interaction at all levels.

Question. Relative to the full spectrum of threats to the United States, how would you assess the cruise missile threat to the United States and its territories?

Answer. I believe that although a cruise missile attack is possible, it is unlikely to occur from a nation state without significant indications, warnings, and a deterioration of relationships; I also believe terrorists will continue to focus on less technical and less expensive means to attack the United States. Based on that, I believe the threat of a cruise missile attack is low, but if confirmed, I will continue to pursue efforts to ensure we have a robust capability to defend against such attacks.

Question. If confirmed, what capabilities would you prioritize to address this threat?

Answer. If confirmed, I will consider numerous ongoing initiatives such as improvements to the Wide Area Surveillance network to meet cruise missile and other low altitude threats to North America. If confirmed, I would also continue to support ongoing efforts that the Services and interagency community are making to upgrade fighter aircraft and ground-based missile defense radars to detect and, if required, engage and destroy low radar-cross section and low altitude targets. In addition, if confirmed, I will emphasize the continued need for a rapidly-deployable integrated air and missile defense capability that can be used to protect national, high-interest security venues or critical infrastructure when required.

CONTINENTAL AIR DEFENSE

Question. How has the continental air defense mission changed since the end of the Cold War and the events of September 11, 2001?

Answer. Both the mission and threat have changed significantly. Prior to the end of the Cold War, and as recently as September 11, 2001, NORAD was very much focused on looking to deter, detect, and defend against external threats approaching the United States and Canada from beyond our borders. However, since September 11, 2001, effectively executing the air defense mission now requires NORAD to look not only outward, but also within the borders of the United States and Canada to deter, detect, and defend against asymmetric threats originating from within our borders.

Question. Do you believe that current U.S. continental air defense capabilities are adequate to meet national security needs?

Answer. Yes. NORAD successfully defends the skies of the United States and Canada employing early warning radars, fighter aircraft, tanker aircraft, air/ground-based communication systems and ground-based missile systems as required to maintain aerospace control of the U.S. and Canada. NORAD also maintains a close relationship with the interagency community, sharing a network of vital information and intelligence necessary to provide a common operating picture to support air-control and air-intercept missions. NORAD continues to evaluate and upgrade its air defense capabilities to defend against not only traditional airborne threats, but new and emerging airborne threats.

Question. If confirmed, what capabilities and programs would you prioritize to address any identified deficiencies?

Answer. If confirmed, I will review NORAD's air defense capabilities to assess their ability to meet national security needs. Should I identify any deficiencies, I will work with the Joint Staff and the Services to validate those requirements.

MARITIME WARNING AND MARITIME DOMAIN AWARENESS

Question. NORAD has gained the mission of Maritime Warning for North America. How does this mission fit into the larger Maritime Domain Awareness mission, and what role do you expect NORAD and NORTHCOM to have in Maritime Domain Awareness in the near term?

Answer. It is my understanding that the NORAD Maritime Warning mission relies upon Maritime Domain Awareness to develop a comprehensive shared under-

standing of the maritime operational environment and to issue binational warnings of maritime threats or attacks against North America. The Commander of NORAD and NORTHCOM coordinates with adjacent geographic combatant commanders, U.S. Government partner agencies, adjacent nations, and the commercial/private sector to further expand MDA in the NORAD Area of Operations and the NORTHCOM AOR through information sharing agreements, plans development, cooperative training, and acquisition of Maritime Domain Awareness sensors/tools.

If confirmed, I will look into the efficacy of the current NORAD Maritime Warning mission and provide the committee my views on this after I have had the opportunity to look at this further.

ARCTIC REGION MISSION

Question. The 2011 UCP realigned the boundaries of combatant command AOR in the Arctic region. NORTHCOM's AOR now includes the Bering Strait and the North Pole. NORTHCOM was also tasked to become DOD's advocate for Arctic capabilities.

What is the practical effect of this assignment, and how has it changed NORTHCOM planning and operations?

Answer. The April 2011 UCP expands the roles and responsibilities of NORTHCOM by identifying NORTHCOM as the DOD advocate for Arctic capabilities. The UCP also identifies two combatant commands with distinct AOR in the Arctic: U.S. European Command and NORTHCOM. If confirmed, I look forward to reviewing and validating the NORTHCOM Commander's Estimate on the Arctic, which I understand is in the final stages of coordination.

Question. What specific programs, if any, will you put in place if confirmed to identify and develop capabilities to protect and defend American sovereignty and interests in the Arctic region?

Answer. If confirmed, I look forward to working with the Department, the inter-agency community, and international partners to examine what programs might be necessary to identify and develop capabilities needed to protect and defend our sovereignty.

LAW OF THE SEA CONVENTION

Question. Do you support U.S. accession to the Law of the Sea Convention? If so, please explain why.

Answer. Yes, I believe that joining the Convention protects and advances a broad range of U.S. interests, including navigational mobility and offshore resources. The Convention would protect and advance U.S. interests, bolster our national security, secure U.S. rights over extensive marine areas, and give the United States a seat at the table when our vital interests are at stake.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as Commander, NORTHCOM, and Commander, NORAD?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR MARK BEGICH

THE ARCTIC

1. Senator BEGICH. Lieutenant General Jacoby, your predecessor, Admiral Winnefeld, was crafting a commander's estimate on the Arctic for use within the Department of Defense (DOD) and examining how U.S. Northern Command (NORTHCOM) can best support interagency partners in this region with search and rescue assets, humanitarian assistance, disaster response capabilities, and support to law enforcement. If confirmed, will you complete the estimate and what is the timeline for completion?

General JACOBY. It is my understanding that the initial NORTHCOM Commander's Estimate is complete. However, it should be noted that the Estimate process is continuous so as to consider the operational environment, the nature of anticipated operations, and national and multinational strategic direction. The Estimate is currently being coordinated throughout the Department of Defense in anticipation of its presentation to the Secretary of Defense before the end of 2011. Once approved by the Secretary, NORTHCOM will socialize the Estimate with interagency partners, as well as with Canadian military and policy counterparts in early 2012, prior to being briefed on the Hill.

2. Senator BEGICH. Lieutenant General Jacoby, Alaska needs to play a key role in these initiatives since it is the only U.S. State in the Arctic. The Armed Forces in Alaska are accustomed to the climate, distance, geography, and overall operating environment and have much to offer NORTHCOM and other agencies. How do you see Alaska fitting into NORTHCOM's support of interagency partners in the region?

General JACOBY. If confirmed, a critical area I intend to study as part of NORTHCOM's ongoing Commander's Estimate for the Arctic is how Alaska fits into NORTHCOM's support of interagency partners. The 2011 Unified Command Plan expanded the command's roles and responsibilities by identifying NORTHCOM as the DOD advocate for Arctic capabilities. We will continue to use the Arctic Estimate to help inform how we can best support the Department, our interagency partners, and international partners in order to advance security, safety, and stability in the Arctic region.

3. Senator BEGICH. Lieutenant General Jacoby, have you considered sustaining Joint Task Force (JTF) Alaska as an entity for NORTHCOM to carry out support of agency partners in the Arctic? Why or why not?

General JACOBY. If confirmed, I will support sustaining the JTF-AK Support Element as NORTHCOM's operational command and control headquarters for operations in Alaska and the Arctic. I understand Admiral Winnefeld realigned 12 positions (8 military and 4 civilian) from the NORTHCOM staff in Colorado Springs to the Support Element to perform planning and interagency coordination functions in Alaska. This, coupled with the matrixed support provided by U.S. Pacific Command's (PACOM) Alaskan Command, appears to be a manageable solution. However, if confirmed, as organizational efficiencies are investigated within the Department, I expect there will likely be continued assessment to determine the most appropriate command and control arrangement to support accomplishment of NORTHCOM missions in Alaska and the Arctic.

