<i>Preface</i>	xv
CHAPTER 1	
Introduction	1
1.1 Toward a Unified Theory of Economic Growth	3
1.2 Origins of Global Disparity in Living Standards	6
1.2.1 <i>Catalysts for the Engine of Transition from Stagnation to Growth</i>	6
1.2.2 <i>Persistence of Prehistorical Biogeographical Conditions</i>	7
1.2.3 <i>Convergence Clubs</i>	8
CHAPTER 2	
From Stagnation to Growth	9
2.1 The Malthusian Epoch	10
2.1.1 <i>Stagnation of Income per Capita in the Long Run</i>	11
2.1.2 <i>Population Dynamism</i>	12
2.1.3 <i>Fertility and Mortality</i>	14
2.1.4 <i>Fluctuations in Income and Population</i>	15
2.1.5 <i>Technological Progress</i>	16
2.1.6 <i>Main Characteristics of the Epoch</i>	17
2.2 The Post-Malthusian Regime	17
2.2.1 <i>Take-off in Income per Capita</i>	18
2.2.2 <i>Spike in Population Growth</i>	18
2.2.3 <i>Fertility and Mortality</i>	23
2.2.4 <i>Industrialization and Urbanization</i>	25
2.2.5 <i>Globalization and the Pace of Industrialization</i>	27
2.2.6 <i>Central Features of the Regime</i>	29

2.3	Industrialization and Human Capital Formation	30
2.3.1	<i>Industrial Demand for Education</i>	31
2.3.2	<i>Land Concentration and Human Capital Formation</i>	37
2.3.3	<i>Land Reforms and Education Reforms</i>	39
2.3.4	<i>Political and Education Reforms</i>	42
2.3.5	<i>Human Capital Formation in Less Developed Economies</i>	45
2.3.6	<i>Main Insights</i>	45
2.4	The Demographic Transition	46
2.4.1	<i>Decline in Population Growth</i>	46
2.4.2	<i>Fertility Decline</i>	49
2.4.3	<i>Mortality Decline</i>	51
2.4.4	<i>Life Expectancy</i>	52
2.4.5	<i>Central Characteristics</i>	54
2.5	The Modern Growth Regime	55
2.5.1	<i>Rapid Industrialization and Human Capital Formation</i>	55
2.5.2	<i>Sustained Growth of Income per Capita</i>	57
2.5.3	<i>Divergence in Income and Population across the Globe</i>	57
2.5.4	<i>Insights for Comparative Development</i>	64
2.6	Concluding Remarks	65
CHAPTER 3		
	The Malthusian Theory	67
3.1	The Basic Structure of the Model	68
3.1.1	<i>Production</i>	69
3.1.2	<i>Preferences and Budget Constraints</i>	69
3.1.3	<i>Optimization</i>	70
3.2	The Evolution of the Economy	70
3.2.1	<i>Population Dynamics</i>	70
3.2.2	<i>The Time Path of Income per Worker</i>	72

3.3	Testable Predictions	74
3.4	Empirical Framework	74
3.4.1	<i>Empirical Strategy</i>	74
3.4.2	<i>The Data</i>	77
3.4.3	<i>The Neolithic Revolution and Technological Advancement</i>	78
3.4.4	<i>Basic Regression Model</i>	79
3.5	Cross-Country Evidence	80
3.5.1	<i>Population Density in 1500 CE</i>	81
3.5.2	<i>Population Density in Earlier Historical Periods</i>	86
3.5.3	<i>Income per Capita versus Population Density</i>	92
3.5.4	<i>Effect of Technological Sophistication</i>	96
3.5.5	<i>Robustness to Technology Diffusion and Geographical Features</i>	103
3.5.6	<i>Rejection of Alternative Theories</i>	105
3.6	Concluding Remarks	108
3.7	Appendix	110
3.7.1	<i>First-Stage Regressions</i>	110
3.7.2	<i>Variable Definitions and Sources</i>	110
CHAPTER 4		
	Theories of the Demographic Transition	115
4.1	The Rise in Income per Capita	116
4.1.1	<i>The Theory and Its Testable Predictions</i>	116
4.1.2	<i>The Evidence</i>	118
4.2	The Decline in Infant and Child Mortality	120
4.2.1	<i>The Central Hypothesis</i>	120
4.2.2	<i>Evidence</i>	121
4.3	The Rise in Demand for Human Capital	123
4.3.1	<i>The Theory</i>	125
4.3.2	<i>Evidence: Education and the Demographic Transition</i>	127
4.3.3	<i>Quantity-Quality Trade-off in the Modern Era</i>	129

