TUESDAY, FEBRUARY 15, 2011

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:32 a.m. in room SD-G50, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Reed, Webb, Udall, Hagan, Manchin, Blumenthal, McCain, Brown, and Ayotte.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Jonathan D. Clark, counsel; Gabriella E. Fahrner, counsel; Creighton Greene, professional staff member; Jessica L. Kingston, research assistant; Michael J. Kuiken, professional staff member; Gerald J. Leeling, counsel; Peter K. Levine, general counsel; Jason W. Maroney, counsel; Thomas K. McConnell, professional staff member; William G.P. Monahan, counsel; Michael J. Noblet, professional staff member; and John H. Quirk V, professional staff member.

Minority staff members present: David M. Morriss, minority staff director; Adam J. Barker, professional staff member; John W. Heath, Jr., minority investigative counsel; Daniel A. Lerner, professional staff member; Diana G. Tabler, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: Jennifer R. Knowles and Hannah I. Lloyd.

Committee members' assistants present: Carolyn Chuhta, assistant to Senator Reed; Gordon Peterson, assistant to Senator Webb; Jennifer Barrett, assistant to Senator Udall; Roger Pena, assistant to Senator Hagan; Lindsay Kavanaugh, assistant to Senator Begich; Joanne McLaughlin, assistant to Senator Manchin; Chad Kreikemeier, assistant to Senator Shaheen; Jordan Baugh and Elana Broitman, assistants to Senator Gillibrand; Lenwood Landrum and Sandra Luff, assistants to Senator Sessions; Clyde Taylor IV, assistant to Senator Chambliss; Charles Prosch, assist-

ant to Senator Brown; and Brad Bowman, assistant to Senator Ayotte.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody. The committee meets today to consider the nominations of two senior officials to serve in important positions within the Department of Defense (DOD). Dr. Michael Vickers has been nominated to be the Under Secretary of Defense for Intelligence. He is currently serving in that position on an acting basis while continuing his duties as the Assistant Secretary of Defense for Special Operations, Low Intensity Conflict, and Interdependent Capabilities (SOLIC&IC). Dr. Vickers has served ably in that position, guiding and overseeing major elements of our operations against terrorists and insurgents across the globe.

Dr. Vickers has had a long and distinguished career in Government service, much of which is relevant to the position for which he has been nominated by the President.

In his present position as Assistant Secretary of Defense-SOLIC, he has been deeply involved in intelligence matters across the Government as a policymaker, as a consumer of intelligence, and as a producer of intelligence. He served previously as a Central Intelligence Agency (CIA) operations officer in multiple divisions, spanning the Near East, South Asia, and Latin America, and including involvement in covert actions. He also served as an Army Special Forces soldier and officer.

Congress created the position of Under Secretary of Defense for Intelligence (USD(I)) in 2002 in recognition of the growing importance of intelligence to our military forces, especially in conducting operations after the events of September 11. The Under Secretary of Defense for Intelligence is the principal staff assistant and adviser to the Secretary and Deputy Secretary of Defense regarding intelligence, counterintelligence, security, and other sensitive matters. In this capacity, the USD(I) exercises the Secretary's authority over the intelligence components of DOD and is responsible for intelligence planning, programming, budgeting, policy formulation, and oversight.

The USD(I) is also responsible for ensuring that DOD intelligence components are responsive to the direction and requirements of the Director of National Intelligence (DNI). Indeed, by formal agreement between the DNI and the Secretary of Defense, the USD(I) is dual-hatted as the Director of Defense Intelligence on the DNI's staff.

Dr. Jo Ann Rooney has been nominated to be the Principal Deputy Under Secretary of Defense for Personnel and Readiness, the Department's number two position for military and civilian personnel issues, including recruitment, retention, pay and benefits, health care, readiness, and the quality of life of the members of our Armed Forces and their families. Dr. Rooney comes to us from academia, where she most recently served as the President of Mount Ida College and has served as an instructor at various colleges since 1994.

Dr. Rooney also serves on the board of trustees for the Jewish Hospital and St. Mary's Health Care, a nonprofit health care sys-

tem in Louisville, KY, experience that could serve her well in her new position should she be confirmed.

The Principal Deputy Under Secretary of Defense for Personnel and Readiness position is vitally important as the Department and Congress continue to wrestle with many challenges, including vastly growing personnel and health care budgets and the proper size of the force. The Department is actively planning a reduction in its ground forces, depending on conditions in Iraq and Afghanistan, and the 2012 budget request includes modest reductions in the Army and Navy, while the Department plans greater reductions in future years.

In evaluating the size of the force, we must be mindful of the stress on the force, including inadequate dwell time for many soldiers and a deeply concerning suicide rate.

Finally, the Department is continuing its deliberate progress in implementing the repeal of Don't Ask, Don't Tell.

We welcome both our nominees. We thank them. We thank their families for their distinguished public and private service and willingness to serve our Nation in these important positions. When we call upon them for their opening statements, we will ask them to introduce the family members and their friends who are with them as they give those statements.

Senator McCain.

STATEMENT OF SENATOR JOHN MCCAIN

Senator MCCAIN. Thank you, Senator Levin. I join you in welcoming our nominees and their families and friends who are here today, especially our two youngest there [pointing to the audience], who have been working on paperwork in preparation for this hearing. We thank you for that. [Laughter.]

Secretary Vickers has had a distinguished and storied record of service to this country. He served as an Army Special Forces soldier, as a CIA case officer, and since August 2007 as Assistant Secretary of Defense for Special Operations and Low Intensity Conflict and Interdependent Capabilities.

Dr. Vickers, you must be prepared to streamline the size and cost of the organizations which you'll oversee. Secretary Gates has announced his initiative to cut costs, eliminate waste and redundancies, and focus defense dollars on the most vital programs. With the rollout of the fiscal year 2012 budget yesterday, we will want to know what parts of the defense intelligence enterprise will be affected.

In the face of an unacceptably high and increasing deficit, we must examine all aspects of defense spending. I hope we can learn from you how you would apply these efficiencies for cost savings for other vital defense priorities. For example, which intelligence functions are redundant and can be eliminated; which intelligence organizations that are bloated can be cut; are there senior civilian positions that could be transferred or eliminated; which contracts for services could be terminated; and which major acquisition programs should be restructured or eliminated to save money?

My questions, however, should not be interpreted as reflecting a lack of concern or support for our ongoing operations in Iraq and Afghanistan. Obviously, failure is not an option in achieving our

goals in both Operation New Dawn and Operation Enduring Freedom, and robust intelligence-gathering and analysis are critical to our success.

The list of imperatives for the defense intelligence enterprise is lengthy. We must be able to continue to locate and track America's most relentless enemies on the battlefield, to include former Guantanamo detainees who have made their way back into the fight. We must safeguard our Nation's vital secrets to prevent another Wikileaks episode and any further neutralization of our lawful intelligence collection methods. Through sound acquisition practices, we have to ensure our troops and our Nation have the overhead surveillance required for national security and mission accomplishments.

Dr. Rooney, you've had a distinguished career in law, education, and health administration. I expect you'll be called on very quickly to assist Secretary Gates and Under Secretary of Defense Stanley in making progress in several key areas that demand attention. Foremost among these is identifying ways to improve the well-being and quality of life of servicemembers and their families. After 9 years of combat operations in Iraq and Afghanistan, our forces, particularly the ground forces, special operators, and the combat support personnel who mobilize and sustain them through multiple deployments, are stressed.

While recruiting is strong and retention levels for experienced noncommissioned officers and officers remain historically high, the Department must continue to ensure that the resources, policies, and programs are in place to guarantee that deploying troops are trained, ready, and focused. For our wounded or injured, there must continue to be world-class care on the battlefield, and when they return home that the procedures for helping them and their families transition seamlessly to the next stages of their military service or civilian life work as rapidly and fairly as possible.

I look forward to hearing your testimony and I wish to congratulate you on your nominations and I look forward to confirming you as quickly as possible.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator McCain.

Let me now call on you for your opening statement, Secretary Vickers.

**STATEMENT OF HON. MICHAEL G. VICKERS, NOMINATED TO
BE UNDER SECRETARY OF DEFENSE FOR INTELLIGENCE**

Dr. VICKERS. Chairman Levin, Senator McCain, distinguished members of the committee: It is an honor to appear before you here today. Thank you for your consideration of my nomination. I am profoundly grateful for the confidence President Obama has shown in me by nominating me for the position of Under Secretary of Defense for Intelligence and in designating me as the Acting USD(I) on 28 January. In the brief period I have been Acting USD(I), I have gained a further appreciation of the immense responsibilities of this office.

I am also deeply grateful to Secretary Gates for his support. I had the great privilege of serving with Secretary Gates in the CIA

during the 1980s and he has been the model for me ever since of what a professional intelligence officer should aspire to.

The USD(I) is dual-hatted as the DNI's Director of Defense Intelligence. I have had the great honor of serving with Director Clapper for the past 3½ years and I am grateful for his support for my nomination.

I would also like to thank my family for their love and support. It is a great honor, Mr. Chairman, to introduce them to the committee today. With me here today are my wife, Melana, and our daughters Alexandra, Sophia, Oksana, and Kalyna. I would be a very poor dad if I did not also introduce in absentia our fifth daughter, Natasha, who is busily studying for her midterms at Ohio State and thus could not be with us today.

Chairman LEVIN. Which is the youngest of your daughters who are here today, by the way?

Dr. VICKERS. Kalyna is our kindergartener, who is 6 years old on February 8th.

Chairman LEVIN. I was trying to win her vote here by asking which is the youngest. Thank you. [Laughter.]

Dr. VICKERS. I'd like to also add that Oksana has the same birthday as President Obama. [Laughter.]

Also with me here today are my mother-in-law, Oksana Hepburn, my brother-in-law, Roman Gila, and his son and my nephew Muletti Gila, and numerous friends and colleagues from the Pentagon.

It has been a great privilege and honor for the past 3½ years to serve as Assistant Secretary of Defense for SOLIC&IC under both President Bush and President Obama. Our special operators do much to keep us safe and I am immensely proud of them.

We face many challenges as a Nation, from the war with al Qaeda in Afghanistan to the pursuit of nuclear weapons by rogue states, the development of asymmetric capabilities by rising and resurgent powers, and the continued effects of the global financial crisis. I am confident we'll be more than equal to these challenges, as Americans before us were to the challenges that confronted them.

Our intelligence capabilities constitute an increasingly critical source of advantage for our Nation. Recent events in the Middle East remind us of the importance of intelligence, but also of the unpredictable and rapid turns developments can take. Our warriors in the field and our policymakers here at home are better served by U.S. intelligence today than at any time since I began my service nearly 4 decades ago. We owe them the best intelligence we can provide. If confirmed as USD(I), I will do my best to ensure that this continues to be the case.

As a CIA officer in the 1980s, I learned first-hand about the importance of congressional oversight of intelligence. Even more important, I learned what an indispensable partner Congress can be.

I look forward to your questions, Mr. Chairman.

Chairman LEVIN. Secretary Vickers, we thank you very much for that opening statement.

Dr. Rooney.

**STATEMENT OF JO ANN ROONEY, Ph.D., NOMINATED TO BE
PRINCIPAL DEPUTY UNDER SECRETARY OF DEFENSE FOR
PERSONNEL AND READINESS**

Dr. ROONEY. Good morning, Chairman Levin, Senator McCain, and members of the Senate Armed Services Committee. Thank you for the opportunity to appear before you today. I am grateful for the confidence that President Obama has shown in me by nominating me for the position of Principal Deputy Under Secretary of Defense for Personnel and Readiness. I also want to thank Secretary Gates for his support of my nomination. If confirmed, I will be honored to serve.

I want to thank my family and extended family for their support and it's my pleasure to introduce them now. My mom, Patricia Rooney, is with me today and I want to offer her my heartfelt and special thanks. It is because of her support and that of my late dad, John, that I'm here with you today. My dad, an Army veteran, and my mom, a retired public school elementary teacher, taught me that anything is possible, but that I must embrace opportunities to use my experience and talent to help others and leave an organization and people better for my efforts.

I'm also fortunate to have several other people very special in my life here today. My dearest friend of over 30 years and true sister of the heart, Linda Pizzorni, is here. Her daughter Alessia, a high school senior, is also here with us today. She and her sister Veronica, who is home because she has to be in school and she's with her dad, are truly my nieces in many ways.

Father Al Faretra, who is like my big brother, is representing the rest of the extended family in the Boston area. Prior to becoming a priest, Al served in the Navy and spent time aboard the USS *Forrestal*.

Finally, Father Jim Rafferty, a very dear friend and someone who I've had the pleasure of logging many nautical miles sailing the waters throughout New England, is here lending support.

I have not had the opportunity to serve our Nation in uniform, as did my dad, my uncles, my godfather, and many members of my extended family. They served in peacetime and in wartime, including World War II, Korea, and Vietnam. But like many Americans, I'm aware of the myriad of challenges members of our military, the civilian force, and their families face in supporting their service to our country. It is my desire to serve our country and, if confirmed, I pledge to bring all of my experience, knowledge, energy, and passion to the role.

The responsibilities and functions of the Principal Deputy Under Secretary of Defense for Personnel and Readiness are vast and challenging. They encompass advising and assisting the Under Secretary of Defense for Personnel and Readiness and advising the Secretary and Deputy Secretary of Defense in matters relating to manpower, force management, planning, program integration, readiness, Reserve component affairs, health affairs, training, civilian and military personnel requirements and management, commissary and exchange, morale, welfare, and recreation, quality of life matters, spousal and family support, and dependent education.

By nature, as the needs of our military and civilian members of DOD and their families change the responsibilities of the role must also evolve.

My background in law, finance, business, strategy, organizational change, education, and health care provide me with a broad range of experiences and perspectives to bring to this role, if confirmed.

All of us face daunting challenges, not only within DOD, but throughout the country, in areas of health care, cost containment, efficient use of resources, assessments, and accountability. Yet the goal is to balance these issues in a way to ensure we have the necessary resources so that the men and women in the Department are able to meet our Nation's requirements for national security.

I understand the importance of working with this committee, the entire Congress, other governmental departments and agencies, and civilian and educational institutions in order to accomplish this goal. I understand the longstanding and daunting challenges associated with these and other aspects of DOD personnel and readiness, enabling the effective recruitment, retention, and training of the people we need. I will take all these responsibilities seriously and, if confirmed, I pledge my best efforts to work with this committee and many others to meet these challenges.

In closing, I would like to again thank President Obama and Secretary Gates for selecting me as the nominee for this position. If the Senate confirms me, I will make every effort to live up to the confidence they and all of you have placed in me.

Thank you. I look forward to your questions.

Chairman LEVIN. Thank you very much, Dr. Rooney.

We give a warm welcome to your families and friends, who are such an important part of who you are and your being here today.

We have standard questions which we ask our nominees, which we'll ask each of you now. You can answer together. Have you adhered to applicable laws and regulations governing conflicts of interest?

Dr. ROONEY. Yes.

Dr. VICKERS. Yes, sir.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

Dr. VICKERS. No.

Dr. ROONEY. No.

Chairman LEVIN. Will you ensure your staff complies with deadlines established or requested communications, including questions for the record in hearings?

Dr. VICKERS. Yes.

Dr. ROONEY. Yes.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

Dr. VICKERS. Yes.

Dr. ROONEY. Yes.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Dr. ROONEY. Yes.

Dr. VICKERS. Yes.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify upon request before this committee?

Dr. VICKERS. Yes.

Dr. ROONEY. Yes.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Dr. ROONEY. Yes.

Dr. VICKERS. Yes.

Chairman LEVIN. Thank you.

I think we'll try a 7-minute round of questions.

Dr. Vickers, we've been making efforts over the years, this committee, to expand the budgets, the production rate, the planned number of orbits, for major unmanned aerial vehicles that have been so critical to our forces in Afghanistan, Iraq, and elsewhere, including the Predator and the Reaper. Our current objective is 65 orbits for these aircraft. The budget for fiscal year 2012 that we just received funds these aircraft at the maximum current production rate.

However, the fact is that our troops need more and are asking for more of these assets right now. They're living with significant unfulfilled requirements every day. Now, we were recently told that the limiting factor for accelerating the expansion of that force is operators and linguists rather than the production capacity at factories. My question is, why can't the Services accelerate the recruitment and the training of operators and linguists?

Dr. VICKERS. Mr. Chairman, our Intelligence, Surveillance, and Reconnaissance (ISR) task force, under Secretary Gates' direction, has been working very hard since 2008 to provide the intelligence capabilities our warriors in the field require. Nevertheless, demand has continually outstripped supply, which is one reason during the recent Quadrennial Defense Review we raised the requirement for Predator and Reaper combat air patrols or for orbits from 50 to 65, and it's not clear at this point that 65, which we'll reach in 2013, will still meet our demand.

To supplement that, we've been adding manned aircraft of various kinds, variations of C-12 aircraft, Project Liberty by the Air Force, and medium altitude reconnaissance and surveillance systems by the ground forces, to address this shortfall.

As you noted, buying the aircraft is not enough. We also have to have operators, linguists, bandwidth, across the intelligence cycle. The Air Force in particular has been working very hard at converting operators to these functions. In fact, there are now more pilots involved in unmanned aircraft in the Air Force than there are flying manned aircraft. But we still have work to do.

Chairman LEVIN. I recently wrote Secretary Gates about the current requirements for ISR support in the Horn of Africa and about the Department's current acquisition plans for additional ISR assets to support the geographic combatant commands. Now, I've not received a reply to this letter, but I would ask, since less than 10 percent of the requirements are being filled right now, that you pay

some very urgent attention to that and that you get a response to that as quickly as possible. Would you do that?

Dr. VICKERS. Yes, sir, I will.

Chairman LEVIN. Dr. Vickers, in your current position as Assistant Secretary of Defense-SOLIC, I think you understand very well how our Special Forces have discovered how to tightly integrate the different sensors to achieve unprecedented capabilities to identify high-value enemy personnel, to locate them, to track them, to identify their broader networks, and attack them.

Signals intelligence, sensors are used to cue airborne video cameras where to look. Radars that can detect moving vehicles or even people walking are used as tipoffs to begin focused collection, and so on.

Now, it's proven a lot more difficult for the regular conventional forces of the Army, Air Force, and Marine Corps to achieve the degree of ISR system integration necessary to replicate U.S. Special Operations Command's success because the ISR assets are not under unified control. It's my understanding that the ISR task force and the Joint Staff are focused now on this problem. Do you have any ideas as to how the organizational obstacles can be removed in order to truly integrate our ISR assets operationally?

Dr. VICKERS. Yes, sir, I do. As you noted, the technique that our Special Operations Forces have pioneered, which we call "find, fix, finish, exploit, and analyze"—to have a recurring intelligence cycle to lead to successive operations to take down an enemy network is something that has been progressively transmitted from our national Special Operations Forces to our theater forces and progressively to our general purpose or conventional forces.

General Petraeus is working this problem with his J-2 very hard in Afghanistan and we're seeing results in that area.

I would add as well that we're providing additional capabilities in Afghanistan that we only had in very limited numbers in Iraq, for example, very persistent aerostats over all our conventional force positions to provide the kind of persistent surveillance that our forces need, particularly against improvised explosive devices.

There is still some work that needs to be done. If you compare the different organizations, national, Special Operations Forces, theater, and conventional forces, in their ability to rapidly exploit this kind of information, but the gap is narrowing.

When we used to describe a goal in the Department of trying to make conventional forces more special operations-like, we used to mean operating in small groups like special operators. Now we mean the ability to exploit intelligence across the cycle in the manner you described.

Chairman LEVIN. Thank you.

Dr. Vickers, General Petraeus in a recent interview discussed what he called the growing friction between local Taliban fighters living in Afghanistan and the Afghan Taliban leadership who phone in orders that the local insurgents should continue to fight against Afghan and coalition forces through the winter, while the leadership remains safely in the sanctuaries in Quetta and elsewhere in Pakistan.

According to General Petraeus, Taliban leadership is eager to keep up the fight through the winter because they know they've

suffered losses over the last year. He also said that we're seeing a degree of discord among the Afghan Taliban leaders and between them and the lower level fighters, and a level of discord that we have not seen in the past. Do you agree with General Petraeus' assessment that there is friction and discord between local Taliban fighters in Afghanistan and the Taliban leadership in Pakistan as the leadership phones in those orders while they keep safely somewhere else, and is this level of friction something that we've not seen in the past?

Dr. VICKERS. Yes, sir, I do agree with General Petraeus' assessment. I'd be happy to provide more detail in a classified session, but let me say now that this discord as operational commanders from Afghanistan go back to sanctuary in Pakistan for the winter has increased over the past year, particularly as the effects of the surge of forces the President ordered in December 2009 really began to be felt at the end of this past 2010 fighting season, from September to November.

The situation that General Petraeus was describing, where the Taliban senior leadership wants to continue the fight during the winter months—a lot of local commanders have been voting with their feet, essentially, and saying, "I've had enough of this," to the effects of our increasingly effective operations, but also because of multiple competing interests within the insurgency. The insurgency is not a monolithic group. A lot of fighters fight for very different reasons, including economic ones. So there's naturally a lot of frictions induced there. But the leadership-warrior divide is a big part of it.

Chairman LEVIN. Thank you.

Before I call on Senator McCain, let me just quickly mention that I hope we'll get a quorum here this morning, and when we do we will offer the committee budget to be approved.

I'm going to turn the gavel now over to Senator Reed and call upon Senator McCain.

Senator MCCAIN. Thank you, Mr. Chairman.

I want to thank the witnesses. Secretary Vickers, we've recently heard some rather guardedly optimistic assessments of the situation in Afghanistan. Do you agree with those assessments?

Dr. VICKERS. Yes, sir, I do.

Senator MCCAIN. The main problems still being corruption and Pakistan?

Dr. VICKERS. The strategic problem, sir, as you identified, are the continued presence of a sanctuary in Pakistan and then the governance challenge.

Senator MCCAIN. On the issue of Wikileaks, what's your understanding of the status of investigations into the cause of Wikileaks?

Dr. VICKERS. Sir, the Office of the Under Secretary of Defense for Intelligence has mainly been focused on assessing the damage, which they've done a very good job on, and remedial measures with our chief information officer in the lead. My understanding of the investigation is that it is ongoing, but that's about all I can say at this time.

Senator MCCAIN. I've been interested to hear some in the media and others say that Wikileaks was a good thing, and that it didn't

damage our national security or our ability to carry out our missions.

Yet isn't it true that in Wikileaks some individuals who were cooperating with us were identified?

Dr. VICKERS. Yes, sir, that is true.

Senator MCCAIN. That puts their lives in danger?

Dr. VICKERS. Yes, sir, it does.

Senator MCCAIN. I'm curious about your assessment of the damage that Wikileaks did to your abilities, and particularly in the area of getting people to cooperate with us in the vital aspect of human intelligence.

Dr. VICKERS. Sir, I think it's had implications from the foreign policy level about governments wanting to ensure that their confidential relationships with the United States are protected, down to operational issues, as you mentioned, of assets that would cooperate with us. Fortunately, we are able to attract the intelligence assets that we require to serve our policymakers and warriors, but the damage should not be understated and the Department has learned many lessons about how to prevent this from ever happening again.

Senator MCCAIN. But the damage especially has been on the operational level. If we disclose an ambassador's candid assessment of a foreign leader, that's one thing. But to have operations and individuals disclosed in my view—and more importantly, what is your view—this can be very damaging, and some local individual may think twice before agreeing to cooperate with us if that person's name is going to be publicized.

Dr. VICKERS. Yes, sir, that is exactly correct. As a former CIA operations officer, your first responsibility is to protect the security of those who would cooperate with the United States through tradecraft and proper information security, and they depend on us to do that.

Senator MCCAIN. Do you have a good sense of how former detainees are making their way back into the battlefield? I saw a news report this morning that another one was apparently killed, just reported today. Do you have a sense on how they're making their way back to the battlefield?

Dr. VICKERS. Sir, approximately 20 to 25 percent have made their way back in one form or another.

Senator MCCAIN. That we know of.

Dr. VICKERS. That we know of. Some of those have subsequently been killed or recaptured. Others are out there fighting against us as well. The routes that they take depend on the circumstances of their release. But needless to say, it's been in multiple countries and multiple routes, and I'd be happy to discuss that in more detail at a classified session.

Senator MCCAIN. You would agree it is a problem?

Dr. VICKERS. Yes, sir, it is.

Senator MCCAIN. Because now it seems to be a status symbol for those that return to the battlefield with their compatriots.

Dr. VICKERS. Yes, sir. That's a very good point, that some mid-level operatives have been elevated to leadership positions by this conferral of status.

Senator MCCAIN. Dr. Rooney, we intend to confirm you, and obviously I believe you're well-qualified, but you don't have a depth of experience with the men and women in the military. If I could suggest—and suggestions are a very cheap commodity around here—that you spend some time traveling around, not only to the bases here in the continental United States, but also our overseas bases and areas, if you can, even forward deployed, so to give you a better depth and understanding of the challenges, particularly of the repeated deployments that our men and women in the military have been making and the strain and stress that puts on their families, I hope you will do that as a very high priority.

Dr. ROONEY. Yes, sir. If confirmed, that would be an immediate priority.

Senator MCCAIN. Last year, in a contentious markup, this committee voted 15 to 12 to allow servicemembers, their dependents, and retirees to obtain privately paid abortions at military hospitals. Do you support the administration's position that abortions should be provided in military hospitals?

Dr. ROONEY. My position, sir, is to support the law and enforce the law. But I also understand that the abortions are voluntary, they would be outpatient services, and it's not mandatory that any physicians there actually perform the abortions, but it's making the health care available. I would comply to the law.

Senator MCCAIN. Thank you.

Senator REED [presiding]. Thank you, Senator McCain.

Senator Blumenthal.

Senator BLUMENTHAL. Thank you, Mr. Chairman.

I want to join both the chairman and Senator McCain in thanking you, Secretary Vickers, for your service in the past, very distinguished service, and thank you, Dr. Rooney, for undertaking this very challenging, but critically important, assignment.

Secretary Vickers, I'd like to ask about one of the answers that you gave in the advance policy questions about a very important area that I know has concerned the committee in the past regarding the sharing of information, raw intelligence data, where you observed in the past there have been cultural barriers to the full access to this information.

I wonder if you could please describe for the committee what steps you would take to increase the sharing and availability of this data to special operations personnel and others in the field who need it?

Dr. VICKERS. Yes, sir. As I indicated in my answers to the committee's advance policy questions, the Intelligence Community was raised throughout the Cold War on the principle of need-to-know, and increasingly in the war with al Qaeda and wars in Afghanistan and Iraq, the responsibility to share is imperative for our forces on the battlefield. That means not only sharing with our own forces, but in Afghanistan we have 49 nations fighting alongside us and sharing with them as well.

This requires technical solutions to the problem. Until recently in Afghanistan we had 26 different networks, that we're standardizing to facilitate the movement of information into a common network. But it also requires changes in the way we operate and what information can be provided at what level. Particularly, as Chair-

man Levin noted, some of the sensitive information we get in signals intelligence and others, that has typically been very compartmented, is critical on a time-sensitive basis to operators, both to kill or capture their adversary, but also to protect from attack.

We have been working that very hard. There is an inherent tension, however, between the responsibility to share and need-to-know that we always have to weigh to protect sources and methods from unauthorized disclosure, while making sure we get timely information in the hands of our warfighters.

Senator BLUMENTHAL. Do you feel that the barriers, as has been observed before, are still primarily cultural, or do you think there are procedural barriers that need to be overcome?

Dr. VICKERS. I think there's a mix, sir. I think some of it is cultural legacy, but others, as I said, are technical challenges, or also, as Chairman Levin noted earlier, having the intelligence structures to rapidly process and move the information. Not all elements of the force are equally equipped in that area and it's something we're working to address.

Senator BLUMENTHAL. Going to another line of questioning, I wonder if you could give us a more precise view about the extent of the discord and perhaps the magnitude of the phenomenon of these perhaps dissatisfied enemy combatants voting with their feet, as you have put it?

Dr. VICKERS. Sir, you mean those going back into combat?

Senator BLUMENTHAL. Exactly.

Dr. VICKERS. There are different perspectives on this, sir. Some are inherently repeat offenders, in the way that some portion of those from the criminal justice system do the same, particularly if they're going back into an area where they're surrounded by those engaged in terrorism, and there are certain ungoverned areas that they've made their way back to in Yemen, in Pakistan, that are very conducive to this. I wouldn't want to ascribe a single motivation, but looking at a number of these cases over the past several years and the recidivism, some have chosen a life of terrorism and their associates have.

In some cases it's a family business that we've seen, that a lot of relatives are all engaged in the same line of work. I think that creates a greater propensity for them to go back. It's hard to know a priori necessarily which ones will and won't.

There are those that we have very clear indications that would and therefore they're not released. But there are others that are in that grey ground that we need to do more to fix.

Senator BLUMENTHAL. Are there specific steps being contemplated to do more in that area, as you suggested?

Dr. VICKERS. Yes, sir. We have a Department of Justice-led initiative, with interagency participation, to review release of detainees at the highest levels or to transfer them to another country, and then we have task forces in the field working with local governments to review cases in the zones of armed conflict as well.

Senator BLUMENTHAL. Dr. Rooney, you may have seen recent reports about the very unfortunate and tragic perils of perhaps over-use of combinations of pharmaceutical drugs in treating young men and women coming back and suffering from post-traumatic stress and other psychological phenomena. Are you aware of these reports

and do you have thoughts about what can be done to address this problem?

Dr. ROONEY. Yes, sir, I am aware of the reports and the issue of particularly psychotropic drugs, whether it's on the military side or the civilian side, absolutely shares some common factors. I think the lesson that we're all learning is that—and I'm not a medical doctor—the use of drugs and not understanding the interactions of the drugs actually at times exacerbates the problem. I think we're getting a lot more intelligent about that. We're starting to get a lot more research about where those drugs are effective and where they're not, and also understanding that at times it's critical to link—sometimes our service people are going outside to civilian providers and then also having service inside the military, and we're not necessarily connecting and understanding the drugs that have been prescribed by both.

Because of that awareness, there is now much more emphasis on trying to destigmatize the treatment, so that we can have a coordinated basis of care. But it is an ongoing issue.

Senator BLUMENTHAL. Thank you very much. I thank you both for your answers and for your very distinguished service.

Thank you, Mr. Chairman.

Senator REED. Thank you very much, Senator Blumenthal.

Senator Ayotte.

Senator AYOTTE. Secretary Vickers, Dr. Rooney, I first of all want to commend both of you for your career histories. Secretary Vickers, thank you so much for your service to our country. You're both eminently qualified. I also want to commend your families and thank them for their support for both of you.

Secretary Vickers, I wanted to ask you again; you had cited a statistic in response to Senator McCain that 20 to 25 percent of the Guantanamo detainees have been released and have returned to the conflict. Is that the correct number?

Dr. VICKERS. Yes, ma'am. In the case of Guantanamo it's closer to 25 percent. Of the approximately 600 that have been released, about 150, we either know that they've returned or we strongly suspect that they've returned. In the case of other detainees that have been released on the battlefield, the number is between 20 and 25.

Senator AYOTTE. How is that fact informing release decisions going forward?

Dr. VICKERS. It has a strong impact on it, in the sense that remaining cases are scrutinized not just for recidivism, but also the ability in the case of third countries to continue to detain them if they're transferred. A lot of detainees can't be transferred because there's no assurance that they'll be properly detained and not released.

Part of the recidivism problem breaks down when they're transferred to another country and then they're quickly released. So part of it is, as I said, is looking at the transfer problem in itself.

In zones of hostilities, it may be local politics in some cases. Someone with connections is getting someone released and then again there's a high probability that they'll be recidivists, but the political system has intervened in the past. We've learned from this

experience and are trying to address it, but it's not a foolproof system.

Senator AYOTTE. Given the President's Executive order advocating for the closure of Guantanamo, if tomorrow we capture a high-value target in Pakistan or overseas, or perhaps someone you would deem a repeat offender, what are we doing with them?

Dr. VICKERS. The administration is in the final stages of establishing its detention policy. But there is a challenge with those picked up outside zones of hostilities. In zones of hostilities, in Afghanistan principally now, there are well-established procedures and mechanisms to detain them for the period as required. If a terrorist were picked up in Somalia, for example—one example of a very ungoverned space—that has been a vexing challenge for both administrations, I would add, both the Bush administration and the Obama administration, there's not an obvious solution that presents itself.

But the USD(I)'s responsibility in this is to work on the intelligence aspects and not the detainee policy. I would defer to my policy colleagues in the Under Secretary of Defense for Policy's Office of Detainee Affairs to address your question more fully.

Senator AYOTTE. Secretary Vickers, I fully appreciate that there are others that will have more direct impact on this. But given the breadth of experience that you have in this area and the vexing challenges that you've identified, what recommendations would you have to your colleagues in the administration on how we can best address this issue to make sure that if we capture a high-value target in one of these areas that we can make sure that we have the ability to interrogate that individual and also, if they present a continuing threat, that we can detain them?

Dr. VICKERS. On the interrogation side, the first step to extract intelligence, the administration has established a high-value interrogation group led by the Federal Bureau of Investigation, with participation from Defense and the CIA as well. That group has deployed several times and that mechanism should work well for interrogation and debriefing of detainees.

Options range from transferring to another country, provided human rights assurances and access to the detainee and others can be met. But given the problem that many countries are either incapable or unwilling of taking some of these detainees, we require some mechanism to be able to detain them ourselves. That again, others in the administration are working that very hard.

Senator AYOTTE. When we transfer to another country, Secretary Vickers, aren't we in a position in which we don't have full control over the situation, even if we get assurances from the country? The level of control we have is much less than if we had them, for example, in a Guantanamo-type facility?

Dr. VICKERS. Before we transfer anyone, we want assurances that, in a number of areas, as I said, if they need to be detained the country in question is capable of detaining them; if there is intelligence value to the detainee, that we would have access to that detainee. But countries are sovereign and we do our best to ensure that these conditions are met; they're not always met 100 percent in some of these areas. Again, that's part of the challenge.

Senator AYOTTE. How can Congress help with this issue, because it's obviously of deep concern if we are in a position where we capture a high-value target or a repeat offender and that person still remains a danger, or we need to have them in a position where we can gather important information from them?

Dr. VICKERS. It is critical to have the option of capturing for laws of war, but also for intelligence value as well. Again, this is something that my colleagues in the inter-agency and within DOD are working, and I'm sure they will come to Congress for help on this.

Senator AYOTTE. Thank you very much. I appreciate your answers today. Thank you, Dr. Rooney.

Senator REED. Thank you very much, Senator.

Senator Hagan.

Senator HAGAN. Thank you, Mr. Chairman.

I want to thank Secretary Vickers for your past service to our country; and, to Secretary Vickers and Dr. Rooney, thank you for your agreeing to be nominated to these positions and your willingness to serve. Also, kudos to the families and extended families. Thank you for being here and supporting these very well-qualified individuals.

I did want to ask, Secretary Vickers, when confirmed you will be responsible for implementing Secretary Gates' efficiency initiative as it relates to defense intelligence. In particular, you will need to downsize and consolidate the intelligence workforce and ensure that we avoid duplication of work among the respective intelligence agencies. What is your plan to address and implement this plan while still ensuring the timely development of actionable intelligence for our warfighters?

Dr. VICKERS. During the efficiencies process, the principal focus of eliminating redundancies was to look at Service, meaning Army, Navy, Air Force, Marine Corps intelligence organizations and those of the combatant commands. So we have developed an organization called Joint Intelligence Operations Centers (JIOC), that every combatant command has, and they've all grown rather large, in the thousands of staff.

We have developed a standardized model, after some experience now, that resulted in the major warfighting command, or Central Command, to have a large JIOC, as we describe it, and Pacific Command, which has a lot of challenges in its region, to also have a very large JIOC. But the other combatant commands have been reduced in some cases or had contractors eliminated to a more standardized model appropriate to their theaters, that is Africa Command, Southern Command, Northern Command, and European Command. There have been some savings in that area.

We've also consolidated missions. The counter-threat finance mission has been, on the intelligence side, assigned to the Defense Intelligence Agency (DIA), so this will develop more focused intelligence to support Treasury and other policymakers who have the lead in this area, but also eliminate some redundancies. We had a lot of counter-threat finance intelligence across the Department.

We've also done the same in counterterrorism intelligence in the Department in empowering our Joint Intelligence Task Force for Counterterrorism in DIA to be the lead.

I would add that we've reduced senior executive service ranks, contractors, and others. I would add that Secretary Gates has been very clear that these rounds of efficiencies are really the first step in looking at eliminating redundancy. Intelligence is increasingly important to our policymakers and to our operators, but it's also an area in which the American people and Congress invest a lot of treasure and we have to make sure it's as efficient as possible. If confirmed as USD(I), it's something that will be on the top list of my priorities.

Senator HAGAN. You've said that a lot of these efficiencies have taken place, but you'll also work to ensure that more efficiencies will go forward in these same areas?

Dr. VICKERS. Let me clarify, Senator Hagan. The decisions have been made to standardize these intelligence organizations. There is an implementation plan that will occur. But yes, additional efficiencies might well be sought. Senator Levin mentioned in his opening comments about intelligence, surveillance, and reconnaissance assets and Senator McCain as well, that we probably still have some homework to do down the road.

Right now we're trying to give all the support we can to our warfighters in Afghanistan, but over time we will rationalize those as we move forward.

Senator HAGAN. Obviously, we do want to support them in every fashion possible.

Deputy Secretary of Defense William Lynn has addressed the Department's cybersecurity strategy, which I understand involves five pillars: the first, recognition that cyberspace is a new domain of warfare; two, proactive defenses, avoiding a fortress mentality; three, ensure the safety of critical infrastructure; four, undertake collective defense; and five, sustained technological advantage.

Dr. Vickers, within these pillars, which do you see as the most challenging to facilitate, and why? Just the whole pillars of cybersecurity.

Dr. VICKERS. Let me say, cyber is an increasingly important domain of warfare or competition, used both for intelligence purposes as well as potentially destructive purposes or warfighting purposes. The U.S. Cyber Command is overseen by our Policy Under Secretary and the Chairman of the Joint Chiefs, while the Office of the Under Secretary of Defense for Intelligence really oversees the intelligence aspects of this.

But let me try to address your question in saying that the reason Cyber Command was established was because of the need to have a command for this emerging domain that is so important to our national economy and infrastructure, as well as our warfighting, but also someone to have an organization and a commander that had responsibility for both offense and defense, protecting our networks as well as potentially using this tool.

That integration of offense and defense I think will be very critical to our future, supported by appropriate intelligence in this new area.

Senator HAGAN. Thank you.

Dr. Rooney, let me ask you. When confirmed, you will play an integral role in implementing Secretary Gates' efficiencies initiatives also related to personnel, namely the Army and Marine Corps

end strength reductions, freeze in civilian hire, reduction in contractors in the administration of TRICARE. What do you believe will be the impact of these initiatives?

Dr. ROONEY. Yes, the efficiencies initiatives, as you've suggested, cut across many of the areas under personnel and readiness. The first one, from the human resource side, gives an opportunity to really take a look at that mixture of Active Duty, Reserve, civilian, and contractors, and looks at the roles, contractors and civilians, are playing in support services. Are some of those same programs still viable? Do they need to be administered differently? I think I've seen the term used, "good business practices," and that's really just another way of saying, "should we be doing the same thing, and if so should it be done maybe a little bit differently?"

That would be the personnel side and are there ways to cut some of those costs and combine, really assess, programs. If they're not working, then at that point they need to be eliminated and resources shifted to more critical, mission critical-type initiatives.

The health care side again is a myriad of possible initiatives, everything from a slight increase in the premiums, because that hasn't been changed since the mid-1990s, but also changing behaviors—prescription drugs, using mail order instead of the current system ends up saving a tremendous amount over the years. What we call supply chain, which is as you're purchasing, doing similar purchasing and look at how you're purchasing supplies for a hospital setting. You get great efficiencies in that. Contracting, another way that you can also look at your contracts, make sure you're getting not only the best prices, but coordination in those areas.

Then there's some other, longer-term initiatives that end up eventually impacting efficiency, and that would be looking at practice plans. Are there ways to use urgent care facilities so that we're not forcing people to go to emergency rooms? That's also an issue on the civilian side. So there are some opportunities there, and using primary care physicians differently in terms of practice focus, and then also those types of things I've seen also working in mental health areas. It would be those types of things, taking the current proposals and expanding on them.

Senator HAGAN. You certainly do have a full plate in front of you. I will say, please look at TRICARE. So many of the individuals are having trouble having TRICARE accepted in places that are outside the actual bases.

My time is up. Once again, I thank both of you for your commitment to our country. Thank you.

Senator REED. Thank you, Senator.

Senator Webb.

Senator WEBB. Thank you, Mr. Chairman.

Secretary Vickers, you're eminently qualified by virtue of your military background, your operational experience, your educational enhancement, and your policy experience. I think this is a great fit and I will be a very strong supporter and hope to be working with you on some of these issues in the near future.

Dr. Rooney, I congratulate you on a very strong career to date, particularly in the academic area, and your willingness to serve. At the same time, I would like to learn more from you about how you

have prepared yourself to take the experiences that you have had and apply them to this position. It's my understanding from reading your bio that you have not worked with DOD before; is that correct?

Dr. ROONEY. Yes, sir, that's correct.

Senator WEBB. This is an extremely important under secretaryship. I would like to point out that I recommended the creation of this position in 1985 in a memorandum to Caspar Weinberger. I'm not the only person who's ever recommended this position, but at the time when I was serving as Assistant Secretary of Defense, we had 11 different stovepipes moving up to the Secretary, which was not a healthy management model. Cap Weinberger's hesitation at the time was that it was going to consolidate so much of the responsibilities, the day-to-day responsibilities of DOD, under one office, and if you're going to do that, you need to make sure that the people at the top comprehend the special nature of military service and of DOD.

I'd like to point out, if I may—you may have come across this—that solutions in the military don't always compute on a traditional civilian model. There are a lot of different factors in military service and across the board. We have these situations in the acquisition side, too, as well, but particularly in the area of personnel.

Your nomination has come forward very fast. It was sent on February 4, which was a Friday, and we've had 11 days, most of which last week we weren't here. I have not had the opportunity to meet with you. I'm the chairman of the Personnel Subcommittee, which is the subcommittee that would have policy jurisdiction over the issues that you're working on.

Can you give me a better idea of how you have prepared yourself to understand the unique cultures that are involved in the United States military?

Dr. ROONEY. Yes, sir, I'd be happy to do that. I will step back a bit and say that when I went from being a business executive with a background in finance and tax law into higher education, my first presidency at a doctoral-level institution, I had never been a higher education administrator. I had taught for a number of years, but never ran a college or university. The way I assimilated into that culture was to be a perpetual student, which is what I would also propose here: learned really what happened in the institution and walk around, talk to people, listen, understand. It turned out to be very effective, to the point where I, prior to this, have been at my second presidency.

The same with hospitals. When I first started on a hospital board, quite frankly, the first meeting I sat in I didn't understand most of the acronyms that were put in front of me. Again, what I really did was took the time to study it, talk to the people, spend time in the traditional form, as they say, walk-around management.

As Senator McCain pointed out earlier, one of the first things I would do would be to continue what have been tremendous briefings, but they have certainly been briefings, sir, and material I've been able to read and get a handle on, to understand more clearly the military culture, but also that connection between the military members that this role would have responsibility for overseeing,

personnel and readiness, but also the civilian counterparts in many ways and how that system worked together, and the contractors.

I think it would be the breadth of understanding all of that, and I think my experience in the past shows that I can definitely make that transformation and dive in with that passion and that lifelong education focus, would enable me to prepare and be very effective for this role.

Senator WEBB. There are military cultures and there are cultures within the military cultures, and there are expectations that have evolved based on service in different eras, and they all affect the area that you are sitting here waiting to be confirmed on.

When I was the Assistant Secretary of Defense for Reserve Affairs, we had all 4 Active Services, all 7 Guard and Reserve components, plus political civilians and career civilians, and at any staff meeting we had at least 11 different cultural traditions among the uniformed people sitting at that table, with different relationships, quite frankly, with the overarching policies of DOD.

On issues of health care, you just mentioned the notion of increasing the premiums on TRICARE. Would you elaborate on that?

Dr. ROONEY. I mentioned that one of the efficiencies initiatives set out for us by the Secretary was a modest increase, and I believe that number was about \$5 per month, in the premiums, understanding that we have the duty and obligation to support our Service people—it's what we said from the beginning, that we would take care of our Service people—but on the other hand trying to find a balance of supporting that, but also doing it in a fiscally sound and sustainable manner. I would support the Secretary's position in looking at those modest increases.

Senator WEBB. Here's something you want to remember. As someone who grew up in the military, served in the military, have family members in the military, health care—lifetime health care for career military people—was part of a moral contract. I grew up inside that moral contract. On the one hand, if you're applying a civilian model to a DOD medical program, you can say, "well, if you compare a civilian health care plan, this is an incredibly good deal." On the other hand, these are people who have been told since the day they came into the military that they're going to have health care for the rest of their lives if they give a career to the U.S. military.

It's a moral contract. I'm the chairman of the subcommittee that's going to have to evaluate this proposal, and I hope you will pay strong attention to—again, this is the abstract nature of military service that doesn't come out when you try to compare a model directly with civilian programs.

There are a number of other areas like that. I'm going to ask you to do something. I'm going to ask you to come by and see me. I did not have the opportunity to talk to you, and we can discuss some of these things a bit more.

Dr. ROONEY. I would welcome the opportunity, sir.

Senator WEBB. Thank you, Mr. Chairman.

Senator REED. Thank you, Senator Webb.

I'm next in order, but let me recognize Senator Manchin.

Senator MANCHIN. Thank you, Mr. Chairman.

Let me too add to all of my colleagues, our thanks for your service, to both of you, and your willingness to serve. I think it's admirable.

Dr. Vickers, first with you. I've read your bio and I've learned a little bit about you and I like everything I see. Also, I'm new. With some of my colleagues, we're new to this committee, but we're also new to this process of evaluating where we are in the world, where we're going and how we get there in the most efficient manner. You seem to have been part of an Afghanistan movement back with the Soviet Union and what you were able to witness, what you were able to be a part of, to see an outcome, and to see how we dropped the ball. I think that was very well-documented.

We're in a situation now where, if you could for me identify who our enemy is in the Middle East, what the strength of our enemy is, what is the cost to our enemy, what they're financing their war with, and compared to what we as the United States Government and the people that are supporting our troops, which we will always do, and the comparison between what you saw in the outcome of the Soviet invasion of Afghanistan to where we are today, and the predicted outcome—it's the longest war we've ever been in and we're not seeing much change. If you could help me with that, sir, first, your evaluation, because I don't know of a better person that's had a bird's-eye view and can evaluate this than you.

Dr. VICKERS. Thank you, sir. As you alluded to, one of the tragedies at the end of the Cold War, one of the great tragedies, is that we, after winning the war in Afghanistan, driving the Red Army out, failed to win the peace and left a sanctuary in which al Qaeda could grow, in partnership with the Taliban, that then led to the events of September 11. Secretary Gates has said repeatedly that we will never make that mistake again.

As part of your second question—

Senator MANCHIN. I'm sorry to interrupt you on that, but if I could just ask for a further clarification. With that comment that Secretary Gates made and with the failure of before, of the Soviets, then what we're saying is that we need to have a presence, maybe a different type of a presence, but we will have to have a presence over there. The American people should understand, the citizens of this country should understand, we have to have a presence there.

Dr. VICKERS. What form that engagement takes, of course, will be determined based on conditions down the road. But unlike at the end of the Cold War, where we essentially disengaged from that region and allowed an ungoverned area to become very hostile to us and to provide a sanctuary for al Qaeda, it's something that we don't want to repeat. A core element of our counterterrorism policy is to deny any sanctuary to terrorists, so that they can't plan operations against the Homeland or our interests abroad.

You asked about the enemy. Unlike the Cold War, which was a very daunting time for Americans of a previous generation, but it had one virtue, that we had a principal adversary that we could focus on for a long period of time, and we got very good at that by the last decade of the Cold War. Today we face a more complex environment with a number of challenges around the world.

Foremost among those right now is the continued threat that violent extremism poses to us, and specifically al Qaeda. It's why the

President and his topmost advisors have said we are at war with al Qaeda, and that war spans a number of areas. Al Qaeda and its affiliates do not depend on great sums of financial strength to be able to plot against us in the manner they do. The September 11 attacks, for example, were carried out with approximately \$500,000 of investment.

Our Treasury Department, working with our interagency partners and partners around the world, does everything they can to constrict the flow of funds to al Qaeda and other terrorist and insurgent groups, and has had a significant success. But there are still funds flowing to various groups and, as I said, funding is not the critical resource that they depend on. It's willing people to do these attacks.

Senator MANCHIN. What's the strength of al Qaeda in Afghanistan?

Dr. VICKERS. Al Qaeda in Afghanistan is largely confined now to mid-level operatives, no senior operatives.

Senator MANCHIN. 10,000, 100,000?

Dr. VICKERS. No, sir. The Taliban insurgency is in the tens of thousands. Al Qaeda would be under 50,000 or so, 50,000 to 75,000, and that is on a part-time basis. Al Qaeda is principally concentrated elsewhere, in Pakistan and then its affiliates in Yemen and elsewhere.

Senator MANCHIN. We have how many troops in Afghanistan now?

Dr. VICKERS. We have just about 98,000 troops, just shy of 100,000, and 40,000-some of our coalition partners, and building up a substantial Afghan National Security Force (ANSF).

The principal challenge in Afghanistan is the Taliban which is still aligned with al Qaeda. They provided sanctuary to them in the past. It is adjacent to Pakistan, where al Qaeda's senior leadership resides currently. The President's stated goal is to disrupt, dismantle, and defeat al Qaeda and prevent their return to Afghanistan and Pakistan. So Pakistan and Afghanistan are an integrated strategy for the United States. Even though Afghanistan is not principally where al Qaeda is, it could become a future safe haven if we were to repeat the errors we made after the Cold War.

Senator MANCHIN. I think the hardest thing that I have to understand, I know the people in West Virginia have to understand, is the greatest army that history has ever known, the United States, and the greatest trained and equipped soldiers, we're at 100,000 and let's say that our enemy may be at 30,000 maximum, probably more 10,000 or 15,000, by every report that I'm receiving.

I've also read in your bio that you have a different type of a procedure that you think would have worked there, or maybe you still think that or not, by an unconventional type of war with your special operations. I think that it sounds very intriguing and it seems like we're not going in that direction.

Dr. VICKERS. Sir, every counterterrorism and counterinsurgency challenge has to be taken on its own merits and time. Ultimately, these are internal conflicts or transnational conflicts. We can't prevail in these wars without—in the counterterrorism case, it's a global challenge—a host of international partners. We simply couldn't do it by ourselves. In any intra-state conflict, in an insur-

gency, ultimately it's the locals that have to be able to secure their territory. Sometimes we have to create the time and space for them to be able to do that as we build them up.

After our great success in 2001 of overthrowing the Taliban and kicking al Qaeda out of Afghanistan, we unfortunately did not build up ANSFs to a sufficient level where they could gain control or stabilize their country and secure it. We are rapidly addressing that in the past few years.

Again, I would just caution that some of this is in the range of tactics specific to a portion in time, that may apply to one situation or one country and not another, or for this period of time and not a later period of time. But ultimately we have to empower locals to succeed.

Senator MANCHIN. Mr. Chairman, if I may very quickly just follow up.

If I may request that maybe I can meet with you personally and go into that in more detail, I would appreciate it very much, sir.

Dr. Rooney, just very quickly. I have heard and I know that Senator Webb had mentioned and talked about some concerns he may have. That would be a valid concern when you see the resume, but the bottom line is I also see your private sector experience, too. Would you consider yourself a cost-cutter or efficiency expert?

Dr. ROONEY. I think if you ask those that have worked with me, they'd probably say yes.

Senator MANCHIN. Thank you.

Senator REED. Thank you, Senator Manchin.

Let me take my time and then recognize Senator Ayotte for a second round and, Senator Blumenthal, if you also want a second round.

Secretary Vickers, Dr. Rooney, welcome. Thank you for your service. I've had the privilege to work with Secretary Vickers before. Thank you very much.

First of all, because of your extensive experience in your field of endeavor, if there's anything that you feel would be best held to comment on in a private, nonpublic session, let me know. Don't feel obliged to answer. But one question I think is obvious in the wake of the last several days. We have cooperated and collaborated with intelligence services throughout the Maghreb—Tunisia, Algeria, Egypt, et cetera. What's your estimate of the status today of that cooperation going forward? Would that impose any complications on efforts under your jurisdiction?

Dr. VICKERS. Sir, the U.S. Government has intelligence relationships with scores of partners around the world, many scores of partners, including in North Africa and the Middle East. Each of those relationships is important in some right, but they vary in terms of the depth of intelligence sharing and the particular threat that emanates from that country. I would hesitate in this open session to give a general answer, other than it's very important.

A number of al Qaeda plots are broken up every year and they are done by our local partners with intelligence assistance in some cases from us, in some cases intelligence provided by them. Our relationships with some of these countries that have had instability in recent weeks, we've had longstanding ties with them that will transcend this instability, both on the military side and on the ci-

vilian intelligence side. Sir, I'd be happy to talk to you about it in greater detail.

Senator REED. Let me open up another topic, which Senator Hagan alluded to. That's cyber security. History often suggests that we fight the last war and prepare for the last war. I think we all recognize now that, even in the context of low-intensity conflict, that cyber activities are becoming increasingly more important. Let me pose some issues.

How well do you think we're prepared for it, its coming, to what are the gaps, technological, institutional, and even legal gaps, in terms of your ability to actually deal with this new technology?

Dr. VICKERS. Sir, it is critically important and it's a domain that, as you indicated, is employed by both state and non-state actors in both forms of conflict, both for intelligence purposes as well as disruption and others. Cyber poses a number of challenges because it is inherently a global enterprise, so a lot of cyber traffic, of course, comes through the United States, which previous Congresses have addressed, which has been a tremendous help to U.S. intelligence.

I would be guilty of practicing law without a license if I go too far—

Senator REED. You wouldn't be the first here. [Laughter.]

Dr. VICKERS. But in some cases it raises questions when the web site or server, for example, raises neutrality questions in law, of where that site is located. So it poses a number of unique challenges for us.

Then of course, there's always intelligence gain-loss when we look at operations in these areas. Is it better to monitor someone or take down? There's always very difficult decisions for policymakers to weigh in that area as well.

Senator REED. I think this is again a topic that will consume us, indeed consume us going forward.

Dr. Rooney, you've had an extraordinarily accomplished career. My colleagues with more experience have commented on the unique culture of the military, and it is unique. But my sense is that you have associated yourself and worked with people who share some of the same attributes as our military. They have vocations, not just jobs; and they're dedicated to selfless service, not just to personal ambition. I think in your service and your association you have those, so I think those might be touchstones going forward as you begin this job and I think they will be valuable touchstones.

But let me ask two basic questions. You have a myriad of responsibilities, from the immediate you've spoken about, but there's one that's continuing, and that is to try to integrate not just the operations within DOD, but DOD and the Department of Veterans Affairs (VA). I know VA Secretary Shinseki has been working very diligently on this.

We have problems where soldiers, sailors, marines, and airmen are injured and then they had disability determinations and then they're transferred to the VA system and there's no continuity of care. Just whatever impressions you have today of how you're going to deal with more fully integrating what the VA does for our veterans with what DOD does for Active Duty and Reserve personnel?

Dr. ROONEY. Yes, sir. While I have not been able to have an entire deep dive, what I can say is what I've learned is you're absolutely correct that the timing—even with the new integrated system—there is the first phase of that's been put in; there's two more phases throughout this year. My understanding is that will proceed on the timeline outlined. But those timeframes are still approaching just under a year, 340 days, I think was the last I saw.

I think any of us sitting here, while we might not know what the exact answer is, if you're looking for those services a day is too long, a week is too long. There are clearly some opportunities where better coordination and being able to understand where that process is bogging down. My understanding is it's in three different areas. What can be done to ensure much better communication and cooperation, building on—yes, a technology infrastructure is one way, so you don't duplicate services, but it's not the only answer at this point.

I concur that what I've seen really points out some improvement, but a dramatic need for some further coordination between all areas.

Senator REED. Thank you.

One other area. Under the new financial reform legislation, we have created a Consumer Financial Protection Bureau, and within that Bureau, there is an Office of Servicemember Affairs. In fact, Holly Petraeus is leading that up. I'm sure you will, but I urge you to ensure you link up, because some of the problems that military personnel face in terms of paying bills, in terms of getting appropriate resolution of their rights under the Servicemembers Civil Relief Act is a function not only of DOD, but this new bureau. A lot of what you can do and will do through the Services is educating young military personnel about their rights and their responsibilities. That's just some advice as you, I assume, prepare to take these responsibilities.

Dr. ROONEY. Thank you, sir. If confirmed, I will.

Senator REED. Thank you very much, doctor.

Dr. ROONEY. Thank you.

Senator REED. Senator Ayotte.

Senator AYOTTE. Thank you, Mr. Chairman.

Dr. Rooney, you were talking with Senator Webb about the health care system within the military and he mentioned to you the moral obligation that we have to the military. Appreciating that we're in a fiscal climate where we do need to look to do things differently, there are still some unmet needs. In my State of New Hampshire, we have approximately the fifth or seventh highest per capita rate of veterans in the country. Yet, effectively we're the only State in the Nation that does not have a full-service veterans hospital. Alaska is similarly situated, but there is an Active Duty military base in Alaska where there is full service available.

I would ask you for a commitment to work with me to look at that need and to come up with a solution so that the needs of veterans in New Hampshire are met, and particularly since we have more and more deploying as well in the Guard and becoming veterans and serving our country.

I would ask you to look at that very carefully, because it is a moral obligation that we have to fulfill and, unfortunately, my

State is one where I don't believe that moral obligation is being fully met.

Dr. ROONEY. Absolutely. If confirmed, I would look forward to that.

Senator AYOTTE. Thank you very much.

The other question I have for you, we had talked briefly yesterday about this, but given the multiple deployments of our Guard and Reserve, what is it that you think that we can do to ensure that when our Guard and Reserve deploy and also when they return home that the services are in place to make sure that as they return to civilian life, both they and their families are getting the services that they need? Because with the multiple deployments in the Active Duty, there is usually a base where there is a much more robust set of programs available than in the Guard and Reserve. Yet we've asked so much of our Guard and Reserve with these deployments.

I would ask you what thoughts you have on that to make sure that we are serving our Guard and Reserve and so when they come home that they can acclimate back into civilian life and we give them that support that they deserve?

Dr. ROONEY. You're right. I'm glad we had a brief opportunity to have that conversation. But really, the issue does come that this is the first time where we have relied on the Guard and Reserve and their families to the extent that we have with multiple deployments. One of the factors I think everyone is recognizing now is when these people go home it isn't to a base. They're scattering throughout their States, they're scattering throughout the country.

The Department has not always been acutely aware of how to connect those people to services. At times—and we talked about it—there are some good examples where private sector nonprofits are brought in to be able to cover that. But that's not uniform across the country. So it would be a combination of looking at some of those States and those areas where those services are being connected better and seeing ways to do that across the country.

The other thing would be to close some gaps, where there are benefits being given to Active Duty, but yet there's some that slip through for education, potentially, to make sure that those again extend to employers; to see how again that reentry process can be either streamlined and also involve the employers in that. Again, it's uniformity across the country, but there are some good examples out there to build on.

Senator AYOTTE. Very good. I appreciate that, and also would point you to a New Hampshire program called the deployment cycle support program that is a partnership between State agencies and also the private sector, as a pilot or one that you could look to, that I think is very effective and one that other States could employ as well.

Dr. ROONEY. Absolutely.

Senator AYOTTE. Secretary Vickers, we had testimony in February from General Austin and Ambassador Jeffrey about Iraq and our withdrawal from Iraq in December. I wanted to get your assessment, the other day I saw a report of another terrorist incident in Iraq. My question to you is, do you have any concerns about our ability to transfer security as of December to the Iraqis? Also, we're

going to leave a significant responsibility to protect our own people with the State Department, without the military support. What thoughts do you have on that?

Dr. VICKERS. I am confident that we're on the path toward this transition. There will be a robust civilian mission—as Iraq becomes a normal country, there will still be a large diplomatic mission, with military assistance, intelligence, a range of things to ensure that any threats to the stability of Iraq or threats external there are properly dealt with through our Iraqi partners.

That transition has already been well underway since August 2010 on a path to the end of 2011, and I have no reason to expect that it won't succeed. There is still violence in Iraq, but it is at very low levels compared to what it has been. Some of these attacks of course make news and they will continue to be a challenge for Iraq going forward, but it's something I have high confidence that the Iraqis can handle.

Senator AYOTTE. Thank you, Mr. Secretary.

Senator REED. Senator Blumenthal.

Senator BLUMENTHAL. Thank you, Mr. Chairman.

Just a couple of quick questions. First, to pursue the very significant questions asked by Senator Reed, and more comment on them than question. If there are any legal impediments to your efforts in this cyber area, I would very much like to know about them and I hope that you will suggest them, because I think, as Senator Reed very importantly observed, this is the next war or it may be even the present war, and if there's anything that you need in that area, meaning you collectively, DOD, our defense efforts, I would appreciate your letting us know.

Then to pursue an answer that you gave to Senator McCain. He asked about the corruption in Pakistan, which you very adroitly referred to as a governance challenge. Do we face the same kind of governance challenge in Afghanistan and, if so, to what extent, and what are we doing about it?

Dr. VICKERS. Yes, sir. In any counterinsurgency, governance and development are essential lines of operation as much as security. Ultimately, of course, it's up to the people of a nation to determine how they'll be governed. Afghanistan's history has been one essentially of decentralized government, a central state that does some functions, but then the provinces and local areas have a lot of autonomy. When Afghanistan has been stable throughout its history, it's been with that model.

The challenge is to make sure that there is governance that first and foremost meets the needs of the Afghan people, but, second, also does not undermine the international coalition's effort through corruption or other areas in providing assistance to the Government of Afghanistan. So governance is a central challenge in stability and it is in Afghanistan as it is in many countries around the world. But in Afghanistan, of course, we have 100,000 troops and so we care very dearly about it.

Senator BLUMENTHAL. Thank you.

Dr. Rooney, just very briefly. You may be aware that in the past there have been difficulties in some of the treatment of our National Guard and our reservists in terms of recognizing that they have become in effect part of our Active-Duty Force and the failure

to recognize that service in educational benefits and sometimes health care has been a problem. I've observed it in Connecticut, and I would appreciate your commitment that you will do everything possible to make sure that they are given the recognition they deserve in terms of those benefits and fair treatment and keeping faith with them.

Dr. ROONEY. Absolutely, sir.

Senator BLUMENTHAL. Thank you.

Thank you, Mr. Chairman.

Senator REED. Thank you very much, Senator Blumenthal.

I want to thank Secretary Vickers and Dr. Rooney for your testimony today and, on behalf of Chairman Levin and the Ranking Member, Senator McCain, for your service and your prospective service.

If there are no further questions, the hearing is adjourned.

[Whereupon, at 11:11 a.m., the committee adjourned.]

[Prepared questions submitted to Hon. Michael G. Vickers by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense (DOD) Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. The Goldwater-Nichols DOD Reorganization Act of 1986 and the Special Operations reforms have endured for a generation. I do not see a need for any modifications at this time. If confirmed as the Under Secretary of Defense for Intelligence (USD(I)), I will be alert to the need for any modifications.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. N/A.

DUTIES

Question. What is your understanding of the duties and functions of the USD(I)?

Answer. The USD(I)'s primary responsibility is to support the Secretary of Defense in discharging his intelligence-related responsibilities and authorities under title 10 and title 50 U.S.C. This includes: serving as the principal intelligence advisor to the Secretary of Defense; exercising authority, direction, and control on behalf of the Secretary of Defense over all intelligence organizations within the Department of Defense (DOD); ensuring that intelligence organizations in DOD are manned, organized, trained, and equipped to support the missions of the Department; ensuring that the DOD components, which are also elements of the Intelligence Community, are responsive to the Director of National Intelligence (DNI) in the execution of the DNI's authorities; ensuring that the combatant forces, the Joint Chiefs of Staff, and the civilian leadership of the Department are provided with appropriate intelligence support; ensuring that counterintelligence activities in the Department are conducted and managed efficiently and effectively; ensuring that other sensitive activities which the Department conducts or supports are conducted and managed efficiently and effectively; overseeing Defense Department personnel, facility, and industrial security to ensure efficiency and effectiveness; serving as the Program Executive for the Military Intelligence Program, and ensuring that the DOD components funded by the National Intelligence Program are robust, balanced, and in compliance with the guidance and direction of the DNI; and ensuring that the Department provides the U.S. Congress with intelligence-related information sufficient to execute its oversight responsibilities.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. If confirmed, I believe I have the background and experience to perform the duties of the USD(I). My qualifications include: my training, operational experience, duties, and accomplishments as a Special Forces soldier and officer, Central Intelligence Agency (CIA) Operations Officer, and Assistant Secretary of Defense for Special Operations, Low Intensity Conflict and Interdependent Capabilities (ASD(SO/LIC&IC)); my experience as a producer and consumer of intelligence at both the tactical/operational and national levels; my experience executing and overseeing clandestine operations and covert action programs; and my regular interaction and close relationships with the Office of the USD(I), the leadership of the U.S. Intelligence Community, and the leadership of several key foreign intelligence services.

For the past 3½ years as ASD(SO/LIC&IC), I have had responsibility for overseeing the global operations of DOD, including the war with al Qaeda, the wars in Afghanistan and Iraq, and sensitive counterproliferation and counternarcotics operations. I have had responsibility for overseeing a wide-range of intelligence operations, spanning the full range of intelligence priorities and capabilities, and have had responsibility for overseeing and supporting the full-range of special activities conducted by other agencies of the U.S. Government. As a member of the Deputy's Advisory Working Group, I have participated in the major resource allocation decisions of the Department, including many involving national and military intelligence. I have had access to all of the Department's special access programs.

As a senior policy official, I have participated extensively in Deputies' Committee Meetings, and occasionally, Principals' Committee Meetings and meetings of the National Security Council chaired by the President, and through this experience, I have developed a keen appreciation for how intelligence supports policy. As a result of my oversight of global operations and the operational capabilities of the Department, I have developed a deep understanding of intelligence-driven operations and the Department's intelligence capabilities, including those in the cyber domain.

I am a graduate of the CIA's Career Training Program and a CIA-certified Operations Officer. I have served operationally in three CIA Divisions: Latin America, Special Activities, and Near East and South Asia. I have had extensive interaction and have a close relationship with the Director and Deputy Directors of the CIA, as well as the Chiefs of CIA Centers, Divisions, Offices, and Stations and Bases. I have had extensive interaction and have a close relationship with the DNI and the staff and components of Office of the Director of National Intelligence (ODNI). I have had extensive interaction with and have a deep understanding of the intelligence organizations of DOD. I have had frequent interaction and have close relationships with the heads of several foreign intelligence services.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the USD(I)?

Answer. If confirmed, I believe there are actions I would need to take to strengthen OUSD(I)'s oversight of the military intelligence program and clandestine activities and support for the national intelligence program. I also believe there are actions I could take that could achieve further efficiencies across the Defense Intelligence Enterprise.

Question. Assuming you are confirmed, what duties and functions do you expect that the Secretary of Defense would prescribe for you?

Answer. If confirmed, I believe the Secretary would expect me to discharge the duties and functions—both explicit and implicit—as outlined above. I believe the Secretary would expect me to ensure full intelligence support for ongoing operations; to ensure that intelligence operations conducted by DOD are effective and in compliance with all relevant statutes, authorities, directives, and policies; to ensure that the Defense Intelligence Enterprise is postured to prevent strategic surprise; to ensure, without abrogating the Secretary's statutory responsibilities, that the DNI has visibility and oversight over the full range of intelligence activities in the Department; and to ensure that the Defense Intelligence Enterprise is as efficient as possible. The Secretary may also assign me other duties as his priorities and my background and experience warrant.

RELATIONSHIPS

Question. The Secretary of Defense.

Answer. If confirmed as USD(I), I will provide my full support to the Secretary of Defense in carrying out my duties as his principal advisor on intelligence, counterintelligence, and security. I will keep him informed, seek his guidance and direction, exercise his oversight authority on intelligence, counterintelligence, and secu-

rity-related matters throughout the Department, and attempt to relieve him of as many burdens in the intelligence domain as possible.

Question. The Deputy Secretary of Defense.

Answer. If confirmed as USD(I), I will keep the Deputy Secretary fully informed of my activities and will afford him the same support provided the Secretary of Defense.

Question. The Under Secretaries of Defense.

Answer. Each of the Under Secretaries has vital functions to carry out. If confirmed as USD(I), I will work closely with each of them. A close relationship between the Under Secretary of Defense for Policy and the USD(I) is particularly important. In my current position as ASD(SO/LIC&IC), I have worked to forge a close relationship between Defense Policy and Defense Intelligence and between Policy and the broader Intelligence Community. I have also worked closely with components of the IC on major collection systems. If confirmed as USD(I), I would continue to build on these relationships.

Question. The Assistant Secretary of Defense for Network and Information Integration (ASD(NII))/Successor Organization.

Answer. ASD(NII) has had oversight of enabling capabilities which are central to the conduct of intelligence and security-related activities. If confirmed, I will work closely with the successor organization to ASD(NII) to ensure that this support remains robust.

Question. The Deputy Assistant Secretary of Defense for Detainee Policy.

Answer. If confirmed, I will work closely with the DASD for Detainee Policy on the intelligence aspects of detainee policy and operations.

Question. The Assistant Secretary of Defense for Special Operations/Low Intensity Conflict & Interdependent Capabilities (ASD(SO/LIC&IC)).

Answer. USD(I) and the ASD(SO/LIC&IC) interact on several important matters, and this interaction has grown substantially during my tenure ASD(SO/LIC&IC). As the previous ASD(SO/LIC&IC), I will be well-placed, if confirmed, to ensure that this close interaction continues. If confirmed, I would seek to further expand the already close relationships that exist between Defense Intelligence and Special Operations Forces (SOF) and between the broader Intelligence Community and SOF.

Question. The Service Secretaries and the Service Intelligence Directors.

Answer. If confirmed as USD(I), as the Program Executive for the Military Intelligence Program, I will work with the Secretaries of the Military Departments and the Service Intelligence Directors to ensure their intelligence requirements are met, that the Military Departments and Services develop intelligence capabilities appropriate for the current and future security environment, and that the intelligence organizations contribute to meeting the intelligence needs of their respective Military Department/Service, the Joint Force, the Department, and the Nation.

Question. The General Counsel of DOD.

Answer. As ASD(SO/LIC&IC), I have worked very closely with the General Counsel and his staff. If confirmed as USD(I), I will continue to work closely with the General Counsel, and seek his advice on the myriad legal issues that impact USD(I)'s duties and functions.

Question. The Chairman and Vice Chairman of the Joint Chiefs of Staff.

Answer. As ASD(SO/LIC&IC), I have worked closely with the Chairman and Vice Chairman of the Joint Chiefs of Staff on a wide range of issues. If confirmed as USD(I), I would continue this close relationship to ensure that Defense Intelligence and the Intelligence Community meet the requirements of the Joint Staff and combatant commands.

Question. The commanders of the combatant commands, including U.S. Special Operations Command (SOCOM) and U.S. Cyber Command.

Answer. As ASD(SO/LIC&IC), I have had policy oversight of SOCOM, U.S. Strategic Command, U.S. Joint Forces Command, and U.S. Transportation Command. I was involved in the initial planning for the establishment of U.S. Cyber Command. I have had close relationships with all of the geographic combatant commanders. If confirmed as USD(I), I will build on these relationships to ensure that the intelligence needs of the commanders of the combatant commands are met.

Question. The Directors of the Defense intelligence agencies.

Answer. As ASD(SO/LIC&IC), I have worked closely with the Directors of the Defense intelligence agencies. If confirmed as USD(I), I will exercise the Secretary of Defense's authority, direction, and control over the National Security Agency (NSA), NGA, NRO, and DIA. In this capacity, I will provide planning, policy, and strategic oversight over the intelligence, counterintelligence, and security policy, plans, and programs they execute. I will work with the Office of the DNI to ensure clear and unambiguous guidance is provided to the Defense intelligence agencies.

Question. The Director of National Intelligence.

Answer. As ASD(SO/LIC&IC), I have worked closely with the Office of the DNI and its components, and have worked closely with the Director. If confirmed as USD(I), I intend to fully support the DNI in his goal of greater Intelligence Community integration. Dual-hatted as the DNI's Director of Defense Intelligence, if confirmed, I will advise the DNI on Defense intelligence capabilities. I will exercise the Secretary of Defense's authority, direction, and control over the Directors of NSA, NGA, NRO and DIA, and I will consult with the DNI regarding national intelligence and related matters as appropriate.

Question. The Director of Central Intelligence.

Answer. As ASD(SO/LIC&IC), I have worked to forge a particularly close relationship between the CIA and the Department. If confirmed as USD(I), I will strive to forge an even closer relationship with the Director of CIA, and will fully support him in his role as National Manager for Human Intelligence.

Question. The Director of the National Counterterrorism Center.

Answer. As ASD(SO/LIC&IC), I have worked very closely with the Director of the National Counterterrorism Center. If confirmed as USD(I), I will build on this already close relationship, and provide policy, oversight, and guidance for all Defense intelligence, counterintelligence, and security support provided to the National Counterterrorism Center.

Question. The Deputy and Assistant Directors of National Intelligence.

Answer. If confirmed as USD(I), I will fully support the Deputy and Assistant Directors of National Intelligence to ensure unity of effort in the direction and oversight of the Defense Intelligence Enterprise.

Question. Officials in the Department of Homeland Security with intelligence responsibilities.

Answer. If confirmed as USD(I), I will serve as the Secretary of Defense's focal point for intelligence, counterintelligence, and security matters for the Department of Homeland Security (DHS). I will work with DHS to expand our intelligence and law enforcement information-sharing initiatives with state and local authorities.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the USD(I)?

Answer. The major challenges that, in my view, will confront the next USD(I) are the continued unprecedented scope and pace of global operations and unmet demand for intelligence in an era of intelligence-driven operations; the need to adapt to a rapidly changing intelligence environment; the need to address longer-term challenges to prevent strategic surprise while fully supporting ongoing operations; and the need to do all this in a more constrained fiscal environment. Additionally, we must do a better job of protecting intelligence sources and methods and preventing unauthorized disclosure of information.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If I am confirmed, given the importance of intelligence to ongoing operations, I would do my best to ensure that sufficient resources are devoted to the Defense Intelligence Enterprise, and that intelligence is shared as widely as possible while also ensuring that it is properly protected. I would also ensure that the clear priorities are established, that actions are taken to mitigate strategic risk, and that the Defense Intelligence Enterprise is as efficient and adaptive as possible.

Question. What do you anticipate will be the most serious problems in the performance of the functions of the USD(I)?

Answer. One of the most serious problems currently confronting the USD(I) is the unauthorized disclosure of classified information. The spate of unauthorized disclosures of very sensitive information places our forces, our military operations, and our foreign relations at risk. It threatens to undermine senior leaders' confidence in the confidentiality of their deliberations, and the confidence our foreign partners have that classified information they share with us will be protected.

Question. If confirmed, what management actions and time lines would you establish to address these problems?

Answer. The Office of the USD(I) (OUSD(I)) recently led a comprehensive review of information security policy. If confirmed, I will work with the DOD Chief Information Officer to facilitate immediate implementation of the review's recommendations, as appropriate, and will take additional actions as required.

PRIORITIES

Question. As ASD(SO/LIC&IC), you were quoted as saying: "I spend about 95 percent of my time on operations" leaving the rest of your time for "Service Secretary-

like” activities including policy, personnel, organizational, and development and acquisition decisions impacting Special Operations Forces.

Do you believe that division of time was appropriate in your position as ASD(SO/LIC&IC)?

Answer. I have been assigned a very broad set of responsibilities during my tenure as ASD(SO/LIC&IC). Per the statutory obligations of ASD(SO/LIC&IC), I have oversight of Special Operations Forces. I also serve as the Secretary’s principal advisor on Irregular Warfare matters across the Department. I help provide oversight of the Department’s global operations, including the war with al Qaeda and its affiliates and the wars in Afghanistan and Iraq, and have shared oversight of the Department’s clandestine operations and sensitive activities, including several which have involved the collection of intelligence. I have regularly participated in the national security policy decisionmaking process at Deputies’ Committee meetings, and serve as the Secretary’s principal advisor on special activities conducted by other agencies of the U.S. Government. In my Interdependent Capabilities role, I have had oversight of the Department’s strategic and conventional forces, in addition to the Department’s Special Operations Forces. I also help oversee the Department’s special access programs. I have oversight of the Department counternarcotics and counterthreat finance activities, stability operations, partnership strategy, and humanitarian assistance and disaster relief, and was recently assigned responsibility for overseeing additional aspects of the Department’s information operations (IO).

The time I have personally devoted to each of these areas has varied, consistent with their importance to the Department’s mission and the degree to which I could delegate oversight to my Principal Deputy. During the first 18 months of my tenure, I spent substantial amounts of time on capability and resource allocation decisions across strategic, conventional, and Special Operations Forces. During the 2009–2010 Quadrennial Defense Review, I focused intensely on the Special Operations and Irregular Warfare capabilities of the Department. The unprecedented scale and scope of operations in which U.S. forces are involved, and the strategic importance of and oversight required for sensitive activities conducted by the United States have required increasing amounts of my time since mid-2008. With the war with al Qaeda and its affiliates, the war in Afghanistan, and other sensitive operations for which I have oversight responsibilities, the preponderance of my time in 2010 has been devoted to oversight of operations. This has been in line with the President’s and Secretary’s priorities. Throughout my tenure as ASD(SO/LIC&IC), blessed with my exceptionally capable and willing partner in Admiral Eric Olson, I believe that I have provided the strong oversight of and advocacy for Special Operations Forces that Congress intended when it established the position of ASD(SO/LIC). I likewise believe I have been effective in fulfilling my duties across my entire portfolio. Accordingly, I believe that the allocation of my time has been appropriate.

Question. How would you anticipate dividing your time as the USD(I)?

Answer. Although there is some overlap, the duties and functions assigned to USD(I) are very different from those I currently have as ASD(SO/LIC&IC). That said, if confirmed, I would use a similar approach to allocating my time: focusing on the President’s and Secretary’s top priorities and on the most difficult challenges, and delegating other responsibilities where I can to my Principal Deputy or other senior staff. I would anticipate dividing my time broadly between oversight of intelligence operations, the development of intelligence capabilities, and other duties as the Secretary and the DNI may assign.

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the USD(I)?

Answer. If confirmed as USD(I), I would establish the following broad priorities: (1) ensuring that the full weight of Defense intelligence capabilities are brought to bear to achieve the President’s objective of disrupting, dismantling, and defeating al Qaeda, creating and sustaining stability in Afghanistan, Pakistan, and Iraq, and supporting other ongoing operations in which the Department is engaged or may be engaged; (2) ensuring that intelligence operations conducted by DOD are effective and in compliance with all relevant statutes, authorities, directives, and policies; (3) ensuring that the Defense Intelligence Enterprise is postured to prevent strategic surprise and fully exploit emerging opportunities; and (4) ensuring that the Defense Intelligence Enterprise is as efficient as possible. I would expect to pay particular attention to ensuring that we have the right collection and analytical priorities, that we have a robust ISR architecture (both space and airborne), today and in the future, that the Department’s clandestine operations are fully integrated with those of the CIA and National Clandestine Service, that the President’s highest priority intelligence programs are fully resourced, that analysis addresses policymakers and operational commanders’ needs, that intelligence is timely, accessible, and protected,

and, where appropriate, that we aggressively exploit advances in technology to improve our intelligence capabilities.

COMBATING TERRORISM

Question. What is your understanding and assessment of the Department's comprehensive strategy for combating terrorism (CT), both at home and abroad?

Answer. The Department's counterterrorism strategy directly supports the President's stated goal to disrupt, dismantle, and defeat al Qaeda and its affiliates, first operationally and regionally, and then strategically and globally. Operationally defeating al Qaeda and its affiliates requires actions that render the organization incapable of planning and conducting attacks. Doing this requires, among other things, that the relationship between al Qaeda and groups that support al Qaeda and provide it sanctuary be severed. Strategically defeating al Qaeda requires preventing al Qaeda's resurgence. Achieving these aims requires a sustained global CT campaign involving several mutually reinforcing direct and indirect lines of operation. These include preventing the acquisition and use of weapons of mass destruction by terrorist groups, conducting operations to disrupt, dismantle, and defeat terrorist organizations and deny them sanctuary, building the capacity of our partners, and countering radicalization. Within zones of hostilities, the Department has a lead role, along with our international partners. Outside such zones and those areas where named operations authorized by the President are being conducted, the Department plays a supporting role. While al Qaeda and its affiliates remain the most dangerous threat to the United States, my assessment is that we—the Department, the U.S. Government, and our international partners—have the correct strategy, and it is increasingly working, particularly since mid-2008.

Question. If confirmed, how would you fulfill your responsibilities related to combating terrorism?

Answer. If confirmed, I will build on the work of my predecessors to ensure that the Defense Intelligence Enterprise is fully engaged and supportive of all efforts to defeat al Qaeda and combat terrorism. I will work closely with the Military Departments and Services, the Defense intelligence agencies, the combatant commanders, the Intelligence Community, and our international partners to ensure that we have the intelligence capabilities we need to achieve our CT objectives.

Question. How can the Department best structure itself to ensure that all forms of terrorism are effectively confronted?

Answer. During my tenure as the ASD(SO/LIC&IC), it has become increasingly clear to me that close collaboration among U.S. departments and agencies and with our international partners is essential to CT success. Within DOD, we have restructured our organization to ensure full interagency contributions to the fight, through the establishment, for example, of Joint Interagency Task Forces (JIATF). We have forged an extremely close operational partnership with CIA and the Intelligence Community, and we have substantially strengthened our international capacity building efforts. We have also given top priority to the rapid development of CT and counterinsurgency (COIN) capabilities. I believe these actions posture the Department to effectively combat terrorism.

Question. Are there steps the Department should take to better coordinate its efforts to combat terrorism with those of other Federal agencies?

Answer. During my tenure as ASD(SO/LIC&IC), we have worked hard to achieve unity of effort in CT operations across the U.S. national and homeland security establishment. This has included significant efforts to improve coordination of operations and interagency concurrence. If confirmed as USD(I), I would seek to build on this by moving, for example, from coordination of intelligence operations to integration.

SECTION 1208 OPERATIONS

Question. As ASD(SO/LIC&IC), you had oversight of all section 1208 activities by Special Operations Forces to provide support (including training, funding, and equipment) to foreign regular forces, irregular forces, and individuals supporting or facilitating military operations to combat terrorism.

What is your assessment of this authority?

Answer. Since its enactment in 2005, Section 1208 has been a critical authority for the war with al Qaeda and for counterterrorism and related COIN operations in Iraq and Afghanistan. While the specific details of Section 1208 use are classified, it has enabled important human intelligence operations, operational preparation of the environment, advance force operations, unconventional warfare operations, and partnered CT operations.

Question. Do you believe changes to the authority and/or funding restrictions are needed?

Answer. I support the current request for additional funding authority, raising the annual funding level restriction from \$40 million to \$50 million, and I support extending the authority for the duration of named counterterrorist operations and for other contingencies.

SPECIAL OPERATIONS MISSIONS

Question. During your time as ASD(SO/LIC&IC), Special Operations Forces expanded their role in a number of areas important to countering violent extremist organizations, including those related to information and military intelligence operations. Some have advocated significant changes to SOCOM's title 10 missions to make them better reflect the activities Special Operations Forces are carrying out around the world.

What changes, if any, would you recommend to SOCOM's title 10 missions?

Answer. The list of special operations activities in section 167 of title 10, U.S.C. could be updated to reflect SOCOM's current list of core tasks and the missions assigned to it in the Unified Command Plan. The language in section 167 of title 10, U.S.C. also includes "such other activities as may be specified by the President or the Secretary of Defense," which provides the President and the Secretary the flexibility they need to meet changing circumstances.

Question. What do you believe is the appropriate role of Special Operations Forces in the Department's IO?

Answer. IOs are a core SOF task. They are a vital instrument in countering violent extremism and other transnational threats. They can greatly enable unconventional warfare operations. IO support special operations from the combatant command level to the tactical battlefield.

Question. In your view, how are intelligence operations carried out by special operations personnel different from those carried out by others in the Intelligence Community?

Answer. Some intelligence operations conducted by special operations personnel have unique attributes which are a function of the background, training, and experience of special operators, the missions assigned to their organizations, the intelligence targets they pursue, and the collection methods they employ. Special operations intelligence activities primarily support SOF intelligence requirements. However, when directed, SOF intelligence operations also support Intelligence Community and combatant commander requirements. For certain national collection missions, SOF personnel receive the same training as officers in national intelligence organizations.

Question. If confirmed, how would you ensure intelligence activities carried out by Special Operations Forces are adequately coordinated with other activities carried out by those in the Intelligence Community?

Answer. Special Operations Forces coordinate their intelligence activities with the Intelligence Community as required by applicable law, policy, and agreements, including Intelligence Community Directive Number 304 and the Memorandum of Agreement between DOD and CIA Concerning Operational Activities, July 20, 2005. If confirmed, I would further the operational integration between SOF and the Intelligence Community that has progressively been put in place during my tenure as ASD(SO/LIC&IC).

MILITARY INFORMATION SUPPORT OPERATIONS

Question. If confirmed, what role, if any, would you have with respect to military information support operations (MISO)?

Answer. The Defense Intelligence Enterprise plays a crucial role in support of MISOs. Collecting and analyzing the information required to understand complex foreign human environments is the foundation for effective IOs. Additionally, if confirmed, I will ensure that military IOs are properly coordinated and operationally integrated with the IOs of other organizations within the Intelligence Community.

Question. DOD recently announced that it was discontinuing use of the term "psychological operations" in favor of the term "military information support operations."

Why do you believe such a terminology change was necessary?

Answer. Psychological operations as a term had become increasingly anachronistic, and had taken on avoidable, negative connotations. MISO is a more accurate description of the purpose of these operations.

Question. What operational and doctrinal impacts do you believe such a change will have?

Answer. I believe it will have positive operational and doctrinal impacts.

Question. In your experience as ASD(SO/LIC&IC), do you believe the Armed Forces have sufficient personnel and other assets to conduct the range of military information support missions being asked of them?

Answer. As ASD(SO/LIC&IC), and as a senior advisor to the 2006 Quadrennial Defense Review before that, I strongly supported significant growth in our psychological operations/MISOs force structure. MISO forces remain in high demand across our combatant commands. MISOs require specially trained personnel and unique capabilities, and such personnel are important assets not only for the Department, but for other departments and agencies of the U.S. Government as well. Given the rapid rate of change in the information environment and the diverse character of this environment, sustained modernization and a diverse portfolio of capabilities is required. Our long-term goal is measured growth and significant quality improvements for this force.

COUNTERING VIOLENT EXTREMISM

Question. Over the past few years, DOD has funded a growing number of psychological operations and influence programs under the rubric of strategic communications programs. While the Department does not have any separate documentation outlining these activities, the Government Accountability Office reports that DOD “spent hundreds of millions of dollars each year” to support these operations, including initiatives funded by the Joint Improvised Explosive Device Defeat Organization and the geographic combatant commands. Many of these programs support operations in Iraq and Afghanistan, but Military Information Support Teams from SOCOM are also deploying to U.S. embassies in countries of particular interest around the globe to bolster the efforts of the Department of State and the U.S. Agency for International Development. In your capacity as ASD(SO/LIC&IC), you had limited oversight of a number of these programs. In the position for which you have been nominated, you will continue to play a role in these programs.

What are your views on DOD’s strategic communications, psychological operations and influence programs, and their integration into overall U.S. foreign policy objectives?

Answer. The effectiveness of Department IOs in the rapidly evolving global information environment is an increasingly important determinant of our ability to achieve U.S. military objectives. DOD has an important role in IOs, particularly, but by no means exclusively, in zones of armed conflict. DOD IOs must be integrated with other U.S. Government efforts—those by the Department of State and other government agencies—to shape information environments to our advantage. They must also reduce our adversaries’ abilities to do the same.

Question. In 2005, Ayman al-Zawahiri, al Qaeda’s second-in-command, declared that “We are in a battle, and more than half of it is taking place in the battlefield of the media.” Earlier this year, a non-partisan study highlighted the lack of a U.S. strategy to counter radical ideologies that foment violence (e.g. Islamism or Salafist-Jihadism).

As ASD(SO/LIC&IC), what did you do to further DOD’s strategic appreciation of the ideological basis of al Qaeda and its affiliates?

Answer. DOD fully recognizes the importance of al Qaeda’s ideology and the extent to which it underpins the al Qaeda movement. As ASD(SO/LIC&IC), I worked to advance this strategic appreciation within DOD and across the interagency. I have strongly advocated for programs and activities, many of which are conducted by other departments and agencies of the U.S. Government, to deal with the ideological challenge posed by al Qaeda and its affiliates. In the unclassified realm, my office was recently involved in the establishment of the Department of State-led Center for Strategic Counterterrorism Communications, which will serve as the interagency focal point for U.S. Government counter-radicalization efforts.

Question. In your view, how do we counter radical ideologies that foment violence?

Answer. The most effective counter will be within the affected population and the radical groups themselves.

Question. What do you understand to be the role of the Intelligence Community, as opposed to DOD and the State Department?

Answer. The Intelligence Community has special authorities and capabilities that can be brought to bear. Intelligence collection and analysis informs all IOs.

Question. If confirmed, how would you plan to utilize the results of research being conducted by DOD’s Minerva and Human Social Cultural Behavioral Modeling programs?

Answer. Research from the Minerva program and the applications developed as part of Human Social Cultural Behavioral (HSCB) Modeling program are components of the overall Defense Intelligence effort to improve socio-cultural information.

As currently envisioned by OUSD(I), the socio-cultural analytic effort will integrate social science research, all-source analysis, and regional expertise into fused intelligence products. The modeling capabilities in HSCB will help analysts manage and visualize large volumes of data on economics, infrastructure, demographics, et cetera. Insights developed as a result of enhanced capabilities could also improve the Intelligence Community's ability to provide warning on emerging crises.

INFORMATION OPERATIONS

Question. IOs, as currently defined by DOD, include electronic warfare, operational security, computer network operations, psychological operations, and military deception—each of these lines of operations is unique and complex, and, in some cases, interwoven.

What do you understand to be the roles of the OUSD(I) in overseeing DOD IOs?

Answer. The roles and missions for IOs are being addressed by a Front End Assessment. I would expect that the OUSD(I) will continue to play an appropriate role in the oversight of several of these areas.

Question. What are your views on the roles assigned to USD(I) and the Under Secretary of Defense for Policy with respect to IOs, and particularly offensive computer network operations? If confirmed, what changes, if any, would you consider recommending to the Secretary of Defense?

Answer. The Front End Assessment is addressing this question. Some aspects of IO, as currently defined, will likely migrate to Policy, while others will likely remain in USD(I). I would expect that the USD(I) will continue to play an important role in overseeing computer network operations.

Question. Given the formation of a separate U.S. Cyber Command, what are your views on retaining computer network operations as a core competency with IOs?

Answer. IOs, as currently defined, refer to the integration of various information activities to achieve effects across the information environment, which includes the cyber domain. The formation of U.S. Cyber Command will not change the relationship of computer network operations to the other capabilities necessary for DOD to conduct information and cyber-related operations. It will, however, enhance our ability to conduct IOs in the cyber domain. As noted above, oversight of IO and its components, as currently defined, is being addressed in a Front End Assessment.

COUNTER THREAT FINANCE

Question. A number of officials in DOD and the Intelligence Community have called for applying significantly more resources and attention to identifying, tracking, and halting the flow of money associated with the terrorist networks and the illegal narcotics trade. Comparable efforts have been undertaken by the Joint Improvised Explosive Device Defeat Organization against the flow of money and components supporting the construction and employment of improvised explosive devices.

What are your views on efforts to invest additional resources into identifying and tracking the flow of money associated with terrorism and narcotics, especially in Afghanistan?

Answer. Engaging all U.S. Government tools to track and halt the flow of money associated with terrorist networks, the illegal narcotics trade, and other threats to the U.S. Government is critical. The narco-insurgent nexus is a key enabler, for example, of the insurgency in Afghanistan. While DOD is not the U.S. Government lead in counter threat finance (CTF), it does have a role to play. We are in the process of building an appropriate CTF capability within DOD, and will be alert to the need for additional resources.

Question. As ASD(SO/LIC&IC), you were responsible for a portion of the CTF duties in the Department. What is your assessment of DOD's current CTF organizational structure?

Answer. DOD's threat finance structure is still developing, but it is headed in the right direction. In August 2009, Deputy Secretary Lynn approved the DOD Directive on CTF Policy, which formalizes CTF as a DOD mission. CTF Interagency Task Forces are making important contributions to our counterinsurgency efforts in Afghanistan. A critical element of success in the CTF area will be DOD's ability to support the Department of Treasury, which has the CTF lead for the U.S. Government. The ODNI is also working to strengthen the Treasury Department's capabilities with respect to CTF intelligence.

INFORMATION SHARING

Question. There are still strong barriers to sharing, or allowing access to, the mass of raw intelligence data that has not been included in finished reports or anal-

yses and approved for dissemination within the Intelligence Community. As long as these barriers exist, DNI Clapper's vision of an integrated repository with analytic tools able to connect-the-dots cannot be achieved. The implication is that the Nation will remain more vulnerable to terrorist attacks than it could be. The reasons cited to justify these information access barriers are the need to protect sources and methods and the privacy of U.S. persons.

What are your views about whether it is possible to provide greater access to counterterrorism data to analysts and Special Forces while adequately protecting intelligence sources and properly minimizing exposure of U.S. persons' information?

Answer. I believe it is possible to provide greater access to counterterrorism data to analysts and Special Forces while adequately protecting intelligence sources and properly minimizing exposure of U.S. persons' information. While cognizant of the problem we face with respect to the unauthorized disclosure of classified information, if confirmed, I will seek, in concert with the DNI, to enable better, faster, and deeper sharing of counterterrorism data. We have already made significant progress in this area. Until very recently, multiple U.S. military, civil, and coalition networks in Afghanistan were unable to communicate with one another. We have moved to a common, integrated network—the Afghan Mission Network—and one common database—Combined Information Data Network Exchange—that supports intelligence, military operations, command and control, and logistics across all U.S. entities and 46 partner nations. This approach of establishing a common network and common database has allowed us to ensure that all releasable national, tactical, and commercially available data from across the DOD and IC is available and discoverable.

Question. Do you agree with DNI Clapper that these barriers are mainly cultural in nature?

Answer. Yes, I agree with the DNI. Reflecting upon my own operational experiences and the intelligence support I have received over the years, it is clear that the IC has produced multiple generations of intelligence analysts and leaders inculcated with the philosophy that need-to-know had to be proven before information could be shared. Under that approach, the first and foremost rule was to protect sources and methods, or the result would be loss of sensitive capabilities and lives. While protecting sources and methods must remain a critical concern and need-to-share cannot trump need-to-know, there can be an even greater risk to mission or potential loss of life if information is not shared between government agencies and with our allies. As USD(I), Mr. Clapper initiated and, if confirmed, I will continue to foster policy changes and make investments in training and capability development that will make Responsibility-to-Provide the mindset for the entire DOD enterprise. This is already underway in our schoolhouses where Write-for-Release is part of the curriculum, and in our acquisition programs where federated information sharing via common protocols is an integral part of all fielding efforts at the enterprise intelligence architecture level, the combatant commands and the military departments.

Question. What role do you expect to play in addressing this issue, if confirmed, to be USD(I)?

Answer. If confirmed, I will work closely with the ODNI to ensure that as we build out our information-sharing capability, we do it in full synchronization with the IC. I will also ensure that we have appropriate controls in place to prevent unauthorized disclosure of information.

HOMELAND DEFENSE

Question. With the establishment of the positions of USD(I), the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs, and the Commander of U.S. Northern Command, DOD has been fundamentally reorganized to better address the critical homeland defense mission.

In your view, what challenges lie ahead in integrating the intelligence capabilities of DOD with those of the Department of Homeland Security and other associated Federal, State, and local agencies?

Answer. Two of the longstanding challenges to integrating the intelligence capabilities of DOD with those of the Department of Homeland Security and other associated Federal, State, and local agencies have been IT compatibility and guidance on sharing classified information. With the issuance of Executive Order 13549, Classified National Security Information Program for State, Local, Tribal, and Private Sector (SLTPS) Entities, we have made significant progress in the latter. The Executive Order establishes the right balance between sharing classified information with SLTPS entities in support of homeland defense, while ensuring proper safeguards are in place for protecting information from unauthorized disclosure.

OUSD(I) is currently assisting DHS and other agencies in the development of implementation policy, and will have an ongoing role in supporting an integrated approach.

Question. Does DOD's existing requirements-setting process adequately support the establishment of intelligence requirements for the homeland defense mission?

Answer. The technical solutions needed to inject homeland defense intelligence requirements into the overall DOD requirements-setting process now exist or are in development. Dividing finite resources among existing DOD intelligence requirements, while ensuring adequate support for requirements unique to the homeland defense mission, will present a significant challenge. Adequate intelligence support must be provided, however. Al Qaeda continues to pose a grave threat to the American Homeland, and for at least a decade, intelligence professionals have recognized that the foreign-domestic divide has been shattered by transnational terrorist groups.

EFFECTIVENESS OF USD(I)

Question. The Secretary of Defense took the extraordinary step of establishing an independent ISR Task Force in early 2008 to rectify major shortfalls in support to ongoing military and counterterrorism operations. The Secretary determined that the Military Services had not sufficiently deployed innovative solutions to meet the requirements of combatant commanders. Responsibility for this problem lay not only with the Military Services but also the functional manager for intelligence—the Office of the Under Secretary of Defense for Intelligence (OUSD(I)).

Do you believe that the Secretary's initiative suggests that the OUSD(I) lacks expertise, initiative, or clout, or some combination thereof, or do you think that other factors prevented appropriate action?

Answer. The ISR Task Force was established by Secretary Gates to assess and propose options for maximizing and optimizing deployed ISR capabilities in support of operations in Iraq and Afghanistan. It has been led by an OUSD(I) Deputy Under Secretary, and is primarily staffed by OUSD(I) personnel, though it is also comprised of personnel from OSD(AT&L), the Services, Joint Staff, and Combat Support Agencies. The establishment of the ISR Task Force does not reflect a unique shortfall within OUSD(I). Rather, gaps exist in the ability of the Department to quickly meet the urgent near-term needs of our warfighters, particularly when facing a rapidly evolving threat. This gap is not just confined to ISR or intelligence. The same extraordinary process was required, for example, to rapidly procure mine-resistant ambush protected vehicles and develop additional counter-IED capabilities for Afghanistan. The establishment of the ISR Task Force provided the focus and resources necessary to pursue rapid acquisition of ISR assets. Its efforts are part of a larger departmental effort to expand and institutionalize a rapid acquisition capability led by the USD(AT&L). As a result of the ISR Task Force's success, it was determined that there is an enduring need for the focus and effectiveness the Task Force has brought to integrating ISR systems into Joint Operations. Accordingly, the Secretary notified Congress on September 16, 2010, that he was institutionalizing the responsibilities of the ISR Task Force within the OUSD(I).

DUAL HAT AS DIRECTOR OF DEFENSE INTELLIGENCE

Question. In May 2007, Secretary Gates and DNI McConnell signed a Memorandum of Agreement designating the USD(I) as the Director of Defense Intelligence under the DNI.

What is your understanding of the authorities and responsibilities of this office under the DNI?

Answer. The position of the Director of Defense Intelligence (DDI) was established within the ODNI to assist the DNI in the execution of DNI responsibilities for the oversight of Defense intelligence matters. As the principal advisor to the DNI and ODNI for defense intelligence, the DDI is responsible for requirements, intelligence activities, and advice and assistance. This includes:

- Overseeing the development of DOD's national intelligence requirements on behalf of the DNI;
- Facilitating alignment, coordination, and deconfliction between National and Defense Intelligence activities; and
- Advising and assisting the DNI by synchronizing and integrating Defense intelligence functions with other IC elements.

By creating this dual-hat arrangement, the DDI can exercise authority on behalf of the DNI, while the USD(I) exercises authorities delegated to him by the Secretary of Defense.

Question. What is your assessment of the relevance or importance of this dual designation, and whether it should be continued?

Answer. I believe strongly in the DDI/USD(I) dual-hat arrangement, and strongly support its continuation. I believe it is the most effective way to serve the Defense intelligence needs of both the Secretary of Defense and the DNI, and it is a key instrument for achieving greater integration of U.S. intelligence. The DDI/USD(I) attends all National Intelligence Boards, all DNI Executive Committee meetings, and all senior ODNI staff meetings. The DDI/USD(I) meets weekly with the DNI in a one-on-one session. A full-time senior liaison officer resides in each staff in an effort to enhance communication and coordination. If confirmed, I would plan to build on and expand the collaboration between the OUSD(I) and ODNI staffs through this arrangement.

USD(I) ROLE IN INTELLIGENCE PERSONNEL, ACQUISITION, AND POLICY

Question. DOD senior leaders include Under Secretaries responsible for personnel, policy, and acquisition matters, yet the OUSD(I) includes staff with responsibilities for each of these areas as they apply to the intelligence mission.

In your view, should the OUSD(I) staff continue to duplicate the functions and resources of these other Under Secretaries? If so, why?

Answer. I do not view the OUSD(I) staff functions as duplicative, but rather complementary. The Intelligence components of the Department operate under the authority of the Secretary of Defense in title 10 of the U.S.C. In coordination with the Under Secretary of Defense for Personnel and Readiness (USD(P&R)), the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)), the Under Secretary of Defense for Policy (USD(P)), and the DNI, the OUSD(I) staff provides oversight on behalf of the USD(I) to ensure these programs are aligned both within the Department and the broader Intelligence Community. The USD(I) is uniquely positioned to provide oversight of sensitive DOD programs that are integral to the Intelligence Community, including those exercised clandestinely, and to ensure that those programs complement the activities of the entire Department and the DNI. These efforts ensure maximum effectiveness and efficiency of the consolidated National Intelligence and Defense Intelligence programs.

The USD(I) is the Principal Staff Assistant responsible for promulgation of intelligence policies within DOD (DODD 5143.01). In this capacity, the USD(I) exercises the authorities to ensure efficient use of resources for the intelligence mission set. DOD routinely interacts with the Intelligence Community, and those interactions require special consideration in order to preserve the necessary division between national and military intelligence activities. The USD(I) provides oversight of training, education, and career development for all Defense intelligence personnel. This oversight enables the Department to develop a cadre of well rounded and experienced intelligence experts and to horizontally integrate existing and new capabilities for warfighters. Without this focused oversight, the efficiency and effectiveness of the DOD Intelligence Enterprise would be put at risk. The Department also has responsibility to provide specialized oversight of all Military Intelligence Program funding. Congress has recognized the importance of this oversight in the areas of acquisition, security, personnel, and resources.

OUSD(I) provides advice and assistance to OUSD(AT&L) concerning acquisition programs and processes that significantly affect Defense intelligence, counterintelligence, and security components. Additionally, OUSD(I) works closely with OUSD(AT&L) and ODNI on programs that are funded by the National Intelligence Program and executed in the Department. This advice and assistance is integral to OUSD(I)'s Military Intelligence Program oversight and Battlespace Awareness Capability Portfolio Management responsibilities.

Question. What is your understanding and view of the military departments' initiatives with respect to their tactical, operational, and strategic intelligence collection and analysis force structure and technologies?

Answer. The military departments understand that we are operating in a resource-constrained environment, and they are developing initiatives and strategies to field comprehensive capabilities providing optimized intelligence to full-spectrum operations. If I am confirmed as USD(I), they will have my full support. These strategies provide a range of investment options to realign and reinvest in existing capabilities, while still providing timely, fused, and actionable intelligence to the Joint Force. I support the Secretary of Defense's effort to maximize production of ISR capabilities in support of U.S. forces in combat, as evidenced by the ISR Task Force Initiative. If confirmed, I will work with the Intelligence Community, the military departments, and the combat support agencies to ensure an integrated effort. I will meet with the Service Intelligence Chiefs, the Joint Staff J2, the Combat Support

Agency Directors, and the combatant commands to ensure I have a clear understanding of their highest priority initiatives.

Question. If confirmed, what would be your priorities among these initiatives and how would you propose to provide policy and program oversight and support them with appropriate resources?

Answer. If confirmed, my priorities would be nested with the Secretary of Defense's Planning Guidance and the DNI's National Intelligence Strategy. I would ensure that the initiatives and strategies of the military departments were also nested with Secretary of Defense priorities, and through my office of Joint and Coalition Warfighter Support, would provide the necessary oversight of their plans and programs. My top priority is to support our forces engaged in combat operations with the best intelligence available. To do that, we need to balance our capabilities at the strategic, operational, and tactical levels of war. We would improve innovation and pursue technological advances in support of information sharing—from policy to hardware to analysts; improving collection and exploitation, countering current and emerging threats, strengthening counterintelligence, and improving our security processes.

EFFICIENCIES ISSUES

Question. The Secretary of Defense has announced his intention to eliminate the Office of the Assistant Secretary of Defense for Networks and Information Integration (ASD(NII)) and the J-6 from the Joint Staff on the grounds that other organizations in the Department perform similar functions, particularly the Defense Information Systems Agency and U.S. Cyber Command. Similarly, the Department has a number of combat support defense agencies that are totally engaged in intelligence—such as NSA, DIA, NGA, and NRO. There is also the DNI who manages intelligence, including all the national intelligence agencies within the Department. Each Military Service has an intelligence chief as well. U.S. Cyber Command, U.S. Strategic Command, and each of the other combatant commands have major intelligence components and missions.

In your view, does the logic that led to the decision to eliminate NII and the J-6 imply that USD(I) and the J-2 should also be eliminated in view of the role played by DIA, NSA, NGA, NRO, U.S. Cyber Command, and U.S. Strategic Command? Why or why not?

Answer. The Secretary of Defense is examining the Department's intelligence organization, responsibilities, and authorities as part of his efficiency effort. That endeavor is ongoing, and at this point the Secretary has not made any final decisions. Key members of the OUSD(I) staff are participating in the efficiency effort to inform the larger efficiency team about the intricacies of the Defense Intelligence Enterprise. In my view, there is a radical difference between streamlining oversight and management of command, control, and communications functions and those of a diverse intelligence enterprise. The USD(I), on behalf of the Secretary of Defense, coordinates, oversees and orchestrates the multidiscipline components of the global Defense Intelligence Enterprise and its interaction with the Intelligence Community. I believe the creation of the position of USD(I) was a major step forward in the oversight of defense intelligence, and that the dual-hatting of USD(I) as the DNI Director of Defense Intelligence ensures that Defense Intelligence is fully integrated into the U.S. Intelligence Community. I would not support its elimination. I likewise believe that the J-2 provides critical intelligence support to the Chairman, Joint Chiefs of Staff, the Secretary of Defense, the Joint Staff, and the Unified Combatant Commands.

Question. Do you see an opportunity for the elimination of redundant layers of bureaucracy and greater efficiency in the operation and management of the Defense Intelligence Community, including the combatant commands and the Service component commands?

Answer. The Secretary of Defense initiated an efficiency effort that includes the review of the organizations and functions of Defense Intelligence Enterprise components to identify overlaps and inefficiencies. This effort includes a review of the entire enterprise to include the Defense intelligence agencies, Service intelligence components, and all of the Combatant Command Joint Intelligence Operations Centers. I anticipate that the efficiency effort will identify some redundancies, and if confirmed, I will work to carry out any decisions made by the Secretary.

NATIONAL INTELLIGENCE PROGRAM CONSOLIDATION

Question. The Intelligence Reform and Terrorism Prevention Act of 2004 is the most recent legislative attempt to calibrate the need to centralize management of intelligence across the Federal Government with the need to sustain the benefits of

departmental intelligence answerable to cabinet secretaries. General Clapper, while serving as USD(I), initiated a proposal to separate out the National Intelligence Program (NIP) portion of the Defense budget, establish a new appropriations account within the 050 Defense Function, and expand the ODNI comptroller function to enable ODNI to execute these funds independent of the DOD Comptroller organization.

Does this proposal weaken the authority of the Secretary of Defense over the intelligence components of the DOD?

Answer. This proposal should not weaken the authority of the Secretary of Defense over the intelligence components of DOD. Separation of the NIP portion of the Defense budget, as conceptually proposed, is an administrative action. Thus, it will not affect the Secretary of Defense's "authority, direction, and control over the Department of Defense." 10 U.S.C. sec. 113(b). It will not affect how the Secretary "prescribe[s] regulations for the government of his department, the conduct of its employees, [and] the distribution and performance of its business." 5 U.S.C. sec. 301.

Question. Is this proposal consistent with the Secretary's efficiencies initiative, which seeks to avoid duplication and to reduce the overhead burden, by creating a second large financial control system operating within the Department?

Answer. The proposal to separate the NIP portion of the Defense budget was not intended to be an efficiency initiative, but to provide greater visibility and oversight of NIP resources, as well as improve NIP financial management practices. ODNI is leading a collaborative study effort to determine the feasibility of the conceptual proposal, with DOD stakeholders participating. The study team is still assessing possible approaches and implications. No final decisions have been made on removing the NIP from the DOD budget. If approved, I believe the proposal to separate the NIP portion of the Defense budget would not be incompatible with the Secretary's efficiencies initiative.

SUPPORT FOR COUNTERINSURGENCY

Question. In late 2009, Major General Michael T. Flynn, USA, who was serving as Chief, CJ2, International Security Assistance Force and U.S. Forces-Afghanistan, published an article that criticized the Intelligence Community broadly for focusing excessively on support for kinetic operations against adversary forces in Afghanistan and failing to devote sufficient attention to the counterinsurgency strategy and its emphasis on population protection, tribal dynamics, cultural insight, the rule of law, and the like.

Do you think that General Flynn's criticism was accurate, and if so, has this imbalance been corrected?

Answer. Major General Flynn was correct in his assessment that in a counterinsurgency environment, focusing our intelligence assets solely on the insurgent forces is not effective. A comprehensive understanding of the socio-cultural environment is absolutely critical to developing and implementing effective strategies to separate the insurgency from any viable base of support in the general population. Developing this comprehensive understanding is clearly an intelligence responsibility as laid out in Service and Joint doctrine within the Department. Mobilizing the local population in rural areas for village stability operations has become a critical element of our strategy in Afghanistan, one that is already showing major gains on the battlefield. Tribal engagement is increasingly central to U.S. strategy in other countries as well. Thus, a detailed understanding of tribal dynamics is a critical intelligence task, and will likely remain so for the foreseeable future.

The Intelligence Community has worked hard to implement Major General Flynn's recommendations. The Stability Operations Information Centers he called for have been created and manned by the Defense Intelligence Agency and Service intelligence analysts who are doing the integration and analysis work necessary to generate the comprehensive District Assessment reports that were the cornerstone of Major General Flynn's approach. Significant challenges remain in developing the integrated information-sharing environment envisioned by Major General Flynn, but the Intelligence, Surveillance, and Reconnaissance (ISR) Task Force and the U.S. Central Command have been doing tremendous work in this area as well. Additionally, the former USD(I) commissioned the Intelligence Task Force of the Defense Science Board in March 2010 to evaluate how intelligence can most effectively support counterinsurgency operations. The Board is currently compiling its findings and recommendations and is scheduled to brief the results in the first quarter of calendar year 2011.

I believe the Intelligence Community has responded well to the challenges laid out by Major General Flynn. One of my first actions, if confirmed, will be to confer

with Brigadier General Fogarty, who has replaced Major General Flynn, to get his assessment of the support currently being provided by the Defense Intelligence Enterprise and the Intelligence Community to determine if additional enhancements are required.

Question. In your opinion, has the Intelligence Community devoted enough resources to provide policymakers and combatant commanders with the information on the cultural, social, political, and economic dynamics needed to formulate sound strategies for other critical regions, like Yemen and Somalia?

Answer. As noted above, tribal engagement is an increasingly critical tool in U.S. irregular warfare strategy. It was central to our success in overthrowing the Taliban and al Qaeda in Afghanistan in 2001, it has been a major factor in our success in Iraq (Anbar Awakening), it is again becoming a critical element of our counterinsurgency strategy in Afghanistan, and it offers U.S. policymakers important options in other countries of concern. Information on cultural, social, political, and economic dynamics is likewise needed for effective IOs, as well as enhanced options to deal with power brokers in urban areas. I believe we have made good progress regarding intelligence support in this area, but additional improvements are required. A key part of the required investment is the development of operators—within both the intelligence and the special operations communities—with the requisite language skills. Effectiveness in this area also requires intelligence analysts with very different backgrounds. If confirmed, I would engage the DNI, the Director of CIA, the relevant components of the Defense Intelligence Enterprise, and the Commander of SOCOM to ensure that we continue to develop the required capabilities.

Question. Is collection and analysis on these subjects in these geographical areas a tier one priority for the Intelligence Community or is it classified as lower-priority general background intelligence information? Do you agree with this prioritization?

Answer. As the committee is aware, our National Intelligence Priorities are classified. As noted above, however, intelligence support in this area is increasingly central to effective strategy and operations. If confirmed, I will work to ensure that it is accorded appropriate priority within both the Intelligence Community and the Defense Intelligence Enterprise.

NEED FOR INDEPENDENT INTELLIGENCE ANALYSIS

Question. Intelligence analysis should be independent and free of political pressure that it reach a certain conclusion, including a conclusion that fits a particular policy preference.

If confirmed, how would you ensure that all intelligence analysts within DOD, including those who may be seconded to offices that are not part of the defense intelligence structure, are free from such pressure?

Answer. In my experience, I have found the intelligence analysis that holds up best under scrutiny are those assessments that were reached impartially and independently, using all sources of information available, and which highlight the intelligence gaps that limit the judgments that can be reached by current analysis. Intelligence analysts are inculcated with the importance of “speaking truth to power.” As ASD(SO/LIC&IC), I have interacted regularly with intelligence analysts across the Intelligence Community, and have found them to be professionals who apply rigorous tradecraft standards to their products. The quality of analysis provided to policymakers today, in my judgment, is substantially better than it was in the Cold War. I have spoken to analysts as they attend their career training programs about the importance of what they do, and the need for objectivity and independence. If confirmed, I would reaffirm the importance of objective and independent analysis from the frontline analyst, to the Directors of analytical organizations, to senior policymakers. There will be zero tolerance for political pressure on analysts to reach certain conclusions.

Question. Under what circumstances, if any, do you think intelligence officers and analysts should be able to testify to Congress on their professional conclusions regarding a substantive intelligence issue even if those views conflict with administration positions?

Answer. If Congress requires testimony on a substantive intelligence issue, it should be provided, whether or not it conflicts with an administration position.

CONTROL OF INTELLIGENCE AGENCIES WITHIN DOD

Question. The Intelligence Reform and Terrorism Prevention Act (IRTPA) of 2004 granted the DNI control over the preparation and execution of the National Intelligence Program budget and tasking of national intelligence operations. However, IRTPA also contained language asserting that nothing in the act should be con-

strued so as to impair the authorities of secretaries of cabinet departments, and the Secretary of Defense has delegated “direction, control, and authority”—the highest form of authority in the executive branch—over the national intelligence organizations within the DOD to the USD(I).

What are your views on the balance of authorities accorded in IRTPA to the DNI and to cabinet secretaries, particularly the Secretary of Defense?

Answer. IRTPA struck a proper balance of authorities, in my view, in that it gave the DNI strong authority over core intelligence functions for the National Intelligence Program, such as setting requirements and budgets, as well as determining priorities for and managing the analysis and dissemination of national intelligence, while leaving the responsibility for execution of DOD intelligence activities to the Secretary of Defense, and assigning primary responsibility for leadership and management functions such as inspector general activities, personnel, information technology, financial management systems, and acquisition within the IC elements outside of ODNI and CIA to the heads of the departments in which those elements are located. The recently-enacted Intelligence Authorization Act for Fiscal Year 2010 significantly increased the authorities of ODNI over leadership and management functions in the IC elements, and I expect that DOD and the DNI will together devote considerable time and attention to implementing these new ODNI authorities in a manner that gives full effect to the act while avoiding unnecessary duplication of effort and preserving the Secretary of Defense’s ability to execute his statutory responsibilities over DOD’s intelligence components.

Question. What are your views on the extent of the grant of “direction, control, and authority” to the USD(I) over DOD national intelligence organizations?

Answer. Statutory provisions in both title 10 and title 50 of the U.S.C. assign authority, direction, and control to the Secretary of Defense over DIA, NSA, NGA, and NRO as components of the Department, consistent with the statutory authorities of the DNI. In my view, this balance of authorities is appropriate.

Question. What type of relationship would you strive to establish, if you are confirmed, with the DNI to ensure that DOD interests in national intelligence are satisfied, that DOD adequately assists the DNI in discharging his responsibilities, and that the defense intelligence agencies are properly managed?

Answer. With the former USD(I) now in place as the DNI, with his extensive experience in both DOD and the Intelligence Community, with the close personal partnership we have forged during my tenure as ASD(SO/LIC&IC), and with the close relationships we both have with the Secretary of Defense and with the leaders of the Intelligence Community, I believe there is an unprecedented opportunity to further strengthen the relationship between DOD and the DNI. If confirmed, I expect that together we will look for additional ways to build on the arrangement established by the Secretary of Defense and the DNI under which the USD(I) serves as the Director of Defense Intelligence within ODNI.

Question. Do you believe that the relationships, authorities, processes, and structures in place between the DOD and the DNI provide sufficient influence for the DOD to ensure that the intelligence capabilities DOD will need in the future to prepare for and conduct military operations will be developed and acquired through the National Intelligence Program?

Answer. Yes, I believe that current relationships, authorities, processes, and structures in place between DOD and the DNI have produced highly effective support by NIP resources for military operations.

ROLE IN ACQUIRING SPACE SYSTEMS

Question. If confirmed, what role do you anticipate you would have in the requirements process for, and in oversight of the acquisition of, space systems, including space systems for which milestone decision authority rests with either the Under Secretary of Defense for Acquisition, Technology, and Logistics or the DOD Executive Agent for Space?

Answer. If confirmed as USD(I), as the principal staff assistant to the Secretary of Defense for all intelligence matters, my role in space system acquisition will be to ensure the Defense Intelligence Enterprise meets national and Department requirements. I will ensure that we’ve balanced our investments towards delivering the right mix of intelligence capabilities to support the combatant commanders to accomplish their missions. DOD space systems are one component of a broader architecture of sensors, systems, and capabilities.

As the DOD Program Executive for the Military Intelligence Program (MIP), the USD(I) role is to ensure all parts of the ISR architecture, to include space, air, and ground, are integrated into an overall architecture optimized to meet the warfighters’ needs. If confirmed, I will work closely with the DNI to ensure that the

DOD intelligence architecture, including space intelligence capabilities, is integrated with the national architecture, and that we have a mission-focused space enterprise that is affordable, responsive, efficient, flexible, and fully supportive of military operations and national security needs.

As the Battlespace Awareness Capability Portfolio Manager, if confirmed, I will participate in the Office of the Secretary of Defense (OSD) requirements and acquisition oversight process by providing intelligence input into the Joint Capabilities Integration and Development System (JCIDS) requirements process, the Functional Capabilities Board (FCB), the Joint Capabilities Board (JCB), and the Joint Requirements Oversight Council (JROC), as well as provide input into the DOD acquisition process on the Defense Acquisition Board.

DOD INTELLIGENCE INTERROGATIONS POLICY

Question. DOD Directive Number 3115.09 assigns the USD(I) responsibility for providing oversight of intelligence operations, detainee debriefings, and tactical questioning, and ensuring overall development, coordination, approval, and promulgation of DOD policies and implementation of plans related to intelligence interrogations, detainee debriefings, and tactical questioning.

Do you support the policy set forth in the July 7, 2006, memorandum issued by Deputy Secretary of Defense England stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. Yes, I fully support this policy.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. Yes, I fully support these standards.

Question. If confirmed, will you ensure that all DOD policies promulgated and plans implemented related to intelligence interrogations, detainee debriefings, and tactical questioning comply with the Common Article 3 of the Geneva Conventions and the Army Field Manual on Interrogations?

Answer. If confirmed, I will ensure that all relevant DOD policies and plans comply with applicable U.S. law and international obligations, including Common Article 3.

Question. Do you share the view that standards for detainee treatment must be based on the principle of reciprocity, that is, that we must always keep in mind the risk that the manner in which we treat our own detainees may have a direct impact on the manner in which U.S. soldiers, sailors, airmen, or marines are treated, should they be captured in future conflicts?

Answer. Yes, I strongly hold the view that the manner in which the United States treats detainees may well impact how captured U.S. soldiers, sailors, airmen, and marines are treated in future conflicts. I believe it has broader national security and foreign policy ramifications as well.

Question. Under DOD Directive Number 3115.09, the USD(I) is responsible for developing policies and procedures, in coordination with the Under Secretary of Defense for Acquisition, Technology, and Logistics, the DOD General Counsel, and the appropriate DOD components, to ensure that all contracts in support of intelligence interrogation operations include the obligation to comply with the standards of DOD Directive Number 3115.09 and exclude performance of inherently governmental functions in accordance with DOD Directive 1100.4 and that all contractor employees are properly trained.

What do you believe is the proper role of contractors in intelligence interrogation operations?

Answer. Consistent with Section 1038 of Public Law 111-84, "The National Defense Authorization Act for Fiscal Year 2010," October 28, 2009, I believe that in areas where adequate security is available and is expected to continue, contractor personnel with proper training and security clearances may be used as linguists, interpreters, report writers, information technology technicians, and other employees filling ancillary positions (including as trainers of, and advisors to, interrogators) in the interrogation of individuals who are in the custody or under the effective control of DOD or otherwise under detention in a DOD facilities.

Contractors may be used as interrogators only if the Secretary of Defense determines that it is in the interests of the national security to do so and grants a waiver for a 60-day period, and for an additional 30 days if a renewal is approved. If a waiver is granted, contract interrogators must be properly trained and certified to DOD standards, and they must be supervised and closely monitored by properly

trained and certified DOD military and/or DOD civilian interrogators to ensure that the contract interrogators do not deviate from the government-approved interrogation plans or otherwise perform any inherently governmental function.

Question. What steps would you take, if confirmed, to ensure that intelligence interrogation operations are performed in a manner consistent with the requirements of the manpower mix and that contractors involved in such operations do not perform inherently governmental functions?

Answer. If confirmed, I will ensure that all relevant DOD policies and plans comply with Section 1038 of Public Law 111-84, "The National Defense Authorization Act for Fiscal Year 2010," October 28, 2009, which delineates the functions that contractors may perform in support of intelligence interrogations. If the Secretary of Defense grants a waiver permitting the use of contractors as interrogators, I will ensure that they are properly trained and certified to DOD standards, and that they are supervised and closely monitored by properly trained and certified DOD military and/or DOD civilian interrogators to make certain that the contract interrogators do not deviate from the government-approved interrogation plans or otherwise perform any inherently governmental function.

INTELLIGENCE, SURVEILLANCE, AND RECONNAISSANCE SUPPORT

Question. Over the last 5 years or so, the approved requirement for 24-hour orbits of ISR aircraft has grown from approximately 10 to 65. U.S. Central Command, and specifically the Iraq and Afghanistan areas of operation, has received the overwhelming share of these assets. The other combatant commands, as well as such critically important regions as Yemen and the Horn of Africa, have received little or no additional assets. Even within U.S. Central Command, demand exceeds supply.

Secretary Gates established the independent ISR Task Force partly because the normal requirements and acquisition processes in the Department favored long-term investments in capabilities for waging conventional military operations rather than the needs of deployed forces engaged in irregular warfare.

In your view, is DOD allocating sufficient resources to airborne ISR to protect long-term force modernization preferences?

Answer. I believe the Department is now allocating sufficient resources to airborne ISR. Working closely with Congress, the Department has greatly expanded airborne ISR capabilities during Secretary Gates' tenure. As ASD(SO/LIC&IC), I have consistently and strongly advocated for additional Predator/Reaper CAPs (orbits). These assets are absolutely critical to U.S. strategy in several areas, and demand continues to exceed supply. This is why in the 2010 Quadrennial Defense Review, the Secretary made the decision to expand the authorized U.S. Air Force force structure goal further by another 15 CAPs/orbits (from 50 to 65). We continue to upgrade the capabilities of our airborne ISR systems as well. The introduction of high definition video capabilities, for example, provides resolution that was not possible just 5 years ago. Combining this capability with recently developed SIGINT capabilities has dramatically improved the effectiveness of our ISR orbits. Other airborne ISR systems are having an equally dramatic impact on the battlefield.

The Secretary has provided very clear guidance. His first defense strategy objective is to "Prevail in Today's Wars," and that is where the preponderance of our attention and effort is focused. His strategy also makes it clear that we must continue to "Prevent Future Conflict" and "Prepare to Succeed in a Wide Range of Contingencies." Maintaining an appropriate balance between winning today and preparing for the future requires tough choices, but they are being made. The President's budget for 2011 has the balance right, in my view.

Question. Is the current focus an appropriate one?

Answer. Yes.

REPORTING OF CYBER OPERATIONS IN THE CLANDESTINE QUARTERLY REPORT

Question. The USD(I) coordinates preparation of the quarterly report on clandestine military operations (Clandestine Quarterly Report) to Congress. In discussions with the Department about actions to establish the U.S. Cyber Command, it became apparent that the Department may have failed to report certain cyber activities in the Quarterly Report that should have been included, since they would legitimately fit the accepted definition of clandestine military activities.

What is your understanding of whether the Department failed to report these activities in the regular Clandestine Quarterly Reports, and why?

Answer. It is my understanding that the congressional language directing provision of the Clandestine Quarterly Report specifically calls for reporting on clandestine HUMINT activity. Former USD(I) Clapper, in an effort to keep Congress better

apprised of activities within his purview, expanded the report to routinely include a wide range of activities that exceeded the congressional reporting requirements. I fully support this expanded approach, and, if confirmed, will review the status and process for reporting DOD cyber activities. I am committed to appropriate reporting of all intelligence and intelligence-related activities to Congress.

Question. Setting aside the issue of advance notice of certain significant cyber activities, what is your view on the appropriateness of reporting cyber activities that fit the definition of a clandestine military operation in the Clandestine Quarterly Report?

Answer. The USD(I) is charged with keeping the appropriate committees of Congress fully and currently informed on all DOD intelligence and intelligence related activities. It would be my intent, if confirmed, to fully comply with that responsibility, to include cyber activities.

SCIENCE AND TECHNOLOGY

Question. What technical challenges does the Intelligence Community face that in your opinion are currently not being addressed adequately by DOD science and technology efforts?

Answer. I believe an “Intelligence Revolution” has been underway for some time, and that technological change is the principal driver of this revolution. This revolution has already posed, and will continue to pose, significant challenges as well as opportunities for the U.S. Intelligence Community. I believe that DOD science and technology programs are enabling the IC to keep ahead of the rapidly-changing intelligence environment.

One challenge that we continue to face is making the best use of existing and planned sensors and then exploiting data coming from those sensors. Although we are continuing to push the envelope on new and better sensing technologies, the real challenge has shifted towards integrating data from platforms and sensors into a common framework. Related technical challenges include layering the data, developing advanced analytical tools that make sense of the data, and developing tools that automatically alert analysts or cross-cue other sensors to focus on unique and potentially dangerous activity. Other challenges include the protection of critical space systems and data networks.

Question. Recently, DOD has been exploring a wide range of airship-related technologies for ISR purposes, including those for long-duration, high-altitude flight.

What are your views on the specific missions, concepts of operation, technical viability, and affordability of airships as long-duration, high altitude ISR sensor platforms?

Answer. I believe these technologies will have an immediate, positive impact on our operations in Afghanistan, and could play an even greater role in future operations as the capability continues to evolve. An “unblinking eye and ear” is central to our ISR strategy for the modern battlefield. Over the last decade, the Department has significantly expanded our ability to dwell over the battlefield with ISR platforms. We have done this predominantly through procurement of aircraft systems and sensors. With the advent of long-endurance platforms, the Department is expanding the paradigm of battlefield dwell by developing “game-changing” persistent capabilities that enable satellite-like endurance at a much lower cost and have the flexibility to reposition anywhere in the world. These developments will greatly increase the amount of valuable information available to the warfighter. The development of long-endurance airborne capabilities, I would add, is much broader than just airships. DOD is also pursuing other long-endurance fixed-wing medium- and high-altitude capabilities that can linger for weeks and even months at a time.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the USD(I)?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR CARL LEVIN

WIKILEAKS REMEDIES

1. Senator LEVIN. Secretary Vickers, the imperative after September 11 was a paradigm shift from “need-to-know” to “need-to-share” intelligence and law enforcement information. The Wikileaks fiasco illustrates some of the dangers that can accompany information-sharing practices that are not wisely structured. It seems to me that we have to be smart about this. We can’t go back to the old practice of hoarding information, but we also cannot be wantonly posting sensitive material to hundreds of thousands of people who have no reason to see it. The committee is examining technologies and processes to achieve this balance, and I know that Secretary Gates and his staff have already taken actions and are engaged in longer-term planning. What are your views on how we can finally achieve our information-sharing goals while better protecting information from insider threats?

Secretary VICKERS. The Department of Defense (DOD) works to manage the risk of unauthorized disclosure of classified information through good security practices. For example, we vet our personnel for suitability and trustworthiness in the security clearance process. We establish and uphold rules for physical access to secure facilities and to classified information. We also have rules about the use of networked systems and conduct annual training to educate and remind employees about the rules. Security policy and processes are generally effective deterrents when everyone understands and implements them.

The unauthorized transfer of classified information to WikiLeaks was made possible in part because standard security procedures were relaxed in a war zone in order to facilitate the rapid exchange of information critical to operations. In the aftermath of WikiLeaks, the Department is taking a number of mitigation steps, including possible disciplinary action. We are examining technologies that would improve our ability to identify and thwart a threat from inside the Department as well as strengthen information-sharing governance. Some actions were already under way before the WikiLeaks disclosures. For example, the Department has planned and resourced the development of a public key infrastructure that would authenticate users of the Secret Internet Protocol Router Network (SIPRNet) so we would know exactly who is on the SIPRNet at any given time. Technical subject matter experts in the office of the DOD Chief Information Officer (CIO) are also reviewing options for developing role-based or attribute-based access control capabilities that would more effectively control who has access to what data—a very large and complex task given the Department’s size and the scope of its responsibilities.

To summarize, we can and must responsibly balance information security and information sharing by managing risk using a number of security and security-related protocols that act together to thwart both intentional and unintentional violations.

2. Senator LEVIN. Secretary Vickers, in your answers to the committee’s advance policy questions, you stated that the office of the Under Secretary of Defense for Intelligence (USD(I)) had recently completed a comprehensive review. What are the main recommendations of that review, and will you make it available to the committee?

Secretary VICKERS. Immediately following the WikiLeaks disclosures, the Secretary of Defense directed the USD(I), in concert with the Joint Staff and the DOD CIO, to review DOD information security policy and procedures for handling classified information in forward-deployed areas. The Secretary was particularly concerned over the appropriate balance between the need to share and the responsibility to safeguard classified information. The report was completed and provided to the Secretary in December 2010. The report itself is an internal DOD deliberative document, but some of the principal findings include the following:

- Adequate security policy and procedures exist, but compliance must be better enforced. Forward-deployed units maintained an over-reliance on removable electronic storage media.
- Roles and responsibilities for detecting and dealing with an insider threat must be better defined.
- Processes for reporting security incidents need improvement.
- Limited capability currently exists to detect and monitor anomalous behavior on classified computer networks.

USD(I) Security staff will continue to work closely with the DOD CIO, elements of the Joint Staff and U.S. Cyber Command to address these issues in the months ahead. We stand ready to provide the committee with further details on the report's main recommendations, if requested.

INFORMATION SHARING

3. Senator LEVIN. Secretary Vickers, on a closely related topic, since September 11 the intelligence, law enforcement, and homeland security communities have struggled to develop effective means to connect and correlate fragmentary information held by multiple departments and agencies to thwart terrorist threats. As we learned in the aftermath of the Christmas bombing attempt, achieving this so-called connect-the-dots capability is not so much a technical challenge; the hardest part is overcoming the resistance of agencies to sharing their sensitive information and resolving the important policy and legal concerns regarding protection of privacy and sources and methods.

This challenge of finding and correlating the proverbial needles in haystacks is not confined to the national-level threat from terrorism. It turns out that our troops face identical types of challenges in discovering the people and networks of the terrorist and insurgent groups they are fighting in Iraq, Afghanistan, Yemen, and elsewhere around the world.

The committee's examination of this situation reveals that almost every agency and department is developing large-scale search, discovery, and correlation systems, but they are able to apply these tools only to their own data—in their own stovepipes. In other words, there is a lot of duplication going on but no interagency solution. Indeed, there is no enterprise-wide search capability even within DOD. Do you have an appreciation of this situation, and how do you think it can be fixed, both within DOD and throughout the Government?

Secretary VICKERS. Many DOD and Intelligence Community organizations have leaned forward to provide improved and impressive services rapidly for our troops in Iraq and Afghanistan. This challenge has been increased significantly by the breadth of our modern coalitions, by the need to update intelligence disclosure and release policies, and by the need for technology solutions to assist in marking data for release and moving it down to non-traditional networks to support coalition operations. We expect this trend to continue in future contingency operations. I share your view that there is a need to better coordinate and integrate these various contingency efforts, and we are addressing this challenge aggressively in numerous ways.

The Information Sharing and Collaboration (ISC) Team of the Intelligence, Surveillance, and Reconnaissance (ISR) Task Force has, over the past year, fielded a number of improvements to intelligence architectures in theater and to data dissemination, discovery, access, and retrieval capabilities. This group has also been focused on identifying gaps, overlaps, and integration opportunities among the Quick Response Capabilities delivered to theater, and on ensuring that sustainment and upgrade decisions are made within the context of integrating duplicative efforts, and migrating capabilities to common enterprise standards. The ISC Team is working to ensure these quick-turn-around efforts are designed and upgraded in ways that increase their interoperability across the intelligence enterprise, and that these investments will work toward enduring long-term solutions that can be applied to global operations and will be reusable in future contingency operations. Specific examples of these efforts include: ensuring any upgrades or expansion of the CENTCOM's Combined Information Data Network Exchange database and search capabilities are migrated to global enterprise standards; and a just-initiated review of all DOD and Intelligence Community "cloud" efforts to highlight gaps, overlaps, and an enterprise integration way ahead.

Yet another important organization is the Intelligence Community's Information Sharing Steering Committee (ISSC). DOD participates in the ISSC along with representatives from all Intelligence Community elements to align common information-sharing needs, priorities, solutions, and architectures.

Our approach to accomplishing improvements in information sharing requires that we implement a multi-faceted, layered approach. We recognize explicitly that technology alone will not resolve information-sharing shortfalls. The need to implement improvements in an enterprise approach has led us to develop oversight processes designed to effectively manage and synchronize the many information-sharing initiatives we have underway into one well-orchestrated effort. This focus has led to the establishment of a new Information Sharing and Partner Engagement Directorate within USD(I). This newly created directorate is engaging in a broad range of efforts specifically designed to improve information sharing by addressing policy, foreign relationship management, enterprise architectures, international intelligence sharing architectures and mechanisms, and training and education, and is ensuring we place the appropriate high-level of attention from the Office of the Secretary of Defense (OSD) on this subject. Among its duties, this new Directorate will support a governance structure to guide Intelligence Community-wide enterprise solutions. It will reconstitute and support the Defense Intelligence Information Enterprise (DI²E) Council, and will guide and oversee development of the associated DI²E Framework. A Charter for the new DI²E Council and Terms of Reference for the DI²E Framework have both been drafted and are in review.

U.S. CYBER COMMAND AND CYBERSPACE

4. Senator LEVIN. Secretary Vickers, U.S. Cyber Command's mission is to defend networks and, when directed, conduct offensive operations in cyberspace. Both of these missions are heavily dependent upon intelligence support. From a policy perspective, USD(I) is not responsible for the mission of defending cyberspace, nor for offensive military operations. Those oversight roles are the province of the CIO and the Under Secretary of Defense for Policy (USD(P)).

However, as we have come to learn, gaining access in cyberspace to adversaries' networks to collect intelligence is tantamount to establishing a foundation for offensive actions. Thus, the intelligence activities that you oversee inherently have a relationship to potential offensive military operations. These intelligence operations in cyberspace can take on an extraordinarily sensitive cast, since adversaries could or likely would interpret a penetration of important targets as a potentially hostile act if or when they are discovered. How are you planning to monitor cyber intelligence collection operations under title 50 authorities and to coordinate with the USD(P) and the CIO?

Secretary VICKERS. Because the cyber mission transcends the various OSD offices which execute a principal staff advisor role, it is imperative that the Office of the Under Secretary of Defense (Intelligence) (OUSD(I)) coordinates and consults with these offices in order to ensure the integration and synchronization of cyber efforts amongst the military and the Intelligence Community to satisfy the requirements of the warfighter. USD(I) oversight of any cyber intelligence collection operations under title 50 authorities is conducted in accordance with applicable laws on reporting requirements for intelligence and intelligence-related sensitive activities. Oversight is executed in order to promote better cooperation and collaboration amongst the Defense Intelligence Enterprise to ensure efficient and effective use of our limited resources to achieve the Nation's highest priorities in accordance with the National Security Strategy, the Defense Intelligence Strategy, and the CIO's priorities.

5. Senator LEVIN. Secretary Vickers, are the USD(P) and the CIO going to be consulted about sensitive intelligence operations in cyberspace?

Secretary VICKERS. As stated in a previous response, USD(I) consults and coordinates with USD(P) and CIO on significant intelligence and intelligence-related activities in accordance with current DOD policy. Because of the sensitivities that such operations could have across the Department, it is critical that OUSD(I) coordinates and consults with the various OSD offices which execute a principal staff advisory role pertaining to the cyber mission such as USD(P) and CIO. This close cooperation within the Department and within the Intelligence Community has empowered the Defense Intelligence Enterprise to support U.S. national objectives while maximizing our effectiveness.

6. Senator LEVIN. Secretary Vickers, the National Security Strategy states that the United States will enhance deterrence in cyberspace by "improving our ability to attribute and defeat attacks on our systems or supporting infrastructure." If confirmed as USD(I), what role will you play in identifying an effective deterrence strategy and declaratory policy for cyberspace?

Secretary VICKERS. USD(I) is a primary stakeholder in Department-wide efforts to define an effective deterrence strategy and declaratory policy for cyberspace. If confirmed, I will work closely with USD(P) and the Chairman of the Joint Chiefs of Staff and will participate in National Security Council (NSC)-led fora related to this matter.

7. Senator LEVIN. Secretary Vickers, in your view, what are the elements of an effective deterrence posture for cyberspace that could attribute and defeat attacks?

Secretary VICKERS. An effective deterrence posture is one that would deny aggressors any benefit of an attack through a blend of diplomatic, informational, military, and economic tools to influence behavior.

8. Senator LEVIN. Secretary Vickers, are those two elements alone really enough to deter attacks, or is it also necessary to have a counter-attack component?

Secretary VICKERS. As we define our deterrence strategy, the challenge is to make our defense effective enough to deny an aggressor the benefit of an attack. In cyberspace, as with other areas, the United States reserves the right to respond using the full range of diplomatic, economic, and military tools at its disposal. Response to a cyber attack, if necessary, does not require a response in like kind.

INFORMATION OPERATIONS AND STRATEGIC COMMUNICATIONS ACTIVITIES

9. Senator LEVIN. Secretary Vickers, in response to the committee's advance policy questions, you advocate for a robust DOD presence in conducting information operations and strategic communications programs more broadly in both theaters of war and globally. According to the Government Accountability Office, DOD spends "hundreds of millions of dollars each year" conducting these operations. This committee and Congress have repeatedly questioned DOD's ability to measure the effectiveness of the dollars spent supporting these operations. In your view, has DOD done enough to explain the measures of effectiveness for these programs?

Secretary VICKERS. The rapidly expanding pace of change in the information environment made global and instantaneous communications possible in ways that were unimaginable just a decade ago. Across the globe, our friends and our adversaries are constantly producing and consuming information that influences their decisions and their actions. Drawing a causal link between a discrete action in today's information environment and an individual or group decision is very challenging. We continue to place great emphasis on obtaining good measures of effectiveness and conducting thorough assessments of all of our information operations. Leveraging lessons learned from commercial enterprises, academia, and our interagency partners, we have made some progress to improve our ability to measure effects in our information programs. That said, we must continue to do much more in this area. As the information environment continues to evolve and its complexity grows, DOD must continue to press for new and innovative ways both to communicate with intended audiences and to measure the effects of communications and engagements.

10. Senator LEVIN. Secretary Vickers, do you believe the programs you authorized while you were Assistant Secretary of Defense for Special Operations and Low Intensity Conflict have had a measurable impact?

Secretary VICKERS. Yes, although drawing a causal link between discrete acts in today's information environment and an individual or group response is very challenging, we continue to refine and improve our abilities to measure the impact of our operations. We must continue to invest both resources and intellectual energies to meet this challenge. Our measurement efforts routinely demonstrate our impact. Our COCOM-sponsored websites have ever increasing readership, providing frequent and robust feedback. Our small teams supporting embassies abroad are lauded both by the U.S. embassies they support and the partner nations with whom they interact. Advertising for our rewards programs has significantly increased the number and frequency of reports of high value targets and terrorist supporting materials.

As the information environment continues to evolve, and its complexity grows, DOD will continue to press for new and innovative ways both to communicate with its intended audiences and to measure the effects of our communications and engagements.

11. Senator LEVIN. Secretary Vickers, in response to the committee's advance policy questions, you suggest that DOD's information operations and strategic communications programs should support more robustly other government departments

and agencies in countering the message of violent extremists. Given the clear lines of authority that each government department and agency are given by Congress, how do you foresee DOD increasing its support of the Department of State (DOS) and/or the Central Intelligence Agency?

Secretary VICKERS. The purpose of DOD Information Operations is to support our military objectives. The global nature of modern communications has blurred, however, traditional lines between agency-specific communications programs, increasing the need for mutual reinforcement among them. Messages promulgated by one department or agency which might previously have had effects limited to a single geographic region or audience now find immediate global resonance. This new communications paradigm makes cooperation and collaboration within and among the various departments critical to ensure consistency and efficacy of the U.S. global message. DOD maintains unique capabilities to reach audiences in denied areas or to promulgate information in ways that can support our military objectives. Those capabilities can also contribute, where appropriate, to the larger U.S. Government communications and public diplomacy strategies, in furtherance of U.S. national security objectives. We will continue to strive to provide transparency of our operations within the interagency environment, but more importantly, we will make our capabilities available to support other departments and agencies in areas where those capabilities provide additional options for effective communications and engagement.

12. Senator LEVIN. Secretary Vickers, do you believe DOD has the authority for expanded support operations?

Secretary VICKERS. We have the authorities to support where and when required. We will continue to leverage long-established processes and mechanisms for planning, deconfliction, and partnered efforts to enhance mutually supporting objectives with our interagency partners.

QUESTIONS SUBMITTED BY SENATOR MARK UDALL

1208 FUNDING

13. Senator UDALL. Secretary Vickers, the committee has expressed concern that U.S. Special Operations Command may be using section 1208 funding, which is intended to support counterterrorism operations, for long-term engagement with partner nations. Is this still the case or has it been corrected?

Secretary VICKERS. Section 1208 funds must be used for specific counterterrorism operations, not long-term engagement. Improved reporting procedures and increased coordination with and notifications to Congress have helped address past concerns regarding DOD section 1208 programs. Reviews conducted as part of our annual process by Assistant Secretary of Defense for Special Operations/Low-Intensity Conflict and Interdependent Capabilities, U.S. Special Operations Command, and the Geographic Combatant Commands, have resulted in the termination of several operations over the last 3 fiscal years. Beginning in 2010, SOLIC&IC began notifying the congressional committees with a list of approved continuing operations for the next fiscal year, along with any cost estimate changes. This information is also provided in the annual report to Congress in accordance with section 1208.

ZONES OF HOSTILITIES

14. Senator UDALL. Secretary Vickers, in your advance policy questions, you state that outside zones of hostilities, DOD plays a supporting role in combating terrorism. Does that mean that outside of Iraq and Afghanistan, the concurrence of our ambassadors is required?

Secretary VICKERS. We work closely with our DOS and other government agency colleagues to support whole-of-government approaches to terrorism challenges both inside and outside zones of hostilities. When directed by the President and the Secretary of Defense, geographic combatant commanders conduct counterterrorism operations in support of U.S. Government objectives while ensuring appropriate Chiefs of Mission are consulted and kept informed of all U.S. military activities.

15. Senator UDALL. Secretary Vickers, how does DOD define zones of hostilities in this context?

Secretary VICKERS. In the context of my response, this term refers to Iraq and Afghanistan.

QUESTIONS SUBMITTED BY SENATOR MARK BEGICH

INTEGRATING INTELLIGENCE CAPABILITIES

16. Senator BEGICH. Secretary Vickers, in your view, what challenges will you face in integrating intelligence capabilities of DOD with the Department of Homeland Security (DHS) and other Federal, State, and local agencies?

Secretary VICKERS. DOD enjoys a very positive relationship with DHS. Our commitment to DHS expands far beyond intelligence integration.

I believe one of our greatest challenges to integrating intelligence capabilities between DHS and DOD is the important policy and legal balance regarding the protection of privacy rights and civil liberties. In fact, this challenge expands beyond the DHS and the DOD relationship and is indicative of the greater information-sharing issues facing the whole-of-government. The protection of privacy and other legal rights of Americans while defending our Homeland is no easy task. As we develop solutions, this protection of civil liberties is a core principle that must be kept in mind.

I recognize the imperative for efficient integration between DOD, DHS, and other Federal, State, and local agencies and believe collaboration is a key driver of effective integration. As such, I am in the process of considering a first of its kind Joint Duty Assignment of a DHS representative to serve as a full-time liaison between DHS's Office of Intelligence and Analysis, State and Local Program Office, and the OUSD(I).

In their mission to detect, prevent, and respond to acts of terrorism and weapons of mass destruction, State, local, and tribal agencies depend on the relationship between DHS and DOD. This relationship literally provides a critical link to actionable intelligence information. For example, allowing select State and major urban area fusion center personnel with appropriate security clearances access to appropriate classified terrorism-related information residing on DOD's classified networks is a major step forward. This information will contribute significantly to improving their mission processes supporting Suspicious Activity Reports and Alerts, Warning, and Notifications of potential attacks on our Homeland. This example of a joint initiative has bolstered increased collaboration between DHS, DOD, and other Federal departments and agencies, enabling the trusted and secure exchange of terrorism-related information in order to detect, deter, prevent, and respond to Homeland security threats.

17. Senator BEGICH. Secretary Vickers, are there steps DOD can take to better coordinate its efforts to combat terrorism with other agencies?

Secretary VICKERS. DOD extensively coordinates its efforts to combat terrorism with the National Security Staff, Chiefs of Mission, Chiefs of Station, relevant departments and agencies, and field activities to enable the broadest interagency collaboration consistent with maintaining the security of our efforts. We recognize that this is a constant process that requires regular and routine interface at multiple levels within the respective organizations. We have made wide use of the "Joint-Interagency Task Force" model to bring our interagency colleagues into a collaborative planning and execution forum, and are always vigilant for ways to share best practices and make adjustments to the process.

It is critically important that DOD's counterterrorism activities be fully synchronized and integrated with those of other agencies to develop an optimal whole-of-government response to this vital national security issue. Nowhere is this need for integration more important than in our intelligence and information-sharing activities across the entire Intelligence Community. To support this objective, the DOD focal point for counterterrorism intelligence, the Defense Intelligence Agency's (DIA) Joint Intelligence Task Force for Combating Terrorism, has recently assigned a senior representative to work at the National Counterterrorism Center (NCTC) as a means of improving coordination between Defense and Intelligence Community counterterrorism analytic efforts. Finally, as part of the Secretary of Defense Efficiencies Initiatives, we have directed DIA to conduct a review of the overall Defense relationship with NCTC and develop an appropriate course of action and implementation plan to maximize the integration of analytic capabilities and information-sharing across the national and defense counterterrorism intelligence missions.

[The nomination reference of Hon. Michael G. Vickers follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 5, 2011.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Michael Vickers, of Virginia, to be Under Secretary of Defense for Intelligence, vice James R. Clapper.

[The biographical sketch of Hon. Michael G. Vickers, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHY OF MICHAEL G. VICKERS

Education:

- Johns Hopkins University, Baltimore, MD (attended Nitze School of Advanced International Studies, Washington, DC)
 - Doctor of Philosophy, International Relations-Strategic Studies
 - 1991–2010 (non-resident since 1995); degree awarded August 2010
- The Wharton School, University of Pennsylvania, Philadelphia, PA
 - Master of Business Administration
 - 1986–1988; degree awarded May 1988
- University of Alabama, Tuscaloosa, AL
 - Bachelor of Arts, International Relations
 - 1980–1983 (New College - External Degree Program); degree awarded June 1983

Employment Record:

- Acting Under Secretary of Defense for Intelligence and Assistant Secretary of Defense for Special Operations/Low Intensity Conflict & Interdependent Capabilities
 - 2011–Present
- Assistant Secretary of Defense for Special Operations/Low Intensity Conflict & Interdependent Capabilities
 - 2007–Present
- Center for Strategic and Budgetary Assessments
 - Senior Vice President, Strategic Studies
 - 1996–2007
- Johns Hopkins University, Nitze School of Advanced International Studies
 - Acting Co-Director, Strategic Studies, and Professorial Lecturer (part-time)
 - 1996–1997
- Department of Defense
 - Special Government Employee (paid), Defense Science Board Task Force (part-time), 1996
 - Unpaid member, Defense Science Board Task Force (part-time), 1998, 1999
- Independent Consultant
 - Principal clients: Science Applications International (contract work for the Department of Defense); Defense Budget Project (predecessor organization of the Center for Strategic and Budgetary Assessments)
 - 1994–1996
- Office of Net Assessment, Department of Defense
 - Strategic Studies Fellow (part-time)
 - 1993–1994
- News America Publishing (New York, NY)
 - Editor and Managing Director, The Daily Intelligence Brief (start-up)
 - 1990–1991
- BioAutomation, Inc (Bridgeport, PA)

- Vice President and Chief Financial Officer (start-up)
- 1988–1990
- Metallic Ceramic Coatings, Inc. (Bridgeport, PA)
 - Vice President, Finance and Strategy
 - 1986–1988; 1992–1994
- Central Intelligence Agency
 - Operations Officer
 - 1983–1986
- U.S. Army
 - Special Forces Officer (Captain) and Noncommissioned Officer (Staff Sergeant)
 - 1973–1983

Honors and awards:

- Distinguished Member, 1st Special Forces Regiment, U.S. Army (2010)
- Alexander Hamilton Fellowship (Smith Richardson Foundation) (1993)
- Certification of Distinction, Central Intelligence Agency (1984)
- Honors graduate (cum laude), University of Alabama (1983)
- Meritorious Service Medal (1976, 1983)

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate, and certain senior military officers as determined by the committee, to complete a form that details the biographical, financial and other information of the nominee. The form executed by Hon. Michael G. Vickers in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR–228

Washington, DC 20510–6050

(202) 224–3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A–9, B–4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Michael George Vickers.

2. **Position to which nominated:**
Under Secretary of Defense (Intelligence).

3. **Date of nomination:**
Originally nominated: September 29, 2010; renominated: January 5, 2011.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

April 27, 1953; Burbank, CA.

6. Marital Status: (Include maiden name of wife or husband's name.)

Married to Melana Zyla Vickers.

Maiden Name: Melana Kalyna Zyla.

7. Names and ages of children:

Alexandra Novakovic Vickers, age 22.

Natasha Novakovic Vickers, age 19.

Sophia Novakovic Vickers, age 17.

Oksana Elizabeth Vickers, age 9.

Kalyna Cecilia Vickers, age 5.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Johns Hopkins University, Baltimore, MD, 1991–2010, Doctor of Philosophy, International Relations, degree conferred August 2010.

University of Pennsylvania, Philadelphia, PA, 1986–1988, Master of Business Administration, degree conferred May 1988.

University of Alabama, Tuscaloosa, AL, 1980–1983. Bachelor of Arts, International Relations, degree conferred 1983.

Hollywood High School, Hollywood, CA, 1968–1971, High School diploma.

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Assistant Secretary of Defense (Special Operations/Low Intensity Conflict and Interdependent Capabilities); 2500 Defense Pentagon, Room 3C852A; August 3, 2007 to Present (confirmed July 23, 2007).

Senior Vice President, Strategic Studies, Center for Strategic and Budgetary Assessments; 1667 K Street, NW, Suite 900, Washington, DC; September 1996 to August 2007.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Classified and unclassified contract consulting work for the Department of Defense, 1994 to 2007 while employed by the Center for Strategic and Budgetary Assessments (1996 to 2007) and as a self-employed consultant (1994 to 1996).

Part-time employment (paid) as a special government employee as a member of a Defense Science Board Task Force, 1996; unpaid service as a member of Defense Science Board Task Forces, 1998, 1999.

Operations Officer, Central Intelligence Agency, June 1983 to March 1986.

Commissioned Officer, U.S. Army, December 1978 to June 1983.

Enlisted, U.S. Army, June 1973 to December 1978.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Trustee, Vickers Family Revocable Trust since December 2004; Melana Zyla Vickers (wife), co-trustee.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

None.

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

None.

14. Honors and Awards: List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

Meritorious Service Medal (U.S. Army); two awards, 1976, 1983.

Certificate of Distinction, Central Intelligence Agency, 1984.

Bachelor of Arts, Cum Laude, University of Alabama, 1983.

Alexander Hamilton Fellowship (Smith Richardson Foundation), 1993.
Distinguished Member, 1st Special Forces Regiment, U.S. Army, 2010.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

My most recent publication is my Ph.D. dissertation, "The Structure of Military Revolutions" (Johns Hopkins University, July 2010), which is available through University Microfilms (UMI).

I am the author of two book chapters: "The Revolution in Military Affairs and Military Capabilities," in Robert Pfaltzgraff and Richard Shultz, eds., *War in the Information Age* (Brassey's, 1997); and "Revolution Deferred: Kosovo and the Transformation of War," in Andrew Bacevich and Eliot Cohen, eds., *War Over Kosovo: Politics and Strategy in a Global Age* (Columbia University Press, 2001).

I am the author or co-author of five Center for Strategic and Budgetary Assessments monographs: "War in 2020—A Primer" (1996); "The Military Revolution and Intrastate Conflict" (1997); "The Quadrennial Defense Review: An Assessment" (1997); "Strategy for a Long Peace" (2001); and "The Revolution in War" (2004). I am also the author co-author of four CSBA Backgrounders: "Intelligence Reform and the Next CIA Director" (2004); "The 2001 Quadrennial Defense Review, the Fiscal Year 2003 Defense Budget Request and the Way Ahead for Transformation" (2002); "The Hart-Rudman Commission Report: A Critique" (2000); and "Perspectives on the Revolution in Military Affairs" (1996).

I have had three opinion-editorials published by USA Today: "For Guidance on Iraq, Look to Afghanistan" (June 2004); "Will We Heed Lessons of War in Kosovo?" (June 1999); and "Ground Troops, Yes, But Whose?" (April 1999). I have had one opinion-editorial published by the Washington Post: "Ground War: Doing More With Less" (April 2003). I have had two book reviews published by the Wall Street Journal: "The Destiny of Combat" (Review of Caspar Weinberger and Peter Schweitzer, *The Next War*, and George and Meredith Friedman, *The Future of War*, March 1997) and "The Future of Force" (Review of Frederick Kagan, *Finding the Target*, November 2006). I have had one book review published by the Journal of Military History: *The Making of Strategy: Rulers, States, and War*, Williamson Murray, MacGregor Knox, and Alvin Bernstein, eds. (October 1997). I have also had an article published by Armed Forces Journal: "What the QDR Should Say?" (2006).

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. **Commitments regarding nomination, confirmation, and service:**

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

MICHAEL G. VICKERS.

This 12th day of January, 2011.

[The nomination of Hon. Michael G. Vickers was reported to the Senate by Chairman Levin on March 15, 2011, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on March 17, 2011.]

[Prepared questions submitted to Dr. Jo Ann Rooney by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?
Answer. Not at this time.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. N/A.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. My broad professional experiences, educational credentials, and lifelong commitment to service provide a solid background for me to recognize and contribute positively to myriads of formidable challenges and tasks facing DOD and, in particular, Personnel and Readiness. During my 8 years as president of a doctoral level university, we successfully addressed not only difficult financial challenges, enabling the institution to realize significant operating surpluses after years of deficits, but developed an innovative educational model that directly impacted retention, graduation rates, and student success. By offering courses in a variety of delivery modalities, including blocks sessions, accelerated, low residency, and traditional semesters, we were able to deliver a unique, sustainable solution to the educational needs of traditional, nontraditional, and graduate students while at the same time creating a new business and human resource model for the university. My work on the Jewish Hospital Saint Mary's Healthcare System Board of Trustees in a leadership role has allowed me to be directly involved in developing policies and procedures impacting patient care, safety, operating efficiencies, and human resource policies across a system encompassing ambulatory, community hospitals and tertiary care facilities, an inpatient psychiatric hospital, a comprehensive rehabilitation facility, and clinical research. My current work as president of Mount Ida College and being a member of the Board of Trustees of Regis University have given me additional opportunities to lead an organization through a period of significant transition and be at the forefront of educational innovation. Other corporate and civic engagements have enabled me to lead organizations through dynamic structural and financial changes enabling them to better serve their constituents. My many years of experience outside of post secondary education in tax law, business, and finance provide me with a solid foundation and breadth of knowledge to deal with complex legal, financial, and policy issues.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the next Principal Deputy Under Secretary of Defense for Personnel and Readiness (P&R)?

Answer. There are a number of challenges facing P&R to ensure the human resource systems for civilian and military personnel, Active and Reserve, provide the level of training and high level skills needed to support current as well as potential future engagements. This includes evaluating and providing appropriate compensation and personnel policies commensurate with the skills and sacrifices being made by those in service to our country; ensuring quality, world-class health care, including mental health support, to ill and injured servicemembers; and providing comprehensive support services to families of servicemembers. In addition, there needs to be ongoing evaluation of current policies and procedures to identify opportunities for enhanced efficiencies without impacting service delivery.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. Although I do not have specific recommendations at this time, if confirmed, I would review the plans currently in place to address these challenges and determine what modifications, if any, need to be made. I would look for opportunities to enhance communication and collaboration with my colleagues throughout DOD to improve effectiveness in delivering programs supporting Personnel and Readiness.

DUTIES

Question. Section 136a of title 10, U.S.C., provides that the Principal Deputy Under Secretary of Defense for Personnel and Readiness shall assist the Under Secretary of Defense for Personnel and Readiness in the performance of his or her duties.

Answer. Assuming you are confirmed, what duties do you expect to be assigned to you?

Answer. If confirmed, I expect the Secretary of Defense to assign me my duties, through the Under Secretary of Defense for Personnel and Readiness, functions, and responsibilities currently mandated by law and specified in the Department's directives for the position of Principal Deputy Under Secretary of Defense for Personnel and Readiness.

Question. In carrying out these duties, what would be your relationship with the following officials:

The Secretary of Defense.

Answer. If confirmed, I would serve the Secretary as his advisor and advocate for the management of human resources in the Department.

Question. The Deputy Secretary of Defense.

Answer. If confirmed, I would serve the Deputy Secretary as his advisor and advocate for the management of human resources in the Department.

Question. The Assistant Secretary of Defense for Health Affairs (ASD(HA)).

Answer. If confirmed, ASD(HA) would be my principal advisor for all DOD health policies, programs, and force health protection activities.

Question. The Assistant Secretary of Defense for Reserve Affairs (ASD(RA)).

Answer. If I am confirmed, ASD(RA) would be my principal advisor for all Reserve component matters in the Department of Defense (DOD).

Question. The DOD General Counsel.

Answer. If confirmed, I would anticipate regular communication, coordination of actions, and exchange of views with the General Counsel and the attorneys assigned to focus on personnel and readiness policy matters. I would expect to seek and follow the advice of the General Counsel on legal, policy, and procedural matters pertaining to the policies promulgated from the USD(P&R).

Question. The DOD Inspector General.

Answer. The DOD Inspector General is in charge of promoting integrity, accountability, and improvement of DOD personnel, programs, and operations to support the Department's mission and serve the public interest. If confirmed, I would fully assist in any investigations or issues that relate to personnel and readiness.

Question. The Service Secretaries.

Answer. If confirmed, I would work closely with the Secretaries of the Military Departments on all matters relating to the management and well-being of military and civilian personnel in the DOD Total Force structure.

Question. The Chief of the National Guard Bureau.

Answer. The Chief, National Guard Bureau is a principal advisor to the Secretary of Defense, through the Chairman of the Joint Chiefs of Staff, on matters involving non-Federalized National Guard forces and on other matters as determined by the Secretary of Defense. If confirmed, I would work through ASD(RA) to ensure effective integration of National Guard capabilities into a cohesive Total Force.

Question. The Assistant Secretaries for Manpower and Reserve Affairs of the Army, Navy, and Air Force.

Answer. If confirmed, I would work with these officials as partners in carrying out the human resource obligations of the Services.

Question. The Deputy Chiefs of Staff of the Army and Air Force for Personnel, the Chief of Naval Personnel, and the Deputy Commandant of the Marine Corps for Manpower and Reserve Affairs.

Answer. If confirmed, I would work closely with these officers to ensure that DOD attracts, motivates, and retains the quality people it needs.

Question. The combatant commanders.

Answer. If confirmed, I would foster mutually respectful working relationships that translate into providing the Total Force capabilities needed to complete combat missions.

Question. The Joint Staff, particularly the Director for Manpower and Personnel (J-1).

Answer. If confirmed, I would seek a close coordinating relationship and open channels of communication with the Joint Staff regarding personnel and readiness policy issues.

SYSTEMS AND SUPPORT FOR WOUNDED WARRIORS

Question. Servicemembers who are wounded and injured performing duties in Operations Enduring Freedom, Iraqi Freedom, and New Dawn deserve the highest priority from their Service for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from Active Duty, if required, and continuing support beyond retirement or discharge. Yet, as the revelations at Walter Reed Army Medical Center (WRAMC) in 2007 illustrated, the Services were not prepared to meet the needs of returning wounded servicemembers. Despite the enactment of legislation and renewed emphasis, many challenges remain.

What is your assessment of the progress made to date by DOD and the Services to improve the care, management, and transition of seriously ill and injured servicemembers and their families?

Answer. While I do not have enough information at this time to make a full assessment, I am aware that medical, benefit, and transitional assistance improvements have been made since 2007 to ensure our wounded, ill, and injured servicemembers receive the care and support necessary to either return to Active Duty or to civilian life. However, it is a continually evolving process with ever increasing demands and the Department must regularly evaluate its Wounded Warrior programs and constantly strive to improve.

Question. What are the strengths upon which continued progress should be based?

Answer. A significant strength, in my opinion, is the highest level priority the Department has placed on caring for our wounded warriors and their families. The sustained focus and assessment of the needs of the wounded, ill, and injured servicemembers will allow the Department to continue its progress in caring for these members.

Question. What are the weaknesses that need to be corrected?

Answer. The Department should better identify opportunities for improvement by putting in place a proactive assessment and evaluation process that corrects weaknesses.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase support for wounded servicemembers and their families, and to monitor their progress in returning to duty or to civilian life?

Answer. Although I do not have any specific recommendations at this time, if confirmed, I would ensure that current programs and policies are regularly evaluated and outcome assessments conducted with adjustments made, as needed, to ensure necessary resources are in place to take care of our recovering wounded warriors and their families.

Question. Studies conducted as a result of the revelations at WRAMC pointed to the need to reform the disability evaluation system (DES). A DES pilot program, and now an Integrated DES program, has been established to improve processing of servicemembers.

What is your assessment of the need to further streamline and improve the Integrated DES?

Answer. There are always opportunities for improvements. I believe the Department has an obligation to our servicemembers participating in the Integrated DES to proactively evaluate the program and proactively apply lessons learned.

Question. If confirmed, how will you address any need for change?

Answer. The Integrated DES is a collaborative effort between DOD and the Department of Veterans Affairs. If confirmed, I would work in close collaboration with the Department of Veterans Affairs to continually evaluate the process and apply unified solutions to correct identified deficiencies.

DEPARTMENT OF DEFENSE AND DEPARTMENT OF VETERANS AFFAIRS COLLABORATION

Question. Secretary of Defense Gates and Secretary of Veterans Affairs Shinseki have pledged their support for improving and increasing collaboration between their respective departments to support military servicemembers as they transition to veteran status, in areas of health and mental health care, disability evaluation, and compensation.

If confirmed, what role would you expect to play in ensuring that DOD and Veterans Affairs achieve the administration's objectives in DOD and VA collaboration?

Answer. If confirmed, I will be intimately involved in the collaborative efforts between DOD and the Department of Veterans Affairs. I share the vision of a model interagency partnership that delivers seamless, high quality, and cost-effective services to beneficiaries and value to our Nation. I will do my utmost to provide leadership that enables the interagency effort and facilitate the completion of those goals. Together with USD(P&R), I will ensure that DOD continues to work closely with the Department of Veterans Affairs to ensure that transitioning servicemembers receive the benefits, care, and transition support they deserve.

DISABILITY SEVERANCE PAY

Question. Section 1646 of the Wounded Warrior Act, included in the National Defense Authorization Act for Fiscal Year 2008, enhanced severance pay and removed a requirement that severance pay be deducted from VA disability compensation for servicemembers discharged for disabilities rated less than 30 percent incurred in the line-of-duty in a combat zone or incurred during the performance of duty in combat-related operation as designated by the Secretary of Defense. In adopting this provision, Congress relied on the existing definition of a combat-related disability contained in title 10 U.S.C. 1413a(e)). Rather than using the definition intended by Congress, DOD adopted a more limited definition of combat-related operations, requiring that the disability be incurred during participation in armed conflict.

If confirmed, will you reconsider the Department's definition of combat-related operations for purposes of awarding enhanced severance pay and deduction of severance pay from VA disability compensation?

Answer. Although I do not know the details, it is my understanding that a review of the policy implementing section 1646 of the Wounded Warrior Act is currently underway. If confirmed, I would look into the status of this review to ensure that any policy change relating to the definition, if warranted, meets the intent of Congress and is consistent with the governing statute.

HOMOSEXUAL CONDUCT POLICY

Question. The current Homosexual Conduct Policy, commonly referred to as "Don't Ask, Don't Tell" went into effect in February 1994 after months of congressional hearings and debate resulting in the enactment of a Federal statute. Although there have been some changes in how this policy has been implemented, the basic policy has not changed. President Obama made it clear that he intends to work with the military and with Congress to repeal the policy. Following their February 2, 2010, testimony recommending repeal of the policy, Secretary of Defense Gates and Chairman of the Joint Chiefs of Staff Admiral Mullen, initiated a high-level, comprehensive review of the impact of repealing the current law.

What is your view on repealing or changing this policy?

Answer. If confirmed, I would assist the USD(P&R) to work closely with the Military Department Secretaries and the Service Chiefs to provide the Secretary of Defense the best advice possible on the way forward regarding this issue.

Question. If confirmed, what role, if any, would you anticipate playing in efforts to repeal or change this policy?

Answer. If Congress changes the law and if confirmed, I would assist USD(P&R) in leading the implementation of the change in the policy within DOD. I would work closely with the Services to ensure the revising of this policy is done in a way that maintains our highest state of military readiness.

RELIGIOUS GUIDELINES

Question. What is your understanding of current policies and programs of DOD regarding religious practices in the military?

Answer. The Department does not endorse the establishment of religion, but it does guarantee its free exercise. The Department and the Military Services ensure servicemembers may observe the tenets of their respective religions, including the right to hold no specific religious conviction or affiliation.

Question. In your view, do these policies appropriately accommodate religious practices that require adherents to wear particular articles of faith?

Answer. My understanding is that wearing particular articles of faith are permissible so long as the articles are neat and conservative; do not negatively impact the readiness, good order, or discipline of the unit; and the mission is not jeopardized. If confirmed, I would continue to monitor and evaluate this issue.

Question. In your view, do these policies appropriately accommodate the free exercise of religion and other beliefs without impinging on those who have different beliefs, including no religious belief?

Answer. Yes.

Question. In your view, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. It is my understanding that the military chaplaincy has done an admirable job in ministering amidst the pluralistic environment of the military. Even as chaplains express their faith, they and their commanders also are asked to be as inclusive as possible when ministering to an interfaith group. I believe that as a group, military chaplains work to balance these responsibilities well.

Question. The Independent Review Related to Fort Hood observed that "DOD policy regarding religious accommodation lacks the clarity necessary to help commanders distinguish appropriate religious practices from those that might indicate a potential for violence or self-radicalization." Recommendation 2.7 of the Final Recommendations urged the Department to update policy to clarify guidelines for religious accommodation and Recommendation 2.8 urged the Department to task the Defense Science Board to "undertake a multi-disciplinary study to identify behavioral indicators of violence and self-radicalization ...".

What is your view of this recommendation?

Answer. I cannot make an assessment at this time, but if confirmed, evaluating the adequacy of current policies concerning the safeguarding of our servicemembers would be a top priority.

Question. Will you work to ensure that a scientific fact-based approach to understanding radicalization will drive the Department's relevant policies on this topic?

Answer. If confirmed, I would review the plans that are currently in place to address these challenges, and determine what, if any, changes should be made to them to address this critical issue. I would intend to collaborate with my colleagues in the Office of the Secretary of Defense, the Military Services, and the Joint Staff in charting the right course for the Department.

PROTECTION OF U.S. FORCES AGAINST INTERNAL THREATS

Question. One year ago, 13 people were slain and scores wounded during a shooting rampage allegedly carried out by a U.S. Army medical corps officer. A DOD review of the attack released in January 2010 concluded that the Department was poorly prepared to defend against internal threats, including radicalization among military personnel.

What is your assessment of the lessons learned from the tragedy at Fort Hood?

Answer. It is my understanding that while the first responders and initial response teams were well-prepared to react to this incident, the proceeding warning signals were not properly recognized and therefore, this tragedy was not prevented. If confirmed, I would work with the USD(P&R) to gain a comprehensive understanding of the lessons learned, corrective actions taken, and the plan moving forward in order to increase our force protection on our installations.

Question. If confirmed, what strategies would you advocate to prevent and mitigate such threats in the future?

Answer. If confirmed, I would work closely with DOD leadership to strengthen the areas identified by the Fort Hood Independent Review to include mitigating violence in the workplace, ensuring commanders/supervisors have access to appropriate personnel records, and integrating and strengthening force protection policies. Furthermore, I will work closely with our medical community to give commanders a better understanding of how to identify violence indicators.

MUSLIMS IN THE U.S. MILITARY

Question. Are you concerned that the attack at Fort Hood could lead to harassment or even violence against Muslims in the military?

Answer. Every servicemember has a right to practice their religious faith without fear of persecution or retribution. If confirmed, I will review policies to ensure that they are adequate to provide physical and emotional safety from religious harassment and will take appropriate action, if needed.

Question. If confirmed, what strategies would you advocate to address the potential for harassment or violence against Muslims in the U.S. military?

In order to safeguard the rights of servicemembers, there must be both formal and informal feedback procedures that quickly identify and assess any harassment, should it occur. Responses to grievances, or any identified shortcomings in command climate assessments, must be quick, thoughtful, and effective. If confirmed, I would review the viability of these feedback systems, and take measures to correct them, as appropriate.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. The Department has in recent years developed comprehensive policies and procedures to improve the prevention of and response to incidents of sexual assaults, including providing appropriate resources and care for victims of sexual assault. However, numerous incidents of sexual misconduct involving military personnel in combat areas of operation are still being reported. Victims and their advocates claim that they are victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate treatment for the victim. They assert that their command fails to respond appropriately with basic medical services and with an adequate investigation of their charges followed by a failure to hold assailants accountable.

Do you consider the current sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Answer. It is my understanding that the Department has put considerable effort into the development of policies and programs designed to address sexual assault. If confirmed, I would review those policies to ensure the Department provides the appropriate care to victims and hold offenders accountable.

Question. What problems, if any, are you aware of in the manner in which this new confidential reporting procedure has been put into operation?

Answer. I have not been informed of any specific problems in the implementation of the confidential reporting option, called restricted reporting. I am aware that the restriction of no investigation when a victim chooses restricted reporting has concerned commanders responsible for the actions of their unit members. I believe that the Department must find a balance between victim care and offender accountability but of the utmost importance is that victims come forward and obtain support they need following an assault.

Question. What is your view of the steps the Services have taken to prevent and respond to sexual assaults in combat zones, including assaults against contractor personnel?

Answer. I do not have enough information to make a detailed assessment at this time, but I am aware the Department has focused on educating servicemembers deploying to combat zones about how to prevent sexual assault and what to do should it occur. That said, it has been made clear to me that if anyone shows up at a military treatment facility following a sexual assault, he or she will receive care.

Question. What is your view of the adequacy of the training and resources the Services have in place to investigate and respond to allegations of sexual assault?

Answer. I know that all Services have been directed to establish guidelines for a 24-hour, 7-day per week sexual assault response capability for all locations, including deployed areas. At this time, I cannot make an assessment of the effectiveness of those guidelines, but if confirmed, evaluating the adequacy of training and resources allocated to sexual assault investigation and response would be a top priority.

Question. What is your view of the willingness and ability of the Services to hold assailants accountable for their acts?

Answer. I strongly believe that anyone who commits a sexual assault in the military needs to know that they will be held accountable. That is how DOD removes perpetrators from our ranks and, at the same time, show victims that taking the difficult step of assisting with an investigation will help their fellow servicemembers. I understand that the Services are working towards increasing the subject matter expertise of those investigating and prosecuting sexual assaults. If confirmed, I am committed to ensuring that accountability remains a key priority.

Question. If confirmed, what actions will you take to ensure senior level direction and oversight of efforts to prevent and respond to sexual assaults?

Answer. Sexual assault reaches across the Department, and as such, outreach and accountability efforts need to have the same reach. If confirmed, I would ensure that the Department has the correct structure in place to engage the departmental leadership, and the leadership of other agencies such as the Departments of Veterans Affairs, Health and Human Services, and Justice, in planning, guiding, and evaluating our efforts.

SERVICE ACADEMIES

Question. What do you consider to be the policy and procedural elements that must be in place at each of the Service Academies in order to prevent and respond appropriately to sexual assaults and sexual harassment and to ensure essential oversight?

Answer. I believe the Department's sexual assault and sexual harassment policies provide a foundation for combating sexual misconduct at the Service Academies. There must be policies and procedures that encourage victims to come forward and that hold offenders accountable, as well as effective training programs. It is my understanding that the academies have institutionalized prevention and response programs. I further understand that the Department reviews the efforts of the academies annually. If confirmed, I would continue that oversight and determine whether additional measures need to be taken.

Question. What is your assessment of measures taken at the Service Academies to ensure religious tolerance and respect, and to prevent sexual assaults and sexual harassment?

Answer. Regarding religious tolerance, I do not have enough information to make an assessment at this time. I believe it is imperative that leaders, at all levels, must continue to ensure that every member of the DOD respects the spirit and intent of laws and policies surrounding the free exercise of religion.

On the topic of sexual assault, it is my understanding that the academies have institutionalized prevention and response programs. I further understand that the Department reviews the efforts of the academies annually. If confirmed, I would continue that oversight and determine whether additional measures need to be taken.

WOMEN IN THE MILITARY

Question. The Navy recently opened service on submarines to women and the Marine Corps recently expanded service opportunities for women in intelligence specialties. The issue of the appropriate combat role of women in the Armed Forces is a matter of continuing interest to Congress and the American public.

Do you believe additional specialties should be opened up for service by women?

Answer. In my opinion, DOD has sufficient flexibility under current law to make assignment policy for women, if needed. DOD should continue to monitor combat needs as Services recommend expanding deployment roles for women.

Question. Do you believe any changes in the current policy regarding women in combat are needed?

Answer. I am not aware of any changes necessary at this time. It is my understanding that Department policy and practices are reviewed on a recurring basis to ensure compliance and effective use of manpower. If confirmed, I would take my responsibility to review each proposed policy change very seriously and ensure changes to existing policy move forward only when accompanied by a thorough plan for implementation.

RISING COSTS OF MEDICAL CARE

Question. In testimony presented to Congress in February 2009, the Assistant Director of the Congressional Budget Office asserted that "medical funding accounts for more than one-third of the growth projected for operations and support funding between 2009 and 2026." In April 2009, Secretary Gates told an audience at Maxwell Air Force Base that "health care is eating the Department alive."

What is your assessment of the long-term impact of rising medical costs on future DOD plans?

Answer. I am informed that government estimates indicate these costs could rise to over 10 percent of the DOD budget in just a few years. If confirmed, I would research means to ensure that DOD provides quality care, and it does so in the most cost-effective way that provides the best value for our servicemembers and their families.

Question. If confirmed, what actions would you initiate or recommend to the Secretary of Defense to mitigate the effect of such costs on the DOD top-line?

Answer. I cannot make specific recommendations at this time. However, if confirmed, I would work closely with our healthcare leadership in DOD to examine every opportunity to assure military beneficiaries are provided the highest quality care possible while managing cost growth and to provide that advice to the Secretary of Defense.

Question. What reforms in infrastructure, benefits, or benefit management, if any, do you think should be examined in order to control the costs of military health care?

Answer. I believe that to control the costs of military health care, DOD needs to research all possibilities. If confirmed, I would examine the costs of the direct care facilities, determining where efficiencies can be gained and investing wisely in infrastructure requirements. I would look at the efficiencies in procuring health care services in the civilian market, and, I would evaluate the benefit structure to see where reasonable changes could occur. In the long term, the promotion of healthy lifestyles and prevention among our beneficiaries will also help greatly reduce the demand for health services.

PERSONNEL AND ENTITLEMENT COSTS

Question. In addition to health care costs, personnel and related entitlement spending continues to grow and is becoming an ever increasing portion of the DOD budget.

What actions do you believe can be taken to control the rise in personnel costs and entitlement spending?

Answer. I am aware that personnel-related costs are consuming an increasing proportion of the Department's finite resources. At the same time, I believe DOD cannot fail to adequately provide for and support our All-Volunteer Force and their families. This includes maintaining a sufficient rotation base for both our Active and Reserve personnel. If confirmed, I know achieving a right-sized mix of Active Duty, Reserve, civilians, and contractors is imperative. A key part of this challenge will be striking the optimum balance between personnel, recapitalization, and operational and support costs, while ensuring that related entitlements are appropriate and well-reasoned.

Question. In your view, can the Department and the Services efficiently manage the use of bonuses and special pays to place high quality recruits in the right jobs without paying more than the Department needs to pay, or can afford to pay, for others?

Answer. Although I do not have a detailed knowledge of the Department's and the Services' special pay programs at this time, I believe the use of targeted pays and bonuses can be effectively and efficiently used in recruiting and retaining specific skills and specialties.

MENTAL HEALTH

Question. Senior military leaders, including the Secretary of Defense and Chairman of the Joint Chiefs of Staff, increasingly recognize the need to reduce the stigma for military personnel and their families and veterans in seeking mental health care.

If confirmed, what role would you expect to play in expanding breadth of this message to military personnel and their families?

Answer. If confirmed, I would continue to ensure that existing DOD efforts to combat stigma toward help-seeking behavior among servicemembers be supported and, if necessary, would expand the breadth of the outreach efforts. I fully support the Department's efforts to improve health and mental health care services, and reduce the stigma of mental health care.

SUICIDE PREVENTION

Question. The numbers of suicides in each of the Services has increased in recent years. The Army released a report in June 2010 that analyzed the causes of its growing suicide rate and examined disturbing trends in drug use, disciplinary offenses, and high-risk behaviors.

If confirmed, what role would you play in shaping DOD policies to help prevent suicides both in garrison and in theater and to increase the resiliency of all servicemembers and their families?

Answer. I believe DOD must support a culture to promote health and resiliency, and reduce high-risk behavior in the force. This requires both military and civilian leaders to be active participants in this effort and have essential roles in providing

the requisite support. If confirmed, I will assure that proper emphasis on suicide prevention is placed through training, reducing stigma, increasing resilience, and increasing access to care. I will focus on providing standardization, integration of best practices, and general oversight, serving as a change agent and providing guidance from which the Services can operate their suicide prevention programs.

Question. What is your understanding of the action that the Office of the Secretary of Defense is taking in response to the June 2010 Army report, and the data in Chapter 3 in particular?

Answer. The Army released a report in June 2010 that analyzed the causes of its growing suicide rate and examined disturbing trends in drug use, disciplinary offenses, and high-risk behaviors. If confirmed, I will ensure that the Army is enforcing existing regulations and policies and has implemented risk mitigation strategies in suicide prevention for the substance abuse and behavior issues (disciplinary and high risk) they identified. In addition, I would support ongoing assessment and monitoring of the impact of these policies and regulations on the suicide rate.

READINESS RESPONSIBILITIES

Question. Section 136 of title 10, U.S.C., gives the Under Secretary of Defense for Personnel and Readiness certain responsibilities for military readiness. Some important issues that affect military readiness, however, such as logistics and materiel readiness, have been placed under the jurisdiction of the Under Secretary for Acquisition, Technology, and Logistics.

What is your understanding of the responsibilities of the Under Secretary of Defense for Personnel and Readiness in ensuring military readiness?

Answer. I view the responsibilities of the USD(P&R) as to advise the Secretary on all matters related to readiness. These include oversight of civilian and military training and education, personnel and medical readiness, and the analysis of broad mission assessments from the combatant commanders regarding the readiness of key units in support of the Secretary's deployment decisions. As for readiness responsibilities across the Department, if confirmed, I will work collaboratively with my colleagues in OSD, the Joint Staff, and the Services to ensure our forces are ready to execute the National Military Strategy, and I will sustain the readiness synergism and linkages that exist today across the Department, the other Federal Agencies, our coalition partners, and local governments and communities.

Question. What are the most critical objectives to improve readiness reporting and monitoring of the Military Forces, and if confirmed, how would you work with the Military Departments as well as other Office of the Secretary of Defense offices to achieve them?

Answer. I believe the Department needs accurate and timely readiness assessments of our military forces. These are the gauge by which DOD should measure our ability to execute the missions assigned by the President and Secretary of Defense. Accurate assessments allow the Department to effectively plan and manage its forces, and signal where there are capability shortfalls or assets are needed. It is my understanding that the Defense Readiness Reporting System (DRRS) provides the means to capture these assessments from our military commanders, and provides a holistic and important view of the Department's readiness to the senior leadership. If confirmed, I would personally review DRRS implementation to ensure the Department is meeting the needs of the senior leadership and a unity of effort across the Department to drive this important effort to a fully operational capability.

ACTIVE-DUTY END STRENGTH

Question. In the National Defense Authorization Act for Fiscal Year 2010, Congress authorized higher Active Duty end strengths for all the Services.

In your view, what is the appropriate Active Duty end strength for each of the Services?

Answer. While I cannot make an informed assessment at this time, I believe strongly that our forces, both Active and Reserve, must be large enough to not only satisfy deployed demands, but also have a rotation base that recognizes the personal needs of our volunteers and their families. If confirmed, I would devote considerable attention to this important issue.

Question. What challenges will the Services face in maintaining these higher end strengths?

Answer. The foremost challenge will be monitoring and responding to retention and recruiting trends, especially as the economy improves.

MEDICAL PERSONNEL RECRUITING AND RETENTION

Question. DOD continues to face significant shortages in critically needed military medical personnel in both the Active and Reserve components. The committee is concerned that growing medical support requirements will compound the already serious challenges faced in recruitment and retention of military medical, dental, nurse, and behavioral health personnel.

