## 1 Normal Brain Myelination and Normal Variants . . . . . 1

<b>Introduction</b> . . . . .	1
<b>Chronological Imaging Atlas of Normal Myelination</b> . . . . .	2
<b>Cavum Septi Pellucidi, Cavum Vergae and Cavum Velum Interpositum</b> . . . . .	11
Cavum Septi Pellucidi and Vergae . . . . .	11
Cavum Velum Interpositum . . . . .	12
<b>Ventriculus Terminalis</b> . . . . .	14

## 2 Congenital Brain Malformations . . . . . 17

<b>Introduction</b> . . . . .	17
<b>Corpus Callosum Agenesis/Dysgenesis</b> . . . . .	19
Completely Absent Corpus Callosum . . . . .	19
Near Complete Agenesis of Corpus callosum . . . . .	20
<b>Pericallosal Lipoma</b> . . . . .	22
Curviline	
Parietal Cephalocele . . . . .	29
Parietal Cephalocele . . . . .	30
Skull Base Encephalocele . . . . .	31
Parietal Meningocele . . . . .	32
Spinal Lipomeningocele . . . . .	33
<b>Micrencephaly with Lissencephaly</b> . . . . .	34
<b>Generalized Cortical Dysplasia</b> . . . . .	35
<b>Schizencephaly</b> . . . . .	37
Open Lip Schizencephaly (Type II) . . . . .	37
Unilateral Closed Lip Schizencephaly (Type I) . . . . .	38

	. . . 39
	. . . 40
	. . . 40
	1
with Agenesis of Corpus Callosum . . . . .	41
Focal Subcortical Heterotopia . . . . .	43
Band Heterotopia (“Double Cortex”) . . . . .	44
<b>Holoprosencephaly</b> . . . . .	45
Septo-Optic Dysplasia in a Teenager . . . . .	45
Septo-Optic Dysplasia . . . . .	46
Alobar Holoprosencephaly . . . . .	47
Semilobar Holoprosencephaly . . . . .	48
Semilobar Holoprosencephaly with Pierre-Robin Syndrome . . . . .	49
<b>Chiari Malformations</b> . . . . .	51
Chiari I Malformation with Low but Rounded Tonsils . . . . .	51
Unilateral Chiari I Malformation with Pointed Tonsils . . . . .	52
Chiari II (Arnold-Chiari) Malformation . . . . .	53
Chiari II and Meningomyelocele in a Newborn . . . . .	54
Chiari III and Occipital Encephalocele . . . . .	55
Chiari III and Spina Bifida . . . . .	56
<b>Dandy-Walker Syndromes</b> . . . . .	58
Dandy-Walker Variant with Enlargement of Fourth Ventricle . . . . .	58
Dandy-Walker Variant with No Separate Fourth Ventricle . . . . .	59
Dandy-Walker Variant with Elevation of Torcula . . . . .	60
<b>Joubert’s Syndrome</b> . . . . .	61
<b>Rhombencephalosynapsis</b> . . . . .	63
<b>Cloverleaf Skull Syndrome (Kleeblattschädel Anomaly)</b> . . . . .	64
<b>Hemimegalencephaly</b> . . . . .	66

