1. ABOUT AUTOCONTROL

AUTOCONTROL is the independent advertising self-regulatory organisation (SRO) in Spain, established in 1995 as a non-profit association. It is comprised of advertisers, advertising agencies, media and professional associations, and its goal is to work for responsible advertising: truthful, legal, honest and loyal.

Currently it has **600 direct members and 4,000 indirect ones**, which are related with approximately **70% of the advertising investment in Spain**.

From its beginnings, AUTOCONTROL manages the Spanish system of self-regulation of commercial communication, on the basis of three main instruments:

Conduct Codes. The [Code of Advertising Practice – AUTOCONTROL](#) of AUTOCONTROL, **based on the Advertising and Marketing Communication Practice of the International Chamber of Commerce (ICC Code)**, and the [Sectoral Conduct Codes](#) whose application has been entrusted to AUTOCONTROL.

Jury of Advertising. Extrajudicial body for the disputes resolution that is responsible for adjudicating on advertising complaints. **Recognized as an Alternative Dispute Resolution (ADR) body, by the Directorate-General for Consumers Affairs, of the Ministry of Health, Consumer and Social Affairs.**

Legal Counsel Advice. It is formed by experts in Advertising Law, Privacy and Data Protection, and IT, with exclusive dedication to AUTOCONTROL. Who are in charge of advising companies in the fulfilment of their legal obligations in these areas.

Our activities include:

The [handling of complaints](#) with regard to commercial communications, submitted by consumers, consumer associations, businesses and public offices.

The advice to companies, through tools such as [Copy Advice](#)[®] (advice on the deontological and legal compliance of advertising campaigns before their broadcast); [Cookie Advice](#)[®] (technical and legal advice on the use of cookies); [Data Advice](#)[®] (technical and legal advice on data protection) and [Web Advice](#)[®] (advice on compliance with advertising regulations on websites).

Training, providing courses and seminars addressed, not only to law or advertising professionals who wish to deepen their knowledge in the field of advertising regulations or be updated in the same, but also to recent graduates who want to orient their professional career in this field.

Moreover, AUTOCONTROL actively collaborates, within the framework of the **26 agreements it has signed, with several national, regional and local administrations** with competence in the control of the advertising activity.

AUTOCONTROL fulfils the requirements established in the Unfair Competition Law for self-regulation systems.

2. ACTIVITY DATA

Prior advice: Since its launch, AUTOCONTROL has received more than **518,000 legal and deontological requests**, from which **424,000** were **Copy Advice®** requests.

A posteriori control: Since its creation, the AUTOCONTROL's Advertising Jury has solved **5,354 cases**, in an **average period of 14 days** at first instance.

3. ADVERTISING SELF-REGULATION

3.1. SPAIN

The advertising self-regulation is the social responsibility commitment assumed by the industry, which is showed in the compliance of specific principles and deontological rules collected in the Advertising Conduct Codes; as in the submission before an independent third party for the resolution of complaints which can be submitted because of the infringement of these

rules: **the Advertising Jury.**

Advertising self-regulation appears as the answer of the industry to society's demand of having confidence and credibility guarantees in advertising. Its goal is that advertising activity is carried out in a true, legal, honest and loyal way, to benefit consumers, competitors and the market, in general.

Consumers benefit from self-regulation as it contributes to advertising being responsible, trying to avoid or correcting legal or deontological regulations breaches. Moreover, it offers them a free, agile and effective system of complaints management through a Jury formed of independent experts.

In turn, self-regulation benefits **companies**, through the promotion of responsible advertising which helps to increase consumer trust in advertising and the brands' good reputation. In addition, the advice tools offered by advertising self-regulation – like **Copy Advice®**- help companies comply with the regulation applicable to advertising, helping them to avoid making possible infringements. Finally, the Advertising Jury allows them to solve disputes quickly and efficiently, with a cost significantly lower than those of a judicial proceeding.

Self-regulation is also perceived positively by regulators and **public administrations** as much as: the codes of conduct complement legal regulation; prior advice tools make it easier for companies to fulfil the rules; and extrajudicial systems of advertising complaints management, like the Advertising Jury, establish an alternative mechanism to the the administrative and judicial one to solve advertising complaints. And all of this without any cost for the Administration, because all costs that derive from this activity are assumed by the companies subject to the self-regulation system.

During the last decades, many European and national regulations related to advertising, consumer protection, mass media and personal data protection, among others, have recognised the advertising self-regulation and have urged its promotion. This support for self-regulation in the field of advertising law has been strengthened with the approval of the amendment to the Unfair Competition Law (1991), at the end of 2009. **The new article 37 recognizes and promotes, specifically: Codes of Conduct, previous control systems (such as AUTOCONTROL's Copy Advice® service), and the out-of-court dispute settlement systems (like the Advertising Jury, AUTOCONTROL's complaints resolution committee).**

In addition to this, AUTOCONTROL fulfils the requirements established in the Unfair Competition Law for its legal recognition. This Law also states the obligation of using self-regulation systems before initiating a legal action in some cases, when self-regulation system complies with the requirements of the Law in case of actions against the companies adhered to the Codes of Conduct. In a world which is more and more global and interconnected, it is more necessary than ever to have an efficient and well coordinated advertising self-regulation. AUTOCONTROL plays a very active role in the two organisations: **EASA and ICAS** which were created to promote advertising self-regulation in and European and at an international level.

3. ADVERTISING SELF-REGULATION

3.2. EUROPE (EASA)

AUTOCONTROL, since its creation, has been a member of the [European Advertising Standards Alliance \(EASA\)](#), an organisation created in 1992, which includes the European advertising self-regulation organisations and the main associations that represent the advertising industry. At the moment, AUTOCONTROL holds the Presidency of this organization.

EASA's principal role is to promote good

practices and high standards in advertising self-regulation, always respecting the cultural, legal and commercial differences of the different states. Moreover, EASA handles the **cross-border complaints system - in which AUTOCONTROL participates**. This allows any European Union consumer to submit a complaint to the competent foreign advertising self-regulation body, through the equivalent organism of its own country.

3.3. INTERNATIONAL (ICAS)

AUTOCONTROL is promoter and founder of the [International Council for Ad Self-Regulation \(ICAS\)](#), a platform created in 2016 to promote, globally, an efficient advertising and, in this way, contribute to commercial communications globally being truthful, legal, honest and loyal.