4. Senator BEGICH. Lieutenant General Jacoby, 2008 saw a return of foreign flights on North American Aerospace Defense Command's (NORAD) northern areas. While the foreign aircraft have not violated U.S. or Canadian airspace, many of the flights are unannounced requiring a response from the fighters in the Alaska NORAD region. With continued activity and the growing interest in the Arctic, would you concur that sustaining the response resources—the F-22s—at Alaska NORAD region are of critical importance?

General JACOBY. F-22s in Alaska enforce NORAD's Aerospace Control mission by conducting Air Defense and Air Sovereignty operations in the Alaskan NORAD Region. Part of the NORAD Aerospace Control mission includes identifying all air traffic entering North American airspace. Although indefinitely grounded at this time, when operational, F-22s provide advanced technological capabilities to track, intercept, and identify unknown aircraft in the Alaskan NORAD Region.

BALLISTIC MISSILE DEFENSE

5. Senator BEGICH. Lieutenant General Jacoby, the 2010 Ballistic Missile Defense (BMD) Review set forth priorities for missile defense. One of the priorities is defending the Homeland against an intercontinental ballistic missile (ICBM) attack by continuing to sustain and modernize the Ground-based Midcourse Defense (GMD) system. Do you support the policy of ensuring our Homeland is protected from an ICBM attack by a rogue nation or non-state actor?

General JACOBY. Yes. I support the policy of ensuring our Homeland is protected from an ICBM attack by a rogue nation or non-state actor following the priorities in the Ballistic Missile Defense Review (BMDR). The BMDR took a holistic view at the different aspects of the U.S. missile defense strategy and its programs and specified that homeland defense was top priority. The missile defense system now fielded protects our Homeland against ICBM attacks from rogue or non-state actors.

6. Senator BEGICH. Lieutenant General Jacoby, do you support continued modernization and sustainment of the GMD system in support of this policy?

General JACOBY. Yes. The missile defense system that is now fielded protects our Homeland against ICBM attacks from rogue or non-state actors. I believe it is important to maintain this advantage by continuing to improve the GMD system and ensuring there are adequate capacity to counter limited threats as they evolve.

7. Senator BEGICH. Lieutenant General Jacoby, do you support the current hedge strategy for Homeland defense which includes the completion of Missile Field 2 at Fort Greely for additional capacity and development of the two-stage interceptor?

General JACOBY. Yes. The current strategy gives the Nation a critical hedge beyond the program of record to respond to unforeseen threats, both in terms of capability and capacity for Homeland defense.

8. Senator BEGICH. Lieutenant General Jacoby, are you aware and supportive of the hedge strategy review that is currently underway to ensure risk is mitigated should the threat evolve sooner or more capable than anticipated?

General JACOBY. Yes. As the Director for Strategic Plans and Policy on the Joint Staff, I have been very involved with the Office of the Secretary of Defense, the Missile Defense Agency (MDA), NORTHCOM, and U.S. Strategic Command (STRATCOM) in the hedge strategy review. I support the efforts of this review to mitigate risk should the threat evolve sooner or if the threat is more capable than anticipated.

9. Senator BEGICH. Lieutenant General Jacoby, although the MDA is still reviewing the number of additional interceptors required, there is a need to enhance the ground-based interceptor (GBI) inventory to ensure there are adequate assets for testing and stockpile sustainment. Do you support the procurement of additional interceptors?

General JACOBY. I believe it is prudent to continually reassess the number of GBIs we need as our capabilities and knowledge of potential threats mature. Based on the most recent threat assessment, it appears that the current number of 30 operational GBIs is sufficient.

10. Senator BEGICH. Lieutenant General Jacoby, do you support increasing protection of the east coast against an ICBM attack by building an In-Flight Interceptor Communications System (IFICS) Data Terminal (IDT) at Fort Drum?

General JACOBY. Yes. An east coast IFICS IDT will significantly enhance our ability to communicate with in-flight GBIs for protection of the east coast.

11. Senator BEGICH. Lieutenant General Jacoby, are you confident the IDT is sufficient enough to protect the east coast from a limited ICBM?

General JACOBY. Yes. Against today's threat, I believe an east coast IFICS IDT enhances our ability to communicate with in-flight GBIs for protection of the east coast.

12. Senator BEGICH. Lieutenant General Jacoby, as the threat matures and if the nature of the attack becomes less limited, would the current GMD system still be sufficient enough to protect the east coast?

General JACOBY. Today, the current GMD system provides protection for the east coast. With the addition of the east coast IFICS IDT, that capability is enhanced. As the threat matures, or if the nature of the threat becomes less limited, and as

we gain better understanding of that threat, we will engage with the Department and with the MDA to ensure the Nation is postured to stay ahead of that threat.

13. Senator BEGICH. Lieutenant General Jacoby, if confirmed, will you continue to assess and evaluate options for defending the east coast as the threat evolves?

General JACOBY. Yes. If confirmed, I will continue to assess and evaluate options for defending the east coast and I will engage with the Department and with the MDA to ensure the Nation is postured to stay ahead of that threat.

QUESTIONS SUBMITTED BY SENATOR JEANNE SHAHEEN

NATIONAL GUARD AND NORTHERN COMMAND

14. Senator SHAHEEN. Lieutenant General Jacoby, given the vital role the National Guard plays in NORTHCOM's operations, what benefits are there in having National Guard members in NORTHCOM's leadership positions and decisionmaking processes?

General JACOBY. I understand that every day, there are close to 100 National Guard soldiers and airmen supporting the NORTHCOM headquarters from as many as 20 States. This includes one three-star, two two-star, and three one-star National Guard officers who serve as the NORTHCOM Deputy Commander, subordinate commanders and direct advisors. I believe this allows the command to leverage National Guard expertise and experience in executing the full spectrum of homeland defense and civil support missions. The command also benefits from their understanding of National Guard policies and programs to ensure the command's planning and collaboration with National Guard forces are informed and effective.

STATE AND LOCAL CRISES

15. Senator SHAHEEN. Lieutenant General Jacoby, as you know well, NORTHCOM is charged with coordinating DOD resources with State/local first responders in the event of an attack or natural disaster. From my time as Governor, I know that all crises are local. It is critical that the Federal Government and NORTHCOM in particular reach out and develop relationships with State/local governments. Admiral Winnefeld had some important efforts with State Governors and National Guard units, but there is a lot that needs to be done to educate, understand, and partner with local cities and counties where appropriate. What specifically are your plans for working with State and local emergency responders?

General JACOBY. I believe that developing great relationships and establishing open communications with state and local emergency managers prior to a crisis are essential to any successful disaster response operation. If confirmed, I will support recently-added initiatives to enhance communications, such as the stand-up of a 10-person Regional Desk Office in HQ NORTHCOM to work closely with each of the 10 NORTHCOM Defense Coordinating Officers (DCOs), who are Federal military officers that work on developing relationships with State and local officials on a daily basis. I believe that focus on understanding both State and Federal mission partners' crisis management organizations, knowing their plans, and integrating the command's planning process with those of NORTHCOM's many mission partners is a vital component to ensure success. It is my understanding that NORTHCOM DCOs continue to hone DOD support options and work closely with Federal Emergency Management Agency (FEMA) regional planners and state officials in developing detailed response timelines to potential crises. For example, during the recent flooding along the Mississippi River in Louisiana, a NORTHCOM DCO team, in coordination with FEMA Region VI partners, helped State and local search and rescue officials develop a specific, all-domain rescue plan that incorporated 10 Louisiana State agencies and 3 supporting Federal agencies. They also developed a Federal supporting plan that will be used during this year's hurricane season. I support continuing to develop these types of relationships with various State and local officials in close coordination with FEMA partners and the National Guard Bureau.