What is your understanding of the shortages of health care professionals currently being experienced in DOD and the sufficiency of the plans to meet recruiting and retention goals?

Answer. Regarding military healthcare servicemembers, it is my understanding the current overall manning of the health professions is at or above manning requirements. If confirmed, one of my goals will be to improve the recruitment and retention of health professional specialties which currently fall below manning requirements. To retain our health professionals, Congress has provided DOD broad authority to provide special and incentive pays for all health professional officers. I believe there is an increased need for civilian healthcare providers and DOD must remain competitive to recruit from the civilian labor market.

Question. What legislative and policy initiatives, including bonuses and special pays, do you think may be necessary to ensure that the Military Services can continue to meet medical support requirements?

Answer. In regard to legislative and policy initiatives for the Military Services, I do not have any specific recommendations at this time. However, I believe there may be a need for more flexible recruiting and retention strategies such as the recently granted authority to use bonuses and special pays as needed to recruit, hire, and retain medical specialties.

DWELL TIME

Question. Even though dwell time is improving as our forces draw down in Iraq, many Active Duty military members are still not experiencing the ideal dwell time of 2 years at home for every year deployed.

In your view, when will the Active component dwell time goal be met?

Answer. From my perspective, the largest impact to dwell time will come from the balance of the drawdown in Iraq and the President's decisions regarding Afghanistan. Increases in end strength for the Army, Marine Corps, and Special Operations Forces over the past several years should translate into dwell times increasing.

The Iraq drawdown will also serve to increase the dwell time for our units as fewer forces will need to be deployed. How much this will increase dwell time depends on the level of forces needed for Afghanistan. In all cases, however, DOD must carefully manage our forces across the Department. This involves careful assessment of where and when military forces are needed, and how to structure the force to best meet the projected demands.

Question. In your view, would additional Army end strength in 2011 or 2012 improve dwell time ratios and reduce stress on the force, and if so, what numbers of Active and Reserve component members would be necessary?

Answer. I do not have enough information to make an assessment at this time. I defer to the analysis of the Quadrennial Defense Review as to whether current end strength increases are sufficient in light of anticipated strategy and projected needs.

MOBILIZATION AND DEMOBILIZATION OF NATIONAL GUARD AND RESERVES

Question. Over the past 9 years, the National Guard and Reserves have experienced their largest and most sustained employment since World War II. Numerous problems arose in the planning and procedures for mobilization and demobilization, e.g., inadequate health screening and medical readiness, monitoring, antiquated pay systems, limited transition assistance programs upon demobilization, and lack of access to members of the Individual Ready Reserve. Reserve Force management policies and systems have been characterized in the past as inefficient and rigid and readiness levels have been adversely affected by equipment stay-behind, cross-leveling, and reset policies.

What is your assessment of advances made in improving Reserve component mobilization and demobilization procedures, and in what areas do problems still exist?

Answer. It is my understanding that the Department has focused on increasing the alert and mobilization times prior to mobilization; DOD needs to ensure that we provide predictability to servicemembers, their families, and employers. If confirmed, I would continue the efforts of the Department to monitor this issue closely, as we know that predictability is a major factor for all those affected, and I believe

strongly that National Guard and Reserve personnel deserve first-class mobilization and demobilization procedures, health screening, and transition assistance programs.

Question. What do you consider to be the most significant enduring changes to the administration of the Reserve components aimed at ensuring their readiness for future mobilization requirements?

Answer. It is my understanding the most significant enduring changes are in the implementation of service force generation plans, which have been created to provide a defined cycle to prepare Reserve component units for employment as an operational force. This enables units to train for a mission prior to mobilization and deploy and redeploy on a predictable time line.

Question. Do you see a need to modify current statutory authorities for the mobilization of members of the National Guard and Reserves?

Answer. If confirmed, I would review existing authorities and proposed legislation to ensure that the Department has appropriate authorities in light of the role of the Guard and Reserves in our force deployment plans.

MEDICAL AND DENTAL READINESS OF THE RESERVES

Question. Medical and dental readiness of Reserve component personnel has been an issue of significant concern to the committee, and shortfalls that have been identified have indicated a need for improved policy oversight and accountability.

If confirmed, how would you seek to clarify and coordinate reporting on the medical and dental readiness of the Reserves?

Answer. It is essential for DOD and all the Service components to have a single repository of data which accurately reflects the medical and dental readiness of the Reserve components. If confirmed, I will work with the Assistant Secretaries of Defense for Health Affairs and Reserve Affairs in bringing the appropriate parties, including information management, medical, and line personnel, together to examine the reporting processes in detail, to agree on the necessary definitions of what and who should be monitored, and to fill any gaps in the reporting processes.

Question. How would you improve upon the Department's ability to produce a healthy and fit Reserve component?

Answer. If confirmed, I will closely examine the significant progress in improvement that I understand has been made in medical and dental readiness for the Reserve component and identify what still needs to be accomplished to achieve the goal of a healthy and fit Reserve component force.

MILITARY QUALITY OF LIFE

Question. In January 2009, the Department published its second Quadrennial Quality of Life Review, which focused on the importance of key quality-of-life factors for military families, such as family support, child care, education, health care, and morale, welfare, and recreation services.

How do you perceive the relationship between military recruitment and retention and quality-of-life improvements and your own top priorities for the Armed Forces?

Answer. Quality-of-life efforts impact the recruitment and retention of military personnel and are key to maintaining the All-Volunteer Force. A servicemember's satisfaction with various aspects of military life as well as the servicemember's family experience influences members' decision to reenlist. If confirmed, I would review how effectively our programs meet the needs of servicemembers and their families, and ensure that they are contributing positively to recruitment and retention.

Question. If confirmed, what further enhancements to military quality-of-life would you consider a priority, and how do you envision working with the Services, combatant commanders, family advocacy groups, and Congress to achieve them?

Answer. I would aggressively pursue the Department's priorities to promote the well-being and resilience of servicemembers and their families. I would focus on understanding the needs of our force and their families and expand assistance such as access to counseling, fitness opportunities, and childcare support to help minimize stress on the force. The Department leadership should work together with advocacy groups and Congress to efficiently close gaps and reduce overlaps in programs and to communicate effectively to ensure that families know how to access available support when they need it.

FAMILY SUPPORT

Question. Military members and their families in both the Active and Reserve components have made, and continue to make, tremendous sacrifices in support of operational deployments. Senior military leaders have warned of growing concerns

among military families as a result of the stress of frequent deployments and the long separations that go with them.

What do you consider to be the most important family readiness issues for servicemembers and their families, and, if confirmed, how would you ensure that family readiness needs are addressed and adequately resourced?

Answer. If confirmed, I would make family readiness issues one of my top priorities. I would support, prioritize, and appropriately resource quality physical and mental healthcare, spouse career assistance, childcare, other elements of dependent support, and education needs.

Question. How would you address these family readiness needs in light of global rebasing, BRAC, deployments, and growth in end strength?

Answer. If confirmed, I would continue the Department's current approach to identify and address family readiness needs, to gather information from the Services, commands, servicemembers and families, professional organizations, and researchers about how to best prepare families for rebasing, BRAC, deployments, and other stressful aspects of military life.

Question. If confirmed, how would you ensure support to Reserve component families related to mobilization, deployment, and family readiness, as well as to Active Duty families who do not reside near a military installation?

Answer. If confirmed, I would ensure that the Department's Yellow Ribbon Program is properly focused and funded to address the issues faced by members of the Active, Guard, and Reserve and their families. The program should provide information, access, referrals, and outreach to military members and their families. This needs to be underwritten by a coordinated, community-based network of care encompassing DOD, VA, State, local, non-profit, and private providers. My goal would be to provide a full range of services for Active, Guard, and Reserve members and their families.

Question. If confirmed, what additional steps will you take to enhance family support?

Answer. If confirmed, I would encourage the implementation of flexible family support programs that meet the needs of our servicemembers and their families, whether they live on military installations, near military installations, or far from military installations.

ACCESS TO HEALTHCARE

Question. One of the major concerns for military family members is access to health care. Military spouses tell us that the healthcare system is inundated, and those stationed in more remote areas may not have access to adequate care.

If confirmed, what steps would you take to ensure complete access to healthcare for the families of servicemembers?

Answer. I agree that access to care for family members is an important concern and, if confirmed, I will work to ensure appropriate access to care is a key feature of our TRICARE program and will continually explore ways to ensure all beneficiaries are provided the appropriate level of care within the established TRICARE Access to Care Standards.

OFFICE OF COMMUNITY SUPPORT FOR MILITARY FAMILIES WITH SPECIAL NEEDS

Question. In the National Defense Authorization Act for Fiscal Year 2010 (section 563), Congress required the establishment of an Office of Community Support for Military Families with Special Needs within the Office of the Under Secretary of Defense for Personnel and Readiness. The purpose of this office is to enhance and improve DOD support for military families with special needs, be they educational or medical in nature.

In your view, what should be the priorities of this Office of Community Support for Military Families with Special Needs?

Answer. I believe the priorities of this office include medical and educational programs to strengthen military families with special needs. If confirmed, I would support the critical efforts of this office to establish consistent policy and monitor its implementation across the Services. I would identify programs already in existence that can provide special services to military families.

Question. If confirmed, how would you ensure outreach to those military families with special needs dependents so they are able to get the support they need?

Answer. If confirmed, I would ensure increased communication efforts to reach families with special needs through the use of webinars, social media outlets, base newspapers, commissaries and exchanges, childcare centers and youth facilities, DOD schools and a variety of DOD and Services' websites. In addition, I would emphasize collaboration with civilian community resources.

MY CAREER ADVANCEMENT ACCOUNTS PROGRAM

Question. The Department established the My Career Advancement Accounts (MyCAA) program, a demonstration project that provides military spouses with funds through “career advancement accounts” to help enable them to pursue portable careers. In February 2010, the Department became overwhelmed by the numbers of program applicants, subsequently ran out of funds, and then temporarily halted the program. The program has now restarted, but the funds, as well as the number of spouses who would be eligible for the program, will be more limited.

What is your understanding of the current focus and objectives of the program?

Answer. I believe the objective of the MyCAA program is to ensure that military spouses have opportunities to pursue and sustain a career while supporting their servicemembers. It is my understanding that the current MyCAA is available only to spouses of Active Duty members in the pay grades of E1–E5, W1–W2, and O1–O2. MyCAA is restricted to \$4,000 per eligible spouse and must be used over a 3-year period for an Associate’s degree, a license, or a credential leading to a portable career. I believe these financial parameters will allow the Department to sustain the program. It is my understanding that DOD continues to offer robust career counseling programs to all our spouses.

Question. If confirmed, what would be your objectives for the MyCAA program and other spouse employment initiatives or programs?

Answer. My objective would be to assist, support, and empower them in making informed decisions through offering them an opportunity to obtain comprehensive information on high-growth, high-demand, portable occupations that can move with them as they relocate. This would include occupational information on education, license, and credential requirements, how to access other Federal, State, and private opportunities for financial assistance in achieving these requirements, as well as understanding earnings potential. I would also promote the outstanding pipeline of talent that military spouses represent to America’s employers. Military spouses are talented, diverse, motivated, and bring strong values to the workplace.

MEDICAL RESEARCH PROGRAMS

Question. What do you see as the highest priority medical research investment areas for DOD?

Answer. I believe the highest priorities are to address critical research capability gaps related to the treatment and recovery of wounded warriors, such as the diagnosis and treatment of Traumatic Brain Injury (TBI), Post Traumatic Stress Disorder (PTSD), and other elements of combat related stress, development of improved prosthetics, treatment of eye injury, and other deployment and battlefield-related injuries.

Question. How will you assess the amount of investment made in these research areas to determine if they are sufficient to meet DOD goals and requirements?

Answer. If confirmed, I would review the current research portfolio to ensure it prioritizes and resources research appropriate to the requirements of the Department.

Question. How will you ensure that DOD medical research efforts are well coordinated with similar research programs within the private sector, academia, the Services, DARPA, the Department of Veterans Affairs, and the National Institutes of Health?

Answer. If confirmed, I would support coordination efforts to ensure that research is being conducted jointly, building on and partnering with industry, academia, and other government agencies to ensure the greatest return to our warfighters. I am aware that joint program committees have been established to engage with Federal partners to ensure that our research reflects the best interests of our service personnel.

Question. How will you ensure that new medical technologies (including drugs and vaccines) are independently and adequately tested before their use by DOD organizations and personnel?

Answer. If confirmed, I would ensure that the Department applies the highest standards of the Food and Drug Administration (FDA) to ensure new medical technologies, drugs, and vaccines are safe and effective before they are adopted for use in the Department.

Question. There have been growing privacy and security concerns raised about the use of on-line social networks for medical research purposes.

How will you ensure that the increasing use of social networking media for medical research purposes will protect the privacy and security of patients?

Answer. If confirmed, I would ensure active application of the Department’s policy, which states that the rights and welfare of human subjects in research sup-

ported or conducted by the DOD components will be protected. This protection is based on the ethical principles of respect for persons and beneficence, and encompasses requirements to obtain informed consent and to do no harm. In implementing this policy, the Department will adhere to the applicable statutory provisions for human protections in research as well as supporting Department policies.

Question. What are your biggest concerns related to the DOD medical research enterprise?

Answer. Although I do not have detailed knowledge of the entire research portfolio, I am especially interested in ensuring the responsiveness of the research program to medical readiness and our warfighters' medical needs. This will be accomplished by assuring that DOD has a balanced investment in medical science and technology and in medical advanced development leading to timely incorporation into clinical practice in the Military Health System.

MORALE, WELFARE, AND RECREATION

Question. Morale, Welfare, and Recreation (MWR) programs are critical to enhancement of military life for members and their families, especially in light of frequent and lengthy deployments. These programs must be relevant and attractive to all eligible users, including Active Duty and Reserve personnel and retirees.

What challenges do you foresee in sustaining MWR programs (particularly in view of the Secretary's efficiencies initiatives) and, if confirmed, what improvements would you seek to achieve?

Answer. It is my understanding that the benefits of strong MWR programs are critical to esprit de corps, stress reduction, and personal health and well-being. Although there are very extensive installation MWR facilities and programs, I believe there is an immediate challenge in ensuring that MWR programs for our deployed forces meet their needs, especially free access to the Internet to communicate with family and friends back home and fitness and recreation activities to keep forces fit to fight. Recreation support for our wounded warriors is also critical. In the longer term, I believe the Department needs to understand what programs are valued by servicemembers and their families in order to make wise investments. In addition, the MWR customers need to be involved in expressing their needs and satisfaction with our programs and policies; I understand the Department will conduct the second MWR customer satisfaction survey in fiscal year 2011. If confirmed, these are all areas I would aggressively pursue.

COMMISSARY AND MILITARY EXCHANGE SYSTEMS

Question. Commissary and military exchange systems are significant quality of life components for members of the Active and Reserve Forces and their families.

What is your view of the need for modernization of business policies and practices in the commissary and exchange systems, and what do you view as the most promising avenues for change to achieve modernization goals?

Answer. I understand that commissary and exchange programs and policies must continue to evolve to meet the needs and expectations of our changing force and a changing marketplace. I believe efforts should be aimed at reducing overhead and pursuing new avenues to reach our military families who do not live on military installations. The commissary system should deliver customer savings and also achieve high satisfaction ratings. The military exchange resale community must continue to work, individually and collaboratively, to adapt marketing and selling practices, invest in technologies, and improve merchandise availability to be more responsive to military customers.

Question. In the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005, Congress required the Secretary of Defense to establish an executive governing body for the commissary and exchange systems to ensure the complementary operation of the two systems.

What is your understanding of the purpose and composition of the executive governing body?

Answer. I am aware the Department established the DOD Executive Resale Board as the governing body to provide advice to the USD(P&R) regarding the complementary operation of the commissary and exchange systems. I have been informed that the Board works to resolve issues and has been instrumental in pursuing matters of mutual benefit to the elements of the military resale system. The Board is chaired by the PDUSD(P&R), and members include both the senior military officers and civilians who oversee and manage the commissary and exchange systems.

Question. If confirmed, what would your role be with respect to the governing body, and what would your expectations be for its role?

Answer. The Secretary designated the PDUSD(P&R) as the chairperson of the Executive Resale Board. If confirmed, I would ensure the Board would continue to meet regularly to review operational areas of mutual interest to the commissary and exchange systems.

CIVILIAN PERSONNEL SYSTEMS

Question. Section 1113 of the National Defense Authorization Act for Fiscal Year 2010 repealed the statutory authority for the National Security Personnel System (NSPS), and required that all NSPS employees be converted to other personnel systems by no later than January 1, 2012.

What is your understanding of the Department's progress in converting its civilian employees from NSPS?

Answer. I understand during fiscal year 2010, 172,000 employees representing approximately 76 percent of the NSPS population were transitioned from NSPS to the Government-wide General Schedule system. I also understand the transition of all remaining NSPS employees to the appropriate statutory pay and personnel system will be completed by the statutory deadline of January 1, 2012.

Question. Section 1113 also provides DOD with extensive personnel flexibilities for its civilian employees that are not available to other agencies. In particular, section 9902(a) of title 5, U.S.C., as added by section 1113, directs the Department to establish a new performance management system for all of its employees. Section 9902(b) directs the Department to develop a streamlined new hiring system that is designed to better fulfill DOD's mission needs, produce high-quality applicants, and support timely personnel decisions.

Do you agree that DOD's civilian employee workforce plays a vital role in the functioning of the Department?

Answer. Yes, DOD's civilian employee workforce plays an instrumental role in the functioning of the Department.

Question. What is your view of the personnel flexibilities provided by section 1113?

Answer. I understand Congress provided these flexibilities to allow the Department to better meet mission requirements. If confirmed, I will support the work that I understand is under way to develop the flexibilities.

Question. If confirmed, will you make it a priority to implement these flexibilities in a manner that best meets the needs of the Department and promotes the quality of the Department's civilian workforce?

Answer. Yes.

Question. Section 1112 of the National Defense Authorization Act for Fiscal Year 2010 directs the Department to develop a Defense Civilian Leadership Program (DCLP) to recruit, train, and advance a new generation of civilian leaders for the Department. Section 1112 provides the Department with the full range of authorities available for demonstration programs under section 4703 of title 5, U.S.C., including the authority to compensate participants on the basis of qualifications, performance, and market conditions. These flexibilities are not otherwise available to DOD.

Do you agree that the Department needs to recruit highly qualified civilian personnel to meet the growing needs of its acquisition, technical, business, and financial communities?

Answer. Yes.

Question. In your view, has the existing civilian hiring process been successful in recruiting such personnel and meeting these needs?

Answer. Although I believe the Department currently has a highly talented workforce, I wholeheartedly support the initiatives to streamline and reform the civilian hiring process. There is much work to be done in this area, and if confirmed, I would ensure that the Department actively engages in the Government-wide initiative to reform civilian hiring and aggressively pursues improvements within the Department.

Question. If confirmed, will you make it a priority to implement the authority provided by section 1112 in a manner that best meets the needs of the Department and promotes the quality of the Department's civilian workforce?

Answer. Yes.

HUMAN CAPITAL PLANNING

Question. Section 115b of title 10, U.S.C., as added by section 1108 of the National Defense Authorization Act for 2010 requires the Secretary of Defense to develop and annually update a strategic human capital plan that specifically identifies gaps in the Department's civilian workforce and strategies for addressing those gaps. Sec-

tion 115b requires that the plan include chapters specifically addressing the Department's senior management, functional, and technical workforce and the Department's acquisition workforce.

Would you agree that a strategic human capital plan that identifies gaps in the workforce and strategies for addressing those gaps is a key step toward ensuring that the Department has the skills and capabilities needed to meet future challenges?

Answer. Yes.

Question. Do you see the need for any changes in the requirements for a strategic human capital plan under section 115b?

Answer. At this time, I have no recommendations. If confirmed, I would review the strategic human capital planning that the Department has conducted over the past years against the section 115b requirements to determine if any changes may be needed to improve the Department's overall workforce planning effort.

Question. If confirmed, will you ensure that DOD fully complies with these requirements?

Answer. Yes.

BALANCE BETWEEN CIVILIAN EMPLOYEES AND CONTRACTOR EMPLOYEES

Question. In recent years, DOD has become increasingly reliant on services provided by contractors. Over the past 8 years, DOD's civilian workforce has remained essentially unchanged in size. Over the same period, the Department's spending on contract services has more than doubled, with the estimated number of contractor employees working for the Department increasing from an estimated 730,000 in fiscal year 2000 to an estimated 1,550,000 in fiscal year 2007. As a result of the explosive growth in service contracts, contractors now play an integral role in the performance of functions that were once performed exclusively by government employees, including the management and oversight of weapons programs, the development of policies, the development of public relations strategies, and even the collection and analysis of intelligence. In many cases, contractor employees work in the same offices, serve on the same projects and task forces, and perform many of the same functions as Federal employees.

Do you believe that the current balance between civilian employees and contractor employees is in the best interests of DOD?

Answer. I support the Secretary's initiative announced with the fiscal year 2010 budget to reduce the Department's reliance on contracted services contractors. I believe the desired outcome of the Department's in-sourcing initiative is a balanced total workforce of military, government civilians, and contracted services that appropriately align functions to the public and private sector, and results in the best value for the taxpayer.

Question. In your view, has DOD become too reliant on contractors to perform its basic functions?

Answer. If confirmed, I would support the Department's ongoing efforts to critically examine currently contracted functions. Striking a balance between government and contractor performance that ensures uncompromising government control of critical functions, while providing best value to the taxpayer, is imperative.

SECRETARY GATES' EFFICIENCIES INITIATIVES

Question. In May 2010, Secretary Gates launched an initiative to strengthen and modernize our fighting forces by eliminating inefficient or duplicative programs. In an August 16, 2010, memo to DOD components, the Secretary directed 20 specific initiatives, many involving military and civilian personnel and DOD contractors.

What is your assessment of the efficiencies announced by the Secretary to date, and if confirmed, what criteria would you use to identify and justify additional opportunities for efficiency in programs within the purview of the Under Secretary of Defense for Personnel and Readiness?

Answer. I understand that Secretary Gates is attempting to identify efficiencies and redundancies within DOD and, if confirmed, I would support the implementation and continuation of this effort. I would use the Secretary's criteria to divest the Department of missions that are not appropriate or part of our core mission. I would also build on the Secretary of Defense's work of finding greater efficiencies, with the goal of applying those resources toward higher priority efforts within the Department. From shared services to other process improvements, I would strive to ensure Personnel and Readiness is on the leading edge of efficiencies while still maintaining effectiveness for the Department.

ACQUISITION WORKFORCE

Question. Over the past 15 years, DOD has dramatically reduced the size of its acquisition workforce, without undertaking any systematic planning or analysis to ensure that it would have the specific skills and competencies needed to meet current and future needs. Since September 11, 2001, moreover, the demands placed on that workforce have substantially increased. Section 852 of the National Defense Authorization Act for Fiscal Year 2008 established an Acquisition Workforce Development Fund to help DOD address shortcomings in its acquisition workforce. The fund would provide a minimum of \$3 billion over 6 years for this purpose.

Do you believe that DOD acquisition workforce is large enough and has the skills needed to perform the tasks assigned to it?

Answer. While I cannot make an assessment of the size of the workforce at this time, I fully support the Secretary's goals of increasing the capacity and capability of the acquisition workforce through reducing reliance on contracted services in key acquisition support functions.

Question. Do you support the use of the DOD Acquisition Workforce Development Fund to ensure that DOD has the right number of employees with the right skills to run its acquisition programs in the most cost effective manner for the taxpayers?

Answer. Yes.

LABORATORY PERSONNEL DEMONSTRATION PROGRAM

Question. The laboratory demonstration program founded in section 342 of the National Defense Authorization Act for Fiscal Year 1995 as amended by section 1114 of the National Defense Authorization Act for Fiscal Year 2001, section 1107 of the National Defense Authorization Act for Fiscal Year 2008, section 1108 of the National Defense Authorization Act for Fiscal Year 2009, and section 1105 of the National Defense Authorization Act for Fiscal Year 2010, paved the way for personnel management initiatives and new flexibilities at the defense laboratories. These innovations have been adopted in various forms throughout other DOD personnel systems.

If confirmed, will you fully implement the laboratory demonstration program and the authorities under these provisions?

Answer. Yes.

Question. If confirmed, will you ensure that the directors of the defense laboratories are provided the full range of personnel flexibilities and authorities provided by Congress?

Answer. Yes.

FOREIGN LANGUAGE PROFICIENCY

Question. A Foreign Language Transformation Roadmap announced by the Department on March 30, 2005, directed a series of actions aimed at transforming the Department's foreign language capabilities, to include revision of policy and doctrine, building a capabilities-based requirements process, and enhancing foreign language capability for both military and civilian personnel.

In your view, what should be the priorities of the Federal Government to expanding the foreign language skills of civilian and military personnel and improving coordination of foreign language programs and activities among the Federal agencies?

Answer. The priorities of the Federal Government to expanding the foreign language skills of civilian and military personnel and improving coordination between foreign language programs and activities among the Federal agencies should be an integrated, holistic, whole-of-nation approach to developing these skills beginning in pre-school and continuing through high school and college graduation. The shortage of language and cultural skills is a national shortfall, not just an isolated DOD problem. If confirmed, I will support and build upon DOD efforts to ensure the education of a broader pool of Americans with skills in critical languages. Early education and skill development in critical foreign languages is paramount and must begin in pre-school and continue through the high school and college years. Educating our children beginning in pre-school and continuing throughout their educational journey in critical languages will result in globally competitive citizenry from which DOD, other Federal Government agencies, and the private sector can recruit.

GI BILL BENEFITS

Question. Congress passed the Post-9/11 Veterans Educational Assistance Act in 2008 that created enhanced educational benefits for servicemembers who have served at least 90 days on Active Duty since September 11. The maximum benefit

would roughly cover the cost of a college education at any public university in the country.

What unresolved issues related to implementation of the post-9/11 Veterans Educational Assistance Act (e.g., coverage of additional military personnel) do you consider most important to be addressed?

Answer. It is my understanding that there are two technical fixes needed in the current statute. First, the original statute inadvertently left out some National Guard Active Duty as qualifying time for Post-9/11 GI Bill benefits. Second, although the statute authorized the Services to offer a supplemental payment for enlistments in critical skills (commonly called “kickers”), it did not include the specific language required to allow the Services to use the Education Trust Fund to pay for these kickers. Both of these provisions are rectified in the current version of S. 3447, recently introduced in the Senate.

MILITARY RETIREMENT

Question. The 10th Quadrennial Review of Military Compensation proposed a new defined benefit retirement plan that more resembles the benefits available under the Federal Employee Retirement System than the current military retirement benefit; increasing TRICARE fees for retirees; and the adoption of dependent care and flexible spending accounts for servicemembers. The head of a Defense Business Board Task Force has criticized military benefits as “GM-style benefits” describing the military retirement system as a “pre-volunteer force retirement system” and criticizing “taxpayer-subsidized grocery chains and low out-of-pocket healthcare costs.”

What is your view of the adequacy of the current military retirement benefit?

Answer. I have not yet formed an opinion on the adequacy of the current military retirement benefit. However, it is only one component of the entire military compensation system. I believe it will be important to consider the impacts of making changes to one part of the system so that DOD maintains their current high quality military force.

Question. How might it be modernized to reflect the needs of a new generation of recruits, while easing the long-term retirement cost of the government?

Answer. I don’t have a recommendation at this time, but if confirmed, I would review this issue carefully.

Question. Do you share the Defense Business Board Task Force view of military benefits?

Answer. I have not reviewed this report in detail, but I know that one of its major recommendations was changing the military retirement system.

It is my understanding that the Defense Business Board is considering alternatives to the current military retirement system and alternatives for the Department to consider. If confirmed, I look forward to reviewing these and other proposals with the military departments.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Principal Deputy Under Secretary of Defense for Personnel and Readiness?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR MARK BEGICH

TRICARE IN ALASKA

1. Senator BEGICH. Dr. Rooney, there are over 89,000 TRICARE beneficiaries in the State of Alaska. Active Duty military, their families, and retirees face many challenges accessing health care in Alaska. The Military Treatment Facilities (MTF) at Fort Wainwright and Elmendorf Air Force Base (AFB) are top quality and provide many services to military members and their families. However, many specialties are neither available at the MTFs or at capacity and cannot accommodate all customers. Many civilian specialists in Alaska do not participate in the TRICARE network. I've worked extensively with TRICARE Management Activity and the Services to improve access to care. I commissioned an interagency working group which identified the need for regulatory flexibility and a single reimbursement rate to improve access to care in Alaska. Are you aware of these challenges? If confirmed, what steps would you take to improve access to healthcare in Alaska?

Dr. ROONEY. I am aware of these challenges. I have been advised that throughout Alaska there are roughly 1,783 non-Federal physicians of whom 1,566 are TRICARE Participating Providers. Of the 1,566 TRICARE participating providers, 793 are primary care physicians with specialties in family practice, general practice, internal medicine, and pediatrics. The TRICARE Management Activity's strong support in approving 12 locality-based waivers ranging from 125 percent to 565 percent of the CHAMPUS Maximum Allowable Charge (CMAC) for critical specialty providers, coupled with an existing Rate Reimbursement/Rate Demonstration which sets rates in Alaska at 1.4 times the CMAC allowable charges, has greatly increased acceptance of TRICARE by non-Federal providers. A significant change was noted from early 2008 to February 2011, when the TRICARE Preferred Provider Network increased from 465 to 845 providers.

If confirmed, I would continue to support the TRICARE Management Activity's efforts in this regard. While I was pleased to learn that the Rate Reimbursement Demonstration initially set to expire in December 2010 was extended until December 2012, I will ensure that future changes to the rate structure are done collaboratively with the various Federal agencies that are also exploring options resulting from the Interagency Task Force's recommendation for regulatory flexibility and a single Federal reimbursement rate.

2. Senator BEGICH. Dr. Rooney, if confirmed, please describe how you would work with the Army and the Air Force to ensure the MTFs in Alaska meet health care requirements of Active Duty military and their families, especially as the Army increases personnel stationed at Fort Wainwright.

Dr. ROONEY. If confirmed, I will meet regularly with the Surgeons General of the Services and the Assistant Secretary of Defense for Health Affairs to discuss provider and ancillary support staffing gaps in the three Alaska MTFs. I will encourage support of the MTFs to the maximum extent possible given the high operational tempo and associated deployments. I have been advised that, in all forums, there appears to be a strong interest in ensuring access for all. This guided the TRICARE Management Activity's recently approved TRICARE Expansion Plan favorably endorsed by the Assistant Secretary of Defense for Health Affairs and the Services' Surgeons General in collaboration with the Alaska community leadership. The focus of the Expansion Plan is on improved access for Department of Defense (DOD) beneficiaries without displacing non-DOD beneficiaries. In the context of improving access and protecting non-DOD beneficiaries from DOD overflow, I will encourage the Services' Surgeons General and the Assistant Secretary of Defense for Health Affairs to explore opportunities for partnerships with the Alaska community for such programs as Graduate Medical Education, thereby facilitating mutual positive outcomes. In addition, Elmendorf AFB already supports internships in dental, pharmacy lab, physician assistants, medical assistants, Doctor of Osteopathy, and a physician residency. State-wide recruiting efforts are being initiated by the State, hospitals, and our healthcare support contractor.

3. Senator BEGICH. Dr. Rooney, please describe how you would work with TRICARE Management Activity as they work to increase the TRICARE network in Alaska to provide for better access to health care for our servicemembers and their families.

Dr. ROONEY. Access to care issues in Alaska cannot be addressed merely in terms of access to purchased care services in the community (network or non-network). As the interagency working group which you commissioned confirmed in their Report to Congress of September 2010, I have been advised that some of the issues are not

under the control of the Under Secretary of Defense for Personnel and Readiness (USD(P&R)) or the Federal Government. These include licensure and certification rules, recruitment of primary care and specialty services, and apprehension on the part of private practitioners regarding changes in the reimbursement environment related to healthcare reform. Similarly, access challenges faced by TRICARE beneficiaries are no different from challenges faced by other beneficiaries covered by the Federal Government health plans or by many Alaskans covered by private pay plans. I was pleased to learn of the TRICARE Management Activity's recent initiatives in the State of Alaska, which include:

- Establishing a TRICARE Civilian Preferred Provider Network requiring the West Region's Health Care Support Contractor to develop and operate such a network in designated Prime Service Areas.
- Permitting eligible TRICARE beneficiaries to enroll in Prime with assignment to MTF Primary Care Managers, or, as an alternative, assignment to a civilian Primary Care Manager within the TRICARE civilian preferred provider network. This will allow approximately 250 to 300 beneficiaries to transfer to a civilian Primary Care Manager. This will include family practice, pediatrics, and internal medicine providers.
- Offering this new program, first, to the Prime Service Areas surrounding Fort Wainwright Army Base and Eielson AFB in Fairbanks and then, second, evaluating whether to expand it further into Anchorage surrounding the Joint Base Elmendorf Richardson.

Working jointly with the political leadership, the Services, and the community, the TRICARE Management Activity's 18-month effort in bringing these initiatives to fruition is notable. If confirmed, I will continue to support these ongoing efforts while closely monitoring the impact these programs have on improving access to health care for our servicemembers and their families.

FAMILY DEPLOYMENT SUPPORT

4. Senator BEGICH. Dr. Rooney, one of my priorities is support for our military families, especially those in Alaska. The 1st Stryker Brigade Combat Team, 25th Infantry Division will deploy to Afghanistan in May and I want to make sure their families are taken care of as their loved ones face yet another deployment. What do you consider to be the most important family readiness issue for servicemembers and their families?

Dr. ROONEY. I share your priority of supporting our military families. The impact of a deployment or multiple deployments on military families is the most significant family readiness issue for servicemembers and their families. The challenges to military family readiness and resiliency are numerous stressors related to separation, deployment, geographic isolation, high operational tempo, and financial worries.

The Department has a network of Family Support Programs at all DOD installations worldwide that provide resources to prepare military families to effectively navigate the challenges of daily living experienced in the unique context of military service. Family Support Programs provide information and referral, education and training, and counseling services to educate families about the potential challenges they may face. The goal is to equip them with the skills needed to competently function in the face of such challenges and to increase their awareness of the supportive resources available to them. The focus of the support is to assist families with deployment, relocation, spousal employment, family life education (including parenting skills), personal financial management, volunteer opportunities, and non-medical counseling.

The Family Support Programs are designed to provide training and support to servicemembers and families during all phases of deployment. In particular, to address the impact of deployment on children and youth, the Department augments Family Support Programs with licensed counselors placed in child development centers, schools, and State family programs. The counselors provide specialized non-medical counseling education, and training for parents, teachers, child development staff, and with parental permission, children and youth. Given the frequency and length of deployments, and the impact those separations can have on military children, the support provided by the child and youth counselors throughout the deployment cycle is very important.

5. Senator BEGICH. Dr. Rooney, if confirmed, how would you ensure those needs are adequately resourced?

Dr. ROONEY. I will ensure funding and trained personnel are provided to support the ongoing needs of the families. I share the Department's strong commitment to

providing assistance to servicemembers and their families, particularly in light of the unprecedented demands that have been placed on them. Family assistance programs serve a critical need in direct mission support for the mobilization and deployment of both the Active Duty and the Reserve components and I would work closely with the Services to ensure resources are adequate to meet the identified needs.

In meeting the direction and goals of the Secretary of Defense to create a more efficient and effective organization, we will continue to review and assess where we can take offsets from existing programs to meet the high priority requirements and needs of the servicemembers and their families.

6. Senator BEGICH. Dr. Rooney, what additional steps will you take to enhance family support?

Dr. ROONEY. I will ensure that existing as well as any new programs that serve families are continually assessed so that only those programs that add value and enhance family readiness and resilience are given resources and continued. I will insist that we integrate programs into a delivery system that is easily accessible and that ongoing evaluations focused on obtaining evidence of successful outcomes are developed. Successful support programs are those that respond directly to the needs identified by members and their families.

The promotion and publicizing of these support programs to servicemembers and their families are also priorities. It is critical to make sure the breadth and depth of the programs are known, that they are being used to their full potential, and that they are being recognized as valuable to helping servicemembers and their families cope with the challenges of daily living experienced in the context of military service.

In summary, it is important that:

- A. Programs that support our servicemembers and their families which are regularly evaluated and have been shown to add value and enhance family readiness are resourced and continued;
- B. Programs that are evidence-based are integrated into a delivery system that is easily accessible and those outcomes that respond to identified support needs of members and families are measured for effectiveness;
- C. The support programs are adequately promoted and publicized; and
- D. Innovative and effective programs are identified and presented as best practices for others to emulate.

OUTSOURCING VERSUS INSOURCING

7. Senator BEGICH. Dr. Rooney, regarding DOD's outsourcing and insourcing efforts, it seems that the pendulum swings one way and then the other. I recently read an article which indicated the Army put their insourcing efforts on hold, and Secretary Gates has indicated the insourcing is not saving as much money as initially thought. In your opinion, how can DOD strike a balance between civilian and contractor employees that is in the best interest of DOD and the taxpayers?

Dr. ROONEY. When issues of sourcing are discussed within DOD, the goal is to consider it from the perspective of Total Force Management. Across the entire Department, it is recognized that continuous improvement to the Total Force Management of Active and Reserve military, government civilians, and contracts for services are critical. We must ensure that our military is not considered a free source of labor by organizations within the Department who rely on the Services to finance their recruitment, training, and development. Rather, the true cost of military, government civilians, and/or contracted support should be determined depending on individual facts and circumstances. To that end, the strategic view of the Total Force continues to evolve as the mission and plan across the FYDP are executed.

Total Force Management requires a holistic analysis and prioritization of the work to be done. It requires identification of and investment in the most effective and efficient component of the workforce to best accomplish the tasks to deliver the required capabilities and level of readiness. The separate decisions that affect each component of the Total Force must be synchronized to achieve the desired outcomes and balance operational, fiscal, and acquisition risks.

The challenge faced with Total Force Management is that it is dynamic and requires judgment informed by sound analysis. This not only includes the development and promulgation of policies, but also requires the Department to provide managers with the tools, resources, training, and information necessary to achieve the desired outcomes, all of which must occur in a difficult fiscal environment. Cur-

rent business processes must be synchronized to ensure the risks associated with decisions made in the context of Total Force Management are fully considered.

There is work being undertaken to improve the Department's Inventory of Contracts for Services, as recommended by the most recent Government Accountability Office (GAO) review of DOD processes and in compliance with changes to the governing statute as directed in the National Defense Authorization Act for Fiscal Year 2011. The tools and processes that inform the Department's inventory of military and civilian workload, the Inherently Governmental and Commercial Activities Inventory, are also being reviewed. Improvements to these tools are critical to achieve a more appropriate balance in the workforce, aligning inherently governmental activities to military and civilian workforces and commercial activities to the most cost effective service provider, whether military, civilian, or contracted support.

8. Senator BEGICH. Dr. Rooney, how will you approach this issue?

Dr. ROONEY. I will approach this issue by recognizing that there has been a focus over the past few years on insourcing. The Department is committed to meeting the statutory obligations under title 10, which require an annual review of contracted services and identification of those services that are more appropriately performed by the government workforce and should be insourced.

There is no prescribed solution, and neither all insourcing nor all outsourcing is ideal. The private sector and contracted support are, and will continue to be, a vital source of expertise, innovation, and support to the Department's Total Force.

We also acknowledge the concern expressed by Congress as related to the A-76 public-private competition program, and the opportunity in the past year to review related policies, tools, and processes. We believe that the A-76 public-private competition process along with insourcing are critical tools for commanders and managers to have available to them for the purposes of validating manpower and other requirements; driving more consistent delivery of mission critical support and services to warfighters and families; and delivering required readiness levels while minimizing fiscal opportunity costs to meet the compelling needs of the Department.

QUESTIONS SUBMITTED BY SENATOR JEANNE SHAHEEN

NATIONAL GUARD PROGRAMS

9. Senator SHAHEEN. Dr. Rooney, the United States has come to rely heavily on our National Guard members. Our Guard has experienced the largest and most sustained deployment since World War II. In New Hampshire, we have seen the largest Guard deployments in the history of our State. You mention in your advance policy questions that you believe that National Guard and Reserve personnel "deserve first-class mobilization and demobilization procedures, health screening, and transition assistance programs." If confirmed, what role would you play in ensuring our National Guard and Reserve servicemembers are extended first-class support benefits—before, during, and after their deployments?

Dr. ROONEY. I share Congress' sentiment that our National Guard and Reserve servicemembers deserve first-class mobilization and demobilization procedures, medical and dental screening, and transition assistance programs. If confirmed, I will work with the Services to ensure that they comply with departmental activation policy and that the policy is balanced and effective. I would support current departmental initiatives aimed at providing as much advanced notice to deploying servicemembers and units as possible. This will ensure that servicemembers receive their entitlements in a timely fashion. I also believe that it is imperative that transition assistance be made possible to all redeploying servicemembers of the Reserve component. I will work with the Services to ensure that pre- and post-deployment health assessments are conducted, and any identified medical issues are dealt with as soon as possible and in a compassionate manner. I support the current policy which authorizes medical benefits to our National Guard and Reserve servicemembers before, during, and after their activation. In addition, I fully support the Yellow Ribbon Reintegration Program that provides access to services and information for our National Guard and Reserve servicemembers and their families throughout the deployment cycle. I am aware that there are a number of State-sponsored programs that exemplify innovative and effective support programs for National Guard and Reserve members throughout the cycle. I am interested in learning more about these initiatives and finding ways to emulate and integrate these best practices on a wider scale. If confirmed, I look forward to working with Congress to ensure that our National Guard and Reserve servicemembers receive the benefits they deserve as they are activated in support of the defense of this Nation.

10. Senator SHAHEEN. Dr. Rooney, I'm especially concerned about the unique challenges and factors that affect our returning National Guard members as they reintegrate back to their jobs, homes, and families. Oftentimes, our State's National Guard leadership has a better understanding of the unique support needed on a State-by-State basis, and—in some States like New Hampshire—they have developed their own effective full-cycle deployment support programs. Will you commit to working closely with individual States and their National Guard leadership in order to develop the most effective, first-class programs you mention in your testimony?

Dr. ROONEY. Yes. Understanding the unique needs and ensuring the effective reintegration of our National Guard and Reserve servicemembers back into their families, communities, and jobs is one of our most important responsibilities. The Department's Yellow Ribbon Reintegration Program has been effective at addressing many of the issues that confront our returning warriors and their families and I am aware of some of the successful programs developed by individual States. I am committed to working with the broad array of Federal, State, and community programs and services to most effectively meet the needs of our National Guard and Reserve servicemembers and their families.

SUICIDE PREVENTION

11. Senator SHAHEEN. Dr. Rooney, each of the Services has reported increasing numbers of suicides in recent years. If confirmed, what role would you play in shaping DOD policies to help prevent suicides not only to Active Duty personnel, but also to National Guard and Reserve servicemembers and their families?

Dr. ROONEY. If confirmed, I would play a very active role. I have read the DOD Task Force Report on Suicide Prevention and found it to be thorough. I am impressed with the quality of the programs that each of the Services is currently employing and the active role that the Services' senior leaders play in the effort to prevent suicides among their respective members. There is still more that can be done, however. I believe that a single entity in the Department that would serve as a consistent policy and oversight authority DOD-wide, which would include the National Guard and Reserve, could disseminate information and interact with other departments, agencies, or organizations. This could also accelerate the implementation of key policy initiatives. If confirmed, I would work to ensure that the recommendations which could have the most impact, as outlined in the report, were implemented in a timely and effective manner.

12. Senator SHAHEEN. Dr. Rooney, are you content with the programs as they are currently structured?

Dr. ROONEY. While I believe the current suicide prevention programs among the Services as a whole are effective, there is clearly more that can be done. In early 2000, the overall DOD suicide rate was well below the rate of a comparable sample of the civilian population by almost half. One of the most promising avenues currently being pursued is our increasing emphasis on resilience across the Department highlighted by programs such as the Army's Comprehensive Soldier Fitness (CSF). CSF is a structured, long-term assessment and development program to build resilience and enhance performance of every soldier, family member, and civilian employee. It incorporates the principles of Total Force Fitness that the Joint Chiefs of Staff have populated across the Services. These concepts have also been embraced by the National Guard and Reserve Forces so training has been modified to meet the needs of this population. I believe the Department's focus on getting out ahead of this issue will pay dividends in the future and go a long way towards building a formula for resistance, resilience, and recovery.

13. Senator SHAHEEN. Dr. Rooney, what more can we do to reduce the number of these tragedies?

Dr. ROONEY. There are two other areas in which I believe we can make some progress. The first is data collection and standardization of reporting. I believe that more accurate and timely data can help us gain a further understanding of the complex issues and identify key leading indicators that we can use to take action before a potential suicide occurs. The second area is peer-to-peer programs that use the skills of our many veterans to directly interact with those in distress. I think this type of personal intervention program has significant potential to reach out to servicemembers particularly in the National Guard and Reserve where recent data has indicated a disturbing increase in suicide rates. Across the States, there are many great examples of National Guard and Reserve suicide prevention programs,

self-assessment programs, and other web-based tools. I believe that it is incumbent upon the Department to ensure that we are aware of these State-led programs and share the information across States so that others can build on their successes.

SEXUAL ASSAULT PREVENTION AND RESPONSE

14. Senator SHAHEEN. Dr. Rooney, in a February 15 Federal class-action lawsuit, more than a dozen female and two male current and former U.S. military servicemembers allege that incidents of sexual assault and misconduct were not adequately investigated or pursued. Sexual assault is an extremely grave concern, and all allegations should be taken seriously and investigated immediately. What is your response to this lawsuit and allegations that commanders are failing to respond appropriately to allegations of sexual assaults?

Dr. ROONEY. I cannot comment directly on current litigation. However, clearly, sexual assaults have no place in the U.S. Armed Forces. One sexual assault is one too many, and leadership throughout DOD has expressed this as well. However, when an assault does occur, victims are encouraged to come forward using one of the two reporting options available to get the help and services they need.

The Department reviewed pre-command training and has proposed revised training standards for the Sexual Assault Prevention and Response (SAPR) policy that will be reissued this spring. In addition, all of the Service Chiefs and Secretaries of the Military Departments have aggressively championed the SAPR program at Service summits and through a variety of communication channels. We have and will continue to make it clear that commanders have a duty to take every allegation of sexual assault seriously, to see to the safety and care of the parties involved, and to hold offenders accountable in each and every case where evidence supports such action. There is progress being made. In cases where there was sufficient evidence for commanders to take action and the victim has chosen unrestricted reporting, the percentage of subjects who had court-martial charges initiated against them increased from 30 percent in 2007 to 52 percent in 2010.

15. Senator SHAHEEN. Dr. Rooney, what specific levels and kinds of training are provided to officers and commanders in the field to respond in an appropriate way to allegations of sexual assault and misconduct?

Dr. ROONEY. DOD Instruction (DODI) 6495.02, SAPR Program Procedures, requires the Military Services to provide periodic, mandatory education at installation and fleet unit commands, during pre-commissioning programs and initial-entry training, and throughout the professional military education (PME) systems. All servicemembers are also required to receive SAPR training when they deploy to locations outside the United States that includes specific information addressing the location's customs, mores, and religious practices.

The Department conducted Policy Assistance Team (PAT) visits in 2009 to review commander training across the Services. Overall, the observed training met the requirements of DODI 6495.02, and the PATs found the training to be implemented in accordance with Department policy. However, the PATs recommended revisions to strengthen commander training by including concrete examples of supportive behavior to the program and the chance to practice skills or answer questions.

The Services have also worked to ensure SAPR commander training is instituted. For example, the Army embedded SAPR training in professional military education at training institutions, including specific training support packages for pre-command courses and senior leaders. Work with Training and Education Command's Ground Training Branch produced an Interactive Media Instruction module on SAPR, targeting mid-level Marine Corps leaders who may be unable to physically attend annual training. The Navy briefs new installation and regional Commanding Officers on SAPR at the Navy's Senior Shore Station Leaders course a minimum of four times a year. The Air Force provides training to all new wing and group commanders five times a year and squadron commanders also receive training during their new commanders' orientation training. All of these meet DODI 6495.02 requirements.

16. Senator SHAHEEN. Dr. Rooney, are the levels of training currently in place adequate to address this issue?

Dr. ROONEY. As my response to the previous question indicated, the Department conducted PAT visits in 2009 to review commander training across the Services. Overall, the observed training met the requirements of DODI 6495.02, and the PATs found the training to be implemented in accordance with Department policy. However, the PATs recommended policy revisions to strengthen commander training by

including concrete examples of supportive behavior to the SAPR program and the chance to practice skills or answer questions. These revisions will appear in the reissuance of DODI 6495.02 scheduled for later in 2011. However, the Services incorporated most of these revisions into their commander training programs in fiscal year 2010, as briefly described below:

- In fiscal year 2010, the Army developed training specifically for senior leaders. During fiscal year 2010, the U.S. Army School of Command Preparation (Pre-Command Course) trained 197 brigade commanders, 542 battalion commanders, and 195 command sergeants major. In addition, the Army Reserve reported training 400 brigade and battalion commanders.
- In fiscal year 2010, the Navy revised key SAPR command personnel training to improve response to sexual assaults. Navy installation Sexual Assault Response Coordinators (SARC) reported training on roles and responsibilities for 1,807 commanders in fiscal year 2010, as well as training for 805 new command SAPR program points of contacts, 484 new command liaisons, and 681 new SAPR data collection coordinators.
- Marine Corps provided command team training on SAPR roles and responsibilities to 258 commanders in fiscal year 2010, which included how to perform commander-led discussions during installation orientation for newcomers.
- In the Air Force, senior pre-command training is conducted at Air University, Maxwell AFB, AL. In fiscal year 2010, 122 wing and vice wing commanders and 270 group commanders received SAPR training as part of this training. Installation SARCs also provided SAPR-specific training to 3,342 squadron commanders and first sergeants.

The Sexual Assault Prevention and Response Office (SAPRO) is currently working with the Defense Equal Opportunity Management Institute to develop questions for the Defense Equal Opportunity Climate Survey (DEOCS) that address SAPR. The DEOCS is a commander's management tool that allows him or her to proactively assess critical organizational climate dimensions that impact the organization's effectiveness. These questions are being formulated to specifically assess the extent of knowledge, impact of messaging, and levels of skill associated with SAPR policy within military units. While survey responses for individual units will be provided back to commanders for their use, Service-wide response trends will be analyzed for Service strengths and potential gaps in training effectiveness. These cumulative survey results will be used to improve DOD training requirements for both servicemembers as well as commanders. In addition, commander training will continue to receive attention by SAPRO in its program oversight role. The Services also review commander training as part of their Service Inspector General assessments of the SAPR program at military installations.

17. Senator SHAHEEN. Dr. Rooney, what additional measures—if any—would you recommend in order to more effectively respond to allegations of sexual assault in the field?

Dr. ROONEY. At this time, the Department is continuing to implement the recommendations of the Defense Task Force on Sexual Assault in the Military Services—many of which were legislated in the National Defense Authorization Act for Fiscal Year 2011. To date, 26 recommendations have been completed or closed, 61 are in progress, and only 4 cannot move forward or are outside the Department's control.

Some of the 26 recommendations that have been completed include:

- Including the SAPR program in the Department Program Objective Memorandum budgeting process to ensure a separate line of funding be allocated to the Services.
- Setting forth clear guidance to all commanders that their leadership of their commands' SAPR program is a non-delegable responsibility.
- Ensuring that Sexual Assault Forensic Examination (SAFE) kits are either available or accessible in sufficient time to preserve evidence.

Some of the 61 recommendations that are in progress include:

- Developing standardized SARC and Deployable SARC duty descriptions in the SAPR DOD Instruction to ensure qualified personnel are appointed to fill these critical positions and to clarify roles and responsibilities.
- Directing SAPRO to develop training policies and exercise oversight of Military Service SAPR training programs.
 - Note: The Training Subcommittee of the Sexual Assault Advisory Council developed training requirements for servicemembers, commanders, senior

enlisted members, and first responders, and are included in the SAPR policy scheduled for reissuance in spring/summer 2011. A Working Integrated Product Team has been established to discuss and address this recommendation in regards to SAPR training for Equal Opportunity Advisors.

- Enacting a comprehensive military justice privilege for communications between a victim advocate and a victim of sexual assault.
 - Note: The Department has submitted a proposed Executive order that would create a Victim Advocate Privilege to the Office of Management and Budget (OMB) for formal coordination. This Executive order is currently under OMB Federal Agency review and signature is expected in the coming months. Once signed, it will become part of the Manual for Courts-Martial Military Rules of Evidence and will be included in the Federal Register as a policy change that will extend privileged communication to include all victims of sexual or violent offenses, including domestic violence in all cases arising under the Uniform Code of Military Justice.

The four recommendations that cannot move forward or are outside the Department's control are:

- Establish a Sexual Assault Response Team (SART) protocol. At a minimum, this protocol should include that the SART convene within 24 hours of a reported sexual assault.
 - Under further review. The Department altered this recommendation to meet the intent. It is impractical to mandate a SART meeting within 24 hours of a reported sexual assault especially in a deployed environment.
- Ensure that victims of sexual assault in training environments are provided confidential access to victim support services and afforded time for recovery.
 - On hold. All victims are provided confidential access to victim support services. However, further analysis needs to be given to restricted reporting in the training environment and the impact it may have on an individual's progress. The Department developed an action plan to implement this recommendation at a later date.
- Enact a law exempting Federal medical personnel from State provisions requiring them to report sexual assaults to civilian law enforcement to ensure all servicemembers have the restricted reporting option.
 - This recommendation lies with Congress. However, the Department is exploring options on how to otherwise implement this recommendation.
- Ensure the Services consistently implement the titling standard.
 - On hold. Military law enforcement organizations already adhere to DOD Instruction 5505.7, "Titling and Indexing of Subjects of Criminal Investigations in the Department of Defense." The Department developed an action plan to further implement this recommendation at a later date.

In addition to the above, we have received approval to conduct a survey of victim experience with the SAPR program. This survey is expected to produce a measure of victim satisfaction that can be used to assess program effectiveness. This survey is expected to be completed in the fall of 2011. Also, as the Task Force was extremely thorough in its review of the SAPR program, the Department continues to believe greater program effectiveness will be achieved through these recommendations.

18. Senator SHAHEEN. Dr. Rooney, do you believe that reporting procedures and policies currently in place are effective?

Dr. ROONEY. The reporting procedures and policies enacted in 2005 have been effective in bringing additional victims forward for assistance and care. While there are many victims that still do not report the crime, more sexual assault victims are coming forward to make a report and get assistance than at any time in the Department's history. However, as more information is gathered, current policies and procedures can continue to evolve, further improving victim response and prevention of sexual assault.

Most sexual assaults in civilian and military communities alike go unreported because of victim concerns about the stigma associated with the crime and loss of privacy. However, civilian research shows that when victims report the crime, they are more likely to get care. In 2010, Department policy, training, and messaging brought forward 105 percent more victims than what was received in 2004. Restricted Reports now account for nearly 30 percent of all initial reporting and increase on average by about 8 percent each year. Unrestricted Reports have increased on average by about 5 percent each year. The Department believes that

much of this increase in reports is due to its reporting policy and training. In 2010, more than 93 percent of Active Duty members received training on sexual assault reporting options, how to report, and to whom reports should be made.

Increased reports of sexual assault do not mean that more assaults are occurring. Given the historical underreporting of sexual assault, the Department believes that its policies are providing the support necessary to bring a greater proportion of victims forward and to establish a culture of prevention. This belief is supported by Department research in 2010 that found that the incidence rate of sexual assault during the year prior to the survey decreased by one third since 2006, while the number of reports made by victims actually increased. As a result, the Department now has greater visibility over the sexual assaults that occur against servicemembers. We believe that greater visibility leads to improved victim response, more opportunities to provide care, and heightened offender accountability.

19. Senator SHAHEEN. Dr. Rooney, what more can DOD do in order to improve its responsiveness to these serious allegations?

Dr. ROONEY. When the Department enacted its current SAPR policy in 2005, it created new resources for victims and required specialized training for all first responders, including healthcare providers, investigators, military attorneys, and chaplains. Currently:

- Over 700 SARCs and over 11,000 victim advocates were trained in fiscal year 2010 to assist victims of sexual assault all over the world.
- All first responders get annual and other specialized training on how to assist and treat victims, including unit commanders who receive SAPR program training prior to taking command.
- Victims today have greater access to SAFEs, trained personnel, and follow-up care than before the policy.
- Most victims who make Unrestricted Reports of sexual assault contribute to legal action against the alleged offender. However, a few hundred victims each year decline to participate in the military justice process.

While the Department has improved its response system substantially by establishing a 24/7 response capability at every military installation worldwide, it must continue to improve the professionalism, capabilities, and resources of all who support victims seeking support. In addition, we must continue to create a culture where victims of crime are treated fairly by those with whom they serve. This includes our current policy of training all deployed personnel, including Guard and Reserve. These efforts take continuous time, attention, and resources, as well as patience and resolve, such that widespread victim support becomes a permanent feature of military culture. The Department believes that its current efforts to improve the confidentiality of victim communication with SAPR personnel sends an important message that victim privacy will be respected. In addition, ongoing efforts to teach commanders how to champion the SAPR program will further improve the professionalism of DOD's response to this crime. Ultimately, these efforts contribute to the Department's strategic priority of establishing a climate of confidence such that more victims will want to report the crime.

20. Senator SHAHEEN. Dr. Rooney, sexual assault has been a particular risk in combat areas. In your advance policy questions, you suggested that you "did not have enough information to make a detailed assessment" about steps the Services have taken to prevent and respond to sexual assaults in combat zones. Can you provide a more thorough assessment of the steps the Services have taken in order to prevent and respond to sexual assaults in combat zones?

Dr. ROONEY. The Department has been diligent in addressing SAPR in combat zones and must be ready for any eventuality when it deploys people into these areas. Over the past 7 years, it has responded directly to the special circumstances that impact sexual assault in combat zones. A number of specific steps have been taken by the Department.

In 2004, the Care for Victims of Sexual Assault Task Force was begun and its recommendations became the framework for the Department's SAPR policy enacted in 2005. Both of these efforts focused intently on the special circumstances that impact sexual assaults in combat zones. Deployable SARC and Unit Victim Advocate positions were created to ensure that SAPR services were available wherever servicemembers deployed. In addition, a special training requirement was developed to give pre-deployment training to individuals before they arrived in theater. This training addresses reporting procedures in theater, local customs and mores, and prevention skills.

Following a 2008 GAO recommendation, the Department drafted changes to existing directives detailing responsibilities for the commanders of the combatant commands in deployed and joint environments.

In 2009, the Defense Task Force on Sexual Assault in the Military Services visited forward deployed installations that support Operation Enduring Freedom and Operation Iraqi Freedom. The Task Force recommended that the Department improve access to qualified medical personnel to conduct evidence collection, especially in deployed and remote environments. The Services implemented this recommendation in fiscal year 2010. DOD is also in the process of fulfilling additional Task Force recommendations to improve the training of Deployable SARCs and establish Deployable Victim Advocate positions.

In fiscal year 2010, the Department was tasked by Congress to report on the current availability and adequacy of comprehensive and proper medical care for victims of sexual assault in combat zones, as well as the availability and adequacy of post-mobilization medical and mental health care for victims of sexual assault in the Reserve components. The results of this review were forwarded to Congress in 2010 and the three lines of action identified from this review are currently being pursued.

OSD SAPRO and the Military Services continue to focus on these challenges. In fiscal year 2010, none of the Military Services reported any gaps in supplies, trained personnel, or transportation resources; reported any cases in which lack of an available SAFE kit or other medical supplies hindered care; or had any verifiable reports of victims for whom timely access of laboratory testing resources hindered care. The Marine Corps reported one case in which a victim had to be transported 90 minutes to undergo a SAFE and was addressing the matter at the end of fiscal year 2010. Department research since the SAPR policy was enacted in 2005 has found that, while most sexual assaults occur at one's home station, 25 percent of women and 27 percent of men indicated the unwanted sexual contact occurred while they were deployed to a combat zone or to an area where they drew imminent danger pay or hostile fire pay. This dictates that SAPR in combat zones must remain a focus of concern.

Prevention of sexual assault in combat zones is challenging. However, the Department's strategy has been to teach skills and techniques that apply universally, regardless of location. The Services have all enacted programs that teach Active By-stander Intervention skills that enable members to identify situations that are at risk for sexual assault and safely intervene before the crime occurs. These programs mesh well with the battlefield ethos of ensuring the safety of fellow servicemembers, and the Department believes these strategies have contributed to a reduction of the sexual assault incident rate by one-third since 2006.

When sexual assaults do occur, the delivery of comprehensive care to victims, wherever they are located, requires training care providers with the right skills and having the appropriate equipment at the right time and place. The unique and unpredictable circumstances in deployed environments can make it difficult for SAPR responders to deliver comprehensive and consistent care to victims. Tracking victim services accurately and consistently can also be challenging in deployed environments. Unit rotations and redeployment make it difficult to provide consistent assistance once a report has been made.

The work on both prevention techniques and response effectiveness continues. Most recently, at the request of the Deputy Secretary of Defense, U.S. Central Command recommended changes to the policies and procedures of the OSD and Military Departments that they believed may hinder theater operations in a deployed environment. One of its recommendations was for the USD(P&R) to issue enduring guidance describing the SAPR services a combatant command must provide to contractor staff when contractors deploy with U.S. Armed Forces. OSD SAPRO proposed revisions to the SAPR Policy that will fulfill this recommendation when the SAPR Policy is reissued in 2011.

21. Senator SHAHEEN. Dr. Rooney, what additional measures—if any—will you recommend in order to more effectively prevent sexual assaults in combat zones?

Dr. ROONEY. DOD prevention programs appear to be working and have contributed, at least in part, to a decrease in sexual assaults occurring annually against Active Duty servicemembers. The incidence rate of sexual assault has decreased substantially, according to the Defense Manpower Data Center Workplace and Gender Relations Survey of the Active Duty:

- In 2006, 6.8 percent of women and 1.8 percent of men on Active Duty indicated experiencing some form of sexual assault in the year prior to being surveyed.

- In 2010, 4.4 percent of women and 0.9 percent of men on Active Duty indicated experiencing some form of sexual assault in the year prior to being surveyed.

This decrease in incidence rate suggests that there were nearly one-third fewer incidents of sexual assault in 2010 than in 2006. The decrease also reflects the fact that prevention concepts are well understood throughout the military community:

- 93 percent of Active Duty received prevention training in 2010 (up from 88 percent in 2006).
- 93 percent of Active Duty believe it their duty to prevent harm to a fellow servicemember.

The Department plans to continue its prevention training initiatives as well as its predeployment briefings to servicemembers traveling to combat areas about prevention and response procedures specific to the area. However, prevention programs used by the Department are universal—the concepts taught apply anytime, anywhere servicemembers are stationed. The Defense Task Force on Sexual Assault in the Military Services also recommended that each installation and operational commander assess the adequacy of installation measure to ensure the safest and most secure living and working environments. This includes installations and forward operating bases in combat zones. Implementation of this recommendation is ongoing, and, if confirmed, I would continue to support these initiatives.

QUESTION SUBMITTED BY SENATOR KELLY AYOTTE

NATIONAL GUARD YOUTH CHALLENGE PROGRAM

22. Senator AYOTTE. Dr. Rooney, the National Guard Youth ChalleNGe Program (NGYCP) works to intervene in and reclaim the lives of at-risk youth by transforming their values and enhancing their skills, education, and self-discipline. The program has distinguished itself as an effective intervention in the lives of troubled youths. Despite this track record of success, I understand that the National Guard Bureau is considering a significant reduction in the national training program for the NGYCP. What is your assessment of the program and what is DOD's plan to fund this program going forward?

Dr. ROONEY. The NGYCP training and education program is a direct investment in the ChalleNGe program staff. The aim of the training and education program is to improve the performance of NGYCP staff and provide a cumulative effect of individual staff performance on cadet recruiting, retention, graduation rates, mentoring, and a positive placement following graduation.

Course attendees consistently agree that the course offerings are of great value and benefit. Over 93 percent of the attendees report an increase in their performance and 85 percent of the attendees' supervisors report the performance for those who complete training and educational offerings as excellent. In summary, trained and educated staff members improve ChalleNGe program's overall performance in cadet recruiting, retention, graduation rates, mentoring, and positive placement following graduation.

For fiscal year 2011, the Office of the Assistant Secretary of Defense for Reserve Affairs provided funding and budget guidance for the NGYCP to operate under the ongoing Continuing Resolution. This guidance stated that the priority during the continuing resolution period is to make the necessary funds available to fully support the ChalleNGe programs at the cost share percentage authorized under 32 U.S.C. 509, and to provide funds to increase enrollment at current programs in States that have the fiscal resources to meet the cost share funding requirements. Travel and training for the NGYCP staff should be considered after core NGYCP requirements were funded. While under the continuing resolution, the Department is limited to fiscal year 2010 spending levels which are less than the fiscal year 2011 President's budget request. If and when the continuing resolution is resolved, then we plan to review the entire fiscal year 2011 appropriation for the NGYCP. If the amount appropriated supports the President's budget request, then additional funding to support training for the rest of fiscal year 2011 will be available.

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 5, 2011.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Jo Ann Rooney, of Massachusetts, to be Principal Deputy Under Secretary of Defense for Personnel and Readiness, vice Michael L. Dominguez.

[The biographical sketch of Dr. Jo Ann Rooney, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHY OF DR. JO ANN ROONEY

Education:

- Boston University School of Management
 - September 1979–May 1983
 - B.S. Business Administration, Finance Concentration, Summa Cum Laude, awarded May 1983
- Suffolk University Law School
 - September 1984–February 1987
 - Juris Doctorate Degree awarded February 1987
- Boston University School of Law
 - August 1989–May 1991
 - LL.M. (Master of Laws) in Taxation awarded May 1991
- University of Pennsylvania, Graduate School of Education
 - August 2003–May 2005
 - Ed.D. (Doctorate in Education) in Higher Education Management

Employment Record:

- Jewish Hospital & St. Mary's HealthCare (uncompensated)
 - Member, Board of Trustees (2007–present)
 - Vice Chair (July 2008–present)
 - System includes primary, ambulatory, in-patient psychiatric, inpatient rehabilitation center, et cetera
 - Approximately \$1 billion in revenue
 - Committees:
 - Environment of Care (2006–present)
 - Strategic Planning (2007–present)
 - Investment (2007–present)
 - Management Review (2008–present)
 - Transition Committee (2009–present)
 - Benefits Measurement Committee (2009–present)
 - CEO Search Co-Chair (2009–present)
- Regis University (uncompensated)
 - Member, Board of Trustees
 - 2004–present
 - Executive Committee and Standing Committee Chair (2008–present)
- Mount Ida College
 - President
 - July 2010–December 2010
- Mount Ida College
 - Professor of Business Administration
 - July 2010–December 2010
- Spalding University
 - President
 - August 2002–June 2010
- Spalding University
 - Professor of Business Administration

- August 2002–June 2010
- The Housing Partnership (uncompensated)
 - Member, Board of Directors
 - 2003–June 2010
 - Chair of the Board (June 2008–June 2010)
 - Chair Elect (2006–2008)
 - Executive Committee-Treasurer (2005–2006)
- Emmanuel College
 - Adjunct Faculty
 - August 1994–August 2002
- The Lyons Companies, LLC (and affiliated companies)
 - Corporate General Counsel
 - Chief Financial Officer (CFO)
 - Chief Operating Officer (COO)
 - Partner
 - September 1994–August 2002
- Maselan & Jones, PC
 - Tax Attorney
 - July 1993–September 1994
- Steams, Rooney & Associates
 - Partner
 - July 1992–December 1993
- CIGNA Companies - IFSD
 - Staff Attorney
 - Technical Manager
 - June 1991–July 1993
- Caprio Law Offices
 - Attorney
 - September 1990–May 1991
- The Codman Company
 - Vice President
 - Senior Property Manager
 - Regional Marketing Director
 - Director of Residential Market Research
 - June 1984–September 1990
- Boston University Metropolitan College
 - Senior Lecturer
 - September 1986–December 1987

Honors and Awards:

- Beta Gamma Sigma (1983)
- Lock Honorary Society (1983)
- Mayor's Citation for Community Service to the City of Louisville, KY (2010)
- Scholar House, Lucy Award (2009)
- Business First, Partners in Health Care Award (2006, 2007, 2008, 2009, and 2010)
- Today's Woman Magazine, Most Admired Woman in Education (2006)
- Business and Professional Women/River City, Woman of Achievement (2006)

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Dr. Jo Ann Rooney in connection with her nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Jo Ann Rooney.

2. **Position to which nominated:**

Principal Deputy Under Secretary of Defense for Personnel and Readiness.

3. **Date of nomination:**

Originally nominated: September 29, 2010; renominated: January 5, 2011.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

March 23, 1961; Hazleton, PA.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Single.

7. **Names and ages of children:**

None.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

University of Pennsylvania, Graduate School of Education, August 2003–May 2005, Ed.D. (Doctorate in Education) Higher Education Management, May 2005.

Boston University School of Law, August 1989–May 1991, LL.M. (Master of Laws) in Taxation, May 1991.

Suffolk University Law School, September 1984–February 1987, J.D. (Juris Doctorate), February 1987.

Boston University School of Management, September 1979–May 1983, B.S. Business Administration, Finance Concentration, Summa Cum Laude, May 1983.

West Hazleton High School, September 1975–June 1979, High School Diploma, June 1979.

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

7/2010–12/2010, President of Mount Ida College, Newton, MA

7/2010–12/2010, Professor of Business Administration, Mount Ida College, Newton, MA

8/2002–6/2010, President of Spalding University, Louisville, KY

8/2002–6/2010, Professor of Business Administration, Spalding University, Louisville, KY

8/1994–8/2002, Adjunct Faculty, Emmanuel College, Boston, MA

9/1994–8/2002, Corporate General Counsel/Chief Financial Officer (CFO)/Chief Operating Officer (COO)/Partner, The Lyons Companies, LLC. (and affiliated companies) - Waltham, MA

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

None.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Jewish Hospital Saint Mary's Healthcare (JHSMH), Louisville, KY - Vice Chair, Board of Trustees.

Regis University, Denver, CO - Board of Trustees.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

American Bar Association Massachusetts Bar Association and Massachusetts Board of Bar Overseers

Rhode Island Bar Association

Florida Bar Association

Beta Gamma Sigma Honor Society

Member - Trustees of the Reservations (MA)

Member - Boat U.S.

Member - U.S. Rowing

Member - Hull Lifesaving Museum

Penn Alumni Association

Suffolk University Alumni Association

Boston University Alumni Association

St. Paul Parish (Hingham, MA)

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

None.

14. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

Beta Gamma Sigma

Lock Honorary Society

Today's Woman Magazine, 2006 Most Admired Woman in Education

Business and Professional Women/River City, 2006 Woman of Achievement

Business First, Partners in Health Care Award 2006, 2007, 2008, 2009, and 2010

Scholar House, Lucy Award 2009 (outstanding achievement supporting educational opportunities for women and families)

Mayor's Citation for Community Service to the City of Louisville, February 1, 2010 (presented for distinguished and outstanding service to the City of Louisville)

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Dissertation Spring 2005 - Navigating in a Building Sea of Change: Successful Growth Strategies of Two Private Higher Education Institutions, Author: Dr. Jo Ann Rooney.

April 2009, Association of Governing Boards (AGB) National Conference on Trusteeship, "Board Engagement in Major Academic Change," Prepared and Presented By: Dr. Jo Ann Rooney and Dr. L. Randy Strickland.

May 2008, Kentucky Council on Post Secondary Education (CPE) 8th Annual Conference on the Scholarship of Teaching and Learning - Challenging Student to Think Critically and Learn Deeply, Keynote Address "Boomers vs. X vs. Y: Educating Across Generations," Prepared and Presented By: Dr. Jo Ann Rooney.

April 2008, Association of Governing Boards (AGB) National Conference on Trusteeship, "Fostering Active Board Participation in Academic Governance," Prepared and Presented By: Dr. Jo Ann Rooney and Dr. L. Randy Strickland.

February 2008, Kentucky Council on Post Secondary Education (CPE) Adult Learner Summit, "Best Practices in Retention in Accelerated Programs," Prepared and Presented By: Dr. Jo Ann Rooney.

December 2007, Commission on Colleges of the Southern Association of Colleges and Schools (SACS) Annual Meeting, "Reaffirmation 101: A Case Study of Spalding University" Prepared and Presented By: Dr. Jo Ann Rooney, Dr. L. Randy Strickland, Dr. Lynn Gillette, and Victoria Murden McClure.

December 2007, Commission on Colleges of the Southern Association of Colleges and Schools (SACS) Annual Meeting, "General Education Assessment ASAP" Prepared and Presented By: Dr. Jo Ann Rooney, Dr. L. Randy Strickland, Dr. Lynn Gillette.

November 2007, Council for Accelerated and Experiential Learning (CAEL) International Conference, "Demonstrating the Effectiveness of Accelerated Programs" Prepared and Presented By: Dr. Jo Ann Rooney, Dr. L. Randy Strickland, Dr. Lynn Gillette.

November 2007, Commission for Accelerated Programs (CAP) Annual Meeting Plenary Session, "Best Practices in Retention in Accelerated Programs" Prepared and Presented By: Dr. Jo Ann Rooney, Dr. L. Randy Strickland, Dr. Lynn Gillette.

May 2007, Educational Policy Institute RETENTION 2007, "How to Use Assessment Data and Accreditation to Develop a QEP focused on Improving Students' Math Skills and Increasing Retention" Prepared By: Dr. Jo Ann Rooney, Dr. L. Randy Strickland, Dr. Lynn Gillette.

April 2007, N.C. State Undergraduate Assessment Symposium, "From Assessing for Accreditation to Assessing for Improvement - The Case of Spalding University" Prepared By: Dr. Jo Ann Rooney, Dr. L. Randy Strickland, Dr. Lynn Gillette.

January 2006, CIC President's Institute, "Restoring the Luster to Good Places: Institutional Turn-around Stories" Prepared and Presented By: Dr. Jo Ann Rooney.

November 2005, Commission for Accelerated Programs (CAP), "Teaching Accelerated Courses or Achieving Successful Outcomes with Adult Learners in Accelerated Courses" Prepared and Presented By: Dr. Jo Ann Rooney.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

See attached list.

[Nominee responded and the information is contained in the committee's executive files.]

17. Commitments regarding nomination, confirmation, and service:

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

JO ANN ROONEY.

This 20th day of January, 2011.

[The nomination of Dr. Jo Ann Rooney was reported to the Senate by Chairman Levin on March 15, 2011, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on May 26, 2011.]

**NOMINATION OF GEN MARTIN E. DEMPSEY,
USA, FOR REAPPOINTMENT TO THE GRADE
OF GENERAL AND TO BE CHIEF OF STAFF,
U.S. ARMY**

THURSDAY, MARCH 3, 2011

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:35 a.m. in room SD-106, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Lieberman, Reed, Nelson, Udall, Hagan, Begich, Manchin, Blumenthal, McCain, Inhofe, Chambliss, Brown, and Ayotte.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Jonathan D. Clark, counsel; Gabriella E. Fahrner, counsel; Jessica L. Kingston, research assistant; Gerald J. Leeling, counsel; Jason W. Maroney, counsel; Michael J. Noblet, professional staff member; and William K. Sutey, professional staff member.

Minority staff members present: David M. Morriss, minority staff director; Adam J. Barker, professional staff member; John W. Heath, Jr., minority investigative counsel; Daniel A. Lerner, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: Jennifer R. Knowles and Christine G. Lang.

Committee members' assistants present: Christopher Griffin, assistant to Senator Lieberman; Carolyn Chuhta, assistant to Senator Reed; Gordon Peterson, assistant to Senator Webb; Jennifer Barrett and Casey Howard, assistants to Senator Udall; Lindsay Kavanaugh, assistant to Senator Begich; Joanne McLaughlin, assistant to Senator Manchin; Chad Kreikemeier, assistant to Senator Shaheen; Jeremy Bratt, assistant to Senator Blumenthal; Anthony Lazarski, assistant to Senator Inhofe; Lenwood Landrum, assistant to Senator Sessions; Clyde Taylor IV, assistant to Senator Chambliss; Charles Prosch, assistant to Senator Brown; Pam Thiessen, assistant to Senator Portman; and Grace Smitham, assistant to Senator Cornyn.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody. The committee meets today to consider the nomination of General Martin Dempsey to be Chief of Staff of the Army.

General Dempsey, we welcome you here today, along with members of your family. We look forward to your testimony and to your continuing service.

America's Army today is as great as it has ever been in its 235 years of service to our Nation. As we are reminded every day, this service continues to come with great sacrifice.

Our Army remains globally committed and overstretched by nearly 10 years of continuous combat. The Army has met the challenges of the last decade with courage, determination, and professionalism for which they and all of us are justifiably proud and profoundly grateful.

The challenges of the decade ahead, however, will be no less daunting. Over the next 4 years, under General Dempsey's leadership, the Army must deal with many enduring and new challenges. First and foremost, the Army must continue to meet the demand for trained and ready forces in support of operations in Afghanistan and, for a short while, longer in Iraq.

Thankfully, the U.S. drawdown of forces in Iraq has begun. But, nearly 40,000 American soldiers remain there, contributing to the continued strain on our troops and their families.

At the same time, over 60,000 Army troops are committed to operations in Afghanistan. Hard fighting will continue, even as we and our allies continue to build the Afghan security forces so that they may take more and more responsibility for their security.

As adaptable and well prepared as our soldiers are today to support missions in Afghanistan and Iraq, the future beyond these operations holds real questions about what we will need the Army to do and how it will be structured to do it. In a speech to cadets at the U.S. Military Academy last week, Secretary of Defense Gates outlined what he considers the greatest challenges facing the Army as it takes on board the lessons of the last decade and prepares for the uncertain and dangerous world that lies ahead. Secretary Gates argued that it is unlikely that the Nation will commit large land forces to future conflicts and that the Army must "confront the reality that the most plausible high-end scenarios for the U.S. military will be primarily naval and air engagements." He cautioned that in a strategic environment where we are unlikely to fight an enemy employing large armored formations the Army will find it difficult to justify the number, size, and cost of its heavy armored brigades.

In a press interview last week, General George Casey, the Army's current Chief of Staff, seemed to go in a different direction when he said that he expects that over the next 10 years we will still have 50,000 to 100,000 soldiers deployed in combat.

We look forward to hearing General Dempsey's views on these perspectives and how they may shape the Army's plans and priorities in the coming years.

In his speech at West Point, Secretary Gates also said that his first concern is how the Army will structure itself—that is, its size and the number and composition of its deployable units, such as

combat brigades—how it will structure itself for the missions it is most likely to perform. In restructuring itself, the Army must find ways, he said, to maintain its hard-won combat-proven current capabilities and invest in the right future capabilities within a fiscally constrained environment.

Budget pressures are already being felt throughout the Defense Department. The Department's sufficiency initiative is intended to take funds away from less important or inefficient programs or activities and give them to higher, more relevant current and future modernization priorities.

As the next Chief of Staff of the Army, General Dempsey will need to find ways to deal with the spiraling growth of personnel costs. In the face of these challenges, additional budget reductions, although still being debated, are more likely than not. We are interested to hear General Dempsey's assessment of the efficiency initiative and any ideas that he may already have for improving processes and systems to ensure that we get the most out of every dollar the Army spends.

More directly related to its force structure, the Army needs to begin planning for the end strength reductions announced by Secretary Gates in January. The Army intends to begin drawing down 22,000 soldiers of temporary excess end strength, which was approved by Secretary Gates in the summer of 2009, and needs to do that between now and 2013. This reduction should not impact Army force structure, as this additional end strength was always temporary and intended to allow the Army to fill its deploying units and to end the use of stop loss that is holding soldiers beyond their enlistment. However, the Army also plans to reduce permanent end strength by another 27,000 people between 2015 and 2017, assuming security conditions are on track with current strategic plans.

This second part of the drawdown plan should result in some reduction of the Army's force structure, likely including the elimination of some combat brigades. Although this reduction is not planned to begin until after 2014, which would be at the back end of General Dempsey's tenure as Army Chief of Staff, he will nonetheless be responsible, at a minimum, for the analysis, planning, and the initial implementation of these end strength and force-structure changes.

The Army needs to rebuild its strategic depth—that is, the desired readiness in the nondeployed force—such that it is capable of responding to any unforeseen contingency. Strategic depth has been sacrificed over the last 10 years by the consuming force requirements of operations in Afghanistan and in Iraq. In order to gain and maintain the necessary higher readiness levels in our deployed forces, the readiness of our nondeployed forces has been at historic lows. Although the Army continues to meet the demand for counterinsurgency and support operations in Afghanistan, Iraq, and around the world, and despite the amazing resilience of our troops and their families, the Army remains stressed in many ways. Given the planned Army drawdown, budget pressures, and force demands for operations in Afghanistan, we continue to face substantial risk, should we need the Army to respond to another contingency.

As the next Chief of Staff, General Dempsey will have the opportunity, as commitments in Iraq are concluded, to rebuild some degree of strategic depth. We're interested to hear General Dempsey's assessment of Army readiness and his views on the prospects for its improvements over time.

The Army needs to continue to rationalize and stabilize its near- and long-range modernization strategies and programs. In general, major Army modernization efforts have not been successful over the last decade or more. But, over the last 2 years, under the leadership of Vice Chief of Staff of the Army, General Peter Chiarelli, and the Under Secretary of the Army, Dr. Joseph Westphal, the Army has worked diligently, through an objective and detailed series of capability portfolio reviews that has started it on a path towards achieving rational, stable, and affordable Army modernization strategies and programs. As a result of this analytical process, the Army has terminated over-ambitious, redundant, or unaffordable weapons systems. We're interested to hear General Dempsey's assessment of this review process and to share with the committee what role he might play in sustaining the momentum achieved over the last 2 years.

Finally, the Army must work as long and as hard as possible to deal with the human cost to soldiers and their families of the pressures and consequences of an Army in continuous combat for 10 years. A high priority of the Army's leadership over the last 4 years has been dealing with the stress of multiple combat rotations and long separations, the stress on soldiers and their families.

The Department of Defense (DOD) and the Army set a goal that soldiers in units would have twice as much time at home as they would deployed, and that Army families would enjoy greater stability and less stress. Also, the Army has instituted significant programs for the improved care of our wounded soldiers and their families. Despite the efforts of the Army and leaders throughout the chain of command, heartbreaking incidents of suicide continue in the Active-Duty Force, and are now increasing in the National Guard and Reserves, as well. The committee is interested to hear General Dempsey's assessment of the Army's efforts in these areas.

General Dempsey, the Nation could not be more proud of our Army, its soldiers, and their families. We are grateful for your leadership and for your willingness to assume responsibility for the readiness and the care of our magnificent Army. You are extraordinarily well qualified to undertake the position to which you have been nominated.

We are also grateful for the service and sacrifices of your family in supporting you over the years. When we call upon you for your opening statement, we would be delighted if you would introduce your family who are with you here today.

Senator McCain.

STATEMENT OF SENATOR JOHN McCAIN

Senator McCAIN. Thank you, Mr. Chairman.

General, welcome, and congratulations on your nomination. I'm grateful for your extraordinary service and personal sacrifices throughout your career. I'm very appreciative of your family and the support they've given to you.

Since the attacks of September 11, soldiers and their families have served under the stressful conditions of active combat for nearly 10 years as the Army has transformed itself into a modular expeditionary force while simultaneously meeting the demands of two wars. We're enormously grateful for the sacrifices soldiers and their families have made for their Nation, for their units, and for one another. The human costs of combat have been great. But, I applaud the efforts of senior military leaders in DOD and the Army to provide the best medical care possible to respond to the needs of wounded soldiers and to assist the families of all soldiers. If you're confirmed, there will be no higher priority than continuing this work.

While the cost of defeating al Qaeda and the Taliban, and those who would attack us again if they could, has been great, Army leaders at every level can take pride in their accomplishments. Four years ago, how different the situation was in Iraq. I described it then as dire and deteriorating, and there were those who declared that the war was lost and we should accept defeat. I shudder to think of how the Middle East would look today and what condition the Armed Forces would be in today if the Army had not surged troops to Iraq and not been so decisive in providing the security needed to turn the tide there.

Winning the current fights in Iraq and Afghanistan must continue to be the Army's priority, and the next Chief of Staff must ensure that soldiers have what they need to succeed. As Chief of Staff, you will have to develop and justify your vision of what the Army should look like in the future.

In his speech last week to the cadets at the U.S. Military Academy, Secretary Gates expressed his predictions about what their future service in the Army would look like. He discounted the likelihood of another land campaign like Operations Iraqi Freedom or Enduring Freedom, and forecast an Army, in coming years, that would most likely engage in short-duration, low-intensity operations engaged in counterterrorism, rapid reactions, disaster response, and stability security-force assistance missions. I'm interested in how much you share Secretary Gates' views.

The budget plan for the Future Years Defense Plan through 2016 also calls for reducing Active-Duty strength by 47,000 soldiers. I'd like your views on whether such manpower reductions are consistent with the Army's focus on full-spectrum operations and readiness to conduct missions of any kind.

Debate about the future missions of the Army is a necessary predicate for the weaponry the Army will need to succeed. I am deeply concerned by the Army's inability to manage successfully its major defense acquisition programs; most prominently, the Future Combat System (FCS). With the arguable exception of the Stryker, the Army has not successfully brought a major system from research and development, through full production since the so-called "big five," the Abrams tank, Bradley fighting vehicle, Patriot missile, and Blackhawk and Apache Helicopters, in the late 1970s and early 1980s. To my knowledge, the Army has yet to negotiate the termination cost for the FCS contract. As such, the total cost of FCS has yet to be fully determined. Unfortunately, this failed 11-year investment in a "modernization program" has served only to

set the Army and the American taxpayer back. I'd be interested to hear from you how we intend to improve the management and oversight of major Army acquisition programs so that something like FCS doesn't happen again.

On balance, the Army can take great pride in its record of accomplishment, particularly those of its troops and its transformation from a garrison force to an expeditionary, mobile, and highly adaptable fighting force. Many challenges lie ahead, and the fiscal environment we are in will be very unforgiving if we repeat the mistakes of the recent past.

I thank you for your willingness to take this assignment on, and look forward to your testimony.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator McCain.

We're delighted that Senator Reed is going to be introducing our nominee.

You couldn't have anyone better to be introducing you. I want you to know that, General. You're very well served by the person we're going to hear from next.

Senator Reed.

**STATEMENT OF HON. JACK REED, U.S. SENATOR FROM THE
STATE OF RHODE ISLAND**

Senator REED. Thank you very much, Senator Levin, Senator McCain, my colleagues on the committee.

It is a pleasure and a privilege to have the opportunity to formally introduce General Martin Dempsey to this committee as we consider his nomination as the 37th Chief of Staff of the U.S. Army.

I recognize that many, if not all, of you have had the opportunity to meet and to work with General Dempsey in the various challenging assignments he's held in recent years in our Army, particularly his command of the 1st Armored Division in Operation Iraqi Freedom, taking a force into the country and then being suddenly told to stay longer than expected, and doing it with superb professionalism; and then his succeeding command as the leader of the Multi-National Security Transition Command in Iraq, responsible for the training, support, and establishment of the Iraqi security forces.

Throughout his more than 36 years of Active service, General Dempsey has demonstrated the professional skill and personal character to lead our Army in challenging times. Our soldiers are engaged in two major operations in Iraq and Afghanistan. The Army has been engaged, since 2003, in the longest sustained combat operations in this history of our country. General Dempsey recognizes this. He also recognizes that his first priority is to support our soldiers in the fight. This support requires the continued training, equipment, and leadership that has made our Army the superb force that it is today.

Support for our soldiers also means support for their families, and General Dempsey knows about Army families. Throughout his career, his lovely wife, Deanie, has been serving with him, by his side, and together they have raised Major Christopher Dempsey, who's currently assigned to the Department of History at the U.S.

Military Academy at West Point, and daughters, Megan and Caitlin, both veterans of the U.S. Army. The Army is indeed a family affair with the Dempsey family.

But, General Dempsey also has the daunting challenge of shaping a force for the future in a time of increasingly constrained budgets. Dynamic change in technology, in international economic forces, in international institutions—indeed, even the notion of national sovereignty—all of these forces, and more, will shape the future and must, indeed, shape the Army. They must be responded to with innovative and creative proposals, and I am absolutely confident that General Dempsey will meet these challenges as we go forward.

He is superbly prepared to provide this critical leadership at this challenging moment. I would urge my colleagues to confirm him speedily so he can assume these responsibilities.

Thank you very much.

Chairman LEVIN. Thank you very much, Senator Reed.

A couple of our colleagues have asked their statements be submitted for the record, I will insert them here.

[The prepared statements of Senator Begich and Senator Gillibrand follow:]

PREPARED STATEMENT BY SENATOR MARK BEGICH

General Dempsey, the Small Business 8(a) Business Development Program is a vital economic tool for Alaska Natives, Native Hawaiians, and Native American Tribes in the lower 48. This program provides for education opportunities, cultural preservation, infrastructure development, and other opportunity for tribal members. The program is directly tied to the U.S. Government's commitment and policy of the right of self-determination to our first people.

Recently, the 8(a) program has unfairly been subject to criticism. Although some participants have pushed the limits of the opportunity provided to them, the majority of companies in the program have sound business practices and offer critical services and advantages to the Government. Additionally, to address loopholes that undermine the intent of the program, the Small Business Administration recently released the most comprehensive and thorough regulatory reform on the 8(a) program in its history.

A few 8(a) Army contracts have been subject to public scrutiny and criticism in the press. Addressing criticism, valid or not, can result in restrictive guidance undermining the 8(a) program, or a reluctance by contracting officers to contract with 8(a) Alaska Native Corporations, Native Hawaii Organizations, and tribal entities. However, the program itself is still a valid and important tool for Native peoples and for the Government.

Collectively, contract performance for the services rendered by 8(a) companies to their customers, including the Army, has been commendable. In addition, the contracting flexibility provided to the Army under this program has allowed it to address requirements for services in a timely and inefficient manner that could not otherwise be achieved.

If confirmed, I request you continue to utilize this program to contract for appropriate services required by the Army.

PREPARED STATEMENT BY SENATOR KIRSTEN E. GILLIBRAND

Admirals Row, built in the 19th century, consists of 11 brick buildings built to house high ranking Navy officers located in Brooklyn, NY. The buildings, which are architecturally distinguished and of historical importance, have been left mostly abandoned since the mid-1970s and are severely deteriorated and in dire need of repair. The Army National Guard currently controls the property, and has identified the Timber Shed and Building B for preservation. The Brooklyn Navy Yard Development Corporation (BNYDC), the non-profit corporation that manages the Navy Yard under a contract with New York City, has expressed its willingness to execute an emergency stabilization of these buildings prior to the property transfer between the

National Guard and the city. The BNYDC would like to begin construction on the buildings at Admirals Row immediately, but is currently prohibited from starting work because the National Guard will not allow access to the site.

I have written to Secretary McHugh to request that the Army take quick action to allow emergency stabilization of the Timber Shed and Building B in advance of the planned property transfer, while also completing the transfer expeditiously. I appreciate Colonel Presnell's response to BNYDC with a promise to expedite the environmental review. I want to reiterate my belief that the Army's flexibility in allowing the BNYDC to stabilize the buildings coupled with an expeditious review and transfer is in the best interest of both the Defense Department and the local community.

Chairman LEVIN. General Dempsey, the committee has a series of standard questions that we ask all of our nominees, and I will ask them of you now.

Have you adhered to applicable laws and regulations governing conflicts of interest?

General DEMPSEY. I have, Senator.

Chairman LEVIN. Do you agree, when asked to give your personal views, even if those views differ from the administration in power?

General DEMPSEY. I do.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

General DEMPSEY. I have not.

Chairman LEVIN. Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

General DEMPSEY. I will, Senator.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

General DEMPSEY. I will.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

General DEMPSEY. They will.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify, upon request, before this committee?

General DEMPSEY. I do, sir.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly-constituted committee, or to consult with the committee regarding the basis for any good-faith delay or denial in providing such document?

General DEMPSEY. I do.

Chairman LEVIN. Thank you, General Dempsey.

Now we're ready for your statement.

STATEMENT OF GEN MARTIN E. DEMPSEY, USA, FOR RE-APPOINTMENT TO THE GRADE OF GENERAL AND TO BE CHIEF OF STAFF, U.S. ARMY

General DEMPSEY. Thank you, Chairman Levin.

I do this at my great peril, but I'd like to stray from my prepared remarks, just at the beginning here, because I was struck by the, I hope, intended symbolism of having Senator Reed sit next to me during his introduction, because I've always felt as though this body, in particular, was a wingman of the Army's. Senator Reed

has always been a great wingman; that is to say, someone who watches out for you and who helps you see yourself in ways that perhaps you're unable to see. I'd like to have that relationship with this committee and with the Congress of the United States, because, Mr. Chairman, I think you and the Ranking Member have mentioned the challenges we have before us, and articulated them very well, and we're going to have to work together to settle those.

Chairman LEVIN. We look forward to working with you, General, on that basis, as a matter of fact. Very eloquently and aptly put.

General DEMPSEY. Thank you, Mr. Chairman.

Thank you for the opportunity to appear before this committee today in support of my nomination as the 37th Chief of Staff for the U.S. Army.

Senator Reed, thank you again, and the members of this committee, for allowing me to be part of this process. Thank you for your unwavering support and commitment to the soldiers of the U.S. Army and their families.

I've known some of you for a decade or more, and I've met some of you only recently, in the last few days. I always welcome the chance to discuss our national security challenges with you, and I sincerely admire what the members of this committee and your professional staffs have done to support those who courageously serve and are resilient in the service of their Nation.

I'd like to take a moment, as you suggested, Chairman Levin, to introduce my wife, Deanie, to you. I know she appreciates your kind words about her, too. We've been married, as you noted, for almost 35 years. She has joined me in commissioning all three of our children as officers in the Army, and she's sent two of them off to war. One of them, our son, Major Chris Dempsey, is here today.

Deanie and I have built our lives both within and around the Army, and I can report to you that there is no greater champion for soldiers and their families than Deanie. If I am confirmed, the Army will receive the great gift of her continued service with, I must be honest, the occasional break to care for our three grandchildren, and soon-to-be five grandchildren. She is my hero, and I love her for many reasons, not least of which is her shared commitment to the U.S. Army.

I'd also like to congratulate my predecessor, General George Casey, who will soon complete 41 years of distinguished service to our Nation.

I've always considered service in the Army to be a privilege. That privilege is even more apparent when our way of life is challenged as it has been over these past 10 years. I sit before you today with confidence that whatever challenges confront us in the future, your Army will respond with the same courage and resolve that has characterized it for the past 235 years.

You have seen firsthand the superb performance of our soldiers in Iraq and Afghanistan. Less visible, but equally important, are the contributions of soldiers currently deployed in over 150 nations around the globe. These men and women are fulfilling tasks assigned to us in the National Security Strategy to seek to prevent conflict by representing our Nation and its values and by increasing the capabilities of our international military partners. They are

Active, Guard, and Reserve. We are truly one Army, and we serve America proudly.

Here at home, we partner with local communities, schools, and colleges. Each year, 75,000 of America's sons and daughters make a commitment to leave their homes and serve their Nation in the uniform of the U.S. Army. In return, we make a commitment to develop them as soldiers and as leaders. As Commanding General of U.S. Army Training and Doctrine Command (TRADOC), I've met with soldiers serving in the very center and at the very edges of freedom. I've met with their families, living both at home and abroad. I've met with our wounded and with their families.

They are inspirational. They understand the challenges that we face as an Army and as a Nation. Their expectations of us are as simple as they are profound. They trust that we will provide the resources necessary for them to succeed in the fights in which we are currently engaged, and they trust that we will have the wisdom and resolve necessary to prepare them for the missions unknown to us today, but which surely await us.

If you confirm me as the Army's 37th Chief of Staff, you can be sure that I will act to earn their trust every day. I will work to match their drive, their sacrifice, and their resolve. I will partner with the Congress of the United States, and this committee in particular, to ensure we remain worthy of the title "America's Army."

Mr. Chairman, I want to assure you and the members of this committee that I understand the gravity of the task at hand. The position to which I have been nominated carries daunting responsibilities. I embrace the challenge.

I want to thank President Obama, Secretary Gates, and Secretary McHugh for their trust and their confidence in nominating me. I want to thank you for the opportunity to appear before you today.

I look forward to your questions.

Chairman LEVIN. Thank you very much, General.

Let's try a 7-minute first round for questions.

I made reference to Secretary Gates' West Point speech, and quoted from it. I wonder if you could give us your reaction to his remarks, both the ones that I quoted and any other part of that speech that you might like to refer to.

General DEMPSEY. Thank you, Mr. Chairman.

Secretary Gates, in his speech at West Point, pulled together themes that he's been discussing with us for some time. It's an aggregate, if you will, of the professional conversations we've had about the current state and the future state of our Armed Forces. It's not a conversation he's had uniquely with the Army. He's challenged the other Services, as well.

It seems to me that, in terms of the reference you made to his discussions about the heavy force, in particular, what he's challenging us to do is to reconsider the way we've proportioned our force—the force mix, if you will—and determine if that's the force mix that best suits our needs today. I don't think he's predisposed to the answer to that question. I think he's encouraging us to confront it. As we confront it, I think he is challenging us equally to look at the institution that supports it and the leaders that we develop. My personal, professional judgment, where I sit today, in

TRADOC, is that we have to become an institution that accepts adaptation as an imperative. It has to be part of our fabric. Where that takes you is, we might develop an Army suitable for 2020 that, consciously, we know will not be exactly the Army we need in 2030, because the current and future operating environments, as we anticipate them, will require an institution that provides what the Nation needs when it needs it. I think that the key to that, actually, is the development of leaders; so, leader development is job one. Systems and processes have to become more responsive to change and allow for the introduction, laterally, of changes to technology, for example. Organizations, which always change in our Army, have to be prepared and embrace change. I think we understand the signal we're receiving, and I think we can find the answer.

Chairman LEVIN. One of the points that he made at West Point was his identification of "ongoing and prospective requirements to train, equip, and advise foreign armies and police." That raised the question, he said, as to how the Army should "institutionalize security force assistance into the Army's regular force structure and make the related experience and skill set a career-enhancing pursuit." He flagged the importance of the Army's doctrine on this new advise-and-assist brigades, which he said have played the role that they've played in the last couple years, which is a "key role in the successful transition to full Iraqi security responsibility."

Now, building the security forces of foreign forces has traditionally been a Special Operation Forces mission. But, in both Iraq and Afghanistan, our general-purpose forces have been performing that mission for some time, in the form of those Advise and Assist Brigades. I'm wondering what your reaction is to the possibility of adding that as a required fundamental capability for general-purpose forces, which would require additional education, training, and readiness challenges for the Army to meet.

General DEMPSEY. Yes, thank you, Mr. Chairman.

I do think it becomes a core competency for our force in the future, as part of our effort to prevent conflict. I think that we've made some dramatic and very successful adaptations at the tactical level in understanding what it takes to partner with indigenous forces and partners. I think where we probably have room to grow and room to learn is in how we partner with institutions, how we accomplish what we formerly called security sector reform at the ministerial level, because it's not simply enough to partner with international partners at the tactical level; we have to ensure that they have the systems and the institutions that support them so they become viable partners into the future. I do think, if confirmed, that will be an area that I would pay particular attention to.

Chairman LEVIN. There were plans, some years ago—when Secretary Gates became Defense Secretary, there had been plans to re-station two Army brigades currently in Europe back to the United States. Those plans were put on hold when Secretary Gates came into office. The Department has now started a global posture review to reexamine the purposes, locations, and costs of U.S. forces stationed around the world, including the Army's combat brigades in Europe.

Can you give us your understanding of the status of that review—I believe you're a part of that review, maybe a major part of it—and give us the status of the review and whether or not that will include an assessment of Army forces stationed in Europe, as to whether we should continue them in the current numbers and configurations that they're at?

General DEMPSEY. Yes, sir. The study that you refer to, of which TRADOC is part, is essentially the force mix and force design—how many types of each brigade and what are the internal capabilities of them. We are involved in that.

We haven't made any decisions, because the recent announcement of the additional 27,000 has put us back to the drawing board, if you will, on trying to understand the implications of that and the assumptions we're making about the demand on us into the future.

But, to your point, if I could knit your previous question and this one together, the issue at hand for us will be, whenever we decide our force structure and its location, is, what purpose does it serve, where it sits? I'm a product of 12 years of the U.S. Army-Europe, and found great benefit in being immersed into that culture. I think that there will always be reason for us to have a forward-deployed force, both for the benefit of our partners, but also for our own benefit. But, I think that the size of that forward presence will be reexamined as we determine what our future force structure will look like.

Chairman LEVIN. Thank you.

Senator McCain.

Senator MCCAIN. Thank you, Mr. Chairman.

Again, congratulations, General Dempsey.

Prior to the Iraq war, there was a no-fly zone imposed as a result of the cease-fire agreement. That went on for, I believe, a decade. Isn't that correct?

General DEMPSEY. Yes, sir.

Senator MCCAIN. We did not take out the Iraqi air defenses?

General DEMPSEY. Actually, we did, Senator.

Senator MCCAIN. From all parts of Iraq?

General DEMPSEY. This predates my time at U.S. Central Command (CENTCOM). I was back in Germany, as it turns out during those years.

Senator MCCAIN. Yes.

General DEMPSEY. But, I do recall working on the Joint Staff. When there would be issues with Iraqis positioning air defense elements south of the latitude that we had established, we would attack them.

Senator MCCAIN. But, we didn't take out all Iraqi air defenses?

General DEMPSEY. No, sir.

Senator MCCAIN. Our aircraft were within range of those defenses?

General DEMPSEY. When they moved into a position that they were in range, we would attack them.

Senator MCCAIN. That wasn't too hard to do.

General DEMPSEY. Not being part of it, Senator, I can't speak to the difficulty of it.

Senator MCCAIN. Have you seen media reports that Gaddafi is using some of his air assets to attack, or attempt to attack, the pro-revolutionary forces?

General DEMPSEY. I have, Senator.

Senator MCCAIN. You have seen that. You might tell Admiral Mullen that you've seen that.

Do you believe that the Arab League and the people on the ground in Libya that are being attacked by Gaddafi's air assets should be listened to when they are asking for us to see that it is stopped?

General DEMPSEY. I think that they will have voice, and are having voice, inside the government.

Senator MCCAIN. As a veteran of several conflicts, isn't it true that if you tell the enemy that if they take certain measures, there will be reprisals—what I'm trying to say, if we tell the Libyans and Gaddafi that we are imposing a no-fly zone, that is a strong deterrence to many of their pilots as to whether to fly or not. We've already seen pilots defect. We've already seen a couple of them land in Malta. Wouldn't that have a certain deterrent effect on them, psychologically?

General DEMPSEY. Deterrence is always one of the options that we should have available to the national command authority. I will say, of course, that my own personal experience is, sometimes the way our potential adversaries interpret our deterrent actions is not exactly as we've planned it. But, deterrence is a valid option.

Senator MCCAIN. The perception of Libyan pilots who now take off and land and attack pro-revolutionary forces might prove rather cautionary to them if they think that we will stop them and shoot them down if they carry out those missions.

General DEMPSEY. We have the finest air force in the world, Senator.

Senator MCCAIN. May I just say, personally, I don't think it's loose talk on the part of the people on the ground in Libya, nor the Arab League, nor others, including the Prime Minister of England, that this option should be given the strongest consideration.

I'm very concerned about Wikileaks. Almost daily, we see some additional revelation of the Wikileaks situation. First of all, how did this happen? Second of all, who has been held responsible for this greatest disclosure, frankly, of classified information in the history of this country?

General DEMPSEY. Senator, I can't answer the question, "How did it happen?" I have been made aware that there's an ongoing—you know it as a 15-6 investigation—essentially, a commander's inquiry—commissioned by the Secretary of the Army, to answer that exact question. I know that the individual responsible for the investigation has had a series of meetings with Secretary McHugh. I'm looking forward to learning more about that, as well.

To your point about the protection of information, I think that this will be a wake-up call for us. We have to go forward, but we have to balance our protection of information with the competing requirement to continue to collaborate with interagency partners on information so that we can be as agile as the networks that we fight.

Senator MCCAIN. To my knowledge, no one besides Private First Class Manning has been held responsible for Wikileaks. Is that correct?

General DEMPSEY. To this point, that is correct, Senator. I don't know that that'll be the outcome.

Senator MCCAIN. One of your major responsibilities will be the issues of acquisition. A recently completed Decker-Wagner Army acquisition review paints a rather gloomy picture. According to this report, between \$3.3 and \$3.8 billion of the Army's research and development budget has been wasted per year, since 2004, on programs that were subsequently canceled.

Do you believe those figures to be accurate?

General DEMPSEY. I do, Senator.

Senator MCCAIN. Let me specifically mention one program to you, as I conclude my questioning, that I don't understand, and maybe you could provide us with some written response, because you may not know a great deal about it. But, the title is, "U.S. to spend \$800 million as it leaves MEADS program." It goes on to say, "Over the next 3 years, the U.S. Government plans to spend more than \$800 million on a missile defense proof of concept that Army Secretary John McHugh has little confidence will even work." In this article, it says the termination costs would be very high. I still don't quite understand why we would negotiate a contract that, if a contractor fails to meet its goals and we have to cancel the contract, we have to pay off the contractor. Do you know very much about this particular program, General?

General DEMPSEY. I do not, Senator.

Senator MCCAIN. Good. Maybe you could provide us with a written response after you are sworn in.

But, this kind of thing—I don't think there are stronger advocates in support of our defense spending and our need to equip and train our men and women who are serving, but when our constituents read stories like this—and it may not be totally accurate—but, when they read stories titled, "U.S. to spend \$800 million as it leaves the MEADS program," I think they deserve better, or at least a better explanation, at best.

[The information referred to follows:]

The Medium Extended Air Defense System (MEADS), Memorandum of Understanding (MOU), not the contract, established the terms by which the international parties negotiated that the withdrawing partner would bear the responsibility for contract termination. These terms on withdrawal are normal for international agreements. According to the MEADS MOU that we have with Italy and Germany, the Department of Defense (as the withdrawing participant) would be required to pay all contract modification or termination costs that would not otherwise have been incurred but for its decision to withdraw, up to its share of the cost ceiling for its financial contributions. The purpose of including this provision, during the negotiations, is to make it more difficult for a country to withdraw from a multilateral agreement—a withdrawal that could really leave the remaining countries in a difficult and costly position. This provision provides all MOU participants with positive incentive to stay in MOU programs that have awarded substantial MOU-related contracts to implement the MOU scope. This provision is value neutral in its applicability and protects the United States (normally the largest partner nation) from potential withdrawals by other partner nations that could have major negative impacts on the United States.

If the United States unilaterally terminated its participation in the MEADS program, we estimate our cost would be as high as the MOU ceiling amount of \$846 million for the United States. Allowing the contractor to proceed to "Proof of Con-

cept” avoids the expense of termination and allows the best use of remaining funds while maximizing return on investment.

Conversely, if the United States and its partners pursue the proposed Proof of Concept effort using the remaining MEADS MOU funding our cost would be limited to the current MOU commitment of \$804 million. In addition to saving money, the United States and its partners would derive substantial benefit in terms of hardware, software, or intellectual property deliverables from the MEADS prime contractor. This would allow Germany and Italy to proceed into production and provide the United States with an expanded array of future choices with regard to future Air and Missile Defense system-of-systems capability.

Senator MCCAIN. I thank you, General.

Thank you, Mr. Chairman.

General DEMPSEY. Thank you, Senator.

Chairman LEVIN. Thank you very much, Senator McCain.

General, you, then, will supply an assessment of that program and of that issue that Senator McCain has just raised, after you are confirmed.

General DEMPSEY. If I could clarify. The Senator said, “when sworn in.” So, sometime after April 11, I will dutifully respond.

Chairman LEVIN. I will stand corrected.

General DEMPSEY. Thank you, sir.

Chairman LEVIN. After you are sworn in, then we would expect an answer.

General DEMPSEY. Actually I should say, “if I’m sworn in.”

Chairman LEVIN. You are correct.

General DEMPSEY. Yes, sir.

Chairman LEVIN. We assume that. I’m glad you also do not assume that.

Senator Lieberman.

Senator LIEBERMAN. Thank you, Mr. Chairman.

I think it’s a good assumption.

I thank you, General Dempsey, for your career of service. It has impressed me, as I’ve had the honor to get to know people in our military, particularly in Iraq and Afghanistan in recent years, that the quality of leadership, really, from top down, is quite remarkable. I would set—and I particularly mean it in your case—the level of capacity against leadership in any other sector of our society. We’re very lucky to have had you rise to the position that you’ve been nominated for by the President. I look forward to working with you in the years ahead.

I wanted to ask you one question about the ongoing situation in Libya, following up with what Senator McCain said. I, too, have felt that the no-fly zone ought to be under active consideration, premised on a request from the opposition, once it established a provisional government, which now seems to have happened. Second, of course, hoping that we would have allies in that effort.

I want to ask you about another alternative here, because this is an ongoing situation and its outcome will determine, I think, not only how the lives of the people of Libya are, and whether more blood is shed there at the hands of a truly maniacal leader, Gaddafi, but also has an impact on the succession or transition to democracy in the rest of the Arab world. That’s why we’re all focused on it.

Another alternative, obviously, is to try to help the opposition and stop Gaddafi, is to provide them with air defense systems, and train them in those systems. The question of whether we do that

is not what I want to ask you about, because that has to be determined at a higher level. But, am I correct in saying that the Army has had experience in training militaries around the world in the use of air defense systems?

General DEMPSEY. Yes, Senator. If I can respond to that, recalling my experience as the Acting CENTCOM Commander, the answer to that is yes.

Senator LIEBERMAN. Right. While we're considering the no-fly zone—and I hear all the concerns about how it would be—how difficult it would be to implement another alternative that we might provide the Libyan opposition with the capacity to defend themselves from Gaddafi's aircraft. I assume that, if directed to do so, the Army would be prepared, in your opinion, to carry out that mission, to train the opposition in Libya, to Gaddafi, in the use of better air defense systems.

General DEMPSEY. Internal to TRADOC, we do have coursework and expertise in air defense.

Senator LIEBERMAN. Thank you.

You're not going to be surprised to hear that I'm concerned about the proposals to reduce the Army's end strength, although when Secretary Gates was before us, and when he made the announcement, it was very clear that this is conditions-based, depending on what the demands on the Army are, as we head into 2015, which is the date when the reduction is supposed to occur. All of us are haunted by the phrase "hollow Army". We don't want to go through that again. We fought hard, side by side, in the spirit that you suggested earlier, to increase the end strength.

I want to read to you an answer that you gave to one of the advance policy questions submitted to you by the committee. You were asked about the possible impact of decreasing Army end strength, and the Service's ability particularly to achieve the dwell ratio of 2 years at home for every year our soldiers are deployed. That was a big motivator for the statutory authorization of increased end strength. Your answer was, "The decreases in Army end strength are condition-based, and I'm not in a position, at this time, to assess whether there will be an impact on the dwell goal of 1-to-2, based on these reductions."

I want to ask you whether you would say that one of the conditions that should be met, before the Army is asked to reduce its current end strength, would be a judgment that the 2-to-1 or 1-to-2 dwell ratio for our Active-Duty Army will not be jeopardized by that reduction in end strength.

General DEMPSEY. I absolutely agree with that, Senator.

Senator LIEBERMAN. I appreciate that very much.

We don't know now whether the Government of Iraq will request that any of our Armed Forces remain in Iraq after the end of the current Status of Forces Agreement, at the end of this year. I hope they do, because I think it's necessary to protect all that we've given there to achieve what has been achieved. But, just assuming, for a moment, that the Iraqi Government did ask us to maintain some number of our Armed Forces in Iraq after December 31st of this year, and we decided to do so, I assume that would have an impact on dwell ratios for our Army and on proposals for reducing U.S. Army end strength.

General DEMPSEY. It may, Senator. It would turn on the depth of that commitment they were asking us to make and our assessment of what common interests we have in doing so. At some point, there is a bit of science to it. We know how big the Army is. We know what we're asking it to do. We know we want to have it on a 1-to-2 boots-on-the-ground (BOG)-dwell, because of the human dimension, and we can figure it out.

Senator LIEBERMAN. Good enough.

One part of Secretary Gates' speech at West Point that's received less attention than other parts—and it was a very important and thoughtful speech—was his focus, not on the Army's hardware, but on the software of training, professional military education, doctrine, career management, and promotions, so much of which you've had a leadership role in, in recent years and overall in your career in the Army.

I wanted to ask you—I know you've been leading a study on the Army as a profession of arms, in your current capacity—whether you could give us any of your initial thoughts on how the Army can best rise to what I describe as the software challenge, particularly the element of leadership, which you referred to in your excellent opening statement.

General DEMPSEY. Yes. Thanks, Senator.

It won't surprise you, I get a little advice, on occasion, in that regard from the junior officers and noncommissioned officers (NCO) among us. Incidentally, in my office calls, over here with many of you, I tend to have time to chat with your fellows, who, by the way, are just a remarkable bunch. That's across the Services. The question I always ask them is, how are you doing? How are we doing? What are you doing? What do you want to do? Some of your military legislative assistants are recently retired or resigned military. I ask them, was there something we could have done to keep you in the ranks? I get a lot of inputs.

I like the problem we have. We talked about all the challenges we have. But, I'll tell you, I really like the problem we have, in terms of the leaders, and even the individual soldiers; because 10 years ago, Senator, we didn't really know whether we were a courageous, resilient, resolute, inquisitive, adaptable force. We didn't know. We hadn't been tested. We certainly have been tested over the past 10 years. That's the foundation on which we now have to build the future Army.

Our challenge will be that these young men and women have had capabilities, authorities, and responsibilities, as captains, that I didn't have as a two-star general. I'm not exaggerating a bit when I say that. So, continuing their development, from that point, a much higher entry level than I had, is our challenge. We think there are different attributes—inquisitiveness—we think, the ability to adapt. We have to line up our evaluation system with these attributes. We have to relook at our professional military education, how much in the brick-and-mortar schoolhouse, how much can be done through these mobile learning devices. We have to find ways to broaden these young men and women at places like these fellowships.

We can figure this out. But, what we can't do—and I think the message that the Secretary of Defense is sending us is, we can't

simply—if I can use probably a poorly phrased metaphor here—but, if we were a rubber band and have been stretched over the last 10 years, we can't let ourselves simply contract back to our previous shape, because they won't stand for that.

Senator LIEBERMAN. Very well said.

Thank you.

Chairman LEVIN. Thank you, Senator Lieberman.

We are setting up a briefing on Libya that we will have tomorrow. It will be a classified briefing. We will share with the members of the committee, as soon as we have it, the time of that briefing.

Senator Inhofe.

Senator INHOFE. Thank you, Mr. Chairman.

I appreciate Senator Lieberman talking about the end strength and the fellowship program. I was going to ask about that, and I appreciate your answers.

The fellowship program, I see a guy sitting, two seats to your left, who was a part of that—the only problem with that program: you learn to love these guys and gals and then they're gone. I don't know how we can correct that, though. I appreciate the fact that we started limiting that program, here, about 15 years ago, and it's been increasing since then. I would encourage you to keep that trend up.

Let me say this. Your predecessor, General Casey—one of the things I liked and appreciated about him—and I know you have those same characteristics, because I've already been exposed to them—and that is, he's very hands-on. He wanted to know for himself what was going on. Of course, you're interested in the Joint Fires and Effects Trainer System (JFETS) Program and Air Defense Artillery and some of these things that are going on today. I hope that we can continue with that. I'm sure that we can. I appreciate the fact that you have, in our Fires Center of Excellence and all these things.

It's a whole new concept, this simulation level that we've gotten to right now. People are in shock when they come from other countries and see and witness this thing. I'm hoping that you would keep that up.

Do you have any comments about the JFETS program?

General DEMPSEY. I think it's game-changing.

Senator INHOFE. Yes.

General DEMPSEY. For the other members, it's a simulation, where we can link several different locations around the country. For that matter, we can link forward-deployed forces and have a common, live, virtual, and constructive environment in which leaders can grapple with complex problems, some of which are military, some of which are not.

Senator INHOFE. Yes.

General DEMPSEY. We're working to actually impose that model on the rest of the Army, at least in the institutional force. I think, eventually, though, the next training revolution in our Army will be what occurs at home station, because we have to raise the bar at home station. But, JFETS is groundbreaking.

Senator INHOFE. Yes, I agree with that.

Just one quick thing on some of the problems we're having that are health-related. We know, of course, with the strain, the tempo of operations (OPTEMPO) and all of this, the suicide rates, divorces, and all of this stuff that have gone on—and I know that we are addressing these but, I'd specifically talk about one of them, this traumatic brain injury (TBI). I've been interested in this for some time. In fact, the Chairman was good enough, at my request, to hold a hearing. We've made another request to hold a hearing that would include not just the vice chiefs, which is what we had the first hearing, but also the medical people, civilians, some of the troops themselves. I would like to be able to have such a hearing. Would you encourage us to get into the TBI and some of the other related problems, health problems that our troops are having?

General DEMPSEY. Senator, anything that this committee will do to remain teamed with us on the issue of care for wounded warriors, I will deeply appreciate and completely support.

We all saw that Frank Buckles, our last World War I veteran, passed away, just a few days ago, at 110. The scars of this war will be with us for the next 90 to 100 years. Shame on us if we forget, when the conflicts dissipate a bit. Shame on us if we reflect that this is a long-term issue for our Army, but also for our Nation.

Senator INHOFE. I appreciate that. I don't mean to imply that this is having that negative an effect on individuals. I spent New Year's Eve in Afghanistan with the troops, and then again last week. It's just shocking to me. I was a product of the draft, and so I'd never thought an All-Volunteer Army would be what this is. But, the spirits are so high, and it just seems that, even when the OPTEMPO is high, the spirits are high, and we've done a good job. I know you'll carry that on.

Senator McCain talked about some of the aging equipment that we have. General Casey and General Chiarelli have stated that we're burning up equipment as soon as we can field them. This is something that is a concern of mine. There was a statement that was actually in the press, and I'll read it. The study of the Secretary of the Army by former Assistant Secretary of the Army, Gilbert Decker, and retired General Louis Wagner, found that the Army has spent \$3.3 to \$3.8 billion annually since 2004 on weapons programs that have been cancelled. I am concerned, and you wouldn't know now, but for the record, I want to see if that has stopped by now. If not, maybe we can address and find out why.

[The information referred to follows:]

The Army Acquisition Review Panel submitted its report in February 2011, which includes 76 recommendations in 4 broad areas that extend across various Army organizations. Those broad areas address requirements generation, risk management, organizational alignment, and resources. The Secretary of the Army has directed the Assistant Secretary of the Army for Acquisition, Logistics and Technology (ASA(ALT)) to assess those recommendations. The ASA(ALT) will provide specific recommendations for implementation of those portions of the report which are judged to improve the efficiency and effectiveness of the Army's Acquisition process. That initial assessment is due to the Secretary in April. Following that, the Army will determine the path forward on implementation of the recommendations.

Senator INHOFE. On the equipment, and the aging equipment, specifically, I've been concerned, as time has gone by—and I think Senator McCain mentioned this—and a good example would have been the Crusader. We needed to increase that non-line-of-sight ca-

capacity that we had. The Paladin, that we're using today, is the same technology that was there 50-some years ago, when I was in the U.S. Army. Now we have a Paladin Integrated Management (PIM) program. But, we went through the FCS and—as has been stated before—we get down the road to these things, then someone comes along and we whack them and start something new.

I hope, and I believe, that you will do all you can—now that we have the PIM program—down the road a little ways, that we can continue to do that. It's just remarkable that our capability with the old Paladin, there are five countries, including South Africa, that make a better artillery piece than what we're using now.

Do you have any comments about where we're going to go in the future and what you're going to try to keep the discontinuation from happening again?

General DEMPSEY. Simply my commitment, Senator, to work that. I am familiar with the work of Dr. Decker and General Wagner. I think it's good work. My own professional view is that some of the programs that we aspire to field fail because of the time horizon we establish for them. I have been vocal, within TRADOC, that requirements determination and the acquisition solution to those requirements and capabilities need to be taken on a shorter timeline, a 5- to 7-year time horizon instead of a 10- to 15-year horizon, because if we try to project our needs 10 or 15 years in the future, it's almost certain we won't get it right. I think we have some good ideas in that report to work on. You have my commitment, Senator.

Senator INHOFE. Yes. I'm sure that's right. My time has expired, but I would only tell you that—I remember the last year that I served on the House Armed Services Committee was 1994—we had a witness that came in that said, "In 10 years, we'll no longer need ground troops." You're right. As smart as all the generals are, we don't know what's out there in the future. But, I would like to get to the point where, no matter what is there, our kids have the best that there is out there, and I'm sure you feel the same way.

I look forward to serving with you.

General DEMPSEY. Thank you, sir.

Chairman LEVIN. Thank you, Senator Inhofe.

Senator Reed.

Senator REED. Thank you very much, Mr. Chairman.

General Dempsey, welcome.

Let me follow up on a point that you responded to, to Senator Inhofe, in that this 100-year burden for soldiers and marines and sailors and airmen who are bearing the fight now, it has to reflect not only in the DOD budget, but the Veterans Affairs budget. I think you concur. I just want that for the record.

General DEMPSEY. Absolutely.

Senator REED. Thank you.

We're talking, now, about the future. That is being shaped, or thought about, in terms of several different dimensions. One is a changing context: new technologies, social networking, climate change affecting the natural resources and will be the struggles. That has to be factored in.

But, the other fact is the traditional threat; what other countries or non-state actors have, in terms of weapon capabilities and inten-

tions. Can you talk about that aspect, as you go forward, of how you're trying to weigh that threat? Does it synchronize well with Secretary Gates' speech at West Point?

General DEMPSEY. Yes, sir, I will speak to that. It gets at the reason—I don't think the Secretary was saying, "Shed the heavy force and invest entirely in the light force and special forces," because he and I have had conversations, for example, about the Israeli experience in southern Lebanon in 2006, where a non-state actor, a terrorist organization, was as well organized, trained, and equipped as the traditional Israeli defense force that was confronting it: shore-to-ship missiles, air defense weapons, electronic warfare, advanced anti-armor capabilities. I mean really remarkable stuff. So, as the Secretary and I—and this is mostly in my job as acting CENTCOM commander—but, as we talked about the future of conflict, we generally believe that the future will be more a series of hybrid threats, where you have to be prepared to confront your adversary wherever he chooses to confront you.

Sometimes it'll be very irregular and decentralized, and sometimes it will look a lot like a conventional conflict. So, what we owe the Nation is a force that has capabilities proportional to what we believe we'll confront but has all those capabilities. We need an institution that's adaptable enough that if we get it wrong—and, as we've said here earlier, we are likely to get it wrong—we have to have an institution that is adaptable enough to rebalance itself on a far more frequent basis than we have in the past. I think the world is a far more dangerous place today than it's ever been, and we owe the Nation an agile force that can adapt to the future, whatever it finds in that future.

Senator REED. Thank you.

Let me go to another point that was raised in the West Point speech; that is, developing, not just an officer corps, but NCO corps of expertise and flexibility and agility. Part of that goes as a reward structure. Do you have any thoughts or comments now about how you're going to think about changing the reward structure so that you find people at the upper levels of both the commissioned officer corps and noncommissioned corps who have a cultural awareness, who have a range of skills that are not the traditional tactical operational skills that have in the past been the gate to get into the upper ranks?

General DEMPSEY. Yes. I will say, Senator, that's really been my life's work for the last 2 years, has been looking at leader development, really, all four cohorts; and I'll define the cohorts as officers, NCOs, warrant officers, and civilians as well, working a great deal with the Assistant Secretary of the Army for Manpower and Reserve Affairs on civilian development.

I think we've done some very good work, in particular, in the NCO corps. When I came in the Army in 1974, a NCO was very likely not to have a high school education. Now, it's the expectation that, if a soldier rises to the rank of sergeant major, he'll have a bachelor's degree before he gets there. By the time he retires, he'll have a master's degree.

We haven't actually adjusted how we use them yet to account for that additional capability. Someone approached me yesterday about the possibility of having NCO fellows here in the Congress of the

United States. You kind of slap your forehead and say, “Why didn’t I think of that?” We haven’t really adjusted the way we use them. But, I have great faith, and I applaud the selection that General Casey made of the new Sergeant Major of the Army, Ray Chandler, who will push us in that regard, in development of the NCOs.

On the officer side, and others, we’re looking at a new personnel management model. You may have heard of the Blue Pages in IBM. We have a prototype, on a thing we call the Green Pages, that allow an individual officer to actually collaborate more on their career development, allows us to understand what they’re interested in, not just the classes we’ve given them, but we might have somebody who worked in Outward Bound as a child or as a military child, spent 18 years in the Pacific Rim. We wouldn’t know that today, but we’d like to know that. There’s a number of programs that are out there. Technology provides huge opportunities to use them.

What I will tell you, in closing this question, is, I am deeply committed to the development of our leaders, because we are likely to get the equipment, sort of right, but not perfect, and the organization sort of right, but not perfect. We’re probably going to give guidance a little late, I’ve found. The person that pulls it together is that leader on the ground, and we have to keep committing to their development.

Senator REED. Just let me follow up on that and second your comment about the NCOs; they are the heart and soul of any military force, particularly the U.S. Army. In 1971, when I came on Active Duty, the same comment could be made about the NCOs’ education level, and now they’re superbly trained. I think you’re absolutely on target.

Second is that, with the advent of social networking—and this is not going to be a social network—but I was extremely impressed, years ago, when some enterprising young officers set up, sort of, Company Commander, Inc. or CompanyCommander—

General DEMPSEY. Dot com.

Senator REED.—dot com. Is that informal learning—how are you going to integrate that into our plans?

General DEMPSEY. That’s the question that provides the greatest opportunities for us, I think, in terms of leader development.

I have to just back up a second and tell you, when I took the job at TRADOC, Senator, I found a CD of General Donn Starry. Now, he’s a name familiar to you.

Senator REED. I know.

General DEMPSEY. But, Donn Starry was considered to be one of the great thinkers of our Army in the 1970s, and helped the Army, under other leaders, build to what it became in 1991, and even what it is today. But, he had a video—it was one of the first VCR tapes ever made in the Army—and it showed him walking into a mall in Hampton, VA, and looking at young men and women playing video games. He turned to the camera and said, “We know they’re in there. They’re in there playing these games. They’re paying for the opportunity to play. They’re learning something. What we don’t know is what they’re learning.” That was in 1981.

I feel the same way today about social networking. We have young men and women playing massive multiplayer online role-

playing games, MMOs as they call them, World of Warcraft and others—I mean, millions of children playing these interactive games. They’re learning something about developing as leaders, believe it or not, because of the way these games structure, and you have to impose your own leadership into the game.

We can figure out how to leverage a game like that for leader development, linking schoolhouses across the country—I’m talking about military schoolhouses. I think we’d be onto something in helping these young men and women collaborate, meet their desire to social network, and also facilitate the kind of learning we’re going to need by introducing complex problems in that environment, that we can’t replicate physically at places like Fort Hood, Fort Bragg, and Fort Carson. I think social networking has enormous opportunities for us.

Senator REED. Thank you very much, General.

Mr. Chairman, if I may, I think I recognize General Gordon Sullivan, the former Chief of Staff of the U.S. Army is in the audience today. His distinguished service must be applauded.

Thank you, General Sullivan.

Chairman LEVIN. Thank you, Senator Reed. Thank you for making that reference to General Sullivan.

We are very much intrigued by your answers here, I must tell you, General Dempsey. It’s really mind-opening.

Senator Chambliss.

Senator CHAMBLISS. Thank you very much, Mr. Chairman.

General Dempsey, let me echo the sentiments of my colleagues in congratulating you on this nomination, and also to thank you and your family for your service to our country and your continued commitment to freedom and democracy around the world.

Also, I want to commend you, likewise, on this fellowship program, and I appreciate your comments and strong support of that. I have been blessed, going back to my days in the House, with outstanding young men and women serving in my office. It’s been a privilege to have a chance to dialogue with those folks, one on one, about what really is happening out there which, in addition to the great service they provide from an information standpoint, personally, they’re just such an asset. It’s a very valuable program.

I want to go back to the question that Chairman Levin asked you about, on this decision regarding personnel serving in Europe. You’ll recall, a couple years ago, a decision was made to put three brigades back in the continental United States, one at Fort Bliss, one at Fort Carson, one at Fort Stewart. I’m not sure how the decision can be characterized as a reversal, putting on hold, or whatever. But, I’d like for you to characterize exactly where that is. What kind of importance is that decision being given in your current discussions, relative to what’s going to happen, as far as bringing troops back from Europe? Lastly, what’s your timetable on that study?

General DEMPSEY. Yes, thank you, Senator.

We, at one point, were going to build 76 brigade combat teams. We took a decision—the Department did—that we would build only out to 73, and we held the 4 brigades in Europe, pending the outcome of the conflicts in Iraq and Afghanistan, because we had

them—all of the Army, on such a 1-to-1 BOG-dwell ratio that it would have been too disruptive to move them, under that situation.

Now we're looking at absorbing, potentially, the 27,000 reduction, and it is inevitable, as Chairman Levin said, that there will have to be some structural changes to account for that 27,000. The analysis is just really beginning on that, and I haven't been made privy to it.

If confirmed, of course, that will come to the Chief and to the Secretary of the Army to determine which brigades are essentially the billpayers for that 27,000 end strength. I'm not suggesting it will be all brigade combat teams. It'll have to be some portion of the entire Army, to include the generating force. I think the timeline for that is probably the analysis over the next 6 months, because it'll be executed in the—in Program Objective Memorandum 13–17 and the timeline for our submission of 13–17 is on or about July 1. That's about the timeframe for this analysis.

Senator CHAMBLISS. Okay. While impressive gains in security have been made throughout the country of Iraq, Iraq still remains a very dangerous place to live, travel, and work in 2011. Targeted assassinations, corruption, and Iraqi security force, medical, logistical, planning, and transportation shortcomings continue to undermine the Iraqi Government security and infrastructure improvement efforts throughout the country. The security of their oil fields, pipelines, and terminals, while also much improved, remain a critical vulnerability and a prime target of insurgent forces.

As U.S. forces withdraw from Iraq, the Department of State will have to act quickly to significantly increase their security footprint in Iraq so that their diplomats can maintain a significant construction presence in Iraq for years to come, a job required sustained oversight engagement to watch over what remains of the \$58 billion in U.S. construction programs. While that ability to find, vet, and hire so many professional security personnel in such a short period is by no means a certainty, neither is continued stability in Iraq. As we're seeing throughout the Middle East right now, there is all kinds of instability regarding neighbors to Iraq.

My question is, with this sustained instability throughout the Muslim world, is the withdrawal of all U.S. combat forces from Iraq at the end of this year still the right thing to do?

General DEMPSEY. I can't speak to whether it's the right thing to do for Iraq. I think that's the piece of this, Senator, that we would have to examine.

We certainly have interests in Iraq and in the broader region. It will have to be determined whether Iraq's interests and ours will be matched, and that part of that match will be additional force structure remaining in Iraq. I mean, that's very much a negotiation that will have to occur between the two sovereign nations.

I will say that some forward presence—U.S. military presence, but, even more specifically, U.S. Army presence—in that region is important to me. I think that's a very important region of the world, and will be, for the foreseeable future, and I am advocate of a forward presence there.

Senator CHAMBLISS. There's also been some preliminary discussion and conversation about, when it becomes time to leave Afghanistan, that we may leave that country from a combat stand-

point, but that we will establish at least one base in Afghanistan. What's your thought, with reference to that issue?

General DEMPSEY. I haven't been made aware of that planning. I'm not surprised that someone is—someone should be, in fact, looking beyond the date 2014, which is the commitment we've made with our North Atlantic Treaty Organization allies to provide the kind of support, and to be in the lead. I'm not surprised folks are beginning to look beyond that to determine what is our long-term interest there.

I think the answer to that question, Senator, very similar to the one I gave vis-a-vis the Arabian Peninsula. We are very closely partnered with Pakistan and have some shared interests. We are currently in Afghanistan and have shared interests. How those interests are managed over time, I think, will be dependent upon how the situation on the ground plays out in the next 3 or 4 years.

Senator CHAMBLISS. As my time has expired, General, thanks again for your service. We look forward to continuing to work with you in your new role.

Chairman LEVIN. Thank you, Senator Chambliss.

Senator Nelson.

Senator NELSON. Thank you, Mr. Chairman.

Again, General Dempsey, thank you for your service, and your family, for their service, as well.

On a visit to Iraq, you and I spent time talking about how you were able to take the processes and procedures of acquisition of the U.S. military and use that to make acquisitions for the Iraqi military, recognizing that, in the absence of those processes and procedures—acquisition procedures in the Iraqi Government—they were basically incapable of getting all the money spent in the right way, 100 percent for the acquisitions. By doing that, using Iraqi money, you were able to acquire their military material for their needs. I thought that was novel at the time. It also showed me that there was a recognition by the Iraqi Government that their responsibility was clearly theirs, not just simply the United States, to provide for the cost of their defense.

As we look toward leaving in December 2011, there is a possibility that we're going, as you and I discussed, that the Iraqis are able to provide for their own defense, but they might decide that they need continuing support for their defense. We understand. If they can't defend, they can't govern. Self-defense and self-governance go hand-in-glove.

What I'm getting to is, they're facing deficits in their budgets, as we're facing deficits in our budgets. On a relative basis, I would take theirs over ours. My point is, can we look to ways in negotiating anything, if we're going to stay and provide assistance, where they can pick up a bigger share of the cost so that the American taxpayer doesn't end up picking up a bigger share of the cost?

General DEMPSEY. Senator, I think General Lloyd Austin, who's in Iraq—would be better positioned to answer whether they—

Senator NELSON. Well, I asked him, too.

General DEMPSEY. Oh, you did?

Senator NELSON. Yes.

General DEMPSEY. I probably should have read their answer before I tried to hazard a guess at my own.

As I said in an earlier answer, Senator, I think this is all about identifying our common interests, and then challenging each of us to invest in those common interests. I think that the proposal would be absolutely appropriate.

Senator NELSON. You may very well be, in your new position, when not only the Iraqi war winds down, but also perhaps, if we're so fortunate, that we would see a reduction in the level of activity and the costs associated with Afghanistan.

While the Army is always engaged in planning, do you believe that we will be in a position to start looking towards some planning for a reduction in forces in Afghanistan? I know this is something we're going to ask General Petraeus, when he's here. But, from your standpoint, if that decision is made, that we are going to reduce forces, that you will take that into consideration, looking at our continuing end strength needs, as well as the rest of the military needs, to support the kind of defense that Secretary Gates has been talking about.

General DEMPSEY. Senator, you will consider me for confirmation both as the Chief of Staff of the Army, but also as a member of the Joint Chiefs of Staff; and that last point there is the responsibility of the Joint Chiefs, to balance our commitments around the world for our national security. If confirmed, I'll absolutely take that obligation to heart.

Senator NELSON. If we do that, how will this affect the current situation, where we're looking to draw down 27,000 troops from the Army? By 2014, will that be reevaluated, do you believe? Will that have constant reevaluation, or is that a date set and a goal that just must be achieved, or will that have to be constantly reevaluated in the days ahead?

General DEMPSEY. I consider it to be the latter case, Senator, where the assumptions on which those decisions were made need to be reevaluated as we see what occurs with Iraq, post-December 11, and what occurs with Afghanistan post-2014.

Senator NELSON. Now I'm really going to test you on what our Chairman said at the beginning, about giving your opinion, no matter how it might shape up with other opinions with your colleagues.

Chairman LEVIN. He's not confirmed yet, though. [Laughter.]

Senator NELSON. That's true. You can tell me anything—

Chairman LEVIN. But, we still expect that of you.

Senator NELSON. We still expect it.

Chairman LEVIN. Yes, I support Senator Nelson.

General DEMPSEY. Thank you for your first response, Chairman Levin. [Laughter.]

Senator NELSON. If confirmed as the Army Chief of Staff, can we expect that you would be a very strong advocate for our National Guard?

General DEMPSEY. That's an easy one, Senator. Absolutely.

Senator NELSON. Now the tough one. Do you believe that the Chief of the National Guard Bureau should become a member of the Joint Chiefs of Staff? That's the tougher one.

General DEMPSEY. Yes. It's tough, only because I haven't thought about it. I have learned, long ago, not to render an opinion about

something I haven't thought about. What you can count on me to be is openminded about that.

Senator NELSON. I hope that you will be openminded about it. The Guard has established itself as an operational force, no longer as a supply force. It's operational. It's not on the shelf, ready to go. It's active, as active as the Active Duty military. I would hope that you would consider that. Keep an open mind, but consider it. I'm going to keep pushing for it, because I think the importance of the role that the Guard has now taken is something that needs to be at the table all the time. Getting a four-star in charge of it was step number one. But, step number two, as a full partner, I think, involves being a member of the Joint Chiefs. I know it's touchy, but I hope that you and your colleagues will look very carefully at that.

General DEMPSEY. Thank you, Senator.

Senator NELSON. Thank you, and good luck.

Chairman LEVIN. Thank you, Senator Nelson.

Senator Ayotte.

Senator AYOTTE. Thank you, Mr. Chairman.

General Dempsey, I want to thank you for your distinguished service to our country.

I also want to thank your wife, Deanie, and your son, Christopher. It's wonderful to have a military family here. The sacrifices that your entire family has made, we're deeply appreciative of.

I welcomed the opportunity, also, to sit down with you yesterday.

I want to take this moment just to express my deep condolences to the families of the Air Force members who were killed yesterday in Germany on their way to Afghanistan. I think it reminds us that we continue to be at war with terrorists, and the difficulties that we face, and also the sacrifices that our servicemen are making across the branches on behalf of our freedom and democracy in the world.

General Dempsey, in your answers to the advance policy questions, you state that the significant increase in the number of soldier suicides is of greatest concern to you, and I share your concerns. With the number of suicides in the National Guard rising to especially troubling levels, I share your goal of reducing those suicides. In particular, as we discussed yesterday, in New Hampshire we have the National Guard's Deployment Cycle Program which I believe is the model program, because we not only need to make sure that programs are in place for the full deployment cycle for our Active Duty members, but also, we've asked so much of our guardsmen and -women in the Reserve to make sure that we are taking care of our soldiers when they come home from the Guard, as well. This program is a highly effective and fiscally responsible initiative. It's really a public-private partnership that I think is unique across the country.

Yesterday, Senator Shaheen and I wrote a letter to Admiral Mullen, urging him to take a close look at this program, and also to support this program. We have seen the program work to help on retention, to help with the many issues and challenges that our guardsmen and -women face when they return from duty, and also when they are going to duty, as well their families. I would ask you—and I will provide you with a copy of this letter—for your support for this program, and for you to take a close look at it. I think

it's a model for other States across the country, and very important that we not lose sight of our soldiers when they come home. Particularly in the Guard, when we've asked so much more of the Guard, with multiple deployments, than we have historically, that we make sure that those programs are in place.

I just wanted to get your thoughts on what you envision, going forward, in addressing our guardsmen and -women and the deployment cycle support for them.

General DEMPSEY. Thank you, Senator. Thank you for, by the way, your role as the spouse of an air national guardsman. I know you've been through a couple of deployments, as well.

Senator AYOTTE. Thank you.

General DEMPSEY. You speak with great authority and experience in that regard.

I have already passed to my staff, as the TRADOC commander, the task to look at that program you mentioned to me yesterday.

In general, though, I'll tell you that we continue to learn as we go. We've been reminded, recently by some of those statistics, other kinds of trends within the force, of the accruing effects of 10 years of war. The Guard presents a unique problem, because they don't come back to a central location. They come back, they spend a brief period of time, and then they dissipate, sometimes within a single State, sometimes within 10 or 15 States. I can assure you, at this point, that we are beginning to grapple with understanding the problem, and we will partner with you and others to solve the problem. Because, it's one, again, that will be with us for some time.

Senator AYOTTE. Thank you. I very much appreciate that, and look forward to working with you on solving that problem, which is so important in supporting not only our Active Duty troops, but our guardsmen and -women, and Reserve, who we're asking so much of them at this time.

General Dempsey, Chairman Mullen has also stated his belief that the national debt represents a preeminent threat to our national security. Do you share that concern?

General DEMPSEY. I do, Senator. The instruments of national power—diplomatic, military, and economic—have to be in balance for us to be the power we need to be.

Senator AYOTTE. If we don't restore fiscal sanity to Washington and reduce our national debt, one of the concerns that I have is that the rising debt payments will begin to significantly crowd out the finances we have to be able to protect our Nation and its interests and, obviously, to fill our commitment to our Active Duty troops and to our veterans, who have sacrificed so much for us.

I would ask you, as the—hopefully—new Chief of the Army, to look at two things, and also to get your thoughts on it. One is the recently released March Government Accountability Office (GAO) report. In that report, the GAO found that there were instances of duplication and waste among the branches, where the branches could better coordinate, where there were redundancies on areas of equipment and areas where we could work together to reduce costs. Have you had a chance to review that report yet?

General DEMPSEY. No, I haven't reviewed the actual report, but I have seen the reporting on it.

Senator AYOTTE. I would ask you to review that report and look for ways to implement some of the recommendations that are made in that report so that we can reduce those duplications and make sure that we are using taxpayer dollars as effectively as possible, given the great challenges that we face right now.

General DEMPSEY. I will.

Senator AYOTTE. Thank you. I also wanted to follow up on the comments that Senator McCain made about the acquisition programs in the Army. We've seen, in some instances, where there have been billions of dollars that programs have been canceled, programs have been broken. How do you plan to address acquisition in a way that uses taxpayer dollars more wisely? Hopefully we can see some cost savings from that, as well.

General DEMPSEY. Senator, we have to. We can't continue to hemorrhage resources that you'll be increasingly challenged to help provide.

I think that the Decker-Wagner report gives an aperture through which to look at this issue much more seriously.

One of the earlier comments was about these things called "capability portfolio reviews". I think you're familiar with them. The capability portfolio review process is really senior leadership of the Army, personified now as the Vice Chief of Staff of the Army himself, Pete Chiarelli—bringing together the requirement side of the house and the acquisition side of the house periodically to do exactly what you're talking about. I think the first step, in answering your question, is to institutionalize those capability portfolio reviews and then to take the Decker-Wagner report and implement it, or at least determine which pieces of it should be implemented.

Senator AYOTTE. Thank you very much, General.

My time is up. I want to again commend you and your family for your service. I look forward to working with you to make sure that you have the equipment that you need, but also on these issues of where we can save taxpayer dollars and do things more effectively and more efficiently.

General DEMPSEY. Thank you.

Senator AYOTTE. Thank you.

Chairman LEVIN. Thank you, Senator Ayotte.

Senator Udall.

Senator UDALL. Thank you, Mr. Chairman.

Before, General, I direct some comments and questions your way, I want to associate myself with the remarks of the Senator from New Hampshire. She's on point. The Senate, right now, seems to be the one institution here in Washington that's really working on a long-term deficit and debt-reduction plan. A broke country is a weak country. We have some serious work to do. DOD can help us get the job done.

You've talked about dwell time, General, and you know that, under the current Army force generation cycle, we're not able to provide the goal of 2 years at home. My question is, since the quantity of time at home station is limited, what steps would you take, as Chief, to improve the quality of time at home for soldiers?

General DEMPSEY. That's a interesting way to put it, Senator. I haven't heard it phrased that way, but it's worth thinking about.

Senator UDALL. I have great staff, General.

General DEMPSEY. Any of them behind you?

Senator UDALL. Yes.

General DEMPSEY. Okay. Good.

Senator UDALL. He's a retired Army helicopter pilot.

General DEMPSEY. Ah, a retired helicopter pilot. I might have known. I'm surrounded by helicopter pilots here, it seems.

Senator, just before I talk about the quality issue, I don't want to walk away from the absolute imperative of the quantity issue, because every study we can possibly get our hands on suggests that it takes at least 2 years to fully recover from the experience that a young man or woman will have in a forward-deployed combat environment. So, it is quantity. I have to remain firmly committed to it.

In terms of the quality, the issue, for me, is to determine—it's back to this best practices. There are some remarkable practices out there, some of which, by the way, we saw in effect at Fort Carson, CO, in a recent visit there. We have centers of excellence in different programs. One program, in particular, ties it together, called the "Comprehensive Soldier Fitness Program," that has to be extended, and is being extended, into families, how to make families more resilient, right from the start of their service, not waiting until some crisis comes their way.

But, what we're trying to do is take the best of ideas out there, and share them and institutionalize them, because some of the family care programs have been like a thousand flowers blooming. With good intentions, we've wanted to do as much as we could. Now we're in a position where we've seen a thousand things; we need to decide which 50 of them actually have the impact we're seeking. We need to invest in those to get at the quality issue you're talking about. That work is ongoing, generally through our Installation Management Command, commanded by Lieutenant General Ricky Lynch, but also in partnership with the Assistant Secretaries of the Army.

Senator UDALL. I think that fits into, I don't know if you've put this in a doctrine or not, but I think you have the rule of 5 versus the lure of 55. I hear you voicing that same kind of an approach to this.

If I might, let me turn to a question of Civ-Mil jointness, if you will. We're asking our soldiers to be diplomats, ambassadors, trainers, and negotiators—even have an eye for business cycles and dynamics—in all these theaters in which they're deployed. They come back as experts in areas we never could have envisioned a few years ago. I'm wondering how we can ensure that they share what they've learned with other agencies before and after future combat rotations. Is there any joint predeployment training with non-military agencies, like the State Department, at the National Training Centers? Would you see any value in such training?

General DEMPSEY. First of all, absolutely, Senator. We are doing a good bit of it now. We jointly train the Provincial Reconstruction Teams (PRT), for example, that are forward-deployed. We train with them. To the extent we can, we try to get them, as well, to go through our mission readiness exercises with deploying brigades. Now, sometimes, because those other agencies of government are one deep at many of the skilled positions, unlike us, they

can't make that training. But, we never deploy either a PRT or a brigade combat team without some of that training. Could and should we do more? Yes.

Second, in the educational system of our Army, we have several programs. I'll mention one. We have a interagency fellowship program at the Command and General Staff College at Fort Leavenworth, KS, where we take young Army officers who have gone through an abbreviated Command and General Staff College course, and we'll put them into an agency of government—U.S. Agency for International Development, the Department of State, Department of Commerce, Department of Transportation—displacing one of their folks; that allows that person, then, to come to Fort Leavenworth and go through the 10-month Command and General Staff college experience. We have about 20 of them out there now. We have the capacity to take 36.

But, those are the kind of programs I think we need to take a look at in the future, as well.

Senator UDALL. That would be a fantastic way to take advantage of that investment we've made. I know those soldiers are keen to share what they've learned.

By the way, I wanted to comment on your comments about the NCO-in-residence opportunity here. I had the great privilege of having Master Sergeant Rubio serve for a year in my office in the first year of the NCO fellowship. It was phenomenal. I want to just underline the importance of that approach.

Let me, in my remaining time, move to energy. DOD's been leading the way in the development of renewable energy programs that will reduce the force's need for fossil fuels. It's first and foremost about security. We know that many of the grievous injuries in theater, delivered by improvised explosive devices, are aimed at supply convoys and the like.

The Marine Corps has set up what they're calling an experimental forward operating base in California. They're working with private industry to develop and test solar cells, batteries, and other products. Then they've taken the most promising approaches to Afghanistan, and they've cut their fuel consumption in the process.

Do you have plans, in the Army, to look at this Expeditionary Forward Operating Base model. If you don't, what can we do to help make that a reality?

General DEMPSEY. No, we do, Senator.

All the technological advances that we're introducing into the force all put an increasing demand on the generation of power. So, we have a capabilities-based assessment on the issue of power.

There's sort of a joke in Afghanistan: You can follow a U.S. Army unit through the mountains of Afghanistan by the trail of batteries they shed, because of the power requirement that all of these systems require.

We have a study in place—a capabilities-based assessment—to try to determine how we can meet those power demands and become more self-sustaining. The aspiration is to eventually, in the out years, develop the capability to have a self-sustaining brigade that can produce its own water, its own power, its own energy. We're a long way from that, but that's the right question to be asked to those that partner with us, like Defense Advanced Re-

search Projects Agency, U.S. Army Research, Development, and Engineering Command, even the private sector, to try to help us become more self-sustaining.

Senator UDALL. That's exciting news, and count on me to be an advocate for what you're doing.

Thank you, again. When you're confirmed, I look forward to further working with you.

General DEMPSEY. Thank you, Senator.

Senator UDALL. Thank you.

Chairman LEVIN. Thank you, Senator Udall. Thank you for raising the energy question. It's a critically important question for the Army. I also talked to General Dempsey about that, and the need for our security, in many ways, to address that issue which you have raised. Thank you for your ongoing interest in that piece.

Senator Brown is next.

Senator BROWN. Thank you, Mr. Chairman.

I'm bouncing back and forth, between hearings, like many others. Sir, I met you yesterday. Obviously, I asked a lot of the questions. I appreciate your candor. I look forward to voting in support of you.

I have a couple of questions. I think you know that I have an interest in Guard and Reserve troops, and I attended the first National Guard Caucus event this year. I agree with many of the priorities referenced by Senator Graham, a dear friend of mine. He drilled down on several key themes that, if implemented, I believe would have a positive impact on our Nation's operational service and security.

He was in the Reserves and, I just found out, the Guard, as well. I look forward to hearing his perspective on a whole host of issues regarding the Guard and Reserves.

I'm concerned with the fact that our depressed economy is having a terrible effect on our heroes that have served, especially the Guard and reservists. Over 30 percent of our young non-Active-Duty soldiers are unemployed. I'm wondering, what does this mean to you, in your efforts, if any? Is there anything that we can do, and you can help us with, to have employers not only hire, but keep onboard, members of the Guard and Reserves?

General DEMPSEY. Yes, Senator, thanks. Thank you for your service in the Guard.

We are partnered with the other agencies of government, notably the Veterans Administration, of course, but also with Governors across the country, in trying to raise the interest and awareness of the plight of the returning veteran, if you will.

General Petraeus' wife, Holly, was appointed to look at the predatory practices of some on trying to take advantage of soldiers, with things like loans and so forth.

Senator BROWN. Senator Reed and I actually dealt with that in our Financial Regulation bill, to try to address those.

General DEMPSEY. Yes.

Senator BROWN. I recognize that, as well.

General DEMPSEY. That crosses all components—Active, Guard, and Reserve.

Senator BROWN. Right.

General DEMPSEY. We've partnered with academia, to the extent we can, to find educational opportunities. I won't name them, but there's some remarkable initiatives out there, in academia, where they are reaching out to veterans to allow them to use their GI Bill in a way that is both financially vital for them, but also to account for their unique needs as veterans as they come back from a conflict.

Those are the things we're doing. What I would say to you, in response to your question, is, if confirmed, we have to keep the fire burning in that regard.

Senator BROWN. Right.

General DEMPSEY. Because, again, this is not a 2-year problem or challenge, this is a multiyear challenge.

Senator BROWN. Sir, also, I know that you're dealing with the real issue of not only Active-Duty suicide rates, but, the Guard and Reserves rate seem to be dramatically higher. I'm trusting that you'll continue on with that effort and try to address what the needs are and try to have more intervention.

General DEMPSEY. Absolutely, Senator.

Senator BROWN. Thank you. I'd appreciate that.

Also, I was wondering if you could give any insight as to the M-9 pistol competition, where that will stand in the new go-round. Anything you can share?

General DEMPSEY. In TRADOC, most of my attention to date, in terms of personal weapons, has been on the individual carbine, because TRADOC was tasked by the Secretary of the Army to run an analysis of whether it was time to move away from the M-4.

We're actually doing two things with regard to the carbine. One is, improving the M-4, both its performance, but also the performance of the ammunition. We're looking at whether we need an individual carbine beyond the M-4. That work is ongoing. I think the request for proposal (RFP), in draft, has been released. I think the final RFP will be issued sometime in the third quarter of this fiscal year.

I have not been involved, to date, Senator, on the issue of the M-9. Based on our conversation yesterday, I will look forward to learning more about that, if I'm confirmed.

Senator BROWN. Great. Sir, just in conclusion, I know the challenges are huge. My concern is that we get the best value for our dollars, but also that we can provide the tools and resources to our men and women who are fighting to not only do the job, but come home safely.

One of the issues we talked about yesterday was the rules-of-engagement issue, and making sure that's revisited and updated so we can allow the soldiers to do the job without being handcuffed by attorneys. I'm one of them. But, obviously, I think that's important. Out of all the things I've heard about the morale, the issues, it's that one issue that always seems to come back with us, saying, "You know what? I'd love to do A, B, C, and D, but the JAG says—or this person says—the commander's guidance is"—and I think, in some respects, at times, we may be jeopardizing the safety of our soldiers.

I know you said you were going to look into that, and I appreciate it. Good luck to you and your family.

Thank you.

General DEMPSEY. Thank you, sir.

Chairman LEVIN. Thank you, Senator Brown.

Senator Hagan is next.

After Senator Hagan, Senator Shaheen, I believe, will be the last Senator, on this side at least, and she has agreed that she could stay on, if other Senators appear, and take the gavel at that point. I very much appreciate that.

Senator Hagan.

Senator HAGAN. Thank you, Mr. Chairman.

I want to welcome General Dempsey, and really appreciate your service to our country, and your continued service.

I also wanted to welcome your wife, Deanie, and your family. It's obviously a family affair, when somebody spends the number of years that you have with our military. I want to thank you so much. To have three children also having been in the Army certainly is a testament to you and your wife. So, thank you both for that.

I want to ask a question about the sexual assaults. I know you will take this seriously, but I did want to bring this up. Last month, a group of veterans and Active-Duty servicemembers sued the Pentagon, citing military commanders aren't doing enough to prosecute sexual assault cases. If these claims are founded, the failure to provide basic guarantees of safety to women, who now represent 15 percent of the Armed Forces, is not just a moral issue or a morale issue, it is a defining statement about the condition and the approach of our military.

The Pentagon has issued a statement, saying the issue is a command priority and that it is working to make sure all troops are safe from sexual abuse.

In the Army today, what do you foresee as the challenges in implementing a safe and timely reporting system for sexual assaults?

General DEMPSEY. You have my commitment, as I expressed yesterday, that this issue is foremost in mind, and here's why, Senator. It rubs at the fabric of our profession. You may have heard that we're doing an analysis this year of, what have the last 10 years of war done to our profession? How are we different? How do we perceive ourselves to be different? How have some of the responsibilities we've pushed to the lower echelons—should they have changed the way we develop leaders? These things are all tied together. One of the things that has come out of the analysis already is that the core of our profession—if we're going to be a profession—and we can't take that for granted—is trust. The reason that an issue like sexual harassment is so important is not just because we should be protecting young men and women from sexual predators, but it tears at the very fabric of our profession. It breaks the bond of trust between leader and led. That's why it's important.

We have made some inroads. You're well aware of our three-phased program. We're well on the way to executing the program. Some of the reporting indicates, in the Active component, that it's steadied out. But, that's not good enough. It needs to nosedive, the number of incidents.

You'll hear folks talk about whether it's better reporting or more incidents. I find that to be somewhat irrelevant, actually, because,

again, it tears at the fabric of the profession. I do think the key is experts inside of brigade combat teams—and we’re putting them there; education of our leaders about why it’s important—not just because of the gender issues, but because of this issue of trust. We’re doing that. But, what you have is my assurances that, if confirmed, I will press down even harder on the accelerator.

Senator HAGAN. I appreciate that. Thank you. I’m sure everybody will appreciate that.

In the last decade, the Army has attempted to field the Crusader, the Comanche, the FCS, the non-light-of-sight missile, and the Armed Reconnaissance Helicopter. This research and development adds up, I believe, to about over \$10 billion of research and development for equipment that was actually never fielded.

The ground combat vehicle (GCV) is the latest possibility that will be added to the Army vehicle fleet. Do you think the requirements for this vehicle are realistic in development? More importantly, is the use of research and development funds being spent on the ground combat vehicle going to transform the battlefield capabilities? Will the ground combat vehicle be superior to the Bradley enough to justify the costs associated with developing and fielding it?

General DEMPSEY. Yes, thank you, Senator.

I am convinced that the requirements for the ground combat vehicle have been articulated in a way that actually begins to get at some of our aspiration for acquisition reform, meaning this: We collaborated, right from the start, among senior leaders, those who do the requirements determination and the acquisition community, on the requirements, as opposed to, potentially, some of the other programs you mentioned, where the requirements were determined, passed to the acquisition community, and the collaboration clearly wasn’t adequate.

The other thing we’ve done with the GCV is, we’ve said, “Look, if you can’t give it to me in 5 to 7 years, I don’t need it.” Because, we know that if we shoot our aspirations beyond that technology we can see, generally speaking, we will be disappointed in the outcome.

I think that the GCV is actually prototypical, not only of the next generation of ground combat vehicle, but of a process change. That’s how we should look at it.

The Bradley has been a venerable part of our inventory. But, it has reached its maximum capacity in weight and energy. As we continue to add technological advances, as we continue to learn more about what it means to protect, when we continue to learn more about the mobility required in urban areas, that’s why we think the GCV is an important step in our modernization.

Senator HAGAN. Where are we on that timeline now?

General DEMPSEY. The RFP is out, and I think we’re approaching one of the milestones—I don’t recall which—in the fall of this year.

Senator HAGAN. Okay. I think the collaboration is obviously very important to getting the right vehicle at the right time for the right price.

As addressed in General Chiarelli’s Suicide Awareness Report, published last July, in 2010, the life demands of a soldier today, when you look at the moving, the promotions, the combat stress,

the exposure to trauma—all of these issues are disproportionately high, the suicides are comparatively high, compared to their civilian counterparts of the same age. The Army developed the Comprehensive Soldier Fitness to institutionalize mental resiliency. Although the Army is treating the symptoms of deployments, the larger issue, I believe, is rebalancing the force to allow the soldiers and their families to reset.

As the Army works to teach soldiers to be internally prepared to deal with the challenges of the Army at war, what is the Army doing to create balance within the force, in terms of shorter deployments and longer stability within the assignments? We spoke a little bit about this yesterday.

General DEMPSEY. We did, Senator. But, I appreciate the opportunity to reinforce it.

We must get to a position where we have a minimum of 2 years at home with 1 year deployed in the Active component. It's 1-to-4 in the Reserve component. I'm not sure that's going to be enough, to tell you the truth. I don't know.

As I sit here today, I'm confident that, if we can get to 1-to-2, we will be doing our soldiers and families a great service, that they well deserve, in terms of helping them cope with these life demands that Pete Chiarelli, who, by the way, deserves every accolade we can possibly heap upon him for the work he's doing in this regard.

As we see these conflicts extend—and again, we're making some assumptions about Iraq and Afghanistan; and if those assumptions prove true, then 1-to-2 might be adequate to the task. But, if we continue to deploy in the numbers we're deploying, then we might have to reconsider and seek an even different BOG-dwell ratio. It might have to be 1-to-3. But, I'm not in a position—none of us are, really—to say that, right now.

You know this, Senator, but, we'll always do what the Nation needs. If we have to break our BOG-dwell because of an emergency for this Nation, we're there. But, as a routine matter, when these issues become prolonged, we need to have a standard of 1-to-2 so we can address the issues you're addressing.

Senator HAGAN. It's so important for the soldiers, as well as their families.

I thank you for your testimony, and I look forward to your confirmation.

General DEMPSEY. Thank you, Senator.

Senator HAGAN. Thank you.

Senator SHAHEEN [presiding]. Good morning. It's still "good morning".

General Dempsey, congratulations to you on your nomination. Thank you, to you and your family, for all of the service you've given to this country.

I've been particularly impressed in the parts of your testimony, and questions that I've been able to hear this morning, about your work on leadership development. I would suggest that perhaps you could design a course for Members of Congress, because I think that would be helpful.

General DEMPSEY. I think the appropriate response there is, "No comment," Senator. [Laughter.]

Senator SHAHEEN. I know that Senator Ayotte, in her remarks, mentioned New Hampshire's Deployment Cycle Support Program, which we have had in place for several years to help our deploying Guard and Reserves and their families. I would just like to reiterate how important this program is. I think it's a model for the rest of the country. There's some very impressive data on the successes of the program. People who have been part of it are four times more likely to stay married when they come back. They're four times more likely to stay in the military. They're five times less likely to become homeless. On the very critical issue of suicide prevention, that a number of people have raised this morning, 100 percent of those people considered at risk for suicide are in active prevention with licensed support personnel.

It has been a hugely successful program. With the largest deployment in New Hampshire's history right now, we think it's very important. I hope, after you are confirmed, that you will help us figure out how we can continue this program, which had been supported primarily through congressionally directed spending. I hope you will take a look at this.

General DEMPSEY. I will, Senator. Thank you.

Senator SHAHEEN. Thank you.

This summer, I had the opportunity to visit Iraq for my first time, and Kuwait. We visited Camp Arifjan. I was truly amazed—and I think most people don't recognize that the deployment out of Iraq is the largest movement of people and materiel in the military since World War II. It was really quite amazing. General Patton, I know, would be proud of what General Webster and folks there have been able to accomplish.

One of the things that impressed me the most was the way they had integrated savings into the entire operation there so that all of the men and women who were part of that effort are looking at how they can be more efficient in bringing people out and the operations of that unit.

I wonder if you could talk a little bit about how you see integrating that kind of culture into the entire Army, and what's happening on that right now.

General DEMPSEY. Yes, thank you, Senator, because it gives me the opportunity to point out that I'm deeply committed to supporting the Secretary of the Army and what he's doing to inculcate that culture that you describe into our Army.

Secretary McHugh has been very clear with us, with the four-stars as we assemble from time to time with him, on that issue. We both respect his judgments and the course that he's charted for us.

I would also mention that one of those who has accepted that responsibility is General Ann Dunwoody, who, you probably know, is our Army Materiel Command Commander. I've often said to her that she is accomplishing this retrograde of equipment out of Iraq in a way that actually almost makes it invisible to the rest of us, and suggested maybe it shouldn't be. She's done a remarkable job.

I think what you're reflecting is, you've seen, at the tactical level, the kind of adaptations and efficiencies that we're capable of. What you're suggesting is, we have to do the same thing as an institution, and you're exactly right.

Senator SHAHEEN. How do you make that happen?

General DEMPSEY. Secretary McHugh and General Casey, for the past few years, have pursued a thing that they call the “enterprise approach,” which is a way of suggesting that the stovepipes of the Army—and, sad to say, but not surprising, I suppose, we do have our own stovepipes: TRADOC, Forces Command, Army Materiel Command, the forward-deployed forces—we tend to see things inside of our own, if you will silos.

Senator SHAHEEN. Right.

General DEMPSEY. What the approach encourages is cross-collaboration. Now, I’d be disingenuous to suggest we’re where we need to be. But, where we want to be, and where I think Secretary McHugh will guide us, is to an approach that allows us to see issues right from the start, with a resource-sensitive eye, which, frankly, to our discredit in some ways, we haven’t had to do that because the American people have been so generous with their resources over the last 10 years.

We’ve done fairly well with those resources, by the way. As has been said earlier, today’s Army is the best Army it’s ever been. Thank you for that. But, we have to understand that we also share part of the Nation’s responsibility to be viable and to support the economic instrument of power, not just the military instrument of power. We’re prepared to do that. To do that, we have to be more resource-conscious. We will.

Senator SHAHEEN. Thank you.

I want to also follow up on Senator Udall’s question about how we reduce the dependency of our military on foreign oil and on how we are more efficient around energy use. You got into that a little bit, but I wonder if you could elaborate some more on the kinds of things that we’re doing and what kind of support would be helpful from Congress as you’re looking at what you need to do.

General DEMPSEY. You know what I’d like to do, Senator, if confirmed, is take on board the opportunity to actually engage this committee—and you, in particular—on what we’re doing with regard to this issue of power and energy, because we are doing a great deal. Much of it is really nascent. It’s not really very well developed. But, we’re looking at the same things that our civilian counterparts are looking at, in terms of solar and wind and the other noncarbon fuels that we might leverage to make ourselves more reliant. It’s actually a matter of military necessity, because the more you’re reliant on a fuel convoy, the more you’re stuck to lines of communication; and you’ve what that’s—happened to us in Iraq and Afghanistan.

Senator SHAHEEN. Right.

General DEMPSEY. Let me take on board the opportunity to engage you on that more coherently or articulately to let you know what we’re doing and to seek your advice on what more we might do.

Senator SHAHEEN. Good. I will definitely take you up on that.

General DEMPSEY. Okay.

Senator SHAHEEN. At this point, my time has expired. Since I am the last remaining Senator, I would like to again thank you. Thank you for being here, for your candor in your responses, and for your willingness to continue to serve.

At this point, the hearing is adjourned.
[Whereupon, at 11:37 a.m., the committee adjourned.]

[Prepared questions submitted to GEN Martin E. Dempsey, USA, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?
Answer. No.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. None. The Goldwater-Nichols Act has worked quite well in making the armed services an integrated joint force.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. I have over 35 years of experience in Army, Joint, and Coalition organizations from the tactical to the strategic levels of command, all of which have allowed me to see our Army at work in a broad variety of capacities and missions. Some of my most relevant experiences have been during periods of deployment when we have faced significant threats to our Nation's security. I served as a field grade officer during Operation Desert Shield/Operation Desert Storm and then Operation Iraqi Freedom as the Commanding General of 1st Armored Division. Later as the Commanding General, Multi-National Security Transition Command-Iraq training Iraqi Security Forces, I experienced firsthand the importance of preparing our Army for joint and combined operations. Returning from Iraq, I served as Deputy and then Acting Commander of U.S. Central Command. Most recently, as the Commanding General for Training and Doctrine Command, I have had an opportunity to reinforce the training ethos of our Army as we look toward an uncertain future. I have travelled across our Army and at every turn have seen the sacrifices of our soldiers and their families. Our soldiers are the best the world has ever seen, and they remain fiercely dedicated to our Nation and its security. If confirmed by this Senate, I would be honored to serve as their Chief of Staff.

DUTIES

Question. Sections 601 and 3033 of title 10, U.S.C., establishes the responsibilities and authority of the Chief of Staff of the Army.

What is your understanding of the duties and functions of the Chief of Staff of the Army?

Answer. The Chief of Staff, Army serves as the senior military advisor to the Secretary of the Army in all matters and has responsibility for the effective and efficient functioning of Army organizations and commands in performing their statutory missions.

Question. Assuming you are confirmed, what duties do you expect that Secretary McHugh would prescribe for you?

Answer. I expect that Secretary McHugh would prescribe the following duties for me if I am confirmed as the Chief of Staff of the Army:

- (a) Serve as the senior military leader of the Army and all of its components;
- (b) Assist the Secretary with his external affairs functions, including presenting and justifying Army policies, plans, programs, and budgets to the Secretary of Defense, Executive Branch, and Congress;
- (c) Assist the Secretary with his compliance functions, including directing The Inspector General to perform inspections and investigations as required;

- (d) Preside over the Army staff and ensure the effective and efficient functioning of the headquarters, to include integrating Reserve component matters into all aspects of Army business;
- (e) Serve as a member of the Joint Chiefs of Staff and provide independent military advice to the Secretary of Defense, President, and Congress. To the extent that such action does not impair my independence as the Chief of Staff of the Army, in my performance as a member of the Joint Chiefs of Staff, I would keep the Secretary of the Army informed of military advice rendered by the Joint Chiefs of Staff on matters affecting the Department of the Army. I would inform the Secretary of the Army of significant military operations affecting his duties and responsibilities, subject to the authority, direction, and control of the Secretary of Defense;
- (f) Represent Army capabilities, requirements, policy, plans, and programs in joint fora;
- (g) Supervise the execution of Army policies, plans, programs, and activities and assess the performance of Army commands in the execution of their assigned statutory missions and functions; and
- (h) Task and supervise the Vice Chief of Staff, Army, the Army Staff and, as authorized by the Secretary of the Army, elements of the Army Secretariat to perform assigned duties and responsibilities.

Question. What duties and responsibilities would you plan to assign to the Vice Chief of Staff of the Army?

Answer. The Vice Chief of Staff of the Army would be responsible for providing advice and assistance in the execution of my responsibilities for those missions and functions related to manpower and personnel; logistics; operations and plans; requirements and programs; intelligence; command, control and communications; and readiness.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the Chief of Staff of the Army?

Answer. If confirmed as the Chief of Staff, I will continually assess my ability to perform my duties and, if necessary, implement measures aimed at improving my ability to lead our Army.

RELATIONSHIPS

Question. If confirmed, what would be your working relationship with:
The Secretary of Defense.

Answer. The Secretary of Defense, as the head of the Department of Defense and the principal assistant to the President in all matters relating to the Department of Defense, issues guidance and direction to the Military Departments. If confirmed, I will be responsible to the Secretary of Defense and his Deputy, through the Secretary of the Army, for the operation of the Army in accordance with such directives. As a member of the Joint Chiefs of Staff, I will serve as a military adviser to the Secretary of Defense as appropriate. I will cooperate fully with the Secretary of Defense to ensure that the Army properly implements the policies established by his office. In coordination with the Secretary of the Army, I will communicate with the Secretary of Defense in articulating the views of the Army.

Question. The Deputy Secretary of Defense.

Answer. The Deputy Secretary of Defense performs such duties and exercises such powers as the Secretary of Defense may prescribe. The Secretary of Defense also delegates to him full power and authority to act for the Secretary of Defense and exercise the powers of the Secretary on any and all matters for which the Secretary is authorized to act pursuant to law. If confirmed, I will be responsible to the Secretary of Defense, and to his deputy, through the Secretary of the Army, for the operation of the Army in accordance with such directives. Also, in coordination with the Secretary of the Army, I will communicate with the Deputy Secretary of Defense in articulating the views of the Army. I will work closely with them to ensure that the Army is administered in accordance with the guidance and direction issued by the Office of the Secretary of Defense.

Question. The Under Secretaries of Defense.

Answer. Acting on behalf of the Secretary of Defense, the Under Secretaries perform responsibilities that require them, from time to time, to issue guidance—and in the case of the Under Secretary of Defense for Acquisition, Technology, and Logistics, direction—to the military departments. If confirmed, in coordination with the Secretary of the Army, I will communicate with the Under Secretaries in articulating the views of the Army. I will work closely with them to ensure that the Army is administered in accordance with the guidance and direction issued by the Office of the Secretary of Defense.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Chairman of the Joint Chiefs of Staff is the principal military adviser to the President, the National Security Council, and the Secretary of Defense. Subject to the authority, direction, and control of the President and the Secretary of Defense, the Chairman plans the strategic direction and contingency operations of the armed forces; advises the Secretary of Defense on requirements, programs, and budgets identified by the commanders of the combatant commands; develops doctrine for the joint employment of the Armed Forces; reports on assignment of functions (or roles and missions) to the Armed Forces; provides for representation of the United States on the Military Staff Committee of the United Nations; and performs such other duties as may be prescribed by law or by the President or Secretary of Defense.

In conjunction with the other members of the Joint Chiefs, the Chief of Staff of the Army assists the Chairman in providing military advice to the President, the National Security Council, and the Secretary of Defense. If confirmed as a member of the Joint Chiefs of Staff, I will provide my individual military advice to the President, the National Security Council, and the Secretary of Defense. If confirmed, as a member of the Joint Chiefs of Staff, it would be my duty to provide frank and timely advice and opinions to the Chairman to assist in his performance of these responsibilities. As appropriate, I will also provide advice in addition to or in disagreement with that of the Chairman. I will establish and maintain a close and professional relationship with the Chairman, and will communicate directly and openly on policy matters involving the Army and the Armed Forces as a whole.

Question. The Vice Chairman of the Joint Chiefs of Staff.

Answer. The Vice Chairman of the Joint Chiefs of Staff assists the Chairman in providing military advice to the Secretary of Defense and the President. If confirmed as a member of the Joint Chiefs of Staff, it would be my duty to ensure that the Vice Chairman is provided my frank views and opinions to assist him in his performance of his responsibilities.

Question. The Secretary of the Army.

Answer. If confirmed, my relationship with the Secretary of the Army would be close, direct, and supportive. Within the Department of the Army, a large part of my responsibility as Chief of Staff would be to serve as the Secretary's principal military adviser. My responsibilities would also involve communicating the Army Staff's plans to the Secretary and supervising the implementation of the Secretary's decisions through the Army Staff, commands and agencies. In this capacity, my actions would be subject to the authority, direction, and control of the Secretary. In my capacity as a member of the Joint Chiefs of Staff, I would also be responsible for appropriately informing the Secretary about conclusions reached by the Joint Chiefs of Staff and about significant military operations, to the extent such action does not impair independence in the performance of my duties as a member of Joint Chiefs of Staff. I anticipate that I would work closely and in concert with the Secretary to establish the best policies for the Army in light of national interests.

Question. The Under Secretary of the Army.

Answer. The Under Secretary of the Army is the Secretary's principal civilian assistant and performs such duties and exercises such powers as the Secretary prescribes. His responsibilities require him, from time to time, to issue guidance and direction to the Army Staff. If confirmed, I will be responsible to the Secretary, and to the Under Secretary for the operation of the Army in accordance with such directives. I will cooperate fully with the Under Secretary to ensure that the policies established by the Office of the Secretary of the Army are properly implemented. I will communicate openly and directly with the Under Secretary in articulating the views of the Army Staff, commands, and agencies.

Question. The Vice Chief of Staff of the Army.

Answer. The Vice Chief of Staff of the Army serves as the principal advisor and assistant to the Chief of Staff. If confirmed, I will establish and maintain a close, professional relationship with the Vice Chief of Staff, Army.

Question. The Assistant Secretaries of the Army.

Answer. The Assistant Secretaries of the Army have functional responsibilities that, from time to time, require the issuance of guidance to the Army Staff and to the Army as a whole. If confirmed, I will establish and maintain close, professional relationships with each of the Assistant Secretaries to foster an environment of cooperative teamwork between the Army Staff and the Army Secretariat as we deal together with the day-to-day management and long-range planning requirements facing the Army.

Question. The General Counsel of the Army.

Answer. The General Counsel is the chief legal officer of the Department of the Army. His/Her duties include coordinating legal and policy advice to all members

of the Department regarding matters of interest to the Secretariat, as well as determining the position of the Army on any legal question or procedure, other than military justice matters, which are assigned to The Judge Advocate General. If confirmed, I will establish and maintain a close, professional relationship with the General Counsel to assist in the performance of these important duties.

Question. The Inspector General of the Army.

Answer. The Inspector General is responsible for inspections and certain investigations within the Department, such as inquiring into and reporting to the Secretary and the Chief of Staff regarding discipline, efficiency, and economy of the Army with continuing assessment of command, operational, logistical, and administrative effectiveness; and serving as the Department of the Army focal point for Department of Defense Inspector General inspections and noncriminal investigations, as well as the Department of Defense inspection policy. If confirmed, I will establish and maintain a close, professional relationship with the Inspector General to ensure effective accomplishment of these important duties.

Question. The Judge Advocate General of the Army.

Answer. The Judge Advocate General is the military legal advisor to the Secretary of the Army and all officers and agencies of the Department of the Army. The Judge Advocate General provides legal advice directly to the Chief of Staff and the Army Staff in matters concerning military justice, environmental law; labor and civilian personnel law; contract, fiscal, and tax law; international law; and the worldwide operational deployment of Army forces. The Chief of Staff does not appoint The Judge Advocate General, and does not have the personal authority to remove him. This enables The Judge Advocate General to provide independent legal advice. If confirmed, I will establish and maintain a close, professional relationship with the TJAG as my legal advisor and I will assist him in the performance of his important duties as the legal advisor to the Secretary of the Army.

Question. The Chief of the National Guard Bureau.

Answer. The National Guard Bureau is a joint bureau of the Department of the Army and Department of the Air Force. Appointed by the President, he serves as principal adviser to the Secretary of Defense through the Chairman of the Joint Chiefs of Staff on National Guard matters. The Chief, National Guard Bureau is also the principal advisor to the Secretary of the Army and the Chief of Staff on matters relating to the National Guard. If confirmed, I will establish and maintain a close, professional relationship with the Chief, National Guard Bureau to foster an environment of cooperative teamwork between the Army Staff and the National Guard Bureau, as we deal together with the day-to-day management and long-range planning requirements facing the Army.

Question. The Director of the Army National Guard.

Answer. The Director, Army National Guard is responsible for assisting the Chief, National Guard Bureau and Vice Chief, National Guard Bureau in carrying out the functions of the National Guard Bureau, as they relate to the Army National Guard. If confirmed, I will establish and maintain a close, professional relationship with the Director, Army National Guard to foster an environment of cooperative teamwork between the Army Staff and the National Guard Bureau. This will be essential as we deal together with the day-to-day management and long-range planning requirements facing the Army to sustain and improve Army National Guard's operational capabilities.

Question. The Chief of the Army Reserve.

Answer. The Chief, Army Reserve is responsible for justification and execution of the personnel, operation and maintenance, and construction budgets for the Army Reserve. As such, the Chief, Army Reserve is the director and functional manager of appropriations made for the Army Reserve in those areas. If confirmed, I will establish and maintain a close, professional relationship with the Chief, Army Reserve as we deal together with the day-to-day management and long-range planning requirements facing the Army to sustain and improve the Army Reserve operational capabilities.

Question. The Chiefs of the Other Services.

Answer. If confirmed, as a member of the Joint Chiefs of Staff, it would be my duty to engage in frank and timely exchanges of advice and opinions with my fellow Service Chiefs. I look forward to developing strong working relationships with these colleagues.

Question. The Combatant Commanders.

Answer. Subject to the direction of the President, the combatant commanders perform their duties under the authority, direction, and control of the Secretary of Defense, and are directly responsible to the Secretary of Defense for the preparedness of their commands to carry out missions assigned to them. As directed by the Secretary of Defense, the Service Secretaries assign all forces under their jurisdiction

to the unified and specified combatant commands or to the U.S. element of the North American Aerospace Defense Command, to perform missions assigned to those commands. In addition, subject to the authority, direction, and control of the Secretary of Defense and the authority of combatant commanders under title 10, U.S.C., section 164(c), the Service Secretaries are responsible for administering and supporting the forces that they assign to a combatant command. If confirmed, I will cooperate fully with the combatant commanders in performing these administrative and support responsibilities. I will establish close, professional relationships with the combatant commanders and communicate directly and openly with them on matters involving the Department of the Army and Army forces and personnel assigned to or supporting these commands.

VISION FOR THE FUTURE

Question. What is your vision for the Army of today and the future?

Answer. The Army will remain a critical component of the Joint Force, providing an affordable mix of tailorable and networked organizations operating on a rotational cycle, providing a sustained flow of trained and ready land forces for full spectrum operations, prepared for unexpected contingencies and at a tempo that will sustain our All-Volunteer Force.

Question. What roles do you believe the Army should play in contingency, humanitarian, and stability operations?

Answer. We are capable of executing contingency, humanitarian or stability operations, as directed by the President or Secretary of Defense, under the control of the appropriate Combatant Commander. We are also capable of assisting our international partners in building their own operational capacity. Through security force assistance, we can increase the ability of other nations to uphold the rule of law, ensure domestic order, protect its citizens during natural disasters, and avoid conflicts, which would otherwise require U.S. military support.

Question. Do you see any unnecessary redundancy between Army and Marine Corps ground combat forces, particularly between Army light or medium weight divisions and Marine Corps divisions?

Answer. No. We each have unique but complementary capabilities that provide the National Command Authority with options for dealing with emerging threats and contingencies.

ARMY ROLE IN THE JOINT FORCE

Question. The U.S. military fights as a joint force and strives to achieve realistic training in preparation for military operations. The Army provides trained and equipped forces for joint military operations.

How do you believe the Army can best contribute to improved joint military capabilities while preserving its service unique capabilities and culture?

Answer. The Army works our relationships with Sister Services diligently while maintaining our unique values, culture, and traditions. The Army provides forces for prompt and sustained combat operations on land as a component of the Joint Force. Through sustained operations on land and among populations, we make permanent the advantages gained by joint forces.

MAJOR CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges that will confront the next Chief of Staff of the Army?

Answer. We have to win our current conflicts while simultaneously preparing for future security challenges. We must take care of our soldiers, our wounded, and their families. We must meet this challenge in an environment that demands more efficient use of limited resources.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. The Army, with support from Congress, is already working to understand and address many of these challenges. Although we don't have all the answers yet, it is clear that to be prepared for an increasingly complex and unpredictable future, we need thinking, adaptable, and resilient leaders. Investments in our human capital, both uniformed and civilian, coupled with a sustainable rotational force structure model, will ensure we are postured to meet the challenges of the future.

Question. What do you consider to be the most serious problems in the performance of the functions of the Chief of Staff of the Army?

Answer. At this point, I am not aware of any problems that would impede the performance of the Chief of Staff of the Army.

Question. If confirmed, what management actions and time lines would you establish to address these problems?

Answer. I am committed to working to ensure that our management systems are maintained or refined to meet challenges facing the Army. I have not yet determined specific plans to modify systems currently in place or under revision but if confirmed will carefully assess how we execute our management functions to ensure appropriate stewardship of our resources.

Question. If confirmed, what broad priorities will you establish?

Answer. If confirmed, I look forward to the opportunity to talk with the Secretary of the Army, to develop priorities for our force. In my current position, I've asserted that we must be a learning organization, we must make training credible and relevant at home station so that it replicates more closely the challenges of the operational environment, and we must develop our leaders differently. It's also clear that we must work to preserve the All-Volunteer Force, care for our Wounded Warriors, continue to work to deliver Full Spectrum Capabilities, and transform systems and processes to build true adaptability into our institution.

ACQUISITION ISSUES

Question. Major defense acquisition programs in the Department of the Army and the other military departments continue to be subject to funding and requirements instability.

Do you believe that instability in funding and requirements drives up program costs and leads to delays in the fielding of major weapon systems?

Answer. A variety of factors contribute to increased risks of cost increase and delay, depending on the program, the technologies involved, and the acquisition strategy employed. However, I agree that the foundation for any successful large acquisition program rests on carefully refined requirements, a sound program strategy, and funding stability.

Question. What steps, if any, do you believe the Army should take to address funding and requirements instability?

Answer. Requirements must be carefully refined to meet realistic and affordable objectives, and they must account for the rate of technological and scientific change in meeting needed capabilities.

Question. What is your view of the Configuration Steering Boards required by statute and regulation to control requirements growth?

Answer. I support efforts by Congress to control costs, refine requirements, and reduce program risk in our major acquisition programs. The Configuration Steering Boards play a significant role in oversight of acquisition programs and compliment Army efforts to validate requirements and eliminate redundancies through Capability Portfolio Reviews. In tandem, these oversight processes help the Army avoid cost increases and delays in our programs.

Question. What role would you expect to play in these issues, if confirmed as Army Chief of Staff?

Answer. If confirmed as Chief of Staff, I will work diligently with the Secretary of the Army and the Assistant Secretary of the Army for Acquisition, Logistics, and Technology to ensure that all oversight mechanisms for acquisition programs are used effectively to reduce cost and schedule risk. In the area of requirements, I will work with TRADOC to refine requirements to meet affordable and achievable acquisition strategies.

Question. The Comptroller General has found that DOD programs often move forward with unrealistic program cost and schedule estimates, lack clearly defined and stable requirements, include immature technologies that unnecessarily raise program costs and delay development and production, and fail to solidify design and manufacturing processes at appropriate junctures in the development process.

Do you agree with the Comptroller General's assessment?

Answer. I agree that this assessment is valid with respect to some of the Army's past programs. However, the Army has already adopted different approaches in the development of more recent programs. I understand that prior to the release of the Ground Combat Vehicle (GCV) Request for Proposals (RFP) in November 2010, the program's requirements were carefully reviewed, prioritized and weighted in the RFP to avoid reliance on immature technologies, mitigate cost and schedule risk, and provide an achievable and affordable framework for a new vehicle. The GCV program involved close coordination between acquisition, requirements and resourcing experts to provide a solid program foundation. The Army is vigorously working to avoid the characterizations in the Comptroller General's assessment in future programs.