<b>3 Inherited Neurological Diseases and Disorders of Myelin</b> . . . . .	69	<b>4 Infection</b> . . . . .	125
<b>Introduction</b> . . . . .	69	<b>Introduction</b> . . . . .	125
<b>Hereditary Myelin Disorders</b> . . . . .	70	<b>Meningitis and Complications of Meningitis</b> . . . . .	127
Krabbe's Disease		Acute Pyogenic Meningitis . . . . .	127
(Globoid Cell Leukodystrophy) . . . . .	70	Subacute Pyogenic Meningitis	
Mucopolysaccharidoses (MPS) . . . . .	73	with Hydrocephalus . . . . .	128
Zellweger Syndrome . . . . .	78	Suppurative Meningitis with Subdural	
Adrenoleukodystrophy . . . . .	79	Effusions and Cortical Ischemia . . . . .	128
Neuronal Ceroid Lipofuscinosis (NCL) . . . . .	80	Suppurative Meningitis and Brain Infarct . . . . .	130
Mitochondrial Disorders . . . . .	83	Meningitis with Multiple Infarcts . . . . .	131
Cerebellar Degeneration Associated		Candida Meningitis . . . . .	132
with Coenzyme Q10 Deficiency . . . . .	90	<b>Brain Abscess</b> . . . . .	133
Hallervorden-Spatz Disease . . . . .	91	<b>Empyema</b> . . . . .	135
<b>Defects in Genes Encoding</b>		Subdural Empyema with Cortical	
<b>the Myelin Proteins</b> . . . . .	93	and Meningeal Involvement . . . . .	135
Pelizaeus-Merzbacher Disease . . . . .	93	Subdural Empyema . . . . .	136
p10 p9 Translocation . . . . .	95	Epidural Empyema . . . . .	137
18q Syndrome . . . . .	97	<b>Septic Emboli</b> . . . . .	138
<b>Disorders in Amino Acid</b>		<b>Nocardiosis</b> . . . . .	139
<b>and Organic Acid Metabolism</b> . . . . .	98	<b>Citrobacter Infections</b> . . . . .	141
Phenylketonuria (PKU) . . . . .	98	Citrobacter Meningitis and Cerebritis . . . . .	141
Propionic Acidemia . . . . .	100	Chronic Citrobacter Cerebritis . . . . .	142
Maple Syrup Urine Disease (MSUD) . . . . .	101	<b>Herpes Simplex Virus Encephalitis</b> . . . . .	143
Galactosemia . . . . .	102	Neonatal Herpes Simplex	
Late-Onset Type of Ornithine		Virus Encephalitis Type 2 . . . . .	143
Transcarbamylase (OTCD) Deficiency		Neonatal Herpes Simplex	
with a Recent Occipital Infarct . . . . .	104	Virus Encephalitis Type 2 . . . . .	144
<b>Miscellaneous</b> . . . . .	106	Herpes Simplex Virus Encephalitis Type 1 . . . . .	147
Multiple Sclerosis (MS) . . . . .	106	<b>Congenital Cytomegalovirus Infection</b> . . . . .	149
Acute Disseminated Encephalomyelitis		<b>Cytomegalovirus Encephalitis</b> . . . . .	151
(ADEM) . . . . .	110	<b>Viral Encephalitis (Influenza Encephalopathy)</b> . . . . .	152
Perisylvian Syndrome . . . . .	112	<b>Congenital Human Immunodeficiency Virus</b>	
Merosin-Deficient Congenital		<b>(HIV) Infection</b> . . . . .	153
Muscular Dystrophy (CMD) . . . . .	114	<b>Cysticercosis</b> . . . . .	157
Vanishing White Matter (VWM) Disease . . . . .	115	Intraventricular Cysticercosis . . . . .	157
Megalencephalic Leukoencephalopathy		Subarachnoid Cysticercosis . . . . .	157
with Subcortical Cysts (MLC)		Parenchymal Cysticercosis . . . . .	158
and Normal Development . . . . .	117	Calcified Cysticercosis . . . . .	159
Delayed Myelination . . . . .	119	<b>Tuberculosis</b> . . . . .	160
Autoimmune Polyglandular Syndrome		Tubercular Meningitis . . . . .	160
(APS) . . . . .	121	Intracranial Tuberculoma . . . . .	160
Osmotic Myelinolysis		<b>Tuberculous Abscesses</b> . . . . .	161
(Extrapontine Myelinolysis) . . . . .	123	<b>Limbic Encephalitis</b>	
		<b>(Paraneoplastic Limbic Encephalitis)</b> . . . . .	162
		<b>Acute Cerebellitis</b> . . . . .	164
		<b>Rasmussen's Encephalitis</b> . . . . .	165

## 5 Posterior Fossa Tumors . . . . . 167

<b>Introduction</b> . . . . .	167
Diffusion-Weighted Imaging (DW imaging)	167
MR Spectroscopy . . . . .	167
<b>Medulloblastoma</b> . . . . .	169
Solid Medulloblastoma . . . . .	169
Hemorrhagic/Necrotic Medulloblastoma . .	170
Medulloblastoma with CSF Seeding . . . . .	172
<b>Cerebellar Pilocytic Astrocytoma</b> . . . . .	173
Mostly Solid Cerebellar Pilocytic	
Astrocytoma . . . . .	173
Cystic Cerebellar Pilocytic Astrocytoma	
with Mural Nodule . . . . .	175
<b>Ependymoma</b> . . . . .	176
<b>Brain Stem Glioma</b> . . . . .	178
<b>Epidermoid Tumor</b> . . . . .	180
<b>Arachnoid Cyst</b> . . . . .	181
<b>Von Hippel-Lindau Disease (VHL)</b> . . . . .	182
<b>Acute Lymphoblastic Leukemia</b>	
(Precursor B) . . . . .	184
<b>Chordoma</b> . . . . .	185