16. Senator SHAHEEN. Lieutenant General Jacoby, how would you approach responding to a medium- to large-scale terrorist attack in a major U.S. city?

General JACOBY. In the event of an attack, if confirmed, I would immediately begin posturing forces to respond to requests for assistance. As the Director for Strategic Plans and Policy on the Joint Staff, I have seen over the past 18 months that the DOD has taken significant steps to improve its ability to support civilian authorities in responding to catastrophic incidents in major metropolitan areas, par-

ticularly weapons of mass destruction attacks, but also major industrial accidents (such as the recent nuclear power plant disaster in Japan). Approximately 13,500 National Guard and Title 10 forces are now ready to respond, growing to 18,000 by 1 October 2012. These forces are trained and equipped to provide critical search and extraction, decontamination, emergency medical care, and medical evacuation in support of the Primary Federal Agency, the affected State, and local incident commanders. Many of these forces are on a very rapid response timeline and are prepared to deploy within hours in order to save lives and minimize human suffering within the critical initial 72 hours after an incident.

17. Senator SHAHEEN. Lieutenant General Jacoby, in the event of an attack, how do you envision your role and the chain of command?

General JACOBY. In the event of a maritime or land attack on the U.S. Homeland, the Commander, NORTHCOM, would command and control Title 10 forces responding to the event, as directed by the President or the Secretary of Defense. In the event of an air attack on the U.S. Homeland, Commander, NORAD, would command and control title 10 fighter aircraft and land-based air defense capabilities as directed by the President or Secretary of Defense.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

CYBER

18. Senator MCCAIN. Lieutenant General Jacoby, as I mentioned in my opening remarks, more must be done both here in Congress and across the executive branch on addressing the threats we face in the cyber domain. The recent findings from the Government Accountability Office (GAO) highlight some key areas that must be addressed. According to GAO, "DOD's organization to address cyber security threats is decentralized and spread across various offices, commands, Military Services, and military agencies," and that the "supporting relationships necessary to achieve command and control of cyberspace operations remain unclear." Do you agree with GAO's assessment?

General JACOBY. I believe that the support relationships which are necessary to achieve command and control of cyberspace operations still need some clarity. However, it is my understanding that details of Cyber Command (CYBERCOM) and control are being worked and senior-level discussions should clarify DOD direction in the near-term. The stand-up of CYBERCOM demonstrates DOD's commitment to clearly lay out this complex mission and establish proper command and support relationships to succeed in the cyber environment.

19. Senator MCCAIN. Lieutenant General Jacoby, do you believe that NORTHCOM's role in support of a cyber attack is well defined and that the mechanisms exist for NORTHCOM, STRATCOM, and CYBERCOM to all operate in concert with the Department of Homeland Security (DHS) in the event of a serious domestic cyber attack?

General JACOBY. I believe NORTHCOM's support role in the event of a serious domestic cyber attack is primarily to respond to second and third order physical effects in a "response and recovery" mode supporting civil authorities. This would likely involve supporting the DHS in a Defense Support of Civil Authorities (DSCA) role, utilizing the existing DSCA process, which also applies to the support provided by STRATCOM/CYBERCOM. I understand NORTHCOM has a good relationship with CYBERCOM via its liaison officer and daily collaboration through NORTHCOM's Theater Network Control Center and Network Operations Security Center. Further, NORTHCOM coordinates and collaborates with CYBERCOM in its situational awareness, planning, and exercises. Finally, NORTHCOM has included the DHS, STRATCOM, and CYBERCOM in a series of mission analysis and tabletop exercises to build professional relationships and explore roles and responsibilities in cyberspace for both homeland defense and DSCA missions.

20. Senator MCCAIN. Lieutenant General Jacoby, in your answers to the committee's advance policy questions, you indicate that NORTHCOM's responsibility extends to defense of physical assets in the event of a cyber attack. Does that mean NORTHCOM helps put the fires out and picks up the pieces when the attack is over, or does NORTHCOM have the means and authority to defend against and respond to a cyber attack that results in physical damage to assets inside the United States?

General JACOBY. Depending on the nature of a cyber attack, it is my understanding that NORTHCOM would most likely coordinate transportation and other physical recovery support using the capacities that we have as a military. Eighty-five percent of the cyber infrastructure that DOD and civil authorities use is owned by the private sector, which is largely responsible for its maintenance and protection. DHS, in partnership with other Federal Departments and Agencies; State, local, tribal and territorial governments; the private sector; and international partners, will manage and lead a fully coordinated response to a significant cyber incident to minimize impact, restore operations, and reduce the risk of future occurrence of the event or events. In accordance with a Memorandum of Agreement signed in 2010 by Secretary Gates and Secretary Napolitano, such a request would likely be directed to STRATCOM, with expertise provided by their subordinate command, CYBERCOM. As a supporting command, NORTHCOM will provide full support to STRATCOM's efforts.

21. Senator MCCAIN. Lieutenant General Jacoby, after the release of the DOD cyber security strategy last week, General Cartwright, the Vice Chairman of the Joint Chiefs of Staff, stated that DOD is spending 90 percent of its time playing defense against cyber attacks and 10 percent playing offense and that DOD should invert this defense/offense ratio to assert that there will be consequences to a cyber attack against the United States. Do you agree with General Cartwright's statements?

General JACOBY. I believe cyber operations that are entirely passive and defensive will fail and that we cannot simply hunker down in a defensive mode and wait for things to happen. That said, defensive measures must be continually evaluated and improved to keep up with the rapidly evolving threats we face, so understandably there may currently be an imbalance between defensive and offensive cyber operations. Cyber is a relatively new domain, thus more analysis is needed before the Department decides on a way ahead on balance of offensive/defensive cyber operations.

22. Senator MCCAIN. Lieutenant General Jacoby, what do you view as the appropriate direction DOD should be headed with respect to cyber strategy?

General JACOBY. The DOD understands the importance of cyber, which is why it stood up CYBERCOM to focus the Department's efforts in operating and defending the Global Information Grid. The DOD has some of the brightest and most dedicated professionals working the challenges of operating in cyberspace, and I believe the underpinning for success will be the partnerships established throughout the U.S. Government, private sector, and internationally. Additionally, I believe it is essential that our military make command and control in cyberspace more responsive by developing policy, doctrine, and authorities to support combatant commander requirements.

23. Senator MCCAIN. Lieutenant General Jacoby, do you view this as a matter of urgency?

General JACOBY. Absolutely. I believe the cyber security threat is one of the most serious national security, public safety, and economic challenges the Department faces. A whole-of-government approach is vital to address cyber threats across the DOD and the public and private sectors.

BUDGET CUTS

24. Senator MCCAIN. Lieutenant General Jacoby, on Tuesday, General Dempsey stated that the President's proposed cut of \$400 billion from defense spending over the next 12 years will be difficult to implement. He went on to say that recent calls for cuts of \$800 billion or greater would be extraordinarily difficult and very high risk. Do you agree with General Dempsey that proposed cuts to defense of the magnitude being discussed will be of very high risk to our military capabilities?