Question. If so, what steps do you believe the Department of the Army should take to address these problems?

Answer. The Department of the Army has already begun taking significant steps to address these concerns. There is a renewed emphasis on collaboration between the requirements and acquisition communities in the development of new programs. Last year, Secretary McHugh commissioned a thorough review of the Army's acquisition process led by The Hon. Gil Decker and Gen (Ret.) Lou Wagner that provides a blueprint for improvements to the acquisition process. I understand the Army is now studying these recommendations and developing a plan to implement those that help our process. As a whole, the Department must continue to build on these efforts to avoid unnecessary cost and delay in our programs.

Question. What role would you expect to play in these issues, if confirmed as Army Chief of Staff?

Answer. If confirmed as Chief of Staff, I will continue to work with Department of the Army leadership to implement any necessary changes to ensure that the Army's acquisition programs succeed in providing needed capabilities to our soldiers.

Question. Beginning in 2010, the Army began a series of capabilities portfolio reviews that have contributed to the rationalization of the Army's modernization plans and resulted in significant programmatic decisions, including the termination of major weapons programs.

What is your understanding and assessment of the Army's capabilities portfolio reviews and process?

Answer. The capabilities portfolio reviews have been successful in identifying redundancy and finding efficiencies across system portfolios. The Army is now studying how to best institutionalize the capabilities portfolio reviews process to identify additional efficiencies, and then work to achieve them.

Question. If confirmed, what actions would you take, if any, to institutionalize the portfolio review process within the Army?

Answer. If confirmed, I look forward to reviewing the studies to institutionalize portfolio review process to identify and achieve further Army efficiencies.

ARMY MODERNIZATION

Question. In general, major Army modernization efforts have not been successful over the past decade. Since the mid-1990s, Army modernization strategies, plans, and investment priorities have evolved under a variety of names from Digitization, to Force XXI, to Army After Next, to Interim Force, to Objective Force, to Future Combat System and Modularity. According to press reports, a recent modernization study done for the Secretary of the Army by former Assistant Secretary of the Army Gilbert Decker and retired Army General Louis Wagner found that the Army has spent \$3.3 billion to \$3.8 billion annually since 2004 on weapons programs that have been cancelled.

What is your assessment, if any, of the Army's modernization record?

Answer. Over the last 10 years, our Army has achieved a remarkable degree of modernization in areas such as improving soldier protection, increasing battlefield intelligence, and bringing the network to individual soldiers. At the same time, we have nearly completed the modular conversion of over 300 brigade level organizations and to complete the conversion of our division and higher level headquarters to enable mission command in the operational environments we anticipate in the first half of the 21st century. If confirmed, I look forward to studying the Decker-Wagner recommendations to identify areas where we can improve.

Question. If confirmed, what actions, if any, would you propose to take to achieve a genuinely stable modernization strategy and program for the Army?

Answer. I recognize that a stable modernization strategy and program is an important component to both a balanced Army and to exercise good stewardship of resources entrusted to the Services. If confirmed, I will work closely with Secretary McHugh on how to achieve this.

Question. What is your understanding and assessment of the Army's current modernization investment strategy?

Answer. While it is true that several of our major modernization efforts over the past decade have been unsuccessful, I would submit that the American soldier today is the best equipped and enabled soldier this country has ever fielded. Successes such as the Stryker vehicle, world class body armor, soldier night vision equipment, soldier weapons, precision fire systems such as Excalibur and High Mobility Artillery Rocket System, and vehicles such as the family of medium trucks all suggest to me that the Army has had some tremendous success in modernization.

I believe the Army has learned some valuable lessons and now has both the processes and the mindset to more carefully and rigorously review programs both before

we initiate them and while they are in progress. This will be an area I will assess more deeply if I am confirmed as Chief of Staff and will periodically give this committee my frank assessments.

Question. Do you believe that this strategy is affordable and sustainable?

Answer. If confirmed, I plan to closely examine this strategy to ensure it is affordable and sustainable.

Question. In your view does the Army's current modernization investment strategy appropriately or adequately address current and future capabilities that meet requirements for unconventional or irregular conflict?

Answer. From my current position, I believe the current modernization investment strategy strikes an appropriate balance between current and future capabilities. If confirmed, I look forward to studying this further with the Army staff.

Question. Does the investment strategy appropriately or adequately address requirements for conventional, high-end conflict with a peer or near-peer enemy?

Answer. From my current position, I believe the current modernization investment strategy appropriately and adequately addresses requirements for conventional, high-end conflict with the peer or near-peer enemy we can reasonably foresee in the fiscal year 2012–2016 FYDP time horizon.

Question. If confirmed, what other investment initiatives, if any, would you pursue with respect to unconventional or conventional capabilities?

Answer. I have not yet formulated investment initiatives particular to either conventional or unconventional capabilities that are different from those the Army is currently pursuing, but I look forward to doing so, if confirmed.

Question. If confirmed, what actions, if any, would you propose to ensure that all these initiatives are affordable within the current and projected Army budgets?

Answer. To be good stewards of the resources provided, the Army must continue to internalize a "cost culture" that considers "affordability" as an essential element of all (not just modernization) initiatives. If confirmed, I intend to work closely with the Secretary to ensure future initiatives are affordable within current and projected budgets.

Question. In your view, what trade-offs, if any, would most likely have to be taken should budgets fall below or costs grow above what is planned to fund the Army's modernization efforts?

Answer. While I do not have that information at this time, I believe trade-offs must occur after all areas of risk are carefully considered and coordinated with the Secretary of Defense and Congress.

ARMY WEAPON SYSTEM PROGRAMS

Question. What is your understanding and assessment of the following research, development, and acquisition programs?

Ground Combat Vehicle (GCV).

Answer. In the development of the Ground Combat vehicle—the replacement for the Bradley Infantry Fighting vehicle—the Army is fully committed to the "Big Four" imperatives: soldier protection; soldier capacity (squad plus crew); the capability to operate across the Full Spectrum of operations; and Timing (7 years to the first production vehicle from contract award). The Ground Combat Vehicle will be the first vehicle that will be designed from the ground up to operate in an Improvised Explosive Device (IED) environment. Modular armor will allow commanders the option to add or remove armor based on the current threat environment. The Ground Combat Vehicle will be designed with the capacity for Space, Weight, and Power growth to incorporate future technologies as they mature. The Army is using an incremental strategy for the Ground Combat Vehicle with the first increment being an Infantry Fighting Vehicle. The Army is currently reviewing proposals from vendors for Technology Development contracts.

Question. Warfighter Information Network-Tactical (WIN-T).

Answer. I believe that the Warfighter Information Network-Tactical is one of the Army's most important programs. It provides the broadband backbone communications for the tactical Army. Warfighter Information Network-Tactical Increment 1 (formerly Joint Network Node) began fielding in 2004 to provide a satellite based Internet Protocol network down to battalion level. Warfighter Information Network-Tactical Increment 2 begins fielding in fiscal year 2012 to provide an initial On the Move capability, extending down to company level. Warfighter Information Network-Tactical Increment 3 will provide improved capabilities, including higher throughput, three to four times more bandwidth efficiency, and an aerial transmission layer, to all 126 brigades/division headquarters with an on-the-move requirement.

Question. Early-Infantry Brigade Combat Team (E-IBCT) Network Integration Kit (NIK).

Answer. The E-IBCT investment provides the infrastructure that will allow the Army to grow the tactical network capability, and an opportunity for both large and small companies to support the Army's tactical network strategy.

The NIK is a necessary bridge solution that allows the Army to continue evaluation and development of incorporated network technologies.

Question. Joint Tactical Radio System (JTRS) including the Ground Mobile Radio (GMR) and Handheld, Manpack, and Small Form Fit (HMS) radios.

Answer. Joint Tactical Radio System is the Services' future deployable, mobile communications family of radios. They provide Army forces dynamic, scalable, on-the-move network architecture, connecting the soldier to the network. Fiscal year 2012 procurement funding supports fielding of Joint Tactical Radio System capability to eight Infantry Brigade Combat Teams to meet fiscal years 2013/2014 network requirements.

The Ground Mobile Radio is the primary vehicular radio capability using the Wideband Networking Waveform and Soldier Radio Waveform to meet tactical networking requirements.

The Man Pack and Rifleman Radio are the primary Joint Tactical Radio System capability for battalion and below tactical operations. The man pack supports the Soldier Radio Waveform and interoperates with legacy waveforms (Single Channel Ground and Airborne Radio Systems, Ultra High Frequency Satellite Communications). Rifleman Radio primarily serves the dismounted formation and utilizes the Soldier Radio Waveform to provide voice and individual location information from the dismounted soldier to the leader. The combination of the three radios helps the Army to push the network to the individual soldier.

Question. Stryker combat vehicle, including the Double-V Hull initiative, procurement of more flat-bottom vehicles, and the Stryker mobile gun variant.

Answer. The current Stryker vehicle has exceeded its Space, Weight and Power and Cooling (SWaP-C) limits due to add-on appliqué (armor and devices) required for ongoing combat operations. In the near term, it is imperative to increase crew protection with the Double-V-Hull (DVH) Stryker. In the mid-term, Stryker modernization will improve protection and mobility by recouping SWaP-C, enabling future growth and allowing integration of the emerging network for all Stryker variants. Fleet-wide modernization for all variants upgrades protection, counter-IED, drive train, suspension, electrical power generation and management, and digital communications and network integration.

Double-V Hull: Stryker Double-V Hull (DVH) is on track for June 2011 fielding. The initial DVH test results are positive, indicating the vehicle will be ready for fielding as scheduled.

Non-Double V Hull and Nuclear, Biological, and Chemical Reconnaissance Vehicle (NBCRV): The Army will procure 168 Stryker NBCRVs in fiscal years 2012 and 2013 for a total quantity of 284 (an Army Force Generation (ARFORGEN) model rotation quantity). These vehicles are in normal Hull configuration. The Stryker NBCRV provides a unique capability to the Joint Force including a critical mission of Homeland Defense, for which DVH protection is a lesser consideration.

Stryker Mobile Gun System (MGS): The Army has procured and fielded 142 of 335 MGS. In August 2009, the Army decided to not pursue additional MGS procurement at this time with forthcoming fleet-wide modernization.

Question. Joint Light Tactical Vehicle (JLTV).

Answer. The JLTV is a joint program with the U.S. Marine Corps, Navy, and the Army; the Australian Army is also currently a partner in the Technology Development phase. I believe that the JLTV is a vital program to fill the force protection and payload gaps not currently satisfied by the High Mobility Multipurpose Wheeled Vehicle. It will also fill the mobility, transportability and communication architecture gaps not satisfied by the Mine Resistant Ambush Protected (MRAP) vehicles being used in Light Tactical Vehicle (LTV) roles. The Army Tactical Wheeled Vehicle Strategy plans for the JLTV to replace about a third of the LTV fleet, which is roughly 46,000 vehicles. The Army is currently examining the attributes of the JLTV program to ensure it meets our needs for the future Army light tactical fleet, especially in terms of protection.

Question. Armed Aerial Scout (AAS).

Answer. I agree the Army has an enduring requirement for an armed aerial scout as was reaffirmed after the termination of the Armed Reconnaissance Helicopter (ARH) program.

This requirement will be validated by the ongoing Armed Aerial Scout Analysis of Alternatives whose findings are scheduled for release in third quarter fiscal year 2011.

Question. M1 Abrams tank modernization.

Answer. In my view, the Abrams modernization is necessary and will initially enable integration of the emerging network and provide ability to fire the next generation of 120mm ammunition. Future modernization will provide capability improvements in lethality, protection, mission command, mobility, and reliability intended to maintain the Fleet's combat overmatch and restore space, weight, and power margins to keep the Tank relevant through 2050. The Abrams modernization program is funded in the fiscal year 2012 budget request. If confirmed, I will be able to offer an assessment as the program matures.

Question. M2 Bradley infantry fighting vehicle modernization.

Answer. The Bradley Infantry Fighting Vehicle (IFV) will be replaced by the Ground Combat Vehicle beginning in 2018. Bradley Non-Infantry Fighting Vehicle (Cavalry, Engineer and Fire Support variants) modernization will address recoupment of Space, Weight and Power to provide platform growth and enable improvements in protection, mobility and ability to integrate the emerging network.

Question. Logistics Modernization Program (LMP).

Answer. I understand the LMP is an Enterprise Resource Planning (ERP) system in the Operation and Support phase of its life-cycle.

Based on commercial off-the-shelf SAP Corporation software technology, LMP provides the Army with an integrated end-to-end supply chain solution at the national level that improves overall synchronization of information.

I concur with the Army's vision to achieve a seamless, end-to-end modernized logistics enterprise and to develop and implement logistics enterprise architecture with joint interoperability. To support that vision, the LMP will integrate with other Army ERPs, including General Funds Enterprise Business System (GFEBS), and Global Combat Support System-Army (GCSS-A), to provide a seamless enterprise-wide logistics environment spanning the factory to the foxhole in accordance with the approved Army ERP Strategy.

Question. Paladin Integrated Management Vehicle program.

Answer. I understand that the Paladin Integrated Management (PIM) program is an effort to address an existing capability gap in the self-propelled artillery portfolio brought about by an aging fleet and the termination of prior howitzer modernization efforts [Crusader and Non-Line-of-Sight-Cannon (NLOS-C)]. The PIM program provides upgrades that allow the Army to meet existing and future needs, and leverages the commonality with the Bradley Fighting Vehicle chassis and automotive components. PIM should provide growth potential in Space, Weight and Power and capacity for network expansion to accommodate future howitzer related needs, to include the addition of such Force Protection packages as add-on armor.

Question. M4 Carbine Upgrades/Individual Carbine Competition.

Answer. The Army continues to make improvements and upgrades based on operational lessons learned through the M4 Product Improvement Program. The Army's effort is designed to integrate full automatic firing, an ambidextrous selector switch and a more durable "heavy" barrel. Simultaneously, the Army has initiated a full and open competition to confirm the best possible Individual Carbine solution. Results of the competition are expected in fiscal year 2013.

MINE RESISTANT AMBUSH PROTECTED (MRAP) VEHICLES

Question. If confirmed, what would you propose should be the Army's long term strategy for the utilization and sustainment of its large MRAP and MRAP-All Terrain Vehicle fleets?

Answer. The Army needs to continue to provide the best level of protection for our deploying soldiers. Given what we have learned during the last 10 years, I believe we should attempt to provide MRAP levels of protection to deploying forces worldwide commensurate with the mission assigned. The Army will integrate MRAPs into the force.

QUADRENNIAL DEFENSE REVIEW

Question. The 2010 report of the Quadrennial Defense Review (QDR) provides guidance that military forces shall be sized to prevail in ongoing conflicts in Afghanistan, Iraq, and the war against al Qaeda as well as for conducting foundational activities that prevent and deter attacks or the emergence of other threats.

What is your assessment of the Army's current size and structure to meet the QDR report's guidance?

Answer. The Army's size and structure have proven adequate to meet the demands of our defense strategy as we know them today, although a very heavy demand has been placed upon soldiers and their families for nearly 10 years. If confirmed, I would work closely with the Secretary of Defense, the Secretary of the

Army, the Chairman of the Joint Chiefs, and our combatant commanders to match end strength, structure, and tempo in our ARFORGEN rotational model to meet demands as they change.

Question. If confirmed, what size or structure changes would you pursue, if any, to improve or enhance the Army's capability to meet these requirements?

Answer. The nature of the strategic environment requires the Army to continuously assess its capabilities and force requirements. It's taken 10 years to achieve a size, structure, and capability that we can reasonably describe as balanced. We are accustomed to change, and we will undoubtedly need to continue to change. As we do we must seek to maintain a balance of capabilities that are available to meet the Nation's needs at a sustainable tempo.

Question. The QDR report particularly emphasizes the requirement for improved capabilities in the following six key mission areas.

For each, what is your assessment of the Army's current ability to provide capabilities to support these mission requirements?

If confirmed, what changes, if any, would you pursue to improve the Army's capabilities to support:

Defense of the United States.

Answer. The Army is fully capable of fulfilling its responsibility to defend the homeland through detection, deterrence, prevention, and if necessary, the defeat of external threats or aggression from both state and non-state actors. A specific program recently undertaken to enhance this ability include the fielding of the enhanced Stryker Nuclear Biological and Chemical Reconnaissance Vehicle. This provides us with a much improved technical assessment and decontamination capability.

Question. Support of civil authorities at home.

Answer. The Army is well postured to provide support to civil authorities. We are organized and trained to provide responsive and flexible support to mitigate domestic disasters, CBRNE consequence management, support to civilian law enforcement agencies, counter WMD operations and to counter narcotics trafficking activities. We continue to address the challenges associated with this mission set including unity of command, integration with civilian authorities, and the integration of Title 10 and Title 32 forces.

Question. Succeed in counterinsurgency, stability, and counterterrorism operations.

Answer. We are highly proficient in counter insurgency, stability and counter-terrorism operations. This has been the focus for the Army for much of the last 10 years and we have institutionalized lessons learned across the operating and generating force.

Question. Build the security capacity of partner states (including your views, if any, on the use of general purpose forces in the security force assistance role).

Answer. General Purpose Forces have a clear role in building sustainable capability and capacity of partner nation security forces and their supporting institutions. Peace time engagement is our best opportunity to shape the future operating environment. General Purpose Forces are well suited to support these activities through Security Force Assistance.

Question. Deter and defeat aggression in anti-access environments.

Answer. The Army's ability to deter and defeat aggression in anti-access environments as part of the joint force is adequate to meet the demands of the current security environment. That said, there are some tasks and skills to which we have not trained due to the demands of our ongoing conflicts. We must restore our proficiency in those tasks. We work with our sister Services to assess our capabilities to conduct entry operations as part of the joint force and watch closely the improved anti-access/area denial capabilities being developed by potential adversaries.

Question. Prevent proliferation and counter weapons of mass destruction.

Answer. The Army provides highly trained and ready forces with capabilities to support combatant commander requirements to counter the proliferation of weapons of mass destruction. Current capabilities include operating effectively within a chemical, biological, radiological, and nuclear environment, specialized teams to locate and neutralize weapons of mass destruction (WMD), and an operational headquarters with expertise in eliminating WMD.

Question. Operate effectively in cyberspace.

Answer. We are on the right glide path to support U.S. Cyber Command and our geographic combatant commanders to operate effectively in cyberspace. On 1 October 2010, the Army stood up a new three star command (U.S. Army Cyber Command/2nd Army), to direct the operations and defense of all Army networks, and when directed, provide full-spectrum cyberspace operations. The Army is bringing the forces of network operations, defense, exploitation, and attack under one oper-

ational level command to integrate and synchronize global operations for the first time.

MODULARITY

Question. Modularity refers to the Army's fundamental reconfiguration of the force from a division-based to a brigade-based structure. Although somewhat smaller in size, modular combat brigades are supposed to be just as, or more capable than the divisional brigades they replace because they will have a more capable mix of equipment—such as advanced communications and surveillance equipment. To date, the Army has established over 90 percent of its planned modular units, however, estimates on how long it will take to fully equip this force as required by its design has slipped to 2019.

What is your understanding and assessment of the Army's modularity transformation strategy?

Answer. The modular transformation strategy reorganizes Army brigades, divisions and corps headquarters, and theater armies and subordinate commands into standardized designs. 98 percent of all Army brigades have converted or are in the process of converting to modular design. The remaining 2 percent are projected to begin modular conversion by 2013. Modular transformation improves the Army's ability to meet combatant commander requirements and National Security Strategy objectives by providing tailorable formations and leaders who are accustomed to building teams based on changing requirements.

Question. In your view, what are the greatest challenges in realizing the transformation of the Army to the modular design?

Answer. The most significant challenge associated with modular transformation is the full fielding of authorized equipment. Although all units will be organized in a modular design by the end of fiscal year 2013, full fielding of some items of equipment will take longer.

Question. If confirmed, what actions or changes, if any, would you propose relative to the Army's modular transformation strategy?

Answer. If confirmed, we will continue to review Army plans and strategies, including the modular transformation strategy, to ensure the Army continues to provide the joint force with the best mix of capabilities to prevail in today's wars, engage to build partner capacity, support civil authorities, and deter and defeat potential adversaries. If confirmed, I will continue to assess Army structure against current and potential threats to provide the best mix of capabilities and the highest levels of modernization possible.

Question. What is your understanding and assessment of the employment and performance of modular combat brigades and supporting units in Operations Iraqi Freedom, New Dawn, and Enduring Freedom?

Answer. These modular capabilities increase the effectiveness of the Army by better supporting the needs of combatant commanders across the full spectrum of operations.

Question. What changes, if any, would you propose to the modular design, the mix of combat and supporting brigades, or modular unit employment to improve performance or reduce risk?

Answer. At Training and Doctrine Command, we are currently working with current and former commanders, to examine our organizations to see if they are the best we can provide. We are continuously looking at alternate force designs and force mixes to see how we can improve, in both effectiveness and efficiency, our force structure.

Question. With respect to the Army's modular combat brigade force structure design, press reports indicate that the Army is reassessing its heavy and infantry brigade structures and may add a third maneuver battalion to each where there are only two battalions now.

If confirmed, how would you propose to implement a decision to add a third maneuver battalion to the heavy and infantry combat brigades?

Answer. We are examining the current brigade designs and associated force mix including the number and type of brigades. This will produce alternatives to be analyzed. As the results of this analysis emerge, we will make appropriate decisions on the implementation of any of such proposals and their affect on our available resources. No decisions have been made regarding future force design or force structure changes.

ACTIVE-DUTY END STRENGTH

Question. The Army has increased its Active-Duty end strength over the last several years to meet current and what was believed to be the demands of future oper-

ational requirements. Authorized active duty Army end strength is now 569,400. The Secretary of Defense has announced Army Active-Duty end strength reductions beginning this year through 2014 of 22,000 soldiers followed by another 27,000 beginning in 2015. The fiscal year 2012 budget starts this reduction by requesting 7,400 fewer soldiers.

In your view, what is the appropriate Army Active-Duty end strength needed to meet today's demand for deployed forces, increase nondeployed readiness, build strategic depth, and relieve stress on soldiers and their families?

Answer. We are continuously assessing the factors that affect end strength including assigned missions, operational demands, unit readiness, soldier and family well-being, Reserve component capability and capacity, and fiscal constraints in order to determine required Active-Duty end strength. Our Active-Duty end strength is adequate to meet current demand. As future demand is better understood, we will assess its impact.

Question. In your view, what is the appropriate Army Active-Duty end strength needed to meet the likely future demand for deployed forces, maintain nondeployed readiness, ensure ground force strategic depth, and avoid increasing stress on soldiers and their families?

Answer. I am not yet prepared to provide you with an answer on future Army end strength.

Question. Plans for the reduction of Army end strength assumes that the cuts will be made gradually over several years.

What, in your view, are the critical requirements of the management of this end strength reduction to ensure that should strategic circumstances change the cuts can be stopped and, if necessary, reversed?

Answer. End strength reductions are not automatic. They are conditions based and will require periodic assessment. If confirmed, I will work with Secretary McHugh and Army Leadership to develop a plan that will allow us to accomplish current and projected missions, balance the well-being of soldiers and families, and keep us prepared to meet unforeseen operational demands.

Question. The gradual reduction of end strength may provide a hedge against an unforeseen contingency requiring sufficient and available Army forces, however, savings from the reduction of forces could be realized sooner and with greater long-term advantages with faster implementation.

What, in your view, are the most important advantages and disadvantages of faster end strength reductions?

Answer. The Army's deliberate and responsible draw-down plans will proceed at a pace necessary to ensure mission success, the well-being of soldiers and families, compliance with directed resource constraints and flexibility for unforeseen demands.

The advantage of drawing down faster would be the flexibility to invest in other required areas. The disadvantages lie in the reduced flexibility for meeting unforeseen demands and the precision to maintain the skills and quality of the remaining force.

Question. End strength reductions totaling 49,000 soldiers will also require force structure reductions as well.

If confirmed, how would you propose to reduce Army force structure, if at all, to avoid the problems associated with a force that is over-structured and undermanned?

Answer. The Army is coordinating the end strength reductions with its deliberate Total Army Analysis process to ensure Army force structure contains required capability and capacity to meet current and future operational requirements within authorized end strength.

Question. How will these planned end strength reductions impact the Army's plans for overseas basing of its units?

Answer. In my present position, I have not had a chance to examine the potential impact of end strength reductions on overseas basing.

Question. The Army has had two other major post-conflict end strength reductions in the last 40 years after Vietnam and after Operation Desert Storm.

What, in your view, are the critical elements of the planning and management of a major force reduction to ensure that the health of the Army as a whole is not crippled impacting ongoing operations or general readiness?

Answer. End strength reductions are conditions based and must be deliberate and responsible. The Army's plan should ensure accomplishment of its assigned missions, operational readiness for future demands, compliance with directed resource constraints while treating soldiers and their families with the dignity and respect they deserve.

Question. If confirmed, what actions would you take to ensure that the planning and management of an end strength reduction minimize the negative impact on the readiness of the Army and soldier families?

Answer. Throughout my entire career, I have focused on taking care of soldiers and families. If confirmed, I will look carefully at the impact on soldiers and families.

Question. Does the Army have the legislative authority it needs to properly shape the force as part of the personnel drawdown?

Answer. At this time, I am not aware of any additional legislative authority the Army needs to shape personnel drawdown. If confirmed, I will consult with Secretary McHugh and Senior Army personnel leadership to determine if additional authorities are necessary.

STRATEGIC RISK

Question. Do you believe that the extended pace and scope of operations in Iraq and Afghanistan create increased levels of strategic risk for the United States based on the lack of availability of trained and ready forces for other contingencies?

Answer. In my current position, I have not yet had the opportunity to examine strategic risk given our global demand. If confirmed as a member of the Joint Chiefs, I will have the opportunity to look closely at this issue.

Question. If so, how would you characterize the increase in strategic risk in terms of the Army's ability to mobilize, deploy and employ a force for a new contingency? In your view, is this level of risk acceptable?

Answer. As mentioned in the previous question, I have not yet had the opportunity to examine strategic risk.

Question. What is the impact of the decision to increase Army forces committed to Afghanistan on our ability to meet our security obligations in other parts of the world?

Answer. The impact is manageable as we have available forces in the Train/Ready pool of forces to meet potential future requirements with an acceptable degree of risk. The Army is currently meeting all requirements and mitigates the Afghanistan additional commitment with forces made available commensurate with the drawdown in Iraq. The Army continuously balances meeting current requirements against building/maintaining strategic depth and capacity for contingency, full spectrum operations.

Question. How and over what periods of time, if at all, will reductions to Army end-strength increase or aggravate this risk?

Answer. These projected reductions, as mentioned by the Secretary of Defense in his 6 January announcement, are based on the condition of a decrease in demand. If confirmed, I will work with Secretary McHugh to ensure our force structure is adequate to meet all future demands.

Question. If confirmed, what additional actions would you take, if any, to reduce or mitigate this strategic risk?

Answer. The Army has a mature planning process to determine force structure changes within the approved end strength for all Army components. If confirmed, I will work to ensure the full readiness of units generating to deploy to known operations in or in preparation for contingency operations.

"INSTITUTIONALIZING" SUPPORT FOR IRREGULAR WARFARE

Question. A major objective of the Department over recent years has been increasing emphasis on lower-end, irregular, counterinsurgency, and stability type operations. All of which are areas that place a high premium and demands on Army capabilities. In order to ensure that a rebalance achieves this objective, and perhaps more importantly is then sustainable, Secretary Gates has stressed the need for the Department to "institutionalize and finance" the support necessary for the irregular warfare capabilities that have been developed over the last few years and will be needed in the future.

What, in your view, does it mean to "institutionalize" capabilities and support for irregular warfare capabilities in the Army?

Answer. The Army views Irregular Warfare as an operational theme rather than a particular type of operation. We must be able to conduct Stability Operations, Counter-Insurgency, Counterterrorism, and Foreign Internal Defense and support the Special Operations Forces in unconventional warfare. I understand "institutionalize" to mean that the Army's operating forces and generating forces view operations under the theme of Irregular Warfare as a core capability. We must be able to execute missions across the full spectrum of conflict, to include irregular warfare.

Question. What is your understanding and assessment of Army efforts to date to institutionalize and support these capabilities?

Answer. The Army has institutionalized Irregular Warfare. We have an Irregular Warfare proponent within Training and Doctrine Command supported by an Irregular Warfare Fusion Cell that synthesizes Army Irregular Warfare efforts including those from the Army's Peacekeeping and Stability Operations Institute, Counter-Insurgency centers and others. The Army includes Irregular Warfare in our professional military education. The Army has built four Counter-Insurgency Centers, a Security Force Assistance training brigade, increased the military police, and significantly increased Special Operations and Civil Affairs forces.

Question. In your view, what are the obstacles, if any, to institutionalizing this kind of support, and what will be necessary to overcome them?

Answer. I have not seen any particular obstacles to institutionalizing this kind of support. The Army has to balance risk across the range of missions it may be called on to perform.

Question. While force structure and program changes may be necessary, they are unlikely to prove sufficient to achieve full institutionalization. The greater challenge may be found in changing Army culture, attitudes, management, and career path choices, for example through adjustments to organization, training, doctrine, and personnel policies.

In your view, what are the most important changes, if any, that might be necessary to complement programmatic changes in support of the further institutionalization of capabilities for irregular warfare in the Army?

Answer. We have to retain the flexibility, adaptability, and agility to operate both in missions requiring maneuver over extended distances and in missions requiring the establishment of security over wide areas regardless of what kind of threats populate the battlefield.

Question. Institutionalizing support for irregular, counterinsurgency, and stability capabilities in the force does not mean ignoring the requirement for the Army to be trained, equipped, and ready for major combat at the high-end of the full spectrum of operations.

If confirmed, how would you propose to allocate the Army's efforts and resources to ensure that the force is prepared for major combat while at the same time it increases and institutionalizes support for irregular, counterinsurgency, and stability operations?

Answer. We are training and educating our soldiers and leaders to understand that they must be capable of both combined arms maneuver and wide area security. In training, we replicate the threats and conditions they are likely to face in their next mission. For 10 years, that has meant irregular threats and conditions common in the wide area security role that supports counterinsurgency operations. As the demand for forces in Iraq and Afghanistan is reduced, we will introduce threats and conditions in training common in the combined arms maneuver role. The goal however is to avoid the false dichotomy of "regular or irregular" warfare. The future battlefield will be populated with hybrid threats—combinations of regular, irregular, terrorist, and criminal groups—and we must train and educate our leaders and units to understand and prevail against them.

Question. Do you anticipate that the Army will continue to train and equip general purpose force brigades for the "advise and assist brigade (AAB)" mission after the wars in Iraq and Afghanistan come to an end?

Answer. I anticipate that there will be an ongoing requirement for Security Force Assistance activities of the type carried out by these brigades into the future. I believe building partnerships and partner capacity will be key roles for the Army in the future. If confirmed, I will continue to assess requirements and work with this Congress to ensure we have the resources and flexibility required to meet them.

Question. If so, what mission essential task list changes do you plan to institutionalize this mission set in training for the general purpose force brigades?

Answer. If confirmed, I will work with our joint partners to identify the mission essential tasks for Security Force Assistance and incorporate them into the Unified Joint Task List and Army Unified Task List.

Question. Do you foresee that general purpose force brigades will be regionally aligned to carry out an AAB-type mission?

Answer. I believe it is too early to tell. I believe some brigades may be regionally aligned. The number and type of brigades will depend upon what we have available after the priority requirements in the CENTCOM AOR, and the other COCOM requirements. If confirmed I will work with Secretary McHugh to determine the best allocation to support operational requirements.

Question. If so, what changes to training and equipping of the ARFORGEN model will be necessary for regional alignment?

Answer. The ARFORGEN model and our modular design are well-suited to the kind of adaptations that will be required to meet security force assistance requirements in the future.

LESSONS LEARNED

Question. What do you believe are the major lessons that the Department of the Army has and should have learned from Operation Enduring Freedom (OEF) and Operation Iraqi Freedom (OIF) regarding its title 10, U.S.C., responsibilities for manning, training, and equipping the force?

Answer. We have learned that soldiers require more than a year to fully recover from extended deployments and to prepare for another deployment. In addition, the ability to adapt rapidly is the key to success in the current and future operational environments. We have also learned that a fully integrated Reserve component is critical to meet force requirements.

Question. If confirmed, which of these lessons, if any, would you address as a matter of urgent priority?

Answer. They are equally important and all must be addressed.

ROTATION CYCLES/SCHEDULES

Question. Although improving recently, the Active Army's ratio of time spent deployed to time at home station has remained fairly steady at 1:1—that is for each year deployed a soldier spends about 1 year at home station. The Active Army objective is 1:2 where soldiers can expect to be home for 2 years for each year deployed. The Reserve component objective is 1:5 where soldiers can expect to be home for 5 years for each year deployed.

What impact do you expect the proposed troop reductions in Iraq to have on the so-called “dwell time” of Army soldiers? Is it possible that the reduction of demand for Army forces in Iraq alone will allow the Army to achieve the 1:2 dwell time goal by the end 2011?

Answer. The proposed troop reductions in Iraq will allow the Army to gradually increase dwell if there is not a significant increase in demand in Afghanistan or in other contingencies. We do not believe that the reduction of demand in Iraq alone will allow the Army to meet the 1:2 dwell goal.

Question. What is your assessment of the potential impact of the decision to decrease Army end-strength on the rotation schedule and meeting the dwell goal of 1:2 for Active-Duty Forces?

Answer. With the proposed troop reduction in Iraq and projected decrease in Afghanistan, we will see improvement gradually in dwell, but the Army has not yet met its dwell goal of 1:2 for Active-Duty Forces. The decreases in Army strength are conditions based and I am not in a position at this time to assess whether there will be an impact to the dwell goal of 1:2 based on these reductions.

Question. How, in your view, will the proposed reductions in Iraq impact the ability of the Army National Guard to respond to Homeland Defense and support to civil authorities?

Answer. The return of these Army National Guard forces to state control should provide the Governors and Adjutants General with increased forces to conduct Homeland Defense, disaster response, and Defense Support of Civil Authorities. These forces will be better trained and more experienced due to their Iraq combat deployments. Although the National Guard has been able to meet all disaster relief requirements, the return of forces will allow more flexibility to accomplish local missions.

EQUIPMENT AVAILABILITY

Question. Both deploying and nondeploying Active and Reserve component Army units are training without all their required equipment. Deploying units do not receive some of their equipment until late in their predeployment training cycle or as they arrive in theater.

In your view, has deployment of additional brigades to Afghanistan increased the strain on maintenance systems and further reduce equipment availability for training?

Answer. There have been some challenges with equipment being available for training when it has been fielded directly to theatre. We're beginning to overcome this challenge.

Question. What is the impact of our drawdown from Iraq in this regard?

Answer. The drawdown from Iraq should improve availability of equipment for units to conduct pre-deployment training. For some systems, such as tactical wheeled vehicles, it will have a larger positive impact. For other pieces of more high

demand equipment in short supply across the Army, I anticipate it will have a lesser impact.

Question. Do you believe that the Army has enough modern equipment to fully support the predeployment training and operations of deploying units?

Answer. The Army does not have enough equipment to fill all units to their fully modernized capabilities. This means there are some instances in which the most modern equipment is not available until later in a unit's pre-deployment cycle or until it arrives in theater. However, the Army uses the force generation model to resource units with adequate levels of the available modernized equipment to conduct their pre-deployment training and assigned mission upon deployment.

Question. What do you see as the critical equipment shortfalls for training and operations?

Answer. The Army is short unmanned aerial systems and some non-line-of-sight communications equipment. Due to the nature of the warfare in Afghanistan, we face shortages in light infantry specific equipment. As we continue to reset equipment returning from Iraq we will see a steady improvement in on hand equipment for units training for contingency force missions.

Question. What steps would you take, if confirmed, to address these shortfalls and ensure that units have what they need to train and operate?

Answer. If confirmed, I will continue our capability portfolio reviews to evaluate our priorities against mission requirements and adjust our resource allocations to ensure the Army continues to strike the critical balance between having enough modern equipment to fully support pre-deployment training and operations in theatre. If confirmed, I would support the Army Force Generation Model of phased equipping through which the Army intensively manages our equipment on-hand to ensure next deploying units, from all components, have sufficient equipment for training and deployment.

EQUIPMENT REPAIR/RESET

Question. Congress provided the Army with approximately \$15 to \$17 billion annually to help with the reset of nondeployed forces and accelerate the repair and replacement of equipment. However, the amount of reset funding requested for DOD in fiscal year 2012 decreased to \$11.9 billion from the fiscal year 2011 request of \$21.4 billion.

In your view, is this level of funding sufficient to not only prepare Army forces for operations in Afghanistan but to also improve the readiness of non-deployed forces for other potential contingencies?

Answer. It is my understanding that the \$4.4 billion requested for reset in fiscal year 2012, though lower than requests in fiscal year 2010 and fiscal year 2011, is adequate to replace equipment lost in combat and to repair equipment available for reset. If confirmed, I will closely examine this issue.

Question. Is it your understanding that our repair depots are operating at full capacity to meet rebuild and repair requirements for reset?

Answer. My understanding is that repair depots are operating at required capacity but not at their full capacity.

Question. What additional steps, if any, do you believe could be taken to increase the Army's capacity to fix its equipment and make it available for operations and training?

Answer. There are certain measures, such as contract augmentation or rebalancing workload that could be used to increase capacity at our facilities. At this time, I am not in a position to determine whether these measures are necessary or appropriate.

Question. What impact is it likely to have on the ability of Army National Guard (ARNG) units to respond to Homeland Security and support to civil authorities missions?

Answer. I understand that the reduction of reset funding for fiscal year 2012 is commensurate with the reduction of troop and equipment levels supporting Operation New Dawn. I believe that the ARNG will still be able to respond to Homeland Defense missions and provide support to civil authorities.

MISSILE DEFENSE

Question. The Department of Defense recently decided to terminate the Army's Surface-Launched Advanced Medium-Range Air-to-Air Missile, and not to proceed with procurement and fielding of the tri-national Medium Extended Air Defense System, two Army air and missile defense systems.

Do you consider missile defense to be one of the Army's core missions?

Answer. Yes. The Army has confirmed on many occasions that Air and Missile Defense is a core competency. Protection of our deployed forces is the priority. The Army provides this protection in coordination with our sister Services and coalition partners.

Question. How do you believe the Army should manage the risks that result from these decisions?

Answer. I believe the Army needs to continue to monitor the threat and prioritize required future capabilities to ensure we provide effective affordable solutions in a timely manner to our forces.

Question. The Army has recently proposed transferring a number of its air and missile development programs to the Missile Defense Agency (MDA).

In your view, what is of the proper relationship between the Army and the Missile Defense Agency?

Answer. It is my understanding that the Army relies on the MDA to develop and produce the Ballistic Missile Defense System (BMDS). The Army works with MDA to provide those BMDS capabilities to the combatant commanders. The Army maintains a relationship with MDA through the Army/MDA Board of Directors and its four standing committees.

Question. The Army has recently completed a review of its air and missile defense portfolio.

In your view, what are or should be the Army's responsibilities, if any, with respect to development, procurement, and operation of missile defense systems?

Answer. The Army's responsibilities depend on the type of missile defense system being developed and guidance from the Office of the Secretary of Defense.

SPACE

Question. The Army Space support to Strategic Command works closely with Air Force Space Command in getting space based communications to the warfighter. Recently the Army has begun to look at the possibility of expanding the scope of data that could be provided to the last tactical mile from space.

In your view, what are the needs that the Army could address from space, and, if confirmed, how would you ensure that this is coordinated with OSD?

Answer. While I am not yet in a position to provide an informed assessment, I understand that the importance of space programs continues to increase across DOD, and the Army needs to keep pace to fully leverage capabilities and ensure that space systems are appropriately prioritized within both DOD and the Department of the Army.

Question. If confirmed, what would be your vision for the Army space forces in the future?

Answer. While I am not yet in a position to provide an informed assessment, one of my priorities, if I am confirmed, is to position the Army to keep pace to fully leverage capabilities and ensure that space systems are appropriately prioritized and resourced.

Question. The Army, as do all the Services, tends to lag behind in the acquisition of ground and other terminals to work with new satellite systems. Acquisition of GPS M-code capable equipment is just one example of where there is needed capability on orbit but terminals will not be available in a timely fashion to utilize the capability.

What is your view on this lag and, if confirmed, what actions would you propose taking to resolve the lag?

Answer. If confirmed, I would need to examine this issue more closely. While I understand that all of the Services have specific requirements to meet specific needs for their forces and that the Army depends heavily on these systems, I am not yet in a position to provide an informed assessment.

LOW DENSITY/HIGH DEMAND FORCES

Question. If confirmed, how would you address the Army's management of low density units such as Special Operations Forces, military police, civil affairs, and others which are in extremely high demand in this new strategic environment?

Answer. If confirmed, I would use the Total Army Analysis (TAA) to identify the capabilities necessary, within resource constraints, to achieve the full spectrum of missions expected of the Army. When requirements for additional low density/high demand capabilities are identified through this process, they are resourced within acceptable risk. This process will help determine where these capabilities should reside: the Active component, the Reserve component, or a mix of both. The Army balances the inventory of these low density units to ensure availability of an affordable

mix of flexible forces capable of accomplishing the missions required within the most likely security environment.

Question. Are there functional changes among the Active and Reserve components that you believe should be made?

Answer. I am not yet aware at this time of any changes that may be necessary.

ARMY READINESS

Question. How would you characterize Army readiness in its deployed and non-deployed units?

Answer. I have some concerns about the readiness levels of deployed and non-deployed units. In the ARFORGEN model, deployed and deploying Army units are given the highest priority for manning, equipping and training to achieve the combatant commander's wartime/mission requirements. Nondeployed Army units are used to provide the additive resources to ensure that deployed and deploying Army units can meet mission requirements. This requires the Army to continue to do risk assessment so nondeployed units do not fall below an unacceptable level of risk.

Question. Do you believe the current state of Army readiness is acceptable?

Answer. In my opinion, the Army is prepared to accomplish current missions.

Question. How do you see operations in Iraq and the war in Afghanistan impacting the readiness of Army forces that may be called upon to respond to an attack or another contingency?

Answer. The current demand for Army forces coupled with the cumulative effect of nearly 10 years of conflict impacts the Army's flexibility to provide forces to other contingencies.

IRAQ AND AFGHANISTAN DEPLOYMENTS

Question. Many soldiers are on their fourth and some their fifth major deployment to Iraq or Afghanistan. Beginning in August 2008 Department of Defense policy has been to limit deployments for Active component soldiers and mobilization of Reserve component soldiers to not longer than 12 months.

What is your assessment of the impact of multiple deployments of troops to Afghanistan and Iraq on retention, particularly among young enlisted and officer personnel after their initial active duty obligated service has been completed?

Answer. The Army monitors retention very closely, given the high operational demand and multiple deployments that soldiers are experiencing. Statistics reveal that multiple deployments to Afghanistan and Iraq are not adversely impacting retention. Continuous improvements to Army benefits, such as world class healthcare advances for wounded soldiers, enhancements in family support programs, and additional monetary bonuses have encouraged large numbers of our soldiers to continue their commitments beyond their obligated service periods.

Question. What are the indicators of stress on the force, and what do these indicators tell you about that level of stress currently? In addition to any other stress indicators that you address, please discuss suicide and divorce rates, drug and alcohol abuse, AWOLs, and rates of indiscipline.

Answer. The indicators of stress on the force that the Army tracks continuously include: Reenlistments, Chapter separations, Divorce, Domestic Violence, Sexual Assault, Enlisted Desertion, AWOL offenses, Drug and Alcohol Enrollments, Drug Positives, Courts-Martial and suicides.

I understand that Army discipline and misconduct rates, including desertion, absence without leave, and courts-martial have remained steady or declined in the past year. Other indicators of stress on the force, such as substance abuse and domestic violence have increased. However, the significant increase in the number of soldier suicides is of the greatest concern. Soldiers and their families continue to make significant personal sacrifices in support of our Nation. If confirmed, I am committed to providing soldiers and families with a quality of life commensurate with their service and to continuing Army efforts to develop multi-disciplinary solutions directed at mitigating risk behaviors and enhancing soldier and family fitness and resilience.

Question. For how long do you believe these levels of commitments can continue before there will be significant adverse consequences for the Army?

Answer. I am concerned about the long-term health of the force if we are unable to achieve the appropriate deployment to dwell ratio for the deploying soldier. Adequate dwell time should help the visible and invisible wounds of this protracted conflict. If confirmed, I will closely monitor indicators of stress on the force and work to ensure that the Army has plans and programs to confront these issues appropriately.

Question. The Chief of Staff of the Army, General Casey has stated that the Army is “out of balance”.

What is your understanding and assessment of the concept and efforts to achieve “balance” for the Army?

Answer. I understand balance to be the Army’s ability to sustain the Army’s soldiers, families, and civilians, prepare forces for success in the current conflict, reset returning units to rebuild the readiness consumed in operations and to prepare for future deployments and contingencies, and transform to meet the demands of the 21st century. With the help of Congress, we have made significant progress over the past 3 years to restore balance.

Question. If confirmed, what actions, if any, would you take to achieve and sustain Army “balance”?

Answer. If confirmed, I will work with Secretary McHugh and Army leadership to adopt measures and strategies to achieve and sustain balance. Building resilience among our forces will be one of my highest priorities.

RESERVE COMPONENTS AS AN OPERATIONAL RESERVE

Question. What is your understanding and assessment of the Army’s Reserve Components as an Operational Reserve, as opposed to its longstanding traditional role as a Strategic Reserve?

Answer. The demand for U.S. ground forces over this past decade has required continuous use of Active component (AC) and Reserve component (RC) forces in order to meet the Army’s operational requirements. The RC is no longer solely Strategic Reserve. Current and projected demand for Army forces will require continued access to the RC. Mobilization and operational use of the RC will continue for the foreseeable future.

Question. In your view, what are the major challenges to maintaining and enhancing the Army Reserve and Army National Guard as a relevant and capable Operational Reserve?

Answer. In my opinion, the Army must ensure continued access to the Reserves as an essential part of the Total Force. If confirmed, I will work to ensure they have the necessary training equipment to accomplish all missions. Maintaining an appropriate level of resourcing for the Operational Reserve and mobilizing these forces on a predictable and recurring basis will be challenges for the Army.

Question. What are your views about the optimal role for the Reserve component forces in meeting combat missions?

Answer. In my view, Reserve component forces play a critical role in enabling the Joint Force Commanders to meet assigned missions. Today’s force is structured to balance maneuver capability in the Active component with a majority of the enablers in the Reserve component. This balance should provide capabilities to meet operational requirements.

Question. In your view, should the Department of Defense assign homeland defense or any other global or domestic civil support missions exclusively to the Reserve?

Answer. Reserve component forces are uniquely positioned to be the first responder to these missions: however, the Army’s Total Force must be able to execute homeland defense or other global or domestic support missions.

Question. In your view, how will predictable cycles of 1 year mobilized to 5 years at home affect the viability and sustainability of the All-Volunteer Reserve Force?

Answer. Once the Army can restore its balance and stress on the force has been significantly reduced, a predictable cycle that ensures full recovery and training will support the viability and sustainability of the All-Volunteer Reserve Force. I think the exact ratio—whether 1:4 or 1:5—requires further analysis.

MOBILIZATION AND DEMOBILIZATION OF NATIONAL GUARD AND RESERVES

Question. In the aftermath of the attacks of September 11, 2001, the National Guard and Reserves have experienced their largest and most sustained employment since World War II. Numerous problems arose in the planning and procedures for mobilization and demobilization, e.g., inadequate health screening and medical readiness monitoring, errors caused by antiquated pay systems, limited transition assistance programs upon demobilization, and lack of access to members of the Individual Ready Reserve (IRR). Reserve Force management policies and systems have been characterized in the past as “inefficient and rigid” and readiness levels have been adversely affected by equipment stay-behind, cross-leveling, and reset policies.

What is your assessment of advances made in improving Army Reserve component mobilization and demobilization procedures, and in what areas do problems still exist?

Answer. I understand the Army is currently reviewing all of its mobilization policies to ensure that the systems in place are effective and responsive for Reserve component soldiers. I believe Reserve components are a critical part of the Total Force, and if confirmed, I will continue the effort to ensure that Reserve component soldiers are mobilized and demobilized in the most effective and efficient way possible and that their needs and the needs of their families and employers are met.

Question. What is your understanding and assessment of the sufficiency of current Reserve Force management policies?

Answer. As I understand current Reserve Force management policies, the goal is to manage the force to produce a supply of units to the combatant commanders with a short-term goal of 1 year of mobilization every 5 years with a long-term goal of 1 year of mobilization every 6 years. The challenge the Army has faced has been that demand has been greater than the supply and has caused the need for more frequent mobilizations. As operations in Iraq and Afghanistan start to draw-down, the Army should be better able to attain the mobilization to dwell goals.

Question. What do you consider to be the most significant enduring changes to the administration of the Reserve components aimed at ensuring their readiness for future mobilization requirements?

Answer. The Army Force Generation Model fundamentally changes the way the Army builds unit readiness for mobilization requirements. The ARFORGEN model presents a structured progression of readiness through a multi-year long cycle.

Question. Do you see a need to modify current statutory authorities for the mobilization of members of the National Guard and Reserves?

Answer. At present, I am not aware of a need to modify current statutory authorities to facilitate mobilization of the National Guard and Reserves. If confirmed, I will work with Secretary McHugh to review the statutory authorities to determine if they are sufficient.

INDIVIDUAL READY RESERVE

Question. The Commission on the National Guard and Reserves has found that accessing the IRR as a viable source of manpower for the war was problematic, and that using the IRR as a solution for unit manning is a failed concept.

What is your assessment of the value of the IRR to the All-Volunteer Force?

Answer. I believe the IRR has proven an invaluable asset to all Army components to support contingency operations around the world.

Question. What are your views on the proper role of the IRR in Army force management planning?

Answer. The IRR can serve as a source of experienced and highly-skilled soldiers to help the Army meet critical skill and grade requirements.

Question. If confirmed, what changes, if any, do you foresee making to the Army's IRR recall policy?

Answer. At this time, I do not have sufficient information to recommend changes to this policy. If confirmed, I will consider input from all components to determine the best IRR recall policy.

Question. What is your assessment of the adequacy of the system in place for members in the IRR receiving orders to active duty to request a delay or exemption for that activation, including the procedures in place for appealing the Army's decision on that request?

Answer. While this is an important part of the IRR mobilization, I do not have sufficient familiarity with this policy to recommend changes.

Question. Recent studies of Army suicides show higher rates among the IRR.

What should the Army and DOD do to address this concern?

Answer. Suicides in the IRR are often more difficult to address because those soldiers are not affiliated with a unit. If confirmed, I will consider all methods to integrate IRR soldiers into the Army's Health Promotion/Risk Reduction efforts.

PERSONNEL AND ENTITLEMENT COSTS

Question. In addition to health care costs, personnel and related entitlement spending continues its steep upward growth and is becoming an ever increasing portion of the DOD budget.

If confirmed, what actions would you take to control the rise in the Army's personnel costs and entitlement spending?

Answer. We need to strike a balance between preserving the All-Volunteer Force, accomplishing operational missions and retraining an Army that is affordable to the Nation. If confirmed, I will work with the Secretary of the Army and the Secretary of Defense on how best to achieve it.

Question. If confirmed, what actions would you take to avoid a requirement for massive end-of-year reprogramming to cover personnel costs?

Answer. My understanding is the President's budget is adequate to meet current personnel costs.

Question. What would be the impact of a year-long continuing resolution on Army personnel funding?

Answer. If the Army is given the flexibility to manage total resources (both Base and Overseas Contingency Operations (OCO) funds) to pay its force, then fiscal year 2011 continuing resolution will have minimal impact on military pay and allowances.

MEDICAL AND DENTAL READINESS OF ARMY NATIONAL GUARD AND ARMY RESERVE
PERSONNEL

Question. Medical and dental readiness of Reserve component personnel has been an issue of significant concern to the committee, and shortfalls that have been identified have indicated a need for improved policy oversight and accountability.

If confirmed, how would you seek to clarify and coordinate reporting on the medical and dental readiness of the Reserves?

Answer. I believe the Army should develop and resource mechanisms to routinely identify screen and assess Reserve component medical readiness. If confirmed, I will work with Secretary of the Army, the Chief of Army Reserves, the Director of the Army National Guard, and the Surgeon General to develop policies for more effectively identifying personnel that are nondeployable for medical reasons.

Question. How would you improve upon the Army's ability to produce a healthy and fit Reserve component?

Answer. This is a very important issue, and I will work with the Army's Active and Reserve component leadership to assess whether there are challenges in this area. The Army is moving forward with a Comprehensive Soldier Fitness Program. If confirmed, I would determine how this program applies to Reserve component and National Guard soldiers.

NATIONAL GUARD ORGANIZATION, EQUIPMENT, AND READINESS

Question. What is your understanding and assessment of changes in the global and domestic roles and mission of the Army National Guard and the National Guard Bureau?

Answer. The Army National Guard is a component of the Reserve and Total Force. It responds to emergencies within the United States and deploys to support contingency operations overseas. Throughout the last 10 years, the Army National Guard has transformed from a Strategic Reserve to an operational Reserve. The National Guard, with the support of the National Guard Bureau, has proven critical to the Army's Total Force, and I believe it will continue to do so in the years ahead.

Question. What is your understanding and assessment of the Army's commitment to fully fund 100 percent of National Guard equipment requirements? In your view, do Army processes for planning, programming, and budgeting sufficiently address the requirements of the National Guard?

Answer. I understand efforts are underway to modernize the Reserve components and to ensure they are equipped to fulfill their missions. If confirmed, I will examine the funding of the National Guard to ensure it receives the appropriate level of resources to maintain its role as a vital component of the Total Force.

Question. If confirmed, how would you ensure that the resourcing needs of the Army National Guard are fully considered and resourced through the Army budget? In your view, what is the appropriate role for the Chief of the National Guard Bureau in this regard?

Answer. If confirmed, I will work closely with the Chief, National Guard Bureau, to ensure that Army National Guard requirements/needs are appropriately synchronized with Army priorities and resourcing strategy.

Question. What is your assessment of the effect, if any, of increasing the grade of the Chief of the National Guard Bureau to General (O-10)?

Answer. The increase in grade reflects the significant responsibilities of the Chief of the National Guard Bureau.

Question. In your opinion, should the Chief of the National Guard Bureau be a member of the Joint Chiefs of Staff?

Answer. In my present role, I have not had the opportunity to consider this issue.

Question. What is your understanding of the role and authority of the Director of the Army National Guard?

Answer. The Director of the Army National Guard assists the Chief of the National Guard Bureau, organizing and managing its personnel and other resources

to accomplish the responsibilities and functions. The Director of the Army National Guard assists in carrying out the functions of the National Guard Bureau as they relate to the Army.

Question. In your view, should the Director of the Army National Guard be “dual hatted” as a Deputy Chief of Staff of the Army?

Answer. In my present role, I have not had the opportunity to see how these positions would function together and have not formed an opinion.

ARMY SCIENCE AND TECHNOLOGY (S&T)

Question. What do you see as the role that Army science and technology programs will play in continuing to develop capabilities for current and future Army systems?

Answer. It is my understanding that the Army’s science and technology investment strategy is shaped to foster invention, innovation, and demonstration of technologies for the current and future warfighter. The science and technology program should retain the flexibility to be responsive to unforeseen needs identified through current operations.

Question. What in your view have been the greatest contributions, if any, of Army science and technology programs to current operations?

Answer. I believe the most significant contribution the Army science and technology community has offered to current operations is the ability to use technology to significantly improve warfighter capabilities. Technological innovations have resulted in the rapid development and deployment of lightweight and adaptable Armor solutions that have been critical to addressing emerging threats, enhancing intelligence capabilities, and better protecting our deployed forces.

Question. What metrics would you use, if confirmed, to judge the value and the investment level in Army science and technology programs?

Answer. To judge the value and investment level in Army science and technology programs, I would use metrics that demonstrate improved warfighter capabilities; improve acquisition programs; and align technology development to warfighter requirements.

Question. What new S&T areas do you envision the Army pursuing, for instance to lighten soldier load, and to improve the survivability and combat effectiveness of dismounted soldiers and ground vehicles?

Answer. If confirmed, I will engage the Army’s science and technology program and its stakeholders, including the acquisition community, Training and Doctrine Command and the combatant commanders to discuss the needs of the warfighter and the “art of the possible” for future technology-enabled capabilities to ensure the Army remains the best equipped force in the world.

ARMY LABORATORIES AND RESEARCH, DEVELOPMENT AND ENGINEERING CENTERS (RDEC)

Question. How will you balance the role of Army laboratories between long-term fundamental research, support to current operations and the development of new capabilities to support current and future Army missions?

Answer. The Army laboratories are science and technology performing organizations and as such have and will continue to play a major role in supporting current operations with best capabilities available. Through their broad range of investments in key strategic science and technology areas, they also provide critical new capabilities for soldiers.

Question. If confirmed, how will you ensure that the Army laboratories and R&D centers have the highest quality workforce, laboratory infrastructure, resources, and management, so that they can continue to support deployed warfighters and develop next generation capabilities?

Answer. Army laboratories and Research and Development Centers need to maintain the resources required to continue initiatives and advancements that support the warfighter. If confirmed, I will learn more about their operations and support efforts to improve best practices and workforce quality necessary for mission accomplishments.

ARMY TEST AND EVALUATION EFFORTS

Question. In the past, the DOD Test Resource Management Center did not certify the Army’s test and evaluation (T&E) budget due to identified shortfalls in T&E range sustainment, operations, and modernization.

If confirmed, how will you ensure that the Army’s T&E infrastructure is robust enough to test new systems and technologies and reliably verify their combat effectiveness and suitability?

Answer. Testing is a crucial capability for maintaining the Army's combat edge and modernizing the force. I fully recognize the value of testing to ensure new technologies and equipment address the capabilities our warfighters need. If confirmed, I will work closely with the Army T&E community and the Office of the Secretary of Defense T&E leadership to ensure the Army's T&E infrastructure is adequately resourced to address testing requirements and maintain robust test capabilities.

ARMY INFORMATION TECHNOLOGY (IT) PROGRAMS

Question. What major improvements, if any, would you like to see made in the Army's development and deployment of major information technology systems?

Answer. I believe the Army needs to implement and enforce technical standards, make acquisition of commercial off-the-shelf (COTS) or near-COTS technology easier, and field new technology to operational forces more quickly. This is in line with the congressional mandate you gave us in section 804 of the 2010 NDAA.

As Commanding General for Training and Doctrine Command, I helped establish a center for network integration at Fort Bliss, TX—the Army Evaluation Task Force (AETF). It will serve as the Network's primary test unit with a two-fold intent, to remove the integration burden from the operational units and to provide an operational venue to evaluate new technologies and network capabilities prior to fielding to operational units. The new capabilities they develop should ultimately provide the impetus for future acquisition and equipping decisions.

Question. How will the consolidation of IT systems announced under Secretary Gates efficiency initiative reduce the IT support cost per user to the Army?

Answer. I understand the two primary Army initiatives that fulfill Secretary Gates' mandate are Enterprise Email and consolidation of Army data centers. Implementation of these initiatives should help reduce the cost of information technology support to the Army.

HUMAN TERRAIN SYSTEMS

Question. What is your understanding of the Army's plans to institutionalize the Human Terrain System (HTS) program? Given the proliferation of such capabilities across the Services, what are your views, if any, on developing a joint HTS capability?

Answer. The Army has institutionalized the Human Terrain System as an enduring capability assigned to Training and Doctrine Command and funded capability starting in the fiscal year 2011. I believe there is merit to developing a joint capability. In September 2010, I directed a Training and Doctrine Command capability based assessment of all Socio-cultural capabilities throughout the combatant commands and Services. The intent is to identify other ongoing socio-cultural initiatives, to determine potential synergies and best practices in order to develop and evolve an enduring joint capability. The results of this assessment are due in the spring of 2011.

OPERATIONAL ENERGY

Question. Prior to and since the creation of the Assistant Secretary of Defense for Operational Energy Plans and Program, a number of the Services have made progress addressing concerns associated with operational energy. The Army has announced its operational energy aspirations for the future but, unlike the other Services, the Army's five strategic energy security goals appear vague and lack quantitative metrics against which to measure progress.

If confirmed, how would you propose that the Army address its operational energy challenges, requirements, and opportunities in the immediate short-term?

Answer. The most important issue with operational energy is the amount of fuel used to meet our operational needs. Most of our fuel is used in generation of electricity. The Army has implemented, and accelerated deployment, of generators that use less fuel as well as microgrid systems that tie generators together to operate more efficiently. We are developing more efficient motors for helicopters and vehicles to reduce our operational energy footprint and, ultimately, wars are won or lost by dismounted soldiers, so the Army is addressing excessive soldier loads, driven in large part by energy and power constraints. As the Commanding General of the Army Training and Doctrine Command, I'm a charter member of the Army's Senior Energy and Sustainability Council, which is responsible for addressing energy challenges across the Army. If confirmed I will continue efforts currently underway to increase our energy efficient capabilities in theater and emphasize energy awareness through the military chain of command, and across the Army, to foster a more energy-aware culture.

Question. What is your understanding of the Army's progress with respect to testing and deploying operational energy technologies?

Answer. The Army is taking advantage of every avenue, to include industry, to help us develop technologies that can reduce our operational energy footprint. Renewable energy systems and insulated tentage are some of the systems being piloted and tested. We are also evaluating technologies that will help lighten soldier loads and reduce the amount of batteries and fuel we must procure and deliver to theater. We will continue to pursue more efficient devices and employ energy management capabilities that are essential to retain energy as an operational advantage.

Question. What is your understanding of how the Army is taking advantage of its labs and research, engineering and development centers to further its operational energy and security goals?

Answer. The Army has integrated the national laboratories with Department of Energy and Army laboratories to develop solutions to a range of operational energy, power and security needs. Some of the initiatives include research to reduce the size and weight of components, broadening alternative energy sources, leveraging various emergent energy efficient technologies. These new technologies will increase energy efficiency and improve power supplies for contingency bases, forward operating bases and equipment carried by individual soldiers. If confirmed I will work to ensure that the research conducted at Army facilities continues to focus on meeting the operational energy needs of the current and future Army.

INVESTMENT IN INFRASTRUCTURE

Question. Witnesses appearing before the committee in recent years have testified that the military Services under-invest in their facilities compared to private industry standards. Decades of under-investment in our installations have led to increasing backlogs of facility maintenance needs, created substandard living and working conditions, and made it harder to take advantage of new technologies that could increase productivity.

What is your assessment of Army infrastructure investment?

Answer. Since fiscal year 2007, with BRAC, Transformation, and Grow the Army initiatives, the Army has made significant MILCON investments in its infrastructure. If confirmed, I will work with the Assistant Secretary of the Army, Installation, Energy and Environment, and the Commanding General at Installation Management Command to assess our infrastructure investments.

Question. If confirmed, what actions, if any, would you propose to increase resources to reduce the backlog and improve Army facilities?

Answer. Proper stewardship of our facilities portfolio requires the Army to fully sustain the current facilities, dispose of our excess facilities, improve the quality of our worst facilities and build-out our largest and most critical shortages, all at a level adequate to support the mission.

If confirmed, I will evaluate the proper balance of funding, to include evaluating whether the Army should increase operation and maintenance funding for restoration and modernization and Demolition.

ARMY POLICIES REGARDING DRUG AND ALCOHOL ABUSE

Question. What is your understanding of the Army's policy with respect to disciplinary action and administrative separation of soldiers who have been determined to have used illegal drugs? Do you agree with this policy?

Answer. Army policy directs commanders to initiate administrative separation for all soldiers involved in trafficking, distribution, possession, use, or sale of illegal drugs. While the policy requires initiation of separation, commanders have the authority to retain or separate a soldier.

I concur with this policy.

Question. What is your understanding of the Army's policy with respect to rehabilitation and retention on active duty of soldiers who have been determined to have used illegal drugs or abused alcohol or prescription drugs? Do you agree with this policy?

Answer. Army policy requires that the separation authority consider a soldier drug offender's potential for rehabilitation and further military service. For this reason, soldiers who commit drug and alcohol offenses are required to be evaluated by a certified substance abuse counselor through the Army Substance Abuse Program (ASAP). Commanders consider the recommendation of ASAP counselors when determining a soldier's potential for rehabilitation and retention.

I concur with this policy.

Question. Do you believe that the Army has devoted sufficient resources to implementation of its rehabilitation policies and objectives since 2001? If not, in what ways?

Answer. My personal experience at various command levels since 2001 has been that the Army devotes sufficient resources to implement these objectives. If confirmed, I will assess and closely monitor the level of resourcing for this important area.

Question. What measures are being taken to improve the Army's performance in responding to problems of drug and alcohol abuse?

Answer. Army policy requires a comprehensive approach by commanders, law enforcement and the medical community for drug and alcohol abuse. The Army is working diligently to improve its surveillance, detection, and intervention systems for drug and alcohol abuse.

The Army investigates all reported drug and alcohol incidents to assist commanders in properly adjudicating the offense. The Army is also enhancing detection capabilities through the Drug Suppression Teams.

The Army is also working to improve intervention systems. In addition to increasing the number of ASAP counselors to accommodate the increasing demand, the Army continues to expand the Comprehensive Soldier Fitness program to build resiliency in the force. The Army is also conducting the Confidential Alcohol Treatment and Education Pilot program at six installations to promote help seeking behavior by allowing soldiers to confidentially seek help for alcohol problems.

MEDICAL PERSONNEL RECRUITING AND RETENTION

Question. The Army continues to face significant shortages in critically needed medical personnel in both Active and Reserve components.

What is your understanding of the most significant personnel challenges in recruiting and retaining health professionals in the Army?

Answer. There continues to be a national shortage of medical professionals that challenges the Army's efforts to recruit and retain healthcare professionals. The Army competes with governmental and non-governmental agencies, as well as private healthcare organizations to attract and retain the most skilled and talented healthcare providers, in a uniformed or civilian capacity. The Army continues to evaluate initiatives to provide more flexibility to allow the Army to adequately compete in these areas.

Question. If confirmed, would you undertake a comprehensive review of the medical support requirements for the Army, incorporating all new requirements for 2011 and beyond?

Answer. I believe it is important to review medical support requirements on a regular, recurring basis. With that in mind, if confirmed I will assess whether the Army should undertake a comprehensive review of the medical support requirements for the Army.

Question. If confirmed, what policies or legislative initiatives, if any, are necessary in order to ensure that the Army can continue to fulfill ongoing medical support requirements?

Answer. Given the policy initiatives currently underway and the changes implemented by the National Defense Authorization Act for Fiscal Year 2011 at this time, I do not believe additional legislative authorities are needed to ensure that the Army fulfills medical support requirements. If confirmed, I will closely monitor this area and will work closely with the administration and Congress to seek any additional authorities identified as necessarily to maintain this goal.

WOMEN IN COMBAT

Question. What is your view of the appropriate combat role for female soldiers on the modern battlefield?

Answer. Female soldiers have been and continue to be an integral part of our Army team, contributing to its success and overall readiness as they perform exceptionally well in specialties and positions open to them. Women are employed in units and positions and trained in theater-specific roles that often necessitate combat action such as defending themselves or their units from attack or accompanying patrols.

Question. In your view, should the current policy prohibiting the assignment of women to ground combat units be revised or clarified in any way to reflect changing roles for female soldiers and the changing nature of warfare?

Answer. Existing Army policy is more restrictive than the 1994 Department of Defense policy. If confirmed, I will assess Army policies against the evolving nature and realities of modern combat.

Question. Do you believe that it is appropriate for female soldiers to serve in positions in which they may be exposed to combat?

Answer. Yes. Women are serving in positions that expose them to combat today and continue to make tremendous contributions as well as demonstrate their selfless – service and sacrifices in roles and responsibilities critical to the safety and security of our Nation and to the readiness of the Army.

FOREIGN LANGUAGE PROFICIENCY

Question. A Foreign Language Transformation Roadmap announced by the Department of Defense in March 2005, directed a series of actions aimed at transforming the Department's foreign language capabilities to include revision of policy and doctrine, building a capabilities based requirements process, and enhancing foreign language capability for both military and civilian personnel.

What is your assessment of the progress the Army has made in increasing its foreign language capabilities in operations in Iraq and Afghanistan?

Answer. As Commanding General for the Training and Doctrine Command, I witnessed a tremendous increase in foreign language capabilities in support of OIF/OEF. The Army revolutionized its recruiting processes to enlist native and heritage speakers into vital interpreter/translator positions. Pre-deployment training for the General Purpose Force Soldiers and Civilians has transformed to include Afghanistan/Pakistan Hands Program, Language Enabled Soldiers training, the Rapport Program, and other Soldiers and Civilians with Culturally Based Language Training. The Reserve Officer Training Corps has introduced a very successful Culture and Language Program, which provides incentives and immersion opportunities for cadets who take foreign language and related cultural studies. Overall, these initiatives have provided enhanced capabilities for counterinsurgency operations and building partner capacity overseas.

Question. In your view, what should be the priorities of the Department of Defense, and the Army in particular, in responding to the need for improved foreign language proficiency and improving coordination of foreign language programs and activities among Federal agencies?

Answer. In my opinion, one of the highest priorities for the Department of Defense should be the continued support of the Defense Language Institute Foreign Language Center, which provides Culturally Based Language Training to all Services and Department of Defense Components. With the increasing demand for Pashto and Dari instructors, and foreign language professionals in general, the Department of Defense must coordinate with Federal agencies to ensure best practices are shared to recruit and retain personnel with these critical skills.

PROTECTION OF U.S. FORCES AGAINST INTERNAL THREATS

Question. One year ago, 13 people were slain and scores wounded during a shooting rampage allegedly carried out by a U.S. Army Medical Corps officer. A Department of Defense review of the attack concluded that the Department was poorly prepared to defend against internal threats, including radicalization of military personnel.

What is your assessment of the lessons learned from the tragedy at Fort Hood?

Answer. The lessons learned are invaluable to the Army as we strive to improve the Army Protection Program for individuals and units against emerging threats. Through a holistic Protection approach, the Army is aggressively fielding material and nonmaterial solutions to address internal and external threats.

Question. If confirmed, what strategies would you advocate to prevent and mitigate such threats in the future?

Answer. If confirmed, I will ensure that we continue to integrate and synchronize the many Army Protection Programs that protect our soldiers, family members, and Department of the Army civilians by ensuring that commanders and leaders have the information and tools needed to address the ever changing threat environment.

RELIGIOUS GUIDELINES

Question. The DOD Independent Review Related to Fort Hood observed that "DOD policy regarding religious accommodation lacks the clarity necessary to help commanders distinguish appropriate religious practices from those that might indicate a potential for violence or self-radicalization" and recommended that the policy be updated.

What is your view of the need to clarify the policy regarding religious accommodation in the Army?

Answer. The policies for religious accommodation in the Army are published in AR 600-20, Army Command Policy. The policy must be clear and provide appro-

appropriate guidance to both soldiers and commanders regarding how the Army accommodates for religious beliefs and practices. To this end, if confirmed, I will assess the current policy and determine if further changes are necessary.

Question. Are you concerned that the attack at Fort Hood could lead to harassment or even violence against Muslims in the Army?

Answer. Your question raises a valid concern. However, the Army is a diverse force. As soldiers in the profession of arms, we understand the key role that good order, discipline, morale, and safety have in ensuring units are at all times ready to defend this nation. The Army has long been a place where people from all walks of life can serve proudly and where the many become one—a U.S. Army soldier.

Question. If confirmed, what strategies would you advocate to address the potential for harassment or violence against Muslims in the Army?

Answer. The Army has a longstanding commitment to treat all soldiers with dignity and respect. Treating soldiers with dignity and respect requires continuous leader emphasis and vigilance.

Question. Do Army policies regarding religious practices in the military accommodate, where appropriate, religious practices that require adherents to wear particular forms of dress or other articles with religious significance?

Answer. Regulations regarding wear of religious clothing or items are found in two regulations (AR 600–20, Army Command Policy and AR 670–1, Wear and Appearance of Army Uniforms and Insignia). The policy provides the authority to wear religious jewelry, apparel or articles if they are neat, conservative, and discreet and compliant with these regulations.

Question. In your view, do these policies accommodate the free exercise of religion and other beliefs without impinging on those who have different beliefs, including no religious belief?

Answer. In my opinion, current Army policies provide commanders with adequate flexibility to balance accommodation for religious beliefs and maintain good order and discipline.

Question. In your opinion, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. The Army does not have a policy regarding public prayer by military chaplains. As a matter of practice, however, chaplains are encouraged to be considerate of the audience.

FAMILY SUPPORT

Question. The Army Family Action Plan has been successful in identifying and promoting quality of life issues for Army families.

What do you consider to be the most important family readiness issues in the Army, and, if confirmed, what role would you play to ensure that family readiness needs are addressed and adequately resourced?

Answer. In my view the most pressing family readiness issues include sustaining the Army Family Covenant and improving communication and awareness of the extensive range of available support programs and services the Army has to improve soldier and family quality of life.

In 2007, the Army Family Covenant was unveiled to improve quality of life by providing programs and services that enhance soldier and family strength, readiness, and resilience. Since then, the Army has made great progress and continues to fulfill its commitment to provide soldiers and families a quality of life commensurate with the quality of their service.

The Army Family Action Plan, Survey of Army Families, and other studies revealed that soldiers and families may not be aware of the myriad of available support services. To address this concern, the Army is transforming Army Community Service (ACS) to help connect soldiers and families to the right service at the right time. This transformation will create a more streamlined and modular support structure that better supports our modular Army at every installation. The Army has begun piloting ACS transformation and anticipates completion by October 2011.

The Army has made great progress in building a wide range of support capabilities over the last few years, but the strain on the force continues. If confirmed, I will continue to strengthen our support services and ensure our programs efficiently meet the needs of the soldiers and families who use them.

Question. How would you address these family readiness needs in light of global rebasing, BRAC, and lengthy deployments?

Answer. If confirmed, I will endeavor to ensure that Army Family programs reach out to all soldiers and their families, regardless of geographic location or deployment status. I will also work to ensure that family program platforms and delivery systems keep pace with a mobile Army and utilize technological advances and social networking so services are available to the soldiers and families who need them.

Question. If confirmed, how would you ensure support of Reserve component families related to mobilization, deployment and family readiness, as well as active duty families who do not reside near a military installation?

Answer. I am committed to ensuring soldiers and families remain connected to Army Family services and programs, whether by internet, telephone, or in person regardless of geographic location or Component. Army OneSource (www.MyArmyOneSource.com) is the website of choice for information on Army Family programs and services. Army OneSource highlights Active and Reserve Component Family Programs, is publicly accessible, and thus available to all components and immediate and extended family members.

The State Joint Force Headquarters is the platform for support of geographically dispersed servicemembers and families. This platform projects the Joint Family Support Assistance Program resources, ARNG Family Assistance Centers (FACs), ARNG Family Readiness Support Assistants, and the ARNG Child and Youth program in support of Reserve component families and Active component families that do not reside near the installation. Additionally, Army sponsored programs including Operation Military Kids and Community Based Child Care and Respite Care programs build community capacity for the geographically dispersed Army population. These programs offer similar services and assistance to geo-dispersed Reserve component families as would be available on installations and are connected to local resources that soldiers and families are eligible to use.

MENTAL HEALTH ADVISORY TEAMS

Question. The Army's Mental Health Advisory Team (MHAT) studies in Iraq and Afghanistan have been valuable in identifying the extent of mental health conditions and resource and training challenges being experienced in combat theaters. The most recent report, MHAT VI, stated that multiple deployments were related to higher rates of acute stress and psychological problems, that servicemembers on their third and fourth deployment "reported using medications for psychological or combat stress problems at a significantly higher rate," and that "soldiers with short dwell-time report high mental health problems, high intent to leave the military and low morale."

Based on the findings of MHAT VI that soldiers experience increased stress due to multiple deployments and short dwell time, what actions would you take, if confirmed, to ensure that appropriate mental health resources are available to soldiers in theater, as well as upon their return?

Answer. The MHAT studies play a key role in proactively identifying how changes in the operational environment impact the ability to provide behavioral health care. Since OEF MHAT VI, the number of behavioral health personnel in theater was significantly increased to improve the ratio of behavioral health specialists to soldiers. Specifically, the MHAT team recommended one behavioral health personnel should be deployed for every 700 soldiers, and this ratio was met. Second, the MHAT team recommended a redistribution of behavioral health personnel to ensure that each BCT had one additional dedicated provider to augment their organic provider. This "dual provider" model was designed to ensure that a provider would be available to travel to remote outposts to see soldiers who had limited access to the larger Forward Operating Bases. If confirmed, I will ensure that the Army continues to develop and synchronize the expeditionary components of health promotion, risk reduction, and suicide prevention programs and services.

Question. What do you think have been the most valuable findings of the Army's Mental Health Advisory Teams, and what are the lessons which can be applied to future deployments?

Answer. One of the most valuable findings from the MHATs has been to document that soldiers on multiple deployments report higher mental health problems. This finding was first observed in 2005 (MHAT III), and has been replicated in every subsequent MHAT. Another valuable finding noted in the question was the observation that mental health problems are related to dwell-times. Specifically, short dwell-times are associated with a heightened increase in reports of mental health problems. Other key findings include the observation that deployment length is strongly associated with reports of mental health problems and deployments have put a strain on marital relationships. Overall, the willingness to take a systematic look at the behavioral health care system and the behavioral health status of soldiers

through programs such as the MHATs has ensured that the Army is being responsive to the needs of deployed soldiers to include refining behavioral healthcare delivery models.

SUICIDES

Question. The committee continues to be concerned about the continuing increase in soldier suicides, especially the sharp increase in Reserve component suicides. In June, 2010, the Army released a report on Health Promotion, Risk Reduction, and Suicide Prevention that analyzed the causes of suicides in the Army and reported disturbing trends in drug use, disciplinary offenses, and high risk behaviors. Chapter III of this report discussed the lost art of leadership in garrison.

In your view, what is the cause of this surge in the number of suicides of Reserve Component members?

Answer. The number of ARNG suicides for calendar year 2009 and calendar year 2010 were 62 and 112, respectively. The increase in suicides is due in part to improved reporting over the past 18 months for the Reserve components. This increase is not directly associated with deployments or unemployment as over 50 percent of ARNG suicides were soldiers who never deployed.

Question. The Army is focusing attention on the differences between our Active-Duty (AD) and non-Active-Duty suicides because there are external variables at play. The Army believes that factors such as the economy (particularly a difficult labor market) are creating stress in our non-AD population. Data indicates that unemployment among our young non-AD soldiers is above 30 percent and we are experiencing an increase in requests for employment assistance through ESGR (Employer Support of the Guard and Reserve). Additionally, Reserve component soldiers do not have the same access to medical care as their AD counter parts.

Answer. We continue to pull all accessible national data to better understand current trends. The CDC has a 3-year lag in reporting. So, while we have anecdotal indication of increased suicide in some civilian sectors, we don't have a clear picture of the national suicide rates for calendar year 2008–calendar year 2010. This is particularly important because these unreported years encapsulate the largest recession since WWII (Dec. 2007–June 2009). The Army is improving awareness of and access to training and resources; working with employers and private sector to mitigate economic stress; and improving the quality and access to health care for all Reserve component soldiers.

Question. What is your assessment of the Army's response to the continuing increase in suicide rates?

Answer. Leaders across the Army have taken aggressive steps to improve the health of the force, decrease high risk behavior and stem the increasing rate of suicides in our formations. This is a very tough issue and it is going to take consistent vigilance to fully understand the causes for this increase, identify the indicators and implement appropriate intervention measures. After nearly a decade of war, we are working to keep pace with the expanding needs of our strained Army, and continuously identify and address the gaps that exist in our policies, programs and services. The Army Health Promotion, Risk Reduction and Suicide Prevention Report 2010, along with the DOD Task Force on the Prevention of Suicide by Members of the Armed Forces and other strategic reports, serve as the foundation for our systemic effort to improve.

Question. What is the Army doing to address the issues raised in the Health Promotion, Risk Reduction, and Suicide Prevention?

Answer. The Health Promotion, Risk Reduction and Suicide Prevention (HP/RR/SP) report was a focused 15 months effort to better understand the increasing rate of suicides in the force. This candid report informed and educated Army leaders on the importance of identifying and reducing high risk behavior related to suicide and accidental death, and reducing the stigma associated with behavioral health and treatment. Important issues raised in the HP/RR/SP Report include: gaps in the current HP/RR/SP policies, processes and programs necessary to mitigate high risk behavior; an erosion of adherence to existing Army policies and standards; an increase in indicators of high risk behavior including illicit drug use, other crimes and suicide attempts and an increased operational tempo.

To address gaps in the current HP/RR/SP policies, processes and programs necessary to mitigate high risk behavior, the Army has taken actions such as disseminating policy addressing the issues of polypharmacy, requiring a comprehensive medical review of any soldier who is receiving four or more medications when one or more of those is a psychotropic or antidepressant.

To address the erosion of adherence to existing Army policies and standards, the Army has issued commanders a compendium of Army policies emphasizing the

Army's current policies and systems for surveillance, detection and intervention of high risk behavior. This has already increased our compliance and utilization rates across numerous proven policies and processes.

To address the increase in indicators of high risk behavior including illicit drug use, other crimes and suicide attempts, the Army has taken actions such as instituting a new online system giving Medical Review Officers improved access to drug and alcohol information systems resulting in enhanced identification of prescription/illicit drug use.

To address stressors associated with an increased operational tempo, the Army has increased the number of Military Family Life Consultants. These consultants work with soldiers and their families to provide them support during transitions and separations. They are available to support soldiers both prior to deployment/mobilization and during reintegration upon return from deployment.

Question. What is your assessment of the status of the Army's Resiliency program in ensuring the readiness and well being of the Total Force?

Answer. The Army's Comprehensive Soldier Fitness program is a ground breaking way of addressing stress on the force. We have migrated from treating stress and stress-related outcomes to developing resiliency in our young soldiers to get ahead of the effects of this hazardous occupation. We are shifting our focus from intervention to prevention, from illness to wellness.

It is my view the Comprehensive Soldier Fitness is a critical component to the Army's holistic approach to the wellness of the Force. As part of our program we have fielded Master Resiliency Trainers into our training base to start early in developing resiliency among our recruits and trainees. We are gradually expanding this fielding to incorporate all units, particularly timed to our deploying forces during pre and post-deployment phases.

Question. National Institute of Mental Health (NIMH) is currently performing a 5-year study on suicides in the Army.

Has the Army received any interim reports from this study that may influence Army suicide prevention programs?

Answer. The Army has received several interim reports from the NIMH and is evaluating the findings. The Army continues to work with our national partners in academia to develop groundbreaking programs and initiatives, in particular the Army Study to Assess Risk and Resilience in Servicemembers being conducted by the NIMH.

Question. If confirmed, what actions, if any, would you propose that the Army take in the meantime to enhance its suicide prevention program?

Answer. If confirmed, I will sustain the extensive leader focus on this issue and its challenges. This is an enduring problem that requires enduring solutions.

SUPPORT FOR WOUNDED SOLDIERS

Question. Wounded soldiers from Operations Enduring Freedom, Iraqi Freedom, and New Dawn deserve the highest priority from the Army for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from active duty if required, and continuing support beyond retirement or discharge. Yet, as the revelations at Fort Stewart in 2003 and Walter Reed in 2007 revealed, the Army was not prepared to meet the needs of returning wounded soldiers.

In your view, what were the most critical shortcomings in warrior care since 2001?

Answer. The quality of military medical care is in my opinion cutting edge and unequalled. In my opinion, at the outset of Operations Enduring Freedom and Iraqi Freedom, the Army's infrastructure was lacking in the area of housing and managing outpatient care for returning wounded, ill, and injured soldiers received. Additionally, we identified shortcomings in Traumatic Brain Injury, Post Traumatic Stress, Behavioral Health, and Pain Management. Since 2001, we have invested significant research, resources and developed formal programs to improve warrior care.

Question. What is your assessment of the Army's response?

Answer. With the support of Congress, the Army has addressed the issues of housing wounded and injured soldiers, developed well resourced Wounded Warrior Transition Units (WTU) and effectively centralized our Army programs under the Warrior Transition Command.

Question. How does the Army provide follow-on assistance to wounded personnel who have separated from active service?

Answer. In 2004, the Army created the Wounded Warrior Care program to provide follow on assistance to wounded personnel who separated from service. Under

the program, the Army maintains contact with soldiers to provide a continuum of care and support.

Question. How effective, in your view, are those programs?

Answer. With more than 170 Advocates stationed around the country in Department of Veterans Affairs medical facilities, at Warrior Transition Units, and everywhere severely injured Army Veterans reside, the Army Wounded Warrior (AW2) Program is where it needs to be to support those who have bravely served this great nation. As part of the Warrior Transition Command, AW2 is now positioned to ease the transition from soldier to veteran as part of a continuum of care and support that stretches from the battlefield to where they reside today.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase the Army's support for wounded personnel, and to monitor their progress in returning to duty or to civilian life?

Answer. If confirmed, I will continuously assess the efficiency and appropriateness of the Army's support for wounded personnel. I would implement strategies and seek resources as needed to ensure that the Army meets the needs of wounded soldiers.

Question. Studies following the revelations at Walter Reed point to the need to reform the Army's disability evaluation system.

What is your understanding and assessment of the Army's disability evaluation system?

Answer. If confirmed, I will closely examine the disability evaluation system to reveal any areas that need to be improved or that could be streamlined. I would also work with Army, DOD and VA stakeholders to decrease the length of time to complete these evaluations and facilitate the transition to civilian life for those determined to be not fit for duty.

Question. If confirmed, what actions, if any, would you propose to address any need for changes in this system?

Answer. If confirmed, I would work with experts in this area and with the stakeholders in the Army, DOD and VA to identify elements of the current system that should be changed and develop a strategy for accomplishing those changes.

ARMY WARRIOR CARE AND TRANSITION PROGRAM

Question. The Pittsburgh Tribune-Review recently published a series of articles that alleged that the Army's 38 Warrior Transition Units had become "a dumping ground for criminals, malingerers, and dope addicts" creating an imbalance of soldiers who need complex medical case management and soldiers that commanders do not want to take on combat deployment.

Does the Army have adequate guidelines to ensure that only those soldiers with qualifying medical needs are assigned to Warrior Transition Units?

Answer. I am concerned that Warrior Transition units maintain the focus on complex medical care management and support those soldiers with a genuine need. If confirmed, I will continuously assess guidelines to ensure that only soldiers with qualifying needs are assigned to the WTUs.

Question. In your view, are the Warrior Training Units serving the purpose for which they were created?

Answer. Over the past 4 years, the Warrior Care and Transition Program has significantly improved the quality of care and support soldiers and families have received.

Question. If confirmed, do you plan to make any changes to the criteria for assignment to a Warrior Training Unit?

Answer. While I do not have plans to change the criteria for assignment to Warrior Training Units at this time, this is an issue I will thoroughly assess if confirmed. Also, I will continually assess the effectiveness of the Warrior Care and Transition Program to ensure it provides the level of care and support our wounded warriors deserve.

Question. Staffing of Warrior Transition Units has been a major issue, especially at installations experiencing surges of redeploying troops.

In your view, are the Warrior Transition Units staffed with sufficient numbers of qualified personnel?

Answer. I am not fully aware of the existing staffing levels in the Warrior Transition units. I will, if confirmed, learn more about this area and to ensure appropriate resourcing of Warrior Transition Units to support the soldiers under their care.

IMPLEMENTATION OF THE REPEAL OF "DON'T ASK DON'T TELL" POLICY

Question. What is your assessment of the Army's readiness and capability to implement the repeal of the "Don't Ask Don't Tell" (DADT) policy?

Answer. The Army is on track with its implementation plan in accordance with DOD guidance and timelines, and I believe the Army is fully capable of executing the implementation. Our plan includes periodic assessments to review and consider feedback from the field throughout the implementation.

Question. What in your view are the major challenges, if any, that could confront the Army in implementing the repeal of DADT? If confirmed, what actions, if any, would you propose taking to deal with these challenges?

Answer. The most important challenge is that we educate our soldiers who are in combat situations with a minimum of disruption and risk. We are making every effort to train units prior to deploying. We will also provide the training to currently deployed units and we will follow up with these deployed units to ensure that all soldiers receive the required training upon their return from deployment.

Question. What measures is the Army taking to focus training on combat units and other deployed units and ensure that repeal of the current policy does not adversely affect combat operations?

Answer. The Army is using a Chain Teach methodology, where each commander is responsible for educating his/her subordinates and they in turn train their Soldiers. Commanders and leaders will carefully manage deployed units' training to minimize impact on the mission. The Army is making every effort to train units prior to deployment.

Question. If confirmed, what conditions or circumstances would you expect to be achieved, if any, before recommending that the Chairman of the Joint Chiefs certify that DADT can be repealed without adversely affecting the Army?

Answer. If confirmed, I would base my recommendation on the input I receive from commanders and leaders consistent with the requirements established by Congress and Department of Defense leadership. I would also seek to ensure that the Army completes training according to Army guidance.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. Numerous cases of sexual misconduct involving soldiers in Iraq, Kuwait, and Afghanistan have been reported over the last several years. Many victims and their advocates contend that they were victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate military treatment. They asserted that the Army failed to respond appropriately by providing basic services, including medical attention and criminal investigation of their charges and, ultimately, appropriate disciplinary action.

What is your understanding of the resources and programs the Army has in place in deployed locations to offer victims of sexual assaults the medical, psychological, and legal help that they need?

Answer. I am very concerned about reports of sexual assault anywhere in our Army but especially in deployed locations. We cannot tolerate this behavior wherever it occurs. While the deployed theatres pose special challenges, the Army is committed to providing victims in deployed units with appropriate medical care, resources and support. The Army has taken a number of significant steps to improve the assistance to victims of sexual assault, including enhanced recognition of the special circumstances posed by deployed soldiers. The Army's Sexual Harassment Assault Response and Prevention (SHARP) Program includes medical, advocacy, chaplain, investigative and legal services. This program requires every brigade sized unit to appoint and train a deployable sexual assault response coordinator and every battalion to appoint and train unit victim advocates.

Question. What is your view of the steps the Army has taken to prevent additional sexual assaults at deployed locations as well as home stations?

Answer. In 2008, the Army implemented its I. A.M. (Intervene, Act, Motivate) Strong Sexual Assault Prevention Campaign. The campaign includes strategic, operational and tactical level execution of the I. A.M. Strong Campaign, with heavy emphasis on soldiers' commitment to intervene and protect their fellow soldiers from the risk of sexual assault and from the risk of sexual harassment. The campaign places additional emphasis on establishing a command climate that deters sexual harassment and assault.

Question. What is your view of the adequacy of the training and resources the Army has in place to investigate and respond to allegations of sexual assault?

Answer. While increasing emphasis to prevent sexual assaults before they occur, the Army continues to emphasize victim services and response capabilities, to include enhancements to investigation and prosecution resources.

The SHARP Program is a great start to managing strategies, policies and resources necessary to adequately prevent and respond to incidents of sexual assault.

This is a challenging problem that will require leadership and constant vigilance at all levels.

Question. Do you consider the Army's current sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Prior to implementation of the I. A.M. Strong Prevention Campaign, the focus of the Army program was primarily on victim response. Part of that response focus was the implementation of confidential reporting, or restricted reporting, which is an effective way to allow a victim to come forward and have their personal needs met without fear that may be associated with a criminal investigation. If confirmed, I will continue to look closely at the Army's sexual assault program.

Question. What problems, if any, are you aware of in the manner in which the confidential reporting procedures have been put into effect?

Answer. Getting victims to trust the system and come forward can be challenging; however, I am not aware of any specific problems with the current reporting procedure. Confidential reporting, or restricted reporting, allows a victim to come forward and have their personal needs met without fear that may be associated with a criminal investigation.

Question. What is your view of the appropriate role for senior military and civilian leaders in the Secretariat and the Army staff in overseeing the effectiveness of implementation of new policies relating to sexual assault?

Answer. Perhaps the most important role of any Senior Army Leader is to ensure there is an adequate assessment of an organizational climate, where such behavior is not tolerated and where victims feel free to report incidents without fear of reprisal.

Question. If confirmed, what actions would you take to ensure senior management level direction and oversight of Departmental efforts on sexual assault prevention and response?

Answer. If confirmed, I will have an active role in the oversight and implementation of the Army's Sexual Harassment/Assault Response and Prevention (SHARP) Program. I will work with the Secretary and the Army leadership to ensure the Army's SHARP program continues to receive the appropriate level of supervision, guidance, and support needed to drastically reduce incidents of this unacceptable crime.

MORALE, WELFARE, AND RECREATION

Question. Morale, Welfare, and Recreation (MWR) programs are critical to enhancement of military life for members and their families, especially in light of frequent and lengthy deployments. These programs must be relevant and attractive to all eligible users, including Active Duty and Reserve personnel, and their eligible family members.

What challenges do you foresee in sustaining and enhancing Army MWR programs and, if confirmed, what improvements would you seek to achieve?

Answer. The Army has taken steps to ensure we care for and retain Families through a broad range of meaningful initiatives, to include many family and MWR programs and services. In October 2007, the Army leadership unveiled the Army Family Covenant, which institutionalized the Army's promise to provide soldiers and their families with a quality of life that is commensurate with their service to the Nation. The Soldier Family Action Plan provided the original roadmap to implement the Army Family Covenant, and includes such important programs as Soldier Family Assistance Centers, Survivor Outreach Services, improved services to the geographically dispersed, Exceptional Family Member respite care, Army OneSource, Child, Youth and School Services, Child Development Center and Youth Center construction, and more.

A challenge will be to sustain a consistent level of funding for these programs. If confirmed, I will consult with commanders, soldiers and families to ensure that these programs are adequate and meet their needs.

DETAINEE TREATMENT STANDARDS

Question. Do you agree with the policy set forth in the July 7, 2006, memorandum issued by Deputy Secretary of Defense England stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. Yes. The U.S. military has always adhered to one simple, enduring principle regarding detainees: they are to be treated humanely, no matter what the circumstances of their capture, and no matter how the conflict is characterized.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006,

and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. Yes. Both of these documents provide effective, practical guidance and direction to the field on critically important issues relative to detainee treatment, detainee operations training, and the interrogation of detainees.

Question. Do you believe it is consistent with effective military operations for U.S. forces to comply fully with the requirements of Common Article 3 of the Geneva Conventions?

Answer. Yes. The requirements of Common Article 3 are nothing new to the U.S. military. The protections outlined in this article have been a part of U.S. policy on the law of war and the treatment of detainees for some time.

Question. If confirmed, how would you ensure that U.S. forces in Iraq and Afghanistan comply with the standards in the Army Field Manual, the DOD Directive, and applicable requirements of U.S. and international law regarding detention and interrogation operations?

Answer. First and foremost, I would set the right tone for the force by taking every opportunity to talk about the importance of ethical conduct on the battlefield. I would stress that the Army earns the trust and respect of the American people by our actions, especially our actions in combat. I would tell them that by adhering to the laws of war, treating detainees humanely, and showing compassion and restraint, we prove to America and to the world that we are what we say we are: a disciplined, professional fighting force.

Second, I would sustain and improve our existing systems for helping our soldiers understand and adhere to the proper standards for detainee treatment, detention operations, interrogations, et cetera.

Finally, the Army is committed to adherence to the Law of War and the humane treatment of detainees. When allegations of wrongdoing by soldiers surface, the Army must continue to fully investigate. If misconduct is substantiated, there are procedures in place to hold soldiers accountable.

Question. In the past 2 years, significant changes have been made in Iraq in the way detention operations have been conducted in a counterinsurgency environment, including through the establishment of reintegration centers at theater internment facilities.

What do you consider to be the main lessons learned from the changes to detention operations in Iraq?

Answer. The two primary lessons learned from detention operations in Iraq were the need for centralized command and control and the requirement to nest with the host nation's correctional system and rule of law.

Centralized command and control of detainee operations is necessary to ensure uniform implementation of policy.

The other lesson we learned from Iraq was that detainee operations cannot stand alone; it must nest with the host nation's correctional system and rule of law. Integration of detainee operations with host nation police, judiciary and penal systems is essential to a smooth transition to host nation control.

Question. What is your understanding of how these lessons are being applied in Afghanistan?

Answer. Combined Joint Interagency Task Force (CJIATF) 435 in Afghanistan incorporated the above lessons learned. The CJIATF incorporates detainee operations, corrections, and rule-of-law concepts that provide assistance to the GIROA to assume full detention and correction responsibilities. The CJIATF works closely with the Department of State and the host nation.

Question. What should be done to incorporate those lessons learned into Department of Defense doctrine, procedures and training for personnel involved in detention and interrogation operations?

Answer. As the DOD Executive Agent for detainee operations, the Army is working closely with DOD and the Services to incorporate these lessons learned into DOD-wide doctrine, procedures and training. The Army continues to compile and assess lessons learned to inform and update policy, doctrine, and tactics, techniques, and procedures.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Chief of Staff of the Army?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR CARL LEVIN

FUTURE ARMY AIRLIFT

1. Senator LEVIN. General Dempsey, as the head of the Army's Training and Doctrine Command (TRADOC), you were responsible for studying the challenges to rapid deployment of ground forces to distant theaters from the Continental United States, and determining methods for increasing our responsiveness. Afghanistan is a case in point—a distant, landlocked theater that, like most of the Third World, has few airfields large enough to handle our long-range transport aircraft. Moreover, the few large airfields that do exist tend to have very limited space on the ground to park aircraft for unloading or staging personnel and equipment. This means that even when we can get to a region by air, the throughput is very limited. Moving even a single brigade in this fashion can take weeks or even months.

In the ongoing Analysis of Alternatives (AOA) process for a replacement of the C-130, the Army's concern is that the large fleet of C-17s, C-5s, and C-130s has limited utility in the Third World, where airfields are scarce and restricted. In the AOA, the Army favors a replacement for the C-130 that has a vertical takeoff and landing (VTOL) capability much like that of the V-22. U.S. Transportation Command is also very interested in high-capacity alternatives to complement traditional fixed-wing lift assets. What are your views on the need for a C-130-sized VTOL capability to support the Army?

General DEMPSEY. The Army has been actively collaborating with the U.S. Air Force for over 3 years to validate the Joint Future Theater Lift (JFTL) requirements and move to a Milestone A decision for a theater airlift capability with more payload and greatly improved access than a C-130. Our lessons learned from past and recent deployment experiences and studies support the need for a heavy-lift VTOL aircraft. This airframe will require the ability to operate in austere environments on unimproved landing areas within close proximity to objective areas and supported units. It will also require the ability to bypass known, prepared airfields, which an adversary can easily interdict or deny.

2. Senator LEVIN. General Dempsey, do you think this would be an important capability for the Army and worth the significant investment it would require from the Air Force to develop and produce?

General DEMPSEY. The Army has in-depth studies substantiating the capability. The promise of the technology represented by the JFTL could address the need for an intra-theater VTOL airlifter for the entire Joint Force. The Army will continue to collaborate directly with the U.S. Air Force to complete the ongoing JFTL Joint Technology Study in order to continue to march toward a Milestone Decision Document and 'Milestone A' decision. The development of the JFTL will be a challenge because of the technical and engineering requirements, the reality of rapid deploying expeditionary formations, the costs associated with developing and fielding a truly transformational lift platform coupled with today's fiscal realities—not to mention the challenge in balancing the need for "lift" with "strike" capability to our Sister Services.

QUESTIONS SUBMITTED BY SENATOR MARK BEGICH

ENERGY SOURCES

3. Senator BEGICH. General Dempsey, energy is vital to the operational capability of the military. However, our current energy dependence puts lives at risk and undermines our operational capability. I know the Department of Defense (DOD) and the Services understand how vulnerable our reliance on oil, especially oil from foreign countries, has made us as a nation and are taking many steps to alleviate dependency. Nevertheless, the bottom line today is the military needs access to fossil fuels for energy needs. I prefer those sources to be domestic instead of overseas to ensure access and strengthen our national security. Please describe your view of how reliance on oil for fuel impacts Army operations and personnel.

General DEMPSEY. The Army's reliance on oil, from domestic and foreign sources, for essentially all operational energy needs impacts our operations and personnel by placing the Army at risk of not meeting fuel requirements when supply chain disruptions occur. The logistical burden of fuel and water convoy operations needed to supply contingency bases has led to significant loss of personnel and equipment. To the extent we can use energy more efficiently or, in some cases, use alternative energy sources, we can reduce the number of shipments and lessen the risk to our soldiers.

4. Senator BEGICH. General Dempsey, what is your understanding of steps that have been taken to alleviate consumption of oil for current operations and what impact have those efforts had?

General DEMPSEY. The Army is pursuing a comprehensive energy strategy that will reduce consumption across our installations and operational forces. We are developing and deploying advanced technologies and solutions to reduce fossil fuel demand and to increase energy efficiency across platforms, theater base camps, and installations. The Army is also adopting alternative and renewable energy systems, where life cycle cost effective, to expand operational alternatives and help reduce fossil fuel consumption. We're taking action to quantify and analyze the impacts of these initiatives. In the last year especially, the Army has taken definitive steps to more clearly articulate its energy security requirements and accelerate the development, integration, and deployment of capabilities to the field. If confirmed, I will continue to focus on this important area.

5. Senator BEGICH. General Dempsey, in your view, what remains to be done?

General DEMPSEY. I recognize that much more needs to be done. While the Army is already making positive strides, it must continue to pursue and field solutions in the areas of smart micro-grids, renewable energy technologies, and energy-efficient structures. As TRADOC Commander, I was a member of the Senior Energy and Sustainability Council. So I know that the Army's senior leaders are working these issues hard. Part of this effort is for Army leaders, at all levels, to understand the importance of operational energy considerations in mission success.

6. Senator BEGICH. General Dempsey, how does the price of oil impact the Army's budget during these times of constrained resources?

General DEMPSEY. Oil price increases have a definite impact on the Army budget in the year of execution. Since 2007, the Army has spent an average of more than \$3 billion per year on fuel and energy, with more than half supporting liquid fuels for operations and the remainder representing power and energy at our installations. Higher oil prices mean higher energy costs and a significant reallocation of financial resources, which could impact the Army's ability to support important mission priorities.

7. Senator BEGICH. General Dempsey, if confirmed, what steps will you take to alleviate dependency on foreign sources of energy, and ultimately decrease reliance on oil for fuel?

General DEMPSEY. The Army Energy Security Implementation Strategy establishes principles that directly address this objective. If confirmed, I will continue to support and advocate for the Army's campaign to reduce consumption, expand energy alternatives, and improve management capabilities. We must curtail our reliance on oil and other imported sources of energy, in order to reduce our vulnerability associated with disruptions of supply or price fluctuations.

IRREGULAR WARFARE

8. Senator BEGICH. General Dempsey, Army units from Alaska have made a significant contribution to operations overseas. Last week, I visited the 1st Stryker Brigade Combat Team (BCT) at the National Training Center (NTC) in California during their predeployment training exercise. In May, they will deploy to Afghanistan. Due to the operational tempo, their training is focused on capabilities required for the mission in Afghanistan. It is my understanding in fiscal year 2012 the Army will be able to begin full spectrum operations (FSO) training as dwell time increases. However, as Secretary Gates highlighted in a speech at West Point last week, it is imperative the capabilities required for these types of missions are institutionalized. Yet the force must also be trained for the many different types of threats we will face in the future. If confirmed, what action will you take to institutionalize irregular warfare?

General DEMPSEY. We recently published Change 1 to our capstone operations manual, FM 3-0. This manual explicitly states that the Army's operational concept is FSOs. FSOs is a combination of offensive, defensive, and stability or civil support operations undertaken simultaneously as part of an interdependent joint force to seize, retain, and exploit the initiative, accepting prudent risk to create opportunities to achieve decisive results. FM 3-0 goes on to state that these operations are conducted amid populations, and that shaping the conditions with the civilian population is just as important to campaign success as are offensive and defensive combat operations.

We are currently institutionalizing Irregular Warfare by highlighting it in our capstone doctrine, by inculcating it throughout our professional military education system, and by reshaping our training strategies to include stability and civil support operations in addition to standard offensive and defensive operations.

At our Combat Training Centers (CTCs), the scenarios are developed to enable commanders to train their units on FSO mission essential tasks. These tasks include offensive operations, defensive operations, and stability and civil-support operations. During a typical FSO rotation at a CTC, the training unit will conduct both Combined Arms Maneuver against regular forces, and Wide Area Security against irregular forces and criminal elements. The degree of focus on offense, defense, and stability operations will vary based on unit training objectives and potential missions for the training unit. This wide array of tasks in a very complex operational environment will ensure our forces possess the agility to succeed in FSOs, including irregular warfare.

9. Senator BEGICH. General Dempsey, how do you propose to sustain the capability currently at the NTC like role players and infrastructure that has been built up in recent years for irregular warfare?

General DEMPSEY. The CTC Program, based on the TRADOC G-2's Operating Environment Master Plan and the Army Training Strategy, has identified enduring training enablers (including role players and infrastructure) that are required for training FSOs against hybrid threats. These enduring enablers will be prioritized based on the operational force needs, programmed in the Army's Program Objective Memorandum, and sustained in a resource-informed manner. For example, we currently use around 800 role players at each CTC per rotation through Overseas Contingency Operations (OCO) funding to support Operation Enduring Freedom/Operation New Dawn counterinsurgency-focused mission rehearsal exercises. However, our initial estimate is that we will need 466 role players for FSOs training at the Joint Readiness Training Center (JRTC) and Joint Multinational Readiness Center (JMRC) and 296 role players at the NTC to conduct full-spectrum operations training against hybrid threats. We will also continue to maintain the Military Operations in Urban Terrain (MOUT) villages at the CTCs, though we'll only man them to the minimal degree required.

ALASKA LAND MOBILE RADIO

10. Senator BEGICH. General Dempsey, the Alaska Land Mobile Radio (ALMR) system provides interoperable communications for Federal, State, and local government agencies consistent with national interoperability objectives set by the Department of Homeland Security. ALMR is maintained cooperatively through a cost share with all partners. ALMR is used for operational needs of the Army like installation security, radio communication for convoys, synchronization of personnel during deployments and redeployments, transportation management, training support, and communication with other agencies. I understand the Army will be divesting 41 roadway sites in Alaska over a 2-year period beginning this summer. I appreciate

the Army's proposal to transfer the sites to the State of Alaska at no cost. If confirmed, will you fully examine the impact of the divestiture on all partners to ensure the system will remain viable until it is replaced or upgraded?

General DEMPSEY. We will absolutely continue to examine the impact of our divestiture, as I think we have done to this point, and will do our best to ensure that ALMR remains viable within the limitations we have. The Army no longer has a sufficient "business case" for continuing to maintain those sites that do not directly support day-to-day Army requirements. However, we remain fully committed to being good partners in this arrangement. To that end, we have offered to transfer the assets at our 41 sites, approximately \$18 million in capital investment, to the State of Alaska at no cost. This will allow the State to continue to benefit from the Army's capital investment into ALMR that directly supports public safety and other State agency missions. We will also maintain our remaining sites in accordance with the ALMR Cooperative Agreement and will continue to share the use of Federal frequencies with the State, which is a key enabler of this system.

11. Senator BEGICH. General Dempsey, if confirmed, will you work with the other partners to ensure the divestiture timeline allows for all partners to make the necessary preparations to assume responsibility for the sites if they choose to do so?

General DEMPSEY. We have worked closely with ALMR partners and will continue to do so as we go through the divestiture process. While the ALMR Cooperative Agreement requires a 12 month notification for termination, in this case we provided a 16 month notification through Alaskan Command (ALCOM), our DOD Representative to the ALMR Consortium. We also developed a 2-year phased transfer plan with only one-third of the sites being transferred in the first year in order to provide maximum fiscal planning opportunity. Additionally, Brigadier General Scott, U.S. Army Pacific G-6, personally traveled to Alaska in March to meet with Commissioner Becky Hultberg and her staff to see if there was a way to further assist. At that meeting, the Army proposed additional accommodations by delaying start date of the planned divestiture (first 13 sites) until January 2012, with the Army maintaining the sites in a reduced maintenance (or break-fix) posture for an additional 6 months before transferring equipment. This allows ALMR partners a total of 22 months of preparation time from our original notification. We are absolutely interested in being good partners and will continue to do all we can to enable this transition within our limitations.

QUESTIONS SUBMITTED BY SENATOR SAXBY CHAMBLISS

ARMY TRANSFORMATION

12. Senator CHAMBLISS. General Dempsey, the 2010 Quadrennial Defense Review (QDR) reinforced the focus on stability operations as an integral and co-equal element of FSOs. As such, the role of Civil Affairs (CA) forces as subject-matter experts for key stability tasks was elevated in two directives included in the Rebalancing the Force section of the QDR as enhancements to the capabilities of the U.S. Armed Forces. The first of these—"expand CA capacity"—provides resources and potential, creates opportunity, and presents challenges. The second one—"increase counterinsurgency, stability operations, and counterterrorism competency in general purpose forces"—is an important implied task for CA that presents its own opportunities and challenges.

As the Commander, TRADOC, part of your mission was to: . . . design, develop, and integrate capabilities, concepts, and doctrine in order to build an Army that is a versatile mix of tailorable, adaptable, and networked organizations operating on a rotational cycle for FSOs. During your tenure there, part of TRADOC's web-based initiatives included the development or maintenance of a Capabilities Needs Assessment website, which documented CA capability requirements but never resolved the gaps in CA capabilities.

How do you reconcile the status of these efforts to close the CA gaps and shortfalls while you were Commanding General, TRADOC, with the elevated status of stability operations, and by extension the importance of CA, within the 2010 QDR?

General DEMPSEY. CA forces are an important part of Stability Operations. We identified through our Capability Needs Assessment process that the Army lacked sufficient resources, specifically CA capabilities, for Building Partner Capacity. Our analysis identified capability gaps. Our follow-on processes addressed those gaps, and we implemented solutions like resourcing the 162nd Infantry Training Brigade to prepare General Purpose Forces (GPF) for conducting Stability Operations. We have been expanding CA forces to provide the increased level of support required

by both ongoing operations and anticipated future requirements in both the Reserves and the Active Force. In 2007 we had 29 CA Battalions with just 9 percent of the force in the Active component. By 2013 we will have 43 CA Battalions with 32 percent of the force in the Active component. The continued growth and transformation of CA forces is a work in progress.

13. Senator CHAMBLISS. General Dempsey, in these tight financial times where we actively seek efficiencies wherever we can find them, is creating additional CA force structure (military construction dollars, training dollars, etc.) the best use of taxpayer funds?

General DEMPSEY. The Army regularly assesses its ability to meet the demands of the combatant commanders. We identified the need for additional CA capability in ongoing operations and see the need for these capabilities continuing beyond those operations. CA specialists bring unique capabilities to the force, not only in our current operations, but also in our engagements and activities to build partner capacity. Our growth and transformation of Civil Affairs forces is a work in progress that we will continually assess as part of the Army's ongoing force modernization and development processes.

14. Senator CHAMBLISS. General Dempsey, is creating additional CA capacity (soldiers/units) the proper way to solve a capability shortfall?

General DEMPSEY. CA forces provide a unique capability to the whole force, enabling us to better meet the needs of our National Security Strategy. When deciding how to solve a capability shortfall, the Army conducts a formal Capability Based Assessment (CBA) process resulting in a recommendation of how to meet the need. In this instance the recommended solutions broadly included creating additional CA units as well as resourcing the 162nd Infantry Training Brigade to prepare GPFs to conduct Stability Operations. We continuously assess how to maximize our capabilities and reduce shortfalls as part of our strategic reviews and the Total Army Analysis.

15. Senator CHAMBLISS. General Dempsey, would embedding CA within the Army BCT help resolve some or all of these capabilities gaps while simultaneously conserving precious resources during an era of increasingly constrained budgets?

General DEMPSEY. As we look beyond Afghanistan and Iraq, we see the need to maintain flexibility to task organize our CA forces, which we anticipate may include the ability to operate outside a BCT, in conjunction with other Special Operations Forces (SOF).

SPECIAL OPERATIONS ACTIVITIES

16. Senator CHAMBLISS. General Dempsey, section 167, title 10, U.S.C., defines 10 activities as special operations (SO) activities insofar as each relates to SO. While there is a catchall proviso listed as well, designating "such other activities as may be specified by the President or the Secretary of Defense" as SO activities, given the 2006 realignment of all Reserve CA and psychological operations/military information-support operations (PO/MISO) forces from the U.S. Special Operations Command (SOCOM), where they supported both the GPF and SOF, to the U.S. Army Reserve Command (USARC), where they now primarily support the GPF. Should CA and PO have remained on this list of SO activities?

General DEMPSEY. Active component CA and Military Information Support Operations (MISO) should remain on the list of Special Operations Activities. However, Reserve component (RC) CA and MISO should be removed for two reasons. First, because RC CA and MISO support the GPF, they should be aligned with them to better facilitate their operational employment. Second, the complexities of managing a force the size and composition of the RC CA and MISO force are best handled by the USARC.

Consistent with section 167, title 10, U.S.C., SOCOM is designated the joint CA Proponent. Within SOCOM, the Army SOCOM is the proponent for CA. It has long been acknowledged, in both design and practice, that CA is not an exclusively special operations discipline. The GPF has a longstanding history of employing CA that certainly extends to operations conducted abroad today.

17. Senator CHAMBLISS. General Dempsey, given this change of command and control, how do you reconcile the fact that Reserve component CA and PO/MISO soldiers continue to perform what is technically defined as a SO activity without com-

mensurate authorities, training, equipping, or funding every time they deploy in support of combat operations in Iraq, Afghanistan, and the Horn of Africa?

General DEMPSEY. Per section 167, title 10, U.S.C., “For purposes of this section, special operations activities include each of the following insofar as it relates to special operations ... Civil Affairs ... Psychological Operations ...”. Based upon this definition, the CA and MISO missions conducted by the Reserve component (RC) in Iraq, Afghanistan, and the Horn of Africa are not Special Operations Activities because they are conducted in direct support of GPFs, not SOFs. The RC CA and MISO soldiers have the appropriate authorities (i.e. Commanders Emergency Relief Program), training (AC and RC CA and MISO forces are trained using the same Program of Instruction and Doctrine, with the exception of language training being optional for the RC), and Major Force Program 2 (MFP2) funding to support their combat operations and other operational employment.

18. Senator CHAMBLISS. General Dempsey, what can be done to clarify this statutory discrepancy?

General DEMPSEY. If deemed necessary, a decision to clarify any perceived discrepancy would have to be in the form of a recommendation from the Secretary of Defense to Congress to address section 167, title 10, U.S.C.

QUESTIONS SUBMITTED BY SENATOR SCOTT P. BROWN

M9 PISTOLS

19. Senator BROWN. General Dempsey, what is the future of the M9 in the Army?

General DEMPSEY. It is undetermined at this time. The Army is reviewing a current Modular Hand Gun requirement developed by the U.S. Air Force for applicability to the Army and adoption as an Army requirement. The review is still in early staffing so it would be premature to speculate on replacing the M9 at this time. The M9 Pistol has served the Army well over the past quarter century and has proven itself in numerous combat operations, including Panama, Desert Storm, Somalia, as well as the current wars in Iraq and Afghanistan.

20. Senator BROWN. General Dempsey, does the Army plan to procure more M9s or to compete for a replacement pistol?

General DEMPSEY. No, the Army is not currently planning to procure any more M9s to include sustainment quantities. Current Army policies allow for 100 percent replacement of parts to include receivers during reset if necessary to maintain the required quantity of pistols in the Army inventory. The M9 Pistol has served the Army well over the past quarter century and has proven itself in numerous combat operations, including Panama, Desert Storm, Somalia, as well as the current wars in Iraq and Afghanistan. While the Army does not have a current plan to compete for a replacement pistol, the Army is reviewing a current Modular Hand Gun Capabilities Production Document developed by the U.S. Air Force for applicability to the Army and adoption as an Army requirement. The review is still in early staffing so it would be premature to speculate on replacing the M9 at this time.

QUESTIONS SUBMITTED BY SENATOR ROB PORTMAN

ABRAMS TANK

21. Senator PORTMAN. General Dempsey, in your written answers to the advance policy questions posed by the committee regarding Army weapon system programs you stated, “In my view, the Abrams modernization is necessary and will initially enable integration of the emerging network and provide ability to fire the next generation of 120mm ammunition. Future modernization will provide capability improvements in lethality, protection, mission command, mobility, and reliability intended to maintain the Fleet’s combat overmatch and restore space, weight and power margins to keep the tank relevant through 2050. The Abrams modernization program is funded in the fiscal year 2012 budget request. If confirmed, I will be able to offer an assessment as the program matures.” Do you acknowledge that the fiscal year 2012 budget request ends U.S. production of the tank for the first time in modern history?

General DEMPSEY. The Army has continuously built Abrams tanks since 1979. The M1A2SEPV2 production ends in fiscal year 2013, last fielding in fiscal year 2014. M1A1AIM SA production ends in fiscal year 2011, last fielding in fiscal year 2014.

22. Senator PORTMAN. General Dempsey, are you willing to work with this committee to address alternatives that would continue production of Abrams tanks beyond 2012?

General DEMPSEY. We share your concerns over the viability of the industrial base and recognize the challenges associated with starting and stopping production. Abrams upgrade production will continue fielding 18 Heavy Brigade Combat Teams (HBCT) equipped with M1A2SEPV2s and 6 HBCTs equipped with M1A1AIM SA by fiscal year 2014. Because of this effort, the Abrams tank will remain a critical part of the Army's combat vehicle force beyond 2014.

23. Senator PORTMAN. General Dempsey, what is the impact on ending tank production on U.S. industrial capability in our depots, armor facilities, and private companies across our Nation?

General DEMPSEY. There will be a production break for the Abrams tank in fiscal year 2013. This is the result of the Army completing its objective to field upgraded Abrams tanks to 18 HBCTs. The near-term plan for Abrams modernization sustains government and contractor System Engineering capability. It will not provide the production workload at Anniston Army Depot in Anniston, AL and the Joint Systems Manufacturing Facility in Lima, OH (formerly known as the Lima Army Tank Plant) that would adequately sustain these facilities and key suppliers and sub-contractors after fiscal year 2013. We are seeking to minimize the impact of the break with the approval of the requirement for the next package of Abrams tank improvements. At a minimum, the Army anticipates the break to continue for at least 2 years.

24. Senator PORTMAN. General Dempsey, the Army has acknowledged that the Abrams tank will remain in the inventory for the foreseeable future. What is the Army doing to upgrade the current fleet including the Abrams tank in terms of research, development, test, and evaluation (RDT&E) and production?

General DEMPSEY. The Abrams Program is moving towards a Materiel Development Decision in third quarter of fiscal year 2011 that will define the next package of improvements for the Abrams tank. Abrams near-term modernization will focus on leveraging mature technologies to increase power generation, power distribution and fuel efficiency. Long-term modernization will provide capability improvements in lethality, survivability, mobility and reliability intended to maintain the Abrams tank combat overmatch and provide the size, weight, power, and cooling margin to keep the Abrams relevant through 2030 and beyond.

25. Senator PORTMAN. General Dempsey, I understand the Army intends to begin modernizing the Abrams tank with new capabilities including those directly tied to lessons learned from Iraq deployments, but the fiscal year 2012 budget request includes less than \$10 million for Abrams RDT&E. How is \$10 million sufficient in fiscal year 2012 sufficient for this task?

General DEMPSEY. The \$9.7 million of RDT&E funds requested in the fiscal year 2012 President's budget is sufficient for Abrams modernization because the Army anticipates that the majority of the \$107.5 million in fiscal year 2011 RDT&E funds will carry over to fiscal year 2012, thereby providing sufficient funding to execute all anticipated fiscal year 2012 RDT&E efforts.

26. Senator PORTMAN. General Dempsey, will you please provide a detailed modernization plan for the Abrams tank?

General DEMPSEY. Abrams tank modernization will be done in two phases: Near term, we will pursue Power Generation and Power Distribution Modernization to enable integration of the Army Directed Requirements along with the ability to fire the next generation of 120mm ammunition. This will be done through field modifications and technical insertions as the vehicles are at the depots. Long term modernization will provide major capability improvements in lethality, survivability, mobility, and reliability intended to maintain the Abrams tank combat overmatch and provide the size, weight, power, and cooling margin to keep the Abrams relevant through 2030 and beyond.

QUESTIONS SUBMITTED BY SENATOR JOHN CORNYN

WEST POINT SPEECH

27. Senator CORNYN. General Dempsey, in a speech at West Point on February 25, 2010, Secretary Gates stated, "The Army also must confront the reality that the

most plausible, high-end scenarios for the U.S. military are primarily naval and air engagements—whether in Asia, the Persian Gulf, or elsewhere . . . But in my opinion, any future defense secretary who advises the president to again send a big American land army into Asia or into the Middle East or Africa should ‘have his head examined.’” The United States has sent 100,000 or more ground troops into these very regions five times over the last 6 decades. Does our Nation need to maintain its ability to carry out large-scale ground campaigns in order to ensure our national security, or is the requirement for these types of land operations truly a thing of the past?

General DEMPSEY. The Secretary clarified his statement a week later at the Air Force Academy, stating that it would be wrong to interpret his statement as “questioning the need for the Army at all, or at least one its present size, the value of heavy armor generally, and even the wisdom of our involvement in Afghanistan.” We believe that the intent is for all the Services to think harder about the entire range of missions and how to achieve the right balance of capabilities in an era of tight budgets, how to use the assets we have with the greatest possible flexibility, and how to truly take advantage of being part of the Joint Force. I agree with all of those goals. Most importantly we need to look at how we prepare ourselves for an uncertain future, since the challenges we will face are different than those we grew up with. We take our profession of arms seriously; at all levels we are continuously assessing and adapting to changing environments. Trends in the 21st century security environment continue to create conditions leading to increased instability. The combination of population growth, fragile states, demand for natural resources, rapid diffusion and access to technology, and the proliferation of weapons of mass destruction increase the likelihood of conflict. The Army mitigates these conditions through our engagements, exchanges, exercise programs, security force assistance activities, and by building partnership capacity. As such, we as professionals are working to ensure the full complement of Army capabilities are available when needed. To meet these requirements we need a consistent flow of forces provided by a balanced and affordable Army comprised of “tailorable” and networked organizations, operating on rotational cycles and capable of providing trained and available forces to conduct full-spectrum military operations.

28. Senator CORNYN. General Dempsey, Secretary Gates also highlighted that the lessons learned in Iraq and Afghanistan must be “incorporated into the Service’s DNA and institutional memory.” He went on to say that the Army has always needed “entrepreneurial leaders with a broad perspective and a diverse range of skills.” In a recent interview, you said that the Army needs to focus on mastering a few skills that will prepare it for whatever future missions it is given, rather than becoming a “jack-of-all-trades” in a postwar era. In your view, what lessons from Iraq and Afghanistan are most important for the Army to carry forward?

General DEMPSEY. Our Army is a learning organization—from the accumulation of all our experiences in peacetime and at war. Our Campaign of Learning is evidence of our commitment to learning. Within the Army, leadership remains the multiplying and unifying element of combat power. Our lessons learned garnered from 10 years of war for leader development clearly highlight the need for agile and adaptive leaders who are critical thinkers, innovative and can recognize and manage transitions to exploit opportunities for success on the battlefield. This also drives a requirement for learning systems that facilitate the education and training of our leaders.

Continuation: As campaigns progressed over the last 10 years, U.S. Army forces learned the importance of counter-insurgency and other variations of stability and support operations. Leaders of all echelons, but especially leaders of squads and platoons, had to become masters of negotiation, persuasion and influence with local nationals. They had to bridge cultural barriers with local politicians, foreign security forces, spiritual leaders and citizens and had to learn ways to establish trust across these boundaries. They had to adapt their interpersonal skills to move others to the desired end state with indirect influence, instead of force or use of direct authority. They had to be prepared for rapid transitions between civil support missions to instantaneous response to attacks from insurgents and then back to peaceful interactions. With greater application of mission command, company and higher-level leaders had to learn to operate at greater levels of trust down the chain of command. Awareness of the importance of the alignment of intent and means across echelons was heightened.

Army systems for leader development were required to adapt concurrently to meet the operational demands for more competent and agile leaders of character. This adaptation was deliberately aimed at developing critical and innovative thinkers prepared to meet the evolution of the Operational Environment. CTCs underwent sig-

nificant adaptations to provide the conditions to train individuals and units in all aspects of deployed operations. Authentic native noncombatants were introduced in the mission rehearsal exercises, and opposing forces (OPFOR) role played the practices of terrorists and insurgents. Situational training exercises provided exposure to critical tasks and used increased variability to present soldiers with opportunities to practice adaptation. Leader development systems and management practices were updated to steward the effective development of leaders. Professional military education (PME) was modified to push senior- and mid-level learning outcomes down to lower ranks. Senior- and mid-level education addressed the broadened requirements for stability and support operations and operations with joint, inter-agency, intergovernmental and multinational forces. PME also adapted to the requirements of modularity and Army Force Generation (ARFORGEN) in order to man deploying units with qualified leaders. We have learned that we must anticipate change early, to recognize the “weak signals” in order to maintain our learning advantage over our adversaries, and we have learned that we must have training, education and assignment systems in place to develop our leaders that are equally as adaptive as the leaders themselves.

Our experiences have underscored the importance of the role of leadership at all levels in our Army, the Joint Force, and with our partners to accomplish our Nation’s aims. Within the Army, leadership remains the multiplying and unifying element of combat power. Leadership requires influencing others to accomplish the mission while improving our organizations at all levels of the Army to maintain the successful edge as the Nation’s premier land power force. Leadership doctrine, founded on the principle of competent leaders of character supporting and defending the Constitution, subordinate to civilian authority, set the foundation for Army leaders to adapt to the rapid onset of operational requirements following 9/11 and the global war on terrorism. Our leadership requirements model establishes the attributes and competencies expected of all Army leaders. Leaders are responsible for upholding Army values and exercising the discipline necessary in combat as well as garrison to reflect those values to one another, to our citizenry, and to the world. We have learned to emphasize the responsibility for all leaders to influence beyond the chain of command, to operate in a “whole-of-government” approach to the Operational Environment and with our international partners. Increased attention has also been given to the requirement for resilience in leaders and leaders helping others deal with the stresses stemming from complex operations and recurring overseas deployments.

29. Senator CORNYN. General Dempsey, what specific skills that have fallen by the wayside over the past decade are in need of further development?

General DEMPSEY. To date, the Army has had the opportunity to only conduct one rotation at a CTC focused on FSOs against a Hybrid Threat, which is an insufficient number upon which to draw hard conclusions. However, that rotation indicates several areas within warfighting functions may need improvement. These warfighting functions include: Mission Command on the move, massing the effects of Intelligence, Surveillance, and Reconnaissance, fires, and maneuver at a decisive point, optimizing use of engineering assets for mobility, counter-mobility, and survivability, and operating away from protected fixed bases, such as Forward Operating Bases and Combat Outposts. Our next FSO rotations at CTCs are in August at the NTC, and in September at the JRTC. At these training rotations we’ll aggressively work to both validate our initial impressions and gain new insights into skills that have atrophied over the past decade.

ARMY END STRENGTH

30. Senator CORNYN. General Dempsey, in your advance policy response to the committee, you stated that it has taken the Army “10 years to achieve a size, structure, and capability that we can reasonably describe as balanced.” During this time, the Army has increased its Active-Duty end strength in order to meet current and future operational requirements. However, as part of his cost-saving initiatives, Secretary Gates has proposed reductions to the Army’s Active-Duty end strength of 22,000 soldiers by 2014, followed by an additional 27,000 soldiers beginning in 2015. Over the last 40 years, the Army has conducted two major post-conflict end strength reductions, first after the Vietnam War and then again after Operation Desert Storm. Given that we live in what some senior military leaders, including the current Chief of Staff of the Army and the current Secretary of the Army, refer to as an “era of persistent conflict,” how risky is it to reduce our Army’s end strength so soon?

General DEMPSEY. Assumptions about future demand for Army forces are critical to assessing potential implications associated with both end strength and force structure adjustments. DOD's assumption is that the drawdown in Iraq will continue, and that it will be completed by 31 December 2011. DOD also assumes that forces in Afghanistan will moderate to a sustainable level, in accordance with current administration policy. While we cannot predict with certainty when and where crises may occur, we do anticipate that in an era of persistent conflict, Army forces will continue to be required for a variety of missions. The Army does not anticipate that near-term future demands will reach a level of commitment seen in recent years, and we are in the process of conducting deliberate analysis to determine how and when to implement directed reductions. The Army will continue to ensure accomplishment of its assigned missions, improve operational readiness to meet future demands, and care for the well-being of its soldiers and their families.

31. Senator CORNYN. General Dempsey, extended deployments and the high operational tempo have put a substantial strain on our All-Volunteer Army, resulting in high rates of post-traumatic stress disorder, suicide, and alcohol and drug abuse, as well as other health issues within the force. The Army's increase in Active-Duty end strength was designed, in part, to mitigate these effects and allow for longer dwell-time between deployments. If conditions on the ground in Afghanistan do not allow for the administration's planned drawdown of U.S. troops by 2014, will the reduction of 22,000 soldiers to the Army's Active-Duty end strength have a negative impact on the quality and resiliency of our force?

General DEMPSEY. The additional 22,000 end strength has been an integral part of the Army's ability to meet the manning requirements of deploying units. The planned reduction is based on the assumption that the demand for Army forces will decline by the end of 2013. If that assumption proves to be inaccurate, the Army will re-evaluate its ability to meet the new demand and engage with the Secretary of Defense to determine the appropriate mitigation strategy to meet the new demand signal.

As far as quality and resiliency of the force, the Army will continue its efforts to retain soldiers with the greatest potential to serve and align them with our leadership development strategy. The Army's deliberate and responsible drawdown plans will take into consideration operational demands, individual and unit readiness, and sustainment of the All-Volunteer Force.

ARMY COMBAT BRIGADES IN EUROPE

32. Senator CORNYN. General Dempsey, the Pentagon reportedly intends to decide in the near future how many Army BCTs to keep in Europe, which could be as many as four or as few as two. Meanwhile, since 2002, two Germany-based BCTs have essentially been in limbo while the Pentagon debates their fate. It now appears unlikely that these units, which had been scheduled to return to the United States by 2013, will meet that deadline. One of these BCTs has been slated to relocate to Fort Bliss, TX, a post whose role in our national defense has increased greatly in recent years. At Fort Bliss, soldiers are afforded unparalleled training opportunities at its vast ranges, whose conditions accurately replicate those faced by soldiers in Afghanistan and Iraq. In addition, military quality of life at Fort Bliss is high, partly as a result of substantial Federal investment in its expansion. In your view, is delaying the return of these Army units from Europe the right course of action, given that our European allies have their own highly capable militaries?

General DEMPSEY. The National Security Strategy and the QDR affirm the importance of investing in the capacity of strong and capable states. These efforts further U.S. objectives of securing a peaceful and cooperative international order. The Army's forces represent the Nation's enduring commitment to the defense of Europe specified in the North Atlantic Treaty Organization's (NATO) Article 5, ensure a credible deterrent against all forms of aggression, and provide a robust capability to build Allied and partner capacity for coalition operations such as in Afghanistan. It must also be noted that the majority of nations contributing troops in support of the International Security Assistance Force, the NATO's largest and most complex out-of-area operation, come from NATO members. The relationships needed to support these types of operations can only be developed through long-term, sustained relationships achieved with American servicemembers stationed in Europe.

33. Senator CORNYN. General Dempsey, why are these Army BCTs still permanently stationed in Europe, and when will the Army bring them home?

General DEMPSEY. The Office of Secretary of Defense is currently reviewing the disposition of forces in Europe. A decision on the future posture in Europe is expected soon. Army forces in Europe will have better facilities for soldiers and families, access to better training facilities and ranges, and a consolidated footprint that will help U.S. Army Europe operate more cost effectively and efficiently.

PERMANENT CHANGE OF STATION POLICIES

34. Senator CORNYN. General Dempsey, current Army policy requires relatively frequent Permanent Change of Station (PCS) moves for most soldiers and their families. At a time when our military is being pressured to find ways to stretch each and every dollar and improve its fiscal stewardship, a thoughtful and sensible revision of the Army's PCS policies could potentially save millions of dollars annually, which the Army could use to meet other requirements. Requiring PCS moves every 5 or 6 years—instead of every 2 or 3—would also reduce the strain on military families. In so doing, you would enable many military spouses to pursue their own careers without facing frequent relocations, and you would ease the stress that frequent moves and school relocations puts on military children. Do you see any potential for the Army to rethink its current PCS policies to cut unnecessary expenses and improve the quality of life for military families?

General DEMPSEY. As a general rule, the Army does not require soldiers to move simply because they have remained at one location for a set number of years. Overseas moves are an exception, by the Office of the Secretary of Defense policy. They have established specific tour lengths based on environmental conditions in the overseas locations.

Two-thirds of all Army PCS moves result from accessions, separations, and professional development. The remaining third are used to distribute soldiers internal to the Army. They are used to maintain an acceptable match of skills and grades in units to meet operational requirements. Over the past 10 years the requirements for moves has accelerated by the need to meet the demands of filling deploying units. As demand for Army units decreases, we will work to increase the time on station for soldiers and families while maintaining the critical match of skills and grades across the Army.

[The nomination reference of GEN Martin E. Dempsey, USA, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
February 7, 2011.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment as the Chief of Staff, U.S. Army, and appointment to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., sections 601 and 2033:

To be General

GEN Martin E. Dempsey, 0000

[The biographical sketch of GEN Martin E. Dempsey, USA, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF GEN MARTIN E. DEMPSEY, USA

Source of commissioned service: USMA

Educational degrees:

U.S. Military Academy - BS - No Major

Duke University - MA - English

U.S. Army Command and General Staff College - MMAS - Military Arts and Sciences

National Defense University - MS - National Security and Strategic Studies

Military schools attended:
 Armor Officer Basic and Advanced Courses
 National War College
 U.S. Army Command and General Staff College

Foreign language(s): French

LTG	8 Sep 05
GEN	8 Dec 08

Major duty assignments:

From	To	Assignment
Jan 75	May 76	Platoon Leader, B Troop, 1st Squadron, 2d Armored Cavalry, U.S. Army Europe and Seventh Army, Germany
May 76 ...	Sep 77	Support Platoon Leader, 1st Squadron, 2d Armored Cavalry, U.S. Army Europe and Seventh Army, Germany
Sep 77	Jun 78	S-1 (Personnel), 1st Squadron, 2d Armored Cavalry, U.S. Army Europe and Seventh Army, Germany
Jul 78	Jan 79	Student, Armor Officer Advanced Course, U.S. Army Armor School, Fort Knox, KY
Apr 79	Jan 80	Motor Officer, 1st Squadron, 10th Cavalry, 4th Infantry Division (Mechanized), Fort Carson, CO
Jan 80	Oct 80	Commander, A Troop, 1st Squadron, 10th Cavalry, 4th Infantry Division (Mechanized), Fort Carson, CO
Oct 80	Jun 81	S-3 (Operations), 1st Squadron, 10th Cavalry, 4th Infantry Division (Mechanized), Fort Carson, CO
Jun 81	Jul 82	Commander, Headquarters and Headquarters Troop, 1st Squadron, 10th Cavalry, 4th Infantry Division (Mechanized), Fort Carson, CO
Aug 82 ...	May 84	Student, Duke University, Durham, NC
Jun 84	Jul 87	Instructor, later Assistant Professor, Department of English, U.S. Military Academy, West Point, NY
Aug 87 ...	Jun 88	Student, U.S. Army Command and General Staff College, Fort Leavenworth, KS
Jul 88	Sep 89	Executive Officer, 4th Battalion, 67th Armor, 3d Armored Division, U.S. Army Europe and Seventh Army, Germany
Sep 89	May 91	S-3 (Operations), later Executive Officer, 3d Brigade, 3d Armored Division, U.S. Army Europe and Seventh Army, Germany and Operations Desert Shield/Storm, Saudi Arabia
Jul 91	Jun 93	Commander, 4th Battalion, 67th Armor, 1st Brigade, 1st Armored Division, U.S. Army Europe and Seventh Army, Germany
Jul 93	Jun 95	Chief, Armor Branch, Combat Arms Division, Officer Personnel Management Directorate, U.S. Total Army Personnel Command, Alexandria, VA
Aug 95 ...	Jun 96	Student, National War College, Fort Lesley J. McNair, Washington, DC
Jul 96	Jul 98	Commander, 3d Armored Cavalry Regiment, Fort Carson, CO
Jul 98	Oct 99	Assistant Deputy Director for Politico-Military Affairs, Europe and Africa, J-5, The Joint Staff, Washington, DC
Oct 99	Aug 01	Special Assistant to the Chairman of the Joint Chiefs of Staff, The Joint Staff, Washington, DC
Sep 01	Jun 03	Program Manager, Saudi Arabian National Guard Modernization Program, Saudi Arabia
Jun 03	Oct 04	Commanding General, 1st Armored Division, U.S. Army Europe and Seventh Army Operation Iraqi Freedom, Iraq
Oct 04	Jul 05	Commanding General, 1st Armored Division, U.S. Army Europe and Seventh Army, Germany
Aug 05 ...	May 07	Commander, Multi-National Security Transition Command-Iraq/Commander, NATO Training Mission-Iraq, Operation Iraqi Freedom, Iraq
Aug 07 ...	Mar 08	Deputy Commander, U.S. Central Command, MacDill Air Force Base, FL
Mar 08 ...	Oct 08	Acting Commander, U.S. Central Command, MacDill Air Force Base, FL
Dec 08	Present	Commanding General, U.S. Army Training and Doctrine Command, Fort Monroe, VA

Summary of joint assignments:

Assignments	Date	Grade
Assistant Deputy Director for Politico-Military Affairs, Europe and Africa, J-5, The Joint Staff, Washington, DC	Jul 98–Oct 99	Colonel
Special Assistant to the Chairman of the Joint Chiefs of Staff, The Joint Staff, Washington, DC	Oct 99–Aug 01	Colonel
Commander, Multi-National Security Transition Command-Iraq/Commander, NATO Training Mission-Iraq, Operation Iraqi Freedom, Iraq	Aug 05–May 07	Lieutenant General
Deputy Commander, U.S. Central Command, MacDill Air Force Base, FL	Aug 07–Mar 08	Lieutenant General
Acting Commander, U.S. Central Command, MacDill Air Force Base, FL	Mar 08–Oct 08	Lieutenant General
Executive Officer, 3d Brigade, 3d Armored Division, U.S. Army Europe and Seventh Army, Operations Desert Shield/Storm, Saudi Arabia	Jan 91–Feb 91	Lieutenant Colonel
Commanding General, 1st Armored Division, U.S. Army Europe and Seventh Army, Operation Iraqi Freedom, Iraq	Jun 03–Oct 04	Brigadier General/ Major General
Commander, Multi-National Security Transition Command-Iraq/Commander, NATO Training Mission-Iraq, Operation Iraqi Freedom, Iraq	Aug 05–May 07	Lieutenant General

U.S. decorations and badges:

Defense Distinguished Service Medal (with Oak Leaf Cluster)
 Distinguished Service Medal (with Oak Leaf Cluster)
 Defense Superior Service Medal
 Legion of Merit (with two Oak Leaf Clusters)
 Bronze Star Medal with "V" Device
 Bronze Star Medal
 Meritorious Service Medal (with two Oak Leaf Clusters)
 Joint Service Commendation Medal
 Army Commendation Medal
 Army Achievement Medal (with Oak Leaf Cluster)
 Combat Action Badge
 Parachutist Badge
 Joint Chiefs of Staff Identification Badge

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by GEN Martin E. Dempsey, USA, in connection with his nomination follows:]

UNITED STATES SENATE
 COMMITTEE ON ARMED SERVICES

Room SR-228
 Washington, DC 20510-6050
 (202) 224-3871

COMMITTEE ON ARMED SERVICES FORM
 BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
 NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Martin E. Dempsey.

2. Position to which nominated:

Chief of Staff, U.S. Army.

3. Date of nomination:

7 February 2011.

4. Address: (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. Date and place of birth:

March 14, 1952; Jersey City, NJ.

6. Marital Status: (Include maiden name of wife or husband's name.)

Married to Diane Sullivan Dempsey.

7. Names and ages of children:

Christopher, 32.

Megan, 31.

Caitlan, 27.

8. Government experience: List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

None.

9. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

10. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member, Veterans of Foreign Wars.

Member, Association of U.S. Army.

11. Honors and awards: List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

None.

12. Commitment to testify before Senate committees:

I, Martin E. Dempsey agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate.

13. Personal views:

I, Martin E. Dempsey, agree, when asked before any duly constituted committee of Congress, to give my personal views, even if those views differ from the administration in power.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–E are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

MARTIN E. DEMPSEY.

This 1st day of February, 2011.

[The nomination of GEN Martin E. Dempsey, USA, was reported to the Senate by Chairman Levin on March 15, 2011, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on March 16, 2011.]

NOMINATION OF HON. LEON E. PANETTA TO BE SECRETARY OF DEFENSE

THURSDAY, JUNE 9, 2011

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:31 a.m., in room SD-G50, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Lieberman, Reed, Akaka, Nelson, Webb, McCaskill, Udall, Hagan, Begich, Manchin, Shaheen, Gillibrand, Blumenthal, McCain, Inhofe, Sessions, Chambliss, Wicker, Brown, Portman, Ayotte, Collins, Graham, and Cornyn.

Other Senators present: Senators Feinstein and Boxer.

Committee staff members present: Richard D. DeBobes, staff director; Leah C. Brewer, nominations and hearings clerk; and Travis E. Smith, special assistant.

Majority staff members present: Jonathan D. Clark, counsel; Jessica L. Kingston, research assistant; Michael J. Kuiken, professional staff member; Peter K. Levine, general counsel; Jason W. Maroney, counsel; Thomas K. McConnell, professional staff member; William G.P. Monahan, counsel; Michael J. Noblet, professional staff member; Russell L. Shaffer, counsel; and William K. Sutey, professional staff member.

Minority staff members present: David M. Morriss, minority staff director; Adam J. Barker, professional staff member; Daniel A. Lerner, professional staff member; Lucian L. Niemeyer, professional staff member; Michael J. Sistik, research assistant; and Richard F. Walsh, minority counsel.

Staff assistants present: Kathleen A. Kulenkampff, Brian F. Sebold, Bradley S. Watson, and Breon N. Wells.

Committee members' assistants present: Vance Serchuk, assistant to Senator Lieberman; Carolyn Chuhta, assistant to Senator Reed; Nick Ikeda, assistant to Senator Akaka; Ann Premer, assistant to Senator Nelson; Gordon Peterson, assistant to Senator Webb; Tressa Guenov, assistant to Senator McCaskill; Casey Howard, assistant to Senator Udall; Roger Pena, assistant to Senator Hagan; Lindsay Kavanaugh, assistant to Senator Begich; Joanne McLaughlin, assistant to Senator Manchin; Chad Kreikemeier, assistant to Senator Shaheen; Elana Broitman, assistant to Senator Gillibrand; Jeremy Bratt and Ethan Saxon, assistants to Senator Blumenthal; Anthony Lazarski, assistant to Senator Inhofe; Lenwood Landrum, assistant to Senator Sessions; Tyler Stephens,

assistant to Senator Chambliss; Joseph Lai, assistant to Senator Wicker; William Wright, assistant to Senator Brown; Brad Bowman, assistant to Senator Ayotte; Ryan Kaldahl, assistant to Senator Collins; Taylor Andrae, assistant to Senator Graham; Dave Hanke, assistant to Senator Cornyn; and Joshua Hodges, assistant to Senator Vitter.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody.

This morning, the committee meets to consider the nomination of Leon Panetta to be Secretary of Defense. Director Panetta is no stranger to testifying before Congress over the course of his long and distinguished career in public service. We welcome you to the committee today, and we thank you, Mr. Panetta, for your decades of dedicated service to our Nation and your willingness to answer the call once again.

We know your wife, Sylvia, is not able to be here with you today. She has made her own sacrifices over the last 50 years, supporting your efforts in both the public and private sector. I know that I speak for the committee when I say that we would love to thank her in person for the sacrifices that she has made. Director Panetta, please let your wife know of the committee's gratitude for her support and her sacrifice.

If confirmed, Director Panetta will replace Secretary Robert Gates at the helm of the Department of Defense (DOD). When President Obama asked Secretary Gates, then-President Bush's Secretary of Defense, to stay on in that position, it provided welcomed continuity and experience in our defense leadership. Director Panetta's nomination to be Secretary of Defense represents change, but brings an impressive level of continuity as well.

The next Secretary of Defense will face an extraordinarily complex set of demands on our Armed Forces. Foremost among them are the ongoing wars in Afghanistan and Iraq. Between these 2 conflicts, we continue to have approximately 150,000 troops deployed.

The U.S. military is also providing support to the North Atlantic Treaty Organization (NATO) operations in Libya. In addition, even after the extraordinary raid that killed Osama bin Laden, terrorist threats against our Homeland continue to emanate from Pakistan, Yemen, Somalia, and elsewhere.

The risk of a terrorist organization getting their hands on and detonating an improvised nuclear device or other weapon of mass destruction remains one of the gravest possible threats to the United States. To counter this threat, the Defense Department is working with the Departments of State, Energy, Homeland Security, and other U.S. Government agencies to prevent the proliferation of nuclear weapons, fissile materials, and dangerous technologies.

A number of key national security decisions will have to be made in the coming weeks and months. Even as the drawdown of U.S. forces in Iraq is on track, recent signs of instability may lead Iraq's political leadership to ask for some kind of continuing U.S. military presence beyond the December 31st withdrawal deadline agreed to

by President Bush and Prime Minister Maliki in the 2008 security agreement between our countries.

Another key decision point is looming in Afghanistan regarding reductions in U.S. forces starting in July. President Obama said the other day that, "It is now time for us to recognize that we have accomplished a big chunk of our mission and that it is time for Afghans to take more responsibility."

The President has also said that the reductions starting in July will be "significant" and not just "a token gesture". I support that decision. The more that Afghan leaders understand that we mean it when we say our commitment is not open-ended, the more serious they will be in preparing Afghan security forces to assume security responsibility for all of Afghanistan.

I support the so-called "transition strategy", which calls for Afghan security forces to take more and more of the lead in providing for their country's security. The more that Afghan security forces do that, the better are the chances of success because the Taliban's biggest nightmare is a large, effective Afghan Army, an army already respected by the Afghan people, in control of Afghanistan's security.

Having Afghan security forces in the lead would deprive the Taliban of their biggest propaganda target, the claim that foreign troops are occupiers of Afghanistan. There is nothing inconsistent between transitioning security responsibility to Afghan security forces and a long-term strategic relationship with Afghanistan, which is also important to sustaining a successful outcome.

Another major issue facing the Department is the stress on our Armed Forces after 10 years of nonstop war. The repeated deployments of our military over the last decade has resulted in many of our servicemen and women being away from their families and homes for two, three, four, or more tours. It is not only our force which is stressed, so are our military families.

Our incredible men and women in uniform continue to answer the call, but we must act to reduce the number of deployments and to increase the time between deployments.

The next Secretary of Defense will be required to juggle the competing demands on our forces while Washington struggles with an extremely challenging fiscal environment. The defense budget will not, and should not, be exempt from cuts. But this will require Congress, working with the next Secretary of Defense, to scrub every program and expenditure in the defense budget and to make tough choices and tradeoffs between the requirements of our warfighters today and preparations for the threats of tomorrow.

The administration in February submitted a defense budget for fiscal year 2012, which included some efficiency savings. But in April, President Obama announced he wanted to reduce security spending by \$400 billion over 12 years, starting in the next fiscal year, presumably including under the umbrella of security spending the budgets of the Pentagon, Departments of State and Homeland Security.

Now we have asked the administration what part of the \$400 billion reduction do they recommend be Pentagon cuts, and how many of those for fiscal year 2012? So far, we have received no answer.

Hopefully, today we will get Mr. Panetta's understanding of that matter and his opinion on the central fiscal issues. His service as President Clinton's Director of the Office of Management and Budget (OMB) is invaluable because he understands the inner workings of the budget process and because he shaped the decisions that helped achieve the budget surpluses of the late 1990s.

Fortunately for the Nation, Director Panetta brings a compelling record of achievement and experiences well suited to the demands of the position for which he has been nominated.

Leon Panetta has repeatedly demonstrated an ability to work across party lines. Since entering public service in 1966, he worked on the staff of the Republican Whip in the U.S. Senate, and headed the Office of Civil Rights in the Nixon administration. He later won election to the House of Representatives as a Democrat, where he served eight terms and became chairman of the House Budget Committee.

Throughout his time in public service, Leon Panetta has been guided by a clear moral compass. He has said, "In politics, there has to be a line beyond which you don't go—the line that marks the difference between right and wrong, what your conscience tells you is right. Too often," he said, "people don't know where the line is. My family, how I was raised, my education, all reinforced my being able to see that line."

Finally, Leon Panetta has been intimately involved in the most pressing national security issues of our time during his tenure as President Obama's Director of the Central Intelligence Agency (CIA). This includes his having personally overseen the manhunt for Osama bin Laden and the impressive operation that brought an end to al Qaeda's murderous leader.

This operation epitomizes the way in which the CIA and the Defense Department are finally working together to support each other in the counterterrorism operations. The assault on bin Laden's hideout is the first significant instance, I believe, of an operation that could have been conducted under Defense Department authorities under U.S. Code title 10 but that was instead executed under the authorities of title 50, with the Director of the CIA exercising operational control over our elite military force.

Now let me conclude by expressing, on behalf of this committee, our gratitude and our deep admiration for the man whose shoes Director Panetta has been nominated to fill, Secretary Robert Gates. Secretary Gates' service to the country has been extraordinary, having worked in the administration of eight Presidents.

He left the comfort and rewards of private life, following a long career in Government, to serve his country again in the critical post of President Bush's Secretary of Defense at a difficult time in our history. Throughout his tenure across the Bush and Obama administrations, Secretary Gates' leadership, judgment, and candor have earned him the trust and respect of all who have worked with him.

Secretary Gates has combined vision and thoughtfulness with toughness and clarity and courageous, firm decisionmaking. I would add that right from the start, Secretary Gates established a direct and open relationship with Congress, and this committee in particular, for which I am personally most grateful.

I believe history will judge Secretary Gates' time as Secretary of Defense to have been truly exceptional.
Senator McCain.

STATEMENT OF SENATOR JOHN MCCAIN

Senator MCCAIN. Thank you, Mr. Chairman.

Let me welcome Director Panetta and congratulate him on his nomination to be the next Secretary of Defense.

I am grateful for his remarkable career of public service and his willingness to serve in this new and very important capacity. I am appreciative of your family and the support they have given to you.

Let me also welcome our colleagues from California today, who will shortly underscore your extraordinary qualifications to assume the position of Secretary of Defense.

Your successes as Director of the CIA over the last 2 years, and there have been many, especially finding and eliminating Osama bin Laden, are a credit to you, and to the men and women of the Intelligence Community. At the same time, you and I know the director would be the first to admit that he has big shoes to fill, if confirmed, in the person of Robert Gates.

I have seen many Secretaries of Defense in my years, and I believe that history will long remember Secretary Gates as one of America's finest, most effective, and most impactful Secretaries of Defense.

One of the key criteria that we should be looking for in the next Secretary of Defense is continuity—the continuation of the wise judgment, policies, and decisionmaking that have characterized Secretary Gates' leadership of DOD. Thanks to the good work of Secretary Gates, his team, and our men and women in uniform, the next Secretary of Defense will take office with a great deal of positive momentum. But many consequential challenges remain.

Indeed, over the next several years, our country faces decisions related to our national security and defense that will echo for decades to come, decisions that will determine whether we remain the world's leading global military power, able to meet our many commitments worldwide, or whether we will begin abandoning that role.

What will have perhaps the most impact on this outcome is the President's stated goal of cutting \$400 billion in defense spending by 2023, on top of the \$178 billion in efficiencies in top line reductions that Secretary Gates has already announced.

In recent weeks, Secretary Gates has been sounding the alarm against misguided and excessive reductions in defense spending that cut into the muscle of our military capabilities. I could not agree with him more. Defense spending is not what is sinking this country into fiscal crisis. If Congress and the President act on that flawed assumption, they will create a situation that is truly unaffordable—the decline of U.S. military power.

I know there will be cuts to defense spending, and some reductions are no doubt necessary to improve the efficiency of DOD. But I also remember, and I think you do also, Director Panetta, when General "Shy" Meyer, then Chief of Staff of the Army, who warned in 1980 after draconian cuts were made, testified before this committee that we had a "hollow army".

That is not an experience that we can or should repeat in the years to come. We must learn the lessons of history. I would welcome the nominee's opinion on this vital matter, including how the President's proposal could be implemented.

Another major decision involves how we achieve our objectives in the three conflicts in which U.S. forces are now engaged—Iraq, Afghanistan, and Libya. In Iraq, the key question now is whether some presence of U.S. forces will remain in Iraq beyond the end of this year, pending Iraqi request and approval, to support Iraq's continuing needs and our enduring national interests. I believe such a presence is necessary, as Secretary Gates has argued.

In Afghanistan, the main question is the size and scope of the drawdown of forces beginning this July. Here, too, I would agree with Secretary Gates that any drawdown should be modest, so as to maximize our ability to lock in the hard-won gains of our troops through the next fighting season.

Finally, in Libya, there are signs that Gaddafi may be starting to crack, but the odds of a stalemate remain far too high. I believe U.S. strategy should be to reduce those odds as much as possible and quickly force Gaddafi to leave power, rather than hoping we achieve that objective with minimal effort.

Another significant challenge facing the Defense Department is acquisition reform for its weapons and services. Secretary Gates has made some courageous decisions in attempting to get major weapons procurement programs on track. A similar focus needs to be brought to how the Defense Department chooses to buy billions of dollars in services to maintain the highest degree of readiness.

In addition, especially in this budget environment, it will be important to continue to eliminate weapons programs that are over cost, behind schedule, and not providing improvements in combat power and capabilities. After 10 years of war, we must continue to eliminate every dollar in wasteful spending that siphons resources away from our most vital need—enabling our troops to succeed in combat.

Director Panetta, you are nominated to lead our Armed Forces amid their 10th year of sustained overseas combat. Not surprisingly, this has placed a major strain on our forces and their families. Yet, our military is performing better today than at any time in our history.

This is thanks to the thousands of brave young Americans in uniform who are writing a new chapter in the history of our great country. They have shown themselves to be the equals of the greatest generations before them.

The calling that all of us must answer in our service is to be equal and forever faithful to the sacrifice of these amazing Americans.

Mr. Chairman, Senator Inhofe has to leave, and he would like to make just a very brief 10-second comment.

Senator INHOFE. Yes, thank you, Senator McCain.

I only want to say that because of an unavoidable conflict, I have to leave. But I was honored to serve for 8 years with then-Congressman Panetta, and I have always considered him to be a very close friend.

I look forward to supporting his confirmation and serving with him in his new capacity.

Thank you for the opportunity to say that.

Chairman LEVIN. Thank you very much, Senator Inhofe.

We have our two wonderful colleagues from California here to introduce Director Panetta, and we are delighted to have both of you here and to have you as colleagues. It is a treat for all of us that you are with us.

Senator Feinstein?

Who, by the way, is also chair, may I say, of the Senate Intelligence Committee, so she has a lot of very direct experience now and long before with Director Panetta.

STATEMENT OF HON. DIANNE FEINSTEIN, U.S. SENATOR FROM THE STATE OF CALIFORNIA

Senator FEINSTEIN. Thank you very much, Mr. Chairman and members of the committee.

It is really a distinct pleasure for me to introduce the Director of the CIA and distinguished Californian, Leon Panetta, who was nominated by President Obama on April 28 to be the 23rd Secretary of Defense.

As members of this committee well know, in his 47 years of public service, Director Panetta has held the positions of congressman, chairman of the House Budget Committee, Director of OMB, Chief of Staff to the White House, Co-Director with his wife of the Leon and Sylvia Panetta Institute for Public Policy—which I have had the pleasure of speaking before—member of the Iraq Study Group, Director of the CIA, and from 1964 to 1966, a second and then a first lieutenant in the U.S. Army as an intelligence officer.

I would add to that list trusted adviser to the President and respected member of his national security team. In the course of 2 years as Director, he has mastered the intelligence field, led the CIA through a very tumultuous time, restored badly damaged relationships with Congress and with the Director of National Intelligence, and carried out President Obama's personal instruction to him to find Osama bin Laden.

I have no doubt that his past experience and his capabilities prepare Leon Panetta to meet the major challenges before DOD. With knowledge of CIA operations and analysis, he will come to the Pentagon with a thorough understanding of the situation in Afghanistan, as well as the aggravating factors of our relationship with Pakistan. Through CIA analysis and operations, he is also well aware of the other contingencies around the globe where the U.S. military may be called to deploy.

Director Panetta is also well positioned to guide the Department through the constrained budget environment, which the chairman spoke of, along with the rest of Government. He possesses the credentials and experience to make cuts where needed and where prudent. I am confident that he will do so in a way that keeps the military strong and capable and in a way that maintains the cohesion of the Department and its Services.

Finally, let me recognize that there are many officials in the Government with the intellect and management skill to do this job. Leon brings something more. He has an interesting leadership

style, with a deft personal touch that really matters to the people in his charge and that greatly benefits the oversight responsibility that we in Congress have.

Let me give you an example. It was early in his tenure at the CIA in 2009 when Director Panetta requested an urgent meeting with the Senate Intelligence Committee to brief us on a program that he had just learned of and that he had learned had never before been briefed to Congress. He found that unacceptable, and we very much appreciated his position.

In the 2 years since, he has never declined to answer a question or provide us with his candid views. I believe the vice chairman of the committee, who is a member of this committee, Senator Chambliss, can testify to this. Leon has been completely forthright and motivated only by what is best for the CIA and, more importantly, this Nation.

Let me conclude. A National Public Radio interview last week with Secretary Gates noted that the healthcare budget of DOD was bigger than the entire budget of the CIA and that no other position can fully prepare someone to be Secretary of Defense.

I have great respect for Secretary Gates and praise him for his service to this country. Beyond all reasonable expectations, he has been an outstanding Secretary of Defense. But I would suggest to you that Leon Panetta, who has served honorably and successfully in Congress, at OMB, at the White House, and now the CIA, is prepared and uniquely qualified to be another outstanding Secretary of Defense in this very challenging time.

I thank the committee.

Chairman LEVIN. Thank you very much, Senator Feinstein, for a very strong introduction.

Now, Senator Boxer?

STATEMENT OF HON. BARBARA BOXER, U.S. SENATOR FROM THE STATE OF CALIFORNIA

Senator BOXER. Thank you so much.

I clearly appreciate every word that my colleague Senator Feinstein said about my friend Leon Panetta. What I am going to try to do is add a little bit more of a personal side because I have known this man and worked with him since 1982, when I was elected to Congress, and he became one of my mentors at that time.

Eventually, I served on the House Budget Committee where he was the chairman, and I watched him very carefully reach out across every kind of line that would divide us—Republican, Democratic, liberal, conservative, moderate. We were facing at that time a lot of new, perplexing issues.

One was the AIDS crisis. No one quite knew where this was headed, what it was about. I remember going to Leon and saying there is this new disease, and nobody quite understands it, and we haven't done anything about it. He said, "You know, why don't you hold some hearings on it? It seems to really concern you, and bring in the Republicans," and we did.

We were able to get the very first funding in that time for AIDS research because Leon was willing to listen. This is someone who is very smart, and he gets it. But he also was willing to listen to

all sides, and I think we have seen that in every single job that he has fulfilled. This is a man who has dedicated himself to public service, and we are so grateful to him.

I won't go through every job he has held. First of all, it would take too much time. Second of all, Senator Feinstein highlighted so many of those. But to be someone who could work as effectively behind the scenes as you can in front of a camera, to be someone who could be such a trusted adviser that two Presidents have chosen him.

I could just go on about Leon. I am sure you don't want me to because you have a lot of work to do. Let me say for the people of California what he has meant to us.

He has recognized the importance of our resources in our State, namely our coast and our ocean. He stepped out in front in the early years and said this is an economic issue for us, and he preserved that coast. That is forever. That Monterey sanctuary is forever. He is visionary.

Then when we saw him move into the national security arena, as he did at the CIA, and the work he did in the latest achievement that he can talk about, and doesn't really do that much, in terms of making sure that Osama bin Laden was finally taken out. This was a brave mission by our military, and Leon Panetta was a part of the decisionmaking.

I think at this time where we are engaged around the world in so many difficult conflicts, so many difficult conflicts, he is bringing now the intelligence perspective to the job.

I would ask unanimous consent that my formal statement be printed in the record.

I just want to turn to Leon at this time, just as a Senator from California and a friend, and say thanks so much for everything you have done throughout your career for this country. I know your origins. I know how proud your family is, and I think we all share that pride in you.

Good luck, and I hope the committee confirms you quickly.

Thank you very much.

[The prepared statement of Senator Boxer follows:]

PREPARED STATEMENT BY SENATOR BARBARA BOXER

Mr. Chairman and colleagues—good morning.

I am so very pleased to be here today to introduce my former colleague and fellow Californian, Leon Panetta, President Obama's nominee to be Secretary of Defense.

I can think of no better person to fill this critical post at a time when our Nation continues to face threats to our national security.

Mr. Panetta has devoted 4 decades of his life to public service. During that time, he has earned the trust and confidence of his colleagues on both sides of the aisle.

The son of Italian immigrants, Mr. Panetta was born and raised in the city of Monterey, CA.

Shortly after earning his bachelor and law degrees from Santa Clara University, Mr. Panetta joined the U.S. Army as an intelligence officer and went on to receive the Army Commendation Medal for his service.

Mr. Panetta came to Washington in 1966 and rose to become the Director of the U.S. Office for Civil Rights, where he fought for the desegregation of public schools even as other government officials were calling for slower enforcement of civil rights laws in the south.

Mr. Panetta does what he thinks is right, and I saw him bring that same strength and passion to his work as a Member of the House of Representatives, where I am proud to have served with him.

He was my chairman of the House Budget Committee and together we worked on the first ever funding to fight AIDS.

Among his many accomplishments, Mr. Panetta authored the Hunger Prevention Act of 1988, worked to extend Medicare and Medicaid to cover hospice care for the terminally ill, and was a critical voice in protecting California coastlines.

As the Director of the Office of Management and Budget during the Clinton administration, Mr. Panetta learned the intricacies of the Federal budget process and, most importantly, how to effectively set and manage a budget.

He also served as President Clinton's Chief of Staff, engaging at the highest levels on critical national security matters.

For the past 2 years, Mr. Panetta has served as Director of the Central Intelligence Agency, where he has been responsible for protecting Americans around the world. Most recently, he oversaw the covert mission that located and killed Osama bin Laden, the founder of al Qaeda and mastermind behind the horrific attacks of September 11, 2001.

Bin Laden's death was the result of close coordination between our military and intelligence communities and Mr. Panetta's deep understanding of our Intelligence Community will be particularly beneficial in this new role.

I think it is clear that Mr. Panetta has the unique experience needed to serve our Nation at this critical time and I know he will continue to work tirelessly to keep America safe.

Mr. Chairman, thank you for this opportunity to speak on behalf of Mr. Panetta. I hope that he will get a favorable vote from your committee.

Chairman LEVIN. Thank you, Senator Boxer, for a very moving introduction and tribute.

You are both welcome to stay or leave. I know you both have committee chairs that you have to fulfill responsibilities.

Senator BOXER. I have a bill on the floor. By the way, we do have a bill on the floor about the Economic Development Act, and I want to remind everybody. So I will be going down on the floor.

Thank you.

Chairman LEVIN. You never miss an opportunity to make your point effectively. [Laughter.]

Thank you very much.

Let me now call on Mr. Panetta. After your opening statement, we will ask you the usual questions and then turn to our questions.

Thank you very much again for your service. Director Panetta?

**STATEMENT OF HON. LEON E. PANETTA, NOMINATED TO BE
SECRETARY OF DEFENSE**

Mr. PANETTA. Thank you very much, Chairman Levin, Ranking Member McCain, all of the distinguished members of the committee.

I am deeply honored and deeply humbled to be here as the President's nominee to be Secretary of Defense.

I also want to take this moment to thank my fellow Californians, Senators Feinstein and Boxer, who are not only distinguished Senators who have represented their State well, but are dear friends and dear colleagues.

The role of Secretary of Defense, while, without question, it involves a very large responsibility in size alone, still in a very basic way is similar to the role of the CIA Director in that our first and foremost mission is to protect the country. If confirmed, my number one job will be to ensure that America continues to have the best-trained, the best-equipped, and the strongest military in the world in order to make sure that we protect our country.

As many of you know, I have devoted my career to public service. But it began a long time ago when I served as an intelligence offi-

cer in the U.S. Army. I was proud to wear the uniform of our country, and my respect and my admiration for our Nation's Armed Forces has only grown in the decades since.

My youngest son, Jim, served in Afghanistan and received the Bronze Star. I have personally witnessed the tradition of service and sacrifice that drives each generation to fulfill a fundamental duty to our country.

In addition to respecting that great tradition of duty, I have done a number of things to try and prepare for this very difficult and challenging job. First, in the weeks since my nomination, I spent a number of hours with Bob Gates. Bob is a dear friend, and he and I first got to know each other as we were building our careers in public service.

We also served together on the Iraq Study Group, and we continue to serve together as members of the President's national security team. We share a common belief that the national security of this country is the responsibility of all Americans, regardless of party.

I, too, believe that he will be remembered as one of the greatest Secretaries of Defense in our Nation's history for the way he led the Department during a time of war and for the crucial reforms that he has tried to put in place in the way the Pentagon does business. Those are reforms that I intend to carry on.

Second, I talked with our Service Secretaries and the Service Chiefs. I believe it is important to have a candid, open line of communication between the Secretary and all of the Service Chiefs. They are the ones that are out there leading each of their Services, and I need to know what they are thinking, and I need to know what is important in terms of serving the interests of the troops that they directly lead.

One of those chiefs told me for our troops, there has been no shortage of war. Indeed, we are a Nation at war. Our All-Volunteer Force has been stretched by combat that has lasted nearly a decade. We owe it to them, we owe it to their families to ensure that they have the best leadership, the best training, the best equipment, the best benefits, and the best healthcare that we can give them.

I pledge to them and I pledge to you that every deployment decision that I make will be mindful of the stresses on our men and women in uniform and on their families.

Third, I have reached out to the former Secretaries of Defense, both Democrat and Republican, and asked for their advice. To a person, they impressed upon me how important it was to stay focused on the management of the Pentagon. This is the biggest enterprise in our Government, and it requires focused, hands-on management, which is, frankly, the only way I know how to do business.

Fourth, I have sat down with many of you and have known many of you throughout my career. Because I really do believe that Congress has to be a partner in this role in the protection of our country, I am a creature of Congress and I believe that the Pentagon is made stronger by your oversight and by your guidance.

As a young legislative assistant a long time ago here in the Senate, I had the honor of seeing firsthand the bipartisanship of lead-

ers like Dick Russell and Henry Jackson, John Stennis, and Barry Goldwater. As a Member of Congress, I saw that tradition carried on by other great leaders.

I believe deeply in the tradition of strong, bipartisan national security leadership. You, Mr. Chairman, and you, Senator McCain, have carried on that tradition. I thank you for that.

This is a time of historic change. Unlike the Cold War, when we had one main adversary, we face a multitude of challenges—al Qaeda and other global terrorist networks, places like Yemen, Somalia, North Africa, not just the Federally Administered Tribal Areas (FATA) in Pakistan. Dangerous enemies spread out across the world.

We face insurgents and militants who cross borders to conduct attacks. We face the proliferation of dangerous weapons in the hands of terrorists, in the hands of rogue nations. We face cyber attackers, a whole new arena of warfare that can take place not only now, but in the future, and something we have to pay attention to.

We face the challenge of rising and changing powers and nations in turmoil, particularly in the Middle East, undergoing enormous political transformation. We are no longer in the Cold War. This is more like the “blizzard war”, a blizzard of challenges that draw speed and intensity from terrorism, from rapidly developing technologies, and the rising number of powers on the world stage.

But despite the times we live in, there is reason to be confident. The operation that killed Osama bin Laden, in my view, has not only made clear to the world that we will do what we have to do, but it has also given us the greatest chance since September 11 to disrupt, dismantle, and to defeat al Qaeda.

But to do that, to be able to finish the job, we have to keep our pressure up. If confirmed, my first task at DOD will be to ensure that we prevail in the conflicts that we are engaged in. In Afghanistan, we must continue to degrade the Taliban. We have to train security forces. We have to help the government take ownership of their country so that they can govern and protect their country.

In Iraq, we must assure that the Iraqi military and security forces are prepared to safeguard their nation so that it can become a stable democracy in a very important region of the world.

As we do that, I am very aware that we must be highly disciplined in how we spend the taxpayers’ precious resources. This committee well knows that the days of large growth and unlimited defense budgets are over. Our challenge will be to design budgets that eliminate wasteful and duplicative spending while protecting those core elements that we absolutely need for our Nation’s defense.

I do not believe, based on my long experience in government and working with budgets, that we have to choose between strong fiscal discipline and strong national defense. I don’t deny that there are going to be tough decisions that have to be made and tough choices that have to be made. But we owe it to our citizens to provide both strong fiscal discipline and a strong national defense.

Finally, and most importantly, it is the job of Secretary of Defense to be a tireless advocate for our troops and for their families. It is their sacrifice and their dedication that have earned the re-

spect of a grateful nation and inspired a new generation to volunteer to wear the uniform of our country.

They put their lives on the line to fight for America, and I will just as surely fight for them and for the families who support and sustain them.

As Director of the CIA, I had no more solemn duty than sending young people into harm's way to put their lives on the line. After we lost seven of our colleagues in Afghanistan in December 2009, I had to do what my colleagues in the military do all too often—visit the wounded at Bethesda, attend the ramp ceremony at Dover, offer a prayer at the side of an Arlington Cemetery gravesite for a patriot who left this world too young.

Not one day will pass when I don't think of the brave souls who have fought and died and those who fight today for our freedom. As Secretary Gates emphasized in his last trip to the troops, they will always be in my thoughts and prayers.

If confirmed, Mr. Chairman, I pledge to you that I will always keep our troops foremost in my mind, that I will be a careful, accountable steward of our Nation's precious resources, that we will have the strongest national defense in the world, and that you will always have my best and most candid advice, and that I will always, always seek yours.

I am the son of Italian immigrants. My father used to say to me time and time again that to be free, we have to be secure. That is the pledge that I make to you, that I will do everything I can to keep America secure so that it can be free. I will do that if I am confirmed as Secretary of Defense.

Thank you.

[The prepared statement of Mr. Panetta follows:]

PREPARED STATEMENT BY HON. LEON E. PANETTA

Chairman Levin, Ranking Member McCain, and distinguished members of the committee.

I am humbled to be here as the President's nominee to be Secretary of Defense. The role of the Secretary of Defense is similar to the role of the Central Intelligence Agency (CIA) Director—first and foremost to protect the country. If confirmed, my number one job will be to ensure that America continues to have the best-trained, best-equipped, and strongest military in the world.

I have devoted my career to public service—and it began when I served as an intelligence officer in the U.S. Army. I was proud to wear the uniform of my country—and my respect and admiration for our Nation's Armed Forces have only grown in the decades since. My youngest son Jim served in Afghanistan and received the Bronze Star. So I have personally witnessed the tradition of service and sacrifice that drives the generations to fulfill a duty to our country.

In addition, I have done a number of things to try and prepare for this job.

First, in the weeks since my nomination, I have spent a number of hours with Bob Gates. Bob and I first got to know each other as we were building our careers in public service. We also served together on the Iraq Study Group. We share a common belief that national security is the responsibility of all Americans, regardless of party. I believe he will be remembered as one of the greatest Secretaries of Defense in our Nation's history for the way he led the Department during a time of war, and for the crucial reforms he made in the way the Pentagon does business—reforms that I intend to carry on.

Second, I talked with the Service Secretaries and the Service Chiefs—I believe it is important to have candid, open lines of communication between the Secretary and the Services. One of those chiefs told me, "For our troops, there is no shortage of war."

Indeed, we are a Nation at war. Our All-Volunteer Force has been stretched by combat that has lasted nearly a decade. We owe it to them and their families to ensure that they have the best leadership, the best training, the best equipment,

the best benefits and health care that we can give them. I pledge to them and I pledge to you that every deployment decision I make will be mindful of the stresses on our men and women in uniform and their families.

Third, I reached out to every living former Secretary of Defense—Democrat and Republican—and asked for their advice. Fourth, I sat down with many of you—because Congress is my partner in this role and in the protection of the country. I'm a creature of Congress and I believe that the Pentagon is made stronger by your oversight. As a young legislative assistant, I had the honor of seeing firsthand the bipartisanship of leaders like Dick Russell, Henry Jackson, John Stennis, and Barry Goldwater. I believe deeply in the tradition of strong bipartisan national security leadership that you and this committee carry on.

This is a time of historic change. Unlike the Cold War, when we had one main adversary, today we face a multitude of challenges—al Qaeda and other global terrorist networks, insurgents and militants who cross borders, the proliferation of dangerous weapons, cyber attackers, rising and changing powers, and nations—particularly in the Middle East—undergoing enormous political transformation.

We are no longer in the Cold War. This is the Blizzard War—a blizzard of challenges that draws speed and intensity from rapidly developing technologies and the rising number of powers on the world stage.

But, despite the times we live in, there is reason to be confident. The operation that killed Osama bin Laden, in my view, has given us the greatest chance since September 11 to disrupt, dismantle, and defeat al Qaeda permanently. We must keep up the pressure.

If confirmed, my first tasks at the Department of Defense will be to ensure that we prevail in the conflicts in which we are now engaged. In Afghanistan, we must continue to degrade the Taliban, train the security forces, and help the government take ownership for the country's progress and security. In Iraq, we must assure that the Iraqi military and security forces are prepared to safeguard their nation.

As we do that, I am very aware that we must be highly disciplined in how we spend the taxpayer's precious resources. This committee well knows: the days of unlimited defense budgets are over. Our challenge will be to design budgets that eliminate wasteful and duplicative spending while protecting those core elements we need for our Nation's defense. I do not believe that we have to choose between strong fiscal discipline and strong national defense. We owe it to our citizens to provide both.

Finally, it is the job of the Secretary of Defense to be a tireless advocate for our troops and their families. It is their sacrifice and dedication that have earned the respect of a grateful nation . . . and inspired a new generation to wear the uniform of our country. They put their lives on the line to fight for America, and I will just as surely fight for them and for the families who support and sustain them.

As Director of the CIA, I had no more solemn duty than sending young people into harm's way. After we lost seven of our colleagues in Afghanistan in December 2009, I had to do what my colleagues in the military do all too often—visit the wounded at Bethesda, attend the ramp ceremony at Dover, and offer a prayer at the side of an Arlington Cemetery grave for a patriot who left this world too young.

Not one day will pass when I won't think of the brave souls who fight for our freedom.

If confirmed, Mr. Chairman, I pledge to you that I'll always keep our troops foremost in my mind . . . that I will be a careful, accountable steward of our national resources . . . that we will have the strongest national defense in the world . . . and that you'll always have my best and candid advice. To be free, we must be secure. That is my pledge to you if I am confirmed as Secretary of Defense.

Chairman LEVIN. Thank you so much, Director Panetta, for a powerful, moving, and a very straightforward statement.

We have standard questions, which we ask of nominees before we take turns at asking our own questions, and I will put those questions to you now.

Have you adhered to applicable laws and regulations governing conflicts of interest?

Mr. PANETTA. Yes, I will.

Chairman LEVIN. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Mr. PANETTA. Yes, I will.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation progress?

Mr. PANETTA. No, I have not.

Chairman LEVIN. Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Mr. PANETTA. Yes, I will.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

Mr. PANETTA. Yes, I will.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Mr. PANETTA. Yes, they will.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify upon request before this committee?

Mr. PANETTA. Yes, I will.

Chairman LEVIN. Finally, do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good-faith delay or denial in providing such documents?

Mr. PANETTA. Yes, I will.

Chairman LEVIN. Thank you.

I think what we will do is we will be here all morning, and then we will have a break for lunch. Then we are going to go into a classified session this afternoon.

Let us start with a 7-minute first round here for questions.

Director Panetta, in answer to prehearing questions, you said that you support the July 2011 date set by President Obama for the beginning of a process of transferring increasing responsibility for Afghanistan's security to the Afghan security forces and of drawing down U.S. forces from Afghanistan. President Obama recently said that the size of U.S. troop reductions from Afghanistan will be significant.

Director Panetta, do you agree that the U.S. troop reductions from Afghanistan beginning in July should be significant?

Mr. PANETTA. I agree with the President's statement.

Chairman LEVIN. There are approximately 100,000 more Afghan soldiers and police today than there were in December 2009. The NATO training mission in Afghanistan is ahead of schedule in meeting the target of 305,000 Afghan security forces by this fall.

In addition, a new target of 352,000 Afghan security forces by 2012 has been set to ensure that these forces have the specialized skills needed to sustain these units over the long term, and I very much support that decision. Do you agree, Director Panetta, that training and partnering with the Afghan army and police and getting those forces in the lead on operations is key to the success of our counterinsurgency strategy in Afghanistan?

Mr. PANETTA. Yes, I do.

Chairman LEVIN. Now, Pakistani leaders deny being aware of the presence of Osama bin Laden in Abbottabad. It is counterintuitive to believe that none of their leaders knew of it. But nonetheless, that is not my question.

Pakistan's leaders are well aware and acknowledge their awareness of the sanctuaries in Pakistan by the Haqqani network and the Afghan Taliban down in Quetta. Now those people are attacking our troops, Afghan troops, coalition troops across the border in Afghanistan and then go back to their sanctuary in Pakistan.

A recent Defense Department report called the extremist Haqqani network "the most significant threat in eastern Afghanistan," and yet the Haqqanis continue to enjoy open safe haven across the border in Pakistan. I think this is a totally unacceptable situation. I am wondering if you agree, and if so, what should be done about it?

Mr. PANETTA. Senator, I share your concern with regards to the safe haven in Pakistan, particularly as it relates to groups like the Haqqanis. I have strongly urged those in Pakistan to take steps to do whatever they can to prevent these kind of cross-border attacks and to prevent the safe havens that do exist on the Pakistani side of the border.

This is a difficult challenge. The relationship with Pakistan is at the same time one of the most critical and yet one of the most complicated and frustrating relationships that we have. It is extremely critical in that we are conducting a war against our primary enemy in the FATA in their country.

It is critical because supply lines, vital supply lines go through their country. It is critical because they are a nuclear power, and there is a danger that those nukes could wind up in the wrong hands.

At the same time, it is very complicated, complicated by the fact that they maintain relationships with certain terrorist groups, that they continue to not take aggressive action with regards to these safe havens, and that their concern about the sovereignty results in criticism of the United States when, in fact, my view is that the terrorists in their country are probably the greatest threat to their sovereignty.

Having said all of that, we have to maintain the relationship. We have to do everything we can to try to strengthen that relationship so that both of us can work to defend both of our countries.

Chairman LEVIN. Director Panetta, as I mentioned in my opening statement, the President has called for \$400 billion in reductions to national security spending over the next 12 years. Now do you have any understanding of the proposed breakdown of that \$400 billion as to how much he is proposing for reductions in Pentagon spending, how much in intelligence spending, the intelligence organizations, and how much he is proposing to reduce in the Homeland Security Department?

Mr. PANETTA. No, I do not.

Chairman LEVIN. Can you try to find that out for us? Because we need to find that out, and give us an answer for the record.

Mr. PANETTA. I will certainly ask whether or not that decision has been made.

[The information referred to follows:]

The administration has not made final decisions concerning the specific details on the \$400 billion reduction.

Chairman LEVIN. Do you know whether we are going to receive a budget amendment for the fiscal year 2012 DOD budget?

Mr. PANETTA. I do not know the answer to that.

Chairman LEVIN. All right. On the question of torture, you, in your answers to the committee's prehearing policy questions, said the following, "I will ensure that all interrogations conducted by DOD personnel are conducted consistent with the Army Field Manual and in accord with the Geneva Conventions."

My question, is waterboarding consistent with the Army Field Manual and the Geneva Conventions?

Mr. PANETTA. I have taken the same position as the President of the United States. I believe that waterboarding crosses the line, the use of that tactic with regards to interrogations. The President outlawed the use of that, plus other enhanced interrogation techniques, in an Executive order that he issued when he first came into the presidency.

Chairman LEVIN. I need to switch gears here on you a lot because time requires that we do that. Senator Webb and I recently went to Okinawa, Guam, and Senator Webb was in Korea before. Senator McCain obviously has great personal experience in this area as well. Senator McCain, Senator Webb, and I proposed changes to basing plans on Okinawa and Guam. We urged a review of the plans in Korea because we believe that the current plans are unrealistic, unworkable, and unaffordable.

Then, independently, the Government Accountability Office (GAO) concluded that the cost of these military realignments are higher than expected and in many cases largely unknown, a highly critical GAO report of this direction that we are currently moving. I am wondering whether or not you are familiar with this issue. If confirmed, in any event, whether you are familiar with these issues or not in those three places, will you agree to review this matter and work with us to find a solution that helps advance our strategic objectives in the region.

Because we have strategic objectives in the region, but they are currently unaffordable. They are unknown in terms of cost. Would you be willing to review this matter and to work with us?

Mr. PANETTA. Yes, I will, Senator. You discussed this with me when I met with you, and also Senator Webb discussed his concerns about that area. I agree with you that it is a very important strategic area for the United States. We do have to maintain a presence there.

But there are a lot of issues to be resolved and worked on, and I look forward to working with you, Senator McCain, Senator Webb, and others to try to determine what the best and most cost-effective approach would be.

Chairman LEVIN. Thank you.

Senator McCain.

Senator MCCAIN. Thank you very much, Mr. Chairman.

Thank you, Director Panetta.

What is your assessment of the battlefield situation in Afghanistan since we inaugurated the surge?

Mr. PANETTA. I think the assessment is that we have made progress with regards to security in that country. Albeit fragile and reversible, I nevertheless believe that progress has been made to try to advance security.

We also have made good progress in training the forces there in Afghanistan, both their police and military force. I think the area where, frankly, greater progress needs to be made is on the governance side, to try to ensure that they improve their governance so that, ultimately, they can take responsibility for that country.

Senator MCCAIN. When you point out that it is fragile and reversible, I think that is absolutely accurate. So you would agree with Secretary Gates' repeated statements that withdrawals in July should be modest?

Mr. PANETTA. I agree that they should be conditions based, and I am going to leave it up to Secretary Gates, General Petraeus, and the President to decide what that number should be.

Senator MCCAIN. If you are the Secretary of Defense when that decision is made, obviously, you will have significant influence. You just came from a position where you have a very good assessment of the military situation. I think it is not inappropriate for you to answer when I ask if you agree with Secretary Gates' assessment that the withdrawal should be modest.

Mr. PANETTA. Senator, if I am confirmed, I will have to, obviously, arrive at a decision myself that I will have to ultimately present to the President. But I am not in that position now, and that decision really does rest with General Petraeus, Secretary Gates, and the President.

Obviously, I have tremendous admiration for Secretary Gates. He and I pretty much walk hand-in-hand on these issues. But with regards to specific numbers, I just am not going to—

Senator MCCAIN. I wasn't asking for specific numbers. On the subject of Iraq, if the Iraqi Government and all its elements agree that there should be a residual U.S. military presence in Iraq, particularly in three areas—air defenses, intelligence capability, and security in the areas around Kirkuk and that part of Iraq where there has been significant tensions—would you agree that that would be a wise thing for us to do?

