Foreword	page 11
<i>Luigi Dei</i>	
Foreword	12
<i>Greek Patriarch, Custos of the Holy Land, Armenian Patriarch</i>	
In memoriam	14
<i>Father Michele Piccirillo (Luigi Marino, Carmelo Pappalardo, Grazia Tucci)</i>	
<i>Piergiorgio Malesani (Piero Baglioni, Carlo Alberto Garzonio, Giovanni Pratesi)</i>	
Introduction	16
<i>Grazia Tucci</i>	

PART ONE: ANALYSIS OF HISTORICAL AND DOCUMENTARY SOURCES

1.1. The archaeological and historical context of the <i>Basilica of the Holy Sepulchre in Jerusalem</i>	24
<i>Alessandra Angeloni, Carmelo Pappalardo</i>	
Introduction	25
1.1.1. Notes on modern studies (<i>C. Pappalardo</i>)	25
▪ Notes on modern surveys (1854-1940)	
1.1.2. Contemporary studies (<i>C. Pappalardo</i>)	29
▪ Synopsis of the construction phases	
1.1.3. The sequence of construction phases (<i>A. Angeloni</i>)	33
▪ The Constantine-era monument ▪ The restoration by Constantine IX Monomachus ▪ The Crusader restoration	
▪ The modern and contemporary era	
1.1.4. Preliminary report on stratigraphic analysis of the elevations (<i>A. Angeloni</i>)	38
▪ Methodological notes ▪ Procedure for compiling data	
1.1.5. Sample stratigraphical investigation: the North Transept of the Holy Sepulchre Basilica in Jerusalem (<i>A. Angeloni</i>)	39
1.1.6. Conclusions	42
<i>References and additional bibliography</i>	43
1.2. Wall Stratigraphy Analysis of the Holy Sepulchre in Jerusalem: the North Transept	46
<i>Alessandra Angeloni</i>	
1.2.1. Notes on the building phases of the North Transept	47
1.2.2. The stratigraphical sequence	48
▪ Phase I (II-IV century AD): the Hadrianic building ▪ Phase II (IV century AD): the Constantinian Complex	
▪ Intermediate phase II/III – between Phase II and Phase III ▪ Phase III (XI century AD): Restoration by Constantine IX Monomachus ▪ Phase IV (12th century AD): the Crusader transformation ▪ Intermediate phase IV/V: between Phase IV and Phase V ▪ Phase V (20th century AD): The modern restorations	
1.2.3. Conclusions	63
<i>References and additional bibliography</i>	64

1.3. Transformations of the subsurface before building works	page 68
<i>Osvaldo Garbarino, Simonetta Fiamminghi, Roberto Sabelli</i>	
Introduction (<i>S.Fiamminghi, O. Garbarino</i>)	69
1.3.1. The Holy Sepulchre of Jerusalem. Historical background and documentary sources (IV-XII century) (<i>O. Garbarino</i>)	71
▪ Comparative spreadsheet of the main written and iconographical sources concerning the Holy Sepulchre Sanctuaries (IV-XII centuries)	
1.3.2. The underground, the quarries, and the Holy Sepulchre: traces (<i>S. Fiamminghi</i>)	92
1.3.3. Meleke and Mizzi Hilu: the stones of the Holy Sepulchre (<i>S. Fiamminghi</i>)	96
1.3.4. The quarry and its transformations (<i>S. Fiamminghi</i>)	101
▪ The ancient cave ▪ The quarry during the Hadrianic transformation phase ▪ The quarry and the Constantinian construction	
1.3.5. The underground cave: the Chapels of St. Helena, of the Invention of the Cross and of St. Vartan (<i>S. Fiamminghi</i>)	105
1.3.6. The Chapel of St. Helena and Egeria's <i>locus post Crucem</i> (<i>O. Garbarino</i>)	108
<i>References I</i> [Subchapter 1, <i>O. Garbarino</i>]	110
<i>References II</i> [Subchapters 2-6, <i>S. Fiamminghi, O. Garbarino</i>]	112
1.4. The "Status Quo" in the Church of the Holy Sepulchre	114
<i>Athanasius Macora</i>	
1.4.1. The "Status Quo" in the Holy Sepulchre Church	115
1.4.2. The "Status Quo"	115
1.4.3. Examples of how the "Status Quo" works	116
1.4.4. Some principles regarding the "Status Quo" in the Church of the Holy Sepulchre	118
1.4.5. Monitoring and enforcement	118
1.4.6. The role of the government	119
1.4.7. Maintenance, restoration, and conservation of the <i>Basilica</i>	119
1.4.8. Conclusions	123
1.5. Surveys of the Holy Sepulchre in Jerusalem from the XVI century to present times	124
<i>Grazia Tucci</i>	

PART TWO: SURVEYS AND DIAGNOSTICS

2.1. The Survey of the Church of the Holy Sepulchre before the Digital Era	176
<i>Dennis D. Balodimos, Andreas Georgopoulos</i>	
Introduction	177
2.1.1. Methodology	178
2.1.2. Instrumentation used	180
2.1.3. Data acquisition	180
2.1.4. Data Processing	181
2.1.5. Difficulties and problems	183
2.1.6. Final drawings and their evaluation	185
2.1.7. Concluding remarks	185
<i>References</i>	189

