The Indian society's impulse for social change and reform was a response to its opposition to colonial rule. Examine.
 (Answer in 150 words) 10 Marks

The social reform movements were a response to opposition to colonial rule.

REASONS :-

- Due to western education, Indians had forgotten to take pride in their past.
- Then, Swami Vivekananda glorified India's past so that Indians change and help each other to unite against the British.
- Women were earlier confined to their homes.
- But Mahatma Gandhi counselled women and thereafter, women also participated in nationalistic movements.
- There was widespread untouchability.
- Gandhiji preached the need to change this and treat each man equally.

However, all social reform movements were not a response to opposition to colonial rule. Examples are:-

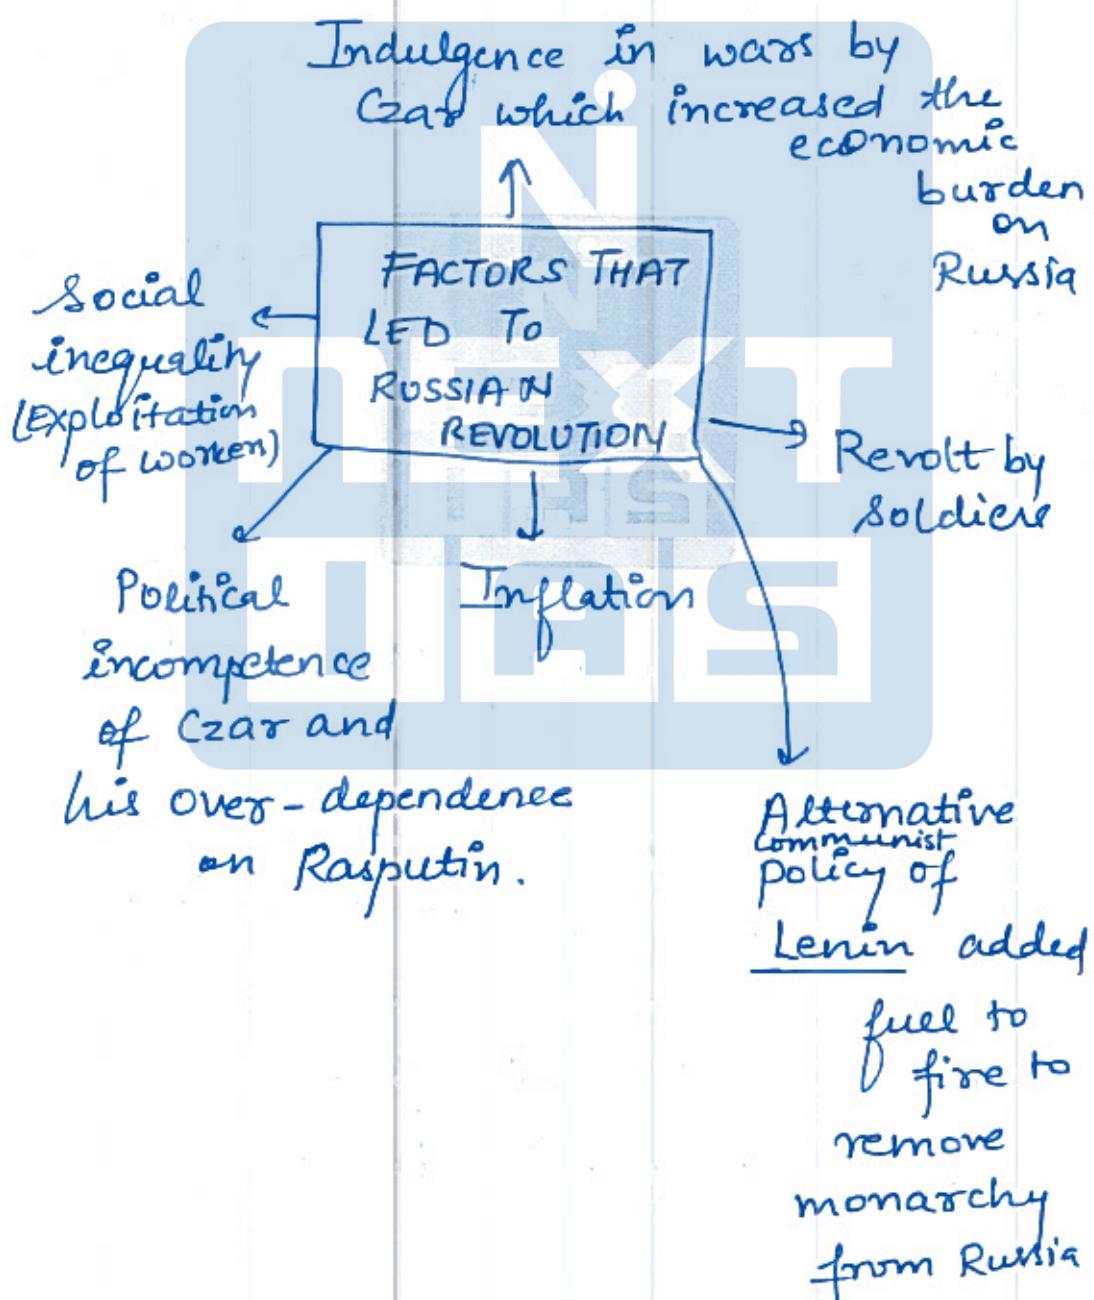

Thus, all social reform movements were not due to opposition to Colonial rule but were due to inherent desire of reformers to bring equality in society.

What are the factors that led to the Russian revolution and what are the consequences of this revolution?
 Discuss its influence on the Indian national movement.
 (Answer in 150 words) 10 Marks

Russian revolution occurred
 due to policies of Nicholas Czar.

INFLUENCE ON INDIAN NATIONAL MOVEMENT :-

- Lenin's ideals inspired leaders like Bhagat Singh to adopt revolutionary terrorism to drive out British from country.
- Workers in Indian industries began to clamour for their rights.
- Communist parties got strengthened in India.
- Industrial regulations ^{were passed} and strikes became a regular feature in India.

Thus, the Russian revolution inspired the Indian nationalists to oppose the British for their exploitative policies and seek justice.

Discuss the various factors responsible for the uneven temperature distribution on Earth's surface.

