Comparison: April to September – Presidential Ballot

In late April, Trump led Biden by 5-points in Pennsylvania, so there has been a net 7-point shift in the direction of the Democratic candidate since then. Another significant change in the race is other/undecided went from 14% of voters to just 5%.

- Harris’s gains relative to Biden have been concentrated among younger voters, while older voters were relatively static. Harris picked up a net 15-points among voters 18-49, with similar gains among 18-34 year olds and those 35-49. Harris also narrowed the deficit somewhat among voters 50-64, but fell back with seniors.
- Harris now leads with Independents by 9-points, when Trump led by 6-points in April. She has also made significant progress in consolidating the Democratic base behind her.
- Women are voting for Harris by a 19-point margin, compared to Biden’s 3-point lead with them in April.
- Suburban and rural voters have shifted toward Harris, while Trump improved modestly with urban voters.
- Harris significantly narrowed Trump’s advantage among voters with less than a 4-year college degree, but still trails with them.

Comparison: April to September – Senate Ballot

Sen. Casey leads by the same 4-point margin he did in April, with more limited changes than the Presidential race.

- By age, the biggest differences are at the youngest and oldest ends of the electorate, with Casey gaining among voters 18-34, but McCormick taking the lead among voters 65+.
- There were no significant shifts by party or gender overall, though Casey lost some of his lead among women 50+.
- Casey’s large lead among voters who say they live in urban areas declined, but his improvements in suburban and rural areas cancelled those losses out.

Senate: Images and job approval

While the Senate ballot is largely unchanged from April, both candidates have seen their images decline as the campaign has progressed. Unlike his image, Casey's job approval overall is very similar to where it stood in April.

- Casey's image is now a net -5 among voters 50+, a 19-point decline from April. His job approval also dropped significantly among older voters, but improvement among younger voters has helped him.
- McCormick has seen similar erosion with older voters, going from +16 to only +3.
- Democrats and Independents are a net double digits higher on Casey's job approval than his image, providing the difference between those two measurements.

Generic ballots

The exceptionally close political balance of Pennsylvania comes through on the generic ballots, where Democrats have a slight 1-point edge on the General Assembly generic and Republicans have the same 1-point lead on a generic Congressional ballot.

- In April, Republicans were narrowly ahead in the General Assembly generic by 2-points.
- On both generic ballots, there is a clear age gap, with Republicans up with voters 50+ and Democrats winning voters under 50 thanks to a significant lead with voters 18-34.
- Republicans are somewhat more likely to support a generic Republican than Democrats are a generic Democrat, but Independents lean toward the Democrats on both ballots.

Political environment

82% of likely voters in Pennsylvania say they are a 10 out of 10 on their motivation to vote. Among voters 50+ that number hits 91% vs. just 71% among voters under 50. Motivation: 10 is up 9-points compared to April as the election approaches.

- Motivation increase was relatively larger with Democrats, with the two parties now near parity, as well as for voters 18-34 and Independents, who both are still much lower than voters overall.
- Two thirds of voters say the country is headed in the wrong direction, though this is slightly less pessimistic than voters were in April.
- 64% call themselves worried about their personal financial situation, identical to April.
- Governor Shapiro is the most popular politician tested in the survey, with 52% of voters viewing him favorably vs. 30% unfavorably. His image is in positive territory with every group with the exception of Republicans.

ISSUES DRIVING THE ELECTION

Most important issues determining vote – voters 50+

- More than 3-in-5 voters 50+ now place a personal economic issue (inflation, economy, Social Security) in their top issue pair, up from 56% in April. These voters favor Trump over Harris by 30-points, but are a bit closer on the Senate race (McCormick +24).
- As was the case in April, Immigration is the top single issue, now at 37%. Highest among Republicans but it is a leading issue for most groups.
- Democratic voters 50+ place abortion and threats to democracy as their top issue pair.
- Black voters 50+ rank Social Security first on their issue list, followed by abortion and threats to democracy.

Key issues for voters 50+

- Issues that impact the lives of older Americans are seen as very important for determining votes this November, led by Social Security, followed closely by Medicare and policies to help seniors live independently at home as they age.
- Not only are these issues important, voters who care about them are politically competitive, with voters prioritizing each of those issues very close on both the Presidential and Senate ballots.

Q34-39. Please tell me how important each of the following issues are when deciding your vote this November: extremely important, very important, somewhat important, not too important, or not at all important.

AARP commissioned the bipartisan polling team of [Fabrizio Ward](#) (R) & [Impact Research](#) (D) to conduct a survey of voters in Pennsylvania. AARP commissioned the bipartisan polling team of Fabrizio Ward (R) & Impact Research (D) to conduct a survey of voters in Pennsylvania. The firms interviewed 1,398 likely voters, which includes a statewide representative sample of 600 likely voters, an oversample of 470 likely voters age 50 and older, and an additional oversample of 328 Black likely voters age 50 and older. The survey was done between September 17-24, 2024. The interviews were conducted via live interviewer on landline (24%) and cellphone (35%), as well as SMS-to-web (41%). The sample was randomly drawn from the Pennsylvania voter list. The margin of sampling error at the 95% confidence level for the 600 statewide sample is $\pm 4.0\%$; for the 800 total sample of voters 50+ is $\pm 3.5\%$; for the 400 total sample of Black voters 50+ is $\pm 4.9\%$.

Due to rounding, answer choices may not always add up to 100%. Data is specified in the report that it is among either the 18+ or 50+ universe.
