Part I. Unicepts

Introduction to Part I	3
0.1 Overview	3
0.2 Selection Processes	4
0.3 Ontology and Language	6
0.4 Unicepts and Unitrackers	7
0.5 Organization and Method	9
0.6 Acknowledgments	10
1. A Clumpy World	11
1.1 Overview	11
1.2 Real Kinds	11
1.3 Reproduction and Mass Production	15
1.4 Historical Kinds	17
1.5 Individuals	18
1.6 Eternal Kinds	21
1.7 Shapes and Divisions of Historical Kind Clumps	22
1.8 Real Categories	24
2. <i>Direct Reference for Extensional Terms</i>	27
2.1 Overview	27
2.2 Conventions of Language	27
2.3 Following Precedent	30
2.4 Direct Reference to Clumps	32
2.5 Identifying through Language	34
2.6 Real Definitions	35
2.7 Names for Properties	36
2.8 Boundaries and Slippage	37
2.9 Communication with Names for Clumps and Peaks	39
3. Introducing Unitrackers and Unicepts	42
3.1 Overview	42
3.2 Initial Examples of Unitracker Function	43
3.3 Discarding Concepts	46
3.4 Details on the Nature and Function of Unicepts	49
3.5 Life Span and Growth of Unitrackers and Unicepts	51
3.6 How Names Connect with Unicepts	52
3.7 The Role of Language in Unicept Development	53
3.8 On Modeling Unicepts	54

4. Functions of Same-Tracking	56
4.1 Overview	56
4.2 Perceptual Constancy Mechanisms	56
4.3 Self-Relative Location Trackers	59
4.4 Object Constancy	60
4.5 Same-Tracking for Application of Unicept Templates	61
4.6 Practical Stuffs and Affording Unicepts	62
4.7 Factic Unicepts: Substantive and Attributive	66
4.8 Two Closing Remarks	68
5. How Unicepts Get Their Referents	70
5.1 Overview	70
5.2 How Unicept Referents Are Fixed: The Quarry	70
5.3 Two General Principles Concerning Functions	72
5.4 Imprinting	74
5.5 More General Mechanisms for Priming Unitrackers	75
5.6 Some Mechanisms that Set Targets, Specifically, for Affording Unicepts	76
5.7 The Problem of Location-Detached Signs	77
5.8 A Third General Principle: Proxy Functions	79
5.9 Natural Epistemology for Substantive and Attributive Unicepts	80
6. Misrepresentation, Redundancy, Equivocity, Emptiness (and Swampman)	84
6.1 Overview	84
6.2 Failures of Biological Function	84
6.3 False Beliefs	88
6.4 Redundant Unitrackers and Fregean Senses	89
6.5 Equivocepts	91
6.6 Vacucepts	93
6.7 How Unicepts Fit with Biosemantics	94
6.8 Swampman	95
7. Philosophical Analysis; Referents of Names: Theory Change; Observation versus Theory; Theory of Mind	97
7.1 Overview	97
7.2 Philosophical Analysis	97
7.3 Referents of Names	99
7.4 Theory Change in Science	101
7.5 Observation versus Theory	102
7.6 "Theory of Mind"	103
Part II. Infosigns, Intentional Signs, and their Interpretation	
8. Introduction to Part II	109
8.1 Overview	109

8.2	Infosigns and Natural Information	109
8.3	Infosigns and Intentional Signs	111
8.4	Interpreting Linguistic Signs	112
9.	Indexicals and Selfsigns	114
9.1	Overview	114
9.2	Assumptions to be Questioned	114
9.3	Components of Conventional Linguistic Signs	115
9.4	Preliminary Examples of Selfsigning Components	117
9.5	Indexicals and Demonstratives	120
9.6	Addendum on Intensional Contexts	122
10.	An Anatomy of Signs	124
10.1	Overview	124
10.2	The Project	124
10.3	Infosigns Are Always Articulate and Often Productive	125
10.4	Equivocal Infosigns	127
10.5	Infosign Systems and Families	128
10.6	Variants and Invariants; Embedded Infosign Families	129
10.7	A Taxonomy of Infosign Variables	131
10.8	How a Language Is Put Together	136
11.	Infosigns and Natural Information	137
11.1	Overview	137
11.2	The Project	137
11.3	Examples of Nonintentional Infosigns	139
11.4	Causal Connections; Dretske on Natural Information	140
11.5	Correlational Information	141
11.6	The Reference Class Problem	143
11.7	Addressing the Reference Class Problem	144
11.8	Using Infosigns	147
11.9	Correlations between Types of States of Affairs	149
11.10	Infosign Strength and Response Strength	150
11.11	Redundancy	151
11.12	Metacorrelations	152
11.13	Indirect Infosigns; Indirect Natural Information	153
12.	Intentional Signs	155
12.1	Overview	155
12.2	The Project	155
12.3	Intentional Infosigns	156
12.4	Intentional Signs and Stabilizing Functions	159
12.5	Pure and Impure Intentional Signs	160
12.6	Entwining of Intentional Content and Nonintentional Information	161
12.7	Intentional Signs Used by Non-Human Animals	163
12.8	Maps, Charts, Diagrams, Graphs	163

12.9	Extending the Senses	164
12.10	Inner Representations	165
13.	Linguistic Signs	167
13.1	Overview	167
13.2	The Topic	167
13.3	Semantic Meaning	170
13.4	Communicating with Language: The Broad Picture	173
13.5	Meta-Regularities and Extra-Semantic Infocontent	175
13.6	Grice's Conversational Maxims	176
13.7	Far-Side Pragmatic Meaning, or Semantic Meaning?	178
13.8	Addendum: Gricean Temptations	181
14.	Perception, Especially Perception through Language	184
14.1	Overview	184
14.2	The Project	184
14.3	Perception as Sign Reading	185
14.4	Attached and Detached Signs, with an aside on Animal Cognition	187
14.5	Genuine Perception Thought of as Certain	190
14.6	The Contents of Perceptual Experience	193
14.7	Translating Linguistic Signs into Understanding	196
14.8	Replies to Objections	198
15.	Markers of Identity and Grounded Infosigns	204
15.1	Overview	204
15.2	Selfsigns of Identity: Duplicate Markers; Strawson Markers	204
15.3	Anaphoric Signs of Identity	206
15.4	Grounding as Indicating Identity	208
15.5	Situated Signs; Counting up Signs	209
15.6	Recognizing Identity: A Reminder	210
16.	Out-Side Pragmatics: Descriptions, Quantifiers, Directives	212
16.1	Overview	212
16.2	Three Kinds of Referent	212
16.3	Functions of the Definite and Indefinite Articles	213
16.4	Quantifiers, Possessives, and Proper Names	217
16.5	Thumbnail Review of Basic Themes	218
	<i>Glossary</i>	221
	<i>Bibliography</i>	227
	<i>Index</i>	237
