

ProQuest Central

A multidisciplinary research solution including full-text journals, news and more – supporting first year students to scholarly researchers.

ProQuest Central provides libraries with breadth of access to **47 databases** containing the full text content students and faculty need — from journals, magazines, news sources, and trade publications — to case studies, market and industry reports, business cases and more. Offering a broad foundational base for the library, ProQuest Central includes over 26,000 titles with full text across disciplines.

Essential

Researchers can access essential content from some of **the world's most important scholarly publishers** including:

- Cambridge University Press
- Nature
- Springer
- Emerald, and others

It also includes **essential news content** that is increasingly needed for research from sources such as:

- Wall Street Journal
- Le Monde
- Financial Times
- The Economist, and more

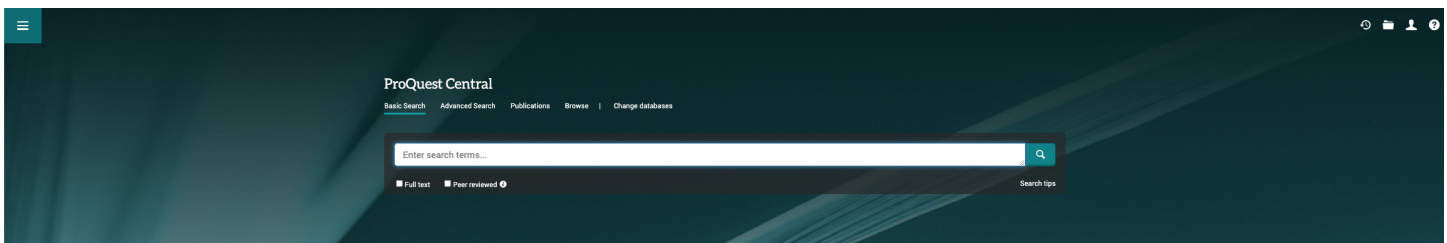

Support teaching, learning and research

Support your scholars with the full text content they need to inform their research projects, tackle the world's biggest challenges and support successful learning and assignments. ProQuest Central provides access to:

- The latest **scholarly journals** from the most important publishers
- Timely content from **local, national and international news**
- Influential business and current affairs **magazines**
- The latest academic thinking in the form of **working papers** and **conference proceedings**

Simple

Unlike other solutions that require multiple products often on different platforms, ProQuest Central covers multiple full text content sources and subject areas in **one interface**. This makes it easy for users across the institution to find and use the information they need, resulting in higher usage and lower training requirements, as well as simpler implementation and management for the library.

Why ProQuest Central?

- **Scholarly Journals:** Read the latest full text of key journals including the Lancet, Nature, MIT Sloan Management Review, Journal of Marriage and Family, and Journal of Business Ethics. Find the world's most important scholarly publishers including Cambridge University Press, Springer, Nature, and Emerald.
- **News:** Local, national, and international news coverage including the New York Times, Wall Street Journal, Washington Post, Chicago Tribune, Financial Times, Le Monde, and The Guardian. CBS 60 MINUTES documentary video series is included, as well as daily videos from New York Times and Washington Post.
- **Cutting-edge thinking:** See the latest academic thinking first by accessing more than 3.3 million working papers from arXiv.org, NBER, RePEc, INSEAD, and OECD, and 300,000+ full text dissertations.
- **Health & Medical:** Users can access the top medical journals, practical guidance, consumer health information, as well as reference books and videos for health care, psychology, and nursing.
- **Global Market Information:** An unrivaled collection for small business, start-ups, and business studies covering highly coveted analyses of industries, countries, economies, and markets. Providers include Fich Solutions, Economist Intelligence Unit (EIU), Plunkett Research, Oxford Economics, and Barnes Reports.
- **Current Affairs:** Keep up to date with current full text of the most widely read magazines including The Economist, New Statesman, Billboard, Variety, Macleans, Atlantic Monthly, and The Spectator.
- **Science & Technology:** Influential journals with ongoing full text across the breadth of science and technology, from impactful cross-discipline titles to subject specific academic publications. Plus, a vast number of full-text dissertations, conference proceedings, and trade journals.