Mr. PANETTA. I believe that if Prime Minister Maliki and the Iraqi Government requests that we maintain a presence there, that ought to be seriously considered by the President.

Senator MCCAIN. Do you think it would be in our interest to do that, given the situation?

Mr. PANETTA. Senator, I have to tell you, there are 1,000 al Qaeda that are still in Iraq. We saw the attack that was made just the other day. It, too, continues to be a fragile situation, and I believe that we should take whatever steps are necessary to make sure that we protect whatever progress we have made there.

Senator MCCAIN. Do you know of anyone of authority either in Congress or in the administration who believes that we should send ground troops into Libya?

Mr. PANETTA. I haven't met anybody yet who supports that. [Laughter.]

Senator MCCAIN. I haven't either. Nor do I. In fact, I think it would be a great mistake.

Do you believe that it is a proper role of Congress to restrict the powers of the President of the United States to act? In other words, you and I were around when there was a vote for cutoff of funds for Vietnam. Whether that was right or wrong, that was the appropriate role of Congress.

Does it worry you if Congress begins to tell the Commander in Chief as to exactly what he can or cannot do, what the President can or cannot do in any conflict?

Mr. PANETTA. Senator, I believe very strongly that the President has the constitutional power as Commander in Chief to take steps that he believes are necessary to protect this country and protect our national interests. Obviously, I think it is important for Presidents to consult, and to have the advice of Congress. But in the end, I believe he has the constitutional power to do what he has to do to protect this country.

Senator MCCAIN. I agree. In 2007, the last time we went through a very serious crisis, it was concerning whether we should withdraw from Iraq or not, and I see some parallels as the rising and understandable war-weariness of the American people continues to be manifested.

One of the things that we did at that time was set up some benchmarks that we expected to be met by both the Iraqis and the United States. As I recall, there was 13 or a number of those. Over time, most of those benchmarks were met.

Don't you think it would be appropriate for us to do the same thing as far as Afghanistan is concerned? We can measure progress by certain metrics, and I think it would be important in order to gain or keep the confidence of the American people that we should set up some benchmarks for progress, both in Afghanistan and as far as Pakistan is concerned, since we are sending billions of dollars of taxpayers' money to Pakistan as well.

Mr. PANETTA. Senator, I think we all know what the fundamental goal here is to try to develop a stable enough Afghanistan that it will never again become a safe haven for al Qaeda or—

Senator MCCAIN. My specific question is—

Mr. PANETTA.—for other terrorists.

Senator MCCAIN.—would you agree—

Mr. PANETTA. But with regards to achieving that goal, I think that working with the administration, working with the President, working with the Secretary of Defense, establishing some of those areas where we need to make progress and identifying those, I think that is something that would be worth pursuing.

Senator MCCAIN. Thank you. I thank you for your service, and I thank you for your willingness to continue to serve.

My time has expired. But one of the biggest problems that I see—and I apologize, Mr. Chairman—but is this whole issue of acquisition. We have terrible out-of-control costs for literally every weapon system that we have acquired in the last 10 years that I know of.

I believe you have a good team there in the Pentagon. I think that Mr. Carter is doing a good job. But we are going to have to get our arms around this. We cannot afford aircraft that double and triple the original estimated costs and don't meet the timelines that are set up. The F-35 is just the most outstanding example.

I know you will make this as one of your highest priorities. It is simply not affordable for us to continue business as usual the way we acquire weapons today. It may require some really fundamental changes in addition to the legislation that we have already passed to try to address this issue.

I thank you, Mr. Chairman.

I thank you, sir.

Mr. PANETTA. Thank you, Senator. I agree with you fully on that issue.

Chairman LEVIN. Thank you. He speaks, I think, for our entire committee in saying that, and I think it is also clear you have the background to really do something about it and to dig into it.

Thank you very much, Senator McCain.

Senator Lieberman.

Senator LIEBERMAN. Thanks, Mr. Chairman.

Director Panetta, thank you for answering the call to serve your country again. I have the greatest confidence in your ability and your principles.

I love the quote from your father. Our fathers must have come out of the same cloth, which is to value the freedom that America provides is our unique and distinguishing contribution to governance, but to understand that without security, there is no freedom. I can't think of anything I would rather hear from a nominee for Secretary of Defense than that.

I want to begin with a few quick questions about Iran. Do you agree that the Islamic Republic of Iran is working very hard to develop a nuclear weapons capability?

Mr. PANETTA. Our concern with Iran is that they continue to try to develop some kind of nuclear capability. As to whether or not they have made certain decisions as to how far they should go, those are questions that I would probably have to address in another forum. But there is no question that they continue to work to try to develop some kind of nuclear capability.

Senator LIEBERMAN. Right. Also, to the best of your knowledge, is the Islamic Republic of Iran working to develop increased capacities in intercontinental ballistic missile systems to deliver nuclear or other weapons?

Mr. PANETTA. That is correct.

Senator LIEBERMAN. As I am sure you know, there has been a lot of both diplomatic and economic sanctions work being done to attempt to discourage Iran's nuclear ambitions and really to end them. However, as President Obama has said, all options have to remain on the table.

I wanted to ask you whether, as Secretary of Defense, you will consider it to be one of your responsibilities to have credible military plans to strike and destroy Iran's nuclear facilities if the President, as Commander in Chief, decides that it is necessary to use that option?

Mr. PANETTA. I think in line with the President's statement that we should keep all options on the table, and that would obviously require appropriate planning.

Senator LIEBERMAN. Thank you.

Let me go to Afghanistan and see if I can approach it this way. I thought the President made not only a correct, but a courageous

decision in 2009 in deciding to raise the number of our forces in Afghanistan by 30,000 plus, a so-called Afghanistan surge. At the time, the statement was made that we would begin to draw those troops down around July of this year, 2011.

There was a lot of anxiety in the region, particularly in Afghanistan and Pakistan and beyond, about whether that was the beginning of a kind of early withdrawal and, again, a retreat from the region. Discussions were had, particularly between us and the Afghans, and President Obama settled with President Karzai, as you well know, on a plan that will begin the transition around July of this year. But the goal is to remove effectively all of our forces, unless there is a mutual agreement to the contrary before then, by the end of 2014.

You have said today and in the answers to the questions we submitted earlier that you thought we were making measurable progress. The American military are making measurable progress in Afghanistan, but that the progress was reversible. Rather than asking you to adopt an adjective that someone else has put on it, is it fair to say that the standard you would apply to the drawdown of American forces that would begin in July of this year, is it that it not be so great as to risk the gains we have made, which, as you have said, are reversible?

Mr. PANETTA. There is no question we ought not to take any steps that risks the gains that have been made, and I have great confidence, frankly, that General Petraeus and Secretary Gates and the President will make the right decision in a transition that has to take place going towards 2014.

Senator LIEBERMAN. Is it fair to say that if you are confirmed as Secretary of Defense, that the goal that you see is to turn responsibility for security of Afghanistan over to the Afghans at the end of 2014 and not to jeopardize our capacity to do that before then?

Mr. PANETTA. No, that is absolutely correct. At the Lisbon conference, 48 nations plus President Karzai made the decision that there would be a transition going towards 2014, and it would be then that, hopefully, we would be able to transfer responsibility. We ought to do nothing that jeopardizes that path.

Senator LIEBERMAN. I appreciate that. Let me just briefly read you what Secretary Gates said this weekend in Afghanistan. "I think that once you have committed, that success of the mission should override everything else because the most costly thing of all would be to fail."

Do you agree with that?

Mr. PANETTA. Absolutely.

Senator LIEBERMAN. I appreciate your answers to those questions.

Let me move to another part of the world. I think at the end of the last century, if you asked most people up here and in the Defense Department, State Department, et cetera, CIA, what would be our focus in this century, they probably would have said that the Asia-Pacific region would be the strategic center of gravity of the 21st century.

We were obviously and necessarily distracted by the attack on us on September 11, and I think we have responded with remarkable

courage and effectiveness. But I think that the Asia-Pacific remains the strategic center of gravity for the 21st century.

As I think you know and those of us who have been there recently have found, there is an anxiety among our friends in Asia about, one, China's growing military capabilities and, two, about America's staying power and commitment to the region. I wanted to give you an opportunity to speak to that anxiety that, if confirmed as Secretary of Defense, notwithstanding the budget pressures on the U.S. Government, would our strategic involvement in the Asia-Pacific region, in your opinion, continue to be a national security priority?

Mr. PANETTA. Absolutely. I think that region is very important to us from a strategic point of view. We have to maintain a presence in the Pacific arena. I think we also, in line with that, have to maintain a relationship with China. Building that kind of relationship for the 21st century, I think, is extremely important.

Obviously, there are concerns, concerns about some of the things they are doing in modernizing their military. At the same time, I think we have to be able to work with them in terms of scale and transparency so that we are working together and not in opposition to one another in order to make sure that we protect the security of that region.

Senator LIEBERMAN. But in your watch as Secretary of Defense, you certainly don't anticipate any withdrawal or retreat of America's commitment to the Asia-Pacific region and our allies there?

Mr. PANETTA. Not at all. Not at all.

Senator LIEBERMAN. Thank you very much.

Chairman LEVIN. Thank you, Senator Lieberman.

Senator Chambliss.

Senator CHAMBLISS. Thanks, Mr. Chairman.

Director Panetta, thanks for your willingness to continue to exhibit great public service.

As you and I have had the privilege of working together for many years now since I was a freshman member of the House, and you were a member of the Clinton administration. We don't need to talk about how many years that has been. But I respect your service and value our friendship.

I would just say that I know you will be the first to credit the many hard-working and very professional men and women in the intelligence and military community that led to the successful take-down of bin Laden, and you would be right to do that. But the fact is without strong leadership at the top, that mission would not have been successful. I give a lot of the credit for that mission to you, and it is well deserved.

You and I had the opportunity to talk about the issue of rising healthcare costs in the DOD budget when we visited a couple of weeks ago. I noticed you had several questions on that issue in your advance policy questions, and I appreciate your responses.

I don't have a question on this. But as the chairman said earlier, you are going to have a very difficult job when it comes to trying to find savings and become more efficient at DOD. There is no bigger expense, at least from the standpoint of increasing annually, than the healthcare costs.

I just want to reemphasize the fact that this is an extremely important issue, and we need to get our arms around it. I look forward to working with you. I encourage you to continue to think creatively about how we can bring these costs down without negatively impacting the quality of service to those who depend on that system.

I want to go back to the line that Senator McCain was addressing on Afghanistan. Regarding the troop withdrawals, I think it is clear from an operational perspective that the withdrawal of U.S. troops at this point makes no sense. It may make sense from a domestic political perspective. It may make some level of sense in terms of waking up the Afghans to the fact that we are not going to be there forever, and they need to step up to the plate.

But I am concerned that a significant withdrawal of U.S. forces will reverse the progress that we have made in Afghanistan and that the Afghans have made. I am glad to see you say in your responses to questions that you “support a responsible, conditions-based withdrawal”. However, I would prefer there to be no withdrawal until it is clear that the gains that we have made will not be reversed.

My question for you is, as we withdraw troops from Afghanistan, if it becomes clear from an operational perspective that the withdrawal is negatively affecting progress and stability, will you advise the President that the withdrawal should be stopped and that, if necessary, additional U.S. forces be sent back to Afghanistan?

Mr. PANETTA. As I have said and as the President has said, and the Secretary has emphasized, this has to be a conditions-based withdrawal. That means you look at the conditions on the ground as it proceeds, obviously, we need to do everything we can to ground to stay, hopefully, on target with regards to the 2014 date.

But again, it is conditions based, and I think based on what changes take place, then obviously the President and the Secretary would have to make adjustments.

Senator CHAMBLISS. I would hope that from a conditions-based standpoint, Leon, that you would give strong consideration to the safety and security of our soldiers. I know they are of number one importance to you.

If withdrawal of troops puts our men and women in greater harm’s way, I hope that we would make it conditions based and that we would cease the withdrawal. I hope that would be your recommendation to the President.

Mr. PANETTA. Yes.

Senator CHAMBLISS. Another issue that I want to bring up with you that we have discussed is the issue of tactical aircraft and fifth-generation fighters. Let me just say that several years ago, Secretary Gates made a push to place the future of tactical aviation on basically one weapon system, and that is the F-35.

He argued that it had stealth and other advanced capabilities that made it the airplane of the future. However, at a recent hearing, last month Secretary Carter indicated, in fact, that DOD has taken money out of the F-35 program to buy fourth-generation fighters.

Not only are these fourth-generation fighters costing billions of dollars, but they are going to be in the inventory for probably 20,

30 years, and we are going to be paying to maintain them at even a greater cost. Yet their utility is greatly limited against any kind of modern threat, and in my view, this does not seem to be a very good way to expend taxpayer dollars.

What is your perspective on this issue? If confirmed, will you absolutely be committed to preserving U.S. supremacy and air dominance and ensuring our resources are spent most wisely towards that end?

Mr. PANETTA. Senator, obviously, I want to make sure that we have the very best in terms of our fighter planes, and I know the F-35 is a plane that is being developed as the next-generation fighter. But I also know that there are extensive costs associated with how that plane is being developed, and I think we have to watch it very carefully.

I want to assure you that one of my responsibilities, in line with what Senator McCain said, is to take a very hard look at all weapon systems to make sure that they are cost effective and that they are, in the end, providing the very best equipment our forces need.

Senator CHAMBLISS. What really concerns me about where we are with that program is exactly what Senator McCain alluded to. That is that we just seem to be out of control and that we keep moving the goalpost with contractors and then blaming contractors for an increase in cost, when, frankly, part of it is due to our inefficient management of the systems.

If we are going to spend the kind of money that we are committed to spend on that fifth-generation fighter, because that is where we are headed, and we all know that. We have to have that airplane in the inventory. The decisions that are going to be made by you, as Secretary of Defense, relative to procurement, to acquisition, as well as to the testing of that airplane, are going to be critical.

You bring a wealth of knowledge from that perspective from your years at OMB, as well as where you are today. Again, we look forward to dialoguing with you, between you and this committee on that issue as well as our other acquisition issues that are going to be before you.

Let me ask you one other matter relative to Libya. I notice that you agree that the Gaddafi regime must go. How are we going to do it? Based on what we are doing today, from our participation in the NATO operation, how are we going to make that happen?

Mr. PANETTA. That is, as the President has said, the objective. It has to be done by a number of means.

Number one, we are bringing strong economic sanctions against them. Number two, we are bringing strong diplomatic pressure against them. We have implemented embargoes and, more importantly, the work that NATO is doing, pursuant to the United Nations (U.N.) resolution.

The NATO forces that are there are bringing tremendous pressure, I believe, on them, not only fighting obviously to protect civilians, but to implement the no-fly zone. But in addition to that, target the command and control elements of the regime. I think all of those factors have to continue in order to put pressure on Gaddafi.

Frankly, I think there are gains that have been made. We have seen the regime weakened significantly. We have seen the opposition make gains both in the east and the west. I think there are some signs that if we continue the pressure, if we stick with it, that ultimately Gaddafi will step down.

Senator CHAMBLISS. Again, thanks for your service, and I look forward to continuing to work with you.

Chairman LEVIN. Thank you very much, Senator Chambliss.

Senator Reed.

Senator REED. Thank you very much, Mr. Chairman.

Thank you, Director, for your extraordinary public service, particularly in the last few months for your decisive and courageous advice to the President, which led to the successful raid against bin Laden. It would not have been as successful or as effective without your participation.

Thank you personally for your friendship over many years.

Let me return to the topic of Afghanistan. We are looking at a decision shortly that will be based on conditions on the ground. But it strikes me, and I think implicit in what you said in your testimony, that those conditions on the ground might be more relevant vis-à-vis Pakistan than Afghanistan.

That, in fact, as long as the Government of Pakistan at least appears to see some of these terrorist groups on their soil as strategic assets and not liabilities, that our operations in Afghanistan are going to be very difficult.

Going to the real conditions on the ground, your comment on whether those conditions are really more about Pakistan than Afghanistan, and whether our effort, our strategy, our focus has to be there as much as Afghanistan. I would also include in this context some type of regional dialogue, including Pakistan, Afghanistan, and India. Your comments, Mr. Director?

Mr. PANETTA. I would agree with that, Senator. I think it is pretty clear we can't succeed in Afghanistan if we are not succeeding in Pakistan in terms of controlling the safe havens and the cross-border operations. We have to work at both in order to ensure that we are able to stay on path with what we would like to achieve in Afghanistan.

In addition to that, I agree with you this is a regional issue. To the extent that the countries in that region can work together and relate to each other instead of being suspicious of each other and creating the kind of dynamic that, frankly, has not been very helpful, I think it would be in the interest of peace in that region if we could get all three to continue to work together to advance the same goals.

Senator REED. One of the points that I believe your predecessor made—I, too, will join my colleagues in commending him for exemplary service. Indeed, one of the challenges you have is following an extraordinarily talented, successful, and decent human being. You will do it, I know. But you have a challenge.

Secretary Gates pointed out how important non-DOD operations were at the Department of State, and agricultural programs at the Department of Agriculture. Now we are getting also into the spectrum of these violent climate episodes throughout the globe of scientists in the National Oceanic and Atmospheric Administration

and others. Yet there is a real danger here that those budgets might suffer.

In terms of Afghanistan, my colleagues on the Senate Foreign Relations Committee yesterday released a report criticizing the build stage in the operation. Can you comment upon that partnership and how critical it is?

Again, when we look ahead at the conditions on the ground, we could be successful interdicting terrorist groups, seizing caches of weapons, even interdicting transmissions from Pakistan. But if there is no political capacity or governmental capacity, healthcare, education, or anything, we are going to still have a population that is disgruntled and probably destructive towards us.

Mr. PANETTA. Senator, I agree with what you have said. It has to be a whole-of-government approach as we deal with these issues. Clearly, the State Department plays a very important role in providing assistance to individuals to ensure that an area remains secure: the education area. The Justice Department provides assistance. The area of agriculture also provides important assistance.

I know DOD is our primary military weapon in terms of securing areas. But if we don't follow it up with these other important assets, we will never be able to fully secure these countries.

Senator REED. Let me change topics for a moment. It strikes me that I am old enough to remember when there were three dimensions of conflict—air, land, and sea. I did some land stuff and technically air because I jumped out of airplanes.

But there is a whole new dimension, cyber. I don't think we know enough yet to be fully prepared, fully conversant. But can you comment briefly on the strategy that you will try to develop? I presume that strategy will involve some deterrence, preemption, offense, and defense. As was just indicated, there is a policy now within the context of the rules of war, what would constitute some type of *casus belli*?

I think you are stepping in at a critical moment where we are just beginning to develop a strategy for a new dimension of warfare that we have never really confronted yet, and your leadership will be critical.

Mr. PANETTA. There is no question that the whole arena of cyber attacks, developing technologies in the information area represent potential battlefronts for the future. I have often said that there is a strong likelihood that the next Pearl Harbor that we confront could very well be a cyber attack that cripples our power systems, our grid, our security systems, our financial systems, and our governmental systems.

This is a real possibility in today's world. As a result, I think we have to aggressively be able to counter that. It is going to take both defensive measures as well as aggressive measures to deal with it. But most importantly, there has to be a comprehensive approach in Government to make sure that those attacks don't take place.

I have a huge responsibility, if confirmed in this new position, in dealing with the cyber area through the National Security Agency (NSA) and others. My goal would be to work very closely with them and with others to develop not only the capability, but also the law that I think we need to have in order to determine how we approach this challenge in the future.

Senator REED. Just a final topic, and really echoing what Senator McCain said, Senator Chambliss, and others, is that there is an acquisition bow wave coming, as you recapitalize and innovate our military forces, and that has been pushed off a bit. It has been deferred a bit, but it is coming.

One of the aspects, as Senator Chambliss pointed out, is that it is not simply the sheer number of systems that we have to buy—land, sea, air, and others—it is the price tag on each one of these systems. I know Secretary Carter has been working very hard to make affordability part of the design. But all of those efforts are going to be absolutely necessary because there will be no room within even a generous budget to do everything that has to be done unless we make significant progress in that area. Just your comments again, Mr. Director.

Mr. PANETTA. In the briefings that I have had, it is obvious that this is an area that we have to pay a lot of attention to because of the efficiencies, because of competition, because of the nature of expanding contracts that have taken place there.

We have seen these weapon systems grow in cost. It takes an extraordinary amount of time to field a system—from the beginning of moving that kind of weapon system to the time it is finally developed, finally deployed, it almost becomes outdated. We have to improve that process.

I know Congress has taken steps in that arena, but I look forward to working with you and with the members of this committee to take greater steps to make sure we are looking at every possible efficiency in the procurement arena in order not only to save dollars, but to make sure we are getting better equipment as a result of it.

Senator REED. Thank you, Mr. Director.

Thank you.

Chairman LEVIN. Thank you, Senator Reed.

Senator Brown.

Senator BROWN. Thank you, Mr. Chairman.

Good to see you again, sir. I appreciate you taking time with me yesterday, I look forward to voting to confirm you.

Mr. Chairman, thank you for holding this hearing.

I echo a lot of the same thoughts that my colleagues do regarding the cross-border operations, the tremendous amount of aid we give to Pakistan, \$4 billion, I think, give or take. I have deep concerns that as we try to move forward with completing our mission and bringing our men and women home from Afghanistan that we are having these areas where you have the safe havens, yet we are giving them billions of dollars in aid.

It is either you are with us or you are not? Either you are helping or you are not. Is there an effort and/or what is your position with regard to carrying that message that people like me and others in Congress are getting a little bit frustrated with that duplicity?

Mr. PANETTA. Senator, I want to assure you that Secretary Clinton; Chairman Mike Mullen, who meets with them regularly; myself; my deputy, who was just there; have all made the same point that we need to have their cooperation, we need to have their partnership in confronting what, frankly, is a common enemy here.

Terrorism just isn't our problem. It is their problem. They are the subject of attacks every day from terrorists. It is in their interest to try to take greater action to control terrorism within their borders, and I think they have to recognize that we expect in a relationship and a partnership that it is a two-way street, that it isn't just one way. It has to be two ways if we are going to protect both of our countries.

Senator BROWN. Right. I mean, the fact that bin Laden was there. Clearly, if they didn't know he was there then—I, quite frankly, don't believe them. But I am hopeful that message continues very strongly. I know when I went over there, I conveyed that same message as well.

If you are walking down the hallway and a media group grabs you and says, "Sir, what is the mission in Afghanistan?" What is your response? When I go back home, what should I convey to the people back in Massachusetts as to now that, obviously, we have made progress there? We have done A, B, C, and D. What should I convey and what do you convey, sir, in your everyday conversations, what is the mission in Afghanistan right now?

Mr. PANETTA. The fundamental mission in Afghanistan is to provide sufficient stability so that country never again becomes a safe haven for al Qaeda or al Qaeda's militant allies. I think that is the fundamental mission.

Senator BROWN. Is it your plan to achieve that mission by setting benchmarks that will hopefully be attained so we can step back and bring our men and women home? Let me ask you that first.

Mr. PANETTA. I think the President has made clear that there are goals that we are continuing to work on. We need to weaken the Taliban. We need to develop the force structure in Afghanistan with the police and the army so they can assume these responsibilities, and we need to develop the governance system there so that it can provide greater security for the future. Each of these areas has to be focused on in order to arrive at our goal.

Senator BROWN. Is it your opinion that there is a will in Afghanistan with the people and the government folks there to do that, to ultimately be self-sufficient?

Mr. PANETTA. I think there is. I think in the discussions I have had there, I think they really do want their country to succeed. It is not always easy. This is a tribal society. It is not a simple thing to be able to work together.

Senator BROWN. You have the tribal society, then you have the central government. There is very little interaction.

Mr. PANETTA. It is not easy. It is difficult. Yet, I think they understand that, ultimately, this is their country, and they are going to have to provide the security in their country.

Senator BROWN. I am also deeply concerned and I am hopeful that you will look at it, we keep hearing reports that monies that we are providing are going ultimately to terrorists and ultimately being used against our men and women that are serving. Is that something you have a comment on?

Mr. PANETTA. I think we have to continually oversee that and make certain that doesn't happen. I don't deny that there has been corruption in that country, and I think we have to ensure that one

of their responsibilities as a government is to make sure that doesn't happen.

Senator BROWN. Just to shift gears a little bit, what is happening in Egypt and that region of the world, obviously, people are hopeful that they are having an opportunity to share in the freedoms and privileges that we and other countries like us have. Yet there is also deep concern about voids that may be left after these transitional periods.

For example, in Egypt, we have given them billions of dollars, and they have purchased billions of dollars of military equipment and the like. They have upcoming elections at some point. Depending on who gets in power, they still have the equipment. They still are receiving aid.

I am concerned about Israel and its safety and security. I am concerned about other parts of that region. What are your thoughts on the relationship with Israel, the transition we are seeing over in the Middle East?

Mr. PANETTA. We will and have to continue to maintain a strong relationship with Israel and that part of the world, and we have to reach out to other nations in that part of the world as well if we are going to ultimately preserve peace in that region.

This is an area that is in great turmoil now. I think you have just commented on that. A lot of these countries are going through turmoil—Tunisia, Egypt, Libya, Bahrain, Yemen. There are a number of countries that are dealing with uncertainty.

I think the United States has to, on a case-by-case basis, work with each of these countries to ensure that they reduce the violence, to ensure that they are recognizing some degree of universal rights, and that they are implementing economic and political reform. That is not going to be easy. There are tremendous changes going on, but we have to play a role in what is developing in the so-called "Arab spring".

I think the President spoke to that. The fact is that if we don't, there are other countries in that region like Iran that are going to try to influence what takes place. We can't afford for that to happen.

Senator BROWN. Thank you, sir. Good luck.

Chairman LEVIN. Thank you, Senator Brown.

Senator Akaka.

Senator AKAKA. Thank you very much, Mr. Chairman.

I want to say aloha and welcome to Director Panetta, who is a dear friend and a former colleague. We have so many things that we can talk about, but I want to tell you, Director Panetta, that I am really impressed with your opening statement. What else can I say, as we consider a person who was nominated by the President to be Secretary of Defense who will be a tireless advocate of our military and will bring about support and sustain them?

For me, this is great and that this will be in your thoughts and prayers and supported by your dad's principles of having a free country and a country that is secure and that you would continue to bring strong discipline and national defense for our country. With all of this, I want to wish you well and tell you that you certainly have my support.

As we discussed, you will face significant challenges, if confirmed. The men and women of the Armed Forces have served with honor and resolve in two major conflicts that have taken a tremendous toll on our Armed Forces. We must do all we can to care for them. Fulfilling this sacred obligation is dependent on DOD and the Department of Veterans Affairs (VA) cooperation.

I am glad that you stated in your advance policy questions that you would ensure that DOD continues to work closely with the VA to support servicemembers and their families, and we talked about working on a seamless transition between DOD and the VA. With this, as you carry on into the position of Secretary, you certainly have my support.

Director Panetta, if confirmed, what will be your top priorities as you look to care for men and women in uniform and their families?

Mr. PANETTA. Senator, obviously, my first and foremost priority is to protect this country, but I can't do it unless we have good fighting men and women who are willing to put their lives on the line in order to defend this country. I think we owe it to them as a result of that, and we certainly owe it to their families, to make sure that we are doing everything possible to meet their needs.

I think, obviously, providing the kind of healthcare, providing the benefits, providing the counseling that is necessary, particularly for wounded warriors, making sure that they can transition to the VA in a seamless way, all of these are areas that I have to pay attention to because I have seen it firsthand that these kids are out there. They are, indeed, putting their lives on the line, and we have asked them to go there time and time again.

We have to make sure that they know that they are fully supported in this effort. It is going to be my job, if confirmed as Secretary of Defense, to ensure that we are providing those benefits. Obviously, I want to work with people like yourselves that have been working at this for a long time to make sure that we are covering all of their needs.

Senator AKAKA. Thank you.

I am impressed as you did tell us just about five steps of what you are planning to do and have social reforms. I thought it was unique where you want the Service Chiefs and the Secretaries to work together and share their concerns as well and that you want to work on the Pentagon management, which I think is so important as well. This is also important, to regard Congress as a partner and to work with Congress as well, and then to deal with the challenge of nations that are rising and changing, as you mentioned.

Director Panetta, the Chief Financial Officers Act of 1990 required DOD to prepare financial statements, which were found ultimately unreliable. In 2010, the National Defense Authorization Act requires the Department to provide auditable financial statements by 2017. I believe in accountability, and I know you do, too. We owe the American people complete and accurate financial information from the Pentagon.

Additionally, accurate books would allow Pentagon leaders to make better-informed decisions in a resource-limited environment. If confirmed, what will you do to ensure that the Department meets these requirements?

Mr. PANETTA. Senator, I was concerned in finding out that the Department would not be able to achieve full auditability until something like 2017. I understand how areas of the budget developed, the American people should know that, obviously, there is auditing that does go on within each of these areas. But as a department, we should be able to audit that department.

If I am confirmed, one of the first things I am going to do is to try to see if we can't take steps to try to improve on that timetable so that we can say to the American taxpayer that what we are spending on national defense is being fully audited.

Senator AKAKA. Director Panetta, DOD is one of the few departments that has recognized the importance of developing and maintaining its language and cultural awareness capabilities. A number of steps have been taken to improve these skills within the Department and across the country, such as leading the National Language Service Corps and coordinating its activities with other Federal agencies.

What are your thoughts on the importance of cultural and foreign language capabilities within DOD?

Mr. PANETTA. Senator, I am a big believer in language training and getting our people equipped with the ability not only to speak the language, but to understand the culture of the countries that we are dealing with. I say that not only because I think it is good for each individual to be able to have that capability, but I have to tell you it is important to our national defense to have that capability.

At the CIA, I have developed a requirement for analysts, for those that are operations officers to have a language capability. It makes them not only a better individual, it makes them a better intelligence officer to have that capability.

I think at DOD, I think we need to also encourage greater language training so that they understand not only the language, but the culture of the countries that they are involved with. Having that capability makes us much better at doing our job.

Senator AKAKA. Thank you very much, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Akaka.

Senator Ayotte.

Senator AYOTTE. Thank you, Mr. Chairman.

Thank you so much, Director Panetta, for your leadership and distinguished record of service to our country.

I wanted to ask you, the President's proposal starting in 2013 to cut \$400 billion, do you agree with that proposal, and is it a realistic number in terms of preserving our national security?

Mr. PANETTA. Senator, obviously, I agree with the commitment of the President to try to take action to reduce the deficit and the number that he suggested. I do want to say that there is a comprehensive review that is going on that the President himself stated would take place, the Secretary has stated would take place.

That comprehensive review is looking at a number of issues related to the Defense Department in order to determine what is the right pace, what are the right areas, what is the right transition in order to achieve that savings. I look forward to the results of that comprehensive review.

Senator AYOTTE. As a follow-up, you have certainly expressed your admiration for Secretary Gates, and I share that admiration for his service to our country. He has made some recent statements expressing concerns over the \$400 billion proposal and I think, in fact, talked about it cutting into the meat, in terms of the muscle of our defense. Do you disagree with him on that front?

Mr. PANETTA. No, no. I share his concerns. I share his concerns about the possibility of hollowing out our force. I think that would be a terrible mistake. I share his concern about some kind of automatic, across-the-board cuts and just implementing some kind of formulaic approach to cutting defense when we have to look at each area and determine where we are going to achieve savings in order to protect defense.

Obviously, I share those concerns. But what I want to do is to be able to look at that comprehensive review in order to make sure that none of the concerns that Secretary Gates has raised or that I am concerned about take place in seeking those reductions.

Senator AYOTTE. In conducting that review, when you get into the position of being the Secretary of Defense, if you disagree that \$400 billion is a reasonable number and could jeopardize our national security, would you express your opposition to the President on that?

Mr. PANETTA. If the end result of that comprehensive review were to come to that conclusion, then obviously, I would share those concerns. I don't think it will, but I think that if there was something that indicated that our national defense would be impacted, obviously, I would share that with the President.

Senator AYOTTE. Director, I wanted to ask you about the CIA and interrogations. Does the CIA currently conduct interrogations of high-value targets or of terrorists or those that are captured?

Mr. PANETTA. Senator, the way it works now is that when a high-value target is captured, there is a high-value detainee interrogation group (HIG) that comes together. That involves the Army, the Federal Bureau of Investigation (FBI), and the CIA working as a team. They will go and interrogate an individual for intelligence as a team. It works pretty well, but that is the way it works now.

Senator AYOTTE. But just to clarify, does the CIA actually do the interrogations themselves? Meaning I understand what the HIG does, but as I understand it, the CIA has really—while participating in the HIG, has not been doing interrogations. Am I wrong on that?

Mr. PANETTA. Generally, the CIA individual there can ask questions. Generally, what is done is that they will share with each other what questions ought to be asked by the interrogator. That could be the Army individual. It could be the FBI. But every once in a while, the CIA individual asks questions as well.

Senator AYOTTE. Is there anything that prohibits the CIA from taking the lead in conducting interrogations under current policy?

Mr. PANETTA. The way the team works now is that, if it is somewhere where intelligence is the primary objective here, going after and trying to find that out, then the CIA individual becomes pretty central to the questions that are asked. That is the way it works now.

In other words, if there is a real emphasis on that, that is one case. If it is an FBI case and they are looking at trying to prosecute that individual, then obviously FBI takes the lead. If it is a military case or individual that could involve follow-up on the military, then they would take the lead.

It really works as a team. That is probably the best way to say it. It is a team, and they do it on a case-by-case basis.

Senator AYOTTE. Nothing currently prohibits the CIA from being the lead in conducting interrogations?

Mr. PANETTA. Nothing prohibits that from happening.

Senator AYOTTE. Okay. To your knowledge, does it happen now? I understand it is a team. But I am just trying to understand whether the CIA ever takes the lead.

Mr. PANETTA. It is not the direct interrogation that used to take place early on in this decade, but it is much more of a team approach right now, and that is the way it works.

Senator AYOTTE. I wanted to follow up with respect to the Detainee Treatment Act. Do you agree with all the provisions of the Detainee Treatment Act, including the provisions that provide legal authority regarding interrogations?

Mr. PANETTA. Obviously, I agree with the law, yes.

Senator AYOTTE. You talked about your view on waterboarding. Do you think that all of the enhanced interrogation techniques cross the line, I think, was what you used when you discussed waterboarding.

Mr. PANETTA. No, I don't have the same view with regards to all of the other enhanced techniques that I do with regards to waterboarding.

Senator AYOTTE. So, right now under the President's Executive Order, the interrogations are limited to the Army Field Manual. Is that right?

Mr. PANETTA. Correct.

Senator AYOTTE. You would agree that there are some enhanced interrogation techniques that don't necessarily cross the line but wouldn't be contained within the Army Field Manual. Is that right?

Mr. PANETTA. The enhanced techniques that were used early on have now been forbidden by the President's Executive order. It is the Army Field Manual that is the primary guide with regards to interrogations.

Senator AYOTTE. But to the extent that some of those techniques may be permitted under the Detainee Treatment Act, and would you necessarily disagree with the law contained within the Detainee Treatment Act?

Mr. PANETTA. If it is permitted under the Army Field Manual, then obviously, I would support that.

Senator AYOTTE. My time is up. I appreciate your answering my questions.

Chairman LEVIN. Thank you, Senator Ayotte.

Senator Nelson.

Senator NELSON. Thank you, Mr. Chairman.

Director Panetta, thank you for your decades of public service and your willingness to step forward and extend that public service in this new position.

You will inherit 10 years of war, budget belt-tightening, and two wars winding down, if confirmed. You will be tasked with reshaping DOD, including resetting its combat-weary units, drawing down the DOD budget, and taking care of the DOD members and their families. To say that is a set of tall orders is an understatement of giant proportions.

With respect to Afghanistan, there has been quite a bit of discussion about the need for benchmarks to do authentic assessment of where we are in the transition to the Afghanistan capability of defending itself so that it can govern itself going forward. I have been a prime supporter of benchmarks, first with regard to Iraq and now with respect to Afghanistan as well.

I am introducing legislation today that will require benchmarks to evaluate progress being made toward the transition of security responsibility to the Government of Afghanistan. The bill would call for the benchmarks on transition to be included as a part of the already-established reporting requirements for Afghanistan known by I think it was 1230 and 1231 reports to make it consistent.

I am encouraged by your discussion and your support of this method of evaluating progress by some form of metrics so that we are not in a gray area always about whether we are winning or we are losing or making progress. It gives us an opportunity to decide what level of progress have we made, what remains to be accomplished for us in that regard. I am encouraged by many of my colleagues on both sides of the aisle talking about the benchmarks as well.

Because if we intend to transfer security responsibility to the Afghan Government by 2014, obviously, it is important to mark our progress. Do you have any preliminary thoughts as to the kinds of things you might look at as part of benchmarking that would help you evaluate conditions on the ground as to whether or not we are making satisfactory progress to where you can say we are 25 percent there, 50 percent there, or we have 50 percent yet to go?

Mr. PANETTA. I think that to establish any metrics or guideposts here, it is very important that General Petraeus, that obviously our diplomatic leaders there, the administration participate in trying to identify those areas that are important.

Levels of violence is an important area to look at. A district assessment that looks at each of the districts and tries to determine the stability in each of those areas. Clearly, an evaluation of the development of the Afghan army, police operation, and how they are performing. That is another important element. Obviously, the governance responsibilities within Afghanistan. I mean, those are all key areas that I think need to be evaluated.

Senator NELSON. In your view, and it is obviously a unique view as Director of the CIA, can you give us some idea of what you think the impact of the death of Osama bin Laden might have on the campaign going forward in Afghanistan and keeping it from a safe haven for future al Qaeda operations?

Mr. PANETTA. Senator, with regards to specific intelligence on that, that is probably more appropriate in another forum. But I think it is fair to say that the death of Osama bin Laden, there is no question that it impacted al Qaeda. He was the spiritual leader

of al Qaeda, and I think it did impact on their capability. In addition to that, obviously, there are a number of operations that I think have impacted on their command and control capabilities as well.

But having said that, they still remain dangerous, and they are dangerous with regards to the efforts they continue to work at in Pakistan. One of the concerns that I will share with you is that I think we do have to pay attention to these nodes that are developing where al Qaeda has moved some of its operations, places like Yemen, Somalia, and North Africa. Those are areas that I think we have to continue to focus on.

So, yes, it has had an impact. Yes, I think it has weakened them. But they still remain dangerous, and we still have to go after them.

Senator NELSON. I agree with you, and I appreciate that view.

We have had a very touchy situation develop with respect to Pakistan in terms of what level of support Osama bin Laden may have had from anyone involved in the Pakistan Government. It is a complicated relationship, we understand. But the American people are really quite concerned about double dealing. You can't have a friend be your friend and your enemy at the same time. Your friend, but working against you.

Do you think that the relationship with Pakistan is transparent enough at the present time? Is there something we can do so that the American public can make a better determination of that relationship that we share with the Government of Pakistan?

Mr. PANETTA. Senator, I think we have to continually work at that. We have to work at developing a relationship of trust with the Pakistanis. I don't know that we are totally there. I mean, there are some areas where, frankly, we have good discussions. We have good communications. But there are a number of areas where, frankly, we don't have that level of trust or communication capability.

I think we have to work at that. We have to develop it because, as I have said, it is in the interest of both countries to have a trusting relationship because terrorism is an enemy not just for the United States. It is an enemy for Pakistan.

Senator NELSON. Do you think that an internal investigation with some level of transparency within their government to try to determine responsibility for anyone who may have had involvement in trying to protect the presence of bin Laden in their country, that that will be fruitful? If it is fruitful, that it will be looked as credible by our Government first, but by the American people?

Mr. PANETTA. Senator, at this point, we don't have any intelligence to indicate that there was any relationship here. But having said that, I do believe that the Pakistanis are conducting several investigations at different levels to try to investigate what took place, and I think probably would be important to see what the results of those investigations are.

Senator NELSON. Thank you. Good luck in your new position, which you are about to achieve.

Thank you.

Chairman LEVIN. Thank you, Senator Nelson.

Senator Graham.

Senator GRAHAM. Thank you, Mr. Chairman.

Mr. Director, I can't thank you enough for being willing to do this job after being CIA Director. I just think the President has put together an A-plus national security team, and you are one of the linchpins of that. So now, some hard questions. [Laughter.]

You mentioned to Senator Nelson that you think the killing of bin Laden has created some momentum. I couldn't agree with you more. What to do with that momentum?

The statement to me that it makes, there is no place you can go and no passage of time that will protect you from justice being delivered by the American people. I think that is a statement that needs to be made. But we also need to make another statement. You can count on America.

My general belief is that this war is more complicated than killing terrorists. Do you agree with that?

Mr. PANETTA. Yes.

Senator GRAHAM. We have to make an equal investment in helping those who would fight the terrorists in their own backyard and be our partner. Don't you agree that takes more time, that it is more costly and, in many ways, more deadly to build up partnerships than just killing an individual?

Mr. PANETTA. It absolutely does take more time.

Senator GRAHAM. Do you agree with me that the payoff is much more enormous if we can get it right?

Mr. PANETTA. Correct.

Senator GRAHAM. What happens if we lose in Afghanistan?

Mr. PANETTA. I think if we lose in Afghanistan, we not only create another safe haven for al Qaeda and for their militant allies, but I think the world becomes a much more threatened place because of that loss, particularly in that region.

Senator GRAHAM. I can't agree with you more. I think that is absolutely dead on.

What do I tell a family in South Carolina who has lost a son or daughter in Afghanistan to an improvised explosive device (IED) that we know was made in Pakistan, and we can't do a damned thing about it? What do I tell them?

Mr. PANETTA. I think that is one of those situations that is frustrating and angering. One where we have to say to that family that we are not just walking away from that responsibility, but we are continuing to put pressure on those countries that are involved with that.

Senator GRAHAM. I couldn't agree with you more. I don't think, quite frankly, we are going to be able to sustain our efforts in Afghanistan until we deal with the safe havens. I trust you and General Petraeus to deliver that message.

But on behalf of the people of South Carolina and I think most members of this committee, if you are listening in Pakistan, you need to choose. Because it is in your interest to help fight the people that would undermine Afghanistan, as well as Pakistan.

I am all in for winning in Afghanistan and doing what we need to do in Iraq. But Pakistan needs to get with the program one way or the other.

Now, the Pentagon itself. Do you agree that the general system we have today to buy weapons is that the longer it takes to develop a weapon and the more it costs, the more the contractor makes?

Mr. PANETTA. That is right.

Senator GRAHAM. Isn't that kind of stupid? [Laughter.]

Mr. PANETTA. Not for the contractor.

Senator GRAHAM. I mean, it really is. Yes, yes, yes. I don't blame the contractor. I blame us.

What if we did this? What if we said to the contractors in the future, you are welcome to bid on major weapon systems, but why don't you share 25 percent of the development cost, and at the end of the day, we are going to have a fixed price, not a cost plus. If there are any overruns, you share in the overruns. Do you think that is some idea to at least consider?

Mr. PANETTA. I think that is a suggestion worth looking at.

Senator GRAHAM. Yes, I think it is, too. I think it would save us a lot of money. One thing I would like you to do is go back in the past, and if you had a cost-sharing arrangement, how much money would we have saved in the last 20 years if we had that arrangement versus the longer it takes, the more it costs, the more you make? I think it is a way to save money and actually get weapons done quicker.

When it comes to Iraq, if the Iraqis ask us to provide some troops in 2012, Secretary Gates says he thinks that would be smart. Do you think that would be smart to say yes?

Mr. PANETTA. Yes.

Senator GRAHAM. Okay. Secretary Gates, do you agree that he has a pretty good view of what is going on in the world?

Mr. PANETTA. He sure does.

Senator GRAHAM. He has served our country in an extraordinary manner, I think. If he says 3,000 to 5,000 makes sense when it comes to July withdrawal in Afghanistan, would you give great consideration to that number?

Mr. PANETTA. I don't want to speculate on what the number is. But whatever Secretary Gates recommends—

Senator GRAHAM. Well, that is what he said. It is not speculation. He said 3,000 to 5,000 would be a wise move in July. Would you at least consider that request?

Mr. PANETTA. I think Secretary Gates' position, General Petraeus' position, obviously the President's position, all of that ought to be considered.

Senator GRAHAM. Would you agree that between all of us, that probably Gates and Petraeus have the best view of anybody that I know of, if I had to pick two people to ask?

Mr. PANETTA. They have a pretty good view.

Senator GRAHAM. I would put you on that list, too. Okay. Now, when it comes to Libya. If Gaddafi stays, what does that mean for our national security interests after we said he must go?

Mr. PANETTA. I think it impacts on our national security interests in the world if that happens.

Senator GRAHAM. Do you think it kills the Arab spring?

Mr. PANETTA. I think it sends a terrible signal to these other countries.

Senator GRAHAM. Do you think it tells the Iranians that you really don't have to fear America when it comes to developing nuclear weapons?

Mr. PANETTA. I think it tells them that our word isn't worth very much if we are not willing to stick to it.

Senator GRAHAM. I couldn't agree with you more. I can't wait to vote for you. [Laughter.]

Now, when it comes to detainees, if we captured someone tomorrow in, say, Yemen or Somalia, some of these failed states, high-value target, where would we put them as far as a jail? Do we have a jail available to our Armed Forces?

Mr. PANETTA. Probably better than anyone here, the——

Senator GRAHAM. Can I tell you what Admiral Mullen said when I asked him that question?

Mr. PANETTA. Sure.

Senator GRAHAM. We don't have an answer for that question. Would you help me come up with an answer?

Mr. PANETTA. That is probably not a bad answer.

Senator GRAHAM. I think it is the truth. But do you think that is a smart policy, to be a nation without a jail in the war on terror?

Mr. PANETTA. I think we have to have facilities to be able to provide to detainment of these individuals. That is clear.

Senator GRAHAM. To the committee, we don't, and we need to find one. I think Guantanamo Bay is a good candidate because it is the only one left.

Now, in 2014, everybody is focusing on a transition in Afghanistan. I think, if we do this smartly, we can transition. But I am very interested in making sure, as you said, Afghanistan never becomes a failed state.

Secretary Gates said today, and he said in February when I asked him this question, that he believes that joint basing past 2014, where you would have American air power and counterterrorism units left behind in Afghanistan in a joint environment for training and counterterrorism, if the Afghans request it, would be a very good policy for us. Do you generally agree with that?

Mr. PANETTA. I think the President has made clear that we have to make a long-term commitment to stability in that region not just now, but in the future.

Senator GRAHAM. Can I read you what Secretary Gates said to my question in February about joint basing?

Mr. PANETTA. Sure.

Senator GRAHAM. "A security agreement with Afghanistan that provided for a continuing relationship and some kind of joint facilities and so on for training, for counterterrorism, and so on beyond 2014 I think would be very much in our interests." Do you think that is a reasoned statement?

Mr. PANETTA. I think that is worth looking at.

Senator GRAHAM. I do, too. Now, at the end of the day, you are taking over at a time when the budget for the Nation has never been more out of whack. We're in Afghanistan, Iraq, and Libya. You have a very big agenda to fulfill.

At the end of the day, we are a war-weary Nation. What would you tell the American people in terms of the attitude we need to take as a country? Address their war weariness and tell them why, in your view, we should consider staying behind in Iraq, why we

should consider a long-term relationship with Afghanistan. Why is it so important that we continue to stay in the fight after 10 years?

Mr. PANETTA. Senator, it goes back to my father's statement. If you want to be free, you have to be secure. The only way to ensure that security is to be able to establish some kind of peaceful solution to these challenges abroad.

Chairman LEVIN. Thank you very much, Senator Graham.

Senator McCaskill.

Senator McCASKILL. Thank you, Mr. Chairman.

I welcome you and thank you for your service and look forward to working and supporting you in every way possible.

Obviously, part of our mission in counterinsurgency is to secure and stabilize and enhance the infrastructure, and I want to certainly commend to you and ask you to direct the folks that work with you to pay attention to some of the findings of the Commission on Wartime Contracting. They issued a report last Friday, and I think it is full of very basic common-sense information that seems to be escaping us in the area of contracting and contingency operations.

That is two important factors. One on the front end is security, whether or not the security is available and appropriate in order to support the building of projects that we put a lot of money in. We saw this in Iraq over and over again, where we would build a power plant, we would work on an oil refinery, and then 2 months later it would be blown up. So, I think that security piece and, obviously, the cost of the security piece in order to build the projects needs to be taken into account.

But the second one, and this report they came out with Friday is a really important report, Director, and that is sustainability. We have white elephants all over this part of the world, all brought to you courtesy of the American taxpayer. I will read you just one quote from this report. "A project may be carefully planned, well executed, and economical, but become wasteful if the host nation cannot provide trained staff, afford parts or fuel, perform necessary maintenance, or produce intended outcomes."

We have one of these white elephants we spent \$300 million on in Kabul, a power plant that was designed to be dual fuel, and Afghanistan made a commitment to us that they would fuel it. Now they say they can't afford the fuel. The fact that it is a dual fuel makes it complicated in terms of the technology. So, basically, it is now only being used as a backup, and Afghanistan is buying electricity from another country.

This is a great example, but it can be replicated over and over again. I really think it is time—and I understand the mentality. I respect greatly General Petraeus and his strategies in terms of counterinsurgency, but what happens is there is this almost myopic focus. If we can build this project, we will put people to work. This is good. This is what counterinsurgency is all about.

They don't think about what is it going to look like in 3 or 4 years. Especially in Afghanistan, you and I discussed the sustainability questions in Afghanistan are particularly acute. This is not a nation that is ready to take over many things, including some of these projects that we are building.

I really think that if we don't begin analyzing sustainability at the front end—and I am going to make a formal request to you that every project that is being built right now—whether it is a road, whether it is a healthcare center, whether it is a school—every project be analyzed right now for sustainability.

If it is obvious it is not going to be sustained, I really believe you have to pull the plug. I mean, this is hundreds and tens upon billions of dollars have just gone down a rat hole because we didn't think about what happens when we are finished building it. I think it is really important.

This is the hardest question, and you and I talked about this. What are the conversations that are ongoing and what is the planning that is ongoing about how Afghanistan, with their very meager gross national product (GNP), very meager GNP, how in the world do they afford what we are building them, both in the projects and, more importantly, this army that we are building for them?

It is very difficult for me to figure out what happens to this army when we leave because they can't afford it.

Mr. PANETTA. Senator, first of all, on your first point, I want you to know that if I am confirmed, I really do want to work with you closely with regards to the contracting issue in order to ensure sustainability. I share all of your concerns. I know why it has happened. I know how that has developed. But at the same time, I don't think we have paid enough attention to that issue, and I would like to work with you in trying to improve that whole aspect.

With regards to the issue of Afghanistan, again, I share your concern about where are they going to draw the resources they need not only to sustain the army and the police force, but to be a country, to be able to carry on their responsibilities. I think that is going to be part of the governance challenge that we are going to face there is to ensure that, as a nation, they begin to develop the resources, develop the revenues that they need in order to be able to govern that country. That is going to be part of it. Otherwise, it is not going to work.

Senator MCCASKILL. Is there a plan in place for short term and long term? Is there some kind of plan that is in the works that we will be putting I think it is \$13 billion this year? What is the plan for 4, 5 years from now? Is there a plan that we will continue to spend upwards of \$5 billion or \$6 billion a year just keeping this army?

We are building them an army with a size and scope that is beyond—they have never had an army, a national army in Afghanistan. So this is new, and is there planning going on, joint planning or anything else that would indicate how this is going to look 2, 3, 4 years down the line in terms of what we have built?

Mr. PANETTA. Senator, I have not been fully briefed on what directly is being looked at in terms of that longer term. But let me get into that. If I am confirmed, I would like to look at that and then be able to give you a better answer.

[The information referred to follows:]

The administration is working to ensure a successful transition to the Afghan National Security Force (ANSF) having the lead responsibility for security throughout Afghanistan by the end of 2014.

We are making steady progress in developing the quantity, quality, and operational capacity of the ANSF. We remain on track to reach the envisioned end strength of 195,000 Afghan National Army soldiers and 157,000 Afghan National Police personnel. Our effort now include the development of logistical, engineering, communications, medical, and other enabling capabilities that the ANSF will need to support their own operations, as well as organic training and education capabilities they will need to sustain themselves by developing their future recruits. Our efforts also include the development of ministerial-level management and oversight capabilities necessary to lead and sustain the ANSF.

Detailed planning for long-term ANSF sustainment is an ongoing, active effort. The Combined Security Transition Command-Afghanistan is collaborating with the Office of the Secretary of Defense, the Joint Staff, and NATO to analyze the long-term requirements for ANSF capability in light of current fiscal constraints. We envision a continuing role for the United States and expect continued contributions from international donors. To that end, before retiring, then-Secretary of Defense Gates challenged our partners in the International Security Assistance Force to contribute a combined 1 billion euros annually to the NATO Afghan National Army Trust Fund.

Although international support for the ANSF will likely be required for some time to come, ultimately, Afghanistan must continue to increase its funding for its own security. This will depend on continued economic growth and governance in Afghanistan, which, in turn, will benefit from the security that a properly sustained ANSF can provide, as well as from the stabilizing effects that can result from a strategic partnership between Afghanistan and the United States and the continued presence of U.S. forces.

As our plans evolve, we will engage you and congressional colleagues on the details of this challenging effort.

Senator MCCASKILL. That is great. The only other topic is warning you that I will subject you to pop quizzes on the Wartime Contracting Commission's work. They have done some really good work. My colleague Senator Webb and I have worked very hard getting it established, and I think it is like many other commissions. Unfortunately, it is not getting enough attention, and really, where it needs to be front and center is going to be under your purview.

I am hoping that you will make sure that your immediate staff is aware of its work and takes it to heart. Because we have an awful lot of lessons learned that we have never learned. I think it is really important, as we try to do things with less money.

The only other issue I want to bring up with you today that I don't think has been discussed yet is just getting your commitment and your comments about what needs to be done and should be done as it relates to the problem of sexual assault within the military, women in the military that have had a great deal of difficulty accessing some sense of justice.

Mr. PANETTA. Senator, we talked about that together in your office, and I totally share your concerns. We have to have zero tolerance for any kind of sexual assaults in the military, and we have to allow the victims of those sexual assaults the ability to be able to complain, to have those complaints listened to, and to have the evidence that is necessary to be able to establish those cases.

There are a lot of steps that need to be taken, and I look forward to working with you and with others in the Department to make sure that we protect women, who have served so well in the military these days.

Senator MCCASKILL. Thank you so much for your time here today. Most of all, thank you for loving your country so much that you are willing to take on this incredibly big, huge, and important responsibility.

Mr. PANETTA. Thank you.

Senator McCASKILL. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator McCaskill.

Senator Cornyn.

Senator CORNYN. Thank you, Mr. Chairman.

Director Panetta, good to see you.

Mr. PANETTA. Nice to see you.

Senator CORNYN. As you and I discussed in my office, and thank you for coming by recently to talk about some of my concerns with the financial management problems at DOD, I think most Americans would find it shocking that DOD is unable to produce timely, accurate, and complete information to support management decisions.

As we also discussed, the law of the land requires DOD to be able to complete a clean audit by 2017. Again, I think that would be shocking to most people.

But I appreciate your response on page 74 of your advance policy questions, the answers you submitted to our questions that you said achieving clean audit opinions would be one of your top management improvement priorities. Certainly, you have the background and experience to move the Department in that direction and to complete that requirement of the law.

I am advised that the Marine Corps actually is doing a relatively good, compared to the other Services, job in this area, and they are experiencing a 3-to-1 return, on for every dollar they spend on improving financial management, actually getting a good return on that investment. I know that it may be the attitude, there may be strong institutional resistance at DOD—believe me, as many do and as I do—that their main job is to fight and win the Nation's wars, but that this is not a priority.

But you know and I know, we all know, the budgetary pressures the Department and others are going to be under as we deal with this unsustainable debt and these huge deficits is important. I think this is important to me and I know important to you to make financial management reform one of your important priorities.

Having said that, I would just ask you the straight-up question, do you agree with Secretary Gates when he said that the defense budget, however large it may be, is not the cause of the country's fiscal woes?

Mr. PANETTA. I agree with that. I think it isn't. It is by no means the cause of the deficits, the huge deficits that we are incurring today.

Senator CORNYN. The President has requested \$671 billion for fiscal year 2012. That is a lot of money, \$671 billion. I know that there is going to be room for the Department to share in some of the budget cuts that are going to be on the table.

But of course, as you and I have discussed, I hope that this is not seen as an opportunity for those who want to whack the Pentagon budget to do so in a way that will impair our ability to defend ourselves or protect our national security interests. I am sure you share that view as well, don't you?

Mr. PANETTA. Yes, I do.

Senator CORNYN. Let me just ask a question, you have the benefit of great experience and long experience with Government. But

that also means you have a record that I want to ask you about. Of course, you were President Clinton's Chief of Staff and Director of OMB before that. You played a big role in the budget decision-making during the presidency of President Clinton, overseeing a major reduction in DOD procurement spending, including a 13.4 percent decline in fiscal year 1994.

Some have called that a procurement holiday. Others have said we were cashing the peace dividend, even though we still had many threats to our country. I want to give you an opportunity, if you would, to explain your role in those cuts and whether you think they were deeper than they should have been or just please give us your perspective. Because, frankly, I hope we don't try to cash a peace dividend in 2012 while we are engaged in two and a half wars.

Mr. PANETTA. As Director of OMB, obviously, I was given the responsibility by the President to try to achieve significant savings as part of the economic plan that was adopted by Congress that, by the way, reduced the deficit by almost \$500 billion. I think that, plus other agreements that were made in the Bush administration and, ultimately, with the Republican Congress all contributed to our ability to achieve a balanced budget.

Specifically, with regards to the defense area, my responsibility as OMB Director was to provide a number to the Defense Secretary and allow the Defense Secretary and those at the Defense Department to determine how best to try to achieve those savings. I do understand that was part of what they proposed.

But looking at it in hindsight, it might not have been the best way to achieve those savings, but it was a decision that was made at the Defense Department.

Senator CORNYN. Turning to Afghanistan, I know there is a lot of comment and favorable comment about your involvement, and I think you deserve credit for your part played in taking down Osama bin Laden. Congratulations to you and the President's national security team for that accomplishment.

But I get the sense that people are sort of prematurely declaring that the fight is over because we have degraded al Qaeda in Afghanistan. I am glad to hear you point out that they have metastasized to other parts of North Africa and the region.

But I just want to ask you in particular, I know there are other groups that may not be as familiar to Americans as al Qaeda, like Lashkar-e-Taiba and other groups. Could you just talk a little bit about the Islamic jihadist groups that are out there that could easily morph into a threat as dangerous as al Qaeda?

Mr. PANETTA. There are a number of terrorist groups that are out there, Senator. Obviously, al Qaeda is the one that we are principally concerned about because they attacked this country, and they continue to plan to attack this country.

But there are interrelationships that they have with other terrorist groups. The Haqqanis, for example, are a group that has relations with al Qaeda. They, in turn, obviously are conducting attacks in Afghanistan. There is a group called Tehrik-i-Taliban Pakistan, which is another group in the FATA that has relationships with al Qaeda that conduct attacks, not only plan attacks

against us, but also have conducted attacks within Pakistan as well.

There is Lashkar-e-Taiba which is a terrorist group that focuses on attacks largely in India but have been known to discuss attacks elsewhere as well.

If you move to the area of Yemen, there, al Awlaki who is associated with al Qaeda, but nevertheless I think represents a real threat on his own because he is very computer oriented and, as a result of that, really does represent the potential to try to urge others, particularly in this country, to conduct attacks here. So that is a concern.

We have Somalia, where al Shabaab operates in Somalia. Although it is primarily located in Somalia, we do have intelligence that indicates that they, too, are looking at targets beyond Somalia. Then if you add to that Hezbollah and Hamas, you can see that you have a pretty good array of terrorist groups to confront.

Senator CORNYN. Thank you very much. My time is up. But I think it is important that the American people understand the threat to our country, our national interests, our interests of our allies and American citizens extends beyond solely al Qaeda. I appreciate your answer.

Thank you. I look forward to working with you.

Chairman LEVIN. Thank you, Senator Cornyn.

Senator Gillibrand.

Senator GILLIBRAND. Thank you, Mr. Chairman, for this hearing.

Thank you so much, Mr. Panetta, for your extraordinary public service to our country. I am extremely grateful.

I want to touch upon three issues, if we have time. I want to explore a little more on Pakistan, al Qaeda in the Arabian Peninsula (AQAP), and then go to a little bit of cyber warfare.

Chairman Mullen stated a few months ago that it is fairly well known that elements of the Inter-Services Intelligence had a long-standing relationship with the Haqqani network. Obviously, addressing the Haqqani network is really important to reaching our goals in Afghanistan.

Yet a week ago, he reported that Pakistan has agreed to go after the terrorist group. How will you judge the seriousness of Pakistan's commitment to that effort?

Mr. PANETTA. I think there is probably a simple test, which is whether or not the Haqqanis are continuing to go into Afghanistan and attacking our forces. It seems to me that if they have an influence over the Haqqanis, that they could urge them to cease fire and to stop those kinds of attacks.

Senator GILLIBRAND. I appreciated your testimony earlier about the nature of al Qaeda, that it has fundamentally metastasized, and in fact, many believe that al Qaeda in the Arabian Peninsula is perhaps far more dangerous than any other aspect of al Qaeda today.

You also mentioned that al Qaeda works in a very diffuse way, that oftentimes, it is inspiring groups like al-Shabaab in Africa and AQAP in Yemen. Of the three terrorist attempts on our homeland since September 11, the one on New York came out of Pakistan, the Christmas Day attempt on Chicago from Yemen, and the Fort Hood massacre motivated out of Yemen. Al Awlaki recruits online,

including from Europe and the United States, and we need to focus on a smart strategy to address these threats.

I support your view that we have to take these threats head-on and we have to make them very much part of our mission. I want to understand why in Yemen our approach is so different than that of Afghanistan. Perhaps not in this setting, but to talk a little bit about what some of your long-term strategies are to deal with the fact that al Qaeda has changed so much.

Mr. PANETTA. With regard to specific operations, I would have to do that in another forum. But just generally, I think our approach has been that because of these nodes that have developed, our approach has been to develop operations in each of these areas that will contain al Qaeda and go after them so that they have no place to escape.

So that we are doing that in Yemen. It is obviously a dangerous and uncertain situation, but we continue to work with elements there to try to develop counterterrorism. We are working with Joint Special Operations Command as well in their operations. Same thing is true for Somalia and with regards to al Qaeda in the Islamic Maghreb in North Africa, we are working with both the Spanish and the French to develop approaches there that will contain them as well.

I think we have at the CIA tried to develop a more comprehensive strategy to kind of look at all of those nodes, look at all of those threats, and not just focus on the FATA or Pakistan, but focus on all of those threats in order to try to deal with it.

Senator GILLIBRAND. Right. Now, obviously, Yemen is under substantial turmoil, and we don't know whether the government survives or not. Do we have strategies in place to make sure that if there is a transition that we are very knowledgeable about what military assets are there, what will happen to them? Have you engaged the Saudis or any other potential allies in what we can do there to protect against future growth of terrorism?

Mr. PANETTA. Again, with regards to specific operations, I really have to discuss that in another forum. But it is a very uncertain situation. It has been destabilized, and yet we are continuing to work with those individuals in their government to try to go after AQAP, and we are continuing to receive cooperation from them.

At this point in time, I would have to say that while, obviously, it is a scary and an uncertain situation, with regards to counterterrorism, we are still very much continuing our operations.

Senator GILLIBRAND. Last, if I still have time, Mr. Chairman, I appreciated the testimony you gave earlier, Senator Reed asked about it and others, about cyber terrorism, cyber crime, cyber attacks, and cyber warfare. I appreciated the fact that the statement was made that a cyber attack could well be a declaration of war, and you and I had a chance to talk about this in some respects.

Can you share with us any of your vision, design, goals with regard to how we create a greater platform for cybersecurity and cyber defense? In particular, I have worked with Senator Hatch on creating some international protocols to create alliances and working relationships with both allies and nonallies on how to begin to have an ability to enforce laws against cyber attacks, cyber crimi-

nals, cyber terrorists, and any other form of cyber mischief. I would love your thoughts on what you can share with us.

Mr. PANETTA. Senator, as we discussed in your office, this is an area of great concern for me because I think what I have witnessed at the CIA and elsewhere is that we are now the target of increasing attacks that go after our systems, and it is extremely important for us to do everything we can to confront that threat.

Obviously, I have a great resource with the NSA that has tremendous expertise and tremendous knowledge in this area. What I would like to do is to develop an even more effective force to be able to confront cyber terrorism, and I would like to work with you on the effort to try to develop those kinds of relationship not only here, but abroad, so that other countries can work with us in this effort.

We talk about nuclear. We talk about conventional warfare. We don't spend enough time talking about the threat of cyber war.

Senator GILLIBRAND. Thank you.

Last, I just want to thank you for your testimony today about your priority to look out for the men and women serving in our armed services and their families. I think not only must that be one of your primary responsibilities, but I appreciate that it is in the forefront of your mind.

My time has expired. I will just leave you with I hope you continue that focus and particularly focus on the issue of housing. Because a lot of troops are coming back from various missions, and Fort Drum and other places around the United States really have inadequate housing supply. I hope that you can address that in a perhaps more aggressive and more nuanced way.

Thank you so much, very much for your testimony.

Chairman LEVIN. Thank you, Senator Gillibrand.

Senator Collins.

Senator COLLINS. Thank you. Thank you, Mr. Chairman.

Director, you certainly deserve the widespread accolades and expressions of gratitude that you are receiving from virtually every member of this committee today, and I want to add my own thanks for your willingness to continue to serve our country during such a difficult time.

But like my colleagues Senator Graham and Senator Brown, now the hard questions start. I want to start with Libya.

You have repeated today the administration's goal that Colonel Gaddafi must go. But what then? If there is any painful lesson that we have learned from our experience in Iraq, it is that if we do not have a plan in place after we have deposed a tyrant, that chaos and violence ensues.

Do you have confidence that we have a plan for dealing with Libya post Gaddafi, and do we even really know who we are dealing with in the opposition?

Mr. PANETTA. I know that Secretary Clinton is spending a great deal of her time working with our allies to respond to that concern, to try to work with those in the opposition who have come together in the consuls that they have developed there, to try to work with them in terms of greater support so that if they do, in fact, have to take control of the country, that they will have that capability.

What you have raised is a legitimate concern, and it is an area that we have a lot more work to do in order to ensure that if Gaddafi does step down that we can ensure that Libya will be a stable country.

Senator COLLINS. It really concerns me, particularly when you look at the leadership of al Qaeda and the Libyan presence there, if you look at the number of foreign fighters in Iraq that have come from Libya. I just don't feel any confidence that we know what comes next.

Mr. PANETTA. The opposition, obviously, has been made up of various tribal groups that have come together, and there are concerns about some of the other influences that are now trying to impact on the opposition. It is something that we are watching very closely, but I do think that if we can get Gaddafi to step down that I am confident that there are enough leaders in the opposition who can provide, hopefully, that continuity.

Senator COLLINS. Let me next turn to Afghanistan. No one wants to lose Afghanistan, and all of us are so mindful of the enormous sacrifices that our military men and women have made in Afghanistan and the enormous amount of taxpayer dollars that have been spent.

Senator Brown asked you a key question today about what is our mission? You talked about the goal of having Afghanistan be a stable state, and that certainly is something that I want also. But to me, that seems to be a never-ending mission. I don't see how we get to a stable state in Afghanistan.

Let me give you an example. A key to our transition in Afghanistan, the key to our troops being able to come home is the development of a competent, aggressive Afghan security force, and we have made a lot of progress in that area.

But I look at the cost of maintaining the Afghan security force. In this year's presidential budget request, it is \$12.8 billion. The total Afghanistan gross domestic product (GDP) is about \$30 billion, and 97 percent of Afghanistan's GDP is derived from spending related to international military and donor community presence.

When I look at that imbalance, I don't see how Afghanistan is ever going to be able to even afford its own security forces. That says to me that we are going to have to continue to be a major contributor to paying for those security forces forever, virtually. Tell me how this ends. I just don't see how it ends.

Mr. PANETTA. I understand the concerns that you have raised, Senator, and I think we all share those concerns. I guess I can only say, having served on the Iraq Study Group, there was a moment in time when I had a lot of the same concerns about Iraq and whether or not Iraq would ever be stable enough to be able to draw down our forces there.

While Afghanistan is a very different country and has a very different history, the fact is that over the last few years, I have seen progress made with regards to governance in some of the key areas, with regards to security, with regards to the role of the Afghans in participating with our forces to try to secure area. They have gotten better.

Whether or not, in the end they are going to be able to develop the resources, develop the revenues, develop the governance that

needs to be done, those are major questions. But I think if we stick with it, if we continue to provide help and assistance to them, that I think there is going to be a point where Afghanistan can control its own future. We have to operate on that hope.

Senator COLLINS. Finally, let me echo the concerns that my colleagues have raised about whether the budget constraints, which are very real, are going to drive our military requirements rather than vice versa. This is an issue we discussed in my office.

This year, when the independent panel looked at the Quadrennial Defense Review (QDR), it concluded that the QDR had been molded by the budget rather than being what it is supposed to be, which is an unvarnished assessment of what our military requirements are. I am particularly concerned about the gap when I look at the Navy's shipbuilding budget. The Chief of Naval Operations has testified before our committee that we need, at a minimum, a 313-ship Navy, and we know the 313-ship goal is much smaller than the actual requirement that our combatant commanders have for ships.

Indeed, there was a recent report just 2 months ago from the Navy on the ballistic missile defense (BMD) force structure requirements that states that the Navy currently does not have the capacity to meet the demands of our combatant commanders for BMD capable ships. I am very worried about that gap in this time of budget constraints. I am worried that the Navy has yet to complete the contracts on the DDG-1000, the second and third ships.

What actions do you think need to be taken to help close the gap between the 285-ship Navy today and the, at a minimum, 313-ship requirement?

Mr. PANETTA. I strongly believe that the Navy has to project our force throughout the world and that the Navy is obviously crucial to that mission. I agree with the ship numbers that have to be developed for the Navy in order to be able to do that.

I think the key here is going to be something that has happened in your own State, which is that shipbuilding operations have to develop greater efficiencies. Yours is a great example of having developed those kinds of efficiencies that helps us on the cost control side and at the same time allows us to continue our shipbuilding capability.

I do think that greater competition, greater presence of an industrial base here that deals with these issues will provide the kind of cost savings that we will need in order to fulfill that mission.

Senator COLLINS. Thank you, and I look forward to working with you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Collins.

Mr. PANETTA. Senator, I don't know if you are going to take a break. But I just—

Chairman LEVIN. Yes. I think it sounds to me like we are going to take a break. [Laughter.]

But this will not be a lunch break. This will just be a very brief 5-minute break, and Senator Blumenthal will be next. Just take a very quick break and then back here. We will finish the questions, and then we will have a lunch break.

Mr. PANETTA. Thank you. [Recess.]

Chairman LEVIN. Senator Blumenthal?

Senator BLUMENTHAL. Thank you, Mr. Chairman.

Mr. Panetta, thank you for answering all our questions, for your extraordinary service, and for your very powerful and eloquent testimony today and your very responsive answers to all of the issues that have been raised.

I want to second the sentiment that has been expressed by Senator Graham, which is I can't wait to vote for your confirmation, and I appreciate your willingness and patriotism to take on this very tough assignment. Also to second Senator Graham's views, and I think they are widely shared, that we need fundamental and far-reaching reform in our methods of acquiring and terminating weapons programs.

Would you agree with that?

Mr. PANETTA. Yes, I do.

Chairman LEVIN. I think, Senator Blumenthal, that probably Director Panetta would also agree that Secretary Gates can't wait for us to vote for Director Panetta's confirmation. [Laughter.]

Mr. PANETTA. I think that is fair to say.

Chairman LEVIN. That will not be taken out of your time, by the way.

Senator BLUMENTHAL. Thank you, Mr. Chairman.

Speaking of Secretary Gates, I hope and assume you would agree with him that the second engine for the F-35 is unnecessary and should be terminated?

Mr. PANETTA. I support that position.

Senator BLUMENTHAL. Also that we need to continue the sub building program at the rate of two per year, which I think is fairly noncontroversial?

Mr. PANETTA. That is correct.

Senator BLUMENTHAL. Would you also agree with Admiral Mullen that talking about a secure and thereby free America, that the greatest threat to our security today is the national deficit?

Mr. PANETTA. There is no question in my mind that the size of the deficit we are confronting represents a threat to our security.

Senator BLUMENTHAL. That we need to address that problem without excessive cost cutting in the defense budget?

Mr. PANETTA. Obviously, defense needs to play a role. But when you are facing that size deficit, everything has to play a role.

Senator BLUMENTHAL. I want to talk for a moment about one of the causes of those costs in both our defense budget and our veterans programs, and they are a cause of cost that is not necessarily in the headlines or even reported, and those costs have to do with tobacco use and tobacco addiction and the costs of tobacco-related diseases.

I know that the Defense Department is very much aware of these costs because, as a matter of fact, it asked all military personnel last year to make their 2011 New Year's resolution to quit smoking. In fact, about \$1.6 billion a year in DOD costs are related to medical care that is provided for tobacco-related diseases. Among the retirees from our military for veterans, about 80 percent of the \$5 billion in annual costs of treating pulmonary disease are directly attributable to smoking.

The costs of smoking simply in dollar terms, medical treatment, are at least \$5 billion a year, not to mention the impacts on readiness, which are, in effect, less fit, less physically able military personnel, more likely to sustain injuries, more likely to be stressed out, more likely to be dependent and addicted to nicotine. The stark fact is that military personnel are 50 percent more likely to smoke and more likely to use tobacco products than their civilian peers.

My question to you is both an immediate and a longer-range one. First, whether you have any suggestions as to what can be done immediately? Second, would you be willing to commit the resources and interests of DOD to addressing the problems of nicotine addiction and tobacco use and the related medical impacts?

Mr. PANETTA. Senator, if I am confirmed, one of the areas I have to focus on is the health costs that are impacting here. I think the area that you have just defined is one area that we do have to pay attention to in terms of its implications on health and its implications on cost. I would look forward to working with you to try to develop an approach that would allow us to, again, not only deal with smoking, but deal with other threats to healthcare that impact on not only our soldiers but, frankly, that impact on Americans.

Senator BLUMENTHAL. On the families of our soldiers and our veterans?

Mr. PANETTA. That is right.

Senator BLUMENTHAL. Because of not only the immediate effects of smoking or other kinds of health problems, but also the related impacts on families.

Mr. PANETTA. No, that is right. I think smoking, good nutrition, good exercise. I mean, there are a number of areas that I think need to be focused on as part of the solution to dealing with healthcare costs.

Senator BLUMENTHAL. I would welcome the opportunity to work with you on those issues.

Mr. PANETTA. Thank you.

Senator BLUMENTHAL. Let me say while we are talking about veterans, I have offered a measure, a number of other Senators have, to broaden and deepen the commitment of our country to caring for issues relating to employment, homelessness, healthcare of our veterans and would hope that DOD would also increase its commitment in that area and hope under your leadership, it would, given your very moving and powerful remarks about the need to take better care of our military personnel.

Mr. PANETTA. Senator, I really do feel an obligation to those that served, and I don't treat this like a situation where once you have completed your service and you become a veteran that somehow you are somebody else's responsibility. I think we have an obligation to make sure that people are treated right once they have served this country not only now, but in the future.

Senator BLUMENTHAL. Finally, because my time is close to expiring, let me ask you one last question. The ammonium nitrate fertilizers that are the cause of probably the vast majority of the IED very tragic and unfortunate injuries to our troops are transported from Pakistan, and I wonder what can be done to stop that flow

of fertilizer, the ammonium nitrate substances that are the basis for those explosive devices?

Mr. PANETTA. Senator, that is a continuing concern for us, and it is not so much the transfer of the material, but it is actually the development of IEDs, the explosives themselves, that we see taking place in Pakistan that make their way into Afghanistan. We have to take a number of steps not only with the Pakistanis, but also trying to check at the border to make sure that we do everything possible to stop that flow of IEDs. It is a very real threat, and a lot of that is coming across the border.

Senator BLUMENTHAL. Thank you very much, and I look forward to working with you. Thank you once again for your service to our Nation.

Mr. PANETTA. Thank you.

Chairman LEVIN. Thank you, Senator Blumenthal.

Senator Portman.

Senator PORTMAN. Thank you, Mr. Chairman.

It is a pleasure to have you before the committee. As I told you, Mr. Panetta, when we had the opportunity to speak, I am delighted to see that a former OMB Director could actually make something of himself. You have done a great job as CIA Director, and I know that you have had the opportunity today to answer some tough questions, but also I am sure that the tone has been appreciative and respectful.

I am most concerned on the budget front and particularly with regard to our major acquisitions programs. The cost growth, the time delays have been particularly troubling to me. On this committee over the 4 or 5 months, we have heard lots of testimony, and this is at the same time, of course, that we are talking about not just restraining spending but actually putting everything on the table to deal with our historic deficits and the debt overhang that is affecting our economy so directly and affecting our future.

This concerns me greatly. It also, I think, impacts our national security because our men and women in uniform need the best equipment and they need it in a timely manner, and they are not getting it.

A couple of data points, and you know them well. Cost overruns annually now are, in some years, over \$300 billion a year. This is, as compared to just a decade ago, when annual overruns were on average about \$40 billion year. The average delays almost 2 years in delivering initial capabilities for these programs.

The reasons are varied. Sometimes it is internal DOD processes, I think. Sometimes it is these contracting processes that still aren't working, and these practices have been subject to a lot of GAO reports, directives, and public and private studies. There has been some good work done on it, and the chairman has done some good work on it, but we still have a long way to go.

This would be one of my major concerns. Given your background and experience, I think you are well qualified to address it. I would like to hear a little about that.

Senator Graham apparently talked earlier today about cost-sharing arrangements and the potential for that. I think that is an interesting idea. On the Joint Strike Fighter program alone, we heard testimony before the committee that we are 80 percent over

cost from the original estimates. That is over \$150 billion and 30 percent more than the current baseline that was just set in 2007.

After 15 years of development and 2 years into operational production, we still don't have a stable design. Again, I think that impacts our warfighters as well. I realize the Defense Department is working on implementing the Systems Acquisition Reform Act, and the better buying power initiative is ongoing. But, frankly, there is a lot more that needs to be done.

Could you talk a little about this and particularly the benefits of competition, as we talked about privately, and finding efficiencies?

Mr. PANETTA. Senator, because we share a common background, I think we understand the costs that are involved in this area. I think we are dealing with a culture that has developed that somehow we have to change. I know during the period from September 11 there has been an awful lot of money that has been put into the defense budget, a lot of equipment that has been developed during that period. I think at the same time, a lot of it has certainly been worthwhile, been important to our national defense. But a lot of bad habits have developed during that period.

I think there is an assumption that somehow this thing can play out and that the cost can increase as dramatically as you have pointed out in some of these areas and that somehow somebody is still going to pay the bill. I think what we have to do is to make clear that those who are involved—and they are great companies; they are good people; a lot of them do a great job—that they have a responsibility here to be able to work with us to develop better competition, to do some of the things that Senator Graham mentioned in terms of absorbing some of the costs of development.

The work that they are doing is not just money in their pocket. What they are working on is important to the national security of this country, and I think what we have to do is work with them, work with contractors, work with others to try to develop approaches that can try to shape the costs that are involved and the delays that are involved here.

I know this is tough. I know that some of this military technology is extremely intricate. It involves a lot of complicated work. But I am absolutely convinced that there has to be a way to achieve greater cost savings, and I hope to work with you and others to try to see what we can do to do that.

Senator PORTMAN. I am encouraged from our conversations and this testimony today that you are prioritizing that. Ultimately, if we don't fix it, we will be robbing from some of the fundamental responsibilities you would have as Secretary of Defense to protect our country. Because looking at some of these projections over the next decade or 2 decades, if we don't begin to figure out how to deal with these overruns on the acquisition programs, they will quickly take the entire current defense budget.

We need to be sure that our men and women in uniform are getting what they need and be sure that this and the healthcare issue, which I know you have also addressed here today, is the other one where I think you look at the huge cost increases there, has to be handled in a way that, again, ensures that the focus is on our national security concerns.

Quickly, on trade agreements, as you are aware, we are hoping soon to be reviewing proposed export opening agreements with the Republic of Korea, with Panama, and with Colombia. This has been increasingly clear in the post Cold War environment, all elements of our national power must be used to provide for our security and build effective allies, and these three countries are great allies.

In response to prepared questions, you noted that the U.S.-Republic of Korea alliance remains one of the cornerstones of U.S. strategy in the Asia-Pacific. I found that interesting, and you have pledged to stay in close contact with your counterparts there and build on the relationships laid by Secretary Gates.

You also noted the importance of the Government efforts to support DOD activities providing training, equipment, and so on to our Central American partners, including Panama, given the importance of the canal particularly and the U.S. Southern Command's (SOUTHCOM) work there.

Also with regard to Colombia, in testimony earlier this year, the commander of SOUTHCOM described our trade agreement with Colombia as "a very positive, beneficial aspect for our cooperation because of a growing capacity to support the capabilities of Armed Forces and law enforcement."

My question would be to you, how do you assess the value from a security standpoint of building upon these commercial ties through these trade opening agreements with these allies, and do you agree that these enhanced trade and investment agreements is one way to combat the threats that these states face to their security and to the broader region?

Mr. PANETTA. Senator, I think that when it comes to protecting our security, there are a number of areas that have to be addressed, and one of those, obviously, it is not just the military responsibility, but there is an economic side of this that plays a very important role in terms of promoting better security.

The ability of these other countries to develop trade with us, to develop their economies creates greater stability within those countries. I think that is a fact. To the extent that we can help promote that kind of trade, that we can promote that kind of economic development, I think it assists these nations in their ability to achieve stability.

Colombia is a good example. They have done a great job going after narco-trafficking. If we can help, be able to help them develop their economy, that could become another added factor in providing greater security in that region. The same thing is obviously true for Korea.

Senator PORTMAN. Do you think ratification of these three agreements would be positive for our national security interests?

Mr. PANETTA. Yes, I would.

Senator PORTMAN. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Portman.

Senator Webb.

Senator WEBB. Thank you, Mr. Chairman.

Director Panetta, again, I appreciate your having come by my office to have detailed conversations on a number of areas. Having had the honor and the privilege of meeting with Caspar Wein-

berger, when he was Secretary of Defense, on a daily basis for 4 years, I am well aware of the challenge of your job. I honestly believe that, other than the presidency itself, this is probably the most difficult and complicated job in our Federal Government, and I wish you the best.

I also appreciate or was gratified to hear your response to Senator Collins with respect to the need to rebuild our Navy, to get the Navy's numbers up. I think as the situation in Afghanistan and Iraq allows us more leeway in terms of how we shape the DOD budget, we really do need to do that.

If you are looking at the size of the Navy right now, I think it is about 282 ships, and the ground floor goal of 313 and all of the interests, the vital national interests that we have with respect to the stability of East and Southeast Asia, it is going to be a very important thing for us to look at. In that regard, I would like to raise two points with respect to the situation in East Asia, and then I also would like to ask you a question about Libya.

First, when we are looking at the tempo in East Asia, we see clearly that Chinese military activities have dramatically increased over the past 15 or 16 months. The two most glaring examples of that were the set-to with Japan in the Senkaku Islands about a year ago, and then most recently, the Chinese naval vessels actually cutting the cable of a Vietnamese ship that was exploring oil, the possibility of oil in the South China Sea.

These incidents are basically related to sovereignty issues, and they are not only national security issues, they obviously have downstream economic consequences. But to me, they clearly talk to the commitments that we have for stability in this region.

We have made these commitments. We are the key, I think, to the strategic balance in that region. I am wondering if you are of the same mind as Secretary Clinton and Secretary Gates were last year, a year ago, when they pretty strongly stated that we are not going to be deterred from protecting the interests of countries in international waters in that part of the world?

Mr. PANETTA. Very much. That is an extremely important region. We have to have a presence there in order to protect our own interests and to work with other countries in that area. In order to do that, there has to be respect for international law, and there has to be freedom of the seas so that we can do our job.

I think it is important to have a relationship with China, but they also need to understand that by trying to advance in the China Sea, they can't interfere with our ability to navigate in that part of the world.

Senator WEBB. Or to unilaterally address sovereignty issues with respect to other countries?

Mr. PANETTA. That is correct.

Senator WEBB. Thank you.

That also gets to the very important question of our basing system in this part of the world. I know Chairman Levin addressed this, and I heard your response to that. I think the timing of addressing these basing issues, particularly with respect to the Japanese, is vital. This has been going on for 15 years, and we keep kicking the can down the road on it.

We are not going to have stability in Asia if we don't have it in Northeast Asia. It is the only place in the world, as you well know, where the direct interests of Russia, China, Japan, the United States intersect, and the Korean Peninsula is right in the middle of all of that. I hope that we can work with you on the suggestions that Chairman Levin, Senator McCain, and I brought forward in order to have a timely solution of that basing issue.

Mr. PANETTA. No, I really appreciated the conversation we had in your office. I know this isn't—it is not an easy issue. That is why the can has been kicked down the road, I guess, all of these years because of the cost and the politics and the diplomatic problems involved with each of these decisions.

I think it absolutely has to be addressed. We have to establish a stable situation there. We can't have a situation in which we are just playing this year to year. I think we need a long-term solution, and I really want to work with you and the chairman and others to try to find a solution.

Senator WEBB. I thank you for saying that. Because I do believe this is fixable and have spent many years thinking about this. I believe what we were able to come up with is at least the right approach, and it could be done in a timely way if we could get people to work with us on doing that.

With respect to the situation in Libya, I take your point during your exchange with Senator McCain that it is the President's responsibility to ensure national security. At the same time, we have a situation where when the President unilaterally decides to begin a military operation and then continues it, where, clearly, I think as a former Member of Congress, you would agree that Congress needs to be involved in shaping downstream when something like that occurs?

Let me say it another way. No one would disagree that with the President's authority to unilaterally order military force if the country was under attack, under imminent threat of attack, invoking the inherent right of self-defense, which is actually I think what we are doing in a lot of these strikes, even places like Yemen. Or if we are coming to the aid of an ally based on a treaty commitment, or we are defending Americans, protecting Americans who are in distress.

But when you have a situation like in this case where the justification is humanitarian, you can see the potential for a very broad definition of what a humanitarian crisis is. Once that decision is made unilaterally by the President, it needs to be subject to the review and the direction of Congress, in my view.

Mr. PANETTA. Senator, it has been my experience, both as a Member of Congress and member of administrations, while obviously that constitutional power does rest with the President, that once those decisions are made, in order for those decisions to be sustained, that it is very important to work with Congress, seek the best advice and counsel of Congress, and hopefully to get Congress' support for those actions.

Senator WEBB. I did hear you agree with Senator McCain or to his comment that nobody is thinking about putting American ground forces in Libya?

Mr. PANETTA. That is correct.

Senator WEBB. I assume that also means after the fall of the Gaddafi regime?

Mr. PANETTA. As far as I know, no one is discussing any boots on the ground there—at any time.

Senator WEBB. The House passed a provision to that effect with 416 votes, and I have introduced a provision here. I just think we have our hands full, and it is not something we should be doing in the future in that part of the world.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Webb.

Senator Shaheen.

Senator SHAHEEN. Thank you, Mr. Chairman.

We are almost done, Director Panetta. I was listening to Senator Nelson's litany of the challenges ahead of you once you get confirmed, and I certainly intend to vote for that. I think you will get confirmed. I wondered, "Hmm, why does he want to do that?" But like everyone on this committee, I am very grateful that you are willing to do that and appreciate your patriotism and commitment to the country. Thank you very much for that.

Mr. PANETTA. Thank you, Senator.

Senator SHAHEEN. I also very much appreciated the opportunity to sit down with you and your willingness to listen to some of our particular concerns in New Hampshire and was very pleased to hear that you are familiar with the work of the men and women at the Portsmouth naval shipyard and was pleased to hear your comments to Senator Collins about your commitment to address the backlog that both the shipyard and other shipyards around the country are facing.

I was also very pleased that you were willing to listen to the good work that has been done by New Hampshire's National Guard deployment support program. Listening to your commitment today to better serve men and women after they get out of the military, I hope you will look at programs like New Hampshire's and some of the other States that have been so successful. Because not only are our National Guard and Reserves going to continue to play a greater role in our defense, but there is some very good data that shows how successful these programs have been.

I think they serve as a good model for the rest of the Military Services to look at. I hope you will do that.

Mr. PANETTA. Thank you, Senator.

Senator SHAHEEN. One of the reasons that we have been so successful in developing the technology for our national security and have given us really our superiority in terms of our military might around the world is because of our national defense technology sector. New England and New Hampshire have been a knowledge center for that defense technology sector, and I wonder if you could speak to how DOD or what DOD is currently doing to ensure that there is a sustained commitment to that defense technology sector so they will continue to be there as we need them in the future?

Mr. PANETTA. Senator, I haven't been fully briefed on all of the efforts to try to deal with preserving that kind of technology. But if I am confirmed, I just want you to know that I am a very strong believer that if we are going to have a strong defense in this country that we have to have industries here that are American. We

have to have technology capabilities that are American. We have to be able to have a base of support in this country in order to maintain our defense systems.

It doesn't mean that we don't deal with our allies. It doesn't mean that we try to negotiate agreements with them in certain areas. But if we are going to protect our national defense, we have to protect our industrial base. We have to protect our technological base. We have to be able to protect the capabilities that we need here in order to make that happen.

Senator SHAHEEN. Thank you very much for that commitment. A piece of that is the research and development (R&D) needs, and obviously, DOD has been a very important part of ensuring that that R&D gets done. Given the budget constraints that we are facing, how do you see that affecting our ability to continue to ensure that the R&D that we need is done?

Mr. PANETTA. Again, I don't think we can do this job without investing in R&D as part of the process of making sure we are at the cutting edge for the future.

I recognize that, obviously, as part of the effort to look at the entire budget in order to achieve savings that all of those areas will be looked at. But my view is that if we want to protect the weapons systems, if we want to protect our capabilities for the future, we have to be able to have good R&D at the same time.

Senator SHAHEEN. Thank you.

In talking to some of those New Hampshire and New England companies that are part of our national defense manufacturing base, one of the concerns that I often hear from them, because they are often doing commercial work as well as work for the military, is their frustration with our export control system. As I know you know, International Traffic in Arms Regulations restrictions are onerous. In many cases, they are out of date. They were really designed for a Cold War system that no longer exists, and I know that Secretary Gates has been a real proponent of addressing that system.

I hope that you will be as committed, and I would ask how you see moving forward an agenda that updates our export control system in a way that both protects our national security, but also recognizes that we need to be competitive globally?

Mr. PANETTA. I want you to know, Senator, that I share Secretary Gates' attitude here. I think we have to be able to develop 21st century approaches to this kind of exchange in order for us to be able to make sure that the technologies we have are, in fact, technologies that we are working with others to assure and to have.

Senator SHAHEEN. Thank you.

I know earlier you were asked about Iraq and whether we would continue to stay in Iraq if we are asked. Like others, I have been concerned about increasing violence in Iraq, about the recent casualties. We just lost someone from New Hampshire in the attack over the weekend. I wonder if you could talk to what we need to do to keep our focus on the efforts in Iraq, and assuming that we are not asked to stay, how we will deal with drawing down the remaining troops that are there?

Mr. PANETTA. We are, at the present time, on track to withdrawing our forces by the end of 2011. But I think that it is clear to me that Iraq is considering the possibility of making a request for some kind of presence to remain there. It really is dependent on the prime minister and on the Government of Iraq to present to us what is it that they need and over what period of time in order to make sure that the gains that we have made in Iraq are sustained.

I have every confidence that a request like that is something that I think will be forthcoming at some point.

Senator SHAHEEN. My time has expired. I would like to explore that more later.

Mr. PANETTA. Okay.

Chairman LEVIN. Thank you, Senator Shaheen.

Senator Udall.

Senator UDALL. Thank you, Mr. Chairman.

Welcome, Mr. Director. I was going to say good morning, but I realize it is the afternoon. Thank you for your patience.

I want to also, with everybody else on the committee, acknowledge your tremendous leadership, your personal friendship, and your willingness to take on yet another assignment, perhaps one of the biggest and most important in the Federal Government.

I think you and I share a concern about the country's fiscal trajectory. Of course, Secretary of Defense Gates has pointed out that this is a key threat to our national security, as had the Chairman of the Joint Chiefs, Admiral Mullen.

I know we are going to not support any cuts that will harm our capacity to secure our Nation or the well-being of our troops. But we are going to have to make some tough decisions. A broke country is a weak country. Conversely, a solvent country can be a strong country.

You have had to deal with this at the agency. That is, how do you balance the needs and the resources? I think we have all said, hey, everything has to be on the table. But I am curious what your thoughts are about what the right size is of our military and how do we determine what our mission ought to be?

I have two easy questions for you. What role do you believe that the American military should play in the world? As the senior military adviser-to-be to the President, when you are confirmed—I am going to be that optimistic—what would be a set of guidelines that you would use to recommend to the President whether military action is justified?

Mr. PANETTA. Obviously, I think that the United States exercises a unique role in the world by virtue of our leadership in the diplomatic arena, but also because of our military power, we are able to back that up. I think it is extremely important in today's world, where there are so many challenges and so many threats that we are confronting, that we maintain a strong military in order to deal with those kinds of threats.

It is not only the fact that we are involved in wars, but clearly, we are facing increasing turmoil. We are facing terrorism. We are facing other challenges. In my view, the United States plays a very unique role in the world as far as providing the kind of leadership that tries to advance universal rights, a peaceful approach to deal-

ing with the world that tries to advance good economic and political reform.

That is a unique role for the United States, and I think we need to continue to send that message and to continue to exert that leadership. For that reason, I think having a strong military is essential to that larger role that the United States plays in today's world.

We hope that others would work with us. We do, obviously, work with our allies. We work with NATO. We work with other nations. But there is no question in my mind that the United States is the fundamental leader right now in the world in a number of ways, and having the military strength to back up that kind of leadership is very important.

With regards to how we approach the use of force, I think there are several important guidelines. Number one, what is the threat to our national interests? What is our capability to be able to respond, our military capability to respond to that kind of a threat? Have we exhausted all other remedies and options to the use of force? Lastly, what are the prospects to get the support of not only Congress, but the American people in that effort? I think all of those things are important considerations.

Senator UDALL. Thank you for those thoughts, Director Panetta. I think this will be a topic of ongoing conversations, obviously, as we work to consider how, if we need to reconfigure DOD and how we are prepared in a world of insurgencies and cybersecurity needs, satellite systems that are very important to all of us. There is a real change underway.

I also hope that we will continue to do what we can to strengthen our relationship with China as it becomes more of an economic powerhouse. Hopefully, it will shoulder some of the responsibility on a worldwide basis because of its own self-interest, frankly.

Let me turn to energy. I think this has been an area of your interest as well. It is one of a deep concern, but I also think a great opportunity for us. Admiral Mullen has said saving energy saves lives. He recently pointed out that before we buy another airplane or a ship, we ought to look at what we can do to save the lives of our soldiers, marines, airmen, and sailors through our dependence on oil and other energy technologies.

What are your thoughts on what DOD can do to continue to push alternative technologies and reducing our dependence on foreign oil?

Mr. PANETTA. Senator, this is an area that I want to learn a lot more about in terms of how the Defense Department is approaching this. At least from some of the briefings I have gotten, I think the Defense Department really is a leader in terms of trying to develop better energy efficiency, and we need to be because we use an awful lot of fuel.

My hope is to continue those efforts and to work with you and others to try to determine what additional steps can we take, both in the development of weapons, the development of technologies, how we can better use clean energy, how we can better use some of the new forms of energy in order to reduce fuel costs at the Pentagon. But more importantly, in order to contribute to, hopefully, a cleaner environment.

Senator UDALL. I have just introduced a bill along with Congressman Giffords, I should say reintroduced a bill that we had put in the hopper in the last Congress, that would provide more direction to DOD. It has widespread support from particularly retired general officers and others, and I look forward to working with you and the chairman as we move to authorize the Defense Department's activities for 2012.

You are right. DOD's energy bill is about \$13 billion a year, and DOD uses more energy than most countries use, which stands out. But it is an opportunity. I don't see it as a burden. I see it as a real opportunity. I think you do, too.

Mr. PANETTA. I think it is.

Senator UDALL. I see my time has expired. But maybe for the record, I could ask one question and you could maybe give a brief response. Then if you want to expound on it for the record, that would be great.

I know 2014 is our date for Afghanistan, the full handoff. I do worry about and you know all too well about the safe havens and the sanctuary they provide for the Taliban. If we can't reduce those safe havens or, at best, eliminate them, what are your thoughts on what that means for the hopes of a resolution of the situation in Afghanistan?

Mr. PANETTA. I think we can only win in Afghanistan if we can win in Pakistan by reducing those safe havens. I think the two go hand-in-hand. The ability to achieve stability in Afghanistan is dependent on whether or not we can limit and, hopefully, stop the transfer of terrorism across that border.

Senator UDALL. Thank you, Mr. Director. You and both the chairman are my heroes because you have both been sitting here for some 4 hours and with great patience and articulate answers.

Thank you. I look forward to serving with you. Thank you.

Mr. PANETTA. Thank you.

Chairman LEVIN. Thank you very much, Senator Udall.

Let me just, before we break for lunch, try to clarify two parts of your testimony regarding the transition of security responsibility to the Afghan security forces.

First, would you agree that security transition to Afghan security forces is to be completed by 2014, but that the process of transferring provinces and districts to an Afghan security force lead begins in July?

Mr. PANETTA. That is correct.

Chairman LEVIN. That President Karzai in March identified the first group of areas to begin transition this year, including a number of identified provinces, and that has already been presented and approved by NATO?

Mr. PANETTA. That is correct.

Chairman LEVIN. Next, my staff tells me that they have not been able to find any statement of Secretary Gates in which he specifies a number of U.S. troops that he believes should be withdrawn from Afghanistan starting in July. Are you aware of any statement by Secretary Gates identifying such a number, whether it is 3,000 to 5,000 or any other number?

Mr. PANETTA. I have discussed this with the staff at DOD, and they are not aware of any statement that he has made that has indicated a number that would be involved.

Chairman LEVIN. At this point?

Mr. PANETTA. At this point.

Chairman LEVIN. Thank you.

It looks like it is about 5 after 1 p.m. Is that right? We will meet at 2:30 p.m. in a classified session.

Thank you all. Thank you again for your testimony and for your service.

[Whereupon, at 1:05 p.m., the committee adjourned.]

[Prepared questions submitted to Hon. Leon E. Panetta by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions? If so, what areas do you believe might be appropriate to address in these modifications?

Answer. It has been 25 years since the passage of Goldwater-Nichols legislation which has prepared the Department of Defense (DOD) to better meet today's challenges. At this time, I do not believe Goldwater-Nichols should be amended, but, if confirmed, I will continue to evaluate this issue and will work with the committee on this very important topic.

DUTIES OF THE SECRETARY OF DEFENSE

Section 113 of title 10, U.S.C., provides that the Secretary of Defense is the principal assistant to the President in all matters relating to DOD. Subject to the direction of the President, the Secretary of Defense, under section 113, has authority, direction, and control over DOD.

Do you believe there are actions you need to take to enhance your ability to perform the duties of the Secretary of Defense?

Answer. Current authorities for the Secretary of Defense appear to be clear and appropriate.

Question. What changes to section 113, if any, would you recommend?

Answer. At this time, I have no recommendation for changes to section 113. My view may change based on the perspectives I may gain while serving in the position of Secretary of Defense, if confirmed.

PRIORITIES

Question. If confirmed, you will confront a range of critical issues relating to threats to national security and ensuring that the Armed Forces are prepared to deal with these threats.

What broad priorities would you establish, if confirmed, with respect to issues which must be addressed by DOD?

Answer. The top priority of the Secretary of Defense is to ensure the security of the American people.

We face a number of challenges: first, prevailing in the current conflicts in Iraq and Afghanistan and in the fight against al Qaeda; second, keeping weapons of mass destruction out of the hands of terrorists and rogue nations; third, preparing to counter future military threats; fourth, preserving the finest fighting force in the world and taking care of servicemembers and their families; and fifth, continuing the reforms DOD's leadership has initiated which will be crucial in this time of budget constraints.

NATIONAL SECURITY BUDGET REDUCTIONS

Question. The President has called for \$400 billion in reductions to national security spending over a 10-year period starting in 2013, and has asked Secretary Gates to lead a review to provide recommendations on where to make those cuts.

What is your understanding of the current status of that review?

Answer. Secretary Gates has discussed with me his overall approach for the Comprehensive Review. It is my understanding that the process initiated focuses principally on driving program and budget decisions from choices about strategy and risks. Such a strategy-driven approach is essential to ensuring that we preserve a superb defense force to meet national security goals, even under fiscal pressure.

Question. What role do you expect to play, if confirmed, in guiding the review and in determining what cuts, if any, should be made to the defense budget?

Answer. If confirmed, I expect to play a large role in the Comprehensive Review and to have it completed in the fall.

Question. Do you believe that a national security spending reduction of this magnitude can be accomplished without significant adverse impact on our national security?

Answer. If confirmed, I will work to make disciplined decisions in ways that minimize impacts on our national security. But it must be understood that a smaller budget means difficult choices will have to be made.

Question. If confirmed, how will you prioritize the objectives of: making needed investments in the future force, addressing pressing requirements for completing the mission in Iraq and Afghanistan, resetting of the force, meeting ongoing operational commitments across the globe, and achieving the level of savings proposed by the President?

Answer. From my years of service in the public sector, I recognize the importance of balancing immediate and future needs. In national security matters, such a balance is essential to keeping America safe both today and tomorrow. Decisions on budget must be carefully made so that none of the listed objectives is compromised.

If confirmed, I will work with both DOD's civilian and military leaders to seek the right balance and I will not hesitate to provide my views on the potential consequences of proposed future changes in the DOD's budget.

CHAIN OF COMMAND

Question. Section 162(b) of title 10, U.S.C., provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the combatant commands. Section 163(a) of title 10 further provides that the President may direct communications to combatant commanders be transmitted through the Chairman of the Joint Chiefs of Staff and may assign duties to the Chairman to assist the President and the Secretary of Defense in performing their command function.

Do you believe that these provisions facilitate a clear and effective chain of command?

Answer. Based on my understanding of the existing authorities and the practice I have personally observed while Director of the CIA, I believe there is currently a clear and effective chain of command. If confirmed as Secretary of Defense, I will work to ensure that the chain of command continues to be clear and effective.

Question. In your view, do these provisions enhance or degrade civilian control of the military?

Answer. I believe these provisions enhance civilian control of the military.

Question. In your capacity as the Director of the Central Intelligence Agency, you were reported to have been in charge of the recent operation against Osama bin Laden, an operation using military forces of DOD, presumably under the authorities in title 50, U.S.C.

Are there circumstances in which you believe it is appropriate for U.S. military forces to be under the operational command or control of an authority outside the chain of command established under title 10, U.S.C.?

Answer. I believe the chain of command established by title 10 is the appropriate mechanism for command and control of military operations. Without commenting on the bin Laden operation in particular, I will state that in general there are instances in which military capabilities are temporarily made available to support an activity of a non-DOD U.S. Government department or agency. In those circumstances, it is appropriate for the head of such department or agency to direct the operations of the element providing that military support while working with the Secretary of Defense. In such situations, the President remains at the top of the chain of command and at all times has overall command and responsibility for the operation. The military units supporting such an operation are still governed by the

laws of armed conflict. Military personnel remain accountable to the military chain of command, including the Uniform Code of Military Justice.

Question. Can you explain the chain of command for U.S. military forces in the operation against bin Laden, and what role, if any, the Director of the Central Intelligence Agency and the Secretary of Defense each had in that chain of command?

Answer. I cannot comment publicly on the chain of command for the bin Laden operation, in particular. In general, see my answer above.

Question. Please explain the pros and cons of utilizing U.S. military personnel for missions under the authorities contained in title 50, United States Code.

Answer. Non-DOD Federal departments and agencies may, in carrying out their duties, occasionally require support that only the U.S. Armed Forces can provide. It is therefore sometimes preferable to make an appropriate military capability temporarily available to support the operations of other departments and agencies. A significant advantage of doing so is that it permits the robust operational capability of the U.S. Armed Forces to be applied when needed. A potential disadvantage is that the department or agency receiving the support may not be specifically organized or equipped to direct and control operations by military forces.

Question. If the reports mentioned above are accurate, please describe the authorities and agreements which are in place to allow U.S. military personnel to carry out missions under the authorities contained in title 50, U.S.C. Do you believe any modifications to these authorities are necessary?

Answer. As noted above, consistent with title 50 of the U.S.C., the President may authorize departments, agencies, or entities of the U.S. Government to participate in or support intelligence activities. I cannot comment publicly on any specific arrangements in this regard. As stated above, military personnel in support of any such activities remain subject to the laws of armed conflict and the Uniform Code of Military Justice while operating under the direction of the head of a non-DOD Federal department or agency. I believe that existing authorities are sufficient to facilitate DOD's providing appropriate support under title 50 while ensuring necessary oversight.

Question. Please explain your views on the preferred chain of command structure for counter terrorism operations conducted outside of Iraq and Afghanistan.

Answer. My view is that the chain of command established under title 10 is appropriate for command of U.S. military operations, regardless of the location. The determination of whether a military counterterrorism operation is appropriate will depend on the nature of the contemplated operation and the circumstances specific to the time and place of that operation.

ADVICE OF THE SERVICE CHIEFS AND THE COMBATANT COMMANDERS

Question. Section 151 of title 10, U.S.C., provides, in part, that the Chairman of the Joint Chiefs of Staff is the principal military adviser to the President, the National Security Council, and the Secretary of Defense and that if any member of the Joint Chiefs submits to the Chairman advice or an opinion, in disagreement with, or advice or an opinion in addition to, the advice presented by the Chairman, the Chairman shall present that advice or opinion at the same time he provides his own advice to the President, the National Security Council, and the Secretary of Defense.

Answer. Section 163 of title 10, U.S.C., provides that the Chairman of the Joint Chiefs of Staff serves as the spokesman for the combatant commanders, especially on the operational requirements of their commands.

Question. What changes in law, if any, do you think may be necessary to ensure that the views of the individual Service Chiefs and of the combatant commanders are presented and considered?

Answer. At this time, I do not recommend any changes to the law. If confirmed, and after I have been in office for a sufficient time to determine if changes are advisable, I will recommend changes as appropriate or necessary.

Question. Do you believe the Chief of the National Guard Bureau should be a member of the Joint Chiefs of Staff?

Answer. No. The Chief of the National Guard Bureau is now a 4 star general and attends Joint Chiefs of Staff meetings and provides invaluable advice. Members of the Guard are members of the uniformed services and adding its Chief to the Joint Chiefs of Staff would introduce inconsistencies among its members and will create the impression that the National Guard is a separate military service.

GOLDWATER-NICHOLS FOR THE INTERAGENCY (POLICY)

Question. Several groups and individuals have been calling for a Goldwater-Nichols Act for the entire Federal Government. They argue that the U.S. and allied mili-

taries can prevail on the battlefield but that the global war on terror requires a concerted effort by a host of U.S. agencies.

What are your views on the merits of instituting a Goldwater-Nichols Act for the entire Federal Government?

Answer. In the 25 years since Goldwater-Nichols much has changed. In the post-September 11th era, there have been significant benefits due to increased unity of effort and interagency cooperation. Civilian-military collaboration has improved, and our military commanders expect to operate in a coordinated and joint, multi-service environment. Diplomats, development experts, intelligence analysts, and law enforcement must work together in today's complex operations.

At this time, I do not know that instituting such a change across the entire Federal Government is needed. However, there may be additional ways to develop more effective and inclusive approaches to our national security challenges that do not require legislation.

If confirmed, I intend to reiterate to all civilian and military personnel in DOD the important role each interagency partner plays in supporting our Nation's security.

USE OF MILITARY FORCE

Question. The question as to whether and when U.S. forces should participate in potentially dangerous situations is one of the most important and difficult decisions that the national command authorities have to make. Prior Secretaries of Defense and Chairmen of the Joint Chiefs of Staff have proposed criteria to guide decision-making for such situations.

What factors would you consider in making recommendations to the President on the use of force?

Answer. If confirmed, I would consider many of the same factors that previous Secretaries of Defense have evaluated in their recommendations to the President on the use of force, including the threat to our vital interests, the ability to employ non-military methods to respond to the threat, our capability to defeat that threat and improve our strategic situation through the use of military force, and the prospects for sustained public support for military action.

Question. What circumstances should pertain for you to recommend that the President employ preemptive force?

Answer. As the 2010 National Security Strategy discusses, military force, at times, may be necessary to defend our country and allies or to preserve broader peace and security, including by protecting civilians facing a grave humanitarian crisis.

While the use of force is sometimes necessary, if confirmed, we will continue to exhaust other options before war whenever we can, and carefully weigh the costs and risks of action against the costs and risks of inaction. When force is necessary, if confirmed, we will continue to do so in a way that reflects our values and strengthens our legitimacy, and we will seek broad international support, working with such institutions as NATO and the U.N. Security Council.

The United States must reserve the right to act unilaterally if necessary to defend our Nation and our interests, yet we must also seek to adhere to standards that govern the use of force.

Question. What degree of certainty do you believe is necessary before the United States would use preemptive force?

Answer. I believe the use of preemptive force should be based on the strongest evidence of the need. It is a decision that must not be taken lightly.

Two years as CIA Director has made me realize that intelligence is often ambiguous. I believe the men and women in the Intelligence Community do their best to get the most reliable intelligence possible. Still, we need to be aware of the caveats that come with intelligence products. We need to continue to ask hard questions about the information presented to policymakers.

DEPARTMENT OF DEFENSE AND DEPARTMENT OF VETERANS AFFAIRS COLLABORATION

Question. Secretary of Defense Gates and Secretary of Veterans Affairs Shinseki have pledged to improve and increase collaboration between the respective departments to support military servicemembers as they transition to veteran status, in areas of health and mental health care, disability evaluation, and compensation.

If confirmed, what role would you expect to play in ensuring that DOD and the Department of Veterans Affairs achieve the administration's objectives in DOD and VA collaboration?

Answer. I understand significant improvements have been made in DOD-VA collaboration in the last few years. If confirmed, I will continue the efforts made by

Secretary Gates, and look forward to working with Secretary Shinseki to accelerate current timelines. If confirmed, I will ensure that DOD continues to work closely with VA to support servicemembers and their families in all facets of making a seamless transition to veteran status will remain a top priority.

DISABILITY SEVERANCE PAY

Question. Section 1646 of the Wounded Warrior Act, included in the National Defense Authorization Act for Fiscal Year 2008, enhanced severance pay and removed a requirement that severance pay be deducted from VA disability compensation for servicemembers discharged for disabilities rated less than 30 percent incurred in the line-of-duty in a combat zone or incurred during the performance of duty in a combat-related operation as designated by the Secretary of Defense. In adopting this provision, Congress relied on the existing definition of a combat-related disability contained in 10 U.S.C. 1413a(e). Rather than using the definition intended by Congress, DOD adopted a more limited definition of combat-related operations, requiring that the disability be incurred during participation in armed conflict.

If confirmed, would you review the interpretation of this provision by the Department's subject matter experts and reconsider the Department's definition of combat-related operations for purposes of awarding enhanced severance pay and deduction of severance pay from VA disability compensation?

Answer. I understand this matter is currently being reviewed. If confirmed, I will continue that review and ensure that any policy change, if warranted, meets the intent of Congress.

HOMOSEXUAL CONDUCT POLICY

Question. The "Don't Ask, Don't Tell Repeal Act of 2010," enacted on December 22, 2010, provides for the repeal of the current DOD policy concerning homosexuality in the Armed Forces, to be effective 60 days after the Secretary of Defense has received DOD's comprehensive review on the implementation of such repeal, and the President, Secretary, and Chairman of the Joint Chiefs of Staff certify to the congressional defense committees that they have considered the report and proposed plan of action, that DOD has prepared the necessary policies and regulations to exercise the discretion provided by such repeal, and that implementation of such policies and regulations is consistent with the standards of military readiness and effectiveness, unit cohesion, and military recruiting and retention.

What is your view on repealing the current DOD policy?

Answer. I support the Don't Ask, Don't Tell Repeal Act of 2010 and the certification process defined in the law.

If confirmed, and in the event Secretary Gates does not sign such a certification prior to his departure from office, I will work closely with the Joint Chiefs of Staff to assess whether the elements for certification in the law are met before signing it myself.

PROTECTION OF U.S. FORCES AGAINST INTERNAL THREATS

Question. On November 5, 2009, a gunman opened fire at the Soldier Readiness Center at Fort Hood, TX, killing 13 people and wounding or injuring 43 others. A DOD review of the attack released in January 2010 concluded that the Department was poorly prepared to defend against internal threats, including radicalization among military personnel.

What is your assessment of the lessons learned from the tragedy at Fort Hood?

Answer. I understand that the Fort Hood review released by DOD in August 2010 included 79 recommendations on how to improve personnel policies, force protection, emergency response and mass casualty preparedness, and support to DOD healthcare providers. I am told that DOD has completed implementation of half of these recommendations.

If confirmed, I intend to review all the lessons learned, recommendations for improvement, and progress made to date and work closely with Members of Congress to ensure that DOD is prepared to defend against internal threats, including radicalization among DOD's military and civilian personnel.

Question. If confirmed, what strategies would you advocate to prevent and mitigate such threats in the future?

Answer. I understand that the findings and recommendations of the Fort Hood Review are the foundation of DOD's current strategy and leadership and accountability are key. If confirmed, I will review this strategy and how it has been implemented, seek the advice of DOD's civilian and military leadership, and consult with Congress to ensure that DOD implements the most effective policies to prevent and mitigate such threats in the future.

RELIGIOUS GUIDELINES

Question. The Independent Review Related to the Tragedy at Fort Hood observed that “DOD policy regarding religious accommodation lacks the clarity necessary to help commanders distinguish appropriate religious practices from those that might indicate a potential for violence or self-radicalization.” Recommendation 2.7 of the Final Recommendations urged the Department to update policy to clarify guidelines for religious accommodation and Recommendation 2.8 urged the Department to task the Defense Science Board to “undertake a multi-disciplinary study to identify behavioral indicators of violence and self-radicalization”

What is your view of these recommendations?

Answer. It is my understanding that the Fort Hood Follow-on Review prepared an implementation plan in response to both of these recommendations. If confirmed, I will review that report and the progress that has been made to ensure DOD policies, programs, and procedures appropriately accommodate the free exercise of religion while effectively protecting our servicemembers from harm.

Question. What is your understanding of current policies and programs of DOD regarding religious practices in the military?

Answer. It is my understanding that the military places a high value on the rights of servicemembers to observe their respective religious faiths and that policies and programs reflect this.

Question. In your view, do these policies appropriately accommodate the free exercise of religion and other beliefs without impinging on those who have different beliefs, including no religious belief?

Answer. I understand each Religious Ministry Professional has committed to functioning in a pluralistic environment and to supporting, both directly and indirectly, the free exercise of religion by all members of the Military Services, their family members, and other persons authorized to be served by the military chaplaincies. If confirmed, I will review the relevant policies, seek the advice of the military leadership, and consult with Congress to ensure that DOD appropriately accommodates the free exercise of religion.

Question. In your view, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain’s ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. I understand current policy appears to strike the proper balance by allowing chaplains to voluntarily participate, or not participate, in settings which conflict with their faith traditions, while also ensuring chaplains performing in an interfaith setting, such as an official dinner or interfaith memorial service, are mindful of the requirement for inclusiveness. If confirmed, I will monitor these policies and practices.

Question. If confirmed, will you work to ensure that a scientific fact-based approach to understanding radicalization will drive the Department’s relevant policies?

Answer. I understand DOD has commissioned a Defense Science Board study on violent radicalization and plans to commission two additional clinical studies to identify any potential indicators of violent behavior in military personnel. The results of these studies will inform DOD’s policies and programs on radicalization. If confirmed, I intend to ensure that DOD continues to rely on a scientific, fact-based approach to countering radicalization and protecting our force.

Question. Current policy in the Department gives discretion to military leaders to decide whether requests to waive uniform and appearance standards should be granted based on religious beliefs. The Department has submitted a legislative proposal that would clearly exempt the armed services from the requirements of the Religious Freedom Restoration Act.

In your view, do DOD policies appropriately accommodate religious practices that require adherents to wear particular articles of faith?

Answer. I understand the important and delicate balance that must be struck between accommodating religious practices that require adherents to wear particular articles of faith and maintaining the military’s uniform grooming and appearance standards. If confirmed, I will work with the leaders of the military services to achieve an appropriate balance between maintaining the military’s uniform grooming and appearance standards and approving requested religious accommodations.

MUSLIMS IN THE U.S. MILITARY

Question. Are you concerned that the attack at Fort Hood could lead to harassment or even violence against Muslims in the military?

Answer. I recognize the events related to the attack at Fort Hood are first and foremost a tragedy for all involved. While it is possible that such a tragic act could spur harassment and violence as a means of retaliation, I am informed that military leaders and supervisors at all levels take precautions to prevent such occurrences and maintain good order and discipline in the force. No form of harassment will be tolerated.

Question. If confirmed, what strategies would you advocate to address the potential for harassment or violence against Muslims in the U.S. military?

Answer. If confirmed, I would advocate open communications, decisive action on the part of military leaders and supervisors, and command emphasis on the military standard for maintaining good order and discipline. More specifically, this would include safeguarding the rights of servicemembers by exercising the established procedures and processes for addressing all indications of harassment and complaints. If confirmed, I would review the effectiveness of these feedback systems, and take measures to improve them, as appropriate.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. The Department has in recent years developed comprehensive policies and procedures to improve the prevention of and response to incidents of sexual assault, including providing appropriate resources and care for victims of sexual assault. However, numerous incidents of sexual misconduct involving military personnel in combat areas of operation and at home stations are still being reported. Victims and their advocates claim that they are victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate treatment for the victim. They assert that their command fails to respond appropriately with basic medical services and with an adequate investigation of their allegations followed by a failure to hold assailants accountable.

Do you consider the current sexual assault policies and procedures, particularly those on confidential or restricted reporting, to be effective?

Answer. Sexual assault has no place in DOD—and it will not be tolerated. DOD's zero tolerance policy on sexual assault is the right policy. The Chairman of the Joint Chiefs of Staff, the Joint Chiefs, and the Service Secretaries are continuously and directly engaged in emphasizing the importance of addressing sexual assault. DOD is deeply committed to broad and focused improvements in how it prevents and responds to sexual assault. Advancements in development of policies and programs, such as hiring additional investigators, field instructors, prosecutors, and lab examiners have been made. But there is still work to do to integrate and continue to improve our efforts across DOD and the Services. If confirmed, I would continue to ensure DOD is committed to addressing sexual assault in a comprehensive manner.

Question. What problems, if any, are you aware of in the manner in which the restricted reporting procedure has been put into operation?

Answer. I have not been informed of any specific problems in the implementation of the restricted reporting option. It is my understanding that restricted reporting allows victims who wish to remain anonymous to come forward and obtain the support they need following an assault without being identified. I believe that the most important concern in reviewing the reporting procedure should be to ensure that victims are coming forward. If confirmed, I will review DOD's program to gain a clear picture of progress and areas for future improvement in sexual assault reporting procedures.

Question. What is your view of the steps the Services have taken to prevent and respond to sexual assaults in combat zones, including assaults against contractor personnel?

Answer. Sexual assault against anyone is unacceptable in any location. I do not have enough information to make a comprehensive assessment at this time, but it is my understanding that if any of our deployed servicemembers, civilians, or contractors is assaulted, he or she will receive appropriate and responsive support and care. It is also my understanding that individuals who commit sexual assault are appropriately punished. If confirmed, I will continue to ensure DOD is committed to addressing sexual assault in a comprehensive manner across the Services in all locations. There is no tolerance in DOD for sexual assault in any location or for any personnel who serve in DOD.

Question. What is your view of the adequacy of the training and resources the Services have in place to investigate and respond to allegations of sexual assault?

Answer. DOD is committed to addressing sexual assault in a comprehensive, integrated and uniform manner. It is my understanding that all Services have been directed to establish guidelines for a 24-hour, 7 day a week sexual assault response capability for all locations, including deployed areas. I also understand that the

Services recently enhanced their resources for investigating and prosecuting sexual assault cases. While, I cannot make a specific assessment at this time, if confirmed, evaluating the adequacy and efficacy of training and resources allocated to the Services for sexual assault investigation will be a priority.

Question. What is your view of the willingness and ability of the Services to hold assailants accountable for their acts?

Answer. DOD's policies emphasize the command's role in effective response to sexual assault. DOD has taken action to provide training for commanders and to ensure adequate training and resources for prosecutors and investigators. I understand that DOD's policies seek to balance victim care and appropriate command action against offenders, with one of the aims being to build the victim's confidence to assist in an investigation. If confirmed, I will ensure accountability, appropriately balanced with victim care, remains an important focus of DOD's sexual assault prevention and response efforts.

Question. If confirmed, what actions will you take to ensure senior level direction and oversight of efforts to prevent and respond to sexual assaults?

Answer. I believe that sexual assault has no place in the Armed Forces, and that DOD currently has a zero tolerance policy. I understand DOD has assigned a General/Flag Officer with operational experience to provide direct oversight of the Sexual Assault Prevention and Response Program office. This senior leader will facilitate and integrate a comprehensive and uniformed approach to sexual assault prevention and response policy across DOD. If confirmed, I will continue to make sexual assault prevention and response a priority for DOD and will work closely with the Secretaries of the Military Departments and the Chiefs of the Military Services to ensure that DOD maintains senior leadership focus on this issue.

MOBILIZATION AND DEMOBILIZATION OF NATIONAL GUARD AND RESERVES

Question. In support of the current ongoing conflicts, the National Guard and Reserves have experienced their largest and most sustained employment since World War II. Numerous problems have arisen over time in the planning and procedures for mobilization and demobilization, e.g., inadequate health screening and medical response to service-connected injuries or illnesses, antiquated pay systems, limited transition assistance programs upon demobilization, and inefficient policies regarding members of the Individual Ready Reserve. Reserve Force management policies and systems have been characterized in the past as "inefficient and rigid" and readiness levels have been adversely affected by equipment shortages, cross-leveling, and reset policies.

What is your assessment of advances made in improving Reserve component mobilization and demobilization procedures, and in what areas do problems still exist?

Answer. I understand there have been many changes made in policies governing the utilization of the Guard. There is now a 180-day notification prior to mobilization, dwell ratio standard of no more than 1 year mobilized for 5 years not mobilized, and Guard and reservists can only be involuntary activated for 1 year.

These changes have improved morale by providing a predictable cycle of active duty.

A key problem that remains is there are over 30 different duty statuses for Guard and Reserve personnel. This diversity of duty status is cumbersome and results in mobilization and de-mobilization delays.

MEDICAL AND DENTAL READINESS OF THE RESERVES

Question. Medical and dental readiness of Reserve component personnel has been an issue of significant concern to the committee, and shortfalls that have been identified have indicated a need for improved policy oversight and accountability.

If confirmed, how would you seek to clarify and coordinate reporting on the medical and dental readiness of the Reserves?

Answer. In order to fully assess the capability of the Reserve Force, it is critical to measure and report medical and dental readiness in a standardized manner. It is my understanding that over the past several years, small, but steady improvements have been made across the Services, but there is more work to do in confirming the medical and dental readiness of the entire Reserve Force.

Medical and dental readiness is tracked through standardized calculations each quarter. Currently, the medical readiness achievement goal is 75 percent and DOD is at 63 percent. The dental readiness achievement goal is 85 percent, and DOD has met that goal.

While progress can be seen, the medical and dental readiness of the Reserve component remains a priority if I am confirmed.

Question. How would you improve upon the Department's ability to maintain a healthy and fit Reserve component?

Answer. It's my understanding that DOD continues to pursue new and improved opportunities to provide flexible options for the Guard and Reserve to improve their overall readiness.

Producing and maintaining a healthy and fit Reserve component requires more than access to health care—it also requires command emphasis and individual accountability.

Recently, the Army Reserve approved and funded two medical/dental readiness days per soldier starting in fiscal year 2010.

If confirmed, I will work with the Services to incorporate the findings and recommendations from the executive-level DOD Prevention, Safety and Health Promotion Council (PSHPC) recently created to advance health and safety promotion and injury/illness prevention policy initiatives to address readiness requirements developed from evidence-based research.

DWELL TIME

Question. While dwell time is improving as our forces draw down in Iraq, many Active Duty military members are still not experiencing the dwell time goal of 2 years at home for every year deployed.

In your view, when will the Active component dwell time goal be met?

Answer. I understand that the Navy, Air Force and Marine Corps, on average, are meeting or exceeding DOD's dwell time goal of 1:2 for the Active component. The Army is now averaging 1:1 but expects to be 1:2 by October 2011. If confirmed, I will continue to monitor this issue closely.

Question. When will dwell time objectives be met for the Reserve components?

Answer. I understand Reserve component dwell time is improving, but has not reached DOD's dwell time goal of 1 year of active duty and 5 years at home, or 1:5. If confirmed, I will continue to work toward the goal of a 1:5 dwell time ratio for the Reserve component.

ACTIVE-DUTY END STRENGTH

Question. Secretary Gates announced this year that the Army would reduce its end strength by 22,000 through fiscal year 2013, including 7,000 in fiscal year 2012. This end strength was part of the temporary increase authorized in 2009 and was intended to enable the Army to cease relying on "stoploss" and to make up for a growing population of non-deployable soldiers. Beginning in fiscal year 2015, depending on conditions on the ground, the Army and Marine Corps plan to reduce their permanent end strength and force structure by 27,000 soldiers and at least 15,000 marines, respectively.

Do you agree with this Active-Duty end strength reduction plan?

Answer. If confirmed, I will review the plan, but it is my understanding, that based upon what we know today, and the well reasoned assumptions that have been made, that the current plan strikes a prudent balance between serving operational needs and ensuring the funds available for recapitalization which are critical to future readiness. However, I know that ensuring that commanders have the right numbers and right kinds of volunteers to perform their mission is of critical importance. As future national security circumstances could change, if confirmed, our plan will change accordingly.

Question. What is your view of how these planned end strength reductions will affect dwell time ratios?

Answer. The Army and Marine Corps end strength reductions, planned for fiscal year 2015, are based on the assumption of a future draw-down in Afghanistan. If this assumption holds true, the dwell ratio of 1:2 should not be affected.

Question. What effect would inability to meet dwell time objectives have on your decision to implement the planned end strength reductions?

Answer. If confirmed, I will take into consideration dwell time objectives and our ability to meet competing strategic objectives before implementing the planned end strength reductions.

Question. In your view, can the Army accelerate to 2012 more of its planned reduction in its temporary over-strength without an adverse impact on national security?

Answer. I am unable to express an opinion on this issue at this time. If confirmed, I will work closely with the Army on appropriate end strength.

Question. What would be the effect on dwell time of accelerating the Army's force reduction plan?

Answer. That would depend on the Army's deployment footprint and the period of acceleration. However, I would anticipate that the Army may not be able to achieve the dwell ratio goal of 1:2 on its current schedule. This is an issue that I will need to evaluate, if confirmed.

Question. What are the assumptions regarding "conditions on the ground" that will allow for the planned reductions beginning in 2015 to occur on time?

Answer. Generally speaking, I would consider our progress against the established security objectives at the time. I would solicit the advice of DOD's senior military and civilian leaders to inform my judgment on such decisions.

Question. The Navy and Air Force have requested congressional authorization of force management tools to avoid exceeding end strength limits and save money.

In your view, what tools do the Department and Services need to get down to authorized strengths in the future, and which of these require Congressional authorization?

Answer. I understand that some of the authorities used during previous force reductions have expired or are expiring soon. DOD is seeking to renew these authorities and is requesting new legislation to size and shape the force. My view is that DOD should make maximum use of voluntary authorities; however, great care should be taken to ensure those who leave are not going to be needed in the near term. If confirmed, I will study this issue closely and rely on the advice of both civilian and military professionals at the Department.

RECRUITING STANDARDS

Question. Recruiting highly qualified individuals for military service during wartime in a cost-constrained environment presents unique challenges. The Army has been criticized in past years for relaxing enlistment standards in tough recruiting environments with respect to factors such as age, intelligence, weight and physical fitness standards, citizenship status, tattoos, and past criminal misconduct. On the other hand, as the Deputy Chief of Staff of the Army, G-1, recently testified, less than 25 percent of all 17-24 year olds are eligible to enlist, primarily due to physical and educational requirements.

What is your assessment of the adequacy of current standards regarding qualifications for enlistment in the Armed Forces?

Answer. From my understanding, the current enlistment qualification standards are well-defined and have stood the test of time. They are driven by the need to provide the Services with men and women who are prepared to adapt to the rigors of military life and meet performance requirements. To that end, the Services carefully screen applicants, who come from all walks of life. The traditional high school diploma is the best single predictor of attrition. Some standards may change over time. Medical standards have been revised, for example, as pre-enlistment treatments result in improved outcomes.

Question. In your view, is there any way to increase the pool of eligible enlistees without sacrificing quality?

Answer. From my understanding, the Services are exploring ways to improve our ability to predict attrition. The Services may be able to augment their screening procedures by incorporating other measures, such as personality, to identify applicants who are likely to adapt well to the military. If confirmed, I will work with the Services to continually find new ways to recruit.

Question. Are there any enlistment requirements or standards that are overly restrictive or which do not directly correlate to successful military service?

Answer. I am not aware that DOD assesses that military enlistment standards are overly restrictive. The Services employ fitness, adaptability, and aptitude standards which correlate to the physical, disciplined, regulated lifestyle and cognitive demands needed to succeed in the Armed Forces.

Question. Do you believe that current policies defining three tiers of high school diploma credentials, aimed at minimizing attrition during the initial enlistment term, should be retained?

Answer. My understanding is the Services track the attrition rates of military recruits, by a variety of credential types, and traditional high school diploma graduates have lower rates of attrition than any other type of credential holder.

WOMEN IN THE MILITARY

Question. The Navy has opened service on submarines to women, the Marine Corps recently expanded service opportunities for women in intelligence specialties, and the Army is reviewing its assignment policy for female soldiers. The issue of the appropriate role of women in the Armed Forces is a matter of continuing interest to Congress and the American public.

Do you believe additional specialties should be opened up for service by women?
 Answer. It is my understanding DOD believes it has sufficient flexibility under current law to make appropriate assignment policy for women. DOD will continue to monitor combat needs as Services recommend expanding combat roles for women and notify Congress accordingly as required by statute (10 U.S.C., § 652 and/or § 6035). Any decision regarding opening additional specialties for service by women should be based on our obligation to maintain a high state of mission readiness of our All-Volunteer Force.

Question. Do you believe any changes in the current policy or legislation regarding women in combat are needed or warranted?

Answer. I understand DOD policies and practices that restrict assigning female servicemembers are currently under review per section 535 of the National Defense Authorization Act for Fiscal Year 2011. If confirmed, I will take my responsibility to thoroughly review any proposed policy change and ensure changes to existing policy move forward after appropriate notice to Congress.

RISING COSTS OF MEDICAL CARE

Question. In testimony presented to Congress in February, 2009, the Assistant Director of the Congressional Budget Office asserted that “medical funding accounts for more than one-third of the growth projected for operations and support funding between 2009 and 2026.” In April, 2009, Secretary Gates told an audience at Maxwell Air Force Base that “health care is eating the Department alive.” The administration has proposed health care efficiencies to save nearly \$8.0 billion through 2016.

Do you agree with the proposed health care efficiencies?

Answer. As they have been described to me, I believe that the proposed health care efficiencies are sensible efforts to control DOD’s health care costs while maintaining the same level of care. I also believe the modest increases in beneficiaries’ cost shares are reasonable.

Question. What reforms in infrastructure, benefits, or benefit management, if any, do you think should be examined in order to control the costs of military health care?

Answer. While the proposals included in the fiscal year 2012 President’s budget are a significant first step, I believe that we need to continue to explore all possibilities to control the costs of military health care. In the long term, the promotion of healthy life styles and prevention among our beneficiaries is one way to help reduce the demand for health services.

Question. What is your assessment of the long-term impact of rising medical costs on future DOD plans?

Answer. I understand that even with the estimated savings from the health care efficiencies proposed in the fiscal year 2012 budget, the cost of the Military Health System continues to increase as a percentage of the DOD budget and will exceed 10 percent of the budget in just a few years.

During a period when there is heavy downward pressure on all Federal spending, including defense spending, we must make smart choices that permit us to maintain a balance between personnel benefits and funding for equipment and readiness.

If confirmed, one of my highest priorities would be to ensure that DOD provides quality care, and it does so in a way that provides the best value for our servicemembers and their families, as well as the American taxpayer.

Question. If confirmed, what actions would you initiate or recommend to mitigate the effect of such costs on the DOD top-line?

Answer. I cannot make specific recommendations at this time. If confirmed, I would work closely with the health care leadership in DOD to examine every opportunity to ensure military beneficiaries are provided the highest quality care possible while managing cost growth.

PERSONNEL AND ENTITLEMENT COSTS

Question. In addition to health care costs, personnel and related entitlement spending continues to grow and is becoming an ever increasing portion of the DOD budget.

What actions do you believe can and should be taken, if any, to control the rise in personnel costs and entitlement spending?

Answer. I am aware that an increasing portion of DOD’s limited resources are devoted to personnel-related costs.

I understand there have been many incremental adjustments to military pay and benefits over the years; however, much of the military compensation system remains rooted in structures established generations ago. If we are going to manage costs,

I believe everything must be on the table. It may be appropriate to conduct a comprehensive review of the military pay and benefits structure to determine where costs can be contained.

I believe that it may be possible to restructure our military benefits in a way that reduces costs, but any such effort must continue to attract and support our men and women in uniform and their families in a wide variety of situations.

Question. In your view, can the Department and the Services efficiently manage the use of bonuses and special pays to place high quality recruits in the right jobs without paying more than the Department needs to pay, or can afford to pay, for other elements of the force?

Answer. I understand recruiting and retention bonuses are cost-effective tools to achieve DOD's personnel strength and experience objectives. However, we must continually monitor these tools to ensure they are being used efficiently as well as effectively. A review of the utilization and efficacy of bonuses should certainly be part of any comprehensive review of the military pay and benefits structure.

MILITARY RETIREMENT

Question. The 10th Quadrennial Review of Military Compensation (QRMC) proposed a new defined benefit retirement plan that more resembles the benefits available under the Federal Employee Retirement System than the current military retirement benefit; increasing TRICARE fees for retirees; and the adoption of dependent care and flexible spending accounts for servicemembers. The head of a Defense Business Board Task Force has criticized military benefits as "GM-style benefits" describing the military retirement system as a "pre-volunteer force retirement system" and criticizing "taxpayer-subsidized grocery chains and low out-of-pocket healthcare costs".

What is your view of the adequacy of the current military retirement benefit?

Answer. I understand that the military retirement system was created in an earlier era and, in general, accomplishes the purpose for which it was designed; to provide a strong incentive to attain 20 years of service and then to leave shortly thereafter. To maintain the right military force structure, the comprehensive mix of pay and benefits, which includes military retirement, needs to be adequate. However, over time, the world has changed and private-sector compensation practices have changed, but the military retirement system has remained essentially the same. I believe it may be appropriate to also review the military retirement system for needed changes and efficiencies.

Question. How might it be modernized to reflect the needs of a new generation of recruits, while easing the long-term retirement cost of the government?

Answer. I understand there are many proposed alternatives to the current military retirement system. I am unable to make recommendations at this time but will closely study proposals and their impact if confirmed.

Question. Do you share the Defense Business Board Task Force view of military benefits?

Answer. I am aware that the Defense Business Board is reviewing military retirement, but I do not believe it has released their report. I look forward to reviewing it once it is made available. I agree that it may be possible to restructure our military benefits in a way that reduces costs, but any such effort must continue to attract and support our men and women in uniform and their families.

DEPENDENT CARE AND FLEXIBLE SPENDING ACCOUNTS

Question. The 10th QRMC recommended providing dependent care and flexible spending benefits to Active-Duty servicemembers. Providing these benefits would seem consistent with the initiatives of First Lady Michelle Obama and Dr. Jill Biden on behalf of military families. It would appear that no new legislative authority is needed for the Department to provide these benefits to servicemembers and their families.

If confirmed, would you extend these benefits to the active duty servicemembers and their families?

Answer. I understand that in response to the National Defense Authorization Act for Fiscal Year 2006, DOD examined and provided a report on the advantages and disadvantages of providing flexible spending accounts to military members. If confirmed, I will review whether flexible spending accounts should be extended to Active-Duty servicemembers and their families.

SYSTEMS AND SUPPORT FOR WOUNDED WARRIORS

Question. Servicemembers who are wounded or injured performing duties in Operations Enduring Freedom, Iraqi Freedom, and New Dawn deserve the highest pri-

ority from their Service for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from active duty if required, and continuing support beyond retirement or discharge. Yet, as the revelations at Walter Reed Army Medical Center (WRAMC) in 2007 illustrated, the Services were not prepared to meet the needs of significant numbers of returning wounded servicemembers. Despite the enactment of legislation and renewed emphasis, many challenges remain, including a growing population of soldiers awaiting disability evaluation.

What is your assessment of the progress made to date by DOD and the Services to improve the care, management, and transition of seriously ill and injured servicemembers and their families?

Answer. Although I do not have sufficient information to make a full assessment at this time, I am aware that significant improvements in these areas have been made in the last 4 years. However, it is my opinion that more must be done. If confirmed, I will strive to ensure DOD regularly evaluates and seeks to improve its wounded warrior programs to ensure that the needs of our wounded warriors and their families are met.

Question. What are the strengths upon which continued progress should be based?

Answer. In my opinion, one of the most significant strengths is the high priority which DOD has placed on caring for our wounded warriors and their families. In my view, next to the wars themselves, there is no higher priority, and if confirmed, I will continue to place the highest priority on these efforts.

Question. What are the weaknesses that need to be corrected?

Answer. A challenge facing DOD in this area, as in other areas, is to ensure that in delivering the highest standard of care for our wounded, ill and injured, we do so in an effective and cost-efficient manner.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase support for wounded servicemembers and their families, and to monitor their progress in returning to duty or to civilian life?

Answer. I do not have any specific recommendations at this time. If confirmed, I will closely monitor and evaluate this issue to ensure necessary resources are in place to take care of our recovering wounded, ill, and injured servicemembers and their families.

Question. Studies conducted as a result of the revelations at WRAMC pointed to the need to reform the disability evaluation system (DES). A DES pilot program, and now an Integrated DES program, have been established to improve processing of servicemembers.

What is your assessment of the need to further streamline and improve the Integrated DES?

Answer. I have been told that a revised and improved disability evaluation system developed by the Departments of Defense and Veterans Affairs, known as the Integrated Disability Evaluation System, today serves over half of those in the system, and that its wide adoption is a priority of the VA and DOD leadership. I do not currently have any specific recommendations regarding the Integrated Disability Evaluation System, but I support these ongoing efforts and, if confirmed, will look for opportunities to further improve on them.

Question. If confirmed, how will you address any need for change, particularly the Army's growing problem?

Answer. I do not have specific recommendations at this time, but, if confirmed, I will work with DOD and VA to continually evaluate the system and identify opportunities for improvement.

SUICIDE PREVENTION AND MENTAL HEALTH RESOURCES

Question. The numbers of suicides in each of the services has increased in recent years. The Army released a report in July 2010 that analyzed the causes of its growing suicide rate and examined disturbing trends in drug use, disciplinary offenses, and high risk behaviors. In addition, studies conducted by the Army of soldiers and marines in theater are showing declines in individual morale and increases in mental health strain, especially among those who have experienced multiple deployments.

In your view, what role should DOD play in shaping policies to help prevent suicides both in garrison and in theater and to increase the resiliency of all servicemembers and their families, including members of the Reserve components?

Answer. The rise in suicides in the military and by veterans is tragic and DOD has a responsibility to address the factors that contribute to suicidal behavior among our military men and women whether they are deployed, at a military installation or in their home communities. I understand all of the Services have imple-

mented prevention and resilience building programs. The Final Report of the Department of Defense Task Force on the Prevention of Suicide by Members of the Armed Forces is being used as a vehicle to review all Departmental policies and procedures related to suicide prevention. If confirmed, I will ensure that DOD continues to improve suicide prevention policies and processes.

Question. What is your understanding of the action that the Office of the Secretary of Defense and the Army are taking in response to the July 2010 Army report, and the data in Chapter 3 in particular?

Answer. While I have not had the opportunity to read Army Health Promotion, Risk Reduction, Suicide Prevention Report 2010, I know that sustaining a force steadily engaged in combat for over a decade has unexpected challenges. Some of those challenges include a rise in “high risk” behaviors and suicides. It is my understanding the Army’s report provided an introspective look at these issues and concluded that suicide and other high risk behaviors must be addressed with a more holistic and multidisciplinary approach. If confirmed, I will work to see the Services share lessons learned to jointly address these risk factors.

Question. If confirmed, what actions will you take to ensure that sufficient mental health resources are available to servicemembers in theater, and to the servicemembers and their families upon return to home station?

Answer. Ensuring that our servicemembers and their families have sufficient access to the mental health resources that they need is critical to the wellness of our total force. I am advised that DOD is working to determine workforce requirements for mental health professionals, and utilizing all the medical, educational, and counseling resources available, but there is further room for improvement. If confirmed, I will monitor how well we are meeting these goals by assessing current utilization rates and further determining ways in which we can leverage more resources for our servicemembers and their families.

MILITARY QUALITY OF LIFE

Question. In January 2009, the Department published its second Quadrennial Quality of Life Review, which focused on the importance of key quality of life factors for military families, such as family support, child care, education, health care and morale, welfare and recreation services.

How do you perceive the relationship between military recruitment and retention and quality of life improvements and your own top priorities for the Armed Forces?

Answer. While I have not had the opportunity to read the Quadrennial Quality of Life Review, I know that quality of life factors, such as those highlighted in the report, contribute significantly to recruiting and retention are key to maintaining the All-Volunteer Force. It is well known that a servicemember’s satisfaction with various aspects of military life, as well as the servicemember’s family’s experience, has a strong influence on a member’s decision to reenlist. If confirmed, I will monitor how effectively DOD programs, in conjunction with community efforts, meet the needs of servicemembers and their families, and ensure that they are contributing positively to recruitment and retention.

Question. If confirmed, what further enhancements to military quality of life would you consider a priority, and how do you envision working with the Services, combatant commanders, family advocacy groups, and Congress to achieve them?

Answer. I understand the importance of quality of life programs on the wellness of the total force as well as on recruiting and retention. If confirmed, I will study the key areas such as access to counseling, fitness opportunities, child care support and spouse employment opportunities. I look forward to working with advocacy groups and Congress to efficiently close gaps and reduce overlaps in programs and to communicate effectively with families to ensure that they know how to access available support when they need it.

FAMILY SUPPORT

Question. Military members and their families in both the Active and Reserve components have made, and continue to make, tremendous sacrifices in support of operational deployments. Senior military leaders have warned of growing concerns among military families as a result of the stress of frequent deployments and the long separations that go with them.

What do you consider to be the most important family readiness issues for servicemembers and their families, and, if confirmed, how would you ensure that family readiness needs are addressed and adequately resourced?

Answer. If confirmed, I will study this issue in great detail, but I believe that family readiness is tethered to family resilience. It is DOD’s responsibility to ensure that families are well prepared to meet the challenges that come with deployment

and service. Through focusing on the psychological, social, financial, and educational well-being of military families, DOD can continue to build family resilience. I understand that great strides have been made in improving access to resources for families through such programs as Military One Source, the Yellow Ribbon Program, but DOD can always improve.

Question. How would you address these family readiness needs in light of global rebasing, base realignment and closure, deployments, and growth in end strength?

Answer. Given upcoming structural changes across the world, it is DOD's responsibility to ensure that all resources including those in health care, education and employment are available to families at the level they need wherever they may be located. In order to accurately address the needs of these families in a changing environment, it is also critical to DOD's success to build community partnerships between all Federal agencies and with local governments, businesses, and non-profit organizations that are stakeholders in addressing the stressful aspects of military life. If confirmed, I will monitor the changing needs of our military families closely.

Question. If confirmed, how would you ensure support to Reserve component families related to mobilization, deployment and family readiness, as well as to Active Duty families who do not reside near a military installation?

Answer. DOD has a duty to ensure that every family has access to quality resources, regardless of location. These resources should provide information, access, referrals, and outreach to all military members and their families. This needs to be underwritten by a coordinated, community based network of care encompassing DOD, VA, State, local, non-profit and private providers. It is my understanding that DOD's Yellow Ribbon Program has been successful in addressing these needs. If confirmed, I will assess this program to ensure that it is properly focused and funded to address the issues faced by Active Duty, Guard, and Reserve servicemembers and their families.

Question. If confirmed, what additional steps will you take to enhance family support?

Answer. During my pre-hearing office calls, I heard about many excellent State programs that support servicemembers and their families. If confirmed, I would like to explore these further and see if they can be expanded across all States.

Question. In your view, are the recent increases in military family support (which have risen to \$8.3 billion in the fiscal year 2012 President's budget) sustainable in future years?

Answer. I believe family programs are sustainable in future years. It will be necessary to review family programs with respect to efficiencies just as every other program in DOD will be reviewed against the overall needs of DOD. The focus should not merely be on more resources, but rather on the efficiency and quality of Family Support programs along with the leveraging community-level organizations and citizens who desire to help their military-connected neighbors. DOD efficiency, along with community partnerships and cooperation, are key to allowing DOD to meet the long-term needs of our military families in an ever-increasing fiscally constrained environment.

DETAINEE TREATMENT POLICY

Question. Do you support the policy set forth in the July 7, 2006, memorandum issued by the Deputy Secretary of Defense stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. Yes.

Question. If confirmed, will you ensure that all DOD policies promulgated and plans implemented related to intelligence interrogations, detainee debriefings, and tactical questioning comply with the Common Article 3 of the Geneva Conventions and the Army Field Manual on Interrogations?

Answer. Yes.

Question. Do you share the view that standards for detainee treatment must be based on the principle of reciprocity, that is, that we must always keep in mind the risk that the manner in which we treat our own detainees may have a direct impact on the manner in which U.S. soldiers, sailors, airmen, or marines are treated, should they be captured in future conflicts?

Answer. Yes, I believe that DOD's leadership should always be mindful of multiple considerations when developing standards for detainee treatment, including the risk that the manner in which we treat our own detainees may have a direct impact on the manner in which U.S. soldiers, sailors, airmen, or marines are treated, should they be captured in future conflicts.

Question. Do you consider waterboarding to be torture?

Answer. As I stated at my February 2009 confirmation hearing and prior to that hearing, I believe that waterboarding crosses the line and should not be employed. Having said that, I also believe, as the President has indicated, that those individuals who operated pursuant to a legal opinion indicating that the technique was proper and legal ought not to be prosecuted or investigated. They were acting pursuant to the law as it was presented to them by the Attorney General at that time.

Question. Do you believe that waterboarding is consistent with the requirements of Common Article 3 of the Geneva Conventions?

Answer. As stated, I have expressed the view that I believe that waterboarding crosses the line and should not be employed. I therefore believe that waterboarding is inconsistent with the requirements of Common Article 3 of the Geneva Convention.

Question. Do you believe that we have obtained intelligence through waterboarding that we would not have been able to obtain through other means?

Answer. As I have stated previously, the Intelligence Community relies on many sources of information. Whether that technique is the only way to obtain certain information is an open question, as I have repeatedly said. If confirmed as Secretary of Defense, I will ensure that all interrogations conducted by DOD personnel are conducted consistent with the Department of the Army Field Manual 2-22.3 and in accord with Geneva Conventions Common Article 3.

Question. Do you believe that the intelligence we received through waterboarding was accurate, or did we receive false leads?

Answer. I cannot generalize about the quality of the intelligence that has been obtained through any particular technique. I am aware of instances in which useful information has been obtained from detainees and other instances in which detainees sought to provide false information.

Question. Are there any circumstances under which you believe the United States should resume waterboarding of detainees?

Answer. As I testified at my February 2009 confirmation hearing, I fully support the President's decision to establish the Army Field Manual, which does not permit waterboarding, as the single standard applying to all interrogations by U.S. Government personnel and have upheld this standard while I was CIA Director. I will continue to do so if confirmed as Secretary of Defense. I believe we should do everything possible to collect intelligence while remaining in compliance with the law.

Question. Are you familiar with the "enhanced interrogation techniques," other than waterboarding, that have been applied to so-called "high value detainees" at Guantanamo and elsewhere?

Answer. Yes.

Question. Do you believe that these enhanced interrogation techniques are consistent with the requirements of Common Article 3 of the Geneva Conventions?

Answer. I would refrain to offer a legal opinion on this question as the answer also depends upon the nature and extent of the technique employed.

COORDINATION WITH THE DEPARTMENT OF HOMELAND SECURITY

Question. After the terrorist attacks on September 11, 2001, Congress established the Department of Homeland Security (DHS), and DOD established the U.S. Northern Command and an Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs.

What is your assessment of the current situation regarding cooperation and coordination between DOD and DHS on homeland security matters, and what will be your goals in this regard if you are confirmed?

Answer. I understand that DOD has established a strong relationship with DHS. I believe DOD and DHS have a common goal: the protection of the United States.

Elements of DOD work very closely with a number of the operational components of DHS including the Coast Guard, the Federal Emergency Management Agency (FEMA), the Secret Service, Customs and Border Protection, and others.

DOD and DHS work hand in hand with the Council of Governors to reach common goals. I understand DOD has a number of liaison and coordination officers throughout DHS and its components. I also understand that there are a number of cyber security related issues on which the Departments are also in collaboration.

If confirmed, my goal would be to continue this strong relationship and build upon a number of these important initiatives.

Question. What do you believe is the appropriate mechanism for DOD to respond to the needs of domestic agencies for DOD support—whether through new or modified programs within DOD or otherwise?

Answer. I understand the mechanisms for DOD to respond to the needs of domestic agencies appear to be working effectively. During the 2010 Deepwater Horizon oil spill, DOD responded to 141 requests for assistance from DHS and the U.S. Coast Guard, by providing ships to skim surface oil, air traffic control capabilities, and other critical assets. DOD has responded to over 50 requests for assistance from FEMA in the past year for a variety of disasters. DOD also regularly assists other agencies in the homeland as well, including the Department of Agriculture for fighting wildfires, and the Secret Service for security during special events such as the Presidential Inaugural. If confirmed, I will work closely with domestic agencies to ensure DOD is prepared to continue to support civil authorities, when appropriate.

IRAQ LESSONS LEARNED

Question. What do you believe are the major lessons learned from the Iraq invasion and the ongoing effort to stabilize the country?

Answer. One of the most important lessons is the U.S. Government must train and plan for post-combat operations. Conflict can occur along a spectrum. Our military must be prepared for combat, but also may have a role in shaping the political, cultural and economic factors that can fuel conflict. The U.S. military must plan and train with civilian counterparts, be prepared to operate effectively in all phases of conflict, and develop better awareness of political, cultural, and economic factors to ensure that our actions will meet our objectives.

Question. What is your understanding and assessment, if any, of the Department's adaptations or changes in policy, programs, force structure, or operational concepts based upon these lessons learned?

Answer. I understand that lessons learned from Iraq and other recent engagements have led to deep and wide-ranging changes in doctrine, organization, training, and policy. For example, the counterinsurgency doctrine has been completely revised, culminating in the publication of Counterinsurgency Field Manual 3-24. The development of Advise and Assist Brigades and intelligence, surveillance, and reconnaissance units are examples of force structure changes.

Question. If confirmed, what additional changes, if any, would you propose making to policy, programs, force structure, or operating concepts based on the lessons of combat and stability operations in Iraq?

Answer. I am not in a position to recommend specific measures at this time. I understand that many of the lessons from Iraq are in the process of being integrated into DOD policy and doctrine, and are contributing to the effort in Afghanistan. If confirmed, I will monitor this ongoing process closely.

LEAD AGENCY TRANSITION IN IRAQ

Question. Responsibility and authority for lead U.S. agency in Iraq is scheduled this year to transition from DOD to Department of State (DOS). By October 2011, DOS is supposed to achieve an initial operating capability as lead agency and achieve full operating capability by December.

What is your understanding and assessment, if any, of the planning and progress on executing this transition from DOD to DOS? In your view, what are the sources of greatest risk, if any, to the current plan and successful implementation of this transition?

Answer. DOD, State Department, and other agencies and offices have undertaken unprecedented levels of coordination and planning for the transition in Iraq. I understand that DOD has an excellent working relationship with DOS and that the two departments are working together at all levels to achieve a successful transition. As one would expect with a transition of this scope and complexity, challenges exist and DOD is doing everything it can to help set up DOS for success.

The biggest concern I am aware of is that the State Department may not receive the resources it needs for the transition.

Question. If confirmed, what changes, if any, would you propose to the current plan or actions for implementation of the transition?

Answer. I believe the current plans are sufficient, based on what I have been briefed to date. If confirmed, I would review and assess the Iraq transition planning and make recommendations on any necessary changes.

STABILITY AND SUPPORT OPERATIONS

Question. The U.S. experience in Iraq and Afghanistan has underscored the importance of planning and training to prepare for the conduct and support of stability and support operations in post-conflict situations.

In your view, what are the appropriate roles and responsibilities, if any, between DOD and other departments and agencies of the Federal Government in the planning and conduct of stability operations?

Answer. As seen in recent operations, there is a great need for economic development, governance, and law enforcement experts who work for the State Department, U.S. Agency for International Development (USAID), and the Justice Department. As appropriate, I understand that DOD operates within U.S. Government and international structures for managing civil-military operations, and will seek to enable the deployment and use of the appropriate civilian capabilities and resources. Ideally, I understand that DOD usually will be in a supporting role. But when no other options are available, and when directed, DOD has led stability operations activities to establish civil security and control and to restore essential services, repair and protect critical infrastructure, deliver humanitarian assistance, and then transitioned lead responsibility to other U.S. Government agencies, foreign governments and security forces, and international governmental organizations and non-governmental organizations.

Question. In developing the capabilities necessary for stability operations, what adjustments, if any, should be made to prepare U.S. Armed Forces to conduct stability operations without detracting from its ability to perform combat missions?

Answer. I note DOD policy states that "stability operations are a core U.S. military mission that DOD shall be prepared to conduct with proficiency equivalent to combat operations." This represents a significant cultural and programmatic shift in recent years. If confirmed, I intend to familiarize myself with the efforts of the Military Departments to enhance proficiency on these missions and will work with the Chairman, the Military Department Secretaries, and Service Chiefs to ensure appropriate adjustments are made.

Question. Do you believe that the authorities provided under section 1206 (Building the Capacity of Foreign Military Forces) and section 1207 (Security and Stabilization Assistance) of the National Defense Authorization Act for Fiscal Year 2006 contribute to a policy of military engagement?

Answer. I believe the authorities provided under sections 1206 and 1207 of the National Defense Authorization Act for Fiscal Year 2006 have made the government more agile in its ability to respond to urgent and emergent counterterrorism and stabilization challenges. I am told that the "dual-key" processes established to manage these projects have fostered greater collaboration between the Departments of State and Defense. If confirmed, I intend to apply the lessons learned from our experience with these programs in future security and stabilization assistance efforts with Secretary Clinton and other interagency partners.

Question. Do you believe that the U.S. Government needs to establish new organizations or offices to manage stability operations? If so, why?

Answer. Although I have not studied this issue in detail, my understanding is that the U.S. Government does not need to establish new organizations or offices to manage stability operations. If confirmed, however, I will be open to the advice of others on this issue.

Question. Do you believe that the U.S. Government needs to establish new procedures to manage stability operations? If so, why?

Answer. I think one area where we can improve is to strengthen our combined ability to conduct "whole-of-government" planning which will enhance the management and the effectiveness of the U.S. Government's stabilization and reconstruction activities. If confirmed, I will review how to make such planning a priority.

Question. What role do you believe DOD should play in providing training and advocacy for "rule of law" development in Iraq and Afghanistan?

Answer. Without fair and effective rule of law, neither Iraq nor Afghanistan will be able to prevent the return of terrorists. Both countries require U.S. Government assistance in rule of law capacity building in such areas as civilian police forces, attorneys, and judges. I strongly support the State Department's lead in this critical endeavor. However, in fragile security environments, my sense is that DOD rule of law practitioners can also play a major and useful role in providing training and assistance.

SECURITY SITUATION IN IRAQ

Question. What is your assessment of the current security situation in Iraq?

Answer. Iraq still faces dangerous and determined enemies, but these enemies do not have the support of the Iraqi people. Although occasional high-profile attacks still occur, the underlying security situation in Iraq remains stable and these attacks have not sparked a return to widespread insurgency or civil war.

Question. What are the main challenges to stability and security in Iraq over the coming months?

Answer. The main challenges to internal stability and security in Iraq are al Qaeda in Iraq and Iranian-backed Shia extremist groups. Moreover, the unresolved status of territories claimed by the Kurdistan Regional Government has the potential to create fissures that can be exploited by extremist groups, and could even lead to an escalation of tension between Kurdish and central government forces. However, with sustained political engagement by Iraqi leaders and a strong U.S. support role, the ISF should be able to handle these challenges.

DRAWDOWN IN IRAQ

Question. Do you support the current plan for the drawdown of U.S. forces from Iraq consistent with the U.S.-Iraq Security Agreement of 2008 signed by President Bush and Prime Minister Maliki?

Answer. Yes.

Question. If the Government of Iraq were to ask for the continued presence in Iraq of U.S. forces beyond the end of 2011, would you support the deployment or retention of additional troops in Iraq beyond the current deadline for U.S. troop withdrawal?

Answer. Iraqi leaders and U.S. officials have acknowledged that there will be gaps in Iraqi Security Forces' capabilities after 2011, especially in external defense. I believe the United States should consider a request from the Government of Iraq to remain in Iraq for a limited period of time to provide limited assistance to fill these gaps.

U.S.-IRAQ STRATEGIC RELATIONSHIP

Question. In your view, what will be the nature of the U.S.-Iraq strategic relationship after December 31, 2011?

Answer. The nature of the U.S.-Iraq strategic relationship desired by both countries is articulated in the November 2008 Strategic Framework Agreement (SFA). The SFA establishes a structure for cooperation and collaboration across a variety of sectors, including commercial, education, cultural, political, energy, and defense.

Question. What do you see as the greatest challenges for that relationship over the coming years?

Answer. The greatest challenges will be maintaining U.S. engagement and support for Iraq during a time of change. Recent turmoil in the broader Middle East highlights the importance of active U.S. engagement and maintaining strategic partnerships with regional partners based on mutual interests and mutual respect. We must maintain focus on Iraq in order to advance broader U.S. objectives of peace and security in the region.

AFGHANISTAN COUNTERINSURGENCY STRATEGY

Question. Do you support the counterinsurgency strategy for Afghanistan? In your view, is that the right strategy?

Answer. Yes, I support the strategy that the President has set forth and I believe it is the right strategy. We have the necessary resources and strategy in place to succeed in our focused counterinsurgency campaign. This strategy has reversed the insurgency's momentum and is helping the Afghans increase their governance capacity and build security forces that are capable of providing the security and basic services necessary to achieve a peaceful, stable Afghanistan that does not again become a safe haven for terrorists. The gains made are fragile and reversible.

Question. If confirmed, are there changes you would recommend to the U.S. strategy in Afghanistan? For example, would you support an increase in counterterrorism action in Afghanistan?

Answer. I believe U.S. strategy in Afghanistan is sound. The administration tracks metrics of progress throughout the year and conducts annual reviews to determine whether adjustments are necessary. Counterterrorism is a significant part of the counterinsurgency strategy, and managing the balance of all aspects of the strategy is an ongoing process.

Question. What is your assessment of the progress of the counterinsurgency campaign in Afghanistan?

Answer. Important gains have been made over the past 18 months, establishing security and Afghan Government authority in former Taliban strongholds such as

Helmand and Kandahar, as well as building the capacity of the Afghan National Security Forces. Although the gains are fragile and reversible, momentum has shifted to the Afghan Government, and they are on track to begin the transition process by assuming lead security responsibilities in several areas of the country this summer.

Question. In your view, how significant an impact does the death of Osama bin Laden have on the counterinsurgency campaign in Afghanistan?

Answer. The death of Osama bin Laden is a significant victory in our campaign to disrupt, dismantle, and defeat al Qaeda, which is the core goal of our efforts in Afghanistan. The successful operation does not mean we can rest, but rather we have a unique opportunity to make new gains on al Qaeda while it is in disarray. It is too early to assess the long-term impact of his death, but it clearly conveys our persistence, determination and capability to achieve our goals.

TRANSITION OF SECURITY RESPONSIBILITY IN AFGHANISTAN AND U.S. TROOP
REDUCTIONS

Question. Do you support the July 2011 date announced by President Obama to begin transferring more and more responsibility for Afghanistan's security to the Afghan security forces and to begin the drawdown of U.S. forces from Afghanistan, with the pace of reductions to be based on conditions on the ground?

Answer. I support the July 2011 date to begin the process of transferring lead security responsibility to the Afghan National Security Forces (ANSF) and to begin a responsible, conditions-based drawdown of U.S. forces. Over the preceding 18 months, the International Security Assistance Force (ISAF) and its ANSF partners have made significant gains in the overall security environment. Their hard-earned gains have set the necessary conditions to begin the transition of responsibility.

Question. Do you support a significant drawdown of U.S. troops starting in July of this year?

Answer. I support a responsible conditions-based drawdown as called for by the President. I believe we have made the progress necessary to give the President meaningful options for his decision. Decisions regarding the size and pace of the drawdown will be based on commanders' assessment of conditions and warfighting requirements.

Question. In your view, what impact, if any, does the death of Osama bin Laden have on the size or time table for the reduction of U.S. troops in Afghanistan?

Answer. It is too early to know the implications of Osama bin Laden's death on the region and how it will affect the campaign. While bin Laden's death sends a clear message to other al Qaeda and Taliban senior leaders about U.S. resolve, there are no indications at this stage of what impact, if any, it might have for decisions regarding the size or time table for reducing forces in Afghanistan.

Question. Do you support the goal of transitioning security responsibility to the Afghan security forces by 2014?

Answer. Yes. At the NATO Summit in Lisbon, the participants in ISAF endorsed President Karzai's goal of ANSF assuming lead responsibility for security throughout Afghanistan by 2014. Although much work is still left, I am confident that this objective can be met.

AFGHANISTAN NATIONAL SECURITY FORCES

Question. What is your assessment of the progress in developing a professional and effective ANSF?

Answer. The ANSF have made enormous progress in size and quality over the past 2 years and remain ahead of schedule for their growth targets this year. In addition, both the Afghan National Army (ANA) and Afghan National Police (ANP) have made significant gains in effectiveness and professionalism, although more remains to be achieved. The establishment of the Afghan Local Police (ALP) program has also fostered greater local capability to resist insurgents. U.S. and NATO efforts to recruit, train, equip, and deploy these forces, in conjunction with very capable Afghan Ministers of Defense and Interior, are paying real dividends on the ground in Afghanistan. These gains have set the ANSF on a path to be capable of assuming lead security responsibilities across Afghanistan by the end of 2014.

Question. Do you support the increase in the size of the ANSF beyond the level of 305,000 by the fall of 2012?

Answer. Yes. Military commanders, who are closest to the problem and have expert knowledge, have conducted detailed studies on ANSF personnel and capabilities requirements. These requirements were developed by examining the terrain, the strength of the enemy, and the core goals in the DOD campaign plan. In order to ensure the Afghans have the capabilities they need to secure their country in the

current threat environment, continued ANSF growth is needed. The President has endorsed growth to 352,000 and I support that decision.

Question. What do you see as the main challenges to building the capacity of the ANSF and, if confirmed, what recommendations, if any, would you make for addressing those challenges?

Answer. Some of the main challenges to building the capacity of the ANSF include poor literacy rates and low education levels in the Afghan population which constrain the development of more advanced capabilities such as logistics, aviation, medical and communications units. These are capabilities that will be necessary for the ANSF to ensure Afghanistan does not again become a safe haven for terrorists. NATO Training Mission-Afghanistan has put a lot of attention on, and resources toward, the literacy problem. Another key challenge is the development of strong and capable leadership, which takes time and experience. If confirmed, I will work with military and civilian leaders and international partners to explore ways to bolster ANSF capacity.

AFGHAN GOVERNANCE AND DEVELOPMENT

Question. While improving security for the Afghan people is a key component of our counterinsurgency strategy in Afghanistan, the success of that strategy also depends on improving the Government of Afghanistan's capacity to provide governance, better services and economic development. Significant concerns remain over the performance of the Government of Afghanistan in meeting the needs of the Afghan people and fighting corruption.

What do you see as the role for DOD in building the capacity of the Government of Afghanistan to deliver services, provide better governance, improve economic development and fight corruption in Afghanistan?

Answer. I strongly agree that improving governance and economic development is as crucial to our strategy in Afghanistan as is improving security. While DOS and USAID are the lead agencies within the U.S. Government on governance and development initiatives in Afghanistan, the DOD contributes to this effort and must cooperate closely with State and USAID. Coordinating DOD stabilization projects with civilian reconstruction and development efforts ensures that the military and civilian activities work together to support longer-term development objectives, as well as near-term stabilization.

In areas where civilians cannot operate independently due to an insecure environment, they regularly collaborate with military counterparts. Recognizing that corruption erodes the legitimacy of the Afghan state and fuels the insurgency, the Commander, ISAF, created Task Force Shafafiyat ("Transparency") to foster a common understanding of the corruption problem and coordinate anti-corruption efforts among ISAF, U.S. Forces-Afghanistan, the Afghan Government, and the international community. The task force has enabled ISAF to begin helping the Afghans address corruption and has improved U.S. contracting practices to ensure our funds are not being used in ways that contribute to the corruption that enables the insurgency.

RECONCILIATION

Question. Under what conditions should reconciliation talks with the Taliban leadership be pursued?

Answer. The President has clearly outlined our support for an Afghan-led process to achieve a political resolution to the conflict in Afghanistan. I support Afghan Government efforts to achieve the reconciliation of groups and individuals who agree to cut ties with al Qaeda, cease violence, and accept the Afghan Constitution.

Question. What is your assessment of the likelihood that such conditions may be achieved in the near future?

Answer. The clear successes we have seen in the military campaign are helping to create the conditions for reconciliation. The insurgency does not represent a clear hierarchy, and includes a variety of competing and affiliated groups. Resolution of the conflict in Afghanistan will likely require a process that includes both national and local dispute resolution. I am optimistic that the sustained combination of our military, governance, and diplomatic efforts is helping to set the conditions for the Afghan Government to build the political consensus that will ultimately bring about a resolution to the conflict.

U.S. STRATEGIC RELATIONSHIP WITH PAKISTAN

Question. What in your view are the key U.S. strategic interests with regard to Pakistan?

Answer. Most importantly, the core national security goal remains, to disrupt, dismantle, and defeat al Qaeda and its militant allies, and eliminate their capacity to threaten the United States and its allies in the future. U.S. strategic interests in Pakistan encompass both our relationship with Pakistan itself and Pakistan's role in the campaign against al Qaeda. Al Qaeda and other extremists use safe-havens in Pakistan to plot and prepare attacks against the U.S. and our allies and partners, and it is essential to continue working with Pakistan to eliminate these safe havens.

In addition, Pakistan's civilian-led government requires international support to maintain political stability and to work toward the ability to govern all of its territory effectively. The fact that Pakistan is a nuclear state that faces internal threats from extremist organizations adds to the urgency of these requirements. Furthermore, U.S. economic interests in South Asia require stability in the region. Preventing, if possible, a potential Pakistan-India conflict is another important and strategic interest. For these reasons, it is in the United States' interest for Pakistan to have a strong civilian-led government and an open society, to live in peace and security with its neighbors, and to ensure its nuclear assets remain secure, in accordance with international standards. If confirmed, I look forward to working with Congress as we pursue these strategic interests with Pakistan.

Question. U.S. and Pakistan officials have been working together for years to counter the threat of terrorism. However, the revelation that Osama bin Laden has been hiding out apparently for years at a spacious, highly-secure compound in Pakistan, less than 35 miles from the capital, has raised disturbing questions about the nature of Pakistan's cooperation with the United States in the fight against terrorism.

What in your view are the key lessons from the operation to kill Osama bin Laden for the U.S.-Pakistan relationship?

Answer. The operation against Osama bin Laden was a vital element of the President's comprehensive strategy to disrupt, dismantle, and defeat al Qaeda, but it is far from the only element in this strategy. One of the key lessons from this operation is that we have seen no clear evidence to indicate that senior Pakistani leaders were involved in harboring Osama bin Laden or knew of his whereabouts. Although the relationship with Pakistan is not always easy and we have our differences, continuing cooperation with Pakistan is critical to keep a tremendous amount of pressure on al Qaeda's leadership and the networks that provide it support and safe haven at a time when it is most vulnerable. The operation presents a historic opportunity not only for us, but also for Pakistan, to advance our shared interests and strengthen our cooperation in eradicating terrorist networks that threaten both nations. If confirmed, I will continue to work with our partners in both Afghanistan and Pakistan to achieve our goal of eliminating terrorist networks that threaten the United States and our allies and partners and continue to seek Pakistan's unambiguous support in the fight against al Qaeda and the regional syndicate of terrorist networks.

Question. If confirmed, what changes, if any, would you recommend for U.S. relations with Pakistan, particularly in terms of military-to-military relations?

Answer. Our military-to-military relationship with Pakistan, like our overall relationship, has featured ups and downs and is challenged by a long-term lack of trust within Pakistan about our intentions. If confirmed I will continue to focus on building the trust that is necessary for the effective partnership we need with Pakistan.

U.S. ASSISTANCE TO PAKISTAN

Question. Since 2001, the United States has provided significant military assistance to Pakistan, including foreign military financing and training and equipment through the Pakistan Counterinsurgency Fund to build the capacity of the Pakistan Army and Frontier Scouts to conduct counterinsurgency operations. In addition, the United States has provided significant funds to reimburse Pakistan for the costs associated with military operations conducted by Pakistan along the Afghanistan-Pakistan border and other support provided in connection with Operation Enduring Freedom.

How effective, in your view, has this assistance been in improving Pakistan's efforts and commitment to counter terrorists in Pakistan?

Answer. Security assistance, Coalition Support Fund reimbursements, and cross-border coordination with ISAF and Afghan forces have helped enable Pakistan's counterinsurgency campaign. Since 2009, Pakistan has undertaken counterinsurgency operations against extremist organizations in the northwest, including in Swat, South Waziristan, Mohmand, and Bajaur, with varying levels of success. Pakistan's level of commitment is reflected in the enormous casualties it has suf-

ferred as a result of terrorism in the last few years, including more than 11,000 military personnel killed or wounded in action and more than 30,000 civilian casualties in recent years, most recently in significant attacks following the bin Laden operation. However, Pakistan continues to lack the necessary military and civilian capacities to “hold” and “build” in cleared areas. If confirmed, I will work Congress to ensure that the support we provide is yielding the results we seek.

OSAMA BIN LADEN AND AL QAEDA

Question. What changes, if any, should the United States make to its security assistance policy regarding Pakistan in light of the revelation of Osama bin Laden’s hideout within Pakistan?

Answer. The current “train-advise-and-equip” programs with the Pakistan military and paramilitary forces have been an important component in pursuing the near-term objective of eliminating terrorist sanctuaries and disrupting the al Qaeda network. It is vital, however, that Pakistan live up to its end of the bargain, cooperating more fully in counterterrorism matters and ceasing to provide sanctuary to Afghan Taliban and other insurgent groups. Therefore, in the wake of the Osama bin Laden raid, we have asked Pakistan to take a number of concrete steps to demonstrate cooperation and counter-terrorism. Future requests for security assistance will be informed by Pakistan’s response to the counter-terrorism steps we have proposed.

Question. In your view, will the death of Osama bin Laden have a significant impact on the conflict against al Qaeda and if so, how?

Answer. The death of Osama bin Laden is a significant blow to al Qaeda and brings us closer to its strategic defeat. However, al Qaeda remains a potent, dangerous, and adaptable foe. Its close allies, such as Pakistan Taliban and the Haqqani Network, have increasingly adopted al Qaeda’s jihadist vision and, as core al Qaeda is weakened, there is a risk that decentralized affiliates may pose an increased threat to the United States. To achieve the President’s objective of defeating al Qaeda and preventing its return to either Pakistan or Afghanistan, it is vital that we continue to aggressively pursue our accelerated counterterrorism campaign in the Afghanistan-Pakistan border region.

Question. What is your assessment of the threat posed by al Qaeda affiliates to the U.S. Homeland, U.S. interests overseas, and western interests more broadly? Which affiliates are of most concern?

Answer. Al Qaeda and its adherents are diverse, dispersed, and decentralized. They are present in the Arabian Peninsula, North and East Africa, South Asia, Iraq, and elsewhere around the globe, including within the United States. Intent and ability to attack the United States varies by group, but such attacks are a common theme in their propaganda and planning. Bin Laden himself remained very focused on attacking the Homeland. Al Qaeda in the Arabian Peninsula has already demonstrated both the intent and the capability to conduct attacks against the United States. Despite the death of Bin Laden, core al Qaeda and its adherents in the Afghanistan-Pakistan region remain a very dangerous threat.

ARAB SPRING

Question. The Arab Spring has changed—and will likely continue to change—the political dynamics in the Middle East and North Africa for many years to come. These changes will require the United States to adjust our military-to-military and defense civilian relations in this region. Some observers argue that the United States should reduce significantly our military-to-military contact in countries as a result of the ongoing changes and others advocate more robust and stepped-up contact with our partners in this region.

In your view, what should be the posture of the U.S. Government on military-to-military and defense civilian relations in the region?

Answer. The DOD’s military-to-military and defense civilian relations with our partners in the Middle East and North Africa have played a critical role in advancing U.S. strategic interests: defeating extremists, countering weapons of mass destruction, countering terrorist organizations, ensuring the free flow of commerce, preventing Iran from acquiring a nuclear weapon, disrupting smuggling and piracy, supporting operations in Iraq and Afghanistan, and securing Israel. Engagement with our key Middle Eastern and North African partners’ defense ministries and militaries, building partner capacity to meet common challenges, having a forward presence to enable operations and deter potential threats, and being able to access regions—if and when necessary for future contingencies—require considerable effort on the part of many organizations within DOD working in tandem with DOS. During this time of change and uncertainty in the region, I understand that DOD will

continue to evaluate and re-calibrate the nature and substance of our relationships to ensure they are consistent with U.S. values and advance U.S. vital national interests.

LIBYA

Question. Do you support the limited U.S. military mission in Libya?

Answer. Yes. DOD is supporting operations against Libya as a part of an international coalition that is enforcing United Nations Security Council Resolution (UNSCR) 1973. The coalition's combined efforts have prevented the mass killing of civilians in Libya. The President was clear from the beginning that the United States would bring its unique set of capabilities to bear on the front end of this conflict to stop the advance of Qadhafi's forces, take out regime air defenses, and set the stage for the NATO mission. While our role is now to support and assist, the U.S. military can provide unique capabilities to this effort that our NATO allies and other partners cannot provide either in kind or at the levels required, such as electronic warfare, aerial refueling, intelligence, surveillance and reconnaissance support, and unmanned aerial vehicle strikes.

Question. Do you support broadening the military mission to include regime change?

Answer. No. While I do believe that the Qadhafi regime has lost all legitimacy and must go, the goal of our military effort, and the mandate of the United Nations (U.N.) resolution, is very clear: protect the Libyan people. We must continue to use a range of diplomatic and economic tools to apply further pressure on the Qadhafi regime. Ultimately, however, it will be up to the Libyan people to decide their future.

Question. Should the United States provide arms and training to the Libyan rebels?

Answer. The purpose of our military action is grounded in UNSCR 1973, to protect the Libyan people in population centers like Benghazi from a massacre at the hands of Qadhafi's forces, and any assistance will be for that purpose. The administration has chosen not to provide arms or training to the rebels at this time, but it is my understanding that DOD has authorized up to \$25 million of non-lethal support which includes medical equipment, protective vests, binoculars, and radios.

STRATEGIC COMMUNICATIONS AND INFORMATION OPERATIONS

Question. Over the past few years, DOD has funded an increasing number of psychological operations and influence programs. While the Department does not have any separate documentation outlining its strategic communication activities, GAO reports that DOD "spent hundreds of millions of dollars each year" to support its information operations outreach activities. Many of these programs are in support of operations in Iraq and Afghanistan, but Military Information Support Teams (MISTs) from United States Special Operations Command are also deploying to U.S. embassies in countries of particular interest around the globe to bolster the efforts of DOS and the USAID. Further, the geographic combatant commands are moving into this operational space.

What are your views on DOD's psychological operations and influence programs and its integration into overall U.S. foreign policy objectives?

Answer. I understand that DOD's capability to effectively operate in the information environment is essential to the U.S. Government's ability to engage foreign audiences and adversaries to service our strategic and operational interests and objectives. It is particularly important to counter the rise of violent extremism, reduce the influence of those who challenge our interests and military operations, and it is a critical element of Combatant Command strategies for security and stability in their respective geographic regions. To be effective, these activities must be nested in U.S. foreign policy objectives and integrated across government and with our allies. I have seen much improvement in the coordination and de-confliction of these activities across the interagency and, if confirmed, will seek to build on these relationships.

I am aware that there has been acute interest from Congress in this area as budget requirements have risen sharply in recent years based on the growing realization of our military leaders that we must effectively operate in the 21st century information environment. Over the last year, DOD has taken significant steps to improve and ensure appropriate and focused management and oversight of all influence programs including psychological operations (now re-named Military Information Support Operations). If confirmed, I will continue this effort fully cognizant of both its importance to our military strategy and the requirements to ensure that DOD oper-

ates as a mutually supporting partner in a cooperative effort to advance our Nations objectives.

Question. You were reportedly a strong supporter of the creation of the State Department's Center for Strategic Counterterrorism Communications. In your view, what—if any—support should DOD provide to this Center?

Answer. As the Director of the Central Intelligence Agency, I supported the creation of the Center for Strategic Counterterrorism Communications (CSCC) and it will continue to have my support should I be confirmed as Secretary of Defense. Both DOD and CIA support the Center with personnel. DOD currently provides three military servicemembers in support of the CSCC, and I understand that DOS has requested several additional personnel. This request is undergoing review and consideration within DOD.

Question. In 2005, al Qaeda's Ayman al-Zawahiri declared that "We are in a battle, and more than half of it is taking place in the battlefield of the media." Last year, a non-partisan study highlighted the lack of a U.S. strategy to counter radical ideologies that foment violence (e.g. Islamism or Salafist-Jihadism).

What is the role of DOD versus the Intelligence Community and the State Department?

Answer. I understand DOD participates in several interagency efforts to counter violent extremism and works closely with not only DOS, but also CIA, the National Counterterrorism Center (NCTC), and others to ensure DOD programs are synchronized and deconflicted with programs of the other departments and agencies. Due to DOD's global presence, DOD personnel often encounter the effects of radical ideologies and the violence propagated by Islamist extremists on a daily basis. DOD personnel are thus well situated to contribute to U.S. Government efforts to counter the messages of violent extremists. DOD seeks to reduce support for violent extremist organizations by engaging foreign local populations, countering adversary propaganda, and developing relationships with key leaders and credible local interlocutors across the globe.

Question. In your view, how do we counter radical ideologies that foment violence?

Answer. The efforts of the U.S. Government to counter radical ideologies must be persistent and long-term, and should be developed in order to shape and support collaborative regional security initiatives. One critical area of focus is those populations that are most vulnerable to extremist messaging. The U.S. Government should work within the interagency framework to build and implement programs and activities that address these at-risk audiences, which are predominantly under 30 years of age and mostly, but not exclusively, male. We have learned from experience that one of the most effective ways of countering such messaging is by seeking to amplify the credible voices of our Muslim partners.

Question. Defense Secretary Gates launched the Minerva Program in 2009 to develop deeper social, cultural and behavioral expertise for policy and strategy purposes.

Do you support this program and its goals?

Answer. I have not had an opportunity to be briefed on the program and its specifics. In general, I agree that understanding the dynamics of social, political, economic, and cultural systems is critical not only for national security policy makers and strategic planners, but also for commanders down to the lowest tactical level.

SOMALIA

Question. Somalia is a collapsed state with a weak government unable to project either power or stability or to provide services to its people. Somalia is also a training and operations hub for: al Shabaab and other violent extremists; pirates operating in the Indian Ocean and Arabian Peninsula; illicit traffickers of weapons, humans, and drugs; and remnants of the al Qaeda East Africa cell that was responsible for the destruction of our embassies in Dar es Salaam and Nairobi in August of 1998.

What is your assessment of the threat posed by al Shabaab to the U.S. and Western interests in the Horn of Africa and to the U.S. Homeland?

Answer. The threat from al-Shabaab to the U.S. and Western interests in the Horn of Africa and to the U.S. Homeland is significant and on the rise. Al-Shabaab leaders, who have claimed affiliation with al Qaeda since 2007, are developing ties with al Qaeda in the Arabian Peninsula, and are showing an increasing desire to stage international terrorist attacks in addition to their acts of violence inside Somalia. Al-Shabaab employs several hundred foreign fighters and regularly tries to recruit fighters from Somali diaspora communities in the United States and Europe. The Kampala bombings last July, which killed 79 innocent civilians, were a wake-up call and a reminder that al-Shabaab is willing to operationalize its rhetoric. As

al-Shabaab faces increasing international pressure, we may see the group increase its international attacks. Al-Shabaab continues to repress the Somali people and remains the main adversary to the Somali Transitional Federal Government (TFG) and to the African Union Mission in Somalia (AMISOM) peacekeepers in Mogadishu.

Further, Somalia's lack of governance and sparse population could make it appealing as a safe haven for al Qaeda. As al Qaeda undergoes leadership changes and regroups from counterterrorism operations in Pakistan, we need to ensure that it does not relocate its center of operations to Somalia.

Question. Given your knowledge of the role of the various U.S. Government departments and agencies in the Horn of Africa, what changes, if any, would you make to DOD's current role in the Horn of Africa?

Answer. I understand the DOD mission in the Horn of Africa is to build partnership capacity in order to promote regional security and stability, prevent conflict, and protect U.S. interests. I believe this mission is appropriate. I am informed U.S. Africa Command is undertaking a review of East Africa to determine how our military efforts in the region work in concert with our interagency partners to achieve our collective regional goals and counter al Qaeda's linkages to elements of al-Shabaab. DOD's ultimate goal is a fully integrated strategy under which security assistance, capacity building, operational collaboration with regional partners, and counter-terrorism actions are synchronized to provide the regional security and stability that is in the interest of both the United States and our regional partners.

This review of DOD's East Africa strategy will also review the status of Joint Task Forces to determine if any should be considered for transition to a more permanent Joint Interagency Task Force—including recommendations on basing and funding for Combined Joint Task Force-Horn of Africa (CJTF-HOA) based at Camp Lemonier, Djibouti. If confirmed, I will work to ensure our strategy is developed as part of a coordinated U.S. national security policy towards the Horn of Africa, and to determine how the DOD can and should best support this policy.

YEMEN AND AL QAEDA IN THE ARABIAN PENINSULA

Question. A number of senior U.S. officials, including you, have indicated the most significant threat to the U.S. Homeland currently emanates from Yemen.

What is your assessment of the current U.S. strategy in Yemen?

Answer. U.S. goals in Yemen are to ensure Yemen is stable, unified, and economically viable, and to help Yemen deny al Qaeda in the Arabian Peninsula (AQAP) a safe-haven and operational platform. We do not yet know how the current crisis will play out.

The ongoing unrest has weakened an already fragile economy and allowed AQAP to expand its influence and to make some tactical gains in the tribal areas—in several cases seizing and holding territory now outside of Republic of Yemen Government control. However, despite AQAP's limited gains, they remain distant from, and largely counter to, the current anti-government movement in Yemen.