2.2. 3D Survey of the Holy Sepulchre using Modern Geomatic Techniques	page	190
<i>Grazia Tucci, Valentina Bonora</i>		
Introduction		191
2.2.1. Previous survey and archaeological studies		191
▪ The 'integrated metric survey' for structural analyses		
2.2.2. Survey instruments and methods		194
▪ Work plan ▪ Instruments ▪ How 3D scanning systems work ▪ Acquisition ▪ Scan alignment and referencing		
2.2.3. Survey campaigns		197
▪ Data acquired during the survey campaigns ▪ Topographic control network and reference system		
▪ Topographic traverses		
2.2.4. Survey data management		200
▪ Data storage and digital preservation ▪ Data management ▪ Subprojects		
2.2.5. Graphical outputs of the 3D survey		218
▪ Preparation of the graphical output ▪ Section profile vectorization ▪ Vectorization of orthogonal views of the point cloud ▪ Digital orthophotos ▪ Videos ▪ Surface models		
References		230
2.3. From Survey to Model: a round-up of the Modelling Techniques		232
<i>Valentina Bonora, Francesco Algostino</i>		
2.3.1. Overview of the employment of reality-based 3D models in the Cultural Heritage field		233
2.3.2. 3D modelling of the Holy Sepulchre monumental complex		234
▪ Triangulation ▪ Mesh on the cloud ▪ Modelling using profiles ▪ Blocking out		
2.3.3. State of progress in modelling and future prospects		238
▪ Example of modelling workflow: the nave of the <i>Katholikon</i>		
References		246
2.4. Digital Models for documentation and communication: new outlooks for using the 3D database		248
<i>Grazia Tucci, Valentina Bonora, Francesco Algostino</i>		
Premise		249
2.4.1. Facing the risk with maintenance management		249
2.4.2. Digital records for Heritage documentation		250
2.4.3. Digital tools for Heritage documentation		252
2.4.4. The Appeal and Risks of Virtual Worlds		252
2.4.5. Management, Communication, Dissemination		253
▪ A proposal for a communication project ▪ A first experience: the virtual tour of the Holy Sepulchre		
2.4.6. 3D solid models		255
▪ Possible uses of solid models		
2.4.7. Future development prospects		256
2.4.8. How additive manufacturing works		258
▪ Stereolithography (SL) ▪ Laser Sintering (LS) ▪ Three dimensional printing ▪ Fused Deposition Modeling (FDM)		
▪ Other manufacturing techniques useful for exhibitive solid models ▪ Low cost and DIY projects		
2.4.9. How conventional prototyping (CNC) works		259
2.4.10. Work-flow		259
▪ Numerical description of the object ▪ Data preparation ▪ Surface tessellation ▪ Orientation and slicing		
▪ Making the solid model ▪ Final operations		
References		261
2.5. Seismic hazard in Jerusalem		262
<i>Giovanni Pratesi, Carlo Alberto Garzonio, Piergiorgio Malesani</i>		
2.5.1. Definition and methodologies		263
2.5.2. History of earthquakes in the Jerusalem Area		264

2.5.3. Hazard Maps – Peak Acceleration	page	267
2.5.4. Potentials of increases in seismic intensity		268
2.6. Seismic noise measurements: site effects and modal analysis		270
<i>Andrea Fiaschi, Luca Matassoni, Giovanni Pratesi, Piergiorgio Malesani</i>		
2.6.1. Methodological outline		271
2.6.2. Measurement campaign		275
2.6.3. Noise study		276
2.6.4. Earthquake noise comparison		278
2.6.5. Evaluation of the soil amplification and fundamental frequencies		279
2.6.6. Modal analysis		281
2.6.7. Comparison of engineering and instrumental modal analysis		283
2.6.8. Conclusions		283
2.7. Seismic noise measurements: depth of the substratum		284
<i>Andrea Fiaschi, Silvia Castellaro, Luca Matassoni</i>		
2.7.1. Introduction: available information		285
2.7.2. Methodology		285
2.7.3. Depth of the bedrock		286
2.8. Geology and Geomorphology		288
<i>Carlo Alberto Garzonio, Piergiorgio Malesani, Giovanni Pratesi</i>		
2.8.1. Geographical outlines		289
2.8.2. Geological setting		289
2.8.3. Geomorphological aspects, lapideous materials		291
2.9. Surveys for geomechanical characterization of the site and materials		294
<i>Carlo Alberto Garzonio, Piergiorgio Malesani, Giovanni Pratesi, Emma Cantisani</i>		
2.9.1. Methodological introduction		295
2.9.2. Geomechanical surveys		296
2.9.3. Physical and minero-petrographic characterization		298
2.9.4. External sites		299
2.9.5. Sites in the Holy Sepulchre		299
2.9.6. Results and conclusions		301
2.10. Seismic vulnerability analysis of the Monumental Complex of the Holy Sepulchre		302
<i>Francesco Pugi</i>		
2.10.1. General organization		302
▪ Analysis of the vulnerability of monumental buildings		
2.10.2. Results of the analysis		305
▪ Sustainable ground acceleration	▪ Scale of priorities for possible retrofitting interventions	
2.10.3. Detailed study		311
▪ The Greek Choir	▪ The Rotunda	
<i>Our memory lane</i>		329
<i>The Authors</i>		334