General JACOBY. I agree with General Dempsey's statement that reductions of this magnitude would be difficult to implement, particularly as we strive to minimize risk and ensure a continuing strong national defense. But, as we look strategically at the fiscal landscape, we should realize that reductions are in fact necessary and that we, in the Department of Defense, must do our part. The key is how we approach these reductions. I think a general reduction across all accounts would be inefficient. We need a continuation of the targeted reductions started under Secretaries Gates and Panetta to reach the \$400 billion plateau. To go beyond this level, however, could cause serious readiness issues.

25. Senator MCCAIN. Lieutenant General Jacoby, do you believe the impact of such cuts would significantly degrade the readiness of our Armed Forces?

General JACOBY. I believe we can minimize negative impacts with targeted reductions, focusing on areas where some additional risk could be assumed, of course depending on the level of cuts. At any level of cuts, I believe across-the-board reductions would be an inefficient way to proceed and more likely result in significant degradation to readiness.

26. Senator MCCAIN. Lieutenant General Jacoby, I understand from comments by General Dempsey earlier this week that DOD is in the process of analyzing the President's proposed \$400 billion in cuts to defense and will develop commensurate military strategy. Do you believe we should develop a military strategy first and then formulate a budget to accomplish such a strategy, not the other way around?

General JACOBY. We certainly need to be cognizant of both as we proceed, however, I believe we should focus principally on driving program and budget decisions from choices about strategy and risks. Such an approach is essential to ensure preservation of a superb defense force to meet national security goals, even given the existing fiscal environment.

AFGHANISTAN

27. Senator MCCAIN. Lieutenant General Jacoby, I believe your time commanding soldiers in Afghanistan in 2004 and your recent tour as Commander of Multi-National Corps-Iraq provides you with a unique perspective on our current engagements in both countries. On Afghanistan, do you believe the surge of forces has led to an improved security situation that is placing enormous pressure on the Taliban and affiliated groups?

General JACOBY. Yes, I believe significant advances in Afghanistan have been made due to the surge of forces. The increased number of forces allowed the DOD to establish security in areas of importance to the insurgency such as Central Helmand and Kandahar. In addition, the surge allowed the Afghan National Security Force to expand their capacity, capability and control of Afghanistan. Most importantly, I believe the surge was a major factor in halting Afghanistan's potential regression into a refuge and training location for al Qaeda.

28. Senator MCCAIN. Lieutenant General Jacoby, do you believe that withdrawing these 33,000 U.S. forces by next summer places additional risk on our soldiers and our mission?

General JACOBY. I agree with the theater and combatant commanders that we can drawdown, while continuing to mitigate risk given current circumstances. However, I believe there should be a continual assessment of situation to make adjustments if conditions on the ground deteriorate.

29. Senator MCCAIN. Lieutenant General Jacoby, do you believe, as it was reported yesterday in the Washington Post, that we are within reach of rendering al Qaeda incapable of launching large-scale attacks against the Homeland of the United States like we experienced on September 11? If so, what should we do to finish the job?

General JACOBY. I believe al Qaeda is a dangerous threat that remains focused on attacking the United States and our interests abroad. I also believe that the death of Osama Bin Laden and the success of our Nation's counterterrorism campaign in the Afghanistan-Pakistan border region provide an opportunity to strike a blow to al Qaeda ability to conduct complex attacks on the United States. To defeat al Qaeda and prevent its return, we should continue to aggressively pursue our worldwide counterterrorism strategy.

IRAQ

30. Senator MCCAIN. Lieutenant General Jacoby, if requested by the Iraqis, do you believe the United States should maintain a residual presence of military personnel in country?

General JACOBY. I believe the United States should consider providing limited assistance to fill anticipated gaps in Iraqi Security Forces' capabilities, should the Government of Iraq request such support.

31. Senator MCCAIN. Lieutenant General Jacoby, what do you believe would be a sufficient number of U.S. military personnel to assist in maintaining security in a number of key areas, such as Mosul?

General JACOBY. The Commander, U.S. Forces-Iraq determines U.S. military force requirements for security operations in Iraq. As such, I defer to General Lloyd J. Austin III for specifics regarding force structure in Iraq.

QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

BUDGETARY CONSTRAINTS

32. Senator AYOTTE. Lieutenant General Jacoby, as Director for Strategic Plans and Policy, you are responsible for overseeing DOD's contingency plans. Please explain, generally and in an unclassified way, how \$400 billion or even an \$800 billion cut in defense over the next decade would impact DOD's ability to carry out these contingency plans that are essential to our national security?

General JACOBY. As part of our ongoing Comprehensive Defense Review, we are assessing how defense cuts of \$400 billion would impact the DOD's ability to carry out contingency plans. At the unclassified level, I can tell you that defense cuts would impact the concurrency with which the joint force is able to execute contingency plans. For example, as we reduce the joint force's capacity, we will also reduce the range of options available for the President, especially once the joint force is committed somewhere. This reduction of capacity covers the entire spectrum of missions in the Quadrennial Defense Review, including, conventional and strategic deterrence, countering terrorism, conducting counter-insurgency and stability operations, helping to build the capacity and commitment of our allies and partners, and DSCA. We are also examining the impact of further cuts in the Defense budget as to the level of risk in executing our plans, as well as our ability to conduct other operations and deter in other theaters. We have not initiated planning to defense cuts of up to \$800 billion, but suffice to say that as \$400 billion cuts will elevate risk in many areas, deeper cuts could pose an unacceptable risk to achieve our strategic security objectives.

THREATS TO THE HOMELAND

33. Senator AYOTTE. Lieutenant General Jacoby, as Commander of NORTHCOM, you will be responsible for helping defend the people and territory of the United States against threats to our Homeland. Based on your nomination to serve as the Commander of NORTHCOM, as well as your current position as Director of Strategic Plans and Policy on the Joint Staff, what do you believe are the greatest threats to the Homeland and the people of the United States?

General JACOBY. [Deleted.]

34. Senator AYOTTE. Lieutenant General Jacoby, do you believe that al Qaeda affiliated groups, such as al Qaeda in the Arabian Peninsula, continue to constitute one of the most serious threats to Americans and the U.S. Homeland?

General JACOBY. [Deleted.]

35. Senator AYOTTE. Lieutenant General Jacoby, in your professional military judgment, does it make sense to bring terrorists captured overseas by our military, in accordance with the law of war, to U.S. soil where they could ultimately be released into local populations?

General JACOBY. I believe that the U.S. Government has the capability to detain captured international terrorists, either within or outside the United States. I do not believe that any captured terrorist would be released into a community in this country.

[The nomination reference of LTG Charles H. Jacoby, Jr., USA, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
July 25, 2011.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment in the U.S. Army to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be General

LTG Charles H. Jacoby, Jr., 0000.