ARTS

Arts & Humanities Database: Includes over 500 full text titles in areas such as Art, Architecture, Design, History, Philosophy, Music, Literature, Theatre and Cultural Studies. The collection features scholarly journals from publishers such as Springer and Johns Hopkins University as well as influential and popular publications including Sight and Sound, Artforum International, and Vogue.

BUSINESS

ABI/INFORM Collection: Composed of ABI/INFORM Global, ABI/INFORM Trade & Industry, and ABI/INFORM Dateline, this collection features thousands of full-text journals, dissertations, working papers, and key business and economics periodicals such as The Economist and MIT Sloan Management Review. It also contains company/country/industry-focused reports, and major news sources like the Wall Street Journal. Its international coverage gives researchers a complete picture of companies and business trends around the world.

Accounting, Tax & Banking Collection: Comprises the Accounting & Tax Database and the Banking Information Database which are not sold individually. This offers over 100 active full text titles unique from ABI and brings together global scholarly journals, as well as other key resources, providing access to reliable information in this continuously evolving area of study. The collection helps researchers locate precise results from sources ranging from current news to professional and academic journal articles covering the trends and history influencing important accounting, tax, banking, and financial issues of the day.

Asian & European Business Collection: It provides information pertinent to the study of business and finance topics across Asia and Europe, including academic journals, newspapers, newswires, and magazines. Find information on companies, economies, and markets as well as international trade and overall business conditions and practices throughout these regions.

Business Market Research Collection: For the business librarian serving programs that require students to apply real world information in their coursework, the Business Market Research Collection provides a broad range of specialized company, industry, and country information that can be easily found by a novice searcher. It provides company, industry, and geopolitical macroeconomic market research from these sources: Hoover's Company Profiles, Oxford Economics, Barnes Reports.

HEALTH RESEARCH

Consumer Health Database: Offers international coverage dating back to 1988 of an enormous range of public health subjects, including pandemics, disaster preparedness, and obesity. Particularly of interest to public library users, the public health topics covered in the collection range from sports injuries to women's health, food and nutrition, midwifery, eye care, dentistry and more.

Healthcare Administration Database: Provides the most reliable and relevant information on a wide range of topics, including hospitals, insurance, law, statistics, information & technology, business management, personnel management, ethics, health economics, and public health administration.

Health & Medical Collection: Uniquely suited for libraries with users who require content for learning and researching biomedical science and related subject areas. Our content helps health science librarians meet the research needs of many audiences, whether they're supporting a clinical research study or providing faculty with instructional multimedia content to help students connect theory to practice.

Nursing & Allied Health Database: Whether it's supporting a clinical research study or providing faculty with instructional multimedia content to help students connect theory to practice, librarians rely on the Nursing & Allied Health Database for its diverse mix of scholarly literature, clinical training videos, reference materials, and evidence-based resources, including dissertations and systematic reviews. By going beyond journals and taking a holistic and interdisciplinary approach to subject coverage, this database is uniquely suited for students, instructors, researchers, and healthcare professionals.

Psychology Database: Combines 900+ full text psychology and psychosomatic scholarly journals, with diverse sources of content including dissertations and training videos to help new students bridge theory with practice. It covers a wide range of topics including clinical and social psychology, genetics, psychology of business and economics, communication, criminology, addiction, neurology, social welfare, and more.

Public Health Database: Delivers core public health literature from thousands of publications, much of it in full text. With journals, dissertations, videos, news, trade publications, reports, and more, the database covers a wide variety of disciplines ranging from social sciences to business to biological sciences, offering in-depth scholarly insights into topics such as biostatistics, environmental health sciences, epidemiology, health services administration, international public health, maternal and child health, and occupational safety and health.

INTERDISCIPLINARY

Australia & New Zealand Database: Locally-sourced scholarly publishing adds important social, scientific, and business context to cross-disciplinary and globally relevant areas of study. This database provides ongoing full-text academic journals that are locally published by scholarly publishing organizations and educational institutions in Australia and New Zealand. Major subject areas of study include business, science, technology, engineering, social sciences, education, and humanities.