## 6 Supratentorial Brain Tumors . . . . . 187

<b>Introduction</b> . . . . .	187
DW Imaging . . . . .	188
MR Spectroscopy . . . . .	188
<b>Glioblastoma Multiforme (GBM)</b> . . . . .	189
<b>Juvenile Pilocytic Astrocytoma (JPA)</b> . . . . .	191
<b>Mixed Pleomorphic Xanthoastrocytoma</b>	
(PXA) and Ganglioglioma . . . . .	192
<b>Oligodendroglioma</b> . . . . .	194
<b>Ependymoma</b> . . . . .	197
<b>Choroid plexus papillomas</b> . . . . .	199
Choroid Plexus Papilloma in the Trigone . .	199
Choroid Plexus Papilloma at the Foramen	
of Monro . . . . .	201
<b>Gliomatosis Cerebri</b> . . . . .	202
<b>Ganglioglioma</b> . . . . .	203
<b>Central Neurocytoma</b> . . . . .	206
<b>Dysembryoplastic Neuroepithelial Tumor</b>	
(DNET) . . . . .	208
<b>Germinoma of the Pineal Region</b> . . . . .	208
<b>Pineal Teratoma</b> . . . . .	210
<b>Pineoblastoma</b> . . . . .	211
<b>Pineal Embryonal Carcinoma</b> . . . . .	212
<b>Primitive Neuroectodermal Tumor (PNET)</b> . .	214
<b>Atypical Teratoid Rhabdoid Tumor</b> . . . . .	215
<b>Esthesioneuroblastoma</b> . . . . .	217

<b>Trigeminal Neurofibroma</b> . . . . .	218
<b>Eosinophilic Granuloma</b> . . . . .	220
<b>Craniopharyngioma</b> . . . . .	220
<b>Pituitary Adenoma</b> . . . . .	222
Pituitary Macroadenoma . . . . .	222
Pituitary Microadenoma (Prolactinoma) . .	224
<b>Subependymal Giant Cell Astrocytoma (SEGA)</b>	225
<b>Atypical Meningioma</b> . . . . .	226
<b>Congenital Brain Tumors</b> . . . . .	229
Congenital Teratoma . . . . .	229
Congenital Glioblastoma Multiforme . . . .	230
<b>Orbital Juvenile Pilocytic Astrocytoma (JPA)</b> . .	230
<b>Optic Pathway Glioma</b> . . . . .	232
<b>Hypothalamic Hamartoma</b>	
(Hamartoma of Tuber Cinereum) . . . . .	233

## 7 Brain Damage . . . . . 235

<b>Introduction</b> . . . . .	235
<b>Nonaccidental Trauma</b> . . . . .	236
Scalp Injury (Subgaleal Hemorrhage) . . . .	236
Skull Fracture . . . . .	237
Subdural Hemorrhage . . . . .	238
Subarachnoid Hemorrhage . . . . .	239
Parenchymal Hemorrhage and Ischemia . .	240
Diffuse Axonal Injury . . . . .	241
Hypoxic Ischemic Injury . . . . .	242
Infarct . . . . .	243
Atrophy . . . . .	244
Venous Sinus Thrombosis . . . . .	245
Thalamic Infarcts in a	
Shaken Infant Syndrome . . . . .	245
<b>Epidural and Subdural Hematoma</b> . . . . .	247
Epidural Hematoma (EDH) . . . . .	247
Subdural Hematoma (SDH) . . . . .	249
<b>Contusion</b> . . . . .	251
<b>Diffuse Axonal Injury (DAI)</b> . . . . .	252
DAI in Corpus Callosum and Parenchyma . .	252
Hemorrhagic Contusion with DAI . . . . .	254
Multiple Areas of DAI in Corpus Callosum .	255
DAI with Excitotoxic Mechanism . . . . .	256
<b>Periventricular Leukomalacia (PVL),</b>	
<b>Preterm Hypoxic Ischemic</b>	
<b>Encephalopathy (HIE)</b> . . . . .	258
Periventricular Leukomalacia	
with White Matter Aplasia . . . . .	258
Periventricular Leukomalacia	
with Thin Corpus Callosum . . . . .	259
Unilateral PVL . . . . .	260
Periventricular Leukomalacia with	
Dystrophic Parenchymal Calcification . .	260