ICAS' members include national advertising self-regulation organisations from Europe, America and Asia, other regional and international organisations, such as EASA, and regional and international associations of the advertising industry.

ICAS contributes to the consolidation of the existing advertising self-regulation organisations and facilitates the creation of new ones in emerging markets. It also constitutes a relevant platform to discuss and work in the development of solutions to face the challenges of advertising globally.

3. ADVERTISING SELF-REGULATION

3.4. COMPLIANCE

Compliance activity has gained importance over the past years in our country **and, nowadays, a significant number of companies have a team or a person in charge of regulatory compliance.**

The job of a dedicated person or team for regulatory compliance mainly focuses on assuring the fulfilment of the regulation that affects each sector, having also the goal of creating a company culture of compliance, social responsibility and good governance. Not only does this regulation include the legal one, but also the deontological regulation. That is the Codes of conduct to which each Company has adhered itself.

In this sense it **is essential that the dedicated person or team knows the advertising Codes of conduct to which their organisation is adhered, as well as the tools offered by the advertising self-regulation system**

– AUTOCONTROL – to verify its compliance and that

the compliance policy of the company - if it has one -, considers these particulars.

Without a doubt, an adequate integration of the advertising self-regulation aspects in the company's regulatory compliance will mean a more efficient management of those voluntary commitments.

AUTOCONTROL's publications (Digital Magazine, Digital Bulletin AUTOCONTROL @Informa and Newsletter) and its **courses and training seminars** can be useful to the regulatory compliance officers to know advertising self-regulation and keep up to date with the regulatory and self-regulatory news in the advertising field.

AUTOCONTROL collaborates with the **Spanish Compliance Association (ASCOM)**, to promote the knowledge and training about advertising regulation and self-regulation among professionals of the sector.

4. OUR SERVICES

4.1. PRIOR ADVERTISING ADVICE

COPY ADVICE®

Copy Advice® service, created in 2001, is a tool widely used in the Spanish advertising industry, which is very useful to ensure regulatory compliance and avoid possible infringements and reputational risks. Since the launch of the service, Legal Counsel of AUTOCONTROL has handled **almost 424,000 Copy Advice® requests**.

It is a **report prepared by the Legal Counsel of AUTOCONTROL, confidential, voluntary and non-binding** (unless provided otherwise in sectoral codes or agreements), on the legal and deontological compliance of advertisements or advertising projects, reviewed before their dissemination. It can be requested by the advertiser, its advertising or media agency or

the media that will disseminate the advertising campaign.

The speed of this service (the average period for issuing a **Copy Advice®** during last year was 3 working days), along with the wide experience in advertising self-regulation of the Legal Counsel of AUTOCONTROL, has permitted to manage these advice requests with great efficiency.

Moreover, in 2012 the **Copy Advice® Express** service was created, with an issue average of 1 working day. Nowadays, **Copy Advice®** is the most requested service. Advertisers, agencies and media submitted to AUTOCONTROL, during 2023, **33,620 ads for their revisión, before being issued**.

DEONTOLOGICAL REQUESTS

The Legal Counsel AUTOCONTROL also offers an **advice service to solve doubts, related to advertising regulation or self-regulation, or about their interpretation, from advertisers, agencias, media and sectorial associations**. It does not include the assessment of specific advertising campaigns provided through the **Copy Advice®** service.

In **2022**, the Legal Counsel of AUTOCONTROL has processed **5,120 deontological advice requests**. Since it was launched, this service has managed around **95,000 consultations**.

WEB ADVICE®

It is a **detailed analysis** of the legal and deontological correction of the **advertising content included in the analysed website**. Cookies policies review is excluded, since it is analysed through the **Cookie Advice®** service.

As a complement of the legal report of advertising contents of a website, we offer a data protection regulation compliance report of a website, consisting on **the review of the data protection clauses of the website**.

4. OUR SERVICES

4.2. DATA PROTECTION & PRIVACY ADVICE

The growth in digital activity is also reflected in the increasing number of inquiries and requests for reports related to data protection and privacy linked to advertising activity. **Since the launch of the different services in this area, which includes general inquiries and Cookie Advice®, Data Advice® and Web Advice® reports, AUTOCONTROL has dealt with more than 2,000 requests.**

COOKIE ADVICE®

Cookie Advice® service helps companies with the compliance of the current regulation on privacy and cookies, and, specifically, comply with the obligations about information and consent collection (**article 22.2 of the Spanish Law on Information Society and Electronic Commerce Services**). This service includes a review of the situation of own and third-party cookies that are installed through a specific website, platform or computing application; as well as the review of the terms of third-party contracts, if any, in terms of the compliance with the information and informed consent collection duties. After this review, the applicant will

receive a report with the conclusions of the verification process and, in case it is needed, the recommendation for modifications that should be done by the editor.

As the Spanish Data Protection Agency (AEPD) states in the '[Guide on the use of cookies](#)', **it is advisable to carry out a periodical, technical and legal review** of the cookies, and, in all cases, when there are significant modifications in the website, platform of computing application with regards to the cookies that are installed from them or to the policy of information or informed consent about such cookies.

DATA ADVICE®

The **Data Advice®** service, launched in 2018, includes the following specialised legal advice tools for the compliance of the data protection regulation, particularly, for the compliance and adaptation to the General Data Protection Regulation (GDPR):

- **Adaptation of information and consent clauses:** Legal counsel service focused on the analysis and adaptation to information and consent clauses, checking if consents previously collected are valid according to the new GDPR and, otherwise, if data processing can be protected under a different legal basis (e.g. legitimate interest).
- **Impact assessment support:** Advice on if it's required to carry out an impact assessment and, in this case, legal advice in the assessment procedure.
- **Rights attention and management:** Advice on data protection rights attention and management, including the review of the company's internal procedures.
- **Mediation** service for complaints on data protection rights exercise.
- **Advice on other data protection issues** (data processing activities register, contracts with data processing managers, security violation notification, etc.), excluding impact assessment, the acceptance of the DPO role and the technical analysis (no legal).
- **Training programmes** about privacy and data protection. Almost 1.100 professionals attended to the training and information activities on data protection organised by AUTOCONTROL in 2023.