[The biographical sketch of LTG Charles H. Jacoby, Jr., USA, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF LTG CHARLES H. JACOBY, JR., USA

Source of commissioned service: USMA

Educational degrees:

U.S. Military Academy - BS - No Major
University of Michigan - MA - History
U.S. Army Command and General Staff College - MMAS - Military Art and Sciences
National Defense University - MS - National Security and Strategic Studies

Military schools attended:

Infantry Officer Basic and Advanced Courses
U.S. Army Command and General Staff College
School of Advanced Military Studies
National War College

Foreign language(s): Spanish

Promotions:

Promotions	Date of Appointment
2LT	7 June 78
1LT	7 June 80
CPT	1 Jan. 82
MAJ	1 July 89
LTC	1 July 93
COL	1 June 98
BG	1 July 02
MG	14 Nov. 05
LTG	31 May 07

Major duty assignments:

From	To	Assignment
Dec. 78 ...	Oct. 80	Rifle Platoon Leader, C Company, 1st Battalion (Airborne), 325th Infantry, 82d Airborne Division, Fort Bragg, NC
Oct. 80 ...	Feb. 81	Scout Platoon Leader, 1st Battalion (Airborne), 325th Infantry, 82d Airborne Division, Fort Bragg, NC
Feb. 81 ...	Aug. 81	S-3 (Air), 1st Battalion (Airborne), 325th Infantry, 82d Airborne Division, Fort Bragg, NC
Sep. 81 ...	Aug. 82	Aide-de-Camp to the Commanding General, Joint Special Operations Command, Fort Bragg, NC
Aug. 82 ..	Dec. 83	Commander, A Company, 2d Battalion (Airborne), 325th Infantry, 82d Airborne Division, Fort Bragg, NC, and Operation Urgent Fury, Grenada
Jan. 84 ...	July 84	Student, Infantry Officer Advanced Course, U.S. Army Infantry School, Fort Benning, GA
Aug. 84 ...	May 86	Student, Department of History, University of Michigan, Ann Arbor, MI
May 86 ...	May 89	Instructor, later Assistant Professor, Department of History, U.S. Military Academy, West Point, NY
July 89	May 91	Student, U.S. Army Command and General Staff College, Fort Leavenworth, KS
June 91 ..	Jan. 92	Chief, G-3 (Operations), 25th Infantry Division (Light), Schofield Barracks, HI
Feb. 92 ...	June 93	S-3 (Operations), 1st Brigade, 25th Infantry Division (Light), Schofield Barracks, HI
June 93 ..	Oct. 93	Chief, G-3 (External Evaluation Branch), 25th Infantry Division (Light), Schofield Barracks, HI

From	To	Assignment
Oct. 93 ...	Oct. 95	Commander, 1st Battalion, 504th Parachute Infantry Regiment, 82d Airborne Division, Fort Bragg, NC
Oct. 95 ...	Aug. 96	Staff Action Officer, Congressional Activities Division, Management Directorate, Office of the Chief of Staff, U.S. Army, Washington, DC
Aug. 96 ..	June 97	Student, National War College, Fort Lesley J. McNair, Washington, DC
June 97 ..	Oct. 97	Student, Spanish Language Training, Defense Language Institute-Washington Office, Washington, DC
Nov. 97 ...	Feb. 99	Commander, Joint Task Force-Bravo, U.S. Southern Command, Honduras
Feb. 99 ...	Nov. 00	Deputy Chief of Staff, later Executive Officer to the Commander in Chief, U.S. Southern Command, Miami, FL
Nov. 00 ...	July 02	Deputy Director for Global/Multilateral Issues/International-American Affairs, J-5, The Joint Staff, Washington, DC
July 02	Mar. 04	Assistant Division Commander (Operations), later Assistant Division Commander (Support), 25th Infantry Division (Light), Schofield Barracks, HI
Mar. 04 ..	Mar. 05	Assistant Division Commander (Support), 25th Infantry Division (Light)/Combined Joint Task Force-76, Operation Enduring Freedom, Afghanistan
Mar. 05 ..	June 05	Assistant Division Commander (Support), 25th Infantry Division (Light), Schofield Barracks, HI
July 05	May 07	Commanding General, U.S. Army Alaska/Deputy Commander, U.S. Alaskan Command, Fort Richardson, AK
May 07 ...	June 10	Commanding General, I Corps and Fort Lewis, Fort Lewis, WA
Apr. 09 ...	Dec. 09	Commanding General, I Corps and Fort Lewis/Multi-National Corps-Iraq, Operation Iraqi Freedom, Iraq
Jan. 10 ...	Mar. 10	Commanding General, I Corps and Fort Lewis/Deputy Commander for Operations, U.S. Forces-Iraq, Operation Iraqi Freedom, Iraq
Mar. 10 ..	June 10	Commanding General, I Corps and Fort Lewis, Fort Lewis, WA
June 10 ..	Present	Director, Strategic Plans and Policy, J-5, The Joint Staff/Senior Member, U.S. Delegation to the United Nations Military Staff Committee, Washington, DC

Summary of joint assignments:

Assignments	Date	Grade
Commander, Joint Task Force-Bravo, U.S. Southern Command, Honduras	Nov. 97–Feb. 99	Colonel
Deputy Chief of Staff, later Executive Officer to the Commander in Chief, U.S. Southern Command, Miami, FL	Feb. 99–Nov. 00	Colonel
Deputy Director for Global/Multilateral Issues/International-American Affairs, J-5, The Joint Staff, Washington, DC	Nov. 00–July 02	Colonel/Brigadier General
Assistant Division Commander (Support), 25th Infantry Division (Light)/Combined Joint Task Force-76, Operation Enduring Freedom, Afghanistan	Mar. 04–Mar. 05	Brigadier General
Commanding General, I Corps and Fort Lewis/Multi-National Corps-Iraq, Operation Iraqi Freedom, Iraq	Apr. 09–Dec. 09	Lieutenant General
Commanding General, I Corps and Fort Lewis/Deputy Commander for Operations, U.S. Forces-Iraq, Operation Iraqi Freedom, Iraq	Jan. 10–Mar. 10	Lieutenant General
Director, Strategic Plans and Policy, J-5, The Joint Staff/Senior Member, U.S. Delegation to the United Nations Military Staff Committee, Washington, DC	June 10–Present	Lieutenant General

Summary of operations assignments:

Assignments	Date	Grade
Commander, A Company, 2d Battalion (Airborne), 325th Infantry, 82d Airborne Division, Operation Urgent Fury, Grenada	Aug. 83–Dec. 83	Captain
Assistant Division Commander (Support), 25th Infantry Division (Light)/Combined Joint Task Force-76, Operation Enduring Freedom, Afghanistan	Mar. 04–Mar. 05	Brigadier General
Commanding General, I Corps and Fort Lewis/Multi-National Corps-Iraq, Operation Iraqi Freedom, Iraq	Apr. 09–Dec. 09	Lieutenant General
Commanding General, I Corps and Fort Lewis/Deputy Commander for Operations, U.S. Forces-Iraq, Operation Iraqi Freedom, Iraq	Jan. 10–Mar. 10	Lieutenant General

U.S. decorations and badges:

Defense Distinguished Service Medal
 Distinguished Service Medal (with Oak Leaf Cluster)
 Defense Superior Service Medal (with two Oak Leaf Clusters)
 Legion of Merit
 Bronze Star Medal (with Oak Leaf Cluster)

Defense Meritorious Service Medal
 Meritorious Service Medal (with five Oak Leaf Clusters)
 Joint Service Commendation Medal (with Oak Leaf Cluster)
 Army Commendation Medal (with four Oak Leaf Clusters)
 Army Achievement Medal (with two Oak Leaf Clusters)
 Combat Infantryman Badge
 Expert Infantryman Badge
 Master Parachutist Badge
 Air Assault Badge
 Ranger Tab
 Joint Chiefs of Staff Identification Badge

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by LTG Charles H. Jacoby, Jr., USA, in connection with his nomination follows:]

UNITED STATES SENATE
 COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
 NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Charles H. Jacoby, Jr.
2. **Position to which nominated:**
Commander, Northern Command/North American Aerospace Defense Command, Peterson Air Force Base, CO.
3. **Date of nomination:**
July 25, 2011.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
June 19, 1954; Detroit, MI.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Grace A. Dorta.
7. **Names and ages of children:**
Charles H. Jacoby III, age 20.
Victor D. Jacoby, age 16.
Michael C. Jacoby, age 13.
8. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than

those listed in the service record extract provided to the committee by the executive branch.

