

Contents

Preface and Acknowledgments	6
1. Introduction: Integrating macro and micro data for the analysis of early societies in Cyprus <i>Marialucia Amadio</i>	7
2. Exploring new spatial analysis method for earthen buildings: a combination of statistical analysis and soil micromorphology <i>Pantelitsa Mylona, Jean-Denis Vigne, Julia Watzel</i>	15
3. Building function through micromorphology of floors at Chlorakas-Paloures, Cyprus <i>Victor Klinkenberg</i>	32
4. New evidence on plaster manufacture at Middle Bronze Age Erimi <i>Marialucia Amadio</i>	50
5. Urbanism from the Ground Up: Investigating the Socio-Environmental Dynamics of Bronze Age and Iron Age Cyprus using soil and sediment micromorphology <i>Rachel Kulick</i>	61
6. Applications of Soil Micromorphology to Archaeoseismology Investigations in Cyprus <i>Amanda Gaggioli</i>	81
7. Once upon a time in micrometers... tools, activities and living spaces during the Pre-Pottery Neolithic in Cyprus <i>Laurence Astruc</i>	98
8. Getting under the slip: Technological and compositional studies of Red Polished ware from Early and Middle Bronze Age Cyprus <i>Maria Dikomitou Eliadou</i>	110
9. Paleodietary reconstruction through the lens of stable carbon and nitrogen isotope analysis: a synthesis of current and recent data from prehistoric Cyprus <i>Caterina Scirè-Calabrisotto</i>	127
10. A paleogenetic study from Erimi-Laonin tou Porakou: preliminary results and future perspectives <i>Francesco Fontani and Elisabetta Cilli</i>	140
11. From South Asia to the Eastern Mediterranean: the appearance of zebu cattle in the iconography of Bronze Age Cyprus and some consideration for future research <i>Anna Spyrou</i>	154
