# INTRODUCTION

The following report is a comprehensive survey of the World Bank Group operations in China since the People's Republic of China assumed its World Bank membership in 1980.

For over 40 years, China and the World Bank Group (WBG) have worked together in partnership to address China's evolving development challenges. The country's overall success with reform, growth and poverty reduction during this time is well known. While China deserves full credit for these positive developments, the WBG has played a supporting role in helping China to: introduce relevant international practices and experiences; make timely diagnostic studies of China's challenges and recommendations to address them; follow up with well-considered investment projects to test innovative ideas; and implement appropriate capacity building programs to turn some of the more successful elements into replicable models.

As of June 30, 2023, the World Bank's cumulative lending to China reached about US\$67.82 billion for a total of 445 development projects, while the International Finance Corporation (IFC) invested about US\$18.1 billion in more than 500 projects in the country.

China is now an Upper-Middle Income country and expected to reach high income in the coming five years. The WBG's Country Partnership Framework (CPF) for FY2020 to 2025, issued in December 2019, consequently charts an evolving WBG relationship with China with a decline in lending and a more selective engagement in line with the capital increase commitments agreed to by its shareholders in 2018.

The current CPF aims to help China address some of its remaining development challenges, notably the transition to more environmentally sustainable growth, strengthen key Chinese institutions engaged in economic and social development, and reduce inequality in lagging regions.

The CPF focuses on three areas of engagement:

- **Advancing market and fiscal reforms** by improving the environment for competition and private sector development; and achieving more efficient and sustainable subnational fiscal management and infrastructure financing.

- **Promoting greener growth** by reducing air, soil, water, and marine plastic pollution; strengthening sustainable natural resource management; promoting low-carbon transport and cities; and facilitating the transition to a lower carbon energy path.

- **Sharing the benefits of growth** by increasing access to health and social services; and improving the quality of early childhood development.

As lending declines, the Bank would be positioned to support China with more reimbursable advisory services (RAS), technical assistance, and policy advice; and engagement by IFC in China's private sector, especially in investments in global public goods.

This survey is updated in July each year, while our website ([www.worldbank.org/china](http://www.worldbank.org/china)) provides detailed and up-to-date information about the World Bank's activities in China.

## SECTION III. IFC IN CHINA

The International Finance Corporation (IFC), a member of the World Bank Group, helps developing countries achieve sustainable growth by financing investment, mobilizing capital in international financial markets, and providing advisory services to businesses and governments. China is IFC's second-largest portfolio country. Since its first investment in 1985 to date, IFC has invested around 18.1 billion (combined IFC's own account and mobilization, including short-term finance) to support more than 500 projects across China. In fiscal year 2023, IFC invested US\$0.49 billion in 7 projects.

IFC invests in and mobilizes capital for private sector projects in China, particularly those that help promote a green economy, enable rural development and development in lagging frontier areas of China, and improve productivity, private sector expansion, and higher standards. IFC's unique financing and advisory products combine global expertise with local knowledge, maximizing investment returns as well as social benefits.

### **Promoting a Green Economy**

- IFC invests in and mobilizes partner banks to fund renewable-energy and energy-and-wa-ter-efficiency projects, as well as pollution prevention and abatement, green buildings, and green finance products such as green bonds.
- We advise China's regulators and financial institutions on adopting international environ-mental and social best practices.
- IFC client Industrial Bank became the first Chinese lender to adopt the Equator Principles for social and environmental risk management in project finance.

### **Promoting Balanced Development**

- IFC is one of the largest investors in China's microfinance institutions and helps reduce the wealth gap between urban and rural areas.
- We also focus our investments on provinces and regions that have benefitted less from China's significant growth in the past 40 years, primarily in the west, central and northeastern provinces.
- We support the growth of thousands of agricultural businesses and micro, small and medium enterprises, and the development of human capital through investments in healthcare, aged care and education.
- Through investment and advisory work, we improve infrastructure, individual well-being, and food safety and security in China.

### **Improving Productivity, Innovation and Expanding the Private Sector**

- IFC partners with technology companies to help solve the most difficult development problems, and reach the segments of the population underserved by conventional companies
- We also advise on and invest in public-private partnerships, and in private companies operating in sectors where most other companies are state-owned, such as infrastructure.
- We support private Chinese companies to expand to other emerging regions like Africa through direct investment and capital mobilization.
- We promote the adoption of international environmental, social, and corporate-governance standards.

