

<b>Introduction .....</b>	<b>8</b>
<b>Why is data so central? .....</b>	<b>10</b>
<b>Is there something important in paleontological data? Nomothetic, idiographic and the dark abyss of deep time. ....</b>	<b>13</b>
<b>Paleontological sciences in German-speaking area during the 19<sup>th</sup> century .....</b>	<b>17</b>
<b>Summary.....</b>	<b>19</b>
<b>Chapter I. Patterns and History: The Fossil Record into the Flow of deep Time .....</b>	<b>20</b>
<b>Chapter II. The Making of Paleontological Data.....</b>	<b>20</b>
<b>Chapter III. A strenuous Effort of Thought: Zittel's Heredity .....</b>	<b>21</b>
<b>Chapter IV. How to observe? .....</b>	<b>21</b>
<b>Chapter V. How an Epistemic Practice shaped its Data: Formenreihen and Evolution</b>	<b>22</b>
<b>Chapter VI. Paleontology and Darwinian Theory of Evolution: The dangerous Role of Statistics .....</b>	<b>22</b>
<b>Chapter VII. On the Notion of Paleontological Representation: The Levels of Constitution of Paleobiological Data .....</b>	<b>23</b>
<b>Chapter VIII. Paleobiological Data and Phenomena.....</b>	<b>23</b>
<b>Chapter I. Patterns and History: The Fossil Record into the Flow of deep Time..</b>	<b>25</b>
<b>Introduction.....</b>	<b>25</b>
<b>Bronn's Education: The Importance of Kameralwissenschaft.....</b>	<b>27</b>
<b>Historical Roots of Bronn's Data .....</b>	<b>33</b>
<b>Bronn's mature Conceptualisation of the Fossil Record: How to put Events in Deep Time.....</b>	<b>41</b>
<b>Conclusion: Bureaucratic Statistik into paleontological data.....</b>	<b>51</b>
<b>Chapter II. The Making of Paleontological Data .....</b>	<b>54</b>
<b>Introduction.....</b>	<b>54</b>
<b>On the Notion of 'paleontological Data' .....</b>	<b>57</b>
<b>Zittel's education and teaching.....</b>	<b>60</b>
<b>Zittel's Notion of paleontological Data .....</b>	<b>61</b>
<b>Epistemological and ontological Consequences of this Coming into Being .....</b>	<b>70</b>
<b>Data, Facts, and Events: epistemic Things and epistemic Virtues .....</b>	<b>72</b>
<b>Conclusion .....</b>	<b>78</b>
<b>Chapter III. A Strenuous Effort of Thought: Zittel's Legacy .....</b>	<b>80</b>
<b>Introduction.....</b>	<b>80</b>
<b>Zittel's Paleontological Data at the End of 19<sup>th</sup> Century .....</b>	<b>82</b>

<b>Palaeontographica and Neues Jahrbuch für Mineralogie, Geognosie, Geologie und     Petrefaktenkunde.....</b>	<b>87</b>
<b>Zittel's Heredity and the Attempt to unify Vertebrate with Invertebrate Data during     the first Half of 20<sup>th</sup> Century. ....</b>	<b>89</b>
<b>Conclusion .....</b>	<b>93</b>
<b>Chapter IV. How to observe?.....</b>	<b>97</b>
<b>Introduction.....</b>	<b>97</b>
<b>How to observe? Facts, Events, and The geological Law of Development of Molluscs .</b>	<b>99</b>
<b>How to re-observe Time in the Form of Space? .....</b>	<b>106</b>
<b>From Local to Global History.....</b>	<b>108</b>
<b>Oppel's Zone .....</b>	<b>111</b>
<b>Conclusion .....</b>	<b>117</b>
<b>Chapter V. How an Epistemic Practice shapes its Data: Formenreihen and Evolution .....</b>	<b>119</b>
<b>Introduction. Zone: Range or Assemblage?.....</b>	<b>119</b>
<b>Genetic Relationship .....</b>	<b>121</b>
<b>"The paleontologist as an observer is practically immortal": Genetic Relationships and     Evolution .....</b>	<b>127</b>
<b>Chapter VI. Paleontology and the Darwinian Theory of Evolution: The dangerous Role of Statistics .....</b>	<b>138</b>
<b>Introduction.....</b>	<b>138</b>
<b>The paleontological Perception of Darwin's Theory.....</b>	<b>141</b>
<b>Statistical Treatment of Data: an Introduction .....</b>	<b>142</b>
<b>The Statistical Treatment of the Fossil Record .....</b>	<b>148</b>
<b>Geological Biology.....</b>	<b>157</b>
<b>On the Presumed Incompleteness of the Paleontological Tradition .....</b>	<b>161</b>
<b>Rapid Evolution is difficult to Account for by any Working of Natural Selection.....</b>	<b>166</b>
<b>Neumayr's Reaction: the Rejection of the statistical Treatment of Data .....</b>	<b>174</b>
<b>Conclusion .....</b>	<b>176</b>
<b>Chapter VII. On the Notion of Paleontological Representation: The Levels of Constitution of the Paleobiological Data .....</b>	<b>178</b>
<b>Introduction.....</b>	<b>178</b>
<b>Representation by Ostension or Description .....</b>	<b>182</b>
<b>How Representations Literally Construct the Ontological Features of their Objects</b>	<b>191</b>
<b>Formenreihen .....</b>	<b>193</b>

<b>Williams' Tables .....</b>	<b>197</b>
<b>To Represent is to Constrain.....</b>	<b>202</b>
<b>Conclusion .....</b>	<b>210</b>
<b>Chapter VIII. Paleobiological Data and Phenomena .....</b>	<b>214</b>
<b>Introduction.....</b>	<b>214</b>
<b>Bringing some epistemic Order .....</b>	<b>220</b>
<b>“Scientists are not born, they are made”: Tracking the Changes in paleontological Phenomena through paleontological Textbooks.....</b>	<b>226</b>
<b>Events that look like facts .....</b>	<b>228</b>
<b>Historical Geology .....</b>	<b>232</b>
<b>An indirect, quasi-theoretical approach.....</b>	<b>237</b>
<b>Conclusion .....</b>	<b>242</b>
<b>Conclusion .....</b>	<b>245</b>
<b>Bibliography.....</b>	<b>250</b>
