Production Ready for Backup Service

Organizations lack confidence that their data protection measures can mitigate the effects of cyber attacks. Data loss and systems downtime can have a significant financial impact, making it increasingly important for firms to leverage the expertise of IT services providers.

83% need external help to make sure they cover all the IT security and risk requirements[2]

69% are concerned they will experience a disruptive event such as data loss or systems downtime over the next year[3]

55% aren't very confident that their organization is meeting its backup and recovery service level objectives[1]

67% are concerned their organization's existing data protection measures may not be sufficient to cope with malware and ransomware threats[1]

$1.06m average cost of data loss in the last 12 months (in USD)[1]

64% need external technology-specific expertise to help their internal IT team be successful[2]

Capitalize on a complete portfolio of services to implement and expertly pair data protection solutions to your unique environment

With ProDeploy Infrastructure Suite and Production Ready for Backup, we can meet all your day one needs.

ProDeploy Infrastructure Suite
Dell ProDeploy experts are here to help, providing 24/7 deployment services that take you from planning through implementation and beyond.

Production Ready for Backup
Taking you a step beyond primary deployment, delivering advanced configuration that meets your specific business and regulatory requirements.

Production Ready for Backup Service

Get you into production fast
Experts configure new solutions quickly and effectively so you can get back to business.

Maximize data protection investments
Get more out of new technology with integrated solutions that meet essential business requirements.

Ensure data will be protected
Skilled experts perform advanced configuration to instill confidence that data will be protected.

Highly trained technical experts work with you to understand individual requirements and deliver purpose-driven functionality across the most common backup use cases.

✓ Protect data per industry regulations

✓ Prevent mission critical data loss

✓ Integrate with Disaster Recovery

✓ Centralize data backup

✓ Cost-effective large-scale data retention

This service covers the Dell data protection portfolio including:

Appliances - PowerProtect Data Manager, PowerProtect DP and PowerProtect DD*

Software: PowerProtect Data Manager, Avamar, Networker, vProtect and Data Domain Virtual Edition

*Production Ready service is only available for PowerProtect DD3300 series. PSX for Backup service is available for PowerProtect DD6400, DD6900, DD9400 and DD9900.
Note: Data protection technology must be fully deployed before Production Ready is applied.