4. OUR SERVICES

4.3. COMPLAINTS MANAGEMENT

ADVERTISING COMPLAINTS

The Advertising Jury is an **independent out-of-court body** in charge of solving disputes and complaints on advertising. It has become the preferential mechanism for advertising complaints resolutions in our country. On November 19th, **the Jury has obtained public recognition** as an **Alternative Dispute Resolution (ADR) body**. With this recognition, the AUTOCONTROL's Jury became the first private entity accredited in Spain by the Directorate-General for Consumers Affairs, of the Ministry of Health, Consumers Affairs and Social Affairs, and it becomes part of the [unified list of accredited entities of the European Commission](#), and the [online dispute resolution platform established by the European Union](#).

Since its creation till 1st January 2024, it has managed almost **5,300 cases** in an average period of 14 days in first instance.

The Advertising Jury is fully composed of prestigious professionals in the areas of Law, Commercial Communication and Economy, and it develops its activity guided by the principles of independence and transparency. In order to ensure their impartiality, the Jury and its members are independent from the Association and from the entities adhered to it. **The Spanish Agency for Food Safety and Nutrition (AESAN), is involved in the selection of 25% of its members.**

It resolves the complaints against ads issued by any media in Spain by applying the Code of Advertising Practice. Complaints may be filled by any person with a legitimate interest in claiming against a particular advertisement, regardless of whether or not they are part of the Association. The system is free for consumers, consumer associations and the Public Administration. **All the Advertising Jury's decisions are published.**

The Advertising Jury's decisions are compulsory for AUTOCONTROL's members or other companies subjected to the system according to the application agreements of the sectoral Codes of Conduct, and voluntary for the rest. In this case, in spite of the voluntary nature of the system, the moral strength which accompanies the Jury's decisions is undeniable, even between non member companies. The technical knowledge and impartiality demonstrated by the Jury's

decisions have generated a high level of credibility and confidence amongst the advertising industry, the Government and society in general. A good example is that, to date, in less than 5% of the disputes resolved by the Jury, the claimed company has not carried out the decision of the Jury. In cases in which the parties started a new proceeding in the Courts of Justice after AUTOCONTROL's Jury made a decision, the judicial pronouncements have mostly agreed with the content of the settlement previously passed by the Jury.

AUTOCONTROL's Advertising Jury has adjudicated in 255 cases in 2023. Around 58 of these cases were solved through mediation or acceptance of the dispute, resulting the ceasing or changing of the ad. Regarding the cases managed by the Advertising Jury, 29 were upheld, 6 were partially estimated, and 59 were not upheld.

For some years, the number of complaints received annually by AUTOCONTROL has stabilized, thanks to the preventive work developed by the Association, and the responsible use by companies of the prior advice services, both offered by AUTOCONTROL.

4. OUR SERVICES

4.3. COMPLAINTS MANAGEMENT

CROSS-BORDER COMPLAINTS (EASA)

The advertising cross-border complaints system managed by the European Advertising Standards Alliance (EASA), and in which AUTOCONTROL participates, **allows any consumer of the European Union to submit a complaint to the competent foreign advertising self-regulation body**, through the equivalent organism of its own country.

AUTOCONTROL handles the complaints of Spanish consumers against the ads originating in media or from advertisers based in other country of the of the complaint, transferring them to the advertising self-regulation organisation.

BEHAVIOURAL ADVERTISING COMPLAINTS (EDAA)

The [European Interactive Digital Advertising Alliance](#) (EDAA) is an organisation managed by the main European associations of the advertising and digital sector. Its main role is the management of an interactive European identifying icon of Behavioural Advertising (OBA) on websites.

The companies that take part in this initiative show such icon in all of their Internet adverts, and through it, users will be directed to the [“Your Online Choices”](#) site, where they can get more information in their own language about behavioural advertising. This

site also offers an opt-out tool that allows the user to accept the terms or not.

The national advertising self-regulation organisations (AUTOCONTROL in Spain) are in charge of processing the complaints for non-compliance of the established standards in the IAB Framework about behavioural advertising or in the EASA Best Practice Recommendations about behavioural advertising, to ensure an efficient implementation of them.

SETTLEMENT OF COMPLAINTS RELATED TO THE ALLOCATION OF “.ES” DOMAINS

AUTOCONTROL is one of the entities authorized by Red.es (Organism designated by the Spanish Government for the management of online “.es” domains) for the **extrajudicial resolution of disputes in the designation of the “.es” domains**.

In order to do so, AUTOCONTROL has a list (shared with Red.es) of **well-reputed and prestigious experts** in Spanish law and out-of-court dispute resolution

matters, who shall resolve the specific disputes concerning the designation of “.es” domain names, between their owner and a third party. This is done in a reasoned manner and always respecting the rules of procedure established by Red.es.

In **2023, 2 controversies had to be solved** by AUTOCONTROL's Panel of Experts.

4. OUR SERVICES

4.3. COMPLAINTS MANAGEMENT

TELECOMMUNICATIONS DATA PROTECTION MEDIATION SERVICE

The **voluntary data protection mediation** is a service launched by AUTOCONTROL on **January 1st 2018**, and developed in collaboration with the **Spanish Data protection Agency (AEPD)** after signing, in September 2017, the **“Protocol for the private resolution of complaints related to the data protection in the field of the contract and advertising of telecommunication services”**. During 2023, more than 71 request have been received, reaching an agreement level of 67,6%. Moreover around 1,100 consultations have been handled.

It is a free service that AUTOCONTROL offers to consumers in order to solve complaints related to personal data protection, and submitted against adhered entities to the Protocol (**MÁSMOVIL Group, Orange, Telefónica and Vodafone**). Some of the reasons of the complaints that can be handled to this service include, among others: unwanted advertising reception, identity theft, data processing for invoice reception after requesting the cancellation of the service, and the products/service contracting or the carrying out of paperworks without the user's authorization.

AUTOCONTROL offers a quick resolution platform to solve those complaints that consumers consider that they have not been managed (or properly managed), and when facts have occurred within the 12 months before the date when the complaint has been submitted. **The resolution expected deadline is one month**. It can be expanded up to three months if parties agree.

This initiative works independently from the complaints that citizens can continue before the AEPD, if they consider that their rights have been violated.

4.4. TRAINING

COURSES AND SEMINARS

AUTOCONTROL **has been organising specialised courses and seminars on commercial communications regulation and self-regulation matters in Spain for more than 25 years**, having become a reference entity in this field.

