PROVISIONAL Türkiye After Action Implementation Roadmap
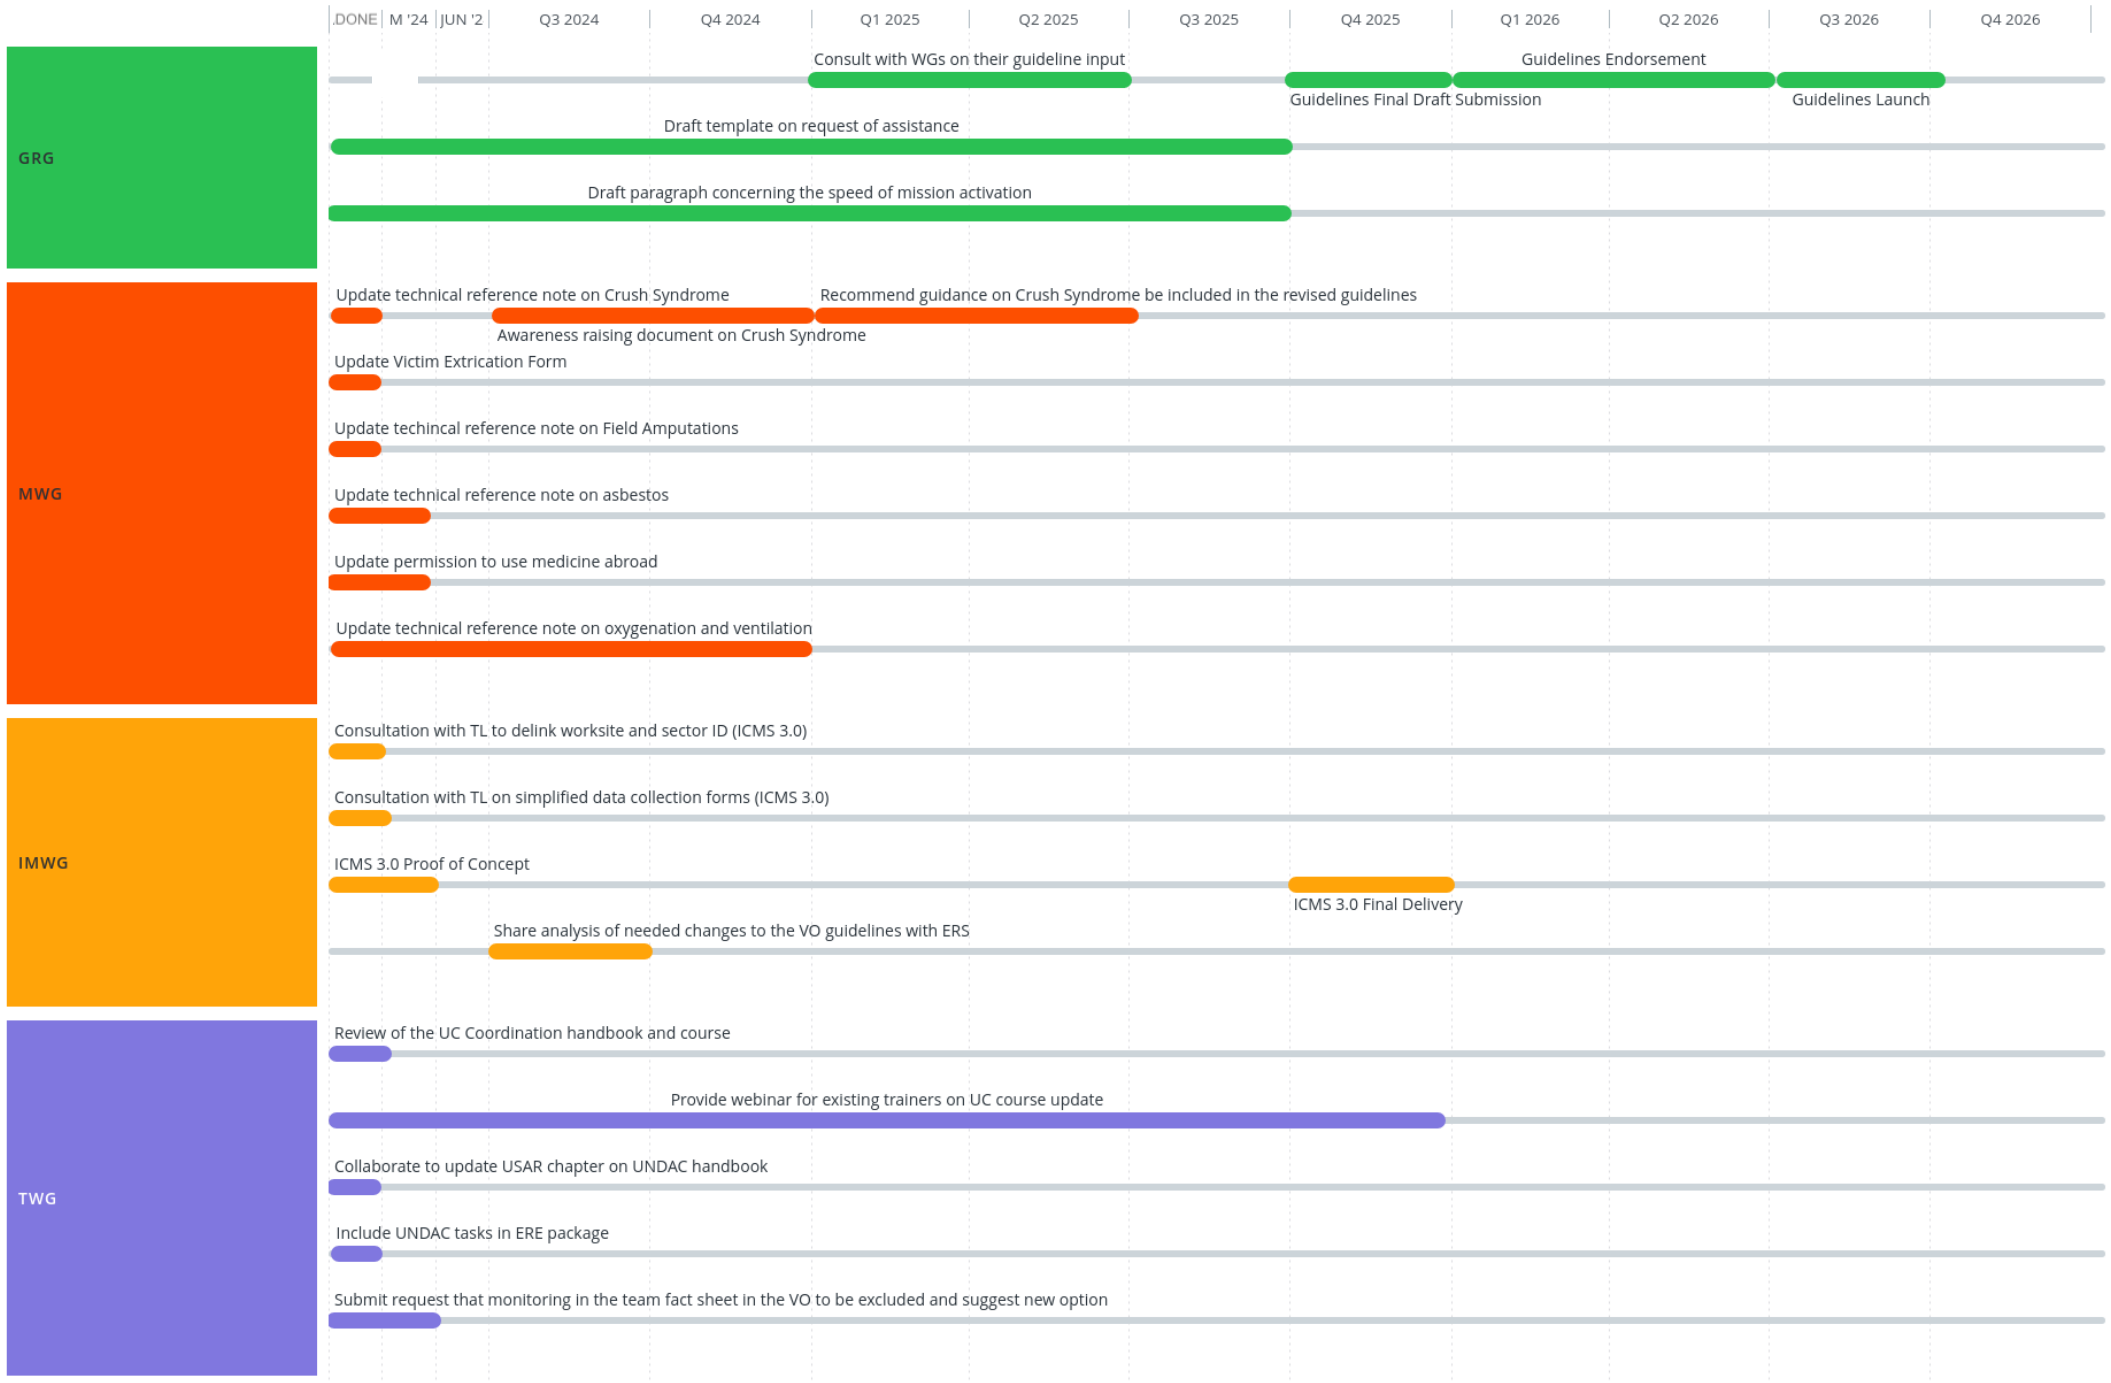