<b>Hypoxic Ischemic Encephalopathy (HIE)</b> . . . . .	263	<b>Sinovenous Thrombosis</b> . . . . .	315
Hypoxic Ischemic Encephalopathy		Transverse Sinus Thrombosis	
with Infarcts . . . . .	263	Extending Into Superior Sagittal,	
Hypoxic Ischemic Encephalopathy		Sigmoid and Jugular Sinus . . . . .	315
with Brain Edema . . . . .	263	Evolution of Transverse Sinus Thrombosis . . . . .	316
Hypoxic Ischemic Encephalopathy		<b>Sturge-Weber (SWS) Syndrome and Lack</b>	
Post-Surgery . . . . .	263	<b>of Flow Through the Superior Sagittal</b>	
Hypoxic Ischemic Encephalopathy		<b>Sinus Simulating Chronic Superior</b>	
with Seizures . . . . .	265	<b>Sagittal Sinus Thrombosis</b> . . . . .	318
<b>Hypoxic Encephalopathy in Near-Drowning</b> . . . . .	267	<b>Iatrogenic Sinus Thrombosis in an</b>	
<b>Multicystic Encephalomalacia</b> . . . . .	268	<b>Infant Treated with Extracorporeal</b>	
<b>Status Epilepticus and Postictal Stage</b> . . . . .	270	<b>Membrane Oxygenation (ECMO)</b> . . . . .	320
Status Epilepticus with Partially		<b>Intracranial Aneurysm</b> . . . . .	322
Reversible Tissue Changes . . . . .	270	Berry Aneurysm . . . . .	322
Status Epilepticus with Permanent		Fusiform Aneurysm . . . . .	323
Tissue Damage . . . . .	272	Berry Aneurysm with Significant	
<b>Cortical Laminar Necrosis</b> . . . . .	275	Vasospasm . . . . .	324
<b>Cyclosporin-Induced Encephalopathy</b> . . . . .	277	<b>Hemolytic Uremic Syndrome (HUS)</b> . . . . .	326
<b>Pontine and Extrapontine Myelinolysis</b>		<b>Intracerebral Hematoma</b> . . . . .	327
<b>in the Setting of Rapid Correction</b>		<b>Moyamoya Disease</b> . . . . .	329
<b>of Hyponatremia</b> . . . . .	278	Bilateral Moyamoya Disease . . . . .	329
<b>Cephalhematoma</b> . . . . .	280	Bilateral Moyamoya Disease	
CT Scan of Cephalhematoma . . . . .	280	with a Major Infarct . . . . .	330
MR Imaging of Cephalhematoma . . . . .	281	Unilateral Moyamoya (Variant) . . . . .	330
Cephalhematoma and		Sickle cell Disease Leading	
Hypoxic-Ischemic Insult . . . . .	283	to Moyamoya Disease . . . . .	330
		<b>Vein of Galen Malformation</b> . . . . .	332
<b>8 Vascular Disorders</b> . . . . .	287		
<b>Introduction</b> . . . . .	287	<b>9 Head and Neck</b> . . . . .	335
<b>Childhood Cerebrovascular Diseases</b>		<b>Introduction</b> . . . . .	335
<b>with Infarct</b> . . . . .	288	<b>Multinodular Goiter</b> . . . . .	335
Dissection . . . . .	288	<b>Thyroglossal Duct Cyst</b> . . . . .	337
Sickle Cell Hemoglobinopathy with Infarct . . . . .	292	<b>Tornwaldt Cyst</b> . . . . .	339
Herpesvirus Infections of the CNS		<b>Cystic Hygroma in Neck of Newborn</b> . . . . .	340
and Vascular Thrombosis . . . . .	296	<b>Neurofibromatosis</b> . . . . .	342
CNS Vasculitis and Infarct . . . . .	298	Plexiform Neurofibromatosis of the Neck . . . . .	342
<b>Wiskott-Aldrich Syndrome (WAS),</b>		Neurofibromatosis of the Orbit . . . . .	343
<b>Vasculitis and Infarct</b> . . . . .	301	<b>Kikuchi Disease</b> . . . . .	344
<b>Arteriovenous Malformations (AVMs)</b> . . . . .	302	<b>Dermoid</b> . . . . .	346
<b>Cavernous Malformation</b> . . . . .	306	<b>Schwannoma of the Tongue</b> . . . . .	348
Solitary Intrinsic Parenchymal Lesion . . . . .	306	<b>Pleomorphic Adenoma of the Nose</b> . . . . .	349
Solitary Exophytic Cavernous		<b>Rhabdomyosarcoma</b> . . . . .	350
Malformation . . . . .	307	<b>Acinic Cell Carcinoma of the Parotid Gland</b> . . . . .	352
Solitary Cavernous Malformation		<b>Anophthalmos</b> . . . . .	354
with Developmental Venous Anomaly . . . . .	308	<b>Wolf-Hirschhorn Syndrome</b> . . . . .	356
Multiple Cavernous Malformations . . . . .	309	<b>Retinopathy of Prematurity</b> . . . . .	357
Cavernous Malformation Simulating		<b>Hemangioma</b> . . . . .	358
Neoplasm with Major Bleed . . . . .	311	Hemangioma of the Parotid Gland . . . . .	358
<b>Developmental Venous Anomaly</b> . . . . .	312	Hemangioma of the Face and Orbit . . . . .	359
<b>Capillary Telangiectasia</b> . . . . .	314	<b>Langerhans Cell Histiocytosis</b> . . . . .	360