(Answer in 150 words) 10 Marks

The uneven temperature distribution of Earth's surface is due to factors like:

1: Axis of the earth is inclined at $23\frac{1}{2}^{\circ}$ N from the equator.

Due to this, the solar rays fall directly on equator, making equator the warmest portion on earth and the poles, the coolest portion.

2: ROTATION of earth causes day and night, which leads to different temperatures.

3: REVOLUTION of earth around the sun leads to sun's rays falling directly on Tropic of

Cancer in the summers. Hence,
deserts are found there.

→ In winters, sun's rays fall
overhead on Tropic of Capricorn
and hence, deserts are also found
here.

Thus, the latitude, axis, spin and
revolution of Earth determines
distribution of temperature on Earth's
surface.

To what extent does seismic investigation contribute to our understanding of the Earth's interior structure?
Analyze its significance in detail.
(Answer in 150 words) 10 Marks

Seismic investigation sends P and S-waves to understand Earth's interior structure.

→ It helps in understanding the focus and epicentre of the earthquake.

→ ~~It~~ wherever the waves travel the fastest, that region is a solid and constitutes earth's crust.

→ wherever waves travel slowly, that region constitutes mantle as it is semi-solid.

Thus, waves help us determine the depth of the crust and the mantle.

The pace of demographic transition varies across different states of India making population growth a double-edged sword. Comment.
(Answer in 150 words) 10 Marks

The pace of demographic transition is the fastest in southern States like Kerala, Tamil Nadu.

Whereas, transition is slowest in states like Bihar and UP where total fertility rate is still high.

This makes demographic transition a double-edged sword as it has both pros and cons.

