

## Addendum No.1 – Responses to Questions

MOSH Genesis  
Exhibit Design

RFQ#: INNOVATION-MOSH2024  
RFQ#: NATURE\_CULTURE-MOSH2024

1. Are there outline exhibit briefs for the Nature and Culture, and Innovation galleries?

**There is nothing formal that MOSH can present at this time. We anticipate extensive collaboration with the selected exhibit designer to formulate a strategy for each exhibit.**

2. Is there an anticipated budget scale for the delivery of both galleries?

**Not at this time. MOSH has earmarked approximately \$20mm currently for all exhibits but this is subject to change once exhibit design has started.**

3. What is the anticipated timeframe for the development and delivery of the galleries?

**MOSH currently anticipates project opening by July 31, 2028, which is subject to change.**

4. Can you confirm that MOSH requires hard copies + flash drives by the 5/16 deadline?

**Yes, the deadline is 5/16/24.**

5. Can you provide an update on MOSH's current stage in the design process? How much progress has been made in designing both scopes of work?

**The Exhibit Design process is still in a conceptual phase. The architecture of the building is also at the conceptual level.**

6. Is Local Projects, the original exhibit designer, still involved in the project? If yes, in what capacity?

**Local Projects worked on a conceptual design. With the city of Jacksonville's recent involvement of the project, along with a new CEO of MOSH, the Exhibit Design RFQ has been reissued.**

7. Are there any plans to release additional exhibit RFQs in the near future?

**No**

8. Are all the experiences outlined in this scope intended for the same gallery?

**The scope would encompass a variety of different exhibits and themes.**

9. Could you provide details on the square footage and ceiling height of this space?

**There is approximately 25,000 sq ft total allocated to Innovation, Nature, and culture permanent exhibits (7,500-8,500 for each). Ceiling heights will be different for the 2 floors. As of now, one floor is 14' and the other is 25'. The sq ft and ceiling heights could change as the design is still being developed.**

10. Are there any budget constraints or an estimated cost per square foot for this portion of the project?

**With this solicitation being qualifications based only, we haven't nailed down an exact budget number for Exhibit Design yet.**

11. What is the proposed project schedule for this scope of work?

**Specifically for the Exhibit Design process, Conceptual Design through Design Development is expected to be from June 2024 through October 2025.**
