This erratum corrects Figure 4, which presents some mistakes. The authors have substituted the unadjusted OR of 11.16 (95% CI: 3.78-32.91) with 4.37 (95% CI: 1.77-10.80). The amended Figure 4 now has a pooled ratio of OR: 3.00 95% CI: 1.60, 5.64 $I^2=79%$ $p=0.006$ instead of OR: 3.61 95% CI: 1.70, 7.70 $I^2=85%$ $p=0.0009$ presented in the article.

The corrected version of Figure 4 is as follows:
