

# What's in Your Portfolio?

The list we've compiled in this "What's in Your Portfolio?" piece is a small sampling of companies that are actively involved in or profiting from unbliblical practices such as abortion, pornography, and others. Many have used these companies to accumulate wealth, but we often forget that when we choose to invest in any company, we become owners in a company and help support (financially) the mission and vision of that company. Ask your financial consultant for a moral audit on your investments.

Timothy Plan promotes biblically responsible investing, allowing clients to invest in a way that aligns with both their values and retirement goals. Our foundational principle is that God owns everything, and we are firmly committed to running a mutual fund company with the integrity, excellence, and wisdom that brings honor and glory to our Lord.

## Filtered Results

A company may violate multiple subfilters within each filter, as well as violate multiple filters. The total number represents all subfilters violations by each company. For example: if a company manufactures abortifacients and performs fetal tissue research, the number of violations for abortion would equal two. The chart below represents domestic, foreign and private totals.

Strategies intended to hedge risk may be partly or wholly unsuccessful. Because the Timothy Plan Funds do not invest in excluded securities, the Funds may be riskier than other funds that invest in a broader array of securities. There are risks when a fund limits its investments to particular-sized companies, and all companies are subject to market risk.

Investing involves risk, including the potential loss of principal.