Canadian Business & Current Affairs Database (CBCA): This longstanding Canadian periodical collection covers a broad variety of subjects and topics, with millions of full-text records. For readers and researchers at every level, CBCA features a diversified mix of publications from three focused databases: CBCA Business, CBCA Education, and CBCA Reference & Current Events including scholarly journals, trade publications, magazines, reports, radio and television transcripts, news, dissertations, and more. It features high-quality indexing of 1,900+ publications, 850+ full text, and 300+ active full text titles. Broad coverage from a Canadian perspective this database spans topics like agriculture, business and economics, education, government and politics, health sciences, history, literature, medical sciences, social sciences, and more. CBCA includes 3,300+ Canadian dissertations on Canadian history, culture, economics, politics, and society.

Career & Technical Education Database: The definitive source for vocational information for users across the college prep and academic space. The database includes 1,000+ full-text titles, including trade journals and magazines, scholarly journals, and blogs and video content. Students and instructors can research vocational topics including computer science, engineering, healthcare, building trades, law enforcement, food industry, sales and retail, and transportation.

Continental Europe Database: A multidisciplinary collection that helps researchers in all fields to access the latest scholarly articles available in their area. It includes full-text, locally published academic journals by scholarly publishing organizations and educational institutions in many European countries including France, Italy, Germany, Denmark, Norway, Sweden, Switzerland, Spain, and Portugal. Major subject areas include business, science, technology, engineering, social sciences, education, and humanities.

East & Central Europe Database: Locally-sourced scholarly publishing adds important social, scientific, and business context to cross-disciplinary and globally relevant areas of study. This database features full-text academic journals that are locally published by scholarly publishing organizations and educational institutions located in the East and Central Europe region. Major subject areas include business, science, technology, engineering, medical, social sciences, education, arts, literature, history, and others.

East & South Asia Database: Provides full-text academic journals that are locally published by scholarly publishing organizations and educational institutions in East and South Asia countries, Hong Kong, Indonesia, Japan, Malaysia, South Korea, Philippines, Singapore, Taiwan, Thailand, and also China. Major subject areas include business, science, technology, engineering, medical, social sciences, political science, law, and humanities.

India Database: A comprehensive multidisciplinary resource that provides full-text, scholarly journals, all published in India. These scholarly sources support academic fields of study, such as business, medicine, science, technology, social sciences, and humanities. Providing a unique source of the very best scholarly periodical output from India, this database specializes in current scholarship originating in India, with most coverage from the last ten years and is updated daily with new content.

Latin America & Iberia Database: Provides full-text academic journals that are locally published by scholarly publishing organizations and educational institutions in many Latin American countries, including Argentina, Brazil, Chile, Colombia, Ecuador, Mexico, Nicaragua, Peru, Uruguay, Venezuela, as well as Spain and Portugal. Major subject areas include business, science, technology, engineering, medical, social sciences, education, arts, anthropology, law, and humanities.

Middle East & Africa Database: Locally-sourced scholarly publishing adds important social, scientific, and business context to cross-disciplinary and globally relevant areas of study. This database provides full-text academic journals that are locally published by scholarly publishing organizations and educational institutions in many Middle Eastern and African countries. Major subject areas include business, science, technology, engineering, social sciences, education, and humanities.

Publicly Available Content Database: Designed to complement other databases and collections, this database connects users to full text from publicly available scholarly content from thousands of sources from around the world. It includes content from major subject repositories such as arXiv as well as open access journals, journal articles, pre-prints, books, conference papers and reports.

Research Library: Provides an international mix of scholarly, professional, and consumer periodicals that cover over 150 subjects including business, the sciences, medical, technology, literature, the arts, and history. It is updated daily with new content and includes a deep backfile, providing users with deeper historical context. A key multidisciplinary resource, Research Library is built on renowned ProQuest vocabulary and indexing and brings all of these resources together through a single user-friendly interface.

INTERDISCIPLINARY CONTINUED

Turkey Database: Locally-sourced scholarly publishing adds important social, scientific, and business context to cross-disciplinary and globally relevant areas of study. This database provides full-text academic journals that are locally published by scholarly publishing organizations and educational institutions in Turkey. Major subject areas include business, science, technology, medical, engineering, social sciences, education, and humanities.