Nowadays, AUTOCONTROL **has a complete educational and training offer intended to law and advertising professionals**, who need to update and deep their knowledge of advertising regulation, and to recent graduates who wish to acquire knowledge that will allow them to orientate their career towards this sector.

Our courses and seminars start from an **eminently practical focus and provided by experts of the academic world and professionals** of the business and Administration field, along with experts from the AUTOCONTROL team.

In 2019 has taken place **the first edition on the Higher Course on Advertising Law** to respond to the increasing demand from the Law and advertising professionals for a specialized training focused on the advertising industry.

4. OUR SERVICES

4.5. OTHERS

CONFIANZA ONLINE SEAL

Conianza Online is an **Association created under the shelter of the digital advertising and ecommerce self-regulation** in 2003, with AUTOCONTROL and Adigital as founding members. Its main objective is to **increase users' trust in the Internet**; for this purpose, the Conianza Online Trust Seal was created.

This [Seal](#) allows users to identify those companies that have decided to voluntarily acquire high levels of ethic compromise and responsibility, so they deserve a higher trust than those companies that don't have the Seal due to the fact that they aren't members of this Association.

The main objectives of the Association Conianza Online are: to increase consumers' trust in the use of the Internet and new digital media; to

offer a tool for public and private entities to show their ethic compromise with society and, thus, to earn consumers' trust in the new media; and provide consumers and online companies with an extrajudicial controversy resolution instrument that is fast, inexpensive and effective.

Since November 2015, the companies who have adhered to Conianza Online may use the "E-commerce Europe Trustmark".

On January 2019, **Conianza Online** obtained public recognition as an **Alternative Dispute Resolution (ADR) Body on the e-commerce field**.

4. OUR SERVICES

4.5. OTHERS

CSR CERTIFICATE

The advertising self-regulation is another **element of the Corporate Social Responsibility (CSR) programs**. According to advertising ethic and loyalty is encouraged to benefit consumers, it is contributing in the promotion of the social responsibility.

Currently, the rates that evaluate the Social Responsibility of companies take into account those activities that assume the **ethic commitments with the commercial activity, and also with communication and advertising**. There are several **reports and documents which confirm this**, such as the Guide for the Creation of

Memories of Sostenibility from the *Global Reporting Initiative*, which includes specific forecasts related to the participation in advertising self-regulation systems and the joining to the Codes of Conduct about this field. Particularly, the last version of this Guide, published in November 2013.

For that purpose, **AUTOCONTROL annually issues its members a CSR certificate, which allows them to highlight, in their annual CSR Report or Sustainability Report, participating in the Spanish system of self-regulation advertising of AUTOCONTROL. Some of the most important companies in our country, have already included it.**

ADVERTISING JURY DECISIONS DATABASE

It is an online documentation service that allows to access to the Advertising Jury decisions since its origin until today, as well as mediations and public deontological opinions.

Those decisions and deontological opinions collect the doctrine of the Advertising Jury related to the interpretation of the AUTOCONTROL' s Code of Advertising Practice, of other sectoral Codes of Conduct applied by AUTOCONTROL, and the legality

principles of the legal rules that apply to advertising products and services.

The consultation of this database is especially useful for professionals from legal and compliance departments, lawyers, consultants and professors (especially, of Law and Communication). Also for all those professionals that develop tasks related with marketing and advertising in advertisers, agencies and media.

MONITORING

Our **monitoring** service consists in the **review of commercial communications from a specific sector, disseminated in a determined period of time, and in specific media, to verify a series of indicators related to the effective compliance of the legal or deontological regulations applicable to that advertisement.**

It is a useful tool to verify the level of compliance with deontological commitments assumed by the industry.

In the last few years, AUTOCONTROL has carried out several European and national monitoring exercises related to the advertising in digital media from sectors like toys, online gaming, alcohol or food advertising aimed at children.

4. OUR SERVICES

4.5. OTHERS

PUBLICATIONS

DIGITAL MAGAZINE AUTOCONTROL

It is a [digital specialized publication](#) - a reference in the sector -, published on a monthly basis (except the bimonthly issue of July and August) and sent to our members and subscribers.

Through this magazine we **allow the monitoring of the processing and approval of legislative and deontological rules that affect advertising, jurisprudence and recent administrative decisions regarding commercial communications, the Advertising Jury decisions** and, in general, interesting news about advertising regulation and self-regulation, including the most relevant novelties on the activity of the Association in Spain and internationally, and our training offer.

It is relevant for managers and professionals of marketing, legal advice, compliance, etc., lawyers, professors and others.

DIGITAL BULLETIN AUTOCONTROL @INFORMA

[Digital publication](#), published on a monthly basis, and exclusively for AUTOCONTROL's members, through which we offer, the 15th of each month (except August) updated information about regulation, jurisprudence and administrative novelties.

It also includes a specific section about relevant industry's news - regulatory novelties in other countries, challenges and threats, etc. -, apart from a dedicated section about AUTOCONTROL's activity, self-regulation novelties, Advertising Jury's decisions, new members, relevant industry's news, etc.

NEWSLETTER AUTOCONTROL

[Free digital monthly publication](#) that allows to know and follow up the main novelties about advertising regulation and self-regulation, jurisprudence and administrative decisions, Advertising Jury's decisions, and another news of interest.

5. COLLABORATION WITH ADMINISTRATION

Since it was created in 1995, AUTOCONTROL has actively collaborated **with many national and autonomous administrations** with competency in the advertising activity control, **through the agreements signed with them.**

These bodies, according to what is established in many state and community rules, **recognise AUTOCONTROL's role as an advertising self-regulation organism and the utility of its tools of prior assessment and complaints resolutions, whose use is promoted and encouraged as a complement,** without affecting the administrative competencies of these bodies. Most of these agreements have Joint Committees, with parity representation, to facilitate the cooperation and coordination between parties, without affecting the competencies and responsibilities of the corresponding Administration.

At national level, AUTOCONTROL has signed collaboration agreements with the Ministry of Health; Ministry of Consumer; the Spanish Agency of Food Security and Nutrition (AESAN); General Secretariat for Consumption and Gaming; the National Commission of Markets and Competition (CNMC); the Secretary of State for Telecommunications and Digital Infrastructures (SETELECO), the Secretary of State for Digitalization and Artificial Intelligence (SEDIA); the Spanish Data Protection Agency (AEPD); the Directorate-General of Gambling Regulation; and Red.es.