AQAP is intensely focused on conducting a near-term attack against the United States, and poses an immediate terrorist threat to U.S. interests and the Homeland. The Christmas Day attempted bombing of the Detroit-bound airliner in 2009 and the failed package bombing attempt in October 2010 were the more recent attempts by al Qaeda to attack the U.S. Homeland. Despite these setbacks, al Qaeda and its affiliate, AQAP, are still actively plotting attacks, with the principal goal of successfully striking the U.S. Homeland. If confirmed, I will continue to work to achieve U.S. objectives in Yemen.

Question. Given the ongoing political upheaval and splintering of the military in Yemen, what are your views on the United States continuing to provide security assistance—most significantly DOD section 1206 funding—to Yemeni counterterrorism forces?

Answer. In consideration of the ongoing political environment in Yemen, I understand DOD is constantly evaluating our security assistance and capacity building programs—particularly those provided under section 1206. The Republic of Yemen Government currently remains a critical partner in the war against al Qaeda, and DOD remains particularly mindful of the continued and growing threat to the Homeland from AQAP.

NATO

Question. At the NATO Summit in Lisbon last November, NATO members adopted a new Strategic Concept setting out the Alliance's vision for the coming decade. In their communiqué from that Summit, NATO countries envisioned a more agile, capable and cost-effective alliance, able to defend against a full range of threats and

to operate effectively with other international organizations and non-NATO nations. At the same time, many NATO members have significantly reduced their national defense budgets in response to the global economic crisis.

What are the greatest opportunities and challenges that you foresee for NATO in meeting its strategic objectives over the next 5 years?

Answer. The United States has enormous stakes in a strong, mutually supportive NATO alliance, and the President has stressed his strong desire to rebuild and adapt transatlantic security relationships to meet 21st century security challenges. NATO's new Strategic Concept is an important step in ensuring that NATO will continue to play its unique and essential role in ensuring the common security of its members and it will guide the next phase in NATO's evolution. Over the next 5 years, top-tier NATO-related challenges include, first and foremost, achieving durable progress on a successful transition in Afghanistan, implementing missile defense in Europe, and stemming the deterioration in European military capability. It is my sense that a number of our NATO allies, while fulfilling their current commitments, have been underperforming in terms of their own investments in defense capabilities, especially when it comes to deployable expeditionary forces. Many are planning further cuts to defense investment in order to sustain their operations in Afghanistan and elsewhere while coping with the financial crisis. The challenge will be for allies to work together to determine which capabilities must be sustained and how that can be done in a more cost-effective manner, while also identifying other capability or mission areas where a higher degree of risk is acceptable.

Question. Do you envision further enlargement of NATO within the next 5 years?

Answer. The President has stated that NATO enlargement should continue so long as new candidates are democratic, peaceful, and willing to contribute to common security. Precisely which countries and within what timeframe NATO would undertake further enlargement are important questions which the administration would need to address in close consultation with Congress and our allies. It is important that each NATO aspirant should be judged on its individual merits and progress in implementing political, economic and military reforms.

Question. In your view, is there a continuing requirement for U.S. nuclear weapons to be deployed in NATO countries?

Answer. NATO's New Strategic Concept stated NATO's commitment to the goal of creating the conditions for a world without nuclear weapons, but made clear that as long as there are nuclear weapons in the world, NATO will remain a nuclear Alliance. At Lisbon, NATO also initiated a review of its overall posture in deterring and defending against the full range of threats to the Alliance. I am informed that this review will recommend an appropriate mix of nuclear, conventional and missile defense capabilities for the Alliance. This provides an opportunity to adapt NATO's nuclear posture to the realities of the 21st century. NATO's new Strategic Concept reflects allies' commitment to NATO as a nuclear alliance and to nuclear burden sharing as fundamental to deterrence and assurance in Europe. NATO has rightly made clear that it will not unilaterally eliminate its nuclear capabilities absent an agreement with Russia on non-strategic nuclear weapons. The administration is exploring negotiations with Russia to address the disparity in non-strategic weapons, and will consult with allies on those negotiations.

SPECIAL OPERATIONS FORCES

Question. The previous two Quadrennial Defense Reviews (QDR) have mandated significant growth in our Special Operations Forces and enablers that directly support their operations.

Do you believe that we should further increase the number of special operations personnel? If so, why, and by how much?

Answer. I believe that the current growth in special operations personnel is appropriate. I understand that U.S. Special Operations Command (SOCOM) is programmed to meet the growth mandated by the last two QDRs. If confirmed, I will examine if additional growth of Special Forces is needed, but only after that programmed growth is complete.

Question. In your view, how can the size of Special Operations Forces be increased, while also maintaining the rigorous recruiting and training standards for special operators?

Answer. Special Operations Forces cannot be mass produced. Special Operations Command leaders have stated that Special Operations growth should not exceed 3 to 5 percent per year in order to ensure quality of the manpower being produced. I have been informed that this is the pace SOCOM has sustained to great effect over the past several years and is on track to sustain over the next several years.

Question. In recent years, Special Operations Forces have taken on an expanded role in a number of areas important to countering violent extremist organizations, including those related to information and military intelligence operations. Some have advocated significant changes to SOCOM's title 10 missions to make them better reflect the activities Special Operations Forces are carrying out around the world.

What current missions, if any, do you believe can and should be divested by SOCOM, and why? Are there any additional missions that you believe SOCOM should assume, and, if so, what are they and why do you advocate adding them?

Answer. I understand that DOD uses a range of processes, such as the Unified Command Plan, to review the mission sets and responsibilities it assigns to SOCOM on an ongoing basis. Additionally, the law provides the President and the Secretary of Defense flexibility needed to meet changing circumstances. At this time I would not advocate significant changes to SOCOM's title 10 missions. If confirmed, and after I have been in office for a sufficient time to determine if changes are advisable, I will consider any recommend changes as appropriate or necessary.

Question. What can be done to ensure that indirect special operations missions with medium- and long-term impact, such as unconventional warfare and foreign internal defense, receive as much emphasis as direct action, and that they receive appropriate funding?

Answer. The activities of Special Operations Forces are quite varied, from high-risk strikes and counterterrorist raids to working by, with, and through local partners, whether training and advising foreign counterparts or providing support to civilian authorities abroad. I believe that each of these missions is highly valued within the special operations community. However, as the security landscape has changed, the demands for these kinds of missions have begun to exceed the ability of the Special Operations community alone to meet them. As a remedy to this situation, Secretary Gates advocated that the conventional forces be prepared to take on more of the kinds of missions that used to fall exclusively to SOF, including, for example, Security Force Assistance. I agree that broadening the spectrum of irregular missions that our conventional forces are able to take on will alleviate some of the demands being placed on the SOF community and ensure that the Total Force is adequately prepared to undertake both direct and indirect missions.

COMBATING TERRORISM

Question. What is your understanding of the Department's strategy for combating terrorism?

Are there steps the Department should take to better coordinate its efforts to combat terrorism with those of other Federal departments and agencies?

Answer. It is my understanding that the DOD strategy for combating terrorism is comprised of three elements: antiterrorism—defensive measures used to reduce the vulnerability of individuals and property to terrorist acts; counterterrorism—offensive actions to disrupt, dismantle and defeat terrorists, and resolve terrorist incidents; and consequence management—measures to recover from terrorist attacks. Each of these components of combating terrorism has its own policies and strategies, developed in close coordination with interagency partners.

While I served as Director of the CIA, I worked closely with my interagency counterparts on strategies to defeat terrorism around the globe and will bring that experience to bear if confirmed as Secretary of Defense. If confirmed, I will continue to work with my interagency partners and the National Security Council and Staff to ensure the best coordination possible.

INTELLIGENCE SUPPORT FOR INDIRECT ACTIVITIES

Question. Some observers contend that the national intelligence agencies focus their assistance to the Defense Department in Afghanistan and Iraq on special operators engaged in direct action operations. As a consequence, it is alleged, general purpose forces and Special Operations Forces engaged in indirect activities, including foreign internal defense and population protection, receive less intelligence support.

Do you believe this is true?

If so and if confirmed, how would you ensure Special Operations Forces engaged in indirect activities receive adequate intelligence support?

Answer. The Intelligence Community (IC) supports a range of DOD customers to include those involved in foreign internal defense and population protection. Especially in light of efforts over the last several years, the IC and DOD are appropriately providing intelligence support to all warfighters across the board. For example, DOD created the Intelligence, Surveillance, and Reconnaissance (ISR) Task

Force to field ISR platforms rapidly and, with the committee's support, has continued to work to expand airborne ISR capabilities. Over the past year, the IC has also provided significant support to the surge of forces to Afghanistan through Attack the Improvised Explosive Device Network capabilities that support both general purpose and Special Operations Forces. DOD and the IC are also substantially increasing intelligence support to Village Stability Operations and to the Afghan local police. The IC has also put greater emphasis on developing a comprehensive understanding of the socio-cultural environments within which terrorist networks and insurgent forces operate, which has enabled all warfighters to effectively engage the local population during stability operations. If confirmed, I will work to ensure that such programs, which support all warfighters, remain robust.

SECTION 1208 OPERATIONS

Question. Section 1208 of the Ronald Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375), as amended by subsequent bills, authorizes the provision of support (including training, funding, and equipment) to regular forces, irregular forces, and individuals supporting or facilitating military operations by U.S. Special Operations Forces to combat terrorism.

What is your assessment of this authority?

Answer. I understand that section 1208 authority is a key tool that combatant commanders have repeatedly confirmed as essential to combating terrorism in their areas of responsibility. It enables the Special Operations Forces under their control to leverage willing partners that possess access to areas, people, and information that are denied to our forces, but critical to tactical and strategic success. The authority has allowed DOD to respond immediately to emergent global challenges. Section 1208 requires appropriate civilian oversight, including Secretary of Defense approval and congressional notification.

CAPABILITIES OF SPECIAL OPERATIONS FORCES AND GENERAL PURPOSE FORCES

Question. The 2010 QDR called for increased counterinsurgency, counterterrorism, and security force assistance capabilities within the general purpose forces.

What is your assessment of the QDR with regard to the mix of responsibilities assigned to general purpose and Special Operations Forces, particularly with respect to security force assistance and building partner military capabilities? Do you believe that our general purpose forces need to become more like Special Operations Forces in mission areas that are critical to countering violent extremists?

Answer. I concur with Secretary Gates that America's dominance in traditional warfighting has created powerful incentives for adversaries to use alternative methods to counter U.S. influence and interests. I also agree that, for the foreseeable future, the most likely contingencies the United States will face will involve irregular threats. Therefore, I believe the 2010 QDR's strategic shift toward expanding general purpose forces' capabilities and capacity for these contingencies makes sense. The overall flexibility of our Armed Forces can be greatly improved by investing in key enablers within our conventional force, such as strengthening and expanding capabilities for security force assistance; increasing the availability of rotary-wing assets; expanding manned and unmanned aircraft systems for intelligence, surveillance, and reconnaissance; improving counter-improvised explosive device capabilities; and enhancing linguistic, cultural, counterinsurgency, and stability operations competency and capacity.

Question. Are there certain mission areas that should be reserved for Special Operations Forces only?

Answer. Special Operations Forces are a unique component of our U.S. Armed Forces that are trained to conduct operations in areas under enemy control or in politically sensitive environments, including counterterrorism, unconventional warfare, direct action, special reconnaissance, foreign internal defense, and counter-proliferation of weapons of mass destruction. In such environments, Special Operations Forces provide a unique and essential capability.

U.S. FORCE POSTURE IN THE ASIA PACIFIC REGION

Question. The Defense Department's 2010 report of the QDR states that the United States needs to "sustain and strengthen our Asia-Pacific alliances and partnerships to advance mutual security interests and ensure sustainable peace and security in the region," and that, to accomplish this, DOD "will augment and adapt our forward presence" in the Asia-Pacific region.

Do you agree that the U.S. needs to augment and adapt our presence in the Asia-Pacific?

Answer. Yes. DOD must keep pace with changes in the Asia-Pacific security environment that pose profound challenges to international security, such as the rise of new powers, the growing influence of non-state actors, and the potential spread of weapons of mass destruction (WMD).

DOD should maintain an enduring military presence in the Asia-Pacific region that provides a tangible reassurance that the United States is committed to Asia's security, economic development, and the prosperity essential to the region's success.

Question. If so, what specific capabilities or enhancements are needed in your view?

Answer. If confirmed, I will review DOD's posture in Asia and make appropriate recommendations on any enhancements. In general, our regional allies and partners must remain confident in the continued strength of our deterrence against the full range of potential threats.

Question. What do you see as the U.S. security priorities in the Asia-Pacific region?

Answer. As outlined in the 2010 National Security Strategy, the United States must develop a positive security agenda for the region. DOD's priorities include protecting U.S. territory, citizens, and allies; deterring aggression and maintaining regional stability; maintaining free and open access to the maritime, air, and space domains; deterring and defeating violent extremism; and preventing the proliferation of weapons of mass destruction and their associated materials.

NORTH KOREA

Question. North Korea represents one of the greatest near term threats to regional security and stability. This seriousness of the threat is seen by North Korea's continued pursuit of a nuclear capability and ballistic missile program, and particularly, over the past year, by North Korea's unprovoked and deadly attacks against South Korea—specifically the attack on the Republic of Korea navy ship Cheonan in March 2010 and the artillery attack on South Korea's Yeonpyeong Island in November 2010.

What is your assessment of the current security situation on the Korean peninsula?

Answer. North Korea's large conventional military, pursuit of asymmetric advantages through its ballistic missile and weapons of mass destruction (WMD) programs, including the newly revealed uranium enrichment activities, and proliferation behavior, underscores that North Korea poses a growing and direct threat to the United States, our allies in the region, and to the international community. If confirmed, I intend to monitor the security situation on the Korean Peninsula closely, work for the continued transformation of our alliances and partnerships in the region, and maintain the military capabilities necessary to protect our interests, defend our allies, and deter North Korea from acts of aggression and intimidation.

Question. In your view does the lack of progress in diplomatic efforts to persuade North Korea to verifiably dismantle its nuclear weapons program inform or guide U.S. nuclear deterrence strategy in the region?

Answer. I understand that U.S. strategy toward the Korean Peninsula is centered on maintaining peace through deterrence and diplomacy. The U.S. nuclear deterrence strategy has helped to prevent renewed war on the Korean Peninsula for more than half a century through escalation dominance, secure second-strike capabilities, and robust extended deterrence commitments to regional allies. Successful deterrence creates the space within which diplomacy can operate. The success of diplomatic efforts, however, will ultimately hinge on the willingness of North Korea to comply with the agreements it makes.

Question. What is your assessment of the threat posed to the United States and its allies by North Korea's ballistic missile and WMD capabilities and the export of those capabilities?

Answer. North Korea's missile and WMD programs pose a serious threat to U.S. regional allies and partners, and increasingly, are becoming a direct threat to the United States itself. The United States must continue to monitor carefully North Korea's WMD and missile development programs and related proliferation activities. If confirmed, I would ensure that DOD continues to work closely with other parts of the U.S. Government to address these and other emerging threats, reduce our vulnerabilities and those of our allies and partners, and work cooperatively with our allies to ensure our contingency planning remains adaptive and responsive.

Question. In your view are there additional steps that DOD could take to ensure that North Korea does not proliferate missile and weapons technology to Syria, Iran and others?

Answer. I understand that DOD, with its interagency partners, has taken several measures to prevent North Korea's proliferation of weapons-related technology, to include working to advance international nonproliferation norms, and cooperating with partner nations to inspect and interdict vessels and aircraft suspected of carrying illicit cargo. If confirmed, I would continue to work to strengthen international consensus against proliferation, invest in capacity building programs with partner nations, and find ways to increase WMD-related information sharing with international partners.

REPUBLIC OF KOREA

Question. Since the end of World War II, the alliance between the United States and the Republic of Korea (ROK) has been a key pillar of security in the Asia Pacific region. This relationship has gone through periods of inevitable change.

What is your understanding of the current U.S. security relationship with the ROK?

Answer. In my view, the U.S.-ROK Alliance remains one of the cornerstones of U.S. strategy in the Asia Pacific and is as strong and viable today as it has ever been. A mutual commitment to common interests, shared values, continuous dialogue, combined planning, and a recognition of the need to transform the relationship in light of the changing regional and global circumstances provide a strong underpinning to the Alliance and can serve to inform U.S. and ROK efforts going forward as the Alliance becomes a more equal military partnership.

Question. If confirmed, what measures, if any, would you take to improve the U.S.-ROK security relationship?

Answer. As I understand it, DOD and the ROK continue to work closely to realign U.S. forces on the Peninsula and prepare for the transition of wartime operational control to the ROK by December 2015. As part of these efforts, for example, DOD is repositioning U.S. forces to bases south of Seoul. This will make the U.S. presence less intrusive to the Korean people, will remove U.S. forces from the center of Seoul, and result in a U.S. force posture that enhances U.S. forces' readiness and quality of life. If confirmed, I would maintain close contact with my ROK counterpart and build upon the solid foundation laid by Secretary Gates to continuously improve and transform this important security relationship.

Question. What is your view regarding the timing of turning over wartime operational command to the ROK?

Answer. I understand that the United States and ROK have an understanding on a comprehensive way forward for the transfer of wartime operational control by December 2015. If confirmed, I will continue to work with my ROK counterpart to complete this process.

Question. Do you believe that current planning regarding tour normalization in the ROK should be reconsidered in view of the high cost of the plan and the risks associated with significantly higher numbers of dependents on the Korean peninsula?

Answer. I understand tour normalization in Korea was designed to further our commitment to support our forward-stationed forces and family members. It was to be implemented on an "as affordable" basis and not according to any specific timeline. If confirmed, I will continue to assess the cost of implementation and our proposed force posture to determine the best way forward.

CHINA

Question. Much has been made about the economic and military growth in China and what that growth might mean in terms of regional and global security.

From your perspective, what effect is China's expanding economy and growing military having on the region at-large and how is that growth influencing the U.S. security posture in Asia and the Pacific?

Answer. China's sustained economic growth is in the United States' interest and has contributed to the Asia-Pacific's economic growth and development in recent years. In terms of regional security, China's economic growth has increased China's international profile and influence, and has enabled China's leaders to embark upon and sustain a comprehensive transformation of its military forces. The pace and scale of China's military modernization, coupled with the lack of transparency, raises many questions, both within the United States and the region as a whole, about China's future.

From my perspective, DOD has a special responsibility to monitor China's military and to deter conflict. Through a robust forward presence, prudent capability developments, and, sustained action to strengthen alliances and partnerships, DOD

can support our national interest in promoting a peaceful, stable, and prosperous Asia-Pacific region.

Question. What do you believe are the objectives of China's military modernization program?

Answer. China appears to be building the capability to fight and win short duration, high-intensity conflicts along its periphery. Its near-term focus appears to be on preparing for potential contingencies involving Taiwan, including possible U.S. military intervention. Its modernization efforts emphasize anti-access and area capabilities. China is also devoting increasing attention and resources to conducting operations beyond Taiwan and China's immediate periphery. Beijing's growing focus on military missions other than war includes humanitarian assistance, non-combat evacuation operations, and counter-piracy support. Lastly, China is strengthening its nuclear deterrence and enhancing its strategic strike capabilities through modernization of its nuclear forces and improving other strategic capabilities such as space and counter-space operations and computer network operations.

Question. How do you believe the United States should respond to China's military modernization program?

Answer. I believe that we should continue to monitor closely the growth of China's military capabilities while continuing to encourage Beijing to be more transparent about its military and security affairs. Our strategy must be designed to preserve peace, enhance stability, and reduce risk in the region. Our response to China's military modernization should be flexible and supported by the continued transformation of our force posture in the Asia-Pacific, the maintenance of our global presence and access, the modernization of our own capabilities, and the strengthening of our Alliances and partnerships.

Question. U.S.-China military-to-military dialogue has been strained over the past several years and efforts to establish and maintain mutually beneficial military relations has been hampered by China's propensity for postponing or canceling military engagements in an apparent effort to influence U.S. actions.

What is your view of the relative importance of sustained military-to-military relations with China?

Answer. President Obama and President Hu Jintao have expressed that a healthy, stable, reliable, and continuous military-to-military relationship is an essential part of their shared vision for a positive, cooperative, and comprehensive U.S.-China relationship. I fully agree with that assertion. The complexity of the security environment, both in the Asia-Pacific region and globally, calls for a continuous dialogue between the Armed Forces of the United States and China to expand practical cooperation where we can and to discuss candidly those areas where we differ.

Question. Do you believe that we should make any changes in the quality or quantity of our military relations with China? If so, what changes and why?

Answer. I understand that our two Armed Forces have made progress in recent months to build toward a more sustained—and sustainable—relationship. I was informed the recent visit of General Chen was a success. We can build on that progress to improve the U.S.-China military-to-military relationship, both in terms of the quantity of exchanges, but more importantly, the quality of the dialogue. I believe that military exchanges with China can be valuable, but can only truly work if China is willing to reciprocate with transparent and substantive discussions. If confirmed, I will look for ways to deepen and enhance our military-to-military relationship with China, and to encourage China to act responsibly both regionally and globally.

DEPARTMENT OF DEFENSE COUNTERNARCOTICS

Question. On an annual basis, DOD's counternarcotics (CN) program expends approximately \$1.5 billion to support the Department's CN operations, building the capacity of certain foreign governments around the globe, and analyzing intelligence on CN-related matters. In a recent Government Accountability Office (GAO) report, GAO found that DOD "does not have an effective performance measurement system to track the progress of its counternarcotics activities." This is the second such finding relating to DOD CN in the last decade.

What is your assessment of the DOD CN program?

Answer. Drug trafficking and associated organized crime are a multidimensional threat to the United States. In addition to the impact on our Nation's public health and economy, drug trafficking and other forms of transnational organized crime provide a funding source for terrorists and insurgents, undermine legitimate government institutions, and contribute to international instability.

I have not had an opportunity to assess the DOD counternarcotics program. If confirmed, I look forward to working with Congress and the Office of National Drug Control Policy to ensure that these programs achieve measureable results and that those results are clearly aligned with the goals of the National Security Strategy and the National Drug Control Strategy.

Question. In your view, should DOD continue to play a role in attempting to stem the flow of illegal narcotics?

Answer. Based on my experience with this issue from my time in Congress, in the Clinton administration, and in my most recent assignment, all agencies must work to confront the flow of illicit narcotics. This whole-of-government approach has been critically important to the progress we have made since the 1980s and should continue.

INTERNATIONAL PEACEKEEPING CONTRIBUTIONS

Question. In testimony before the House Committee on Foreign Affairs (July 29, 2009), Ambassador Susan Rice, U.S. Ambassador to the United Nations, stated that the United States “is willing to consider directly contributing more military observers, military staff officers, civilian police, and other civilian personnel—including more women I should note—to U.N. peacekeeping operations.”

What is your view on whether the United States should contribute more military personnel to both military observer and staff positions in support of U.N. peacekeeping operations?

What are the advantages and disadvantages of contributing additional military personnel to U.N. peacekeeping operations?

Answer. The United States has a stake in the success of U.N. peacekeeping operations. I believe that, where practicable, the United States should continue to provide military personnel for U.N. peacekeeping operations, especially for key staff positions that can help shape the direction and success of the mission. However, as with any investment, there are associated costs. If confirmed, I will carefully evaluate any proposals to contribute military or civilian personnel to a U.N. peacekeeping operation, weighing the potential positive impact of U.S. participation in the mission against other military commitments we have around the globe and the proposed cost of U.S. involvement.

COUNTER THREAT FINANCE

Question. A number of officials in DOD and the Intelligence Community (IC) have called for investing significantly more resources in identifying and tracking the flow of money associated with terrorist networks and illicit trafficking. The objective would be to identify key individuals, as well as individuals enabling the flow of money outside of certain countries of interest.

What are your views on the role of DOD in counter threat finance activities?

Answer. Terrorists, drug traffickers, and other adversaries rely heavily on legal and illegal funding sources to support their activities, which routinely work against U.S. interests. It is critical to engage all U.S. Government tools to track and halt the flow of money associated with these organizations. It is my understanding that DOD has capability to identify and disrupt our adversaries’ finances while working with its interagency counterparts in both Iraq and Afghanistan. DOD is not the U.S. Government lead agency in counter threat finance but, it plays a supportive role by working with other departments and agencies, and with partner nations, to fight our adversaries’ ability to use global financial networks.

CENTRAL AMERICA AND MEXICO

Question. During a recent Senate Armed Services Committee hearing, the Commanders of U.S. Northern Command and Southern Command discussed the increasingly dangerous region along the northern and southern borders of Mexico and the devastating impact transnational criminal organizations are having on the people and security of southern Mexico, Guatemala, Belize, Honduras, and El Salvador. The United States has increased its assistance in this region, but—to date—DOD has had only a small role.

What are your views on the threats posed by transnational criminal organizations in this region?

Answer. These threats are real and are felt throughout Mexico, Central America, and elsewhere in the region. Transnational criminal organizations (TCOs) threaten the security and prosperity of the United States’ neighbors and have the resources to impact the stability of some of the more vulnerable nations in the region. To confront these threats effectively, it is necessary to harness the talents and resources

of DOD, in coordination with those of DOD's Federal partners and the governments of Mexico and Central American nations.

Question. What is your assessment of DOD's current activities in Mexico and Central America?

Answer. I have not yet had an opportunity to make a thorough assessment but generally speaking, DOD activities such as training, equipping, information sharing, infrastructure support, operational support, and related cooperation with Mexican and Central American militaries and security forces complement other U.S. Government security efforts under the Mérida Initiative and the Central America Regional Security Initiative. I am mindful, however, that DOD plays a supporting role to its law enforcement partners in the fight against TCOs and that DOD-led efforts alone are not enough in the long term. I believe a long-term solution will require a whole-of-government effort.

Question. What changes, if any, would you propose to the DOD's current activities in this region?

Answer. As I noted above, I have not had an opportunity to make a thorough assessment of DOD's current activities in the region. If confirmed, I look forward to working closely with DOD's Federal partners and the U.S. Government's partners in the governments of Mexico and the Central American nations, in consultation with Congress, to shape the scope and scale of continued DOD efforts in the region.

INTERAGENCY COLLABORATION

Question. The collaboration between U.S. Special Operations Forces, general purpose forces, and other U.S. Government departments and agencies has played a significant role in the success of counterinsurgency and counterterrorism operations in recent years. However, much of this collaboration has been ad hoc in nature.

What do you believe are the most important lessons learned from the collaborative interagency efforts in Afghanistan, Iraq, and elsewhere?

Answer. Our Nation has learned many hard lessons about the importance of whole-of-government approaches in counterinsurgency and counterterrorism operations over the past several years. One of the most important lessons of our experiences in Afghanistan and Iraq is that success in counterinsurgency, counterterrorism, and post-conflict stability operations depends upon the integrated efforts of both civilian and military organizations in all phases of an operation, from planning through execution. Sustainable outcomes require civilian development and governance experts who can help build local civilian capacity. DOD supports civilian agency lead in areas such as fostering political reconciliation, building accountable institutions of government, restoring public infrastructure, and reviving economic activity, so that DOD can focus on providing a safe and secure environment and assisting in building accountable Armed Forces. If confirmed, I will continue efforts to ensure that interagency collaboration is as robust and effective as possible.

Question. How do you believe these efforts can be improved? How can the lessons learned in recent years be captured in military doctrine and adopted as "best practices" for future contingency operations?

Answer. I believe interagency collaboration can be improved by continuing to ensure that the U.S. military plans and trains with our civilian counterparts and is prepared to operate effectively in all phases of conflict, including post-conflict reconstruction and stabilization. In addition, improving the interagency planning process would ensure that optimal use is made of all national instruments of statecraft, while also enhancing the ability to conduct comprehensive assessments, analysis, planning, and execution of whole-of-government operations. Robust civilian capabilities are critical to realizing any improvements in interagency efforts and best practices for future operations.

INTELLIGENCE REFORM AND TERRORISM PREVENTION ACT OF 2004

Question. The Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA), among other actions, realigned the responsibilities for budgeting for and management of intelligence organizations between the Secretary of Defense and the head of the Intelligence Community, the Director of National Intelligence (DNI).

What do you believe is the role of DOD in intelligence under IRTPA?

Answer. I believe the role of DOD, including its intelligence components, is spelled out clearly in law. Under title 50 of the U.S.C., the Secretary of Defense has responsibility for all intelligence and intelligence-related activities conducted by DOD components. DOD contains a number of elements of the Intelligence Community, including the Defense Intelligence Agency, the National Security Agency, the National Geospatial-Intelligence Agency, and the National Reconnaissance Office. Consistent with the statutory authorities of the DNI under the IRTPA, the Secretary of Defense

is responsible for the continued operation of these elements as effective unified organizations within DOD for the conduct of their missions in order to satisfy the requirements of the Intelligence Community. The Secretary is also responsible for ensuring that the budgets of these elements are adequate to satisfy the overall intelligence needs of the Chairman of Joint Chiefs of Staff, the geographic combatant commanders, and other departments and agencies, as well as ensuring that such elements are responsive and timely in satisfying the needs of operational military forces. In the period since IRTPA's signing, a tremendous amount of integration has occurred within the Community and I believe the elements of the Intelligence Community, including those within DOD, are working together more closely than ever.

Question. Do you believe that the IRTPA strikes the correct balance between the duties and responsibilities of the Secretary and the DNI?

Answer. Yes. Based on my understanding of authorities granted under IRTPA, I believe the duties and responsibilities of the Secretary and the DNI are sufficiently balanced. The IRTPA gave the DNI strong authority over core intelligence functions for the National Intelligence Program, such as setting requirements and budgets, as well as determining priorities for and managing the analysis and dissemination of national intelligence, while leaving the responsibility for execution of DOD intelligence activities to the Secretary. The Under Secretary of Defense for Intelligence is dual-hatted as the Director of Defense Intelligence in the Office of the DNI which helps ensure the equities of both the DNI and Secretary of Defense are taken into account. If confirmed as Secretary of Defense, I will maintain the current strong working relationship with the DNI to address any issues that might arise over the balance of responsibilities.

Question. What changes in the IRTPA, if any, would you recommend that Congress consider?

Answer. At this point, I do not recommend any change to the current law. If confirmed, I will wait until I have sufficient time to weigh options, should I discover a reason to recommend a change.

QUALIFICATIONS OF INTELLIGENCE COMMUNITY OFFICIALS AND SECRETARIES OF DEFENSE

Question. During the Bush and Obama administrations, there has been significant criticism about the appointment of active duty and retired military officers to senior positions in the Intelligence community, including as Director of National Intelligence and Director of the Central Intelligence Agency. Some have referred to this as the "militarization" of the CIA and the Intelligence Community. With your nomination to be Secretary of Defense, we now have the situation where the last two nominees to be Secretary of Defense have been CIA Directors.

Is there reason to be concerned about current or former military officers serving in senior positions in the Intelligence Community?

Answer. No. I have served alongside many current or former military officers and have been impressed with their knowledge, professionalism, and effectiveness. While it is important to maintain a military and civilian balance across the Intelligence Community, in my view, there is no reason to be concerned, as a general matter, about current or former military officers serving in senior positions in the Intelligence Community. The challenges facing the Intelligence Community are enormous and require the most capable leaders available. Our military possesses a considerable pool of talented leaders who have proven experience within, or related to, the Intelligence Community. The wealth of experience and leadership these military officers bring with them is invaluable in meeting the Community's challenges.

Question. Is there reason to be concerned about civilian heads of Intelligence Community elements serving in senior positions in the Defense Department, including as Secretary of Defense?

Answer. No. I think it is fair to say that DOD and IC integration has never been better. This is a product, in part, of people like Secretary Gates, who brought his wealth of experience as a CIA officer and National Security Council official to DOD. Both the head of an Intelligence Community element and the Secretary of Defense strive to achieve the same central objective: keeping the American people safe. I believe that the knowledge and experience obtained as a senior leader in the Intelligence Community is extremely valuable and will improve my ability, if confirmed as Secretary of Defense, to successfully prevail in this mission.

QUADRENNIAL DEFENSE REVIEW

Question. The 2010 report of the QDR provided that military forces shall be sized to prevail in ongoing conflicts in Afghanistan, Iraq, and the war against al Qaeda as well as for conducting foundational activities that prevent and deter attacks or

the emergence of other threats. The QDR report particularly emphasizes the requirement for improved capabilities in key mission areas such as counterinsurgency, stability, and counterterrorism operations, as well as building the security capacity of partner states.

What is your understanding and assessment of the current ability of each Service to provide capabilities to support these mission requirements and, if confirmed, what changes, if any, would you pursue to improve these capabilities?

Answer. Our experience in Iraq and Afghanistan attests to the fact that U.S. forces have made tremendous strides over the past decade in developing capabilities and doctrine for effective counter-terrorism, counter-insurgency, and stability operations. This is true across the board, but particularly in our Army and Marine Corps forces, which have borne the brunt of the burden of bringing stability to these two countries.

Further improvement is always possible and it will be important that we continue to gather and assess "lessons learned" from our forces in the field. If confirmed, I will continue to press for enhancements in our capabilities for all-source intelligence collection, analysis, and dissemination; rapid, secure communications to units in remote areas; defeating improvised explosive devices; training, advising, and assisting host-country forces; and cultural understanding.

Question. A major objective of the Department over recent years, as well as guidance in the QDR report, has been toward increasing emphasis on and institutionalization of lower-end, irregular, counterinsurgency, and stability type operations.

In your view, what does it mean to "institutionalize" capabilities and support for irregular warfare capabilities in each of the Services? What is your understanding and assessment of Department's efforts to date to institutionalize and support these capabilities?

Answer. Institutionalizing these capabilities means working to ensure that our forces actively maintain and continue to improve effective capabilities for counter-insurgency and stability operations even after we have achieved our goals in the current conflicts. This will entail not only retaining much of the equipment that has been fielded over the past decade for ongoing operations but also sustaining the improvements in doctrine and training of experienced warfighters that has been central to the successes we have achieved.

I understand DOD has taken steps to accomplish this. For example, as units rotate back to home station from deployments to Iraq and Afghanistan, they have been resetting equipment for operations that include COIN and stability operations. Furthermore, military education and training programs have been revised to place much greater emphasis on counter-insurgency and stability operations.

The United States will continue to face challenges from non-state adversaries and regions threatened by terrorist and insurgent violence. Our Armed Forces must, therefore, retain the ability to counter these threats effectively.

Question. Institutionalizing support for irregular, counterinsurgency, and stability capabilities in the force does not mean ignoring the requirement to be trained, equipped, and ready for major combat at the high-end of the full spectrum of operations.

If confirmed, how would you propose to redistribute the Department's efforts and resources, if at all, to ensure that the force is prepared for major combat while at the same time it increases and institutionalizes capabilities and support for irregular, counterinsurgency, and stability operations?

Answer. The 2010 QDR recognized the imperative to improve capabilities for operations against both irregular adversaries and states equipped with advanced anti-access and area-denial weapons. Accordingly, DOD is allocating resources to both ends of the spectrum of operations. This is appropriate, given the array of threats and challenges facing our Nation, but it is also difficult to accurately predict future threats and, accordingly, allocate sufficient resources, particularly in an era of fiscal austerity. Secretary Gates has pointed out that it may be necessary to shrink the force and accept that we will have less overall capacity in order to ensure that the forces we field are superbly trained and equipped for the most important missions. If confirmed, this is a set of issues to which I will devote priority attention.

TACTICAL FIGHTER PROGRAMS

Question. Perhaps the largest modernization effort that we will face over the next several years is the F-35 Joint Strike Fighter (JSF) program to modernize our tactical aviation forces with fifth generation tactical aircraft equipped with stealth technology.

Based on current and projected threats, what are your views on the requirements for and timing of these programs?

Answer. I understand that the F-35 will replace a range of legacy tactical aircraft in the Air Force, Navy and Marine Corps with a fifth generation fighter. Based on the current and projected threats, I believe it is important that we transition to a fifth generation tactical aviation capability across the U.S military services as soon as practical. I understand that one F-35 variant, the Marine Corps' Short Take Off and Vertical Landing (STOVL) F-35B is on "probation" while technical issues are addressed. Overall, I believe we should maintain sufficient legacy inventory to support the force structure needed to prevail in the wars we are currently engaged in, as well as in possible future conflicts, while we field the F-35.

Question. What is your assessment of whether the restructuring of the JSF program that we have seen over the past 2 years will be sufficient to avoid having to make major adjustments in either cost or schedule in the future?

Answer. It is my understanding that the F-35 program restructure was intended to put the program on solid ground, with realistic development and production goals and significant reduction in concurrency. I support DOD's current effort to focus on and reduce F-35 sustainment costs. If confirmed, I will review the overall F-35 program's status and health.

NAVY SHIPBUILDING

Question. Today's Navy is at its smallest size in decades and could decline further without additional shipbuilding efforts. The Chief of Naval Operations has concluded that the Navy requires a fleet of at least 313 ships to perform its mission.

What are your views regarding the CNO's conclusions about the appropriate size and composition of the fleet, and the adequacy of the Navy's current and projected plans to deliver that inventory of ships?

Answer. A strong naval force is essential to project U.S. military power and ensures a global presence. I am not familiar with all of the analysis performed in the Chief of Naval Operations' assessment to reach a minimum number of 313 ships. However, if confirmed, I will work with the Secretary of the Navy and the Chief of Naval Operations to ensure that the appropriate force structure requirements are fully identified and supported.

INFORMATION ASSURANCE

Question. Protection of military networks, information, and communications is critical to DOD operations. The Department has not yet provided Congress with a comprehensive legislative proposal that would allow the Department to implement the President's guidance on dealing with current and future cyber threats.

What is your assessment of the cyber security posture of the Department's critical information systems?

Answer. From my understanding, DOD is developing a solid foundation for securing critical information systems. Given the lack of strong security features in today's commercial information technology, however, DOD's critical information systems, like other critical financial, energy, transportation information systems, contain vulnerabilities that are at risk of being exploited by a sophisticated adversary. To mitigate these vulnerabilities I understand that DOD has implemented and continues to improve a capability for protecting and defending its networks. Among other actions, the recent stand-up of U.S. Cyber Command has brought increased operational focus to these tasks.

Going forward, an enormous amount of work is required to keep pace with technology and capabilities, and to stay ahead of system vulnerabilities that put our information and communications technology systems at risk. If confirmed, I will continue the efforts to secure DOD's information and communications technology, address cyber challenges, and ensure DOD can defend against network adversaries.

Question. What Department-wide policies, guidance, or changes in legislation do you believe are necessary to address information and cyber security challenges for current and future systems?

Answer. I am not in a position to recommend specific policies, guidance, or changes to authorities at this time. The administration is currently working with Congress to fashion new cyber legislation, and DOD is an active participant in these ongoing discussions. If confirmed, I will be studying this issue and if I determine any recommended changes in legislation to address information and cyber security challenges, I will work with the administration to provide those recommendations to Congress.

FUTURE ARMY

Question. In a speech at West Point last February, Secretary Gates argued that it is unlikely that the Nation will commit large land forces to future conflicts, and

that the Army must “confront the reality that the most plausible, high-end scenarios for the U.S. military [will be] primarily naval and air engagements.” Accordingly, the Army will find it difficult to justify the number, size, and cost of its heavy forces. On the other hand, former Chief of Staff of the Army, General George Casey Jr., said he expected that over the next 10 years we will still have 50,000 to 100,000 soldiers deployed in combat. Chairman of the Joint Chiefs Admiral Michael Mullen said that for planning purposes the Department assumes 6 to 10 combat brigades will likely be deployed.

Do you agree with Secretary Gates assertion that the commitment of land forces, on the scale of Iraq or Afghanistan, is unlikely in the future? Why or why not?

Answer. I think our historical experience argues for humility in predicting the shape or direction of future conflicts. Dismissing the prospect of a particular type of warfare could lead to unpreparedness or strategic surprise. Therefore, we must be prepared to conduct operations across the spectrum of conflict, and our forces, including the Army, need the ability and flexibility to adapt to a changing security environment. However, I believe that we should employ the full range of diplomatic, economic, and informational tools to achieve national security objectives with reduced reliance on military force whenever possible.

Question. Do you agree that high-end military operations will primarily be naval and air engagements such that the Army will have difficulty justifying the size, structure, and cost of its heavy formations?

Answer. It is always difficult to predict the characteristics of future conflict, but I think DOD must be prepared to confront potential adversaries armed with advanced technologies, such as integrated air defense systems, long-range ballistic missiles, and anti-ship cruise missiles. Given the importance of power projection for U.S. operations, naval and air assets will undoubtedly play a key role in these future military engagements. However, robust Army capabilities, which provide an unquestioned and essential ability to find and defeat opposing ground forces and establish security over wide areas, also serve as a deterrent to potential aggressors. Our experience in Iraq and recent military operations by our allies and partners has informed our thinking on the role of heavy forces across the spectrum of conflict, including in urban areas and the conduct of counterinsurgency operations. Of particular concern for ground forces are not only the modernization efforts of nation-states but also the proliferation of increasingly advanced weaponry, such as precision-guided anti-tank weapons, manportable air defense systems, and precision-guided rockets, artillery, and mortars, to non-state actors. If confirmed, I will work closely with the Services to assess current and future challenges and adjust the size and focus of each Service accordingly.

Question. In your view, what are the most important considerations or criteria for aligning the Army’s size, structure, and cost with strategy and resources? If confirmed, what actions, if any, would you propose to properly align the Army’s size and structure with the requirements of security strategies and the likely availability of resources?

Answer. I understand that our Nation needs an Army that can win on conventional battlefields, that can conduct effective counterinsurgency and stability operations, and that can partner with the ground forces of partner states to impart skills that can help them bring security and stability to their own countries and regions. Maintaining skills across this broad mission set while ensuring excellence will be a challenge, particularly in a period of budget austerity, and may require some tradeoffs across the force. If confirmed, I will work closely with military and civilian leaders to balance these risks.

ARMY MODERNIZATION

Question. In general, major Army modernization efforts have not been successful over the past decade. According to a recent study done for the Secretary of the Army by former Assistant Secretary of the Army Gilbert Decker and retired Army General Louis Wagner the Army has sunk \$3.3 billion to \$3.8 billion annually since 2004 into weapons programs that have been cancelled. The report states that, “The Army lacks a credible, quantitative model and process for determining realistic, achievable requirements for modernization and recapitalization given reduced budgets.”

What is your assessment of the Army’s modernization record?

Answer. I understand that many of the Army’s development and procurement problems stemmed from pursuing programs that ultimately did not match the needs of DOD, were cost prohibitive or were technologically infeasible. I understand that the Army has been working to rapidly review and implement many of the innovative recommendations of the Decker-Wagner panel. If confirmed I will review current Army programs to ensure this history is not repeated.

Question. What actions, if any, would you take to ensure that the Army achieves a genuinely stable modernization strategy and program?

Answer. If confirmed, I will closely monitor and oversee the Army modernization efforts. This will include reviewing the steps that the Army is taking to improve the effectiveness of its requirements and acquisition systems. Moreover, as the Army implements changes to its acquisition system, I will encourage that the lessons learned from the Army's efforts are infused into other programs across the Services and DOD.

Question. What is your understanding and assessment, if any, of the Army's capabilities portfolio review process and its current modernization priorities and investment strategy?

Answer. I understand that as part of his comprehensive efforts to reform Army acquisition, in February 2010, Secretary McHugh ordered an Army-wide "capability portfolio reviews" to scrutinize requirements, identify potential redundancies and if appropriate, recommend program changes, including terminations. These portfolio reviews appear to be sound steps toward improving the results of the Army's requirements and acquisition systems; however, I have not had the opportunity to review this initiative in detail.

Question. What actions, if any, would you take to sustain the momentum of these reviews in stabilizing the Army's modernization strategy and priorities?

Answer. As noted above, if confirmed, I will closely monitor Army modernization efforts. In doing so, I will encourage the Army to continue its capability portfolio review process and share its lessons learned from this effort throughout DOD.

BALLISTIC MISSILE DEFENSE

Question. In September 2009, President Obama announced that he had accepted the unanimous recommendation of the Secretary of Defense and the Joint Chiefs of Staff to pursue a Phased Adaptive Approach (PAA) to missile defense in Europe. This approach is intended to defend all of Europe against existing and emerging threats from Iranian missiles, starting this year and increasing in capability with each of its four phases. Phase 4 of the European PAA is intended to provide a capability to defend against long-range missiles that could reach the United States, thus augmenting the existing homeland missile defense capability.

Do you support the Phased Adaptive Approach to Missile Defense in Europe and, if confirmed, will you implement it?

Answer. I support the President's policy on European Phased Adaptive Approach (EPAA) and, if confirmed, I will ensure DOD supports the program's full implementation.

Question. In February 2010, the Defense Department issued its report on the first-ever comprehensive review of U.S. ballistic missile defense policy and strategy, the Ballistic Missile Defense Review (BMDR), as required by Congress. The BMDR established a number of policy priorities, including establishing defense against near-term regional missile threats as a top priority of missile defense plans, programs and capabilities. It also stated the policy of sustaining and enhancing the ability of the Ground-based Midcourse Defense system to defend the homeland against attack by a small number of long-range missiles by countries such as North Korea and Iran, and of hedging against future uncertainties.

Do you support the policies, strategies, and priorities set forth in the Ballistic Missile Defense Review and, if confirmed, will you implement them?

Answer. I will need to further study the Ballistic Missile Defense Review (BMDR), if confirmed, but as I understand the issue currently, I support the administration's policies, strategies, and priorities as set forth in this review. If confirmed, I will implement the policy priorities of the BMDR, including sustaining and enhancing defense of the homeland, while increasing our capability against the growing regional threats.

Question. The two most recent flight tests of the Ground-based Midcourse Defense (GMD) system failed to intercept their targets. The Director of the Missile Defense Agency (MDA) has formed a Failure Review Board to determine the root cause of the most recent failure and will devise a plan to correct it, including two flight tests to confirm the correction. Until the second flight test confirms the correction, probably sometime in late 2012, the Director of MDA has suspended production of the Exo-atmospheric Kill Vehicles (EKVs) of the type that failed last year's flight tests, in order to ensure that those EKV's do not contain a flaw that would need to be corrected later.

Do you agree that it is prudent to verify that the flight test failure problem has been corrected before continuing production of the EKV's, and before building more

Ground-Based Interceptors (GBIs) or deciding how many additional GBIs may be needed in the future?

Answer. Verifying and correcting the problems with the EKV's prior to continuing production is prudent and supports the administration's policy to "fly before you buy" in order to improve reliability, confidence, and cost control of U.S. missile defense systems.

Question. Do you support the continued modernization and sustainment of the Ground-based midcourse defense system?

Answer. Yes. The United States is currently protected against the threat of limited ICBM attack from States like North Korea and Iran. It is important we maintain this advantage by continuing to improve the Ground-based Midcourse Defense system.

Question. The United States and NATO are seeking options to cooperate with Russia on missile defense. President Obama has announced that such cooperation would not limit U.S. or NATO missile defense capabilities.

Do you agree that such cooperation could enhance the security of the United States, NATO, and Russia against common missile threats from nations such as Iran?

Do you agree that irrespective of Russian objections, the United States is committed to the continued development and deployment of United States missile defense systems worldwide, including qualitative and quantitative improvements to such systems?

Answer. Yes, I believe that missile defense cooperation with Russia can enhance U.S., NATO, and also Russian security. The United States is committed to sustaining strategic stability with Russia, and it is my understanding that neither current nor planned U.S. missile defenses will impact this stability. The United States is committed to continuing to develop and deploy missile defenses, including qualitative and quantitative improvements.

SPACE

Question. China's test of an anti-satellite weapon in 2007 was a turning point for the United States in its policies and procedure to ensure access to space. As a nation heavily dependent on space assets for both military and economic advantage, protection of space assets became a national priority.

Do you agree that space situational awareness and protection of space assets should be a national security priority?

Answer. Yes. Space situational awareness underpins our ability to operate safely in an increasingly congested space environment and enables the protection of space assets. Maintaining the benefits afforded to the United States by space is central to our national security.

Question. In your view should China's continued development of space systems inform U.S. space policy and programs?

Answer. Yes.

Question. If confirmed would you propose any changes to National Security space policy and programs?

Answer. I am not in a position to recommend any proposed changes at this time. If confirmed, I would continue implementation of the President's 2010 National Space Policy and the supporting National Security Space Strategy. The two offer pragmatic approaches to maintain the advantages derived from space while confronting the challenges of an evolving space strategic environment.

Question. The Federal Communications Commission is currently considering licensing a telecommunications provider who plans on using a signal that has the potential to disrupt GPS signals.

If confirmed, would you look into this matter to understand the impact on GPS signals?

Answer. Yes. I understand DOD is currently addressing this issue. If confirmed, I will work with the FCC to ensure GPS remains accessible to support national security, public safety, and the economy.

Question. The management of national security space and space systems appears to be more fragmented than ever.

If confirmed, would you commit to reviewing the overall management and coordination of the national security space enterprise?

Answer. It is my understanding that DOD recently took steps intended to clarify and streamline space management, by amending the Secretary of the Air Force's responsibilities as the Executive Agent for Space, and by establishing a Defense Space Council. If confirmed, I will assess what further steps may be required within DOD

and in the interagency to ensure effective management of the National Security Space Enterprise.

Question. What is your view on weapons in space and the merits of establishing an international agreement establishing rules of the road for space operations?

Answer. I support the principles outlined in the 2010 National Space Policy, including that all nations have a right to explore and use space for peaceful purposes, and that all nations should act responsibly in space to help prevent mishaps, misperceptions, and mistrust. I understand that the Joint Staff is conducting an operational assessment of the European Union's proposed Code of Conduct for Outer Space; if confirmed, I look forward to reviewing this assessment and considering appropriate steps to establish clear rules of the road for space operations.

STRATEGIC SYSTEMS

Question. Over the next 5 years DOD will begin to replace or begin studies to replace all of the strategic delivery systems. For the next 15 plus years, DOD will also have to sustain the current strategic nuclear enterprise. This will be a very expensive undertaking.

Do you have any concerns about the ability of the Department to afford the costs of nuclear systems modernization while meeting the rest of the DOD commitments?

Answer. I share the President's commitment to a safe, secure, and effective nuclear deterrent as long as nuclear weapons exist. Sustaining our nuclear deterrent requires life extension programs for warheads and modernization of delivery systems. I believe that providing necessary resources for nuclear modernization should be a national priority.

IRAN

Question. Iran continues to expand its nuclear program and has failed to provide full and open access to all aspects of its current and historic nuclear program to the International Atomic Energy Agency. In addition the P-5 +1 talks have stalled, with Iran setting unreasonable preconditions to resume the talks.

Do you believe it would be in the United States' interest to engage Iran in a direct dialogue regarding stability and security in Iraq?

Answer. The United States continues to reject Iran's destabilizing behavior towards Iraq and calls on Iran to meet its international obligations. The Iran and Iraq relationship is an issue that should be negotiated by their respective governments, especially as the United States draws down. However, I also believe we should continue the current strategy of engagement and pressure and remain open to additional talks with Iran through the P5+1.

Question. What more do you believe the United States and the international community could be doing to dissuade Iran from pursuing a nuclear weapons program?

Answer. I believe that we should explore ways to increase the pressure on Iran, including through additional sanctions, and make it as clear as possible that Iran's failure to meet its international obligations will make it less—not more—secure. At the same time, we should leave open the door for diplomacy, since it is not too late for Iran to provide commitments and take steps that ensure that its nuclear programs will remain peaceful.

Question. What is your assessment of the threat posed by Iran?

Answer. Iran remains a significant threat to the United States, its allies, and its interests in the region. Iran continues to enrich uranium and pursue an illicit nuclear program, support terrorist groups that attack U.S. forces and interests, and aggressively exert its influence throughout the region. There is a real risk that its nuclear program will prompt other countries in the region to pursue nuclear options or threaten the broader global non-proliferation regime.

Question. In your view, what has been the effect of sanctions against Iran—have they been effective and should additional unilateral or multilateral sanctions be levied against Iran?

Answer. The increasing economic pressure that the Obama administration has brought to bear on Iran has caused surprise and anxiety in Tehran. I do not believe that Iran's leaders believed that we could generate the level of international support that we have for sanctions. Iranian behavior has not changed, as Iran's leadership continues to flout U.N. resolutions and has failed to meet its international obligations. I believe, however, that we must continue to increase the economic pressure on Iran in an attempt to change Iran's behavior.

DOD'S COOPERATIVE THREAT REDUCTION PROGRAM

Question. The Cooperative Threat Reduction (CTR) program, which is focused primarily on eliminating Cold War era weapons of mass destruction (WMD) in the

states of the former Soviet Union, has several key objectives that include: (1) eliminating strategic nuclear weapons; (2) improving the security and accounting of nuclear weapons and weapons-usable fissile material; (3) detecting, eliminating and preventing the proliferation of biological and chemical weapons and capabilities; and (4) encouraging development of capabilities to reduce proliferation threats.

In your view, what needs to be done to reduce the proliferation threat from the residual Cold War stockpiles of WMD weapons and materials in the former Soviet Union?

Answer. I believe the countries of the former Soviet Union have made appreciable strides in the past two decades to reduce the threats associated with the extensive Soviet WMD programs, facilities and stockpiles in their territories—in many cases with the support and assistance of DOD's CTR program. While much has been done, residual Cold War stockpiles of WMD and materials continue to pose a threat to U.S. national security, especially in light of the potential for WMD terrorism. Where and when host governments are unable to mitigate this threat on their own, CTR and other U.S. programs should work with these nations to reduce this threat.

Question. Are Russia and the former Soviet Union countries making a significant contribution to efforts to reduce the proliferation threats they inherited?

Answer. It is my understanding that Russia and states of the Former Soviet Union are making important contributions to reduce proliferation threats they inherited and to address new ones. These contributions include direct national funding as well as collaboration with U.S. agencies and other international partners.

I understand that DOD's principal vehicle to support these efforts is the Nunn-Lugar Cooperative Threat Reduction program, which is executed in close coordination with related activities of the Departments of State and Energy. As examples, I understand that Kazakhstan is partnering with U.S. agencies to reduce a variety of nuclear and biological threats that were left by the Soviets on its soil. Similarly, Georgia is taking a leading role, with U.S. assistance, to eliminate Soviet-era biological threats and to turn itself into a regional bio-defense leader. I am also told that we have maintained a strong non-proliferation partnership with Russia in a number of areas.

Question. Do you think the CTR program is well coordinated among the U.S. Government agencies that engage in threat reduction efforts in Russia, e.g., DOD, the Department of Energy, and the State Department?

Answer. I understand that DOD's CTR mission is executed with essential support from DOS, and in cooperation with the Department of Energy and other interagency partners. Robust collaboration across U.S. agencies and interagency coordination is a hallmark of the program and key to its effectiveness. If confirmed, I will evaluate whether interagency coordination can be improved.

Question. As the CTR program expands to geographic regions beyond the states of the former Soviet Union, in your view what proliferation and threat reduction goals should the DOD establish?

Answer. Expanding the geographic reach of the CTR program beyond the former Soviet Union strikes me as an important step toward preventing and reducing WMD threats and building global partnerships. The President has highlighted the threats posed by nuclear and biological terrorism as key proliferation concerns requiring international attention. In line with these priorities, I am informed that DOD's goals for the program are: (1) reducing and eliminating nuclear weapons threats; (2) improving the security and accounting of nuclear weapons and weapons-usable fissile material; (3) detecting, eliminating and preventing the proliferation of biological and chemical weapons and capabilities; and (4) encouraging development of capabilities to reduce proliferation threats among key partners and regions. I believe that these goals make sense.

PROMPT GLOBAL STRIKE

Question. The 2010 QDR concluded that the United States will continue to experiment with prompt global strike prototypes. There has been no decision to field a prompt global strike capability as the effort is early in the technology and testing phase.

In your view, what is the role for a conventional prompt global strike capability in addressing the key threats to U.S. national security in the near future?

Answer. Conventional prompt global strike (CPGS) weapons would provide the Nation with a unique conventional capability to strike time-sensitive targets, so that distant, hard-to-reach places will no longer provide sanctuary to adversaries. It is my understanding that the only current prompt global strike capability in the U.S. inventory is a nuclear armed ballistic missile. CPGS would be a valuable option for the President to have at his disposal.

CPGS systems could be useful in scenarios involving regional adversaries considering an attack using weapons of mass destruction or against high-priority non-state adversaries. More broadly, CPGS may be the only systems available in situations where a fleeting, serious threat was located in a region not readily accessible by other means.

Question. What approach to implementation of this capability would you expect to pursue if confirmed?

Answer. I understand that DOD is developing and testing technologies relevant to both land-based and sea-based CPGS. It would be premature to make any decisions regarding a future deployed system until the results of these tests are in-hand.

Question. In your view what, if any, improvements in intelligence capabilities would be needed to support a prompt global strike capability?

Answer. Like other weapon systems, effective employment of CPGS weapons would depend on the availability of timely and accurate intelligence on the nature, location, and disposition of a potential target. If confirmed, I will consider what specific improvements in intelligence capabilities may be needed to enable effective use of CPGS systems for various types of targets. I believe that it is important to pursue continued enhancements in our capabilities to collect, analyze, and distribute intelligence irrespective of the development of CPGS systems.

NUCLEAR WEAPONS AND STOCKPILE STEWARDSHIP

Question. Congress established the Stockpile Stewardship Program with the aim of creating the computational capabilities and experimental tools needed to allow for the continued certification of the nuclear weapons stockpile as safe, secure, and reliable without the need for nuclear weapons testing. The Secretaries of Defense and Energy are statutorily required to certify annually to Congress the continued safety, security, and reliability of the nuclear weapons stockpile.

As the stockpile continues to age, what do you view as the greatest challenges with respect to assuring the safety, reliability, and security of the stockpile?

Answer. It is my understanding that stockpile stewardship is effective; today's stockpile appears to be safe, secure, and reliable and not require further nuclear testing. But the stockpile is aging. I understand that there are challenges in identifying and remedying the effects of aging on the stockpile. If confirmed, I am committed to working with the Department of Energy to maintain the critical skills, capabilities, and infrastructure needed to ensure the safety, reliability, and security of the stockpile, all in a constrained budget environment.

Question. If the technical conclusions and data from the Stockpile Stewardship Program could no longer confidently support the annual certification of the stockpile as safe, secure, and reliable, would you recommend the resumption of underground nuclear testing?

Answer. As stated in my answer above, my understanding is that today's nuclear stockpile appears to be safe, secure, and effective and does not require a return to nuclear testing. I understand that nuclear testing is not currently anticipated or planned. It is my understanding that the Stockpile Stewardship Program has demonstrated an ability to resolve problems that in the past would have been resolved with testing, and I believe that if the Stockpile Stewardship Program is adequately funded to maintain critical technical and manufacturing capabilities, it can continue to fulfill this role. My recommendation on a course of action in the event that I was unable to certify the stockpile as safe, secure, and reliable would depend critically on the root causes of problems in the stockpile.

Question. What considerations would guide your recommendation in this regard?

Answer. The dominant considerations would be the safety, security, and reliability of the nuclear stockpile and our ability to sustain the U.S. nuclear deterrent. Technical and military considerations would guide my recommendation to the President. I would certainly take into account the expert technical judgment of the three nuclear weapons laboratory directors, coupled with the military judgment of the Commander, U.S. Strategic Command, as well as the judgment of other experts. I would also ask for the best military judgment of the Joint Chiefs of Staff.

Question. Do you agree that the full funding of the President's plan for modernizing the nuclear weapons complex, commonly referred to as the 1251 report, is a critical national security priority?

Answer. I have not had the opportunity to review this report. If confirmed, I look forward to the opportunity to do so. I do believe that maintaining a safe, reliable, and secure nuclear stockpile is a critical national security priority. At the same time, I believe that nuclear modernization, as with all DOD's efforts, must be undertaken in a cost-effective manner. I am informed that Secretary Gates took steps to reduce the estimated costs of the *Ohio*-class replacement ballistic missile submarine

and the new Long-Range Strike Family of Systems. If confirmed, I would continue to work to ensure affordability while sustaining a safe, secure, and effective nuclear deterrent.

Question. Prior to completing this modernization effort, do you believe it would be prudent to consider reductions below New START treaty limits for either the deployed or non-deployed stockpile of nuclear weapons?

Answer. I have not had an opportunity to review the timeframe of the modernization program or to assess its relationship to reductions below the New START treaty limits. I agree with the Senate's resolution of ratification for the New START treaty in calling for negotiations with Russia to "secure and reduce tactical nuclear weapons in a verifiable manner." I understand that the administration has suggested bilateral negotiations with Russia on this matter, after consultation with our allies. I believe that any proposed further reductions should take into account the status of the stockpile of nuclear weapons, and that our investments and these negotiations should be pursued in parallel.

MEDICAL COUNTERMEASURES INITIATIVE (MCM)

Question. The administration has produced an interagency strategy for the advanced development and manufacture of medical countermeasures (MCM) to defend against pandemic influenza and biological warfare threats. In this strategy, DOD will be responsible for the development and manufacture of medical countermeasures to protect U.S. Armed Forces and DOD personnel.

Do you support this interagency strategy and the MCM Initiative and, if confirmed, would you plan to implement them?

Answer. Yes. If confirmed, I will work to establish this important capability that is needed to support our forces and sustain our global operations.

DEFENSE ACQUISITION REFORM

Question. Two years ago, Congress enacted the Weapon Systems Acquisition Reform Act of 2009 (WSARA), without a dissenting vote in either House. WSARA is designed to ensure that new defense acquisition programs start on a sound footing, to avoid the high cost of fixing problems late in the acquisition process.

What are your views regarding WSARA and the need for improvements in the Defense acquisition process?

Answer. I support the improvements in the areas of defense acquisition organization and policy that are addressed in the WSARA. WSARA mandated needed improvements in the defense acquisition process. I support the law's requirements that DOD examine trade-offs between cost, schedule, and performance to significantly reduce cost growth in major defense acquisition programs. I am aware that DOD has undertaken significant further acquisition reform. If confirmed, I will continue the effort to improve the acquisition system consistent with the direction provided in WSARA.

Question. If confirmed, how would you improve all three aspects of the acquisition process—requirements, acquisition, and budgeting?

Answer. I believe that the acquisition process must be closely coordinated with the requirements and budget processes. Since enactment of WSARA, progress appears to have been made in coordinating these three processes, but I understand there remains room for improvement and that DOD can reduce costs to get better value for its defense dollar. I understand DOD is currently engaged in a comprehensive initiative designed to reduce cost throughout the defense acquisition system. I understand that a major part of this "Better Buying Power" initiative is to coordinate the requirements, acquisition, and budget processes in a way that mandates affordable requirements and full funding into weapon systems up front. I support these efforts.

I also believe that it is necessary to create a "Fast Lane" for acquiring and fielding systems in response to urgent operational needs, as was done with the Mine Resistant Ambush Protected (MRAP) vehicle in Iraq and Afghanistan. Since the attacks of September 11, 2001, DOD has engaged in rapid acquisition through a variety of largely ad hoc processes. Section 804 of the National Defense Authorization Act for Fiscal Year 2011 requires DOD to consider a formal process for rapid acquisition. If confirmed, I will make creating a formal process for rapid acquisition a priority.

Question. If confirmed, how would you improve acquisition accountability?

Answer. Goldwater Nichols established a chain of command for the acquisition process which provides for clear accountability. However, the acquisition process must be operated in close coordination with the requirements process and the budget process, and this requires active participation by DOD's senior leadership to en-

sure all three processes are properly coordinated and held accountable. If confirmed, I am committed to ensuring accountability in all aspects of acquisition during my tenure.

Question. Do you believe that the current investment budget for major systems is affordable given increasing historic cost growth in major systems, costs of current operations, and asset recapitalization?

Answer. I have not reviewed DOD's investment budget in detail. However, it is clear to me that in this current fiscal environment, pursuing affordability and cost control are critical. In recent years, Secretary Gates has cancelled a number of programs that were unneeded, were not delivering affordably, or had been procured in adequate numbers already. These efforts have gone a long way towards paring down DOD's portfolio of major weapons systems to those that are truly needed. Existing programs must be managed so that cost growth does not make them unaffordable. If confirmed, I will continue to examine the investment budget closely for affordability and for opportunities to achieve cost savings.

Question. If confirmed, how do you plan to address this issue and guard against the potential impact of weapon systems cost growth?

Answer. Clearly, continued implementation of WSARA is a critical element in controlling cost growth. If confirmed, I will support this and other ongoing efforts to control costs and reform the acquisition system. In particular I will review DOD's major programs to determine if they are affordable and I will direct the Services to do the same for programs under their direction.

SERVICES CONTRACTING

Question. Over the past decade, there has been a dramatic increase in the volume of services purchased by DOD. According to a recent report by the Defense Science Board, the Department now spends substantially more for contract services than it does for all products, including weapon systems. Yet, the Department is still struggling to establish a management structure for services contracts comparable to the structure in place for the acquisition of products.

What is your view of the Department's reliance on service contractors?

Answer. I recognize that the private sector is, and will continue to be, a vital source of expertise, innovation and support and that DOD, which relies on an All-Volunteer Force, simply cannot operate without the support of service contractors. These contractors do account for more of the defense budget than contractors who provide products to DOD. I believe that properly managing service contractors is just as important as managing DOD's contractors who provide weapon systems and other products.

Question. If confirmed, how do you plan to address the issue of cost growth in services contracting and ensure that the Department gets the most for its money in this area?

Answer. If confirmed, I will review the processes DOD is using to manage service contractors to ensure that they are providing good value for the funds they receive.

Question. Over the last decade, the Department has become progressively more reliant upon contractors to perform functions that were once performed exclusively by government employees. As a result, contractors now play an integral role in areas as diverse as the management and oversight of weapons programs, the development of personnel policies, and the collection and analysis of intelligence. In many cases, contractor employees work in the same offices, serve on the same projects and task forces, and perform many of the same functions as DOD employees.

In your view, has DOD become too reliant on contractors to support the basic functions of the Department?

Answer. At this time I do not have enough information to make this assessment. However, I believe that reliance on contractors is something that must be assessed function by function. Many functions are appropriate for contractor support, however some, such as program management, are more appropriately performed by government personnel. Some functions are inherently governmental and should not be performed by contractors. If confirmed I will assess this issue to determine whether or not DOD's reliance on contractors has become excessive.

Question. Do you believe that the current extensive use of personal services contracts is in the best interest of DOD?

Answer. Although I am not familiar with the various types of functions acquired through personal service contracts, or the extent to which DOD acquires these functions through personal services contracts, I understand there are statutory restrictions. In my view, the basis for those restrictions is as applicable to DOD as to that of other Federal departments and agencies. If confirmed, I will ensure that personal services contracts are not used inappropriately.

Question. What is your view of the appropriate applicability of personal conflict of interest standards and other ethics requirements to contractor employees who perform functions similar to those performed by government employees?

Answer. When it is appropriate for contractors to perform work that is similar to work performed by government employees, my view is that those contractor employees should be subject to appropriate ethics and conflict of interest requirements. Contractor employees should be held to similar ethical standards as the Government employees they support, and in particular, should not be allowed to misuse the information which may be available to them as a result of their performance under a DOD contract.

Question. U.S. military operations in Iraq and Afghanistan have relied on contractor support to a greater degree than previous U.S. military operations. According to widely published reports, the number of U.S. contractor employees in Iraq and Afghanistan has often exceeded the number of U.S. military deployed in those countries.

Do you believe that DOD has become too dependent on contractor support for military operations?

Answer. I am not in a position to offer such an assessment at this time. While DOD's use of contractors is high relative to previous conflicts, current levels may be warranted. DOD now has several years of experience with the widespread use of contractors to support the All-Volunteer Force engaged in counter-insurgency and stability operations. It is my understanding that the increased level of reliance on contracted support in contingency operations is highlighted in a recent study conducted by the Chairman of the Joint Chiefs of Staff.

Furthermore, it is my understanding that based on a recommendation by the Chairman, Secretary Gates recently issued a memorandum to DOD regarding a wide range of initiatives associated with contractor support in contingencies. This memorandum requires the military departments to assess opportunities for insourcing contracted capabilities that represent high risk to the warfighter. If confirmed, I will review this study and the military departments' assessments.

Question. What risks do you see in the Department's reliance on such contractor support?

Answer. Reliance on contractor support can lead to operational problems if contractors fail to perform. Experience has shown that a number of other problems can arise including a potential for increased fraud, waste and abuse, problems that arise from contractor interaction with local communities, and issues with the use of force. It is also possible that skills needed in the military in the future will atrophy or disappear due to reliance on contractor support.

Question. What steps do you believe the Department should take to mitigate such risk?

Answer. I believe the first step in mitigating such risk is to gain a thorough understanding of any risks we have with the current workforce mix of military, civilian and contractors. The aforementioned study led by the Chairman of the Joint Chiefs of Staff and the assessments being conducted by the military services and agencies will provide me with a baseline level of understanding. If confirmed, I will review and continue ongoing efforts to conduct effective oversight of service contracts in contingencies.

Question. Do you believe the Department is appropriately organized and staffed to effectively manage contractors on the battlefield?

Answer. It is my understanding that originally DOD was not properly organized and staffed to effectively manage contractors in the ongoing contingency operations, but that corrective actions have been taken over the last several years. If confirmed, I will review ongoing efforts to ensure DOD institutionalizes its contingency contracting capabilities and the lessons learned from our experiences in Iraq and Afghanistan are applied to future conflicts.

Question. What steps if any do you believe the Department should take to improve its management of contractors on the battlefield?

Answer. It is my understanding that DOD has made significant progress in implementing effective management of contractors during contingency operations through several ongoing efforts. If confirmed, I will review and ensure these efforts are adequate and effective and I will work to institutionalize the effective management processes that have been developed over the last several years as appropriate.

PRIVATE SECURITY CONTRACTORS

Question. Federal agencies, including DOD, have spent more than \$5 billion for private security contractors in Iraq and Afghanistan over the last decade. Over this period, there have been numerous reports of abuses by private security contractors,

including allegations of contractors shooting recklessly at civilians as they have driven down the streets of Baghdad and other Iraqi cities. In September 2007, employees of Blackwater allegedly opened fire on Iraqis at Nisour Square in downtown Baghdad, killing more than a dozen Iraqis and wounding many more. More recently, the Senate Armed Services Committee reported on questionable activities by private security contractors in Afghanistan.

Do you believe DOD and other Federal agencies should rely upon contractors to perform security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations?

Answer. Without a substantial increase in the force structure committed to contingency operations, the use of contractors for some security functions in contingencies is a necessity. However, these contractors must be properly regulated and supervised and their mission must be carefully limited. Contractors cannot engage in combat operations. Their use of force is limited to self-defense and the defense of others against criminal violence and the protection of critical property. Under these circumstances, I believe that the limited use of security contractors in contingency operations is acceptable. It would be inappropriate for me to comment on their use by other departments. If confirmed I will ensure that proper limitations on private security contractors are in place and enforced.

Question. In your view, has the U.S. reliance upon private security contractors to perform such functions risked undermining our defense and foreign policy objectives in Iraq and Afghanistan?

Answer. The use of force by contractors or military personnel can, if misapplied, undermine our policy objectives. Contractors for physical security missions have been a necessity in Iraq and Afghanistan and will continue to be so. My understanding is that, over time, DOD has established procedures to manage these contractors effectively to prevent unnecessary violence that would be detrimental to our policy objectives. This is an area that requires constant attention and continued supervision and policy refinement is required. If confirmed, I will focus on providing that supervision.

Question. What steps if any would you take, if confirmed, to ensure that any private security contractors who may continue to operate in an area of combat operations act in a responsible manner, consistent with U.S. defense and foreign policy objectives?

Answer. If confirmed, I would work to ensure that two actions are taken. First, the use of private security contractors in any area of combat operations must be fully coordinated. There must be unified and consistent procedures for all such contractors, regardless of which U.S. agency hires them. Our commanders on the ground must have authority to restrict security contractors' operations as the situation requires.

Second, there must be assured legal accountability for the actions of private security contractors. In a given circumstance, the host nation will have responsibilities in this regard as well, such as rigorous licensing procedures and enforcement of its own laws.

Question. Do you support the extension of the Military Extraterritorial Jurisdiction Act to private security contractors of all Federal agencies?

Answer. I support steps to ensure that there is legal accountability for the actions of all contractors performing work for the U.S. Government in an area of combat operations. If confirmed, I will consult with my interagency partners concerning appropriate mechanisms to ensure such accountability.

Question. What is your view of the appropriate application of the Uniform Code of Military Justice to employees of private security contractors operating in an area of combat operations?

Answer. There must be assured legal accountability for the actions of all contractors deployed to an area of combat operations. The application of the Uniform Code of Military Justice is one tool to do this.

Question. OMB Circular A-76 defines "inherently governmental functions" to include "discretionary functions" that could "significantly affect the life, liberty, or property of private persons"

Answer. In your view, is the performance of security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations an inherently governmental function? In your view, is the interrogation of enemy prisoners of war and other detainees during and in the aftermath of hostilities an inherently governmental function?

I am not familiar with DOD policies governing the use of contractors in detention operations, but if confirmed, I will review them to ensure they properly separate inherently governmental functions from work performed by contractors. I am aware that Congress spoke to the issue of interrogation by contractors in section 1038 of

the National Defense Authorization Act for Fiscal Year 2010 which prohibits the interrogation by contractor personnel of detainees or others in the custody or under the effective control of DOD in connection with hostilities. If confirmed, I will ensure this provision is enforced.

Question. Do you see a need for a comprehensive reevaluation of these issues now?

Answer. If confirmed, I will review these issues to determine whether there is a need to reevaluate these policies.

ACQUISITION WORKFORCE

Question. Over the last 15 years, DOD has reduced the size of its acquisition workforce by almost half, without undertaking any systematic planning or analysis to ensure that it would have the specific skills and competencies needed to meet DOD's current and future needs. Since September 11, 2001, moreover, the demands placed on that workforce have substantially increased. Section 852 of the National Defense Authorization Act for Fiscal Year 2008 established an Acquisition Workforce Development Fund to help DOD address shortcomings in its acquisition workforce. Over the last year, Secretary Gates has stated that the Department must continue to rebuild its acquisition workforce, even as it seeks efficiencies in other areas.

Do you agree that the Department would be "penny-wise and pound foolish" to try to save money by cutting corners on its acquisition workforce at the risk or losing control over the hundreds of billions of dollars that it spends every year on the acquisition of products and services?

Answer. Yes. I am aware that DOD is expending far more today on goods and services with an acquisition workforce substantially reduced in size from the 1990s. If confirmed, I will support a properly sized and highly capable acquisition workforce.

Question. Do you believe that the Acquisition Workforce Development Fund is needed to ensure that DOD has the right number of employees with the right skills to run its acquisition programs in the most cost effective manner for the taxpayers?

Answer. Yes. It is my understanding that DOD has used the Defense Acquisition Workforce Development Fund, which originated in this committee, to resource a number of initiatives to attract, develop, and retain individuals with critical acquisition skills. DOD must continue to fund these initiatives which are critical to achieving a properly sized and highly capable acquisition workforce.

Question. If confirmed, what steps if any will you ensure that the money made available through the Acquisition Workforce Fund is spent in a manner that best meets the needs of DOD and its acquisition workforce?

Answer. If confirmed, I will direct that the Under Secretary for Acquisition, Technology, and Logistics monitor the implementation of the Defense Acquisition Workforce Development Fund to ensure that it focuses on rebuilding critical skills in the workforce, without which our goals for affordability, cost control, and reform of the acquisition system cannot be met.

MANAGEMENT ISSUES

Question. The Government Performance and Results Act is intended to provide managers with a disciplined approach by developing a strategic plan, establishing annual goals, measuring performance, and reporting on the results by for improving the performance and internal management of an organization.

What do you consider to be the most important priorities and challenges facing DOD as it strives to achieve these management goals?

Answer. I share Secretary Gates' concern, as noted in his recent speech to the American Enterprise Institute, that the current systems for managing people and money across the DOD enterprise are inadequate. It is my understanding that the defense agencies, field activities, joint headquarters, and support staff functions of DOD operate without centralized mechanisms to allocate resources, track expenditures, and measure results relative to DOD's overall priorities. If confirmed, I look forward to addressing this issue.

Question. What are your views on the importance and role of financial information in managing operations and holding managers accountable?

Answer. I believe that having access to the appropriate financial information, as well as other key performance indicators, is critical towards managing operations and holding leaders accountable for results.

FINANCIAL MANAGEMENT

Question. DOD spends billions of dollars every year to acquire, operate, and upgrade business systems needed to support the warfighter, including systems related

to the management of contracts, finances, the supply chain, and support infrastructure. Despite these expenditures, the Department's business systems are stovepiped, duplicative, and nonintegrated. As a result, the Department remains unable to produce timely, accurate, and complete information to support management decisions.

If confirmed, will you ensure that the financial management problems of DOD receive priority attention at the senior management level?

Answer. Yes.

Question. What priority do you believe the Department should place on achieving a clean financial statement, as required by section 1003 of the National Defense Authorization Act for Fiscal Year 2010?

Answer. Achieving clean audit opinions is one of my top management improvement priorities. A clean financial audit opinion is important to demonstrate that DOD is a responsible steward of public funds and to ensure management has accurate and timely information for decisionmaking. I understand DOD has a plan for achieving auditable statements that includes goals, a governance process, and resources; and that this plan depends in part on modernizing its business systems.

I expect senior leaders across DOD to work together to continue progress towards meeting the legal requirement to be ready for audits by the end of 2017, and will ensure that the Comptroller, in partnership with the Chief Management Officers, devotes time and resources to leading this effort.

HUMAN CAPITAL PLANNING

Question. DOD faces a critical shortfall in key areas of its civilian workforce, including the management of acquisition programs, information technology systems and financial management, and senior DOD officials have expressed alarm at the extent of the Department's reliance on contractors in these areas. Section 115(b) of title 10, U.S.C., requires the Department to develop a strategic workforce plan to shape and improve its civilian employee workforce.

Would you agree that the Department's human capital, including its civilian workforce, is critical to the accomplishment of its national security mission?

Answer. Yes. DOD's human capital, including its civilian workforce, is not only critical, but an essential element to the successful accomplishment of its national security mission. It is my understanding that the civilian workforce is viewed as one entity throughout DOD. Given the intent to have civilians be capable and ready to move to where an emerging requirement exists within DOD, collaboration is an ongoing process amongst the Services, Defense Agencies, Joint Staff, and Office of the Secretary of Defense. This process ensures that DOD is speaking in one voice for its civilian workforce to ensure transparency, develop and recommend enterprise policy, and support the overall lifecycle. DOD employs a robust system of talent management to ensure it possesses and plans for future workforce needs. If confirmed, I will work to ensure that this ready and capable civilian force has the support it needs through programs that foster ideas, methods, and procedures for lifecycle management.

Question. Do you share the concern expressed by others about the extent of the Department's reliance on contractors in critical areas such as the management of acquisition programs, information technology and financial management?

Answer. If confirmed, I will monitor whether or not DOD is too reliant on contractors. The private sector will continue to provide vital support to DOD. There are areas in acquisition, IT and financial management where support from contractors is an appropriate and cost effective solution to perform work that does not require government personnel discretion. If confirmed, I will be committed to proactively managing the Total Force of military and civilian personnel, and support provided by contractors.

Question. If confirmed, will you ensure that the Department undertakes necessary human capital planning to ensure that its civilian workforce is prepared to meet the challenges of the coming decades?

Answer. Yes. If confirmed, I will ensure that a comprehensive workforce plan provides strategies for recruitment, development, and retention of a mission-ready civilian workforce is in place. Planning is critical as fiscal constraints impact workforce capabilities and sustainment.

TEST AND EVALUATION

Question. A natural tension exists between major program objectives to reduce cost and schedule and the test and evaluation (T&E) objective to ensure performance meets specifications and requirements.

What is your assessment of the appropriate balance between the desire to reduce acquisition cycle times and the need to perform adequate testing?

Answer. I support rigorous independent testing and evaluation to provide accurate and objective information on the capabilities and limitations of defense systems to both acquisition executives and warfighters and to ensure contractors deliver products that meet their requirements. When systems are urgently needed in the field, the imperative for accurate and objective testing is still just as important but should be addressed through efforts to expedite the T&E process. I understand this has been accomplished successfully for such urgent efforts as the MRAP vehicle program. In those urgent cases I believe that some risk can be taken, but safety and basic performance must be verified prior to fielding. Testing is needed to validate system performance and I believe it is a necessary part of the acquisition process. That said, there may be opportunities to achieve this goal through more efficient processes than those currently in practice.

Question. Under what circumstances, if any, do you believe we should procure weapon systems and equipment that has not been demonstrated through T&E to be operationally effective, suitable, and survivable?

Answer. In a limited number of urgent circumstances it might be necessary to field a system prior to operational testing in order to address an urgent gap in a critical capability. But even in such cases, operational evaluation should still be conducted at the earliest opportunity to assess the system's capabilities and limitations and identify any deficiencies that might need to be corrected.

Question. Congress established the position of Director of Operational Test and Evaluation to serve as an independent voice on matters relating to operational testing of weapons systems. As established, the Director has a unique and direct relationship with Congress, consistent with the statutory independence of the office.

Do you support the continued ability of the Director of Operational Test and Evaluation to speak freely and independently with Congress?

Answer. Yes.

FUNDING FOR SCIENCE AND TECHNOLOGY INVESTMENTS AND WORKFORCE

Question. In his State of the Union speech earlier this year, the President said that "maintaining our leadership in science and technology (S&T) is crucial to America's success." In the fiscal year 2012 budget submission, despite the significant efforts to find efficiencies, the DOD's basic research investments grow by 2 percent per year and other S&T activities remain constant taking into account inflation.

Do you support maintaining growth in the DOD's S&T investments?

Answer. I understand and appreciate the valuable role government investment in S&T has had for the Nation and DOD. As Director of the Central Intelligence Agency, I noted that many of that agency's key capabilities emerged from long-term S&T funding. I have seen the results and I support long-term S&T investments. I am also aware that the President has challenged S&T funding levels for all government components. While S&T investment will be a high priority if I am confirmed, all defense appropriations must be considered during this time of budget constraints.

Question. How will you assess whether the S&T investment portfolio is adequate to meet the current and future needs of the Department?

Answer. If confirmed, I anticipate conducting an early review of DOD's capabilities to support the administration's goals, including S&T investment. DOD's budget must balance a number of competing needs and, if confirmed, I will have to assess all those needs, and the risks associated with various levels of funding.

Question. Well over half of all graduates of U.S. universities with advanced degrees in S&T are non-U.S. citizens. Due to a variety of reasons, many return to their home countries where they contribute to competing against the United States in technology advancement.

What is your view on steps that the Department should take, if any, to ensure that DOD and the defense industrial base are able to recruit and retain scientists and engineers from this talent pool?

Answer. The issue of enabling and encouraging foreign students to remain in the United States to pursue careers in science and engineering is one that affects the Nation as a whole. If confirmed, I would work within the administration and with Congress to find ways to retain this talent pool.

DEFENSE INDUSTRIAL BASE

Question. The latest QDR addressed the need for strengthening the defense industrial base. Specifically, it said: "America's security and prosperity are increasingly linked with the health of our technology and industrial bases. In order to maintain

our strategic advantage well into the future, the Department requires a consistent, realistic, and long-term strategy for shaping the structure and capabilities of the defense technology and industrial bases—a strategy that better accounts for the rapid evolution of commercial technology, as well as the unique requirements of ongoing conflicts.”

What is your view on steps that the Department should take, if any, to strengthen the defense industrial base?

Answer. I believe a strong, technologically vibrant, and financially successful defense industrial base is in the national interest. I understand that national policy for many years has been to let market forces adjust the defense industrial base to our evolving threats and requirements, and to changing technology. The government specifically supports defense S&T, and small businesses entering the defense market. Occasionally, specific industrial policies are used to assure the long-term health of particular sectors of the defense industry. If confirmed, I will ensure DOD uses a sector-by-sector approach to the defense industrial base, with productivity growth and long-term health as its goals.

ENCROACHMENT

Question. Some of the most significant issues that impact the readiness of the Armed Forces are categorized as outside encroachment upon military reservations and resources. This encroachment has included, but is not limited to environmental constraints on military training ranges, local community efforts to obtain military property, housing construction, and other land use changes near military installations, airspace restrictions to accommodate civilian airlines, and transfer of radio frequency spectrum from DOD to the wireless communications industry. Unless these issues are effectively addressed, military forces will find it increasingly difficult to train and operate at home and abroad.

In your opinion, how serious are encroachment problems for the U.S. military? If confirmed, what efforts would you take to ensure that military access to the resources listed above, and other required resources, will be preserved?

Answer. I believe that encroachment is a serious issue for the U.S. military. I am aware that DOD has a number of key programs to influence activities outside our installations so that they do not conflict with our training and operations. I strongly support such efforts and, if confirmed, will work closely with Congress to ensure that these efforts are effective.

LAW OF THE SEA CONVENTION

Question. The United Nations Convention on the Law of the Sea is pending consideration in the United States Senate.

What is your view on whether or not the United States should join the Law of the Sea convention?

Answer. I support U.S. accession to the Law of the Sea Convention.

Question. How would being a party to the Law of the Sea convention help or hinder the United States' security posture?

Answer. Being a party to the Law of the Sea Convention would not hinder the U.S. security posture, nor would it have any adverse impact on our sovereignty. In fact, becoming a party would enhance our security posture by enabling the United States to reinforce the Convention's freedom of navigation and overflight rights, including transit passage in strategic straits, and preserve our rights and duties in the Arctic. In addition, becoming a Party to the Convention would support combined operations with coalition partners and support the Proliferation Security Initiative; establish undisputed title to our extended continental shelf areas; and bolster our leadership in future developments in the law of the sea. Accession would also add to DOD's credibility in a large number of Asia-focused multilateral venues where Law of the Sea matters are discussed.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as Secretary of Defense?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR CARL LEVIN

EXPORT CONTROL REFORM

1. Senator LEVIN. Mr. Panetta, the outgoing Secretary of Defense has been a leading proponent of the administration's effort to reform our export control system. One element of that effort is a review of the U.S. Munitions List (USML), which is expected to result in the transfer to the Commerce Control List (CCL) less sensitive items that do not require USML controls. What is your view of the administration's effort to reform export controls?

Mr. PANETTA. I fully support the reform efforts because I believe they are absolutely necessary to meet 21st century national security challenges. Secretary Gates played a key role in setting the administration's export control reform objectives: a single list, a single licensing agency, a single enforcement coordination agency, and a single U.S. Government-wide information technology licensing system. The administration has made significant progress in most areas. The Department of Defense (DOD) has been fully engaged in revising the USML and continue to focus on completing this important work with our interagency partners to produce a single export control list that is more transparent and predictable for government and industry.

2. Senator LEVIN. Mr. Panetta, if you are confirmed, do you plan to continue the review of the USML, and to transition items, as appropriate, to the CCL?

Mr. PANETTA. Yes, I will work to ensure that DOD continues to be the key driver in revising the USML into a positive list, tiering controls based on the criticality of items and technologies for military and intelligence applications, and identifying items that should be moved to the more flexible licensing policies under the CCL.

3. Senator LEVIN. Mr. Panetta, what is your understanding of the timing for this effort?

Mr. PANETTA. With respect to revising the USML and moving items to the CCL, DOD has developed initial drafts of 19 categories of the USML. My understanding is that following interagency deliberations, the plan is to incrementally publish these re-built categories for public comment in the latter part of 2011 and early 2012.

With respect to establishing a single information technology system, DOD is leading this critical step. Using DOD's U.S. Exports System (USXPORTS) program, for the first time, all agencies will have access to a full licensing dataset that will facilitate fully informed and timely decision making. The Departments of State and Commerce will be connected to USXPORTS this year; the Treasury Department is expected to have connectivity in 2012.

My understanding is that the administration is working to finalize the rules for the Export Enforcement Coordination Center (EECC) as directed by Executive Order 13558, signed by the President in November 2010. The EECC is a key pillar of export control reform.

Finally, the administration will need to work with Congress on legislation that would allow the President to establish a single U.S. export control licensing agency.

QUESTIONS SUBMITTED BY SENATOR MARK BEGICH

BUDGET

4. Senator BEGICH. Mr. Panetta, Secretary Gates and Admiral Mullen have recently been vocal about DOD being unable to sustain any more cuts to force struc-

ture. I do not agree that DOD is in a position where it cannot achieve additional cost savings and efficiencies through elimination of poor performing programs and a reassessment of priorities and requirements, especially in light of some requests made this year by DOD which do not make fiscal sense and are not in the best interest of the force. For instance, DOD is requesting \$804 million to continue developing the Medium Extended Air Defense System (MEADS). Yet we will not procure this system and based on the programs past performance we will not get anything viable out of continued development. Additionally, DOD intends to carry out tour normalization in Korea. Moving dependents to this increasingly volatile area will cost billions in military construction and basic housing allowance over the long term. It doesn't make fiscal sense or common sense. Another example is the realignment of marines to Guam. The cost is astronomical and the agreement may not be executable and need re-examining as Chairman Levin has pointed out this year. The Government Accountability Office (GAO) has also identified several actions DOD could take to eliminate redundancy and save money. If confirmed, will you closely examine previous decisions and agreements that are costing taxpayers billions of dollars and are not enhancing national security or providing for our military?

Mr. PANETTA. The Department has begun a comprehensive review of the defense programs in light of the current fiscal environment. Everything is on the table and we will assess each program in terms of the contribution the program makes to our national security strategy.

5. Senator BEGICH. Mr. Panetta, what type of review will you conduct?

Mr. PANETTA. I will continue the comprehensive review begun by Secretary Gates and bring it to a conclusion by this fall.

6. Senator BEGICH. Mr. Panetta, if confirmed, how will you manage/prioritize DOD's budget in this time of scarce resources to ensure the readiness of our forces but eliminate wasteful spending?

Mr. PANETTA. During both the current comprehensive review and the development of subsequent budgets, I will ensure we protect our essential military capabilities while continuing to pursue additional efficiencies, streamline operations, control acquisition cost growth, and identify lower priority efforts that can be eliminated or curtailed. That said, difficult choices will have to be made to operate within reduced resources.

AFGHANISTAN AND PAKISTAN

7. Senator BEGICH. Mr. Panetta, I support eliminating the threat to U.S. national security in Afghanistan and Pakistan by defeating al Qaeda and preventing those countries from being safe havens again. However, like many of my colleagues, after a decade in the country I am concerned about an indefinite U.S. presence. In light of the recent killing of Osama bin Laden and elimination of many terrorists and insurgents, I believe we need a thorough threat assessment and to concisely define a realistic and achievable end-state. What is your assessment of our current strategy in Afghanistan and Pakistan?

Mr. PANETTA. Our strategy is working, but much work remains. Although the death of Osama bin Laden was a significant achievement in our Nation's effort against al Qaeda, his death does not mark the end of our efforts to disrupt, dismantle, and defeat al Qaeda and its affiliates. Al Qaeda and other extremist groups continue to threaten the United States and U.S. allies and partners from safe havens in Pakistan, and wish to reestablish safe havens in Afghanistan.

In Afghanistan, the progress that we have made over the past 16 months in driving the Taliban from their home territory in Helmand and Kandahar is evidence that the insurgency is under intense pressure and that their capabilities are being degraded. We have reversed the insurgency's momentum in many key areas and are now making strides with the Afghans to enable a government capable of providing basic services and security. The implementation of this strategy has moved us closer to our desired end-state of an Afghan state capable of repelling insurgent threats to the central government, and of denying the reestablishment of a safe haven for al Qaeda.

Although our relationship with Pakistan is a challenging one, continued cooperation with Pakistan is important to maintaining necessary pressure on al Qaeda leadership and the networks that provide it support and safe haven, at a time when it is most vulnerable. Al Qaeda vulnerability in the wake of the death of Osama bin Laden presents an historic opportunity not only for us, but also for Pakistan, to advance our shared interests and strengthen our cooperation in eradicating ter-

rorist networks that threaten both nations, as well as our partners in the region and the world. I will continue to seek Pakistan's unambiguous support in the fight against al Qaeda and the regional syndicate of terrorist networks.

8. Senator BEGICH. Mr. Panetta, what is your assessment of the threat to U.S. national security in the region?

Mr. PANETTA. [Deleted.]

9. Senator BEGICH. Mr. Panetta, how do you view the United States' long-term commitment—financially, reconstruction, and security-wise?

Mr. PANETTA. The United States and the international community have sacrificed an extraordinary amount—in lives and resources—for the Afghan people. We remain committed to assisting Afghanistan in seeking a secure Afghanistan that is free of al Qaeda safe-havens. Ultimately, however, the Afghans must be responsible for taking the lead for security in their country, and the transition process through 2014 will support this.

President Obama and President Karzai have agreed that the United States and Afghanistan should have an enduring strategic partnership beyond 2014. The North Atlantic Treaty Organization (NATO) and the international community have also made clear that their commitment to Afghanistan is enduring and will continue beyond the completion of the transition to Afghan security responsibility. We are currently engaging with the Afghans to outline in broad terms a vision for our long-term cooperation and presence.

Afghanistan will require international assistance for many years to come; this is the reality of over 30 years of war. Our assistance, however, must be focused on helping the Afghans take full responsibility for their own future. We need to ensure that as a nation they begin to develop the capacity and the resources they need to reduce their reliance on international aid.

10. Senator BEGICH. Mr. Panetta, what is your assessment of President Hamid Karzai as a partner?

Mr. PANETTA. President Karzai is the democratically elected leader of Afghanistan, and we are committed to working with him to achieve our shared objectives. U.S. policy toward Afghanistan is not contingent on a single leader; our commitment is to the people of Afghanistan, based on the core interests that we share.

President Karzai faces a difficult situation in Afghanistan. He is fighting an insurgency with the assistance of more than 140,000 foreign forces. The burden of this war has been great on the Afghan people. They have been traumatized by some 30 years of war. Inevitably, there will be times of tension or disagreement, and just as President Karzai needs to listen to our concerns, we also need to listen carefully to his. President Karzai sometimes airs these concerns in ways we find unhelpful. But ultimately, he appreciates what the United States is doing and the sacrifices made by our forces.

11. Senator BEGICH. Mr. Panetta, what do you see as the role for DOD in building the capacity of the Government of Afghanistan to deliver services, provide better governance, improve economic development, and fight corruption in Afghanistan?

Mr. PANETTA. Although the Department of State (DOS) has the lead for governance and economic development activities in Afghanistan, DOD brings capabilities and resources that augment civilian efforts, particularly in contested areas. As part of the counterinsurgency strategy, U.S. military forces also support developing Afghan governance and economic capacity, particularly at the district and provincial levels. U.S. military forces use Commanders' Emergency Response Program funds to carry out small-scale projects designed to meet urgent humanitarian relief requirements or urgent reconstruction requirements of the population, with a focus on short-term stability rather than long-term development. Military commanders provide co-leadership of Provincial Reconstruction Teams, and generally are key partners of Afghan Government officials at the district level.

Further, the President's December 2009 strategy review designated DOD as having primary responsibility for building capacity within the Ministry of Defense and Ministry of Interior. This includes a range of responsibilities to help build ministerial capacity to recruit, train, equip, and sustain their own forces. DOD also contributes to anti-corruption efforts through its Shafafiyat task force and its support to the Ministry of Interior's law enforcement activities.

12. Senator BEGICH. Mr. Panetta, do you have concerns with the Afghan Government's ability to sustain our efforts—like funding their own security forces? What more can we be doing?

Mr. PANETTA. After 30 years of war, the institutional and economic capacity of Afghanistan is badly damaged. Nonetheless, Afghanistan has several areas with great potential for economic development and revenue generation, but we expect that the Afghan Government will require international assistance for years to come to realize that potential. A key aim of U.S. assistance, therefore, must be to help the Afghans take full responsibility for their own future, and we need to ensure that as a nation they begin to develop the capacity and the resources they need to reduce their reliance on international aid. This is why the design of U.S. Government-funded projects is increasingly focused on Afghan capacity to sustain those projects.

Projects to help build the Afghan Government's capacity include improvements to the Afghan energy sector (a major catalyst for economic development), transportation and associated infrastructure to facilitate regional trade, improvements to the agricultural sector, and efforts to improve the Afghan Government's ability to collect customs revenue. In addition DOD has implemented programs through its Task Force for Business and Stability Operations (TFBSO) to connect outside investors to potential Afghan producers and to help Afghanistan build the capacity to develop its mineral and other natural resources in environmentally sound and sustainable ways.

Aside from increasing the Afghan Government's capacity and revenue to sustain the current joint efforts with the United States, we anticipate that costs for Government services, such as the funding the Afghan National Security Forces (ANSF), could be adjusted over time. Detailed planning for long-term ANSF sustainment is an ongoing, active effort. The Combined Security Transition Command-Afghanistan is collaborating with the Office of the Secretary of Defense, the Joint Staff, and NATO to analyze the long-term requirements for ANSF capability in light of current fiscal constraints. We envision a continuing role for the United States and expect continued contributions from international donors. To that end, before retiring, then-Secretary of Defense Gates challenged our partners in the International Security Assistance Force (ISAF) to contribute a combined 1 billion Euros annually to the NATO Afghan National Army Trust Fund. The Department is working with our international partners to pursue that initiative.

13. Senator BEGICH. Mr. Panetta, if confirmed, will you support the drawdown in July?

Mr. PANETTA. I will support the President's decision.

14. Senator BEGICH. Mr. Panetta, how long should the drawdown take?

Mr. PANETTA. The pace and scope of the drawdown should take into account security and other conditions on the ground. I will listen to the recommendations from the commanders and provide my best military advice to the President. A successful transition of security lead to ANSF requires careful planning and implementation.

15. Senator BEGICH. Mr. Panetta, what is your assessment of the progress in developing a professional and effective ANSF?

Mr. PANETTA. Progress in developing professional and effective ANSF has been steady. One hundred thousand have been added to the rolls of the ANSF since the establishment of NATO Training Mission-Afghanistan (NTM-A) in November 2009. NTM-A has set the conditions for enhancing professionalism by the opening of twelve branch schools in the past year, implementing an aggressive literacy program, and establishing leadership training for officers and non-commissioned officers (NCOs). The focus this year is on training Afghan trainers to train their own. A sign of progress in this regard is the graduation 2 weeks ago of 26 new Sergeants Major from the Sergeant Major Academy—the first class trained solely by Afghan Instructors and leaders. Similarly the Commander of ISAF Joint Command (IJC) has led improvements in the operational effectiveness of the ANSF through partnering. Ninety-Five percent of all Afghan Kandaks (battalions) are partnered with coalition forces. In the ISAF's main effort operation in Kandahar Province, HAMKARI, ANSF comprise 60 percent of the total forces and are increasingly taking the lead in planning and executing operations. The response to the recent Taliban attacks in Kandahar City on 7 May 2011 was an example of the improving effectiveness of the ANSF. They dealt with the attackers in a deliberate manner, eliminating the threat with minimal casualties and limited ISAF support. Clearly there are challenges and issues as we continue to grow and develop the ANSF, but commanders at all levels are working shoulder to shoulder with their Afghan counterparts to resolve them. I am confident that we can proceed with transition of security responsibilities in designated areas to the ANSF, and meet our goal of ANSF lead for security countrywide in Afghanistan by the end of 2014.

16. Senator BEGICH. Mr. Panetta, if confirmed, will you make it a goal to transfer the security mission to the Afghans sooner than 2014?

Mr. PANETTA. President Karzai established the 2014 transition goal, which NATO subsequently endorsed based on joint assessments with the Afghan Government about the state of the insurgency, the rate at which the ANSF can develop their capability to take over security lead, and the level of governance capacity and development throughout the country. Actual conditions on the ground will drive the ultimate rate and sequence of transition, but the 2014 goal remains a realistic target for a responsible transition.

17. Senator BEGICH. Mr. Panetta, if confirmed, what changes, if any, would you recommend for U.S. relations with Pakistan, particularly in terms of military-to-military relations?

Mr. PANETTA. I would continue to seek Pakistan's unambiguous support in the fight against al Qaeda and its affiliates operating in the Afghanistan-Pakistan region. Pakistan, however, must choose what kind of partnership it seeks. Pakistan's own security depends on its civilian and military efforts to deny safe havens in the tribal and border regions and to extend economic opportunity and the government's writ to those areas. It is also in the United States' interest that Pakistan take these steps. Strong military-to-military relations and assistance can be an important means of building Pakistan's capabilities for this effort, but it will also require a mutual effort to build and sustain trust in a commitment to achieving shared objectives.

LAW OF THE SEA CONVENTION

18. Senator BEGICH. Mr. Panetta, the United Nations Convention on the Law of the Sea (CLOS) is pending consideration in the U.S. Senate. I support ratification of this treaty and know the Arctic is an increasingly important region. What is your view on whether or not the United States should join the CLOS?

Mr. PANETTA. I support U.S. accession to the 1982 Law of the Sea Convention (LOS Convention). The rights guaranteed under the LOS Convention are essential for the global presence of U.S. forces, enabling large-scale movement of materiel through the Straits of Gibraltar, Malacca, Hormuz, and Bab el-Mandeb and into the Persian Gulf to sustain our combat forces into Iraq and Afghanistan. These rights also permit the U.S. submarine fleet to transit submerged through key choke points on critical missions and allow the U.S. Air Force to conduct global missions without overflying foreign national airspace. Finally, freedom of navigation and overflight rights ensure the uninterrupted flow of commerce to and from our shores.

19. Senator BEGICH. Mr. Panetta, how would being a party to the CLOS help or hinder the United States' security posture?

Mr. PANETTA. Becoming a Party to the 1982 Law of the Sea Convention (LOS Convention) would enhance our security posture by enabling the United States to reinforce the LOS Convention's freedom of navigation and overflight rights, including transit passage through strategic straits, and preserve our rights and the duties of all States in the Arctic. In addition, becoming a Party to the LOS Convention would: support combined operations with coalition partners; support the Proliferation Security Initiative (PSI); establish undisputed title to our extended continental shelf areas; and bolster our leadership in future developments in the law of the sea. Accession to the LOS Convention would also add to DOD credibility in a large number of Asia-focused multilateral venues where law of the sea matters are discussed.

20. Senator BEGICH. Mr. Panetta, what will you do to get this treaty to the Senate for approval?

Mr. PANETTA. I look forward to supporting the administration's continued engagement with the Senate toward favorable consideration of U.S. accession to the 1982 Law of the Sea Convention (LOS Convention).

I have been and remain a strong advocate of the LOS Convention. I will support the administration's goal of ratification of this treaty.

GROUND-BASED MIDCOURSE DEFENSE

21. Senator BEGICH. Mr. Panetta, the Ground-based Midcourse Defense (GMD) system in Alaska and California is the only missile defense system that protects the U.S. Homeland from long-range ballistic missile attacks. This is an extremely complex program that was simultaneously fielded and developed. It is our only line of

defense and it is imperative there is confidence in the system and the appropriate resources are allocated. If confirmed, will you support the 2010 Ballistic Missile Defense Review which established GMD as a priority and ensure the program is resourced to be able to protect the U.S. Homeland against evolving threats?

Mr. PANETTA. I support the priority given to GMD in the 2010 Ballistic Missile Defense Review.

22. Senator BEGICH. Mr. Panetta, what role do you see GMD playing in the long-term security of the Nation?

Mr. PANETTA. The protection of the United States against a ballistic missile attack remains a vital security priority. As the Secretary of Defense, I will work to ensure United States citizens have the best possible defenses against such an attack. With GMD and a successful intercept, the United States retains a broader range of response options than without. I also believe that threat nations will be less inclined to prosecute a ballistic missile attack against the United States if they believe that we have the capability to destroy the ballistic missile in flight, before it reaches its target. For these reasons, we must continue to maintain a viable defense and continue to evolve our capability so that it is effective against future threats.

RARE EARTH-DEPENDENCY ON FOREIGN SOURCES

23. Senator BEGICH. Mr. Panetta, I am concerned about a potential threat to U.S. national security and military operability: the issue of rare earth elements and our military's dependence on unreliable foreign nations for our supply. China produces approximately 97 percent of the world's rare earth supply and has restricted export quotas of rare earth elements based on their own internal demand. Rare earths are essential components to clean energy technologies. They are also critical to many modern defense applications, such as radar and sonar systems and precision-guided munitions. DOD comprises a small segment of aggregate rare earth demand, but we cannot function effectively without these elements. Our most critical weapons systems rely on these elements. Please share your view on the importance of rare earths and our current dependency on China for them.

Mr. PANETTA. I share your concerns that access to certain individual rare earth elements and components may be an issue. We must work to ensure that the U.S. has adequate supplies of the needed elements and carefully monitor supply and demand.

24. Senator BEGICH. Mr. Panetta, if confirmed, will you ensure DOD adequately and appropriately evaluates near-, mid-, and long-term supply-chain availability, determines aggregate defense demand, and establishes a plan to address potential supply chain vulnerabilities?

Mr. PANETTA. Yes. While it appears expected domestic production of rare earth elements should be substantial by the end of next year, I remain concerned that access to certain individual rare earth elements and components may be an issue and will continuously monitor the situation.

25. Senator BEGICH. Mr. Panetta, where do you see it in the list of priorities of DOD?

Mr. PANETTA. Given the fact that rare earth elements are a critical component of our defense capability, availability of these elements will be one of my priorities and areas of focus.

26. Senator BEGICH. Mr. Panetta, how long should it take to develop a plan?

Mr. PANETTA. Identifying individual rare earth elements of concern to the defense industrial base is the focus of the rare earth materials assessment required by Congress under section 843 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011. Depending upon its findings regarding defense demand and market supply for the individual elements, the assessment will include, as appropriate, options for mitigating risk in order to ensure the availability of the necessary rare earth materials or components. It should be possible to identify strategy options within months after identifying the elements of concern.

RESERVE COMPONENT

27. Senator BEGICH. Mr. Panetta, the National Guard and Reserves are critical to our force. For the last decade they have performed alongside their Active Duty

brethren with honor and distinction as an operational force instead of a strategic Reserve. If any lesson was learned it is that they are critical to a ready force and during times of high operational tempo. Over the last several years there has been a total force approach to better incorporate the Reserve component. I worry, however, business will go back to usual and funding and support for the Reserve component will dramatically be reduced by the Services thereby compromising their readiness. If confirmed, how will you approach the Reserve component force structure role as operations decrease?

Mr. PANETTA. I agree that the Guard and Reserve have made major contributions to the Department's efforts over the last 10 years, and have been integral to the Total Force. Our Reserve component is a valuable, highly experienced and well-trained element of that force, and continuing to support their readiness is critical. Given the current era of conflict and the broad range of security challenges on the horizon, sound decisions regarding the rebalancing of capabilities and aggregate capacity of the Total Force are essential to defending and advancing our national interests. It will be my approach to make the most efficient use of the Total Force—Active, Guard, Reserve, civilians, and contractors. In order to reduce stress on the overall force, maintain an All-Volunteer Force, and leverage the skills and experience resident in the Guard and Reserve, their continued contribution in the future is critical.

28. Senator BEGICH. Mr. Panetta, if confirmed, how will you ensure total force integration initiatives, like associate units in the Air Force, undergo a thorough requirements scrub and are properly resourced to reflect the steady state requirements of the unit?

Mr. PANETTA. In order to ensure Total Force integration, I would work to use the Guard and Reserve in partnership with the Active Forces to best advantage, increasing the capacity of, and reducing the burden on, all our military personnel and their families. I will work to ensure that the gains made in readiness, training, and equipping in the Reserve components over the last decade are preserved and maintained, reflecting the steady state demands on our Armed Forces.

We must adequately resource and effectively employ all elements of the Total Force, consistent with their assigned missions. Accordingly, I will continue the significant work by the Department and the Services to sustain and refine the effectiveness of our total Force.

To this end, Secretary Gates approved a Quadrennial Defense Review (QDR)-directed Comprehensive Review of the Future Role of the Reserve Components, which outlined the organizational and operational benefits of initiatives such as the associate units in the Air Force, along with other effective employment options, which use the Guard and Reserve to best advantage. As this review was approved by Secretary Gates, it will be my approach to take these important recommendations under my review. In addition, we have defined the accepted use of Reserve component units and personnel in response to unforeseen outside the continental U.S. (OCONUS) events, which I will ensure that the Department embraces as the United States continues to act as a stabilizing force throughout the world.

DWELL TIME

29. Senator BEGICH. Mr. Panetta, when you visited me we talked about the high operational tempo of the brigades and units in Alaska. Currently, the 1/25 Stryker Brigade Combat Team is deployed to Afghanistan and the other brigade—the 4/25 Airborne Brigade Combat Team—will deploy at the end of the year. The brigades have not yet had a 1:2 dwell time. Dwell time is crucial to an all-volunteer healthy force. Please discuss your view on the importance of dwell time to the force.

Mr. PANETTA. I agree—dwell time is critically important to the sustainment of the all-volunteer force. The Department struggles with balancing critical operational requirements and the burden we are asking some of our servicemembers to bear.

Six years ago, DOD established business rules designed to protect dwell time. The Service Chiefs, combatant commanders, OSD, the Chairman, and ultimately the Secretary of Defense review any deployment order that exceeds dwell time goals; extends a unit in theater more than 14 days beyond what they were originally told; or is longer than 365 days. These individual reviews look for other ways we can meet the requirement without breaking a given unit's dwell. Frequently, options include similarly capable units, volunteers, and task organizing units to shield components that were deployed more recently than their parent unit.

We currently have a deploy-to-dwell time of 1:1 and that will increase to 1:2 by October 2011 for all Active Duty members. The goal for reservists is 1:5.

30. Senator BEGICH. Mr. Panetta, in your view, will the Army and Marine Corps planned manpower decreases facilitate the attainment of DOD's dwell time objectives? If so, how? If not, do the cuts make sense?

Mr. PANETTA. The dwell times for our deploying forces are primarily driven by our commitment in Afghanistan and other operations around the world. I will take into consideration the conditions on the ground and our ability to meet our strategic objectives before deciding the appropriate course of action for force reductions. I will continue to monitor dwell times and future manpower reductions as we move forward.

In the meantime, the Department will continue to use existing processes to carefully vet all deployment orders that unduly burden our servicemembers. This series of individual reviews, from the Service Chiefs up to me, carefully considers all viable options for mitigating deployment stress. Where there are no viable alternatives I ultimately consider the criticality of the requirement, relative to the harmful effects of the deployment. Unfortunately, we have not been able to eliminate dwell shortfalls completely and this concerns me. The Department must continue to look for solutions in order to maintain this superb force.

31. Senator BEGICH. Mr. Panetta, what should be the goal for dwell time?

Mr. PANETTA. The Department goal for dwell time for our Active component is a ratio of 1:2. The goal for our Reserve component is a ratio of 1:5.

DEPARTMENT OF DEFENSE AND DEPARTMENT OF VETERANS AFFAIRS COLLABORATION

32. Senator BEGICH. Mr. Panetta, Secretary of Defense Gates and Secretary of Veterans Affairs Shinseki have pledged to improve and increase collaboration between their respective departments to support military servicemembers as they transition to veteran status, in areas of health and mental health care, disability evaluation, and compensation. If confirmed, what role would you expect to play in ensuring that DOD and the Department of Veterans Affairs collaborate?

Mr. PANETTA. I understand significant improvements have been made in DOD-VA collaboration in the last few years, but much work remains to be done. I will ensure that DOD continues to work closely with VA to support servicemembers and their families, and I look forward to working with Secretary Shinseki.

SUICIDE PREVENTION

33. Senator BEGICH. Mr. Panetta, the number of suicides in each of the Services has increased in recent years. The Army released a report in July 2010 that analyzed the causes of its growing suicide rate and examined disturbing trends in drug use, disciplinary offenses, and high risk behaviors. In addition, studies conducted by the Army of soldiers and marines in theater are showing declines in individual morale and increases in mental health strain, especially among those who have experienced multiple deployments. The 4/25 in Alaska has experienced one confirmed suicide and two suspected suicides within the last month. This brigade has experienced a high operational tempo and will deploy again late this year. These incidents are tragic, unfortunate, and impact the entire unit. In your view, what role should DOD play in shaping policies to help prevent suicides both in garrison and in theater and to increase the resiliency of all servicemembers and their families, including members of the Reserve components?

Mr. PANETTA. The Department should play an active role in shaping policies to help prevent suicide no matter where it may occur and whether they are Active, Reserve, or Guard. Suicide prevention is a very important issue within the Department. Each Service acknowledges the important role that leaders, both officer and Non-Commissioned Officers (NCO), play in building resilience among those under their command. At the OSD level, we have established a working group to better integrate the efforts and programs across Services. To this end, we are specifically looking at training leadership, effective peer-to-peer programs, and outreach to Guard and Reserve members. As Secretary, I will ensure the Department is fully engaged on this issue.

ENERGY SECURITY

34. Senator BEGICH. Mr. Panetta, the 2010 QDR identified energy security as one of four key priorities for reform because doing so will reduce risks to military personnel, safeguard strategic interests, and ensure troop readiness. Recognizing this, General Petraeus recently issued guidance to the troops in Afghanistan asking them

to reduce energy consumption. I know DOD and the Services understand how vulnerable our reliance on oil, especially oil from foreign countries, has made us as a Nation and are taking many steps to alleviate dependency. However, the bottom line today is the military needs access to fossil fuels for energy needs. I prefer those sources to be domestic instead of overseas to ensure access and strengthen our national security. Please describe your view of how reliance on foreign oil for fuel impacts the military and national security.

Mr. PANETTA. America's dependence on foreign oil and fossil fuels puts our national security at risk. For DOD, our reliance on oil shapes our missions—both strategically and tactically. This is especially true because we seek to purchase fuel as close to the fight as possible—for both financial and operational reasons. Because assured access to energy is a core part of fighting and winning the Nation's wars, we can and must do better as a Department in improving the efficiency of our use and the range of energy alternatives available to our forces.

Success in this area will not come easily for DOD. But global energy trends make success imperative. They include the rising global demand for energy, changing geopolitics, and new threats, which mean that the cost and availability of conventional energy sources will be less certain in the future. By changing the way we power the force now and in the future, America will have a military that is better able to project and sustain power around the world for the full spectrum of military missions.

35. Senator BEGICH. Mr. Panetta, what is your understanding of steps that have been taken to alleviate consumption of oil for current operations and what impact have those efforts had?

Mr. PANETTA. DOD components are taking steps to include energy as a consideration in how they organize, train, and equip the Nation's warfighters. In June 2011, the Department released its initial "Operational Energy Strategy." The Strategy is the DOD roadmap for transforming energy use in military operations and improving energy security for the warfighter. Additionally, the Services have each produced mission-specific energy strategies. Components are implementing these strategies to improve their energy use.

The Department is taking steps to better track energy use, and is testing and fielding systems to reduce the energy demand of our forces and use alternate sources. Our technical initiatives include smart micro-grids; energy-efficient shelters; solar energy; fuel cells; waste-to-energy systems; hybrid engines; lightweight and low drag materials; improved power generation and distribution; and energy storage solutions. In addition, the Department is making non-materiel changes, such as better aircraft routing and loading.

Many of these efforts are being fielded now and are making immediate operational gains.

36. Senator BEGICH. Mr. Panetta, in your view, what remains to be done?

Mr. PANETTA. DOD is the Nation's single largest user of energy. In 2010, the Department consumed over 5 billion gallons of petroleum fuels for military operations.

For the long term, if we are to significantly reduce our volume of fuel use, we must systematically consider the risks and costs associated with our energy use as we build the future force. As our experiences in Iraq and Afghanistan demonstrate, we cannot assume secure logistics. The Department must integrate energy security considerations into the full range of planning and force development activities, including the requirements and acquisition processes.

Congress has given the Department the statutory tools it needs to implement this change, and we are beginning to do so. If the Department requires additional authority, I will not hesitate to seek the necessary Congressional authorization.

37. Senator BEGICH. Mr. Panetta, if confirmed, what steps will you take to alleviate dependency on foreign sources of energy, and ultimately decrease reliance on oil for fuel?

Mr. PANETTA. While the Department is a significant consumer of energy, it only accounts for about 1 percent of the energy all Americans use. The cost of America's national energy consumption, particularly oil, is too high, both in the billions of dollars the Nation sends overseas, the geostrategic consequences, and costs to the warfighter. The solutions to the Nation's energy challenges require action at every level of Government as well as from the private industry and every American. The Department has an opportunity to reduce these costs by achieving energy efficiencies while leading the way for the Nation by focusing on warfighter requirements.

PRIORITIES AND CHALLENGES

38. Senator BEGICH. Mr. Panetta, if confirmed, what priorities will you establish?
Mr. PANETTA. My top priority as Secretary of Defense is to ensure the security of the American people.

We face a number of challenges: first, prevailing in the current conflicts in Iraq and Afghanistan and in the fight against al Qaeda; second, keeping weapons of mass destruction out of the hands of terrorists and rogue nations; third, preparing to counter future military threats; fourth, preserving the finest fighting force in the world and taking care of servicemembers and their families; and fifth, continuing the reforms DOD's leadership has initiated which will be crucial in this time of budget constraints.

39. Senator BEGICH. Mr. Panetta, if confirmed, what do you believe will be your greatest challenge? Do you have a plan for addressing that challenge?

Mr. PANETTA. We must ensure that we prevail in the conflicts in which we are now engaged. In Afghanistan, we must continue to degrade the Taliban, train the Security Forces, and help the government take ownership for the country's progress and security. And in Iraq, we must assure that the Iraqi military and security forces are prepared to safeguard their nation.

As we do that, I am very aware that we must be highly disciplined in how we spend the taxpayer's precious resources. The days of unlimited defense budgets are over. Our challenge will be to design budgets that eliminate wasteful and duplicative spending while protecting those core elements we need for our Nation's defense. I do not believe that we have to choose between strong fiscal discipline and strong national defense. We owe it to our citizens to provide both.

I will also be a tireless advocate for our troops and their families. It is their sacrifice and dedication that have earned the respect of a grateful nation, and inspired a new generation to wear the uniform of our country. They put their lives on the line to fight for America, and I will just as surely fight for them and for the families who support and sustain them.

QUESTION SUBMITTED BY SENATOR KIRSTEN E. GILLIBRAND

VIOLENCE AGAINST WOMEN

40. Senator GILLIBRAND. Mr. Panetta, in conflicts around the world, rape of women and girls has become one of the most horrific weapons of choice used systematically to attack civilians, devastate families, and destabilize societies. Violence against women and girls is frequently an early indicator of repressive regimes and instability and it is often an obstacle to security, stabilization, and the development of a sustainable peace. Despite the recognition of rape as a war crime, a crime against humanity, and a form of genocide, over the years the brutality and frequency of this crime has only increased.

Could you describe the steps taken by DOD to:

- incorporate training on prevention and response into the basic training curricula of foreign military forces and judicial officials;
- ensure that U.S. assistance to units involved in regional or multilateral peacekeeping operations includes such training; and
- incorporate training on preventing and responding to violence against women and girls when U.S. military personnel, military contractors, and military observers are to be deployed in humanitarian relief, conflict, and post-conflict settings.

Mr. PANETTA. DOD recognizes that sexual and gender-based violence (SGBV), particularly when used as a tactic of war, is not only a human rights issue, but also an obstacle to conflict resolution and lasting security. DOD has taken important steps to build the capacity of partner militaries, as well as DOD personnel, to prevent and respond to SGBV. The Defense Institute of International Legal Studies (DIILS) provides training on prevention and response to SGBV to foreign military units receiving security assistance from the United States. DIILS addresses SGBV as part of seminars such as "Human Rights and the Law of Armed Conflict" and "Developing a Professional Military Force." In addition, geographic Combatant Commands provide targeted training to address specific country contexts. For example, DIILS and U.S. Africa Command train military judicial personnel in the Democratic Republic of the Congo to investigate and prosecute SGBV crimes.

As part of its efforts to build the capacity of partner countries to participate in international peacekeeping operations, the Global Peace Operations Initiative

(GPOI) provides training to peacekeepers to protect civilians from SGBV. Geographic Combatant Commands implement half of GPOI activities, which are funded by DOS.

U.S. personnel also receive pre-deployment training on preventing and responding to SGBV. Training on combating trafficking in persons (TIP) and on sexual assault prevention and response are required, including risk-reduction factors in specific deployment locations. Combatant Commands and the Military Departments also provide mission-specific pre-deployment training that addresses SGBV. For example, all personnel who deploy to U.S. Southern Command's area of responsibility are required to take the "Human Rights Awareness Education" training prior to deployment. U.S. Southern Command's training module includes TIP specific scenarios, information on identifying victims, and appropriate responses.

DOD is developing an action plan on women, peace, and security to build on current efforts, including integration of prevention and response to SGBV into training of partner militaries, peacekeepers, and DOD personnel. This will be integrated into the National Action Plan that the National Security Staff is developing with DOS, USAID, and DOD.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

ENERGY REQUIREMENTS

41. Senator MCCAIN. Mr. Panetta, section 526 of the Energy Independence and Security Act (EISA) of 2007 (P.L. 110–140) stated:

"Procurement and Acquisition of Alternative Fuels. No Federal agency shall enter into a contract for procurement of an alternative or synthetic fuel, including a fuel produced from nonconventional petroleum sources, for any mobility-related use, other than for research or testing, unless the contract specifies that the lifecycle greenhouse gas emissions associated with the production and combustion of the fuel supplied under the contract must, on an ongoing basis, be less than or equal to such emissions from the equivalent conventional fuel produced from conventional petroleum sources."

This provision effectively prevents DOD from procuring petroleum from Canadian tar sands sources, a vital energy supplier for the DOD mobility-related uses at our military bases along the northern tier of the United States. DOD has apparently ignored this provision as it has proven unworkable and completely unresponsive to the budgetary constraints and wartime needs of DOD. I might add that President Obama at Georgetown on March 30, 2011, stated: "I set this goal knowing that we're still going to have to import some oil. It will remain an important part of our energy portfolio for quite some time, until we've gotten alternative energy strategies fully in force. And when it comes to the oil we import from other nations, obviously we've got to look at neighbors, like Canada and Mexico that are stable and steady and reliable sources." If confirmed, would you support DOD's current actions to receive and use oil from Canada, a strategic ally and trading partner?

Mr. PANETTA. My understanding of this issue is that this particular provision has not prevented the Department from meeting our energy needs. I am also told that this is an area of active litigation for the Department, so it would be inappropriate for me to comment further on this issue.

42. Senator MCCAIN. Mr. Panetta, in your view, what would be the burden placed on DOD from a fiscal perspective and on DOD contracting personnel if required to enforce a strict compliance to section 526 of EISA?

Mr. PANETTA. My understanding is that the Department is already in strict compliance with the provision.

43. Senator MCCAIN. Mr. Panetta, would you support legislative action that would repeal section 526 of EISA?

Mr. PANETTA. This is an issue I look forward to learning more about. I can say that energy security and, increasingly, climate change are key issues for the 21st century defense missions. As the 2010 QDR stated, "although they produce distinct types of challenges, climate change, energy security, and economic stability are inextricably linked." Climate change and associated extreme weather events act as an accelerant of instability around the world, which places demands on civil and military institutions. As we make decisions about how we assure that U.S. forces have a reliable supply of energy, now and in the future, the Department must balance both energy security and climate security considerations.

DEFENSE BUDGETS

44. Senator MCCAIN. Mr. Panetta, in your answers provided to the committee prior to this hearing, you responded to a question about the impact of defense spending reductions on our national security by stating "I will work to make disciplined decisions in ways that minimize impacts on our national security. But it must be understood that a smaller budget means difficult choices will have to be made. DOD is in the process of working through fiscal year 2011 with about \$20 billion less than what was requested by the President." If confirmed, what priorities will guide the comprehensive review and these difficult decisions?

Mr. PANETTA. I will ensure that we protect our essential military capabilities while continuing to pursue additional efficiencies, streamline operations, control acquisition cost growth, and identify lower priority efforts that can be eliminated or curtailed. That said, difficult choices will have to be made to live within a reduced Defense topline.

45. Senator MCCAIN. Mr. Panetta, how would you propose reining in spending in the short-term?

Mr. PANETTA. Each defense program must be assessed in terms of its contribution to the national security strategy. I will continue the effort begun by Secretary Gates to seek efficiencies, eliminate overhead, control costs, and identify lower priority efforts.

46. Senator MCCAIN. Mr. Panetta, is it time to stop the spending sprees that mark the end of each fiscal year for DOD program managers trying to spend every dime they have before funds expire?

Mr. PANETTA. I will vigorously investigate any indication of wasteful year-end spending.

47. Senator MCCAIN. Mr. Panetta, what would you do to eliminate wasteful spending?

Mr. PANETTA. I will build on the efficiencies identified by Secretary Gates and work with the Department's leadership to manage defense spending prudently. Reducing spending on any lower priority programs, or programs that are no longer needed, will be a key component of that management effort.

48. Senator MCCAIN. Mr. Panetta, Admiral Mullen stated recently that in the search for \$400 billion in savings that "two of the big places the money is, is in pay and benefits." He warned against the "relatively easy" choice of cutting hardware while maintaining the increasing costs of pay and health care for military personnel, retirees, and their dependents and asserted that "all things are on the table." In your advance policy questions, you talked about the need for a "comprehensive review of the military pay and benefits structure to determine where costs can be contained." Do you agree with Admiral Mullen that personnel costs have to be included in the search for a solution to the response to a smaller DOD budget?

Mr. PANETTA. Yes, everything must be on the table. Any such effort should take into consideration that the Nation must continue to attract and support our men and women in uniform and their families in a wide variety of situations.

BASE REALIGNMENTS AND CLOSURES

49. Senator MCCAIN. Mr. Panetta, as you may know, DOD is required by law to complete base realignments and closures (BRAC) resulting from the 2005 BRAC round by September 15, 2011. Are you committed to DOD's compliance with the BRAC deadline established by law to the maximum extent practicable?

Mr. PANETTA. Yes. Of the 222 recommendations forwarded by the Commission to the President, the Department has a handful of recommendations facing scheduling challenges. The Department is working diligently to ensure we satisfy our BRAC legal obligations.

In order to ensure no disruption to the full and complete implementation of each of the recommendations facing scheduling challenges, as well as continuity of operations, the Department has requested legislation that would provide the Secretary of Defense or Deputy Secretary of Defense with limited authority to extend the BRAC implementation period for up to 10 recommendations, for up to a year, when such an extension is necessary to ensure the operational readiness of units or functions being relocated as part of the recommendation. This legislation would not modify the substance of any BRAC recommendation nor would it eliminate the legal obligation to fully implement each recommendation; it merely would provide the Sec-

retary or Deputy Secretary with limited authority to extend the implementation period.

50. Senator MCCAIN. Mr. Panetta, in your opinion, given the need to find another \$400 billion over the next 12 years, should DOD conduct another round of BRAC to reduce excess infrastructure?

Mr. PANETTA. It is my understanding the Department has not asked for authorization for another Base Closure and Realignment (BRAC) and is very single mindedly focused on the current one and meeting current deadlines. Whether another round of BRAC is needed is something I will assess.

DEFENSE FUNDS EARMARKED FOR NON-DEFENSE REQUIREMENTS

51. Senator MCCAIN. Mr. Panetta, in these times of fiscal austerity where DOD is making hard decisions about savings and efficiencies, DOD should not be spending DOD funds on non-DOD requirements like local roads, financial support for parks and recreation areas, and many other worthy causes that have no connection to military readiness. If confirmed, what would you do to ensure that funds provided to DOD are spent only on essential defense and national security requirements?

Mr. PANETTA. If confirmed, I will ensure that the President's Budget requests will reflect the level of funding that is required to meet essential defense and national security requirements each year. Once funds are appropriated, I will ensure that the Department will execute funds in accordance with the legislative direction provided in the annual appropriations acts.

DEFENSE INDUSTRIAL BASE

52. Senator MCCAIN. Mr. Panetta, the current DOD policy of relying on market forces to sustain the health of the industrial base may not account for instances where DOD is the sole customer for military unique weapons. Do you intend to continue the current initiative to develop an industrial base strategy?

Mr. PANETTA. The Department recognizes the defense industrial base is more global, commercial, and financially complex than ever before.

The Department regularly addresses specific industrial-base concerns within programs and services and has also embarked on a more comprehensive sector-by-sector, tier-by-tier analysis of the industrial base. This approach will help inform future programmatic decisions, expand the scope of the Department's industrial base assessments, and create a database on industry for use as an input to many decision-making processes across the Department.

53. Senator MCCAIN. Mr. Panetta, such a strategy will work best if there is open communication between defense officials and industry leaders so that industry can shape itself to meet the needs of DOD. Secretary Gates began a Secretary/Chief Executive Officer (CEO) dialogue to facilitate that communication. Do you intend to continue that dialogue?

Mr. PANETTA. I am committed to maintaining an open dialogue with industry and increasing the transparency within which we operate to the maximum extent permitted by law.

54. Senator MCCAIN. Mr. Panetta, the current export control regime is seen by some as reducing U.S. industries global competitiveness. What actions do you believe are necessary to be taken to improve the export control regime?

Mr. PANETTA. There are compelling national security arguments for fundamentally changing the regulations and procedures we have had in place since the Cold War for determining what weapons and dual-use equipment and technology may be exported and under what terms. Over the years, we have made incremental changes—but this has not been adequate. We need to establish new rules, organizations, and processes that deal effectively and efficiently with 21st century challenges. This is the basis for the “four singles” of the administration's export control reform effort: a single export control list, a single licensing agency, a single enforcement coordination agency, and a single information technology system for export licensing. The export control reform initiative is focused on protecting sensitive items and technologies that are the U.S. “crown jewels”. By doing so, we would be better able to monitor and enforce controls on technology transfers with real security implications, while helping to speed the provision of equipment to allies and partners who fight alongside us in coalition operations. This revised export control system,

based on revised controls and new licensing policies and procedures, would allow U.S. companies to compete more effectively in the world marketplace.

MILITARY SCHOOLS AND EDUCATION

55. Senator MCCAIN. Mr. Panetta, DOD is currently embarked on a \$4.0 billion investment plan over the next 5 years to address the deteriorated facilities conditions of K–12 schools maintained and operated by DOD Education Activity (DODEA). The urgent requirement was revealed in a study requested by this committee which assessed the condition of DODEA schools worldwide and the impact of underinvestment of funding for replacements and renovations. As a result, Secretary Gates established a priority to ensure that the children of our military personnel are provided the best education opportunities in world-class facilities with the most current technology available. If confirmed, will you continue this firm and comprehensive commitment of funds over the next 5 years to upgrade DODEA schools?

Mr. PANETTA. Yes, I will continue to commit to funds for upgrading DODEA schools. As Secretary Gates recognized, I too believe we have an obligation to provide a quality education to dependents of our servicemembers, and part of this is ensuring the facilities are in good condition.

56. Senator MCCAIN. Mr. Panetta, what goals would you expect DODEA to maintain in carrying out the upgrade and modernization of K–12 schools owned by DODEA?

Mr. PANETTA. The Department's goal is to provide schools that will best showcase a 21st century education. We can do this by enhancing the curriculum to better support Science, Technology, Engineering, and Math (STEM) programs, and use technology to create a teaching environment that would increase student performance. Our future schools will focus on how to best improve student learning and incorporate features that can transition schools to a facility that incorporates various teaching tools to accommodate differentiated learning to benefit all students.

57. Senator MCCAIN. Mr. Panetta, should our commitment to quality K–12 education facilities extend to the use of DOD funds to improve schools owned and operated by local school districts?

Mr. PANETTA. It is DOD policy to first rely on local education agencies to provide for the education of military children. In some locations, the Department has been able to make property on its installations available for local educational agencies to construct, operate, and maintain local schools. While the Department continues to believe that school maintenance and repair is a local responsibility, it cannot ignore the fact that its children are currently being educated in less than ideal facilities. Recognizing this, Congress recently appropriated \$250 million "to make grants, conclude cooperative agreements, or supplement other Federal funds to construct, renovate, repair, or expand elementary and secondary public schools on military installations in order to address capacity or facility condition deficiencies at such schools."

The Department is reviewing needs of local schools on bases to determine which have the most serious facility deficiencies.

58. Senator MCCAIN. Mr. Panetta, what guidelines for DOD investment would you establish to manage the funding provided to local districts?

Mr. PANETTA. As required by section 8109 of Public Law 112–10, the Department will give "priority consideration to those military installations with schools having the most serious capacity or facility condition deficiencies." We are implementing this requirement and will manage the Department's investment accordingly.

FINANCIAL MANAGEMENT

59. Senator MCCAIN. Mr. Panetta, the business processes and systems at DOD lack the controls and discipline necessary for DOD to produce auditable financial statements. This impacts the quality and timeliness of information you will be receiving for critical decisions around how to best utilize taxpayers' money. Secretary Gates recently conveyed his frustration on this issue in a speech before the American Enterprise Institute. What specific actions do you plan to take to ensure DOD achieves the September 2017 date for obtaining an audit opinion of DOD's financial statements?

Mr. PANETTA. I intend to ensure the DOD financial statements are audited as soon as possible. Financial statement audit opinions provide the public a measure

of confidence in the financial management of Federal agencies. They provide an independent assessment of the accuracy of financial information that management relies upon to make critical decisions.

I understand DOD has a plan to improve processes and systems in order to provide reliable and accurate financial information and financial statement audit opinions. I plan to ensure this effort receives the right amount of leadership attention and resources across all functional areas.

60. Senator McCAIN. Mr. Panetta, Secretary Gates set in motion a focus on eliminating inefficiencies in DOD. The reductions he levied across the Services may not achieve their intended results in view of the fact that DOD did not assess how they could do business more efficiently and with less cost, but instead levied budget cuts in areas with the least resistance or complexity. It is imperative in the current and foreseeable future of downward budgets that DOD makes reductions in their spending in areas where solid business cases justify the reductions. We cannot afford to have decisions made without understanding the impacts of reductions on the overall mission of DOD. What actions will you take to ensure that any decline in DOD's budget is achieved in a responsible manner that supports DOD's mission?

Mr. PANETTA. I will be guided by the objective of ensuring the Department continues to meet its responsibility to support the national security strategy. A strategy-driven approach is essential and the ongoing comprehensive review seeks to do that. I will continue the initiative to find additional efficiencies and eliminate lower priority programs. However, it must be understood that difficult choices will have to be made.

61. Senator McCAIN. Mr. Panetta, what are the opportunities you envision to consolidate administrative and leadership functions of the various agencies or DOD enterprises? One example could be the consolidation of the Defense Contract Management Agency and Defense Contract Audit Agency under one leadership function with two operating arms.

Mr. PANETTA. I intend to continue Secretary Gates' effort to make the Department more efficient. As part of this effort, I will explore ways to consolidate functions in a manner that will still support defense requirements.

MILITARY UNIFORM AND APPEARANCE POLICIES

62. Senator McCAIN. Mr. Panetta, military leaders have expressed concern about the provisions of the Religious Freedom Restoration Act (RFRA) and whether it should apply to the uniform and personnel appearance standards of military members. The requirements of military discipline, unit cohesion, use of emergency protective equipment, and so on, have produced insistence on uniform standards over many years. Out of concern about the ability of DOD to prevail in litigation challenging the applicability of the RFRA to the Armed Forces, the administration forwarded a legislative proposal that would amend title 10 to specify that the language of the RFRA does not apply to the military. What are your views about the importance of this issue and the need for legislation to address this problem?

Mr. PANETTA. I understand the important and delicate balance that must be struck between accommodating religious practices that require adherents to wear particular articles of faith and maintaining the military's uniform grooming and appearance standards. I will work with the leaders of the Military Services to achieve that balance.

HEALTH CARE COSTS

63. Senator McCAIN. Mr. Panetta, in response to the advance policy questions you stated: "In the long term, the promotion of healthy life styles and prevention among our beneficiaries is one way to help reduce the demand for health services." Do you agree that tobacco use adversely affects military performance and the health of DOD's beneficiary population?

Mr. PANETTA. Yes, I agree. The negative health effects that are commonly known about tobacco use, such as lung cancer and heart disease, certainly adversely affect those military and civilian beneficiaries who use these products. As such, I understand the Department offers programs to assist servicemembers and their families in quitting this habit.

64. Senator MCCAIN. Mr. Panetta, what is the rationale for DOD selling tobacco products to servicemembers, retirees, and their families at a discounted rate in military exchanges and commissaries?

Mr. PANETTA. While DOD policies recognize that tobacco use is detrimental to health and readiness, the rationale for the discount is similar to other discounts we provide the servicemembers: to provide savings on products they use.

The National Defense Authorization Act for Fiscal Year 2009 directed the Department to develop a smoking cessation benefit to encourage users to quit or reduce their tobacco use. Moving forward, we will build strategic partnerships with all the Military Services to support the smoking cessation benefit. DOD continues to actively encourage servicemembers to quit tobacco and many military treatment facilities offer treatment and classes to assist with quitting.

65. Senator MCCAIN. Mr. Panetta, is it time to reassess this policy in order to achieve your goal of healthy life styles and prevention for DOD beneficiaries, and if confirmed, would you pledge to do so?

Mr. PANETTA. I will ensure that the Department undertakes a thorough policy review to identify the best strategies to reduce the impact of tobacco products on our servicemembers and their families. The Department must support healthy lifestyles as a means of sustaining the health of our servicemembers and their families.

QUESTIONS SUBMITTED BY SENATOR JAMES M. INHOFE

STATE PARTNERSHIP PROGRAM

66. Senator INHOFE. Mr. Panetta, the National Guard provides unique capacity-building capabilities through its State Partnership Program (SPP). SPP specifically supports both combatant commanders' and U.S. ambassadors' strategic objectives by establishing sustainable relationships with critical partner nations around the world. SPP started back in the early 1990s as part of European Command's engagement plan with former Warsaw Pact nations; SPP has grown and is now engaged with 62 nations around the world. The National Guard Bureau (NGB) has been developing an updated overall strategic plan for SPP that looks at the world today and where we should be engaging with SPP. One of those areas is the continent of Africa which currently has only eight active partnership programs. Although the SPP has great potential, cumbersome statutory limits and unsteady funding streams have hamstrung positive efforts. I have been working with the Office of the Secretary of Defense (OSD), NGB, DOS, and others to deconflict the statutes currently severely limiting how and where guardsmen can operate when operating in the SPP. What are your views of our SPP?

Mr. PANETTA. The SPP is an excellent security cooperation tool that provides valuable training and experience to National Guard members through interactions with foreign counterparts. The SPP contributes significantly to achieving U.S. national security goals by building partner capacity globally, and by providing unique, niche capabilities in direct support to the Geographic Combatant Commanders and U.S. Chiefs of Mission in fulfilling their theater and country engagement objectives. In addition to building a partner nation's capacity, the SPP forges personal relationships between the individual National Guard members and foreign government personnel, creating an enduring bond that, over time, fosters trust between the organizations involved.

67. Senator INHOFE. Mr. Panetta, if confirmed, will you continue to work on improving and expanding this program, to include statute and funding changes?

Mr. PANETTA. Yes, I will. Over the past 2 years, OSD has been working on a Directive-Type Memorandum (DTM) that describes the use of DOD appropriated funds for State Department Partnership Program activities. They are in the final stage of completing the DTM which will be the basis for a new DOD Instruction on the State Department Partnership Program. During the creation of the DTM, we discovered that there are a few limitations that need to be addressed in legislation to allow us to conduct State Department Partnership Program engagements more effectively in the area of defense related activities. We will work to propose legislation that will allow us to expand our ability to conduct these State Department Partnership Program activities to build and strengthen our partner capabilities and relationships.

SECURITY ASSISTANCE AND ENGAGEMENT PROGRAMS

68. Senator INHOFE. Mr. Panetta, I have been one of the strongest supporters of our security assistance and engagement programs, whether it is foreign military financing and sales (FMF and FMS), international military education (IMET), or our train-and-equip programs. These programs have been extremely effective programs, executed predominantly by DOD in close coordination with DOS. Our military-to-military (1206), civilian-to-civilian (1207), small-scale Special Forces (1208), Commander's Emergency Response Program (CERP), and Combatant Commander's Initiative Fund (CCIF) have proven to be vital resources in aiding developing countries in the professionalization of their militaries, fighting terrorism, and providing resources for emergency situations. A key to these programs has been that the engagements are worked by both DOS and DOD, chiefs of mission, and combatant commanders working together to increase the capabilities of our partner nations to provide for their own security, increasing stability in their region and around the globe. Are you familiar with these programs? If yes, what is your opinion of them?

Mr. PANETTA. Yes, I am familiar with these programs. Building our foreign partners' capacity to conduct counterterrorism operations and creating an environment inhospitable to terrorists and insurgents are among the major elements of Geographic Combatant Commanders' strategies to counter terrorism and instability around the world. Enabling our foreign partners to provide for their own security and contribute to multilateral security efforts is an investment that pays immediate and long-term dividends by reducing the need for costlier U.S. interventions in response to turmoil in regions critical to U.S. interests. As you note, collaboration between the Departments of State and Defense in formulating and implementing these programs is a key factor in their success, and promotes effective use of taxpayers' dollars by combining the expertise and abilities of personnel from across the Executive Branch. The security challenges facing partner countries are linked to multiple parts of the security sector, including the military, police, and judiciary. I look forward to working with Congress and my counterparts in the administration to fulfill this shared responsibility to build partner nation security capability and capacity.

69. Senator INHOFE. Mr. Panetta, if confirmed, would you continue to support investment by DOD in these programs?

Mr. PANETTA. Yes, I believe that continuing to engage with foreign partners through counterterrorism and capacity-building efforts, and maintaining strong international security relationships, will continue to be an imperative for DOD. Enabling other countries to provide for their own security will be an enduring test of U.S. global leadership, and these efforts will be critical to protecting our national security interests. In a world where the most likely threats will emanate from failed and fractured states, building the security capacity of partners is a vital warfighting instrument. It reduces the need for direct U.S. military intervention, with all of its attendant political, financial, and human costs. It also provides better security as capable partners are often more effective addressing threats in their neighborhoods than outside actors. Improving the way the U.S. Government implements these programs requires continued investment across our national security infrastructure, not just DOD. I look forward to continuing DOD's partnership with Congress in developing innovative solutions that enable the United States to respond with agility to emerging threats and opportunities.

70. Senator INHOFE. Mr. Panetta, DOD and DOS are working on a proposal to pool funding for security assistance into three long-term funds totaling as much as \$2 billion. This proposal would provide long-term funding vice the year-to-year funding that has had a negative impact on our current engagement programs. However, there are issues with how the funding is pooled by the two departments, who has oversight in Congress, and how will the funds get executed in a timely and consistent manner. If confirmed, can you provide an update on the status of this proposal and how you will resolve funding, oversight, and execution issues?

Mr. PANETTA. I would be happy to update the committee regarding this proposal and the administration's efforts to resolve the issues you mention.

The proposal to create a Global Security Contingency Fund (GSCF) was included in the President's fiscal year 2012 budget request. The proposal represents more than a year's work within the administration to develop a new business model for addressing security sector assistance requirements within the budget cycle. It also reflects an appreciation for the degree to which defense, diplomacy, and development must be better integrated so that U.S. assistance programs are more effective and targeted in an era of transnational challenges and rapidly changing dynamics.

I look forward to working with Congress to address any outstanding concerns regarding the GSCF.

AFGHANISTAN

71. Senator INHOFE. Mr. Panetta, various press reports state that administration officials are considering withdrawing from Afghanistan more rapidly than currently planned. Secretary Gates said this weekend in Afghanistan that pulling out of Afghanistan too fast would threaten the gains made in the 18 months since the surge of 30,000 troops. Secretary Gates told marines in Afghanistan on Sunday, "If you guys and everybody keeps the pressure on, we can hang onto everything we've gained over the last year to 18 months, we can expand the security bubble beyond that ... We have succeeded in stopping the Taliban's momentum ... but we've just kind of turned that corner and I think we need to keep the pressure on." In Kabul, he appealed for patience and said that only modest U.S. troop reductions would make sense this summer in a still unstable Afghanistan. U.S. and coalition commanders I met on the ground in Afghanistan have repeatedly told me that it's too early to make major changes on the ground, and some believe it will take until the end of this fighting season to get a true assessment of the conditions on the ground in Afghanistan. I trust our military leadership to make the right decision based on their assessment of the conditions on the ground. Some argue that, with Osama bin Laden dead, our mission in Afghanistan is complete. The killing of Osama bin Laden was a great victory, but our mission in Afghanistan is to ensure that it can never again become a staging area for terrorist attacks against the American Homeland.

What conditions must be met in July 2011 to determine the extent of a U.S. troop drawdown?

Mr. PANETTA. The conditions for determining the extent of the drawdown include progress on several interrelated aspects of our counterinsurgency strategy, such as reversing the Taliban's momentum, denying the Taliban access to and control of key population centers and lines of communication, disrupting the Taliban outside secured areas and denying al Qaeda safe haven, and developing the ANSFs and their capability to manage a degraded insurgency. We have made progress in each of these areas sufficient to enable the President to make his decision about the drawdown and its extent.

72. Senator INHOFE. Mr. Panetta, which conditions have been met?

Mr. PANETTA. There has been progress across the range of factors and in some cases substantial progress. For example, the momentum has shifted to the Coalition & ANSF and together we have degraded the Taliban's capability and achieved significant security gains, especially in the Taliban's heartland in the south. These security gains are enabling key political initiatives to make progress. We have begun a transition process that will ultimately put Afghans in the lead for security nationwide by 2014. The growth in the quantity and quality of the ANSF—which have fielded more than 100,000 additional forces over the past 18 months—is one of the critical conditions that is enabling the drawdown of U.S. surge forces. We are beginning to see reintegration and reconciliation processes gain traction, and we are discussing a strategic partnership with the Afghans to signal our enduring commitment to regional peace and stability.

73. Senator INHOFE. Mr. Panetta, what conditions would cause you to ask President Obama to delay the withdrawal of troops?

Mr. PANETTA. At this time, the progress that has been achieved has established conditions necessary for the President to make his drawdown decision on schedule.

74. Senator INHOFE. Mr. Panetta, are there future planned decision points after July 2011 that will be used to determine further reductions in U.S. troop commitments?

Mr. PANETTA. Beyond the President's immediate drawdown decision, commanders will need to make recommendations for decisions regarding the overall pace and shape of the transition to Afghan security. Those decisions will depend upon continued progress and conditions on the ground.

75. Senator INHOFE. Mr. Panetta, what conditions must be met in 2014 to transition to Afghan control?

Mr. PANETTA. Transition will begin this July in seven districts and provinces and then spread throughout the country by the end of 2014. The exact conditions for en-

tering and completing the transition process in a given area will vary across the country, reflecting the differences across Afghanistan. The ability of the ANSFs to carry out lead security responsibilities effectively is a central consideration as are the abilities of Afghan institutions of government, especially at the provincial and district levels, to meet the basic needs of citizens for dispute resolution and economic development.

76. Senator INHOFE. Mr. Panetta, what are the minimum conditions that must be achieved in Afghanistan, in order for Afghans to be able to sustain stability with relatively limited international assistance?

Mr. PANETTA. One of the most critical preconditions for Afghans to maintain a stable, secure Afghanistan will be capable, professional ANSF. Although support for the ANSF will continue to require international assistance for many years, security forces continue to make significant progress, with increases in quantity, quality, and operational capacity. Over time, as U.S., Coalition, and Afghan forces continue to degrade the Taliban insurgency, the Afghan Government may be able to reduce the size, and therefore cost, of the ANSF to address a diminished threat.

Another essential condition to build sustainability will be increased Afghan fiscal self-sufficiency. External support will likely continue to be critical in the near and medium-term to help mitigate shortfalls in infrastructure, human capacity, and security concerns. However, over time, as economic growth continues and Afghanistan tax revenues increase, levels of required assistance should decline.

77. Senator INHOFE. Mr. Panetta, what impact would a failure in Afghanistan have on U.S. national security in the long term?

Mr. PANETTA. Failure in Afghanistan would mean a return of the conditions that resulted in Afghanistan becoming the safe haven from which al Qaeda plotted the September 11 attacks against the United States. It would mean a perilous increase in the security threats the United States faces from violent extremists, as well as in the threats these groups pose to other countries in the region. Moreover, failure in Afghanistan would undermine the credibility of U.S. security commitments elsewhere around the world and jeopardize the national interests they are meant to protect.

78. Senator INHOFE. Mr. Panetta, during my visit over New Years, Afghan and coalition personnel unanimously told me that setting the July 2011 timeline to begin withdrawal of U.S. forces from Afghanistan had a devastating effect on operations—it sent the wrong signal to the Afghan people, our coalition partners, and the Taliban. Do you believe the announcement of a July 2011 withdrawal date negatively impacted operations?

Mr. PANETTA. No. Establishing the July 2011 timeline to begin a conditions-based drawdown of U.S. surge forces struck an appropriate and responsible balance between giving our commanders the resources they need to carry out the strategy and communicating to the Afghans that they must step forward and take on the responsibility for their own security. The timeline additionally undercuts claims that we are occupiers and assures the American people that the mission is not open-ended. The date also provided ample time for our forces to turn back the Taliban's momentum while building up capable ANSFs that are increasingly taking on responsibility to hold and expand on the security gains achieved thus far.

MILITARY SPENDING

79. Senator INHOFE. Mr. Panetta, the Office of Management and Budget has asked DOD for \$400 billion in cuts through 2023 ... a 6½ percent annual decrease from current spending rates. These cuts would come solely out of base budget. On May 25, 2011, Secretary Gates said at the American Enterprise Institute, "The Reagan build-up of the 1980s fielded a new generation of weapons platforms that continue to be the mainstay of the force today ... In contrast, the 1990s represented basically a procurement holiday ... What remains are much-needed capabilities ... that our Nation's civilian and military leadership deem absolutely critical. For example: we must build a new tanker ... field a next generation strike [fighter] ... recapitalize the ground forces ... replace our ballistic missile submarines." How will you balance the pressure to cut defense spending with the military's readiness and acquisition priorities?

Mr. PANETTA. I will ensure that future spending decisions are based on the Department's priorities, national security strategy, and a clear understanding of associated risks. It is an important process where we must identify options for the Presi-

dent and Congress, to ensure that the Nation consciously acknowledges and accepts additional risk in exchange for reduced investment in its military.

80. Senator INHOFE. Mr. Panetta, what do you see as DOD's top readiness and acquisition priorities?

Mr. PANETTA. My top priority is ensuring that the warfighters have what they need to accomplish their missions and to provide for the national security of the United States.

DEFENSE INDUSTRIAL BASE

81. Senator INHOFE. Mr. Panetta, throughout the post-World War II era, the United States has maintained its military leadership in large part as a result of its industrial leadership—particularly in aerospace and other defense industries. That leadership is due in large part to the employees of that industry—the engineers, scientists, and machinists. Maintaining this leadership in the future will require that DOD identify and communicate what it needs to counter future military threats. If confirmed, what will you do to map out the industrial policy and needs of DOD?

Mr. PANETTA. As Secretary of Defense, I will ensure DOD policies, procedures, and actions: (1) stimulate and support vigorous competition and innovation in the industrial base supporting defense; and (2) establish and sustain cost-effective industrial and technological capabilities that assure military readiness and superiority.

I will do so by: (1) monitoring industry readiness, competitiveness, ability to innovate, and financial stability as the Department moves to capabilities-based acquisitions in an era of increasingly sophisticated systems; (2) leveraging DOD research and development, acquisition, and logistics decisions to promote innovation, competition, military readiness, and national security; (3) leveraging statutory processes (for example, the Defense Priorities and Allocations System; Hart-Scott-Rodino antitrust evaluations; Exon-Florio Committee on Foreign Investment in the United States evaluations) and promoting innovation, competition, military readiness, and national security; (4) leading efforts for the Department to engage with industry to ensure openness and transparency; and (5) continuing our long history of supporting science, technology, engineering, and mathematics education initiatives in a collaborative process at local, regional, and national levels.

NUCLEAR FORCE LEVELS

82. Senator INHOFE. Mr. Panetta, during the New START hearings, General Chilton was asked by Senator Feingold whether the New START treaty allowed the United States to “maintain a nuclear arsenal that is . . . more than is needed to guarantee an adequate deterrent.” General Chilton replied, “I think the arsenal that we have is exactly what is needed today to provide the deterrent. . . . [I]t is sized to be able to allow us to hedge against both technical failures in the current deployed arsenal and any . . . changes in the geopolitical environment that might cause us to need more weapons deployed.” Do you agree with General Chilton?

Mr. PANETTA. Over the last 50 years, U.S. nuclear strategy and force structure have continually evolved with the global-strategic environment. DOD will continue to assess the proper force size and capabilities required for an effective nuclear deterrent. The DOD is committed to sustaining and modernizing a safe, secure, and effective nuclear deterrent in an efficient and cost effective manner that maintains strategic deterrence and stability, strengthens regional deterrence, and assures our allies and partners.

NUCLEAR MODERNIZATION

83. Senator INHOFE. Mr. Panetta, in the 2010 Nuclear Posture Review (NPR) and during the discussion on the New START treaty, the administration made substantial commitments to the sustainment and modernization of the U.S. nuclear deterrent. Secretary Gates was a strong supporter of the nuclear triad and a robust modernization program: “In many ways, the primary threat to the effectiveness and credibility of the American deterrent is one that we control ourselves, and that is failing to invest adequately in our Nation’s nuclear weapon infrastructure, a point I have made a number of times in recent years.” Will you commit to the nuclear modernization plan (referred to as the 1251 plan) that was the basis for Senate support for the New START treaty?

Mr. PANETTA. I am committed to the sustainment of a safe, secure, and effective nuclear deterrent, and I support the administration's plan for modernization and sustainment as laid out in the Report to Congress pursuant to section 1251 of the National Defense Authorization Act for Fiscal Year 2010.

84. Senator INHOFE. Mr. Panetta, will you support decisions for a follow-on nuclear bomber, air-launched cruise missile, intercontinental ballistic missiles (ICBM), and submarine launched ballistic missiles (SLBM)?

Mr. PANETTA. I will continue the DOD commitment to sustaining and modernizing a safe, secure, and effective nuclear deterrent that supports strategic deterrence and stability, strengthens regional deterrence, and assures our allies and partners in an efficient and cost-effective manner.

85. Senator INHOFE. Mr. Panetta, will you support modernization of our nuclear weapons laboratories and characterize such funding as "national security activities" as opposed to regular Department of Energy funding?

Mr. PANETTA. I am committed to the sustainment of a safe, secure, and effective nuclear deterrent, and I support the administration's plan for modernization and sustainment as laid out in the Report to Congress pursuant to section 1251 of the National Defense Authorization Act for Fiscal Year 2010. As described in the 2010 NPR and in the Report pursuant to section 1251, modernization of the nuclear weapons infrastructure is a key element of the administration's nuclear policy. This is exemplified by the Chemistry and Metallurgy Research Replacement-Nuclear Facility (CMRR-NF) and the Uranium Processing Facility (UPF), which, when fully operational, will support production of critical components needed to ensure a safe, secure, and effective nuclear stockpile.

Funding for these activities is currently part of the Weapons Activities Account in the National Nuclear Security Administration budget; accordingly, it is already considered national security funding.

U.S. NUCLEAR DOCTRINE

86. Senator INHOFE. Mr. Panetta, the administration is reviewing nuclear deterrence requirements and nuclear targeting guidance with a goal of further nuclear reductions. This could precipitate a move away from longstanding nuclear doctrine characterized by a second-to-none approach, with flexible nuclear forces capable of providing the President a wide array of targeting options, to a minimum deterrence approach with too few forces that may lack credibility. The administration has called for a study of current nuclear deterrence requirements and nuclear targeting guidance. As the study progresses, will you make yourself and your staff available for regular briefings to describe the study?

Mr. PANETTA. Over the last 50 years, U.S. nuclear doctrine and targeting strategies have continually evolved with the global strategic environment. Every President since the beginning of the nuclear age has asked DOD to conduct such analyses and has used that information to inform updated planning guidance provided to DOD. We would be remiss if we did not re-examine our nuclear strategy in today's dynamic security environment. It is my intention to keep Congress fully informed of U.S. nuclear deterrence strategy.

87. Senator INHOFE. Mr. Panetta, will you ensure that a thorough assessment is conducted, including analysis of the implications for reductions on stability and preserving a second-to-none capability?

Mr. PANETTA. Any future nuclear reductions must strengthen deterrence of potential regional adversaries, maintain strategic deterrence and stability vis-a-vis Russia and China, and maintain the reliability and effectiveness of our security assurances to our allies and partners. In the NPR Report follow-on analysis, we will identify the force levels required to support those objectives and any potential risks associated with each.

88. Senator INHOFE. Mr. Panetta, will you commit to a careful consideration of the advice provided by our military leaders?

Mr. PANETTA. It is my intention to work with the military leadership to maintain a safe, secure, and effective nuclear deterrent.

89. Senator INHOFE. Mr. Panetta, do you agree it is important to determine deterrence requirements and the types of forces necessary to achieve those requirements before engaging with the Russians in another round of nuclear reductions?

Mr. PANETTA. As noted in the 2010 NPR Report, any future nuclear reductions must strengthen deterrence of potential regional adversaries, maintain strategic deterrence and stability vis-a-vis Russia and China, and maintain the credibility and effectiveness of our security assurances to our allies and partners. In the NPR Report follow-on analysis, DOD will identify the force levels needed to support those objectives and any potential risks associated with each. The analysis will help shape our negotiating position as further arms reduction agreements are considered.

90. Senator INHOFE. Mr. Panetta, will you pledge to provide detailed briefings to Congress on any future analysis in support of a future arms control negotiation?

Mr. PANETTA. It is my intention to keep Congress fully informed about developments in U.S. nuclear strategy and arms control policy.

91. Senator INHOFE. Mr. Panetta, in 1992, you voted as a Member of the House of Representatives to eliminate all U.S. non-strategic nuclear warheads. The policy of this administration is to maintain non-strategic weapons in Europe until such time that NATO consensus supports their removal. Will you confirm your support for the administration position?

Mr. PANETTA. As noted in the 2010 NPR Report, reassuring U.S. allies and partners is one of the key objectives of U.S. nuclear deterrence policy and force posture. Any change in our nuclear posture will be considered in the context of our continuing need to assure our allies and partners of our commitment to their security. Any decision to change the status of U.S. nuclear forces committed to the defense of NATO would be after thorough review and consultations with NATO. I fully support the administration's policy on this issue.

92. Senator INHOFE. Mr. Panetta, will you work to ensure that a nuclear-capable F-35 is developed to allow the continuation of that commitment?

Mr. PANETTA. Yes, I am committed to the development of a dual-capable F-35 fighter. DOD will carry out the direction stated in the 2010 NPR Report, that "the Air Force will retain a dual-capable fighter (the capability to deliver both conventional and nuclear weapons) as it replaces F-16s with the F-35 Joint Strike Fighter."

As set out in the Report to Congress pursuant to section 1251 of the National Defense Authorization Act for Fiscal Year 2010, the Air Force will continue to conduct the dual-capable aircraft mission with existing fighter aircraft until the F-35 is fielded.

SHIFT IN MISSILE DEFENSE

93. Senator INHOFE. Mr. Panetta, while directing that we sustain and enhance our ability to defend the Homeland against limited numbers of long-range ballistic missiles, the administration has made defending against regional threats "a top priority of our missile defense plans," according to Secretary Gates. As a result, funding for the GMD system has steadily declined, while the two test failures of the GMD system in 2010 suggest the Missile Defense Agency is not doing nearly enough to sustain and enhance the system. GMD reductions include:

- Cutback deployment from 44 to 30 GBIs and cancellation of 10 GBIs in Poland;
- \$500 million reduction to the GMD program in the fiscal year 2010 budget request;
- Fiscal years 2011–2015 funding for GMD declines by \$600 million when compared to President's budget last year; and
- Obama GMD budget for fiscal years 2010–2013 is \$4 billion less than Bush fiscal years 2010–2013 planned budget.

Will you pledge to end this neglect of the GMD system and provide the attention and funding necessary to return the GMD system to full operational reliability and ensure the system is improved and modernized over time?

Mr. PANETTA. I will support the continued sustainment and improvement of the GMD system as a key priority.

I share Secretary Gates' view that the "protection of the United States from the threat of ballistic missile attack is a critical national security priority."

The current ballistic missile defense posture for the United States protects against ICBMs that might be deployed by states like North Korea or Iran. Improvements to the existing sensors and software, in addition to the procurement of additional ground-based interceptors (GBIs) and radars, and the development of the

SM-3 IIB interceptor, will continue this protection against future ICBM threats from states like North Korea and Iran.

MISSILE DEFENSE COOPERATION WITH RUSSIA

94. Senator INHOFE. Mr. Panetta, will you commit to share with Congress, no later than 30 days after your confirmation:

- Missile defense and threat information provided to Russia, including in the NATO context;
- The draft Defense Technology Cooperation Agreement, including the Bush administration's draft;
- The Missile Defense Cooperation Agreement that had been discussed with the Russians; and
- Analysis of the location of the AN/TPY-2 radar being considered for deployment in Turkey, and any other locations being considered by this and past administrations.

Mr. PANETTA. DOD and DOS have briefed Congress on cooperation efforts with Russia and efforts to implement the European Phased Adaptive Approach (EPAA), including the deployment of the AN/TPY-2 radar, and will continue to do so.

Discussions on the draft Defense Technology Cooperation Agreement (DTCA) were initiated in 2004 at President Bush's direction to establish a legal framework for purposes of conducting with Russia a broad range of defense-related cooperative research and development activities, which could include missile defense. The Obama administration has continued these efforts to negotiate and conclude a DTCA with Russia. A draft Ballistic Missile Defense Cooperation Agreement (BMDCA), which Russia declined to negotiate, would have been a more limited form of the DTCA. These agreements were briefed in detail to Senate staff members in December 2010 during discussions as part of the Senate's consideration of the New START treaty advice and consent to ratification. Finally, the United States only shares sensitive information with foreign countries in accordance with Foreign Disclosure laws and regulations.

NUCLEAR MODERNIZATION

95. Senator INHOFE. Mr. Panetta, in the 2010 NPR and during the discussion on the New START treaty, the administration made substantial commitments to the sustainment and modernization of the U.S. nuclear deterrent. Enhanced safety, security, and reliability of nuclear weapons stockpile, modernization of the nuclear weapons complex, and maintenance of the nuclear delivery systems are key to enabling maintaining our nuclear deterrence. The Perry-Schlesinger Commission stated it was alarmed by the disrepair and neglect of the nuclear weapons stockpile and complex. Secretary Gates warned in October 2008, there's "no way we can maintain a credible deterrent and reduce the number of weapons in our stockpile without either resorting to testing our stockpile or pursuing a modernization program." We are the only major nuclear power not modernizing its' weapons. Our weapons are an average of 26 years old and most are 15 or more years beyond design life. Secretary Gates was a strong supporter of the nuclear triad and a robust modernization program. Secretary Gates said, "In many ways, the primary threat to the effectiveness and credibility of the American deterrent is one that we control ourselves, and that is failing to invest adequately in our Nation's nuclear weapon infrastructure, a point I have made a number of times in recent years." Do you support the triad of bombers with gravity bombs and nuclear cruise missiles, ballistic missile submarines, and ICBMs?

Mr. PANETTA. I will continue the DOD commitment to sustaining and modernizing a safe, secure, and effective nuclear deterrent that supports strategic stability in an efficient and cost-effective manner, deters regional threats, and assures allies and partners.

96. Senator INHOFE. Mr. Panetta, is it important to maintain a nuclear triad?

Mr. PANETTA. As stated in the 2010 NPR Report, each leg of the triad has unique advantages. I will continue the DOD commitment to sustaining and modernizing a safe, secure, and effective nuclear deterrent that supports strategic stability in an efficient and cost-effective manner, strengthens regional deterrence, and assures our allies and partners.

97. Senator INHOFE. Mr. Panetta, are you committed to the nuclear modernization plan, referred to as the 1251 plan, that was the basis for Senate support for the New START treaty?

Mr. PANETTA. I am committed to the sustainment of a safe, secure, and effective nuclear deterrent, and I support the administration's plan for modernization and sustainment as laid out in the Report to Congress pursuant to section 1251 of the National Defense Authorization Act for Fiscal Year 2010.

98. Senator INHOFE. Mr. Panetta, do you support modernization of our nuclear weapons labs?

Mr. PANETTA. I am committed to the sustainment of a safe, secure, and effective nuclear deterrent, and I support the administration's plan for modernization and sustainment as laid out in the Report to Congress pursuant to section 1251 of the National Defense Authorization Act for Fiscal Year 2010. As described in the 2010 NPR Report and in the Report pursuant to section 1251, modernization of the nuclear weapons infrastructure, including the nuclear weapons laboratories, is a key element of the administration's nuclear policy.

99. Senator INHOFE. Mr. Panetta, would you characterize this funding as national security activities?

Mr. PANETTA. Funding for activities needed to ensure a safe, secure, and effective nuclear stockpile is currently part of the Weapons Activities Account in the National Nuclear Security Administration budget; accordingly, it is considered national security funding.

NATIONAL SECURITY AND THE GLOBAL THREAT

100. Senator INHOFE. Mr. Panetta, on January 6, 2011, Secretary Gates told Jim Lehrer that "I think [the thing] people need to remember is that providing for the common defense is an unambiguous Federal responsibility. . . . I would argue that defense is not the problem when it comes to the deficit. If you look at defense as a percentage of Federal expenditures or as a percentage of gross national product, we're at a lower level, particularly for wartime, than we have been during any previous war, and as a percentage of the overall Federal budget, about where we have been for a number of years." DOD is executing several efficiency initiatives to make the most of the limited budget it has been given but even those efficiencies will not allow the military to fully sustain operations, maintain the force, and modernize our equipment. DOD needs to fully fund current operations . . . not just in Iraq and Afghanistan but at home and around the globe . . . this includes training and exercises. It needs to take care of its people . . . an exponentially growing cost. And it needs to modernize its aging fleet of ships, vehicles, and aircraft or spend increasing amounts of DOD dollars to sustain old equipment. The \$400 million across-the-board cut favored by the administration next year does not take into account the risks to our national security or our ability to execute the national security strategy. During questioning about postponing weapon systems acquisition and maintenance at a hearing in front of the Senate Readiness and Management Support Subcommittee of the Senate Armed Services Committee, Vice Admiral Burke said: "you can pay for it now or pay more for it later." If confirmed, how will you ensure our military is postured to counter the full spectrum of national security threats?

Mr. PANETTA. This spring, President Obama announced a framework for deficit reduction. As part of that effort, the President set a goal of holding the growth in base national security spending slightly below inflation for the next 12 years, which would save about \$400 billion. Although defense spending is not the source of the Nation's current fiscal condition, it will have to be part of the national solution.

In April, Secretary Gates launched a comprehensive review to ensure that future spending decisions are focused on priorities, strategy, and risks, and are not simply a math and accounting exercise. He said, and I agree, that the choices we make in terms of reductions in defense and security spending must be made with a clear understanding of the potential risks and consequences of those choices.

The overarching goal of the comprehensive review is to preserve a U.S. military capable of meeting crucial national security priorities across the range of potential threats. This process seeks to inform and support decisions by the President and Congress and to ensure that the Nation consciously acknowledges and accepts the implications, including additional risk, of reduced investment in its military in an uncertain and still dangerous security environment. The defense of the United States and the American people is a sacred trust. I take the Nation's defense very seriously, as I know all Members of Congress do. I look forward to working with

Congress to maintain a highly capable military that will protect and defend the United States and preserve security abroad, now and in the future.

101. Senator INHOFE. Mr. Panetta, are we on a path to continue acquiring the best systems and enough of those systems to meet the current requirements or does there need to be a change in our National Security Strategy modifying those requirements?

Mr. PANETTA. As Secretary Gates has stated, we must ensure that future defense spending decisions are strategically informed and focused on priorities and risks. With regard to capabilities, the Department over the past 2 years has cancelled acquisitions or curtailed modernization programs that were badly over budget, behind schedule, dependent on unproven technology, supplied a niche requirement that could otherwise be met, or were impractical in a rapidly changing security environment.

Particularly, amid declining resources, it is critically important that we continue the Department's commitment to developing technology and fielding weapons systems that are affordable, versatile, and relevant to the range of threats in the decades to come. This approach is consistent with the 2010 National Security Strategy, which notes that "we will scrutinize our programs and terminate or restructure those that are outdated, duplicative, ineffective, or wasteful. The result will be more relevant, capable, and effective programs and systems that our military wants and needs."

102. Senator INHOFE. Mr. Panetta, overall funding for procurement is down \$6 billion in fiscal year 2012 (base budget and Overseas Contingency Operations) compared to the fiscal year 2011 Continuing Resolution. Research and development is down \$5 billion and military construction is down \$4 billion. What impact does this have on our future forces and the cost to recapitalize our infrastructure, vehicles, ships, aircraft, and other equipment 5 to 10 years down the road?

Mr. PANETTA. The impact is not precisely known at this time. If confirmed, I intend to ensure that limited Defense resources are used on those programs that will provide the warfighter with equipment and support that is needed to accomplish the national security mission of the United States. The Department will have to continue to identify ways to become more efficient so that scarce Defense resources are not wasted and the highest priorities are funded.

103. Senator INHOFE. Mr. Panetta, what impact will delaying modernization have on the cost of future weapons systems?

Mr. PANETTA. Any cost impacts associated with the pace of modernization would be highly dependent on the specific choices and implementation. This is an area I will be looking at closely.

FORCE REDUCTIONS

104. Senator INHOFE. Mr. Panetta, in January 2007, the end strength of the Army grew by 65,000 because we did not have enough ground forces to sustain operations. Two years later Congress approved a temporary increase in Army end strength of another 22,000. At the same time, we also grew the size of the Marine Corps by 27,000. DOD is projecting cutting the Army by 27,000 and Marine Corps by 20,000 between 2015 and 2016. Secretary Gates said this week that "... the worst thing in the world would be what was done in the 1970s and 1990s ... give everybody in the military a same percentage cut across the board. That's the way you hollow out the military. That's the way you don't have enough ammunition to use at firing ranges, you don't have enough money for exercising or training, you don't have enough money for tank miles or steaming days or flight hours ... if we have to reduce the size of the military in some way, I want the level of excellence when we're done to be at the same standard it is today." I felt we cut our force too deep during the Clinton administration which resulted in our need to increase the force in 2007. In your answers to the advance policy questions, you state that "2 years as Central Intelligence Agency (CIA) Director has made me realize that intelligence is often ambiguous." I agree. Our crystal ball has been cloudy at best when it comes to anticipating impacts to our national and global security. Do you support cuts in Army and Marine Corps end strength?

Mr. PANETTA. Any reduction will need to be monitored and will be affected by security considerations around the globe and the readiness of our military.

105. Senator INHOFE. Mr. Panetta, do these cuts assume zero forces in Iraq in 2012 and zero forces in Afghanistan in 2014?

Mr. PANETTA. Any reductions in the Army and the Marines Corps will be based on security considerations in Iraq and Afghanistan as well as around the globe.

106. Senator INHOFE. Mr. Panetta, are these personnel cuts being driven by budget constraints or based on national security requirements?

Mr. PANETTA. DOD has increased U.S. Army and U.S. Marine Corps end strengths in order to meet the demands generated by simultaneous operations in Iraq and Afghanistan. The planned cuts in their end strengths are deferred until after fiscal year 2015 to reflect our expectation that ground force requirements for operations in Iraq and Afghanistan will be markedly lower after fiscal year 2015. Although realistic force planning must be mindful of resource constraints, it is driven by strategic considerations that assess the nature of challenges likely to be confronted in the future, the types of missions the U.S. Armed Forces will be required to perform, and the capabilities and capacities needed to execute those missions successfully.

GUANTANAMO BAY

107. Senator INHOFE. Mr. Panetta, I returned from my most recent visit to Guantanamo Bay (GTMO) on May 20, 2011. It was important for me to return to get an update on the operations and see firsthand the current conditions of the detention facilities and the detainees. I took six members who had never been to GTMO before. Each of them, regardless of party, came away with a greater appreciation for the work that is being done there. GTMO is the single greatest repository of human intelligence in the war on terror. This intelligence has prevented terrorist attacks, saved lives, and helped lead us to Osama bin Laden. You said that “enhanced interrogation techniques” yielded some of the intelligence information that ultimately led to Osama bin Laden, but “whether we would have gotten the same information through other approaches I think is always going to be an open question.” Do detainees at GTMO pose a threat to U.S. national security?

Mr. PANETTA. As I have stated before, I fully support the President’s decision to establish Army Field Manual 2–22.3 as the single standard applicable to all interrogations by U.S. Government personnel. This decision was based on the results of a careful review conducted by the President’s interagency Interrogation and Transfer Policies Task Force which was charged with evaluating the sufficiency of the interrogation practices and techniques in the Army field manual. The Task Force found that additional techniques were not necessary. I believe we should do everything possible within the law to gather information, and I agree with those who state that information can be obtained without resorting to measures such as waterboarding. I do not support a set of classified interrogation methods that are not open to public scrutiny.

108. Senator INHOFE. Mr. Panetta, do you believe the United States will continue to capture terrorists around the world?

Mr. PANETTA. Yes. When it comes to protecting the American people from al Qaeda and its associated forces, intelligence is critical to identifying and disrupting their plots, as well as to dismantling their networks. Among our greatest sources of information about al Qaeda, its plans, and its intentions have been the members of its network who have been taken into custody by the United States and our partners overseas. Wherever possible, we must maintain a preference to capture terrorists and take advantage of the opportunity to gather information through interrogation that is vital to the safety and security of the American people.

109. Senator INHOFE. Mr. Panetta, where will you put existing detainees and future detainees?

Mr. PANETTA. The United States will continue to hold detainees in accordance with the authority provided by the 2001 Authorization for Use of Military Force, as informed by the law of war. DOD’s ability to detain the enemy and interrogate them for intelligence in prosecuting the war against al Qaeda, the Taliban, and their associated forces is essential to U.S. national security. The United States has been detaining individuals in this war for nearly a decade and has learned that there is no one-size-fits-all approach to the complex issue of law of war detention in a 21st century conflict with a transnational terrorist group.

DOD currently holds detainees in Iraq, Afghanistan, and Guantanamo Bay. We are transitioning our detention operations in both Iraq and Afghanistan, with the

intent of moving from a law of war detention framework to a peacetime domestic legal framework where each respective nation takes responsibility for its own citizens.

I fully support the President's commitment to close the detention facility at Guantanamo Bay because it is in our national security interest to do so. I do acknowledge, however, that the United States needs a place to hold individuals whom we capture abroad. This is a very serious issue for our country, and it is one I believe policymakers need to address expeditiously. The decision to capture an individual outside an active theater of combat operations is a complex issue, involving a range of factors unique to the individual and the place and circumstances of capture. With respect to future detainees, disposition recommendations would be informed by the unique circumstances of each capture, with decisions made on a case-by-case basis among policymakers.

110. Senator INHOFE. Mr. Panetta, if held at locations in other countries such as Afghanistan or Yemen, isn't there a greater risk of escape, attack on the prison, or release of these terrorists?

Mr. PANETTA. The United States does not ask other nations to detain on its behalf. When we transfer detainees to another nation, that individual becomes subject to the laws of the receiving nation. In certain cases, detainees have been held and/or tried by the receiving nation for crimes they have committed. There have been instances where former detainees, or dangerous individuals held by other nations, have escaped or have been released. We take these instances very seriously, and certainly factor them when assessing the transfer of a detainee to the control of another government.

As we strengthen our own detention policies and procedures, we must continue to work with our partners around the world to build their capacity to confront this common challenge. Specifically, we must deepen our cooperation with our international partners to develop credible rehabilitation and reintegration programs as part of a durable counterterrorism strategy. We must ensure that our detention policies remain principled and consistent with the rule of law, that they evoke credibility with our public and the international community, and that they can be sustained into the future as a useful tool in our counterterrorism fight.

IRAQ

111. Senator INHOFE. Mr. Panetta, there continues to be concerns about our ability to safely withdraw forces out of Iraq by the end of the year. Four days ago, several servicemembers were killed in eastern Baghdad in a rocket attack. If confirmed, what steps will you take to ensure our forces can safely withdraw from Iraq?

Mr. PANETTA. The current security agreement gives us the right to defend ourselves and Iraqi forces all the way through our drawdown. We will approach our security posture throughout the drawdown in partnership with Iraqi forces. We continue to ensure both U.S. forces and Iraqi Security Forces (ISF) are prepared for this period of transition by continuing to provide training for our Iraqi partners. This includes training for Iraqi Police, ISF, and Iraqi Special Operations forces. Additionally, we will continue to closely monitor external malign influences and refine our deterrent options to address any threat posed to our forces. Finally, we will maintain robust self defense capabilities throughout the drawdown and address potential threats through a combination of kinetic and non-kinetic actions.

We will maintain a full spectrum of land, air, and naval forces, supported by a total complement of Special Operations Forces (SOF), Intelligence, Surveillance and Reconnaissance (ISR), logistics, and other enablers throughout the drawdown. The plan to withdraw U.S. forces from Iraq has been thoroughly briefed and rehearsed, and we will retain flexibility to react to changing circumstances.

112. Senator INHOFE. Mr. Panetta, do you think there will be a U.S. military presence in Iraq after 2011?

Mr. PANETTA. I believe some U.S. military personnel would be appropriate to support Iraq's continuing needs and enduring U.S. national interests, as Secretary Gates has stated. However, any post-2011 U.S. military mission would require a formal request from the Iraqi government, which we would be willing to consider. To date no request has been received.

INVESTIGATION INTO CENTRAL INTELLIGENCE AGENCY

113. Senator INHOFE. Mr. Panetta, you have opposed Attorney General Holder's investigation of possible incidents of abuse by CIA personnel during interrogations that went beyond guidelines imposed by the Bush administration. You stated: "I think the reason I felt the way I did is because I don't believe there's a basis there for any kind of additional action." What is the current status of the investigation and your opinion of it continuing?

Mr. PANETTA. I refer you to the Department of Justice with respect to the status of any investigation. My views are stated in the record.

U.S.-GEORGIA STRATEGIC PARTNERSHIP

114. Senator INHOFE. Mr. Panetta, there have been multiple terrorist acts and several terrorist attempts in the territory of Georgia orchestrated by the Russian Federation. The last one happened just 2 days ago when Georgian police prevented a terrorist plot targeting the NATO Liaison office in Tbilisi. The Obama administration is aware of these developments. On April 15, 2011, at a meeting in Berlin between the foreign ministers of Georgia and NATO, Secretary Clinton stated, "... We share Georgian concerns regarding recent Russian activities that can negatively affect regional stability." Despite the ongoing reset policy with the Russian Federation and the attempts of the Obama administration to engage Russia positively, Moscow persistently continues to undermine the security of Georgia. While the timeline for Georgia's NATO membership remains unclear, what is your opinion on the steps the United States should undertake to enhance the security and stability of Georgia, including any possibilities of supporting acquisition of defensive capabilities from the NATO countries?

Mr. PANETTA. The United States steadfastly supports Georgia's sovereignty and territorial integrity within its internationally recognized borders, and is committed to maintaining a strong bilateral defense relationship with Georgia.

Our security assistance and military engagement with Georgia focuses on two areas. First, we are focused on strengthening defense institutions and providing comprehensive defense assistance covering doctrine, personnel management, logistics, education, and training to support Georgia's defense reform and modernization efforts along Euro-Atlantic lines. This approach will ensure the lasting institutional transformation of the Georgian Armed Forces and provide the foundation for a secure Georgia.

Second, the United States is assisting the Georgian Armed Forces with training and equipping infantry battalions to deploy and operate alongside U.S. forces in a counter-insurgency environment in Afghanistan. Georgian forces are currently deployed, without caveats, as part of the ISAF in Helmand Province.

In addition to these bilateral efforts, we also encourage our international partners to demonstrate support for Georgia's territorial integrity and sovereignty. Through NATO, we work with our allies to assist Georgia with implementing its Annual National Program and to encourage Georgia to use tools available through the NATO-Georgia Commission.

HUAWEI AND THE IT SUPPLY CHAIN

115. Senator INHOFE. Mr. Panetta, as CIA Director, you must have been concerned about the threat of foreign technology (i.e., hardware, software, and services) in the U.S. information system supply chain, especially where that technology originates from companies under the control of the People's Republic of China. Would you be comfortable with Huawei (or a companion company, ZTE) being significant vendors to the CIA or DOD? If not, why not?

Mr. PANETTA. Continued globalization marks today's information and communications technology (ICT) marketplace. Moreover, DOD represents a small portion of the commercial ICT market, and it is unlikely its unique high assurance requirements can drive the development of commercial off-the-shelf products. Yet the leveraging of the rapid technology advancement of the commercial marketplace remains a key DOD advantage. While globally sourced technology provides innumerable benefits to the Department, it also provides foreign sources with increased opportunity to compromise the supply chain by inserting malware into ICT in order to access or alter data, and intercept or deny communications. Even though the risk of such a supply chain attack may be tolerable for many consumers of commercial ICT, the DOD cannot ignore these risks to its national security missions.

In this setting, use of Chinese or other foreign-sourced equipment in the absence of adequate risk management would concern me. The DOD is taking a proactive risk management approach to address this issue, enhancing the acquisition process in light of the changing global market to ensure rigor in addressing foreign sourcing risks.

In response to these risks, DOD is in the process of institutionalizing the Trusted Defense Systems/Supply Chain Risk Management (SCRM) strategies described in the Report on Trusted Defense Systems in Response to National Defense Authorization Act, section 254, delivered to Congress in January 2010. The Department's strategy for achieving trustworthy defense information and weapons systems in light of supply chain risk contains the following core elements:

1. Prioritize scarce resources based on mission dependence—Allocate the Department's systems assurance resources based on their criticality and risk of attack.
2. Plan for comprehensive program protection—Employ comprehensive program protection planning, including systems engineering, supply chain risk management, hardware and software assurance, counterintelligence, and information assurance to identify and protect critical components, functions, technologies, and information using a full range of tools, resources, and practices.
3. Detect and respond to vulnerabilities in programmable logic elements—Invest in enhanced vulnerability detection research and development, and transition such analytical capabilities to support acquisition.
4. Partner with industry—Collaborate with industry to develop commercially reasonable standards for global sourcing and SCRM and to identify leading edge commercial practices and tools.

The forgoing strategy is being implemented to protect DOD systems from supply chain risk. Through the application of these processes, any particular proposed use of Chinese or other foreign-sourced equipment would first be evaluated for the supply chain risk to DOD Systems and Networks in light of system criticality, all source intelligence, and the feasibility of adequate mitigation measures.

116. Senator INHOFE. Mr. Panetta, do you feel the private sector also needs to make better procurement decisions, and also needs additional information in order to make better decisions?

Mr. PANETTA. Through the course of developing its Trusted Defense Systems Strategy, it became increasingly clear that the DOD was exposed to risk through the supply chains of the commercially-owned and operated telecommunications infrastructures upon which DOD depends, and that the forgoing strategy does not directly address these broader risks. To address this gap, DOD and DHS are co-leading an Interagency Task Force that will in partnership with industry develop a more complete understanding of the relevant technical risks to the U.S. telecommunications infrastructure and will assess the dependency of vital governmental and economic operations upon that infrastructure. It will then evaluate a range of potential technical risk mitigations strategies. Central to this activity is an assessment of information sharing deficiencies within the telecommunications sector. These deficiencies inhibit effective risk management of supply chain risk within that sector. While the Task Force is studying these issues, DOD in cooperation with other parts of the national security community is monitoring specific risks to the broader telecommunications infrastructure related to foreign sourcing that could affect national security and of which we are already aware. As a result, there have been interim actions taken to address specific risks to the broader telecommunications infrastructure posed by foreign sourcing.

QUESTIONS SUBMITTED BY SENATOR JEFF SESSIONS

MISSILE DEFENSE

117. Senator SESSIONS. Mr. Panetta, the Obama administration's Phased-Adaptive Approach for ballistic missile defense in Europe has been criticized because it leaves a gap between Iran's movement towards ICBMs that can threaten Europe and the United States, and on the other hand, the deployment of an American missile defense system that is capable of protecting the continental United States from ICBMs. Do you see Iran's ICBMs as a threat to the United States and, if so, what should be done to close the gap?