FAST DEMOGRAPHIC TRANSITION

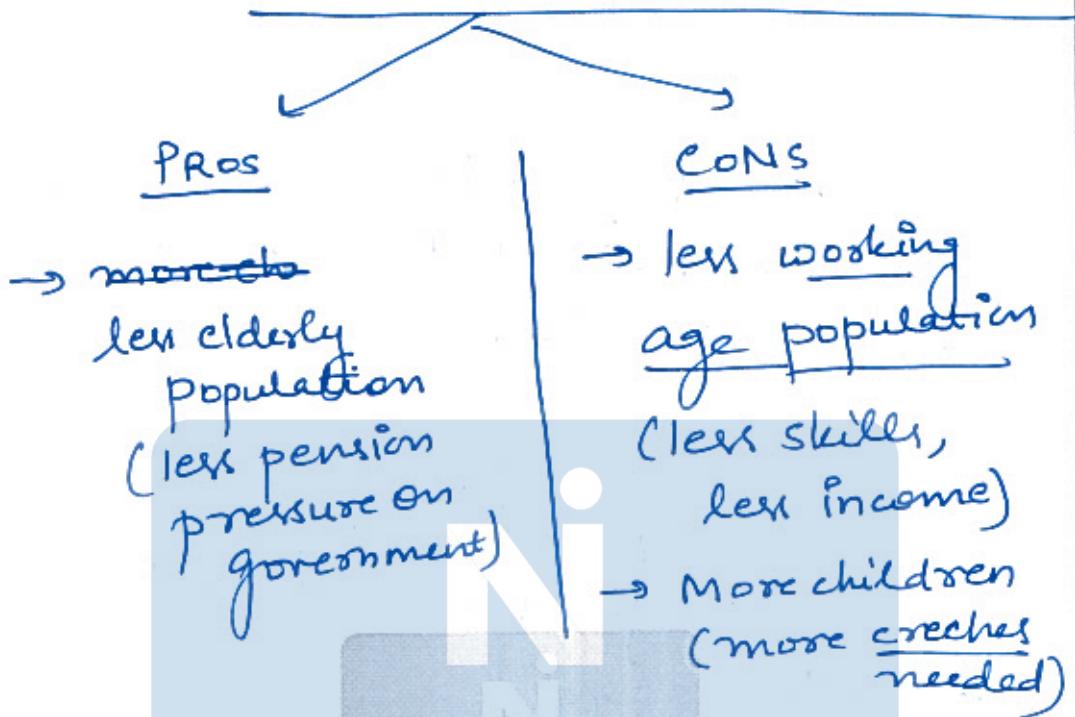

PROS

- less children (less dependents)
- more workforce (more skilled, higher incomes).

CONS

- increased elderly people
- less working class
- more burden on state for pensions
- geriatric care facilities to be provided