## **IFC Products**

### **Financial Products**

- Equity
- Loans
- Local currency products
- Quasi-equity/convertibles
- Risk management
- Structured finance

- Trade finance

### **Tailored Advice**

- IFC advises clients on how best to expand microfinance, mobile finance, small-and-medium-enterprise finance, sustainable-energy finance, carbon trading schemes, and trade finance.
- We promote environmental and social sustainability.
- We also help improve corporate governance, risk management, supply chain management, and other services.

## SECTION IV. MIGA OPERATIONS IN CHINA

Created in 1988, the Multilateral Investment Guarantee Agency (MIGA) encourages foreign direct investment (FDI) in developing countries by providing political risk insurance (guarantees) to foreign investors and lenders against the risks of expropriation, transfer restriction, breach of contract, war and civil disturbance, and non-honoring of financial obligations. As part of its guarantee program, MIGA helps investors and governments resolve disputes that may adversely impact investments guaranteed by MIGA, thus preventing potential claim situations from escalating and keeping investments going. MIGA also helps countries formulate and implement strategies for attracting and retaining FDI through its financial contribution to Investment Climate (IC) Advisory Services (formerly known as Foreign Investment Advisory Services or FIAS), as well as offering online services and free information on investment opportunities, business operating conditions, and political risk insurance.

### **MIGA in China**

Since 2000, there was rising interest for MIGA guarantees covering investments into China, particularly for projects that involve sub-sovereign risk, such as those in the water, wastewater and solid waste management sectors. MIGA is eager to facilitate more investments into China, especially in support of China's PPP Program and western and northeast regional development strategy. At the same time, MIGA is working closely with Chinese partners on outward investment in support of the country's "Going Abroad" and "the Belt and Road Initiative". For the past few years, MIGA has received increasing interest from Chinese banks and companies to cover their outward investments.

### **Guarantees**

**Exposure.** MIGA has been active in supporting FDI into China. Since 1993, MIGA has supported 36 projects amounting to over US\$593.9 million. Most of these projects are in the water, wastewater, and waste management sectors.

For Chinese outward investment, MIGA has in the past ten years supported thirteen projects totaling US\$1.53 billion in guarantee coverage in the power, telecom, transport, extractive industries, construction, health sectors in Kenya, Jordan, Egypt, Bangladesh, Myanmar, Ghana, Nigeria, Turkey, Oman and Uzbekistan. MIGA guarantees to those projects helped facilitate a total of US\$5.39 billion in investment. A number of Chinese banks such as the Industrial and Commercial Bank of China (ICBC), ICBC (Asia), Bank of China (Beijing), Bank of China (Hong Kong), Bank of China (Singapore), Bank of China (Dubai), China Construction Bank (CCB) and China Development Bank have benefited from MIGA guarantees for those outward investment projects. In addition, MIGA is currently preparing several new projects for outward investments.

**Cooperation with the Ministry of Finance (MOF) and Ministry of Commerce (MOFCOM): Focus on Outward Investment.** MIGA has been working with the MOF and MOFCOM, with a focus on facilitating Chinese investment overseas, specifically into Africa and Asia. In 2005, MIGA organized a workshop jointly with the MOF, China EXIM Bank and the IFC to introduce

risk mitigation tools provided by the World Bank Group, particularly by MIGA. In 2006, MIGA and FIAS organized a conference jointly with MOFCOM to present the findings of a survey of 150 Chinese companies with overseas investments. Also in 2006, MIGA co-sponsored the Dialogue Conference between Chinese enterprises and Fortune Global 500 Companies with MOFCOM's China Investment Promotion Agency in Wenzhou. In 2012, MIGA co-organized two workshops on Chinese outward investment and risk management with its Chinese partners in Beijing and Tianjin, respectively. In 2016 and 2017, MIGA Vice President and Chief Operating Officer and MIGA Executive Vice President attended the Investing in Africa Forum in Guangzhou, China and Dakar, Senegal and presented recent examples of MIGA's support for Chinese overseas investments. In 2019, MIGA, IFC and Guangdong Provincial Department of Commerce jointly held a workshop on "Overseas Investment and Risk Management" for Chinese private investors held in Guangzhou. In May 2023, MIGA participated "International Financial Institutions Non-Sovereign Operations Workshop" organized by MOF.

**Cooperation with Sinosure, China Development Bank, Bank of China, ICBC, China Africa Development Fund, and other partners.**In 2005, MIGA signed a Memorandum of Understanding with Sinosure on cooperation in marketing and co-insurance of Chinese outward investment. Between 2005 and 2017, MIGA provided four investment insurance training courses for Sinosure, and co-organized a series of political risk insurance road shows in China's coastal cities. MIGA has also strengthened its cooperation with China Development Bank, Bank of China, and ICBC through joint projects, regular dialogues and identification of potential projects for future cooperation. Since 2010, MIGA has also arranged a number of workshops for China Development Bank, China Africa Development Fund, Bank of China (Hong Kong), ICBC and PowerChina in Beijing, Changchun and Hong Kong.

# **SECTION V. GEF PROJECTS IN CHINA**

## **(World Bank as Implementing Agency)**

The Global Environment Facility (GEF) provides grants and concessional loans to UNDP and World Bank-eligible countries to co-finance projects and programs that both protect the global environment and promote sustainable economic growth. The GEF is an independent financial institution which began as a pilot program in 1991 and was formally established in 1994. It funds the agreed incremental costs of activities that benefit the global environment in six focal areas: climate change; biological diversity; international waters; persistent organic pollutants, land degradation and stratospheric ozone depletion. The Climate Change, Biodiversity and POPs Conventions have designated the GEF as their funding mechanism. Countries must ratify the relevant convention to qualify for GEF support in these three focal areas.

Countries access GEF resources through either one of three “implementing agencies”: the UN Development Program (UNDP), the UN Environment Program (UNEP) and the World Bank, or through several “executing agencies” including the Asian Development Bank (ADB). The GEF Secretariat, which is functionally independent from the three implementing agencies, reports to and services the GEF Council (Board) and Assembly. The Ministry of Finance is the Focal Point for coordinating GEF projects in China.

Since 1992, the World Bank has facilitated 58 GEF-supported projects in China with grants of more than US\$743.6 million.

## GEF Projects in China (World Bank as Implementing Agency)

(As of June 30, 2023, in US\$ million)

Project Name	Focal Area	GEF Grant	Year of Approval*	Status	
P003405	Ship Waste Disposal	International Waters	30.00	92	Completed
P003404	Sichuan Gas Transmission and Distribution Rehabilitation	Climate Change	10.00	94	Completed
P003402	Nature Reserves Management	Biodiversity	17.90	95	Completed
P035693	Efficient Industrial Boilers	Climate Change	32.80	96	Completed

# SECTION VI. MONTREAL PROTOCOL PROJECTS IN CHINA

## (World Bank as Implementing Agency)

The World Bank signed an agreement with the Multilateral Fund to the Montreal Protocol (MP) in 1991 whereby it agreed to provide support to eligible countries to meet their MP obligations and became one of four implementing agencies engaged in country efforts to phase out ozone depleting substances (ODS). The effectiveness of a given ODS in removing ozone is measured by its Ozone Depleting Potential (ODP). The use of ODS and their substitutes penetrates all facets of daily life - refrigerators in homes, domestic and commercial air conditioning in buildings, freezers in supermarkets and transportation, aerosols for hair sprays, paint or shaving cream, fire extinguishers, furniture, construction materials, insulation foams, automobile air conditioning, and so on.

As an "Article 5" country (developing country), China is eligible for financing from the Multilateral Fund for the implementation of the MP. Between 1993 and 1997, the World Bank approved four China ODS Phase-out Projects. The ODS I and II Projects were completed in mid-1997 and phased out a total of 15,800 ODP tons. The ODS III Project financed phaseout activities in individual companies producing or using ODS. It was completed in December 2006 and phased out about 19,000 ODP tons.

The ODS IV Project is a sector- and performance-based umbrella project composed of ten sector plans including mobile air conditioning, commercial refrigeration, CFC production, 1.1.1.-TCA, halon, foam, CTC Production and process agents I and II, CFC/Halon accelerated phase-out, and pharmaceutical aerosol. The ODS IV Project implemented during 1997-2013 helped China to achieve a total reduction of 211,811 ODP tons, ensuring fulfilment of its obligations under the MP ahead of schedule, while contributing greatly to climate change mitigation. ODS IV also included activities on HCFC phase-out demonstration subprojects in the foam sector, and the preparation of HCFC Phase-out Management Plans in the foam and production sectors.

In 2007, the Parties to the MP decided to accelerate the HCFC consumption and production phase-out schedule for both developed and developing (Article 5) countries. HCFCs are used primarily as refrigerants in refrigeration and air-conditioning equipment and as blowing agents for producing insulation foam. With low ODP values, HCFCs were introduced in some applications as transitional substances to replace the potent ODS group, CFCs.

With the adjusted schedule, all Article 5 countries were required to reduce their HCFC production and consumption levels to baseline levels (2009-2010 average) by January 1, 2013 and achieve a 10% reduction by January 1, 2015. Additional reductions are scheduled from 2020 until 2030 when complete phaseout is mandated except for a small allowance for servicing equipment until 2040.

A total funding of US\$168 million was approved for China's HCFC Phase-out Project (Stage I) to assist it in meeting its 2013 freeze and 2015 reduction obligations. The project comprises a

US\$73 million grant approved in November 2012 for China to reduce HCFC-141b consumption in the polyurethane (PU) foam sector and a \$95 million grant approved in April 2013 to reduce HCFC production, both while reducing corresponding greenhouse gas (GHG) emissions (as ODS are also GHGs). The project has five components: 1) Investment in HCFC 141-b consumption reduction in the PU foam sector; 2) Investment in HCFC production reduction; 3) Technical assistance and policy support; 4) Project management; and 5) Preparation of HCFC phase-out activities beyond 2015.

The HCFC Phase-out Project (Stage I) was closed at end of June 2019. The total grant funds of \$168 million was disbursed to subprojects, technical assistance activities and project management units. The project has met and sustained all the key outcome targets, including compliance with China's 2015 MP production and consumption limits for HCFCs.

This was possible in the foam sector through a total of 58 subprojects (excluding 5 cancelled subprojects) that converted foam manufacturing to low-GWP alternatives. These subprojects and policy measures to ban the use of HCFC-141b in the three targeted foam subsectors addressed by the Project resulted in a total phase-out of 14,685 MT (1,615 ODP tons). Conversion to hydrocarbon and water blown technologies in the foam sector has resulted in a climate impact of 10.8 million tCO<sub>2</sub>e of emissions avoided.

The elimination of HCFC production under this Project was achieved through a total of 28 production reduction contracts signed with HCFC producers including 4 for idle production line closures, 19 for quota reductions and 5 for production closure. As a result, production of all types of HCFCs in 2017 was 17% below the MP allowable limit of 26,210 ODP tons for that year. In total, HCFC production was reduced from 30,180 ODP tons in 2010 to 21,639 ODP tons in 2017, representing a reduction of 8,541 ODP tons. The closedown of production capacity and reduction provides climate co-benefits equivalent to 184 million tCO<sub>2</sub>e, surpassing the target of 63 million tCO<sub>2</sub>e by more than 100%.

To enable China to fulfill its subsequent HCFC phase-out obligations, the Multilateral Fund approved in 2016 the second stage of HCFC phase-out in the PU foam sector which will lead to complete HCFC-141b consumption phase-out in the sector by 2026. The HCFC Phase-out Project (Stage II) is providing support to dozens of larger foam manufacturers, and, indirectly through foam systems houses, to several hundred SMEs across ten foam subsectors, as well as policy support and technical assistance. In 2019, China agreed to an adjusted funding of the second stage HCFC phase-out in the PU foam sector of \$ US\$28.31 million while maintaining complete HCFC-141b phase-out by 2026.

In addition, HCFC production reductions to mirror consumption phase-out requirements are also included in the project for 23 remaining HCFC production companies. The Multilateral Fund has already approved US\$23 million for China to meet its 2018 HCFC production reduction commitments to the Montreal Protocol. The verification of the 2018 HCFC production conducted in 2019 confirmed that the actual production in 2018 is 20,754 ODP tons, which is lower than the target of 22,742 ODP tons. The 2019 HCFC production was also found to be lower than the 2018 target. Additional funding for Stage II implementation of HCFC production reductions was approved in 2021 with an additional funding of \$44 million and will enable China to meet HCFC production reduction commitments to the Montreal Protocol until 2026.

## Montreal Protocol Projects in China (World Bank as Executing Agency)

(As of June 30, 2023, in US\$)

	Total Funding (US\$)	Phase-out Target (ODP Tons)	Status
ODS I	7,732,000	15,400	Completed
ODS II	4,904,000	400	Completed
ODS III (adjusted for cancellations)	88,513,461	19,062	Completed
ODS IV	409,331,052	205,480	Completed
ODS V	168 million in total (73,000,000 for the foam sector; 95,000,000 for the production sector)	1,615 (foam) 3,970 (production)	Completed
ODS VI	28.31 million for the foam sector; 67 million for the production sector	4,450 (foam) 15,638 (production)	Ongoing
<b>Total</b>	<b>773.79 million</b>	<b>266,015</b>