None.

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Limited partnership in a family LLC. Jacoby Land & Timber, LCC.
Managing partner, Robert Jacoby, Brother).

10. **Memberships:** List all memberships and offices held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Association of the U.S. Army (AUSA).
Association of Graduates, U.S. Military Academy.
Council on Foreign Relations.

11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

None.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power.

Yes.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–E are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

CHARLES H. JACOBY, JR.

This 21st day of July, 2011.

[The nomination of LTG Charles H. Jacoby, Jr., USA, was reported to the Senate by Chairman Levin on August 2, 2011, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on August 2, 2011.]

NOMINATION OF HON. ASHTON B. CARTER TO BE DEPUTY SECRETARY OF DEFENSE

TUESDAY, SEPTEMBER 13, 2011

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:33 a.m. in room SD-106, Dirksen Senate Office Building, Senator Carl Levin (chairman), presiding.

Committee members present: Senators Levin, Lieberman, Reed, Nelson, McCaskill, Hagan, Begich, Shaheen, Blumenthal, McCain, Inhofe, Sessions, Wicker, Brown, Portman, Ayotte, Graham, and Cornyn.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Richard W. Fieldhouse, professional staff member; Creighton Greene, professional staff member; Jessica L. Kingston, research assistant; Peter K. Levine, general counsel; Jason W. Maroney, counsel; William G.P. Monahan, counsel; Robie I. Samanta Roy, professional staff member; Russell L. Shaffer, counsel; and William K. Sutey, professional staff member.

Minority staff members present: David M. Morriss, minority staff director; Adam J. Barker, professional staff member; Pablo E. Carrillo, minority investigative counsel; Paul C. Hutton IV, professional staff member; Daniel A. Lerner, professional staff member; Lucian L. Niemeyer, professional staff member; Michael J. Sistik, research assistant; and Richard F. Walsh, minority counsel.

Staff assistants present: Kathleen A. Kulenkampff, Hannah I. Lloyd, and Bradley S. Watson.

Committee members' assistants present: Christopher Griffin, assistant to Senator Lieberman; Carolyn Chuhta, assistant to Senator Reed; Nick Ikeda, assistant to Senator Akaka; Ann Premer, assistant to Senator Nelson; Gordon Peterson, assistant to Senator Webb; Maria Mahler-Haug, assistant to Senator McCaskill; Roger Pena, assistant to Senator Hagan; Lindsay Kavanaugh, assistant to Senator Begich; Brooke Jamison, assistant to Senator Gillibrand; Ethan Saxon, assistant to Senator Blumenthal; Anthony Lazarski, assistant to Senator Inhofe; Lenwood Landrum, assistant to Senator Sessions; Joseph Lai, assistant to Senator Wicker; Charles Prosch, assistant to Senator Brown; Brad Bowman, assistant to Senator Ayotte; Matthew Rimkunas and Sergio Sarkany, assistants to Senator Graham; and Joshua Hodges, assistant to Senator Vitter.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. This morning the committee meets to consider the nomination of Ashton Carter to be Deputy Secretary of Defense. We welcome the nominee and his family to today's hearing. We appreciate the long hours and other sacrifices that our nominees make to serve their country, and we know that these sacrifices would not be possible without the support of their families.

Senator Lieberman, who is going to be introducing Dr. Carter this morning, needs to chair another committee meeting. I know that firsthand because I'm supposed to be there later myself. In any event, what we're going to do now is call upon Chairman Lieberman, Senator Lieberman, who's a member of this committee, as well, to introduce our nominee, and then we'll come back to the opening statements. I've consulted with Senator McCain and he's perfectly happy to do it that way.

Senator Lieberman.

**STATEMENT OF HON. JOSEPH I. LIEBERMAN, U.S. SENATOR
FROM THE STATE OF CONNECTICUT**

Senator LIEBERMAN. Thank you very much for your courtesy, Mr. Chairman, and for your skill at overcoming the obvious irascible reluctance of Senator McCain to allow me to speak first.

Chairman LEVIN. He's a soft touch. [Laughter.]

Senator LIEBERMAN. I am really grateful for the opportunity to appear before you now, not from my customary seat, in order to introduce Dr. Ash Carter, the President's nominee to be our 30th Deputy Secretary of Defense. Just slightly more than 2 years ago, I had the privilege of introducing and supporting Ash's nomination as Under Secretary of Defense for Acquisition, Technology, and Logistics. After that hearing, this committee in its wisdom endorsed the nomination, approved it by voice vote, and then the Senate did the same. I think we have some momentum going here.

If anything, over the last 2 years I think Ash Carter has strengthened his case, the case for him to assume at this particular time this extraordinary position. I've known Ash for years and we've become personal friends, both during his time serving in the Defense Department under Bill Perry during the Clinton administration and now.

We've also had the opportunity to travel under the esteemed leadership of Senator McCain, with me in a supporting role, to the security conference in Munich every February, and it's been a great opportunity to get to know him both as a person and a public official.

His résumé is quite impressive. I'll just state some of the highlights for you. He has, unusually, a Ph.D. in theoretical physics, has been a professor of international relations, security, and science and, going back to the Clinton administration, served as Assistant Secretary of Defense for International Security Policy.

Since then he's also served during the Bush administration on the Defense Science Board and the Defense Policy Board, and is widely recognized and respected, I think on a bipartisan basis, as one of our country's leading thinkers and leaders, actors, on defense and national security issues.

For the last 2 years, as I've mentioned, Ash has served as Under Secretary of Defense for Acquisition, Technology, and Logistics. In this position he has overseen billion-dollar military programs and procurement of critical equipment for our men and women in the Armed Forces. In this job, as so many others, I believe he has truly distinguished himself.

Of particular note, Ash has played a pivotal role in getting 6,500 mine resistant ambush protected (MRAP) all-terrain vehicles to our troops in Afghanistan at really breakneck speed. Of course, we all know that these vehicles have saved countless lives. The success of the program I think speaks to Ash's fierce dedication to our men and women on the front lines, but also to the importance of the acquisition programs delivering equipment our troops need in a way that is not only timely, but cost effective.

When and I hope, of course, if Ash is confirmed, he will assume his new responsibilities at a time when the Pentagon faces the prospect of what I would call extreme, draconian budget cuts, so severe that Secretary of Defense Panetta has warned that they could, "hollow out the force and weaken our national defense." Of course, I totally agree and I know many members on both sides of the aisle on this committee agree.

In the face of this danger, I think Ash's considerable talents, his experience, his skill as an advocate, will be more necessary than ever. I have great confidence that he will work ceaselessly, first to make sure that every dollar entrusted to our Department of Defense (DOD) is used as efficiently and effectively as possible, but also that he will be a determined advocate for the programs and the funding that are needed to ensure that our military stays what it is today, the best in the world, and that our Nation stays therefore, at a time when the world remains dangerous and unpredictable, remains as secure and free as we all want it to be.

Mr. Chairman, Senator McCain, I thank you again for your courtesy and I am proud to offer my wholehearted endorsement for this nomination and hope that my colleagues will give him the same unanimous support that he received the last time he appeared before the committee.

Thank you very much.