SLOW DEMOGRAPHIC TRANSITION

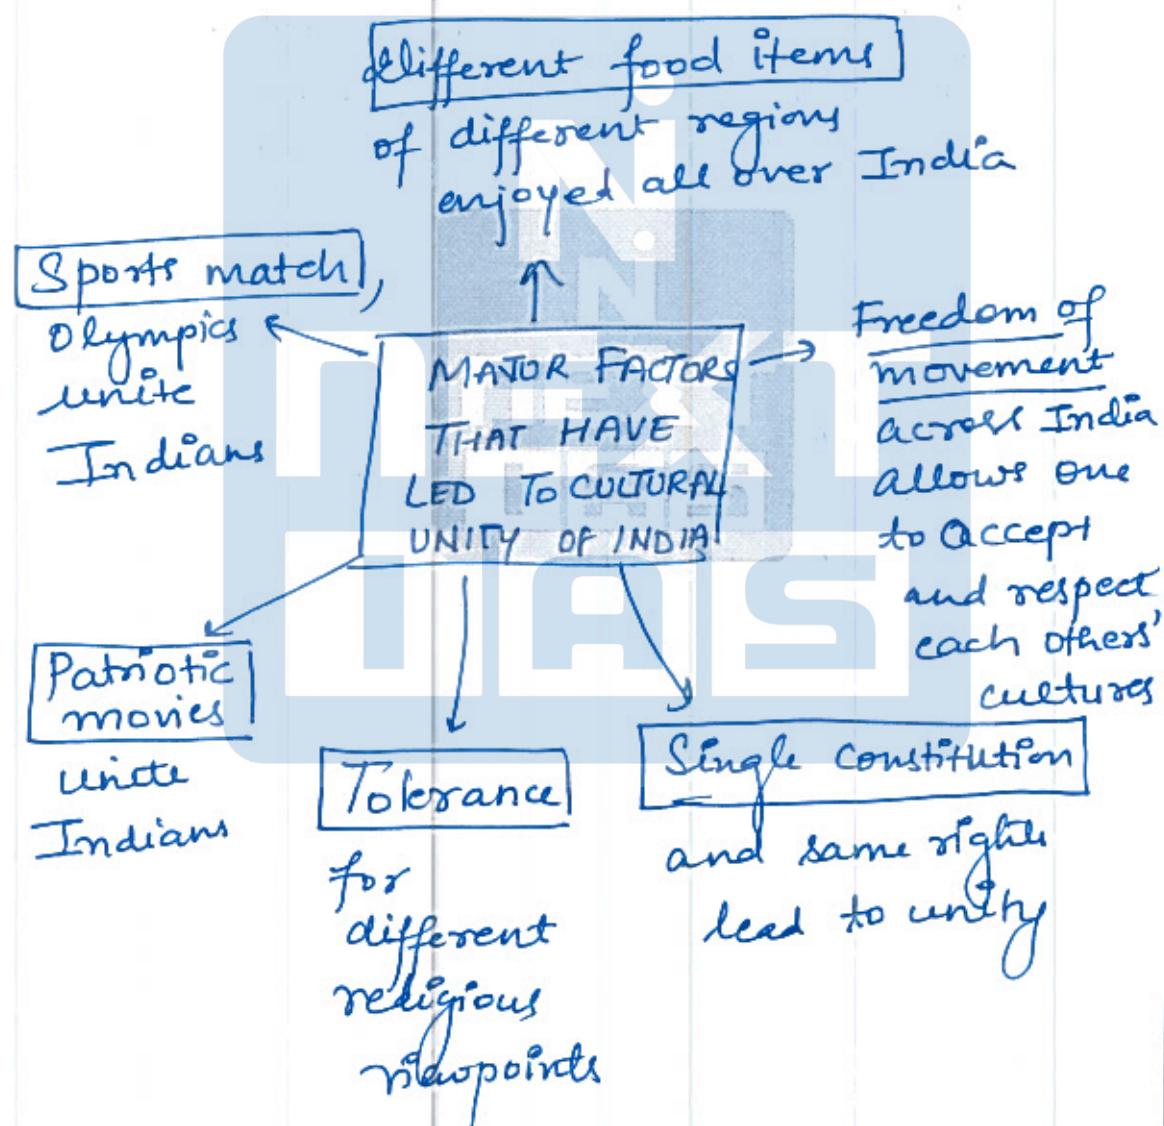

Thus, different strategies need to be adopted by different states for a smooth demographic transition.

The dichotomy in public and private life in Indian society acts as a major barrier to the annihilation of caste. Justify.
(Answer in 150 words) 10 Marks

Untouchability was abolished by the Indian constitution in 1950. However, untouchability and caste discrimination still exists in Covert forms due to dichotomy in public and private life in Indian society.

In public life, a person may treat a Dalit equally as others. But in cases of marriage, caste becomes an issue.

Thus, unless this dichotomy between public and private life is resolved, caste discrimination will continue to be a problem for Indian society.

India was forced into numerous wars post Independence. Highlight the causes and impact of the Indo-Pak and Indo-China wars on our bilateral relationships. (Answer in 250 words) 15 Marks

Post-independence, India had to fight 2 wars with Pakistan in 1965 and 1971.

India had to fight a war with China in 1962.

