

This book explores the use of the internet by (non-Islamic) extremist groups, drawing together research by scholars across the social sciences and humanities. It offers a broad overview of the best of research in this area, including research contributions that address far-right, (non-Islamic) religious, animal rights, and nationalist violence online, as well as a discussion of the policy and research challenges posed by these unique and disparate groups. It offers an academically rigorous, introductory text that addresses extremism online, making it a valuable resource for students, practitioners and academics seeking to understand the unique characteristics such risks present.

**Mark Littler** is Senior Lecturer in Criminology and Policing at the University of Huddersfield, UK. He has previously held posts at the University of Hull, University of Oxford, and University of Manchester, and has been an Associate at the think-tank Demos and a Senior Fellow at the Centre for Analysis of the Radical Right. Mark has published on far-right extremism in journals including *The Journal of Language and Politics* and *Behavioral Science of Terrorism and Political Aggression*, and was recently commissioned to undertake work on online radicalisation by the UK Government's *Commission for Countering Extremism*.

**Benjamin Lee** is Senior Research Associate at the Centre for Research and Evidence on Security Threats, based at Lancaster University, UK. He has published on far-right extremism in journals such as *Democracy and Security* and *Behavioral Science of Terrorism and Political Aggression*. In addition, he has published in both the *International Journal of Press/Politics* and *New Media and Society*.