AUTOCONTROL has also signed collaboration agreements with, among others, the following autonomous community bodies: Presidency of the Autonomous Community of Valencia, Madrid Health Council, the Economy and Finance Council of Madrid Regional Government, the Health Council of Castilla-La Mancha Regional Government. Finally, AUTOCONTROL has also signed an agreement with Madrid City Council.

Moreover AUTOCONTROL has been recognized by the Bank of Spain as an advertising self-regulation system according to its Circular 4/2020 on financial products and services advertising and the Circular 2/2020, of October 28, of the National Securities Market Commission, on advertising investment products and services.

Actually, AUTOCONTROL has 26 agreements, including:

1. Agreement with the **Ministry of Health, Consumer and Social Affairs** and the **Spanish Federation of Food and Beverage Industries (FIAB)** for the application of the PAOS self-regulation Code for food advertising aimed at children (June 2005). Modified in 2012 and in 2013.
2. Agreement with **Red.es**, public entity in charge of consolidating the development of the Information Society in Spain, appointing AUTOCONTROL as an "out-of-court body for the resolution of controversies" in the designation of ".es" domains (February 2006).
3. Agreement with the **Andalusian Audiovisual Council** (November 2006). Replaced by the agreement of July 2020 and renewed July 2023.
4. Agreement with the **Catalonian Audiovisual Council** (December 2006). Subsequently replaced by the Agreement of July 2011 and by the Agreement of July 12, 2024.
5. Collaboration Agreement with the **Spanish Agency of Food Safety and Nutrition (AESAN)** to foster advertising self-regulation (January 2008). Renewed March 2020 and extended May 2024.
6. Agreement with the **Ministry of Health, the Spanish Federation of Food and Beverage Industries (FIAB) and TV Broadcasters** for the application of the PAOS self-regulation Code for food advertising aimed at children by televisions (September 2009).
7. Agreement with the **General Direction for Regulation of Gambling (DGOJ)** belonging to the **Ministry of Finance, now to the Ministry of Consumer**, to co-regulate the advertising, sponsorship and promotion of gambling activities (November 2011). Renewed October 2020.
8. Agreement to establish a Code of Conduct on Commercial Communications of Gambling Activities, signed with the **General Direction for Regulation of Gambling (DGOJ)** belonging to the **Ministry of Finance** the former Audiovisual Authority in Spain (Telecommunications and Information Society State Department) – currently such authority is the **National Commission of Markets and Competition (CNMC) – and Gambling Operators** (June 2012).

5. COLLABORATION WITH ADMINISTRATION

9. Agreement with **Red.es**, public entity in charge of consolidating the development of the Information Society in Spain, to foster responsible digital advertising (August 2012).
10. Collaboration Agreement with the **Catalonian Agency of Consumer Affairs (ACC)** (October 2014). Extended May 2021.
11. Collaboration Agreement with the **Ministry of Health, Social Affairs and Equality, now Ministry of Health**, and the **National Health Self-Care Association (ANEFP)** on advertising of medicinal products for human use (December 2014). Extended March 2021.
12. Collaboration Agreement with the **DG of Consumer Affairs** of the Health Council of Castilla-La Mancha Regional Government for advertising activities (January 2016). Successively replaced by the Convention of November 2020 and by the Convention of 29 December 2023.
13. General Actuation Protocol signed with the **Spanish Data Protection Agency (AEPD)**, driving the "Protocol for the private resolution of claims related to the data protection in the field of the contact and advertising of telecommunication services" signed by AUTOCONTROL and the main telecommunication operators (September 2017).
14. Collaboration Agreement with the **Health, Security and Emergency Department of Madrid Regional Government** (September 2017). Extended October 2021.
15. Collaboration Agreement with the **Health Council (GD Consume) of the Regional Government of Andalusia**, on advertising activity control (October 2017). Expanded to health centers, establishments and services, in December 2018. Extended December 2022.
16. Agreement with **Kontsumobide** (Basque Institute of Consumption), on advertising activity control (February 2018). Extended September 2024.
17. Collaboration Agreement with the **Economy Employment and Competitiveness of Madrid Regional Government (GD of Consumer Affairs)** for advertising activities (April 2020). Extended September 2022.
18. General Protocol signed with the **Secretary of State for Telecommunications and Digital Infrastructures (SETELEC0)**, the **Secretary of State for Digitalization and Artificial Intelligence (SEDIA)**, the **Ministry of Consumer Affairs**, **AUTOCONTROL** and the **Spanish Association of Advertisers (aea)**, for the promotion of self-regulation on commercial communications in digital media (October 2020). Extended August 2024.
19. Collaboration Agreement with the **Ministry of Health of the Castilla la Mancha Community Board** on advertising activity (December 2020). Extended November 2024.
20. General Protocol signed with the **Ministry of Consumer Affairs**, the **Spanish Association of Toy Manufacturers** and **AUTOCONTROL**, for the self-regulation of children's toy advertising (April 2022).
21. General Collaboration Protocol to Fight Financial Fraud, signed within the framework of the Action Plan against Financial Fraud (PAFF) between the **Ministry of Economy and Digital Transformation (Treasury, DGS, SEDI)**, the **National Securities Market Commission**, the **Bank of Spain**, the **Secretary of State for Security**, the **State Attorney General's Office**, and the **entities** that can be consulted [here](#), including **AUTOCONTROL** (April 2022).
22. Agreement with the **Audiovisual Council of the Valencian Community**, on audiovisual advertising activity control (July 2022).
23. Agreement with the **Ministry of Health of the Community of Madrid**, regarding the control of advertising activity (pharmaceutical products, health products, health centers, services and establishments, cosmetics, food and alcoholic beverages) (November 2022). Extended in November 2024.
24. Agreement with the **Department of Health of the Generalitat of Catalonia**, regarding advertising activity (medicines, health products, cosmetics and products with an alleged health purpose) (December 2022).
25. Agreement with the **National Commission of Markets and Competition (CNMC)**, for the promotion of co-regulation on commercial communications in audiovisual communication services (new Agreement adapted to Law 13/2022, of 7 July, General Audiovisual Communication, and which replaces the various Agreements that have been signed with the audiovisual authority since 2003) (June 2023).
26. Agreement with the **General Directorate for Consumer Affairs, Ministry of Social Rights, Consumer Affairs and Agenda 2030** (new agreement replacing the successive agreements signed with the General Directorate for Consumer Affairs since 1999) (May 2024).