CAUSES OF :-

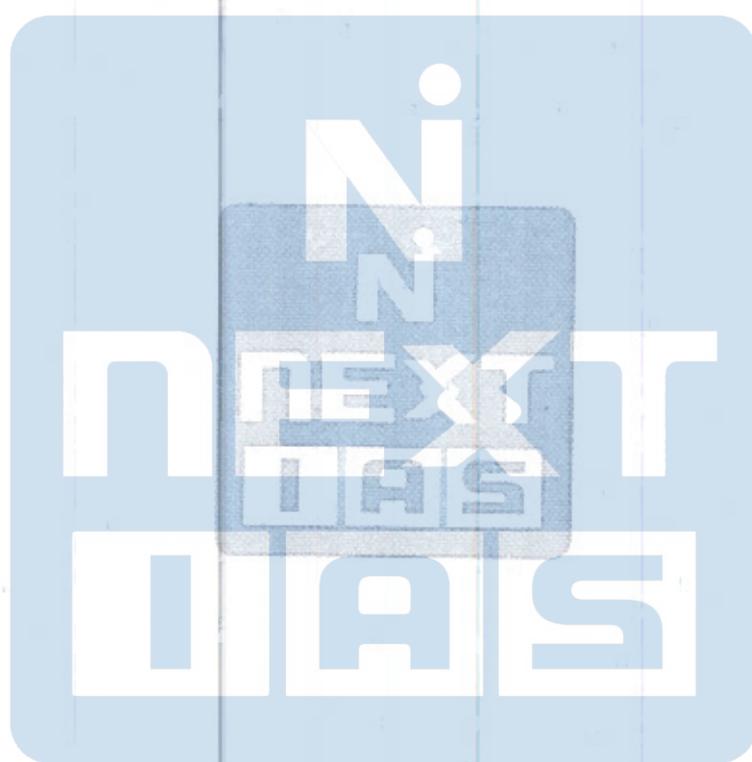

- INDO-PAK WAR, 1965 :- to annex Kashmir and Kargil (Tiger Hill)
- INDO-PAK WAR, 1971 :- for liberation of Bangladesh (East Pakistan) from West Pakistan
- INDO-CHINA WAR, 1962 : China had occupied the Aksai Chin area of India. This led to the war.

IMPACT OF WARS ON OUR BILATERAL RELATIONSHIP :-

- Pakistan and China both became enemy nations.
- Line of Control (LOC) disputes.

- China refused to accept LAC (line of Actual Control).
- China refused to recognise Arunachal Pradesh as integral part of India.
- Disputes between India and China in Girawal Valley.
- Regulation of FDI coming into India from China became more stringent.
- Political negotiations with Pakistan came to a standstill.
- SAARC has become inactive due to presence of Pakistan.
- Terrorist attacks like Pulwama, Uri and Mumbai attacks happened, taking lives of many people.
- Trade with Pakistan has reduced substantially.
- China is planning to gain maritime dominance through its 'string of pearls' strategy in Indian Ocean.

Thus, the bilateral relationship has sunk to a new low after the wars.

The process of consolidation of Bengal, which started after the Battle of Plassey culminated in the Battle of Buxar. Do you think the Battle of Buxar was more important for the British than Plassey?

(Answer in 250 words) 15 Marks

The Battle of Plassey fought in 1757 between the British and Siraj-ud-Daulah, was won by the British through treachery.

However, it gave the British access to economic resources of Bengal.

The Battle of Buxar fought in 1764, was more important than Battle of Plassey because:-

- It led to the defeat of Mughal emperor Shah Alam II
- Thus, British gained access to resources of the entire country through the Treaty of Allahabad signed in 1765.
- The British gained political control over the entire India as the mughal ruler was defeated.

- Since the Nawab of Awadh, Shuja-ud-Daulah was also defeated, the British gained access to Awadh.
- Since the Battle of Buxar was a hard-fought battle between the British and the joint army of Shah Alam II, Shuja-ud-Daulah and Mir Qasim, hence Battle of Buxar was more important than Battle of Plassey.

Sanskrit literature in general and particularly in the Guptan age set a high watermark for the literary history of ancient India. Discuss.
(Answer in 250 words) 15 Marks

Literary history of ancient India is characterised by many texts, plays and poems in Sanskrit.

Gupta age promoted Sanskrit literature. For instance, Kalidasa wrote Meghdoot, Abhigyanashakuntalam and Vikramavatist Vikramavrashiyam in Sanskrit.

→ Kalhana wrote Rajatariningi in Sanskrit.

