

Extended Focal Aria K2 speaker range sings with both music and movies

MADE IN
FRANCE

Focal, the leading French audio brand, is adding a bookshelf model and a center speaker to the Aria K2 family, allowing for a range of thrilling hi-fi and home cinema set-ups, alongside the Aria K2 936 floorstanding speaker launched last year. Aria K2 906 and Aria K2 Center make their debut at the CEDIA Expo, from September 1-3 in Indianapolis.

FOCAL TECHNOLOGY & SAVOIR-FAIRE

Aria K2 is a special edition of the original high-performance Aria 900 range, first launched by Focal in 2013. The Aria K2 906 and Aria K2 Center join the Aria K2 936 in offering an exceptional listening experience, thanks to the iconic K2 cone in their speaker drivers. Manufactured in France at the Focal workshops, this aramid fibre cone guarantees a pure, precise and dynamic sound. It also brings a fresh, characterful look to this unique range in Focal's Home line-up.

HIGH-END ASH GREY FINISH

Aria K2 products boast a refined style that is modern yet timeless. The cabinets feature a premium, Ash Grey finish exclusive to Focal - also seen on the company's flagship Utopia products - which combines with a leather-effect front panel for added elegance.

COMPLEMENTARY PRODUCTS

Aria K2 products work together in perfect aesthetic and sound harmony. As such, Aria K2 936 or 906 can be installed on their own or they can be combined with Aria K2 Center in a Home Cinema system. Focal also recommends linking this range with the Sub 1000 F subwoofer to give your Home Cinema installation a deep and powerful boost of bass.

Available: September 2021