DIGITAL PACT:

In addition, AUTOCONTROL has been a member since its launch in January 2021 to the Digital Pact for the protection of people promoted by the Spanish Agency for Data Protection.

AUTOCONTROL is one of the 19 signatories of the Action Plan against Financial Fraud.

Follow these recommendations from the @CNMV and protect yourself. #StopFinancialFraud

6. CODES OF CONDUCT AND SECTORAL SELF-REGULATION

6.1. SECTORAL CODES OF CONDUCT

Since its creation, AUTOCONTROL has been actively working with other associations and organizations in the development of Sectoral Advertising Codes of Conduct that strengthen advertising self-discipline in several business sectors.

AUTOCONTROL has also become a reference for the implementation and monitoring of that sectoral codes.

Currently, apart from its [Code of Advertising Practice](#), AUTOCONTROL applies 20 sectorial codes as a result of the self-regulation agreements it has signed with different sectoral institutions:

Confianza Online

[Confianza Online Ethical Code](#) (Adigital and AUTOCONTROL). (2002). Modified in 2023.

Promotion of Prescription Medicines

[Code of Best Practices for the Pharmaceutical Industry](#) (Farmaindustria). (2002). Modified in 2021.

Advertising of Beer

[Self-regulation Advertising Code of Spanish Brewers](#) (Cerveceros de España). (2003). Modified in 2009.

Advertising of Spirits

[Self-regulation Advertising Code of Spirits Spain](#) (Espirituosos de España) (2003). Modified in 2023.

Advertising of Toys

[Self-regulation Advertising Code for Toys Advertising aimed at Children of the Spanish Toy Manufacturers Association \(AEFJ\)](#) (2003). Modified in 2012.

Food and Beverages Advertising for Children (PAOS Code)

[Co-regulation Code on advertising in food and beverages aimed at children, obesity prevention and health with the Spanish Federation of Food and Beverages Industries \(FIAB\)- Ministry of Health, Social Affairs and Equality](#) (2005). Modified in 2012.

Advertising of Videogames

[Guidelines on Best Practices in the Advertising in Interactive Software Products](#) of the former Spanish Association of Distributors and Entertainment Software Editors (AEDES), current Spanish Videogames Association (AEVI – Asociación Española de Videojuegos) (2005). Modified in 2018.

Advertising of Health Technology

[Code Ethics of the Health Technology Sector](#) of the Spanish Federation of Health Technology Companies (Fenin). (2006). Modified in 2022.

6. CODES OF CONDUCT AND SECTORAL SELF-REGULATION

6.1. SECTORIAL CODES OF CONDUCT (cont.)

Advertising of Enteral Nutrition Products

[Code of Ethics of the Spanish Association of Manufacturers and Distributors of Enteral Feeding Products](#) (AENE - Asociación Española de Fabricantes y Distribuidores de Productos de Nutrición Enteral) (2006). Modified in 2020.

Advertising on Medicines for the General Public

[Code of Ethics for the promotion and advertising of drugs authorized without medical prescription not financed by the National Health System and other products for health self-care](#) of the Association for Health Self-care (Anefp - Asociación para el Autocuidado de la Salud). (2007). Modified in 2020.

Advertising of Gambling Activities

[Code of Ethics on commercial communications of Gambling Activities](#). Agreement with DG of Gaming Regulation and former Audiovisual Authority in Spain (Telecommunications and Information Society State Department) – currently such Authority is the National Commission of Markets and Competition (CNMC) – (2012). Modified in 2019.

Advertising on Dietetic Products for Children

[Ethic Code for best commercial practices on advertising of dietetic products for children](#) of the Spanish National Association of Manufactures of Dietetic Products for Children (ANDI) (2012). Modified in 2014.

Perfumes and Cosmetics Advertising

[Selfregulation Code for a responsible communication of Perfumes and Cosmetics](#) (STANPA – Spanish Association of Perfumes and Cosmetics) (2015).

Cinema Advertising

[Code of Ethics of advertising in cinema by the major film advertising agencies](#) (Movierecord, Discine and 014 IN) (2016).

Advertising of Bottled Drinking Water

[Ethics Code of Good Practice of bottled drinking water sector in labelling and advertising](#) (ANEABE) (2016).

Code of Conduct for the interactions with the Health Community with the Spanish Association of Generic Medications

[Code of Conduct on Interactions with Health Community](#) (AESEG) (2018). Modified in 2022.

Wine Advertising

[Code of Wine Commercial Communications](#) (OIVE) (2018). Modified in 2021.

Advertising of Disposable wipes

[Code of Best practices for labelling of disposable wipes and wet toilette paper](#) (STANPA). (2019).

Influencers Advertising

[Code of Conduct on the use of influencers](#) in advertising of the Spanish Association of Advertisers (aea) and AUTOCONTROL (2020). Within the framework of the Protocol signed with the Ministry of Economic Affairs and Digital Transformation and the Ministry of Consumer Affairs (2020).

Data Processing in Advertising Activity

[Code of Conduct for Data Processing in Advertising Activity](#) (2020). Modified in 2023.

6. CODES OF CONDUCT AND SECTORAL SELF-REGULATION

6.2. DIGITAL ADVERTISING SELF-REGULATION

Our Association carries out a strong activity on digital media advertising, which is also applied to both the Code of Advertising Practice of AUTOCONTROL and other sectorial Codes we applied.

The increase of the advertising investment in digital media in the last years has brought an important increase of the use of the prior advice services AUTOCONTROL offers to the companies of the industry. **In 2023, 19,771 voluntary requests for Copy Advice® were received regarding electronic commercial communications.** These requests are mainly related to advertising content which will be included in websites, displays, mailings or social media. Moreover, digital media has become the most claimed media before the Advertising Jury.

Aware of the features and specific needs of the digital media, AUTOCONTROL has progressively turned on specific services focused on the advertising in this type of media. **Since 2013 the Data Protection and Digital Regulation has offered the Cookie Advice® service, related to the compliance of the regulation on privacy in websites.**

Digital advertising monitoring reports, complaints resolution on behavioural advertising within the framework of the *“Your online Choices”* platform, developed by the *European Interactive Digital Advertising Association (EDAA)*, or the settlement of claims related to the allocation of “.es” domains, are other activities which AUTOCONTROL has carried out related to digital advertising.

