HYAS **INSIGHT**

INVESTIGATE, IDENTIFY, ATTRIBUTE
AND ALL KINDS OF OTHER STUFF TO RUIN A HACKER'S DAY

HYAS Insight provides threat and fraud response teams with never-before-seen visibility into everything you need to know about an attack. This includes the origin, current infrastructure being used, alerts when new relevant infrastructure is created, and any infrastructure likely to be used against you in the future. Top Fortune 500 companies rely on our exclusive data sources and nontraditional collection mechanism to power their security and fraud investigations.

USE CASES

With HYAS Insight, security and fraud analysts are able to accelerate and close investigations faster, with increased accuracy, often achieving full attribution and locating the sources of attacks.

⬈ Threat Intelligence

Our unique datasets and aggregation and correlation capabilities enable analysts to discover, investigate, identify, and when correlated with timestamps, attribute threats to specific locations.

⬈ Incident Response

HYAS Insight helps analysts make better decisions faster, dramatically accelerating investigations and saving valuable time and resources.

⬈ Advanced Attribution

HYAS enables threat and fraud teams to identify and locate the sources of attacks, often down to where the attack originated, with its precision geo-IP capability.

⬈ Integration and Data Enrichment

Via simple API and direct partner integrations, HYAS intelligence and data improves the efficacy and performance of your security stack, increasing the return on investment of your existing security investments.

99

The median number of days attackers reside within a victim's network before detection

BENEFITS

NONTRADITIONAL INVESTIGATION
THAT TAKES YOU CLOSER THAN YOU EVER THOUGHT YOU'D BE

⬈ SUCCESSFULLY CLOSE MORE CASES

The goal of any investigation is to get to conclusions and close cases. HYAS collects a variety of unique data elements that allow you to pivot from one data point to the next. By spider-webbing out, you can map an adversary's campaign infrastructure more effectively than ever before.

⬈ FOCUS RESOURCES TO STAY OUT AHEAD

HYAS allows you to set alerts and notifies you when a new domain is registered by nefarious characters you choose to research. This allows you to stay ahead of attackers and their associates as they build out new infrastructure.

⬈ SEE OVER THE SHOULDER OF YOUR ENEMY

Bad actors have to log in to accounts, run reports, and perform maintenance. And every time they do, HYAS gives you the opportunity to see where they are, what they're up to, and what their motivations may be so you can prioritize your precautionary measures.

⬈ ASSIST AUTHORITIES

HYAS provides investigators with the information they need to track down and observe where an attack originated and any additional locations being used to carry on an attack.

⬈ TRACK PROGRESS WITH BREADCRUMBS

As you pivot through Indicators of Compromise (IOCs), HYAS tracks each step for easy reference, visible reminders, and navigation. The trail can be saved for future reference and shared among teammates for easy collaboration.

HYAS INTELLIGENCE SERVICES

To complement HYAS Insight, our team at HYAS can engage as a force-multiplying extension of your team. When time and experience matter most, you can count on our experts to provide actionable intelligence and infrastructure attribution.

WE'RE NOT HERE TO PLAY CAT AND MOUSE
WE'RE OUT TO CHANGE THE GAME

HYAS is a valued partner and world-leading authority on cyber adversary infrastructure and communication to that infrastructure. We help businesses see more, do more, and understand more about the nature of the threats they face, or don't even realize they are facing, on a daily basis. Our vision is to be the leading provider of confidence and cybersecurity that today's businesses need to move forward in an ever-changing data environment.