Osteosarcoma of the Cranium . . . . .	362
Fibrous Dysplasia . . . . .	364
Bilateral Coronoid Hyperplasia of the Mandible Causing Trismus . . . . .	365
Dental Radicular Cyst . . . . .	367
Mastoiditis with Sigmoid Sinus Thrombosis . . . . .	368
Arteriovenous Fistula of Vertebral Artery . . . . .	369

## 10 Spine . . . . . 371

Introduction . . . . .	371
Chiari I Malformation . . . . .	372
Tethered Cord with Lipoma . . . . .	373
Case 1 . . . . .	373
Case 2 . . . . .	374
Ventriculus Terminalis of the Conus Medullaris . . . . .	375
Diastematomyelia . . . . .	376
Separate Thecal Sacs . . . . .	376
Single Thecal Sac . . . . .	376
Dermal Sinus Tract . . . . .	378
Spinal Lipomas . . . . .	380
Case 1. Intra- and Extramedullary Lipomas . . . . .	380
Case 2. Extramedullary Cervical Lipoma with Cord Compression . . . . .	381
Case 3. Intradural, Extramedullary Lipoma at the Conus . . . . .	382
Caudal Regression Syndrome . . . . .	383
Congenital Spinal Scoliosis, Kyphosis and Kyphoscoliosis . . . . .	384
Lumbar Hemivertebra . . . . .	384
Thoracic Hemivertebra . . . . .	386
Kyphosis . . . . .	387
Arthrogryposis (Larsen's Syndrome) . . . . .	388
Mucopolysaccharidoses (MPS) . . . . .	388
Hurler/Scheie Syndrome (MPS Type I H/S) . . . . .	388
Morquio's Syndrome (MPS Type IV-A). . . . .	390
Spinal Cord Astrocytoma . . . . .	391
Intraspinal Ependymoma . . . . .	394
Holocord Ependymoma . . . . .	394
Conus Ependymoma . . . . .	395
Neurofibromatosis Type 1 (NF-1) . . . . .	396
Neurofibromatosis Type 2 (NF-2) . . . . .	398
Neurofibroma . . . . .	400
Metastatic Disease from CNS Primary Tumor . . . . .	402
Intradural, Extramedullary Metastases (Drop Metastases) . . . . .	402
Intramedullary Metastases . . . . .	403
Neuroblastoma . . . . .	404
Ganglioneuroma . . . . .	406

Ependyoblastoma . . . . .	407
Meningioma . . . . .	408
Meningeal Sarcoma . . . . .	410
Rhabdomyosarcoma . . . . .	411
Primary Rhabdomyosarcoma . . . . .	411
Metastatic Rhabdomyosarcoma . . . . .	412
Teratoma . . . . .	413
Sacroccygeal Teratoma . . . . .	414
Osteochondroma . . . . .	415
Hemangioma . . . . .	417
Spinal Trauma . . . . .	418
Ligament Injury and Subluxation with Acute Cord Edema . . . . .	418
Myelomalacia . . . . .	419
Brachial Plexus Trauma . . . . .	421
Nerve Root Avulsion from Accident . . . . .	421
Obstetric Brachial Plexus Injury . . . . .	422
Blunt Trauma to the Brachial Plexus . . . . .	423
Epidural Hematoma . . . . .	425
Spine Fractures . . . . .	426
Lumbar Spine Burst Fracture . . . . .	427
Lumbar Spine Compression Fracture . . . . .	428
Spondylolisthesis . . . . .	430
Case 1. Spondylolisthesis With Spinal Canal Narrowing . . . . .	430
Case 2. Spondylolisthesis Without Spinal Canal Narrowing . . . . .	430
Acute Disseminated Encephalomyelitis (ADEM) . . . . .	432
ADEM of Thoracic Cord . . . . .	432
ADEM of Cervical Cord . . . . .	433
Epidural Abscess . . . . .	434
Subacute Combined Degeneration of Spinal Cord (B12 Deficiency) . . . . .	435