Mr. PANETTA. The United States is currently protected against any attacks from North Korea or Iran if those countries were able to develop and deploy an effective ICBM capability today. This protection is a result of investments made over the past

decade in a system based on GMD. Because of continuing improvements in the GMD system and the number of GBIs now deployed compared to potential North Korean and Iranian long-range ballistic missile capabilities, the United States possesses a capability to counter the projected threat from North Korea and Iran for the foreseeable future.

In order to maintain this advantageous position, the administration is taking several steps to improve the protection of the United States from the potential ICBM threat posed by Iran and North Korea. These steps include the continued procurement of GBIs, the deployment of additional sensors, and upgrades to the Command, Control, Battle Management, and Communications system.

118. Senator SESSIONS. Mr. Panetta, while directing that we sustain and enhance our ability to defend the Homeland against limited numbers of long-range ballistic missiles, the administration has made defending against regional threats “a top priority of our missile defense plans,” according to Secretary Gates. As a result, funding for the GMD system has steadily declined, while the two test failures of the GMD system in 2010 suggest the Missile Defense Agency is not doing nearly enough to sustain and enhance the system. GMD reductions include:

- Cutback deployment from 44 to 30 GBI and cancellation of 10 GBIs in Poland;
- \$500 million reduction to the GMD program in the fiscal year 2010 budget request;
- Fiscal year 2011–2015 funding for GMD declines by \$600 million when compared to the President’s budget last year; and
- Obama’s GMD budget for fiscal years 2010–2013 is \$4 billion less than Bush fiscal years 2010–2013 planned budget.

Will you pledge to complete the deployment of an effective GMD system?

Mr. PANETTA. I will support the continued sustainment and improvement of the GMD system.

I share the view of Secretary Gates, who said that the “protection of the United States from the threat of ballistic missile attack is a critical national security priority.”

The current ballistic missile defense posture for the United States protects against ICBMs that might be deployed by states like North Korea or Iran. Improvements to the existing sensors and software, in addition to the procurement of additional GBIs and radars, will continue this protection against future ICBM threats from states like North Korea and Iran.

119. Senator SESSIONS. Mr. Panetta, should we support the emphasis on regional missile defense at the expense of Homeland defense?

Mr. PANETTA. The administration has put in place a balanced program, which addresses both the short-range and longer-range threats in a timely manner and is responsive to development of the threats. The forward-based radar that will be deployed as part of Phase 1 of the European Phased Adaptive Approach (EPAA), and the deployment of the SM–3 Block IIB to Europe in Phase 4 of the EPAA, will improve the missile defense coverage of Europe while also enhancing protection of the United States from a potential ICBM attack from Iran.

In addition, the administration is making improvements to the existing GMD sensors and software and is procuring additional GBIs. The United States must also be well hedged against the possibility of rapid threat developments or delays in U.S. technological advances. The administration has already made several decisions to strengthen the U.S. hedge posture, including the construction of Missile Field 2 at Fort Greely, AK, mothballing six GBI silos at Missile Field 1 at Fort Greely instead of decommissioning them, and the development and assessment of a two-stage GBI.

NUCLEAR POLICY

120. Senator SESSIONS. Mr. Panetta, President Obama identified a “world without nuclear weapons” as a long-term national security goal in an April 2009 speech. However, when asked in the advance policy questions about your assessment of the threat posed by Iran and North Korea, you responded that there is a real risk that Iran’s nuclear program will prompt other countries in the region to pursue nuclear options. In addition, you stated that North Korea’s newly revealed uranium enrichment activities underscores that it poses a growing and direct threat to the United States, our allies in the region, and the international community. Do you share the goal of a world without nuclear weapons?

Mr. PANETTA. As stated in the NPR Report, the greatest threat facing our Nation is nuclear proliferation. The NPR Report also stated that the United States is committed to the long-term goal of a world free of nuclear weapons. As long as nuclear weapons exist, however, the United States will sustain a safe, secure, and effective nuclear deterrence force. The nuclear deterrence force will continue to play an essential role in deterring potential adversaries and reassuring allies and partners around the world of the U.S. commitment to their security. Therefore, without jeopardizing our traditional deterrence and reassurance goals, we are now able to shape our nuclear weapons policy and force structure in ways that will better enable us to meet our most pressing security challenges.

121. Senator SESSIONS. Mr. Panetta, do you believe that this goal is realistic? If so, how does this square with the reality of the threat posed by Iran's and North Korea's nuclear programs?

Mr. PANETTA. As the President stated, such a goal is ambitious and will not be reached quickly. Presently, changes in the nuclear threat environment have altered the hierarchy of our nuclear concerns and strategic objectives. In coming years, we must give top priority to discouraging additional countries from acquiring nuclear-weapons capabilities and stopping terrorist groups from acquiring nuclear weapons or the materials to build them. At the same time, we must continue to maintain stable, strategic relationships with Russia and China. We must also counter threats posed by any emerging nuclear-armed states, thereby protecting the United States and our allies and partners against nuclear threats or intimidation, and reducing any incentives that any emerging nuclear-armed states might have to seek their own nuclear deterrents.

122. Senator SESSIONS. Mr. Panetta, given that the nuclear age has had an absence of great power conflicts like World War II, what are the risks and dangers of a "world without nuclear weapons"?

Mr. PANETTA. Nuclear forces continue to play an essential role in deterring potential adversaries and reassuring allies and partners around the world. Until such time as the administration's goal of a world free of nuclear weapons is achieved, the maintenance of nuclear capabilities will remain a core mission of DOD.

Our defense posture will continuously adapt to changes in the strategic environment. Credibly underwriting U.S. defense commitments in a world without nuclear weapons will demand an increased reliance on tailored approaches to deterrence that integrate all aspects of national power. This includes land, air, and naval forces capable of fighting limited and large-scale conflicts in environments where anti-access weaponry and tactics are used, as well as forces prepared to respond to the full range of challenges posed by state and non-state groups.

The United States is positioned with capabilities across all domains to deter a wide range of attacks or forms of coercion against the United States, its allies, and partners. If deterrence fails and adversaries challenge our interests with the threat or use of force, the United States must be prepared to respond in support of U.S. national interests. The range of plausible future challenges is significant. Potential adversaries of the United States are likely to employ a diverse array of approaches and capabilities if and when they choose to oppose the United States, its allies, or its partners. In the future, U.S. forces must be sized and shaped to provide the maximum possible versatility for the broadest plausible range of conflicts. A deliberate, continuing assessment of national interests, military requirements, and the strategic environment should guide U.S. global defense posture planning. In the emerging security environment, the United States will tailor its defense posture to mitigate foreseeable security risks and manage future security challenges effectively.

123. Senator SESSIONS. Mr. Panetta, what are your views about future nuclear force levels?

Mr. PANETTA. As stated in the 2010 NPR Report, any future nuclear reductions must continue to strengthen deterrence of potential regional adversaries, maintain strategic stability vis-a-vis Russia and China, and maintain the reliability and effectiveness of our security assurances to our allies and partners. We will continue to assess the force size required for an effective deterrent. DOD is committed to sustaining and modernizing a safe, secure, and effective nuclear deterrent in an efficient and cost-effective manner that supports strategic stability.

124. Senator SESSIONS. Mr. Panetta, are you committed to supporting, maintaining, and modernizing America's triad of nuclear delivery systems—that is, America's ICBMs, SLBMs, and nuclear-armed long-range bomber aircraft, in addition to spe-

cifically meeting the commitments President Obama made in his letter during the START debate?

Mr. PANETTA. I am committed to the sustainment of a safe, secure, and effective nuclear deterrent, and I support the administration's plan for modernization and sustainment as laid out in the Report to Congress pursuant to section 1251 of the National Defense Authorization Act for Fiscal Year 2010. I will continue the DOD commitment in an efficient and cost-effective manner.

125. Senator SESSIONS. Mr. Panetta, as a Congressman, you voted against nuclear testing and voted for a nuclear test ban. You also voted for funding cuts and against the development of numerous missile systems, including the MX missile, Pershing II, and Trident II, as well as voting for funding reductions and cuts to the B-1 and B-2 bombers. Will you support and fulfill policies even if you personally disagree with them?

Mr. PANETTA. Yes. As my record of service in the Executive Branch demonstrates, I am fully committed to executing the President's policies and complying with all legal requirements enacted by Congress, while offering my own candid advice to the President.

RUSSIA COOPERATION

126. Senator SESSIONS. Mr. Panetta, in your response to the advance policy questions, you state that you agree with missile defense cooperation with Russia. What evidence have you seen in the past that would demonstrate that Russia is a reliable partner for cooperation in missile defense?

Mr. PANETTA. The United States and Russia conducted a robust and successful missile defense exercise program, with five exercises conducted between 1996 and 2006. This cooperation, unprecedented at the time, contributed to the understanding of our respective missile defense capabilities and interests and demonstrated our countries' shared interest in and ability to work together to address common security threats.

With our new push for deeper missile defense cooperation, we seek to responsibly foster and sustain a stable relationship with Russia. As the pace of military-technical innovation increases and the global security environment evolves, we believe it is important to enlist Russia's help in addressing common 21st century security challenges, specifically regional actors seeking illicit capabilities.

Appropriate levels of cooperation with Russia on missile defense would send a powerful signal to regional actors, such as Iran, that Russia and the United States are working together to counter the threat posed by the proliferation of ballistic missiles and pursuit of nuclear weapons capabilities. Our goal is a level of cooperation that will improve U.S. and Russian security and the security of our NATO allies while increasing transparency to reduce Russia's concerns about U.S. missile defense efforts.

127. Senator SESSIONS. Mr. Panetta, what does cooperation mean to you? Does it include a joint area where Russians have their hand on a launch trigger?

Mr. PANETTA. The administration has been clear that Russian objections will not change or limit our missile defense system capabilities or missile defense deployments, nor will Russia have a "launch trigger" that will control any U.S. or NATO missile defense systems.

The administration's concept for missile defense cooperation stems from the conviction that NATO must be responsible for defense of NATO territory and that Russia should be responsible for defense of Russian territory. We would operate our respective systems independently but cooperatively, including sharing of sensor data that may enhance the ability of both systems to defeat missile attacks by regional actors such as Iran.

128. Senator SESSIONS. Mr. Panetta, in 2009, the administration initiated a reset in relations with the Russians. I would like to understand your assessment of the impact of this so-called "reset" of U.S.-Russian relations, especially in light of how they have threatened their neighbors and invaded Georgia. Specifically, has the "reset" resulted in an improved Russian strategic, diplomatic, and economic posture toward our allies in Central Europe, including Georgia?

Mr. PANETTA. Our approach in transforming our defense relationship with Russia has been to work to integrate Russia more closely into the fabric of the international community to ensure that parties on all sides have more of a stake in keeping the

relationship on the right track. Our goal has been to cooperate with Russia where we have common interests but not at the expense of our principles or our friends.

Through interactions with Russia, we hope we can build the infrastructure for future collaboration, identify and clarify the extent of agreement and disagreement, counteract narratives of “zero-sum” competition, and reform existing structures, such as the NATO–Russia Council and the Organization for Security and Cooperation in Europe, to meet new challenges.

We have seen some key successes over the course of the past 2 years on Afghanistan, strategic arms control, Iran, and bilateral defense relations. Military-to-military relations were revitalized in 2009, including the resumption of regular consultations between Chiefs of Defense and their staffs; military exchanges, visits, and exercises, and a broadening and deepening of cooperation in such areas as armed forces reform, defense policy and national security priorities, transparency and confidence-building measures, and regional and global security.

In all our engagements, we remind our Russian counterparts of Russia’s obligation to respect the security, sovereignty, territorial integrity, and independence of its neighbors. We are open about our defense engagement with those countries and make clear that we welcome the opportunity to work with Russia’s neighbors as well as with Russia.

129. Senator SESSIONS. Mr. Panetta, in addition, has the “reset” resulted in improved Russian cooperation on the nuclear proliferation challenges posed by Iran and North Korea? Please explain specific improvements.

Mr. PANETTA. In general, the “reset” has resulted in greater cooperation by the Russian Federation. For example, Russia agreed to United Nations Security Council Resolutions (UNSCR) 1874 and 1929 against North Korea and Iran, respectively. After the adoption of UNSCR 1929, Russia cancelled the delivery of the S–300 missile defense system to Iran.

AFGHANISTAN AND IRAQ

130. Senator SESSIONS. Mr. Panetta, the United States cannot give away the work of its magnificent military in Afghanistan and Iraq by a too precipitous withdrawal. How will you monitor the situation on the ground in Afghanistan and Iraq to ensure that stability remains during and after the withdrawal of U.S. forces?

Mr. PANETTA. I completely agree that the withdrawal from Afghanistan must be meticulously planned and not precipitous in order to not risk the gains we have made at great sacrifice of our blood and treasure. I will monitor the situation through the eyes of our commanders on the ground and by personally visiting Afghanistan to assess for myself. Preserving our recent gains will be my top priority, as we begin to transition security lead to the ANSF.

Regarding Iraq, General Austin and his staff have a number of systems in place to monitor the situation in Iraq during the drawdown. He will report regularly to me, the Chairman of the Joint Chiefs of Staff, and General Mattis on issues relating to security, politics, rule of law, and training and readiness for foreign military and police forces. Additionally, my office and the Joint Staff participate in National Security Staff led weekly updates at the deputies’ committee to discuss Iraq from a broader interagency perspective. Finally, DOD maintains active involvement in a robust interagency process of weekly working groups covering a variety of topics including security, rule of law, transition, international engagement, and strategic communications.

131. Senator SESSIONS. Mr. Panetta, what contingency plans do you have in place in the event that a redeployment is required during the drawdown to ensure stability?

Mr. PANETTA. Contingency planning is an ongoing effort by our military to ensure we are ready for rapidly changing situations. I will work closely with the Chairman of the Joint Chiefs of Staff and military commanders to ensure we remain ready for any contingency.

QUESTIONS SUBMITTED BY SENATOR SAXBY CHAMBLISS

LOANS AND CREDIT FOR SERVICEMEMBERS

132. Senator CHAMBLISS. Mr. Panetta, I understand that DOD regulates interest rates on short-term loans that do not amortize when made to its uniformed servicemembers, capping them at 36 percent. Traditional, amortizing installment

loans are exempt from such interest rate caps. What is DOD's current position on short-term loans that do not amortize and those that do amortize?

Mr. PANETTA. DOD does not have a position on any specific types of loans given to servicemembers. The Department proposes to help ensure that servicemembers and their families receive fair protections by working with Federal and State governments on existing and proposed policies impacting all consumers. The goal is to try to eliminate the need to identify servicemembers and their families separately for protections, which may create unintentional barriers to credit.

133. Senator CHAMBLISS. Mr. Panetta, how does DOD propose to balance consumer protection for its members without creating unintentional barriers to credit for them in the future?

Mr. PANETTA. The Department proposes to help ensure that servicemembers and their families receive fair protections by working with Federal and State governments on existing and proposed policies impacting all consumers. The goal is to try to eliminate the need to identify servicemembers and their families separately for protections, which may create unintentional barriers to credit.

QUESTIONS SUBMITTED BY SENATOR ROGER F. WICKER

FUTURE THREATS

134. Senator WICKER. Mr. Panetta, the United States faces a number of national security challenges today and our forces—our resources—are stretched thin in order to meet those challenges. However, we also know that the future will bring its own set of challenges and threats to the security and prosperity of the next American generation. In order to prepare for those threats and meet our responsibilities to those who follow us, we must ensure the actions we take will give future generations the flexibility and resources they need, including an industrial base capable of sustaining our future military forces. As Secretary, what actions will you take to examine the industrial base at all levels, develop an industrial base policy and communicate that policy with the private sector, to ensure that we maintain a robust and capable aerospace and defense industrial base capable of meeting the threats of the future?

Mr. PANETTA. I understand the Department is examining the industrial base by conducting a sector-by-sector, tier-by-tier (S2T2) research effort. S2T2 is a process to expand the scope of the Department's industrial base assessments beyond their traditional programmatic perspective and to create a database on industry for use as an input to many decision-making processes across the Department.

I am committed to maintaining an open dialogue with the private sector and increasing the transparency within which we operate to the maximum extent permitted by law.

EXPORT CONTROL

135. Senator WICKER. Mr. Panetta, it is widely accepted that the current export control regime is antiquated and reduces U.S. industries' global competitiveness. Since the addition of commercial satellites to DOS's technology control list, we have seen the U.S. global share of that industry reduced from over 70 percent to less than 30 percent as the Europeans and others have marketed their products as International Traffic in Arms Regulations compliant. What actions are necessary to be taken to improve the export control regimen?

Mr. PANETTA. On May 6, 2011, DOD and DOS transmitted a joint interim report to Congress in response to section 1248 of the National Defense Authorization Act for Fiscal Year 2010. The report, entitled "Risk Assessment of United States Export Control Policy," is a conservative starting point for transferring satellite and related items from the USML to the CCL. It recommends that, under certain conditions, commercial communications satellites, systems, subsystems, and components be controlled on the CCL.

A more comprehensive assessment of controls on satellites, related items, and technology is currently underway, as part of the administration's Export Control Reform (ECR) initiative. DOD, with its interagency partners, is expected to complete this review of USML Category XV (Spacecraft Systems and Associated Equipment) in the coming months. The draft will include recommendations for what items should remain on the USML and those that can be moved to the CCL. No items controlled on the USML by statute will be removed from the USML unless and until the authority to do so is provided by Congress.

I understand that DOD expects to provide the final section 1248 report to Congress later this year, based on the findings from work underway in the ECR initiative. Since the administration has not completed its revision of controls on spacecraft in the USML, I cannot provide any conclusions at this time regarding its recommendations. However, consistent with our overall approach to ECR, I expect that the administration will consider how to provide "higher fences around fewer items," and increase transparency and predictability so that the U.S. space industry will be able to compete globally and more efficiently.

I am aware that current U.S. law limits the flexibility of the President and requires control of these items on the USML per section 1513 of the National Defense Authorization Act for Fiscal Year 1999. If confirmed, I look forward to working with Congress on the legislative changes that would be required to implement any proposed changes.

TECHNOLOGICAL SUPERIORITY

136. Senator WICKER. Mr. Panetta, U.S. defense policy since World War II has been to rely on advances in technology rather than force size for our national security. Do you believe that the Pentagon should strive to maintain our technological superiority in all mediums of combat?

Mr. PANETTA. I fully understand the role advanced technology and technological superiority has on the strategic options available to the President, including the size and shape of our forces. We live in an era where nations have increased their investments in world-class science and technology talent and facilities. While much of this investment is centered on commercial applications, there are significant national security implications. These investments provide nations with options to develop new military capabilities and non-state actors the opportunity to build asymmetric capabilities to challenge our forces.

Given this environment, the Department must continue to build upon the technical strengths it has developed over the decades since World War II. The combined scientific, technical, and engineering talent in our universities, the defense industrial base, other parts of commercial industry, and Government labs are second to none in the world. If confirmed, I will ensure the Department's investments in research, development, test and evaluation protect this technical advantage while providing the taxpayer with the greatest return on their tax dollars in ensuring the technical superiority of our forces.

INDUSTRIAL POLICY AND LEADERSHIP

137. Senator WICKER. Mr. Panetta, throughout the post-World War II era, the United States has maintained its military leadership in large part as a result of its industrial leadership—particularly in aerospace and other defense industries. That leadership has only been possible by tremendous work on the part of the employees of that industry—the engineers, scientists, and machinists. Maintaining this leadership in the future will require that DOD identify and communicate what it needs to counter future military threats. As Secretary, what will you do to map out the industrial policy and needs of DOD?

Mr. PANETTA. As Secretary of Defense, I will ensure that Department policies, procedures, and actions: (1) stimulate and support vigorous competition and innovation in the industrial base supporting defense; and (2) establish and sustain cost-effective industrial and technological capabilities that assure military readiness and superiority.

I will do so by: (1) monitoring industry readiness, competitiveness, ability to innovate, and financial stability as the Department moves to capabilities-based acquisitions in an era of increasingly sophisticated systems; (2) leveraging Department research and development, acquisition, and logistics decisions to promote innovation, competition, military readiness, and national security; (3) leveraging statutory processes (for example, the Defense Priorities and Allocations System; Hart-Scott-Rodino antitrust evaluations; Exon-Florio Committee on Foreign Investment in the United States evaluations) and promoting innovation, competition, military readiness, and national security; (4) leading efforts for the Department to engage with industry to ensure openness and transparency; and (5) continuing our long history of supporting science, technology, engineering, and mathematics education initiatives in a collaborative process at local, regional, and national levels.

138. Senator WICKER. Mr. Panetta, do you believe that our aerospace and defense industrial base are essential strategic assets and that strategic assessments must include the impact on the industrial base from policy decisions?

Mr. PANETTA. Yes. In order for DOD to develop, field, and maintain high-quality equipment, it must rely on a robust and capable defense industry. We must understand, therefore, the impact of the actions we take on the industrial base and consider those impacts when making strategic decisions.

139. Senator WICKER. Mr. Panetta, as defense budgets flatten, how do you think rapidly rising personnel and operations accounts can be prevented from driving the investment accounts below 35 percent of the defense top line needed to modernize the forces for future threats?

Mr. PANETTA. The Department will need to continue to look for ways to become more efficient to accomplish the core Defense mission. The Department is conducting a comprehensive review of the Defense programs in light of the current fiscal environment. I will ensure that everything is on the table and assess each program in terms of its contribution to our national security strategy.

140. Senator WICKER. Mr. Panetta, alone among major nations, the United States does not have a defense industrial base policy. The current DOD policy of relying on market forces to sustain the health of the industrial base ignores the fact that DOD is the sole customer for military-unique weapons. Do you intend to continue the current initiative to develop an industrial base strategy?

Mr. PANETTA. The Department recognizes the defense industrial base is more global, commercial, and financially complex than ever before.

I understand the Department regularly addresses specific industrial-base concerns within programs and services and has also embarked on a more comprehensive sector-by-sector, tier-by-tier analysis of the industrial base, which will help inform future programmatic decisions, expand the scope of DOD industrial base assessments, and create a database on industry for use as an input to many decisionmaking processes across the Department.

141. Senator WICKER. Mr. Panetta, such a strategy will work best if there is open communication between defense officials and industry leaders so that industry can shape itself to meet the needs of DOD. Secretary Gates began a Secretary/CEO dialogue to facilitate that communication. Do you intend to continue that dialogue?

Mr. PANETTA. I am committed to maintaining an open dialogue with industry and increasing the transparency within which we operate to the maximum extent permitted by law.

PAKISTAN

142. Senator WICKER. Mr. Panetta, I am taking a close look at the \$1.1 billion requested by the administration for the Pakistan Counterinsurgency Capability Fund (PCCF). I am of two minds: on the one hand, I understand the importance of Pakistan if we are to succeed in Afghanistan and in the region; on the other hand, Pakistan has received a lot of U.S. assistance over the past few years (nearly \$6 billion combined in fiscal year 2010 and fiscal year 2011 and over \$5 billion alone in the fiscal year 2012 request). My initial thinking is that the funding needs additional benchmarks and criteria which ensure that our money is spent wisely and that the Pakistanis are cooperating with us. I am interested in your perspective on this subject, both broadly and specifically, on what Pakistan is doing or not doing to ensure accountability for any aid we provide to the country.

Mr. PANETTA. The PCCF and the Pakistan Counterinsurgency Fund (PCF), jointly implemented by DOS and DOD, is the cornerstone of our efforts to enhance the Pakistani military's ability to conduct effective military operations against militants operating within the country's borders.

Since 2009, DOD has executed PCF/PCCF to train and equip those forces that Pakistan has committed to the counterinsurgency (COIN) fight. Unlike traditional security assistance, PCF is structured such that DOD's field element in Pakistan, the Office of the Defense Representative-Pakistan (ODRP), plays the lead role in identifying the Pakistani military's COIN capability shortfalls. ODRP also identifies the requirements for training, equipment, and infrastructure that would address these capability shortfalls. These requirements have focused on enhancing COIN-specific capabilities like intelligence-driven operations; air mobility; close air support, night operations, and countering improvised bombs.

PCF/PCCF is structured so that the delivery of equipment is tied to our ability to train Pakistan's security forces. In the weeks and months ahead, continued delivery of PCF/PCCF training and equipment will require resolution of issues like the Pakistan Army's ordered drawdown of U.S. military personnel, the primary implementers of this program.

QUESTIONS SUBMITTED BY SENATOR LINDSEY GRAHAM

DEFENSE SPENDING

143. Senator GRAHAM. Mr. Panetta, Secretary Gates has previously identified the Gross Domestic Product (GDP) as a benchmark for defense spending. Admiral Mullen previously stated that GDP should serve as a reference to "stimulate discussion relative to the affordability of increased defense spending in a challenging security environment."

Since 2003, GDP as a percentage of defense spending has increased from 4.34 percent to 5.78 percent in 2010. As a percentage of our Nation's wealth, these figures are on average markedly lower than spending in other times of war:

- World War II (5.72 percent to 42.04 percent);
- Korean Conflict (8.25 percent to 15.01 percent); and
- Vietnam War (7.65 percent to 10.86 percent).

Do you agree with Secretary Gates, Admiral Mullen, and others that the GDP should act as a marker for defense spending? If so, what does the lower percentage average spent during the war on terror as compared to other times of conflict lead you to conclude about future defense spending as a percentage of GDP?

Mr. PANETTA. Defense expenditures are currently at a much lower percentage of GDP than during previous major wars. Defense consumed more than half the Federal budget, and the portion of the Nation's economic output devoted to the military was about 9 percent in 1961. By comparison, this year's base defense budget of \$530 billion—the highest since World War II adjusted for inflation—represents less than 15 percent of all Federal spending and equates to roughly 3½ percent of GDP—a number that climbs to about 4½ percent when the war costs in Iraq and Afghanistan are included. I do not believe the Department is likely to return to Cold War levels of defense expenditures, at least as a share of national wealth anytime soon—a sentiment also expressed by Secretary Gates.

LIMITING INTERROGATIONS

144. Senator GRAHAM. Mr. Panetta, I understand that you support the Obama administration's policy of limiting the interrogation techniques of U.S. military and CIA personnel to those consistent with a U.S. Army Field Manual, FM 2–22.3. I am concerned that President Obama's restrictions on interrogations are misplaced, unnecessarily hamper our interrogators, and provide an advantage to our enemies. Should a U.S. Army Field Manual be the single standard for governance on interrogation methods for the U.S. intelligence community or should the Intelligence Community have its own, possibly classified, standard?

Mr. PANETTA. As I have stated before, I fully support the President's decision to establish Army Field Manual 2–22.3 as the single standard applicable to all interrogations by U.S. Government personnel. This decision was based on the results of a careful review conducted by the President's interagency Interrogation and Transfer Policies Task Force which was charged with evaluating the sufficiency of the interrogation practices and techniques in the Army field manual. The Task Force found that additional techniques were not necessary. I believe we should do everything possible within the law to gather information, and I agree with those who state that information can be obtained without resorting to measures such as waterboarding. I do not support a set of classified interrogation methods that are not open to public scrutiny.

145. Senator GRAHAM. Mr. Panetta, do you believe there is any risk in limiting all government interrogations to the U.S. Army Field Manual, a publicly available document?

Mr. PANETTA. No. I fully support the President's decision to establish Army Field Manual 2–22.3 as the single standard applicable to all interrogations by U.S. Government personnel. This decision was based on the results of a careful review conducted by the President's interagency Interrogation and Transfer Policies Task Force which was charged with evaluating the sufficiency of the interrogation practices and techniques in the Army field manual.

RAIL ASSETS

146. Senator GRAHAM. Mr. Panetta, the use of rail to move, mobilize, and reset our Nation's military personnel and assets has proven to be a cost-effective, efficient, and environmentally-friendly mode of transportation. Do you agree that the use of rail to move DOD's assets is a "must-be included" in any mobilization or reset plan developed?

Mr. PANETTA. Rail as well as air, sea, and road are needed to deploy and redeploy forces, and for the movement of sustainment requirements. The effective use of the different modes must be integrated to support and synchronize timely and cost-effective deployment of personnel, their equipment and the associated sustainment.

Surface (both ship and rail) are the most cost efficient modes for moving large volumes of military equipment and sustainment/resupply requirements.

The Department relies heavily upon commercial rail, truck, ocean and air assets, and through the partnerships that are developed, to meet national security objectives. It is our desire that commercial industry maintains these critical capabilities.

147. Senator GRAHAM. Mr. Panetta, with the drawdowns in Iraq and Afghanistan, it is critical to have a logistics infrastructure capable of moving DOD's vehicles and assets to and from their reset and storage facilities. Do you feel the required rail assets are currently in place to support the surge in reset and storage requirements that will come from the drawdowns in Iraq and Afghanistan?

Mr. PANETTA. Currently, the numbers of DOD and commercial rail assets available are sufficient to meet requirements. However, over the next decade commercial rail assets will reach federally-mandated retirement timelines. DOD is currently studying this issue and is assessing courses of action designed to ensure significant commercial rail assets are available to meet the Department's future needs.

RADIATION AND MEDICINE

148. Senator GRAHAM. Mr. Panetta, in light of the recent situation in Japan, coupled with the ever-present threat of terrorist attacks on our Nation, where do you rank the importance of our military's capability to provide the best possible protection against radiation exposure?

Mr. PANETTA. Protecting our military forces from radiation exposure is one of the Department's highest priorities. It is an integral part of our overall emphasis on protecting the warfighters and our Nation against the threat of chemical, biological, radiological and nuclear (CBRN) events, whether intentional or accidental. The Department has a well-established strategy designed to deter and deny our adversaries the ability to threaten our Nation with weapons of mass destruction. Should our forces face the dangerous effects of CBRN weapons or materials, their protection and ability to mitigate those effects are essential to our success. Currently, I see our radiation protection priorities as being within larger CBRN defense efforts to: (1) strengthen our capability to respond and recover from a CBRN incident; (2) provide the necessary U.S. Food and Drug Administration-approved prophylactics (vaccines and other preventative products) and therapeutics (treatments) that protect against CBRN hazards; (3) provide comprehensive situational awareness necessary to counter the threat, along with the ability to share information and data analysis to guide the appropriate response to a CBRN incident; (4) provide the necessary detection and diagnostics to keep people safe and identify those affected; and (5) maintain and improve current individual and collective protection capabilities.

149. Senator GRAHAM. Mr. Panetta, in your opinion, are our Nation's first responders currently equipped with the best possible pre- and post-exposure radiation therapeutics and, if not, would you agree that we would be remiss in not ensuring that our government was doing everything in its power to develop and stockpile the most advanced and clinically-tested drugs presently available?

Mr. PANETTA. It is DOD's policy to provide the best possible medical countermeasures, including prophylaxis and therapeutics, to protect our military and civilian personnel. To this end, I will continue to work with the Service Chiefs to ensure our installation emergency managers continue to reach out to their civilian counterparts to ensure we are doing the right planning to meet any radiological hazard. In addition, we will continue cooperating with the Departments of Health and Human Services and the Department of Homeland Security to maintain in the National Strategic Stockpile adequate supplies of the best countermeasures available.

150. Senator GRAHAM. Mr. Panetta, are you aware that the Armed Forces Radiobiology Research Institute has committed years of research and millions of dol-

lars toward developing a very mature prophylactic radiation protection drug and that it has received positive test results and garnered widespread support across Government agencies?

Mr. PANETTA. Yes, I am aware of the efforts by the Armed Forces Radiobiology Research Institute to develop new drugs that could be used for protection against radiation. I understand that they have been working on a promising candidate, which is in clinical testing according to Food and Drug Administration protocols.

151. Senator GRAHAM. Mr. Panetta, that despite all this, inter-departmental procedures and roadblocks have inhibited such a drug from being stockpiled by our military which has, in fact, repeatedly been the request of the Office of Secretary of Defense for Health Affairs?

Mr. PANETTA. We will work with the Food and Drug Administration as it conducts clinical tests according to its protocols.

152. Senator GRAHAM. Mr. Panetta, if confirmed, would you be willing to further investigate this issue in order to determine what roadblocks have halted the procurement of such a promising drug, and how best to remove such hindrances?

Mr. PANETTA. Yes, I would be willing to look into this issue.

153. Senator GRAHAM. Mr. Panetta, would you commit to further dialogue on this issue and to provide regular updates to ensure our government and the American people are as protected as possible against these imminent threats?

Mr. PANETTA. Yes, I will certainly look into this issue.

QUESTIONS SUBMITTED BY SENATOR JOHN CORNYN

DOD BUDGET CUTS

154. Senator CORNYN. Mr. Panetta, in his April speech on debt reduction, the President targeted security spending for \$400 billion in cuts over the next 12 years, the preponderance of which is expected to come from the DOD budget. If confirmed, will you pursue cuts to the defense budget that go even further than that?

Mr. PANETTA. It is premature to provide an assessment of additional defense cuts until we complete our review associated with the President's target.

PAKISTAN

155. Senator CORNYN. Mr. Panetta, in your written responses to the advance policy questions, you note that "U.S. strategic interests in Pakistan encompass both our relationship with Pakistan itself and Pakistan's role in the campaign against al Qaeda." What is absent from your response is any mention of the major terrorist group, Lashkar-e-Taiba (LeT). Director of National Intelligence Clapper recently testified before this committee that LeT is becoming "an increasing threat to U.S. forces in Afghanistan." What is your assessment of the threat that LeT poses to U.S. interests, as well as our allies?

Mr. PANETTA. [Deleted.]

OVERDUE DOD REPORTS

156. Senator CORNYN. Mr. Panetta, the Senate-passed version of the National Defense Authorization Act for Fiscal Year 2010 included an amendment I sponsored that required DOD to report to Congress within 90 days on the status and capabilities of Taiwan's current air force, as well as an analysis of the specific weapons systems Taiwan would need in order to defend itself. That report is now 16 months overdue. Likewise, DOD is also overdue in submitting the required annual "China Military Power Report", which is mandated for delivery no later than March 1 of each year. The failures by DOD to submit timely reports, as mandated, undermine Congress' oversight role. If confirmed, will you commit to ensuring that these two important reports are submitted to Congress without further delay?

Mr. PANETTA. Yes. I am committed to providing these and other reports to Congress in a timely manner.

VIOLENCE IN MEXICO

157. Senator CORNYN. Mr. Panetta, I remain extremely concerned by the intense cartel-driven violence occurring in Mexico, just a stone's throw from my own home State, and also what I consider to be a lack of focus on this problem by the current administration. This administration does not seem to have a coherent, meaningful strategy in place to help the Government of Mexico regain control over its country and defeat the cartels. Instead, momentum seems to be moving in the opposite direction. Mexican President Felipe Calderon has boldly taken on the cartels, but I'm concerned about whether his successor will share his commitment to fight the cartels and restore law and order in Mexico. What do you see as the risks to our own national security if the Mexican cartels are not defeated?

Mr. PANETTA. I share your concern about the increased violence levels in Mexico and the threats posed by transnational criminal organizations (TCOs) operating there and, increasingly, throughout the region. Although concerned about the escalating violence, the U.S. Government remains confident that Mexico's democracy is strong and its government maintains control over its territory.

As I understand it, the U.S. Government began coordinating assistance to Mexico under the Mérida Initiative in 2008 with the goal of supporting the Government of Mexico's efforts to build capacity to combat TCOs, strengthen the rule of law and respect for human rights, reduce violence, and stem the flow of drugs north and arms and illicit money south. DOD is working with its counterparts in Mexico to assist their efforts to dismantle TCOs. The Department recognizes that, moving forward, U.S. efforts should reinforce the progress made in disrupting cartels. The United States should also reinforce Mexico's move toward institutionalizing its capacity to act on public safety and security issues, transform its borders to respond to security threats while at the same time remaining competitive globally, and ensure that communities see the benefit of respecting human rights and the rule of law and adopting a culture of lawfulness.

It does not appear that TCO violence is spilling across the border into the United States. Still, the Department recognizes that TCOs have linkages to illicit groups operating inside the United States, including drug traffickers and gangs that pose health, law enforcement, economic, and security challenges to cities and towns throughout the United States. Although Mexico has called upon its armed forces to support Mexican law enforcement efforts in combating TCOs, they continue to see the problem as law enforcement in nature, as does the U.S. Government. DOD, along with its interagency partners, is working closely with its Mexican counterparts to support their efforts to dismantle TCOs, and if confirmed, in coordination with interagency partners, I will continue the Department's efforts to provide assistance as requested by the Government of Mexico.

158. Senator CORNYN. Mr. Panetta, could Mexico become a failed state?
Mr. PANETTA. [Deleted.]

159. Senator CORNYN. Mr. Panetta, what would a failed state mean for the United States?
Mr. PANETTA. [Deleted.]

160. Senator CORNYN. Mr. Panetta, I am encouraged by your written response acknowledging that, in order to confront the threats posed by transnational criminal organizations in Mexico, "it is necessary to harness the talents and resources of DOD, in coordination with those of DOD's Federal partners and the Governments of Mexico and Central American nations . . . I believe a long-term solution will require a whole-of-government effort." What would you do to leverage DOD resources in confronting this growing threat on our southern border?

Mr. PANETTA. U.S.-Mexico relations have grown significantly in recent years. The increased military-to-military engagement between our two nations is especially valued. DOD is working closely with interagency partners to provide support and deliver assistance, as requested by the Government of Mexico. As I understand it, DOD representatives meet and speak regularly with Government of Mexico officials to assess the progress we have made to date, and to identify priorities moving forward through established forums such as the U.S.-Mexico Defense Bilateral Working Group and other ongoing meetings with Government of Mexico officials. As the force directly confronting the TCOs, the Government of Mexico is best positioned to identify the resources and support needed to challenge the organizations operating in Mexican territory. The most important step DOD can take is to be prepared to respond quickly when assistance is requested. I look forward to working closely with

U.S. national security agencies, Mexico, Central American Governments, and Congress to shape the scope and scale of continued DOD efforts.

161. Senator CORNYN. Mr. Panetta, how would you improve interagency cooperation in this area?

Mr. PANETTA. DOD has been engaged with its Mexican counterparts on exchanges and training, providing equipment, and information sharing for many years. But as I mentioned previously, defense assistance is a small part of the U.S. whole-of-government support to Mexico, which focuses on building civilian institutions and capacity and for which DOD is in complete support.

I will ensure that DOD continues to work closely with other U.S. departments and agencies and foreign partners to integrate our cooperation with Mexico. DOD has unique capabilities within the U.S. Government, but it must ensure that its policies are complementary rather than duplicative, and that those agencies with the right tools have a seat at the table. Although the Government of Mexico has called upon its armed forces to support Mexican law enforcement efforts in combating transnational criminal organizations, as I understand it, Mexico continues to see the problem as law enforcement in nature, and the U.S. Government agrees with this assessment. In addition to DOD's engagement with its Mexican counterparts, if confirmed, I will ensure that DOD remains prepared to provide support to U.S. law enforcement agencies in their work with Mexico.

THE FUTURE OF IRAQ

162. Senator CORNYN. Mr. Panetta, the recent killing of five American soldiers served as a chilling reminder that security in Iraq remains fragile. The radical Shiite cleric, Moqtada al-Sadr, is attempting to reinsert himself into Iraq's political process through demonstrations and threats of violence. Several military and civilian leaders have expressed serious concern regarding the Iraqis' limited military capabilities in the key areas of logistics, intelligence, and aviation, and what those shortfalls will mean for Iraq once U.S. forces withdraw as planned, by December 31, 2011. How concerned are you about stability in Iraq following the departure of U.S. Armed Forces?

Mr. PANETTA. Although the ISF are currently functioning well as a counter-insurgency force and demonstrating the capability to maintain internal security, U.S. Forces-Iraq (USF-I) assesses that gaps, particularly in the capability to defend against external threats, will exist. USF-I assesses that the broad categories of projected gaps are cross-ministerial intelligence sharing; combined arms capability; integrated air defense and air sovereignty enforcement; and sustainment and logistics. USF-I will focus its efforts on these areas between now and the end of the mission. Additionally, USF-I will continue to assist the Iraqis in the fielding of modernized equipment, providing advice during maneuver training, conducting advanced specialty skills training, and working to mature maintenance and supply operations.

163. Senator CORNYN. Mr. Panetta, can the Iraqis adequately prevent terrorist organizations from taking root and growing in Iraq?

Mr. PANETTA. [Deleted.]

IRAN

164. Senator CORNYN. Mr. Panetta, it remains clear that Iran plans to influence the future of Iraq. The ongoing Iranian meddling in Iraqi affairs is very concerning. In your opinion, how would a complete withdrawal of U.S. forces impact Iran's relations with Iraq?

Mr. PANETTA. We remain troubled by Iran's continued support to and training of militant groups that target both Iraqi and U.S. personnel. We encourage Iran to maintain constructive and peaceful relations with its neighbor Iraq, with which it shares a long history of cultural, religious, and economic ties. Iran should respect Iraqi sovereignty and end its support to those who promote terrorism in Iraq. In addition, Iraq is a sovereign country and has proven resistant to Iranian meddling.

165. Senator CORNYN. Mr. Panetta, would this give the Iranians more opportunity to influence Iraq's future course?

Mr. PANETTA. Iran has pursued a multi-pronged strategy in Iraq consisting of political outreach, soft-power initiatives, and lethal support for surrogate groups. Iran often seeks to fill power vacuums, real or perceived, in order to gain leverage. It is therefore possible that Iran could view the U.S. draw down as an opportunity to

gain such leverage. However, Iraq is a sovereign country that, in its own interest, would be expected to resist efforts by any of its neighbors to exert improper influence.

INDIA'S ROLE IN AFGHANISTAN

166. Senator CORNYN. Mr. Panetta, as of February, there was a shortage of 740 trainers in Afghanistan needed to train Afghan soldiers and police. Last summer, Secretary Gates signed an order sending 850 military personnel to Afghanistan as a stop-gap measure to fill vacancies in the high-priority effort to train local security forces. Administration officials continue to reaffirm that the trainers' mission is essential for preparing Afghan forces to take over the security mission and remains a central tenet of the transition strategy in Afghanistan. Meanwhile, India has proven its willingness to support the effort in Afghanistan, playing an important role in the ongoing reconstruction efforts. To date, India has committed some \$1.3 billion to this cause, in addition to some 3,500 Indian personnel working on relief and reconstruction projects in Afghanistan. Given the clear and immediate demand for more trainers and training options in Afghanistan, as well as India's willingness to help thus far, should we invite India to play a greater role in training the Afghan security forces?

Mr. PANETTA. India provides scholarships for ANSF personnel to study in India, and the Indian Government is currently exploring options to train Afghan women police in India. We welcome these efforts and have encouraged India to coordinate its efforts with the NATO Training Mission in Afghanistan (NTM-A).

We also encourage India to consider further assistance in Afghanistan through priority infrastructure projects and additional training and education assistance and technical assistance to the agriculture sector. As Prime Minister Singh's recent visit to Afghanistan illustrated, India continues to work bilaterally with the Afghan Government to identify additional areas of cooperation.

During President Obama's visit to India in November 2010, he and Prime Minister Singh committed to intensify consultation, cooperation, and coordination to promote a stable, prosperous, and independent Afghanistan. They agreed to collaborate closely to assist the people of Afghanistan by identifying opportunities to leverage our relative strengths, experience, and resources, including joint projects on agriculture and women's economic development. Eighty-five percent of Afghans derive their income from agriculture, and Afghan women continue to lack economic, social, and political opportunities.

PERSONNEL COSTS

167. Senator CORNYN. Mr. Panetta, in your written responses, you note that the portion of DOD's budget devoted to personnel-related costs continues to grow. You acknowledge that the current military compensation system "remains rooted in structures established generations ago," and that you "believe it may be possible to restructure our military benefits in a way that reduces costs." Likewise, Secretary Gates, in his last major policy speech delivered on May 24, stated that we may need to consider "reexamining military compensation levels in light of the fact that—apart from the U.S. Army during the worst years of Iraq—all the Services have consistently exceeded their recruiting and retention goals . . ." If confirmed, do you intend to direct a comprehensive review of military pay and benefits?

Mr. PANETTA. The fiscal environment requires us to look at all areas to meet the savings target including compensation, but we will take care of our personnel and their families, particularly our Wounded Warriors whose sacrifices demand that we deliver on our promises.

168. Senator CORNYN. Mr. Panetta, what overarching changes and modifications do you believe are necessary to control rising personnel costs, while continuing to adequately provide for servicemembers?

Mr. PANETTA. We need to examine all aspects of compensation in a manner that recognizes the unique nature of military life and the need to attract and retain needed personnel. While I don't yet have any specific proposals, I do recognize the importance of this review.

169. Senator CORNYN. Mr. Panetta, do you agree with the recent recommendation of Admiral Mike Mullen, Chairman of the Joint Chiefs of Staff, that when implementing President Obama's call for \$400 billion in cuts to security spending, savings

should be identified within military pay and benefits before cuts are made to force structure, such as weapons programs, equipment, and end strength?

Mr. PANETTA. I look forward to working with the Chairman of the Joint Chiefs of Staff about priorities and potential areas for savings. Finding the \$400 billion sought by the President will require us to make disciplined decisions in a number of areas, and we will need to find the right balance between military pay and benefits, weapons programs, equipment, and end strength.

MILITARY RETIREMENT SYSTEM

170. Senator CORNYN. Mr. Panetta, your written responses also evidenced your concerns regarding the military retirement system, including that it was “created in an earlier era,” and that it “may be appropriate to also review the military retirement system for needed changes and efficiencies.” Secretary Gates also stated in his May 24 speech that we currently have a “one-size-fits-all approach to retirement, pay, and pensions left over from the last century.” He went on to say, “a more tiered and targeted system—one that weighs compensation towards the most demand and dangerous specialties—could bring down costs while attracting and retaining the high quality personnel we need . . .” If confirmed, do you intend to direct a comprehensive review of the military retirement system?

Mr. PANETTA. I expect that, if confirmed, I will need to direct a review of all aspects of military compensation including retirement. That review needs to recognize the unique nature of military life. If retirement changes are proposed, I am committed to grandfathering those currently serving.

171. Senator CORNYN. Mr. Panetta, what overarching changes and modifications do you believe are necessary to control rising costs while continuing to attract the high-quality personnel we need for our national defense?

Mr. PANETTA. Controlling rising costs will require us to make disciplined decisions in a number of areas. We will need to find the right balance between military pay and benefits, weapons programs, equipment and end strength and understand the impact of any pay changes on our ability to recruit and retain the future force.

MILITARY VOTING

172. Senator CORNYN. Mr. Panetta, in a letter to me dated December 16, 2009, Deputy Secretary of Defense William J. Lynn wrote, “I am pleased to inform you that I will designate all military installation voting assistance offices as National Voter Registration Act (NVRA) agencies . . . Those designations will be advertised to State and local election officials, as well as Uniformed Service voters, when implemented.” This action was taken under section 7(a)(2) of the NVRA. Please provide a detailed status on the implementation of this decision.

Mr. PANETTA. Since July 2010, the Department has accomplished the following:

- Federal Voting Assistance Program (FVAP) provided an Installation Voter Assistance (IVA) Office Training Handbook including specific step-by-step voting assistance decision trees for both military and civilians entering the IVA office.
- In-person training was provided in 36 military concentration areas, and three webinars were conducted to assist installation personnel who were unable to attend the in-person training.
- The Under Secretary for Personnel & Readiness issued Directive-Type Memorandum 10–021, directing the Services to establish IVA Offices at all military installations.
- The Department is completing the revision of DOD Directive 1000.04, FVAP, which includes instructions to the Services for fulfilling all aspects of the Military and Overseas Voter Empowerment Act. This is scheduled for completion later this year.
- The Service Senior Voting Representatives report quarterly to the Director, FVAP, on the implementation of IVA Offices and on other voting assistance metrics. The Services expect to have 100 percent Voter Assistance Office and NVRA implementation by the end of fiscal year 2011.

173. Senator CORNYN. Mr. Panetta, what is your opinion on the proper role of DOD in ensuring that our military personnel and their families have a meaningful opportunity to vote in Federal elections, regardless of whether they are stateside or overseas?

Mr. PANETTA. The role of DOD is to assist uniformed servicemembers, their families, and overseas voters to exercise their right to vote.

CIA LEGAL EXPENSES

174. Senator CORNYN. Mr. Panetta, Attorney General Eric Holder reopened the investigations of several CIA interrogators in August 2009, after their cases had been formally closed in 2007 following thorough consideration by Federal prosecutors. Has the CIA paid for any of the legal expenses incurred by these interrogators as a result of these re-investigations? If so, how much Federal funding has the CIA spent on these efforts to date?

Mr. PANETTA. The CIA's expenditure of its appropriations for legal expenses incurred in connection with investigations of CIA interrogators, and the Agency's potential need for additional Federal funding for such expenses, are matters beyond this Department's purview. Accordingly, I defer to the CIA for response.

175. Senator CORNYN. Mr. Panetta, how much additional Federal funding does the CIA anticipate needing to spend on this?

Mr. PANETTA. The CIA's expenditure of its appropriations for legal expenses incurred in connection with investigations of CIA interrogators, and the Agency's potential need for additional Federal funding for such expenses, are matters beyond this Department's purview. Accordingly, I defer to the CIA for response.

UNITED KINGDOM

176. Senator CORNYN. Mr. Panetta, what are the implications of the United Kingdom's reductions in military spending for the future of the NATO alliance?

Mr. PANETTA. We are concerned about the implications reductions in defense expenditure across the Alliance will have on NATO's future viability. The Department continues to engage in frank discussions with all of our NATO partners, in public and private, regarding the challenges associated with declining defense expenditures.

The United Kingdom faces an austere budget environment coupled with an unsustainable defense program that needs to be overhauled. It will implement a number of cuts as a result of its Strategic Defense and Security Review (SDSR) reducing the size and some of the capabilities of its armed forces. Nevertheless, we expect that the United Kingdom will maintain its position as a leading NATO partner for the long term.

Although these are challenging economic times and many countries have significant fiscal challenges, all allies will need to find ways to spend limited funds more wisely through pooling, specialization, and multinational procurement. Although not a panacea, these practices should help our NATO allies to get more capability out of their defense investment.

177. Senator CORNYN. Mr. Panetta, are there any lessons from the United Kingdom's reductions that can be applied to the current U.S. debate about defense spending reductions?

Mr. PANETTA. Yes. The United Kingdom undertook a SDSR last year to tackle the very difficult problem of an austere fiscal environment and a defense program that was overspent, overstretched, and in need of new strategic direction. It is important to note that, even after the SDSR, the United Kingdom was able to maintain 2 percent of GDP expenditure on its military, sustain its commitment to NATO operations in Afghanistan, and respond to the situation in Libya as a leading partner in the effort.

Our own defense establishment must also address an increasingly austere budgeting environment, a complex set of security challenges, and an uncertain future. We are consulting with the British on shared lessons and experiences as our defense establishments continue to explore efficiencies and best practices in our respective defense models.

F-22 EXPORTS

178. Senator CORNYN. Mr. Panetta, Air Force Chief of Staff General Norton Schwartz has previously indicated that having a fleet of only 187 F-22 fighters creates a high risk for the U.S. military in meeting its operational demands. Given China's development of a stealth aircraft and Russia's development and export of air defense systems, the F-22 Raptor has taken on even greater importance. If con-

firmed, will you consider creating an export variant of the F-22 for sale to allied air forces?

Mr. PANETTA. I will review the F-22 program, along with my planned review of all of the Department's major weapons systems. However, it is my understanding that export versions of U.S.-made weapons systems are the result of interest from foreign countries through Foreign Military Sales (FMS) requests. At this time I am not aware of any official requests for F-22 FMS.

WEAPON SYSTEM CODEVELOPMENT WITH INDIA

179. Senator CORNYN. Mr. Panetta, there are eight partner nations committed to the development and production of the F-35 Joint Strike Fighter. These partnerships are the source of extra investment for development of the aircraft, help drive down per-unit cost, and support the industrial base through foreign military sales. I believe there is potential for the United States and our strategic partner India to co-develop one or more military weapon systems, such as the replacement aircraft for the Air Force's 40-year old T-38 trainer aircraft. Co-development of a trainer jet would also expand the opportunities for U.S. Air Force pilots and Indian Air Force pilots to train side-by-side, which would be of great value. Do you agree that co-developing a weapon system with India would be in both our strategic and fiscal interest? Do you support this idea?

Mr. PANETTA. The Department accrues significant benefit from cooperative research and development projects with our NATO partners and friendly foreign nations. 10 U.S.C. 2350a requires our acquisition community to provide an assessment of cooperative opportunities prior to the first acquisition milestone or decision point. I agree that co-development is in both our strategic and fiscal interest and support the idea. If an opportunity for co-development with India were to arise, we would certainly pursue it if practically feasible.

180. Senator CORNYN. Mr. Panetta, what other future programs would be good candidates for DOD to embark on similar joint development efforts with India?

Mr. PANETTA. The Department identifies assessment of cooperative opportunities for co-development at or before the first acquisition milestone or decision point. During that analysis we identify good candidates for joint development. I do not, at this point, know of any specific candidates identified for co-development programs with India, although there is an ongoing cooperative research and development engagement with India.

QUESTIONS SUBMITTED BY SENATOR DAVID VITTER

IRAN NUCLEAR WEAPONS CAPABILITY

181. Senator VITTER. Mr. Panetta, Iran continues to maintain a rapid pace in its progress towards a nuclear weapons capability. The International Atomic Energy Agency continues to report that Iran conducts illicit nuclear activity. Iran's missile program also shows progress towards a nuclear weapons capability that demonstrates prospective increases in proficiency and range. In fact, Iran has already enriched a sufficient quantity of uranium to produce multiple nuclear warheads if it further enriched that material to weapons-grade level. In response, the United States and our allies have imposed significant sanctions on Iran, with the hopes that these steps will press Tehran to change course. Do you agree that the prospect of a nuclear-armed Iran and the persistent threat posed by Iran's proxies, Hamas and Hezbollah, demonstrate the need for the missile defense systems being developed by the United States and its allies?

Mr. PANETTA. Yes, the ballistic missile threat from Iran and its continued defiance of international obligations regarding its nuclear program demonstrate the need for the development and deployment of missile defenses for the protection of the United States, as well as our deployed forces, allies, and partners.

182. Senator VITTER. Mr. Panetta, do you agree that Iran's pursuit of nuclear weapons poses an unacceptable risk to the United States?

Mr. PANETTA. We remain committed to preventing Iran from acquiring a nuclear weapon. The consequences of a nuclear-armed Iran would be highly destabilizing for the Middle East, and could have significant implications for U.S. interests. No one can say with certainty how the situation might unfold, but a nuclear-armed Iran could cause other states in the Middle East to pursue nuclear programs. It could also embolden Iran in its actions throughout the region—most notably by expanding

its support for proxies. A nuclear-armed Iran could also cause strategic instability that could eventually lead to a regional conflict.

183. Senator VITTER. Mr. Panetta, do you agree with the President that all options must be on the table to address Iran's illicit activities?

Mr. PANETTA. Yes, I agree with the President that all options should remain on the table to address Iran's illicit activities. It is DOD's responsibility to plan for all contingencies, and through prudent military planning we continue to refine options to protect U.S. and partner interests from Iranian aggression. However, we continue to believe that diplomacy and economic pressure are the most effective tools for changing Iranian behavior at this time.

184. Senator VITTER. Mr. Panetta, if confirmed, will you ensure DOD is prepared to carry out any orders the President may give to address the threat of an Iranian nuclear weapon?

Mr. PANETTA. It is DOD's responsibility to plan for all contingencies, and through prudent military planning we continue to refine options to protect U.S. and partner interests from Iranian aggression. However, we continue to believe that diplomacy and economic pressure are the most effective tools for changing Iranian behavior and achieving our objectives. I will continue to ensure the Department is prepared to carry out any orders given by the Commander in Chief.

MILITARY PERSONNEL LOANS/CREDIT

185. Senator VITTER. Mr. Panetta, I would like to raise an issue regarding lending to military personnel that has come to my attention and which I find very concerning. The North Carolina legislature is considering legislation (HB 810) that would increase interest rates charged by installment finance lenders. DOD has clearly defined regulations governing lending to military personnel (32 CFR Part 232) which imposes a 36 percent rate cap on short-term loans which do not amortize. Yet, during a hearing military officers testified against the bill indicating that the Office of Secretary of Defense "found the bill objectionable."

Further, when Congress passed the Wall Street Reform Act, despite the opportunity to do so, DOD did not recommend any changes to the statute governing these regulations nor did Congress enact any changes.

When DOD reviewed and considered the regulation in place that imposes a 36 percent rate cap on short-term payday loans which do not amortize, it found that amortizing installment loans should not be covered by the regulation.

72 Federal Register 5058 (August 31, 2007), at page 50582, reads: "Likewise, there are installment loans with favorable terms and some with terms that can increase the interest rate well beyond the limits prescribed by 10 U.S.C. 987. Isolating detrimental credit products without impeding the availability of favorable installment loans was of central concern in developing the regulation. Consequently, installment loans that do not fit the definition of 'consumer credit' in section 232.3(b), including the definition of 'payday loans,' 'vehicle loans,' or 'tax refund anticipation loans' are not covered by the regulation. The Department's intent is to balance protections with access to credit. The protections posed in the statute assist servicemembers, when applied with precision to preclude unintended barriers."

However, I have seen reports of local commanders and civilian representatives of DOD advocating at the State level against the very types of loan instruments that DOD's own regulations call a favorable form of credit for servicemembers and their families.

I am very concerned about continued credit availability to military families. Has DOD changed its policy to include other lenders within the coverage of the regulation?

Mr. PANETTA. No, DOD has not changed its policy and does not intend at this time to include other lenders within the coverage of the regulation. The Department proposes to help ensure that servicemembers and their families receive fair protections by working with Federal and State governments on existing and proposed policies impacting all consumers. The goal is to try to eliminate the need to identify servicemembers and their families separately for protections, which may create unintentional barriers to credit.

186. Senator VITTER. Mr. Panetta, has there been any study finding abuse in this area?

Mr. PANETTA. There have been no DOD-directed studies of installment lending practices.

187. Senator VITTER. Mr. Panetta, is it still the position of DOD to balance consumer protection while preventing unintended barriers to obtaining credit?

Mr. PANETTA. Yes, this is still DOD's position. The Department proposes to help ensure that servicemembers and their families receive fair protections by working with Federal and State governments on existing and proposed policies impacting all consumers. The goal is to try to eliminate the need to identify servicemembers and their families separately for protections, which may create unintentional barriers to credit.

[The nomination reference of Hon. Leon E. Panetta follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
May 26, 2011.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Leon E. Panetta, of California, to be Secretary of Defense, vice Robert M. Gates.

[The biographical sketch of Hon. Leon E. Panetta, which was transmitted to the committee at the time the nomination was referred, follows:]

RÉSUMÉ OF CAREER SERVICE OF HON. LEON E. PANETTA

Education:

- Santa Clara University, 1956–1960
 - Bachelor of Arts Degree in Political Science awarded 1960
- Santa Clara University School of Law 1960–1963
- Juris Doctor Law Degree awarded in 1963

Employment Record:

The following are positions for which I received compensation:

- Central Intelligence Agency
 - Director
 - 2009–present
- Santa Clara University
 - Presidential Professor
 - 1999–2009
- California State University Office of the Chancellor
 - Distinguished Scholar
 - 1997–2009
- Joint Ocean Commission Initiative
 - Commissioner and Co-Chair (compensation from Meridian Institute)
 - 1996–2009.
- Meridian Institute .
 - Board of Directors (no compensation) Member, Policy Planning Staff
 - 2008–2009
- Blue Shield of California
 - Director
 - 2001–2009
- International Advisory Board, Fleischman-Hillard,
 - Member
 - 1998–2009
- Corinthian Colleges Inc.
 - Director
 - 2008–2009
- BP Corp. North America, Inc.
 - Member of Advisory Board

- 2005–2009
- Zenith Insurance Company
 - Director
 - 2000–2009
- California Forward
 - Co-Chair
 - 2007–2009
- Inns of Monterey LTD & Inns of Cannery Rd LTD
 - Director
 - 2003–2009
- Pacific Maritime Association
 - Governmental Advisor
 - 1998–2009
- IDT Corp.
 - Director
 - 2004–2006
- Connetics Corp. (Stiefel Laboratories)
 - Director
 - 2000–2006
- New York Stock Exchange
 - Director
 - 1997–2003
- New York Stock Exchange
 - Co-chairman, Corporate Accountability and Listing Standards Committee
 - 2002–2003

The following are uncompensated positions in which I have served, although in some cases I was compensated for my necessary expenses associated with my work in the organization:

- Leon & Sylvia Panetta Institute for Public Policy
 - Founder and Co-Director
 - 1998–2009
- Pew Oceans Commission
 - Chairman (2000–2003)
 - Commissioner (2003–2006)
- Bread for the World
 - Director
 - 2001–2009
- National Marine Sanctuary Foundation
 - Director
 - 2004–2009
- Close Up Foundation
 - Director
 - 1999–2009
- Junior Statesmen Foundation, Inc.
 - Trustee
 - 2003–2009
- Public Policy Institute of California
 - Director
 - 2005–2009
- National Review Board, U.S. Conference of Catholic Bishops
 - Member
 - 2002–2004
- National Steinbeck Center
 - Director
 - 1998–2001
- U.C. Santa Cruz Foundation
 - Director
 - 1998–2001
- Santa Clara University Law School Board of Visitors
 - Member

- 1998–2009
- Santa Clara University Board of Trustees
 - Member
 - 2000–2009
- Community Hospital of the Monterey Peninsula
 - Trustee
 - 2000–2007
- Center for National Policy
 - Chairman of the Board
 - 1999–2003
- Power Up
 - Director
 - 1999–2000
- Independent Task Force on Immigration and America’s Future
 - Member
 - 2005–2007
- Monterey Bay Aquarium
 - Director
 - 2004–2008
- National Leadership Roundtable on Church Management
 - Director
 - 2005–2009
- Citizens Advisory Group of the Panel on the Nonprofit Sector
 - Member
 - 2005
- National Advisory Council for Aspen Rodel Fellowship Program, Aspen Institute
 - Member
 - 2005–2009
- Aspen Security Group, Aspen Institute
 - Member
 - 2008–2009
- Marks Ranch Advisory Committee, Big Sur Land Trust
 - Co-Chair
 - 2005–2007
- Bretton Woods Committee
 - Member
 - 2001–2009
- California Foundation on the Environment and the Economy
 - Director
 - 2000–2009
- National Advisory Committee, Campaign for the Civic Mission of Schools
 - Trustee
 - 2008–2009
- Caring Institute
 - Honorary Trustee
 - 2001–2009
- Center for the Study of the Presidency
 - Member, Strengthening America’s Future Initiative Steering Committee
 - Member, National Commission to Unite a Divided America
 - Trustee
 - 2008–2009
- Children’s Neurobiological Solutions Foundation
 - Member, Board of Advisors
 - 2001–2009
- Committee for a Responsible Federal Budget
 - Trustee
 - 2000–2009
- Making Washington Work Committee, Committee for Economic Development

- Member
- 2006–2009
- National Advisory Board, Commission on the Future of America’s Veterans
 - Member
 - 2006–2009
- Committee on the Constitutional System
 - Co-Chair
 - 1999–2009
- Leadership Council, Competitive Clusters
 - Member
 - 2003–2009
- Consortium for Ocean Leadership
 - Trustee
 - 2008–2009
- Council for Excellence in Government
 - Principal
 - 2000–2009
- Friends of Long Marine Lab
 - Honorary Director
 - 2006–2009
- Heartland Democracy Center
 - Selected Advisor
 - 2007–2009
- Meridian Institute
 - Director
 - 2008–2009
- National Commission on Federal Reform
 - Member
 - 2001
- Next Ten
 - Senior Advisor
 - 2003–2009
- Ocean Champions
 - Advisory Committee
 - 2003–2009
- Advisory Board of Governors, Partnership for Public Service
 - Member
 - 2004–2009

In addition to the compensated activities mentioned above, prior to my confirmation as Director of the Central Intelligence Agency, I had conducted much of my pre-2009 independent writing (such as my column in the Monterey Herald), speaking (including my Washington Speakers Bureau work), and other professional business through Panetta & Associates, an unincorporated sole proprietorship. I received no salary from Panetta & Associates, but I did receive through it compensation for writing and speaking.

Honors and Awards:

- Army Commendation Medal, 1966
- NEA Lincoln Award, 1969
- A. Philip Randolph Award, 1984
- The Farm Bureau’s Golden Plow Award, 1991
- The American Council on the Teaching of Foreign Languages President’s Award, 1991
- The Peter Burnett Award for Distinguished Public Service, 1993
- The Distinguished Public Service Medal from the Center for the Study of the Presidency, 1995
- The Special Achievement Award for Public Service from the National Italian American Foundation, 1997
- John H. Chafee Coastal Stewardship Award, 2001
- Special Achievement Award, Santa Clara University School of Law Alumni Association, 2002
- Julius A. Stratton Award for Coastal Leadership, 2003

- Exemplary Leadership Award from the American Leadership Forum, Silicon Valley, 2004
- Aquarium of the Pacific Ocean Conservation Award, 2006
- Lifetime Achievement Award for the National Marine Sanctuary Foundation, 2006
- Smithsonian Institution National Portrait Gallery Paul Peck Presidential Award, 2006
- Natural Resources Defense Council Forces for Nature Award, 2007
- National Hospice Foundation Silver Anniversary Honoree, 2007
- Lifetime of Service Award, City Year Silicon Valley, 2007
- Distinguished Public Service Award, Association of Jesuit Colleges and Universities, 2007
- The Santa Clara University School of Law Social Justice and Human Rights Award, 2008

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate, and certain senior military officers as determined by the committee, to complete a form that details the biographical, financial and other information of the nominee. The form executed by Hon. Leon E. Panetta in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Leon Edward Panetta.
2. **Position to which nominated:**
Secretary of Defense.
3. **Date of nomination:**
May 26, 2011.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
June 28, 1938; Monterey, CA.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Sylvia (Varni) Panetta.
7. **Names and ages of children:**
Christopher Panetta, age 48.
Carmelo Panetta, age 46.

James Panetta, age 41.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Monterey High School, 1952–1956, diploma.

Santa Clara University, 1956–1960, BA in Political Science, 1960.

Santa Clara University, 1960–1963, JD, 1963.

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

The following are positions for which I received compensation. Note that the dates are my best recollection.

- Director, Central Intelligence Agency, McLean VA, 2009-present
- Presidential Professor, Santa Clara University, Santa Clara, CA, 1999–2009
- Distinguished Scholar, California State University Office of the Chancellor, Monterey CA, 1997–2009
- Commissioner and Co-Chair, Joint Ocean Commission Initiative, 1996–2009 (compensation from Meridian Institute)
- Director, Blue Shield of California, San Francisco CA, 2001–2009
- Member, International Advisory Board, Fleischman-Hillard, 1998–2009
- Director, Corinthian Colleges Inc., Santa Ana, CA, 2008–2009
- Member of Advisory Board, BP Corp. North America, Inc., Warrenville IL, 2005–2009
- Director, Zenith Insurance Company, Woodland Hills CA, 2000–2009
- Co-Chair, California Forward, Sacramento CA, 2007–2009
- Director, Inns of Monterey LTD & Inns of Cannery Rd LTD, Monterey CA, 2003–2009
- Governmental Advisor, Pacific Maritime Association, San Francisco CA, 1998–2009
- Director, IDT Corp., Newark, NJ, 2004–2006
- Director, Connetics Corp. (Stiefel Laboratories), Research Triangle Park, NC, 2000–2006
- Director, New York Stock Exchange, New York, NY, 1997–2003
- Co-chairman, Corporate Accountability and Listing Standards Committee, New York Stock Exchange, New York, NY, 2002–2003

The following are uncompensated positions in which I have served, although in some cases I was compensated for my necessary expenses associated with my work in the organization. Dates are to the best of my recollection.

- Leon & Sylvia Panetta Institute for Public Policy, Founder and Co-Director, 1998–2009
- Pew Oceans Commission, Chairman (2000–2003) and Commissioner (2003–2006)
- Director, Bread for the World, 2001–2009
- Director, National Marine Sanctuary Foundation, 2004–2009
- Director, Close-Up Foundation, 1999–2009
- Trustee, Junior Statesmen Foundation, Inc., 2003–2009
- Director, Public Policy Institute of California, 2005–2009
- Member, National Review Board, U.S. Conference of Catholic Bishops, 2002–2004
- Director, National Steinbeck Center, 1998–2001
- Director, U.C. Santa Cruz Foundation, 1998–2001
- Member, Santa Clara University Law School Board of Visitors, 1998–2009
- Member, Santa Clara University Board of Trustees, 2000–2009
- Trustee, Community Hospital of the Monterey Peninsula, 2000–2007
- Chairman of the Board, Center for National Policy, 1999–2003
- Director, Power Up, 1999–2000
- Member, Independent Task Force on Immigration and America's Future, 2005–2007
- Director, Monterey Bay Aquarium, 2004–2008
- Director, National Leadership Roundtable on Church Management, 2005–2009
- Member, Citizens Advisory Group of the Panel on the Nonprofit Sector, 2005
- Member, National Advisory Council for Aspen Rodel Fellowship Program, Aspen Institute, 2005–2009
- Member, Aspen Security Group, Aspen Institute, 2008–2009

- Co-Chair, Marks Ranch Advisory Committee, Big Sur Land Trust, 2005–2007
- Member, Bretton Woods Committee, 2001–2009
- Director, California Foundation on the Environment and the Economy, 2000–2009
- Trustee, National Advisory Committee, Campaign for the Civic Mission of Schools, 2008–2009
- Honorary Trustee, Caring Institute, 2001–2009
- Member, Strengthening America's Future Initiative Steering Committee; Member, National Commission to Unite a Divided America; and Trustee, Center for the Study of the Presidency, 2008–2009
- Member, Board of Advisors, Children's Neurobiological Solutions Foundation, 2001–2009
- Trustee, Committee for a Responsible Federal Budget, 2000–2009
- Member, Making Washington Work Committee, Committee for Economic Development, 2006–2009
- Member, National Advisory Board, Commission on the Future of America's Veterans, 2006–2009
- Co-Chair, Committee on the Constitutional System, 1999–2009
- Member, Leadership Council, Competitive Clusters, 2003–2009
- Trustee, Consortium for Ocean Leadership, 2008–2009
- Principal, Council for Excellence in Government, 2000–2009
- Honorary Director, Friends of Long Marine Lab, 2006–2009
- Selected Advisor, Heartland Democracy Center, 2007–2009
- Director, Meridian Institute, 2008–2009
- Member, National Commission on Federal Reform, 2001
- Senior Advisor, Next Ten, 2003–2009
- Advisory Committee, Ocean Champions, 2003–2009
- Member, Advisory Board of Governors, Partnership for Public Service, 2004–2009

In addition to the activities mentioned above, prior to my confirmation as Director of the Central Intelligence Agency, I had conducted much of my pre-2009 independent writing (such as my column in the Monterey Herald), speaking (including my Washington Speakers Bureau work), and other professional business through Panetta & Associates, an unincorporated sole proprietorship. I received no salary from Panetta & Associates, but I did receive through it compensation for writing and speaking and I paid my wife, Sylvia, a salary as its single employee. Note that Panetta & Associates, the sole proprietorship through which my wife used to receive a salary, is a different entity from The Panetta Institute, where she currently serves as the Director in an unpaid capacity (see Part B, Question 5).

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

- Iraq Study Group, 2006
- Co-chair, Council on Base Support and Retention, Office of the Governor of California, 2004–2005
- Chief of Staff, The White House, 1994–1997
- Director, Office of Management and Budget, 1993–1994
- Member of Congress, U.S. House of Representatives, 1977–1993
- Executive Assistant, Mayor of New York City, 1970–1971
- Director, U.S. Department of Health, Education, and Welfare (HEW) Office of Civil Rights, 1969–1970
- Special Assistant to Secretary, U.S. HEW, 1969
- Legislative Assistant, U.S. Senator Thomas Kuchel, 1966–1969
- Officer, U.S. Army, 1964–1966

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

I resigned from all previously held positions upon becoming Director of the Central Intelligence Agency.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

None other than my regular attendance at the Our Lady of Mount Carmel Catholic Church in Carmel Valley, CA.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

I successfully ran for the U.S. House of Representatives in California every 2 years from 1976 to 1992, in the 16th (1976–1990) and the 17th (1992) congressional districts.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

I have been a member of the Democratic Party for many years.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

I have contributed to Democratic candidates over the years. Below is what has been identified from my recollection and records, as well as from a search of internet databases. Despite my searches, there may be other contributions I have been unable to identify, find or remember.

Federal:

McCloskey for Congress, \$250, 5/12/2006
 Murtha for Congress Committee, \$500, 5/15/2006; \$1,000, 3/16/2007; \$250, 2/21/2008
 America's Opportunity Fund, \$250, 10/11/2007
 Hillary Clinton for President, \$1,000, 11/28/2007; \$1,000, 3/14/2007; \$1,000, 4/30/2008
 Larocco for Senate, \$250, 6/26/2007; \$500, 10/16/2008; \$250, 2/20/2008
 Slattery for Senate, \$1,000, 6/29/2008
 Matsui for Congress, \$250, 8/7/2008
 Obama for America, \$2,300, 10/24/2008
 Spratt for Congress Committee, \$500, 6/27/2006
 DCCC, \$250, 10/31/2006
 DNC, \$2,300, 10/20/2008

State:

Anna Caballero for Assembly, \$100, 3/21/2006; \$250, 11/3/2008; \$200, 2/26/2008

14. Honors and Awards: List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

During my tenure as Director of the Central Intelligence Agency, I have been privileged to receive recognition from various organizations and foreign governments in the course of my official duties.

As a Member of Congress, executive branch official in the Nixon and Clinton administrations, and as a public figure since leaving government, I am honored to have received more awards and other recognitions from civic organizations than I can recall. Examples that we found while searching my files prior to my confirmation as Director of the Central Intelligence Agency included:

- Army Commendation Medal, 1966
- NEA Lincoln Award, 1969
- A. Philip Randolph Award, 1984
- The Farm Bureau's Golden Plow Award, 1991
- The American Council on the Teaching of Foreign Languages President's Award, 1991
- The Peter Burnett Award for Distinguished Public Service, 1993
- The Distinguished Public Service Medal from the Center for the Study of the Presidency, 1995
- The Special Achievement Award for Public Service from the National Italian American Foundation, 1997
- John H. Chafee Coastal Stewardship Award, 2001
- Special Achievement Award, Santa Clara University School of Law Alumni Association, 2002
- Julius A. Stratton Award for Coastal Leadership, 2003
- Exemplary Leadership Award from the American Leadership Forum, Silicon Valley, 2004
- Aquarium of the Pacific Ocean Conservation Award, 2006
- Lifetime Achievement Award for the National Marine Sanctuary Foundation, 2006
- Smithsonian Institution National Portrait Gallery Paul Peck Presidential Award, 2006
- Natural Resources Defense Council Forces for Nature Award, 2007
- National Hospice Foundation Silver Anniversary Honoree, 2007

- Lifetime of Service Award, City Year Silicon Valley, 2007
- Distinguished Public Service Award, Association of Jesuit Colleges and Universities, 2007
- The Santa Clara University School of Law Social Justice and Human Rights Award, 2008

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

In my official capacity as Director of the CIA, I have written multiple messages to my workforce, some of which have been made available on the cia.gov website and have been picked up by the press. Additionally, in that same official capacity, I have written two op-ed pieces:

- Congress and the CIA: Time to Move On, Leon Panetta, Washington Post, 2 August 2009, Page A17.
- The CIA is Proud to Be on the Front Lines against al Qaeda, Leon Panetta, Washington Post, 10 January 2010, Page A13.

I wrote one book, *Bring Us Together: The Nixon Team and the Civil Rights Retreat* (1971).

As a Member of Congress and executive branch official in past administrations, I authored many articles, reports, and pieces of legislation—too many to list or recall.

The following are items published between my departure from the White House in 1997 and my arrival at the CIA in 2009, to the best of my recollection.

Commission Reports

- Iraq Study Group—As a member of the Study Group, I participated in the drafting of its final report in 2006, available at <http://www.usip.org/isg/iraq-study-group-report/report/1206/index.html>
- Task Force on Immigration and America's Future—As a member of this commission, I participated in preparation of a 2006 report, available at <http://www.migrationpolicy.org/ITFIAF/index.php>.
- Pew Oceans Commission—I chaired the Commission, which released its report America's Living Oceans: Charting a Course for Sea Change in May 2003, available at <http://www.pewtrust.org/uploadedFiles/wwwpewtrustsorg/Reports/Protecting-ocean-life/env-pew-oceans-final-report.pdf>.
- National Review Board for the Protection of Children and Young People of the United States Conference of Catholic Bishops—The board, on which I served, released a number of studies, most notably *The Nature and Scope of the Problem of Sexual Abuse of Minors by Catholic Priests and Deacons in the United States*, March 2004, available at <http://www.usccb.org/nrb/nrbstudy/nrbstudyhtml.htm.org>.
- New York Stock Exchange Corporate Accountability and Listing Standards Committee—I co-chaired this committee, which released a report in June 2002, available at <http://www.nyse.com/pdfs/corp-govreport.pdf>.

Book Chapters

- "The Politics of the Federal Budget Process," chapter in James A. Thurber, ed., *Rivals for Power: Presidential-Congressional Relations*, 2002 and 2005 editions.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

As Director of the Central Intelligence Agency, I addressed my workforce in my official capacity on a regular basis. In addition to these internal speeches, I made the speeches listed below. I am providing two copies of each of these speeches, either in transcript (T) form or as prepared for delivery (APFD).

- Pacific Council on International Policy, Los Angeles, CA, May 18, 2009 T
- University of Maryland Commencement Ceremony, College Park, MD, May 21, 2009 APFD
- National Italian-American Foundation, Washington, DC, June 11, 2009 APFD
- White House Initiative on Historically Black Colleges & Universities, Washington, DC, September 1, 2009 T
- Arab-American Iftar Dinner, Dearborn, MI, September 16, 2009 APFD
- Commonwealth Club of California, San Francisco, CA, October 23, 2009 APFD
- Fall of the Berlin Wall Commemoration, CIA Headquarters, November 9, 2009 APFD
- CIA Officers Memorial Foundation, Arlington, VA, January 29, 2010 APFD
- In-Q-Tel CEO Summit, San Francisco, CA, February 9, 2010 APFD
- University of Oklahoma, Norman, OK, March 8, 2010 T
- Congressional Black Caucus, Washington, DC, April 28, 2010 APFD
- California State University—Stanislaus Commencement, Stanislaus, CA, June 4, 2010 APFD
- National Association of Asian-American Professionals Convention, San Francisco, CA, August 14, 2010 APFD
- Hispanic Association of Colleges & Universities Conference, San Diego, CA, September 1, 2010 APFD
- Santa Clara University Class of 1960 Reunion, Santa Clara, University, October 8, 2010 APFD
- Foreign Language Summit, College Park, MD, December 8, 2010 T
- Morehouse College, Atlanta, GA, March 15, 2011 APFD
- CIA Officers Memorial Foundation, Arlington, VA, March 30, 2011 APFD
- The Business Council Dinner, Washington, DC, May 12, 2011 APFD
- The Truman National Security Project & Educational Institute Conference, Washington, DC, May 13, 2011, APFD

As a Member of Congress and Executive Branch Official in past administrations, I gave innumerable speeches—too many to list or recall. I usually speak extemporaneously, with the barest of handwritten notes. The following are speeches given between 2006 and my confirmation as Director of CIA in February 2009 for which I did the most preparation, or of which there may be a transcript or recording, to the best of my recollection. I have noted where a record is available, and the format. In most cases, transcripts and videorecordings may be obtained from The Panetta Institute upon request.

- Commonfund Address, March 12, 2006, video recording
- National Marine Sanctuary Foundation Leadership Awards Dinner video tribute to Leon Panetta, June 13, 2006, video recording
- CSU Monterey Bay Master of Public Policy open house address, January 9, 2007, video recording
- Committee for a Responsible Federal Budget annual conference and dinner, March 13, 2007, video and transcript on website
- Marine Economy Forum co-hosted by Roger Williams University and the New England council, April 2, 2007, video recording
- Santa Clara University President's Speakers Series: Is There Light at the End of the Tunnel? address regarding the report of The Iraq Study Group, May 31, 2007, video on website
- Union University scholarship banquet video introduction, October 23, 2007, video recording
- Panetta Institute Jefferson-Lincoln Awards: An Evening to Honor Lives of Public Service, November 10, 2007, cable TV
- National Marine Sanctuary Program West Coast Regional Office Sustainable Tourism Symposium: Monterey Bay—Riding the Wave, November 29, 2007, video recording
- Commonfund address, March 10, 2008, video recording

- Committee for a Responsible Federal Budget annual roundtable and dinner, April 2, 2008, video and transcript on website
- Center for the Study of the Presidency address re: challenges facing the next president, April 11, 2008, summary of remarks
- Panetta Institute Monterey County Reads Volunteer Recognition Ceremony remarks, May 8, 2008, video recording
- Committee for a Responsible Federal Budget forum: Toward Fiscal Responsibility, May 20, 2008, video recording
- Carlyle Investment Management LLC, September 9, 2008, video recording
- Smithsonian Institute forum: An Evening with the Presidential Chiefs of Staff, September 15, 2008, video recording
- California Forward forum: Getting Past Gridlock—Achieving Budget Reform, September 24, 2008, video broadcast (Cal. Channel)
- Committee for a Responsible Federal Budget forum: What Comes Next? The Economic and Budgetary Consequences of the Bailout, October 8, 2008, video and transcript on website
- California Credit Union League address, November 6, 2008, video recording
- Brookings Institution Memos to the President, November 7, 2008, transcript on website
- Governors' Global Climate Change Summit: Finding Solutions Through Regional and Global Action, November 18, 2008, video webcast.

Additionally, prior to my confirmation as Director of the Central Intelligence Agency, I had often made a short introduction for speakers who participated in the Panetta Lecture Series at the Panetta Institute and then moderated discussion. A list of recordings of many of these events maybe found on the Panetta Institute's Web site at <http://www.panettainstitute.org>.

17. Commitments regarding nomination, confirmation, and service:

- (a) Have you adhered to applicable laws and regulations governing conflicts of interest?
Yes.
- (b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?
No.
- (c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?
Yes.
- (d) Will you cooperate in providing witnesses and briefers in response to congressional requests?
Yes.
- (e) Will those witnesses be protected from reprisal for their testimony or briefings?
Yes.
- (f) Do you agree, if confirmed, to appear and testify upon request before this committee?
Yes.
- (g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?
Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

LEON E. PANETTA.

This 26th day of May, 2011.

[The nomination of Hon. Leon E. Panetta was reported to the Senate by Chairman Levin on June 14, 2011, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on June 21, 2011.]

TUESDAY, JUNE 28, 2011

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:35 a.m., in room SD-G50, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Lieberman, Reed, Webb, Udall, Hagan, Begich, Blumenthal, McCain, Chambliss, Brown, Portman, Ayotte, Collins, Graham, and Cornyn.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Jessica L. Kingston, research assistant; Gerald J. Leeling, counsel; Peter K. Levine, general counsel; Jason W. Maroney, counsel; William G.P. Monahan, counsel; and Michael J. Noblet, professional staff member.

Minority staff members present: David M. Morriss, minority staff director; Adam J. Barker, professional staff member; Christian D. Brose, professional staff member; Michael J. Sistik, research assistant; Diana G. Tabler, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: Christine G. Lang and Breon N. Wells.

Committee members' assistants present: Christopher Griffin, assistant to Senator Lieberman; Carolyn Chuhta, assistant to Senator Reed; Gordon Peterson, assistant to Senator Webb; Tressa Guenov, assistant to Senator McCaskill; Casey Howard, assistant to Senator Udall; Roger Pena, assistant to Senator Hagan; Lindsay Kavanaugh, assistant to Senator Begich; Joanne McLaughlin, as-

sistant to Senator Manchin; Ethan Saxon, assistant to Senator Blumenthal; Lenwood Landrum, assistant to Senator Sessions; Clyde Taylor IV, assistant to Senator Chambliss; Joseph Lai, assistant to Senator Wicker; Charles Prosch, assistant to Senator Brown; Brent Bombach, assistant to Senator Portman; Brad Bowman, assistant to Senator Ayotte; Ryan Kaldahl, assistant to Senator Collins; Sergio Sarkany, assistant to Senator Graham; and Dave Hanke and Russ Thomasson, assistants to Senator Cornyn.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody.

The committee meets this morning to consider three military nominations for command of some of the most critical and challenging missions facing our Nation.

Our witnesses this morning on what is truly a joint panel are General James Thurman, U.S. Army, nominated to be Commander, United Nations Command, Combined Forces Command, and U.S. Forces Korea; Vice Admiral William McRaven, U.S. Navy, for appointment to the grade of admiral and nominated to be Commander, U.S. Special Operations Command (SOCOM); and Lieutenant General John Allen, U.S. Marine Corps, for appointment to the grade of general and nominated to be Commander of the North Atlantic Treaty Organization (NATO) International Security Assistance Force (ISAF) and U.S. Forces-Afghanistan.

Thank you all for your many years of great service to this Nation and your willingness to serve once again.

Let me also extend our thanks to your families, whose support is so essential to your and our Nation's success. As is the tradition of this committee, I would invite each of you to introduce any family members or friends who may be here with you when you make your opening remarks.

General Thurman's nomination as the next Commander of U.S. Forces in Korea comes at a time of significant change and simmering tension on the Korean Peninsula. Our commitment to peace and stability in the region remains steadfast, and our alliance with the Republic of Korea (ROK) is as strong as ever.

The strength of that alliance will be particularly important over the next few years, as we embark on an ambitious realignment of our forces on the peninsula and need to deal with the unpredictable and aggressive behavior of a North Korean regime that continues to follow the destructive path of an international pariah.

General Thurman's long experience in positions of leadership and with maintaining well-trained, equipped, and ready soldiers provides the kind of foundation and professional skills that will be required of the U.S. commander in Korea.

Vice Admiral William McRaven is nominated to be the ninth Commander of SOCOM. Admiral McRaven has commanded at every level in the special operations community, most recently as Commander of the Joint Special Operations Command (JSOC), and served in various staff and interagency positions, including time with the National Security Council. Incoming Secretary of Defense Leon Panetta has credited Admiral McRaven with being the "real commander" of the extraordinary operation that killed Osama bin Laden.

Admiral McRaven has been nominated to be Commander of SOCOM at a time of exceptionally high operational tempo and growth for Special Operations Forces (SOF). As the current Commander of SOCOM, Admiral Eric Olson, told the committee earlier this year, "Since September 11, our manpower has roughly doubled, our budget has roughly tripled, and our overseas deployments have quadrupled." Admiral Olson has also indicated that the force is beginning to show signs of "fraying around the edges."

Admiral McRaven, the committee looks forward to hearing your thoughts on how the stress on special operations personnel can be mitigated, given the demand for their unique skills. The committee is also interested in your views on the future of special operations and the challenges that special operations personnel are likely to face. Will the announced drawdown of forces in Afghanistan impact SOF, given that SOF depend heavily on their counterparts in the general purpose forces for many of the enabling capabilities that they need to be successful?

In addition, the committee would be interested in your thoughts on the employment of the range of special operations capabilities against al Qaeda and associated groups outside of Afghanistan, Pakistan, and Iraq. Director Panetta has expressed concern about al Qaeda's shifting to other places, most notably in Yemen, Somalia, and North Africa, and I hope that you will address what you see as the appropriate role for SOF in those areas.

In announcing Lieutenant General Allen's nomination, President Obama called him "the right commander to take over the vital mission in Afghanistan." If confirmed, Lieutenant General Allen will have some big boots to fill in succeeding General Petraeus as Commander of the 49-member ISAF coalition and U.S. Forces-Afghanistan.

Like General Petraeus, General Allen brings an in-depth understanding of the complexities of the counterinsurgency (COIN) effort based on his own experience as the commander in Anbar Province in Iraq. Working with the Sunni Awakening, the marines in Anbar succeeded in getting local Sunni tribal leaders to reject the insurgency and instead support the Iraqi Government.

As the Deputy Commander at U.S. Central Command (CENTCOM), General Allen has developed a regional perspective on issues affecting the mission in Afghanistan. He will be the first marine to serve as the top commander in Afghanistan.

General Allen's number-one priority will be implementing President Obama's decision last week to accelerate the transition of security responsibility to Afghan forces and to start bringing U.S. surge forces home. As outlined by the President, 10,000 U.S. troops will be withdrawn by the end of this year, and the remaining 23,000 U.S. surge forces will be drawn down by September of next year.

The President's decision keeps the pressure on Afghan leaders to assume more and more responsibility for their security, just as the establishment of a date to begin reductions had the effect of creating a sense of urgency on the part of the Afghan Government to take responsibility for Afghanistan's security. The assumption of that responsibility by the Afghans is the path to a successful mission and a stable, non-Taliban-controlled Afghanistan.

The President's transition decision was buttressed by the significant gains that coalition and Afghan forces, partnered together, have made in the last year in reclaiming former Taliban strongholds, particularly in the south.

Another major change in the last year is the surge in Afghan Security Forces. There are now 100,000 more Afghan Security Forces than 18 months ago when President Obama announced the U.S. surge, and another 70,000 Afghan soldiers and police who will be trained and equipped by the end of next summer, when all 33,000 U.S. surge troops will have withdrawn.

In his testimony to Congress last week, Chairman of the Joint Chiefs of Staff Admiral Mullen characterized the President's decision as "more aggressive and incurring more risk" than Admiral Mullen had initially recommended. However, Admiral Mullen felt that, "Only the President in the end can really determine the acceptable level of risk that we must take," because, as he put it, "The truth is, we would have run other kinds of risks by keeping more forces in Afghanistan longer."

Among those other risks, Admiral Mullen said, are the risks of perpetuating greater Afghan dependence on our forces and inhibiting the growth and capability and confidence on the part of Afghan forces. The committee will be interested in hearing from General Allen as to his views of the President's decision.

Again, gentlemen, our great thanks and our gratitude go to each of you and to your families.

Senator McCain.

STATEMENT OF SENATOR JOHN McCAIN

Senator McCAIN. Thank you, Mr. Chairman.

Let me thank our very distinguished witnesses, who are each nominated for a military command that is essential to the security of our Nation and our allies. I want to thank each of them for their many years of dedicated service and for stepping forward again when called upon to serve when and where their Nation needs them most.

All of you will help lead a force that has been at war for 10 years. We honor the service and sacrifice of our men and women in uniform, and we pray that they will return safely and successful in their missions.

General Thurman, you have been nominated to lead our forces on the Korean Peninsula at a tense time in this long-running conflict and a critical time for our alliance with the ROK. We thank General Sharp for his leadership over the past few years.

The U.S.-ROK alliance has never been better and stronger. But the situation on the peninsula has rarely been as dangerous as it is today. The transition of power in North Korea from father to son has contributed to a series of provocative acts of aggression against our South Korean allies.

It is clear to me that if there is another such provocation, South Korea will not turn the other cheek. This has serious implications for the United States as we are bound as treaty allies to the defense of South Korea. We remain as committed as ever to our responsibilities. It is for this reason, and especially in light of the heightened state of alert and increased tensions, that we need to

take a hard look at our current plans for U.S. force realignment and tour normalization on the Korean Peninsula.

This committee needs a better understanding of this major undertaking, the costs of which are significant and growing. But ultimately, what must guide U.S. defense policy vis-a-vis the ROK is our obligation to ensure our mutual security and success.

Admiral McRaven, what you have achieved in your distinguished career was already extraordinary before May 2, 2011. But on that day, by leading the mission that killed Osama bin Laden, you and your men won an enduring place in American military history. To say that I am confident in your ability to lead SOCOM is an understatement.

Admiral Olson has done an exceptional job, and I am confident that you will build on his great work, if confirmed. The leader of al Qaeda is dead, but a new one has taken his place. Your mission will be to help ensure he meets the same end.

At the same time, a series of deadly franchises, especially al Qaeda in the Arabian Peninsula, continues to threaten the security of our Homeland, our interests, our friends, and our allies. We look to SOCOM to continue planning and synchronizing our global operations and to continue building up the capacity of our partners to defeat our enemies far away from our Homeland.

Finally, General Allen, you have perhaps the biggest boots to fill in General David Petraeus, but we know that General Petraeus personally recommended you and supported you as his successor to lead our mission in Afghanistan. I can think of no higher compliment to pay a military officer.

The challenge that you will face in Afghanistan was always going to be significant. But I fear this challenge has only been increased unnecessarily by the drawdown of U.S. forces that the President announced last week.

I agree with the President that we are making amazing progress in Afghanistan. This progress is real, and it is remarkable. But as our commanders on the ground all point out, it is also fragile and reversible.

Our commanders also say that next year's fighting season will be decisive. This will be our opportunity to consolidate our gains in southern Afghanistan while increasing numbers of U.S. forces shift their main effort to eastern Afghanistan, where the Haqqani Network, al Qaeda, and other regional militant groups are still present and operating actively.

However, under the President's plan, which calls for having all of our surge units out of Afghanistan by September, these troops will begin flowing out of Afghanistan right at the time that the Taliban, al Qaeda, and their terrorist allies begin to step up their operations next spring and summer. At the moment when our troops could finish our main objective and begin ending our combat operations in a responsible way, the President has now decided to deny them the forces that our commanders believe they need to accomplish their objective.

I hope I am wrong. I hope this decision will not endanger the hard-won gains that our troops have made or the decisive progress that they still need to make next year. But I am very concerned that the President's decision poses an unnecessary risk to the

progress we have made thus far, to our mission, and to our men and women in uniform.

After all that we have given to this mission—the money we have committed to it, the decade we have devoted to it, and the precious lives we have lost in it—why would we do anything now that puts our mission at greater risk of failure? By drawing down U.S. forces those several months early so that they miss the next fighting season, how much additional risk are we incurring, and how could it negatively affect our mission? Those are just some of the questions we must answer at this critical moment.

It is a pleasure to have all of you before the committee today. You all make me proud of America's Armed Forces and confident about their future.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator McCain.

Let me now call on our witnesses for their opening statements. General Thurman?

STATEMENT OF GEN JAMES D. THURMAN, USA, FOR RE-APPOINTMENT TO THE GRADE OF GENERAL AND TO BE COMMANDER, UNITED NATIONS COMMAND/COMBINED FORCES COMMAND/U.S. FORCES KOREA

General THURMAN. Chairman Levin, Senator McCain, and other distinguished members of the Senate Armed Services Committee, I thank you for the opportunity to appear here today.

I would like to thank the Secretary of Defense and the President for nominating me to be the next Commander, United Nations Command; Commander, U.S.-ROK Combined Forces Command; and Commander, U.S. Forces Korea.

If confirmed, I look forward to working closely with this committee, as well as our alliance partner, the ROK, to address the challenges and opportunities we face together on the strategically important Korean Peninsula. Recognizing that a strong U.S.-ROK alliance is one of the most important factors for maintaining peace and stability on the Korean Peninsula and in the region at large, I will, if confirmed, continue the work of my predecessors directed at sustaining strong ties with our Korean partner.

I would also like to thank this committee for the support it has provided to our soldiers, sailors, airmen, and marines, our Department of Defense civilians and their families, who selflessly serve our great Nation both at home and abroad. As the Commander of U.S. Army Forces Command, which is the Army's largest organization, I am all too well aware of the support this committee has provided and the difference this support has made to the men and women who serve our country in the Armed Forces.

If confirmed, I will make every effort to ensure that those serving us in the ROK will receive the very best working, living, and training environment that can possibly be provided. If confirmed, I look forward to working with this committee to achieve this commitment.

I would also like to thank my wife, Dee, for over 37 years. She has been magnificent in raising our two daughters, Jaime and Carey, who are now both married to Army officers and bringing up our four grandchildren.

Dee has also selflessly supported our soldiers and their families. Like other military spouses, she is truly an unsung hero. I am blessed to have her love and commitment as I continue to serve our Nation.

With that, I thank the committee again for allowing me to appear before you today. I look forward to answering your questions.

Chairman LEVIN. General, thank you so much.

Admiral McRaven?

STATEMENT OF VADM WILLIAM H. McRAVEN, USN, TO BE ADMIRAL AND COMMANDER, U.S. SPECIAL OPERATIONS COMMAND

Admiral McRAVEN. Chairman Levin, Senator McCain, distinguished members of the committee, thank you for allowing me the opportunity to appear here today.

I am deeply honored that the President has nominated me to serve as the next SOCOM commander. If confirmed, I promise you that I will work tirelessly to ensure that SOCOM continues to provide the American people the finest SOF in the world.

Joining me today is my wife, Georgeann. She has been a constant source of strength to me and to the men and women and their families with whom I have served. I have been extremely lucky to have her by my side for the past 33 years.

I have three children as well. My oldest son is a captain in the Air Force. My number-two son is completing his Ph.D. in California, and my daughter is going into her junior year in college.

I have been very fortunate to have spent the past 34 years in special operations, and I can tell you from my personal experience that the decision by Congress to establish SOCOM was the best thing that ever happened to SOF. As a result of your efforts and your interest in the well-being of U.S. special operations soldiers, sailors, airmen, marines, and civilians, we have the best-trained, the best-equipped, and the most experienced SOF in the history of the United States and possibly the world.

The special operations soldier's unparalleled contributions to the security of this great Nation in Iraq, Afghanistan, and around the world are a direct reflection of the support SOCOM has received from Congress over SOCOM's 24-year history. I want to personally thank you for that support.

If confirmed, I will continue to train, organize, equip, deploy, and, when directed by the Secretary of Defense, employ this force across the spectrum of conflict. We will at all times be prepared to answer the Nation's call with experienced forces whose intellect, maturity, and courage allows them to operate in politically and militarily complex environments—men and women who relish challenges and who willingly go where the threat to America is at its greatest.

However, as good as this force is, I know that, if confirmed, one of my primary responsibilities will be to ensure the SOF members and their families are well taken care of, both physically and emotionally. In his 2011 posture hearing, Admiral Eric Olson noted that as a result of 10 years of continuous combat, the force is frayed at the edges.

Admiral Olson and his wife, Marilyn, were exceptionally engaged in the welfare of the SOF soldiers and their families, particularly our wounded warriors. If confirmed, Georgeann and I will follow their lead and put forth every effort to ensure the well-being of the individuals under my command and the families that support them.

It has been my privilege to serve my entire career in special operations. In all those years, I have never ceased to be amazed by the courage and sacrifice of the men and women in special operations. I am humbled to be considered for assignment as their commander.

Thank you very much, and I am standing by for any questions. Chairman LEVIN. Thank you very much, Admiral. General Allen?

STATEMENT OF LTGEN JOHN R. ALLEN, USMC, TO BE GENERAL AND COMMANDER, INTERNATIONAL SECURITY ASSISTANCE FORCE/COMMANDER, U.S. FORCES-AFGHANISTAN

General ALLEN. Chairman Levin, Senator McCain, distinguished members of the committee, thank you for this opportunity to appear before you today.

I am truly honored to be nominated by the President to command the International Security Assistance Force and U.S. Forces in Afghanistan. I am grateful to the Members of Congress, the Secretary of Defense, the Chairman of the Joint Chiefs of Staff for their confidence, the support, and assistance extended to me since my nomination.

Of course, I am and have always been humbled by the incredible sacrifice of our servicemembers and their families, who have continued to serve our Nation despite many hardships.

Mr. Chairman, at this point, I must note the vital role of this committee and its leadership in providing crucial support to our men and women who have so honorably served in Afghanistan and Iraq. Thank you for that support.

I would also like to start by acknowledging and thanking General David Petraeus, whose outstanding service as the Commander of ISAF has been so essential to generating the progress that we have seen in Afghanistan. If confirmed, I will seek to emulate his principled and resolute leadership. If he is confirmed to be the Director of the Central Intelligence Agency, I look forward to a very close working relationship with him and with the rest of the Intelligence Community.

I would also like to express my admiration for Ambassador Eikenberry and his team in Kabul for their untiring dedication to the mission. If confirmed, I look forward to working with my friend, Ambassador Ryan Crocker, with whom I served in Iraq, and the NATO senior civilian representative, Ambassador Simon Gass, to ensure that our military and civilian efforts are closely synchronized.

I would also like to express my profound admiration for all of the partner nations and their forces in Afghanistan. With 49 ISAF nations from all over the globe currently serving in Afghanistan and supporting that mission, the scale of this coalition is truly historic.

As General Petraeus has noted, Afghan and ISAF forces have halted the insurgency's momentum in much of the country and reversed it in key areas. Based on my work as the Deputy Commander of CENTCOM, numerous visits to the theater over the past 3 years, including last month, and extensive discussions with senior military and civilian leaders, I share in that assessment.

Afghan and coalition forces now largely control the battle space in strategically important areas such as Kabul, where one-fifth of the Afghan population lives; in and around Kandahar, the spiritual and historic sanctuary of the Taliban; and in Helmand, a former Taliban stronghold; and in many other key areas.

Meanwhile, we are continuing to exert unprecedented pressure on the insurgency, with a variety of efforts, including the Afghan Local Police initiative, which is mobilizing communities to defend themselves; Afghan-led efforts to reintegrate former fighters, with nearly 1,900 reintegrated to date having joined the peace process; and a variety of governance and development initiatives focused on establishing the conditions to achieve long-term security.

Much of this progress has been enabled by and increasingly led by the Afghan National Security Forces (ANSF), who are conducting their own surge. They are currently on track to meet the 2011 goal of 305,000 troops, and substantially more and more capable Afghan forces will be trained and fielded over the next year as well.

Although there are reasons to be cautiously optimistic, there are also many challenges remaining. Insurgents still maintain lethal capabilities, and the fighting will continue to be intense in some of the areas as the enemy seeks to recover lost territory. Transnational terrorist groups like al Qaeda will seek to establish new bases and safe havens in Afghanistan and Pakistan, and corruption and other challenges to good governance will still need to be addressed.

Still, none of these challenges are insurmountable. As the President announced last week, and in fulfillment of his West Point commitments, we will begin the drawdown of surge forces next month. Although I was not a participant in those discussions, I support the President's decision and believe that we can accomplish our objectives.

If confirmed, I will offer my candid assessment to the chain of command on the current state of the conflict, as well as provide options with respect to the President's goals in accomplishing this strategy.

Even once the security surge forces have been removed, there will still be some 68,000 U.S. troops and thousands of international forces in Afghanistan, not to mention some 70,000 more Afghan forces, which will join the fight in the next 15 months, at the same time the United States and NATO are both discussing long-term strategic partnerships with Afghanistan. This reality sends an important message of commitment to the Afghan people, as well as a sense of urgency that Afghans must take more responsibility for their security.

I would like to close by thanking my family and, most importantly, my wife, Kathy, who is with me here this morning, for her years of dedicated and loyal service to our magnificent troops and

their families. Kathy raised our two daughters, Betty and Bobbie, often alone, during a career where we have been married for 34 years. They have grown up, those two young ladies, to be wonderful and independent women and citizens.

I would also like to add that Kathy and I understand the sacrifices of war, with both our families having experienced conflicts firsthand across the span of American history. If confirmed, I assure you and all the military families that I will do everything I can to provide our forces in Afghanistan with the resources they need to accomplish the mission and to return home safely.

Chairman Levin, Senator McCain, distinguished members of the committee, it has been a great honor to appear before you this morning. I am prepared to answer your questions.

Thank you.

Chairman LEVIN. Thank you so much, General Allen. Now, let me ask the three of you the standard questions that we ask of our witnesses.

Have you adhered to applicable laws and regulations governing conflicts of interest? [All witnesses answered in the affirmative.]

Do you agree, when asked, to give your personal views, even if those views differ from the administration in power? [All witnesses answered in the affirmative.]

Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation outcome? [All witnesses answered in the negative.]

Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings? [All witnesses answered in the affirmative.]

Will you cooperate in providing witnesses and briefers in response to congressional requests? [All witnesses answered in the affirmative.]

Will those witnesses be protected from reprisal for their testimony or briefings? [All witnesses answered in the affirmative.]

Do you agree, if confirmed, to appear and testify upon request before this committee? [All witnesses answered in the affirmative.]

Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good-faith delay or denial in providing such documents? [All witnesses answered in the affirmative.]

Okay, let us try a 7-minute first round of questions. We have three votes at noon, which may complicate this a bit. We will see how it works out.

General Allen, let me start with you. You indicated in your advance policy questions and your testimony that you agree and support the President's decision on U.S. troop reductions in Afghanistan. Can you tell us a little more why you do agree with this decision?

General ALLEN. Mr. Chairman, the President, in December 2009, enunciated the strategy, a result of a deliberate process of the review of the situation in Afghanistan, which was to be resourced in a number of different ways, but in particular with the surge forces. At that time, he announced that those surge forces would begin to be withdrawn in July 2011.

There were two points, I think, that were made importantly in that speech. One was that the nature of this resourcing of that strategy was a clear signal of U.S. support to Afghanistan and our intent to provide Afghanistan the opportunity and the time to begin to develop its ANSF to provide for the security of the country.

But also the other aspect of his announcement was that by beginning to withdraw those surge forces in July 2011, it sent a message of urgency to the Afghans that they must begin to take ownership of their security themselves. The President's announcement in West Point set the schedule ultimately for the withdrawal of those forces.

This was augmented ultimately in the meeting in Lisbon, the conference in Lisbon in November 2010, where the schedule for transition was developed, where our security forces would provide ultimately the cover for the Afghan forces as the transition of terrain in Afghanistan proceeded from 2011 to 2014. In essence, at the end of 2014, Afghan forces being in the lead across the country.

That brings us to the President's announcement. We expected that he would begin the process of the withdrawal. He has made that announcement. As General Petraeus and the Chairman said last week, we are accounting for that number.

We will begin the implementation. He has begun the implementation in Afghanistan with his ISAF staff to implement the President's decision. I support that because that decision was timely. It provides a full accounting for the President's commitments in December 2009.

As we begin the implementation, we will continue to have 68,000 American forces on the ground, an upswing of about 70,000 ANSFs, and we anticipate that this decision by the President can be accounted for within the current strategy, sir.

Chairman LEVIN. How important, General, is it to the success of the mission in Afghanistan that the Afghan Security Forces take ownership of the responsibility for their security?

General ALLEN. Mr. Chairman, it is essential. In the end, our strategy has envisioned that the Afghan Security Forces would take ownership all along.

In the aftermath of the Lisbon conference, the intent was, as agreed to by the member nations of the coalition and by President Karzai, that transition would be completed by 2014, where ISAF forces would support the development and the deployment of the ANSFs and by the end of 2014 be in a position to provide strategic overwatch of that. It is essential to the strategy, Mr. Chairman.

Chairman LEVIN. Now let me ask you, Admiral, do you see the President's announced reductions as creating problems for SOFs in Afghanistan?

Admiral MCRAVEN. Sir, I do not. As General Allen mentioned, there is still going to be a sizable U.S. force and coalition force there. For SOF to operate effectively in Afghanistan, we need to make sure that we continue to have the infrastructure, which will remain in place and, frankly, the enablers, which are always critical to us.

If confirmed, I will work with General Allen to make sure that we balance the counterterrorism and the SOF requirements with

the conventional requirements so that at the end of the day, we are still able to put pressure on the enemy. So, no, sir, I do not think the drawdown will affect SOF.

Chairman LEVIN. Admiral, what is the role of Afghan Special Forces in the counterterrorism operations that have been carried out? How would you assess the capability of the Afghan forces?

Admiral MCRAVEN. Yes, sir. There is a number of different Afghan SOF forces, if you will. There are the Afghan commandos, which are trained by U.S. Army Special Forces personnel, and they are clearly some of the elite Afghan forces. They are magnificent soldiers.

There are Afghan Special Forces, which are the Green Beret counterpart. Then with the force that I operated with, we had what we referred to as the Afghan partner unit. These were Afghans that went on target with the JSOC forces forward to ensure that we had an Afghan that was, if you will, going through the door first, that was making first contact with the locals, in order to make sure that we kind of protected the culturally sensitive issues or items that were on target.

The Afghans that we have worked with are top notch, to be honest with you, sir.

Chairman LEVIN. How important is it to our counterterror effort and to our counterinsurgency effort that they be in the lead in that way, the Afghan Special Forces be in the lead?

Admiral MCRAVEN. Yes, sir. I think it is very important. As General Allen mentioned, at the end of the day, the Afghans have to take ownership for the security of Afghanistan, and I would say the same thing applies to special operations.

At the end of the day, we have to make sure that the Afghans take the lead in special operations, recognizing that, right now, we still need to maintain a fair amount of overwatch. But over time, hopefully, that overwatch will diminish and the Afghans will take a larger role in that.

Chairman LEVIN. You feel they are capable of doing so?

Admiral MCRAVEN. I do, sir.

Chairman LEVIN. Let me ask both of you, Admiral, General Allen, the safe haven enjoyed by the Haqqani Network in Pakistan continues to provide the freedom for that group to launch attacks against the United States and coalition troops in Afghanistan.

You both, I believe, have talked to Pakistani military leaders. Why does Pakistan refuse to take on the Haqqani Network? In your judgment, is that going to change?

Let me start with you, General Allen.

General ALLEN. Sir, I think it is a complex answer that we would receive from them. It is a function probably of capacity. But it might also be a function of their hedging, whether they have determined that the United States is going to remain in Afghanistan, whether our strategy will be successful or not.

At some point, as we have emphasized to the Pakistanis, we have to bring pressure to bear on this insurgent safe haven. In the end, what we would hope is that they would listen to our desires for them to do that, would muster the capacity and the capability, and ultimately put pressure on the Haqqani Network to deny them that safe haven from which that element of the Taliban can move across

the border and conduct operations against ISAF and against the ANSFs as they take over more of the security.

Chairman LEVIN. Admiral, do you want to comment? Is this likely to change in the near term?

Admiral MCRAVEN. Sir, I don't think it is likely to change. I would agree with General Allen. It is a very complex situation, obviously, in Pakistan.

As both General Allen and I have had an opportunity to talk to military leaders in Pakistan, again, it is both a capacity issue for the Pakistanis and I think potentially a willingness issue, recognizing that the situation in the Federally Administered Tribal Areas is difficult for them to deal with.

Chairman LEVIN. Something has to give, something has to change because it just can't continue this way, for them to expect that we are going to have a normal relationship with them, which we all hope for. But it can't continue this way with that expectation in place.

Senator McCain.

Senator MCCAIN. Thank you, Mr. Chairman.

General Allen, do you know of any military leader that recommended in 2009 that the President make an announcement in 2011 of drawdown of troops?

General ALLEN. I do not, Senator.

Senator MCCAIN. Do you know of any military leader that recommended the drawdown plan that the President announced last week?

General ALLEN. I do not, Senator.

Senator MCCAIN. Does it surprise you that after the President's announcement, that President Sarkozy, the British, other of our allies have now announced that they will be withdrawing from Afghanistan?

General ALLEN. It does not, Senator.

Senator MCCAIN. Did you see the picture in the paper over the weekend of President Karzai and the Ayatollah Khamenei sitting down at a meeting, pledging friendship, support for one another?

General ALLEN. I didn't see the picture, sir, but I was aware of the meeting.

Senator MCCAIN. Is it true that improvised explosive devices (IED) manufactured in Iran are still coming across the border into Afghanistan and killing Americans?

General ALLEN. I believe they are, sir.

Senator MCCAIN. Did you hear of the statement the Taliban field commander, Jamal Khan, told the Daily Beast of his reaction to Mr. Obama's speech? "My soul and the soul of thousands of Taliban who have been blown up are happy. I had more than 50 encounters with U.S. forces and their technology, but the biggest difference in ending this war was not technology, but the more powerful Islamic ideology and religion."

Are you aware of that statement by the leader of the Taliban?

General ALLEN. I am, Senator.

Senator MCCAIN. Does the President's announcement of this withdrawal make your job—if you are confirmed, and I am sure you will be—more difficult and more challenging or easier?

General ALLEN. Senator, that is a difficult question to answer, sir.

Senator MCCAIN. I am sure it is. That is why I asked it.

General ALLEN. Not being confirmed yet and not being the commander, I have no ability to assess it with great accuracy at this particular moment. As the Chairman said, the announced decision was a bit more aggressive than we had anticipated. But he supported the decision. General Petraeus supports the decision.

General Petraeus is working now to begin the implementation of that decision. We had anticipated that those forces would be coming out. There is a lot that has to happen between now and the end of this year, sir, and the end of the period of the drawdown.

Senator MCCAIN. General, I understand why it would be difficult for you to answer that question. I appreciate that, and I appreciate your answer.

I have talked to probably 20 retired and Active Duty military leaders since the President's announcement was made, and it is very obvious that the challenges are now enormous. The question is whether we will still be able to succeed or not. I appreciate your willingness and your patriotism to take on what is obviously a dramatically increased risk.

The Economist states again this week, "Mr. Obama would only have himself to blame if, for entirely domestic political reasons, he undermines the conditions for a security transition to Afghan national forces by 2014 that still looks just about doable. His rush for the exit could yet end up delaying the very thing he is hoping for." I think that summarizes the views of most.

Admiral McRaven, do you believe that the United States should have a residual force in Iraq in order to assist particularly with special operations functions, intelligence?

Admiral MCRAVEN. Sir, I think that it would be mutually beneficial to us and the Iraqis if, in fact, that was the case. Obviously, it remains to be seen whether the Iraqis will want us to stay past the intended drawdown time. But clearly, there is still a threat in Iraq, and a small, soft presence there I think would be advisable.

Senator MCCAIN. If you look at recent U.S. casualties, the situation, at least in some respects, politically as well as militarily, has shown some deterioration. Would you agree?

Admiral MCRAVEN. Sir, I would. Statistically, that appears to be the case. Yes, sir.

Senator MCCAIN. General Allen, do you believe that we ought to have an enduring military presence, for example, a base, an air base in Afghanistan? Everything that I know and hear is that President Karzai is very interested in such an arrangement.

General ALLEN. Sir, I believe we should have an enduring military relationship with the Afghans. How ultimately that would be negotiated, how ultimately those missions, roles, and functions would be determined I think remains to be determined by discussions with the Afghans and certainly our own discussions and our determination.

With regard to a permanent base, I don't believe that we need a permanent base in Afghanistan. We could probably conduct operations over the long term from a shared basing concept within Afghanistan.

Senator MCCAIN. I guess we are getting into semantics here. A shared basing concept is, I think, fairly agreeable.

General Thurman, this committee has shown some serious concerns about the cost and the policy of the base realignment. I hope you will work with us closely on that issue, and I think we are going to ask for a pause until we can get a full evaluation.

My question, though, is that there has been recent public reports about a North Korean ship that was turned around that may have had materials in it which would have had some—again, press reports are it had, perhaps some nuclear technology onboard. It was headed for Burma. It was turned around by the United States and headed back to port in North Korea.

Can you tell the committee anything about that?

General THURMAN. Senator, only what I have read in the open source. I do know there are two United Nations Security Council Resolutions, 1718 and 1864, that the purpose of that is to prevent the proliferation of nuclear or weapons of mass destruction from North Korea.

I believe it is very important that we continue to monitor that carefully. I believe it needs to be dealt with in a whole-of-government approach.

Senator MCCAIN. I thank you.

I say congratulations to the three of you, and you make all of us extremely proud that the United States is blessed with such leadership, dedication, and sacrifice; and that includes your families as well.

Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator McCain.

Senator Lieberman.

Senator LIEBERMAN. Thanks, Mr. Chairman.

I would pick up where Senator McCain left off and say that listening to the opening statements that the three of you made and hearing you respond to the questions of Chairman Levin and Senator McCain, which I would not describe as softballs, I think the cumulative effect is that you are really a very impressive group.

Today, I think you have shown us your intelligence and that you are well spoken. Your records speak really with extraordinary power to a career of patriotism, bravery, and leadership capacity. You remind us about how much every American has to be grateful to you and everyone else in uniform for all you do every day to protect our security and our freedom. I thank you very much for that.

General Allen, I want to get into the decision that the President made last week and announced about Afghanistan, let me just ask you this question. As I understand what was announced, one way to look at it is that this calendar year, we will withdraw from Afghanistan 10,000 of the 33,000 troops we surged as a result of the President's decision in December 2009. Next year, we will withdraw the remaining 23,000 by sometime in September.

But here is what I want to ask you. My understanding is that within those parameters this year and next year, you, as ISAF commander, will be given latitude to determine both the pace of the withdrawal that will begin in July and which of our forces are withdrawn. Is that correct?

General ALLEN. That is correct, sir.

Senator LIEBERMAN. The second question I want to ask is this. In your response to the questions submitted to you by this committee, you state, "I will constantly monitor and assess the situation on the ground, and should I determine the situation has changed, I will so advise my chain of command through the proper channels."

My understanding of what you are saying there is that if, as we go through this year into next year, you find that the pace of the withdrawal is having an effect on what is happening on the ground in Afghanistan that you think is really negative, that you will exercise your authority to report that up the chain of command and, if necessary—this is a hypothetical—would ask that the pace of withdrawal be slowed down?

General ALLEN. Senator, that is a very important question. If confirmed, and if I take command of ISAF, I am going to monitor the operational environment and the conditions constantly, not just as it relates to the drawdown of the forces with respect to the surge, but throughout the entire period of time I command during this campaign.

It is my responsibility to the chain of command and to our Commander in Chief to ensure that should I be concerned over the progress of the execution of the campaign, that I so advise the chain of command with my forthright advice. I will make that obligation now. I state that obligation now, and I see that as an important responsibility, sir.

Senator LIEBERMAN. I appreciate that reassurance and I thank you for it.

Admiral McRaven, with regard to Afghanistan, obviously, the SOF has been playing an extraordinarily important role in the counterinsurgency strategy that we are carrying out there with significant success. Is it your expectation as the drawdown of our forces overall, pursuant to the President's decision last week, goes forward, that the SOFs are likely not to be drawn down in number? I think you know what I am asking.

Admiral MCRAVEN. Yes, sir. Sir, I think that remains to be seen. Again, if confirmed, I will work very closely with General Allen and General Mattis to take a look at what the right balance is for SOFs.

We have to strike a good balance between the conventional piece and the various elements of SOF in order to be successful, I think.

Senator LIEBERMAN. Yes, I accept that answer. My own sense of it is that as the forces, our overall number is drawn down, it may be that the special operating forces are going to be even more critical. So that they, in some sense, would be not the last, but you would want to have a critical mass of SOF there as this goes on.

Admiral MCRAVEN. Yes, sir.

Senator LIEBERMAN. General Allen, do you have an opinion going in about that?

General ALLEN. I do, Senator, thank you.

We are currently engaged in a comprehensive civil-military counterinsurgency campaign of which counterterrorism and the role of SOF forces play a very important role.

Senator LIEBERMAN. Right.

General ALLEN. As this campaign continues to mature, as we continue to look at the progress on the ground, we may well see that the role of SOF may increase, in fact, as time goes on within the context of the counterinsurgency campaign.

SOF does more than simply direct action or strike operations. SOF is critical to the development of capacity, as Admiral McRaven has already said, with respect to the Afghan Security Forces. But also SOF is playing a vital role on the ground in the establishment of the Afghan Local Police program and the Village Stability Operations program.

All of that together constitutes an enormously powerful contribution by special operating forces to the campaign today, and we would see that an enduring contribution over the long term, out to 2014 and beyond.

Senator LIEBERMAN. Thank you.

General Thurman, arguably, you will be assuming command in Korea at the most dangerous time in quite a while. I say that based on the continuing provocations by North Korea of our allies in the ROK, by the statement that the President of the ROK has made that if there is another provocation, there will be a response in measure from South Korea, our allies.

But also because we are watching a pattern of aggressive behavior by the People's Republic of China in the region generally that is quite different than what we have seen for a while, really staking claims to territory and a kind of extended sovereignty that we haven't seen in quite this way.

I wondered, going in, whether you would, first, give us your reflections on the state of mind of the leadership of the two countries that most worry me anyway, in the region now, very different, obviously. One is North Korea and the second, of course, is the People's Republic of China, with which we have ongoing comprehensive relations, and we try very hard to manage our relations in a constructive way. The North Koreans, of course, are in a very different place.

General THURMAN. Thank you, Senator.

I have the same concerns going in. I believe Kim Jong Il is an unpredictable leader. He continues to antagonize through his coercive diplomacy to protect his nuclear capability, I believe. There is no question there is a deteriorating economy. Reports I have read is there is a food shortage.

I think he will continue this cycle of provocations. I believe it is important for us to work closely with the ROK, their military, to counter these provocations in a responsible manner.

Having said that, I think it is very important for us to also maintain relations with China. I intend to work close, if confirmed, with Admiral Willard, the U.S. Pacific Command Commander, as we look at and assess the whole security posture and stance, particularly on the peninsula.

Senator LIEBERMAN. Thanks, General. Thanks to the three of you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Lieberman.

Senator Ayotte.

Senator AYOTTE. Thank you, Mr. Chairman.

First of all, I want to say we are blessed and grateful to have the service of all three of you for our country. I want to thank your families and all that have served underneath you for what you have done. We have great confidence in all of your qualifications.

I wanted to ask Vice Admiral McRaven, in your advance policy questions, you were asked what are the weaknesses and shortcomings in the current effort to combat terrorism and insurgency in Afghanistan. In one of your answers, you said, "Those weaknesses and shortcomings will arise not from the strategy or the efforts of our soldiers, marines, airmen, and civilians on the ground, but from diminished resourcing, lack of long-term commitment, and any decrease in international assistance."

Vice Admiral, can you elaborate for me what you meant by that statement in terms of the concerns about diminished resourcing or lack of long-term commitment?

Admiral MCRAVEN. Yes, ma'am. This is basically focused on what we refer to as the enablers. For us, special operations, to continue to be successful in Afghanistan is going to be a function of ensuring that we continue to have the airlift we need, the rotary-wing support, the fixed-wing support, the intelligence, surveillance, and reconnaissance (ISR) in terms of unmanned aerial vehicles.

That is the aspect of the support that is critical now and for the long run in order for special operations to be effective.

Senator AYOTTE. Does the President's recent withdrawal announcement, in your view, impact the lack of a long-term commitment—one of the issues that you raise?

Admiral MCRAVEN. No, ma'am. I would contend it doesn't affect SOF directly. The reason it doesn't is because it is a function of how you balance the withdrawal.

Again, in discussions with General Allen and General Mattis, I will make it clear that as General Allen looks at that withdrawal, that he takes into consideration the critical enablers necessary to continue to support special operations across the battlefield. While it is not just about the direct action piece, which is important—and in my former role as a JSOC commander, that was vitally important—but it is about all the other enablers that support the broader SOF effort in Afghanistan.

Senator AYOTTE. Are there any other concerns you have about diminished resourcing, based on what you highlighted in your statement, that we should be aware of?

Admiral MCRAVEN. No, ma'am. Again, the two primary ones are the airlift support and the ISR support.

Senator AYOTTE. Thank you, Admiral.

Lieutenant General Allen, the fighting season in Afghanistan is roughly from April through October. The President has decided on September 2012 as the deadline for withdrawal of the surge forces. Is there any strategic, operational, or tactical advantage to a September deadline for withdrawal during the fighting season, as compared to waiting through the fighting season?

General ALLEN. Senator, I think that the value of a second fighting season, as was expressed by the Chairman and General Petraeus in their testimony last week, is important. But as General Petraeus said in his recommendations, those recommendations are forwarded to the CENTCOM Commander, ultimately to the Sec-

retary of Defense. The discussions, which ultimately generated the President's decision, account for the President's unique role and unique position in terms of his national security views and his views as President of the United States and the Commander in Chief.

He has made the decision at this juncture with respect to when the end of the drawdown of the surge forces should occur. We support that decision. We will implement that decision. We are in the planning process for it now, Senator.

As I said before to Senator Lieberman, it is my intention, obviously, as the commander to monitor the progress, the operational environment, the progress, and the situation with respect to the accomplishment of our objectives and missions respect to the campaign plan. Should I become concerned that our ability to accomplish those objectives are threatened, I will ensure that I give forthright and prompt advice to the chain of command.

Senator AYOTTE. We deeply appreciate that, General. I just wanted to follow up, just so I am clear. I certainly appreciate the President's unique role as Commander in Chief. But in your view, is there any strategic, operational, or tactical reason to withdraw in September versus at least allowing us to finish the fighting season?

Because you are going to be in the middle of the fighting season. Can you think of any reason of a strategic nature or operational nature why we would withdraw then?

General ALLEN. Senator, again, the forces that are at work during that particular time are not just about the presence of U.S. forces on the battlefield. Even as those forces come down, we will still have some portion of the surge throughout most of the fighting season.

We will have the 68,000 U.S. forces that will be persistent in the presence, tens of thousands of ISAF forces, about 50,000 more Afghan national security police and army forces, and some 20,000 or so Afghan Public Protection Force. They will all be joining the fight. They will all become part of the process during that period of time.

Again, the President was presented recommendations by the Commander of ISAF, forwarded by the CENTCOM Commander, and the discussions were held in the White House, and the President applied his view ultimately as the President of the United States and the Commander in Chief and made the decision.

Senator AYOTTE. I appreciate that, General. I understand that you didn't participate in those discussions, but their recommendations were different than the ones that the President adopted in terms of timing after the fighting season. Is that right?

General ALLEN. The Chairman said that the President's decision was a bit more aggressive than was recommended.

Senator AYOTTE. One of the concerns with a more aggressive recommendation, of course, is, as Senator McCain has outlined, given the progress we have made in Afghanistan, that that progress, we could see a regression of that progress. Is that right?

General ALLEN. We are going to take advantage of the opportunity between now and the end of the year to assess where we are with the progress of the campaign. We have made really spectacular progress in the south. I wish all Americans had the oppor-

tunity to see the great work that has been done by the forces at work, ISAF forces in the south and southwest.

We are going to consolidate that progress and, at some point, take other actions, which I won't get into the great details here. But we will take other actions as necessary. The President's decision will be accounted for, obviously, in the planning that will go forward. We anticipate that we will continue to achieve the objectives of the campaign.

But we must account for the decisions that the President has made, and we will go forward with those—accounting for those decisions, we will go forward with every intention of accomplishing the objectives. We believe that can be done now, and we are moving forward with the planning with the ISAF staff now.

Senator AYOTTE. General, I want to thank you for your testimony. My time is up.

I had the opportunity as a new Senator to go to Afghanistan in January, and I was very impressed with the progress that has been made. I remain concerned and appreciate the challenges that you face with having to withdraw a significant number of our troops during that fighting season.

Thank you for your testimony.

General ALLEN. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Ayotte.

Senator Udall.

Senator UDALL. Thank you, Mr. Chairman.

Good morning, gentlemen. Thank you for your presence, and I want to associate myself with the remarks of my colleagues on the dais as to your service and particularly acknowledge your families who are here, and what wonderful Americans.

General Allen, if I could turn to you, and I know you are going to have some challenges. You have a leadership record that is exemplary. But I would like to focus on some specific items today that I hope then gives us an understanding of your priority and needs.

In that spirit, let me turn to the success that you had and we had in Anbar, in Iraq. You reached out to a population that had been previously pretty hostile and worked with them to then turn their focus to al Qaeda and the elements of terrorism that had really created enormous chaos. In the process, the COIN doctrine was validated.

I don't want to imply that the two countries are alike. But could you talk about the primary lessons that we learned in Anbar and how we are going to apply those lessons in Afghanistan?

General ALLEN. Senator, much of what was accomplished in the Anbar Province, of course, needless to say, much of it was accomplished on the shoulders of the sacrifice of many terrific soldiers, marines, sailors, and airmen. We honor that service and their sacrifice in having accomplished that really remarkable outcome.

But what was accomplished in the Anbar Province was really the result of a comprehensive civil-military counterinsurgency strategy. It was a strategy that leveraged every aspect of military capacity that could be brought to bear in the battle space, civil affairs, conventional military capabilities, advisory capacity to build the Iraqi

police, the Iraqi Security Forces, the two divisions of Iraqi infantry that we had.

Special operators, who worked both as advisers and mentors, but also, euphemistically, the term “black SOF”, the strike forces that would enter the battle space to attack the insurgent network. We pressurized the insurgent network constantly.

While we were pressurizing and shredding the insurgent network and blunting their capabilities with the use of conventional forces, we worked very hard to build the capacity of the Iraqi Security Forces, both the army—those two divisions—and we went from about 4,000 police to almost 30,000 police in the year that we were there, in 2007 and 2008.

All of that was complemented by a comprehensive plan with respect to civilian outreach as well. The U.S. Agency of International Development resourced three embedded provincial reconstruction teams (PRT) and resourced our PRT, our provincial PRT in Ramadi. I believe that the wise outreach to the sheiks in the tribe, the wise expenditure of tax dollars with respect to both the stabilization projects and development projects, our efforts to build governance capacity, where the governance has been completely shattered as a direct result of the efforts of al Qaeda and other of the insurgent efforts, that comprehensive effort paid off in the end.

It built up governance which had the capacity to stand up on its own two feet and extend the writ of the provincial government out into the districts and down to the municipalities and even to the tribes. It incorporated the tribes into the solution rather than have the tribes be on the outside of governance and part of the problem.

It ultimately built the capacity for the people of that province, the beleaguered people along the Euphrates River to ply their trade, to engage in economic development. That, in conjunction with the persistent governance, all overwatched by U.S. forces, but eventually overwatched by Iraqi Security Forces, provided the trade space necessary ultimately for the persistence of governance and the success, frankly, that we have seen in the aftermath in the Anbar Province to this very moment, sir.

Senator UDALL. Let me jump to Afghanistan in that context, General. We have been talking here about the withdrawal numbers and the concern that some have about the effect on the fighting season next year. I know we have a full complement for this fighting season.

Do you think you are going to have to shift to a counterterrorism (CT) model, or can you blend the two strategies? I know we throw those acronyms around casually. But can CT and COIN be implemented simultaneously in different provinces depending on the needs of those populations and the strategy that you have in place?

General ALLEN. Indeed, Senator, it is occurring now. There is an active counterterrorism capability that is underway within the larger counterinsurgency campaign.

As Vice Admiral McRaven knows so well from his time as JSOC and our task force commander in the CENTCOM, the capabilities of those strike forces have really been spectacular in getting at the enemy’s network. As well, the use of SOF, as I previously mentioned, will have an important role in developing the training, supporting the training of the Afghan special operators, as well as fa-

ilitating ultimately the mobilization of the populations in those key villages where the Afghan Local Police are being expanded.

To answer specifically your question, we would see that there will continue to be a counterterrorism dimension to the overarching counterinsurgency campaign. As time passes, as conditions in the battle space evolve, as we approach 2014, and as we define our long-term relationship with Afghanistan, we may well see that the development of CT will become even more important as time goes on. So there will be an important role, sir.

Senator UDALL. Would you talk about reintegration? Do we have enough formal structure around what we are trying to do there? There have been some stories recently that there is more we could do, that we have sent some mixed messages to the fighters in the Taliban forces who want to come out of the cold.

General ALLEN. Reintegration is an essential dimension to a counterinsurgency strategy. It helps us to begin to decompose the base of the insurgency.

The Afghans ultimately will be responsible for reintegration. It is their program. They are ultimately to be responsible for accepting these fighters out of the insurgency and reintegrating them back into Afghan society.

To that effect, the Afghan Peace and Reintegration Committee has been formed at a national level. There are provincial peace committees that have been formed throughout the country. In that process, we are working closely with our Afghan counterparts to facilitate the reintegration process, which ultimately is that local fighters and many of the fighters are, in fact, close to their villages, close to their homes.

Local villagers who desire ultimately to leave the insurgency and to become part of the future of Afghanistan will put down their weapons, renounce violence, sever their ties with al Qaeda and the insurgency, and become part of the solution, become part of the peace process. In return, the village elders and the village benefits ultimately by bringing them back into the fold. Through the use of funds, which are cycled through the Afghan Government through the Peace and Reconciliation Committee councils, projects are performed in those villages which benefit everyone, and the quality of life improves for everyone.

So the village leadership vouches for that young fighter who has come off the battlefield. They embrace him. They bring him back into the community. They make him a reintegrated, productive element within the committee. The whole village benefits as a result.

To your question specifically, the issue with respect to what we can do better, we are just getting started. The infrastructure within the Afghan side is really just beginning to gain purchase at this particular time.

As we recognize as a persistent shortfall in Afghanistan in a number of different areas, the ability to flow resource from the central government down to the provinces and ultimately into the projects for the reintegration program, that is the challenge at this particular moment. I know that our civilian colleagues are working very closely with their Afghan counterparts to improve the ability to get this money on budget and get it flowed in an expeditious

manner to take advantage of the opportunities as these fighters come off the battle space.

We are at about 1,900 soon of those individuals who have formally reintegrated, and there are about 3,000 in the pipeline. So getting this process accelerated has the effect of providing another option if you are a fighter. You can fight U.S. or Afghan forces and potentially be killed. You can fight U.S. or Afghan forces or be detained. Or you can put your weapon down and become part of the future of Afghanistan, be reintegrated into your village, and the whole village will benefit because of it. I think that is a pretty stark option in reality.

Senator UDALL. Thank you, General.

My time is expired. General, I look forward to working with you, particularly on this initiative because this is the key element to bringing our forces home and successfully concluding our operations in Afghanistan.

Thank you.

General ALLEN. Yes, Senator. Thank you.

Senator UDALL. Thanks.

Chairman LEVIN. Thank you, Senator Udall.

Senator COLLINS.

Senator COLLINS. Thank you, Mr. Chairman.

First, let me thank each of you for your service and your willingness to accept these new challenges.

General Allen, the people of Maine have paid a heavy price for the war in Afghanistan. Our State has suffered the highest rate of casualties of any State in the Nation.

We have seen lots of discussion at this hearing and others last week about the number of troops, the pace of withdrawal, and the timetable. But I have for you a more fundamental question and that is, is there any number of troops that can ensure a stable Afghanistan that is going to be able to take responsibility for its own security, given the safe havens and turmoil in Pakistan and the lack of a competent central government that is not plagued by corruption?

In other words, are these such insurmountable obstacles that no matter how many troops we have, for how long, and how brave and skilled they are, are those two facts—the safe havens in Pakistan, the corruption and incompetence of the central Afghan Government—insurmountable obstacles?

General ALLEN. Senator, I don't believe so. There are challenges. There are significant challenges. Those have been explained by both the current ISAF Commander, by the Chairman of the Joint Chiefs. But I believe that the campaign, as we currently envisage its unfolding, has the development of the ANSFs ultimately to be in the lead of security out to 2014 as an objective which is attainable, with U.S. forces in a strategic overwatch position.

Your question about the safe havens, it complicates the process. There is no question of that. We would recommend to our Pakistani friends that they take those measures that are necessary to reduce those safe havens because, in many respects, those safe havens are not only safe havens that generate the opportunity for those insurgent elements to attack into Afghanistan, but they have also turned out to be safe havens that provide a springboard for the as-

sault directly upon the Pakistani Government and the Pakistani military.

We will encourage and we will continue to encourage our Pakistani friends to bring pressure to bear upon those safe havens. It is not just good for the outcome of our strategy and for the President's vision on the outcome in Afghanistan. It is good for Pakistan as well.

I might add that our relationship with Pakistan, while strained at this particular moment, there is a bright spot, frankly, in the many different facets of the relationship that I will touch. That bright spot is the tripartite planning committee, where on a regular basis U.S., Afghan, and Pakistani military officers sit down and go through the process of planning for how they will conduct cross-border operations in a way that limit the operations across the border.

So there is a bright spot in that regard, and I think it is an opportunity for us to continue through that contact to leverage our relationship with Pakistan, to emphasize, as you point out correctly, Senator, the difficulties that these safe havens provide to the accomplishment of our strategy, but also how they endanger Pakistan as well.

To that part of your question that relates to corruption and incompetence, we have been partners with President Karzai for a long time. In the course of this long-term partnership, and in particular in the last couple of years, we have seen our civilian colleagues operating within the context of the civilian surge, which accompanied President Obama's military surge, provide efforts to increase capacity within the Afghan Government, within key ministries, to provide better, predictable, uncorrupt governance.

That process has been accompanied by activity within ISAF, the formation of Task Force Shafafiyat, which stands for transparency in Dari, which is supported by Task Force 2010, which seeks to get at corruption and difficulties associated with contracting that can create additional corruption, as well as Task Force Spotlight, which seeks to control the evolution of private security companies.

There are a number of measures that we have put in place through the civilian surge with our colleagues in the embassy, through Ambassador Eikenberry and soon-to-be Ambassador Crocker, as well as measures that have been put in place through ISAF with the task forces associated with corruption, that seek to build both capacity, at the same time we address the particular issues associated with corruption.

Today, we do face the dilemma of the safe havens. Today, we do work with an Afghan Government that embraces the desire ultimately to reduce corruption and increase competency. We will remain in close partnership with the Afghan Government to get at both of those issues, and we will continue to work with the ANSF.

Even if the safe havens are not reduced, it is our strong desire and hope that in the end, as the Afghan Security Forces ultimately take to the field in the numbers that we anticipate, with the capabilities that we are building into those ANSF forces, that they will be able to provide the cover for Afghanistan so it can have a secure and stable future.

Senator COLLINS. Thank you.

Chairman LEVIN. Thank you, Senator Collins.

Senator REED.

Senator REED. Thank you very much, Mr. Chairman.

Gentlemen, thank you for your service to the Nation and for your families' service. Your service to the Army, to the Navy, to the Marine Corps, and—Admiral McRaven, because of your son—the Air Force. I can get all the principal Services in. So thank you very, very much.

Let me begin with General Allen. You talked very eloquently, in response to Senator Collins, about the need to work closely with the Pakistanis. Have you had the occasion to meet on a regular basis yet or do you intend to meet on a regular basis with General Kayani and your counterparts on the Pakistani Armed Forces?

General ALLEN. Senator, I have met General Kayani on a number of occasions. It is not a relationship yet. That, I hope to develop. It is, in fact, the intent for General Petraeus and I, should I be confirmed, to pay a call on General Kayani so that the relationship that he has enjoyed with General Kayani can ultimately be passed to me.

I look forward to the opportunity to work closely with General Kayani and the senior Pakistani military leadership in partnership, in the context, as I said before, of the tripartite planning committee because, in the end, we have so many common objectives that we need to get after. I look forward to that opportunity to work with the Pakistani military.

Senator REED. I think from your comments, General, from both sides, their perspective and our perspective, it is a complicated and sometimes frustrating relationship. But it is a relationship that is essential to our continued operations in Afghanistan. I would commend your efforts and urge you, as General Petraeus has, to establish at least lines of communication to the leadership.

There is another aspect, too, that you touched upon in your testimony. That is the development of the Afghan National Security Forces. In the several visits I have made there, they have made some progress over the last year, after 7 or 8 years of fits and starts and not being particularly impressive. But I think over the last few years, we have gained momentum.

It seems to be one of the major building blocks of our strategy, our reduction is really almost directly related to their ability to field competent forces. I wonder if you might comment briefly, if you already had, on that aspect.

General ALLEN. It is central to the strategy, Senator. As you correctly point out, as we have developed the real capacity in the last couple of years—and here I must mention Lieutenant General Bill Caldwell and his terrific team in both Combined Security Transition Command-Afghanistan (CSTC-A) and NATO Training Mission-Afghanistan (NTMA), for the work that they have done. It has been a comprehensive approach with respect to the development of the Afghan National Army and the Afghan National Police.

He has put in place a number of training initiatives that are paying big dividends, not the least being literacy training. Where in a country where the literacy, depending on statistics, varies between 10 percent and 20 percent, it is not surprising that many of those who seek to be soldiers or police are illiterate. That alone has

given the members of the ANSFs a different feel about who they are and the role that they could potentially play in their country.

That, plus many of the other initiatives which are underway, which are gaining purchase now and traction, leave me confident that our end state, which is an Afghan Security Force which has both capability and staying power, will be successful in the end.

It is not just about NTMA and Bill Caldwell's efforts. General Rodriguez in the ISAF joint command and all of our conventional forces on the ground that are so closely partnered with Afghan units in the field have become also vital to this process as well, the professionalization of units, as well as the individual preparations of Afghan national security police and army troops in the training pipeline as well, sir.

Senator REED. Thank you, sir.

Admiral McRaven, again, like all of my colleagues, I salute you, your colleagues, and the SEALs for extraordinary operations, and thank you. I think your decisiveness and your feel for every level of the conflict, from the villages of Afghanistan and Pakistan all the way up here to the more complicated rooms in Washington was amply demonstrated.

Thank you for your service.

Admiral MCRAVEN. Thank you, sir.

Senator REED. Let me touch on a point I am sure has also been raised. You have a force that is small, very select, can't expand overnight because of criteria, can't be lowered to accommodate size. It is under significant pressure after 10 years.

Your efforts in Afghanistan and Pakistan are significant, but you also look to other places—Yemen particularly of concern at the moment; Somalia, there is indication of operations there.

Then just a further point is that you, I think, will be, as we go forward, strategically the force that is called upon sort of right out of the box, if you will, which is a change, a slight change in strategic thinking. Given this, the pressure on your SOCOM, your comments about what we have to do to give you the resources.

Are you prepared and capable to expand your operations at a moment's notice worldwide or in different parts of the world? I would appreciate your comments.

Admiral MCRAVEN. Yes, sir. Thank you, Senator.

We are not prepared to expand immediately worldwide. The problem, as you point out, is that it is very difficult to grow SOFs overnight.

Admiral Olson, in his capacity as Commander of SOCOM, has gone on record as saying that he wants to try to grow the manpower within SOCOM at the rate of about 3 percent to 5 percent per year, which I think is about right as well.

Part of this is making sure that the standards that we have set at our various special operations training elements for the special forces officers, the SEALs, the marines, and the aviators remains very high. We don't want to come off those standards because, at the end of the day, the American people expect us to put forth a world-class special operations operator.

I think expanding the force rapidly will be difficult. One of the greatest challenges I think we will have for the future is there will be a greater demand on SOF. As we have talked about today, intu-

itively, we think as the drawdown occurs in Afghanistan in terms of the conventional force, there will probably be some additional requirements for SOFs to cover down, if you will, in Afghanistan.

I don't think we know exactly what the size of that will be yet. I think these are going to have to be discussions between myself, if confirmed, General Allen, General Mattis, and the Secretary to find out what is the right amount of forces we need to put into Afghanistan.

As we look out from Iraq, Afghanistan, and, frankly, across the globe, and, as you are well aware, sir, SOFs any day of the year are in about 60 to 80 countries around the world. Sometimes in very small numbers, but those small numbers can have very large effects in other areas. They are building host nation capacity, hopefully putting forth those values, those American values that the other forces can see and want to replicate. Frankly, that allows us to kind of get ahead of some of the conflict in other countries.

As we look at the hotspots in Yemen, where you have al Qaeda in the Arabian Peninsula, or Somalia, where you have East African al Qaeda and al Shabaab, these are clearly areas of concern. We are looking very hard right now—at least from my standpoint as a former JSOC commander, I can tell you we were looking very hard at Yemen and at Somalia.

Our shortfall, as always, in a lot of these areas, for kinetic strikes is always our ISR, our unmanned ISR or our manned ISR. It is a critical enabler for us to be able to do our mission if it is a direct action mission.

However, having said that, I will tell you that both CENTCOM and U.S. Africa Command have been terrific about kind of apportioning that ISR as required, depending upon the missions that pop up. To get to the crux of your question, sir, it will be difficult to expand, manpower wise. I think any expansion of manpower is going to have to come with a commensurate expansion of the enablers.

Senator REED. Thank you very much, Admiral. My time is expired.

General Thurman, let me just congratulate you on a great service to the U.S. Army, and I look forward to working with you, should you be confirmed.

You are all very correct about that term, but I have a certain hope for all of you gentlemen. Thank you.

General THURMAN. Thank you, Senator.

Chairman LEVIN. Thank you very much, Senator Reed.

Senator Brown.

Senator BROWN. Thank you, Mr. Chairman.

It's good to see you all, and congratulations to you and your families.

General Allen, something that has always bothered me is the lack of other countries fulfilling their commitment with regard to helping train and get up to speed, the Afghan army and police. How do you think that with the current shortfall of about almost 500 institutional trainers, the withdrawal of 10,000 troops will affect that training mission?

General ALLEN. We will continue, Senator, to ask our partners for trainers. We are going to continue to work, if I am confirmed,

through NATO and through ISAF, to the non-NATO troop-contributing nations to continue to provide the kinds of trainers necessary to build the capacity of the ANSFs that we all need in the end to accomplish our objective.

It is no secret that has been difficult to do. It is no secret that we have made it very clear. The current commander has made it very clear, the current Supreme Allied Commander of Europe, Admiral Stavridis, and the NATO leadership has made it very clear that we need more trainers. As you are correct, Senator, we are still short about 480 trainers.

If confirmed and if I become the Commander of ISAF, I will continue to emphasize that we have to have trainers in order, ultimately, to bring to bear the kinds of quality training in the velocity that we need in order to get this ANSF stood up.

Senator BROWN. Is it a higher level? Does it go to the President's level where he goes to the other leaders and says, "Listen, in order to get out of here, we need to train these folks and get them up. And you made a commitment."

It seems like we have been making that request forever, but there hasn't been a heck of a lot of return, reciprocity in providing them.

General ALLEN. Senator, I can't speak to whether the President has asked that question specifically. But I know the Secretary of Defense, this Secretary, has been unambiguous in calling on NATO and the other non-NATO troop-contributing nations to provide trainers.

If confirmed and I become the Commander of ISAF, I will be unambiguous in that requirement as well. I believe Admiral Stavridis has been beating that drum very loudly and regularly, sir.

Senator BROWN. What do you think the ratio is? Is there a ratio between trainer and trainee that works? Are we at that, or how far below are we on that?

General ALLEN. I would have to get back to you on that, sir.

Senator BROWN. If you wouldn't mind, that would be helpful.

General ALLEN. I would be happy to.

[The information referred to follows:]

The current overall coalition trainer to Afghan National Security Force (ANSF) trainee ratio is approximately 1:14, which is sufficient to produce the Army combat and police formations required for the Afghans to transition to security lead. However, the critical shortage of 65 air coalition trainers hinders the development of the Afghan Air Force (Mi-17 and C-27 pilots). The Afghan logistics and medical systems are also short trainers, but these have been identified and are scheduled to be "boots on the ground" by the end of the year. This should allow the North Atlantic Treaty Organization (NATO) Training Mission-Afghanistan (NTM-A) to reach the ANSF growth objective of 352,000 by October 2012 and should complete the training and fielding of the Afghan Army and Police by December 2013. Additionally, NTM-A is training and certifying Afghan trainers to be able to take the lead for basic training of army and police. The goal by the end of 2011 is to have 4,400 Afghan trainers to assume the lead for training to allow coalition trainers to shift focus to professionalizing the force and developing systems that will endure past transition at the end of 2014.

Senator BROWN. How about the flexibility? Do you think you have the flexibility you need to keep the enemy on its heels and also train the Afghan Security Forces from now until the end of the summer? Even though the enemy now has the timeline for our departure, does it affect those two things at all?

General ALLEN. I believe we do have the flexibility.

Senator BROWN. General Thurman, in looking at your new job, when you are confirmed, how do you deal with a lot of the insecurity over there?

Let us say, hypothetically, that North Korea makes another probe and tries to instigate things, and South Korea responds. What role, then, do we play? How do you envision that potentially working out?

General THURMAN. Senator, thank you.

I think the number-one point is we have to maintain a strong presence on the peninsula. There is no question, based on what I have reviewed, that the ROK military is a very professional and competent force.

I think the other important point is making sure that all our plans that we have are current, they are exercised frequently, and we have the right training programs in place. I think the other important thing is maintaining the alliance and continuing the transformation efforts.

If confirmed, I fully expect to look at and review our capabilities and make sure they are the right capabilities and we are positioned properly to support any type of aggression. But I do feel it is very important to maintain a strong presence with our Korean partner and continue to work close with them and to make sure that we have the right strengths and can counter any type of aggression.

Senator BROWN. Thank you.

Back to you, General Allen, I agree with the chairman when he was talking about our relationship with Pakistan. I also feel, we have given them \$4 billion, and yet sometimes we don't know if they are in or they are out. Are they with us, are they not?

How do you view your role in dealing with that situation over there, that country building or country pushback? What do you think your role will ultimately be, if any?

General ALLEN. I think there is a role, Senator. The role, as has been demonstrated by both General McChrystal and, after him, General Petraeus, was to seek ways and opportunity across the border with the Pakistani military to try to have effect upon the nature of the border, the safe havens, those elements of the insurgency where we can focus our efforts.

General Petraeus has established, I think, a productive relationship with General Kayani. I hope to follow in that process where, leveraging the role of the ISAF Commander, we can continue to place the kind of emphasis that we need to with the Pakistani Government, the Pakistani military to continue to pressurize those insurgent safe havens.

In the end, it is a decision that they will make. But in my role as the operational commander, I am going to leverage every possibility that I can for cooperation across the border, to build habits of cooperation, habits of partnership. Hopefully, from there, as we continue to evolve our relationship overall with Pakistan, this will be a mechanism that can provide a bright spot for additional cooperation later. I think here is an important opportunity with Pakistan.

Senator BROWN. Thank you, sir.

Admiral McRaven, I noted that you said that there is some fraying at the edges, potentially, with everything that is happening, and that is rightly understandable. It is not like you can, all of a sudden, just press the button and you get a special ops guy ready—or gal ready to go. What do you anticipate trying to do to deal with that problem?

Admiral MCRAVEN. Yes, sir. In fact, Admiral Olson has put together a Pressure on the Force Task Force and has done really an amazing job of getting out to the various operational units to talk to the soldiers, sailors, airmen, marines, their families, to find out what are the stresses on the force. That task force is continuing to gather its data and information. If confirmed, I will come in, take the recommendations of that task force and then aggressively pursue programs that make sense in order to take care of the families and their soldiers.

We have to take a hard look at not just making sure that this force is sustainable for the next couple of years, but what is it going to look like in 5 years, in 10 years, in 15 years. If we don't get ahead of this and if we don't get on top of the concerns and the pressures that are on the families and the soldiers, I have great concerns about what this force will look like 10 years from now.

Senator BROWN. Great. Thank you, sir.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Brown.

Senator BEGICH.

Senator BEGICH. Thank you very much, Mr. Chairman.

Again, thank you all for your willingness to serve. Like many of my colleagues here, I anticipate and hope that you are all confirmed and look forward to your additional service to this country.

First, General Thurman, let me ask you, if I can, I know the President has delayed the transition of operational control (OPCON) of South Korea I think until 2015. If you could give me some thoughts of your understanding how this additional time will allow the United States and the Republic of South Korea to conduct a successful transfer.

Can you give me kind of a feel? It has been delayed, but what does this mean?

General THURMAN. Yes, sir, Senator. Based on what I have been briefed on, it was delayed until 2015. There has been a Strategic Alliance 2015 that was agreed upon by our Secretary of Defense and the South Korean Minister of Defense. It was the two Presidents that agreed to delay the OPCON transition.

What I believe is this allows the ROK military to continue to transform their efforts. They have several transformation efforts ongoing. They are a highly capable and competent force.

What I have reviewed, there is a timeline and a set of well-defined milestones through the exercise program that will get us on the road to OPCON transition in 2015. If confirmed, I will review the Strategic Alliance 2015 and those milestones and work closely with the ROK Chairman and the ROK Minister of Defense and the ROK military to help progress them along on that timeline.

Senator BEGICH. Let me also ask you, I know you have heard a little bit of discussion—this is more of a yes or no. But if you want to expand, feel free. The security concerns and fiscal realities that

you have heard some questions already on the feasibility on tour normalization.

Assuming you are confirmed, are you willing and obviously going to reexamine the plans for the tour normalization and how that all will work in the future?

General THURMAN. Senator, if confirmed, I will review the overall concept of tour normalization. I am well aware of the fiscal constraints we are under as a Nation. I am also aware of some of the proposed legislation that has been perhaps provided, if the National Defense Authorization Act is approved.

I will work very close with the Department of Defense and this committee to make sure that we are doing the right thing and to make the recommendations.

Senator BEGICH. Very good. Thank you very much.

I will look forward to that as it progresses. Assuming we actually pass an authorization bill, that will be good, and it will have some guidance, hopefully. So thank you.

If I can, Vice Admiral McRaven, this year the Cold Weather Maritime Training Facility will be built in Kodiak, AK, which, of course, we would invite you to Kodiak—not in the summer, but in the winter because that gives you great extra points, to be frank with you.

Admiral MCRAVEN. Yes, sir.

Senator BEGICH. But Kodiak is a great place. You have answered this a little bit already through your conversation with other members, but how important is facility infrastructure investment really for the readiness that you need for your special operations?

Admiral MCRAVEN. Yes, sir. I will tell you, the Kodiak cold weather training facility is kind of a great topic to look at in terms of the effect on the operators and then, frankly, the rest of the infrastructure across SOF.

But right now, when SOCOM was stood up, the legislation was passed in 1986 and really got going in 1987, a lot of the military construction (MILCON) that was in place—when the money flowed from the Services, a lot of the recapitalization money for a number of the MILCON projects did not flow with that.

Now, 24, almost 25 years into SOCOM, we have a number of facilities out there that are in need of repair or, in fact, we need new facilities. I know Admiral Olson has come forth in his posture hearing and made it clear that he is looking for additional support from Congress in order to recapitalize some of this infrastructure.

As with any force, sir, our readiness is a direct reflection of the amount of equipment and infrastructure we have to do the job, to train with both in garrison and forward. The infrastructure is critical to our special operations operators.

Senator BEGICH. As you review that—again, assuming you get confirmed—I am assuming you will share your analysis on where those gaps are and prioritize those based on funding.

Sometimes around this place, the funding occurs based on who yells the loudest. But my view would be what is the most critical elements of infrastructure investment that is necessary for your operations to continue at the level you are at, plus, obviously, growing itself?

Admiral MCRAVEN. Yes, sir.

Senator BEGICH. Great.

Admiral MCRAVEN. Thank you.

Senator BEGICH. One other piece. You had mentioned—I may be abbreviating this—you called it the something-something stress task force?

Admiral MCRAVEN. Yes, sir.

Senator BEGICH. What is the timetable that you anticipate some results? The reason I say this, for all the reasons, I want to echo what you said. That is the readiness of our forces and the impacts on them as individuals and the families that are being impacted because of the amount of deployments and the speed. What is your timetable, do you think you might have?

Admiral MCRAVEN. Sir, the Pressure on the Force Task Force—

Senator BEGICH. There we go.

Admiral MCRAVEN.—that Admiral Olson has implemented has been in place for many months now. They have gone around the country talking to the special operations operators and their families.

Having said that, we have had a number of programs at all the units in place for quite some time. The units, down to the O-5 level, to the lieutenant colonel and the commander level, have programs supported by SOCOM to take care of the families and the operators.

The real question I think for SOCOM is, is that enough? I think as the Pressure on the Force Task Force begins to look at what 10 years of fighting has done, we realize that the current programs are not enough. We have a number of programs that are being implemented daily across the force. But we think, based on the results coming back from this task force, that we are going to need to apply additional resources to support the families and the soldiers.

Senator BEGICH. Will you share that with us?

Admiral MCRAVEN. Absolutely, sir.

Senator BEGICH. Okay. My time is expired, but I want to end with one question to Lieutenant General Allen, and that is the whole issue of corruption in the Karzai Government. You seem optimistic. I don't, to be very frank with you. It seems it has gotten worse.

I was there a year and a half ago, maybe longer now, 2 years ago. Again, time flies around this place. But without solving the corruption issue, from Karzai down, how are we ever going to get the system—and you talk about reintegrating people back in—the peace and reconciliation committees and the cash flow that goes through there. But the corruption is layer upon layer upon layer, generational upon generational upon generational.

Give me some thoughts on how that is ever going to get resolved because, honestly, it seems like every dollar we send over there, everyone is taking a piece of it until it gets to the end, and there is very little then utilized for the Services. I will say it here, as I have said publicly, I think from the Karzai Government on down, he is not exempt from this.

Give me your thoughts on how we are dealing with a corrupt government and a corrupt system. There is the easy question for the day. [Laughter.]

General ALLEN. Thank you, Senator.

It is a daunting problem, as you have indicated. But we are working closely with the institutions of government that are emerging, seeking to create patterns of conduct, systems of accountability, the process of responsible budgeting, the execution of the budget, accountability within the execution of the budget, in ways that can reduce these problems associated with corruption.

It is an effort with which we will, if I am confirmed as Commander of ISAF, I will partner very closely with Ambassador Crocker in his efforts and his great civilian team. I will work very closely with Ambassador Simon Gass, who is a senior civilian representative of NATO, and other elements within the interagency to do all that we can to build capacity which holds people accountable, that creates systems and provides mechanisms for predictability and accountability within the government.

But it is a problem, Senator. You have correctly identified that as a difficulty. Corruption, of course, is corrosive to any democratic process and any hope of democracy. It is our very strong hope that in partnership with the Afghan Government, we can get at this issue.

Senator BEGICH. Thank you very much.

Again, I want to thank all of you for your willingness to serve and to your families that I know are the backbone to your service. So thank you all very much.

General ALLEN. Thank you, sir.

Chairman LEVIN. Thank you, Senator Begich.

Senator Graham.

Senator GRAHAM. Thank you, Mr. Chairman.

I want to compliment the President for making the selections of each of you. You are good choices by the President.

These hearings are not so much about getting you confirmed as it is about allowing us to understand what we can do to help you and what your challenges are. I am completely okay and very much support the idea of civilian control of the military. I think that is essential. That is what has made America great for all these years.

But politicians are accountable to the voters. The generals are accountable to their troops, to their chain of command, and to Congress. I just want to make sure those of us who make decisions in politics that affect the war, that we are accountable. If it turns out well, we get the credit. If we have done some things to undermine the effort, then people will notice where the blame lies. That is my view of what we are trying to do here in the next few months.

Admiral McRaven, is Mullah Omar in Pakistan?

Admiral MCRAVEN. Sir, we believe he is.

Senator GRAHAM. Okay. Let us just stop for a second. We believe that the leader of the Taliban after the fall of the Russians, Mullah Omar, who invited bin Laden to come in to be the honored guest in Afghanistan, who empowered Osama bin Laden to attack the country, is still in Pakistan.

Do we believe he is there with the knowledge of the Inter-Service Intelligence and the upper echelons of the army?

Admiral MCRAVEN. Sir, I believe that the Pakistanis know that he is in Pakistan. Whether or not there is a—

Senator GRAHAM. Let me ask you this. If they tried for about a week, do you think they could find him?

Admiral MCRAVEN. Sir, I can't answer that question. I don't know whether they could or not because I don't know exactly where Mullah Omar is.

Senator GRAHAM. Have we asked them to find him?

Admiral MCRAVEN. Sir, I believe we have.

Senator GRAHAM. I am asking. I think that Senator Levin and I both will ask together today. We are asking the Pakistan Government to help us find Mullah Omar, who has tried to destroy Afghanistan, who has formed an allegiance with al Qaeda.

Along those lines, General Allen, are we certain that IEDs being used against American troops in Afghanistan and coalition forces in general are coming out of Pakistan?

General ALLEN. Senator, I believe, yes, we are.

Senator GRAHAM. As a matter of fact, we have given the Pakistanis information about buildings where we can see these things being put together. Is that not true?

General ALLEN. That is correct, sir.

Senator GRAHAM. Have they responded effectively?

General ALLEN. They have not, sir.

Senator GRAHAM. Okay. I am with Chairman Levin on this. This has to stop.

Now let us talk about corruption. Have you read the article that has come out—I know you have been busy—about the Afghan head of the Central Bank flees to the United States—Central Bank chief flees to the United States? Are you familiar with that at all?

General ALLEN. Sir, I have read many articles at this juncture about that issue.

Senator GRAHAM. I know. I know you—

General ALLEN. I don't recall that one specifically.

Senator GRAHAM. I would like to put this in the record, if I may, Mr. Chairman?

Chairman LEVIN. It will be made part of the record.

[The information referred to follows:]

Afghan central bank chief flees to US

AFP

By Katherine Haddon | AFP – 12 hrs ago

Afghanistan's central bank governor has resigned and fled to the United States, saying his life is in danger over a corruption probe targeting influential figures connected to the government.

President Hamid Karzai's government on Tuesday dismissed the claims made by Abdul Qadir Fitrat, chairman of Da Afghanistan Bank, insisting his life was not under threat and calling him a "runaway governor".

"I announce my resignation from the position of governor of the central bank of Afghanistan immediately," Fitrat said in a statement issued as he visited the United States, where he reportedly has permanent residency.

"Unfortunately, central bank's independence on regulatory and supervisory matters has recently been undermined by the repeated interference of high-level political authorities," he said.

The governor has claimed his role in an investigation into the near-collapse last year of Kabul Bank, the war-torn country's largest private lender, had put him in peril.

"My life was completely in danger and this was particularly true after I spoke to the parliament and exposed some people who are responsible for the crisis of Kabul Bank," he was quoted as saying by the BBC.

In April, Fitrat named in parliament high-profile figures who were allegedly involved in corruption scandal amounting to nearly \$1 billion at Kabul Bank, which handles the pay of thousands of Afghan civil servants.

The bank was founded in 2004 by Sherkhan Farnood, a leading international poker player. Its co-owners included Mahmood Karzai, a brother of President Hamid Karzai, and a brother of Vice President Mohammad Qasim Fahim.

The scandal has highlighted chaos and corruption in Afghanistan's financial system at a time when US-led combat troops are due to start leaving the country, a decade after ousting the fundamentalist Taliban regime.

Some foreign troop withdrawals are due to start next month, with 10,000 United States forces scheduled to leave by the end of this year.

President Karzai's spokesman Waheed Omer angrily dismissed Fitrat's claims.

"We don't think that's very valid. He never actually told anyone in the government that his life was in danger," Omer told AFP.

"This is basically an escape, not a resignation... the formal procedures have not been adhered to. He's not a governor but a runaway governor."

Omer indicated that Fitrat may have been trying to escape from "legal implications" surrounding the Kabul Bank scandal, without giving any details.

The spokesman insisted that Fitrat's departure was "not going to have a major impact" on Afghanistan's ability to resolve the Kabul Bank crisis.

Last year's near-collapse of the bank led to long queues of nervous investors forming outside banks across Kabul and news of Fitrat's resignation prompted anxiety about the state of the financial system among some Kabulis.

"I will not withdraw my money yet, but I am concerned," said Fazull Rahman, a teacher and foreign currency exchanger, speaking outside a branch of Kabul Bank in the city.

"The fact that the chief of the central bank has been threatened and been forced to quit shows that corrupt strongmen are still in control, they will not allow reforms in the banking system. I am disappointed and worried."

The lender was taken over last year by Afghanistan's central bank after claims that executives granted themselves off-the-book loans worth a reported \$900 million that were partly used to buy luxury properties in Dubai.

The International Monetary Fund wants the Karzai government to take steps to ensure a similar scandal does not happen again before it approves a new assistance programme for the desperately poor country.

With tensions high between Kabul and the IMF, the impasse has already seen hundreds of millions of dollars in international aid money to Afghanistan being withheld this year.

"We take note of Governor Fitrat's decision to step down as central bank governor," IMF spokesman Raphael Anspach said, according to the Wall Street Journal.

"We look forward to continue discussing with his successor ways to improve the Afghan banking system in the period ahead."

Fitrat is reportedly holed up in a hotel in Washington's Virginia suburbs and refusing to return to Afghanistan.

US State Department spokeswoman Victoria Nuland confirmed Fitrat was in Washington, adding: "If there were to be a change of leadership at the Afghan central bank, we would continue to encourage that government to take all the necessary steps to reform and strengthen the financial sector."

Senator GRAHAM. I am convinced. I met with the gentleman when I was over there, as Senator Graham, and I met with him extensively. He went to the floor of the Afghan parliament, and he started naming names about Kabul Bank, about who was involved in setting up this bank. The bank was used to pay Afghan Government bills, depositing coalition currency as well as Afghan currency.

The International Monetary Fund (IMF) called it the biggest abuse or rip-off of a bank they have ever seen. For the IMF to say that, that is something because they have seen a lot.

I want to associate myself with Senator Begich. I really do believe that they are trying to cover up, the Karzai Government and other people in Afghanistan are trying to cover up the extent of the fraud and manipulation in this bank.

General Allen, I would ask you to report back to us as soon as you can, to the committee, about your view of the Kabul Bank situation and how it affects our efforts to stop corruption.

General ALLEN. I will, Senator.

[The information referred to follows:]

The level of corruption across Afghanistan's public and private sectors represents a threat to the success of the International Security Assistance Force (ISAF) mission and the viability of the Afghan state. The issues we have seen at Kabul Bank are representative of the problems we face as we seek to enhance transparency and reduce corruption in Afghanistan. While other agencies have the lead on Kabul Bank, I agree that we must support the International Monetary Fund (IMF) as it works with Afghan authorities to address the prior actions they stipulated as necessary to establish a new assistance program. These actions include resolving the issues related to Kabul Bank as well as addressing broader weaknesses in the Afghan banking system. While the Afghan Government has taken some positive steps for-

ward, additional progress on the IMF prior actions is essential to restoring public and international confidence in Afghan financial institutions.

As the Kabul Bank situation highlights, we must continue to work with Afghan leaders to insulate critical institutions from criminal capture and support efforts to investigate and prosecute criminals that divert development and security force assistance; obstruct justice; and engage in or protect illicit activities that strengthen the insurgency and undermine the legitimacy and effectiveness of the government. In coordination with the international community and in support of the Afghan Government, ISAF's Combined Joint Interagency Task Force-Shafafiyat leads ISAF's effort to foster a common understanding of the wider corruption problem, plan and implement ISAF anti-corruption efforts, and integrate ISAF anti-corruption activities with those of key partners. This is done to support the development of what President Karzai has called an "active and honest administration" in Afghanistan.

Senator GRAHAM. Thank you.

Now let us talk about counterinsurgency. I have learned more about this than I ever thought I would know. As a military lawyer, I find the whole concept fascinating.

Since December 2009 to now, I want, from my point of view, the country to know that I believe that General Petraeus and all under his command—Admiral McRaven, all of your forces—have done a fantastic job of going from defense to offense, that the 33,000 surge forces have been used effectively and that we have really put the enemy on the run in many places.

My question, General Allen, if we withdraw the 33,000 by September of next year, will this still be a counterinsurgency operation? Does the math work out? Will there be enough people left behind next year to effectively do counterinsurgency?

General ALLEN. I believe there will, Senator.

Senator GRAHAM. Okay. Now walk me through that. If we needed 33,000—if 70,000 wasn't enough and we had to add 33,000 to make this a counterinsurgency mission, next summer how can we maintain counterinsurgency if all the surge forces have gone? Have we improved that much?

General ALLEN. I think the surge forces, Senator, are a part of the overarching counterinsurgency mission.

Senator GRAHAM. Now, there were 40,000 requested. The President authorized 30,000. It has been my understanding that the strategy was to go into Regional Command (RC)-South, take the Taliban on, and next summer, 2012, reinvest some of those surge forces to RC-East. Have we had enough people in RC-East since December 2009 to have an effective counterinsurgency?

General ALLEN. I believe that the RC-East forces have been conducting an effective counterinsurgency.

Senator GRAHAM. Is the counterinsurgency a mathematical formula?

General ALLEN. To some extent.

Senator GRAHAM. To some extent. Would you run the math and report back to the committee as to whether or not RC-East has been adequately resourced to have an effective counterinsurgency program? Also report back to the committee if you take the 33,000 troops out, what does that do to counterinsurgency operations going forward? Could you provide us with that information?

General ALLEN. I certainly will, Senator.

[The information referred to follows:]

Although Regional Command-East is currently a supporting effort in the overall campaign, it is already achieving some local successes. As I assume command, I will

examine the campaign and operational environment and provide any concerns to my chain of command. My early impression is that it is too early to determine the detailed implications of the drawdown on the current campaign plan, in terms of where geographically, we might accept more or less risk; the general impact is that the Afghan National Security Force will have to take an increasingly leading role in counterinsurgency operations. The Afghan National Security Force are growing in capability that will facilitate their security lead. At the same time, International Security Assistance Forces will also have to assess our way ahead to maintain or even increase momentum of our hard fought gains. This is an expected evolution as we move toward Afghan security lead and continue to use our resources as wisely and discriminately as possible.

Senator GRAHAM. Okay. Admiral McRaven, I can't thank you and those under your command enough for what you have been able to achieve, particularly with bin Laden. If you caught someone tomorrow in Yemen, Somalia, you name the theater, outside of Afghanistan, where would you detain that person?

Admiral MCRAVEN. Sir, right now, as you are well aware, that is always a difficult issue for us. When we conduct an operation outside the major theaters of war, Iraq or Afghanistan, we—and again, I will defer to my time as a JSOC commander—put forth a concept of operation (CONOP).

The CONOP goes up through the military chain of command and is eventually vetted through the interagency, and the decision by the President is made for us to conduct a particular operation. Always as part of that CONOP are options for detention. No two cases seem to be alike.

There are certain individuals that are under the Authorization for the Use of Military Force (AUMF), and those are easier to deal with than folks that may not have been under the AUMF. In many cases, we will put them on a naval vessel, and we will hold them until we can either get a case to prosecute them in U.S. court or—

Senator GRAHAM. Are we going to have a second round, Mr. Chairman?

Chairman LEVIN. Depending on how long the first round lasts and when that vote starts, but I hope so.

Senator GRAHAM. I would like to inquire into this in a second round. So I don't want to intrude—

Chairman LEVIN. Yes, I do hope that we will have at least a few minutes each.

Senator GRAHAM. Okay. To be continued.

Admiral MCRAVEN. Yes, sir.

Chairman LEVIN. You could finish your answer, however, if you want.

Senator GRAHAM. Absolutely. So we put a guy on a ship?

Admiral MCRAVEN. Yes, sir. The bottom line, Senator, is there are—

Senator GRAHAM. How long do we keep him on the ship?

Admiral MCRAVEN. Sir, there are a number of different options, based on—

Senator GRAHAM. What is the longest we can keep somebody on the ship?

Admiral MCRAVEN. Sir, I think it depends on whether or not we think we can prosecute that individual in a U.S. court, or we can return him to a third-party country.

Senator GRAHAM. What if you can't do either one of those?

Admiral MCRAVEN. Sir, again, if we can't do either one of those, then we will release that individual. I mean, that becomes the unenviable option, but it is an option.

Chairman LEVIN. Okay. Thank you, Senator Graham.
Senator Hagan?

Senator HAGAN. Thank you, Mr. Chairman.

I just want to say we are mighty proud of each and every one of you and thank you for your service and your commitment to our country.

I wanted to ask a question about the U.S.-Afghanistan relationship. We have to ensure that Afghanistan does not reemerge as a safe haven for al Qaeda and transnational terrorism.

Though the initial phase of the drawing down of our forces from Afghanistan is limited, we must ensure that the ANSF are capable enough to preserve the tactical gains. It is important that as we transition to the ANSF responsibility, that they are enabled with the appropriate capability, such as intelligence planning, logistics, and maintenance.

General Allen and Admiral McRaven, what should an enduring U.S.-Afghanistan strategic partnership look like beyond 2014? What type of training, advising, and SOFs presence should we have there, if any?

General ALLEN. We are in discussion with the Afghans about what the long-term, enduring relationship will look like. In the course of that discussion, we will ultimately identify the roles and missions and functions which conceivably the U.S. forces could bring to this enduring relationship.

I think while much remains to be discussed, it is not beyond the realm of possibility that some advisory capacity will be required, some enabling capacity will be required for ANSF operations. Some intelligence capacity would be required, both to build the intelligence capabilities of the Afghan forces, and then some counterterrorism capabilities to address any reemergence or any potential terrorist hotspot that could conceivably emerge in Afghanistan in the period beyond 2014.

But much of this discussion remains to be had. We are nowhere near talking numbers yet or specific units. But in very general terms, based on the discussions that we had in Iraq, for example, those kinds of broad roles and functions could conceivably be discussed over the long term.

Admiral MCRAVEN. Yes, ma'am, and I would agree with General Allen's comments.

Senator HAGAN. Thank you.

A few weeks ago I met with General Barbero, the Director of the Joint IED Defeat Organization (JIEDDO) to discuss the inter-agency effort to interdict the flow of the IED caches. I want to do everything possible to improve the detection rates and stem the flow of ammonium nitrate from Pakistan coming into Afghanistan, and I think we need to put serious pressure on the Pakistani network distribution of ammonium nitrate.

We know who the key facilitators are in Pakistan. They are pushing these caches of IEDs made with the ammonium nitrate across the Afghan border, which ultimately is killing or injuring our troops. General Allen, how do you plan to incentivize the Paki-

stanis to control the distribution of this ammonium nitrate, particularly given the fact that the Pakistani military and the civilian population, they, too, have suffered from these IED attacks at the hands of the Pakistani internally focused militants?

General ALLEN. The Pakistanis have recently, I think to their credit, issued a counter IED strategy. We will continue to work with them to build their capacities to do that themselves with respect to protecting themselves from IEDs.

But I think that at multiple levels within our government, we have to make very clear to the Pakistani national leadership, to the military leadership that the continued production of ammonium nitrate, for the purposes of this discussion—the fact that it is unregulated, the fact that it gets into the hands of those who would move it across the border, we have to make it very clear to the Pakistanis. I know we are doing that.

I personally said this to the secretary of defense of Pakistan, we need their help in that regard. They have to control this. They have to do what they need to, to regulate the production and the sale so that it goes into the hands of legitimate businessmen.

On the other hand, on the other side of the border, we will continue to posture our forces to both detect, as best we can, to detect the infiltration of those caches of ammonium nitrate that come across. As we can, we will interdict them, and we have had some pretty big interdictions this year. But it is only a part of the flow that is coming across.

It has to be a joint effort. It has to be an effort with the U.S. and Afghanistan on one side of the border and the United States, Afghanistan, and Pakistan on the other side of the border. I believe at many different levels of the government, we have expressed our great desire that the Pakistanis sign up to this and stand up to the process of controlling and regulating ammonium nitrate and its flow and the hands into which it goes. If confirmed as the Commander of ISAF, I will continue to add emphasis to that.

Senator HAGAN. You said the Pakistanis are now putting forward their counter IED plans. Do you know what those are?

General ALLEN. We will get back to you on that.

[The information referred to follows:]

The improvised explosive device (IED) is as great a threat to Pakistan as it is to Afghanistan. According to Joint Improvised Explosive Device Defeat Organization, since January, there have been 684 IED events in Pakistan. Of those, 30 percent targeted Pakistan's security forces, 10 percent targeted schools, 12 percent targeted civilians, and 16 percent targeted infrastructure.

On June 17, 2011, the Interior Division of the Government of Pakistan issued their National Counter-Improvised Explosive Device (C-IED) Strategy through the General Civil Defense Directorate. This strategy focuses on national level stakeholders countering IED threats through effective interagency coordination. Some of their priorities and goals are as follows:

- Improve border control measures with special attention on smuggling of improvised explosive devices, accessories, ammonium nitrate, and other improvised explosive device precursors;
- Adopt legislation for Pakistan's Anti-Terrorism Act;
- Create a National Counterterrorism Authority that provides specific requests for technical assistance from the National Counterterrorism Center;
- Implement an aggressive public improvised explosive device awareness campaign;
- Establish a C-IED cell within the office of the Director General, Civil Defense;

- Engage international communities to help Pakistan build and develop their own C-IED capabilities by equipping the Armed Forces and police and providing focused training on the interdiction of improvised explosive device precursors; and
- Establish a Level II National Improvised Explosive Device Exploitation Facility (NIEF), principally funded and supported by the United States, to attack the network by exploiting IED evidence primarily for prosecution purposes. The NIEF in Islamabad remains a long delayed aspiration.

Senator HAGAN. Also, do you have a timeframe at all on what the Pakistanis might be doing as far as controlling the businesses producing this?

General ALLEN. I do not.

Senator HAGAN. Okay. Thank you.

In your answers to the committee's advance policy questions, Admiral McRaven, you mentioned the importance of the female cultural support teams to engage with elements of certain populations, presumably the women and children, which have previously been difficult to reach during counterinsurgency operations.

Can you describe the importance of these teams to counterinsurgency operations in Afghanistan, how they are being integrated into SOFs, and any changes to policy or law that you might suggest that would make these teams more effective?

Admiral MCRAVEN. Yes, ma'am. They have been wildly effective in terms of supporting our efforts in Afghanistan. Right now, when a special operations mission goes out, we normally take four females as part of the female engagement team with us. As you point out, their role in that particular mission is after we have secured an objective. I will speak first from the direct action side, and then I will talk a little bit about the special forces side, if you will.

But from the direct action side, after we have secured an objective, part of the role of our female engagement teams is to talk to the Afghan females on target, to make sure, one, that there is nobody else left inside the compound, that everybody is safe and secure, that we reassure the females and the children that they are going to be safe. Many times we will do tactical questioning of the females with a U.S. female soldier. Again, that has been wildly effective for us.

The special forces, the broader special forces teams that are part of developing the Afghan Local Police and the NATO forces that are supporting the provincial reconnaissance companies are also using some variation of the female engagement team to a great effect as well. They are essentially fully integrated, if you will, into the operational units.

They go through an extensive training period for the SOF female engagement teams back at Fort Bragg, under the auspices of the U.S. Army's SOCOM. The Marine Corps SOF also has a female engagement team training program.

Once they have gone through their basic training program, they will come forward. There is some additional training that goes on forward with the unit that they are assigned to. Then, once they have achieved the standard we are looking for, then we will put them forward into the field.

Right now, all the policies and authorities are in place for us to do that. Again, it is probably several years late in coming. We probably would have been much better off had we developed these fe-

male engagement teams early on in the fight. But as we look at them now, they are a key component to our success in the special operations battlefield, if you will, in Afghanistan.

Senator HAGAN. Do you know how many of these female teams that you have?

Admiral MCRAVEN. I know from a JSOC standpoint. I am not sure what the broader Army has. Right now, we have 12 teams, growing to 16.

Senator HAGAN. Thank you.

Admiral MCRAVEN. Yes, ma'am.

Senator HAGAN. My time is out.

General Thurman, I did want to just say you have done a great job as the commander of U.S. Army forces command in Fort Bragg. I welcome you, and I look forward to your confirmation.

Thank you.

Chairman LEVIN. Thank you, Senator Hagan.

Senator Blumenthal.

Senator BLUMENTHAL. Thank you, Mr. Chairman.

I want to join in expressing my thanks and admiration for your great service to the country, the extraordinary sacrifice and service of the men and women who serve under you, and, of course, your families, and look forward to your confirmation and voting for it.

I want to pursue the line of questioning that Senator Hagan began. On the assumption that the Pakistanis are not cooperative, because they have not proven cooperative in the past, what additional measures can we take to destroy the sources of the calcium ammonium nitrate that has proved so absolutely and horrifically destructive to the men and women who serve our Armed Forces in Afghanistan?

General Allen, I would like, respectfully, to ask you to begin. Then, Admiral McRaven, if you could follow with perhaps some perspective on what can be done through special operations?

General ALLEN. Senator, that is an important question. The posturing of our intelligence-gathering apparatus, our capabilities, our ISR capabilities, the posturing, potentially, of our special operators on the western side of the border to detect the infiltration of these capabilities, to detect the infiltration of the ammonium nitrate, they come generally along relatively well-known routes of infiltration, to posture ourselves in a way where we can detect and interdict that material as much as we possibly can.

As I said with Senator Hagan, we have had some large interdictions this year. It is because there have been explicit plans, explicit efforts being put forward and being pursued to do just that. Should I be confirmed and become the Commander of ISAF, it is my intention to redouble that effort in every possible way we can to interdict and stop that flow as it gets to the border.

Senator BLUMENTHAL. Thank you.

Admiral McRaven?

Admiral MCRAVEN. Sir, to continue on from General Allen's discussion, from a special operations standpoint, we actually target the networks, vice the product itself.

Now, when we have the nexus of the product obviously in the network and the individuals in the network, then we get a two-fer. But for the most part, what we are trying to do is shut down the

leadership, both the senior leadership and the mid-level leadership and, to some degree, the foot soldiers that are moving this home made explosives (HME) from areas like Chaman across the border and into southern Afghanistan.

What we found is where we have focused our effort against some of the HME networks, the Taliban networks down south, we have been very effective at disrupting the HME. The additional piece of this, and probably better to discuss in a more classified form, is there some technology out there that is allowing us to detect HME before the critical components are put together and turned into a homemade explosive.

I think we need to continue to pursue that technology because it has been reasonably effective early in the testing of it, to be able to determine where some of this HME is. Then we are subsequently going after those compounds where we see it.

Senator BLUMENTHAL. I thank you both for those answers. I would like to pursue the offer to learn more about that technology in a different setting, if I may? General Allen, also from you, whatever additional information you or your staff can provide.

I am planning to be in Afghanistan and Pakistan toward the end of August on a trip that is designed specifically to focus on this issue, and I would like to be helpful and supportive through the committee and through the authorization-appropriation process—I know the entire committee will share that view—in developing not only the technology, but whatever resources are necessary to pursue the calcium ammonium nitrate that is brought into Afghanistan.

I want to focus on the impacts of the explosive devices that are manufactured with those substances. Particularly, General Allen, I understand there are now 34 active telemedicine portals in operation in Afghanistan. That number will be expanded, I think, by an additional 42 planned focusing on the impacts of the IEDs and other explosive devices, particularly when it comes to traumatic brain injury and post-traumatic stress.

General ALLEN. That is correct.

Senator BLUMENTHAL. I wonder if you could discuss not only the use of those resources but others to diagnose and treat the post-traumatic stress and traumatic brain injuries (TBI) that, in many respects, are among the signature wounds of this war?

General ALLEN. Senator, that is a very important question from the standpoint of the health of the force in the long term. As we discussed yesterday, we have come a very long way with respect to our reaction to the effects of blast on our troops.

As I indicated, the nature of the immediate action that occurs in the aftermath of an attack has given us the ability to not just detect the results of the attack but to take those actions, those medical actions necessary in the immediate aftermath of the attack so that we can provide the opportunity for rest and medical care for those who have been caught in the blast effects.

That process has evolved dramatically, to the extent that today some 95 percent of those who are immediately diagnosed can be returned to their units. But there is some number, because of the immediacy of the care, that we are able to determine right away that

can go quickly to follow-on care. I think that process, as I said, has evolved pretty dramatically in recent time.

Of course, that follows on to the post-traumatic stress disorder (PTSD) that you have mentioned, Senator. What I would like to do is to give you a definitive lay-down both of how the detection for TBI is administered immediately on the spot and how it flows ultimately into the PTSD, so that you have one comprehensive answer.

Senator BLUMENTHAL. Thank you.

My time has expired. I want to thank both of you for the very informative, candid, and forthright testimony that you have given today. It has been very helpful.

I would like to pursue the additional information that you both have mentioned. Thank you very much.

General ALLEN. Yes, sir.

Chairman LEVIN. Let us try a 3-minute second round, see if we can all get 3 minutes of questions in.

Let me first ask you, General Allen, you were asked about the question of deadlines and as to whether you were aware of any deadlines that had been previously set that were supported by military commanders, I believe. In Iraq, back in November 2008, President Bush, as I remember, agreed to two deadlines for U.S. forces, one, a June 2009 deadline for the withdrawal of U.S. combat forces from Iraqi cities and, second, a December 31, 2011, deadline for the withdrawal of all U.S. military forces from Iraq. Is that accurate?

General ALLEN. Mr. Chairman, I will have to check those dates, but thank you for that elaboration.

Chairman LEVIN. But do you remember those two deadlines being set?

General ALLEN. I do remember them.

Chairman LEVIN. Did they have the support of the military at that time, do you remember?

General ALLEN. They did, actually. I remember the withdrawal from the cities that worked quite well, actually.

Chairman LEVIN. All right.

Second, relative to Korea, General Thurman, you indicated, I believe, that you would be willing to look into the plans that we have going on for a transformation underway in South Korea. There are three major initiatives going on involving our military, including a Yongsan Relocation Plan, a Land Partnership Plan, and a tour normalization plan. The costs of those, I believe, are something like \$10 billion, significantly more than they were originally thought to be. That is just our share of the cost.

Can you, when you get there, take a look at the current plans to bring 8,000 more families to South Korea? There is a real question about the rationale. Why are we bringing more families to South Korea if it is a more dangerous place and continues to be a very dangerous place? There is also a very large question about the costs of that normalization, much greater than originally contemplated.

But would you take a look at the current plans and their rationale and their costs when you get there and get the full report to this committee? Because we have now basically put a hold on those plans until we can really make an assessment.

General THURMAN. Mr. Chairman, yes, sir, I will. Based on our discussion yesterday, I fully expect to make that the number-one priority if I am confirmed, once I get on the ground over there.

[The information referred to follows:]

Mr. Chairman, I am fully aware of the concerns raised by you and other members of this committee regarding the Command's tour normalization initiative as well as the efforts to consolidate forces onto two enduring hubs. My top priority remains the review of these programs in order to address the concerns that have been raised.

Chairman LEVIN. All right. Thank you.

Also, do you have any thoughts about the balance, the decision-making process as to, if there is another aggression, which I think is likely, from North Korea, what the proper response is to that aggression, as to what that decisionmaking process is, as to the adequacy of the response, but also as to the proportionality of the response? Is that a joint decision by us and South Korea?

General THURMAN. Mr. Chairman, that is a very good question. First off, South Korea is a sovereign country, and I believe it is well within their rights to protect themselves if there is a provocation. Obviously, that has to be balanced.

I do know that General Sharp has been working very close with the ROK chairman of their joint forces on counter-provocation and looking at the responses in a joint fashion. But I do expect, if confirmed, I will look into that and make sure that we are doing the right things, because I think a provocation can occur any time.

Chairman LEVIN. Thank you.

Finally, Admiral, on the question of your detention of people, you made reference to a couple, I think, that are on a ship, something like that. Is there any legal prohibition against them being tried before an Article 3 court or before a military commission?

Admiral MCRAVEN. Sir, again, it depends on the individual case, and I would be more than happy to discuss the cases that we have dealt with.

Chairman LEVIN. Well, no, not specific cases so much as is there any legal prohibition, assuming it is planned to having those people tried either before an Article 3 court, if they have committed a crime against the United States, or if they have committed a crime of war, by being tried by a U.S. military commission?

Admiral MCRAVEN. Sir, not to my knowledge, there is no prohibition.

Chairman LEVIN. Thank you.

Senator AYOTTE. Thank you, Mr. Chairman.

I wanted to follow up, General Allen, on the question of detention. If we were to, for example, capture someone like Ayman al-Zawahiri in Yemen, for example, outside of Afghanistan, could we detain him in Afghanistan at the detention facilities there?

General ALLEN. We would not recommend that.

Senator AYOTTE. Why is that?

General ALLEN. Because Afghanistan is a sovereign country.

Senator AYOTTE. So we are not going to use the detention facilities, for example, in Afghanistan to detain terrorists who are captured outside the territory of Afghanistan?

General ALLEN. It is not our intention.

Senator AYOTTE. Following up, Admiral, with respect to detention, if we, for example, were to capture al-Zawahiri, and capture

him and not kill him but hold him for purposes of gathering intelligence and detaining him long term because we felt we needed to under the law of war, where would we hold him?

Admiral MCRAVEN. Yes, ma'am. I think that is a policy question that I am really not in a position to answer. From a practical military standpoint, obviously, we can hold Zawahiri or Anwar al-Awlaki or anybody else in a number of places, from a practical standpoint.

It becomes a policy issue and a sovereignty issue for various countries. As General Allen said, we have looked a number of times at whether or not we would do that in Afghanistan, but owing to the nature of the sovereignty of Afghanistan and the concern about the potential backlash from the Afghan Government, we have recommended not to do that.

Senator AYOTTE. Admiral, would it not be helpful, 10 years into the war on terror, to have a long-term detention and interrogation facility that would be secure for individuals where we need to gather further intelligence?

Admiral MCRAVEN. Ma'am, I believe it would be very helpful.

Senator AYOTTE. As far as you understand it, is Guantanamo Bay still off the table in terms of being used for that type of facility?

Admiral MCRAVEN. As far as I understand it, it is. Yes, ma'am.

Senator AYOTTE. Okay. Thank you very much.

I wanted to also ask, General Allen, as the Deputy Commander of CENTCOM, could you tell me if any ISR assets have been pulled from Iraq and Afghanistan or Yemen or the general CENTCOM area of operations in order to support operations in Libya?

General ALLEN. While I was still serving at CENTCOM, yes, there were.

Senator AYOTTE. Could you describe generally what those assets were taken away and whether that has taken any capabilities away from us, ISR capabilities in Afghanistan?

General ALLEN. Not in Afghanistan, ma'am. I will get back to you on that question.

[The information referred to follows:]

There were no U.S. intelligence, surveillance, or reconnaissance assets taken from Afghanistan to support operations in Libya. One Predator unmanned aerial vehicle scheduled to flow to Afghanistan was redirected to support Libya operations. In addition, the United Kingdom remissioned an ASTOR reconnaissance aircraft (Ground Moving Target Indicator collection) from Afghanistan to support Libya operations. These adjustments were planned for and thus had no significant impact to intelligence, surveillance, and reconnaissance capabilities in Afghanistan.

Senator AYOTTE. I would appreciate an answer on that. Thank you very much for that.

I do have an additional question for you, General Thurman, and I will submit that for the record.

I want to thank all three of you for your distinguished service and your willingness to continue to serve our country.

Chairman LEVIN. Thank you, Senator Ayotte.

Senator Graham.

Senator GRAHAM. Thank you, Mr. Chairman.

Admiral McRaven, if night raids were stopped, ordered to be stopped by the Afghan Government, how would that affect our ability to be successful?

Admiral MCRAVEN. Sir, I think stopping night raids would certainly be detrimental to the special operations aspect of the fight in Afghanistan.

Just to give you some statistics, sir, over the course of the last 12 months, the task force that I commanded over there, we conducted approximately 2,000 operations. Of those 2,000 operations, somewhere in the neighborhood of 88 percent of them were, in fact, conducted at night. I think what is lost on a lot of folks is that approximately 84 to 86 percent of those missions, we never fired a shot.

Senator GRAHAM. Admiral, I think it is fair to say that 78 percent of the people we are detaining come from those special operations missions.

Admiral MCRAVEN. They do, sir.

Senator GRAHAM. Now, General Allen, if the Afghan Government insisted that the 2,400 people we are detaining at Parwan Prison under the law of war be transferred to Afghan control by January 2012, would you have concerns about that decision?

General ALLEN. I would, sir.

Senator GRAHAM. Would it affect our ability to be successful?

General ALLEN. I think it would.

Senator GRAHAM. All right. Now let us talk about counterinsurgency. The option that the country has chosen through President Obama is to withdraw 10,000 this year, all surge forces gone by September.

Is it fair to say, General Allen, that was not one of the options presented to the President by General Petraeus?

General ALLEN. It is a more aggressive option than that which was presented.

Senator GRAHAM. My question is, was that an option?

General ALLEN. It was not.

Senator GRAHAM. I just want the country to understand that this is not the Petraeus strategy any longer. The Commander in Chief has the perfect right to do what he did. I just hope that it hasn't undercut what I think could be a very successful outcome.

Now, perception is reality. Do you agree, General Allen, that when the President announced at West Point that we would be withdrawing in July 2011, that created a problem in Afghanistan because it was seen by some as that America is leaving?

General ALLEN. I believe there are those who could have—

Senator GRAHAM. Were letters sent to people by the Taliban saying, "America is leaving in July, you better watch what you do," something to that effect?

General ALLEN. The Taliban have, in fact, communicated—

Senator GRAHAM. Would you agree that the Lisbon statement that we are going to transition in 2014 was very helpful?

General ALLEN. It was.

Senator GRAHAM. Okay. My question is, now that we have changed the strategy and the withdrawal timeline, have we sent the signal yet again of uncertainty? Seems to be the Taliban commanders have renewed optimism, and it seems to be some of our allies are going to Iran and other places.

My question is, do you believe that this more aggressive withdrawal policy by the President has sent a signal of uncertainty, or do you know?

General ALLEN. I think it is too early to tell, Senator.

Senator GRAHAM. Great answer. I know you are going to try your best. We are all pulling for you. Let us know what we can do to help you. God bless you all.

General ALLEN. Thank you.

Chairman LEVIN. Your own position, though, you do support that decision of the President. Is that correct?

General ALLEN. I do, Senator.

Chairman LEVIN. I think it is important that even though this apparently was more aggressive than General Petraeus recommended, that military leaders of our country support this decision and feel it was an appropriate decision for the President to make. Is that correct?

General ALLEN. Mr. Chairman, we are in execution now.

Chairman LEVIN. But you also felt it was a proper decision for the President to make?

General ALLEN. It is the prerogative of the President to take the recommendations of his commanders and to make the decision. He made that decision, and we are executing it.

Chairman LEVIN. All right. Is it something you agree with?

General ALLEN. I agree.

Chairman LEVIN. Thank you.

We want to thank all of you. I think we have probably run just exactly to noon, where we thought we would end.

Your families are sitting behind you, some of them shivering. They are not just figuratively behind you, but they are literally behind you. The air conditioning here is robust, just the way you and your men and women who serve with you act robustly.

Your challenges are tremendous. You are all up to them. With the support of your families, you will succeed in meeting those challenges. This committee is very grateful for the work that you do and the men and women with whom you serve. I can't say that enough. I am sure it sounds to some people listening to our hearings it is a bit repetitious, but from our perspective, we cannot repeat it enough. We do that with a purpose, so that our troops understand exactly how much they mean to us and to the American people.

Thank you again, and we will stand adjourned. We will hope to get these confirmations done this week. That is also a challenging, aggressive schedule, but we are up to it, just the way you are up to it.

Thank you.

[Whereupon, at 12:00 p.m., the committee adjourned.]

[Prepared questions submitted to GEN James D. Thurman, USA, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readi-

ness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders' responsibilities and authorities and the role of the Chairman of the Joint Chiefs of Staff. These reforms have also vastly improved cooperation between the Services and the combatant commanders, among other things, in joint training and education and in the execution of military operations.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?
 Answer. No. If confirmed, I will continue to be alert to the need for any modifications.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. Not applicable.

DUTIES AND QUALIFICATIONS

Question. What is your understanding of the duties and functions of the Commander, United Nations Command/Combined Forces Command (CFC)/U.S. Forces Korea (USFK) and what is your understanding of how these different command responsibilities interrelate?

Answer. The Commander, United Nations Command (CDR UNC), serves as commander of an international command and is responsible for maintaining the Armistice Agreement on the Korean Peninsula. The CDR UNC acts in accordance with United Nations Security Council resolutions and directives. The CDR UNC also acts in accordance with directives from the U.S. Government that are transmitted by the Secretary of Defense through the Chairman of the Joint Chiefs of Staff, keeping the Commander of U.S. Pacific Command (PACOM) informed. The CDR UNC is responsible for the strategic direction, guidance, operational control of forces, conduct of combat operations, and acceptance and integration of United Nations Command (UNC) member nations' forces during contingencies. This includes enabling access to the seven UNC bases in Japan.

The Commander, CFC, as commander of a bi-national command, supports Armistice Agreement compliance, deters hostile acts of external aggression directed against the Republic of Korea, and, should deterrence fail, defeats an external armed attack. In this position, the Commander, CFC, is responsible for receiving strategic direction and missions from the U.S.-Republic of Korea (ROK) Military Committee, which acts as the strategic coordinating interface for ROK and U.S. national authorities. The missions and functions for the Commander, CFC, are prescribed in the Terms of Reference for the Military Committee and in the U.S.-ROK "Military Committee Strategic Directive Number 2".

The Commander, USFK, as a subunified Commander of PACOM, is responsible for all duties and functions associated with title 10, U.S.C., the Unified Command Plan, and CJCSI 5130. This role provides the United States with the means to provide forces to CDR UNC/CFC as required, and to support these forces with the required logistics, administration, and policy initiatives necessary to maintain readiness.

These three commands are, in a sense, mutually supporting of each other's missions. The CFC and USFK can both provide support to the Armistice functions of the UNC. Similarly, both USFK and UNC can provide support to CFC for the latter's deterrence and defense missions. International support to the CFC is coordinated through the UNC. The close consultative partnership with our ROK allies and the member nations of UNC ensure that these commands are leveraged in a complementary fashion in order to support the national interests of both nations.

Question. What background and experience, including joint duty assignments, do you possess that you believe qualifies you to perform these duties?

Answer. If confirmed, my first priority as the UNC/CFC/USFK Commander must be to maintain trained, ready, and disciplined joint and combined commands that are prepared to fight and win. My extensive operational combat and joint duty experience positions me well to perform this key task. As a battalion executive officer during Desert Shield/Desert Storm, the Chief of Plans and Policy for Allied Forces Southern Europe in Kosovo (1999-2000), the Chief of Operations for Coalition Forces Land Component Command during the invasion of Iraq (2002-2003), and the Multi-National Division Commander responsible for all coalition operations in Baghdad, Iraq (2006), I have obtained the operational experience and skills that are needed by a UNC/CFC/USFK Commander who must lead forces that are ready to "fight tonight" on the Korean Peninsula. If confirmed, my operational experience in a combined/coalition environment would be of great benefit in a future role as the Commander of multinational UNC and the bi-national U.S.-ROK CFC. In the case of CFC, the ability to work effectively with a partner nation is particularly impor-

tant as significant change will occur under the Strategic Alliance 2015 plan. Experience gained from operating and leading in multiple combined/coalition environments prepares me well for applying the lessons learned toward further strengthening of the U.S.-ROK Alliance. Most recently, my assignment as the Commander of U.S. Army Forces Command (FORSCOM) has prepared me for leading large and complex organizations—FORSCOM is the Army's largest organization—an experience that will serve me well when dealing with the complexities of UNC, CFC, and USFK. Additionally, by currently having the responsibility of overseeing, manning, training, and equipping 237,000 Active component soldiers, and training and readiness oversight of 560,000 soldiers in the Army National Guard and U.S. Army Reserve, I am well positioned to apply this experience toward maintaining joint and combined commands on the Korean Peninsula that are prepared to fight and win.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform the duties of the Commander, UNC/CFC/USFK?

Answer. If confirmed, I plan on conducting in-depth discussions and exchange with personnel of the U.S. and ROK Governments, nongovernmental organizations, educational and research institutions, and civil society at large in order to enhance the expertise needed to command UNC, CFC, and USFK. I will continue this dialogue and exchange throughout my time in command so that my knowledge and understanding of affairs in the ROK continues to increase and mature.

RELATIONSHIPS

Question. Section 162(b) of title 10, U.S.C., provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the commanders of the combatant commands. Other sections of law and traditional practice, however, establish important relationships outside the chain of command. Please describe your understanding of the relationship of the Commander, UNC/CFC/USFK with the following officials:

The Secretary of Defense.

Answer. The Department of Defense (DOD) is composed of the Office of the Secretary of Defense (OSD), the Joint Chiefs of Staff, the Joint Staff, the Office of the Inspector General of DOD, the combatant commands, the military departments, the defense agencies, DOD Field Activities, and such other offices, agencies, activities, organizations, and commands established or designated by law, or by the President or by the Secretary of Defense, in accordance with sections 111, 113, and 192 of title 10, U.S.C. The functions of the heads of these offices are assigned by the Secretary of Defense in accordance with existing law. The CDR UNC reports to the Secretary of Defense through the Chairman, Joint Chiefs of Staff, and through the Secretary of Defense to the President, while at the same time keeping the Commander, PACOM, informed of any communications with U.S. national authorities. A validated binational U.S.-ROK document provides further guidance on CDR CFC's unique relationship with the ROK National Command and Military Authorities and the U.S. Secretary of Defense.

Question. The Deputy Secretary of Defense.

Answer. The Deputy Secretary of Defense, in accordance with the authorities contained in title 10, U.S.C., and except as expressly prohibited by law or order of the President or Secretary of Defense, has full power and authority to act for the Secretary of Defense and to exercise the powers of the Secretary of Defense upon any and all matters concerning which the Secretary of Defense is authorized to act pursuant to law.

Question. The Under Secretary of Defense for Policy.

Answer. The Under Secretary of Defense for Policy is the Principal Staff Assistant and advisor to the Secretary and Deputy Secretary of Defense for all matters on the formulation of national security and defense policy, and the integration and oversight of DOD policy and plans to achieve national security objectives.

Question. The Under Secretary of Defense for Intelligence.

Answer. The Under Secretary of Defense for Intelligence is the Principal Staff assistant and advisor to the Secretary and Deputy Secretary of Defense regarding intelligence, counterintelligence, security, sensitive activities, and other intelligence-related matters.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Chairman of the Joint Chiefs of Staff is the principal military advisor to the President, the National Security Council, the Homeland Security Council, and the Secretary of Defense. CDR UNC communicates through the Chairman, Joint Chiefs of Staff, to the Secretary of Defense.

Question. The Secretaries of the Military Departments.

Answer. Subject to the authority, direction, and control of the Secretary of Defense, the Secretaries of the Military Departments are responsible for, and have the authority necessary to conduct, all affairs of their respective Departments, including: recruiting; organizing; supplying; equipping to include research and development; training; servicing; mobilizing; demobilizing; administering to include the morale and welfare of personnel; maintaining; construction, outfitting, and repairs of military equipment; and the construction, maintenance, and repair of buildings, structures, and utilities as well as the acquisition, management, and disposal of real property and natural resources.

Question. The Chiefs of Staff of the Services.

Answer. The Chiefs of Staff of the Services are responsible for the organization, training, and equipping of the Services under title 10, U.S.C. Their support is critical to meet readiness needs. The Service Chiefs of Staff also provide military advice to the President, the National Security Council, the Homeland Security Council, the Secretary of Defense, and the Chairman of the Joint Chiefs of Staff as members of the Joint Chiefs of Staff.

Question. Commander, U.S. Pacific Command.

Answer. The Commander, USFK, as commander of a subunified command of PACOM, reports directly to Commander, PACOM, on matters directly pertaining to USFK areas of responsibility. Commander, UNC and Commander, CFC, keep the Commander, PACOM, informed of any communications with U.S. national authorities.

Question. Other Combatant Commanders.

Answer. The commanders of the combatant commands are responsible to the President and the Secretary of Defense for accomplishing the military missions assigned to them and shall exercise command authority over assigned forces as directed by the Secretary of Defense. The operational chain of command runs from the President to the Secretary of Defense to the commanders of the combatant commands. The Chairman of the Joint Chiefs of Staff functions within the chain of command by transmitting to the commanders of the combatant commands the orders of the President or the Secretary of Defense.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the next Commander, UNC/CFC/USFK?

Answer. Based on my initial study of the security situation on the Korean Peninsula and vital U.S. national interests in Northeast Asia, there are four major and enduring challenges that confront any UNC/CFC/USFK Commander.

First is the requirement to deter war, defend against provocation and attack, and maintain the Armistice. As shown by events in 2010, North Korea continues to commit provocations that have become increasingly escalatory and dangerous. A significant challenge is to understand the regime of Kim Jong-il and attempt to determine its intent. The Alliance must take the necessary actions to deter attack, break the cycle of North Korean provocation, and remain ready to defend if deterrence fails.

Second, the command must continue readiness preparations to fight and win a war with North Korea and at the same time prepare to deal with the complexity of a regime collapse and the attendant consequences.

Third, the UNC/CFC/USFK Commander must sustain the strategic U.S.-ROK Alliance and ensure that the military component of the Alliance continues to be strong as it has been historically and serves the interests of our two countries.

Finally, we must continue to transform the Alliance in the best way to achieve national security objectives on the Korean Peninsula. This should be done within the dynamic changes occurring in the region and the fiscal constraints imposed by the global economic situation.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges and problems?

Answer. If confirmed, to address these enduring challenges I will focus on the readiness of U.S. and ROK forces to be able to "fight tonight." This includes placing strong emphasis on joint and combined warfighting fundamentals, readiness and sustainment at best value, interoperability of forces, and counter-provocation. Planning and preparing for the complex challenges of war and collapse provides the foundation for deterrence, defense, and maintaining the armistice. If deterrence fails the Alliance will win the war; if regime collapse occurs we will deal with the myriad potential scenarios of regime collapse.

If confirmed, I will work to sustain and strengthen the Alliance, building on the great work both our militaries and our governments have done over the years and

focus on sustaining mutual trust and interoperability of forces through a robust joint and combined training program.

Finally, if confirmed, I will work toward transforming the military component of the Alliance in accordance with the interests of the United States and ROK and our fiscal constraints.

NORTH KOREA

Question. North Korea represents one of the greatest near-term threats to regional security and stability. The seriousness of the threat is seen by North Korea's continued pursuit of a nuclear capability and ballistic missile program, and particularly, over the past year, by North Korea's unprovoked and deadly attacks against South Korea—specifically the attack on the ROK navy ship *Cheonan* in March 2010 and the artillery attack on South Korea's Yeonpyeong Island in November 2010.

What is your assessment of the current security situation on the Korean peninsula?

Answer. I believe North Korea remains the primary threat to security in Northeast Asia. Over the past few years, the security situation on the peninsula has reached high levels of tension following the attack on the *Cheonan* and the artillery shelling of Yeonpyeong Island. North Korea has hindered the progress of Six-Party denuclearization talks; adopted a policy of provocative actions in an attempt to secure concessions; continues its nuclear program, which includes pursuit of Highly Enriched Uranium; and continues to proliferate dangerous technologies. Although its conventional force threat continues to decline, it has compensated by investing in asymmetric capabilities, such as ballistic missiles and Special Operations Forces. However, Kim Jong-il carefully weighs the cost and benefit of military action and avoids actions that could escalate to war. Our primary concern is the potential for additional North Korean provocations, which is a tool of choice as part of its coercive diplomatic strategy designed to safeguard the regime, maintain internal control, and extort foreign aid.

North Korea is also in the process of a succession of power from Kim Jong-il to his son, Kim Jong-un, adding another dynamic to deterrence. Although little is known of Kim Jong-un, there is no evidence to suggest his decisionmaking calculus will differ significantly from his father's or that his strategic priorities will change. However, Kim Jong-un's youth and inexperience increase the likelihood of miscalculation, as does the imperative for him to establish credibility with the military hardliners he needs to support succession. These factors make him less predictable in the near-term.

I believe the U.S.-ROK Alliance is strong and ready to address these and other security challenges on the Korean Peninsula.

Question. What is your understanding of how the attacks on the *Cheonan* and on Yeonpyeong Island changed the ROK and U.S. security posture on the Peninsula?

Answer. In response to these two attacks by North Korea, the United States and ROK engaged in a series of combined military exercises designed to send Pyongyang the clear message that its irresponsible and belligerent behavior must stop and that both the United States and ROK remain committed to enhancing their combined defense capabilities. The first exercise held in this series was a combined maritime and air readiness event called *Invincible Spirit*. This exercise included extensive training in the areas of anti-submarine warfare, battle group air defense, surface warfare training, including live fire exercises, and a robust complement of aircraft that flew a variety of missions.

Invincible Spirit was followed by the *Ulchi Freedom Guardian* exercise. This annual exercise, like all other training events conducted by the CFC, was designed to improve the U.S.-ROK Alliance's ability to preserve the Armistice. The exercise was focused on ensuring readiness to prepare for, prevent, and prevail against a full range of provocations that could occur on the Korean peninsula now and in the future. Following *Ulchi Freedom Guardian*, the United States and ROK conducted a combined anti-submarine warfare exercise. Focused on anti-submarine warfare tactics, techniques, and procedures, the exercise was conducted in the waters west of the Korean Peninsula. This anti-submarine warfare exercise was followed by a U.S.-ROK naval and air training event that provided training in the areas of fleet protection, alerts/intercepts and defensive counter air/combat air patrols, air defense, surface warfare readiness, basic seamanship maneuvers, logistics sustainment, and communications.

When viewed in their totality, the set of combined exercises conducted since North Korea's attacks in 2010 have enhanced U.S. and ROK combined defense capabilities and readiness, improved force interoperability, and demonstrated U.S. commitment to regional security.

Question. What is your assessment of the threat posed to South Korea, Japan, and the United States by North Korea's ballistic missile and weapons of mass destruction (WMD) capabilities?

Answer. North Korean ballistic missile and nuclear programs pose a direct threat to security in Northeast Asia. The Kim Regime continues to use these two programs to shape conditions to gain leverage during negotiations, to extract concessions, and ensure regime survival.

With an inventory of more than 800 ballistic missiles, North Korea continues to build short and medium range missiles of increasing range, lethality, and accuracy, while enhancing the survivability of its missile forces. With its continued research and development of an Intercontinental Ballistic Missile, and possible fielding of an intermediate range missile, North Korea grows closer to threatening the western United States and striking Okinawa, Guam, and Alaska. This missile development program presents a threat which cannot be ignored.

North Korea demonstrated the ability to produce a nuclear weapon with its second nuclear test on 9 October 2006 at Punggye. The intelligence community assesses that North Korea has enough material for at least six plutonium-based weapons. Additionally, there are indications that North Korea has pursued a highly enriched uranium program in the past, and it is likely the effort continues today. In November 2010 North Korea displayed a uranium enrichment facility at Yongbyon to foreign visitors. The facility's purpose, ostensibly, is to produce fuel for a light water reactor currently under construction at the facility. However, this capability could provide an alternative source of highly enriched uranium for use in nuclear weapons.

Question. What is your assessment of North Korea's conventional capabilities and readiness?

Answer. Despite decades of decline in overall readiness and capabilities, North Korea retains the fourth largest armed force in the world with more than one million active duty and five million Reserve personnel. More than 70 percent of these forces are arrayed within 90 miles of the Demilitarized Zone and North Korea has garrisoned up to 250 long-range artillery systems in positions to strike the Greater Seoul Metropolitan Area. Although an aging and technologically inferior force, North Korea fields over 1,700 aircraft, 800 naval vessels, and 13,000 artillery systems. The most modern North Korean tanks are no match for the U.S. M1A2 main battle tank or ROK K1 and K2 tanks. The North Korean Air Force has a very limited number of modern aircraft, and its pilots have a fraction of the flight hours of ROK and U.S. Air Force pilots. The North Korean Navy's surface fleet is likewise aging and suffering from maintenance problems. North Korea's leadership likely understands its military is incapable of seizing the Korean Peninsula by force and that a conventional war would result in an end to the Kim Regime. However, the North will continue to use its military as a key component of a coercive strategy designed to gain concessions through intimidation and provocations.

Question. What, if anything, should be done to strengthen deterrence on the Korean Peninsula?

Answer. I believe the most important factor in maintaining deterrence on the Korean Peninsula is the maintenance of a strong U.S.-ROK Alliance. The Alliance is grounded in the Mutual Defense Treaty and we are now striving to develop and expand the Alliance based on the June 2009 U.S.-ROK Joint Vision Statement, Strategic Alliance 2015 plan, and the Guidelines for U.S.-ROK Defense Cooperation. These Alliance development measures are designed to build more adaptive and flexible force capabilities and promote closer policy and strategic coordination between the United States and ROK. Additionally, it is important to think of deterrence in a holistic manner, and to this end I will seek to ensure that we maximize the military elements of national power as a part of a synchronized whole-of-government approach. By maintaining a strong Alliance, the United States and ROK will maximize the deterrence effect of their combined capabilities.

NORTH KOREAN NUCLEAR PROGRAM

Question. North Korea recently disclosed that it has a functioning uranium enrichment program. Whether this program is intended for nuclear power, as the North Korean government claims, or for nuclear weapons is unknown. Having achieved enrichment capability, however, North Korea could certainly use that capability to produce highly enriched uranium for weapons. North Korea has a history of proliferating missile and nuclear technology. The Proliferation Security Initiative (PSI) was established as a means to interdict suspect shipments, including shipments of nuclear or missile items to and from North Korea.

Would you recommend any improvements to the organization or capability of the PSI member nations to improve the ability to interdict prohibited shipments to and from North Korea?

Answer. The PSI is an interdiction program designed to impede or stop the transfer of WMD, their delivery systems, and related materials to and from states and non-state actors of proliferation concern. It is an interdiction partnership among participating states where the development of operational concepts, organization of the program, and the sharing of information is done through meetings of its Operational Experts Group (OEG). Since endorsing the Statement of Interdiction Principles in May 2009, the ROK has increased its PSI participation. This increased participation is evidenced by its hosting of the Eastern Endeavor 10 maritime WMD interdiction drill off the port city of Busan and its joining of the OEG in November 2010. Although issues of organization and operational concepts of the PSI are an issue for the OEG, I do believe the initiative is an important component of the international community's effort to stop the transfer of WMD, their delivery systems, and related materials to states and actors of concern. I support enhancement of the initiative.

Question. In your view, are there additional steps that DOD could take to ensure that North Korea does not proliferate missile and weapons technology to Syria, Iran and others?

Answer. Effective counterproliferation requires an interagency and international cooperative effort with the intelligence effort the most critical. ROK and U.S. naval forces from the U.S. 7th Fleet participated in the October 2010 ROK led PSI exercise Eastern Endeavor 10. If confirmed, I will assess whether U.S. or Combined ROK/U.S. forces can more effectively contribute to the PSI. For the employment of other DOD forces and capabilities, I would defer to the Commander, PACOM, the Chairman of the Joint Chiefs of Staff, and the Secretary of Defense.

Question. In your view, how does the lack of progress in diplomatic efforts to persuade North Korea to verifiably dismantle its nuclear weapons program inform or guide U.S. nuclear deterrence strategy in the region?

Answer. As I understand the situation, our diplomatic efforts have been extensive and we have made numerous attempts to reach an agreement leading to a verifiable disablement and dismantlement of North Korea's nuclear weapons programs through the Six-Party Talks. However, responsibility for the lack of agreement rests with North Korea. The Kim regime continues to pursue its nuclear weapons and delivery systems programs and this indicates its potential intent to be able to employ or proliferate nuclear weapons. Therefore, the United States must maintain its nuclear deterrence capability and continue extended deterrence for the ROK until such time as North Korea verifiably dismantles its nuclear program.

BALLISTIC MISSILE DEFENSE PRIORITIES

Question. The proximity and size of North Korea's missile inventory and the unpredictability of the North Korean regime place a premium on the missile defense capabilities in the vicinity of the Korean Peninsula.

What is your assessment of the highest priority missile defense needs of USFK and CFC?

Answer. In 2008, the Secretary of Defense signed guidance directing the distribution of a set number of Patriot PAC-3 and GEM missiles for the Korean Peninsula. To date, the designated number of munitions set forth in that document has not been provided to the U.S. Patriot forces stationed in the ROK. The number of missiles designated for the ROK or, preferably, the Air Defense Artillery Brigade's full unit basic load, is the highest priority concerning missile defense on the Korean Peninsula.

Question. What missile defense capabilities do you believe are needed in the near term to meet the operational needs of these commands, and what systems are available to provide such capabilities?

Answer. One of the basic tenants of air and missile defense is the employment principle of "layered defense." Layered defense allows different missile defense systems to engage an inbound ballistic missile at different points in its trajectory. Although there is more than one missile defense system in the ROK, they are not mutually supporting nor do they provide layered defense. The U.S. and ROK militaries both have Patriot systems which conduct engagements in the terminal phase of a missile's flight (the current version of the ROK Patriot systems provide a very limited Theater Ballistic Missile [TBM] defense capability). The ROK Navy has acquired three Aegis-like missile defense cruisers (KDX IIIs) but they currently do not have missiles to be used in theater missile defense (TMD) nor do they have the ability to engage TBMs over the Korean Peninsula. The system that would best support

the layered defense employment principle is a Terminal High Altitude Air Defense (THAAD) system which can engage inbound TBMs at either the terminal or mid-course phase of flight. A THAAD system could be used to provide layered defense and also improve early warning for the Korean Peninsula as well as enhance Ballistic Missile Defense (BMD) early warning in the region.

Question. The February 2010 Ballistic Missile Defense Review established a policy of pursuing a Phased Adaptive Approach (PAA) to regional missile defense, including in Europe, the Middle East, and East Asia. This approach is intended to provide timely and effective defense of existing and emerging missile threats with a flexible set of missile defense capabilities, tailored to each region.

Do you support the PAA to missile defense, and do you believe it is an appropriate approach to providing missile defense capabilities for the vicinity of the Korean Peninsula?

Answer. I do support the President's guidance on PAA as detailed in the Ballistic Missile Defense Review report. This approach is designed to enhance regional security and deterrence architectures in a way that is flexible and adaptive, and responsive to the threat. In coordination with Commander, PACOM, USFK has been working over the past decade to build a robust BMD force posture that contributes to deterrence and assures the ROK of our commitment to their security and to greater regional peace and stability. I will continue to work with my counterparts as plans for a regional PAA are further developed.

Question. Do you believe it would be in our security interests to seek a cooperative missile defense relationship with South Korea as a means of enhancing security on the Korean Peninsula and the region?

Answer. Yes. There are many benefits and synergies to be gained by cooperative missile defense with the ROK. The United States is working with the ROK to evaluate its missile defense requirements. Should the ROK decide to pursue additional BMD capabilities, experience with other allies has shown that we can each leverage our BMD capabilities through operational cooperation. We also believe that regional security can be enhanced through cooperative missile defense relationships.

NORTH KOREA-POW-MIA RECOVERY EFFORTS

Question. From 1996–2005, the United States worked with the North Korean military to recover and repatriate the remains of American servicemembers who perished on the Korean peninsula. However, in the spring of 2005, the United States unilaterally halted the program.

In your opinion, should the United States work with North Korea to repatriate the remains of American servicemembers found in North Korea? If so, when, or under what conditions, should the United States resume such cooperation?

Answer. It is a core value of the United States and our military to not leave a fallen comrade and I believe every attempt should be made to recover those missing as long as it does not conflict with critical security interests and appropriate conditions exist to execute recovery operations. This is an enduring commitment our Nation makes to its soldiers, sailors, airmen, and marines.

The Defense Prisoner of War/Missing Personnel Office (DPMO) has responsibility for strategy and policy regarding the recovery of Korean War remains and provides DOD oversight on the entire personnel accounting process. The UNC assists DPMO and PACOM Joint POW/MIA Accounting Command in arranging operational and logistics support to remains recovery operations in North Korea. Also, the UNC conducts repatriation ceremonies after remains are transferred to UNC control at the Joint Security Area at the end of each operation.

Once national policymakers determine that conditions permit reengagement with North Korea, DPMO will lead the U.S. team for negotiating the resumption of repatriating Korean War remains. If U.S. and North Korean representatives can reach a mutually agreeable arrangement that provides the necessary process and procedures to conduct operations, it would seem possible to resume this humanitarian effort. The arrangement must address the safety and security of U.S. personnel executing remains recovery in North Korea. When U.S. commanders are satisfied that an acceptable level of risk to U.S. personnel exists, remains recovery operations can resume in North Korea.

Question. If confirmed, what, if anything, would you do to restart cooperation with North Korea on the POW–MIA remains recovery program?

Answer. National policymakers will decide when to restart remains recovery operations in North Korea. This is a bilateral U.S.-North Korea policy issue. However, when the decision is made, the UNC will continue to play a key role in supporting remains recovery operations in North Korea.

REPUBLIC OF KOREA-U.S. ALLIANCE

Question. Since the end of World War II, the U.S.-ROK alliance has been a key pillar of security in the Asia-Pacific region. This relationship has gone through periods of inevitable change.

What is your understanding of the current U.S. security relationship with the ROK?

Answer. It is my understanding the current U.S. security relationship with the ROK is very strong. It is based on mutual respect and trust and grounded in the Mutual Defense Treaty. In June 2009, the United States and ROK signed a Joint Vision statement that commits both nations to building an alliance that ensures a peaceful, secure, and prosperous future for the Korean Peninsula, the Asia-Pacific region, and the world at large. Objectives established in the Joint Vision statement are being supported by the Strategic Alliance 2015 plan that was agreed to by the United States and ROK in October 2010. The Strategic Alliance 2015 plan will synchronize multiple U.S. and ROK military transformation efforts that are designed to build adaptive and flexible force capabilities to deter and defeat aggression and provocations against the ROK. The plan moves the United States and ROK toward building an Alliance that ensures a peaceful, secure, and prosperous future for the Korean Peninsula, the Asia-Pacific region, and the world, as called for in the June 2009 U.S.-ROK Joint Vision statement.

The military component of Alliance development is led by the Guidelines for U.S.-ROK Defense Cooperation that were agreed to by the U.S. Secretary of Defense and ROK Minister of Defense in October 2010. Established to direct the future course of the U.S.-ROK defense relationship, they are based on and serve to advance the June 2009 Joint Vision Statement and the U.S.-ROK Mutual Defense Treaty. Under the guidelines, the U.S. upholds a firm commitment to ROK defense and both nations will implement a set of enabling measures needed for an effective combined defense posture. These enabling measures are: to enhance intelligence and information sharing; strengthen operational planning; further develop capabilities to address the ballistic missile threat from North Korea; institutionalize an extended deterrence policy committee; enhance interoperability; enhance the combined exercise program; and to collaborate on lessons learned. The defense guidelines also recognize the importance of close bilateral cooperation to promote regional and global peace and stability. In support of these stability objectives, the guidelines specify implementation of the following measures: strengthening capabilities to contribute to regional and global peace and stability; supporting the non-proliferation of WMD, related materials, technologies, and their means of delivery; enhancing bilateral, trilateral, and multilateral defense relationships; strengthening cooperation for international security and peacekeeping efforts; and cooperating closely on other transnational and non-traditional security challenges. The defense guidelines recognize the importance of close policy and strategic consultation between the United States and ROK for the enhancement of common interests and further development of the Alliance.

Question. If confirmed, what measures, if any, would you take to improve the U.S.-ROK security relationship?

Answer. Recognizing that a strong U.S.-ROK Alliance is one of the most important factors for maintaining peace and stability on the Korean Peninsula and in the region at large, I will, if confirmed, continue the work of my predecessors directed at sustaining strong ties with personnel of the ROK military, other members of the ROK Government, Korean civil society, and the South Korean people at large. I will encourage continued exchange and cooperation activity between Command personnel and the people of local Korean communities—activity that connects and binds Americans and Koreans together. I will also execute the Alliance building initiatives to promote the continuation of a strong U.S.-ROK security relationship.

Question. What is your assessment of ROK warfighting capability trends with regard to the modernization and capability improvements in ROK equipment and training?

Answer. It is my understanding that the ROK military is a highly professional and competent force with a modern, mobile network-centric warfare capability that fields an array of advanced weapon systems. These weapon systems include the K1 main battle tank, K9 self-propelled artillery, and the KDX-III guided missile destroyer. The ROK military is led by a professional officer corps that currently exercises daily command of its forces. It has sustained and supplemented operational experience through recent deployments to places such as Iraq, Afghanistan, the Gulf of Aden, Lebanon, as well as participating in a host of United Nations peacekeeping and humanitarian assistance operations. Initiatives to further enhance force capabilities, modernize weapon systems, and improve organizational structures and force

management are being implemented as part of the ongoing “307” defense reform program.

ROK military modernization and capability improvements are supported through the maintenance of a robust Foreign Military Sales (FMS) and Defense Armaments Cooperation Program with the U.S. These programs promote interoperability between U.S. and ROK forces and thus create a more capable combined force. During fiscal year 2010, the ROK was our 11th largest FMS buyer. FMS sales were augmented by a robust military training program, where the ROK sends students to the U.S. for training in a variety of military-related courses.

ROK force capability is also sustained and improved through the conduct of a tough and realistic exercise program. In addition to participating in the combined Ulchi Freedom Guardian, Key Resolve, and Foal Eagle exercises with the U.S., the ROK military also conducts annually the Taegeuk, Hoguk, and Hwarang exercises. These exercises help derive requirements for joint force and unit structure development, improve interoperability between the military services, and practice inter-agency coordination. It is these factors in total that lead me to believe that the ROK is a highly professional, competent, and modern military force.

Question. Until last year, the United States and ROK were planning the transfer to wartime operational control (OPCON) of ROK forces to the ROK in 2012. Then, in June 2010, the United States and ROK agreed to further delay the transfer of OPCON until December 2015. This delay was purportedly agreed to because of the evolving security situation on the Peninsula and in order to more closely synchronize the transfer with other transformation initiatives.

What is your understanding of the ROK’s current and projected military capabilities and the ability of ROK forces to assume a greater role in the defense of their homeland including responsibility for command and control of the readiness, operations, and warfighting of their own forces in wartime (“OPCON Transfer”)?

Answer. It is my understanding that the South Korean military is a highly professional and competent force that will be capable of leading Alliance defense of the ROK in wartime. Numbering over 633,000 active duty personnel, it ranks as the world’s sixth largest military in terms of personnel and is a modern, mobile network-centric warfare capable force that fields an array of advanced weapon systems. The ROK military is led by a professional officer corps that currently exercises daily command of its forces. It has gained operational experience through recent deployments to places such as Iraq, Afghanistan, the Gulf of Aden, Lebanon, as well as participating in a host of United Nations peacekeeping and humanitarian assistance operations in East Timor and Morocco and other operations around the world. Initiatives to enhance force capabilities, modernize weapon systems, and improve organizational structures and force management are being implemented as part of the ongoing “307” defense reform program.

ROK military force capability is supplemented through the conduct of a tough and realistic exercise program. In addition to participating in the combined Ulchi Freedom Guardian, Key Resolve, and Foal Eagle exercises with the U.S., the ROK military also conducts annually the Taegeuk, Hoguk, and Hwarang exercises. These exercises derive requirements for joint force and unit structure development, improve interoperability between the military services, and practice inter-agency coordination. Because of these factors, it is my understanding that the ROK will be ready and capable of leading Alliance defense of the ROK in wartime.

Question. Following the decision to delay OPCON transfer to 2015, the United States and ROK entered into an agreement referred to as Strategic Alliance 2015 which is described in the USFK October 2010 Strategic Digest as “an overarching and synchronized Alliance transformation roadmap, containing mutual Alliance end states and milestones, ensuring a smooth transition of the lead for the combined defense of the Republic of Korea.”

What is your understanding of the purpose and scope of the Strategic alliance 2015?

Answer. It is my understanding that the Strategic Alliance 2015 plan synchronizes multiple U.S. and ROK transformation efforts that are designed to build adaptive and flexible capabilities to deter aggression against the ROK and to defeat aggression should it occur. The plan’s objective is to sustain and enhance the U.S.-ROK Alliance’s combined defense posture and capabilities and to support the Alliance’s future vision and bilateral defense priorities as stated in the Guidelines for U.S.-ROK Defense Cooperation. Execution of the Strategic Alliance 2015 plan ensures the effective synchronization of major elements of Alliance restructuring while maintaining a strong combined defense posture to deter or respond to the range of North Korean security challenges throughout the transition process. Key elements of the Strategic Alliance 2015 plan include: refining and improving combined defense plans; defining and developing the new organizational structures required for

ROK lead of the war effort; implementing more realistic exercises based on the North Korean threat of today and tomorrow; preparing for the transition of wartime operational control to the ROK Joint Chiefs of Staff in December 2015; consolidating U.S. military forces in the ROK onto two enduring hubs under the Yongsan Relocation Plan (YRP) and Land Partnership Plan (LPP); and force management. The goal of all initiatives under the Strategic Alliance 2015 construct is to build adaptive force capabilities that deter and defeat future provocations against the ROK and fight and win on the Korean Peninsula should deterrence fail. The Strategic Alliance 2015 plan as a whole synchronizes ongoing transformation efforts to ensure they are aligned and mutually supporting and better postures both nations to deter, counter, and defeat North Korean provocations and aggression.

Question. How will it help ensure that the OPCON transfer takes place no later than December 2015, as it is now scheduled?

Answer. It is my understanding that established within the Strategic Alliance 2015 framework is a governance structure that guides implementation of the plan to include the transition of wartime operational control according to specified milestones. Implementation issues are identified and addressed through a bottom-up process, where U.S.-ROK governance bodies in order of rising decisionmaking authority include council of colonels, subcommittees headed by two-star level general officers, a steering committee, the joint committee, and the Strategic Alliance 2015 working group. These bodies continually work issues related to—among other elements of Strategic Alliance 2015—OPCON transition and ensure that established milestones are adhered to and difficulties addressed as they arise.

REGIONAL POSTURE

Question. In your opinion, how should the United States employ its forces in ROK to provide for regional presence and engagement, and to best respond to regional threats, provide support for out-of-area contingencies, and maintain readiness?

Answer. It is my understanding that how U.S. forces stationed in the ROK are employed is currently in a state of evolution as the Command transforms its presence there. Our primary focus must remain the deterrence of aggression against the ROK—a key Alliance and security treaty partner—and to defeat aggression should it occur. However, the Command's transformation initiatives as currently structured will create the opportunity for U.S. forces stationed in the ROK to become available for use in regional exercises, engagement, and global operations. We must maintain a U.S.-ROK Alliance military posture that allows for an immediate capability to deal with military threats and other contingencies on the Korean Peninsula while also seizing upon opportunities to address global challenges such as terrorism, the proliferation of WMD, piracy, peacekeeping, post-conflict stabilization, and regional engagement, as called for in the 2009 U.S.-ROK Joint Vision for the Alliance. If confirmed, I will conduct a careful and thorough review of the opportunities for U.S. forces to be employed toward the support of regional engagement and out-of-area operations.

CONSOLIDATION OF U.S. FORCES

Question. The LPP is consolidating the combat brigade and supporting elements of the 2nd Infantry Division in and around Camp Humphreys, south of Seoul. New construction of facilities and infrastructure required to support the consolidation is being carried out using funds from both the Host Nation (South Korea) and U.S. military construction accounts. The YRP proposes to move most of the U.S. forces currently stationed at Yongsan compound in Seoul to Camp Humphrey as well. The YRP relocation is to be largely funded by the South Korean Government, but the United States will pay for the construction of the housing to support the relocation.

What is your assessment of the current status of the two consolidation plans and the timeline for completion?

Answer. The YRP and the Land Partnership Plan (LPP) are being executed simultaneously and are scheduled for completion in 2016. The two plans are structured in such a way as to facilitate the orderly movement of servicemembers, civilian employees, and their families to the enduring hubs. The YRP and LPP plans are closely dependent on each other. Land development and infrastructure projects are under construction and must be completed before any unit moves can take place.

The LPP program is on schedule with the majority of projects under design and/or construction. The current plan is to complete construction of the LPP program in the first quarter of calendar year 2016 and complete all unit moves by the end of 2016. YRP negotiations still continue concerning requirements for the U.S. Korea Command (KORCOM) Headquarters. Any delays in reaching agreement over this facility could push back completion of the YRP program. However, both the United

States and ROK expect these negotiations to be concluded shortly. The current plan is to complete YRP construction in early 2016 and complete all moves by the end of 2016 in accordance with the Strategic Alliance 2015 plan.

For the relocation initiative as a whole, as I understand it, the planning and program phase is nearly complete and the design phase is well underway. Site development/construction has been on-going since 2005 and vertical construction of YRP projects will begin within weeks. LPP program construction has been at a steady state since it began in 2004.

Question. What do you anticipate to be the total costs to be incurred by the U.S. Government to carry out the two consolidations?

Answer. According to the LPP signed by the United States and ROK in 2002, most of the facility costs associated with moving U.S. forces from locations north of Seoul to areas south are obtained from host nation burden sharing funds. It should be noted, however, that some of the LPP facility construction was paid for with U.S. Military Construction (MILCON) funds. Under the YRP, the majority of costs associated with relocation will be covered by the ROK, to include the construction of facilities such as barracks, operational facilities, and support facilities. Housing owned by the United States at U.S. Army Garrison Yongsan—a facility that is returned to the ROK under YRP excluding a small parcel—will be replaced by the ROK at U.S. Army Garrison Humphreys. Housing currently leased at U.S. Army Garrison Yongsan will be replaced by a privately financed housing project. For both YRP and LPP, additional land required to execute these two agreements was purchased and provided by the ROK.

Over \$2 billion worth of projects are in design and approximately \$1.2 billion worth of construction are currently underway at U.S. Army Garrison Humphreys. The United States agreed to provide the majority of required family housing and unaccompanied senior leader quarters for our force at a cost estimated at between \$1–\$2 billion. With respect to the relocation of 2nd Infantry Division under the LPP, the United States intends to fund the requirements using both appropriated funds and host nation provided burden sharing funds. The U.S. share of the total cost to carry out the two ROK-U.S. agreements will be approximately \$2.4 billion.

Question. To what extent do you believe the United States should be responsible for the costs related to environmental clean-up at bases being vacated as a result of the LPP?

Answer. The return of U.S. installations in the ROK is governed by the U.S.-ROK Status of Forces Agreement (SOFA) and its relevant agreements. The environmental clean-up of overseas facilities must be accomplished in accordance with existing DOD instructions. If confirmed, I will ensure that all provisions established in the SOFA and relevant DOD instructions are adhered to during the base return process and work with all parties concerned to practice good environmental stewardship at Command facilities.

Question. In your opinion, does the consolidation better support the warfighting mission? If so, how?

Answer. I have been briefed that the relocation initiative improves warfighting capabilities in several ways. First, the 2nd Infantry Division and future Korea Command will be collocated at U.S. Army Garrison Humphreys, improving coordination and planning between staffs of the two organizations. Similarly, relocating 2nd Infantry Division to U.S. Army Garrison Humphreys consolidates the Division's subordinate units at a single location, increasing direct face-to-face contact amongst unit personnel while reducing the physical span of control and infrastructure needed to support the Division. The unit is better postured to train and fight together.

I understand that consolidation at two enduring hubs also enhances command and control and coordination. In addition to strengthening relationships between operational staffs of the 2nd Infantry Division and a future Korea Command, 2nd Infantry Division is better positioned to affect initial liaison and coordination during reception, staging, and onward movement of deploying maneuver and sustainment brigades. Early liaison and coordination sets the conditions to more reliable and effective command and control during execution of later phases/stages of conflict. Positioning of the 2nd Infantry Division at U.S. Army Garrison Humphreys also improves tactical flexibility by posturing the division in a better tactical location for rapid commitment in support of either of the forward stationed ROK armies and corps. This position also shortens logistical lines during the initial phases of conflict that better postures the division for successful employment later.

I have been briefed that consolidation will also enhance the execution of non-combatant evacuation operations (NEO). By reducing the dispersion of transportation assets, movement times are reduced. By separating U.S. forces from initial wartime threats such as North Korea's long-range artillery and its ground forces threatening Seoul, the vulnerability of these forces is reduced and their survivability

enhanced. 2nd Infantry Division located at U.S. Army Garrison Humphreys will be better able to integrate follow-on maneuver and sustainment brigades while not under the fire of North Korean long-range artillery. This factor supports the Division's preparation for combat activities. Finally, I understand that force consolidation enhances warfighting capabilities by improving soldier quality of life, realization of stationing efficiencies, optimizes use of land in Korea, and enhances force protection and survivability.

HOST NATION BURDEN-SHARING PROGRAMS

Question. Two programs supported by the ROK, the Combined Defense Improvement Program and the Korea Host Nation Funded Construction Program, provide cash and in-kind projects to satisfy U.S. military facility and infrastructure requirements.

What is your assessment of the current level and quality of the burden-sharing arrangement?

Answer. I have been informed that since 1991, the ROK has made contributions toward the costs of stationing U.S. military forces on its territory. These contributions are known as cost sharing contributions, where cost sharing is defined as the cash and in-kind contributions allies make to help offset the costs of stationing U.S. forces on their territory. Over the years cost sharing arrangements between the ROK and U.S. have been established and specified in a series of special measures agreements that typically covered periods of time ranging from 1 to 3 years. On 15 January 2009, the ROK and U.S. signed a 5-year Special Measures Agreement (SMA) that specifies cost sharing arrangements during the 2009 through 2013 time period.

ROK SMA contributions are divided into three cost sharing categories: labor, logistics, and ROK Funded Construction (ROKFC). Labor contributions are used solely for the purpose of paying the salaries and benefits of USFK's Korean national employees. Logistics support consists of in-kind support (logistics equipment, supplies, and services) to USFK from the ROK. Finally, ROKFC contributions support USFK's military construction and military construction-like requirements. ROK cost sharing contributions help ensure that the Command maintains its fight tonight readiness and builds the infrastructure needed for a transformed U.S. military force presence in the ROK.

In addition to support provided through the SMA, the ROK makes other contributions toward the costs of stationing U.S. military forces on its territory that are outside the SMA framework. Support of this type includes items such as force protection outside USFK facilities, the Korean Augmentation to the U.S. Army (KATUSA) program, improvements to infrastructure outside and around USFK facilities, use of ROK training areas, various fee exemptions, and other contributions. Unfortunately, the value of the non-SMA contributions is much more difficult to estimate, but in the past contributions of this type have been estimated to be valued in the range of hundreds of millions of dollars.

The current SMA expires at the end of 2013. Prior to 2013, the United States and ROK will engage in negotiations over a new SMA to specify cost sharing arrangements for the post-2013 time period. If confirmed, I will conduct an assessment on the level and adequacy of current cost sharing arrangements so that support can be given to U.S. goals and objectives during negotiations for a post-2013 SMA.

Question. What priorities would you establish, if confirmed, for U.S. forces in Korea to make the best use of these programs?

Answer. It is my understanding that USFK currently has a process in place to determine the appropriate distribution of ROK cost sharing contributions across the three cost sharing categories of labor, logistics, and ROK Funded Construction on an annual basis. If confirmed, I will review this process and make any needed changes to ensure that the contributions are being put to best use.

Question. The overwhelming majority of burden-sharing funds over the last 4 years has been used to carry out construction supporting the consolidation of forces at Camp Humphreys.

Do you believe this funding trend should be continued, or that funding should be spread to critical requirements at other U.S. bases in Korea?

Answer. ROK burden sharing (cost sharing) contributions are divided across three cost sharing categories: labor, logistics, and ROK Funded Construction (ROKFC). It is my understanding that USFK has a process in place to determine not only the appropriate distribution of cost sharing contribution across the three categories, but also the appropriate distribution within categories as well. Needs emanating from LPP requirements at U.S. Army Garrison Humphreys are supported in the ROKFC account. During the 2009–2011 time period, the value of cost sharing contribution

allocated to ROKFC averaged 40 percent of the total SMA contribution yearly. USFK conducts regular reviews of the ROKFC account to ensure that important and emergent military construction requirements are met. If confirmed, I will review the allocation of ROK cost sharing contribution across the ROKFC category to ensure that needs at Command facilities are being properly addressed.

TRAINING OF U.S. FORCES IN THE REPUBLIC OF KOREA

Question. In the past several years, as U.S. forces in Korea have drawn down and consolidated, home station training of both U.S. Army and Air Force units based on the Peninsula has emerged as a significant concern.

Do you believe there is sufficient availability and access to training ranges for large ground unit maneuver and fires, and for close air support missions and other Air Force operations?

Answer. As I understand it, the ground training requirements for U.S. forces in the ROK are currently being met. Expanded digital connectivity is being leveraged to combine live events in the field with virtual or simulation-driven events to maximize training opportunities at the tactical and operational levels. This might include linking events on and off the Korean Peninsula to both replicate the complexity of joint and combined warfare and to optimize use of available resources.

Access to air-to-ground training ranges in the ROK has increased in recent years due to refinements in range scheduling procedures. The command will need to continue unit deployments to other locations for the foreseeable future in order to maintain air crew qualifications with all types of ordnance and for electronic warfare. Additional arrangements must still be made with the ROK Government to further improve the level of range access.

Question. In your view, are the ranges in Korea adequate to meet the training requirements of U.S. forces?

Answer. I have been briefed that the current inventory for training ranges is sufficient to meet U.S. ground forces training requirements and maintain readiness. The United States is working closely with the ROK to improve the quality and availability of training ranges for our air component. Due to the ROK's rapid economic growth, the relatively large scale of its military given the size of the country, environmental concerns, and competition between military and civic infrastructure, our Korean military partners work within the same limitations on range availability that U.S. forces face at home. If confirmed, I will continue to work with our ROK ally to modernize and fully utilize all available training facilities to ensure force readiness requirements are met.

TOUR NORMALIZATION IN SOUTH KOREA

Question. DOD is pursuing full tour normalization for U.S. military personnel assigned to the Korean Peninsula. Essentially, full tour normalization would lengthen service tours from predominantly 1 year, as is the case today, to 3 year tours for those accompanied by their families and 2 years for those who are unaccompanied. Completion of full tour normalization would result in about 12,000 U.S. military families in South Korea.

With the events of the past year on the Korean Peninsula and the likelihood that circumstances on the Peninsula will remain unpredictable for the foreseeable future, and considering that the costs of such a policy change have not yet been fully identified, do you believe that it is prudent to proceed with plans for full tour normalization and to significantly increase the number of U.S. families in South Korea? If so, why?

Answer. It is my understanding that one of the most important benefits of tour normalization is improved force readiness. Currently, about 85 percent of USFK servicemembers rotate each year, just as they have completed Korea specific training and the local exercise cycle. This limits the ability to achieve the same level of readiness enjoyed by American forces in the Continental United States, Europe, and other locations in the Pacific region. Conversely, as the proportion of trained military personnel in place with 3 year accompanied and 2 year unaccompanied tours increases, USFK will see benefits such as improved understanding of the region and operational environment, the strengthening of relations with our ROK ally, and enhanced ability to support the transition of Wartime Operational Control to the ROK. Simultaneously, USFK is in the process of relocating the majority of its forces in the ROK south of the capital city Seoul, thereby reducing the immediate threat to family members and simplifying the execution of noncombatant evacuation operations if such operations should ever become necessary. Non-combatant evacuation operation plans are exercised and practiced on a regular basis. Future hubs under the Command's relocation initiative lie outside the effective range of North Korean

artillery. If confirmed, I will conduct a review of the tour normalization initiative, taking into account recent recommendations made by members of this committee.

Question. Since full tour normalization was not contemplated as part the either the LPP or YRP, what is your understanding of the total costs of full tour normalization and how do you believe it would be funded?

Answer. It is my understanding that the Secretary of Defense directed in September 2010 implementation of full tour normalization in Korea as affordable and according to no specific timeline. The Secretary further directed that a plan be provided to him on how to proceed with tour normalization no later than 31 March 2011. It is my further understanding that the Secretary of Defense is currently reviewing options to implement the tour normalization initiative and that his recommended course of action will be forwarded to the President as part of the fiscal year 2013 budget request.

QUALITY OF LIFE

Question. Through investment in quality of life amenities, to include housing, health care, and recreation, the Department has worked to achieve the goal of making South Korea an "assignment of choice" for U.S. Forces.

What do you consider to be the most essential quality of life programs for soldiers and their families stationed in Korea and, if confirmed, what would be your goals in this regard?

Answer. I believe the most essential quality of life programs for soldiers and their families serving in the ROK are access to quality living and working conditions and facilities, quality health care, and quality educational opportunities for dependent family members. If confirmed, I will advocate for and take actions to provide our soldiers and family members with the best possible living and working environment, health care services, and educational opportunities for dependent family members.

Question. What is your understanding of the capacity of DOD schools in South Korea to accommodate the increase in families/children associated with tour normalization?

Answer. My understanding is that USFK currently has 10 schools with the capacity of about 5,500 students. A number of these schools are scheduled to be replaced as part of the YRP, LPP, and the DOD Education Activity School Rebuilding Program. When these programs are completed, USFK will have the capacity to educate about 6,100 students. School capacity will need to increase to about 14,800 students in order to satisfy the projected demand required by full tour normalization.

MEDICAL CARE FOR U.S. FORCES IN KOREA

Question. One of the most important quality of life issues in Korea is ensuring access to high quality medical care for servicemembers of all military branches and their families. Separate medical chains of command responsible for providing health care, and the presence of non-command-sponsored family members who need health services, among other factors, have presented challenges. One possible reform that has been proposed is to offer a TRICARE-like benefit to all family members and DOD employees, regardless of command sponsorship.

If confirmed, how would you assess the need for improvement in the management and delivery of health care services in South Korea?

Answer. Quality health care is essential for all servicemembers regardless of where they serve. However, this is even more important for our servicemembers stationed in the ROK, who are thousands of miles from home. I have been informed of the long history of excellent care provided by U.S. military treatment facilities in the ROK (Army and Air Force) as indicated by the most recent pinnacle surveys by the Joint Commission in 2010 that placed them among the top for patient care, patient safety, and overall performance for military installations. Furthermore, the advances in specialty care to include surgical care, imaging, and therapeutics of our host nation partners in the ROK is among the top in the world, with four of the institutions with whom USFK conducts business certifying in the Joint Commission International Surveys in the last 2 years. If confirmed, I will continue to monitor and assess the availability and quality of health care for our servicemembers, DOD civilian employees, and their families serving in the ROK.

Question. What is your view on whether or not the policy regarding medical support to noncommand sponsored family members should be reconsidered and revised by DOD?

Answer. It is my understanding that starting under previous USFK commanders and continuing through the present time, extraordinary strides have been made to ensure access and availability of the full range of services, entitlements, and privileges for noncommand sponsored family members and dependent family members

who reside with their military, DOD civilian, or invited contractor sponsor in the ROK. If confirmed, I will continue those efforts. I will also remain abreast of and weigh in on DOD policy adjustments that support adequate staffing and funding of U.S. military treatment facilities so that noncommand sponsored personnel can gain access at levels approaching that of command sponsored beneficiaries.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. DOD and the Military Services have developed comprehensive policies and procedures to improve the prevention of and response to incidents of sexual assaults, including providing appropriate resources and care for victims of sexual assault. However, numerous incidents of sexual misconduct involving military personnel in deployed areas as well as at home stations are still being reported. Victims and their advocates claim that they are victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate treatment for the victim. They assert that commands fail to respond appropriately with basic medical services and with an adequate investigation of their charges, followed by a failure to hold assailants accountable.

Do you consider the current sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Answer. First and foremost, one sexual assault in our ranks is too many and significantly affects the morale and readiness of our units and personnel. We are working to eliminate these crimes from our formations. The current Sexual Assault Prevention and Response (SAPR) policies and procedures are effective and will continue to improve as we transition to the Sexual Harassment/Assault Response and Prevention (SHARP) program, especially for the confidential (restricted) cases. Over the next 27 months, the SHARP program is expected to be fully functional with trained, full time professionals to educate, respond, and assist in the reduction and elimination of this terrible crime.

Question. What problems, if any, are you aware of in the manner in which confidential reporting procedures have been put into operation?

Answer. Confidential (restricted) reporting is critical to empowering victims of these traumatic crimes. It provides them with confidential reporters such as Sexual Assault Response Coordinator (SARC), Victim Advocate, Chaplain, and/or Medical Provider to privately discuss the details and aid in their recovery. The challenge is when a non-confidential reporter such as a concerned roommate, friend, parent, Equal Opportunity Advisor, or by-stander is informed or aware of the incident and attempts to provide assistance and reports it, then the victim's confidentiality is lost and the case automatically becomes an Unrestricted case. This is when the victims may consider themselves "revictimized" and forced to relive the assault. We must continue to encourage reporting, support victims of sexual assault, and ensure commanders can take appropriate actions as required to maintain good order and discipline.

Question. What is your view of the policies and procedures in place to prevent and respond to sexual assaults, including assaults against contractor personnel?

Answer. The Army has sound policies and procedures in place to prevent and respond to sexual assaults. Annually all soldiers are required to take Awareness and Prevention Training. Every sexual assault victim regardless of duty status is treated with dignity and respect, receives immediate medical care and victim advocate services. If the victim is a contractor then the case is transitioned to the contractor's medical, victim advocate, and investigative staff unless the company does not possess these services then the Army provides the necessary care for the victim.

Question. What is your view of the adequacy of the training and resources in place to investigate and respond to allegations of sexual assault?

Answer. Our Criminal Investigation Division (CID), special sexual assault investigators and prosecutors are well-trained and do an outstanding job investigating and responding to every allegation of sexual assault.

Question. What is your view of the willingness and ability of the commanders to hold assailants accountable for their acts?

Answer. Commanders understand their roles as commanders and judicial officials under the Uniform Code of Military Justice. I am confident commanders exercise those authorities and responsibilities. Each case requires investigation, examination of the evidence, appropriate advice from experts, and decisions by the commander. I trust commanders to make their best judgment in each case, and am not aware of any reluctance to make the hard decisions when required.

Question. If confirmed, what actions would you take to ensure senior level direction and oversight of efforts to prevent and respond to sexual assaults and to hold assailants accountable for their actions?

Answer. I am a strong supporter of the Army's "I. A.M. Strong" campaign which directs all personnel to Intervene, Act, and Motivate each other to prevent sexual assaults. In addition, I will ensure the command has the required number of trained SARC/SHARP, Medical, CID, and Chaplain personnel to provide ample prevention training to units and responsive care to all victims. These actions support the CSA's desire for a cultural change in our Army and lead the attack on sexual assaults in our Nation.

HOMOSEXUAL CONDUCT POLICY

Question. The "Don't Ask, Don't Tell Repeal Act of 2010", enacted on December 22, 2010, provides for the repeal of the current DOD policy concerning homosexuality in the Armed Forces, to be effective 60 days after the Secretary of Defense has received the DOD's comprehensive review on the implementation of such repeal, and the President, Secretary, and Chairman of the Joint Chiefs of Staff certify to the congressional defense committees that they have considered the report and proposed plan of action, that DOD has prepared the necessary policies and regulations to exercise the discretion provided by such repeal, and that implementation of such policies and regulations is consistent with the standards of military readiness and effectiveness, unit cohesion, and military recruiting and retention.

What is your view on repealing the current DOD policy?

Answer. This is a policy change that we can make successfully. I believe that the great soldiers, sailors, airmen, and marines can and will accommodate such a significant change. The American people have spoken on this subject through their elected officials, and the result is the law that we currently have and the new policy we are deliberately preparing to implement. An important part of this process is to engage our men and women in uniform and their families. The Services' chain-teaching programs facilitate thoughtful, constructive dialogue on the subject between leaders and servicemembers. Ultimately, I am confident we will continue to have an outstanding military ready and able to serve and meet the needs of the Nation.

Question. If confirmed, do you foresee any problems with implementing a repeal of the policy commonly referred to as "Don't Ask, Don't Tell" in the ROK and USFK, if the President, Secretary of Defense, and the Chairman of the Joint Chiefs make the required certification to Congress?

Answer. If confirmed, I will implement repeal of the policy commonly referred to as "Don't Ask, Don't Tell," as directed. I have completed the DOD policy repeal training.

PREVENTION OF HUMAN TRAFFICKING

Question. Following media reports connecting prostitution and human trafficking in Korea to U.S. military forces, Commander, USFK, in 2004 instituted a zero tolerance policy regarding the illegal activities of prostitution and human trafficking. Under this policy, all USFK personnel, military and civilian, as well as contractors and their employees, are expected to comply with prohibitions, including observance of curfews and laws regarding off-limits areas and establishments, aimed at curtailing these practices.

What effects have changes in U.S. policy, as well as new criminal laws implemented by the ROK, had on the incidence of prostitution and human trafficking in Korea?

Answer. It is my understanding that USFK has a zero tolerance policy regarding the illegal acts of prostitution and human trafficking. The command's policy is built upon a four-prong strategy of awareness, identification, reduction, and enforcement. Awareness is established and increased through improved education such as mandatory prostitution and human trafficking training for all USFK personnel. Identification involves the recognition of indicators that an establishment may be participating in prostitution and human trafficking activities and the procedures to assist victims. Reduction occurs through constant Command presence and efforts to increase alternative activities available for servicemembers to participate in. Finally, the Command pursues aggressive enforcement on illegal establishments and offenders. Additionally, USFK regulation requires all incoming personnel to be briefed on the Command's policy towards prostitution and human trafficking, establishments and areas that have been placed off-limits, and on individual conduct and values. As a result of this policy and related actions, there has been a steady decrease in the number of reports of prostitution and human trafficking and the awareness of Command personnel on this important issue has increased. I fully support the Command's current policy of awareness, identification, reduction, and enforcement, and will continue—and improve upon if necessary—this approach if confirmed.

Question. What further changes, if any, to the Uniform Code of Military Justice and military regulations are needed in your judgment to ensure maximum effectiveness of the zero tolerance policy?

Answer. I know of no changes needed to the Uniform Code of Military Justice and military regulations. If confirmed, I will continue to be alert of the need for any changes.

Question. If confirmed, what steps would you take to further enhance the effectiveness of the zero tolerance policy?

Answer. If confirmed, I will continue the Command's existing policy of awareness, identification, reduction, and enforcement, and make efforts to sustain and build upon the success achieved to date.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as Commander, UNC/CFC/USFK?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis of any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTION SUBMITTED BY SENATOR JOSEPH I. LIEBERMAN

NORTH KOREAN NUCLEAR DETERRENCE

1. Senator LIEBERMAN. General Thurman, I note that in response to an advance policy question submitted to you by this committee, you stated that "the U.S. must maintain its nuclear deterrence capability and continue extended deterrence for the Republic of Korea (ROK) until such time as North Korea verifiably dismantles its nuclear program." I would appreciate it if you would expand upon this response, as I am concerned it does not fully reflect U.S. policy on extended deterrence for the ROK. For example, in a joint communiqué by the U.S.-ROK Security Consultative Meeting issued on October 8, 2010, Secretary of Defense Robert Gates "reaffirmed the continued U.S. commitment to provide and strengthen extended deterrence for the ROK, using the full range of military capabilities, to include the U.S. nuclear umbrella, conventional strike, and missile defense capabilities," without linking that commitment to the dismantlement of the North Korean nuclear program. I thank you again for undertaking this important assignment, and look forward to your response to this question.

General THURMAN. I fully support current U.S. policy on extended deterrence for the ROK. Specifically, that the United States will use the full range of military capabilities to include the nuclear umbrella, conventional strike, and missile defense capabilities, without linking the duration of that commitment to dismantlement of North Korea's nuclear program. This policy has been established in several Security Consultative Meeting Joint Communiqué as well as in the June 2009 Joint Vision of the U.S. and ROK Alliance. My intention was not to limit U.S. extended deterrence policy for the ROK in my response to the advanced policy question.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

KOREAN REALIGNMENT

2. Senator MCCAIN. General Thurman, do you agree with the conclusion of Senator Levin, Senator Webb, and myself that a period of review and reassessment is needed to determine whether the base realignment plan in Korea is still the right plan?

General THURMAN. I am fully aware of your concerns regarding the Command's base relocation plans. My top priority is to review the relocation program in order to address the concerns that have been raised.

3. Senator MCCAIN. General Thurman, what is your understanding of the cost of this current plan?

General THURMAN. It is my understanding that total costs for the Yongsan Relocation Plan and Land Partnership Plan will be about \$12 billion.

4. Senator MCCAIN. General Thurman, what do you consider to be the benefits of current planning for base realignment?

General THURMAN. It is my understanding that the relocation plans were developed to address several problems associated with the existing basing arrangement. These problems included civilian encroachment, non-optimal base locations for the conduct of operations today, and declining servicemember quality of life due to aging and deteriorating facilities. I have been briefed that the relocation initiatives will improve warfighting capabilities by: collocating 2nd Infantry Division and the future U.S. Korea Command, enhancing coordination, planning, and command and control; reducing 2nd Infantry Division's span of control and support infrastructure needs; improving tactical flexibility by better positioning 2nd Infantry Division for rapid support of either of the forward stationed ROK armies and corps; and shortening logistical lines during the initial phase of a conflict. In addition to improving these warfighting capabilities, the relocation initiatives will also enhance force protection and survivability by moving personnel and equipment outside tactical effective range of North Korean long-range artillery and improve the ability to conduct non-combatant evacuation operations. I have been told that once completed, relocation will create stationing efficiencies and optimize the Command's use of land in the ROK. Servicemember quality of life will be improved through the construction of new and modern facilities.

DEPLOYMENT OF ARMY UNITS FROM KOREA

5. Senator MCCAIN. General Thurman, in your answers to the committee's advance policy questions, you stated that the U.S. Forces Korea (USFK) Command's transformation initiatives as currently structured "will create the opportunity for U.S. forces stationed in the ROK to become available for use in regional exercises, engagement, and global operations." GAO completed a report last month that questioned the cost effectiveness of the tour normalization plan and whether Army families would consider it an improvement in quality of life if soldiers assigned to South Korea would be required to deploy to other regions. Is the extended deployment of U.S. combat forces away from Korea consistent with the guidelines contained in the U.S.-ROK Defense Cooperation agreement and the Strategic Alliance 2015 plan?

General THURMAN. The deployment of U.S. forces off the Korean Peninsula appears to be consistent with mutually agreed upon documents between the United States and ROK. For example, the June 2009 Joint Vision of the U.S.-ROK Alliance states that the two countries are building a comprehensive strategic alliance of bilateral, regional, and global scope, adding that the ROK will take the lead role in combined defense of Korea supported by an enduring U.S. military force presence on the Korean Peninsula, in the region, and beyond. The Joint Vision further notes that the United States and ROK will work closely to address the global challenges of terrorism, proliferation of weapons of mass destruction, and piracy, enhancing bilateral coordination on the conduct of peacekeeping and post-conflict stabilization operations.

It is my understanding that the deployment of U.S. forces off the Korean Peninsula is consistent with the Strategic Alliance 2015 plan. Similarly, the October 2010 Guidelines for U.S.-ROK Defense Cooperation recognize the importance of close bilateral cooperation to promote regional and global peace and stability. With this recognition in mind, the guidelines list measures that will be taken to strengthen the Alliance's role in enhancing regional and global security. These measures are: strengthening capabilities to contribute to regional and global peace and stability;

supporting the nonproliferation of weapons of mass destruction, related materials, technologies, and their means of delivery; enhancing bilateral, trilateral, and multi-lateral defense relationships; strengthening cooperation for international security and peacekeeping efforts; and cooperating closely on other transnational and non-traditional security challenges. The defense guidelines recognize the importance of close policy and strategic consultation between the United States and ROK for the enhancement of common interests and further development of the Alliance. It should be noted, however, that U.S. commitment to ROK security remains strong and the focus should always be placed on maintaining peace and stability on the Korean Peninsula.

6. Senator MCCAIN. General Thurman, if confirmed, will you be comfortable with allowing a portion of the approximately 28,000 U.S. forces under your command to be deployed to other regions of the world for up to a year while leaving their families in Korea?

General THURMAN. It is my understanding that USFK's current transformation initiatives will create the opportunity for U.S. forces stationed in the ROK to become available for use in regional exercises, engagement, and global operations. Making these forces available for activities such as this appears to support objectives established in the June 2009 Joint Vision for the U.S. and ROK Alliance. It is my intention to conduct a careful and thorough review of the opportunities and timing for U.S. forces stationed in Korea to be employed toward the support of regional exercises, engagement, and global operations, as well as the effect such employment would have on security of the Korean Peninsula and military families.

7. Senator MCCAIN. General Thurman, how is the participation of USFK forces in the Army's force generation process consistent with the U.S. goal to deter or defeat aggression should it occur?

General THURMAN. It is my intention to conduct a careful and thorough review of the effects deploying U.S. forces stationed in the ROK to regional exercises and global operations will have on deterring and defeating aggression directed at the ROK. Our primary focus must remain defense of the ROK.

8. Senator MCCAIN. General Thurman, could a deployment of a sizeable number of U.S. forces away from Korea for a year act as a destabilizing event?

General THURMAN. The primary focus of U.S. forces stationed in the ROK must be the deterrence of aggression against the ROK and, should deterrence fail, defeat of that aggression. My intention is to conduct a careful and thorough review of the prospect for employing military forces assigned to USFK toward the support of regional exercises and global operations and the effect such employment would have on security of the Korean Peninsula.

9. Senator MCCAIN. General Thurman, how would such deployments be seen by our ROK allies?

General THURMAN. Through documents such as the June 2009 Joint Vision of the U.S.-ROK Alliance and October 2010 Guidelines for U.S.-ROK Defense Cooperation, the ROK has committed itself to working with the United States to address the global challenges of terrorism, proliferation of weapons of mass destruction, piracy, and enhance bilateral coordination on the conduct of peacekeeping and post-conflict stabilization operations. The ROK has also committed itself to cooperate with the United States toward the promotion of regional and global peace and stability. Thus, there are bilateral agreements between the United States and ROK that suggests the latter's openness to the deployment of USFK forces to operations off the Korean Peninsula. With that being said, my intention is to conduct a careful and thorough review of the prospect for employing USFK forces toward the support of regional exercises and global operations.

TOUR NORMALIZATION IN KOREA

10. Senator MCCAIN. General Thurman, it has long been a goal of commanders of USFK to change from year-long, unaccompanied tours for most soldiers assigned to duty in South Korea to a normalized tour of 3 years, accompanied by dependents. However, the costs of carrying out this plan are very high. Building the required family housing, Department of Defense (DOD) schools, medical facilities, and so on represent an investment that the Army may not be able afford. What is your view of the feasibility of the current planning in this regard?

General THURMAN. It is my understanding that the Secretary of Defense directed in September 2010 implementation of full tour normalization in Korea as affordable and according to no specific timeline. The Secretary further directed that a plan be provided on how to proceed with tour normalization no later than 31 March 2011. It is my further understanding that the Secretary of Defense is currently reviewing options to implement the tour normalization initiative. A top priority of mine now is to review the tour normalization initiative along with the appropriate stakeholders.

11. Senator MCCAIN. General Thurman, do you support the proposal to increase the Overseas Housing Cost of Living Allowance to \$5,000 a month, per soldier, to pay for family housing?

General THURMAN. It is my understanding that the projected monthly Overseas Housing Allowance (OHA) under the Humphreys Housing Opportunity Program (HHOP) will be initially set at \$4,200. The HHOP OHA will be a special rate for HHOP units only. I also understand that establishing the OHA rate requires joint approval by the Secretary of the Army and Chairman of the Per Diem and Entitlements Committee who works within the Office of the Secretary of Defense (Personnel and Readiness). The Secretary of the Army approved the rate establishment on 29 March 2011 and forwarded the request to the Chairman of the Per Diem Committee for action. It is my understanding that the request is still within the Office of Secretary of Defense (Personnel and Readiness). A top priority of mine in the near-term will be a review of the Command's transformation program as a whole in order to address concerns that have been raised by Congress.

12. Senator MCCAIN. General Thurman, what is your understanding of the current position of Army leadership on this issue?

General THURMAN. It is my understanding that the February 2010 Quadrennial Defense Review stated that the Defense Department's long-term goal is to phase out all unaccompanied tours in Korea. Later that year, in September 2010, the Secretary of Defense directed the implementation of full tour normalization in the ROK as affordable and according to no specific timeline. It is also my understanding that the Secretary of Defense is currently reviewing options to implement the tour normalization initiative. A top priority of mine is to review the tour normalization initiative with all key stakeholders, to include Department of Army leadership.

QUESTIONS SUBMITTED BY SENATOR JAMES M. INHOFE

NORTH KOREA

13. Senator INHOFE. General Thurman, how does the shifting of U.S. forces impact the United Nations' readiness for deterring or repelling North Korean attacks?

General THURMAN. I have been briefed that the Command is currently implementing a relocation program under the Land Partnership Plan and Yongsan Relocation Plan. These plans were developed to address several problems associated with the existing basing arrangement. These problems included civilian encroachment, non-optimal base locations for the conduct of operations today, and declining servicemember quality of life due to aging and deteriorating facilities. I have been further briefed that the relocation initiatives will improve warfighting capabilities by: co-locating 2nd Infantry Division and the future U.S. Korea Command, enhancing coordination, planning, and command and control; reducing 2nd Infantry Division's span of control and support infrastructure needs; improving tactical flexibility by better positioning 2nd Infantry Division for rapid support of either of the forward stationed ROK armies and corps; and shortening logistical lines during the initial phase of a conflict. In addition to improving these warfighting capabilities, the relocation initiatives will also enhance force protection and survivability by moving personnel and equipment outside tactical effective range of North Korean long-range artillery and improve the ability to conduct non-combatant evacuation operations. A top priority of mine is to review the relocation program underway in the ROK to ensure that the Command maintains its "fight tonight" readiness.

14. Senator INHOFE. General Thurman, are U.S. forces in Korea receiving all the equipment they need to fight and win on the peninsula?

General THURMAN. [Deleted.]

15. Senator INHOFE. General Thurman, how will the military construction that USFK is requesting contribute to that readiness?

General THURMAN. I have been briefed that USFK has requested three military construction projects for fiscal year 2012. These three projects are: construction of a barracks complex at Camp Henry (Army); construction of a barracks complex at Camp Carroll (Army); and construction of a dormitory at Osan Air Base (Air Force). The two Army projects are needed so that unaccompanied soldiers can live in barracks that comply with new Army standards for security, space, and privacy. Current facilities are inadequate and adversely affect soldiers' quality of life and morale. The Air Force dormitory will eliminate a deficiency in unaccompanied personnel housing and improve quality of life for enlisted personnel. Taken as a whole, it is my understanding that these three projects will improve soldier quality of life, morale, and thus, combat readiness.

16. Senator INHOFE. General Thurman, how does the normalization of tours from 1 year tours to 3 year tours affect our readiness?

General THURMAN. I have been briefed that the tour normalization initiative will improve force readiness. Currently, about 85 percent of USFK servicemembers rotate each year, just as they have completed Korea specific training and the local exercise cycle. This limits the ability to achieve the same level of readiness enjoyed by American forces in the Continental United States, Europe, and other locations in the Pacific region. Conversely, as the proportion of trained military personnel in place with 3 year accompanied and 2 year unaccompanied tours increases, USFK will see benefits such as improved understanding of the region and operational environment, the strengthening of relations with our ROK ally, and enhanced ability to support the transition of Wartime Operational Control to the ROK. One of my top priorities upon arrival in the ROK is to conduct a review of the tour normalization initiative and how it will affect combat readiness.

SECURITY ASSISTANCE AND ENGAGEMENT PROGRAMS

17. Senator INHOFE. General Thurman, our military-to-military (1206), civilian-to-civilian (1207), small-scale special operations (1208), Commander's Emergency Response Program (CERP), and Combatant Commander's Initiative Fund (CCIF) have been incredibly successful in aiding developing nations, fighting terrorism, and providing resources for emergency situations. My belief is that the key to these programs has been the combined efforts of DOD, DOS, the chiefs of mission, and combatant commanders working together to increase the capabilities of our partner nations to provide for their own security, increasing stability in their region and around the globe. What value do these funds provide in your prospective areas of responsibility?

General THURMAN. In DOD, offices that play a role in management and execution of the programs identified in the question above are the Office of the Secretary Defense, Joint Staff, and combatant commands. As a subunified command, it is my understanding that the USFK Commander does not participate in the operation of these programs. Thus, I will have to defer to others on this question.

18. Senator INHOFE. General Thurman, do you have any concerns about being able to effectively execute these programs in your prospective areas of responsibility?

General THURMAN. As a subunified command, it is my understanding that the USFK Commander does not participate in the operation of these programs. That being said, it should be noted that by working on a daily basis with Korean counterparts to maintain peace and stability on the Korean Peninsula, USFK operates a robust engagement program with the ROK. This daily engagement is supplemented by USFK's Good Neighbor program. Under this program, a host of activities are conducted that engage and connect the Command with the local Korean community. Good Neighbor events educate, inform, and familiarize Koreans with the mission and purpose of USFK. This direct engagement allows Americans and Koreans to develop mutual understanding of one another's cultures, customs, and lifestyles, often leading to the formation of lifelong friendships between members of the two communities. Examples of events conducted by the Good Neighbor program include English-language camps, speaking engagements by U.S. military personnel, and tours of the Joint Security Area/Demilitarized Zone and USFK installations. The program promotes two-way exchange between USFK personnel and people of the ROK. The program helps foster exchange, understanding, and cooperation between members of USFK and the Korean communities that exist beside USFK facilities. All of these events strengthen the U.S.-ROK Alliance at both the professional and personal levels.

QUESTION SUBMITTED BY SENATOR ROGER F. WICKER

GLOBAL HAWK

19. Senator WICKER. General Thurman, by sharing intelligence, surveillance, and reconnaissance (ISR) responsibility with our coalition partners, I understand U.S. forces will realize a four-fold improvement in coverage over the Korean peninsula beyond Guam-based U.S. Air Force Global Hawk assets alone. I also understand USFK will have direct access to ISR data coming off a Korean Global Hawk, and U.S. and Korean intelligence analysts will continue to work side-by-side with Global Hawk data as they do today with U-2 data. Can you elaborate on the positive impact ROK acquisition of unmanned aircraft system platforms such as Global Hawk will have on American and ROK warfighters?

General THURMAN. ROK Global Hawk systems will dramatically increase our collection capacity. It means sustained collection for days and weeks at a time in crises or combat operations. Our goal is to distribute Global Hawk data creating new opportunities for existing exploiters and surge capacity in times of crises. Global Hawk in Korea provides the means to launch and recover U.S. platforms operating in the region. It provides greater capacity for Indications and Warning. Global Hawk can range the entire peninsula without risks to aircrews from air defense systems. In the hands of our allies, Global Hawk is a force multiplier on the peninsula and throughout the region.

QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

PATRIOT PAC-3 AND GUIDANCE ENHANCED MISSILES

20. Senator AYOTTE. General Thurman, in your responses to the advance policy questions, you state that the U.S. Patriot forces stationed in South Korea have not received the designated number of Patriot PAC-3 and Guidance Enhanced Missiles as per the Secretary of Defense's 2008 guidance. Why hasn't the designated number of munitions been provided yet to our troops in South Korea?

General THURMAN. [Deleted.]

21. Senator AYOTTE. General Thurman, has there been a subsequent policy decision to not provide these missiles to our forces in South Korea or is there a lack of capacity in the industrial base?

General THURMAN. No. However, the Joint Capabilities Mix II—and now III—studies show that there are not enough missile defense assets in the world to keep up with the growing threats. The 2010 Ballistic Missile Defense Review acknowledges this fact and describes methods and suggestions to deal with this to include burden sharing with our allies and ensuring that the missile defense fight is a joint capabilities fight using assets and capabilities from all Services to negate and defeat the multiple and diverse tactical ballistic missile threats.

[The nomination reference of GEN James D. Thurman, USA, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
May 4, 2011.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment in the U.S. Army to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be General

GEN James D. Thurman, 0000.

[The biographical sketch of GEN James D. Thurman, USA, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF GEN JAMES D. THURMAN, USA

Source of commissioned service: ROTC.

Educational degrees:

East Central University—BA—History
Webster University—MA—Management

Military schools attended:

Armor Officer Basic and Advanced Courses
U.S. Army Command and General Staff College
U.S. Army War College

Foreign language(s): None recorded.

Promotions:

	Date of Appointment
2LT	4 Jun 75
1LT	4 Jun 77
CPT	18 Nov 79
MAJ	1 Jan 86
LTC	1 Apr 91
COL	1 Sep 95
BG	1 Jan 00
MG	1 Jan 03
LTG	19 Jan 07
GEN	3 Jun 10

Major duty assignments:

From	To	Assignment
Oct 75	Dec 75	Platoon Leader, A Company, 6th Battalion, 32d Armor, 4th Infantry Division (Mechanized), Fort Carson, CO
Dec 75	Sep 77	Platoon Leader, Combat Support Company, later Executive Officer, C Company, 6th Battalion, 32d Armor, 4th Infantry Division (Mechanized), Fort Carson, CO
Oct 77	Dec 77	Motor Officer, 6th Battalion, 32d Armor, 4th Infantry Division (Mechanized), Fort Carson, CO
Dec 77	Sep 78	Student, Officer Rotary Wing Aviator Course, U.S. Army Aviation Center, Fort Rucker, AL
Sep 78	Jan 81	Aero-Scout Section Leader, later, Aero-Scout Platoon Commander, later Operations Officer, A Troop, 1st Squadron, 17th Cavalry, 82d Airborne Division, Fort Bragg, NC
Jan 81	Sep 81	Assistant S-3 (Operations), 1st Squadron, 17th Cavalry, 82d Airborne Division, Fort Bragg, NC
Sep 81	May 82	Student, Armor Officer Advanced Course, U.S. Armor School, Fort Knox, KY
May 82	May 84	S-3 (Operations), Combat Aviation Squadron, 11th Armored Cavalry Regiment, U.S. Army Europe and Seventh Army, Germany
May 84	May 85	Commander, B Troop, 11th Combat Aviation Squadron, 11th Armored Cavalry Regiment, U.S. Army Europe and Seventh Army, Germany
May 85	Jun 86	Student, U.S. Army Command and General Staff College, Fort Leavenworth, KS
Jun 86	Feb 87	S-3 (Operations), Apache Training Brigade, Fort Hood, TX
Feb 87	Jun 87	Student, AH-64 Aviator Qualification Course, U.S. Army Aviation Center, Fort Rucker, AL
Jun 87	Jun 88	S-3 (Operations), Apache Training Brigade, Fort Hood, TX
Jul 88	Dec 89	Executive Officer, 3d Squadron, 6th Cavalry Brigade, Fort Hood, TX
Dec 89	Jun 91	Executive Officer, 1st Battalion, 32d Armor, 1st Cavalry Division, Fort Hood, TX and Operations Desert Shield/Storm, Saudi Arabia
Sep 91	Apr 92	Commander, 2d Squadron, 2d Armored Cavalry Regiment, U.S. Army Europe and Seventh Army, Germany
Jul 92	Dec 93	Commander, 3d Squadron, 4th Cavalry, 3d Infantry Division (Mechanized), U.S. Army Europe and Seventh Army, Germany
Dec 93	Jul 94 ..	G-3 (Operations), 3d Infantry Division (Mechanized), U.S. Army Europe and Seventh Army, Germany
Jul 94	Jun 95	Student, U.S. Army War College, Carlisle Barracks, PA
Jun 95	Jun 97	Commander, 2d Brigade, 3d Infantry Division (Mechanized), Fort Stewart, GA
Jul 97	Jan 99	Commander, Operations Group, U.S. Army National Training Center, Fort Irwin, CA
Jan 99	Jun 00	Assistant Chief of Staff, Plans and Policy Division, Allied Forces Southern Europe, Regional Command South, Italy
Jul 00	Aug 02	Commanding General, National Training Center and Fort Irwin, Fort Irwin, CA
Sep 02	Sep 03	Director of Training, Office of the Deputy Chief of Staff, G-3, U.S. Army, and Chief, Operations, Coalition Forces Land Component Command, Operation Iraqi Freedom, Kuwait
Oct 03	May 04	Office of the Deputy Chief of Staff, G-3, U.S. Army with duty as Director, Army Aviation Task Force, U.S. Army Training and Doctrine Command, Washington, DC
Jun 04	Dec 05	Commanding General, 4th Infantry Division (Mechanized), Fort Hood, TX

From	To	Assignment
Dec 05	Nov 06	Commanding General, 4th Infantry Division (Mechanized)/Commanding General, Multi National Division-Baghdad, Operation Iraqi Freedom, Iraq
Nov 06	Jan 07	Commanding General, 4th Infantry Division (Mechanized), Fort Hood, TX
Jan 07	Aug 07	Commanding General, V Corps, U.S. Army Europe and Seventh Army, Germany
Sep 07	Apr 10	Deputy Chief of Staff, G-3/5/7, U.S. Army, Washington, DC
Jun 10	Present	Commanding General, U.S. Army Forces Command, Fort McPherson, GA

Summary of joint assignments:

	Date	Grade
Assistant Chief of Staff, Plans and Policy Division, Allied Forces Southern Europe, Regional Command South, Italy.	Jan 99–Jun 00	Brigadier General

Summary of operations assignments:

	Date	Grade
Executive Officer, 1st Battalion, 32d Armor, 1st Cavalry Division, Fort Hood, TX, and Operations Desert Shield/Storm, Saudi Arabia.	Dec 89–Jun 91	Major/Lieutenant Colonel
Director of Training, Office of the Deputy Chief of Staff, G-3, U.S. Army, and Chief, Operations, Coalition Forces Land Component Command, Operation Iraqi Freedom, Kuwait.	Sep 02–Sep 03	Brigadier General/Major General
Commanding General, 4th Infantry Division (Mechanized)/Commanding General, Multi-National Division-Baghdad, Operation Iraqi Freedom, Iraq.	Dec 05–Nov 06	Major General

U.S. decorations and badges:

Distinguished Service Medal (with two Oak Leaf Clusters)
 Defense Superior Service Medal (with Oak Leaf Cluster)
 Legion of Merit (with three Oak Leaf Clusters)
 Bronze Star Medal (with Oak Leaf Cluster)
 Meritorious Service Medal (with five Oak Leaf Clusters)
 Army Commendation Medal
 Army Achievement Medal (with three Oak Leaf Clusters)
 Combat Action Badge
 Parachutist Badge
 Senior Army Aviator Badge
 Joint Chiefs of Staff Identification Badge
 Army Staff Identification Badge

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by GEN James D. Thurman, USA, in connection with his nomination follows:]

UNITED STATES SENATE
 COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
 NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

James D. Thurman.

2. **Position to which nominated:**

Commander, United Nations Command/Combined Forces Command/U.S. Forces Korea.

3. **Date of nomination:**

May 4, 2011.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

September 19, 1953: Gainesville, TX.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to Delia L. (Hilton) Thurman.

7. **Names and ages of children:**

Jamie C. (Thurman) Brown, age 34.

Carey L. (Thurman) Thomas, age 32.

8. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

None.

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational, or other institution.

None.

10. **Memberships:** List all memberships and offices held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Association of the U.S. Army.

Army Aviation Association of America.

American Legion.

Military Officer Association of America.

11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognition for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

In 2005, I received the Robert M. Leich Award from the Army Association of America for outstanding service to Army Aviation.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?

Yes.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–E are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

JAMES D. THURMAN.

This 13th day of February, 2011.

[The nomination of GEN James D. Thurman, USA, was reported to the Senate by Chairman Levin on June 29, 2011, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on June 30, 2011.]

[Prepared questions submitted to VADM William H. McRaven, USN, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and subsequent reforms related to Special Operations Forces (SOF) have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders’ responsibilities and authorities and the role of the Chairman of the Joint Chiefs of Staff. These reforms have also vastly improved cooperation between the Services and the combatant commanders, among other things, in joint training and education and in the execution of military operations.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. Yes. Goldwater-Nichols did not meaningfully affect the Service manpower/personnel, acquisition, readiness reporting, training or other processes. U.S. Special Operations Command (SOCOM), in its daily interaction with all Services, must often address each issue in four different ways.

If so, what areas do you believe might be appropriate to address in these modifications?

Answer. SOCOM needs greater personnel management authority to shape mid- and senior-grade SOF operators to meet SOCOM defined requirements. Promotions, selection for command, selection for advanced educational opportunities, foreign language testing policy, and foreign language proficiency bonus payment policy all differ significantly by Service and are all primarily crafted to support Service needs.

Question. Do you believe that the role of the combatant commanders under the Goldwater-Nichols legislation is appropriate and the policies and processes in existence allow that role to be fulfilled?

Answer. Yes.

Question. From the perspective you have gained in your previous assignments, do you believe that the authority and responsibility of the combatant commanders, in general, and the Commander, SOCOM, in particular, are appropriate?

Answer. Yes, I believe the combatant commanders generally have appropriate authorities. As the Commander of SOCOM, I would seek to clarify the responsibilities

Geographic Combatant Commanders have for supporting their assigned Theater SOCOMs.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. By experience, training and education I have what is needed to lead this extraordinary force now and into the future. I have commanded at every level within the special operations community, including assignments as Commander Joint Special Operations Command (JSOC) and Deputy Commanding General for Operations at JSOC. My service in top leadership positions at both Service and joint headquarters has prepared me to operate at the senior levels of government, including as Director for Strategic Planning in the Office of Combating Terrorism on the National Security Council Staff. As Commander U.S. Special Operations Command-Europe, I gained valuable experience and built useful relationships with our North Atlantic Treaty Organization (NATO) and international special operations partners. I also established the Special Operations/Low Intensity Conflict curriculum at the Naval Postgraduate School.

RELATIONSHIPS

Question. Section 162(b) of title 10, U.S.C., provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the combatant commands. Other sections of law and traditional practice, however, establish important relationships outside the chain of command. Please describe your understanding of the relationship of the Commander of SOCOM to the following offices:

The Secretary of Defense.

Answer. The Secretary of Defense is the SOCOM Commander's next superior command authority in the chain of command, as your introductory paragraph stated. If confirmed, I will look to the Secretary of Defense for operational authority to deploy and employ SOF as well as Department-level direction in the prioritization and accomplishment of the SOCOM mission. The SOCOM Commander owes the Secretary of Defense the commander's best military advice on all aspects of recruiting, training, equipping, managing and employing SOF in support of his, and the President's, national security objectives.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The SOCOM Commander coordinates activities through the Chairman of the Joint Chiefs of Staff. As the senior military advisor to the President and Secretary of Defense, the Chairman is essential in communicating SOF capabilities and requirements to the President and Secretary of Defense. Coordination of SOCOM activities ensures that the Chairman remains fully informed in support of his responsibilities and for coordination of SOCOM staff and the Joint Staff efforts to meet Presidential and Secretary of Defense directed taskings.

Question. The Under Secretary of Defense for Policy (USD(P)).

Answer. The USD(P) is the principal staff assistant and advisor to the Secretary of Defense and the Deputy Secretary of Defense for all matters on the formulation of national security and defense policy. The USD(P) develops, coordinates and oversees the implementation of a wide variety of Department policy, including matters related to planning, programming, budgeting, and execution of special operations activities, including civil affairs and psychological operations, and of low-intensity conflict activities, including counter-terrorism, support to insurgency, and contingency operations. USD(P) also exercises authority, direction and control over the Assistant Secretary of Defense for Special Operations and Low-Intensity Conflict and Interdependent Capabilities (ASD(SO/LIC/IC)) who is responsible for overall supervision of special operations activities. If confirmed, I will work closely with USD(P) to ensure SOCOM activities are closely aligned with Department policies.

Question. The Under Secretary of Defense for Intelligence (USD(I)).

Answer. The USD(I) is the principal staff assistant and advisor to the Secretary of Defense regarding intelligence, counterintelligence, security, sensitive activities, and other intelligence-related matters. If confirmed, I will continue to work closely with USD(I), particularly to ensure the intelligence requirements of SOF in the field are met.

Question. The Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)).

Answer. The USD(AT&L) is the principal staff assistant and advisor to the Secretary of Defense for all matters relating to the DOD Acquisition System, including procurement; research, development, test and evaluation; military construction; and

nuclear, chemical, and biological defense programs. If confirmed, I will closely coordinate SOCOM acquisition activities with USD(AT&L) to ensure SOCOM procurement efforts are closely aligned with Department procurement processes and priorities.

Question. The Assistant Secretary of Defense for Special Operations/Low-Intensity Conflict and Interdependent Capabilities (ASD(SO/LIC/IC)).

Answer. The ASD(SO/LIC/IC) is the principal staff assistant and civilian advisor to the Under Secretary of Defense for Policy (USD(P)) and the Secretary of Defense on special operations matters. The principal duty of the ASD(SO/LIC/IC) is the overall supervision of special operations activities within the Department of Defense (DOD), including SOCOM. As I state in subsequent responses, the SOCOM Commander works closely with ASD(SO/LIC/IC) in the execution of his "Service-like" authorities under 10 U.S.C. section 167.

Question. The Assistant Secretary of Defense for International Security Affairs.

Answer. If confirmed, I will continue to work with the Assistant Secretary, and with U.S. European Command, U.S. Central Command (CENTCOM), and U.S. Africa Command, to ensure the effective employment of SOF capability in support of national security objectives in the Europe, the Middle East and Africa. I am particularly interested in developing an enduring relationship with the newly established NATO SOF Headquarters, and look forward to working with the Assistant Secretary in developing policies in support of NATO SOF Headquarters.

Question. The Assistant Secretary of Defense for Asian and Pacific Security Affairs.

Answer. If confirmed, I will continue to work with the Assistant Secretary, and with U.S. Pacific Command (PACOM), to ensure the effective employment of SOF capability in support of national security objectives in the Asian and Pacific regions.

Question. The Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs.

Answer. If confirmed, I will continue to work with the Assistant Secretary in developing SOCOM's role in Homeland Defense, and in support of civil authorities, to determine the special operations support necessary to protect the United States and its citizens during domestic emergencies.

Question. The Assistant Secretary of Defense for Global Strategic Affairs.

Answer. If confirmed, I look forward to working with the Assistant Secretary in support of his efforts to develop policy on countering weapons of mass destruction and cyber security issues, two areas of abiding interest for SOF.

Question. The Service Secretaries.

Answer. The SOCOM Commander's authority over the Service components, and those forces assigned to him, is clear in the Goldwater-Nichols Act, but requires close coordination with the Service Secretaries to ensure that SOCOM does not intrude upon each Service Secretary's legal responsibilities. Close coordination between the SOCOM Commander and each of the Service Secretaries is also essential to gaining and maintaining the Services' support of SOF with support units from the general purpose forces and with service-common materiel.

Question. The Service Chiefs.

Answer. Without the full support and cooperation of the Service Chiefs, the SOCOM Commander cannot ensure the preparedness of his assigned forces to execute his assigned missions. The Joint Chiefs are also a source of experience and judgment that every combatant commander may call upon. If confirmed, I will continue a full and frank dialog with the Service Chiefs.

Question. The other combatant commanders.

Answer. Successive SOCOM Commanders have fostered an atmosphere of teamwork and trust in their relationships with the combatant commanders. These relationships have only strengthened over the last 10 years, and certainly since SOCOM has been responsible for synchronizing counterterrorist operations after September 11. If confirmed, I will continue to work closely with the other Combatant Commanders to achieve our common objectives against transnational terrorist threats and violent extremist organizations.

Question. The Director of the National Counterterrorism Center.

Answer. SOCOM is actively engaged in support of the National Counterterrorism Center (NCTC), and has been since it was established after September 11. SOCOM also relies upon NCTC estimates and reports in the refinement and synchronization of counterterrorist operations, and will continue to assist NCTC to achieve our common objectives against transnational terrorist threats and violent extremist organizations.

Question. The Director of the Central Intelligence Agency.

Answer. SOCOM and its subordinate elements are consumers of CIA products and analysis. If confirmed, I will ensure that SOCOM continues to develop interoperable

capabilities so that, when directed by the President or Secretary of Defense, we may work efficiently in close partnership to accomplish our assigned missions.

MAJOR CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges confronting the next Commander of SOCOM?

Answer. I believe Admiral Olson, in his 2011 Posture Statement, clearly laid out the major challenges that will confront the next Commander of SOCOM. These seven major challenges are discussed individually below (not necessarily in priority order) and I have laid out what I believe are each of their main drivers.

1. Carefully and deliberately meet the ever-increasing demand for SOF.

The SOF community has seen these challenges take shape over the last several years, and I see these same challenges continuing as SOF remain a first choice for many military operations.

First, we must carefully and deliberately meet the ever-increasing demand for SOF. Since September 11, SOF manpower has roughly doubled, the budget has roughly tripled, and the overseas deployments have quadrupled. Demand is outpacing supply, but we cannot grow more than 3–5 percent every year or we risk compromising the quality of the force. Simply stated, more SOF cannot be created overnight. Our “new normal” is a persistently engaged, forward-based force to prevent and deter conflict and, when needed, act to disrupt and defeat threats. Long-term engagement is a hedge against crises that require major intervention and engagement positions us to better sense the environment and act decisively when necessary. The “new normal,” however, translates into increased demand for SOF. The pace of the last 10 years is indicative of what we expect for the next 10 years.

2. Improve and expand our tactical and operational level skills, equipment, and systems.

The strategic challenges facing our Nation are numerous and many may not be foreseen. Virtually all will continue to emanate from the incredibly dynamic and increasingly complex global environment. The next SOCOM Commander will be challenged to ensure our special operators are properly trained and equipped to fulfill the high degree of expectations the Nation places on our special operators. They must excel under the most demanding conditions while accomplishing some of the most difficult and sensitive tasks regardless of the environment or the difficulty.

Our special operators are supported by technology, mobility and communications systems that allow SOF to share information, rapidly move, tactically maneuver, and strategically influence the environment—whether via direct strike or indirect means. Our technology edge needs to be maintained to retain the capability to execute our missions.

3. Preserve our proposed budget levels and authorities.

Managing and preserving SOCOM’s Major Force Program-11 (MFP-11) funding within the current and future budget discussions is perhaps the major challenge facing the next SOCOM Commander. At the forefront of this challenge is acknowledging that many of the current expenditures are funded by Overseas Contingency Operations (OCO) funding. The Department has made a commitment to phase the OCO funding into SOCOM’s baseline requirement, but the command will continue to rely on OCO funding over the next few years as the phased transfer to the base budget occurs. The next SOCOM Commander must acknowledge our Nation’s current fiscal condition will focus attention on the Department thus creating the challenge to preserving the baseline for MFP-11. The current and future demand for SOF capabilities and foundational activities will exceed force deployment capacity. SOCOM infrastructure and readiness accounts have not kept pace with SOF growth or demand. Current operations will pressure future development and limit required modernization and recapitalization efforts. While the new baseline budget will be questioned, the new SOCOM commander will be challenged to deliver the required capabilities in a fiscally constrained environment knowing the budget without OCO transition does not fully resource the command.

Part of this major challenge includes monitoring and understanding the stress the Service budgets are facing and the impacts it will have on their ability to meet established and future SOCOM requirements for forces, capabilities and platforms. Operationally important Service provided capabilities that enable SOF success in the field will be stressed and potentially unfunded. MFP-11 is used to address “SOF-peculiar” requirements; it cannot be used to deliver these basic building blocks or to generate new SOF capabilities to cover for fiscally limited service-provided capabilities.

4. Find better structures and processes to obtain Service-provided capabilities.

With SOF growth constrained to 3–5 percent annually, effectively meeting the growing demand for our force can only be met through the commitment of the Military Services to attach supporting and enabling forces at a commensurate rate. It is a “SOF Truth” that most SOF operations require non-SOF support. This is true for the acquisition process, personnel policies, and the preparation and execution of the full range of SOF operations.

5. Continue to improve our acquisition speed and agility.

“More” is not always the best answer and should not be the first answer. The speed and agility of SOCOM acquisition authority is achieved through Title 10 authority, its own budget line from Congress in the appropriation process, and being chartered to purchase non-mainstream military equipment, also known as special operations peculiar equipment procured using MPF–11. MPF–11 grants SOCOM the authority to purchase equipment, material, services, and supplies required for special operations mission support for which there is no conventional service requirement.

6. Better understand the people and conditions in the places we go, whether to assist or fight.

One of the Command’s top challenges is to better understand the people and conditions in the places we go, whether to assist or fight. Indeed, understanding the operational context of the environments in which we operate is a hallmark of SOF.

Our complex, dynamic world presents ambiguous problems that challenge our Nation’s national security and interests. SOCOM’s strategic appreciation of these challenges stresses the importance of deeper knowledge of micro-regional geography, history, languages, religions, cultures and traditions, to enable SOF to conduct its activities with more predictable outcomes.

Developing this deep experience and high level of knowledge requires cultivating an agile intellectual posture within our force and maintaining persistent presence with partners and populations in diverse locations around the globe.

7. As our most solemn duty, look after the health and well-being of this magnificent force from whom we ask so much.

As the Commander, I would consider it my responsibility to ensure we are doing the most we can to support our teams and families in recognition of the vital role they play in our national security—there is no greater responsibility.

Question. If confirmed, what plans do you have for addressing these challenges?
Answer.

1. Carefully and deliberately meet the ever-increasing demand for SOF.

I see the need to maintain the maximum growth rate of 3 to 5 percent per year. I also see the need to match this growth and the SOF demand with commensurate levels of Military Services’ provided capabilities that enable SOF to accomplish its mission. We were designed to rely on the Services to meet most of our combat support and combat service support requirements. I intend to continue SOCOM’s efforts with the Services to implement a way to align SOF demand with these Service-provided capabilities.

I will provide my best special operations military advice to the Chairman and the Secretary of Defense on how to best use SOF to ensure we are optimizing our contribution to national security. Given the competing demands for SOF, we will need to be judicious and rigorous in our approach to support the Geographic Combatant Commanders and to do our part in support of national strategies and global campaign plans. Not all missions are appropriate for SOF, and we must guard against accepting missions at the expense of those operations requiring our unique skills and capabilities.

Lastly, if confirmed, I intend to continue the SOCOM initiatives to adapt how we train, deploy, and reset SOF for the “new normal.” The force is fraying, but we can stop the stress on the force by pursuing innovative ways that provide a predictable deployment pattern that accomplishes our missions while sustaining our force and protecting our people and families.

2. Improve and expand our tactical and operational level skills, equipment, and systems.

Success increasingly depends upon the larger combination of defense, diplomacy, and development activities. Long term success will depend more and more on SOF individuals that are selected and have expertise for the regions that they are going to habitually operate in. Our culture and language programs can be augmented to enhance our sub-regional and micro-regional knowledge, awareness and understanding. Efforts in training and personnel management can create better opportu-

nities for our personnel to build the productive and enduring relationships we desire.

In addition to a focus on the SOF operator, mobility enabling capabilities are a focal point in the existing SOCOM Strategic Plan; and technology areas seen as vital to intervention capability will also continue as focus areas for SOCOM research and development.

Finally, we must preserve our SOF buying power by critically assessing what we buy and prioritizing that which is most important while ensuring that the required service-provided capabilities are properly resourced.

3. Preserve our proposed budget levels and authorities.

First, I must ensure there is a clear understanding and support for the necessity of establishing and sustaining the new baseline budget through the transition of OCO funding into SOCOM's baseline. OCO to baseline does not grow the force; it only preserves the command's existing capabilities and current level of effort. The current and future demand for SOF capabilities makes this a top priority. Preserving MFP-11 budget levels is critical in ensuring SOF can meet the Nation's requirements, which is the SOCOM Commander's primary responsibility. MFP-11 provides for the advanced and unique training recently demonstrated in Pakistan. It enables the timely and flexible fielding of equipment, and the capability to rapidly and effectively project our force. A decrease in the Command's budget level would severely impact my ability to meet the demand for SOF and significantly increase the risk to our Nation's security. The importance of this issue is highlighted in the Command's fiscal year 2012 budget submission where 34 percent of the total MFP-11 request is OCO funding. For some higher intensity SOF elements, the OCO percentage is greater than 75 percent. Without this transition, mission failure is a real possibility.

4. Find better structures and processes to obtain Service-provided capabilities.

For acquisition matters, regular Acquisition Summits with the Military Services create enhanced transparency and effectiveness in finding common solutions for Service-wide requirements, which in turn allows SOCOM to better invest in SOF-peculiar modifications and special capabilities. For operational matters, a new SOF Force Generation process (SOFORGEN) will be fully synchronized with the Military Services, and fully operational by fiscal year 2013. SOFORGEN will identify Service-provided requirements in advance, allowing the development of habitual relationships for training and operations, thereby ensuring best possible support to the Geographic Combatant Commanders.

5. Continue to improve our acquisition speed and agility.

The speed and agility of SOCOM acquisition authority coupled with leveraging general purpose forces and service support mechanisms enables Special Operations to remain decisive on the battlefield. Working closely with the Services we have identified priorities to ensure there is no redundancy. We have taken the initiative to divest ourselves of equipment that is not core to the SOF mission. We have focused ourselves by disposing of obsolete, redundant or marginally beneficial capabilities. Leveraging acquisition ensures that special operations peculiar equipment necessary to confront the enemy is there when needed most and with the speed to ensure it meets the needs of the operator.

6. Better understand the people and conditions in the places we go, whether to assist or fight.

SOCOM will maintain and support a number of initiatives the Command has recently developed and implemented, which have shown promising potential and early progress toward meeting these challenges. For example, SOCOM will continue to review and coordinate changes to Service personnel policies to further incentivize language pay for key languages such as Pashto, Dari and Arabic, and increase the number of career SOF individuals in advanced language training. In order to gain the greater levels of nuanced understanding possessed by indigenous populations, SOCOM will continue to strongly support DOD's Military Accessions Vital to the National Interest (MAVNI) and the Army's Intermediate and Advanced Language Programs (IALP) to recruit and access the requisite expertise provided by native speakers. Additionally, our attached female Cultural Support Teams (CSTs) allow us to reach key elements of the population in some environments which was not previously possible.

Furthermore, SOCOM will continue to expand our base of global expertise, pursue every opportunity to strengthen our overseas presence, and develop meaningful personal relationships with key foreign military leaders. To enhance current battlefield effectiveness, SOCOM will strive for repetitive deployments by individuals and small teams to the same locations. More broadly, SOCOM will participate in aca-

demic symposia and seminars, and place SOF members in key positions in U.S. Missions abroad, as well as foreign military units and headquarters. In addition, SOCOM will pursue career incentives that place value on regional and micro-regional expertise and determine a process that allows us to track and assign Foreign Area Officers with prior SOF experience back into SOF units.

7. As our most solemn duty, look after the health and well-being of this magnificent force from whom we ask so much.

SOF warriors face an increased operational tempo which will not abate even after eventual drawdown in Iraq and Afghanistan due to the nature of “new normal” strategic environment that will require increasing SOF presence. To help SOF warriors and their families cope with the psychological hardships that accompany extended separation and the trauma that comes from violent armed conflict, and most critically to our wounded warriors, SOCOM has created the Care Coalition and is committed to the Tactical Human Optimization, Rapid Rehabilitation and Reconditioning (THOR3) Program. Both programs work with governmental and non-governmental organizations, to provide top-notch, personalized support and to physically and psychologically wounded SOF warriors and their families at multiple locations throughout CONUS. Through the Care Coalition and the Chaplaincy, SOCOM will continue to focus on improving the standard of living, happiness, and support of SOF warriors and their families.

Question. What are the most important lessons you have learned during your tenure in senior leadership positions in the special operations community?

Answer.

1. The SOF operator is the “platform” for special operations and we must always remain focused on this over what he carries with him to execute the mission. While material is important, the operator is the primary concern.
2. The world’s strategic environment has evolved toward one that is characterized more by Irregular Warfare activity rather than major nation state warfare. We must confront this “new normal” and posture our forces to be successful in it.
3. Partnerships are keys to success. The complex challenges of the world demand a more global approach to solving problems with those who share our interests. Part of the partnership building is within our own Interagency—building those relationships and trust that will build unity of effort in whole-of-government approaches to addressing problems.
4. Reputation is everything. We must work everyday to be the best that we can be, the most prepared, the best skilled operators in the world.
5. SOF continues to provide unique options for complex problems. The agility and diverse capabilities of our force, from long-term engagement to rapid lethal operations, make SOF a first choice for many military operations.

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the Commander of SOCOM?

Answer. As the Commander of Joint SOCOM and a member of the SOCOM and SOF Board of Directors I helped to craft the Command’s current touchstone priorities of Mission, People, and Equipment. I believe these have served the Command well and will continue to do so in the future. Specifically, if confirmed, I will focus my efforts to enhance our efforts under each area using the following focus areas:

1. Mission
 - Deter, Disrupt, and Defeat Terrorist Threats
 - Plan and conduct special operations
 - Emphasize persistent, culturally-attuned engagement
 - Foster interagency cooperation
2. People
 - Develop and Support our People and Families
 - Focus on quality
 - Care for our people and families
 - Train and educate the joint warrior/diplomat
3. Equipment
 - Sustain and Modernize the force
 - Equip the operator
 - Upgrade SOF mobility
 - Obtain persistent intelligence, surveillance, and reconnaissance systems

CIVILIAN OVERSIGHT OF SOCOM

Question. The 1986 Special Operations legislation assigned extraordinary authority to the Commander of SOCOM, to conduct some of the functions of both a military service and a unified combat command.

Which civilian officials in DOD exercise civilian oversight of the “Service-like” authorities of the Commander, SOCOM?

Answer. The ASD(SO/LIC/IC) is the principal staff assistant and civilian advisor to the Under Secretary of Defense for Policy (USD(P)) and the Secretary of Defense on special operations matters. The principal duty of the ASD(SO/LIC/IC) is the overall supervision of special operations activities within DOD, including SOCOM.

SOCOM also coordinates with the USD(P), Under Secretary of Defense (Acquisition and Technology), USD(AT&L), and Under Secretary of Defense (Comptroller) on matters within their jurisdiction which touch upon the SOCOM Commander’s “service-like” authorities under 10 U.S.C. section 167. The SOCOM Commander and his staff works closely with USD(P), USD(AT&L), and the Comptroller, and their staffs, to ensure SOCOM’s programs are aligned with DOD acquisitions policies and are appropriately funded.

Question. In your view, what organizational relationship should exist between the ASD(SO/LIC) and the Commander, SOCOM?

Answer. The ASD(SO/LIC/IC)’s role, as described above and in subsequent responses to your questions, describes the organizational relationship as it exists—and as it should continue to exist—between ASD(SO/LIC/IC) and the SOCOM Commander.

Question. What should be the role of the ASD(SO/LIC) in preparation and review of Major Force Program 11 and the SOCOM’s Program Objective Memorandum?

Answer. ASD(SO/LIC/IC) is directed by the Deputy Secretary of Defense to provide overall supervision of the preparation and justification of SOF programs and budget; review and approve memoranda of agreement governing the SOCOM program, budget, and execution process; approve the SOCOM recommendations concerning which programs the SOCOM Commander will execute directly; review the SOCOM Program Objectives Memoranda (POM) and budget prior to submission to the Director for Program Analysis and Evaluation and the DOD Comptroller, respectively; and present and defend the SOF program to Congress, with the advice and assistance of the SOCOM Commander. I believe these duties describe the appropriate role for ASD(SO/LIC/IC) in oversight and support of SOCOM.

Question. What is the appropriate role of the ASD(SO/LIC) in the research and development and procurement functions of the SOCOM?

Answer. Working with the SOCOM Commander and the SOCOM Acquisition Executive, the ASD(SO/LIC/IC) advises and coordinates with the Under Secretary of Defense for Acquisition, Technology and Logistics (USD(AT&L)) on acquisition priorities and requirements for special operations-peculiar material and equipment. I do not presently recommend any changes to ASD(SO/LIC/IC)’s role in research and development and procurement functions of SOCOM.

Question. What is the appropriate role of the ASD(SO/LIC) in the operational planning of missions that involve SOF, whether the supported command is SOCOM, a Geographic Combatant Command (GCC), or another department or agency of the U.S. Government?

Answer. Through his broad policy, coordination and oversight roles as the principal staff assistant and civilian advisor on special operations matters, the ASD(SO/LIC/IC) reviews the procedures and provides policy guidance to the SOCOM Commander on all aspects of special operations planning, including contingency planning when directed by the President or Secretary of Defense.

COMBATING TERRORISM

Question. What is your understanding of the Department’s strategy for combating terrorism?

Answer. The current Unified Command Plan (UCP), 06 Apr 2011, designates the Commander, SOCOM, as responsible for synchronizing planning for global operations against terrorist networks, including the integration of DOD strategy, plans, and intelligence priorities for operations against terrorist networks designated by Secretary of Defense (Pg 24, Para 17). The Joint Strategic Capabilities Plan (JSCP) assigns Commander, SOCOM, the responsibility to prepare the DOD (vice SOCOM) Global CT Campaign Plan, and to perform as the global synchronizer for planning (JSCP fiscal year 2008, Enclosure G, Appendix A, Para. 2).

Question. What are the roles and responsibilities of the Commander of SOCOM within the Department’s combating terrorism strategy and how would you fulfill such responsibilities if confirmed?

Answer. Practical implementation of global CT synchronization occurs throughout the development of the DOD Global CT Campaign Plan (CAMPLAN 7500) and its revisions, and in the parallel development of the GCCs' subordinate regional CT plans. Specifically, through the Joint Planning Working Groups, comprised and represented by all GCCs and FCCs, led by HQ SOCOM, regional objectives/intermediate military objectives, tailored 7500 Lines of Operation (LOO), and planning and assessment tasks, are agreed upon. Further, certain cross-area of responsibility (AOR) threat actor sets are assigned to specific GCCs for Supported or Supporting planning for Flexible Response Options. The regional (GCC) plans will have an in-progress review, either simultaneously or serially, at the Under Secretary level, allowing policy leader's visibility on GCC planning focus and priorities in each AOR.

Question. Are there steps the Department should take to better coordinate its efforts to combat terrorism with those of other Federal departments and agencies?

Answer. Joint Staff J5 and USD(P) leadership is vital to advise planners of changes in Department priorities (e.g. resource availability, threat focus, inter-agency issues, IPR types and scheduling) when they occur. Further, as the 's Global CT plan, CONPLAN 7500's alignment with the key national strategic documents should the Secretary of Defense be validated from the policy perspective. Finally, the indirect LOO concerning partner capacity building and eroding or discrediting of violent extremist narratives are areas where the Joint Staff and USD(P) can provide oversight and collaboration guidance for interagency review and validation events such as Promote Cooperation.

AFGHANISTAN

Question. What is your assessment of the current situation in Afghanistan? What are the weaknesses and shortcomings in the current effort to combat terrorism and insurgency in Afghanistan?

Answer. General Petraeus' population centric campaign strategy is yielding its intended results. Although hard won, we are witnessing a reversal in Taliban Momentum since 2005, hundreds of Taliban are integrating, Government of the Islamic Republic of Afghanistan (GIROA) capacity is increasing, security force competencies are improving and the GIROA's span of influence is beginning to impact a larger segment of the rural population. Security and governance are evolving across the country and as a result we are seeing an incremental shift in popular opinion toward the GIROA. As you can readily recognize, a myriad of political, operational and economic challenges remain, but we are employing the appropriate methodology and it is producing success.

Those weaknesses and shortcomings will arise not from the strategy or the efforts of our soldiers, marines, airmen, and civilians on the ground, but from diminished resourcing, lack of long-term commitment and any decrease in international assistance. These are the obstacles we must avoid to ensure success.

Question. In your view, what is the appropriate role of SOF in Afghanistan, and the proper relationship between direct action and counterterrorism and counterinsurgency operations there?

Answer. Counterterrorism (CT) and Counterinsurgency (COIN) are inextricably linked in Afghanistan. There must be a balanced and measured approach to their application. CT efforts including direct action shape the environment and create conditions necessary for the causes of instability to be address, enabling governance capacity development, Afghan Security Force evolution and economic opportunity. However, CT efforts by themselves, offer no long-term chance at establishing stability and it is for this exact reason that SOF-led Village Stability Program is so important for future progress.

Question. General Petraeus and others have emphasized the importance of the Village Stability Operations (VSO) and Afghan Local Police (ALP) programs to the strategy in Afghanistan.

What has been the effect of these programs on rural Afghan populations and what has been the response from the Taliban?

Answer. VSO has focused on security, governance, and development simultaneously. It is a bottom-up approach linking governance to the village level. In the span of approximately 1 year, VSO has expanded GIROA influence in key rural areas from 1,000 Sq km to 23,500 Sq km today, roughly the size of the East Tennessee Valley or Lake Erie. Growth has been exponential since April 2010 and across Afghanistan we are witnessing increasing numbers of local communities requesting to participate in this GIROA program. Five sites have already transitioned to Afghan Government control, which is one measure of the GIROA's evolving capacity. The ALP program, the armed neighborhood watch association with VSO establishment by President Karzi has grown into the thousands and the Afghan Ministry

of the Interior projects numbers nearing 10,000 by the summer of 2012. VSO has also enabled a massive expansion in small scale infrastructure development in these key rural areas. Approximately 2,000 development projects have demonstrated GIROA legitimacy in areas that have remained disenfranchised and ignored since 2001. These security and developmental successes combined with an aggressive GIROA governance mentoring effort are definitively changing popular attitude. It is empowering local communities, providing hope to historically disenfranchised segments of the population and as a result it is eroding support for the Taliban, denying them safe-haven and ultimately creating the conditions for long-term stability.

As a result, the Taliban have mounted an aggressive intimidation, assassination and disruption effort against GIROA officials and supportive populations. Despite these efforts however, we are witnessing ALP capturing insurgents, District Leaders requesting permissions to participate in VSO and ALP. In the south and west and north, this trend continues and increasing numbers of low-level and mid-level Taliban leaders are seeking reintegration.

Question. Do you believe the availability of U.S. Special Operations teams is a limiting factor in expanding these programs to a point where they can have a strategic impact in Afghanistan?

Answer. Yes, the expansion of this effort depends largely now on the growth of SOF teams and enablers. Our combined teams are producing strategic changes presently and additional SOF force structure will demonstrably expand this effect across the country.

Question. How do indirect approaches like Village Stability Operations and Afghan Local Police Programs compliment direct action counterterrorism missions within the U.S. strategy in Afghanistan?

Answer. Village Stability Operations are the foundation of General Petraeus' population centric campaign strategy in key rural areas across Afghanistan. Counterterrorism efforts compliment these rural efforts by shaping and managing the security environment where these indirect approaches are pursued. One is no less or more important than the other; they are separate and distinct efforts that must, and are working in tandem to achieve immediate and enduring stability.

Question. President Karzai has criticized "night raids" carried out by U.S. and coalition SOF in Afghanistan and alleged that they frequently result in civilian casualties.

What steps have SOF taken to avoid civilian casualties and other collateral damage resulting from counterterrorism missions?

Answer. This is a very sensitive issue for our SOF operating in Afghanistan. They have applied multiple approaches to minimize the potentialities for civilian casualties.

1. All of our forces receive formal instruction in theater tactical directives pertaining to civilian casualties (CIVCAS).
2. Every operation is conducted with our Afghan counterparts and they are always in the lead during entry of compounds and call-outs.
3. Escalation of force measures are strictly followed.
4. Full integration of Afghan Security Force leadership in the planning, execution, and post-operation phases has occurred to ensure full transparency and enable their leadership to balance risk, cultural considerations, and operational requirements.
5. Our Afghan partners, as well as our own commands strive to keep district and provincial political leadership apprised of all operations.
6. Employment of close air support and indirect forces is a more closely managed effort at every level of command today.

CIVCAS is the exception today, not a commonality in SOF operations. These multiple efforts have a combined effect of reducing opportunities for CIVCAS and mitigating it when in the off chance it does occur.

PAKISTAN

Question. The relationship between the United States and Pakistan has often been described as tumultuous and the effects on this relationship of the operation that killed Osama bin Laden on May 1, 2011, remain to be seen. Concerns from senior Pakistani officials related to the presence of SOF in the country could negatively impact training and advising activities designed to counter al Qaeda, the Taliban, and the Haqqani Network.

What is your assessment of the military-to-military relationship between the United States and Pakistan?

Answer. Our military-to-military relationship with Pakistan remains positive overall, particularly at the unit level. However, periodic events within the region,

oftentimes beyond the United States' or DOD's control, create temporary strains at the senior level. As with most military-to-military of this nature, relationships, personalities play a key role and must be maintained and nurtured over the long term. SOF has a long history of military-to-military relations with Pakistan. The creation and stand-up of the Office of Defense Representative—Pakistan (ODRP) and SOCOM Central (Forward)—Pakistan (SOC(FWD)-PAK) has enhanced and continues to foster our military-to-military relations with Pakistan. Since 2008, ODRP and SOC(FWD)-PAK have cultivated the military-to-military relationship on a daily basis with much success. Over the years, many enduring personal relationships have been established and benefit both Pakistan and the United States. I can only speak for U.S. SOF, but I expect it also holds true for ODRP that I expect these relationships and new ones to continue to grow and strengthen the relationship between Pakistan and the United States.

Question. In your assessment, how important is the U.S.-Pakistan military-to-military relationship to the success of our counterterrorism strategy?

Answer. Our national and military strategy is based on the direct and indirect approach. Our military-to-military relationships with Pakistan, along with other partner nations, are part of that indirect approach and are critical to the success of our counterterrorism strategy. The United States cannot win the war on terrorism alone. Wherever possible, we must garner support of partner nations so they can combat terrorism within their nations' borders. The Pakistanis are a key partner in the war on terror. Our military-to-military relationship has assisted the Pakistanis with their successes in countering insurgent networks within their borders. Maintaining a strong military-to-military relationship is vital for Pakistan to enjoy continued success. From training and equipping to infrastructure enhancements, all are key components in developing and fostering out military-to-military relationship with Pakistan. Maintaining a properly balanced U.S. military presence of SOF personnel and Office of Defense Representatives—Pakistan personnel enable us to cultivate and enhance our relationship.

IRAQ

Question. From your perspective as Commander, JSOC, what are the main "lessons learned" from Operation Iraqi Freedom and Operation New Dawn?

Answer. Both operations have provided us with many lessons learned which we have incorporated into our current operations. Some of these lessons include: the need for a unified U.S. Government approach, active and integrated interagency coordination, the necessity for culturally attuned forces and the need to maximize combined operations. U.S. military and government efforts need to be synergized to provide a focused effort while reducing the likelihood of duplication and opposed efforts. Interagency integration is essential in our fight against violent extremism. Some of our greatest accomplishments would not have come to fruition without this coordinated effort. Our forces are now more culturally sensitive than ever before, greater language skills and incorporating female military personnel into our post operations activities have allowed our forces greater access and integration with the Iraqi and Afghan civilian populace. Lastly, we have maximized our combined operation efforts by working with and through the host nation forces. Every operation is coordinated with the Government of Iraq and Afghanistan and the Iraqi and Afghan Partnering Units. These combined operations are not only doing a tremendous job in accomplishing the mission but, also help enable and empower the Iraqi and Afghan SOF for future success.

Question. As conventional forces continue to draw down in Iraq, SOF remain heavily engaged with their Iraqi counterparts. However, SOF rely on their conventional counterparts for many support and enabling functions including airlift, medical evacuation, resupply, and intelligence, surveillance, and reconnaissance.

If confirmed, how would you ensure SOF are adequately supported in Iraq as the drawdown progresses?

Answer. As we reduce our presence in Iraq, it will be essential that we make sure that our SOF continues to receive support. SOF will continue to provide assistance and support to Iraqi Special Forces until relieved. U.S. Forces-Iraq (USF-I) is developing and refining their support plans as situations dictate. USF-I has instructed its forces to conduct detailed coordination and contingency plans to mitigate any degradation to SOF support. It will be crucial for SOF to maintain access to the key enablers you have already mentioned and more until the end of Operation New Dawn. SOCOM is postured to respond positively and provide SOF in support of CENTCOM missions. I will continue to ensure SOF operating in austere locations are provided the required support through detailed coordination and planning. Contingency plans to provide emergency assistance to U.S. SOF outside of the remain-

ing U.S. bases will require alternate means of support which will take time to coordinate and execute.

YEMEN

Question. The U.S. Government has a robust security assistance program with Yemen to help enable Yemeni security forces to deal with the threat posed by al Qaeda in the Arabian Peninsula. Much of the training and advising activities under these assistance programs has been carried out by SOF.

In light of the political situation in Yemen, what is your assessment of the most effective way the United States can advance its counterterrorism objectives there?

Answer. Yemen is unique in the Arab world, with socio-economic indicators similar to the poorest African nations, and governance limitations that invite easy comparisons with some of the world's most vulnerable states. Current political turmoil and an uncertain Yemen Government are enormous challenges that face the Republic of Yemen and by extension, the U.S. counterterrorism policy. No other nation enjoys the level of influence with the Yemen Government than that of the U.S. counterterrorism initiatives with the Yemen Government contribute directly to a more stable security environment.

Fiscal year 2011 International Military Education and Training funds will continue to be used to train and educate Ministry of Defense personnel, thereby increasing Yemen's versatility and utility as a coalition member. These funds will continue to provide equipment and training essential for Yemeni Counterterrorism Forces to combat terrorist groups, including al Qaeda in the Arabian Peninsula (AQAP). Increased funding levels for military assistance, particularly those that relate to training and equipping Yemeni counterterrorism forces will be essential for the Yemeni Government to neutralize the threat from AQAP within their borders. SOCOM and SOF will complement these activities with a carefully calibrated engagement in tribal areas of the country where violent extremists enjoy safe haven. Towards this end, we have established a close, working relationship with Yemen Counterterrorism Forces.

TERRORISM THREATS IN AFRICA

Question. Over the course of the last few years, al Qaeda-inspired and affiliated groups in Somalia and the Trans-Sahara have continued to gain strength, leading many to express concern about their intent and ability to strike the interests of the U.S. and partner nations.

What is your understanding of U.S. policy with regard to countering the threats posed by these groups?

Answer. As with all our counterterrorist actions across the globe, we work in concert with the Geographical Combatant Commands and SOF is integrated as just one piece of the overall "Whole of Government" endeavor within U.S. Africa Command (AFRICOM) has laid out a comprehensive approach to building security capacity with partner nations across the continent. SOF will play a significant role in AFRICOM's four defense-oriented goals for their partner nations: having a capable military force, having professional security institutions, having the capability to defeat transnational threats, and increase Partner Nation support to international peacekeeping efforts. In assisting AFRICOM with these goals, basing, overflight and arming rights are just a few of the challenges confronting us. We need streamlined policy and procedures supporting rapid capacity building and information/intelligence sharing, in order to facilitate new and nurture existing partner relationships. We also understand this will all take place in a resource constrained environment. The difficult decisions facing Congress as you wrestle with the fiscal realities facing this nation will most definitely have an impact on our counter terrorist activities in Africa and across the globe.

Question. Do you believe the Intelligence, Surveillance, and Reconnaissance (ISR) assets and other resources allocated to countering terrorism threats in Africa are adequate to understand and respond to the threats posed by these groups?

Answer. A significant portion of the U.S. counterterrorism effort is focused on the CENTCOM AOR and they have received the lion's share of ISR assets. ISR is a high demand, yet finite resource, and in some areas, to include Africa, we have executed an economy of effort in tackling terrorist groups. As our Nation's activities in the Pakistan/Afghanistan AOR change, additional ISR assets may be available to address AFRICOM's needs. DOD, with the outstanding support of Congress, continues to build more capacity, spotlighting other significant limiting factors within Africa such as communications, basing and overflight rights/agreements, information sharing with partner nations, and highly diverse language requirements across the continent. Given the tenuous nature of African governments and the difficulties associ-

ated with adding basing/footprint on the continent, we specifically envision the need for substantial sea-based ISR to support Africa CT operations. We will be in lock-step with AFRICOM as they tackle each of these challenges. SOF will be an integral part of AFRICOM's engagement program and will help lead their response to terrorist networks working on the continent.

WESTERN HEMISPHERE TRANSNATIONAL CRIMINAL ORGANIZATIONS

Question. General Fraser, Commander of U.S. Southern Command, recently testified that "The northern triangle of Guatemala, El Salvador, and Honduras is the deadliest zone in the world outside of active war zones."

What is your assessment of the threat from transnational criminal organizations (TCO) operating in the Western Hemisphere?

Answer. TCOs are a threat to our national security. They enable insurgencies and terrorism, and undermine state security and stability. An obvious outcome can be seen in the violence in Mexico and Central America. They have evolved into regional threats as seen with Mexican cartel members operating as far south as Peru. These threats must be addressed through multi-national, multi-agency collaborative efforts.

Question. What do you believe is the appropriate role, if any, for SOF in countering these threats?

Answer. SOF should continue to support SOUTHCOM and NORTHCOM's requirements to build the capacity of selected partner nation forces through training under Counter-Narcoterrorism and Joint Combined Exchange Training authorities. Where appropriate, U.S. SOF should be applied to advise and assist partner nation forces in planning operations against TCOs.

Question. For more than a decade, Colombian security forces have worked in partnership with SOF to counter-threats similar to those described by General Fraser. This partnership has helped to enable the Colombians to significantly degrade the terrorist organization known as the FARC.

What do you believe are the primary lessons learned from SOF training and advising activities in Colombia?

Answer. SOF is mostly effectively applied when we have persistent presence, we train the right unit at the right level, and we exercise the appropriate authorities through Regional command and control structures.

Question. Are there lessons learned that may apply to U.S. support to Mexico, Guatemala, El Salvador and Honduras in their efforts to counter the threats posed by transnational criminal organizations?

Answer. SOF has the capability to train partner nation (PN) forces in a myriad of specialties that are ideal in combating transnational criminal organizations. Many of the security cooperation strategies used successfully in Colombia should be applied in other Western Hemisphere countries.

PHILIPPINES

Question. What is your view of the effectiveness of the special operation forces assistance being provided to the Philippine military in its fight against terrorist groups?

Answer. Although the focus of the 10 year old mission in the Philippines tends to be on the actions of the military unit against the most prominent terrorist groups, I want to emphasize that this has truly been, and continues to be, a multi-faceted approach. We have engaged with each branch of the Armed Forces of the Philippines (AFP) and Philippine National Police (PNP) using every available authority to help build capacity, while at the same time working to improve the image and public trust of both the AFP and PNP. Individual examples of these efforts range from Title 22 funded (using Navy and Air Force SOF) training to improve AFP aviation Night Vision Goggles and maritime capabilities, to 1206 funded procurement of precision munitions, to DOD funded Military Information operations efforts and Civil Military Support Element funded Civil Affairs projects. Additionally, diplomatic efforts, congressional interest and senior military engagement have solidified the willingness of the Philippine Government to maintain the pressure on the key terrorist groups. As a direct result of these combined efforts, the capacity and legitimacy of the Philippine Security Forces has been greatly improved. An assessment of the Operation Enduring Freedom-Philippines (OEF-P) mission is currently being conducted by Commander, PACOM.

Question. If confirmed, what measures or guidelines will you employ to ensure that U.S. personnel do not become involved in combat in the Republic of the Philippines?

Answer. Ultimately, it is the Commander, PACOM, who assesses the situation and coordinates with the Ambassador on the execution of OEF-P to include the size of the U.S. Force and its employment. In addition to the restrictions dictated by the Philippine Constitution, the current Secretary of Defense and Commander, PACOM, orders are very specific and clear on how U.S. Forces may work by with and through the AFP. Obviously the right to self-defense would allow any U.S. military element to protect itself if unexpectedly attacked by the enemy. As a direct result of the current rules of engagement, there have been only three combat-related deaths; all due to IEDs.

PIRACY

Question. Despite a significant and concerted international effort, which includes various U.S. agencies and the U.S. military, piracy in the northwestern Indian Ocean and the approaches to vital sea lanes through the Gulf of Aden continues largely unabated. Similar threats exist in other key areas including the Straits of Malacca.

How do you assess the threat posed by piracy?

Answer. Piracy operations directly threaten U.S. personnel and interests in these regions. Kidnap for ransom by pirates has recently led to the death of U.S. civilians. Piracy's biggest impact however, is economic. The seizing of cargo ships and ransom demands have harmful economic impacts to companies and countries. Anti-piracy efforts for ship protections and the deployment of military assets for prevention operations continue to require significant expenditures of funds and further strains limited military assets supporting these operations.

The second and third order effects of piracy may lead to future destabilization in the affected areas. The resultant vast sums of money in these impoverished areas lead to the establishment of safe heavens for pirates and their support groups. These funds also further subvert the efforts of African Union Mission in Somalia and the Transitional Federal Government in Somalia to stabilize Mogadishu against violent extremist organization (VEO) groups.

Question. What do you believe is the appropriate role, if any, of SOF in counter piracy efforts?

Answer. NATO conglomerate, Navy capabilities, as well as Naval assets from coastal adjacent countries should lead the effort to deter/prevent piracy. This includes patrolling pirate populated waters and identifying, boarding and where appropriate, engaging with and confiscating suspect vessels and collecting data on suspect pirates.

Special operations involvement is currently limited in the counter piracy efforts. SOF support with unique capabilities when required. These capabilities involve maritime direct action, information operations and building partner capacity for maritime operations.

SOF provide unique capabilities for execution of specialized missions worldwide. These capabilities can be incorporated into counter-piracy operations but due to the high demand, low density nature of SOF, they should not be the lead. Conventional maritime forces have capabilities better designed to deal with the full range of counter-piracy operations on the water. U.S. SOF should only be employed in extreme scenarios where the situation exceeds ability of conventional forces to respond adequately.

Overall, with SOF current force structure and high demand worldwide for its capabilities, current U.S. policy does not warrant a high enough priority for the allocation of SOF assets against this mission since other forces have more relevant capabilities to deal with the full scope of counter-piracy operations.

INTELLIGENCE SUPPORT FOR INDIRECT ACTIVITIES

Question. Some observers contend that the national intelligence agencies focus their assistance to the Defense Department in Afghanistan and Iraq on special operators engaged in direct action operations. As a consequence, it is alleged, general purpose forces and SOF engaged in indirect activities, including foreign internal defense and population protection, receive less intelligence support.

Do you believe this is true?

Answer. No.

Question. If so and if confirmed, how would you ensure SOF engaged in indirect activities receive adequate intelligence support?

Answer. CONPLAN 7500 makes clear the primacy of indirect activities in combating VEOs, and the successful prosecution of that approach is predicated on the level of support given to those efforts, specifically intelligence support. SOCOM enables the indirect approach with an intelligence network focused on supporting Ir-

regular Warfare, specifically on the tenets: Unconventional Warfare (UW), Foreign Internal Defense (FID), and Civil-Military Operations (CMO).

At SOCOM intelligence support to IW is accomplished by the fusing of all source intelligence with cutting edge pattern analysis, imagery, and socio-cultural analysis (SCA) tools and analytic techniques. These efforts are coordinated by the SOCOM Joint Intelligence Center (JICSOC) and the Global Mission Support Center (GMSC), which provide network connectivity, 24/7 reachback support to deployed forces and Special Operations Task Forces, and coordination venues for ISR support.

Although the support to the indirect approach is directed by SOCOM, the requirements themselves are byproducts of the constant interaction between the supported Theater Special Operations Commands (TSOC) and SOCOM. This interaction ensures the coordination of SOCOM intelligence support with that of the regional Joint Intelligence Operations Centers (JIOC). At SOCOM we realize that the majority of the GCCs are combating terrorism and VEOs in non-kinetic operations so providing tailored intelligence support to those missions is vital to successfully supporting the national security strategy.

The Central Intelligence Agency, National Geospatial Intelligence Agency, National Security Agency, National Reconnaissance Organization, and Defense Intelligence Agency have all adapted very well to these indirect approach intelligence requirements. To be sure, there are always capacity challenges as we continue to conduct military operations in Iraq, Afghanistan, and still meet other global challenges, but on balance I am very appreciative of the support provided by the national intelligence agencies.

SECTION 1208 OPERATIONS

Question. Section 1208 of the Ronald Reagan National Defense Authorization Act (NDAA) for Fiscal Year 2005 (Public Law 108-375), as amended by subsequent bills, authorizes the provision of support (including training, funding, and equipment) to regular forces, irregular forces, and individuals supporting or facilitating military operations by SOF to combat terrorism.

What is your assessment of this authority?

Answer. Section 1208 authority remains a key tool for SOF to operate by, with, and through an array of willing partners in Iraq, Afghanistan, the Horn of Africa, and other locations. These foreign regular and irregular forces leverage their natural access to locations, populations and information that are denied to SOF, but critical to our success. Their work is challenging and often carries significant personal risk. The training, equipping, and operational support provided to these partners by our forces under 1208 authority are absolutely essential to overall mission accomplishment. We are appreciative of Congress' continued support for this authority.

Recent Interaction with Congress: DASD-SOCT (Garry Reid) accompanied by SOCOM reps provided a briefing on April 27 to House and Senate Armed Services Committee staffers that covered the fiscal year 2010 annual report. The briefing was well-received, with no significant issues. There was some additional discussion on expanding the authority to go beyond combating terrorism.

Future of the Authority: Rep Mac Thornberry (R-TX), Chairman of the Emerging Terrorism and Capabilities subcommittee of the HASC, has marked the House version of the NDAA for Fiscal Year 2012 with an increase in 1208 authority from \$45 million to \$50 million, and directed DOD to provide a report/briefing on the future of the authority to address CT, UW, and IW requirements.

Expenditure trends (current authority is \$45 million): (a) fiscal year 2010: \$31 million spent of estimated \$38 million requirement; and (b) fiscal year 2011 (to date): \$9 million obligated of estimated \$34 million.

COUNTER-THREAT FINANCE

Question. A number of officials in DOD and the Intelligence Community have called for applying more resources to identify, monitor, and halt the flow of money associated with terrorist networks and the illegal narcotics trade. Comparable efforts have been undertaken by the Joint Improvised Explosive Device Defeat Organization against the flow of money and components supporting the construction and employment of improvised explosive devices.

What is your assessment of the value of counter-threat finance (CTF) activities?

Answer. Finding, stopping, and via our law enforcement partners, freezing or seizing terrorist and narcoterrorist resources is immensely valuable in defeating current threat operations, disrupting future threat operations and ultimately in dismantling the enemy's carefully crafted facilitation networks. Money is the oil that keeps these illicit networks in operation, whether moving guns, jihadists, drugs, or illegal mer-

chandise or persons. Sustained CTF activities are a critical part of any effective counterterrorism effort or campaign. CTF done well is preventive and thus highly cost effective.

Question. What do you believe is the appropriate role, if any, of SOCOM in supporting CTF activities?

Answer. The enemy's sustainment networks are global in nature, and to defeat them, our approach must be global as well. We are not effective against these threats when we constrain ourselves in archaic thinking that limits our field of action, whether geographically, functionally, or otherwise. Hence, SOCOM was recently designated the DOD Lead for CTF and that role should be maintained, possibly even expanded, to ensure DOD can operate effectively alongside and in support of our interagency partners.

SOCOM ACQUISITION AUTHORITIES

Question. SOCOM is unique within the DOD as the only unified command with acquisition authorities and funding. Further, the Commander of SOCOM is the only uniformed commander with a subordinate senior acquisition executive.

If confirmed, how would you ensure SOCOM requirements are adequately vetted and balanced against available resources before moving forward with an acquisition program?

Answer. SOCOM has a robust requirements and programming process that is vetted through a Board of Directors consisting of leadership from each of the component commands. This disciplined process allows SOCOM to align available resources with requirements and to prioritize these requirements within our budget and future year programs.

Question. What role can SOCOM's development and acquisition activities play in broader Service and DOD efforts?

Answer. SOCOM is a microcosm of the entire Defense Department, and our challenges are very similar to investment requirements among the Services. SOCOM also has mature processes to conduct rapid evaluations of technology, systems, and concepts of operations, the results of which benefit SOF and are transferrable to the rest of the Department. SOF Acquirers specialize in the integration of emerging off-the-shelf technologies. This integration allows SOCOM to take the best from each Service as well as industry and modify or customize the equipment to meet special operations needs and rapidly field it to the force. Our success can then be shared with the Services to improve their capabilities. Some of the SOF technologies that have made their way to the Services include the MH-47 Chinook helicopter common avionics architecture system (CAAS) cockpit, an extended service life wing for the C-130, the MK48 lightweight machine gun, software defined tactical radios, and an improved sniper sight.

Question. If confirmed, how would you ensure that Special Operations capabilities and requirements are integrated into overall DOD research, development, and acquisition programs?

Answer. Although SOCOM generates and validates all SOF requirements, these requirements are provided to the Joint Staff for inclusion in the Joint Requirements Knowledge Management System. In addition, SOCOM has initiated acquisition summits with OSD, drawing together SOCOM, USD(AT&L), and the Service Acquisition Executives (SAE) where we discuss acquisition issues of common interest. For example, the SAEs agreed to synchronize technical and programmatic plans among all investment portfolios as well as explore initiatives to develop common architectures and standards across different future SOF and Service platforms. Additionally, USD(AT&L) agreed to develop a plan to address the standardization for certification and other Service test requirements between Services and SOCOM to gain efficiencies and promote common process reciprocity. Continuing that dialogue/exchange will remain one of my priorities.

Question. If confirmed, how would you ensure sufficient resources are dedicated to the development of special operations-unique platforms, when required?

Answer. Ensuring SOF not only has the resources to conduct today's operations but preparing ourselves for the future environment is one of my top priorities. The Board of Directors process allows the Command to take a strategic view of future requirements and achieve a balance. Since September 11, the MFP-11 budget has kept pace with operations, and the investment funding has allowed SOCOM to support these increased demands and acquire equipment as required.

Question. If confirmed, what metrics will you use to determine the effectiveness of SOCOM technology development investments and whether SOCOM is investing sufficient resources in these efforts?

Answer. We have created a series of technology roadmaps that assist us in identifying promising solutions to our problems. These roadmaps are schedule oriented, containing both the technology development timelines and the formal acquisition program schedules. As such, they have quantifiable metrics (cost, schedule, performance, and technology readiness) embedded in them.

Question. SOCOM has undertaken a series of acquisition programs to fulfill its undersea mobility requirements. Both the Advanced Seal Delivery System and the Joint Multi-Mission Submersible programs were terminated and SOCOM recently initiated a new undersea mobility acquisition strategy.

What lessons has SOCOM drawn from previous undersea mobility acquisition efforts and, if confirmed, how would you ensure they are incorporated into current undersea acquisition efforts?

Answer. From our previous efforts, SOCOM learned that satisfying a wide range of undersea requirements with a “one size fits all” solution was challenging. As a result, we are pursuing a series of dry combat submersibles along with modifications to the dry-deck shelters. This diversified approach will allow us to meet our operational requirements by deployment from either a surface ship or via a dry deck shelter on a submarine.

ACQUISITION WORKFORCE

Question. If confirmed, how will you ensure that SOCOM has an acquisition workforce with the skills, qualifications, and experience needed to develop and manage its acquisition and research and development programs?

Answer. The SOCOM Acquisition Executive manages the SOF Acquisition workforce similar to the SAEs. SOF Acquirers are specialists in science and technology, acquisition, contracting, and logistics. They are operationally oriented, professionally trained and certified, and experts in the SOF-unique processes needed to meet the equipping needs of SOF. We are working with USD(AT&L) to expand our organic acquisition workforce, as well as create a unique identifier for SOF acquisition positions.

TRANSFORMATION OF THE SPECIAL OPERATIONS FORCES

Question. Much attention has been focused on the transformation of our conventional Armed Forces to make them more capable of conducting counterinsurgency and combating terrorism missions.

Do you believe our SOFs need to be transformed as well?

Answer. No, not in reference to the development of COIN or combating terrorism capabilities.

Question. If so, what is your vision for such a transformation, and how would the transformation of conventional forces complement a SOF transformation, and vice versa?

Answer. SOCOM and its components have featured counterinsurgency capabilities for many years. We have worked closely with the Services to prepare the total Joint Force, including conventional forces, to execute COIN and counterterrorism missions.

The partnership between conventional forces and SOF is as strong as it has ever been. The extensive combat employment of both forces in shared battle spaces has increased the need to closely coordinate our operations. This has resulted in a sharing of tactics, techniques, and procedures (TTP) between SOF and conventional forces that has helped to increase conventional force capabilities to execute COIN and combating terrorism operations.

The transformation of SOF needs to build on the hard combat skills we have honed over the last 10 years by adding to our ability to understand the operational environment and better discern the likely effects of kinetic and non-kinetic actions we take in complex and increasingly urbanized environments. One of the ways we will help in this transformation is to increase our language and cultural capabilities of our forces. This includes recruiting of both females and U.S. born citizens who speak certain specific languages and are knowledgeable about the socio-cultural aspects of these regions.

SPECIAL OPERATIONS PERSONNEL MANAGEMENT

Question. Some have argued that the Commander of SOCOM should have greater influence on special operations personnel management issues including assignment, promotion, compensation, and retention of SOF. One proposal would modify section 167 of title 10, U.S.C., to change the role of the SOCOM Commander from “monitoring” the readiness of special operations personnel to “coordinating” with the Services on personnel and manpower management policies that directly affect SOF.

What is your view of this proposal?

Answer. Ensuring we have the right people to perform SOF missions is paramount to our operational success. Service personnel policies significantly impact SOF retention—especially as they relate to compensation, development, and promotions. Changing Section 167 to reflect the word “coordinating” rather than “monitoring” will give SOCOM more influence than it currently possesses. The recently implemented DOD Instruction 5100.01 requires the Services to coordinate their personnel policies and plans with SOCOM. The “coordination” policy will provide SOCOM more visibility into personnel policy changes and initiatives. SOCOM is in the initial phases of working with the Services to put this policy into action. We’re optimistic that the inputs provided by SOCOM during the coordination process will provide the influence needed to develop and retain the most capable SOF personnel.

SIZE OF SPECIAL OPERATIONS FORCES

Question. The previous two Quadrennial Defense Reviews (QDR) have mandated significant growth in our SOF and enablers that directly support their operations.

Do you believe that we should further increase the number of special operations personnel? If so, why, and by how much?

Answer. The growth we received during the previous two QDRs has served us well. We are still realizing these increases, with more than 12,000 programmed personnel still to arrive in the next 4 years. The current commander has recommended that manpower growth not exceed 3 to 5 percent annually and I agree with Admiral Olson that growing too fast will dilute capability and outpace the support structure we have in place. A gradual increase in capacity ensures that second and third order effects can be accounted without sacrificing the quality of the SOF operator.

In your view, how can the size of SOF be increased, while also maintaining the rigorous recruiting and training standards for special operators?

We are acutely aware of the risks of focusing on quantity rather than quality. In order to sustain our current growth rates at an acceptable level, we have stepped up our recruiting efforts and have enhanced our training pipelines to increase the throughput of our operators with no loss in quality.

READINESS AND OPERATIONAL TEMPO

Question. The current Commander of SOCOM has described a “fraying” of the SOF due to high operational tempo (OPTEMPO).

What is the current dwell time ratio for SOCOM personnel?

Answer. The calculation of dwell time varies depending on the context. Within the Global Force Management process, SOCOM is required to provide real time dwell calculations when responding to force requests.

These responses are generated based on actual deployment data and current force structure. SOCOM has multiple unit types (e.g.: Special Forces Operational Detachment Alphas, SEAL Platoons, aircraft platforms and crews, Marine Special Operations Teams, et cetera); too many to list in this response. However, overall, the deployment to dwell ratio for SOCOM capabilities ranges between 1:0.8 and 1:2. The most requested tactical level units lie at the lower end of this scale while the higher level headquarters at the upper end. With the exception of Special Forces ODAs, the current dwell of forces closely relates to that projected in the Operational Availability 2010 assessment. This assessment accounted for force structure growth not yet realized. However, force demand has continued to outpace some programmed growth. For example, between August 2009 and August 2010, SOCOM added 36 ODAs to the inventory while ODA requirements increased by 37.5 percent.

Question. In your view, how will shifting resources from Iraq to Afghanistan affect personnel tempo and dwell time ratios?

Answer. While some special operations resources will shift from Iraq to Afghanistan, it most likely will not be a one-for-one offset. Some SOF will shift to support other operations as well. The demand for SOF worldwide is at such a high level that OPTEMPO will still have to be very carefully managed.

Question. What can be done to increase dwell time for SOCOM personnel?

Answer. SOCOM will continue to support the requirements of Geographic Combatant Commanders at the highest level we can sustain without “breaking” the force. In most cases, SOF are doing what they expected and wanted, and they feel good about their impressive contributions. That said, we will set and enforce maximum deployment rates for each element of the force.

Much of the answer to the OPTEMPO challenge is in providing: (1) greater predictability, and (2) more opportunities to train closer to home when not deployed overseas.

Today, due to the significant demand for SOF, many units conduct a combat rotation then, during their dwell period, will deploy for a shorter duration in order to support foundational (Phase-0 type) operations before again deploying for a combat rotation.

Question. In your view, how has sustained high operational tempo impacted the readiness of special operations personnel?

Answer. High OPTEMPO has had a number of impacts on SOF readiness:

1. CENTCOM Focus: Over the years one of the major hallmarks of SOF personnel has been regional expertise and language proficiencies for the key nations and/or non-state groups of the region. Since September 11 the vast majority of SOF operations have taken place in CENTCOM AOR. As a result language proficiency and cultural awareness for other Geographic Combatant Commands has suffered.
2. The compressed time between deployments has had a major impact on the readiness of SOF forces. Opportunities to attend some schools and advanced training normally required for SOF personnel has been reduced or eliminated. Examples include reduced time for classroom language training/proficiency for all SOF; advanced Survival, Evasion, Resistance, and Escape School; lack of fixed wing aircraft available for live ordnance drops needed to train Joint Tactical Air Controllers; lack of vertical lift capability to train SOF ground forces and aircrew proficiency; lack of fixed wing refueling aircraft for helicopter in-flight refueling and ships available to conduct deck landing qualifications. Insufficient availability of non-SOF ranges to support SOF training is a significant issue.
3. Equipment: The lack of CONUS equipment also impacts SOF personnel readiness. SOF aircraft are deployed at the maximum sustainable rate. The lack of CONUS-based rotary/tilt wing lift presents a serious readiness challenge for aircrew qualifications/proficiency and training for SOF ground forces. Many of these assets are either forward deployed or in depot level maintenance. These equipment issues, coupled with compressed inter-deployment timelines, have had a significant impact on overall SOF readiness.

Question. If confirmed, what actions would you take to reduce the negative impacts associated with high operational tempo of special operations personnel?

Answer. First and foremost, we must instill the force sourcing discipline previously discussed to improve dwell time, reduce the high operational tempo, and therefore, reduce some of the negative impact resulting from the current operational tempo.

Additionally, SOCOM must coordinate with the combatant commands and Services to ensure that we have developed the best possible force sourcing recommendation for combatant command requirements. In some cases, Conventional Forces or a combination of Conventional and SOF may provide a better solution than a solely SOF.

A number of actions have already been taken to reduce some of these negative impacts on SOF. These include realigning Army Special Forces Groups to specific Geographic Combatant Commands in order for those personnel to regain cultural and language proficiencies; increasing language proficiency pays and training opportunities for all SOF personnel; contracting fixed wing aircraft as a short term "fix" for training Joint Tactical Air Controllers (JTAC); and maximizing CONUS-based vertical lift assets for training SOF ground forces.

In the future it is imperative we continue our close relationships with the Services in order to gain or maintain current access to various ranges and to utilize more military fixed wing aircraft for JTAC training. Other initiatives should include continued development and utilization of simulators as a substitute for a portion of live ordnance training requirements; creation of a SOF special pay based on the current aviation flight pay model; and continue or enhance current retention incentives for SOF personnel.

Question. In your opinion, how has the high operational tempo affected the resiliency of SOCOM personnel, including rates of suicide, over the past several years?

Answer. Trend analysis shows that SOF personnel, compared to the conventional force and the population in general, are more resilient and capable of successfully handling the stress of high operational tempo. The SOF community has become extremely responsive to the creeping "fraying" of the force as operational tempo has increased over the past several years. Successful preventative programs include Command Leadership, an in-depth assessment and selection process, prevention, treatment, and education.

This responsiveness, based on proactive command leadership directives, significantly increased overall force resilience. These directives support the enhancement

and availability of psychological support throughout the SOF community. The success of this program is based on a number of basic concepts:

1. A SOF peculiar application of “Assessment and Selection” of potential candidates has been critical to this process. Command leadership, combined with the use of embedded psychologists, assess all personnel and closely monitors those individuals with potential or actual issues.
2. This process enhances the “Prevention” aspect of the directive through training, education, and monitoring.
3. The key to this program is “access to care” within the Military Health System (MHS) when required. This has decreased the negative stigma associated with seeking professional psychological help.

RECRUITING AND RETENTION

Question. How successful have the services been in recruiting and retaining the special operations personnel that are needed?

Answer. In today’s operating environment, the demand is much greater for SOF operators with varying languages, more cultural attunement, and regional expertise. Service recruitment efforts face many challenges as selection from the pool of eligible U.S. citizens and legal permanent residents are limited due to medical, educational, or conduct reasons. However, Service recruiting commands, in coordination with SOF component commands continue to be overall successful in recruiting SOF operators.

Continued support for programs like Military Accessions Vital to the National Interest, which has great potential to alleviate some critical strategic language and cultural gaps is needed. Looking forward, the Services’ recruitment must increase for those candidates who will bring ethnic, business, academic, technical and experimental diversity to SOF.

Question. What are the biggest challenges to retention you see in the SOCOM community?

Answer. The recent pressure on our force focus groups identified that one of the primary reasons personnel consider leaving the force is the lack of predictability for deployments to both named operations and to GCC theater security cooperation program missions—specifically, late shifts in deployment schedules and the insertion of new requirements.

Question. What steps need to be taken, in your view, to meet the recruiting and retention goals of each of the Services’ SOF?

Answer. The Services need increased flexibility to incentivize those qualified individuals who choose the path to become special operators. We need your help in supporting programs that are beneficial to SOF and in maintaining recruiting budgets for the Services.

Question. What monetary or non-monetary incentives do you believe would be most effective in this regard?

Answer. SOCOM currently has a set of retention incentives programs focused on maintaining our most senior and most experienced SOF personnel: Critical Skills Retention Bonus (CSRB), Special Duty Assignment Pay (SDAP), Assignment Incentive Pay (AIP) and Critical Skills Accession Bonus (CSAB). These programs have been effective in retaining their target demographic.

OSD directed a compensation study to verify the effectiveness of our current incentives programs. The OSD study is also looking at trends inside other demographics beyond our senior SOF personnel. This will give us the information we need to change or modify our existing programs. Trends are starting to show losses in our junior and mid-career SOF personnel. Adapting our retention incentives to counter losses within our junior ranks will ensure they stay SOF until they become our senior SOF personnel.

Prior to the initiation of the OSD study, SOCOM established a compensation working group composed of members of the SOCOM headquarters and the SOF Components. This working group was charged with gaining the approval of the Services to extend the current incentives and look at modifying our compensation plan based on being in a state of persistent engagement. The working group proposed a new compensation plan called SOF Career Pay or SCP (pronounced “skip”).

There are two primary intents incorporated into SCP: Predictability and Relative Parity. By institutionalizing the retention benefit, we eliminate the need for periodic revalidation and approval as with current incentive programs. However, periodic reevaluation of the program is integrated into the proposal. SCP will provide service-members with a predictable and dependable retention plan which incentivizes them throughout their entire SOF career. One of the thought processes behind SCP is to ensure newly trained and mid-career SOF personnel remain in military service to

become our experienced senior SOF personnel. Currently, our retention incentives' package focuses solely on senior SOF personnel. The Services will reap the long-term benefit of the time and resources invested into our SOF personnel. The second primary intent of SCP is relative parity across the Services by granting similar compensation to those possessing similar skills, experience, and mission sets.

DIVERSITY IN SOCOM

Question. How do you define diversity in SOCOM?

Answer. SOCOM's definition of diversity includes the traditional categories of minority representation and more. The ability to speak foreign languages, know the eccentricity of the region, blend into foreign environments, and understand the local cultures of our operating regions are invaluable skills which lends diversity to SOCOM. Diversity in application is our female Cultural Support Teams which allow us access to key populations in some environments which were not previously possible.

Question. Do you believe that achieving greater diversity in SOCOM is a priority?

Answer. Yes, diversity is an operational necessity for SOF. SOF engagement continues to grow into populations with varied societal values. SOF success is impacted by our ability to assess and adapt on multiple fronts. As such, SOF members must possess a broad range of skills and backgrounds.

Question. If confirmed, what steps would you take to ensure that continued progress toward diversity goals is achieved without violating reverse discrimination principles of law?

Answer. If confirmed, I will work with Senior DOD leadership and the Services to identify future operational requirements and support funding for them. The ability to recruit the right people, with the right skills, means establishing the right target goals.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. What is your assessment of current sexual assault prevention and response policies and procedures in SOCOM?

Answer. The Military Services have primary responsibility to ensure sexual assault response personnel (Sexual Assault Response Coordinators (SARC), Victim Advocates, medical and mental health providers, and criminal investigation personnel) are well trained to support victims, investigate and respond to allegations of sexual assault. If resources are not readily available where the alleged incident occurred, victims are transported to a facility where there is appropriate victim advocate support, medical and psychological care (regardless of service) and investigative/legal support.

The Joint Staff remains a key partner with the Services and OSD in the campaign against sexual assault. Additionally, the Joint Staff works closely with the combatant commands during the development of operational plans and personnel policy guidance to ensure the prevention and response to incidents of sexual assault is addressed.

Prevention of sexual assault is a leadership responsibility. Commanders at all levels must remain committed to eliminating sexual assault within our forces by sustaining robust prevention and response policies; by providing thorough and effective training to all assigned servicemembers, by identifying and eliminating barriers to reporting; and by ensuring care is available and accessible.

Question. Do you consider current sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Answer. Yes. For a multitude of reasons, sexual assault has historically been an under-reported crime. Restricted reporting has been effective. Although the use of restricted, or confidential, reporting doesn't allow a commander to investigate alleged assaults, it does allow a sexual assault victim to confidentially receive medical treatment and counseling without triggering the official investigation process.

Unrestricted reporting supports a sexual assault victim who desires medical treatment and counseling—but also provides for official investigation of his or her allegations within existing administrative reporting channels (such as their chain of command, law enforcement or through the SARC).

As our military members' confidence in the reporting and investigative policies and procedures improve, I believe and certainly hope that more victims will choose unrestricted reporting. This will ultimately increase offender accountability.

Question. What is your view of the adequacy of the training and resources SOCOM has in place to investigate and respond to allegations of sexual assault?

Answer. The Services are responsible for training sexual assault response personnel to ensure they are well-trained to investigate and respond to allegations of

sexual assault. For example, in March of this year, the Army opened phase three of its Intervene Act Motivate (I.A.M.) Strong program. The four-phase program emphasizes that leaders must understand their responsibilities to ensure victims of sexual assault receive sensitive care and support and are not re-victimized as a result of reporting the incident. It also provides tangible guidelines to help Army leaders remain alert to, and respond proactively to, incidents of sexual assault. Improved training for investigators is also a priority and this includes investigative resources in deployed areas. As you may imagine, the combat environment and deployed operations are very dynamic and investigative resources are often strained by other mission requirements. Remoteness of locations, availability of transportation, or the level of ongoing operations may complicate access to resources. I believe the DOD training network in place now prepares investigators to handle sexual assault cases in a caring, responsive, and professional manner. Our ability to respond and support victims is critical.

WOMEN IN COMBAT

Question. The expanding role of women and the implementation of women-in-combat policies in the Armed Forces is a matter of continuing interest to Congress and the American public.

Answer. Prior to 1994, DOD Ground Combat Exclusion Policy prohibited assignment of female servicemembers to units expected to engage in direct ground combat. The NDAA for Fiscal Year 1994 repealed the U.S. Code that supported that policy (10 U.S.C. 6015), and required the armed services to issue policy/orders governing the same. The Secretary of Defense issued a "Direct Ground Combat Definition and Assignment Policy" on 13 January 1994 that took effect on 1 October 1994. In part, that policy states:

- a. Rule. Servicemembers are eligible to be assigned to all positions for which they are qualified, except women shall be excluded from assignment to units below the brigade level whose primary mission is to engage in direct combat on the ground, as defined below.
- b. Definition. Direct ground combat is engaging an enemy on the ground with individual or crew served weapons, while being exposed to hostile fire and to a high probability of direct physical contact with the hostile force's personnel."

Additionally, the NDAA for Fiscal Year 2011 required DOD and the Services to review all laws, policies and regulations restricting service of female members of the Armed Forces. DOD is expected to provide its report to Congress by October 2011.

Question. What is the current SOCOM policy regarding the role of women in SOCOM operations?

Answer. SOCOM follows the DOD policy. Recently, SOCOM sought and was granted approval from USD(P) to attach females to select SOFs in order to perform activities that are inappropriate for males to accomplish, i.e. assisting in the searching of and engaging with women and children. This approval is in full compliance with established DOD policy.

Question. What is your view about changing the policy to allow female military personnel to be assigned to SOCOM units?

Answer. Many female military personnel are already assigned to SOF units in a variety of roles. In order to explore opportunities to expand the participation of females in operational activities, SOCOM fully supports the DOD's efforts to review all laws, policies and regulations restricting service of female members of the Armed Forces as directed by the NDAA for Fiscal Year 2011.

LANGUAGE AND CULTURAL AWARENESS CAPABILITIES

Question. Deployed special operations personnel are heavily concentrated in the CENTCOM theater of operations, including many who have been deployed outside of their regional area of expertise.

Are you concerned that the language and cultural skills among SOF are being degraded because of repeated deployments outside their regional area of expertise?

Answer. Rotational deployments of units not regionally aligned to the CENTCOM AOR have indeed taken a toll on the language, regional expertise, and culture capabilities of those units for their aligned regions. OPTEMPO limits our ability to retain and retrain for primary areas of responsibility while still preparing for the next CENTCOM deployment. This is being addressed to a degree by our force structure growth, however, that growth places increased stress on our training resources.

OPTEMPO continues to reduce our ability to send mid and senior grade operators to advanced regional education and professional development programs such as Foreign Professional Military Education (FPME) and the Regional Centers program. We

leverage these programs to improve specific regional acuity and cultural understanding.

Over the last year, we have improved as a command with getting operators to Regional Centers, however during the previous 2 years we pulled primarily from the senior grade SOCOM HQ Staff officers due to operational units executing rotational deployments. Therefore, the return on this investment was limited by our decreased ability to send mid-grade operators, with longevity in SOF, to build core capability and long-term regionally focused relationships.

Question. If so and if confirmed, what, if anything, would you do to ensure these unique skills are adequately maintained?

Answer. SOCOM set new, higher language capability requirements for its components in 2009. Since then, the SOF Service components significantly ramped up and improved training processes. The HQ, SOCOM also worked recruiting, language proficiency pay, and other policy issues to help facilitate higher capabilities within SOF organizations. Following through on these initiatives and ensuring the resources necessary for their continuation will remain priorities for the Command. The SOF Service components are actively engaged in implementing their programs and SOCOM will continue to engage the Department and Services to this end. Policy issues we continue to pursue include native/heritage recruiting, valuing language and regional capabilities in selections and promotions, language testing and incentives, maintaining DOD funded Defense Language Institute detachments at some of our components, adding SOF specific school billets and funding from the Services for foreign education, and encouraging the Services to award Intermediate Level Education and Senior Level Education equivalency for FPME programs.

MARINE CORPS FORCES SPECIAL OPERATIONS COMMAND

Question. Marine Corps Forces, Special Operations Command (MARSOC), is a subordinate component command to SOCOM established in 2005.

What is your assessment of the progress made in standing up and growing MARSOC, and what do you consider to be the principal issues that you would have to address to improve its operations?

Answer. MARSOC was ordered established in November 2005 and actually activated on February 24, 2006. Since that time, MARSOC has made great strides developing and deploying relevant forces in support of SOCOM and the GCC's. Support from both SOCOM and the Marine Corps have been good. Even though MARSOC represents only 5 percent on SOCOM's total force, they have been aggressively employed as they continue their force build. In fact, MARSOC has conducted over 150 deployment to 18 countries since activation, and has 2 full Marine Special Operations Companies continually present in Western Afghanistan, as well as having just recently completed its second Special Operations Task Force HQ's deployment there. Over the last 5 years, they have also completed their Critical Skills Operator training pipeline, screening applicants with a rigorous Assessment and Selection process and then training those selected marines in SOF operations through an 8 month Individual Training Course. MARSOC has similarly built a training pipeline for all its inherent Combat Support personnel in order to ensure all their deployed marines and sailors can conduct well integrated operations once deployed. Finally, I want to mention the superb working relationship between the Marine Corps and SOCOM. Over the next several years MARSOC will grow by an additional 1001 active duty Marine billets, occupy state of the art training and living facilities currently under construction and continue receiving next generation SOF-peculiar and Service common equipment. The Military Construction program produced significant mission support capability through delivery of facilities at Marine Corps Bases Camp Lejeune and Camp Pendleton, with plans to deliver additional facilities to accommodate capacity shortfalls. The interrelated relationship between the Marine Corps and SOCOM not only solidified the Marine Corps role as an equal partner in the SOF community, but also expanded the SOF capacity and capability that our Nation needs at this critical juncture in the war on terror. So, I would assess MARSOC's progress over the past 5 years as tremendous.

As to the principle issue remaining, I believe that MARSOC's greatest challenge is the management of its continued growth as it moves toward Full Mission Capability. We currently project that MARSOC will be fully manned with critical skills operators in fiscal year 2014. The 1,001 additional CS and CSS marines previously mentioned will be assigned to MARSOC from fiscal year 2013-2016. This uniformed growth, with an accompanying growth in civilian structure, will allow MARSOC to fully deploy and employ their robust capability of one Marine Special Operations Regiment (consisting of three battalions, each with four companies, with each company containing four teams), one Marine Special Operations Support Group (made

up of all the Combat Support and Combat Service Support necessary to support MARSOC operations) and one Marine Special Operations School (conducting Assessment and Selection, the Individual Training Course, and follow-on Advanced Courses).

Question. What unique attributes, if any, does MARSOC contribute to the capabilities of SOF?

Answer. MARSOC brings several unique attributes to SOCOM:

1. First, they are marines, and they bring a marine perspective to all their efforts. This perspective, though not easy to quantify, is very valuable and the results speak for themselves. They certainly are very agile and can rapidly reorganize and adapt in order to address new or emerging requirements.
2. Second, MARSOC has been leading the effort to completely integrate Intelligence and Operations at the lowest possible level. To that end, they have task organized their 14-man Marine Special Operation Teams with additional Intel Marines and all the equipment necessary to collect and fuse locally collected intelligence. Their all source intel analysis allows the team to conduct organic, bottom-up targeting/engagement. The local battlespace dominance and distributed operations we see MARSOC conducting in Afghanistan today are proof of the value of this concept and the 1,001 marines being added to MARSOC's structure include a large number of Intel Marines to further bolster this capability.
3. Third, MARSOC brings a unique Command and Control mindset and capability to SOCOM. As marines, coming from a Marine Air-Ground Task Force background, they are experienced and comfortable with ground elements, aviation elements and logistics elements combined within a single command and adept at tying all those efforts together into a cohesive effort. MARSOC has twice deployed Special Operations Task Force Headquarters to Afghanistan, provided Command, Control, Coordination and Support to Special Operation Forces spread of 100,000 square miles. At the lower levels, Marine Special Operations Companies routinely operate and direct the operations of SEALs, Special Forces and even foreign SOF elements in conjunction with their own inherent teams.

Question. Recently, the Marine Corps approved a primary military occupational specialty (MOS) for enlisted marines trained as special operators allowing these personnel to remain in MARSOC for their professional careers.

Do you believe officers should have a similar opportunity as enlisted marines to serve the duration of their military career in MARSOC rather than rotating through the command as they do currently?

Answer. Officers who attend the individual training course are assigned to MARSOC for a 4 year tour instead of the traditional 3 years. They also receive designation with an additional MOS (0370) to ensure their MARSOC service and training are highlighted in their record. With the 0370 designation, these officers can then be tracked and their records reviewed for the potential of follow on assignments back to MARSOC. However, the number of officers assigned to the operating forces at MARSOC is very small. My initial impression is that retaining certain officers within MARSOC for their entire career would impose some manpower management difficulties on the Service, but the topic is worthy of discussion between myself and the Commandant, particularly as we move closer toward the completion of MARSOC manning in fiscal year 2016.

SPECIAL OPERATIONS MISSIONS

Question. In recent years, SOF have taken on an expanded role in a number of areas important to countering violent extremist organizations, including those related to information and military intelligence operations. Some have advocated significant changes to SOCOM's Title 10 missions to make them better reflect the activities SOFs are carrying out around the world.

What current missions, if any, do you believe can and should be divested by SOCOM, and why?

Answer. SOCOM and SOF senior leaders are in the process of reviewing the current list of SOF core activities, as listed in DOD Directive 5100.01, to ensure it captures the "new normal". The outcome of this review could become the basis for a future update to the Directive and other key documents.

Question. Are there any additional missions that you believe SOCOM should assume, and, if so, what are they and why do you advocate adding them?

Answer. SOCOM and SOF senior leaders are in the process of reviewing the current list of SOF core activities, as listed in DOD Directive 5100.01, to ensure it cap-

tures the “new normal”. The outcome of this review could become the basis for a future update to the Directive and other key documents.

Question. What can be done to ensure that indirect SOF missions with medium- and long-term impact, such as unconventional warfare and foreign internal defense, receive as much emphasis as direct action, and that they receive appropriate funding?

Answer. Indirect SOF missions are part of what the Department now calls foundational activities. The foundational activities which SOF perform have not necessarily lacked emphasis, but rather took a back seat during the last decade as SOF surged in Iraq and Afghanistan. Therefore, today we have plenty of resulting pent up demand. Moreover, we expect a future increase in the requirement for SOF to conduct foundational activities, as an evolved defense strategy premised on conflict prevention takes root. Accordingly, I do not see a lack of emphasis as being a future issue for SOF foundational activities. However, appropriate funding and authority are key. First, I believe Secretary Gates and Secretary Clinton’s current proposal before Congress to create a Global Security Contingency Fund (GSCF) that would provide assistance for security forces, rule of law, and stabilization is indispensable to the future success of SOF foundational activities. (Both departments would contribute resources to the GSCF and have a say in its allocation, creating a real incentive for integrated planning and prioritization.) Accordingly, I recommend Congress pass it as proposed in the current legislative session. Second, we appreciate Congress’ ongoing support for section 1206, which we view as one of our most critical tools for building the capacity of partners to conduct counterterrorism operations and fight alongside us in stability operations. Third, increasing the resources at the Department of State for this work is essential. The Foreign Military Financing program provides a structure for long-term partner capacity development essential to future missions, but it is not sufficiently resourced to meet important needs.

MAY 1, 2011, OPERATION IN ABBOTTABAD

Question. The successful operation on May 1, 2011, which resulted in the death of Osama bin Laden, was a significant victory in the armed conflict against al Qaeda and affiliated organizations.

What do you view as the most important factors that contributed to the success of this operation?

Answer. The operation was successful due to excellent interagency cooperation, operational security, and the tenacity and flexibility of the operators involved to adjust to any contingency that they encountered.

Question. What steps need to be taken, in your judgment, to ensure that the capabilities of SOF to undertake similar missions in the future are maintained and improved?

Answer. SOCOM must maintain the ability to rapidly take full advantage of cutting edge technology that will allow our SOF operators to gain the edge on an increasingly sophisticated adversary. But developing new technology from scratch is too time consuming and expensive so SOF must continue to be innovative in utilizing and modifying commercial off-the-shelf technology to support our missions. In addition, the key factor in any operation is the operator. Maintaining high standards, challenging training environments, and encouraging ingenuity develops unique and valuable operators. Finally, continuing to break down barriers between the various Agencies and Departments allows for increased cooperation and synchronization, allowing the U.S. Government to successfully accomplish the mission.

MILITARY INTELLIGENCE OPERATIONS

Question. In your view, how are intelligence operations carried out by special operations personnel different from those carried out by others in the intelligence community?

Answer. SOF intelligence operations follow all existing policies and regulations guiding DOD and interagency activities. One key difference is the speed of special operations activities. SOF has refined the find, fix, finish, exploit, analyze (F3EA) intelligence cycle to support the cycle rate of SOF activities. The F3EA process is now being migrated to conventional forces. SOF have also placed a premium on sensitive site exploitation (SSE) and the collection and registration of biometrics data from the battlefield. SOCOM elements have developed a series of joint interagency task force nodes, both in deployed areas and in CONUS, that bring together expertise from all our interagency partners. Their specific expertise in SSE, combined with the methodology of the F3EA process, drives special operations on a much faster operational cycle than conventional operations. SOF maximizes interagency con-

tributions through reachback, deconfliction and coordination of activities between agencies, which allow our forces to get inside the enemy's decision cycle.

Question. If confirmed, how would you ensure intelligence activities carried out by SOF are coordinated adequately with other activities carried out by those in the Intelligence Community?

Answer. SOCOM will continue to follow all applicable intelligence community directives, report required sensitive activities to the USD(I), maintain the robust intelligence oversight processes in place involving our Inspector General, Staff Judge Advocate, and our Command Oversight Review Board. I will maintain and build upon the relationships developed over time with the numerous Federal intelligence and law enforcement agencies represented in our Interagency Task Force in Tampa. Additionally, SOCOM will continue to employ and leverage our liaison officers, which we call Special Operations Support Team members, to coordinate with agencies in the National Capital Region. Interagency collaboration is a significant contributing factor in many of our biggest successes.

SPECIAL OPERATIONS PERSONNEL IN EMBASSIES

Question. SOCOM deploys personnel to work with country teams in a number of priority countries where the United States is not engaged in direct action operations, but rather trying to stop the spread of violent extremism. Their mission is to support the priorities of the Ambassador and the geographic combatant commander's theater campaign plan against terrorist networks. At times, Ambassadors have complained that they have not been adequately informed of activities by SOF in their country.

If confirmed, what do you intend to do to make sure the goals of special operations personnel deployed to these countries are aligned closely with those of the Ambassadors they are working with?

Answer. SOCOM has two persistent, strategic avenues to engage with and inform the Embassy leadership of SOF capabilities and operations, the Ambassador Orientation Visit (AOV) Program and the Special Operations Liaison Officer (SOLO) Program.

The AOV provides future Ambassadors the opportunity to visit SOCOM headquarters, receive briefings on SOCOM unique capabilities and responsibilities, as well as regionally targeted introductions considerate of their newly assigned posts. During the program the ambassadors have a 1-hour one-on-one discussion period with their respective TSOC Commander and a 1-hour session with the SOCOM commander. To date SOCOM has hosted more than 75 ambassador designees. Feedback on the program has been positive and the future ambassadors have indicated that the experience is worthwhile and will help them in the future.

Question. Please describe the value of these special operations personnel to their respective Geographic Combatant Commands and the country teams they are supporting.

Answer. SOLOs are SOCOM sourced, SOF qualified officers, and placed under Chief of Mission authority as part of the Country Team, via the National Security Decision Directive-38. There are currently 8 serving SOLOs in various countries with 2 more going out summer 2011, for a total of 10 SOLOs working with the U.S. Embassy country teams. These countries were selected based on their proven or potential ability and desire to work SOCOM as partners across the spectrum of special operations missions and goals. The SOLOs serve as the SOCOM Commander's representative to the country team and host nation SOFs. A prime objective of the SOLO program is improving coordination between the U.S. country team, the TSOC and the host nation. Although the program is still relatively new, all indications are positive. The countries that have SOLO's enjoy a more efficient, direct coordination, and information sharing on SOF specific issues.

MILITARY INFORMATION SUPPORT OPERATIONS

Question. DOD recently announced that it was discontinuing use of the term "psychological operations (PSYOP)" in favor of the term "military information support operations (MISO)."

Do you support this change? Why or why not?

Answer. Yes. Today, for some, the term PSYOP unfortunately conjures up images of propaganda, lies or deception—and these inaccurate perceptions limit the willingness to employ MISO personnel in some areas where they could be extremely effective.

To date, there is some evidence that the name change has allowed for some increases in acceptance, cooperation and coordination throughout the U.S. Government and our partner nations.

Question. What operational and doctrinal impacts do you believe such a change will have?

Answer. Replacing the term Psychological Operations with MISO throughout military doctrine, manuals, and other documents is one of semantics. There were no directed changes in doctrine or operational employment of the force.

Question. Do you believe the Armed Forces have sufficient personnel and other assets to conduct the range of military information support missions being asked of them?

Answer. MISO forces and assets, like the rest of the military, are stretched thin with the ongoing operational requirement to the deployed combat forces. This low density force is one of the most deployed in the military which demonstrates the need to increase forces and assets. Under Admiral Olson, SOCOM conducted several reviews to address these issues. One of the first responses to increasing the MISO capability is the reorganization of SOCOM MISO forces. This reorganization will reduce redundancy in commands and allow for the repurposing of numerous positions from staff to operational capability.

Question. Al Qaeda and affiliated violent extremist groups work hard to appeal to both local and foreign populations. The composition and size of these groups in comparison to the U.S. Government permits them to make policy decisions quickly.

Do you believe DOD is organized to respond quickly and effectively to the messaging and influence efforts of al Qaeda and other affiliated terrorist groups?

Answer. DOD is well positioned and organized from the strategic level to the tactical to quickly respond to al Qaeda and its affiliates when a quick response is what is required. But unlike kinetic warfare, effectiveness in the war of ideas does not necessarily lie in outpacing the tempo of our enemies. A steady drumbeat which clearly articulates U.S. policy over time, anchored in the bedrock truth, best serves our national interests. DOD takes its lead from the Commander in Chief and the Department of State, in re-enforcing the message from our Nation. In doing so, we are extremely effective in face-to-face engagements, through a broad array of engagements with our partner and host nations, and allies, on a daily basis. As a representative example, we reinforce our ability to engage with printed products, such as the Geographic Combatant Command's Regional Magazines and the Geographic Combatant Command's foreign engagement websites. These mediums allow us a broad range of options.