U.K. & Ireland Database: Locally-sourced scholarly publishing adds important social, scientific, and business context to cross-disciplinary and globally relevant areas of study. This database provides full-text academic journals that are locally published by scholarly publishing organizations and educational institutions in the United Kingdom and the Republic of Ireland. Major subject areas include business, science, technology, engineering, social sciences, education, and humanities. Researchers highly value local content.

NEWS

Canadian Newsstream: Offers unmatched access to 400+ Canadian news outlets and newspapers including The Globe and Mail, Toronto Star, along with newswires, websites, and broadcast transcripts that are in full-text format. Extensive backfiles are available for most news sources, providing full access to the articles, columns, editorials, and features published in each. Most titles are updated daily and some backfiles date as far back as the late 1970s.

Global Breaking Newswire: In the modern news world, newswires are the chief source of timely news. With increasing pressures on the traditional news industry, newswires are often the only news coverage for many large regions of the globe. This is the premier library news product providing timely access to the best newswire content available from around the globe for the modern researcher. It contains a growing archive of news indexes that are accessible through the familiar & popular research functionality of the ProQuest platform.

International Newsstream: Offers the most recent news content from outside of the U.S. and Canada with archives that stretch back decades. Featuring newspapers, newswires, transcripts, and digital-only news sites in full-text format. 1,300+ of the world's top news sources such as El Norte, Financial Times, The Guardian, Jerusalem Post, The Daily Telegraph, The Wall Street Journal, The Age, The Sydney Morning Herald, The Times of India, and the BBC Monitoring series of publications are all included in the collection.

U.S. Newsstream: Enables users to search current U.S. news content, as well as archives that stretch back into the 1980s. This contemporary news collection delivers current, full-text news sources including newspapers, newswires, news journals, television and radio transcripts, blogs, podcasts, and digital-only websites. There are no paywalls, and most content loads same day – oftentimes by 8 AM U.S. Eastern time. This comprehensive collection offers researchers unparalleled access to current news sources in the U.S., including preferred access for library users to content from The New York Times, Chicago Tribune, Los Angeles Times, The Wall Street Journal, The Washington Post, CNN Newswires. It also offers exclusive access to over 80 Gannett regional newspapers and includes hundreds of other local, regional, and national titles from throughout the U.S.

SCITECH

Advanced Technologies & Aerospace Database: Provides full-text titles from around the world, including scholarly journals, trade and industry journals, magazines, technical reports, conference proceedings, dissertations, and government publications. Topics covered include aeronautics, astronautics, communications, computer and information technology, electronics, lasers, solid-state materials and devices, space sciences, and telecommunications.

Agricultural Science Database: Providing vast coverage of basic and applied research on agricultural topics, this database features scholarly peer-reviewed journals. In fact, full text coverage goes beyond journals to include dissertations, relevant trade and industry journals and reports, as well as coverage of conference proceedings and newswires. Together this wide range of materials brings together full text to support the full spectrum of academic users studying and researching the agricultural sciences and related disciplines.

Biological Science Database: Highly-relevant full text database of varied content across the Biological Sciences. Our coverage goes beyond merely providing scholarly and peer reviewed journals; in addition we provide relevant trade and industry journals and reports, as well as coverage of conference proceedings, reports and newswires in order to bring you the widest range of materials of interest to specialists in the biological and related sciences.

Computer Science Database: A large and growing set of ongoing full text from publishers such as Springer, Cambridge University Press, Association for Information Systems, Emerald Group, the database supports the needs of students and faculty in the fast growing fields of information technology and computer science. The database is a growing resource of over 7 million full text articles from 1300+ sources. In full-text format, researchers have access to all the charts, diagrams, graphs, tables, photos, and other graphical elements so vital to scientific and engineering literature.

SCITECH CONTINUED

Earth Atmospheric & Aquatic Science Database: A primarily full text interdisciplinary resource of scholarly and learned material with a particular focus on geoscience, meteorology, climatology, aquatic science, and related disciplines. Coverage includes thousands of full-text publications including peer-reviewed journals, trade publications, dissertations, conference proceedings, reports, video material, and much more. In combination with the ProQuest platform's tools and functionality this varied and growing content set serves the needs of students, faculty, and researchers around the world.

