Using Election Systems

Number of Counties Using
Election Systems

Paper Ballot - individual ballots printed on paper, marked with a pencil, counted by hand.

Vote Recorder - holes are punched out next to choice. Ballot cards are counted by computer.

Optical Scan - choices are darkened in with pencil on card which is read by scanner for vote totals.

Voting Machine - votes are cast by pulling down levers for parties or candidates on upright machine. Votes are totaled on each machine on a paper scroll.

Electronic - votes are cast by pressing buttons for candidates on upright machine. Votes are totaled by computer from a cartridge from each machine.

Removal of Voters for Failure to Vote

Every two years (odd-numbered), the Executive Director deletes, from the roster of active registered voters, the name of any elector who has failed to vote in each of two consecutive state-wide general elections and also failed to vote in any other election which might have been held in the precinct in which the voter is registered within the time period between the two general elections. SC Code 7-3-20.

Although voters' names are removed from the active lists for failure to vote, their names are not removed from the central voter registration system. These people are still eligible voters if they have not moved outside their precinct. They may become active voters again by voting.

The reason for the fluctuation of number of registered voters each year is due to these deletions. Numbers also decrease due to death, moving out of the precinct or conviction of a felony or crime against the election laws. The number of voters listed is always the active number.