In addressing al Qaeda, we collectively identify and exploit their miscues and errors, and forcing them into a reactive role to gain the initiative. The DOD in that way, determines the appropriate level of response and quickly coordinates that response with other agencies, and the State Department. Our military commanders have a solid understanding of the impact messaging can have in the strategic environment and exercise authorities with coordinated guidance allowing them broad flexibility to respond in the most appropriate manner.

While shocking video and extremist propaganda constantly reminds us that al Qaeda and their affiliated terrorist groups exercise streamlined and individual messaging—with unencumbered release processes and no mandate for truth—it would appear to give them the ability to address emerging issues, as they see them, at a time and place of their choosing. But recent events suggest that the mainstream is rejecting their propaganda.

Question. What do you believe is the appropriate role for Military Information Support Teams (MIST) in these activities?

Answer. The MIST is the MISO equivalent to the Special Forces operational detachment. The element that executes MISO at the operational and tactical level—but should not be equated to tactical loudspeaker elements that operates in support of combat maneuver forces

The MISTs develop messages to counter hostile information and propaganda, that are culturally relevant and acceptable to the host national population. Such messaging is closely coordinated with the embassy due to the Team's relationship in support of the embassy staff. The MISTs also can maintain awareness of the information environment by identifying current trends in local and regional media reporting, identifying hostile messaging, and measuring local populace reaction.

CIVIL AFFAIRS OPERATIONS

Question. Civil affairs (CA) activities carried out by SOF in partnership with host nation personnel play an important role in developing infrastructure, supporting good governance and civil societies, and providing humanitarian assistance, including medical and veterinary services to needy populations.

In your view, does SOCOM have sufficient personnel and resources to conduct the range of civil affairs missions required for today's operations?

Answer. Civil Affairs activities are most effective when coordinated with other U.S. Government efforts, most notably those carried out by the U.S. Agency for International Development.

Question. If confirmed, how would you ensure Civil Affairs activities by special operations personnel are integrated into larger U.S. Government efforts?

Answer. MISOs can have an amplifying effect on Civil Affairs activities by actively promoting the efforts of the U.S. military and host nation and by communicating truthful messages to counter the spread of violent extremist ideology among vulnerable populations.

Question. If confirmed, how would you ensure Civil Affairs and MISOs are adequately coordinated to achieve a maximum impact?

Answer. I'll start by saying this is a mutually supporting effort where, as you've stated, MISO can and does support, reinforce, and amplify CA efforts on the ground. On the other hand, CA can and does amplify MISO efforts to affect behavior through their on the ground activities. In a nutshell, it's about "words and deeds"—you can't have one without the other, and depending upon the situation one will support or be supported by the other.

Today, we affect this coordination and synchronization through our strategic plans and guidance, where both MISO and CA staff members participate with our strategic planners to ensure, depending upon the situation, activities of both are nested and mutually supporting. This is also true at the TSOCs and GCCs.

On the ground, this coordination and synchronization is affected through the deployment and organization of cross-functional SOF teams that often include elements of MISO and CA who work together, plan together, and often operate together, in coordination with the U.S. Embassy and Country team and JSOTF and/or TSOC commander's objectives.

While there's room for improvement, we believe we're on the right track. We continue to reinforce our efforts for CA and MISO to work more closely and better achieve our population-centric and indirect approach. Starting with a synchronized campaign in coordination with, and often in support of, our U.S. Government civilian interagency partners, CA and MISO have and will continue to improve operations to counter violent extremism as part of U.S. Government strategic objectives globally.

TRAINING CAPABILITY

Question. What capabilities do you consider most important for effective training of special operations personnel?

Answer. Professional military education remains an essential element to the development, sustainment, and advancement of SOF. Additionally, language skills and cultural knowledge continue to be key to establishing effective relations with the foreign forces, organizations, and individuals with which SOF will interact.

Maintaining core Special Operations skills are also critical. They provide the base for what makes SOF special.

Question. What improvements are necessary, in your view, to enhance training for special operations personnel?

Answer. SOF competition for Service installation's Ground Tactical Ranges and Training Areas with the General Purpose Forces is one of our greatest challenges. Given SOF's OPTEMPO and unforecasted mission requirements SOF needs priority at Service installations over GPFs allowing immediate and unfettered access to ranges and training areas. In the current environment, training time is short and precious.

From a Presentation of Force Perspective, Pre-mission and Pre-deployment training with relevant Service-provided capabilities (e.g. mobility, fires, engineers, et cetera) is also critical to ensure that joint SOF packages are effective and fully-enabled. The continued emphasis on language and cultural awareness training is important. SOF have seen remarkable improvements to three key areas since September 11—shooting, moving, and communicating. Now the command must concentrate on "understanding."

Question. What are the most significant challenges in achieving effective training of special operations personnel?

Answer. SOCOM must move from a primarily threat-focused approach to a populace-centric approach. To achieve U.S. strategic objectives, the instruments of national power, including the military, and more specifically SOF, must posture for and then execute an approach based on populace-centric engagement. In this approach, the United States out competes rivals in the open market of relevant populations as opposed to countering rivals in a more conventional manner based on threat-centric engagement. While emphasizing the need for the indirect approach,

we must not weaken our ability to execute direct action when necessary. To be successful, we must optimize our role with the defense-diplomacy-development construct and design our training programs to maximize our combat capability and make our staffs more effective.

Another challenge is ensuring there is enough time to train in the deployment cycle to maintain proficiency in our core SOF capabilities. Since most SOF missions require non-SOF support, time must be added to work closely with the Service Providers prior to deployment.

Question. What, if any, training benefits accrue to SOF from training foreign military personnel?

Answer. SOF providing training in regional synchronization, intelligence sharing, planning and coordination for counterterrorism related operations has provided huge benefits. SOF also participates in Joint Combined Exchange Training (JCET) exercises throughout the world. These exchanges enhance SOF skills and fulfill training requirements. They also build person-to-person and unit-to-unit relationships.

The bottom line is we must continue to develop relationships with our foreign counterparts for persistent engagement, cultural awareness and to maintain SOF instructor and language skills.

Question. To what extent, in your view, is it appropriate for the United States to rely upon contractors for training foreign military personnel? What do you see as the primary risks and advantages in such contractor training?

Answer. Training of foreign forces, as a general rule, must be conducted as a part of the Department of State title 22 funded Security Assistance or Security Cooperation programs. SOF support to these programs usually does not include the use of contracted personnel. The use of contractors in many cases may make sense from a cost perspective, as well as relieving military assets from these tasks. The risk to SOF in using contracted personnel is the possible disclosure of Tactics, Techniques, and Procedures (TTP) which SOF has developed, and has resulted in our successes on the battlefield. SOF reviews contracts for training to foreign forces to ensure TTPs are protected from disclosure. The problem is trying to monitor contracted training that is being done by other countries for foreign forces. Frequently, former U.S. military personnel accept employment with foreign companies to conduct SOF training. It is very difficult to monitor the disclosure in this case.

Contractors are not a SOF substitute. They should only be used in a support role such as logistics and administration. The risk is they are not military and therefore cannot represent the U.S. Government. The advantages are they free up SOF from routine logistical and admin support functions and allow them to concentrate on operational mission accomplishments.

CAPABILITIES OF SPECIAL OPERATIONS FORCES AND GENERAL PURPOSE FORCES

Question. The 2010 QDR called for increased counter insurgency, counterterrorism, and security force assistance capabilities within the general purpose forces.

What is your assessment of the QDR with regard to the mix of responsibilities assigned to general purpose and SOF, particularly with respect to security force assistance and building partner military capabilities?

Answer. SOF have routinely been the force of choice for Security Force Assistance (SFA) activities. However, SOF cannot indefinitely sustain current levels of overseas presence. The resulting pressure on the force and our families is too great and the pressure is creating a dramatic effect on our readiness. All capabilities, including SOF, require foundational activities to make them sustainable. Any comprehensive plan to develop a capability must address these activities base. The General Purpose Force (GPF) maintains the subject matter expertise to deliver most of these foundational activities. The GPF's primary challenge is the lack of core competence in advising specific skills. The GPF's challenge in the future will be to effectively institutionalize what they have learned, developing the right capabilities, and establishing effective and responsive policies, processes, and procedures to meet the national security goals with respect to building foundational activities necessary for conflict prevention. Once it is institutionalized across the Department, we feel the development of foundational activities can be accomplished through the appropriate employment of GPF, SOF or SOF/GPF mix.

GPF are best suited for delivering GPF capabilities to foreign military forces in environments where overt U.S. presence is acceptable to the host-country government and where large-scale U.S. presence is considered necessary and acceptable by the host-country government or in areas where a limited overt presence is acceptable to the host nation government. SOF is more appropriate for politically sensitive

environments where an overt U.S. presence is unacceptable to a host country government. These are not hard and fast rules but should serve as general guidelines for the Department.

Question. Do you believe that our general purpose forces need to become more like SOF in mission areas that are critical to countering violent extremists?

Answer. A key element to countering violent extremists is removing the factors that inspire hatred and discontent, both in their organizations and more importantly, among the populations they recruit. In order to do this effectively, any force, whether SOF or GPF, needs to have an understanding of the culture, and be able to build relationships with the population that promote mutual respect. A key element in the training of SOF personnel is the development of regional and cultural orientation, language capability, and an ability to interact effectively in other cultures. In Afghanistan for example, there are many GPF units currently conducting activities that are traditionally Special Operations and that are important for building Afghan capacity to counter VEOs and raising their standard of living to a point where most incentives to join VEOs no longer exist. NATO Training Mission-Afghanistan/Combined Security Transition Command-Afghanistan (NTM-A/CSTC-A) has GPF conducting Foreign Internal Defense by training Afghan National Army and Police forces. Provincial Reconstruction Teams (PRTs) are conducting capacity building, medical, and engineering support missions that fall under the heading of Civil Affairs, as well as Information Operations to help the Afghan Government communicate more effectively with its own population. PRTs and other GPF units also conduct Humanitarian Assistance activities.

GPF needs to be more SOF like as it pertains to the Knowledge, Skills and Attributes (KSA) that make SOF effective, such as language, culture, regional expertise, cross-cultural ability, diplomacy, and adaptability. These KSAs will enable the GPF to effectively execute the missions and activities that support SOF, in coordination with SOF or independently to create an environment unfavorable to violent extremist organizations (i.e.: enhanced capabilities to conduct or support missions in foreign internal defense, counterinsurgency, stability operations, security force assistance, unconventional warfare, and information operations as outlined in the 2010 QDR). I would also mention that the Services have made great strides in this direction in the last 2 or 3 years.

Question. Are there certain mission areas that should be reserved for SOF only?

Answer. Missions involving the Title 10 SOF Core Activities of Direct Action, Special Reconnaissance, and Unconventional Warfare are highly specialized and from a military standpoint SOF should have primacy due to the extensive specialized mental and physical training required and the high degree of risk that the personnel conducting these missions accept.

However, other agencies in the U.S. Government also specialize in some of these missions, particularly Counterterrorism and Counter Proliferation of Weapons of Mass Destruction. SOF needs to partner closely with them in the conduct of these operations. Additionally, SOF is best suited for politically sensitive environments, where an overt U.S. presence is unacceptable to the host country government, and to denied environments.

SPECIAL OPERATIONS ENABLING CAPABILITIES

Question. The Commander of SOCOM has described the “non-availability” of force enablers as SOCOM’s “most vexing issue in the operational environment.” The 2010 QDR sought to balance previously mandated growth in SOF with additional enabling capabilities.

What do you believe are the greatest shortages in enabling capabilities facing SOF?

Answer. The greatest shortage is in those enabling capabilities not organic to SOCOM’s force structure.

SOCOM’s organic enabling capabilities are those that provide our forces the ability to self-sustain for short durations while maintaining the agility that allows us to deploy forces quickly in support of the combatant commanders. Support of SOF, by doctrine, and except under special circumstances, becomes the responsibility of each Service’s theater logistic command and control structure; Services and/or executive agents should be prepared to support special operations not later than 15 days after SOF are employed.

Shortages of enabling capabilities for SOF are often similar to the shortage of enablers that plague the rest of the deployed force. SOF struggle to obtain enough intelligence, EOD, ISR, communications personnel, medical, and security personnel support.

Question. Do you believe additional enabling capabilities, beyond those mandated by the QDR, are required to support SOF?

Answer. The QDR mandated an increase in the number of organic combat and combat service support assets available to both the Army and Navy special operations units. These capabilities include logisticians, communications assets, forensic analysts, information support specialists, and intelligence experts. We are slowly realizing this programmed growth, and it will make a difference in how our units are supported. The QDR only addresses growth within SOCOM. SOCOM will always rely on the Services for some level of support as addressed in the previous question. Our higher 'tooth to tail' ratio when compared to conventional forces will make us dependent on the services for most operations in excess of 15 days.

Question. Do you believe additional enabling capabilities should be grown within SOCOM or provided in support of SOF by the Services?

Answer. Both, but the preponderance of those support capabilities should remain in the conventional force and be provided to SOF through the habitual association of Service combat support and combat service support capabilities with the SOF units they primarily support.

Currently the responsibility of the conventional force to provide sustainment support to SOF is not clearly defined or specified. This limits SOF's ability to sustain operations.

SOCOM is currently working with its components, the Services and the JS to develop the Special Operation Force Generation process to improve how it requests these critical capabilities. We will work to better define our requirements and make them farther in advance, to allow the Services to plan for the employment of habitually associated units in support of SOF. A reduction of our emergent requests and an increase in habitually associated Service provided capabilities will go a long way to resolve this problem.

RENDER SAFE PROFICIENCY

Question. The proliferation of weapons of mass destruction is a growing and especially concerning threat to our Nation. Select special operations units are assigned the task of interdicting and rendering-safe weapons of mass destruction should they ever fall into the wrong hands.

If confirmed, how would you ensure render-safe capabilities are adequately maintained by special operations units who may currently be heavily engaged in offensive kill/capture missions against high value targets in Afghanistan and elsewhere?

Answer. Currently, our capabilities are adequately maintained by special operations units. I will continue to use the current training and exercise programs in place. Special operations units participate in the Joint Operational Readiness and Training (JORTS) Cycle that incorporates world-wide deployments, individual training, collective training, and joint exercises (and evaluations) year round.

Question. Do you believe additional render-safe capabilities are needed within SOCOM?

Answer. Yes, but allow me to qualify that answer. As I stated before—our capabilities, training, and exercises are on track. We are abreast of the latest's threats. However we cannot rest. We must stay in front of the evolving threat through our research and development (R&D) programs. I am grateful for what we have, but as with any program, we are limited by funding. Increased funding for our R&D programs could potentially enhance our current capabilities within SOCOM.

SUPPORTED COMBATANT COMMAND

Question. Under certain circumstances and subject to direction by the President or Secretary of Defense, SOCOM may operate as a supported combatant command.

In your view, under what circumstances should SOCOM conduct operations as a supported combatant command?

In your view, what resource, organization, and force structure changes, if any, are required in order for SOCOM to more effectively conduct both supporting and supported combatant command responsibilities?

Answer. The plan of using SOCOM as a supported commander for CT ops was developed soon after September 11. Part of the reasoning was based on the assumption that SOCOM forces would most likely be prominent players in any terrorist-related incident, and also the fact that SOCOM is not limited to any specific area of ops. Additional rationale was that the SOCOM Headquarters staff would be best suited to quickly plan any effort that spanned several AORs and/or involved precision timing based on a potential need for near-simultaneous execution against multiple targets. However, during the last 10 years, several real-world scenarios and numerous CT-focused global exercises have not supported the earlier belief that the

Commander, SOCOM, is the best choice for being the supported commander for CT-related ops. In every case, both real-world and exercise, the final decision was to designate the GCC as the supported commanders. Their staffs, each of which includes a TSOC of more than 100 personnel, proved they were able to competently coordinate cross-GCC efforts and there was no need for an added layer of command and control between them and the Secretary of Defense. Also, the Joint Staff has concluded they are capable of executing the planning for any CT-related mission and may only require some SOF augmentation rather than a SOCOM-led effort. I cannot think of any other situation where the Commander, SOCOM, would be the best choice for acting as the supported commander.

INTERAGENCY COLLABORATION

Question. The collaboration between SOF, general purpose forces, and other U.S. Government departments and agencies has played a significant role in the success of counterinsurgency and counterterrorism operations in recent years. However, much of this collaboration has been ad hoc in nature.

What do you believe are the most important lessons learned from the collaborative interagency efforts in Afghanistan, Iraq, and elsewhere?

Answer. We have learned a great deal over the last decade about the strength of collaboration. The organizational innovation of forming small task forces of subject matter experts from across the military, government, and partner nations allowed SOF in Iraq, Afghanistan and elsewhere to synchronize efforts with an efficient agility. These task forces all follow three simple principles: the practice of flattened, agile communications, extensive senior leader involvement across the U.S. Government and allies, and the leveraging of information dominance provided by these subject matter experts and their systems. These principles are our most important lessons learned.

Question. How do you believe these efforts can be improved?

Answer. As we approach future phases of operations in New Dawn and OEF, these forward interagency task forces will likely relocate and refocus on other regions and priorities. We must preserve the ability for the greater interagency network to support these task forces by asking them to loan their best and brightest to the effort. We must remember that any complex task is best approached by flattening hierarchies. It gets everybody feeling like they're in the inner circle, so that they develop a sense of ownership.

Question. How can the lessons learned in recent years be captured in military doctrine and adopted as "best practices" for future contingency operations?

Answer. We're on the right track with doctrinal publications such as Joint Pub 3-08, "Interagency, Intergovernmental Organization, and Nongovernmental Organization Coordination During Joint Operations." Capturing the best practices of these horizontal interagency teams in future editions is critical.

TREATMENT OF DETAINEES

Question. Section 1403 of the NDAA for Fiscal Year 2006 provides that no individual in the custody or under the physical control of the U.S. Government, regardless of nationality or physical location shall be subject to cruel, inhuman, or degrading treatment or punishment.

In your view, is the prohibition in the best interest of the United States? Why or why not?

Answer. Yes. It is essential that we follow both international and domestic laws regarding treatment of detainees. We do this not only to maintain international respect but also to set the example and to live our values. The way we behave shows how we view individual's lives. It is who we are.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the DOD Detainee Program, dated September 5, 2006?

Answer. Yes, I fully support those standards.

Question. Section 2441 of title 18, U.S.C., as amended by the Military Commissions Act of 2006, defines grave breaches of common Article 3 of the Geneva Conventions, including torture and cruel and inhuman treatment.

Do you believe it is consistent with effective counterinsurgency operations for U.S. forces to comply fully with the requirements of Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. If confirmed, how would you ensure that SOF comply with the standards in the Army Field Manual, the DOD Directive, and applicable requirements of U.S. and international law regarding detention and interrogation operations?

Answer. SOCOM ensures that these regulations are followed through unit and individual training, and incorporated into all operational plans, pursuant to law and DOD instructions. I would emphasize their importance, direct continued compliance, and hold those who fail to follow the standards accountable for their actions. Prompt investigation into allegations of abuse and swift action are keys to ensuring strict compliance.

Question. What steps, if any, would you take to ensure that those foreign forces trained by our SOF understand the necessity of complying with the Geneva Conventions when detaining and interrogating individuals?

Answer. When conducting the training, I would ensure that our SOF personnel continue to explain in clear terms why it is important to follow international laws, treaties, and conventions, and the consequences of failure to abide by them. Additionally, I will make sure that we continue to use these training opportunities not just to show them what we do and how we do it, but to also explain why it works. The best thing we can do is set the example and set down our expectations that they should emulate what we do not because we tell them to but because it is the right thing to do. Finally, we make it known that further military assistance and training is predicated on their adherence to the law of war and human rights laws, as required by the Leahy Amendment.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Commander of SOCOM?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR CARL LEVIN

SOLAR MICROGRIDS

1. Senator LEVIN. Vice Admiral McRaven, for several years, elements of Special Operations Command (SOCOM) have supported the development of solar power generators for Special Operations teams deployed in remote areas of Afghanistan, and for the use by the Afghan people through the Village Stability Operations program. The committee understands that two units have been built and forward-deployed for trial and evaluation. A third unit, reflecting input from the deployment of the first two, is now being tested at Aberdeen Proving Grounds before its scheduled deployment to Afghanistan.

For our Special Operations Forces (SOF), these solar generators could dramatically reduce the consumption of diesel fuel and other consumables such as batteries. As we all know, getting supplies to forces in dangerous remote areas is hard and risky and reducing the number of convoys saves lives. What is your assessment of the utility and maturity of the solar microgrid system that SOCOM has developed?

Admiral MCRAVEN. SOCOM deployed the first two of three Mobile Smart Power Initiative Systems to Afghanistan in support of Operation Enduring Freedom in late December 2010 as part of a pilot program to evaluate and assess the use of alternative power generation technologies at remote Forward Operating Base locations.

The overall objective was to increase energy efficiency and reduce reliance on fossil fuels by our SOF elements deployed at remote Village Stability Platform locations. Operating costs, transport demands, resupply needs, and exposure to improvised explosive devices necessitate the need for alternative power capabilities at remote locations throughout Afghanistan. Thus far, the systems have demonstrated utility at both locations for the stated goals of fuel savings but equally important for village stability operations. At both locations we are supplying power to our SOFs but also to the Afghans village centers and medical clinics. System maturity will increase as we move forward applying lessons learned from the first two systems into a larger third system that will be deployed in August 2011. This third system will offer increased power generation capability and will undergo a similar limited user assessment. We believe solar power along with other fuel saving initiatives have a solid place on the battlefield.

2. Senator LEVIN. Vice Admiral McRaven, could fielding of solar microgrid systems for the Village Stability Operations program be accomplished using funding from the Commander's Emergency Response Program (CERP) and/or Afghanistan Infrastructure Fund?

Admiral MCRAVEN. The fielding of Solar Microgrid systems to provide electricity or power generation can be funded from the CERP or the Afghanistan Infrastructure Fund.

3. Senator LEVIN. Vice Admiral McRaven, is SOCOM considering procurement of solar microgrid systems for the use of SOF?

Admiral MCRAVEN. SOCOM investment will be limited to the three initial systems. We will provide our lessons learned to the Service that could best move this type of effort forward into a service common system.

4. Senator LEVIN. Vice Admiral McRaven, should SOCOM procure these systems or is the command looking to one of the Services to sponsor and fund this acquisition?

Admiral MCRAVEN. SOCOM investment will be limited to the three initial systems. We will provide our lessons learned to the Service that could best move this type of effort forward into a service common system.

QUESTIONS SUBMITTED BY SENATOR KAY R. HAGAN

AL QAEDA

5. Senator HAGAN. Vice Admiral McRaven, Secretary-designate Panetta has expressed concern about the shifting of al Qaeda to "nodes" outside of Pakistan, Iraq, and Afghanistan—most notably in Yemen, Somalia, and North Africa—and the need to keep up the pressure on these nodes. How would you characterize the relative threat these nodes pose to the United States and our allies?

Admiral MCRAVEN. Al Qaeda (AQ), its associated movements (AQAM), and key affiliates (to include AQ in the Arabian Peninsula, al-Shabaab, AQ in Iraq, and AQ in the Islamic Maghreb) remain the pre-eminent threat to the U.S. Homeland and interests abroad, to include our allies.

While AQ has been unable to perpetuate a "Spectacular" attack against the U.S. Homeland since September 11, the United Kingdom and Spain have suffered AQ-inspired attacks. The failed "Christmas Day Bomber" attempt to bring down an airliner over Detroit, MI, claimed by AQ in the Arabian Peninsula, is proof that AQ Senior Leader guidance to attack western interests and the U.S. Homeland is being adhered to by AQ affiliates around the globe. AQ utilizes modern communications, financial and logistic networks that transcend national borders and boundaries throughout the globe.

U.S. and partner nation Counterterrorism (CT) efforts, supported by SOCOM Forces and the U.S. Interagency (IA), have frustrated AQ's operations in the U.S. Central Command Area of Responsibility and across the globe; yet AQ's motivation to attack the homeland is undiminished and their ability to reconstitute their capabilities is remarkable.

The shift of AQ operational nodes to Yemen, Somalia, and North Africa poses challenges for the U.S. in that the United States may have to conduct Security Co-

operation and Security Force Assistance activities to assist these country's Armed Forces improve their military and security capacity and capability to meet the AQ threat within their borders.

6. Senator HAGAN. Vice Admiral McRaven, do you believe we are applying sufficient resources to address these threats?

Admiral McRAVEN. We are applying significant resources toward neutralizing al Qaeda in the Arabian Peninsula, Somalia, and East Africa. Our shortfalls continue to be manpower and Intelligence, Surveillance, and Reconnaissance (ISR) in support of kinetic operations in these areas. Unmanned ISR is a critical enabler for SOF in these direct action missions. Both the U.S. Central and Africa Commands have done an exceptional job in apportioning the available ISR but, we continue to experience shortages during these missions. Manpower is one of our greatest challenges we have and will continue to face in the future. The demand for SOF worldwide has quadrupled since September 11 and we do not expect this to decrease. SOF can not be massed produced. Our planned growth for manpower within SOCOM is 3–5 percent per year. It is essential that we ensure our forces have the resources that they need to survive and succeed in the complex, ambiguous and often violent environments in which we ask them to operate in.

GOLDWATER-NICHOLS ACT MODIFICATIONS

7. Senator HAGAN. Vice Admiral McRaven, in response to the committee's advance policy questions, you indicated that you believe modifications to the Goldwater-Nichols Act are required to provide SOCOM with "greater personnel management authority to shape mid- and senior-grade SOF operators to meet SOCOM's defined requirements." In what ways do the Goldwater-Nichols Act and current DOD policies provide insufficient authority to SOCOM to address these issues?

Admiral McRAVEN. I believe the Goldwater-Nichols Act is one of the most significant pieces of legislation passed by Congress regarding DOD operations and organization. However, it has been 25 years since the enactment of Goldwater-Nichols and with the passage of time and an ever changing landscape of threats, I believe it is prudent for DOD to continuously review and innovatively improve our personnel management practices. We must revisit how we manage our personnel in order to guarantee that our system produces the type of leaders needed to succeed in the future operational environment.

8. Senator HAGAN. Vice Admiral McRaven, what specific modifications would you recommend?

Admiral McRAVEN. I am not prepared now to recommend any modifications, but look forward to reviewing this milestone legislation and assessing whether any modifications should be considered to address the challenges faced in today's security environment.

TRANSNATIONAL CRIMINAL ORGANIZATIONS

9. Senator HAGAN. Vice Admiral McRaven, earlier this year, the Commanders of U.S. Northern Command (NORTHCOM) and U.S. Southern Command (SOUTHCOM) described the debilitating impact of transnational criminal organizations in Central America and Mexico. Appropriately, both commanders indicated the lead U.S. Government agencies for supporting our foreign partners in their efforts to counter the influence of transnational criminal organizations should be U.S. law enforcement and DOS. However, they both indicated that DOD can play an important support and enabling role. Would you support SOCOM and SOF playing a more significant role in support of other U.S. Government departments and agencies in this region?

Admiral McRAVEN. Clearly the transnational criminal organizations are a threat to our national security that must be addressed through multi-national, multi-agency collaborative efforts. Per direction from the Secretary of Defense, SOCOM forces under the operational control of the NORTHCOM and SOUTHCOM commanders currently execute counter-narcoterrorism training of selected partner nations' security forces in support of those combatant commanders' theater strategies. While SOF possess additional unique capabilities that could be leveraged against the problem, I would defer to the Secretary of Defense and the combatant commanders to determine what, if any expanded role SOF would have within the context of the whole of U.S. Government and Department of Defense strategy. Should an expanded role be requested and approved, we would support to the extent possible.

10. Senator HAGAN. Vice Admiral McRaven, in your view, what—if any—support capabilities can SOCOM bring to this effort that the geographic combatant commands cannot?

Admiral MCRAVEN. We can bring to this effort the following: an in-depth understanding from a global perspective on Transnational Criminal Organizations networks based on our experience in counterterrorism; a well established relationship of working with law enforcement in forward deployed locations, in the National Capitol Region, and through our Interagency Task Force in Tampa; and finally SOCOM can bring a well-honed process to identify lines of effort that should prove effective at disrupting Transnational Criminal Organizations networks.

In conducting our global mission of synchronizing DOD plans and planning for counterterrorism, we recognize the increasing threat posed by this crime-terror-insurgency nexus. SOCOM is uniquely positioned to contribute to the U.S. Government effort against Transnational Criminal Organizations through information sharing with those agencies possessing the authorities to take action. SOCOM has close working relationships with all of the Geographic Combatant Commands (GCCs) and their subordinate TSOCs on countering these threats.

COUNTER-THREAT FINANCE

11. Senator HAGAN. Vice Admiral McRaven, in response to the committee's advance policy questions, you indicate you are a strong advocate for counter-threat finance operations. You also indicated that you believe SOCOM might want to explore additional activities in this important area. Can you explain what sort of additional and expanded activities you have in mind?

Admiral MCRAVEN. We need to expand threat finance operations into the Theater Special Operations Commands (TSOCs) and develop our capabilities in the collection and processing of threat finance information. Processing means getting the information into the hands of our interagency partners or DOD elements that can operationalize that information. Since threat finance is still a relatively new and sometimes not well-understood addition to DOD operations, expanding threat finance operations/capabilities at the TSOCs may also include assigning experienced threat finance personnel from SOCOM to the combatant commands as needed or requested. Additionally, we need to expand our interaction with our interagency partners. This will enable a broader level of support to Law Enforcement, Treasury and other partners who assist in disrupting the global illicit financial networks. This cooperative work with law enforcement is a logical extension of the effort of SOCOM and the combatant commands. Interagency threat finance operations, supported by DOD worldwide, is a unique combination of authorities to mitigate, degrade and defeat the financial networks that support organizations threatening the United States.

12. Senator HAGAN. Vice Admiral McRaven, transnational criminal organizations in Central America and Mexico are having a debilitating impact on the ability of our foreign partners to govern their nations and provide opportunities for their people. Do you think expanded counter-threat finance activities in this region would be beneficial?

Admiral MCRAVEN. Yes, provided they are led by our interagency partners, supported by DOD, and focused toward disrupting the illicit financial flows of the organizations versus High Value Individual (HVI) hunting. We need to emphasize disrupting the movement of illicit capital into, out of, and through such countries as Mexico, Guatemala, Belize, Panama, Curacao, and Barbados. In addition, al Qaeda and its allies have expressed an interest in leveraging transnational criminal networks operating through Central America and Mexico into the United States. Disrupting these financial flows can help cripple the transnational criminal organizations, their associated drug trafficking organizations (DTOs), and the financial intermediaries who enable this activity. It can also reduce the possibility that terrorist groups can leverage transnational criminal organizations in Central America and Mexico to conduct attacks in the U.S. Homeland.

NATO SOF HEADQUARTERS

13. Senator HAGAN. Vice Admiral McRaven, during your time as the Commander of the Special Operations component of U.S. European Command, you oversaw the creation of what is now known as the North Atlantic Treaty Organization SOFs Headquarters (NATO SOF HQ). In your response to the committee's advance policy questions, you indicated you are "particularly interested in developing an enduring

relationship” with the NATO SOF HQ. What do you see as the value of the NATO SOF HQ to International Security Assistance Force (ISAF) operations in Afghanistan and to broader multilateral military engagements around the world?

Admiral MCRAVEN. I am indeed very familiar with the NSHQ as I was appointed by the Supreme Allied Commander-Europe as the first Director of the NSHQ’s predecessor organization, the NATO SOF Coordination Center (NSCC) in December 2006 while concurrently serving at the Commander of the Theater Special Operations Command.

The NSHQ value to the ISAF SOF effort has been nothing short of immense. I say that with first hand knowledge of its impact cognizant of where we started, but also from my more recent vantage point of an operational Commander in Afghanistan. In February 2007, just a few months after the establishment of the NSCC, we led the first NATO Senior SOF leader assessments to Afghanistan where we took many of the NATO SOF Commanders to Afghanistan to ascertain a first hand perspective. This event began a series of NSCC related activities in support of ISAF SOF, but most importantly served as a catalyst for invigorating NATO SOF force generation, which is the NATO process of gaining commitment of NATO SOF forces to the ISAF SOF team.

From 2007 to now, the NATO Allied and Partner SOF footprint in Afghanistan has grown 500 percent to some 2,100 personnel, primarily due to the NSCC/NSHQ support to the NATO Force Generation process managed by the Deputy SACEUR. Additionally, the NSCC/NSHQ has been an essential partner to the ISAF SOF Command over the last several years providing a degree of coherence to the effort that did not exist previously, in fact the current ISAF SOF Commander is the former NSHQ Deputy Commander. Other NSCC/NSHQ support to ISAF dating back to 2007 has included the development of a Strategic Concept for ISAF SOF Capabilities, a second ISAF SOF Assessment in December 2008 at the request of SACEUR, the drafting of a Strategic ISAF SOF Vision and supporting plan, an ISAF SOF Air Assessment, advice and assistance to the broader Afghanistan SOF command and control arrangements, and creation of ISAF SOF Medical information briefings and medical directives.

One of the most significant contributions was the creation of the SOF Fusion Cell, comprised of contributions from the ISAF SOF troop contributing nations and the NSHQ. It is focused on garnering information from in excess of forty different multinational sources and fusing that information to support ISAF SOF Special Operations Task Groups. This is really an unheralded success story that has been an unprecedented success for information sharing among Allied SOF that is difficult to appreciate. It has cut new ground for SOF collaboration that we aim to fully exploit for the future. As mentioned, today, more than 2,100 NATO Allied and Partner SOF are training and advising partnered elite Afghan National Security Forces (ANSF) paramilitary units as part of a broader force multiplying/economy of force effort. As mentioned in my testimony, as forces draw down in Afghanistan, one can assume that NATO Allied and Partner SOF will figure prominently in continuing to facilitate the transition to Afghan lead.

In terms of broader global military engagement, the experience of the NATO Special Operations Headquarters (NSHQ) is important to the U.S. and to SOCOM because we have seen U.S. leadership of this effort achieve a generational leap forward in NATO Allied and Partner SOF capabilities. We have been able to achieve this by leveraging the unique framework of the NATO Alliance as a vehicle to achieve greater effectiveness, efficiency, and coherence of special operations. Frankly, this is one of the unrecognized advantages or residual benefits of exploiting an Alliance framework. Beyond Afghanistan, the continued evolution of NATO Allied and Partner SOF into a more agile and dynamic force, and capitalization on best practices, will better enable these forces to augment and compliment U.S. national and theater level efforts against enduring challenges such as terrorism and proliferation of WMD.

The breadth of the NSHQ’s involvement beyond the 26 Allies that maintain SOF are also of interest to SOCOM. These evolutionary effects among NATO Allied and Partner SOF also resonate with and influence international SOF well beyond the NATO Alliance via other NATO cooperative mechanisms such as Partnership for Peace, the Mediterranean Dialogue, the Istanbul Cooperative Initiative, the European Union and NATO collaboration with “contact countries” such as Australia, and New Zealand. The continued maturation and codification of the NSHQ’s Allied and Partner Collaborative Network will allow for comprehensive and sustained engagement among the NATO Allied and Partner SOF “human network,” which is in fact a de facto regional node of SOCOM’s broader Global SOF Network. This SOF human network takes a long view towards fostering deeper and more effective en-

during relationships among SOF, and for this reason, NSHQ is of great interest to SOCOM.

14. Senator HAGAN. Vice Admiral McRaven, if confirmed, how would you seek to build the relationship between SOCOM and the NATO SOF HQ?

Admiral MCRAVEN. The Secretary of Defense's (SECDEF) November 5, 2010, designation of SOCOM as the Lead Component Tasked with Executive Agent Responsibilities for the NSHQ established the framework for the relationship between SOCOM and the NSHQ in accordance with the 2010 National Defense Authorization Act. Specifically, SECDEF charged SOCOM with providing NSHQ with advocacy for resources, personnel, and funding within the Department; establishing the appropriate links with NSHQ to share best practices and lessons learned; creating mechanisms to provide NSHQ with the latest releasable U.S. policy, strategy, operations, tactics, and training for SOF; and serving as interlocutor for NSHQ to the Joint Staff and the Office of the Secretary of Defense. So, the basis or foundation for the relationship already exists, and SOCOM has since established a NSHQ Working Group specifically oriented on the NSHQ.

Additionally, myself and ADM Olson both have been habitually engaged and involved in bi-annual NATO Allied and Partner SOF Commanders' Conferences over the last several years. We have been active members of this growing NATO Allied and Partner Collaborative "human" Network alongside the other national SOF representatives. Indicative of this degree of involvement, in May of this year at the NATO Allied and Partner SOF Symposium in Krakow, Admiral Olson offered to host the next symposium in conjunction with SOCOM's May 2012 International SOF Week in Tampa. As you can imagine, this is a superb opportunity to diversify our broader global SOF outreach efforts alongside the NSHQ's annual event and anticipated strong NATO SOF participation.

From a SOCOM perspective, the NSHQ is viewed as a force multiplier, that leverages the unique venue of NATO to effectively and efficiently enhance the capability, capacity, and interoperability of U.S. and NATO Allied and Partner SOF from a centralized hub of influence within the Alliance. U.S. framework nation activities of the NSHQ support U.S. objectives through the construct of the Alliance to achieve commonality of doctrine, procedures, and equipment among NATO Allied and Partner SOF. This is an unprecedented opportunity for SOCOM to participate, lead, and influence where appropriate this aspect of commonality relative to SOF and multinational interoperability. This commonality creates an enduring framework for collective interoperability shaped and influenced by U.S. leadership of the NSHQ, rather than relying on short-term ad hoc solutions. So I think it is beneficial and in our interests to work closely with the NSHQ in these areas that are part of the mandate set forth by the Secretary of Defense. Ultimately, these efforts better posture NATO Allied and Partner SOF to provide world class complimentary capabilities alongside U.S. SOF or independently in support of U.S. objectives relative to contemporary and emerging challenges. Afghanistan is a prime example and the NATO Allied and Partner SOF contribution is not something we take lightly, it is a significant, sizable, and potent SOF element. So again, from a SOCOM perspective, access, influence and participation in the NSHQ provide a very beneficial venue for a parallel and complimentary line of effort to other U.S. bilateral and multilateral means to build NATO Allied and Partner SOF capacity and capability. As a result, SOCOM will continue to look for opportunities to evolve further, what has been very successful collaboration thus far.

SPECIAL OPERATIONS FORCES AND GENERAL PURPOSE FORCES

15. Senator HAGAN. Vice Admiral McRaven, the 2010 Quadrennial Defense Review called for increased counterinsurgency, counterterrorism, and security force assistance capabilities within the General Purpose Forces. These missions have traditionally been within the purview of SOFs. What actions, if any, do you believe need to be taken in order to allow SOFs and General Purpose Forces to successfully share these missions in the future?

Admiral MCRAVEN. Doctrinally, all forces may have a role in these missions. Today, General Purpose Forces are participating in these mission sets globally, whether in the lead or in support of SOF. However, by approaching mission planning with a mid- to long-term view of the objectives and an holistic view of force capabilities, planners will increase both their force sourcing and force employment teaming options between General Purpose Forces and SOF for successful mission execution.

16. Senator HAGAN. Vice Admiral McRaven, are there certain mission areas that should be reserved for SOFs only?

Admiral MCRAVEN. Counterterrorism and Unconventional Warfare missions should be reserved solely for SOF. In addition, the mission of Counterproliferation of Weapons of Mass Destruction, conducted in a hostile environment, should be reserved for SOF only. However, other SOF core activities, when conducted in politically sensitive areas, should be directed towards SOF as the primary force, supported by General Purpose Forces as required.

QUESTIONS SUBMITTED BY SENATOR JAMES M. INHOFE

SECURITY ASSISTANCE AND ENGAGEMENT PROGRAMS

17. Senator INHOFE. Vice Admiral McRaven, our military-to-military (1206), civilian-to-civilian (1207), small-scale special operations (1208), CERP, and Combatant Commander's Initiative Fund have been incredibly successful in aiding developing nations, fighting terrorism, and providing resources for emergency situations. My belief is that the key to these programs has been the combined efforts of DOD, DOS, the chiefs of mission, and combatant commanders working together to increase the capabilities of our partner nations to provide for their own security, increasing stability in their region and around the globe. What value do these funds provide in your prospective areas of responsibility?

Admiral MCRAVEN. Section 1208 authority, which is specifically for SOF to enable foreign regular and irregular forces directly supporting our combating terrorism operations, has been tremendously useful in Iraq, Afghanistan and other key locations in our efforts to disrupt terrorist networks. The foreign elements that we leverage through section 1208 authority have been crucial in finding and fixing the enemy, resulting in more precise and timely targeting, reduced risk to our forces, and minimal civilian casualties. We have also worked to leverage 1206 authority in areas such as the Philippines to support their counterterrorist activities in Mindanao.

18. Senator INHOFE. Vice Admiral McRaven, do you have any concerns about being able to effectively execute these programs in your prospective areas of responsibility?

Admiral MCRAVEN. SOCOM has and maintains effective processes and procedures to execute these programs as currently established. Each of these programs, however, has specific purposes with limited annual funding that can cause the disaggregation of a holistic plan in order to meet the requirements and purpose of a specific program. 1206, for example, prohibits the training of non-Ministry of Defense forces with the exception of foreign maritime security forces. Many Partner Nations, however, maintain their CT forces outside of their Ministry of Defense. Additionally, there are border security and other paramilitary forces that conduct military tasks relevant to counterterrorism and counter insurgency that SOF or other DOD units would be best suited to train. In order to improve the combined efforts of the DOD, DOS, chiefs of mission and combatant commanders to aid developing countries to fight terrorism, insurgency and trans-criminal organizations; we should appropriately modify these programs that would allow DOD to train and equip all Partner Nation security forces that are conducting traditional U.S. military tasks, roles and missions. This would allow SOF and other DOD assets to improve its effective support to DOS and chiefs of mission initiatives to improve Partner Nations' capabilities to fight terrorism, insurgency and transcriminal organizations in a holistic, proactive manner. Additionally, DOD and the combatant commanders should develop resource informed, multi-year plans that are informed by DOS Mission Strategic Resource Plans that would link initiatives in these programs to more long-term Foreign Military Finance funded programs which would enable measurable phased-in approaches to aid developing countries efforts to fight terrorism, insurgency and transnational criminal organizations. Lastly, improvements to these programs, coupled with mutually supportive interagency plans will be extremely valuable in developing approaches to deal with the aftermath of the "Arab Spring" so that these nations do not fall into the influence of al Qaeda or other like minded extremist organizations.

QUESTIONS SUBMITTED BY SENATOR SAXBY CHAMBLISS

COUNTERTERRORISM RESOURCING/AUTHORITIES

19. Senator CHAMBLISS. Vice Admiral McRaven, although highly desired, perfection with respect to counterterrorism has yet to be obtained. While our capabilities have greatly improved since September 11, some security experts speculate that the military personnel charged with combating terrorism are still not properly trained, robustly staffed, or sufficiently resourced to effectively combat all the emerging threats to our national security. What, if any, resources or authorities do you feel the counterterrorism community lacks in order to adequately combat the host of emerging threats to our national security?

Admiral MCRAVEN. The military component of the counterterrorist community, specifically the joint SOF for which HQ SOCOM has responsibility, will have adequate resources to execute currently approved plans and missions, if the current Program Objective Memorandum input and the related OCO-to-Base requests are accepted during the DOD budget approval process.

The plans in effect currently have adequate authorities, in law and policy, to pursue the nationally assigned strategic and operational counterterrorism (CT) objectives. We have several major CT plans in development, including the third revision of the DOD global CT campaign plan, and its SOF supporting plan, for which modified or additional authorities may become necessary. However, at the current stage of plan development, it is too early to speculate on specific authorities that may need to be modified or added. As these plans are presented to the Secretary of Defense for guidance during the coming year, any potential new requirements should become more readily apparent.

SPECIAL OPERATIONS ACTIVITIES

20. Senator CHAMBLISS. Vice Admiral McRaven, section 167, title 10, U.S.C., defines 10 activities as "special operations" activities insofar as each relates to special operations. While there is a catchall proviso listed as well, [i.e. "such other activities as may be specified by the President or the Secretary of Defense"], given the 2006 realignment of all Reserve Civil Affairs and Psychological Operations/Military Information Support Operations (MISO) forces from SOCOM, where they supported both the general purpose force and SOFs, to the U.S. Army Reserve Command, where they now primarily support the general purpose force, should civil affairs and psychological operations have remained on this list of special operations activities?

Admiral MCRAVEN. Although frequently coordinated for mutual support and synergy of effect, Civil Affairs (CA) and (MISO) previously called Psychological Operations (PsyOp) are distinct activities and should not be regarded as synonymous. As such, the following responses address each activity separately:

The skill set associated with providing strategic influence capabilities, coupled with the intricacies of foreign audiences specifically in today's asymmetric warfare, make military information support operations a natural fit with the irregular and unconventional nature of special operations activities. So, the simple answer to your question is "yes", MISO is a special operations activity and should remain as such. This section does not restrict other DOD components from performing the activities. It is the mission profile and the supported unit that determine whether the particular mission is a conventional or special operation. However, in order for the MISO community to advise on the graduate-level cultural and social nuances required in the current and future operating environment, professional, multi-tiered training and up-to-date technological operating systems are a must. Unfortunately, similar to the dilemma faced by most of our Reserve component, time and other resource constraints force them to focus mainly on tactical missions. Several studies fundamental to this issue are in staffing throughout the Department of Defense. Recommendations from these comprehensive analyses are being validated through a joint and service requirements process, and will provide incremental solutions for this systemic challenge.

CA should be left as is in title 10, section 167 as a special operation activity. Leaving CA as a SOF activity, when conducted by SOF units, increases the scope of activities which SOCOM can pursue as it fulfills its strategic objectives. It allows SOF to expend MFP 11 (SOF) funds to prepare for Humanitarian Assistance and Disaster Relief operations; provides authority for SOF to engage in CA operations consisting of support to civil administration, nation assistance; and complements our direct action capability with more unique missions in the building partnership capacity line of operation designed to reinforce our friends and strengthen their ability to maintain security and stability within their borders.

I do believe, however, that amendments to the U.S. Code may be appropriate to better clarify the role of CA within the Department of Defense. Although it is a key SOF enabler, CA is not a unique SOF capability and is in fact required and used by non-special operations units. CA units are currently used to supplement Provincial Reconstruction teams in theater; historically have been used to provide military governance in an occupied territory with no host nation governance capability in place; and provide an interagency and nongovernmental organization (NGO) link during operations through the establishment of civil military operations centers.

21. Senator CHAMBLISS. Vice Admiral McRaven, given this change of command and control, how do you reconcile the fact that Reserve component CA and Psychological Operations/MISO soldiers continue to perform what is technically defined as a special operations activity without commensurate authorities, training, equipping, or funding when they deploy in support of combat operations in Iraq, Afghanistan, and the Horn of Africa?

Admiral MCRAVEN. Although frequently coordinated for mutual support and synergy of effect, CA and MISO are distinct activities and should not be regarded as synonymous. As such, the following responses address each activity separately:

Other non-Special Operations DOD entities can, and do, perform section 167 functions. For example, humanitarian assistance is performed by many agencies. Reserve component MISO performs a Special Operations activity with a conventional mission profile, but it is still MISO. They have accomplished their mission with great competence, and have unmistakably contributed to the combat successes of their supported units operating under authorities derived from the supported Geographic Combatant Commander.

U.S. Army JFK Special Warfare Center and School is the proponent for all Army MISO and, commensurate with that responsibility, is refining the training progression and materiel solutions to provide a more capable and flexible total MISO force. Since the 2006 realignment, that force exists under two separate chains of command, and Reserve component MISO funding has been outside the purview of SOCOM. We are now reorganizing the Active component MISO forces to better support SOF and General Purpose Forces, when required. The MISO studies currently in the requirements process recommend reviewing how best to organize DOD MISO forces to support the DOD, and I support that concept.

CA is not solely a SOF function. The wording of section 167 states that CA is a Special Operations Activity "insofar as it relates to special operations." CA units are conducting Civil Affairs Operations (CAO) outside of SOF, and the need for them to do so in support of non-SOF units and operations is indisputable. I would note that the U.S. Marine Corps and U.S. Navy both operate a CA capability which is conventional, not SOF unique. The Marine Corps has operated their conventional Civil Affairs Groups (CAG) since 1985.

CA is inherently joint, interagency, and multinational in scope for planning and operations and is critical to both special and conventional operations and forces. CA is not just a capability required by SOF, it is a capability required by all. CA units conduct the same core missions whether assigned to a SOF or conventional unit; however, each employs this capability in different operating environments. SOF units work in austere, often sensitive areas which require special training and preparation while CA units in conventional forces support conventional warfare operations. For example, SOCOM operates a Civil Military Engagement program which uses SOF CA teams to compliment and enable select U.S. Embassy Mission Strategic plans in conjunction with U.S. Country Teams. These teams work in austere, politically sensitive, or strategically critical areas to further the goals outlined in the strategic plans.

There are two ways ahead for the CA capability. Clarification is needed in the law to define CA as not just a Special Operations Activity, but a core activity for non-SOF military forces as well. Second, the man, train, and equip mission for CA should not reside in a SOF organization. The Services should have this mission for their respective CA forces in their force structure. This will require them to provide guidance, combat development, and authorities needed for them to execute their conventional missions for their Service and the Joint Force as codified in current strategy and guidance documents. SOCOM will focus on those CA units assigned to us and ensure they receive additional SOF specific equipment, training, or guidance needed to support SOF.

22. Senator CHAMBLISS. Vice Admiral McRaven, does this apparent statutory discrepancy need to be addressed or clarified?

Admiral MCRAVEN. Although frequently coordinated for mutual support and synergy of effect, CA and MISO are distinct activities and should not be regarded as synonymous. As such, the following responses address each activity separately:

Activities listed in section 167 are each special operations activities insofar as they relate to special operations. Therefore, when conducted by SOF units they are special operations, when conducted by non-SOF units they are not. It simply provides authority for SOF to conduct missions like MISO and expend MPF-11 funds to do so. Amendments to the U.S.C. may be appropriate to better articulate the role and responsibilities when these activities are performed by non-SOF units.

I do not believe that section 167 should be amended to remove CA as a special operations activity. It should remain as it provides authority for SOF to conduct CA missions and spend MPF-11 funds on CA units assigned to SOF.

The current wording of section 167 clearly and unambiguously states that CA “insofar as it relates to special operations” is a Special Operations Activity. Therefore, all other CA activities conducted by non-SOF units are not in the SOF purview since they are conducting conventional operations outside the SOCOM operational chain. Likewise, if the 95th CA Brigade (A) units are performing CA operations and activities in support of a SOF mission, it is clearly a special operations activity since they reside in the operational SOCOM chain.

I do believe that amendments to the U.S.C. may be appropriate to better articulate the role and entities responsible for CA outside of SOCOM. CA is not a unique SOF capability, and is in fact required and used by non-special operations units. CA units are currently used to supplement Provincial Reconstruction Teams in theater; historically have been used to provide military governance in an occupied territory with no host nation governance capability in place; and provide an interagency link during operations through the establishment of civil military operations centers.

QUESTIONS SUBMITTED BY SENATOR ROGER F. WICKER

FACIAL RECOGNITION SYSTEM

23. Senator WICKER. Vice Admiral McRaven, I understand there is a need for collecting and processing real-time intelligence in the field where the presence of bandwidth may be limited or non-existent. Do you believe there is a need for a light-weight, portable, real-time facial recognition system which can recognize and record enemy combatants in a matter of seconds, inconspicuously at a standoff distance without the use of bandwidth?

Admiral MCRAVEN. Yes, this could be a useful capability, but it is not a top priority. Facial recognition is not on our top 10 list of Identity Management Technical Development Priorities. Special Operations Development and Acquisition Science and Technology Division tracks, researches and evaluates emerging technologies for SOF development. Facial recognition technologies are still considered an immature and inaccurate means of obtaining a positive identification. Operational deployment of unconstrained facial recognition technology will introduce significant deviations in subject control, impacting image quality and performance. Therefore, facial recognition at a distance is still considered a “soft biometric”, and will not be relied upon for positive identification in a tactical decision scenario. SOCOM anticipates this technology will be operationally viable within the next 5 to 7 years. Meanwhile, a stand-off capability could add value as a triage tool for identifying potential targets at long distances.

Current Facial Recognition Capability: SOCOM and other DOD organizations submit facial photos of persons of interest to the DOD Automated Biometrics Identification System (ABIS). ABIS includes a facial recognition capability that produces a list of potential matches when queried which then must be manually reviewed by a skilled examiner to determine a match/no match. Since January 29, 2009, SOCOM has received the following facial recognition matches:

- Face Only: 219
- Face, Finger, Iris: 4477
- Face and Iris: 115
- Face and Finger: 1996

There were 78,738 total biometric matches during this timeframe, so face was involved in ~9 percent of total matches.

The SOCOM Sensitive Site Exploitation Capabilities Development Document v.2, dated October 30, 2009, outlines the current requirements for a tactical facial recognition capability.

24. Senator WICKER. Vice Admiral McRaven, if it does not already, should an operational requirement for such a system exist?

Admiral McRAVEN. The SOCOM Sensitive Site Exploitation Capabilities Development Document v.2, dated October 30, 2009 addresses the SOF requirement for Facial Recognition. Paragraph 6 d., Tactical Biometrics Capability 3.

Facial Recognition states: "Provide a ruggedized means to collect digital facial images at the minimum required resolution (currently five megapixels) and store images using the approved format (currently JPEG or JPEG 2000 format.) Objective capability would be a standoff facial recognition/geometry capability utilizing digital photographic capture technology of a person at 300 meters, and have it cross referenced with facial recognition software. It should interoperate with existing SOF software platforms."

[The nomination reference of VADM William H. McRaven, USN, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
April 6, 2011.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment in the U.S. Navy to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be Admiral

VADM William H. McRaven, 0000.

[The biographical sketch of VADM William H. McRaven, USN, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF VADM WILLIAM HARRY McRAVEN, USN

06 Nov. 1955 Born in Pinehurst, NC
08 June 1977 Ensign
08 June 1979 Lieutenant (junior grade)
01 July 1981 Lieutenant
01 Jan. 1987 Lieutenant Commander
01 Sep. 1991 Commander
01 Apr. 1998 Captain
01 Aug. 2004 Rear Admiral (lower half)
23 July 2006 Designated Rear Admiral while serving in billets commensurate with that grade
01 June 2007 Rear Admiral
13 June 2008 Vice Admiral, Service continuous to date

Major duty assignments:

Assignments	From	To
NROTC Unit, University of Texas (DUINS)	May 1977	July 1977
Naval Amphibious Base, Coronado, San Diego, CA (DUINS)	July 1977	Jan. 1978
Underwater Demolition Team Eleven (Assistant Platoon Commander)	Jan. 1978	Jan. 1980
Naval Special Warfare Unit One (Intelligence Officer)	Feb. 1980	Feb. 1982
SEAL Team Six (Team Leader)	Feb. 1982	Mar. 1983
USS <i>Spiegel Grove</i> (LSD 32) (Officer in Charge of Special Warfare Detachment for Unitas XXIV)	Apr. 1983	Oct. 1983
SEAL Team Four (Platoon Commander)	Oct. 1983	Dec. 1984
Swimmer Delivery Vehicle Team Two (Operations Officer)	Dec. 1984	Apr. 1986
Office of the Chief of Naval Operations (Sea/SDV Branch Head) (OP-31)	Apr. 1986	Aug. 1988
Commander, Naval Special Warfare Group One (Special Projects Officer)	Aug. 1988	Dec. 1988
XO, SEAL Team One	Dec. 1988	June 1990
Commander, Naval Special Warfare Command (Assistant Current Operations)	June 1990	May 1991

Assignments	From	To
Naval Postgraduate School, Monterey, CA (DUINS)	June 1991	June 1993
Commander, Naval Special Warfare Command (Training and Readiness Officer)	June 1993	June 1994
CO, SEAL Team Three	June 1994	June 1996
Commander, Naval Special Warfare Group One (Chief of Staff)	June 1996	Oct. 1997
Commander, U.S. Special Operations Command (Division Chief and SOCOM Strike Assessment Director)	Oct. 1997	Sep. 1999
Commander, Naval Special Warfare Group One	Sep. 1999	Oct. 2001
National Security Council, The White House (Director for Strategy and Defense Issues)	Oct. 2001	July 2003
Commander, U.S. Special Operations Command (Deputy Commanding General for Operations, Joint Special Operations Command)	July 2003	June 2006
Commander, Special Operations Command Europe/Director, Special Operations, U.S. European Command	June 2006	June 2008
Commander, Joint Special Operations Command/Commander, Joint Special Operations Command Forward, U.S. Special Operations Command	June 2008	To date

Medals and awards:

Defense Superior Service Medal with Bronze Oak Leaf Cluster
 Legion of Merit with one Gold Star
 Bronze Star with one Gold Star
 Defense Meritorious Service Medal
 Joint Service Commendation Medal
 Navy and Marine Corps Commendation Medal
 Combat Action Ribbon
 Meritorious Unit Commendation with two Bronze Stars
 Navy "E" Ribbon
 National Defense Service Medal with one Bronze Star
 Southwest Asia Service Medal with three Bronze Stars
 Afghanistan Campaign Medal
 Iraq Campaign Medal
 Global War on Terrorism Expeditionary Medal
 Global War on Terrorism Service Medal
 Sea Service Deployment Ribbon
 Navy and Marine Corps Overseas Service Ribbon
 Kuwait Liberation Medal (Kingdom of Saudi Arabia)
 Kuwait Liberation (Kuwait)
 Rifle Marksmanship Medal with Silver "E"
 Pistol Marksmanship Medal with Silver "E"

Special qualifications:

BJ (Journalism) University of Texas, 1977
 MA (National Security Affairs) Naval Postgraduate School, 1993
 Designated Special Warfare Officer, 1978
 Designated Joint Specialty Officer, 2003
 Capstone, 2006-2
 Designated Level IV Joint Qualified Officer, 2009

Personal data:

Wife: Georgeann Brady of Dallas, TX
 Children: William B. McRaven (Son); Born: 13 March 1979
 John E. McRaven (Son); Born: 13 January 1982
 Kelly M. McRaven (Daughter); Born: 3 February 1991

Summary of joint duty assignments:

Assignment	Dates	Rank
Commander, U.S. Special Operations Command (Division Chief and SOCOM Strike Assessment Division).	Oct. 97-Sep. 99	CDR/CAPT
National Security Council, The White House (Director for Strategy and Defense Issues) ...	Oct. 01-July 03	CAPT
Commander, U.S. Special Operations Command (Deputy Commanding General for Operations, Joint Special Operations Command).	July 03-June 06	CAPT/RDML
Commander, Special Operations Command Europe/Director, Special Operations, U.S. European Command.	June 06-June 08	RADM
Commander, Joint Special Operations Command/Commander, Joint Special Operations Command Forward, U.S. Special Operations Command.	June 08-To Date	VADM

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by VADM William H. McRaven, USN, in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES
Room SR-228
Washington, DC 20510-6050
(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM
BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
William H. McRaven.
2. **Position to which nominated:**
Commander, U.S. Special Operations Command.
3. **Date of nomination:**
April 6, 2011.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
November 6, 1955; Pinehurst, NC.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Georgeann Brady McRaven (Maiden name: Brady).
7. **Names and ages of children:**
William Brady McRaven, age 31.
John Emory McRaven, age 28.
Kelly Marie McRaven, age 19.
8. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.
None.
9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.
None.
10. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.
Underwater Demolition Team/Seal Association.

11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

None beyond what's listed in my Service record.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?

Yes.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–E are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

WILLIAM H. McRAVEN.

This 16th day of March, 2011.

[The nomination of VADM William H. McRaven, USA, was reported to the Senate by Chairman Levin on June 29, 2011, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on June 30, 2011.]

[Prepared questions submitted to LtGen John R. Allen, USMC, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DUTIES

Question. What is your understanding of the duties and functions of the Commander, North Atlantic Treaty Organization (NATO) International Security Assistance Force (ISAF)?

Answer. The Commander of ISAF (COMISAF) is the senior NATO uniformed officer in Afghanistan. He is the in-theatre operational commander of all ISAF forces in Afghanistan and is tasked with: (a) employing assigned forces and conducting population-centric counterinsurgency operations; (b) enabling an expanded and effective ANSF capable of fighting their own counterinsurgency; (c) providing support to governance and development efforts to protect the Afghan people and to provide a secure environment for sustainability; and (d) evaluating ISAF security, governance, and development support activities.

ISAF is a NATO-directed operation conducted under United Nations Security Council Resolution (UNSCR) 1386 (2001), which authorizes the establishment of ISAF to assist the Afghan Government in maintaining security in Kabul and surrounding areas and to take all necessary measures to fulfill this mandate.

Following a United Nations (U.N.) and NATO/North Atlantic Council agreement, NATO assumed strategic command of ISAF on 11 August 2003 under the authority of UNSCR 1386 and successor UNSCRs. Subsequently, UNSCR 1510 (2003) geographically expanded the ISAF mandate established in UNSCR 1386 to cover all of Afghanistan.

Question. What is your understanding of the duties and functions of the Commander, U.S. Forces Afghanistan (USFOR–A) and how do those duties and functions relate to those of the Commander, NATO ISAF?

Answer. The Commander of USFOR–A is the senior U.S. officer in Afghanistan with duties distinct from his duties as Commander, ISAF. Commander, USFOR–A exercises National Command Element and National Support Element authorities and responsibilities ensuring that U.S. forces have the guidance, equipment, and funding they need to conduct their missions. He ensures unity of effort among all U.S. forces including those under the ISAF command and those forces not under ISAF command, such as those U.S. forces conducting U.S. detention operations and U.S. counterterrorism operations.

COMISAF employs the forces that troop-contributing nations provide to ISAF. The United States remains the largest troop-contributing nation to ISAF. The Commander, USFOR–A, directs and oversees the U.S. military contributions within ISAF. COMISAF ensures that the operations of all troop-contributing nations, including those of U.S. forces, are coordinated.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. Since the chain of command for the Afghanistan theater runs through Central Command (CENTCOM), as the Deputy Commander of CENTCOM from 2008–2011, I had the opportunity to work very closely on Afghanistan. During that time, I traveled to Afghanistan multiple times as well as other countries in the CENTCOM Area of Operations, including Pakistan. As a result, and if confirmed, I believe I understand Afghanistan and the region and also believe that my personal relationships with senior military and government leaders in the region will contribute to my ability to perform my duties at ISAF.

I also served as the deputy commanding general of the II Marine Expeditionary Force (Forward) when it deployed to Iraq’s Anbar Province from 2007–2008. That experience not only prepared me for battlefield command and the harsh reality of war, but it also taught me a tremendous amount about the nature of this kind of conflict and the complex challenges unique to counterinsurgencies. This was driven home in particular during the “Anbar Awakening,” which occurred during my time in Iraq.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform the duties of the Commander, NATO ISAF, and/or Commander, USFOR–A?

Answer. I believe that a professional military officer should never stop learning. I believe that my experiences have prepared me for this position, but, if confirmed, I will constantly educate myself about the strategic environment so that I can lead a force that is resilient and adaptive to the ever-changing battlefield—key requirements in this kind of conflict.

RELATIONSHIPS

Question. Please describe your understanding of the relationship of the Commander, NATO ISAF/Commander, USFOR–A, to the following:

The Secretary of Defense.

Answer. The Commander, USFOR–A reports to the Commander, CENTCOM who, in turn, reports directly to the Secretary of Defense. This reporting relationship is prescribed in 10 U.S.C. Section 164(d)(1). COMISAF does not have a formal relationship with the Secretary of Defense because COMISAF reports to the NATO chain of command (Commander, Joint Forces Command–Brunssum), who reports to the Supreme Allied Commander Europe (SACEUR).

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Commander, USFOR–A does not have a formal command relationship with the Chairman of the Joint Chiefs of Staff, but he coordinates with him through the Commander, CENTCOM, on a regular basis. The Chairman is the principal military advisor to the President, the Secretary of Defense, and the National Security Council. Although he is the Nation’s senior military officer, the Chairman is not in the chain of command. The Commander, USFOR–A sends his advice and opinions on military operations to the Commander, CENTCOM who, in turn, presents them to the Chairman.

Question. NATO Supreme Allied Commander, Europe.

Answer. NATO Supreme Allied Commander, Europe, is the NATO strategic-level commander of all NATO forces, including those assigned to the NATO mission in Afghanistan. He provides Commander, Joint Forces Command Brunssum (JFC–B), with strategic guidance and direction. JFC–B is NATO’s operational level command that is responsible for the mission in Afghanistan. In turn, Commander, JFC–B, directs COMISAF with respect to SACEUR’s and JFC–B’s campaign objectives and COMISAF’s performance of key military and supporting tasks, as mandated by the North Atlantic Council.

Question. Commander, U.S. Central Command.

Answer. The Commander, USFOR-A works very closely with the Commander, CENTCOM on all aspects of U.S. military operations in Afghanistan.

By law, the Commander, USFOR-A reports directly to the Commander, CENTCOM. The Commander, CENTCOM exercises authoritative direction and control over all U.S. Forces in the CENTCOM area of responsibility, which includes all U.S. Forces in Afghanistan. The Commander, CENTCOM provides authoritative direction over all aspects of military operations, joint training, and logistics. He has delegated National Command Element and National Support Element authority and responsibilities to the Commander, USFOR-A.

Question. Commander, NATO Training Mission—Afghanistan/Commander, Combined Security Transition Command Afghanistan.

Answer. Commander, NTM-A/CSTC-A reports to COMISAF/Commander, USFOR-A. NTMA/CSTC-A is a subordinate HQ to both HQ ISAF and HQ USFOR-A. The CSTC-A element retains its U.S.-only character primarily for funding and administrative authorities, and responds to the U.S. chain of command. The NAC established NTM-A in April 2009, and it was merged into CSTC-A in March 2010 under a dual-hatted commander.

Question. Commander, ISAF Joint Command.

Answer. Commander, ISAF Joint Command (IJC), reports to COMISAF. IJC is ISAF's operational-level command and is subordinate to HQ ISAF. IJC was established in November 2009. The IJC Commander is also dual-hatted as the Deputy Commander, USFOR-A, and retains certain U.S. command authorities.

Question. U.S. Ambassador to Afghanistan.

Answer. The Commander, USFOR-A provides operational assistance and advice, to include U.S. military views and recommendations, to the U.S. Ambassador. He maintains a close working relationship with the Ambassador to ensure that military and civilian efforts are synchronized and mutually supporting. This is particularly important in the Rule of Law arena where the Department of State has the lead for the U.S. Government. The Commander, Combined Joint-Interagency Task Force 435 (who reports directly to the Commander, USFOR-A), provides support to the Ambassador for Rule of Law and Law Enforcement, who reports directly to the U.S. Ambassador.

Question. The Secretary General of NATO.

Answer. The NATO Secretary General chairs the North Atlantic Council, the highest political authority in NATO, responsible for the overall decisions and direction of NATO policy and operations. The North Atlantic Council is comprised of ambassador-level representatives of all NATO members, including the United States. The Council is advised on military matters and the conduct of operations by the Military Committee, which is also composed of senior military representatives from each member state. The Council, under the Secretary General's leadership, provides overall direction and guidance to the military chain of command. In practical terms, the Supreme Allied Commander Europe (SACEUR) leads all NATO military operations and advises NATO's Military Committee. Thus, in the case of the ISAF mission, the Secretary General, following consultations and decisions by the North Atlantic Council, provides guidance and direction to SACEUR through the Military Committee, and the SACEUR communicates those directives and guidance through NATO's military chain of command. COMISAF and the Secretary General confer and consult regularly, including formal updates to the Secretary General and the North Atlantic Council on the progress of military operations in Afghanistan.

Question. NATO Senior Civilian Representative for Afghanistan.

Answer. The NATO Senior Civilian Representative-Afghanistan (SCR) is the civilian counterpart to COMISAF. As the NATO Secretary General's direct representative in Afghanistan, the SCR is charged with carrying forward the political aspects of NATO's engagement in Afghanistan.

Although there is no formal command relationship, the SCR and COMISAF work in close concert and with full transparency following the North Atlantic Council approved Terms of Reference for the SCR and SACEUR and Commander JFC-B's guidance for COMISAF. In short, this cooperative relationship is critical to underwrite NATO's operational military and political engagement in Afghanistan and can help to improve cooperation between ISAF and international civilian agencies in Afghanistan.

Question. United Nations Special Representative in Afghanistan.

Answer. U.N. Special Representative of the Secretary-General (SRSG) for Afghanistan is an important leader in the international community's efforts in Afghanistan. While no command relationship exists between COMISAF and the UN SRSG, the ISAF mission was authorized by U.N. Security Council Resolution to assist the Afghan Government in the establishment of a secure and stable environment. Simi-

larly, the UN SRSG has a mandate to lead the UN Assistance Mission in Afghanistan (UNAMA) in supporting the Afghan Government in its efforts to improve critical areas, including security, governance, economic development, and regional cooperation, as well as to support the full implementation of mutual commitments made on these issues at the London Conference in January 2010 and the subsequent Kabul Conference in July 2010. The SACEUR Operational Plan states that COMISAF is expected to work in close coordination with both the NATO SCR and the U.N. SRSG. These partnerships support efforts to work with the Afghan Government to ensure progress towards the goal of a self-sufficient Afghanistan.

AFGHANISTAN-PAKISTAN STRATEGY AND MAJOR CHALLENGES

Question. In his speech at West Point in December 2009, the President formulated his strategy for Afghanistan and Pakistan.

Do you agree with that strategy?

Answer. Yes.

Question. What are the major challenges and problems you foresee, if confirmed as the next Commander, NATO ISAF/Commander, USFOR-A, in the implementation of that strategy?

Answer. Significant challenges will persist in Afghanistan. Among them, the Taliban will seek to recover lost ground, particularly in the south and southwest. Insurgent organizations such as the Haqqani network will continue to threaten our ability to secure some of the population in the east and will also seek to conduct high-profile attacks in the capital region. Transnational terrorist groups such as al Qaeda will seek to establish new bases and safe havens in both Afghanistan and Pakistan. Corruption and other challenges to good governance will need to be addressed. Finally, although the mission is on track, there will be challenges as we build the Afghan National Security Forces to the point where they can assume full responsibility for Afghanistan's security.

Question. If confirmed, what plans do you have for addressing these challenges and problems?

Answer. We must continue to focus on protecting the population, degrading the insurgency, and developing Afghan Security Forces that can assume more responsibility. Additionally, we have to continue—and, in some cases—expand our efforts on issues ranging from security to good governance and Rule of Law. For example, we have to continue building layered defenses to prevent insurgent infiltration from Pakistan and we also have to continue working with our Afghan partners to address corruption. If confirmed, I will work closely with international, Afghan, and Pakistani partners on all lines of effort of the campaign plan to maintain and accelerate the momentum that our campaign has generated.

Question. On June 22, 2011, the President announced his decision regarding the beginning of reductions of U.S. forces in Afghanistan and the size and pace of reductions through 2012.

Do you agree with the President's decision to begin reducing U.S. forces in July 2011? Why or why not?

Answer. Although I was not a participant in the discussions about the various options, I agree with the President's decision to begin reducing forces. The troops that will be redeployed in July represent the fulfillment of the President's commitment to both resource the strategy he enunciated at West Point but also to demonstrate to Afghan leadership the urgency of increased Afghan National Security Force strength and capability to assume its proper role in securing Afghanistan. In the context of our longer-term goal of transitioning security responsibility to Afghans by the end of 2014, this reduction reflects an inflection point alongside the commencement of transition, scheduled to begin next month.

Question. Do you agree with the President's decision announced on June 22nd regarding the size and pace of reductions in U.S. forces? Why or why not?

Answer. Yes, I agree with the President's decision. Of course, I will constantly monitor and assess the situation on the ground and, should I determine the situation has changed, I will so advise my chain of command through the proper channels.

It is also important to bear in mind that, even once the surge forces are removed, there will still be more than 68,000 U.S. troops and thousands of international forces in Afghanistan—not to mention the addition of some 70,000 Afghan forces, which will join the fight during the next 15 months. At the same time, the international community has demonstrated its intention to support Afghanistan until at least 2014, and the United States and NATO are both discussing some form of long-term partnership relationship with Afghanistan. I believe this reality sends an im-

portant message of commitment to the Afghan people, as well as a sense of urgency that the Afghans must take on more responsibility for securing their own country.

SECURITY SITUATION IN AFGHANISTAN

Question. What is your assessment of the security situation in Afghanistan and the nature, size, and scope of the insurgency?

Answer. Based on my understanding of the situation on the ground, I believe that the momentum that the insurgency enjoyed for a number of years has been halted in most of the country and reversed in many key areas. For example, violence is 5 percent lower so far this year in comparison to last year, and it is down 40 percent in Regional Command Southwest. Obviously, we are facing a very resilient insurgency that has demonstrated continued lethal capacity as well as the ability to regenerate over time. That said, the ongoing maturation of Afghan National Security Forces, combined with the beginning of transition in July, should help to further pressure the enemy by degrading support networks and further reduce support for the enemy among the Afghan population. We and our Afghan partners still face numerous challenges, and there will be more tough fighting in the years ahead as we transition security to Afghan lead by the end of 2014.

Question. In your view, what is the impact of the death of Osama bin Laden on the security situation in Afghanistan?

Answer. We do not yet know what effect, if any, bin Laden's death will have on enemy operations and morale among insurgents in Afghanistan and Pakistan, especially at the operational and tactical level. The reality is that we still face very resilient enemies who will continue to try to establish safe havens from which they can expand their influence and from which they can target the governments, forces, and people of Afghanistan, Pakistan, and the forces and diplomats of all of the Nations contributing to the mission.

TRANSITION OF SECURITY RESPONSIBILITY

Question. In March, President Karzai announced the first tranche of provinces and municipal districts designated for the transition of lead responsibility for security to the Afghanistan security forces. The transition of security responsibility in these areas is to begin in July and be completed by the end of 2011.

Do you support the process established by NATO and the Government of Afghanistan for designating areas for transition of security lead to the Afghan Security Forces, including an initial round of transition to be completed by the end of 2011?

Answer. Yes, I believe that the comprehensive, collaborative process established to identify areas for transition is working as intended. If confirmed, I will look closely at our transition planning and implementation and make any changes I believe will increase the effectiveness of the process. The first tranche is on schedule to begin transition next month, and I support moving forward with the timelines that have been established. As the first tranche begins to transition, there will likely be lessons learned that can be incorporated into future transition planning and implementation.

Question. What is your assessment of the capacity of the Afghan Security Forces to assume the lead for security in the areas designated for this initial round of transition?

Answer. Based on my understanding of the current size and capability of Afghan Security Forces, I believe that Afghans are prepared to assume the lead for security in the areas designated in the first tranche. In some cases, such as Kabul and Panshir, Afghan Security Forces are already in the lead and have been for some time.

BUILDING THE AFGHAN NATIONAL SECURITY FORCES

Question. There are approximately 100,000 more Afghan soldiers and police now than there were in November 2009. The strategy for training and equipping the Afghan National Security Forces (ANSF) calls for growing the Afghan National Army (ANA) to a level of 171,000 and the Afghan National Police (ANP) to a level of 134,000 by October 2011. In addition, a new ANSF target end strength has been set of 352,000 by 2012.

In your view, are the target end strength levels for the ANA and ANP sufficient to provide security and stability in Afghanistan?

Answer. If the Joint Coordination and Monitoring Board approves the 352,000 ANSF target end-strength, then I believe the ANA and ANP should be capable of achieving the goal outlined at the November 2010 Lisbon Summit of Afghans in the lead for security by the end of 2014. However, as the NATO Secretary General has

stated, the training mission in Afghanistan will likely extend beyond our combat mission as part of an enduring partnership with Afghanistan.

Question. What in your view are the greatest challenges to building the capacity of the ANSF to assume responsibility for Afghanistan's security?

Answer. Based on my understanding, there are five main challenges to building ANSF capacity.

Leadership: Leader development is one of our top priorities since good leadership provides the foundation upon which any organization develops and improves. Even though we have significantly expanded leadership training and development efforts, there are still shortfalls, especially since it takes substantially more time to train, educate, and develop leaders. With the growth of the force over the last year, the training mission has been able to focus more efforts on leader development as well as professionalization across the force.

Attrition: Attrition within the ANSF continues to be a challenge. Through ISAF's partnership with the ANSF at the ministerial and unit levels, there has been some success at reducing attrition rates. If confirmed, I will ensure that ISAF continues to work with our Afghan partners to address this problem and to develop new initiatives to reduce ANSF attrition.

Insider Threat: To safeguard against infiltration and co-option by insurgents, the ANSF has developed a multi-layered defense, which starts with an eight-step vetting process for all new recruits joining the police and army. The addition of Afghan counter-intelligence personnel into the formations, as well as additional education and training on identifying threats, is intended to minimize this risk.

Logistics: Logistics and maintenance capabilities are required to ensure ANSF can sustain itself over the long-term, which is particularly important as Afghans assume more responsibility for security. We are working with the Afghan Government to field these enabling forces, but developing these specialized skills is complex and timeconsuming.

Literacy: Literacy is the essential enabler for professionalization of ANSF, although it is a challenge in a nation with a 15 percent literacy rate. Since November 2009, over 100,000 ANSF have completed some level of literacy training, and we have increased these efforts recently, with some 70,000 ANSF in literacy training on any given day. Training is focused on developing the basic ability to read and write so that ANSF can, for example, properly account for material, write reports, and read pay statements.

Question. There remains a shortfall in the number of training personnel required for the NATO Training Mission Afghanistan (NTM-A), in terms of both institutional trainers and embedded training teams, the so-called Operational Mentoring and Liaison Teams (OMLTs) and Police OMLTs (POMLTs).

What is your understanding of the current shortfall in NTM-A institutional trainers and OMLTs and POMLTs?

Answer. There is currently a shortfall of 490 NTM-A institutional trainers, which is a significant improvement over the last few months. Despite additional pledges at the ISAF Force Generation Conference in May, we remain short of OMLTs and POMLTs, particularly in Regional Commands North, West, and Central. The partnering shortfall within the Afghan National Army remains at 10 units (Turkey has offered an additional OMLT for 2nd Brigade HQ, 111th Capital Division, which may alleviate some of these shortfalls). ISAF Joint Command is examining ways to potentially thin partnering relationships with more capable army units to mitigate these shortfalls. With the Afghan National Police, there is a shortfall of 88 units in Key Terrain Districts and Areas of Interest. There is an additional shortfall of 137 POMLTs in low priority locations, and we are looking at ways to reduce this shortfall using non-military assets.

Also of note, these shortfalls reflect 305,600 ANSF end strength; when the Joint Coordination and Monitoring Board meets later this year, it is expected to endorse the growth of the force to 352,000 personnel, which may impact the nature, if not the number, of required OMLTs and POMLTs. Given the importance of the training mission to the overall campaign, filling all of these shortfalls is critical to the long-term success of our operations.

Question. Are there additional steps that you believe could or should be taken to get NATO and other coalition partners to provide more institutional trainers?

Answer. Training shortfalls are a longstanding issue best addressed by continued engagement with our partners by all elements of the U.S. Government—including Congress—as well as by NATO/SHAPE HQ, HQ ISAF, and representatives of the NATO training mission. Contributing nations who have operational commitments should be encouraged to reinvest any combat troop reductions with trainers, especially ones with specialized skills such as police, logisticians, medical and mainte-

nance specialists. Even as we solicit more trainers, we are also developing more Afghan trainers, which allows us to reassign coalition trainers.

Question. Are there additional steps that you believe could or should be taken to encourage NATO and other coalition partners to meet the requirements for additional OMLTs and POMLTs?

Answer. As noted above, continuous engagement by all elements of the U.S. Government as well as NATO and other relevant organizations represents the best chance of generating more OMLT and POMLT pledges.

PARTNERING WITH AFGHAN SECURITY FORCES

Question. A key component of efforts to build the capacity of Afghan Security Forces is partnering ANSF units together with ISAF units in the field. A recent Department of Defense (DOD) report states that field reports suggest that a partnership ratio of greater than three ISAF personnel to one ANSF personnel “reduces the effectiveness of the ANSF’s participation” and that “ANSF are more motivated and, hence, more effective when the partnership ratio [between ISAF and ANSF personnel] is closer to even.”

What is your assessment of the effectiveness of partnering for building the capacity of the Afghan Army and Afghan police?

Answer. The process and practice of partnering is critical to building the capacity Afghan Security Forces so that Afghans can assume the lead for security across the country by the end of 2014. Over the past year and a half, we have made significant strides with our baseline training. At the same time, we have focused substantially on increasing our partnership efforts since this has proven to be the most effective way of increasing Afghan capability, confidence, and professionalism in the field. In fact, we have seen the most rapid improvements in our Afghan counterparts in places where we have higher partnering ratios and where our troops live and fight alongside their Afghan partners. It is also worth noting that partnering increased our own effectiveness since Afghan forces understand the human and cultural terrain in ways that we do not.

Question. Do you believe that the partnering of ISAF and ANSF forces can move to a partnership ratio below 1:1 (fewer than 1 ISAF soldier for every ANSF soldier) as the capability of Afghan Security Forces improves?

Answer. Yes, that is precisely what we intend to do as we transition security responsibility. Over time, we will move from partnered operations, to operations with Afghans in the lead with our forces in support, to operations where we are in a strategic over-watch position. For example, we would help offer advice on planning and enabling, but Afghans would carry out the operation by themselves. Eventually we plan to move to complete Afghan control. Many units are already below a 1:1 partner ratio, and there are increasingly more areas where Afghans are in the lead or operating independently. For example, Afghans have assumed more responsibility as our forces have thinned out in parts of the central Helmand river valley, and Afghan forces comprise the majority of forces around Kandahar City. In Kabul Province, Afghans lead almost all operations.

SPECIAL OPERATIONS FORCES IN AFGHANISTAN

Question. In your view, what is the appropriate role of Special Operations Forces (SOF) in Afghanistan, and the proper relationship between counterterrorism and counterinsurgency operations there?

Answer. SOF in Afghanistan are a vital component of our overall counterinsurgency strategy, and play many critical roles in our overall campaign. Special operations strike forces, supported by intelligence and other enablers, are essential for attacking insurgent networks to capture or kill insurgent leaders. Special forces teams that are part of the Combined Forces Special Operations Command-Afghanistan are essential to the support of Village Stability Operations (VSO) and the mentoring of the Afghan Local Police (ALP), primarily in smaller villages and rural areas. The multinational special forces teams in the ISAF SOF provide essential training and partnering to Afghan specialized Provincial Response Companies to facilitate targeted missions against insurgent, drug trafficking, and other networks. Each of these elements also partners with, trains, and assists the Afghan units with which they are working—a critical component of increasing Afghan capabilities. All SOF coordinate closely with the conventional force battle space owner in the region in which they operate so that special operations missions complement conventional force operations to achieve the overall counterinsurgency effect. Counterterrorism operations are an important component of any comprehensive civil-military counterinsurgency campaign.

Question. As U.S. forces are drawn down in Afghanistan, do you anticipate the requirement for SOF will be reduced, stay the same, or increase?

Answer. Although the exact future requirements for SOF are yet to be determined, they will clearly play a prominent role in the future.

AFGHAN LOCAL POLICE/VILLAGE STABILITY OPERATIONS

Question. General Petraeus and others have emphasized the importance of the VSOs and ALP programs to the strategy in Afghanistan.

What has been the effect of these programs on rural Afghan populations and what has been the response from the Taliban?

Answer. The ALP program and VSO have had a measurable and positive effect on security in Afghanistan. Since the program's inception in August 2010, ALP has grown to over 6,500 patrolmen operating at 41 validated sites. These units provide a measure of security where ISAF forces are scarce or non-existent, and build connections between the village, the province, and the central government. Additionally, the program appears to have jump-started local governance and also mobilized communities, a key condition for local populations to resist Taliban influence. Because this program has been so effective in denying terrain to the Taliban, the enemy has explicitly targeted it (although it appears that ALP members have fought off Taliban attacks in a number of recent incidents). Nonetheless, the ALP program and VSO continue to grow, and Afghans across the country are eager for the program to come to their area.

Question. Do you believe the availability of U.S. Special Operations teams is a limiting factor in expanding these programs to a point where they can have a strategic impact in Afghanistan?

Answer. The number of ALP and VSO sites that we can establish in Afghanistan is limited by the availability of Operational Detachment Alpha (ODA) teams, but we have developed an innovative solution that allows us to continue to expand the programs without additional teams. We have begun integrating conventional forces with our special forces, which, after a period of specialized training, are able to thicken the ODAs and free up more special forces personnel for new ALP/VSO missions. We expect that this will allow us to continue to increase the ALP program, even as the number of ODAs in Afghanistan remains fairly constant.

Question. How do indirect approaches like VSO and ALP Programs complement direct action counterterrorism missions within the U.S. strategy in Afghanistan?

Answer. The ALP and VSO programs are part of the comprehensive civil-military counterinsurgency strategy and, as such, they complement other efforts—both kinetic and non-kinetic—to protect the population, to degrade the insurgency, and to build sustainable, effective governance in Afghanistan. By giving local villagers a stake in their own security, the ALP program builds cooperation and support for the district, provincial and central government, which, in turn, makes the environment inhospitable to the Taliban and other insurgent groups. The local security and improved governance that the ALP and VSO programs bring also increase local Afghans' confidence, which sets the conditions for development and grassroots community organizing, grievance resolution, and communal problem-solving. All of these activities complement the other elements of the comprehensive counterinsurgency strategy, which includes direct-action counterterrorism missions.

SPECIAL OPERATIONS ENABLING CAPABILITIES

Question. The Commander of U.S. Special Operations Command has described the "non-availability" of force enablers as the "most vexing issue in the operational environment" for SOF. In many instances, SOF rely on general purpose forces to provide the enabling capabilities they need to be successful in their missions, including rotary wing airlift, medical evacuation, intelligence, surveillance, and reconnaissance capabilities.

What do you believe are the greatest shortages in enabling capabilities facing our forces in Afghanistan?

Answer. Given the decentralized manner in which SOF are dispersed in austere, remote areas—especially those forces conducting VSO and training ALP—the greatest enabling shortage is air asset support, both rotary and fixed wing. Although substantial progress has been made with increasing the number of air assets in theater over the last 2 years, meeting the requirement for these assets will be critical as the number of VSO and ALP sites increase, since this will mean that more small units are fielded in rural areas. Related, these teams also have an increased requirement for Intelligence, Surveillance and Reconnaissance platforms equipped with signals intelligence and full-motion video capabilities. The intelligence analysts, and associated systems, are also necessary to properly exploit the data col-

lected. Additionally, units in rural areas often need dedicated Route Clearance Packages to support ground movement, to conduct ground combat operations, and to maintain freedom of movement.

Question. If confirmed, how would you ensure the requirements for enabling capabilities of SOF in Afghanistan are met as general purpose forces are drawn down?

Answer. Based on lessons from the drawdown in Iraq, I expect requirements for special operations enablers to increase as the conventional force footprint is reduced in Afghanistan. Requirements will continue to evolve as we adapt to the new force posture, but my top priority will be to ensure full connectivity to our teams, especially when it comes to maintaining the “Golden Hour” for medical evacuation. Additionally, I will ensure that we have sufficient air assets, including Intelligence, Surveillance, and Reconnaissance and close-air support platforms as well as Route Clearance Packages.

INTERAGENCY COLLABORATION

Question. The collaboration between U.S. SOF, general purpose forces, and other U.S. Government departments and agencies has played a significant role in the success of counterinsurgency and counterterrorism operations in recent years. However, much of this collaboration has been ad hoc in nature.

What do you believe are the most important lessons learned from the collaborative interagency efforts in Afghanistan?

Answer. One of the most important lessons learned over the past few years is the necessity of a whole-of-government approach to be successful in campaigns such as that in Afghanistan. After all, the complexity of these missions requires experts from many fields and backgrounds to conduct an effective comprehensive civil-military campaign. Keeping all the actors on the same page, and communicating closely at all levels, has perhaps been a central factor in achieving a unified approach to our campaign plan. In particular, the close collaboration between the State and Defense Departments—from action officers to senior leaders—supports a unity of effort that has enabled progress in Afghanistan.

Question. How do you believe these efforts can be improved?

Answer. Although there has been substantial progress improving interagency and international coordination and collaboration, there is still room to improve in areas such as our collective understanding of roles and responsibilities and the manner in which they fit into the overall campaign plan. Essential to this is to maintain an open line of communication and frequent coordinated action between and among all the various actors—including the U.S. Embassy, NATO’s Senior Civilian Representative, the United Nations, and nongovernmental organizations—to increase efficiencies, reduce redundancies, eliminate waste, and seek areas where cooperation could lead to results greater than the sum of the whole.

INTELLIGENCE SUPPORT FOR INDIRECT ACTIVITIES

Question. Some observers contend that the national intelligence agencies focus their assistance to the Defense Department in Afghanistan on special operators engaged in direct action operations. As a consequence, it is alleged, general purpose forces and SOF engaged in indirect activities, including foreign internal defense and population protection, receive less intelligence support.

Do you believe this is true?

Answer. I believe this is a misperception since the national intelligence agencies are integrated into command processes throughout USFOR-A and ISAF. For example, Cryptologic Support Teams from the National Security Agency are spread across the theater down to the brigade level. Several hundred all-source analysts and specialty units from the Defense Intelligence Agency are located at every Regional Command (even the non-U.S. commands) and in conventional units executing VSO. There are also over 100 geospatial analysts and specialists from the National Geospatial Agency support units throughout Afghanistan. In every case, these professionals bring expertise and reach-back capabilities for all types of forces and have been an integral part of enabling the intelligence fusion that has contributed to our success.

With regard to the belief that some Special Operation Forces (SOF) are less supported than direct action SOF, this perception may arise from the operational reality of SOF elements that are supporting foreign internal defense, VSO, and the ALP. While most SOF forces engaged in direct action operate from fixed bases—with extensive communications, robust staff, and assigned national agency analysts—SOF elements engaged in indirect activities are normally deployed in small teams to remote locations. These teams do not have large staffs and the support they do

receive from headquarters elements is less direct, and, therefore, less obvious to many observers.

Question. If so, and if confirmed, how would you ensure SOF engaged in indirect activities receive adequate intelligence support?

Answer. If confirmed, I will seek to maintain the strong relationship between COMISAF and intelligence organizations' leadership to ensure intelligence products are available to all of our forces and are concentrated to support the main effort. I will also continue to partner with National Intelligence Agencies to ensure our requirements are focused and clearly understood. Finally, I will continue requesting the Intelligence Community's assistance in producing "tear-line" products to allow near-real-time and broad dissemination to all members and units of ISAF, as well as our Afghan partners.

CONTRACT OVERSIGHT AND PRIVATE SECURITY CONTRACTORS

Question. The United States has implemented a number of efforts to reduce the risk that U.S. contracting practices will be subject to corruption, which helps fuel the insurgency and undermines the legitimacy of the Afghan Government. These efforts include the establishment of the Combined Joint Interagency Task Force-Shafafiyat (Transparency) to coordinate ISAF anti-corruption activities.

What is your assessment of ISAF's anti-corruption efforts and understanding of criminal patronage networks, and what additional steps, if any, do you believe should be taken to improve those efforts and to ensure adequate oversight of ISAF and U.S. contracts is in place?

Answer. ISAF and its partners in the Afghan Government and key embassies have together developed a common understanding of the problem of corruption and its effect on the ISAF mission and the viability of the Afghan state. The most dangerous forms of corruption involve criminal patronage networks, which divert development and security force assistance, subvert state institutions, obstruct justice, and engage in and protect illicit activities that strengthen the insurgency and undermine the effectiveness and legitimacy of the government.

The establishment of Combined Joint Interagency Task Force Shafafiyat (Transparency) has led to a better understanding of these problems as well as important initiatives to address them. As a result of Shafafiyat's work, ISAF developed and implemented Counterinsurgency Contracting Guidance, which has helped ISAF and the international community be better buyers, and buy from legitimate suppliers. As a result of improved vendor-vetting efforts and integration of procurement and contracting into intelligence and operations at all levels, 75 U.S., international, and Afghan individuals or companies have been debarred from receiving contracts, 24 individuals and companies have been suspended, and 27 debarment actions are pending. Additionally, ISAF has supported the training of specialized Afghan anti-corruption units to develop sustainable Afghan capacity to address corruption.

Given the complexity of this problem, more work can be done. In particular, based on what I know, there is still a need to develop comprehensive U.S. and coalition vendor-vetting and contract oversight procedures. ISAF is currently consolidating over two dozen contracting databases; USFOR-A and the CENTCOM Contracting Command are coordinating to implement a new, more rigorous vendor-vetting process; and ISAF has submitted a proposal to the Office of the Secretary of Defense for the establishment of the Acquisition Accountability Office-Afghanistan, which would provide oversight for all U.S. contracts in the country. If confirmed, I will examine these efforts to determine if they are on track and if anything else needs to be done.

Question. President Karzai has issued a decree calling for the disbandment of most private security contractors (PSCs). Following that decree, the international community negotiated a temporary arrangement to allow for the continued use of PSCs for 1 year while the capacity of a Ministry of Interior guard force, called the Afghan Public Protection Force (APPF), is developed.

What is your assessment of the potential for the APPF to replace or supplement PSCs in providing security?

Answer. The APPF currently provides approximately 6,000 guards for various clients throughout Afghanistan, with plans to expand significantly to replace PSCs. I support the Afghan Government's decision to eliminate PSCs and, if confirmed, intend to support the further development of the APPF. The most significant challenge is the short timeframe in which the APPF needs to increase in size and capability so that it can accomplish its mission. Efforts are underway to this end, including newly expanded APPF headquarters and the construction of a training center for guards. In short, the potential exists for the APPF to replace PSCs on time, although it will require significant work over the next year. Currently, joint ISAF-Af-

ghan assessments of the APPF—which is part of the bridging strategy—are scheduled for September 2011, December 2011, and March 2012.

Question. If confirmed, what steps, if any, would you recommend to improve the development and oversight of the APPF?

Answer. If confirmed, I will look closely at APPF to determine what steps might be necessary to improve development and oversight. Based on what I know, I believe that we should focus on two parallel lines of effort. First, we should support the development of command, control, and management functions within the existing APPF, which is similar to developing any police or military headquarters to perform a specific security missions. Second, we should support the development of a state-owned enterprise, which will support the APPF as it strives to provide security services in a manner similar to those of commercial security companies.

REINTEGRATION AND RECONCILIATION

Question. The Afghanistan Peace and Reconciliation Program (APRP) has been established to enable former insurgent fighters to renounce violence and reintegrate peacefully into their communities. As of mid-June more than 1,700 former fighters had enrolled in the APRP, and the Afghan Government reported that it was in negotiations with more than 40 additional groups representing up to 2,000 more fighters. The APRP has been criticized, however, as involving only a small fraction of the Taliban insurgents.

What is your assessment of the Afghanistan Peace and Reintegration Program and the program's potential for reintegrating further numbers of low- to mid-level insurgent fighters?

Answer. The Afghan Peace and Reintegration Program (APRP) is an essential component of our comprehensive, civil-military counterinsurgency campaign, one that convinces insurgents to join the peace process, accept the Afghan constitution, renounce violence, and rejoin Afghan society. It is a viable alternative to continued fighting or detention. Since the APRP began in August 2010, over 1,850 former insurgents have officially reintegrated—double the number from a few months ago—and at least another 2,000 are in some stage in the reintegration process. All 34 provinces now have Provincial Peace Committees, and a number of provinces have fully-functioning Provincial Reintegration Accounts, which give the Provincial Peace Committee resources to disburse in support of reintegration at the local level.

The greatest factor affecting reintegration, however, is not the number of functioning committees or the presence of reintegration accounts (though those are essential for the program's successful operation). Rather, it is the insurgency's declining resources, low morale, and poor leadership—all of which convince insurgents to abandon the fight and rejoin Afghan society. We are seeing some signs that these factors are encouraging informal reintegration (where insurgents do not enter the reintegration process, but simply return to their homes). As we continue to pressure insurgents on all fronts, we anticipate that we will see increased numbers of formal reintegrees as well. But where we can, we will encourage informal reintegrees to join the peace process by joining formal reintegration.

Question. It has been reported that coalition officials and Taliban representatives have engaged in preliminary talks on reconciliation.

Do you support the beginning of reconciliation talks with the Taliban at this time?

Answer. Historically, ending an insurgency requires some sort of political settlement. At the same time, I recognize that any solution to the fighting in Afghanistan must be led by the Afghan Government if it is to be effective and enduring. For that reason, I fully support Afghan-led reconciliation efforts and support the overall concept as it has been articulated by the Secretary of State.

AMMONIUM NITRATE FOR IMPROVISED EXPLOSIVE DEVICES FROM PAKISTAN

Question. Ammonium nitrate (AN), a prime component in improvised explosive devices (IEDs) that have killed or wounded thousands of U.S., coalition, and Afghan troops and Afghan civilians, continues to flow into Afghanistan. The vast majority of this AN flows in from fertilizer factories in Pakistan. In 2010, in an effort to stem the flow of this material, the Afghan Government banned the use of AN as a fertilizer. Despite this effort and vigilance by Afghan National Security Forces (ANSF), IED incidents and casualties have continued. The amounts of AN reportedly ferried into Afghanistan from Pakistan are staggering.

In light of your recent position at CENTCOM, what is your understanding of the situation regarding the flow of AN into Afghanistan?

Answer. We assess that a large amount of the AN used in IEDs in Afghanistan originates in Pakistan, where it is manufactured as a fertilizer called calcium ammonium nitrate (CAN). There are no regulatory controls to adequately control the

sale and distribution of CAN in Pakistan, which, combined with the porous border between Afghanistan and Pakistan, allows insurgents to procure and move large amounts of CAN into Afghanistan. Although Afghan and ISAF forces have made considerable progress in interdicting shipments of CAN in Afghanistan and along the border since President Karzai banned it in early 2010, it will take a concerted, international effort with the Pakistani government and Pakistani industry in order to better regulate, track, and interdict CAN. The Pakistanis took a significant step forward recently with their release of national counter-IED strategy and the issue is being addressed with the Pakistani government on multiple levels within the U.S. Government.

Question. If confirmed as Commander, NATO ISAF/Commander, USFOR-A, what tools would you have at your disposal to address the flow of AN into Afghanistan and are there any additional tools that you would seek to have?

Answer. There are a variety of current tools at our disposal, and, if confirmed, I would closely examine what other resources, technologies, and initiatives could be brought to bear to reduce the flow of AN into Afghanistan. Currently, there are several border initiatives to address AN, and AN interdiction has increased significantly over the last year, aided by forces on the border and increased intelligence, surveillance, and reconnaissance assets. However, due to the porous nature of the border, there also need to be efforts to address the flow of AN at its source: the factories in Pakistan that produce AN. This would require diplomatic resources—including continuing to work closely with the U.S. Embassy in Islamabad—to facilitate an agreement between the Governments of Pakistan, Afghanistan, and perhaps the United States to either transition to a fertilizer that cannot be used for IEDs or, possibly, to dye the AN to identify which factories are producing AN used in IEDs. If confirmed, I would engage senior Pakistani military officials on this issue and would also work closely with interagency and international partners to reduce the flow of AN and other IED components.

AFGHAN OPIUM TRADE

Question. According to the United Nations Office of Drugs and Crime 2010 Annual Report—released in June 2010, drugs from Afghanistan have an annual market value of \$65 billion, cater to 15 million drug users, cause 100,000 deaths each year, are contributing to the spread of HIV at an unprecedented rate, and are a source of funds for criminal groups, insurgents and terrorists. Moreover, since 2006, much more opium has been produced in Afghanistan than is consumed worldwide, and the resulting stockpile is now large enough to meet 2 years' worth of world heroin demand.

As it relates to the drug trade in Afghanistan, what is your understanding of the role of the Commander of ISAF and Commander of USFOR-A respectively?

Answer. The Commander of ISAF operates under NATO mandate, which precludes forces under ISAF command from conducting operations specifically directed against narcotics organizations. However, NATO forces can conduct nexus operations, which are operations against narco-groups with direct linkages to the insurgency.

The Commander of USFOR-A operates under direction of U.S. policy. Selected U.S. units and organizations that are under the command of USFOR-A, such as Combined Joint Task Force-Nexus, can conduct operations that target the drug trade specifically.

Question. What is your understanding of the rules of engagement for U.S. forces as it relates to drug labs and the drug network respectively?

Answer. ISAF's mandate prevents the Alliance from participating in operations that are exclusively focused on counter-narcotics, although NATO forces can conduct nexus operations against narco-groups with direct linkages to the insurgency. U.S. forces under the ISAF command structure can participate in counternarcotics operations only when there is a connection between narcotics and the insurgency. Of course, it should also be noted that our forces always retain the right to defend themselves when they are facing an imminent threat.

Question. What is your understanding of the nexus—if any—between the drug trade and the various insurgent groups in Afghanistan?

Answer. The illegal narcotics industry is intrinsically linked to the insurgency, corrupt actors, and criminal patronage networks. There is no clear line separating any of these groups since their operations and support networks overlap and are intertwined at a fundamental level.

Question. How significant a source of funding is the drug trade for insurgent groups in Afghanistan?

Answer. While estimates vary, a significant percentage of the illegal drug trade funds the insurgency, and we assess that the illegal drug trade is the largest internal source of funding for the Afghan Taliban.

Question. What is your understanding of the role of the Drug Enforcement Agency and comparable NATO law enforcement efforts in Afghanistan?

Answer. The Drug Enforcement Agency, the Department of Homeland Security, Customs and Borders Patrol, the Bureau of International Narcotics and Law Enforcement Affairs, the U.S. Marshalls, the Serious Organized Crime Agency (UK), and other organizations all work closely with the Afghan Government and the international community to improve and reform the Afghan criminal justice system and to strengthen Afghan law-enforcement capacity. All of these groups bring unique skill sets required to address challenges posed by the drug trade and to help the Afghan Government develop long-term solutions.

Question. As Commander of ISAF and Commander of USFOR-A, respectively, what would be your relationship to these law enforcement activities?

Answer. To ensure unity of effort, ISAF/USFOR-A will continue to synchronize its efforts with civilian law enforcement partners in the areas of capacity-building, public awareness, disrupting illicit precursor chemicals, and combating nexus organizations. As with other efforts, the key to this is close communication and coordination so that we are all working toward the same goal and focused on our campaign plan.

COUNTERNARCOTICS POLICE OF AFGHANISTAN

Question. In each of the past 3 fiscal years, DOD has expended approximately \$450 million building the capacity of the Counternarcotics Police of Afghanistan (CNPA).

What is your current assessment of the CNPA?

Answer. The CNPA have dramatically improved over time. In Helmand Province, which accounts for approximately 40 percent of the world's illicit opium production, the CNPA have provided expertise to help investigate narcotics trafficking in support of the Provincial Governor's counternarcotics campaign (contributing to a 94 percent conviction rate in 2010). In May 2011 alone, the CNPA helped seize 12,000 kg of narcotics around the country.

Despite this progress, more work remains to be done. For example, the CNPA lacks sufficient manpower to effectively enforce counter-narcotics laws across the entire nation. It also needs to improve institutional capabilities such as strategic planning, budget formation, and logistics to reduce its reliance on other agencies, such as the Ministries of Interior and Defense.

Question. As the Commander, NATO ISAF/Commander, USFOR-A, what would be your relationship to the CNPA?

Answer. Currently, NTM-A/CSTC-A has a mentoring relationship with the CNPA to support its development. As Commander ISAF/USFOR-A, if confirmed, I would oversee this mentoring relationship.

Question. Are you satisfied with the arrangement?

Answer. Yes.

COUNTER-THREAT FINANCE ACTIVITIES IN AFGHANISTAN

Question. In 2008, the United States created the Afghanistan Threat Finance Cell (ATFC) to disrupt the flow of funding from the Afghan opium trade and other illicit sources to the Taliban, al Qaeda, and other terrorist and insurgent groups in Afghanistan. The ATFC and related organizations have helped Afghan authorities investigate and prosecute individuals connected to the opium trade, identify outside sympathizers who have been supplying funding to those individuals, and police a variety of corrupt schemes that have filled the coffers of the Taliban-led insurgency and other illicit actors. The ATFC has also helped U.S. forces identify and target individuals associated with IED networks operating in Afghanistan.

What is your assessment of the operations of the ATFC?

Answer. The ATFC is a unique interagency, civilian-military organization that provides a variety of products, services, and support for military units and civilian agencies. These include target packages that support Joint Prioritization Effects List (JPTEL) nominations for military commands; Drug Kingpin and Terrorist Designations; district-by-district assessments of insurgent finances used by military planners to identify targets; threat finance risk assessments for U.S. development projects and contracting; and training and mentoring of specialized Afghan investigative organizations. The ATFC provides support to a large number of United States agencies, coalition partners, and the Afghan Government. Given the imperative to staunch the illicit financial activities that fuel the insurgency, as well as the

criminal patronage networks that undermine the government, the work of the ATFC plays a vital role supporting many elements of our overall strategy.

Question. Some have argued that tracking and targeting the financial sources of insurgent networks is a waste of scarce intelligence resources.

What is your view of counter-threat finance activities, particularly as it relates to Afghanistan?

Answer. Given the nexus of the insurgency, illegal narcotics networks, and criminal organizations, counter-threat finance activities are vital to our overall effort to degrade the insurgency while simultaneously supporting the development of an effective Afghan Government. As noted above, counter-threat finance activities involve more than just the tracking of financial sources, and, in fact, lead to intelligence and knowledge that is directly actionable. Additionally, these activities inform military planners as they are developing operational plans and allocating resources. Overall, counter-threat finance activities contribute significantly to multiple elements of the broader campaign.

GENERAL PURPOSE FORCES USED FOR SECURITY FORCE ASSISTANCE

Question. Building the security forces of foreign nations has traditionally been a SOF mission. However, in both Iraq and Afghanistan, general purpose forces have been performing this mission for some time.

What is your understanding and assessment of the preparation and performance of Army and Marine Corps general purpose forces operating in Afghanistan in a security force assistance role?

Answer. The Armed Forces of the United States have now been involved in counterinsurgency missions for nearly a decade, during which time they have had extensive experience with security force assistance. We have learned numerous lessons during this time, incorporated them into our training and education systems, and used past experience to prepare soldiers, marines, and others for the complex nature of these conflicts, to include security force assistance. Having seen our forces in action, my assessment is that they have performed very well in this role and have, in fact, surpassed all expectations.

Question. How do you envision the use of general purpose forces in the security force assistance role, if at all, as U.S. forces begin to drawdown between 2011 and 2014?

Answer. General purpose forces will continue to be used in a security force assistance role, helping to develop the ANSF as Afghans increasingly take the lead for security throughout Afghanistan.

SUPPORT THE MISSION WITH OPERATIONAL ENERGY

Question. On June 7, 2011, General Petraeus signed and issued a memorandum for U.S. Forces-Afghanistan providing command guidance on supporting the mission with operational energy. In the memorandum General Petraeus stated his expectation that commanders will take ownership of unit fuel demand and announced the standing up of an office to improve operational energy capabilities by changing how Coalition forces use energy. The memorandum also called on commanders to make energy-informed, risk-based decisions on aviation and vehicle operations, base camp design, power and water generation and distribution. General Petraeus also called for energy considerations to be included in requirements and oversight of contracts.

Do you concur with General Petraeus' command guidance and his efforts to date?

Answer. Yes, since our forces are more dependent on energy than ever before, this guidance recognizes the importance of managing that risk by reducing our energy consumption. Moreover, reducing our environmental footprint is also important in our efforts to be good, environmentally-conscious guests of the Afghan people.

Question. If confirmed, to what extent will you continue to support the mission of U.S. Forces-Afghanistan with operational energy or issue similar command guidance?

Answer. If confirmed, I will continue to emphasize this issue and will issue similar guidance.

WOMEN IN COMBAT

Question. What restrictions, if any, do you believe should be imposed with respect to the assignment of combat-related duties to women in uniform, or the assignment of women to combat units?

Answer. If confirmed, I will adhere to the current policies in place regarding combat-related duties for women in uniform. That said, I understand that, at the direction of Congress, the Department is in the process of reviewing current policies. If they change, I will ensure that all forces under my command follow the new rules

and guidelines and I will work with all the relevant parties to make sure potential changes are instituted with as little disruption as possible. Obviously, women in uniform make tremendous contributions every day on the battlefield, and, due to the nature of the conflict in Afghanistan, many women have been engaged in combat and have performed courageously. Some have been wounded, and indeed, some have been killed. I honor their sacrifice.

HEALTH OF THE FORCE

Question. The committee is concerned about the stress on military personnel resulting from lengthy and repeated deployments and their access to mental health care in theater to deal with this increased stress. Increased suicide rates are clear reminders that servicemembers, particularly those who have been deployed multiple times, are under tremendous stress and need access to mental health care.

What is your assessment of the adequacy of health care and mental health capabilities supporting servicemembers in Afghanistan?

Answer. With over 9,000 health-care personnel in Afghanistan, representing most medical specialties, I believe that our forces have access to excellent health-care facilities and professionals. This is particularly true with our emergency health-care capabilities. Rates of U.S. forces killed in action and those dying from wounds have declined since 2009, despite an increase in number of personnel at risk. More troops are surviving devastating wounds as a result of increased medical aviation platforms, more field hospitals, and efforts like our “flying intensive care unit,” in which wounded forces are transported to Landstuhl, Germany, often within hours of injury.

Based on what I know, I likewise assess our mental-health capabilities as robust. There has been a significant increase in the number of behavioral health-care personnel in theater in the last 2 years, as well as in the number of restoration and reconditioning centers for those with behavioral and mental-health problems. A new mental health telemedicine network has also been established, allowing direct communication with mental health-teams by troops based even in remote regions. Currently, there are 34 active telemedicine portals in operation, with an additional 42 planned. Also of note, the first theater-wide behavioral health and neurology care conference took place this month, which allowed mental-health experts to discuss best practices and lessons learned. Additionally, all efforts in theater have been bolstered by the Defense Department’s focus on this area, and significant improvements in pre- and post-deployment assessments and support. If confirmed, I will continue to ensure that our forces have access to the mental health care that they need.

Question. What is your assessment of suicide prevention programs and resources available to support these programs in Afghanistan?

Answer. Suicide is obviously a huge concern for all commanders, and the military has made significant strides to address worrisome trends. In late 2009, The Suicide Prevention Task Force reviewed more than 300 programs, culminating in a report of best practices that have been incorporated throughout the force. In addition to multiple direct care programs, the Army is managing 13 suicide prevention research projects.

The military suicide prevention program currently spans the pre-deployment, deployment, and post-deployment phases, with each Service having tailored programs for their members. All members are exposed to specific prevention and resiliency training, much of this through the Religious Support Teams in theater and through programs such as “Ask, Care, Escort” and “Applied Suicide Intervention Skills Training.” More than 32,000 additional servicemembers have received the suicide awareness training so far this year, and over 900 have been trained to act as “gatekeepers.”

Overall, I assess that we are actively addressing this problem with adequate resources. If confirmed, I will continue to make this a priority within the command.

Question. What is your assessment of the implementation of DOD policy on management of mild traumatic brain injury throughout Afghanistan?

Answer. This is obviously another area of concern since these types of injuries have been so prevalent in these conflicts. Under current guidance, medics and forward physicians in theater use straightforward flow charts on laminated cards to determine who needs to rest and who needs to be referred to higher levels of care. This process appears to be working, with neurologists at the centers for higher levels of care indicating that the patients they see have been appropriately dealt with according to the clinical guidelines. As a result, these forward centers have achieved a 95–99 percent return-to-duty rate without the need for advanced intervention. The 1–5 percent that do not recover using these guidelines are referred to the two major

concussion/traumatic brain injury specialty care centers, where specialists are able to diagnose and treat more advanced injuries. Overall, I assess that Defense Department policy is being followed in Afghanistan, with good effect.

Question. What is your assessment of medical evacuation capabilities in theater today?

Answer. I assess that medical evacuation capabilities in theater today are excellent, with the overall system performance continuing to improve. In 2009, the average time for urgent missions was 62 minutes; in 2010 it was 47 minutes; and, so far this year, it is 42 minutes. There are currently sufficient aircraft and crews in theater to continue to outperform the 60 minute "golden hour" standard through 2011.

Question. If confirmed, what standard would you establish for capability and availability of medical evacuation assets, including for forward operating units?

Answer. It is absolutely essential that we sustain the same high standard of medical evacuation performance and reliability to ensure that our forces have the support they need, especially in the critical summer fighting season. We have sufficient medical evacuation assets in theater to allow 24/7 coverage of the main battle space and the ability to forward position medical evacuation assets for deliberate operations outside the normal coverage rings. If confirmed, I will maintain these standards and continue to look for ways to improve this vital mission.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. The Department has in recent years developed comprehensive policies and procedures to improve the prevention of and response to incidents of sexual assaults, including providing appropriate resources and care for victims of sexual assault. However, incidents of sexual misconduct involving military personnel in Afghanistan are still being reported. Victims and their advocates claim that they are victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate treatment for the victim. They assert that their command fails to respond appropriately with basic medical services and with an adequate investigation of their charges followed by a failure to hold assailants accountable.

Do you consider the current sexual assault policies and procedures, particularly those on restricted reporting, to be effective?

Answer. Yes, I believe that the current sexual assault policies and procedures are effective. DOD believes its first priority is for victims to be protected, treated with dignity and respect, and to receive the medical treatment, care, and counseling that they deserve.

A restricted reporting option is available for victims who wish to confidentially disclose incidents so that they can receive medical treatment and counseling without triggering the official investigative process. Servicemembers who are sexually assaulted and desire restricted reporting under this policy must report the assault to a Sexual Assault Response Coordinator (SARC), a Victim Advocate, a health-care provider, or a chaplain. Health-care providers will initiate the appropriate care and treatment, and report the sexual assault to the SARC in lieu of reporting the assault to law enforcement or the command. The goal of the restricted-reporting option is to encourage victims to come forward and receive help.

Question. What problems, if any, are you aware of in the manner in which restricted reporting procedure has been put into operation?

Answer. Although I do not know the exact details, I understand that there was an issue when victims were flown via medical evacuation to other medical facilities where their identity and situation were unintentionally made known. This issue has been corrected, with the reason for a medical evacuation now listed as "internal wounds" versus "sexual assault trauma". This change protects and ensures the sexual-assault case remains restrictive.

Question. What is your view of the steps taken to prevent and respond to sexual assaults in Afghanistan, including assaults against contractor personnel?

Answer. There are robust policies and procedures in place to prevent and to respond to sexual assaults. Our medical personnel, military police, and SARC support all personnel, including contractors.

Question. What is your view of the adequacy of the training and resources in place in Afghanistan to investigate and respond to allegations of sexual assault?

Answer. We currently have adequate training, resources, and investigators to respond to sexual assaults. One area of concern, however, is that some medical providers are not trained and/or certified before arriving in theater to conduct sexual-assault forensic examinations. This weakness was identified during a recent sexual assault assessment, and, as a result, medical providers will be required to receive adequate training and/or certification prior to deployment.

Question. What is your view of the willingness and ability of military leaders to hold assailants accountable for their acts?

Answer. I expect everyone under my command to hold assailants accountable, and, if confirmed, I will explicitly tell subordinates at all levels that sexual assault prevention is a command issue and I expect and require their personal commander's attention.

Question. If confirmed, what actions will you take to ensure senior level direction and oversight of efforts to prevent and respond to sexual assaults in Afghanistan?

Answer. Sexual assault prevention is a command issue, and if confirmed, I will tell my senior leaders that this is a priority for me and that I expect them to respond to incidents in a timely manner with appropriate medical services, to conduct thorough investigations, and to hold assailants accountable. My program managers will be tasked to provide the proper education and training on sexual assault prevention and reporting procedures to all personnel.

STANDARDS FOR TREATMENT OF DETAINEES

Question. Section 1403 of the National Defense Authorization Act for Fiscal Year 2006 provides that no individual in the custody or under the physical control of the U.S. Government, regardless of nationality or physical location shall be subject to cruel, inhuman, or degrading treatment or punishment.

If confirmed, will you take steps to ensure that all relevant DOD directives, regulations, policies, practices, and procedures applicable to U.S. forces in Afghanistan fully comply with the requirements of section 1403 and with Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the DOD Detainee Program, dated September 5, 2006?

Answer. Yes.

Question. How would you ensure a climate that not only discourages the abuse of detainees, but that encourages the reporting of abuse?

Answer. Leadership starts at the top, and, if confirmed, I will personally ensure that the troops under my command understand my expectations and the clear standards under which we operate. I will provide clear guidance at every level of command, proper training, and ensure prompt and effective action is taken if there is a situation where we fail to meet our own high standards. Additionally, if confirmed, I will ensure that we continue to undertake thorough inspections of all detention facilities and related programs throughout Afghanistan and also that we continue to cooperate with the International Committee of the Red Cross. Our country must always live our values, and nowhere is that more true than how we treat detainees.

DETENTION OPERATIONS IN AFGHANISTAN

Question. In the past several years, significant changes have been made in the way detention operations have been conducted in a counterinsurgency environment. In Afghanistan, Combined Joint Interagency Task Force 435 is responsible for overseeing detention operations, with the goal of responsibly transitioning detention operations to the Government of Afghanistan.

In your view, what are the main lessons learned over the last several years regarding the conduct of detention operations within a counterinsurgency environment?

Answer. Detention operations are an integral part of any counterinsurgency campaign, and our experiences over the past few years have taught us many valuable lessons. Perhaps chief among them is that detention operations have to be conducted in the most humane manner possible, since our treatment of detainees directly reflects our values as a nation and, as a result, can have strategic effects. We have also learned that we have to conduct counterinsurgency "inside the wire", since detained individuals have the potential not only to be sources of intelligence, but also to be part of the solution if they can be effectively reintegrated into society. At the Detention Facility in Parwan, for example, we have initiated various programs to teach detainees job skills that range from agriculture to tailoring. Additionally, we have established a robust Detainee Review Board process and are conducting "release shuras" in which communities come together to support individuals we believe can safely be released. Another lesson learned in recent years is that all of our detention operations have to be conducted with the understanding that they

will eventually be transitioned to the host nation; capacity-building must always be a primary focus.

Question. What is your assessment of the progress of efforts to build the capacity of the Government of Afghanistan to assume responsibility for detention operations?

Answer. The U.S. Detention Facility in Parwan—our flagship detention facility in Afghanistan—began transitioning detention operations in January with Afghans assuming responsibility at some of the Detention Housing Units. The Afghan Government clearly intends to assume more responsibility for detention operations over time, and we will continue to support efforts to build additional Afghan capacity to take on this mission. There are two areas in particular that still need additional work as the transition continues. First, we have to continue our efforts to support the Afghan Government as it establishes a more capable judicial system, which will require recruiting and training more judges and prosecutors, among other officials. (These efforts will be bolstered by the NATO Rule of Law Field Support Mission-Afghanistan, which was approved by the North Atlantic Council and endorsed by ISAF Defense Ministers this month; this organization will be established as a dual-hat command with the U.S. Rule of Law Field Force-Afghanistan.) Additionally, the Afghan Government needs to establish a legal framework for effectively dealing with insurgents. If confirmed, I will work closely with the interagency Rule of Law task force to closely examine our efforts to build the necessary Afghan capacity so that Afghans can assume more responsibility for detention operations.

AFGHANISTAN-PAKISTAN COOPERATION

Question. What is your assessment of the current level of cooperation between Afghan and Pakistani forces in confronting the threat of militant extremists in the border region?

Answer. While the relationship between Afghan and Pakistani forces along the border has had its ups and downs, the level of cooperation in the border region has improved significantly over the last 2 years, especially at the operational level. For example, four Border Coordination Centers have been established; these centers are manned by Afghan, Pakistani, and ISAF liaisons and facilitate the timely exchange of information as well as operational coordination. Additionally, there have been several coordinated “hammer and anvil” operations along the border in Regional Command-East (RC(E)) between Afghanistan’s Kunar Province and Pakistan’s Mohmand Agency—in which forces on both sides of the border work together to ensure that insurgents do not use the border areas as an escape route.

Despite this operational progress, there is significant room for improvement. There are still periodic incidents of “friendly fire”, and insurgent cross-border movement has increased in recent months (due in part to the warmer weather). Despite these recent incidents—and increased tensions in the wake of the bin Laden raid—Afghan, Pakistani, and ISAF forces along the border have continued to use the Border Coordination Centers to exchange information.

Question. If confirmed, what recommendations, if any, would you have for improving security cooperation between Afghanistan and Pakistan?

Answer. If confirmed, I would seek to increase opportunities for military-to-military and civilian-to-civilian dialogue on security matters. I believe this dialogue is critical so that we can best coordinate our activities with each other and pursue new initiatives. I would also build at the operational and tactical level on the collaboration in RC(E) by expanding existing Border Coordination Center cooperation and by looking to expand coordinated cross-border operations, including along the border in Regional Command-South.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the ISAF Commander/Commander, USFOR-A?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR CLAIRE McCASKILL

CONTRACTING REFORM

1. Senator McCASKILL. Lieutenant General Allen, in 2010, General Petraeus issued a memorandum for commanders on counterinsurgency contracting guidance, in which he instructed commanders, among other things, to know where our money is going in contracting. General Petraeus said: “where our money goes is as important as the service provided or the product delivered.” Unfortunately, in the past few years, it has become painfully obvious that in many instances, we do not even know how much we are spending on contracting, which makes it very difficult to know where it is going.

I can pick up the phone and get 10 different statements from 10 different people about how much we are spending on contracting in Afghanistan. The Special Inspector General for Afghanistan Reconstruction (SIGAR) recently removed a report on Department of Defense (DOD) contract spending from its website, citing inaccuracies in one of the Central Contracting Command’s reporting. The Government Accountability Office (GAO) just notified Congress that it was not yet able to comply with its congressionally mandated review of the Synchronized Predeployment and Operational Tracker (SPOT) database, which is supposed to provide a single repository to track contractors in Iraq and Afghanistan, because DOD, the Department of State (DOS), and the U.S. Agency for International Development (USAID) did not provide the information on time. GAO also reported that the agencies had declined to agree with GAO’s prior recommendations to address problems with the accuracy of SPOT reporting.

Do you plan to make contracting oversight a priority under your command and, if so, how?

General ALLEN. I am committed to making contracting oversight a priority. We are working closely with Office of the Secretary of Defense and U.S. Central Command (CENTCOM) to address contracting accountability and to institute a mechanism to better capture in-theater contracting information. This mechanism will enable us to have visibility of what we are spending and what we are about to spend; to ensure we are spending money with the right people and in the right areas to achieve the desired counterinsurgency results; and to ensure we serve as good stewards of the money the American people provide us. Additionally, in April 2011, CENTCOM-Joint Theater Support Contracting Command provided a contracting general officer to support our counterinsurgency contracting objectives and demonstrate our commitment to effective oversight as the Senior Contracting Official-Afghanistan. While his headquarters, staff, and 12 regional contracting centers only execute 20 percent of the spending in Afghanistan, they play a critical coordination role with all theater contracting agencies. Contracting oversight will be a priority during the period of my command.

2. Senator McCASKILL. Lieutenant General Allen, how will you work with the Joint Theater Support Contracting Command (under the CENTCOM Contracting Command) to manage contracting going on within your theater?

General ALLEN. We will work with the Senior Contracting Official-Afghanistan of the CENTCOM-Joint Theater Support Contracting Command to manage contracting within the theater through a three prong approach.

First, we will continue to participate in established venues for the coordination of logistics and contracting initiatives throughout Afghanistan-including the Interagency Combined Joint Logistics Procurement Support Board, Counterinsurgency Contracting Executive Steering Committee, and Regional Commander’s Interagency Counterinsurgency Management Boards.

Second, we will ensure the strategic and holistic development of requirements and allocation of resources.

Finally, we will remain engaged to improve our processes through regular feedback from Task Force 2010, Task Force Spotlight, commissions, audit agencies and inspectors general to include the Commission on Wartime Contracting, the U.S. Army Audit Agency, and the Special Inspectors General for Afghanistan Reconstruction.

Towards these ends, the Senior Contracting Official-Afghanistan created Integration Cells within the U.S. Forces Afghanistan and Regional Commands to assist with contracting issues. The goals of the Integration Cells are to provide acquisition advice and education to the Commanders and staffs, to create cradle-to-grave requirements insight, to improve requirements definition, and speed procurement processes.

3. Senator MCCASKILL. Lieutenant General Allen, how will you address the issue of contractors conducting oversight under your watch? I know there has been some improvement of late, but I remain concerned about that issue.

General ALLEN. While contractors can serve a valuable function as a force multiplier for Contracting Officers Representatives and Administrative Contracting Officers, contract oversight will continue to be addressed primarily through Contracting Officer Representatives. Commanders in the field have to continue to emphasize the criticality of Contracting Officer Representative duties to ensure we hold contractors accountable to their contracts. Those Contracting Officer Representatives are our eyes and ears on-site for every contract to provide feedback to Contracting Officers across the theater to ensure satisfactory performance of those efforts.

4. Senator MCCASKILL. Lieutenant General Allen, how will the reduction in surge troops called for by the President affect the cadre of U.S. Government personnel (whether military or civilian) that we have worked hard to build up to conduct oversight? GAO still says there aren't enough folks to do the job as it is.

General ALLEN. The reduction may certainly reduce the number of personnel available to provide contract oversight. However, on 21 March 2011 the Office of the Under Secretary of Defense issued a Class Deviation for the designation of Contracting Officer Representatives. This deviation clarifies that a Contracting Officer Representative must be an employee, military or civilian, of the U.S. Government, a foreign government, or North Atlantic Treaty Organization (NATO)/Coalition partners; this will increase the pool of available Contracting Officers Representatives, especially at remote sites without a significant U.S. military presence.

This limitation requires that those personnel available for contract oversight more efficiently and effectively achieve our contract administration requirements. To enable this, I will leverage contractors within the boundaries of what is appropriate and legal given their status. In this way they can serve as a force multiplier for Contracting Officers Representatives and Administrative Contracting Officers. In addition, we will continue to take advantage of the Defense Contract Management Agency and their disciplined and robust processes for contract administration to administer complex and sensitive contracts in Afghanistan.

COMMANDERS' EMERGENCY RESPONSE PROGRAM

5. Senator MCCASKILL. Lieutenant General Allen, concerning the Commanders' Emergency Response Program (CERP), I have made clear in the past to General Petraeus I really appreciate the core, fundamental concept of providing small-scale humanitarian relief and reconstruction projects to help win the local people and to provide force protection. I think you should have that flexibility as commander. However, I have also been concerned that we give too much money to CERP (and to its affiliate funds such as the Afghan Infrastructure Fund) to be effective. I also have never been confident in the accounting mechanism for CERP, even though I realize some improvements have been made under General Petraeus' watch. Can you tell me how you would, as commander, improve and maximize the way CERP is used?

General ALLEN. When I take command, I will certainly review our CERP, to include prior audits and assessments. Additionally, we will continue to ask for outside agency audits to review our compliance and to evaluate our progress. I will take action on those audits as appropriate and required.

6. Senator MCCASKILL. Lieutenant General Allen, what changes, if any, do you think need to be made to the way CERP is handled and overseen?

General ALLEN. CERP has been a very successful tool for commanders on the ground. They depend heavily on this program to influence their battle space, support Afghan local populations, and most importantly work with local governments to improve capacity to deliver essential services and address urgent needs. These successes have improved the lives of Afghans and substantially contribute to the effectiveness of our counterinsurgency (COIN) operations. However, there is always room for improvement.

Proposed changes include a greater emphasis on small-scale projects (less than \$500,000) and those that can be completed within 1 year of obligation. Additionally, U.S. Forces-Afghanistan (USFOR-A) CERP guidance has been updated to require greater scrutiny of projects and additional steps to verify sustainability of projects. We are also going a step further and looking at our internal procedures. Finally, we are continuing to coordinate our efforts with development experts such as USAID and nongovernmental organizations working in the Combined Joint Operations Area-Afghanistan.

These steps will provide increased oversight and significantly decrease the risk of project failures. We will remain vigilant in monitoring our ability to successfully execute CERP and continuously seek improvements to refine our procedures.

7. Senator MCCASKILL. Lieutenant General Allen, what do you have to say about the effectiveness of CERP and how do you plan to document it, and its effect on the COIN strategy, as commander?

General ALLEN. CERP has proven to be an effective tool that our commanders employ to execute our COIN strategy. It is used in conjunction with our COIN Contracting Guidance, which emphasizes hiring Afghans first, buying Afghan products, and building Afghan capacity. This is an integral part of our strategy to increase the Afghans' trust in their government and deter insurgent influences, which often prey upon young men that need jobs to support their families. CERP is also part of the greater reconstruction effort. We synchronize local efforts with national programs implemented by DOS/USAID and the Afghanistan Government's National Priorities Program.

Based on observations from our Special Operations Forces and Civil Affairs specialists and their interactions with the population, the execution of post-project atmospheres show that the completion of a project consistently has a positive effect on improving relationships and our ability to interact with and influence both the general population and key leaders within a community. In addition, projects are often designed to achieve other stabilizing effects like stimulating economic activity and supporting local government. Project effects are feeding into more comprehensive assessments such as the Combined Forces Special Operations Component Command-Afghanistan (CFSOCC-A) Village Stability Methodology and International Security Assistance Force (ISAF) Joint Command (JJC) Provincial Stability Reports. These assessments address the three pillars of stability: development, security, and governance. These assessments and our experience collectively indicate that CERP has successfully supported stability operations and our overall COIN strategy.

QUESTION SUBMITTED BY SENATOR MARK BEGICH

LITERACY IN AFGHANISTAN

8. Senator BEGICH. Lieutenant General Allen, in your answers to the advance policy questions from the committee you identified literacy as one of the greatest challenges to building the capacity of the Afghan National Security Forces (ANSF) to assume responsibility for security. I agree literacy is essential for a professional, capable and enduring security force. Literate Afghan people are also key to economic growth, proficient governance, and independence from corruption. What, if any, additional action do you believe the United States and coalition partners can take to increase literacy in Afghanistan, specifically within ANSF?

General ALLEN. The ANSF Literacy Program's mission is to bring everyone in the ANSF to a third grade literacy level by the end of 2014. To date, over 94,247 have received literacy training and successfully tested at either the first, second, or third grade level.

To ensure long-term sustainability of the literacy program, there are three distinct opportunities for countries to contribute to literacy efforts in Afghanistan.

First, countries can donate funds to the NATO Training Mission-Afghanistan (NTM-A) established "Addendum to the Trust Fund in Support of the Afghan National Army for the ANSF-Literacy and English Language Training, and Professional Military Education Programme." This fund exists to institutionalize the long-

term commitment to literacy through the ANSFs. Donating to this fund will give the literacy program an opportunity to expand and provide literacy training to the ANSFs operational force beyond just the third grade level, and well beyond 2014. To date, the largest contributing nation to this fund has been the United Arab Emirates with a \$10 million donation.

Second, the United Nations Educational, Scientific, and Cultural Organization has partnered with NTM-A and the Government of Japan to establish a comprehensive program that combines literacy with professional police education.

Third, using the United Nations' highly regarded Education for All philosophy, countries can partner with the Afghan Ministry of Education to develop and certify a National Education Strategic Plan. Many features of this plan are already in place and literacy in schools is expected to increase steadily in the coming years.

QUESTION SUBMITTED BY SENATOR JEANNE SHAHEEN

U.S.-AFGHAN TECHNOLOGY

9. Senator SHAHEEN. Lieutenant General Allen, as we draw down our forces in Afghanistan, the Afghan Government will need to be able provide for its own security on an ever-increasing basis. The Afghan Minister of Defense and the Chief of the Afghan Army believe technologies currently employed by the U.S. Marines Corps will help them provide security to their own forces and population. The Person-Born Improvised Explosive Device (PB-IED), or suicide bomber, is one of the more difficult threats to detect, but is particularly dangerous at checkpoints. The Afghan military leaders have thus requested NTM-A approval to receive the technology used by the marines to detect and thus counter PB-IED from a safe distance. Could you please provide me with an update on the status of the Afghan request, or plans to provide the counter-PB-IED technology (commercial name: CounterBomber) capability to the Afghan forces?

General ALLEN. In January 2011, NTM-A received a request from the Afghan Minister of Defense to review counter PB-IED technologies, followed by a March 2011 request of the Chief of the General Staff of the Afghan Army. NTM-A is working with the Afghan Ministry of Defense to evaluate counter Person-Borne Improvised Explosive Device capabilities from the perspective of capability, cost, sustainability, feasibility, and the ability to integrate into a larger, more comprehensive Afghan counter-improvised explosive device (IED) strategy. They are also evaluating the financial capacity of the Afghanistan government to sustain this technology after the transition of Coalition support and assistance. A current estimate for the Counter Bomber technology is approximately \$175 million, which provides for 200 systems with 3½ years of operations and support.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

CONTRACTING IN CENTRAL COMMAND

10. Senator MCCAIN. Lieutenant General Allen, various initiatives undertaken by CENTCOM commander last year, in particular, Task Force 2010 and Task Force Spotlight, have shed light on how some contractors (and subcontractors) to DOD have in some cases hired insurgents and other malign actors who were actively opposing U.S. forces in Afghanistan. Needless to say, if left unaddressed, this could significantly undermine the United States' conduct of counterinsurgency operations in theater. Since those initiatives begun, in your view, how successfully, or unsuccessfully, have the CENTCOM commander and DOD been in discovering and discontinuing the inadvertent funding of such relationships with contract funds?

General ALLEN. I believe we are taking the appropriate steps to bring attention to the corruption problem and be good stewards on the management of contract funds; however, we still have much to do in this area.

Over this past year, in partnership with DOD and CENTCOM, we greatly increased our understanding of the corruption problem and how inadvertent funding affects our counterinsurgency efforts in theater. Combined Joint Interagency Task Force Shafafiyat (Dari word meaning "transparency") has helped us map out the criminal patronage networks that exist in Afghanistan and to address corruption as a strategic problem. Task Force Spotlight has aided in tracking and enforcing our procedures regarding private security companies. Task Force 2010 has assisted us in helping us better understand with whom we are doing business, and provided commanders and contracting activities with the information needed for them to take action.

One of the principal tools available to us has been the infusion of intelligence into the assessment of potential vendors. Though not at the pace we desire, we are working closely with CENTCOM to expand the capability in Tampa to vet potential companies prior to doing business with them. To date, the ISAF Joint Command/CENTCOM Contracting Command vendor vetting cell has reviewed 483 companies and rejected 34 from contract award consideration. Task Force 2010, working with the Procurement Fraud Branch of the U.S. Army Legal Services Agency, follows up by referring those rejected companies for suspension and proposed debarment under the Federal Acquisition Regulation. Within the last year, we have seen an increase in the follow-on actions to debar companies and individuals who are deemed non-responsible and should not do business with the U.S. Government in Afghanistan. Our most recent results show 78 companies or individuals debarred; 67 companies or individuals suspended pending debarment; and 64 more companies or individuals submitted for consideration for suspension or debarment. In comparison with last year, we were tracking 23 companies or individuals debarred and 19 companies or individuals suspended pending debarment.

11. Senator MCCAIN. Lieutenant General Allen, in the National Defense Authorization Bill for Fiscal Year 2012, which this committee recently reported out, section 861 would enable contracting authorities at DOD to void a contract, or restrict the award of future contracts, to anyone who is determined by the CENTCOM commander to be actively opposing U.S. forces in Afghanistan. It also allows DOD to terminate—without liability to the taxpayer—any contract with anyone who fails to exercise due diligence to ensure that no contract funds are being used by persons to actively oppose U.S. forces there. Another provision in the same bill, section 862, would authorize DOD to examine any records of a contractor (or subcontractor) in the CENTCOM theater to ensure that contract funds are not subject to corruption or extortion or not provided to anyone actively opposing U.S. forces in Afghanistan. The need for such authorities was originally requested by General Petraeus. In your view, would these authorities be sufficient to provide the Commander of ISAF and U.S. Forces Afghanistan with the flexibility needed to ensure that the United States is not inadvertently contracting with the enemy in Afghanistan?

General ALLEN. I appreciate the support of this committee in providing us the tools needed to combat contract fraud and corruption. Though the provisions in the National Defense Authorization Act for Fiscal Year 2012 will not stop corrupt practices, it does address a critical gap within the Federal Acquisition Regulations. It provides us the authority to rescind or void a contract with someone identified as supporting or working for the enemy, and it provides us the transparency needed to look at all contracts in a contingency environment, especially regarding companies below the prime contractor level. Both of these authorities arm our leaders with the tools needed to gain visibility on the flow of contract funds, and if connections to the enemy are detected, the ability to take immediate steps to deny them further access to our money.

12. Senator MCCAIN. Lieutenant General Allen, what additional authorities may be needed, if any?

General ALLEN. Currently no additional authorities are required. We recognize that Federal and DOD acquisition regulations, policies, and procedures do not adequately differentiate between peacetime and operational contracting practices. To address potential gaps and future authorities that may be needed to bridge the peacetime and the contingency environment, Task Force 2010 established a working group to review existing regulations, policies, and procedures with the goal to recommend areas where changes or select authorities can enhance our acquisition strategy and contract management in-theater. This forum includes all contracting and oversight agencies conducting business in Afghanistan.

QUESTIONS SUBMITTED BY SENATOR JAMES M. INHOFE

OVERALL STRATEGY IN AFGHANISTAN

13. Senator INHOFE. Lieutenant General Allen, what level of risk are we accepting by following the President's withdrawal timeline?

General ALLEN. As commander, one of my very first duties would be to assess any necessary adjustments in concept and approach that may be required. In terms of risk, the surge recovery does not, in my opinion, render our objectives in Afghanistan unattainable. This is primarily because the surge, while still ongoing and important for continued momentum, has created success in several key parts of the

country. It has curtailed the momentum of the insurgency, and the ANSFs continue to grow and develop in their warfighting capacity. Even once the security surge forces have been removed, there will still be some 68,000 U.S. troops and thousands of international forces in Afghanistan, not to mention some 70,000 more Afghan forces that will join the fight in the next 15 months. At the same time, the U.S. and NATO are both discussing long term strategic partnerships with Afghanistan. That said, I will continue to assess and evaluate the surge recovery and keep the chain of command informed.

14. Senator INHOFE. Lieutenant General Allen, in which areas are we accepting more risk?

General ALLEN. Any endeavor as complex as that which we are trying to achieve in Afghanistan requires balancing a variety of risks. As commander, it will be my job to assess the variety of challenges we face as we transition from ISAF lead to Afghan lead—not only in security, but in other areas as well.

I believe that the campaign has the development of the ANSFs, ultimately to be in the lead of security by 2014 with U.S. forces in a strategic overwatch, as an objective that is attainable. It is my opinion that the ANSFs, backed up by continued U.S. support and the provision of key enablers, will be up to the task. We will seek to constantly evaluate risk, and mitigate it whenever possible. The mission for all of us, including coalition partners is far from over, and success will increasingly depend on the degree to which Afghans can sustain this most important fight. If in my assessments and judgment risk becomes untenable I will so advise my chain of command.

15. Senator INHOFE. Lieutenant General Allen, which conditions have been met that justify the withdrawal of forces from Afghanistan at this point?

General ALLEN. As General Petraeus has noted, Afghan and ISAF forces have halted the insurgency's momentum in much of the country and have reversed it in key areas. Based on my work as the Deputy Commander of U.S. Central Command, numerous visits to the theater over the past 3 years, and extensive discussions with senior military and civilian leaders, I share that assessment. Meanwhile, we are continuing to exert unprecedented pressure on the insurgency with a variety of efforts, including the Afghan Local Police initiative that is mobilizing communities to defend themselves, Afghan-led efforts to reintegrate former fighters, and a variety of governance and development initiatives focused on establishing the conditions necessary to achieve long-term security. Much of this progress has been enabled by and increasingly led by the ANSFs, which are conducting their own surge.

Even once the surge forces have been removed, there will still be some 68,000 U.S. troops and thousands of international forces in Afghanistan, not to mention some 70,000 additional Afghan forces that will join the fight in the next 15 months. At the same time, the U.S. and NATO are both discussing long-term strategic partnerships with Afghanistan. This reality sends an important message of commitment to the Afghan people, as well as a sense of urgency that Afghans must take more responsibility for their security.

16. Senator INHOFE. Lieutenant General Allen, what conditions would cause you to ask President Obama to delay the withdrawal of troops?

General ALLEN. As the commander in Afghanistan, one of my solemn duties would be to provide my best military advice to the President. I am going to monitor the operational environment and the conditions constantly, not just as they relate to the drawdown of the forces with respect to the surge, but throughout the entire period of time I command during this campaign. It is my responsibility to the chain of command and to our Commander in Chief to ensure that should I be concerned with the progress of the campaign, I would advise the chain of command with my forthright advice. If I feel that the drawdown of surge forces compromises our ability to achieve our national objectives in Afghanistan, I will not hesitate to recommend an adjustment to the current plan.

17. Senator INHOFE. Lieutenant General Allen, what role do you expect your military judgment to play in decisions about troop levels in Afghanistan?

General ALLEN. As commander in Afghanistan, one of my solemn duties would be to render my best military advice to the President of the United States, to include advice concerning the force levels necessary to accomplish my assigned mission. I expect that the President will be willing to receive that advice, to consider it, and to weigh it amongst the full range of issues and concerns presented to him. I am fully aware that the decisions the President makes must always be informed by a

wide range of considerations, of which the assessment from Afghanistan is one important component.

18. Senator INHOFE. Lieutenant General Allen, what conditions must be met in 2014 to transition to Afghan control?

General ALLEN. There are three aspects to the stages of transition, the first of which is security. To complete security transition to Afghan control, the ANSFs should be responsible for population security and law enforcement, be accountable, and serve the Afghan people. ISAF has a defined role to be postured to provide the strategic overwatch and the assistance needed to achieve sustainable security. Second, Afghan governance and development must be sufficiently inclusive, accountable, and acceptable to the Afghan people. Lastly, the population should have access to basic social services and adequate rule of law in order to establish the foundation for sustainable economic growth. ISAF will enable these second two goals by supporting U.S. efforts across the whole of government, as well as international efforts to assist the Afghan people.

19. Senator INHOFE. Lieutenant General Allen, do you believe this is a realistic date?

General ALLEN. I believe that the mission before us is hard, but doable. ISAF is going to take advantage of the opportunity between now and the end of the year to assess where we are with the progress of the campaign.

The primary governing factors that will determine successful completion by 2014 are ANSFs readiness, the Afghan Government's legitimacy, the civil-military campaign progress, and the resulting decisions made by the enemy and other key regional players. The greatest influence ISAFs have over all these objectives is the ANSFs development, rate of fielding forces, and the quality of its emerging leadership from the ministry-level down to the noncommissioned officer. Quality ANSFs will promote the Afghan Government's legitimacy, reinforce governance with improving law enforcement capacity, and have a positive effect on the campaign.

20. Senator INHOFE. Lieutenant General Allen, what impact would a failure in Afghanistan have on U.S. national security in the long term?

General ALLEN. The effects of a potential failure to achieve our core objective in Afghanistan, to ensure that Afghanistan is never again a sanctuary for al Qaeda, could be significant. Were al Qaeda able to re-establish sanctuaries because Afghan forces and governmental authorities proved incapable of securing and governing the country, there could be obvious negative implications for U.S. national security interests. Al Qaeda could operate once again from Afghan soil and there could very well be substantial civil strife in Afghanistan as well.

The coalition in Afghanistan consists of 49 Troop Contributing Nations, the largest coalition since WWII and operating under a United Nations Security Council Resolution with significant international legitimacy. Additionally, this is NATO's first operation outside of Europe, and NATO performance in this area may well signal the future effectiveness and cohesion of the alliance in other out-of-area operations.

COUNTERINSURGENCY VS. COUNTERTERRORISM

21. Senator INHOFE. Lieutenant General Allen, one ongoing debate is how to deal with insurgencies. Some believe the best way to defeat an insurgency is to win over the population through COIN strategy. Others believe in a counterterrorism strategy that directly targets the insurgents and their networks. Some proponents of the withdrawal have said that we can accomplish our goals in Afghanistan with special operators alone. However, one of our lessons learned in Iraq is the importance of large amounts of conventional forces for counterinsurgency operations. You have worked closely with General Petraeus on his efforts in Iraq and are now discussing operations in Afghanistan. What is the best strategy to achieve our primary goal of preventing Afghanistan from being used as a base for terrorists and extremists to attack the United States and our allies?

General ALLEN. Insurgencies are exceptionally complex and each presents unique and differing challenges. The comprehensive civil-military counterinsurgency strategy currently employed in Afghanistan includes operations across the spectrum of counterinsurgency, and includes targeted operations by counter-terrorism forces. Also important are clear, hold and build operations to protect the population, the development of the ANSFs to establish long-term security, and creation of local security forces to empower local authorities. It also provides support to various civil-

ian endeavors. The goal is a comprehensive counterinsurgency strategy, closely integrated across the whole of government and the international coalition, which is comprised of forces from ISAF troop contributing nations.

22. Senator INHOFE. Lieutenant General Allen, can counterterrorism alone achieve our primary goal in Afghanistan?

General ALLEN. No. On its own, counter-terrorist operations are insufficient to neutralize the insurgency. To be effective, they must be part of a strategy which includes the fielding and professionalization of ANSFs and the development of governance and socio-economic capacity to the degree that allows the Afghan Government to maintain pressure on insurgent forces and prevent the return of transnational terrorist organizations like al Qaeda. This is the approach we are taking today, and one we should continue to pursue.

REINTEGRATION OF THE TALIBAN

23. Senator INHOFE. Lieutenant General Allen, estimates of the strength of the various Taliban factions vary from 20,000 to 40,000. Almost 2,000 Taliban fighters have accepted the offer of reintegration from the Karzai Government. The reintegration program is aimed at the so-called "accidental guerillas" for which fighting in the insurgency is just a job. What is the status of this program?

General ALLEN. Provincial Peace Councils have been established in 32 provinces, with one emerging in Kandahar and one previously established in Nangarhar under review. Twenty-three Provincial Joint Secretariat Teams (technical and administrative support to Provincial Governors) have been formed. Currently 1,926 fighters have registered with the program, with others coming forward. Recently, 375 enrolled in one event in Badghis Province and will likely be added to the total once processed. However, progress is slower in the South and East where the infrastructure of the insurgency is most dense. The capacity to implement the program has been slow to develop. However, as structures develop, resources begin to flow, and confidence builds, we expect to see an increase in reintegration activity.

Reintegration is not easy or straightforward. Most fighters fight on the basis of local grievances, which mean they join this program on the basis of local grievance resolution and local military pressure. This also means that the program is continually dealing with small groups of fighters as opposed to larger networks or blocks. ISAF is working at accelerating reintegration by applying military pressure on the insurgents, supporting Afghan national and provincial leadership and organization, and developing Afghan ability to support local, community-based solutions.

24. Senator INHOFE. Lieutenant General Allen, what are your thoughts on the risks and payoffs of this program?

General ALLEN. Reintegration is a logical outcome in any counterinsurgency campaign. With the emergence of the Afghan mechanisms to support reintegration, we will seek every opportunity to permit insurgents to stop fighting and join the peace process. The payoffs of the Afghan Peace and Reintegration Program are potentially significant, though it is currently making only incremental progress. The number of fighters who have officially enrolled is now almost 2,000 and growing steadily. In the past few weeks, the first demobilization event was held in Helmand province, and in the northwestern province of Badghis, 375 fighters registered at a single event.

We are realistic about potential scope of the program. One concern is that only the local 'accidental guerillas' will reintegrate—not the hardened, ideologically driven fighters. However, the reintegration of local fighters potentially undermines support for the hard liner and in time may cause the latter to reintegrate. A second risk is that reintegrated fighters will return to the fight. However, the evidence so far is that the reintegrees who go through the demobilization process are genuine. The key to this success is local reconciliation combined with provincial and national vetting. A third risk is that the Afghan national and provincial governments' will lack the capacity to implement the program. ISAF is supporting the program by: assisting in the development of procedures; mentoring the selection and training of Provincial Joint Secretariat Teams; providing enabling funding through the DOD Afghan Reintegration Program; and, of course, by applying military pressure on the battlefield.

AFGHAN NATIONAL SECURITY FORCES

25. Senator INHOFE. Lieutenant General Allen, is it correct to say that the capability of ANSF is the decisive point of our Afghan strategy?

General ALLEN. The capability of the ANSF is one of the decisive points of the ISAF campaign. To that end, the coalition continues to emphasize ANSF growth and development. I should note recruiting continues to meet our desired goals, and the ANSF is increasingly capable and perceived positively. In addition, all Afghan National Army Branch schools are currently functioning and dedicated efforts to increase the professionalism of the ANSF are bearing fruit.

This is not to say that we are without challenges. As the campaign progresses, it is important to support our ANSF partners in the campaign. We will continue to partner and mentor the ANSF at the appropriate levels, in order for the ANSF to continue to take the lead in security operations.

26. Senator INHOFE. Lieutenant General Allen, will they be ready by the 2014 timeline that President Karzai has requested?

General ALLEN. Although 2014 is an aggressive timeline for the ANSF to take the security lead, it is achievable. The ANSF will begin assuming security lead this month in seven areas of Afghanistan. As the transition process moves forward and the ANSF take security lead, they will not be doing so alone. As each geographic area undergoes transition, the associated ANSF units will progress through a series of stages where they grow in capability as their partnered ISAF gradually step back. In fact, in certain areas of the country, coalition forces will continue to provide advising and enabling capabilities to the ANSF to ensure they remain capable, credible, and connected to the Afghan people and a deterrent to insurgent and transnational terrorist groups. This support will continue only until such time the ANSF can become completely self-sufficient.

27. Senator INHOFE. Lieutenant General Allen, as the ANSF end strength is increased, will there be sufficient U.S. forces available to partner with Afghan units?

General ALLEN. As the ANSFs increase in strength, they will also grow in capability. Partnership remains a critical part of our campaign plan and future professionalization of the force, which is invaluable to our efforts to conduct irreversible transition by the end of 2014. That said, as we conduct the surge recovery, we will continue to assess our partnership framework as well as future requirements for enablers, mentorship, and support. Progress to date allows us to adjust our partnership ratios as enabled by improving security conditions on the ground.

28. Senator INHOFE. Lieutenant General Allen, can the Afghan Government sustain/fund these robust security forces in the future?

General ALLEN. The Afghan economy is expected to be able to generate some of the income to partially support its security forces, but the Afghan Government will require supplemental funding from the United States and the international community to sustain them. The amount of outside funding will depend upon the level of the insurgency, and the estimated size of the ANSF required for the maintenance of security in Afghanistan beyond 2014.

SECURITY ASSISTANCE AND ENGAGEMENT PROGRAMS

29. Senator INHOFE. Lieutenant General Allen, our military-to-military (1206), civilian-to-civilian (1207), small-scale special operations (1208), CERP, and Combatant Commander's Initiative Fund (CCIF) have been incredibly successful in aiding developing nations, fighting terrorism, and providing resources for emergency situations. My belief is that the key to these programs has been the combined efforts of DOD, DOS, the chiefs of mission, and combatant commanders working together to increase the capabilities of our partner nations to provide for their own security, increasing stability in their region and around the globe. What value do these funds provide in your prospective areas of responsibility?

General ALLEN. Our assessments have shown that the CERP has significantly supported our comprehensive civil-military counterinsurgency strategy. Through investments into Afghan communities, the CERP empowers commanders to reinforce security gains with localized governance and development initiatives. The CERP is a powerful mechanism by which we have already convinced many Afghans in previously contested areas that the Afghan Government has greater capacity to offer peace, stability, and prosperity than insurgents.

CERP is a flexible tool that enables U.S. Commanders to respond to urgent humanitarian relief and reconstruction requirements within their area of responsibility (AOR). In Afghanistan, CERP has been employed to great effect to repair battle damage, repair irrigation systems, build schools and medical clinics, provide urgently needed medical supplies, and supply many other urgent needs to local Afghans. We should continue to aggressively utilize CERP to achieve the desired end state in the Combined Joint Operations Area-Afghanistan (CJOA-A).

To a significantly lesser extent, we have also made use of CCIF in the CJOA-A. CCIF is currently being used to support Rule of Law (ROL) enhancement with the construction of guard housing and other support facilities at the Saraposa Prison in Kandahar.

30. Senator INHOFE. Lieutenant General Allen, do you have any concerns about being able to effectively execute these programs in your prospective areas of responsibility?

General ALLEN. The CERP projects have improved the lives of millions of Afghans and substantially contribute to the effectiveness of our counter-insurgency (COIN) operations. In some areas, the operational environment has matured beyond the acute phases of stability operations to more advanced activities that support development and enabling governance. As a result, some aspects of CERP have evolved to include more complex, longer-term projects. I am concerned that commanders are incurring an increased risk of project failures as they attempt to address some of the more advanced needs within their battle space, but fortunately steps are already being taken to mitigate this concern.

Proposed changes include a greater emphasis on small-scale projects (less than \$500,000) and those that can be completed within 1 year of obligation. Additionally, U.S. Forces-Afghanistan (USFOR-A) CERP guidance has been updated to require greater scrutiny of projects and additional steps to verify sustainability of projects. We are also going a step further and looking at our internal procedures. Finally, we are continuing to coordinate our efforts with development experts such as United States Agency for International Development (USAID) and nongovernmental organizations (NGOs) working in the CJOA-A.

QUESTIONS SUBMITTED BY SENATOR SAXBY CHAMBLISS

AFGHANISTAN—MITIGATION STRATEGIES

31. Senator CHAMBLISS. Lieutenant General Allen, while impressive gains in security have been made throughout Afghanistan since the surge was implemented, those gains have been repeatedly characterized as “fragile and reversible”. Afghanistan remains a dangerous place. Nonetheless, last week President Obama announced the beginning of the withdrawal of the surge forces ordering 10,000 troops to depart Afghanistan by the end of this year and the transfer of authority from ISAF to the Afghans to be completed by the end of 2014. As Tunisia, Egypt, and other nations in the Middle East have shown us so suddenly in these past weeks and months, and given the increasing level of instability throughout the Muslim world, is the drawdown of U.S. combat forces in Afghanistan the right thing to do at this time from an operational perspective?

General ALLEN. I support the President’s decision and believe that we can accomplish our objectives. This is primarily because the surge, while still ongoing and important for continued momentum, has created success in several key parts of the country. It has curtailed the momentum of the insurgency, and the ANSF continues to grow and develop in their warfighting capacity. Even once the surge forces have been removed; there will still be some 68,000 U.S. troops and thousands of international forces in Afghanistan, not to mention some 70,000 more Afghan forces, which will join the fight in the next 15 months. At the same time, the United States and NATO are both discussing long-term strategic partnerships with Afghanistan. I will offer my candid assessment to the chain of command on the current state of the conflict, as well as provide options with respect to the President’s goals in accomplishing this strategy. As the commander in Afghanistan, it would be my responsibility to render my best military advice, and then to execute the President’s decisions as skillfully and diligently as possible.

32. Senator CHAMBLISS. Lieutenant General Allen, should things take a turn for the worse in Afghanistan, what mitigation strategies are you prepared to execute to manage risk to the mission and protect U.S. personnel remaining in Afghanistan as we remove forces from theater, and if needed, would you recommend ceasing the

withdrawal of U.S. forces and even increasing U.S. forces if that were the right operational move?

General ALLEN. The primary means to mitigate risk related to the United States surge drawdown is through the continued growth and development of the ANSF. Increases in the quantity of ANSF will likely outpace decreases in ISAFs. Of note, the Afghan Local Police are a particularly important element of risk mitigation, since they reside in local areas, often where U.S. and coalition forces do not already have a dense presence.

I will closely monitor the operational environment and make appropriate recommendations to mitigate risk and to adapt the force and our operational approach as necessary. It is imperative that we constantly review and assess our progress by challenging previous assumptions and then adapt our campaign and force to confront a changing environment. I will keep the chain of command informed of my assessments and any adjustments that may be required as the operational environment evolves.

AFGHANISTAN RECONCILIATION EFFORTS

33. Senator CHAMBLISS. Lieutenant General Allen, in your responses to advance policy questions you mention your service as the “deputy commanding general of the II Marine Expeditionary Force (Forward) when it deployed to Iraq’s Anbar Province from 2007–2008” as experience that “not only prepared [you] for battlefield command and the harsh reality of war but . . . also taught [you] a tremendous amount about the nature of this kind of conflict and the complex challenges unique to counterinsurgencies.” While you performed this duty during the Anbar Awakening in Iraq, Afghanistan is not Iraq. Afghans are accustomed to switching sides frequently, sometimes even during a battle. With that in mind, if confirmed as the next commander in Afghanistan, how do you propose furthering the political process of reconciliation to help ensure we are able to create and leave behind a secure Afghanistan and ensure the “fragile and reversible” gains we have made are permanent?

General ALLEN. Reconciliation is a political process among the Afghan people, and is supported by the DOS through the U.S. Embassy. ISAF has a key role in enabling this process, and is one which I will fully support. Reintegration is a complementary process, one where ISAF supports the Afghan-led Afghan Peace and Reintegration Program by assisting in the development of procedures, mentoring the selection and training of Provincial Joint Secretariat Teams, providing enabling funding through the DOD Afghan Reintegration Program, and by applying military pressure on the battlefield. These programs are an integral element of the counter insurgency (COIN) campaign, are fundamental to the strategic peace process, and are a key building block of the transition process. Progress in reconciliation processes is a function of building on security gains and governance improvements such that they tip the balance of confidence at all levels decisively in favor of the government. Building on current gains, a successful transition will provide the Afghans with the strength to make reconciliation and reintegration irreversible.

QUESTIONS SUBMITTED BY SENATOR SCOTT P. BROWN

TRAINER-TO-TRAINEE RATIO

34. Senator BROWN. Lieutenant General Allen, the President’s withdrawal plan would leave about 68,000 U.S. troops on the ground in Afghanistan by the end of next summer, along with an expected ANSF end-strength totaling about 352,000 soldiers and police. From your perspective, what is the ideal trainer-to-trainee ratio you intend to meet by the end of this year?

General ALLEN. The current overall coalition trainer to ANSF trainee ratio is approximately 1:14, which is sufficient to produce the Army combat and police formations required for the Afghans to transition to the security lead. However, the critical shortage of 65 air coalition trainers hinders the development of the Afghan Air Force (Mi-17 and C-27 pilots). The Afghan logistics and medical systems are also short trainers; these have been identified and are scheduled to be “boots on the ground” by the end of the year. This number of trainers will allow NTM-A to reach the ANSF growth objective of 352,000 by October 2012 and should complete the training and fielding of the Afghan Army and Police by December 2013. Additionally, NTM-A is training and certifying Afghan trainers to be able to take the lead for basic training of Army and Police. The goal by the end of 2011 is to have 4,400 Afghan trainers assume the lead for training allowing coalition trainers to shift

focus to professionalize the force and develop systems that will endure past transition at the end of 2014.

35. Senator BROWN. Lieutenant General Allen, with a current shortfall of 490 institutional trainers, how will the withdrawal of 10,000 troops by the end of this year affect your training mission?

General ALLEN. The withdrawal of 10,000 troops by the end of this year is not expected to impact the training mission. NTM-A trainers who are inbound from the United States and coalition countries between now and this fall will address all training shortfall except 65 air trainers (C-27 and Mi-17 pilots)-likely enabling us to reach the growth objective of 352,000 by October 2012 and complete the training and fielding of the Afghan National Army and Afghan National Police by the end of 2013. One key effort to meeting this goal will be appropriately balancing trainers and force structure requirements in the future.

36. Senator BROWN. Lieutenant General Allen, what is the ideal trainer-to-trainee ratio you intend to meet by the end of next summer? Is that number an acceptable level of risk, in your opinion?

General ALLEN. The current overall coalition trainer to ANSF trainee ratio is approximately 1:14, which is sufficient to produce the Army combat and police formations required for the Afghans to transition to the security lead. However, the critical shortage of 65 air coalition trainers hinders the development of the Afghan Air Force (Mi-17 and C-27 pilots). The Afghan logistics and medical systems are also short trainers; these have been identified and are scheduled to be "boots on the ground" by the end of the year. This number of trainers will allow NTM-A to reach the ANSF growth objective of 352,000 by October 2012 and should complete the training and fielding of the Afghan Army and Police by December 2013. Additionally, NTM-A is training and certifying Afghan trainers to be able to take the lead for basic training of Army and Police. The goal by the end of 2011 is to have 4,400 Afghan trainers assume the lead for training allowing coalition trainers to shift focus to professionalize the force and develop systems that will endure past transition at the end of 2014.

QUESTION SUBMITTED BY SENATOR SUSAN M. COLLINS

AFGHAN NATIONAL POLICE CONTRACTING

37. Senator COLLINS. Lieutenant General Allen, both DOD and DOS have played a role in training the Afghanistan National Police. DOD has established the desired outcomes for this training, and, until this year, DOS handled the contracting. At the beginning of last year, the DOD and DOS Inspectors General reported that DOD failed to provide DOS with these requirements to include them in the contracts. Unfortunately, only 11 of the 64 police districts evaluated met the goal of being able to carry out law-enforcement actions unaided. We are told by the DOD Inspector General (IG) that the contract now resides with DOD. What metrics and performance requirements has DOD written into this training contract now that it has assumed responsibility for it?

General ALLEN. In April 2011, DOS transferred the Afghan National Police training mission to DOD. DOD and specifically NTM-A picked up this training mission and converted the training from contractor to coalition civilian and military personnel. The DOD IG conducted an audit of DOS to DOD transfer of mission and provided 10 findings in their draft report. NTM-A has addressed 9 of the 10 recommendations, with the remaining open recommendation being addressed between DOS and DOD leadership regarding funding reimbursement.

NTM-A has provided information to DOD IG as to how it has addressed or mitigated 9 of the recommendations, which will be identified in the final report from the DOD IG. Specific to the 64 police districts to meet the goal of being able to carry out law-enforcement actions unaided, ISAF Joint Command has written performance metrics to gauge the operational capability of the Afghan Police. The ISAF Joint Command Unit Assessment Tool serves as the basis for these metrics and performance requirements. Specific metrics and performance requirements, which are written in the Ministry of Interior Training and Support Statement of Work (dated 2 February 2011), include measuring the Afghan National Police's ability to report the status of personnel, logistics, and operations and then take specific actions based on these reports in order to enable the long-term viability of the force.

[The nomination reference of LtGen John R. Allen, USMC, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
June 8, 2011.

The following named officer for appointment to the grade of general in the U.S. Marine Corps while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be General

LtGen John R. Allen, 0000.

[The biographical sketch of LtGen John R. Allen, USMC, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF LTGEN JOHN R. ALLEN, USMC

Position:

Deputy Commander, U. S. Central Command

Assigned:

17 Jun 08

Projected Rotation:

17 Jun 11

Date of Rank:

31 Oct 08

Date of Birth:

15 Dec 53

Date Commissioned:

2 Jun 76

MRD:

1 Jul 14

Education / Qualifications:

U.S. Naval Academy, BS, 1976

Georgetown University, MA, 1983

Defense Intelligence College, MS, 1984

The Basic School, 1977

Amphibious Warfare School Non-Resident, 1982

CMC Fellow—Center for Strategic and International Studies, 1985

Marine Corps Command and Staff College, 1993

National War College, 1998

CAPSTONE, 2006

CFACC, 2008

CLFLCC, 2008

Infantry Officer

Joint Qualified Officer

Commands:

Acting Commander, U.S. Central Command (LtGen: June 10–Aug. 10)

Commanding General, 2d Marine Expeditionary Brigade (MajGen: Aug. 06–June 08)

Commandant of Midshipmen, U.S. Naval Academy (Col: Dec. 01–Sep 03)

Commanding Officer, The Basic School (Col: June 99–Apr. 01)

Commanding Officer, 2d Battalion, 6th Marines, 2d Marine Division (LtCol: July 94–Mar. 96)

Joint assignments:

Deputy Commander, U.S. Central Command (LtGen: July 08–June 10)

Principal Director (Asia & Pacific), Office of the Deputy Under Secretary of Defense (Asia & Pacific) (BGen: Oct. 03–June 06)

Commanding Officer, Migrant Processing, Joint Task Force-160 (LtCol: May 94–July 94)

Service Staff Assignments:

Deputy Commandant of Midshipmen, U.S. Naval Academy (Col: Apr. 01–Dec. 01)
 Military Secretary to the Commandant of the Marine Corps (Col: June 98–June 99)
 Aide-de-Camp to the Commandant of the Marine Corps (LtCol: Mar. 96–July 97)
 Assistant Operations Officer, G-3, 2d Marine Division (Maj/LtCol: June 93–Mar. 94)
 Director, Infantry Officers' Course, The Basic School (Maj: June 90–Aug. 92)

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by LtGen John R. Allen, USMC, in connection with his nomination follows:]

UNITED STATES SENATE
 COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
 NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

John R. Allen.

2. **Position to which nominated:**

Commander, International Security Assistance Force.

3. **Date of nomination:**

June 8, 2011.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

15 December 1953, Fort Belvoir, VA.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to Katherine Glickert Allen.

Maiden name: Katherine Ann Glickert.

7. **Names and ages of children:**

Betty Batchelder Allen; age 30.

Barbara Elizabeth "Bobbie" Allen; age 26.

8. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

None.

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational or other institution.
None.

10. **Memberships:** List all memberships and offices held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member, Council on Foreign Relations
Term Member, Council on Foreign Relations
Marine Corps Association
Naval Academy Alumni Association
Georgetown University Alumni Association
National War College Alumni Association
National Naval Officer Association

11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, or any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

Honorary Life Member, Montford Point Marine Association
Pi Sigma Alpha, National Political Science Honor Society
Marine Corps Fellow, Center for Strategic and International Studies
Commandant of the Marine Corps Fellow

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?

Yes.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–E are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

JOHN R. ALLEN.

This 23rd day of May, 2010.

[The nomination of LtGen John R. Allen, USMC, was reported to the Senate by Chairman Levin on June 29, 2011, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on June 30, 2011.]

**NOMINATIONS OF MADELYN R. CREEDON TO
BE ASSISTANT SECRETARY OF DEFENSE
FOR GLOBAL STRATEGIC AFFAIRS AND
ALAN F. ESTEVEZ TO BE ASSISTANT SEC-
RETARY OF DEFENSE FOR LOGISTICS AND
MATERIEL READINESS**

TUESDAY, JULY 19, 2011

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:31 a.m., in room SD-G50, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Nelson, Hagan, Begich, Blumenthal, McCain, Brown, and Ayotte.

Also present: Senators Lugar and Bingaman.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Joseph M. Bryan, professional staff member; Ilona R. Cohen, counsel; Ozge Guzelsu, counsel; Richard W. Fieldhouse, professional staff member; Creighton Greene, professional staff member; Jessica L. Kingston, research assistant; Peter K. Levine, general counsel; Jason W. Maroney, counsel; Thomas K. McConnell, professional staff member; William G.P. Monahan, counsel; Michael J. Noblet, professional staff member; Russell L. Shaffer, counsel; and William K. Sutey, professional staff member.

Minority staff members present: David M. Morriss, minority staff director; Daniel A. Lerner, professional staff member; Diana G. Tabler, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: Kathleen A. Kulenkampff and Hannah I. Lloyd.

Committee members' assistants present: Carolyn Chuhta, assistant to Senator Reed; Ann Premer, assistant to Senator Nelson; Lindsay Kavanaugh, assistant to Senator Begich; Joanne McLaughlin, assistant to Senator Manchin; Ethan Saxon, assistant to Senator Blumenthal; Clyde Taylor IV, assistant to Senator Chambliss; Charles Prosch, assistant to Senator Brown; and Brad Bowman, assistant to Senator Ayotte.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody.

The committee meets today to consider the nominations of Madelyn Creedon to be Assistant Secretary of Defense for Global Strategic Affairs and Alan Estevez to be the Assistant Secretary of Defense for Logistics and Materiel Readiness.

We welcome our nominees and their families to today's hearing. The long hours and the other sacrifices that our nominees are willing to make to serve our country are appreciated by us, and they could not happen without the support of their families. I hope the nominees will take an opportunity when we call on them for their opening statements to introduce any family members or friends who are here with them.

Both of our nominees have exceptional records of public service. Mr. Estevez has served with distinction in the Department of Defense (DOD) for 30 years, beginning with a series of positions in the Military Traffic Management Command in the 1980s and rising through the ranks over the course of five administrations to his current position as Principal Deputy Assistant Secretary of Defense for Logistics and Materiel Readiness.

Ms. Creedon has served our country for the last 30 years in positions that included Assistant Administrator of the National Nuclear Security Administration (NNSA) for Defense Programs, Associate Deputy Secretary of Energy for National Security Programs, General Counsel for the Defense Base Closure and Realignment Commission, and a trial attorney in the Department of Energy.

Of course, Madelyn has served with distinction as counsel for this committee for 18 of those years, from 1990 to 1994, from 1997 to 2000, and from 2001 to the present. Over that time, we have all benefited from Madelyn's energy, her intelligence, and her breadth of knowledge. We know firsthand of her extraordinary understanding of the nuclear, strategic, and space programs of DOD, programs that few know as well as she does.

Our committee has long benefited from her passionate commitment to the success of these programs, and to the national security of the United States. We will miss you, Madelyn, both personally and professionally.

Senator McCain.

STATEMENT OF SENATOR JOHN McCAIN

Senator McCAIN. Thank you, Mr. Chairman.

I congratulate Mr. Estevez and Ms. Creedon on their nominations.

Ms. Creedon, as you mentioned, has served with distinction for over 17 years on the staff of the Senate Armed Services Committee. Ms. Creedon, I guess you are free at last, as the sentiment goes. [Laughter.]

I look forward to hearing, Ms. Creedon, your views regarding the future of nuclear reductions and how deterrence of attacks by our adversaries should most effectively be maintained, on the recapitalization of the nuclear weapons enterprise, and the future development and sustainment of missile defense.

The Strategic Arms Reduction Treaty (START) only entered into force in February. It will take 7 years to fully implement. The ad-

ministration has signaled its intent to pursue further reductions to the size and scope of the nuclear stockpile.

During debate on the treaty in the Senate, the Senate made it clear that the recapitalization of our aging nuclear weapons infrastructure would be a prerequisite for pursuing further reductions, and the administration has proposed an adequate investment strategy. But to date, and with spending levels in flux across the board, it remains unclear if the strategy will be fulfilled.

Recent comments by the President's national security adviser have prompted new questions about the administration's intent, including the possibility of unilateral reductions and changes in targeting requirements and alert postures.

With respect to defense cyber strategy, Deputy Secretary of Defense, William Lynn, gave a speech last week at the National Defense University, which I thought was an important speech, but it also failed to answer some fundamental questions about how DOD will approach its responsibilities for defending national security aspects of cyberspace, including what constitutes a hostile act against our cyber capabilities and when the United States would respond, as necessary, with offensive cyber operations.

The comments of the Vice Chairman of the Joint Chiefs of Staff, General Cartwright, who questioned the predominantly defensive strategy portrayed by Secretary Lynn, highlight the need for the administration to clarify the authorities and policy that will apply to military operations in cyberspace.

Last month, Secretary Panetta said that, "The next Pearl Harbor we confront could very well be a cyber attack." Yet, so far, U.S. strategy appears to have major shortcomings that could impair our ability to carry out military operations during a cyber attack.

Mr. Chairman, I would freely admit that Congress has not gotten its act together on this issue either.

General Cartwright stated his view, "There is no penalty for attacking the United States right now." This statement, from one of our most senior military leaders, underlines the uncertainty that now exists.

I have often stated my view that Congress needs to act promptly to develop and pass comprehensive legislation to address cyber threats not only to defense networks and systems, but also to maintain the Nation's critical infrastructure, encompassing the electric grid, air traffic control system, water supplies, financial networks, and much more from a cyber attack.

The Department's cyber strategy identified this area as one of its five pillars, but we have yet to answer the vast majority of key policy and legal questions that exist.

I still believe that the best course of action for the Senate to take is to establish a select committee on cybersecurity and electronic intelligence leak that would develop comprehensive cybersecurity legislation, building on much of the good work that has been done already, but considering new ideas and approaches as necessary.

With various agencies, Senate committees, and the White House moving forward with cybersecurity proposals, there is a need for clarity and unity of effort. A temporary select committee could provide much-needed order and urgency of purpose to the process.

Ms. Creedon, I look forward to hearing your assessment, as well as the role you foresee you will play in addressing and answering these questions on policy and legal authorities.

Mr. Estevez, the Department and combatant commands are now carrying out the tasks of removing, relocating, and transferring equipment in Iraq and Afghanistan. Major challenges remain in establishing new supply lines if our ability to move equipment through Pakistan into Afghanistan is jeopardized.

Additionally, we will need your expertise and background as the Department is faced with operations and sustainment costs of the F-35 that may exceed \$1 trillion over the life of the aircraft.

We will also need to ensure that the current tendency to slash future defense budgets will not detrimentally affect readiness, to include the capabilities of our forces, depots, and other industrial bases to the point which we may be faced with a hollow force reminiscent of the 1970s.

I look forward to your testimony on these issues, as well as the continued transformation of the Department's joint logistics processes to better support the warfighter.

I thank both the nominees again for their willingness to serve in these positions.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator McCain.

Now we are going to ask Senator Lugar to make an introduction of Ms. Creedon.

We welcome you. Senator Lugar, you are truly one of our experts on national security. You work with this committee on so many issues important to our national security throughout the years, nuclear proliferation just being one of those issues. We give you a very warm welcome to our committee this morning, and you can proceed with your introduction.

Senator Lugar.

**STATEMENT OF HON. RICHARD G. LUGAR, U.S. SENATOR
FROM THE STATE OF INDIANA**

Senator LUGAR. Thank you very much, Mr. Chairman, for your warm introduction—Ranking Member Senator McCain, Senator Nelson.

It is truly an honor once again to introduce Madelyn Creedon, nominated to serve as the Assistant Secretary of Defense for Global Strategic Affairs in the Pentagon.

Because of the testimony already of the distinguished chairman and ranking member, I know that she really needs no introduction, but I will proceed anyway because I am proud that the State of Indiana and the city of Indianapolis have produced an experienced and very capable threat reduction and deterrence expert, a long-time member of the staff of this committee.

I support her nomination, and I am proud to recommend Madelyn Creedon, this distinguished Hoosier, to the committee today.

This is not the first time I have had this privilege, providing support for Madelyn. If confirmed, it will not be Madelyn's first time to serve in the executive branch in a Senate-confirmed position. In April 2000, I was pleased to express my support for her to this

committee as the President's nominee to be the Deputy Administrator of the National Nuclear Security Administration for Defense Programs.

Before and after Madelyn's work at the NNSA, she worked on the staff of the Senate Armed Services Committee, and her work on both the Subcommittee on Strategic Forces and the Subcommittee on Emerging Threats and Capabilities of this committee are well known to all members. She has worked extensively on efforts to strengthen and improve threat reduction programs in the former Soviet Union, including the Nunn-Lugar Cooperative Threat Reduction (CTR) program.

Indeed, I first encountered Madelyn when she was working for my colleague, Senator Sam Nunn, the former distinguished chairman of this committee.

If confirmed, she will play a vital role in the globalizing of the Nunn-Lugar program to new countries in her capacity as the Assistant Secretary for Global Strategic Affairs. If confirmed, I look forward to hearing from her on a regular basis on the progress of these new efforts.

Mr. Chairman, let me mention my interest in the growing importance of DOD programs over which she will preside and, thus, the growing importance of these positions. Over 2 years ago, the National Academy of Sciences issued a report urging DOD to enlarge the Nunn-Lugar CTR program beyond the states of the former Soviet Union to address newly emerging threats posed by materials and weapons of mass destruction (WMD).

The report identified the need for the CTR program to be made more flexible, more agile, more prepared to move more quickly if it were to be successful in its application outside the states of the former Soviet Union.

Yet, despite the Academy's recommendation, despite the enactment of new legislation to provide the program with authorities to operate outside the former Soviet Union, and despite new presidential policy directives, including the global nuclear lockdown strategy and the release of PPD-2 on the threats posed by dangerous biological pathogens, the current pace of the work to meet these goals suggests that the President's objectives are unlikely to be met. These are part of the challenges facing our nominee, should she be confirmed.

I appreciate the need to ensure that CTR forms of assistance are used appropriately to reduce WMD threats, that our partners can absorb and sustain the assistance, and that the actions of the U.S. Government are coordinated and effective. But I am concerned that in this round of administration, coordination, and planning meetings, certifications and determinations have resulted in paralysis, not progress, to the point where critical threat reduction and national security opportunities may be forfeited.

The path to globalizing the CTR program beyond the original states of the former Soviet Union is open. The program is well-positioned to enter a new phase of global security engagement. It has the authority and the direction. What has been missing is the political and bureaucratic will to move forward with implementation.

Indeed, I would suspect that one of the major challenges facing our nominee will be to work in close cooperation with the imple-

mentation of Nunn-Lugar Global Security Engagement to make each program as effective as possible.

Lastly, Mr. Chairman, many committee members will recall the slogan associated with the North Atlantic Treaty Organization (NATO) expansion, namely, “out of area or out of business”. The same may be said with regard to the CTR program, as efforts are undertaken to expand the original program to meet the threats of WMD, no matter their type or origin or geographical location.

Two factors have led DOD to identify the importance of taking the CTR program to Africa, namely, the growing concern over bioterrorism and the natural prevalence of lethal pathogens in African nations.

Indeed, terrorist activities on the African continent are a growing concern. U.S. Africa Command, the U.S. military command responsible for engagement in Africa, described the threat in its 2010 posture statement this way, “In the last year, al Qaeda and terrorist groups in Africa appear to have strengthened their collaboration. Al Qaeda operatives are active in East Africa. The leaders of Somalia-based al Shabaab have publicly aligned themselves with al Qaeda. Al Shabaab continues to operate multiple terrorist training camps in Somalia with al Qaeda participation.”

The CTR Global Security Engagement Program in Africa that our nominee will inherit is designed to help secure vulnerable facilities, promote cooperative research and transparency in handling dangerous pathogens, and help build an early-warning system capable of quickly detecting, diagnosing, and reporting infections to help determine if they are natural or man-made and to stop their spread.

Last November, I invited several members of Madelyn’s staff-to-be in the Pentagon to join me on a visit to East Africa, particularly the states of Uganda and Kenya, to look into the interface between biosecurity and public health issues and the means by which the Nunn-Lugar Global Security Engagement program might help to contain this threat. With their proximity to the Middle East and large swaths of weakly governed lands, like Somalia, biological virus and bacteria research facilities could be attractive targets for terrorist groups or black market traders.

Moreover, public health boosts are important benefits to future security work of CTR Global. With the humanitarian interest in helping to prevent disease, such cooperative efforts to quickly detect, diagnose, and report dangerous infections are critical to stopping global pandemics.

Our nominee will be required to practice all of her diplomatic skills in mentoring these programs in Africa. The CTR program is building on relationships established by the Centers for Disease Control and the U.S. Army medical research units to work with these laboratories as additional security and shared scientific research are performed.

The intersection of public health issues with bioterrorism concerns will test the merits of the nominee. The selection of Madelyn to lead policy efforts in global strategic affairs is certainly a good one.

Despite the broad nature of the public areas she will oversee, including countering WMD, nuclear forces, missile defense,

cybersecurity, and space issues, she will be asked to ensure that the bedrocks of the CTR and Global Security Engagement components of our future counterproliferation efforts are not left to bureaucratic drudgery and interagency inertia. I know she understands that effective program execution relies on the collaboration of both the policy and implementation functions of DOD.

For all these reasons, Mr. Chairman, I strongly support her nomination. I am honored to be before the committee this morning.

[The prepared statement of Senator Lugar follows:]

PREPARED STATEMENT BY SENATOR RICHARD G. LUGAR

Chairman Levin, Ranking Member McCain, members of the Armed Services Committee, it is an honor for me to introduce Madelyn Creedon, nominated to serve as Assistant Secretary of Defense for Global Strategic Affairs in the Pentagon. However, I know she really needs no introduction to members of this committee.

I am proud that the State of Indiana and the city of Indianapolis have produced an experienced and capable threat reduction and deterrence expert, and a longtime member of the staff of this committee, Madelyn Creedon. I support her nomination, and I am proud to recommend this distinguished Hoosier to the committee today.

This is not the first time I have had the privilege of providing my support for Madelyn, and if confirmed, it will not be Madelyn's first time to serve in the executive branch in a Senate-confirmed position. In April 2000, I was pleased to express my support for her to this committee as the President's nominee to be Deputy Administrator of the National Nuclear Security Administration (NNSA) for Defense Programs.

Before and after Madelyn's work at the NNSA, she has worked on the staff of the Armed Services Committee. Her work on both the Subcommittees on Strategic Forces and Emerging Threats of this committee is well known to all members. She has worked extensively on efforts to strengthen and improve threat reduction programs in the Former Soviet Union, including the Nunn-Lugar Cooperative Threat Reduction (CTR) Program. Indeed, I first encountered Madelyn when she was working for my colleague Sam Nunn, the former distinguished chairman of this committee. If confirmed she will play a vital role in the globalizing of the Nunn-Lugar Program to new countries in her capacity as the Assistant Secretary for Global Strategic Affairs. If confirmed, I look forward to hearing from her on a regular basis on the progress of these new efforts.

Mr. Chairman, let me mention my interest in the growing importance of the Department of Defense (DOD) programs over which she will preside and thus the growing importance of this position.

Over 2 years ago, the National Academy of Sciences issued a report urging DOD to enlarge the Nunn-Lugar Threat Reduction Program beyond the states of the former Soviet Union to address newly emerging threats posed by weapons and materials of mass destruction. The report identified the need for the CTR Program to be made more flexible, more agile, and prepared to move more quickly if it were to be successful in its application outside the states of the former Soviet Union.

Yet despite the Academy's recommendations, despite the enactment of new legislation to provide the program with authorities to operate outside the former Soviet Union, and despite new Presidential policy directives including the Global Nuclear Lockdown strategy and the release of PPD-2 on the threats posed dangerous biological pathogens, the current pace of the work to meet these goals suggests that the President's objectives are unlikely to be met. These are part of the challenges facing our nominee should she be confirmed.

I appreciate the need to ensure that CTR forms of assistance are used appropriately to reduce WMD threats, that our partners can absorb and sustain the assistance, and that the actions of the U.S. Government are coordinated and effective. But I am concerned that endless rounds of administration coordination and planning meetings, of certifications and determinations, have resulted in paralysis, not progress, to the point where critical threat reduction and national security opportunities may be forfeited.

The path to globalizing the CTR program beyond the original states of the former Soviet Union is open. The program is well positioned to enter a new phase of global security engagement; it has the authority and direction. What has been missing is the political and bureaucratic will to move forward with implementation. Indeed, I would suspect that one of the major challenges facing our nominee will be to work

in close cooperation with the implementers of Nunn-Lugar Global Security Engagement to make each program as effective as possible.

Lastly, Mr. Chairman, many committee members will recall the slogan associated with NATO expansion: namely, out of area or out of business! The same may be said with regard to the CTR program, as efforts are undertaken to expand the original program to meet the threats of weapons of mass destruction no matter their type or origin or geographical location. Two factors have led DOD to identify the importance of taking the CTR program to Africa: namely, the growing concern over bioterrorism and the natural prevalence of lethal pathogens in African nations.

Indeed, terrorist activity on the African continent is a growing concern. Africa Command, the U.S. military command responsible for engagement in Africa, described the threat in its 2010 Posture Statement this way: "In the last year, al Qaeda and terrorist groups in Africa appear to have strengthened their collaboration. Al Qaeda operatives are active in East Africa. The leaders of Somalia-based al Shabaab have publicly aligned themselves with al Qaeda . . . al Shabaab continues to operate multiple terrorist training camps in Somalia with al Qaeda participation."