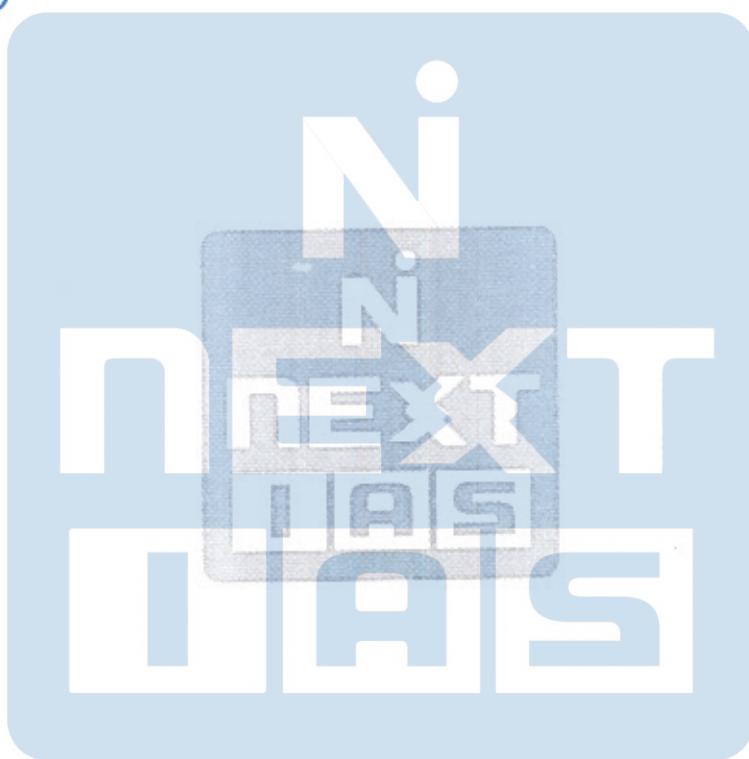

→ Bhaskaracharya wrote a mathematical text 'Lilavati' in Sanskrit.

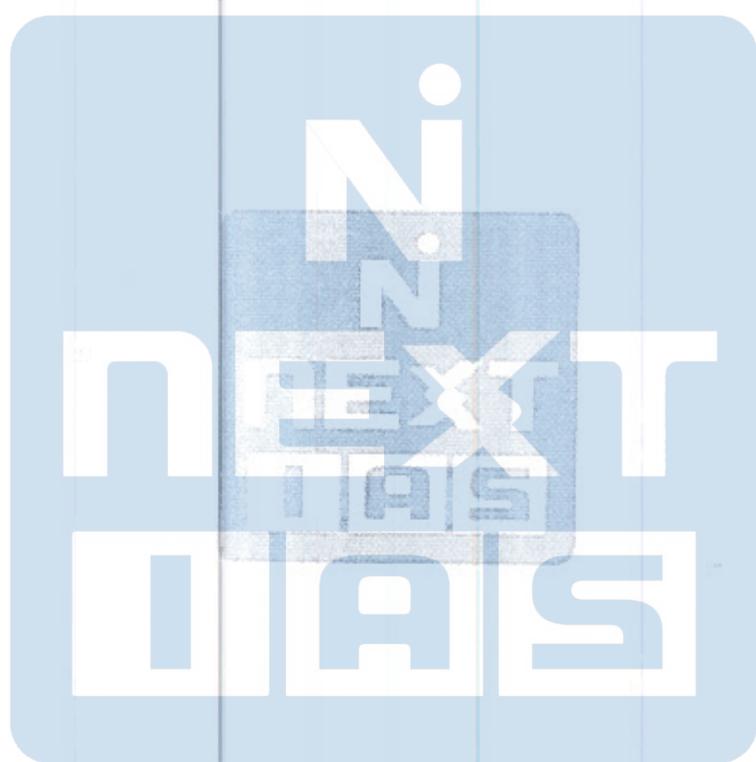

→ Aryabhatta wrote 'Suryasiddhanta' in Sanskrit.

→ Brahmagupta wrote 'Brihatsamhita' in Sanskrit.

→ Many inscriptions and Ashokan edicts had texts in Sanskrit.

Thus, Sanskrit was widely popular among the masses and reached a high watermark during Gupta age.

The configuration of the ocean floor provides essential information about the geological processes that have shaped the Earth's surface. Discuss the major features of the ocean floor and their significance in the study of oceanography. (Answer in 250 words) 15 Marks

The ocean floor provides significant information about the geological processes that shaped the earth's surface.

For example, ocean studies have shown that oceanic crust is made of SiMa (Silicon and magnesium)

SIGNIFICANCE :-

- Ocean floor is formed by seafloor spreading.
- Eg:- Atlantic Ocean is formed due to divergence of American and Eurasian Plate.
- Red Sea is formed due to divergence between the Arabian Plate and the African Plate.
- Thus, Oceanography is important to study as it explains the formation of structures in ocean floor.
- It also helps in deep sea mining for exploration of minerals

Thus, studying ocean floor is essential.

With the growing demand for rare earth elements, their distribution has become a critical aspect of the global economy. Discuss the distribution of rare earth elements across the world, their uses, and the environmental impact of their extraction.