In 2023, 58,80% of the voluntary requests for Copy Advice® were related to electronic commercial communications.

More recently it was launched the **Web Advice®** service to advice about the deontological and legal adaptation of the advertising contents included in a website.

Finally, to complement this service offer, in **January 2018** AUTOCONTROL launched a new service named **Data Advice®**, which includes **different legal tools addressed to advice companies in the implementation and compliance on the new data protection regulations.** Also in January 2018, AUTOCONTROL, in collaboration with the **Spanish Data Protection Agency (AEPD)**, and with the participation of **MÁSMÓVIL Group, Orange, Telefónica and Vodafone, launched a new mediation service** to make the resolution of possible claims related to data protection easier, such as unwanted advertising, identity theft or the data processing for invoices reception after having requested the cancellation of the service. This mediation, managed by AUTOCONTROL as an independent third-party, provides an agile and free solution for the user, without needing to turn to a judicial or administrative procedure.

AUTOCONTROL continues actively participating in different activities related to digital advertising self-regulation in Spain and in European and international level.

6. CODES OF CONDUCT AND SECTORAL SELF-REGULATION

6.2. DIGITAL ADVERTISING SELF-REGULATION (cont.)

In Spain, apart from the agreement action Protocol signed in September 2017, which supports the development of the voluntary mediation system mentioned above, AUTOCONTROL has another **collaboration Agreement with the AEPD, and an agreement with Red.es**. It also keeps in regular contact with the **Information Society State Department and Digital Agenda (SESIAD)**. And when it's necessary, it coordinates its activity with the representative association of the industry. As a result of this collaboration, in 2013 AUTOCONTROL actively participated in the creation of the first Guide in Europe about the cookies use, together with the Spanish Data Protection Agency (AEPD) and Adigital, IAB Spain and the AEA.

At a communitary level, playing the role of Vicepresident of **EASA**, AUTOCONTROL actively participates in all the projects related to digital

advertising self-regulation carried about by this organization. It also partipates in the Board of Directors of **EDAA**, representing all the European advertising self-regulation organism.

Finally, AUTOCONTROL is President of **Confianza Online**, the Association it created in 2003 together with Adigital to increase the user's trust on digital media. **Through its Seal, companies which use it can show high levels of ethic commitment to users, moreover, a quick, affordable and efficient out-of-court complaints resolution system is provided.**

6. CODES OF CONDUCT AND SECTORAL SELF-REGULATION

6.3. TV ADVERTISING SELF-REGULATION

TV advertising self-regulation is one of the key areas for AUTOCONTROL. The self-regulation system in this field was launched in 2002 with the sign of an **agreement between the main national and regional TV operators**. According to it, a self-regulation system, managed by AUTOCONTROL, is established, by virtue of which adhered operators are able to request a report on the lawfulness and deontological correction of the advertising campaigns they are going to broadcast, when they have doubts about them.

This agreement where complemented with the signing, in 2003, of the collaboration agreement with what was the former audiovisual authority: the Telecommunications and Information Society State Department (SETSI). This last agreement has been replaced by the **Collaboration agreement for the development of the co-regulation about commercial communications on TV** signed in 2015 between AUTOCONTROL and the **National Commission of Markets and Competition (CNMC)**.

According to this, the CNMC recognises the usefulness of the self-regulatory procedure as a complementary mechanism for administrative and judicial procedures, and establishes a cooperation frame with AUTOCONTROL.

Both agreements set up their corresponding **Joint Committees** with AUTOCONTROL, which meet on a monthly basis. AUTOCONTROL plays the same role as the French and English self-regulation systems do with their corresponding audiovisual authorities, on one hand, and with the national TV operators, on the other.

In 2023, and in the context of the aforementioned Agreements, the Legal Counsel of AUTOCONTROL reviewed 8,196 TV ads before being broadcasted, and at the request of advertisers, agencies or media; 77,05% of them obtained a positive Copy Advice® result, in 26,67% changes were recommended, and 0,28% were negative.

In the field of television advertising, a special effort has been made with regards to the protection of minors. In particular, AUTOCONTROL revised in 2023, 1,408 advertising aimed at children, **about 90% of this type of advertising**. This activity is carried out in collaboration with the TV operators and the advertisers from the toy, videogame and food sectors, which has assumed, at the same time, self-regulation commitments on the advertising aimed at this public.

TV advertising self-regulation is complemented with the collaboration agreements signed in 2006 with the **Audiovisual Councils of Andalusia and Catalonia**, and, in 2016, with the **Presidency of the Autonomous Community of Valencia** in 2016, as autonomous audiovisual authorities.

In 2023, and in the context of the aforementioned Agreements, the Legal Counsel of AUTOCONTROL reviewed 8,196 TV ads before being broadcasted.

6. CODES OF CONDUCT AND SECTORAL SELF-REGULATION

6.4. FINANCIAL ADVERTISING SELF-REGULATION

In June 2010, the **Order EHA/1718/2010 of June 11th, on the regulation and control of the advertising of banking products and services**, was published. This Order introduced important developments in the regulation of advertising for those services, because through it the previous administrative control system of advertising and banking operations referring to cost or profitability for the customer, was eliminated. The Bank of Spain keeps its a posteriori control competence.

The Order includes two paragraphs in the foreword, in which one can find the large and increasing recognition of self-regulatory systems by the EU authorities and the national legislator. In addition, it indicates the desirability of encouraging voluntary adherence by the entities to the advertising self-regulatory bodies that comply with the requirements of the Commission Recommendation 98/257/EC of March 30th on the principles applicable to bodies responsible for the out-of-court dispute settlement about consumer affairs, to the extent that it will improve advertising quality of the banking services industry.

That Order has been subject to development through Circular 6/2010 of September 28th, from the Bank of Spain to credit and payment institutions, about advertising services and banking products. In this Circular, in addition to detailing the requirements that this kind of advertising has to comply with, the role of SROs in the control of bank advertising is specified and developed. On December 22nd, 2010, the Bank of Spain acknowledged that AUTOCONTROL attested compliance with all the aforementioned requirements.

So, credit institutions, through their adhesion to AUTOCONTROL and their systematic Copy Advice® requests to the Copy Advice® Team on the legality and ethical correctness of their draft campaigns before their release, would fulfil the obligation of internal control required by that Order.

On December 22nd, 2010, the Bank of Spain acknowledged that AUTOCONTROL attested compliance with all the aforementioned requirements.

