

FIND THE RIGHT FIT

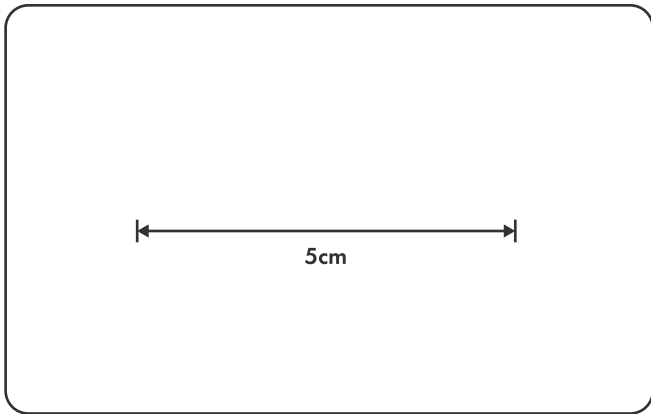

KIDS' SHOE SIZE GUIDE

To get accurate measurements, print at 100% scale or 'Actual Size'.

How it works?

Step 1: Is this page printed correctly?

Place a credit card in this space to see if it fits or measure with a ruler to ensure it is 5cm long.

Step 2. Measure length

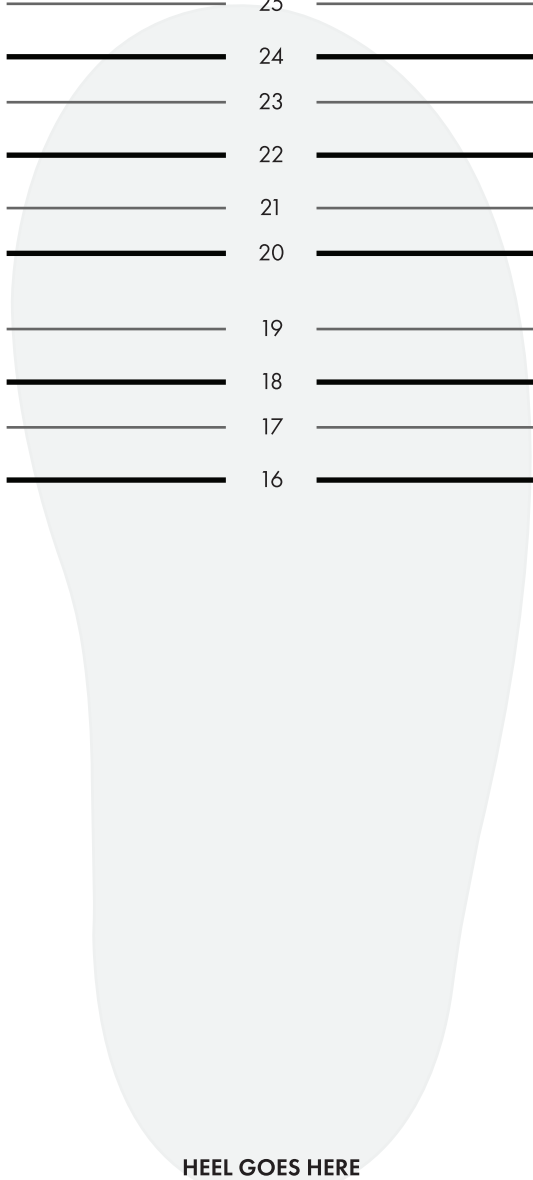

Place your child's feet on the ruler with the heel against the dotted line. Make a marking past the longest toe. Repeat for the other foot.

Step 3: Choose a shoe size

If the marking falls between two sizes, or if feet are two different sizes, choose the larger size.

You are all done! Now it's time to choose some fancy footwear for your little one.
