BEACH FRONT DREAM HOUSE

Published November 15th, 2018

Since the past three years, I've been coming back to Bali for long period of times. I have stayed at **the most incredible villas and properties across the island**, believe me! But this one, was out of this world. All I have always dreamed of for a house, it became real.

To be a bit picky, I would say that the only thing that is missing in this villa is a private beach. Having this incredible ocean front villa deserves a private beach. But considering that is located in a prime location right in the center of Bali, It is quite impossible.

This property is a **six-bedroom villa** with an avant-garde design. The **Australian interior designer Alex Zabotto-Bentley**, combined ancient and modern to create a lush tropical oasis with extravagant views over the Indian Ocean and Bali's famed sunsets.

The villa comes with a legion of **25 professional staff**. A car and a driver at your disposal, a personal in-house concierge. 24h security, a spa room with 3 individual cabins and an extra kids/jacuzzi pool.

The level of service at the villa is totally up to you. There is a in-house chef where you can select among basically any cuisine of the world.

There is a huge garden next to the pool with a football court and surfboards at your disposal to go straight to surf at any time.

We rented this villa due to the visit of our friends from Dubai. We had so much fun! It is perfect for a group of friend or family. It also can be booked for special events such as wedding, parties, business events...