Thus, in the first place, when a request for the cessation or rectification of advertising refers to an advertisement that has a positive Copy Advice® issued by AUTOCONTROL, and whereby that fact has been communicated to the Bank of Spain, the institution will have to refer to the corresponding self-regulation system body (AUTOCONTROL) within a minimum of three working days, before applying the aforementioned requirement. And secondly, in case of administrative action carried out under a disciplinary process, it will be understood that the entity acted in good faith if it had followed the above mentioned positive Copy Advice®.

Since it came into effect, the Legal Counsel of AUTOCONTROL has successfully processed more than 197,000 requests of Copy Advice® related to drafts of advertising campaigns from more than a hundred credit institutions who are members of AUTOCONTROL.

In addition, AUTOCONTROL has been recognized by the Bank of Spain as an advertising self-regulation system, for the purposes of the provisions of Circular 4/2020, of June 26, of the Bank of Spain, on advertising of banking products and services and in Circular 2/2020, of October 28, of the National Securities Market Commission, on advertising investment products and services.

6. CODES OF CONDUCT AND SECTORAL SELF-REGULATION

6.5. MEDICINES ADVERTISING SELF-REGULATION

In October 2014 the **Ministry of Health, Equality and Social Policy (MSSSI in Spanish)**, the **Health Self-Care Association (ANEFP)** and **AUTOCONTROL** signed an **agreement on advertising of medicinal products for human use aimed at the general public**, for the benefit of consumers, the own sector and the general market.

The agreement had the aim of improving the development of this kind of advertising, in order to benefit consumers, the industry and the market in general. Specifically, the agreement aims at establishing the most appropriate mechanisms in order to evaluate the advertising messages for the general public referred to medicines for human use. Thus, the objective is to ensure that such messages are produced with the needed accuracy, clarity and objectivity and that they comply with all the conditions imposed by the law in this matter.

As part of this agreement, ANEFP offers a prior medical advice service ("ANEFP Seal"). **On its behalf, AUTOCONTROL provides its Copy Advice® service** for the verification of the advertising regulation compliance **related to advertising of over-the-counter medicines**. Without affecting its competences, **the Directorate-General of the Basic Services Portfolio of the National Health and Pharmacy System will consider that the company acted in good faith if, having getting a positive Copy Advice® report, it would have adapted to it.**

AUTOCONTROL is also in charge of **solving**, through its Advertising Jury, and according to its

rules, of all the complaints related to this kind of advertising.

Moreover, since 2002 **AUTOCONTROL has applied the Code of Best Practices for the Pharmaceutical Industry**, as a result of its agreement with FARMAINDUSTRIA. This Code changed in 2016. And since 2007 we apply **the Code of Deontological Rules for the promotion and advertising of medicines addressed to the public and other products for the health self-care** from the Health Self-Care Association (ANEFP).

Finally in 2018, was signed the **Code of Conduct for the interactions with the Health Community** with the **Spanish Association of Generic Medications (AESEG)**.

6. CODES OF CONDUCT AND SECTORAL SELF-REGULATION

6.6. ADVERTISING AIMED AT CHILDREN SELF-REGULATION

A good example of the proper work of self-regulation in “cooperation with Public Authorities” can be found in the field of **food and beverages advertising aimed at childrens**.

In 2005 the **Ministry of Health** signed with the **Food and Drinks Industry Federation (FIAB)** and AUTOCONTROL and agreement on the **self-regulation of food and beverages advertising aimed at childrens**. The main objective of this agreement was the launch of the **Co-regulation Code of the Food Advertising Aimed at Childrens, Obesity Prevention and Health (FIAB’s PAOS Code)**, whose control was entrusted to AUTOCONTROL.

FIAB’s PAOS Code is one of the main points of the NAOS strategy headed by the **Spanish Agency of Food Security and Nutrition (AESAN)** within the food advertising policies. This Code, pioneer in Europe, has the goal of establishing a set of rules that serve as a guide for adhered companies in the development, execution and broadcast of ads aimed at children.

In 2011, NAOS strategy was consolidated and drive by the Law 17/2011 on Food Security and Nutrition. To secure the compliance of what was expected in this Law, in 2012 the **new (PAOS Code)** through the co-regulation agreement signed by what was the Spanish Agency of Food Security and Nutrition (AESAN), FIAB, AUTOCONTROL, **ANGED**,

ASEDAS, ACES, FEHR y FEHCAREM (now Dining Brands).

The PAOS Code approved in 2012 expand the commitment of the sector, adding a rules set to guide the adhered companies in the development, execution and dissemination of their ads aimed to Internet users who are under the age of 15. This new PAOS Code also established a monitoring system for Internet advertising. AUTOCONTROL was appointed as the responsible of managing this monitoring, which has been carrying out since then (monitoring activities has been completed since 2013 until 2022).

Within the Agreement’s framework and since it came into effect, the Legal Counsel of AUTOCONTROL issued **more than 9,000 Copy Advice®** related to food and drink advertising projects aimed at minors prior to their broadcast, requested by companies adhered to PAOS. **547** of these requests were managed in **2023**. Regarding complaints, 34 cases have been presented before the Advertising Jury, in 2023 there was no case.

Otherwise, the PAOS Code has a **Joint Committee**, lead by **AESAN**. Apart from all the signers of the agreement, the Spanish audiovisual authority (now the CNMC), the Ministry of Agriculture and Environment, the Consumer and Users Counsel and the Spanish Advertisers Association (aea) are part of it. AUTOCONTROL plays the Secretary role of this Committee.

This Code, pioneered in Europe, has the goal of establishing a set of rules that serve as a guide for adhered companies in the development, execution and broadcast of ads aimed at children.

7. ANNEX I

BOARD OF DIRECTORS

Constituted on May 30, 2024, after the General Assembly meeting held on that date.

CUIDAMOS LOS ANUNCIOS PARA CUIDARTE A TI

Hace más de 25 años anunciantes, agencias y medios creamos AUTOCONTROL para cuidarte, haciendo que la publicidad que recibas sea leal, veraz, honesta y legal. Hoy contamos con más de 4.500 empresas vinculadas, hemos revisado más de 285.000 anuncios y hemos resuelto más de 9.500 reclamaciones sobre publicidad. AUTOCONTROL. 25 AÑOS TRABAJANDO POR UNA PUBLICIDAD RESPONSABLE.