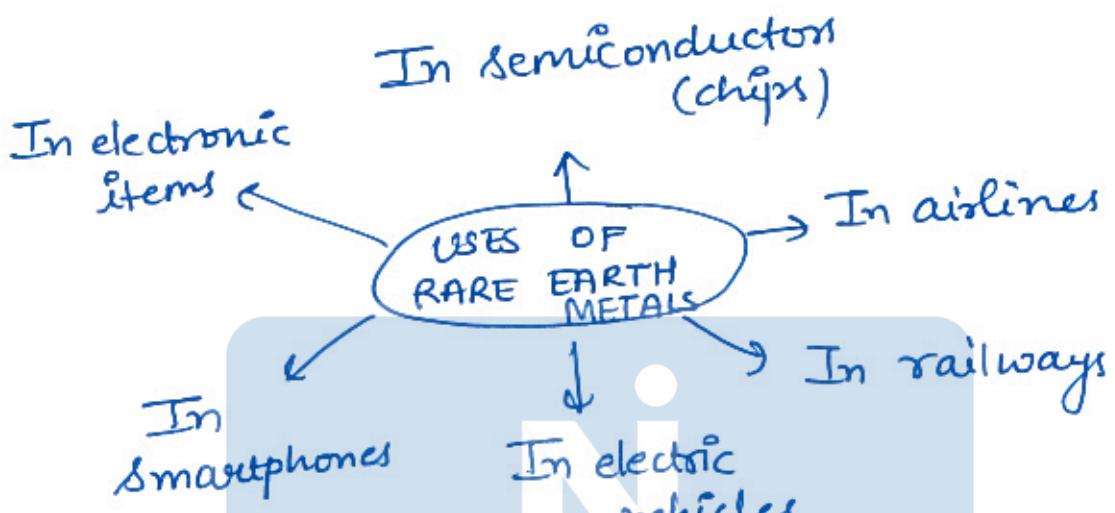

(Answer in 250 words) 15 Marks

Rare earth metals are in huge demand across the world due to their usage in chips of semiconductors and in batteries of electronic vehicles.

DISTRIBUTION OF RARE EARTH METALS

- Rare Earth metals like Nickel and Cobalt are found in South American countries like Bolivia, Peru and Argentina.
- Lithium is abundantly found in Australia.
- Recently, Lithium has been discovered in J&K, India
- China also has reserves of rare earth metals

ENVIRONMENTAL IMPACT OF EXTRACTION

- Mining requires huge amount of water. This leads to water scarcity.
- Dust pollution also happens due to mining.
- Land degradation and soil quality degrades due to mining.
- Air pollution due to use of mining vehicles.
- Habitat of flora and fauna gets disturbed, causing imbalance in the environmental ecosystem.

Thus, extraction of rare earth metals
must happen in a sustainable manner.

The Indian monsoon is a complex phenomenon influenced by various climatic factors. Critically examine the role of oceanic and atmospheric factors in determining the intensity and distribution of monsoon rainfall in India.

(Answer in 250 words) 15 Marks

The Indian monsoon is influenced by climatic factors like temperature, ~~for~~ oceanic and atmospheric pressure and presence of systems like El Nino.

ROLE OF OCEANIC AND ATMOSPHERIC FACTORS IN DETERMINING THE INTENSITY AND DISTRIBUTION OF MONSOON !-

- El Nino : is an oceanic-atmospheric interaction, ^{in Pacific Ocean.} that affects monsoon.
It is caused due to weakening of South East Trade winds.
- In Normal Year, the South East trade winds pull water towards the Australian Coast.
→ Thus, Darwin (in Australia) develops low pressure (LP) and due to upwelling of cold water, Tahiti (in Peru)

develops high pressure.

