

CLIMATE RESILIENT DEVELOPMENT PATHWAYS FOR FOOD SYSTEMS TRANSFORMATION

JULY 6, 17:00 – 18:30 CEST

UNITED NATIONS
FOOD SYSTEMS
SUMMIT 2021

ACTION TRACK #5:
BUILD RESILIENCE TO
VULNERABILITIES,
SHOCKS AND STRESS

Climate Resilient Development Pathways (CRDPs) are new development concepts that combine climate mitigation and climate adaptation, to support sustainable development and ensuring ecological and human well-being.

This side event will bring together physical & social research groups, cooperation agencies, and UN experts to discuss the CRDPs conceptual framework, showcase case studies in Africa of integration of foresight methods, risk management, adaptive social protection and on-going feasibility and effectiveness assessments of multisectoral adaptation options for food security and nutrition.

Program

- 17:05 Welcome-Intro– Sandrine Dixon-Declève (Chair UNFSS AT5 Resilience)
- 17:10 Climate resilient development pathways framework
- 17:15 Climate change projections | Food security - Daniel Mason-D’Croz (CSIRO)
- 17:25 Climate Resilient Development Pathways in Africa CGIAR - Sabrina Chesterman
- 17:40 Sahel Resilience Initiative - Volli Carucci (World Food Programme)
- 17:55 Rogerio Bonifacio (World Food Programme)
- 18:05 Multi-sectorial adaptation - Cristina Tirado (WFP, IPCC Lead Author AR6)
- 18:15-18:30 Audience Q&A

Join us this **Tuesday, July 6** at 17:00 CEST for the discussions.