Engineering Database: Offers primarily full text database of peer-reviewed journals, trade journals, magazines, dissertations, and government reports from authoritative publishers around the world. Subject coverage is cross-disciplinary with a focus on chemical engineering, civil engineering, electrical engineering, mechanical engineering, and bioengineering. This breadth of scholarly and technical literature makes it a useful resource for a wide variety of users from engineering domain experts to undergraduate students.

Environmental Science Database: Provides the most complete collection of resources available to support this multidisciplinary field. The collection combines specialist topic resources from disciplines such as engineering, biotechnology, bacteriology, atmospheric science, ecology and biology and features a diverse range of sources including scientific journals, trade journals, new sources, conference proceedings, reports, monographs, books and government publications.

Materials Science Database: Beyond merely providing scholarly and peer reviewed journals, the Materials Science Database provides relevant trade and industry journals and reports, as well as coverage of conference proceedings and newswires in order to bring you the widest range of materials of interest to specialists in technology fields. This database features around 1,000 titles in full text. The overall philosophy in assembling our content collections is to bring the widest range of relevant materials at an affordable price to help libraries build the most extensive discovery resources for researchers in this field.

Military Database: Offers topics across all government and military branches, including international relations, political science, criminology, defense, aeronautics and space flight, communications, civil engineering, and more. In addition to scholarly journals, the database also includes magazines, technical reports, conference proceedings, trade and industry journals, and government publications.

Science Database: ProQuest Science Database contains 5.5 million full text articles from 1,400+ sources. It is an affordable foundational collection perfect for two-year institutions who need a broad, interdisciplinary science and engineering resource. The Science Database features ongoing full-text from prestigious and highly selective publishers such as Nature Publishing, Springer, Emerald, Cambridge University Press and many others.

Telecommunications Database: An essential resource for anyone researching the industry or its technology. Whether you're looking for the latest news on WAP technology, following market penetration of new technologies, or gathering information about the key players in this field. Telecommunications Database helps you stay one step ahead by providing the full text of over 220 titles with records dating back to the early 1990's.

SOCIAL SCIENCE

Criminal Justice Database: A comprehensive database supporting research on crime, its causes and impacts, legal and social implications, as well as litigation and crime trends. As well as U.S. and international scholarly journals, it includes correctional and law enforcement trade publications, crime reports, crime blogs and other material relevant for researchers or those preparing for careers in criminal justice, law enforcement and related fields.

Education Database: Offers 1,000+ full-text scholarly journals and 55,000+ dissertations, supporting research on the theory and practice of education. Education Database covers not only the literature on primary, secondary, and higher education but also special education, home schooling, adult education, and hundreds of related topics.

Library Science Database: Gives full-text access to 150+ publications in library and information science. It covers a range of titles and topics relevant to the theoretical and applied study of library science, including trade publications aimed at the library profession as well as scholarly journals.

Linguistics Database: Includes full-text journals and other sources in linguistics, including many titles indexed in Linguistics and Language Behavior Abstracts (LLBA). It covers all aspects of the study of language including phonetics, phonology, morphology, syntax and semantics.

Political Science Database: Gives users access to 750+ full text leading political science and international relations journals. Political Science Database also includes thousands of recent, full-text, political science dissertations and other sources such as country reports and policy papers.

Religion Database: Provides a wide range of full-text periodicals and other sources for diverse religious and spiritual studies. It covers formal theological studies of many worldwide religions. In addition to scholarly journals, there are many titles from religious publishing bodies and nondenominational organizations. The resource reflects a wide spectrum of religious belief systems and supports the global study of religion.

Social Science Database: Includes 1400+ full text scholarly journals providing extensive coverage across a wide range of social science disciplines including anthropology, criminology, economics, education, political science, social work, and sociology.

Sociology Database: Gives users access to 700+ full-text journals in sociology and social work including many core titles included in Sociological Abstracts and Social Services Abstracts. The Sociology Database covers the international literature of sociology and social work, including culture, social structure, history, theory of sociology, social psychology, substance abuse, addiction, and more.