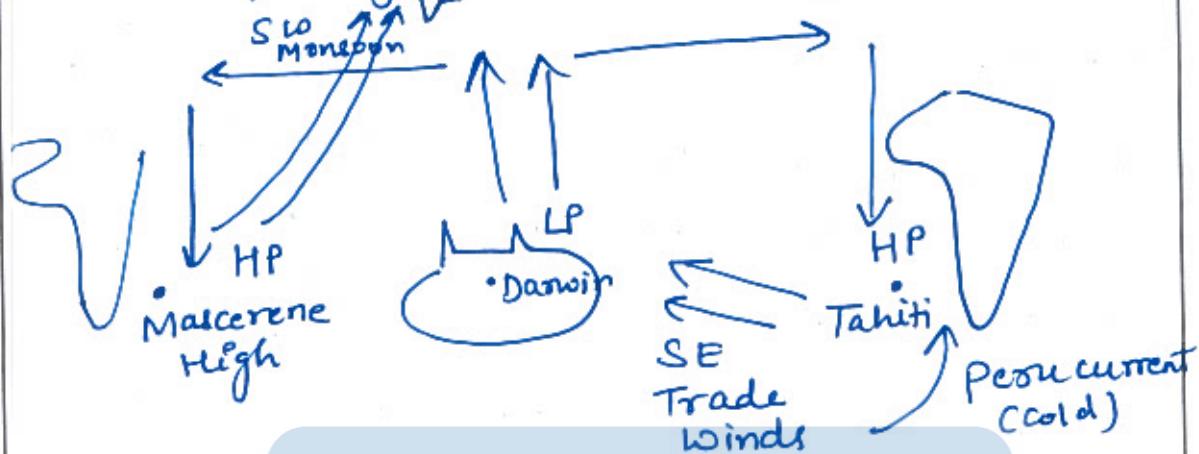

Fig 1: Walker Cell circulation in a Normal year.

- However, during El Niño, the South East trade winds weaken.
- Hence, warm waters are not pushed as much towards Australia and there is little upwelling of cold water in Peru. Thus, Peru remains warm.
- Thus, low pressure (LP) develops in Peru and HP develops in Australia.
- The normal Walker cell circulation gets disturbed and thus, there is little South west Monsoon in India.
- Thus, El Niño has a negative impact on Indian monsoon.

DISTRIBUTION OF MONSOON RAIN IN

INDIA:

- Due to temperate cyclones in Mediterranean Sea, western disturbances cause monsoon in North India during winters.
- In summer, due to South West Monsoon winds, rain occurs in North India and East India.
- ~~For~~ However, due to western Ghats, Pune lies in rainshadow area.
- Similarly, during winter, Tamil Nadu gets maximum rain due to North East trade winds.

Thus, monsoon is unevenly distributed across India.

Why do traditions in our society impede change? To what extent can social legislation be instrumental against old customary practices? (Answer in 250 words) 15 Marks

Traditions refer to the practices being followed by the society in consonance with their religion, caste or other social beliefs.

Traditions impede change because of the following reasons:

- **RELIGIOUS REASONS** :- A change may violate some religious principles or beliefs. Eg:- Women of menstruating age should not enter Sabrimala Temple as the deity is a celibate.
- **SOCIAL RIGIDITY** :- Social norms to protect girls might prevent change. Eg:- Girls unwilling to give up hijab in Karnataka as they fear that boys would stare them if they don't cover their face with hijab.
- **HISTORICAL LEGACY** :- Since a long time, Hindu women have been applying sindoor and observing 'Karma Chauth' for the health of their husbands.

- **ECONOMIC COMPULSIONS** :- to collect revenue prevent the state governments from exiting from the business of liquor.
- **LACK OF ACCOMMODATIVE SPIRIT** :- prevents the society from accepting new norms like same-sex marriages, inter-faith marriages.
- **LACK OF INCENTIVES** :- to switch to crop diversification makes the farmers grow crops like paddy and wheat for which MSP is given.

To change these customary old practices, a social legislation can be instrumental.

REASONS :-

- When society itself develops a framework to bring changes in its practices, the new framework is then well-deliberated and more acceptable to the members of the society.
- Violation of social legislation can lead to social boycott.

- However, since social legislation is not enforceable by law, hence it is not binding on public as per law.
- At max, social boycott can occur for disobeying social rules but no legal punishment can be given to farmers if they do not stop growing paddy, for example.

Thus, social legislation works well only if it is accepted by all members of society and accommodates everyone's needs.

Communalism gains strength from economic deprivation, and thrives in environments of social exclusion, creating fertile ground for discontent and division. Comment.

(Answer in 250 words) 15 Marks

Communalism ~~occurs~~ is a phenomenon which occurs when the religiosity of an individual or a group becomes antagonistic to another.

Communalism gains strength from economic deprivation.

For eg:- Muslim peasants organised Moplah revolt against the rich Hindu landlords in 1919.

Also, according to Sachar Committee report, Muslims are a backward community and are economically deprived. This deprivation strengthens the communal feelings due to feelings of discontent due to lack of good educational opportunities and lack of jobs.

Social exclusion results in thriving of communalism. When Muslims are excluded from certain events or are lynched due to consumption of beef or are forced to chant 'Tai Shree Ram', that results in their alienation and gives rise to communal feelings.

Thus, the nation needs to reduce the economic deprivation of the minorities and foster feelings of harmony to nip the rise of communalism in the bud.