## 11 Fetal Imaging . . . . . 437

Introduction . . . . .	437
Normal MR Images of Fetus . . . . .	438
Normal Fetus . . . . .	438
Parasagittal Images of Normal Development . . . . .	439
Anencephaly . . . . .	440
Holoprosencephaly . . . . .	441
Alobar Holoprosencephaly . . . . .	441
Alobar Holoprosencephaly . . . . .	442
Septo-Optic Dysplasia . . . . .	443
Aplasia of the Corpus Callosum . . . . .	444
Dandy-Walker Malformation . . . . .	445
Fetal Hydrops . . . . .	446
Fetal Sacroccygeal Teratoma . . . . .	448

<b>12 Miscellaneous</b> . . . . .	449	<b>Mesial Temporal Sclerosis</b> . . . . .	467
<b>Introduction</b> . . . . .	449	Bilateral Mesial Temporal Sclerosis . . . . .	467
<b>Neurofibromatosis</b> . . . . .	451	Hippocampus, Fornix and Mamillary Body Involvement in a Patient with Mesial Temporal Sclerosis . . . . .	468
Neurofibromatosis 1 and Bilateral Optic Nerve and Chiasm Glioma . . . . .	451	Unilateral Mesial Temporal Sclerosis . . . . .	469
Neurofibromatosis 1 and Unilateral Optic Nerve Glioma . . . . .	452	<b>Pituitary-Hypothalamic Axis Anomalies</b> . . . . .	470
Neurofibromatosis 1 and “Hamartomas”: Myelin Vacuolization in Supratentorial Area . . . . .	452	Absent Pituitary Gland. . . . .	470
Neurofibromatosis 1 and “Hamartomas”: Myelin Vacuolization in Cerebellum and Pons . . . . .	453	Ectopic Posterior Pituitary Gland . . . . .	471
Neurofibromatosis 1 and Plexiform Neurofibroma of the Skin . . . . .	454	Thickening of the Pituitary Stalk . . . . .	472
<b>Sturge-Weber Syndrome</b> . . . . .	456	<b>Posterior Reversible Encephalopathy   Syndrome (PRES)</b> . . . . .	474
Classic Sturge-Weber Syndrome . . . . .	456	<b>Arachnoid Cyst</b> . . . . .	476
Leptomeningeal Angioma and Prominent Choroid Plexus . . . . .	457	Arachnoid Cyst with Enlargement of the Calvaria . . . . .	476
Classic Sturge-Weber Syndrome with Hemiatrophy and Calvarial Changes . . . . .	458	Arachnoid Cyst with Midline Cyst . . . . .	477
<b>Tuberous Sclerosis</b> . . . . .	460	Arachnoid Cyst with Calvarial Remodeling . . . . .	478
Tuberous Sclerosis and Subependymal Nodules and Cortical Tubers . . . . .	460	Arachnoid Cyst in the Posterior Fossa . . . . .	478
Tuberous Sclerosis and Radial Bands and Cortical Tubers . . . . .	461	<b>Dermoid Cyst (Ectodermal Inclusion Cyst)</b> . . . . .	480
Tuberous Sclerosis and Parenchymal Calcification . . . . .	462	<b>Neuroepithelial (Ependymal) Cyst</b> . . . . .	481
Tuberous Sclerosis and Cortical Dysplasia-Mimicking Lesion . . . . .	463	<b>Temporal Lobe Cysts   and Fetal Alcohol Syndrome</b> . . . . .	483
Tuberous Sclerosis and Giant Cell Astrocytoma, Subependymal and Subcortical Tubers . . . . .	463	<b>Lenticulostriate Vasculopathy</b> . . . . .	485
Tuberous Sclerosis and Low-Grade Glioma . . . . .	465	<b>Craniosynostosis</b> . . . . .	487
		<hr/>	
		<b>Subject Index</b> . . . . .	489