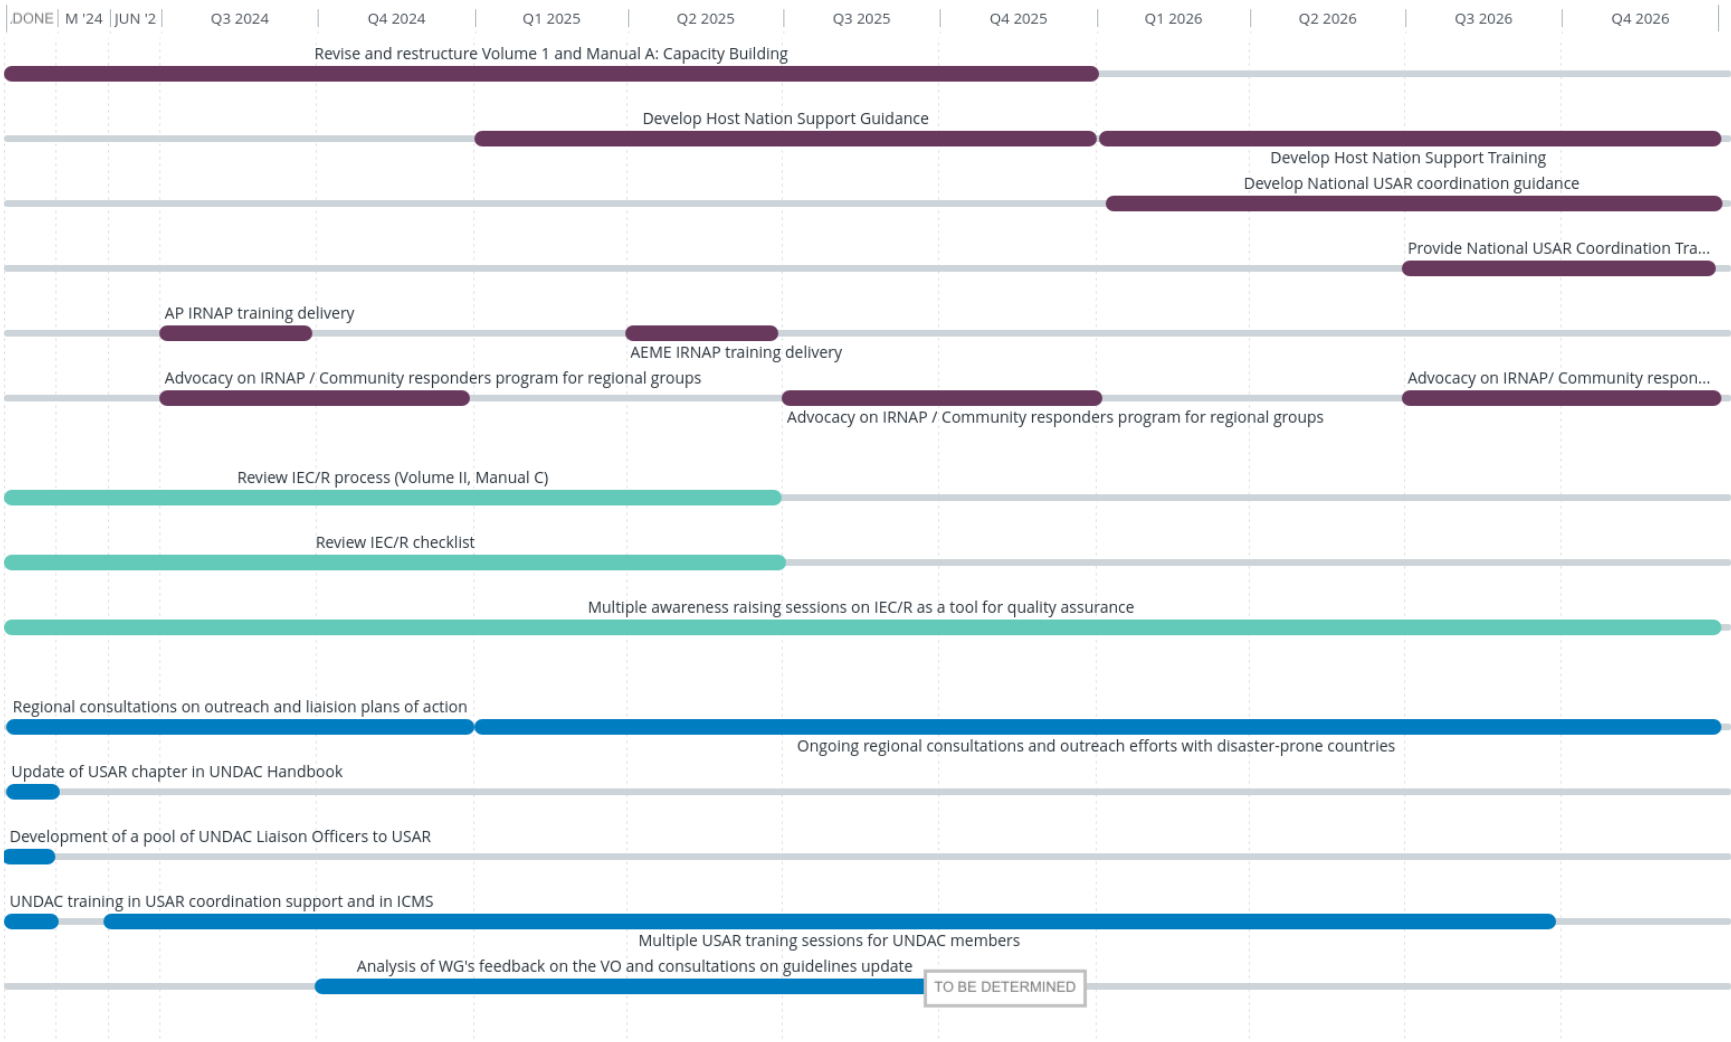

The INSARAG Network has invested significant effort to investigate and learn from the Türkiye deployments. Using the AAR technical report as a basis for discussion in Doha during the October 2023 meetings, as well as in Brazil in April 2024, the INSARAG working groups and secretariat have been discussing how to implement the AAR's recommendations.

On the next page, is a consolidated, provisional, roadmap documenting the projects each Working Group and the Secretariat will take forward as a result from the AAR, and by when they aim to conclude it.

If you identify any mistake in the graph below, or would like to share any relevant inputs in regards to this implementation plan, please contact: Carolina.futuro@un.org. A final report will be published by July 2024 in INSARAG.org.

GRG

Consult with WGs on their guideline input

Guidelines Endorsement

Guidelines Final Draft Submission

Guidelines Launch

Draft template on request of assistance

Draft paragraph concerning the speed of mission activation

MWG

Update technical reference note on Crush Syndrome

Recommend guidance on Crush Syndrome be included in the revised guidelines

Awareness raising document on Crush Syndrome