Chairman LEVIN. Thank you very much, Senator Lieberman.

We just heard from Senator Lieberman and his support for you, and much about your record, your career. I think most of us, perhaps all, are familiar with your distinguished record of public service culminated in your current position as Under Secretary of Defense for Acquisition, Technology, and Logistics. If you're confirmed as Deputy Secretary, you're going to be the number two official in DOD, and in that capacity you're going to play a key role in determining how our country addresses an extraordinarily complex set of challenges that face our Armed Forces.

For example, how can we reduce the stress of repeated deployments on our men and women in uniform and their families after 10 years of non-stop military operations in Iraq and Afghanistan? How will we complete the drawdown of U.S. forces in Iraq, and what continuing role, if any, is the U.S. military willing to play after the December 31 withdrawal deadline if there is a request from Iraq? How can we most effectively contribute to the success

of the mission in Afghanistan by keeping the focus on transitioning security responsibility to Afghan forces, including continuing the drawdown of U.S. forces in that country?

How can we reduce our force posture around the world to bring down the huge costs we're facing, while at the same time maintaining a strong forward presence in key areas?

At the same time all that's on your plate, the next Deputy Secretary is going to play a key role in implementing ongoing efficiencies initiatives and achieving the additional savings that are needed in the current fiscal climate. Last year then-Secretary Gates approved roughly \$180 billion in cuts to defense programs over the Future Years Defense Program. The recent legislation on the debt ceiling calls for an additional \$400 billion in reductions in security spending over a 10-year period, with the possibility of far deeper cuts if the joint committee is unable to reach agreement and a sequester is triggered.

Now, just the reductions required so far, required by the legislation on the debt ceiling, just those reductions are going to require an extremely careful review of every program and expenditure in the defense budget and tough decisions to be made to balance the requirements of today's force and current military missions against investment in needed preparations for the threats of tomorrow.

I know that Dr. Carter agrees that DOD budget reductions must contribute to overall deficit reduction, but must do so without compromising our current or our future security. Unless we impose much greater discipline on our acquisition process and unless we bring down the costs of our weapons programs, we are unlikely to achieve that objective.

Finally, the Deputy Secretary has traditionally handled a wide array of management duties, a role that was enhanced by recent legislation formally designating the Deputy Secretary as Chief Management Officer of DOD. Virtually every area of DOD management is included in the annual list that we get of high risk areas prepared by the Government Accountability Office. Those high risk areas have not changed much over the years.

Dr. Carter, as Deputy Secretary you're going to be responsible for addressing each of those high risk problem areas, including: DOD business transformation, DOD business systems modernization, DOD support infrastructure management, DOD financial management, DOD supply chain management, DOD weapons systems acquisition, DOD contract management, management of interagency contracting, strategic human capital management, and management of real property.

Dr. Carter has demonstrated in his current position that he can be a strong manager and a decisive leader. We particularly appreciate the efforts that you have made to implement the Weapons System Acquisition Reform Act (WSARA), the Better Buying Power Initiative, and to begin the process of bringing some of our largest acquisition programs under control.

Now, I emphasize that you've helped to begin the process of bringing some of our largest acquisition programs under control, but we have a long way to go. Secretary Carter in his new capacity is going to need to speed up the process to help that speed-up effort, to speed up the process of controlling costs of acquisition.

Senator McCain.

STATEMENT OF SENATOR JOHN MCCAIN

Senator MCCAIN. Thank you, Mr. Chairman.

Dr. Carter, thank you for your service as Under Secretary of State for Acquisition, Technology, and Logistics and for your willingness to continue to serve as the Deputy Secretary of Defense. Your willingness and ability to bear the burden of senior leadership is both noteworthy and highly commendable.

The position of Deputy Secretary of Defense is as challenging today as it's ever been. On the one hand, the Department is being confronted by daunting challenges to its ability to ensure the Nation's defense. On the other hand, there's the specter of dramatic cuts in defense spending. Against that backdrop, the Department must find ways to operate more efficiently and effectively than ever before. If confirmed as Deputy Secretary of Defense, you must be prepared to lead both these efforts and succeed in doing so.

Providing for our national defense is the most important responsibility that our or any government has. It's our Nation's insurance policy. In a world that is more complex and threatening as I have ever seen, we cannot allow arbitrary budget arithmetic to drive our defense strategy and spending. Some of the defense cuts being discussed would do grave harm to our military and our Nation's security. Defense spending is not what is sinking this country into fiscal crisis and if Congress and the President act on that flawed assumption they will create a situation that is truly unaffordable, the decline of U.S. military power.

Do not misunderstand me. Real defense cuts are coming and for that reason it's now more essential than ever for DOD to efficiently manage the taxpayers' money. But I will be blunt. This will require not just good leadership; it will require a change in culture at DOD. By that I mean an end to the Department's systemic tendency to spend the taxpayers' money in a manner that is far too often disconnected from what the warfighter actually needs and what is in the taxpayers' best interests.

Particularly over the last 10 years, senior defense management has been inclined to lose sight of affordability as a goal and has just reached for more money as a solution to most problems. Today I see evidence of this cultural problem all too frequently and it must be changed.

Every few weeks I get reports about huge cost overruns on the Pentagon's biggest weapons programs, like the recent projection of a \$1.1 billion overrun in the cost of the first 28 production-quality jets in the Joint Strike Fighter (JSF) program, a program that is now in its 10th year of development and the recipient of about \$56 billion of taxpayer investment to date. Or, the estimated \$560 million estimated cost overruns, or roughly 11 percent growth in cost, in the program to build the USS *Gerald Ford*.

Then, there are the Defense Department's recent reprogramming requests. Four times over the last 2 months, the Department has asked this committee to let it shift a total of over \$10 billion amongst its spending accounts. In doing so, it asks only the chairman and ranking members of the defense committees in the Senate and the House of Representatives to let it reallocate billions of dol-

lars to, among other things, pay hundreds of millions of dollars for the cost overrun in the JSF program and provide authority to start dozens of new programs never before presented to Congress.

Authorizing funding in this way, outside of regular order, subverts transparent congressional oversight, undermines accountability in how defense programs are managed, and actually encourages underperformance.

Just a few days ago, the Bipartisan Commission on Wartime Contracting reported that at least \$30 billion has been wasted on ill-conceived and poorly overseen contracts and grants in Iraq and Afghanistan. Earlier this year, a study of Army procurement showed that between \$3.3 billion and \$3.8 billion had been wasted by the Army every year since 2004 in developing new weapons programs that were cancelled without providing any new capability to the troops risking their lives fighting two wars.

A culture that has allowed massive waste of taxpayers' dollars has become business as usual at DOD. Particularly in today's fiscal environment, this cannot be tolerated. If this is not corrected, the Department's ability to continue defending the Nation and to provide for its national security will be compromised. Taxpayers simply will not tolerate the continuing waste of their resources in light of the debt we face and our competing budgetary needs.

I also want to know if you share my concern that solving this problem may be hindered by the revolving door of retired flag and general officers, top Pentagon civilian officials, and mid-level bureaucrats who had overseen weapons procurement programs before leaving government to join private sector defense industry. With the defense contracting pie expected to get smaller in the future, this problem may get worse than before. I hope you are as sensitive to this as I am.

Notably, as the Deputy Secretary you would also serve as the Department's Chief Management Officer. You'd be responsible for ensuring, among other things, the Defense Department becomes fully auditable by 2017, as required under law. I strongly support the requirement for the Department to pass a clean audit so I'd like to hear from you on this issue.