4.4	The Rise in Demand for Human Capital: Reinforcing Mechanisms	130
4.4.1	<i>The Decline in Child Labor</i>	131
4.4.2	<i>The Rise in Life Expectancy</i>	131
4.4.3	<i>Evolution of Preferences for Offspring Quality</i>	132
4.5	The Decline in the Gender Gap	132
4.5.1	<i>The Theory and Its Testable Predictions</i>	133
4.5.2	<i>The Evidence</i>	135
4.6	The Old-Age Security Hypothesis	136
4.7	Concluding Remarks	136
4.8	Appendix	138
4.8.1	<i>Optimal Investment in Child Quality</i>	138
4.8.2	<i>Optimal Investment in Child Quantity</i>	139
CHAPTER 5		
	Unified Growth Theory	140
5.1	The Fundamental Challenge	142
5.2	Incompatibility of Non-Unified Growth Theories	143
5.2.1	<i>The Malthusian Theory</i>	143
5.2.2	<i>Theories of Modern Economic Growth</i>	145
5.3	Central Building Blocks	146
5.3.1	<i>The Malthusian Elements</i>	147
5.3.2	<i>Engines of Technological Progress</i>	147
5.3.3	<i>The Origin of Human Capital Formation</i>	148
5.3.4	<i>The Trigger of the Demographic Transition</i>	148
5.4	The Basic Structure of the Model	149
5.4.1	<i>Production of Final Output</i>	149
5.4.2	<i>Preferences and Budget Constraints</i>	150
5.4.3	<i>Production of Human Capital</i>	151
5.4.4	<i>Optimization</i>	152

5.5	Evolution of Technology, Population, and Effective Resources	155
5.5.1	<i>Technological Progress</i>	155
5.5.2	<i>Population</i>	155
5.5.3	<i>Effective Resources</i>	156
5.6	The Dynamical System	156
5.6.1	<i>The Dynamics of Technology and Education</i>	157
5.6.2	<i>Global Dynamics</i>	161
5.7	From Malthusian Stagnation to Sustained Growth	164
5.8	Main Hypotheses	166
5.9	Complementary Mechanisms	170
5.9.1	<i>Sources of Human Capital Formation</i>	170
5.9.2	<i>Triggers of the Demographic Transition</i>	171
5.9.3	<i>Engines of Technological Progress</i>	172
5.9.4	<i>The Transition from an Agricultural to an Industrial Economy</i>	172
5.10	Calibrations of Unified Growth Theory	174
5.11	Concluding Remarks	177
5.12	Appendix: Optimal Investment in Child Quality	178
CHAPTER 6		
	Unified Growth Theory and Comparative Development	179
6.1	Country-Specific Characteristics and the Growth Process	182
6.1.1	<i>Factors Contributing to Technological Progress</i>	183
6.1.2	<i>Reinforcing Elements in Human Capital Formation</i>	185
6.1.3	<i>The Dynamics of Technology and Education</i>	187
6.2	Variation in Technological Progress and Comparative Development	189
6.3	Variation in Human Capital and Comparative Development	191
6.3.1	<i>The Emergence of Human Capital–Promoting Institutions</i>	193
6.3.2	<i>Globalization and Divergence</i>	198

6.4 Persistence of Deeply Rooted Biogeographical Factors	208
6.4.1 <i>The Neolithic Revolution and Comparative Development</i>	208
6.4.2 <i>The Out-of-Africa Hypothesis and Comparative Development</i>	217
6.5 Multiple Growth Regimes and Convergence Clubs	226
6.6 Concluding Remarks	229
CHAPTER 7	
Human Evolution and the Process of Development	232
7.1 Natural Selection and the Origins of Economic Growth	233
7.2 Primary Ingredients	235
7.2.1 <i>The Darwinian Elements</i>	235
7.2.2 <i>The Malthusian Components</i>	237
7.2.3 <i>Determinants of Technological Progress and Human Capital Formation</i>	237
7.2.4 <i>The Trigger of the Demographic Transition</i>	238
7.3 The Basic Structure of the Model	238
7.3.1 <i>Production of Final Output</i>	239
7.3.2 <i>Preferences and Budget Constraints</i>	240
7.3.3 <i>Production of Human Capital</i>	241
7.3.4 <i>Optimization</i>	242
7.3.5 <i>Distribution of Types and Human Capital Formation</i>	246
7.3.6 <i>Time Path of the Macroeconomic Variables</i>	249
7.4 The Dynamical System	254
7.4.1 <i>Conditional Dynamics of Technology and Education</i>	254
7.4.2 <i>Conditional Dynamics of Technology and Effective Resources</i>	259
7.4.3 <i>Conditional Steady-State Equilibria</i>	260
7.4.4 <i>Human Evolution and the Transition from Stagnation to Growth</i>	261
7.5 Failed Take-off Attempts	265
7.6 Main Hypotheses and Their Empirical Assessment	266

7.7 Complementary Mechanisms	269
7.7.1 <i>Evolution of Entrepreneurial Spirit and Economic Growth</i>	270
7.7.2 <i>Evolution of Life Expectancy and Economic Growth</i>	273
7.8 Concluding Remarks	278
7.9 Appendix	279
7.9.1 <i>Conditional Dynamics of Technology and Education</i>	279
7.9.2 <i>Conditional Dynamics of Technology and Effective Resources</i>	280
CHAPTER 8	
Concluding Remarks	285
<i>References</i>	289
