## Contents

<b>1</b>	<b>Ion Beam</b>	1
1.1	Introduction	1
1.2	Large Area Sputter Modeling	2
1.3	Focused Ion Beam	14
<b>2</b>	<b>X-ray Lithography</b>	29
2.1	Introduction	29
2.2	Mask Heating and Distortion	30
2.3	Thermal Analysis of Resist	47
2.4	Microstructure Transfer Accuracy	63
<b>3</b>	<b>Laser Chemical Vapor Deposition</b>	77
3.1	Introduction	77
3.2	Kinetically Limited Deposition	78
3.3	Mass Transport Limited Deposition	103
<b>4</b>	<b>Laser Photopolymerization</b>	123
4.1	Introduction	123
4.2	Kinetics of Photopolymerization	124
4.3	Photofabrication	140
4.4	Process Models	150
<b>5</b>	<b>Laser Ablation</b>	159
5.1	Introduction	159
5.2	Photothermal Models	160
5.3	Photochemical Models	176
5.4	Photophysical and Other Models	187
5.5	High Energy Density Laser Models	210