Finally, I've been told that the Defense Department's comprehensive strategic review of military roles, missions, and requirements that underpins how it intends to carry out the President's direction for a \$400 billion reduction in defense spending over the next 12 years may not come out before next year. If true, this review would not be available to inform the deliberations of the Joint Select Committee on Deficit Reduction, or Congress generally, on how the currently proposed defense spending cuts will affect national security. This is unacceptable.

The efforts of the Department or Congress cannot be conducted in a vacuum. Any major budget review, whether conducted by the administration or Congress, must be accompanied by an open, honest, and comprehensive review of requirements and set priorities based on sound strategy.

Dr. Carter, I have come to know you as a hardworking, honest and committed public servant. But, if confirmed, you would face major challenges in confronting the cultural impediments to proper fiscal stewardship at the Defense Department, which I trust you

have come to understand. This culture needs to change. The Defense Department needs to change. It must do so in order to be the best provider it can be of our Nation's most essential service, our national defense.

On all these vital matters, failure truly is not an option, and as the Department's senior leadership applies itself to this urgent and critical task you should know that you will have the support of your friends in Congress. The challenge ahead is daunting, yes, but I have confidence in our men and women in uniform that, given the task ahead, they will rise to the challenges and indeed do more with less. Your leadership and that of Secretary Panetta will be more crucial than ever.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator McCain.

Now let me call on you, Dr. Carter. We know you're accompanied by your family here, so please feel free to introduce them.

STATEMENT OF HON. ASHTON CARTER, Ph.D., NOMINATED TO BE DEPUTY SECRETARY OF DEFENSE

Dr. CARTER. Thank you, Mr. Chairman, and to you, Ranking Member McCain. If I may, I'd like to make a brief statement, and then a number of questions have been raised already and I'll take them at whatever time it's convenient to you.

Chairman Levin, Ranking Member McCain, all the distinguished members of this committee, it's a privilege and a deep honor to appear before you as the President's nominee for Deputy Secretary of Defense. If confirmed, I look forward to the opportunity to continue to serve President Obama and Secretary Panetta in a new role and to continue to work with the Chairman and the Joint Chiefs of Staff and with this committee to protect this great country, to serve the troops who serve us, and to leave a more secure world for our children.

I'd like to thank my wife Stephanie, son Will, daughter Ava for being here today and for their support. I'd also like to thank Senator Lieberman for the kindness and honor of his introduction, for all he's done for this country, and for all he's taught me.

If confirmed, I will step into large shoes and I would like to take this moment to express my admiration for the job Bill Lynn has done as Deputy. It has been a privilege to serve him.

I have served, in one way or another, almost every Secretary of Defense since Caspar Weinberger, and I feel fortunate to have been a member of the Pentagon team led over these past years by Secretary Gates, Secretary Panetta, and Secretary Lynn.

As Under Secretary of Defense for Acquisition, Technology, and Logistics, I have had two overriding priorities. The first has been to wake up every morning and ask myself what my office can do to support our troops in Afghanistan, Iraq, or anywhere else in the world they are deployed, whether with better protection against improvised explosive devices (IED), better reconnaissance and surveillance, or better logistics, and on their timetable and not on the timetable of the Pentagon's frequently ponderous acquisition and budgeting process.

My second priority has been to deliver better buying power to the taxpayers and the warfighters for their defense dollars, working

closely with our acquisition professionals, our industry partners, and Congress. It's an effort, as has been noted, that this committee began in its 2009 Weapons Systems Acquisition Reform Act, and I began with Secretary Gates, all well before the current budget crunch.

But the performance of the system is in my judgment still not acceptable. I think Senator McCain used the word "intolerable" and I would agree with that. I believe that there are some additional actions we're going to need to take to get better value for the defense dollar. This is something the American taxpayer should expect no matter what the defense budget is, but it becomes even more urgent in the serious budget predicament that faces us.

Like Secretary Panetta, I do not believe we need to choose between strong fiscal discipline and strong national defense. If confirmed as Deputy Secretary of Defense, these two priorities will continue, but many others will be added. Secretary Panetta has made it clear to me that he expects his deputy to be prepared to act and speak in his stead at all times. He expects the deputy to shape an orderly deliberative process for him, so that he can make decisions and advise the President based on careful consideration of accurate management information and a full range of options. He expects his deputy to manage the budget down to a finite number of key issues that he needs to decide and to manage other Department-wide matters that require his attention only for final decisions of greatest consequence.

Finally, Secretary Panetta expects all this to be done with the same heart, the same integrity, and the same dedication to our soldiers, sailors, airmen, and marines that he brings to the job.

In all these tasks, I pledge to Secretary Panetta and to this committee, if confirmed, my most earnest efforts. Thank you once again for the opportunity to appear before you.

[The prepared statement of Dr. Carter follows:]

PREPARED STATEMENT BY HON. ASHTON B. CARTER

Chairman Levin, Ranking Member McCain, and all the distinguished members of this committee, it is a privilege and a deep honor to appear before you as President Obama's nominee for Deputy Secretary of Defense. If confirmed, I look forward to the opportunity to continue to serve the President and Secretary Panetta in a new role, and to continue to work with the Chairman and the Joint Chiefs of Staff, and with this committee, to protect this great country, to serve the troops who serve us, and to leave a more secure world for our children.

I would like to thank my wife, Stephanie, and children, Will and Ava, for being here today and for their support. I would also like to thank Senator Lieberman for the kindness and honor of his introduction, for all he has done for this country, and for all he has taught me.

If confirmed, I will step into large shoes, and I would like to take this moment to express my admiration for the job Bill Lynn has done as Deputy. It has been a privilege to serve him. I have served in one way or another almost every Secretary of Defense since Caspar Weinberger, and I feel fortunate to have been a member of the Pentagon team led over these past years by Secretary Gates, Secretary Panetta, and Secretary Lynn.

As Under Secretary of Defense for Acquisition, Technology, and Logistics, I have had two overriding priorities. The first has been to wake up every morning and ask myself what my office can do to support our troops in Afghanistan, Iraq, or anywhere else in the world they are deployed—whether with better protection against improvised explosive devices, better reconnaissance and surveillance, or better logistics—on their timetable, and not on the timetable of the Pentagon's frequently ponderous acquisition and budgeting processes. My second priority has been to deliver better buying power to the taxpayers for their defense dollars, working closely with

our acquisition professionals, our industry partners, and Congress. It is an effort this committee began in its 2009 Weapons Systems Acquisition Reform Act, and I began with Secretary Gates—all well before the current budget crunch. But the performance of the system is in my judgment still not acceptable, and I believe that there are some additional actions we are going to need to take to get better value for the defense dollar. In all these tasks, I pledge to the Secretary of Defense and to this committee, if confirmed, my most earnest effort.

Thank you once again for the opportunity to appear before you.

Chairman LEVIN. Thank you, Dr. Carter.

We start, as we always do with nominees, with the standard questions. You've answered them before, but we'll be asking you to answer them again.

In order to exercise our legislative and our oversight responsibilities, we have to receive testimony, briefings, and other communications of information in a timely way.

The first question is: Have you adhered to all of the applicable laws and regulations governing conflicts of interest?

Dr. CARTER. Yes.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

Dr. CARTER. No.

Chairman LEVIN. Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Dr. CARTER. I will.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

Dr. CARTER. Yes.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Dr. CARTER. Yes.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify upon request before this committee?

Dr. CARTER. I do.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Dr. CARTER. Yes.

Chairman LEVIN. Let's try an 8-minute first round of questions.
